impulse and your actions harmonize, so that under all these conditions you may be consistent with yourself.

15. If any of these three be defective, there is confusion in the rest also. For what benefit is there in having all things appraised, each in its proper relations, if you go to excess in your impulses? What benefit is there in having checked your impulses and in having your desires in your own control, if when you come to action you are unaware of the proper times and seasons, and if you do not know when, where, and how each action should be carried out? It is one thing to understand the merits and the values of facts, another thing to know the precise moment for action, and still another to curb impulses and to proceed, instead of rushing, toward what is to be done. Hence life is in harmony with itself only when action has not deserted impulse, and when impulse toward an object arises in each case from the worth of the object, being languid or more eager as the case may be, according as the objects which arouse it are worth seeking.

16. The natural side of philosophy is twofold: bodily and non-bodily. Each is divided into its own grades of importance, so to speak. The topic concerning bodies deals, first, with these two grades: the creative and the created; and the created things are the elements. Now this very topic of the elements, as some writers hold, is integral; as others hold, it is divided into matter, the cause which moves all things, and the elements.

17. It remains for me to divide rational philosophy into its parts. Now all speech is either continuous, or split up between questioner and answerer. It has been agreed upon that the former should be called rhetoric, and the latter dialectic. Rhetoric deals with words, and meanings, and arrangement. Dialectic is divided into two parts: words and their meanings, that is, into things which are said, and the words in which they are said. Then comes a subdivision of each – and it is of vast extent. Therefore I shall stop at this point, and

But treat the climax of the story;

for if I should take a fancy to give the subdivisions, my letter would become a debater's handbook!

18. I am not trying to discourage you, excellent Lucilius, from reading on this subject, provided only that you promptly relate to conduct all that you have read.

It is your conduct that you must hold in check; you must rouse what is languid in you, bind fast what has become relaxed, conquer what is obstinate, persecute your appetites, and the appetites of mankind, as much as you can; and to those who say: "How long will this unending talk go on?" answer with the words:

19. "I ought to be asking you 'How long will these unending sins of yours go on?" Do you really desire my remedies to stop before your vices? But I shall speak of my remedies all the more, and just because you offer objections I shall keep on talking. Medicine begins to do good at the time when a touch makes the diseased body tingle with pain. I shall utter words that will help men even against their will. At times you should allow words other than compliments to reach your ears, and because as individuals you are unwilling to hear the truth, hear it collectively.

20. How far will you extend the boundaries of your estates? An estate which held a nation is too narrow for a single lord. How far will you push forward your ploughed fields - you who are not content to confine the measure of your farms even within the amplitude of provinces? You have noble rivers flowing down through your private grounds; you have mighty streams - boundaries of mighty nations - under your dominion from source to outlet. This also is too little for you unless you also surround whole seas with your estates, unless your steward holds sway on the other side of the Adriatic, the Ionian, and the Aegean seas, unless the islands, homes of famous chieftains, are reckoned by you as the most paltry of possessions! Spread them as widely as you will, if only you may have as a "farm" what was once called a kingdom; make whatever you can your own, provided only that it is more than your neighbour's!

21. And now for a word with you, whose luxury spreads itself out as widely as the greed of those to whom I have just referred. To you I say: "Will this custom continue until there is no lake over which the pinnacles of your country-houses do not tower? Until there is no river whose banks are not bordered by your lordly structures? Wherever hot waters shall gush forth in rills, there you will be causing new resorts of luxury to rise. Wherever the shore shall bend into a bay, there will you straightway be laying foundations, and, not content with any land that has not been made by art, you will bring the sea within your boundaries. On every side let your housetops flash in the sun, now set on mountain peaks where they command an extensive outlook over sea and land, now lifted from the plain to the height of mountains; build your manifold structures, your huge piles, - you are nevertheless but individuals, and puny ones at that! What profit to you are your many bed-chambers? You sleep in one. No place is yours where you yourselves are not.'

22. "Next I pass to you, you whose bottomless and insatiable maw explores on the one hand the seas, on the other the earth, with enormous toil hunting down your prey, now

with hook, now with snare, now with nets of various kinds; no animal has peace except when you are cloyed with it. And how slight a portion of those banquets of yours, prepared for you by so many hands, do you taste with your pleasure-jaded palate! How slight a portion of all that game, whose taking was fraught with danger, does the master's sick and squeamish stomach relish? How slight a portion of all those shell-fish, imported from so far, slips down that insatiable gullet? Poor wretches, do you not know that your appetites are bigger than your bellies?"

23. Talk in this way to other men, – provided that while you talk you also listen; write in this way, – provided that while you write you read, remembering that everything you hear or read, is to be applied to conduct, and to the alleviation of passion's fury. Study, not in order to add anything to your knowledge, but to make your knowledge better. Farewell.

SENECA LETTER 90. On the Part Played by Philosophy in the Progress of Man

1. Who can doubt, my dear Lucilius, that life is the gift of the immortal gods, but that living well is the gift of philosophy? Hence the idea that our debt to philosophy is greater than our debt to the gods, in proportion as a good life is more of a benefit than mere life, would be regarded as correct, were not philosophy itself a boon which the gods have bestowed upon us. They have given the knowledge thereof to none, but the faculty of acquiring it they have given to all.

2. For if they had made philosophy also a general good, and if we were gifted with understanding at our birth, wisdom would have lost her best attribute – that she is not one of the gifts of fortune. For as it is, the precious and noble characteristic of wisdom is that she does not advance to meet us, that each man is indebted to himself for her, and that we do not seek her at the hands of others. What would there be in philosophy worthy of your respect, if she were a thing that came by bounty?

3. Her sole function is to discover the truth about things divine and things human. From her side religion never departs, nor duty, nor justice, nor any of the whole company of virtues which cling together in close-united fellowship. Philosophy has taught us to worship that which is divine, to love that which is human; she has told us that with the gods lies dominion, and among men, fellowship. This fellowship remained unspoiled for a long time, until avarice tore the community asunder and became the cause of poverty, even in the case of those whom she herself had most enriched. For men cease to possess all things the moment they desire all things for their own.

4. But the first men and those who sprang from them, still unspoiled, followed nature, having one man as both their leader and their law, entrusting themselves to the control of one better than themselves. For nature has the habit of subjecting the weaker to the stronger. Even among the dumb animals those which are either biggest or fiercest hold sway. It is no weakling bull that leads the herd; it is one that has beaten the other males by his might and his muscle. In the case of elephants, the tallest goes first; among men, the best is regarded as the highest. That is why it was to the mind that a ruler was assigned; and for that reason the greatest happiness rested with those peoples among whom a man could not be the more powerful unless he were the better. For that man can safely accomplish what he will who thinks he can do nothing except what he ought to do.

5. Accordingly, in that age which is maintained to be the golden age, Posidonius holds that the government was under the jurisdiction of the wise. They kept their hands under control, and protected the weaker from the stronger. They gave advice, both to do and not to do; they showed what was useful and what was useless. Their forethought provided that their subjects should lack nothing; their bravery warded off dangers; their kindness enriched and adorned their subjects. For them ruling was a service, not an exercise of royalty. No ruler tried his power; and no one had the inclination, or the excuse, to do wrong, since the ruler ruled well and the subject obeyed well, and the king could utter no greater threat against disobedient subjects than that they should depart from the kingdom.

6. But when once vice stole in and kingdoms were transformed into tyrannies, a need arose for laws; and these very laws were in turn framed by the wise. Solon, who established Athens upon a firm basis by just laws, was one of the seven men renowned for their wisdom. Had Lycurgus lived in the same period, an eighth would have been added to that hallowed number seven. The laws of Zaleucus and Charondas are praised; it was not in the forum or in the offices of skilled counsellors, but in the silent and holy retreat of Pythagoras, that these two men learned the principles of justice which they were to establish in Sicily (which at that time was prosperous) and throughout Grecian Italy.

7. Up to this point I agree with Posidonius; but that philosophy discovered the arts of which life makes use in its

daily round I refuse to admit, nor will I ascribe to it an artisan's glory. Posidonius says: "When men were scattered over the earth, protected by caves or by the dug-out shelter of a cliff or by the trunk of a hollow tree, it was philosophy that taught them to build houses." But I, for my part, do not hold that philosophy devised these shrewdly-contrived dwellings of ours which rise story upon story, where city crowds against city, any more than that she invented the fish-preserves, which are enclosed for the purpose of saving men's gluttony from having to run the risk of storms, and in order that, no matter how wildly the sea is raging, luxury may have its safe harbours in which to fatten fancy breeds of fish.

8. What! Was it philosophy that taught the use of keys and bolts? Nay, what was that except giving a hint to avarice? Was it philosophy that erected all these towering tenements, so dangerous to the persons who dwell in them? Was it not enough for man to provide himself a roof of any chance covering, and to contrive for himself some natural retreat without the help of art and without trouble? Believe me, that was a happy age, before the days of architects, before the days of builders!

9. All this sort of thing was born when luxury was being born, – this matter of cutting timbers square and cleaving a beam with unerring hand as the saw made its way over the marked-out line.

The primal man with wedges split his wood.

For they were not preparing a roof for a future banquetball; for no such use did they carry the pine-trees or the firs along the trembling streets with a long row of drays – merely to fasten thereon panelled ceilings heavy with gold.

10. Forked poles erected at either end propped up their houses. With close-packed branches and with leaves heaped up and laid sloping they contrived a drainage for even the heaviest rains. Beneath such dwellings, they lived, but they lived in peace. A thatched roof once covered free men; under marble and gold dwells slavery.

11. On another point also I differ from Posidonius, when he holds that mechanical tools were the invention of wise men. For on that basis one might maintain that those were wise who taught the arts

Of setting traps for game, and liming twigs

For birds, and girdling mighty woods with dogs.

It was man's ingenuity, not his wisdom, that discovered all these devices.

12. And I also differ from him when he says that wise men discovered our mines of iron and copper, "when the earth, scorched by forest fires, melted the veins of ore which lay near the surface and caused the metal to gush forth." Nay, the sort of men who discover such things are the sort of men who are busied with them.

13. Nor do I consider this question so subtle as Posidonius thinks, namely, whether the hammer or the tongs came first into use. They were both invented by some man whose mind was nimble and keen, but not great or exalted; and the same holds true of any other discovery which can only be made by means of a bent body and of a mind whose gaze is upon the ground.

The wise man was easy-going in his way of living. And why not? Even in our own times he would prefer to be as little cumbered as possible.

14. How, I ask, can you consistently admire both Diogenes and Daedalus? Which of these two seems to you a wise man – the one who devised the saw, or the one who, on seeing a boy drink water from the hollow of his hand, forthwith took his cup from his wallet and broke it, upbraiding himself with these words: "Fool that I am, to have been carrying superfluous baggage all this time!" and then curled himself up in his tub and lay down to sleep?

15. In these our own times, which man, pray, do you deem the wiser — the one who invents a process for spraying saffron perfumes to a tremendous height from hidden pipes, who fills or empties canals by a sudden rush of waters, who so cleverly constructs a dining-room with a ceiling of movable panels that it presents one pattern after another, the roof changing as often as the courses, — or the one who proves to others, as well as to himself, that nature has laid upon us no stern and difficult law when she tells us that we can live without the marble-cutter and the engineer, that we can have everything that is indispensable to our use, provided only that we are content with what the earth has placed on its surface? If mankind were willing to listen to this sage, they would know that the cook is as superfluous to them as the soldier.

16. Those were wise men, or at any rate like the wise, who found the care of the body a problem easy to solve. The things that are indispensable require no elaborate pains for their acquisition; it is only the luxuries that call for labour. Follow nature, and you will need no skilled craftsmen. Nature did not wish us to be harassed. For whatever she forced upon us, she equipped us. "But cold cannot be endured by the naked body." What then? Are there not the skins of wild beasts and other animals, which can protect us well enough, and more than enough, from the cold? Do not many tribes cover their bodies with the bark of trees? Are not the feathers of birds

sewn together to serve for clothing? Even at the present day does not a large portion of the Scythian tribe garb itself in the skins of foxes and mice, soft to the touch and impervious to the winds?

17. "For all that, men must have some thicker protection than the skin, in order to keep off the heat of the sun in summer." What then? Has not antiquity produced many retreats which, hollowed out either by the damage wrought by time or by any other occurrence you will, have opened into caverns? What then? Did not the very first-comers take twigs and weave them by hand into wicker mats, smear them with common mud, and then with stubble and other wild grasses construct a roof, and thus pass their winters secure, the rains carried off by means of the sloping gables? What then? Do not the peoples on the edge of the Syrtes dwell in dug-out houses – and indeed all the tribes who, because of the too fierce blaze of the sun, possess no protection sufficient to keep off the heat except the parched soil itself?

18. Nature was not so hostile to man that, when she gave all the other animals an easy rôle in life, she made it impossible for him alone to live without all these artifices. None of these was imposed upon us by her; none of them had to be painfully sought out that our lives might be prolonged. All things were ready for us at our birth; it is we that have made everything difficult for ourselves, through our disdain for what is easy. Houses, shelter, creature comforts, food, and all that has now become the source of vast trouble, were ready at hand, free to all, and obtainable for trifling pains. For the limit everywhere corresponded to the need; it is we that have made all those things valuable, we that have made them admired, we that have caused them to be sought for by extensive and manifold devices.

19 Nature suffices for what she demands Luxury has turned her back upon nature; each day she expands herself, in all the ages she has been gathering strength, and by her wit promoting the vices. At first, luxury began to lust for what nature regarded as superfluous, then for that which was contrary to nature; and finally she made the soul a bondsman to the body, and bade it be an utter slave to the body's lusts. All these crafts by which the city is patrolled - or shall I say kept in uproar - are but engaged in the body's business; time was when all things were offered to the body as to a slave, but now they are made ready for it as for a master. Accordingly, hence have come the workshops of the weavers and the carpenters; hence the savoury smells of the professional cooks; hence the wantonness of those who teach wanton postures, and wanton and affected singing. For that moderation which nature prescribes, which limits our desires by resources restricted to our needs, has abandoned the field; it has now come to this - that to want only what is enough is a sign both of boorishness and of utter destitution.

20. It is hard to believe, my dear Lucilius, how easily the charm of eloquence wins even great men away from the truth. Take, for example, Posidonius – who, in my estimation, is of the number of those who have contributed most to philosophy – when he wishes to describe the art of weaving. He tells how, first, some threads are twisted and some drawn out from the soft, loose mass of wool; next, how the upright warp keeps the threads stretched by means of hanging weights; then, how the inserted thread of the woof, which softens the hard texture of the web which holds it fast on either side, is forced by the batten to make a compact union with the warp. He maintains that even the waver's art was discovered by wise men, forgetting that the more complicated art which he describes was invented in later days – the art wherein

The web is bound to frame; asunder now

The reed doth part the warp. Between the threads

Is shot the woof by pointed shuttles borne;

The broad comb's well-notched teeth then drive it home. Suppose he had had the opportunity of seeing the weaving

of our own day, which produces the clothing that will conceal nothing, the clothing which affords – I will not say no protection to the body, but none even to modesty!

21. Posidonius then passes on to the farmer. With no less eloquence he describes the ground which is broken up and crossed again by the plough, so that the earth, thus loosened, may allow freer play to the roots; then the seed is sown, and the weeds plucked out by hand, lest any chance growth or wild plant spring up and spoil the crop. This trade also, he declares, is the creation of the wise, – just as if cultivators of the soil were not even at the present day discovering countless new methods of increasing the soil's fertility!

22. Furthermore, not confining his attention to these arts, he even degrades the wise man by sending him to the mill. For he tells us how the sage, by imitating the processes of nature, began to make bread. "The grain," he says, "once taken into the mouth, is crushed by the flinty teeth, which meet in hostile encounter, and whatever grain slips out the tongue turns back to the selfsame teeth. Then it is blended into a mass, that it may the more easily pass down the slippery throat. When this has reached the stomach, it is digested by the stomach's equable heat; then, and not till then, it is assimilated with the body.

23. Following this pattern," he goes on, "someone placed two rough stones, the one above the other, in imitation of the teeth, one set of which is stationary and awaits the motion of the other set. Then, by the rubbing of the one stone against the other, the grain is crushed and brought back again and again, until by frequent rubbing it is reduced to powder. Then this man sprinkled the meal with water, and by continued manipulation subdued the mass and moulded the loaf. This loaf was, at first, baked by hot ashes or by an earthen vessel glowing hot; later on ovens were gradually discovered and the other devices whose heat will render obedience to the sage's will." Posidonius came very near declaring that even the cobbler's trade was the discovery of the wise man.

24. Reason did indeed devise all these things, but it was not right reason. It was man, but not the wise man, that discovered them; just as they invented ships, in which we cross rivers and seas — ships fitted with sails for the purpose of catching the force of the winds, ships with rudders added at the stern in order to turn the vessel's course in one direction or another. The model followed was the fish, which steers itself by its tail, and by its slightest motion on this side or on that bends its swift course.

25. "But," says Posidonius, "the wise man did indeed discover all these things; they were, however, too petty for him to deal with himself and so he entrusted them to his meaner assistants." Not so; these early inventions were thought out by no other class of men than those who have them in charge to-day. We know that certain devices have come to light only within our own memory - such as the use of windows which admit the clear light through transparent tiles [Besides lapis specularis (window-glass) the Romans used alabaster, mica, and shells for this purpose.], and such as the vaulted baths, with pipes let into their walls for the purpose of diffusing the heat which maintains an even temperature in their lowest as well as in their highest spaces. Why need I mention the marble with which our temples and our private houses are resplendent? Or the rounded and polished masses of stone by means of which we erect colonnades and buildings roomy enough for nations? Or our signs for whole words, which enable us to take down a speech, however rapidly uttered, matching speed of tongue by speed of hand? All this sort of thing has been devised by the lowest grade of slaves.

26. Wisdom's seat is higher; she trains not the hands, but is mistress of our minds. Would you know what wisdom has brought forth to light, what she has accomplished? It is not the graceful poses of the body, or the varied notes produced by horn and flute, whereby the breath is received and, as it passes out or through, is transformed into voice. It is not wisdom that contrives arms, or walls, or instruments useful in war; nay, her voice is for peace, and she summons all mankind to concord.

27. It is not she, I maintain, who is the artisan of our indispensable implements of daily use. Why do you assign to her such petty things? You see in her the skilled artisan of life. The other arts, it is true, wisdom has under her control; for he whom life serves is also served by the things which equip life. But wisdom's course is toward the state of happiness; thither she guides us, thither she opens the way for us.

28. She shows us what things are evil and what things are seemingly evil; she strips our minds of vain illusion. She bestows upon us a greatness which is substantial, but she represses the greatness which is inflated, and showy but filled with emptiness; and she does not permit us to be ignorant of the difference between what is great and what is but swollen; nay, she delivers to us the knowledge of the whole of nature and of her own nature. She discloses to us what the gods are and of what sort they are; what are the nether gods, the household deities, and the protecting spirits; what are the souls which have been endowed with lasting life and have been admitted to the second class of divinities, where is their abode and what their activities, powers, and will. Such are wisdom's rites of initiation, by means of which is unlocked, not a village shrine, but the vast temple of all the gods - the universe itself, whose true apparitions and true aspects she offers to the gaze of our minds. For the vision of our eves is too dull for sights so great.

29. Then she goes back to the beginnings of things, to the eternal Reason which was imparted to the whole, and to the force which inheres in all the seeds of things, giving them the power to fashion each thing according to its kind. Then wisdom begins to inquire about the soul, whence it comes, where it dwells, how long it abides, into how many divisions it falls. Finally, she has turned her attention from the corporeal to the incorporeal, and has closely examined truth and the marks whereby truth is known, inquiring next how that which is equivocal can be distinguished from the truth, whether in life or in language; for in both are elements of the false mingled with the true.

30. It is my opinion that the wise man has not withdrawn himself, as Posidonius thinks, from those arts which we were discussing, but that he never took them up at all. [Seneca, himself one of the keenest scientific observers in history, is pushing his argument very far in this letter. His message is clear enough.] For he would have judged that nothing was worth discovering that he would not afterwards judge to be worth using always. He would not take up things which would have to be laid aside.

31. "But Anacharsis," says Posidonius, "invented the potter's wheel, whose whirling gives shape to vessels." Then because the potter's wheel is mentioned in Homer, people prefer to believe that Homer's verses are false rather than the story of Posidonius! But I maintain that Anacharsis was not the creator of this wheel; and even if he was, although he was a wise man when he invented it, yet he did not invent it qua "wise man" - just as there are a great many things which wise men do as men, not as wise men. Suppose, for example, that a wise man is exceedingly fleet of foot; he will outstrip all the runners in the race by virtue of being fleet, not by virtue of his wisdom. I should like to show Posidonius some glass-blower who by his breath moulds the glass into manifold shapes which could scarcely be fashioned by the most skilful hand. Nay, these discoveries have been made since we men have ceased to discover wisdom.

32. But Posidonius again remarks: "Democritus is said to have discovered the arch*, whose effect was that the curving line of stones, which gradually lean toward each other, is bound together by the keystone." [*Seneca (see next sentence) is right again. The arch was known in Chaldaea and in Egypt before 3000 B.C. Greek bee-hive tombs, Etruscan gateways, and early Roman remains, testify to its immemorial use.] I am inclined to pronounce this statement false. For there must have been, before Democritus, bridges and gateways in which the curvature did not begin until about the top.

33. It seems to have quite slipped your memory that this same Demorritus discovered how ivory could be softened, how, by boiling, a pebble could be transformed into an emerald*, — the same process used even to-day for colouring stones which are found to be amenable to this treatment! [*The ancients judged precious stones merely by their colour; their smaragdus included also malachite, jade, and several kinds of quartz. Exposure to heat alters the colour of some stones; and the alchemists believed that the "angelic stone" changed common flints into diamonds, rubies, emeralds, etc.] It may have been a wise man who discovered all such things, but he did not discover them by virtue of being a wise man; for he does many things which we see done just as well, or even more skilfully and dexterously, by men who are utterly lacking in sagacity.

34. Do you ask what, then, the wise man has found out and what he has brought to light? First of all there is truth, and nature; and nature he has not followed as the other animals do, with eyes too dull to perceive the divine in it. In the second place, there is the law of life, and life he has made to conform to universal principles; and he has taught us, not merely to know the gods, but to follow them, and to welcome the gifts of chance precisely as if they were divine commands. He has forbidden us to give heed to false opinions, and has weighed the value of each thing by a true standard of appraisement. He has condemned those pleasures with which remorse is intermingled, and has praised those goods which will always satisfy; and he has published the truth abroad that he is most happy who has no need of happiness, and that he is most powerful who has power over himself.

35. I am not speaking of that philosophy which has placed the citizen outside his country and the gods outside the universe, and which has bestowed virtue upon pleasure, but rather of that philosophy which counts nothing good except what is honourable, — one which cannot be cajoled by the gifts either of man or of fortune, one whose value is that it cannot be bought for any value. That this philosophy existed in such a rude age, when the arts and crafts were still unknown and when useful things could only be learned by use, — this I refuse to believe.

36. Next there came the fortune-favoured period when the bounties of nature lay open to all, for men's indiscriminate use, before avarice and luxury had broken the bonds which held mortals together, and they, abandoning their communal existence, had separated and turned to plunder. The men of the second age were not wise men, even though they did what wise men should do.

37. Indeed, there is no other condition of the human race that anyone would regard more highly; and if God should commission a man to fashion earthly creatures and to bestow institutions upon peoples, this man would approve of no other system than that which obtained among the men of that age, when

No ploughman tilled the soil, nor was it right

To portion off or bound one's property.

Men shared their gains, and earth more freely gave

Her riches to her sons who sought them not.

38. What race of men was ever more blest than that race? They enjoyed all nature in partnership. Nature sufficed for them, now the guardian, as before she was the parent, of all; and this her gift consisted of the assured possession by each man of the common resources. Why should I not even call that race the richest among mortals, since you could not find a poor person among them? But avarice broke in upon a condition so happily ordained, and, by its eagerness to lay something away and to turn it to its own private use, made all things the property of others, and reduced itself from boundless wealth to straitened need. It was avarice that introduced poverty and, by craving much, lost all.

39. And so, although she now tries to make good her loss, although she adds one estate to another, evicting a neighbour either by buying him out or by wronging him, although she extends her country-seats to the size of provinces and defines ownership as meaning extensive travel through one's own property, — in spite of all these efforts of hers, no enlargement of our boundaries will bring us back to the condition from which we have departed.

When there is no more that we can do, we shall possess much; but we once possessed the whole world!

40. The very soil was more productive when untilled, and yielded more than enough for peoples who refrained from despoiling one another. Whatever gift nature had produced, men found as much pleasure in revealing it to another as in having discovered it. It was possible for no man either to surpass another or to fall short of him; what there was, was divided among unquarrelling friends. Not yet had the stronger begun to lay hands upon the weaker; not yet had the miser, by hiding away what lay before him, begun to shut off his neighbour from even the necessities of life; each cared as much for his neighbour as for himself.

41. Armour lay unused, and the hand, unstained by human blood, had turned all its hatred against wild beasts. The men of that day, who had found in some dense grove protection against the sun, and security against the severity of winter or of rain in their mean hiding-places, spent their lives under the branches of the trees and passed tranquil nights without a sigh. Care vexes us in our purple, and routs us from our beds with the sharpest of goads; but how soft was the sleep the hard earth bestowed upon the men of that day!

42. No fretted and panelled ceilings hung over them, but as they lay beneath the open sky the stars glided quietly above them, and the firmament, night's noble pageant, marched swiftly by, conducting its mighty task in silence. For them by day, as well as by night, the visions of this most glorious abode were free and open. It was their joy to watch the constellations as they sank from mid-heaven, and others, again, as they rose from their hidden abodes.

43. What else but joy could it be to wander among the marvels which dotted the heavens far and wide? But you of the present day shudder at every sound your houses make, and as you sit among your freecose the slightest creak makes you shrink in terror. They had no houses as big as cities. The air, the breezes blowing free through the open spaces, the flitting shade of crag or tree, springs crystal-clear and streams not spoiled by man's work, whether by water-pipe or by any confinement of the channel, but running at will, and meadows beautiful without the use of art, – amid such scenes were their rude homes, adorned with rustic hand. Such a dwelling was in accordance with nature; therein it was a joy to live, fearing neither the dwelling itself nor for its safety. In these days, however, our houses constitute a large portion of our dread.

44. But no matter how excellent and guileless was the life of the men of that age, they were not wise men; for that title is reserved for the highest achievement. Still, I would not deny that they were men of lofty spirit and -I may use the phrase fresh from the gods. For there is no doubt that the world produced a better progeny before it was yet worn out. However, not all were endowed with mental faculties of highest perfection, though in all cases their native powers were more sturdy than ours and more fitted for toil. For nature does not bestow virtue; it is an art to become good.

45. They, at least, searched not in the lowest dregs of the earth for gold, nor yet for silver or transparent stones; and they still were merciful even to the dumb animals - so far removed was that epoch from the custom of slaying man by man, not in anger or through fear, but just to make a show! They had as yet no embroidered garments nor did they weave cloth of gold; gold was not yet even mined.

46. What, then, is the conclusion of the matter? It was by reason of their ignorance of things that the men of those days were innocent; and it makes a great deal of difference whether one wills not to sin or has not the knowledge to sin. Justice was unknown to them, unknown prudence, unknown also self-control and bravery; but their rude life possessed certain qualities akin to all these virtues. Virtue is not vouchsafed to a soul unless that soul has been trained and taught, and by unremitting practice brought to perfection. For the attainment of this boon, but not in the possession of it, were we born; and even in the best of men, before you refine them by instruction, there is but the stuff of virtue, not virtue itself. Farewell.

SENECA LETTER 91. On the Lesson to be Drawn from the Burning of Lyons

 Our friend Liberalis is now downcast; for he has just heard of the fire which has wiped out the colony of Lyons. Such a calamity might upset anyone at all, not to speak of a man who dearly loves his country. But this incident has served to make him inquire about the strength of his own character, which he has trained, I suppose, just to meet situations that he thought might cause him fear. I do not wonder, however, that he was free from apprehension touching an evil so unexpected and practically unheard of as this, since it is without precedent. For fire has damaged many a city, but has annihilated none. Even when fire has been hurled against the walls by the hand of a foe, the flame dies out in many places, and although continually renewed, rarely devours so wholly as to leave nothing for the sword. Even an earthquake has scarcely ever been so violent and destructive as to overthrow whole cities. Finally, no conflagration has ever before blazed forth so savagely in any town that nothing was left for a second.

2. So many beautiful buildings, any single one of which would make a single town famous, were wrecked in one night. In time of such deep peace an event has taken place worse than men can possibly fear even in time of war. Who can believe it? When weapons are everywhere at rest, and when peace prevails throughout the world, Lyons, the pride of Gaul, is missing!

Fortune has usually allowed all men, when she has assailed them collectively, to have a foreboding of that which they were destined to suffer. Every great creation has had granted to it a period of reprieve before its fall; but in this case, only a single night elapsed between the city at its greatest and the city non-existent. In short, it takes me longer to tell you it has perished than it took for the city to perish.

3. All this has affected our friend Liberalis, bending his will, which is usually so steadfast and erect in the face of his own trials. And not without reason has he been shaken; for it is the unexpected that puts the heaviest load upon us. Strangeness adds to the weight of calamities, and every mortal feels the greater pain as a result of that which also brings surprise.

4. Therefore, nothing ought to be unexpected by us. Our minds should be sent forward in advance to meet all problems, and we should consider, not what is wont to happen, but what can happen. For what is there in existence that Fortune, when she has so willed, does not drag down from the very height of its prosperity? And what is there that she does not the more violently assail the more brilliantly it shines? What is laborious or difficult for her?

5. She does not always attack in one way, or even with her full strength; at one time she summons our own hands against us; at another time, content with her own powers, she makes use of no agent in devising perils for us. No time is exempt; in the midst of our very pleasures there spring up causes of suffering. War arises in the midst of peace, and that which we depended upon for protection is transformed into a cause of fear; friend becomes enemy, ally becomes foeman. The summer calm is stirred into sudden storms, wilder than the storms of winter. With no foe in sight we are victims of such fates as foes inflict, and if other causes of disaster fail, excessive good fortune finds them for itself. The most temperate are assailed by illness, the strongest by wasting disease, the most innocent by chastisement, the most secluded by the noisy mob. Chance chooses some new weapon by which to bring her strength to bear against us, thinking we have forgotten her.

6. Whatever structure has been reared by a long sequence of years, at the cost of great toil and through the great kindness of the gods, is scattered and dispersed by a single day. Nay, he who has said "a day" has granted too long a postponement to swift-coming misfortune; an hour, an instant of time, suffices for the overthrow of empires! It would be some consolation for the feebleness of our selves and our works, if all things should perish as slowly as they come into being; but as it is, increases are of sluggish growth, but the way to ruin is rapid.

7. Nothing, whether public or private, is stable; the destinies of men, no less than those of cities, are in a whirl. Amid the greatest calm terror arises, and though no external agencies stir up commotion, yet evils burst forth from sources whence they were least expected. Thrones which have stood the shock of civil and foreign wars crash to the ground though no one sets them tottering. How few the states which have carried their good fortune through to the end! We should therefore reflect upon all contingencies, and should fortify our minds against the evils which may possibly come.

8. Éxile, the torture of disease, wars, shipwreck, – we must think on these. Chance may tear you from your country or your country from you, or may banish you to the desert; this very place, where throngs are stifling, may become a desert. Let us place before our eyes in its entirety the nature of man's lot, and if we would not be overwhelmed, or even dazed, by those unwonted evils, as if they were novel, let us summon to our minds beforehand, not as great an evil as oftentimes happens, but the very greatest evil that possibly can happen. We must reflect upon fortune fully and completely.

9. How often have cities in Asia, how often in Achaia, been laid low by a single shock of earthquake! How many towns in Syria, how many in Macedonia, have been swallowed up! How often has this kind of devastation laid Cyprus in ruins! How often has Paphos collapsed! Not infrequently are tidings brought to us of the utter destruction of entire cities; yet how

small a part of the world are we, to whom such tidings often come! Let us rise, therefore, to confront the operations of Fortune, and whatever happens, let us have the assurance that it is not so great as rumour advertises it to be.

10. A rich city has been laid in ashes, the jewel of the provinces, counted as one of them and yet not included with them; rich though it was, nevertheless it was set upon a single hill, and that not very large in extent. But of all those cities, of whose magnificence and grandeur you hear today, the very traces will be blotted out by time. Do you not see how, in Achaia, the foundations of the most famous cities have already crumbled to nothing, so that no trace is left to show that they ever even existed?

11. Not only does that which has been made with hands totter to the ground, not only is that which has been set in place by man's art and man's efforts overthrown by the passing days; nay, the peaks of mountains dissolve, whole tracts have settled, and places which once stood far from the sight of the sea are now covered by the waves. The mighty power of fires has eaten away the hills through whose sides they used to glow, and has levelled to the ground peaks which were once most lofty – the sailor's solace and his beacon. The works of nature herself are harassed; hence we ought to bear with untroubled minds the destruction of cities.

12. They stand but to fall! This doom awaits them, one and all; it may be that some internal force, and blasts of violence which are tremendous because their way is blocked, will throw off the weight which holds then down; or that a whirlpool of raging currents, mightier because they are hidden in the bosom of the earth, will break through that which resists its power; or that the vehemence of flames will burst asunder the framework of the earth's crust; or that time, from which nothing is safe, will reduce them little by little; or that a pestilential climate will drive their inhabitants away and the mould will corrode their deserted walls. It would be tedious to recount all the ways by which fate may come; but this one thing I know: all the works of mortal man have been doomed to mortality, and in the midst of things which have been destined to die, we live!

13. Hence it is thoughts like these, and of this kind, which I am offering as consolation to our friend Liberalis, who burns with a love for his country that is beyond belief. Perhaps its destruction has been brought about only that it may be raised up again to a better destiny. Oftentimes a reverse has but made room for more prosperous fortune. Many structures have fallen only to rise to a greater height. Timagenes*, who had a grudge against Rome and her prosperity, used to say that the only reason he was grieved when conflagrations occurred in Rome was his knowledge that better buildings would arise than those which had gone down in the flames. [' Probably the writer, and intimate friend of Augustus, who began life in Rome as a captive from Egypt. Falling into disfavour with the Emperor, he took refuge with the malcontent Asinius Pollio at Tusculum, and subsequently died in the East.1

14. And probably in this city of Lyons, too, all its citizens will earnestly strive that everything shall be rebuilt better in size and security than what they have lost. May it be built to endure and, under happier auspices, for a longer existence! This is indeed but the hundredth year since this colony was founded – not the limit even of a man's lifetime. Led forth by Plancus, the natural advantages of its site have caused it to was strong and reach the numbers which it contains to-day; and yet how many calamities of the greatest severity has it endured within the space of an old man's life!

15. Therefore let the mind be disciplined to understand and to endure its own lot, and let it have the knowledge that there is nothing which fortune does not dare – that she has the same jurisdiction over empires as over emperors, the same power over cities as over the citizens who dwell therein. We must not cry out at any of these calamities. Into such a world have we entered, and under such laws do we live. If you like it, obey; if not, depart whithersoever you wish. Cry out in anger if any unfair measures are taken with reference to you individually; but if this inevitable law is binding upon the highest and the lowest alike, be reconciled to fate, by which all things are dissolved.

16. You should not estimate our worth by our funeral mounds or by these monuments of unequal size which line the road; their ashes level all men! We are unequal at birth, but are equal in death. What I say about cities I say also about their inhabitants: Ardea was captured as well as Rome. The great founder of human law has not made distinctions between us on the basis of high lineage or of illustrious names, except while we live. When, however, we come to the end which awaits mortals, he says: "Depart, ambition! To all creatures that burden the earth let one and the same law apply!" For enduring all things, we are equal; no one is more frail than another, no one more certain of his own life on the morrow.

17. Alexander, king of Macedon, began to study geometry; unhappy man, because he would thereby learn how puny was that earth of which he had seized but a fraction! Unhappy man, I repeat, because he was bound to understand that he was bearing a false title. For who can be "great" in that which is puny? The lessons which were being taught him were intricate and could be learned only by assiduous application; they were not the kind to be comprehended by a madman, who let his thoughts range beyond the ocean. "Teach me something easy!" he cries; but his teacher answers: "These things are the same for all, as hard for one as for another."

18. Imagine that nature is saying to us: "Those things of which you complain are the same for all. I cannot give anything easier to any man, but whoever wishes will make things easier for himself." In what way? By equanimity. You must suffer pain, and thirst, and hunger, and old age too, if a longer stay among men shall be granted you; you must be sick, and you must suffer loss and death.

19. Nevertheless, you should not believe those whose noisy clamour surrounds you; none of these things is an evil, none is beyond your power to bear, or is burdensome. It is only by common opinion that there is anything formidable in them. Your fearing death is therefore like your fear of gossip. But what is more foolish than a man afraid of words? Our friend Demetrius is wont to put it cleverly when he says: "For me the talk of ignorant men is like the rumblings which issue from the belly. For," he adds, "what difference does it make to me whether such rumblings come from above or from below?"

20. What madness it is to be afraid of disrepute in the judgement of the disreputable! Just as you have had no cause for shrinking in terror from the talk of men, so you have no cause now to shrink from these things, which you would never fear had not their talk forced fear upon you. Does it do any harm to a good man to be besmirched by unjust gossip?

21. Then let not this sort of thing damage death, either, in our estimation; death also is in bad odour. But no one of those who malign death has made trial of it. Meanwhile it is foolhardy to condemn that of which you are ignorant. This one thing, however, you do know – that death is helpful to many, that it sets many free from tortures, want, ailments, sufferings, and weariness. We are in the power of nothing when once we have death in our own power! Farewell.

SENECA LETTER 92. On the Happy Life

1. You and I will agree, I think, that outward things are sought for the satisfaction of the body, that the body is cherished out of regard for the soul, and that in the soul there are certain parts which minister to us, enabling us to move and to sustain life, bestowed upon us just for the sake of the primary part of us. In this primary part there is something irrational, and something rational. The former obeys the latter, while the latter is the only thing that is not referred back to another, but rather refers all things to itself. For the divine reason also is set in supreme command over all things, and is itself subject to none; and even this reason which we possess is the same, because it is derived from the divine reason.

2. Now if we are agreed on this point, it is natural that we shall be agreed on the following also – namely, that the happy life depends upon this and this alone: our attainment of perfect reason. For it is naught but this that keeps the soul from being bowed down, that stands its ground against Fortune; whatever the condition of their affairs may be, it keeps men untroubled. And that alone is a good which is never subject to impairment. That man, I declare, is happy whom nothing makes less strong than he is; he keeps to the heights, leaning upon none but himself; for one who sustains himself by any prop may fall. If the case is otherwise, then things which do not pertain to us will begin to have great influence over us. But who desires Fortune to have the upper hand, or what sensible man prides himself upon that which is not his own?

3. What is the happy life? It is peace of mind, and lasting tranquillity. This will be yours if you possess greatness of soul; it will be yours if you possess the steadfastness that resolutely clings to a good judgement just reached. How does a man reach this condition? By gaining a complete view of truth, by maintaining, in all that he does, order, measure, fitness, and a will that is inoffensive and kindly, that is intent upon reason and never departs therefrom, that commands at the same time love and admiration. In short, to give you the principle in brief compass, the wise man's soul ought to be such as would be proper for a god.

4. What more can one desire who possesses all honourable things? For if dishonourable things can contribute to the best estate, then there will be the possibility of a happy life under conditions which do not include an honourable life. And what is more base or foolish than to connect the good of a rational soul with things irrational?

5. Yet there are certain philosophers who hold that the Supreme Good admits of increase because it is hardly complete when the gifts of fortune are adverse. Even Antipater, one of the great leaders of this school, admits that he ascribes some influence to externals, though only a very slight influence. You see, however, what absurdity lies in not being content with the daylight unless it is increased by a tiny fire. What importance can a spark have in the midst of this clear sunlight? 6. If you are not contented with only that which is honourable, it must follow that you desire in addition either the kind of quiet which the Greeks call "undisturbedness," or else pleasure. But the former may be attained in any case. For the mind is free from disturbance when it is fully free to contemplate the universe, and nothing distracts it from the contemplation of nature. The second, pleasure, is simply the good of cattle. We are but adding the irrational to the rational, the dishonourable to the honourable. A pleasant physical sensation affects this life of ours;

7. why, therefore, do you hesitate to say that all is well with a man just because all is well with his appetite? And do you rate, I will not say among heroes, but among men, the person whose Supreme Good is a matter of flavours and colours and sounds? Nay, let him withdraw from the ranks of this, the noblest class of living beings, second only to the gods; let him herd with the dumb brutes – an animal whose delight is in fodder!

8. The irrational part of the soul is twofold: the one part is spirited, ambitious, uncontrolled; its seat is in the passions; the other is lowly, sluggish, and devoted to pleasure. Philosophers have neglected the former, which, though unbridled, is yet better, and is certainly more courageous and more worthy of a man, and have regarded the latter, which is nerveless and ignoble, as indispensable to the happy life.

9. They have ordered reason to serve this latter; they have made the Supreme Good of the noblest living being an abject and mean affair, and a monstrous hybrid, too, composed of various members which harmonize but ill. For as our Vergil, describing Scylla, says

Above, a human face and maiden's breast, – A beauteous breast, – below, a monster huge Of bulk and shapeless, with a dolphin's tail

Joined to a wolf-like belly.

And yet to this Scylla are tacked on the forms of wild animals, dreadful and swift; but from what monstrous shapes have these wiseacres compounded wisdom!

10. Man's primary art is virtue itself; there is joined to this the useless and fleeting flesh, fitted only for the reception of food, as Posidonius remarks. This divine virtue ends in foulness, and to the higher parts, which are worshipful and heavenly, there is fastened a sluggish and flabby animal. As for the second desideratum, – quiet, – although it would indeed not of itself be of any benefit to the soul, yet it would relieve the soul of hindrances; pleasure, on the contrary, actually destroys the soul and softens all its vigour. What elements so inharmonious as these can be found united? To that which is most vigorous is joined that which is most sluggish, to that which is most holy that which is unrestrained even to the point of impurity.

11. "What, then," comes the retort, "if good health, rest, and freedom from pain are not likely to hinder virtue, shall you not seek all these?" Of course I shall seek them, but not because they are goods, - I shall seek them because they are according to nature and because they will be acquired through the exercise of good judgement on my part. What, then, will be good in them? This alone, - that it is a good thing to choose them. For when I don suitable attire, or walk as I should, or dine as I ought to dine, it is not my dinner, or my walk, or my dress that are goods, but the deliberate choice which I show in regard to them, as I observe, in each thing I do, a mean that conforms with reason.

12. Let me also add that the choice of neat clothing is a fitting object of a man's efforts; for man is by nature a neat and well-groomed animal. Hence the choice of neat attire, and not neat attire in itself, is a good; since the good is not in the thing selected, but in the quality of the selection. Our actions are honourable, but not the actual things which we do.

13. And you may assume that what I have said about dress applies also to the body. For nature has surrounded our soul with the body as with a sort of garment; the body is its cloak. But who has ever reckoned the value of clothes by the wardrobe which contained them? The scabbard does not make the sword good or bad. Therefore, with regard to the body I shall return the same answer to you, - that, if I have the choice, I shall choose health and strength, but that the good involved will be my judgement regarding these things, and not the things themselves.
14. Another retort is: "Granted that the wise man is happy;

14. Another retort is: "Granted that the wise man is happy; nevertheless, he does not attain the Supreme Good which we have defined, unless the means also which nature provides for its attainment are at his call. So, while one who possesses virtue cannot be unhappy, yet one cannot be perfectly happy if one lacks such natural gifts as health, or soundness of limb."

15. But in saying this, you grant the alternative which seems the more difficult to believe, - that the man who is in the midst of unremitting and extreme pain is not wretched, nay, is even happy; and you deny that which is much less serious, - that he is completely happy. And yet, if virtue can keep a man from being wretched, it will be an easier task for it to render him completely happy. For the difference between happiness and complete happiness is less than that between wretchedness and happiness. Can it be possible that a thing

which is so powerful as to snatch a man from disaster, and place him among the happy, cannot also accomplish what remains, and render him supremely happy? Does its strength fail at the very top of the climb?

16. There are in life things which are advantageous and disadvantageous, — both beyond our control. If a good man, in spite of being weighed down by all kinds of disadvantages, is not wretched, how is he not supremely happy, no matter if he does lack certain advantages? For as he is not weighted down to wretchedness by his burden of disadvantages, so he is not withdrawn from supreme happiness through lack of any advantages; nay, he is just as supremely happy without the advantages as he is free from wretchedness through under the load of his disadvantages. Otherwise, if his good can be impaired, it can be snatched from him altogether.

17. A short space above, I remarked that a tiny fire does not add to the sun's light. For by reason of the sun's brightness any light that shines apart from the sunlight is blotted out. "But," one may say, "there are certain objects that stand in the way even of the sunlight." The sun, however, is unimpaired even in the midst of obstacles, and, though an object may intervene and cut off our view thereof, the sun sticks to his work and goes on his course. Whenever he shines forth from amid the clouds, he is no smaller, nor less punctual either, than when he is free from clouds; since it makes a great deal of difference whether there is merely something in the way of his light or something which interferes with his shining.

18. Similarly, obstacles take nothing away from virtue; it is no smaller, but merely shines with less brilliancy. In our eyes, it may perhaps be less visible and less luminous than before; but as regards itself it is the same and, like the sun when he is eclipsed, is still, though in secret, putting forth its strength. Disasters, therefore, and losses, and wrongs, have only the same power over virtue that a cloud has over the sun.

19. We meet with one person who maintains that a wise man who has met with bodily misfortune is neither wretched nor happy. But he also is in error, for he is putting the results of chance upon a parity with the virtues, and is attributing only the same influence to things that are honourable as to things that are devoid of honour. But what is more detestable and more unworthy than to put contemptible things in the same class with things worthy of reverence! For reverence is due to justice, duty, loyalty, bravery, and prudence; on the contrary, those attributes are worthless with which the most worthless men are often blessed in fuller measure, – such as a sturdy leg, strong shoulders, good teeth, and healthy and solid muscles.

20. Again, if the wise man whose body is a trial to him shall be regarded as neither wretched nor happy, but shall be left in a sort of half-way position, his life also will be neither desirable nor undesirable. But what is so foolish as to say that the wise man's life is not desirable? And what is so far beyond the bounds of credence as the opinion that any life is neither desirable nor undesirable? Again, if bodily ills do not make a man wretched, they consequently allow him to be happy. For things which have no power to change his condition for the worse, have not the power, either, to disturb that condition when it is at its best.

21. "But," someone will say, "we know what is cold and what is hot; a lukewarm temperature lies between. Similarly, A is happy, and B is wretched, and C is neither happy nor wretched." I wish to examine this figure, which is brought into play against us. If I add to your lukewarm water a larger quantity of cold water, the result will be cold water. But if I pour in a larger quantity of hot water, the water will finally become hot. In the case, however, of your man who is neither wretched nor happy, no matter how much I add to his troubles, he will not be unhappy, according to your argument; hence your figure offers no analogy.

22. Again, suppose that I set before you a man who is neither miserable nor happy. I add blindness to his misfortunes; he is not rendered unhappy. I cripple him; he is not rendered unhappy. I add afflictions which are unceasing and severe; he is not rendered unhappy. Therefore, one whose life is not changed to misery by all these ills is not dragged by them, either, from his life of happiness.

23. Then if, as you say, the wise man cannot fall from happiness to wretchedness, he cannot fall into non-happiness. For how, if one has begun to slip, can one stop at any particular place? That which prevents him from rolling to the bottom, keeps him at the summit. Why, you urge, may not a happy life possibly be destroyed? It cannot even be disjointed; and for that reason virtue is itself of itself sufficient for the happy life.

24. "But," it is said, "is not the wise man happier if he has lived longer and has been distracted by no pain, than one who has always been compelled to grapple with evil fortune?" Answer me now, – is he any better or more honourable? If he is not, then he is not happier either. In order to live more happily, he must live more rightly; if he cannot do that, then he cannot live more happily either. Virtue cannot be strained tighter, and therefore neither can the happy life, which depends on virtue. For virtue is so great a good that it is not affected by such insignificant assaults upon it as shortness of life, pain, and the various bodily vexations. For pleasure does not deserve that. virtue should even glance at it.

25. Now what is the chief thing in virtue? It is the quality of not needing a single day beyond the present, and of not reckoning up the days that are ours; in the slightest possible moment of time virtue completes an eternity of good. These goods seem to us incredible and transcending man's nature; for we measure its grandeur by the standard of our own weakness, and we call our vices by the name of virtue. Furthermore, does it not seem just as incredible that any man in the midst of extreme suffering should say, "I am happy"? And yet this utterance was heard in the very factory of pleasure, when Epicurus said: "To-day and one other day have been the happiest of all!" although in the one case he was tortured by strangury, and in the other by the incurable pain of an ulcerated stomach.

26. Why, then, should those goods which virtue bestows be incredible in the sight of us, who cultivate virtue, when they are found even in those who acknowledge pleasure as their mistress? These also, ignoble and base-minded as they are, declare that even in the midst of excessive pain and misfortune the wise man will be neither wretched nor happy. And yet this also is incredible, – nay, still more incredible than the other case. For I do not understand how, if virtue falls from her heights, she can help being hurled all the way to the bottom. She either must preserve one in happiness, or, if driven from this position, she will not prevent us from becoming unhappy. If virtue only stands her ground, she cannot be driven from the field; she must either conquer or be conquered.

27. But some say: "Only to the immortal gods is given virtue and the happy life; we can attain but the shadow, as it were, and semblance of such goods as theirs. We approach them, but we never reach them." Reason, however, is a common attribute of both gods and men; in the gods it is already perfected, in us it is capable of being perfected.

28. But it is our vices that bring us to despair; for the second class of rational being, man, is of an inferior order, -a guardian, as it were, who is too unstable to hold fast to what is best, his judgement still wavering and uncertain. He may require the faculties of sight and hearing, good health, a bodily exterior that is not loathsome, and, besides, greater length of days conjoined with an unimpaired constitution.

29. Though by means of reason he can lead a life which will not bring regrets, yet there resides in this imperfect creature, man, a certain power that makes for badness, because he possesses a mind which is easily moved to perversity. Suppose, however, the badness which is in full view, and has previously been stirred to activity, to be removed; the man is still not a good man, but he is being moulded to goodness. One, however, in whom there is lacking any quality that makes for goodness, is bad.

30. But He in whose body virtue dwells, and spirit

E'er present

Is equal to the gods; mindful of his origin, he strives to return thither. No man does wrong in attempting to regain the heights from which he once came down. And why should you not believe that something of divinity exists in one who is a part of God? All this universe which encompasses us is one, and it is God; we are associates of God; we are his members. Our soul has capabilities, and is carried thither, if vices do not hold it down. Just as it is the nature of our bodies to stand erect and look upward to the sky, so the soul, which may reach out as far as it will, was framed by nature to this end, that it should desire equality with the gods. And if it makes use of its powers and stretches upward into its proper region it is by no alien path that it struggles toward the heights.

31. It would be a great task to journey heavenwards; the soul but returns thither. When once it has found the road, it boldly marches on, scornful of all things. It casts, no backward glance at wealth; gold and silver – things which are fully worthy of the gloom in which they once lay – it values not by the sheen which smites the eyes of the ignorant, but by the mire of ancient days, whence our greed first detached and dug them out.

The soul, I affirm, knows that riches are stored elsewhere than in men's heaped-up treasure-houses; that it is the soul, and not the strong-box, which should be filled.

32. It is the soul that men may set in dominion over all things, and may install as owner of the universe, so that it may limit its riches only by the boundaries of East and West, and, like the gods, may possess all things; and that it may, with its own vast resources, look down from on high upon the wealthy, no one of whom rejoices as much in his own wealth as he resents the wealth of another.

33. When the soul has transported itself to this lofty height, it regards the body also, since it is a burden which must be borne, not as a thing to love, but as a thing to oversee; nor is it subservient to that over which it is set in mastery. For no man is free who is a slave to his body. Indeed, omitting all the other masters which are brought into being by excessive care for the body, the sway which the body itself exercises is captious and fastidious.

34. Forth from this body the soul issues, now with unrufiled spirit, now with exultation, and, when once it has gone forth, asks not what shall be the end of the deserted clay. No; just as we do not take thought for the clippings of the hair and the beard, even so that divine soul, when it is about to issue forth from the mortal man, regards the destination of its earthly vessel – whether it be consumed by fire, or shut in by a stone, or buried in the earth, or torn by wild beasts – as being of no more concern to itself than is the afterbirth to a child just born. And whether this body shall be cast out and plucked to pieces by birds, or devoured when

thrown to the sea-dogs as prey,

how does that concern him who is nothing?

35. Nay even when it is among the living, the soul fears nothing that may happen to the body after death; for though such things may have been threats, they were not enough to terrify the soul previous to the moment of death. It says: "I am not frightened by the executioner's hook, nor by the revolting mutilation of the corpse which is exposed to the scorn of those who would witness the spectacle. I ask no man to perform the last rites for me; I entrust my remains to none. Nature has made provision that none shall go unburied. Time will lay away one whom cruelty has cast forth." Those were eloquent words which Maecenas uttered:

I want no tomb; for Nature doth provide

For outcast bodies burial.

You would imagine that this was the saying of a man of strict principles. He was indeed a man of noble and robust native gifts, but in prosperity he impaired these gifts by laxness. Farewell.

SENECA LETTER 93. On the Quality, as Contrasted with the Length, of Life

1. While reading the letter in which you were lamenting the death of the philosopher Metronax [A philosopher of Naples,] as if he might have, and indeed ought to have, lived longer, I missed the spirit of fairness which abounds in all your discussions concerning men and things, but is lacking when you approach one single subject, — as is indeed the case with us all. In other words, I have noticed many who deal fairly with their fellow-men, but none who deals fairly with the gods. We rail every day at Fate, saying "Why has A. been carried off in the very middle of his career? Why is not B. carried off instead? Why should he prolong his old age, which is a burden to himself as well as to others?"

2. But tell me, pray, do you consider it fairer that you should obey Nature, or that Nature should obey you? And what difference does it make how soon you depart from a place which you must depart from sooner or later? We should strive, not to live long, but to live rightly; for to achieve long life you have need of Fate only, but for right living you need the soul. A life is really long if it is a full life; but fulness is not attained until the soul has rendered to itself its proper Good, that is, until it has assumed control over itself.

3. What benefit does this older man derive from the eighty years he has spent in idleness? A person like him has not lived; he has merely tarried awhile in life. Nor has he died late in life; he has simply been a long time dying. He has lived eighty years, has he? That depends upon the date from which you reckon his death! Your other friend, however, departed in the bloom of his manhood.

4. But he had fulfilled all the duties of a good citizen, a good friend, a good son; in no respect had he fallen short. His age may have been incomplete, but his life was complete. The other man has lived eighty years, has he? Nay, he has existed eighty years, unless perchance you mean by "he has lived" what we mean when we say that a tree "lives." Pray, let us see to it, my dear Lucilius, that our lives, like jewels of great price, be noteworthy not because of their width but because of their weight. Let us measure them by their performance, not by their duration. Would you know wherein lies the difference between this hardy man who, despising Fortune, has served through every campaign of life and has attained to life's Supreme Good, and that other person over whose head many years have passed? The former exists even after his death; the latter has died even before he was dead.

5. We should therefore praise, and number in the company of the blest, that man who has invested well the portion of time, however little, that has been allotted to him; for such a one has seen the true light. He has not been one of the common herd. He has not only lived, but flourished. Sometimes he enjoyed fair skies; sometimes, as often happens, it was only through the clouds that there flashed to him the radiance of the mighty star. Why do you ask: "How long did he live?" He still lives! At one bound he has passed over into posterity and has consigned himself to the guardianship of memory.

6. And yet I would not on that account decline for myself a few additional years; although, if my life's space be shortened, I shall not say that I have lacked aught that is essential to a happy life. For I have not planned to live up to the very last day that my greedy hopes had promised me; nay, I have looked upon every day as if it were my last. Why ask the date of my birth, or whether I am still enrolled on the register of

the younger men? What I have is my own. 7. Just as one of small stature can be a perfect man, so a life of small compass can be a perfect life. Age ranks among the external things. How long I am to exist is not mine to decide, but how long I shall go on existing in my present way is in my own control. This is the only thing you have the right to require of me, — that I shall cease to measure out an inglorious age as it were in darkness, and devote myself to living instead of being carried along past life.

8. And what, you ask, is the fullest span of life? It is living until you possess wisdom. He who has attained wisdom has reached, not the furthermost, but the most important, goal. Such a one may indeed exult boldly and give thanks to the gods – aye, and to himself also – and he may count himself Nature's creditor for having lived. He will indeed have the right to do so, for he has paid her back a better life than he has received. He has set up the pattern of a good man, showing the quality and the greatness of a good man. Had another year been added, it would merely have been like the past.

9. And yet how long are we to keep living? We have had the joy of learning the truth about the universe. We know from what beginnings Nature arises; how she orders the course of the heavens; by what successive changes she summons back the year; how she has brought to an end all things that ever have been, and has established herself as the only end of her own being [i.e. Nature herself is eternal.]. We know that the stars move by their own motion, and that nothing except the earth stands still, while all the other bodies run on with uninterrupted swiftness. We know how the moon outstrips the sun; why it is that the slower leaves the swifter behind; in what manner she receives her light, or loses it again; what brings on the night, and what brings back the day. To that place you must go where you are to have a closer view of all these things.

10. "And yet," says the wise man, "I do not depart more valiantly because of this hope – because I judge the path lies clear before me to my own gods. I have indeed earned admission to their presence, and in fact have already been in their company; I have sent my soul to them as they had previously sent theirs to me. But suppose that I am utterly annihilated, and that after death nothing mortal remains; I have no less courage, even if, when I depart, my course leads – nowhere." "But," you say, "he has not lived as many years as he might have lived."

11. There are books which contain very few lines, admirable and useful in spite of their size; and there are also the Annals of Tanusius – you know how bulky the book is, and what men say of it. This is the case with the long life of certain persons, – a state which resembles the Annals of Tanusius!

12. Do you regard as more fortunate the fighter who is slain on the last day of the games than one who goes to his death in the middle of the festivities? Do you believe that anyone is so foolishly covetous of life that he would rather have his throat cut in the dressing-room than in the amphitheatre? It is by no longer an interval than this that we precede one another. Death visits each and all; the slayer soon follows the slain. It is an insignificant trifle, after all, that people discuss with so much concern. And anyhow, what does it matter for how long a time you avoid that which you cannot escape? Farewell.

SENECA LETTER 94. On the Value of Advice

1. That department of philosophy which supplies precepts appropriate to the individual case, instead of framing them for mankind at large – which, for instance, advises how a husband should conduct himself towards his wife, or how a father should bring up his children, or how a master should rule his slaves – this department of philosophy, I say, is accepted by some as the only significant part, while the other departments are rejected on the ground that they stray beyond the sphere of practical needs – as if any man could give advice concerning a portion of life without having first gained a knowledge of the sum of life as a whole!

2. But Aristo the Stoic, on the contrary, believes the abovementioned department to be of slight import – he holds that it does not sink into the mind, having in it nothing but old wives' precepts, and that the greatest benefit is derived from the actual dogmas of philosophy and from the definition of the Supreme Good. When a man has gained a complete understanding of this definition and has thoroughly learned it, he can frame for himself a precept directing what is to be done in a given case.

3. Just as the student of javelin-throwing keeps aiming at a fixed target and thus trains the hand to give direction to the missile, and when, by instruction and practice, he has gained the desired ability he can then employ it against any target he wishes (having learned to strike not any random object, but precisely the object at which he has aimed), — he who has equipped himself for the whole of life does not need to be advised concerning each separate item, because he is now trained to meet his problem as a whole; for he knows not merely how he should live with his wife or his son, but how he

should live aright. In this knowledge there is also included the proper way of living with wife and children.

4. Cleanthes holds that this department of wisdom is indeed useful, but that it is a feeble thing unless it is derived from general principles – that is, unless it is based upon a knowledge of the actual dogmas of philosophy and its main headings. This subject is therefore twofold, leading to two separate lines of inquiry: first, Is it useful or useless? and, second, Can it of itself produce a good man? – in other words, Is it superfluous, or does it render all other departments superfluous?

5. Those who urge the view that this department is superfluous argue as follows: "If an object that is held in front of the eyes interferes with the vision, it must be removed. For just as long as it is in the way, it is a waste of time to offer such precepts as these: 'Walk thus and so; extend your hand in that direction.' Similarly, when something blinds a man's soul and hinders it from seeing a line of duty clearly, there is no use in advising him: 'Live thus and so with your father, thus and so with your wife.' For precepts will be of no avail while the mind is clouded with error; only when the cloud is dispersed will it be clear what one's duty is in each case. Otherwise, you will merely be showing the sick man what he ought to do if he were well, instead of making him well.

6. Suppose you are trying to reveal to the poor man the art of 'acting rich'; how can the thing be accomplished as long as his poverty is unaltered? You are trying to make clear to a starveling in what manner he is to act the part of one with a well-filled stomach; the first requisite, however, is to relieve him of the hunger that grips his vitals. "The same thing, I assure you, holds good of all faults; the faults themselves must be removed, and precepts should not be given which cannot possibly be carried out while the faults remain. Unless you drive out the false opinions under which we suffer, the miser will never receive instruction as to the proper use of his money, nor the coward regarding the way to scorn danger.

7. You must make the miser know that money is neither a good nor an evil; show him men of wealth who are miserable to the last degree. You must make the coward know that the things which generally frighten us out of our wits are less to be feared than rumour advertises them to be, whether the object of fear be suffering or death; that when death comes – fixed by law for us all to suffer – it is often a great solace to reflect that it can never come again; that in the midst of suffering resoluteness of soul will be as good as a cure, for the soul renders lighter any burden that it endures with stubborn defiance. Remember that pain has this most excellent quality: if prolonged it cannot be severe, and if severe it cannot be prolonged; and that we should bravely accept whatever commands the inevitable laws of the universe lay upon us.

8. "When by means of such doctrines you have brought the erring man to a sense of his own condition, when he has learned that the happy life is not that which conforms to pleasure, but that which conforms to Nature, when he has fallen deeply in love with virtue as man's sole good and has avoided baseness as man's sole evil, and when he knows that all other things – riches, office, health, strength, dominion – fall in between and are not to be reckoned either among goods or among evils, then he will not need a monitor for every separate action, to say to him: 'Walk thus and so, eat thus and so. This is the conduct proper for a man and that for a woman; this for a married man and that for a bachelor.'

9. Indeed, the persons who take the greatest pains to proffer such advice are themselves unable to put it into practice. It is thus that the pedagogue advises the boy, and the grandmother her grandson; it is the hottest-tempered schoolmaster who contends that one should never lose one's temper. Go into any elementary school, and you will learn that just such pronouncements, emanating from high-browed philosophers, are to be found in the lesson-book for boys!

10. "Shall you then offer precepts that are clear, or precepts that are doubtful? Those which are clear need no counsellor, and doubtful precepts gain no credence; so the giving of precepts is superfluous. Indeed you should study the problem in this way: if you are counselling someone on a matter which is of doubtful clearness and doubtful meaning, you must supplement your precepts by proofs; and if you must resort to proofs, your means of proof are more effective and more satisfactory in themselves.

11. 'It is thus that you must treat your friend, thus your fellow citizen, thus your associate.' And why? 'Because it is just.' Yet I can find all that material included under the head of Justice. I find there that fair play is desirable in itself, that we are not forced into it by fear nor hired to that end for pay, and that no man is just who is attracted by anything in this virtue other than the virtue itself. After convincing myself of this view and thoroughly absorbing it, what good can I obtain from such precepts, which only teach one who is already trained? To one who knows, it is superfluous to give precepts; to one who does not know, it is insufficient. For he must be told, not only what he is being instructed to do, but also why.

12. I repeat, are such precepts useful to him who has correct ideas about good and evil, or to one who has them not? The

latter will receive no benefit from you; for some idea that clashes with your counsel has already monopolized his attention. He who has made a careful decision as to what should be sought and what should be avoided knows what he ought to do, without a single word from you. Therefore, that whole department of philosophy may be abolished.

13. "There are two reasons why we go astray: either there is in the soul an evil quality which has been brought about by wrong opinions, or, even if not possessed by false ideas, the soul is prone to falsehood and rapidly corrupted by some outward appearance which attracts it in the wrong direction. For this reason it is our duty either to treat carefully the diseased mind and free it from faults, or to take possession of the mind when it is still unoccupied and yet inclined to what is evil. Both these results can be attained by the main doctrines of philosophy; therefore the giving of such precepts is of no use.

14. Besides, if we give forth precepts to each individual, the task is stupendous. For one class of advice should be given to the financier, another to the farmer, another to the business man, another to one who cultivates the good graces of royalty, another to him who will seek the friendship of his equals, another to him who will court those of lower rank.

15. In the case of marriage, you will advise one person how he should conduct himself with a wife who before her marriage was a maiden, and another how he should behave with a woman who had previously been wedded to another; how the husband of a rich woman should act, or another man with a dowerless spouse. Or do you not think that there is some difference between a barren woman and one who bears children, between one advanced in years and a mere girl, between a mother and a step-mother? We cannot include all the types, and yet each type requires separate treatment; but the laws of philosophy are concise and are binding in all cases.

16. Moreover, the precepts of wisdom should be definite and certain: when things cannot be defined, they are outside the sphere of wisdom; for wisdom knows the proper limits of things.

"We should therefore do away with this department of precepts, because it cannot afford to all what it promises only to a few; wisdom, however, embraces all.

17. Between the insanity of people in general and the insanity which is subject to medical treatment there is no difference, except that the latter is suffering from disease and the former from false opinions. In the one case, the symptoms of madness may be traced to ill-health; the other is the ill-health of the mind. If one should offer precepts to a madman – how he ought to speak, how he ought to walk, how he ought to conduct himself in public and in private, he would be more of a lunatic than the person whom he was advising. What is really necessary is to treat the black bile and remove the essential cause of the madness. And this is what should also be done in the other case – that of the mind diseased. The madness itself must be shaken off; otherwise, your words of advice will vanish into thin air."

18. This is what Aristo says; and I shall answer his arguments one by one. First, in opposition to what he says about one's obligation to remove that which blocks the eye and hinders the vision. I admit that such a person does not need precepts in order to see, but that he needs treatment for the curing of his eyesight and the getting rid of the hindrance that handicaps him. For it is Nature that gives us our eyesight; and he who removes obstacles restores to Nature her proper function. But Nature does not teach us our duty in every case.

19. Again, if a man's cataract is cured, he cannot, immediately after his recovery, give back their eyesight to other men also; but when we are freed from evil we can free others also. There is no need of encouragement, or even of counsel, for the eye to be able to distinguish different colours; black and white can be differentiated without prompting from another. The mind, on the other hand, needs many precepts in order to see what it should do in life; although in eye-treatment also the physician not only accomplishes the cure, but gives advice into the bargain.

20. He says: "There is no reason why you should at once expose your weak vision to a dangerous glare; begin with darkness, and then go into half-lights, and finally be more bold, accustoming yourself gradually to the bright light of day. There is no reason why you should study immediately after eating; there is no reason why you should impose hard tasks upon your eyes when they are swollen and inflamed; avoid winds and strong blasts of cold air that blow into your face," – and other suggestions of the same sort, which are just as valuable as drugs themselves. The physician's art supplements remedies by advice.

21. "But," comes the reply, "error is the source of sin; precepts do not remove error, nor do they rout our false opinions on the subject of Good and Evil." I admit that precepts alone are not effective in overthrowing the mind's mistaken beliefs; but they do not on that account fail to be of service when they accompany other measures also. In the first place, they refresh the memory; in the second place, when sorted into their proper classes, the matters which showed themselves in a jumbled mass when considered as a whole, can

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3006 be considered in this with greater care. According to our opponents theory, you might even say that consolation, and exhortation were superfluous. Yet they are not superfluous; neither, therefore, is counsel.

22. "But it is folly," they retort, "to prescribe what a sick man ought to do, just as if he were well, when you should really restore his health; for without health precepts are not worth a jot." But have not sick men and sound men something in common, concerning which they need continual advice? For example, not to grasp greedily after food, and to avoid getting over-tired. Poor and rich have certain precepts which fit them both.

23. "Cure their greed, then," people say, "and you will not need to lecture either the poor or the rich, provided that in the case of each of them the craving has subsided." But is it not one thing to be free from lust for money, and another thing to know how to use this money? Misers do not know the proper limits in money matters, but even those who are not misers fail to comprehend its use. Then comes the reply: "Do away with error, and your precepts become unnecessary." That is wrong; for suppose that avarice is slackened, that luxury is confined, that rashness is reined in, and that laziness is pricked by the spur; even after vices are removed, we must continue to learn what we ought to do, and how we ought to do it.

24. "Nothing," it is said, "will be accomplished by applying advice to the more serious faults." No; and not even medicine can master incurable diseases; it is nevertheless used in some cases as a remedy, in others as a relief. Not even the power of universal philosophy, though it summon all its strength for the purpose, will remove from the soul what is now a stubborn and chronic disease. But Wisdom, merely because she cannot cure everything, is not incapable of making cures. 25. People say: "What good does it do to point out the

25. People say: "What good does it do to point out the obvious?" A great deal of good; for we sometimes know facts without paying attention to them. Advice is not teaching; it merely engages the attention and rouses us, and concentrates the memory, and keeps it from losing grip. We miss much that is set before our very eyes. Advice is, in fact, a sort of exhortation. The mind often tries not to notice even that which lies before our eyes; we must therefore force upon it the knowledge of things that are perfectly well known. One might repeat here the saying of Calvus about Vatinius*: "You all know that bribery has been going on, and everyone knows that you know it." I* Quoted also by Quintilian, vi. 1. 13. Between the years 58 and 54 B.C Calvus, a friend of the poet Catullus, in three famous speeches prosecuted Vatinius, one of the creatures of Caesar who had illegally obtained office.]

26. You know that friendship should be scrupulously honoured, and yet you do not hold it in honour. You know that a man does wrong in requiring chastity of his wife while he himself is intriguing with the wives of other men; you know that, as your wife should have no dealings with a lover, neither should you yourself with a mistress; and yet you do not act accordingly. Hence, you must be continually brought to remember these facts; for they should not be in storage, but ready for use. And whatever is wholesome should be often discussed and often brought before the mind, so that it may be not only familiar to us, but also ready to hand. And remember, too, that in this way what is clear often becomes clearer.

27. "But if," comes the answer, "your precepts are not obvious, you will be bound to add proofs; hence the proofs, and not the precepts, will be helpful." But cannot the influence of the monitor avail even without proofs? It is like the opinions of a legal expert, which hold good even though the reasons for them are not delivered. Moreover, the precepts which are given are of great weight in themselves, whether they be woven into the fabric of song, or condensed into prose proverbs, like the famous Wisdom of Cato "Buy not what you need, but what you must have. That which you do not need, is dear even at a farthing." Or those oracular or oracular-like replies, such as

28. "Be thrifty with time!" "Know thyself!" Shall you need to be told the meaning when someone repeats to you lines like these:

Forgetting trouble is the way to cure it.

Fortune favours the brave, but the coward is foiled by his faint heart.

Such maxims need no special pleader; they go straight to our emotions, and help us simply because Nature is exercising her proper function.

29. The soul carries within itself the seed of everything that is honourable, and this seed is stirred to growth by advice, as a spark that is fanned by a gentle breeze develops its natural fire. Virtue is aroused by a touch, a shock. Moreover, there are certain things which, though in the mind, yet are not ready to hand but begin to function easily as soon as they are put into words. Certain things lie scattered about in various places, and it is impossible for the unpractised mind to arrange them in order. Therefore, we should bring them into unity, and join them, so that they may be more powerful and more of an uplift to the soul.

30. Or, if precepts do not avail at all, then every method of instruction should be abolished, and we should be content

with Nature alone. Those who maintain this view do not understand that one man is lively and alert of wit, another sluggish and dull, while certainly some men have more intelligence than others. The strength of the wit is nourished and kept growing by precepts; it adds new points of view to those which are inborn and corrects depraved ideas.

31. "But suppose," people retort, "that a man is not the possessor of sound dogmas, how can advice help him when he is chained down by vicious dogmas?" In this, assuredly, that he is freed therefrom; for his natural disposition has not been crushed, but over-shadowed and kept down. Even so it goes on endeavouring to rise again, struggling against the influences that make for evil; but when it wins support and receives the aid of precepts, it grows stronger, provided only that the chronic trouble has not corrupted or annihilated the natural man. For in such a case, not even the training that comes from philosophy, striving with all its might, will make restoration. What difference, indeed, - is there between the dogmas of philosophy and precepts, unless it be this - that the former are general and the latter special? Both deal with advice – the one through the universal, the other through the particular.

32. Some say: "If one is familiar with upright and honourable dogmas, it will be superfluous to advise him." By no means; for this person has indeed learned to do things which he ought to do; but he does not see with sufficient clearness what these things are. For we are hindered from accomplishing praiseworthy deeds not only by our emotions, but also by want of practice in discovering the demands of a particular situation. Our minds are often under good control, and yet at the same time are inactive and untrained in finding the path of duty, – and advice makes this clear.

33. Again, it is written: "Cast out all false opinions concerning Good and Evil, but replace them with true opinions; then advice will have no function to perform." Order in the soul can doubtless be established in this way; but these are not the only ways. For although we may infer by proofs just what Good and Evil are, nevertheless precepts have their proper rôle. Prudence and justice consist of certain duties; and duties are set in order by precepts.

34. Moreover, judgement as to Good and Evil is itself strengthened by following up our duties, and precepts conduct us to this end. For both are in accord with each other; nor can precepts take the lead unless the duties follow. They observe their natural order; hence precepts clearly come first.

35. "Precepts," it is said "are numberless." Wrong again! For they are not numberless so far as concerns important and essential things. Of course there are slight distinctions, due to the time, or the place, or the person; but even in these cases, precepts are given which have a general application.

36. "No one, however," it is said, "cures madness by precepts, and therefore not wickedness either." There is a distinction; for if you rid a man of insanity, he becomes sane again, but if we have removed false opinions, insight into practical conduct does not at once follow. Even though it follows, counsel will none the less confirm one's right opinion concerning Good and Evil. And it is also wrong to believe that precepts are of no use to madmen. For though, by themselves, they are of no avail, yet they are a help towards the cure. Both scolding and chastening rein in a lunatic. Note that 1 here refer to lunatics whose wits are disturbed but not hopelessly gone.

37. "Still," it is objected, "laws do not always make us do what we ought to do; and what else are laws than precepts mingled with threats?" Now first of all, the laws do not persuade just because they threaten; precepts, however, instead of coercing, correct men by pleading. Again, laws frighten one out of communicating crime, while precepts urge a man on to his duty. Besides, the laws also are of assistance towards good conduct, at any rate if they instruct as well as command.

38. On this point I disagree with Posidonius, who says: "I do not think that Plato's Laws should have the preambles added to them. For a law should be brief, in order that the uninitiated may grasp it all the more easily. It should be a voice, as it were, sent down from heaven; it should command, not discuss. Nothing seems to me more dull or more foolish than a law with a preamble. Warn me, tell me what you wish me to do; I am not learning but obeying." But laws framed in this way are helpful; hence you will notice that a state with defective laws will have defective morals.

39. "But," it is said, "they are not of avail in every case." Well neither is philosophy; and yet philosophy is not on that account ineffectual and useless in the training of the soul. Furthermore, is not philosophy the Law of Life? Grant, if we will, that the laws do not avail; it does not necessarily follow that advice also should not avail. On this ground, you ought to say that consolation does not avail, and warning, and exhortation, and scolding, and praising; since they are all varieties of advice. It is by such methods that we arrive at a perfect condition of mind.

40. Nothing is more successful in bringing honourable influences to bear upon the mind, or in straightening out the wavering spirit that is prone to evil, than association with good men. For the frequent seeing, the frequent hearing of them little by little sinks into the heart and acquires the force of precepts. We are indeed uplifted merely by meeting wise men; and one can be helped by a great man even when he is silent.

41. I could not easily tell you how it helps us, though I am certain of the fact that I have received help in that way. Phaedo says: "Certain tiny animals do not leave any pain when they sting us; so subtle is their power, so deceptive for purposes of harm. The bite is disclosed by a swelling, and even in the swelling there is no visible wound." That will also be your experience when dealing with wise men, you will not discover that you have received it.

42. "What is the point of this remark?" you ask. It is, that good precepts, often welcomed within you, will benefit you just as much as good examples. Pythagoras declares that our souls experience a change when we enter a temple and behold the images of the gods face to face, and await the utterances of an oracle.

43. Moreover, who can deny that even the most inexperienced are effectively struck by the force of certain precepts? For example, by such brief but weighty saws as: "Nothing in excess," "The greedy mind is satisfied by no gains," "You must expect to be treated by others as you yourself have treated them." We receive a sort if shock when we hear such sayings; no one ever thinks of doubting them or of asking "Why?" So strongly, indeed, does mere truth, unaccompanied by reason, attract us.

44. If reverence reins in the soul and checks vice, why cannot counsel do the same? Also, if rebuke gives one a sense of shame, why has not counsel the same power, even though it does use bare precepts? The counsel which assists suggestion by reason – which adds the motive for doing a given thing and the reward which awaits one who carries out and obeys such precepts is – more effective and settles deeper in the heart. If commands are helpful, so is advice. But one is helped by commands; therefore one is helped also by advice.

45. Virtue is divided into two parts – into contemplation of truth, and conduct. Training teaches contemplation, and admonition teaches conduct. And right conduct both practises and reveals virtue. But if, when a man is about to act, he is helped by advice, he is also helped by admonition. Therefore, if right conduct is necessary to virtue, and if, moreover, admonition makes clear right conduct, then admonition also is an indispensable thing.

46. There are two strong supports to the soul – trust in the truth and confidence; both are the result of admonition. For men believe it, and when belief is established, the soul receives great inspiration and is filled with confidence. Therefore, admonition is not superfluous.

Marcus Agrippa, a great-souled man, the only person among those whom the civil wars raised to fame and power whose prosperity helped the state, used to say that he was greatly indebted to the proverb "Harmony makes small things grow; lack of harmony makes great things decay."

47. He held that he himself became the best of brothers and the best of friends by virtue of this saying. And if proverbs of such a kind, when welcomed intimately into the soul, can mould this very soul, why cannot the department of philosophy which consists of such proverbs possess equal influence? Virtue depends partly upon training and partly upon practice; you must learn first, and then strengthen your learning by action. If this be true, not only do the doctrines of wisdom help us but the precepts also, which check and banish our emotions by a sort of official decree. 48. It is said: "Philosophy is divided into knowledge and

48. It is said: "Philosophy is divided into knowledge and state of mind. For one who has learned and understood what he should do and avoid, is not a wise man until his mind is metamorphosed into the shape of that which he has learned. This third department – that of precept – is compounded from both the others, from dogmas of philosophy and state of mind. Hence it is superfluous as far as the perfecting of virtue is concerned; the other two parts are enough for the purpose."

49. On that basis, therefore, even consolation would be superfluous, since this also is a combination of the other two, as likewise are exhortation, persuasion, and even proof itself. [The last stage of knowledge – complete assent – according to the Stoic view, which went beyond the mere sensation-theory of Epicurus.] For proof also originates from a well-ordered and firm mental attitude. But, although these things result from a sound state of mind, yet the sound state of mind also results from them; it is both creative of them and resultant from them.

50. Furthermore, that which you mention is the mark of an already perfect man, of one who has attained the height of human happiness. But the approach to these qualities is slow, and in the meantime in practical matters, the path should be pointed out for the benefit of one who is still short of perfection, but is making progress. Wisdom by her own agency may perhaps show herself this path without the help of admonition; for she has brought direction. Weaker characters,

however, need someone to precede them, to say: "Avoid this," or "Do that."

51. Moreover, if one awaits the time when one can know of oneself what the best line of action is, one will sometimes go astray and by going astray will be hindered from arriving at the point where it is possible to be content with oneself. The soul should accordingly be guided at the very moment when it is becoming able to guide itself. Boys study according to direction. Their fingers are held and guided by others so that they may follow the outlines of the letters; next, they are ordered to imitate a copy and base thereon a style of penmanship. Similarly, the mind is helped if it is taught according to direction.

52. Such facts as these prove that this department of philosophy is not superfluous. The question next arises whether this part alone is sufficient to make men wise. The problem shall be treated at the proper time; but at present, omitting all arguments, is it not clear that we need someone whom we may call upon as our preceptor in opposition to the precepts of men in general?

53. There is no word which reaches our ears without doing us harm; we are injured both by good wishes and by curses. The angry prayers of our enemies instil false fears in us; and the affection of our friends spoils us through their kindly wishes. For this affection sets us a-groping after goods that are far away, unsure, and wavering, when we really might open the store of happiness at home.

54. We are not allowed, I maintain, to travel a straight road. Our parents and our slaves draw us into wrong. Nobody confines his mistakes to himself; people sprinkle folly among their neighbours, and receive it from them in turn. For this reason, in an individual, you find the vices of nations, because the nation has given them to the individual. Each man, in corrupting others, corrupts himself; he imbibes, and then imparts, badness the result is a vast mass of wickedness, because the worst in every separate person is concentrated in one mass.

55. We should, therefore, have a guardian, as it were, to pluck us continually by the ear and dispel rumours and protest against popular enthusiasms. For you are mistaken if you suppose that our faults are inborn in us; they have come from without, have been heaped upon us. Hence, by receiving frequent admonitions, we can reject the opinions which din about our ears.

56. Nature does not ally us with any vice; she produced us in health and freedom. She put before our eyes no object which might stir in us the itch of greed. She placed gold and silver beneath our feet and bade those feet stamp down and crush everything that causes us to be stamped down and crushed. Nature elevated our gaze towards the sky and willed that we should look upward to behold her glorious and wonderful works. She gave us the rising and the setting sun, the whirling course of the on-rushing world which discloses the things of earth by day and the heavenly bodies by night, the movements of the stars, which are slow if you compare them with the universe, but most rapid if you reflect on the size of the orbits which they describe with unslackened speed; she showed us the successive eclipses of sun and moon, and other phenomena, wonderful because they occur regularly or because, through sudden causes they leap into view - such as nightly trails of fire, or flashes in the open heavens unaccompanied by stroke or sound of thunder, or columns and beams and the various phenomena of flames.

57. She ordained that all these bodies should proceed above our heads; but gold and silver, with the iron which, because of the gold and silver, never brings peace, she has hidden away, as if they were dangerous things to trust to our keeping. It is we ourselves that have dragged them into the light of day to the end that we might fight over them; it is we ourselves who, tearing away the superincumbent earth, have dug out the causes and tools of our own destruction; it is we ourselves who have attributed our own misdeeds to Fortune, and do not blush to regard as the loftiest objects those which once lay in the depths of earth.

58. Do you wish to know how false is the gleam that has deceived your eyes? There is really nothing fouler or more involved in darkness than these things of earth, sunk and covered for so long a time in the mud where they belong. Of course they are foul; they have been hauled out through a long and murky mine-shaft. There is nothing uglier than these metals during the process of refinement and separation from the ore. Furthermore, watch the very workmen who must handle and sift the barren grade of dirt, the sort which comes from the bottom; see how soot-besmeared they are!

59. And yet the stuff they handle soils the soul more than the body, and there is more foulness in the owner than in the workman. It is therefore indispensable that we be admonished, that we have some advocate with upright mind, and, amid all the uproar and jangle of falsehood, hear one voice only. But what voice shall this be? Surely a voice which, amid all the tumult of self-seeking, shall whisper wholesome words into the deafened ear, saying:

60. "You need not be envious of those whom the people call great and fortunate; applause need not disturb your composed

attitude and your sanity of mind; you need not become disgusted with your calm spirit because you see a great man, clothed in purple, protected by the well-known symbols of authority; you need not judge the magistrate for whom the road is cleared to be any happier than yourself, whom his officer pushes from the road. If you would wield a command that is profitable to yourself, and injurious to nobody, clear your wn faults out of the way.

61. There are many who set fire to cities, who storm garrisons that have remained impregnable for generations and safe for numerous ages, who raise mounds as high as the walls they are besieging, who with battering-rams and engines shatter towers that have been reared to a wondrous height. There are many who can send their columns ahead and press destructively upon the rear of the foe, who can reach the Great Sea dripping with the blood of nations; but even these men, before they could conquer their foe, were conquered by their own greed. No one withstood their attack; but they themselves could not withstand desire for power and the impulse to cruelty; at the time when they seemed to be hounding others, they were themselves being hounded.

62. Alexander was hounded into misfortune and dispatched to unknown countries by a mad desire to lay waste other men's territory. Do you believe that the man was in his senses who could begin by devastating Greece, the land where he received his education? One who snatched away the dearest guerdon of each nation, bidding Spartans be slaves, and Athenians hold their tongues? Not content with the ruin of all the states which Philip had either conquered or bribed into bondage, he overthrew various commonwealths in various places and carried his weapons all over the world; his cruelty was tired, but it never ceased – like a wild beast that tears to pieces more than its hunger demands.

63. Already he has joined many kingdoms into one kingdom; already Greeks and Persians fear the same lord; already nations Darius had left free submit to the yoke: yet he passes beyond the Ocean and the Sun, deeming it shame that he should shift his course of victory from the paths which Hercules and Bacchus had trod; he threatens violence to Nature herself. He does not wish to go; but he cannot stay; he is like a weight that falls headlong, its course ending only when it lies motionless.

64. It was not virtue or reason which persuaded Gnaeus Pompeius to take part in foreign and civil warfare; it was his mad craving for unreal glory. Now he attacked Spain and the faction of Sertorius; now he fared forth to enchain the pirates and subdue the seas. These were merely excuses and pretexts for extending his power.

65. What drew him into Africa, into the North, against Mithridates, into Armenia and all the corners of Asia? Assuredly it was his boundless desire to grow bigger; for only in his own eyes was he not great enough. And what impelled Gausa Caesar to the combined ruin of himself and of the state? Renown, self-seeking, and the setting no limit to preeminence over all other men. He could not allow a single person to outrank him, although the state allowed two men to stand at its head.

66. Do you think that Gaius Marius, who was once consul (he received this office on one occasion, and stole it on all the others) courted all his perils by the inspiration of virtue when he was slaughtering the Teutons and the Cimbri, and pursuing Jugurtha through the wilds of Africa? Marius commanded armies, ambition Marius.

67. When such men as these were disturbing the world, they were themselves disturbed – like cyclones that whirl together what they have seized, but which are first whirled themselves and can for this reason rush on with all the greater force, having no control over themselves; hence, after causing such destruction to others, they feel in their own body the ruinous force which has enabled them to cause havoc to many. You need never believe that a man can become happy through the unhappiness of another.

68. We must unravel all such cases as are forced before our eyes and crammed into our ears; we must clear out our hearts, for they are full of evil talk. Virtue must be conducted into the place these have seized, -a kind of virtue which may root out falsehood and doctrines which contravene the truth, or may sunder us from the throng, in which we put too great trust, and may restore us to the possession of sound opinions. For this is wisdom – a return to Nature and a restoration to the condition from which man's errors have driven us.

69. It is a great part of health to have forsaken the counsellors of madness and to have fled far from a companionship that is mutually baneful. That you may know the truth of my remark, see how different is each individual's life before the public from that of his inner self. A quiet life does not of itself give lessons in upright conduct; the countryside does not of itself teach plain living; no, but when witnesses and onlookers are removed, faults which ripen in publicity and display sink into the background.

70. Who puts on the purple robe for the sake of flaunting it in no man's eyes? Who uses gold plate when he dines alone? Who, as he flings himself down beneath the shadow of some rustic tree, displays in solitude the splendour of his luxury? No one makes himself elegant only for his own beholding, or even for the admiration of a few friends or relatives. Rather does he spread out his well-appointed vices in proportion to the size of the admiring crowd.

71. It is so: claqueurs and witnesses are irritants of all our mad foibles. You can make us cease to crave, if you only make us cease to display. Ambition, luxury, and waywardness need a stage to act upon; you will cure all those ills if you seek retirement.

72. Therefore, if our dwelling is situated amid the din of a city, there should be an adviser standing near us. When men praise great incomes, he should praise the person who can be rich with a slender estate and measures his wealth by the use he makes of it. In the face of those who glorify influence and power, he should of his own volition recommend a leisure devoted to study, and a soul which has left the external and found itself. 73. He should point out persons, happy in the popular estimation, who totter on their envied heights of power, who are dismayed and hold a far different opinion of themselves from what others hold of them. That which others think elevated, is to them a sheer precipice. Hence they are frightened and in a flutter whenever they look down the abrupt steep of their greatness. For they reflect that there are various ways of falling and that the topmost point is the most slippery. 74. Then they fear that for which they strove, and the good fortune which made them weighty in the eyes of others weighs more heavily upon themselves. Then they praise easy leisure and independence; they hate the glamour and try to escape while their fortunes are still unimpaired. Then at last you may see them studying philosophy amid their fear, and hunting sound advice when their fortunes go awry. For these two things are, as it were, at opposite poles - good fortune and good sense; that is why we are wiser when in the midst of adversity. It is prosperity that takes away righteousness, Farewell,

SENECA LETTER 95. On the Usefulness of Basic Principles

1. You keep asking me to explain without postponement a topic which I once remarked should be put off until the proper time, and to inform you by letter whether this department of philosophy which the Greeks call paraenetic, and we Romans call the "preceptorial," is enough to give us perfect wisdom. Now I know that you will take it in good part if I refuse to do so. But I accept your request all the more willingly, and refuse to let the common saying lose its point:

Do not ask for what you will wish you had not got. 2. For sometimes we seek with effort that which we should decline if offered voluntarily. Call that fickleness or call it pettishness, — we must punish the habit by ready compliance. There are many things that we would have men think that we wish, but that we really do not wish. A lecturer sometimes brings upon the platform a huge work of research, written in the tiniest hand and very closely folded; after reading off a large portion, he says: "I shall stop, if you wish;" and a shout arises: "Read on, read on!" from the lips of those who are anxious for the speaker to hold his peace then and there. We often want one thing and pray for another, not telling the truth even to the gods, while the gods either do not hearken, or else take pity on us.

3. But I shall without pity avenge myself and shall load a huge letter upon your shoulders; for your part, if you read it with reluctance, you may say: "I brought this burden upon myself," and may class yourself among those men whose too ambitious wives drive them frantic, or those whom riches harass, earned by extreme sweat of the brow, or those who are tortured with the titles which they have sought by every sort of device and toil, and all others who are responsible for their own misfortunes.

4. But I must stop this preamble and approach the problem under consideration. Men say: "The happy life consists in upright conduct; precepts guide one to upright conduct; therefore precepts are sufficient for attaining the happy life." But they do not always guide us to upright conduct; this occurs only when the will is receptive; and sometimes they are applied in vain, when wrong opinions obsess the soul.

5. Furthermore, a man may act rightly without knowing that he is acting rightly. For nobody, except he be trained from the start and equipped with complete reason, can develop to perfect proportions, understanding when he should do certain things, and to what extent, and in whose company, and how, and why. Without such training a man cannot strive with all his heart after that which is honourable, or even with steadiness or gladness, but will ever be looking back and wavering.

6. It is also said: "If honourable conduct results from precepts, then precepts are amply sufficient for the happy life; but the first of these statements is true; therefore the second is true also." We shall reply to these words that honourable conduct is, to be sure, brought about by precepts, but not by precepts alone.

7. "Then," comes the reply, "if the other arts are content with precepts, wisdom will also be content therewith; for wisdom itself is an art of living. And yet the pilot is made by precepts which tell him thus and so to turn the tiller, set his sails, make use of a fair wind, tack, make the best of shifting and variable breezes – all in the proper manner. Other craftsmen also are drilled by precepts; hence precepts will be able to accomplish the same result in the case of our craftsman in the art of living."

8. Now all these arts are concerned with the tools of life, but not with life as a whole. Hence there is much to clog these arts from without and to complicate them – such as hope, greed, fear. But that art which professes to teach the art of life cannot be forbidden by any circumstance from exercising its functions; for it shakes off complications and pierces through obstacles. Would you like to know how unlike its status is to the other arts? In the case of the latter, it is more pardonable to err voluntarily rather than by accident; but in the case of wisdom the worst fault is to commit sin wilfully.

9. I mean something like this: A scholar will blush for shame, not if he makes a grammatical blunder intentionally, but if he makes it unintentionally; if a physician does not recognize that his patient is failing, he is a much poorer practitioner than if he recognizes the fact and conceals his knowledge. But in this art of living a voluntary mistake is the more shameful.

Furthermore, many arts, aye and the most liberal of them all, have their special doctrines, and not mere precepts of advice – the medical profession, for example. There are the different schools of Hippocrates, of Asclepiades, of Themison.

10. And besides, no art that concerns itself with theories can exist without its own doctrines; the Greeks call them dogmas, while we Romans may use the term "doctrines," or "tenets," or "adopted principles," – such as you will find in geometry or astronomy. But philosophy is both theoretic and practical; it contemplates and at the same time acts. You are indeed mistaken if you think that philosophy offers you nothing but worldly assistance; her aspirations are loftier than that. She cries: "I investigate the whole universe, nor am I content, keeping myself within a mortal dwelling, to give you favourable or unfavourable advice. Great matters invite and such as are set far above you. In the words of Lucretius:

11. To thee shall I reveal the ways of heaven

And the gods, spreading before thine eyes The atoms. – whence all things are brought to birth.

Increased, and fostered by creative power,

And eke their end when Nature casts them off.

Philosophy, therefore, being theoretic, must have her doctrines.

12. And why? Because no man can duly perform right actions except one who has been entrusted with reason, which will enable him, in all cases, to fulfil all the categories of duty. These categories he cannot observe unless he receives precepts for every occasion, and not for the present alone. Precepts by themselves are weak and, so to speak, rootless if they be assigned to the parts and not to the whole. It is the doctrines which will strengthen and support us in peace and calm, which will include simultaneously the whole of life and the universe in its completeness. There is the same difference between philosophical doctrines and precepts as there is between elements and members; the latter depend upon the former, while the former are the source both of the latter and of all things.

13. People say: "The old-style wisdom advised only what one should do and avoid; and yet the men of former days were better men by far. When savants have appeared, sages have become rare. For that frank, simple virtue has changed into hidden and crafty knowledge; we are taught how to debate, not how to live."

14. Of course, as you say, the old-fashioned wisdom, especially in its beginnings, was crude; but so were the other arts, in which dexterity developed with progress. Nor indeed in those days was there yet any need for carefully-planned cures. Wickedness had not yet reached such a high point, or scattered itself so broadcast. Plain vices could be treated by plain cures; now, however, we need defences erected with all the greater care, because of the stronger powers by which we are attacked.

15. Medicine once consisted of the knowledge of a few simples, to stop the flow of blood, or to heal wounds; then by degrees it reached its present stage of complicated variety. No wonder that in early days medicine had less to do! Men's bodies were still sound and strong; their food was light and not spoiled by art and luxury, whereas when they began to seek dishes not for the sake of removing, but of rousing, the appetite, and devised countless sauces to whet their gluttony, – then what before was nourishment to a hungry man became a burden to the full stomach.

16. Thence come paleness, and a trembling of wine-sodden muscles, and a repulsive thinness, due rather to indigestion than to hunger. Thence weak tottering steps, and a reeling gait just like that of drunkenness. Thence dropsy, spreading under the entire skin, and the belly growing to a paunch through an ill habit of taking more than it can hold. Thence yellow jaundice, discoloured countenances, and bodies that rot inwardly, and fingers that grow knotty when the joints stiffen, and muscles that are numbed and without power of

feeling, and palpitation of the heart with its ceaseless pounding.

17. Why need I mention dizziness? Or speak of pain in the eye and in the ear, itching and aching in the fevered brain, and internal ulcers throughout the digestive system? Besides these, there are countless kinds of fever, some acute in their malignity, others creeping upon us with subtle damage, and still others which approach us with chills and severe ague.

18. Why should I mention the other innumerable diseases, the tortures that result from high living? Men used to be free from such ills, because they had not yet slackened their strength by indulgence, because they had control over themselves, and supplied their own needs. They toughened their bodies by work and real toil, tiring themselves out by running or hunting or tilling the earth. They were refreshed by food in which only a hungry man could take pleasure. Hence, there was no need for all our mighty medical paraphernalia, for so many instruments and pill-boxes. For plain reasons they enjoyed plain health; it took elaborate courses to produce elaborate diseases.

19. Mark the number of things – all to pass down a single throat – that luxury mixes together, after ravaging land and sea. So many different dishes must surely disagree; they are bolted with difficulty and are digested with difficulty, each jostling against the other. And no wonder, that diseases which result from ill-assorted food are variable and manifold; there must be an overflow when so many unnatural combinations are jumbled together. Hence there are as many ways of being ill as there are of living.

20. The illustrious founder of the guild and profession of medicine remarked that women never lost their hair or suffered from pain in the feet; and yet nowadays they run short of hair and are afflicted with gout. This does not mean that woman's physique has changed, but that it has been conquered; in rivalling male indulgences they have also rivalled the ills to which men are heirs.

21. They keep just as late hours, and drink just as much liquor; they challenge men in wrestling and carousing; they are no less given to vomiting from distended stomachs and to thus discharging all their wine again; nor are they behind the men in gnawing ice, as a relief to their fevered digestions. And they even match the men in their passions, although they were created to feel love passively (may the gods and goddesses confound them!). They devise the most impossible varieties of unchastity, and in the company of men they play the part of men. What wonder, then, that we can trip up the statement of the greatest and most skilled physician, when so many women are gouty and bald! Because of their vices, women have ceased to deserve the privileges of their sex; they have put off their womanly nature and are therefore condemned to suffer the diseases of men.

22. Physicians of old time knew nothing about prescribing frequent nourishment and propping the feeble pulse with wine; they did not understand the practice of blood-letting and of easing chronic complaints with sweat-baths; they did not understand how, by bandaging ankles and arms, to recall to the outward parts the hidden strength which had taken refuge in the centre. They were not compelled to seek many varieties of relief, because the varieties of suffering were very few in number.

23. Nowadays, however, to what a stage have the evils of ill-health advanced! This is the interest which we pay on pleasures which we have coveted beyond what is reasonable and right. You need not wonder that diseases are beyond counting: count the cooks! All intellectual interests are in abeyance; those who follow culture lecture to empty rooms, in out-of-the-way places. The halls of the professor and the philosopher are deserted; but what a crowd there is in the cafés! How many young fellows besiege the kitchens of their gluttonous friends!

24. I shall not mention the troops of luckless boys who must put up with other shameful treatment after the banquet is over. I shall not mention the troops of catamites, rated according to nation and colour, who must all have the same smooth skin, and the same amount of youthful down on their cheeks, and the same way of dressing their hair, so that no boy with straight locks may get among the curly-heads. Nor shall I mention the medley of bakers, and the numbers of waiters who at a given signal scurry to carry in the courses. Ye gods! How many men are kept busy to humour a single belly!

25. What? Do you imagine that those mushrooms, the epicure's poison, work no evil results in secret, even though they have had no immediate effect? What? Do you suppose that your summer snow does not harden the tissue of the liver? What? Do you suppose that those oysters, a sluggish food fattened on slime, do not weigh one down with mud-begotten heaviness? What? Do you not think that the so-called "Sauce from the Provinces," the costly extract of poisonous fish, burns up the stomach with its salted putrefaction? What? Do you judge that the corrupted dishes which a man swallows almost burning from the kitchen fire, are quenched in the digestive system without doing harm? How repulsive, then, and how unhealthy are their belchings, and how disgusted men are with themselves when they breathe forth the fumes of

yesterday's debauch! You may be sure that their food is not being digested, but is rotting.

26. I remember once hearing gossip about a notorious dish into which everything over which epicures love to dally had been heaped together by a cookshop that was fast rushing into bankruptcy; there were two kinds of mussels, and oysters trimmed round at the line where they are edible, set off at intervals by sea-urchins; the whole was flanked by mullets cut up and served without the bones.

27. In these days we are ashamed of separate foods; people mix many flavours into one. The dinner table does work which the stomach ought to do. I look forward next to food being served masticated! And how little we are from it already when we pick out shells and bones and the cook performs the office of the teeth! They say: "It is too much trouble to take our luxuries one by one; let us have everything served at the same time and blended into the same flavour. Why should I help myself to a single dish? Let us have many coming to the table at once; the dainties of various courses should be combined and confounded.

28. Those who used to declare that this was done for display and notoriety should understand that it is not done for show, but that it is an oblation to our sense of duty! Let us have at one time, drenched in the same sauce, the dishes that are usually served separately. Let there be no difference: let oysters, sea-urchins, shell-fish, and mullets be mixed together and cooked in the same dish." No vomited food could be jumbled up more helter-skelter.

29. And as the food itself is complicated, so the resulting diseases are complex, unaccountable, manifold, variegated; medicine has begun to campaign against them in many ways and by many rules of treatment. Now I declare to you that the same statement applies to philosophy. It was once more simple because men's sins were on a smaller scale, and could be cured with but slight trouble; in the face, however, of all this moral topsy-turvy men must leave no remedy untried. And would that this pest might so at last be overcome!

30. We are mad, not only individually, but nationally. We check manslaughter and isolated murders; but what of war and the much-vaunted crime of slaughtering whole peoples? There are no limits to our greed, none to our cruelty. And as long as such crimes are committed by stealth and by individuals, they are less harmful and less portentous; but cruelties are practised in accordance with acts of senate and popular assembly, and the public is bidden to do that which is forbidden to the individual.

31. Deeds that would be punished by loss of life when committed in secret, are praised by us because uniformed generals have carried them out. Man, naturally the gentlest class of being, is not ashamed to revel in the blood of others, to wage war, and to entrust the waging of war to his sons, when even dumb beasts and wild beasts keep the peace with one another.

32. Against this overmastering and widespread madness philosophy has become a matter of greater effort, and has taken on strength in proportion to the strength which is gained by the opposition forces.

It used to be easy to scold men who were slaves to drink and who sought out more luxurious food; it did not require a mighty effort to bring the spirit back to the simplicity from which it had departed only slightly. But now

33. One needs the rapid hand, the master-craft. Men seek pleasure from every source. No vice remains within its limits; luxury is precipitated into greed. We are overwhelmed with forgetfulness of that which is honourable. Nothing that has an attractive value, is base. Man, an object of reverence in the eyes of man, is now slaughtered for jest and sport; and those whom it used to be unholy to train for the purpose of inflicting and enduring wounds, are thrust forth exposed and defenceles; and it is a satisfying spectacle to see a man made a corpse.

34. Amid this upset condition of morals, something stronger than usual is needed, – something which will shake off these chronic ills; in order to root out a deep-seated belief in wrong ideas, conduct must be regulated by doctrines. It is only when we add precepts, consolation, and encouragement to these, that they can prevail; by themselves they are ineffective.

35. If we would hold men firmly bound and tear them away from the ills which clutch them fast, they must learn what is evil and what is good. They must know that everything except virtue changes its name and becomes now good and now bad. Just as the soldier's primary bond of union is his oath of allegiance and his love for the flag, and a horror of desertion, and just as, after this stage, other duties can easily be demanded of him, and trusts given to him when once the oath has been administered; so it is with those whom you would bring to the happy life: the first foundations must be laid, and virtue worked into these men. Let them be held by a sort of superstitious worship of virtue; let them love her; let them desire to live with her, and refuse to live without her.

36. "But what, then," people say, "have not certain persons won their way to excellence without complicated training? Have they not made great progress by obeying bare precepts alone?" Very true; but their temperaments were propitious, and they snatched salvation as it were by the way. For just as the immortal gods did not learn virtue having been born with virtue complete, and containing in their nature the essence of goodness — even so certain men are fitted with unusual qualities and reach without a long apprenticeship that which is ordinarily a matter of teaching, welcoming honourable things as soon as they hear them. Hence come the choice minds which seize quickly upon virtue, or else produce it from within themselves. But your dull, sluggish fellow, who is hampered by his evil habits, must have this soul-rust incessantly rubbed off.

37. Now, as the former sort, who are inclined towards the good, can be raised to the heights more quickly: so the weaker spirits will be assisted and freed from their evil opinions if we entrust to them the accepted principles of philosophy; and you may understand how essential these principles are in the following way. Certain things sink into us, rendering us sluggish in some ways, and hasty in others. These two qualities, the one of recklessness and the other of sloth, cannot be respectively checked or roused unless we remove their causes, which are mistaken admiration and mistaken fear. As long as we are obsessed by such feelings, you may say to us: "You owe this duty to your father, this to your children, this to your friends, this to your guests"; but greed will always hold us back, no matter how we try. A man may know that he should fight for his country, but fear will dissuade him. A man may know that he should sweat forth his last drop of energy on behalf of his friends, but luxury will forbid. A man may know that keeping a mistress is the worst kind of insult to his wife, but lust will drive him in the opposite direction.

38. It will therefore be of no avail to give precepts unless you first remove the conditions that are likely to stand in the way of precepts; it will do no more good than to place weapons by your side and bring yourself near the foe without having your hands free to use those weapons. The soul, in order to deal with the precepts which we offer, must first be set free.

39. Suppose that a man is acting as he should; he cannot keep it up continuously or consistently, since he will not know the reason for so acting. Some of his conduct will result rightly because of luck or practice; but there will be in his hand no rule by which he may regulate his acts, and which he may trust to tell him whether that which he has done is right. One who is good through mere chance will not give promise of retaining such a character for ever.

40. Furthermore, precepts will perhaps help you to do what should be done; but they will not help you to do it in the proper way; and if they do not help you to this end, they do not conduct you to virtue. I grant you that, if warned, a man will do what he should; but that is not enough, since the credit lies, not in the actual deed, but in the way it is done.

41. What is more shameful than a costly meal which eats away the income even of a knight? Or what so worthy of the censor's condemnation as to be always indulging oneself and one's "inner man," if I may speak as the gluttons do? And yet often has an inaugural dinner cost the most careful man a cool million! The very sum that is called disgraceful if spent on the appetite, is beyond reproach if spent for official purposes! For it is not luxury but an expenditure sanctioned by custom.

42. A mullet of monstrous size was presented to the Emperor Tiberius. They say it weighed four and one half pounds (and why should I not tickle the palates of certain epicures by mentioning its weight?). Tiberius ordered it to be sent to the fish-market and put up for sale, remarking: "I shall be taken entirely by surprise, my friends, if either Apicius or P. Octavius does not buy that mullet." The guess came true beyond his expectation: the two men bid, and Octavius won, thereby acquiring a great reputation among his intimates because he had bought for five thousand sesterces a fish which the Emperor had sold, and which even Apicius did not succeed in buying. To pay such a price was disgraceful for Octavius, but not for the individual who purchased the fish in order to present it to Tiberius, - though I should be inclined to blame the latter as well; but at any rate he admired a gift of which he thought Caesar worthy. When people sit by the bedsides of their sick friends, we honour their motives.

43. But when people do this for the purpose of attaining a legacy [A frequent vice under the Empire, nicknamed captatio., they are like vultures waiting for carrion. The same act may be either shameful or honourable: the purpose and the manner make all the difference. Now each of our acts will be honourable if we declare allegiance to honour and judge honour and its results to be the only good that can fall to man's lot; for other things are only temporarily good.

44. I think, then, that there should be deeply implanted a firm belief which will apply to life as a whole: this is what I call a "doctrine." And as this belief is, so will be our acts and our thoughts. As our acts and our thoughts are, so will our lives be. It is not enough, when a man is arranging his existence as a whole, to give him advice about details.

45. Marcus Brutus, in the book which he has entitled Concerning Duty, gives many precepts to parents, children, and brothers; but no one will do his duty as he ought, unless he has some principle to which he may refer his conduct. We must set before our eyes the goal of the Supreme Good, towards which we may strive, and to which all our acts and words may have reference – just as sailors must guide their course according to a certain star.

46. Life without ideals is erratic: as soon as an ideal is to be set up, doctrines begin to be necessary. I am sure you will admit that there is nothing more shameful than uncertain and wavering conduct, than the habit of timorous retreat. This will be our experience in all cases unless we remove that which checks the spirit and clogs it, and keeps it from making an attempt and trying with all its might.

47. Precepts are commonly given as to how the gods should be worshipped. But let us forbid lamps to be lighted on the Sabbath, since the gods do not need light, neither do men take pleasure in soot. Let us forbid men to offer morning salutation and to throng the doors of temples; mortal ambitions are attracted by such ceremonies, but God is worshipped by those who truly know Him. Let us forbid bringing towels and flesh-scrapers to Jupiter, and proffering mirrors to Juno; for God seeks no servants. Of course not; he himself does service to mankind, everywhere and to all he is at hand to help.

48. Although a man hear what limit he should observe in sacrifice, and how far he should recoil from burdensome superstitions, he will never make sufficient progress until he has conceived a right idea of God, – regarding Him as one who possesse all things, and allots all things, and bestows them without price.

49. And what reason have the gods for doing deeds of kindness? It is their nature. One who thinks that they are unwilling to do harm, is wrong; they cannot do harm. They cannot receive or inflict injury; for doing harm is in the same category as suffering harm. The universal nature, all-glorious and all-beautiful, has rendered incapable of inflicting ill those whom it has removed from the danger of ill.

50. The first way to worship the gods is to believe in the gods; the next to acknowledge their majesty, to acknowledge their goodness without which there is no majesty. Also, to know that they are supreme commanders in the universe, controlling all things by their power and acting as guardians of the human race, even though they are sometimes unmindful of the individual. They neither give nor have evil but they do chasten and restrain certain persons and impose penalties, and sometimes punish by bestowing that which seems good outwardly. Would you win over the gods? Then be a good man. Whoever imitates them, is worshipping them sufficiently.

51. Then comes the second problem, – how to deal with men. What is our purpose? What precepts do we offer? Should we bid them refrain from bloodshed? What a little thing it is not to harm one whom you ought to help! It is indeed worthy of great praise, when man treats man with kindness! Shall we advise stretching forth the hand to the shipwrecked sailor, or pointing out the way to the wanderer, or sharing a crust with the starving? Yes, if I can only tell you first everything which ought to be afforded or withheld; meantime, I can lay down for mankind a rule, in short compass, for our duties in human relationships:

52. all that you behold, that which comprises both god and man, is one – we are the parts of one great body. Nature produced us related to one another, since she created us from the same source and to the same end. She engendered in us mutual affection, and made us prone to friendships. She established fairness and justice; according to her ruling, it is more wretched to commit than to suffer injury. Through her orders, let our hands be ready for all that needs to be helped.

53. Let this verse be in your heart and on your lips:

I am a man; and nothing in man's lot Do I deem foreign to me.

Let us possess things in common; for birth is ours in common. Our relations with one another are like a stone arch, which would collapse if the stones did not mutually support each other, and which is upheld in this very way.

54. Next, after considering gods and men, let us see how we should make use of things. It is useless for us to have mouthed out precepts, unless we begin by reflecting what opinion we ought to hold concerning everything – concerning poverty, riches, renown, disgrace, citizenship, exile. Let us banish rumour and set a value upon each thing, asking what it is and not what it is called.

55. Now let us turn to a consideration of the virtues. Some persons will advise us to rate prudence very high, to cherish bravery, and to cleave more closely, if possible, to justice than to all other qualities. But this will do us no good if we do not know what virtue is, whether it is simple or compound, whether it is one or more than one, whether its parts are separate or interwoven with one another; whether he who has one virtue possesses the other virtues also; and just what are the distinctions between them.

56. The carpenter does not need to inquire about his art in the light of its origin or of its function, any more than a pantomime need inquire about the art of dancing; if these arts understand themselves, nothing is lacking, for they do not refer to life as a whole. But virtue means the knowledge of other things besides herself: if we would learn virtue we must learn all about virtue.

57. Conduct will not be right unless the will to act is right; for this is the source of conduct. Nor, again, can the will be right without a right attitude of mind; for this is the source of the will. Furthermore, such an attitude of mind will not be found even in the best of men unless he has learned the laws of life as a whole and has worked out a proper judgement about everything, and unless he has reduced facts to a standard of truth. Peace of mind is enjoyed only by those who have attained a fixed and unchanging standard of judgement; the rest of mankind continually ebb and flow in their decisions, floating in a condition where they alternately reject things and seek them.

58. And what is the reason for this tossing to and fro? It is because nothing is clear to them, because they make use of a most unsure criterion – rumour. If you would always desire the same things, you must desire the truth. But one cannot attain the truth without doctrines; for doctrines embrace the whole of life. Things good and evil, honourable and disgraceful, just and unjust, dutiful and undutiful, the virtues and their practice, the possession of comforts, worth and respect, health, strength, beauty, keenness of the senses – all these qualities call for one who is able to appraise them. One should be allowed to know at what value every object is to be rated on the list;

59. for sometimes you are deceived and believe that certain things are worth more than their real value; in fact, so badly are you deceived that you will find you should value at a mere pennyworth those things which we men regard as worth most of all – for example, riches, influence, and power. You will never understand this unless you have investigated the actual standard by which such conditions are relatively rated. As leaves cannot flourish by their own efforts, but need a branch to which they may cling and from which they may draw sap, so your precepts, when taken alone, wither away; they must be grafted upon a school of philosophy.

60. Moreover, those who do away with doctrines do not understand that these doctrines are proved by the very arguments through which they seem to disprove them. For what are these men saying? They are saying that precepts are sufficient to develop life, and that the doctrines of wisdom (in other words, dogmas) are superfluous. And yet this very utterance of theirs is a doctrine just as if I should now remark that one must dispense with precepts on the ground that they are superfluous, that one must make use of doctrines, and that our studies should be directed solely towards this end; thus, by my very statement that precepts should not be taken seriously. I should be uttering a precept.

61. There are certain matters in philosophy which need admonition; there are others which need proof, and a great deal of proof, too, because they are complicated and can scarcely be made clear with the greatest care and the greatest dialectic skill. If proofs are necessary, so are doctrines; for doctrines deduce the truth by reasoning. Some matters are clear, and others are vague: those which the senses and the memory can embrace are clear; those which are outside their scope are vague. But reason is not satisfied by obvious facts; its higher and nobler function is to deal with hidden things. Hidden things need proof; proof cannot come without doctrines; therefore, doctrines are necessary.

62. That which leads to a general agreement, and likewise to a perfect one, is an assured belief in certain facts; but if, lacking this assurance, all things are adrift in our minds, then doctrines are indispensable; for they give to our minds the means of unswerving decision.

63. Furthermore, when we advise a man to regard his friends as highly as himself, to reflect that an enemy may become a friend, to stimulate love in the friend, and to check hatred in the enemy, we add: "This is just and honourable." Now the just and honourable element in our doctrines is embraced by reason; hence reason is necessary; for without it the doctrines cannot exist, either.

64. But let us unite the two. For indeed branches are useless without their roots, and the roots themselves are strengthened by the growths which they have produced. Everyone can understand how useful the hands are; they obviously help us. But the heart, the source of the hands growth and power and motion, is hidden. And I can say the same thing about precepts: they are manifest, while the doctrines of wisdom are concealed. And as only the initiated know the more hallowed portion of the rites, so in philosophy the hidden truths are revealed only to those who are members and have been admitted to the sacred rites. But precepts and other such matters are familiar even to the uninitiated.

65. Posidonius holds that not only precept-giving (there is nothing to prevent my using this word), but even persuasion, consolation, and encouragement, are necessary. To these he adds the investigation of causes (but I fail to see why I should not dare to call it aetiology, since the scholars who mount guard over the Latin language thus use the term as having the right to do so). He remarks that it will also be useful to illustrate each particular virtue; this science Posidonius calls ethology, while others call it characterization. It gives the

signs and marks which belong to each virtue and vice, so that by them distinction may be drawn between like things.

66. Its function is the same as that of precept. For he who utters precepts says: "If you would have self-control, act thus and so?" He who illustrates, says "The man who acts thus and so, and refrains from certain other things, possesses selfcontrol." If you ask what the difference here is, I say that the one gives the precepts of virtue, the other its embodiment. These illustrations, or, to use a commercial term, these samples, have, I confess, a certain utility; just put them up for exhibition well recommended, and you will find men to copy them.

67. Would you, for instance, deem it a useful thing to have evidence given you by which you may recognize a thoroughbred horse, and not be cheated in your purchase or waste your time over a low-bred animal? But how much more useful it is to know the marks of a surpassingly fine soul – marks which one may appropriate from another for oneself!

68. Straightway the foal of the high-bred drove, nursed up in the pastures,

Marches with spirited step, and treads with a delicate motion;

First on the dangerous pathway and into the threatening river,

Trusting himself to the unknown bridge, without fear at its creakings,

Neck thrown high in the air, and clear-cut head, and a belly Spare, back rounded, and breast abounding in courage and muscle.

He, when the clashing of weapons is heard to resound in the distance,

Leaps from his place, and pricks up his ears, and all in a tremble $% \left({{{\bf{n}}_{\rm{c}}}} \right)$

Pours forth the pent-up fire that lay close-shut in his nostrils.

69. Vergil's description, though referring to something else, might perfectly well be the portrayal of a brave man; at any rate, I myself should select no other simile for a hero. If I had to describe Cato, who was unterrified amid the din of civil war, who was first to attack the armies that were already making for the Alps, who plunged face-forward into the civil conflict, this is exactly the sort of expression and attitude which I should give him.

70. Surely none could "march with more spirited step" than one who rose against Caesar and Pompey at the same time and, when some were supporting Caesar's party and others that of Pompey, issued a challenge to both leaders, thus showing that the republic also had some backers. For it is not enough to say of Cato "without fear at its creakings." Of course he is not afraid! He does not quail before real and imminent noises; in the face of ten legions, Gallic auxiliaries, and a motley host of citizens and foreigners, he utters words fraught with freedom, encouraging the Republic not to fail in the struggle for freedom, but to try all hazards; he declares that it is more honourable to fail into servitude than to fail in line with it

71. What force and energy are his! What confidence he displays amid the general panic! He knows that he is the only one whose standing is not in question, and that men do not ask whether Cato is free, but whether he is still among the free. Hence his contempt for danger and the sword. What a pleasure it is to say, in admiration of the unflinching steadiness of a hero who did not totter when the whole state was in ruins:

A breast abounding in courage and muscle!

72. It will be helpful not only to state what is the usual quality of good men, and to outline their figures and features, but also to relate and set forth what men there have been of this kind. We might picture that last and bravest wound of Cato's, through which Freedom breathed her last; or the wise Laelius and his harmonious life with his friend Scipio; or the noble deeds of the Elder Cato at home and abroad; or the wooden couches of Tubero, spread at a public feast, goatskins instead of tapestry, and vessels of earthenware set out for the banquet before the very shrine of Jupiter! What else was this except consecrating poverty on the Capitol? Though I know no other deed of his for which to rank him with the Catos, is this one not enough? It was a censorship, not a banquet.

73. How lamentably do those who covet glory fail to understand what glory is, or in what way it should be sought! On that day the Roman populace viewed the furniture of many men; it marvelled only at that of one! The gold and silver of all the others has been broken up and melted down times without number; but Tubero's earthenware will endure throughout eternity. Farewell.

SENECA LETTER 96. On Facing Hardships

1. Spite of all do you still chafe and complain, not understanding that, in all the evils to which you refer, there is really only one – the fact that you do chafe and complain? If you ask me, I think that for a man there is no misery unless there be something in the universe which he thinks miserable. I shall not endure myself on that day when I find anything unendurable. I am ill; but that is a part of my lot. My slaves have fallen sick, my income has gone off, my house is rickety, I

have been assailed by losses, accidents, toil, and fear; this is a common thing. Nay, that was an understatement; it was an inevitable thing.

2. Such affairs come by order, and not by accident. If you will believe me, it is my inmost emotions that I am just now disclosing to you: when everything seems to go hard and uphill, I have trained myself not merely to obey God, but to agree with His decisions. I follow Him because my soul wills it, and not because I must. Nothing will ever happen to me that I shall receive with ill humour or with a wry face. I shall pay up all my taxes willingly. Now all the things which cause us to groan or recoil, are part of the tax of life – things, my dear Lucilius, which you should never hope and never seek to escape.

3. It was disease of the bladder that made you apprehensive; downcast letters came from you; you were continually getting worse; I will touch the truth more closely, and say that you feared for your life. But come, did you not know, when you prayed for long life, that this was what you were praying for? A long life includes all these troubles, just as a long journey includes dust and mud and rain.

4. "But," you cry, "I wished to live, and at the same time to be immune from all ills." Such a womanish cry does no credit to a man. Consider in what attitude you shall receive this prayer of mine (I offer it not only in a good, but in a noble spirit): "May gods and goddesses alike forbid that Fortune keep you in luxury!"

5. Ask yourself voluntarily which you would choose if some god gave you the choice – life in a café or life in a camp. And yet life, Lucilius, is really a battle. For this reason those who are tossed about at sea, who proceed uphill and downhill over toilsome crags and heights, who go on campaigns that bring the greatest danger, are heroes and front-rank fighters; but persons who live in rotten luxury and ease while others toil, are mere turtle-doves safe only because men despise them. Farewell.

SENECA LETTER 97. On the Degeneracy of the Age

1. You are mistaken, my dear Lucilius, if you think that luxury, neglect of good manners, and other vices of which each man accuses the age in which he lives, are especially characteristic of our own epoch; no, they are the vices of mankind and not of the times. No era in history has ever been free from blame. Moreover, if you once begin to take account of the irregularities belonging to any particular era, you will find – to man's shame be it spoken – that sin never stalked abroad more openly than in Cato's very presence.

2. Would anyone believe that money changed hands in the trial when Clodius was defendant on the charge of secret adultery with Caesar's wife, when he violated the ritual of that sacrifice which is said to be offered on behalf of the people when all males are so rigorously removed outside the precinct, that even pictures of all male creatures are covered up? And yet, money was given to the jury, and, baser even than such a bargain, sexual crimes were demanded of married women and noble youths as a sort of additional contribution.

3. The charge involved less sin than the acquittal; for the defendant on a charge of adultery parcelled out the adulteries, and was not sure of his own safety until he had made the jury criminals like himself. All this was done at the trial in which Cato gave evidence, although that was his sole part therein.

I shall quote Cicero's actual words, because the facts are so bad as to pass belief:

4. "He made assignations, promises, pleas, and gifts. And more than this (merciful Heavens, what an abandoned state of affairs!) upon several of the jury, to round out their reward, he even bestowed the enjoyment of certain women and meetings with noble youths."

5. It is superfluous to be shocked at the bribe; the additions to the bribe were worse. "Will you have the wife of that prig, A.? Very good. Or of B., the millionaire? I will guarantee that you shall lie with her. If you fail to commit adultery, condemn Clodius. That beauty whom you desire shall visit you. I assure you a night in that woman's company without delay; my promise shall be carried out faithfully within the legal time of postponement." It means more to parcel out such crimes than to commit them; it means blackmailing dignified matrons.

6. These jurymen in the Clodius trial had asked the Senate for a guard – a favour which would have been necessary only for a jury about to convict the accused; and their request had been granted. Hence the witty remark of Catulus after the defendant had been acquitted: "Why did you ask us for the guard? Were you afraid of having your money stolen from you?" And yet, amid jests like these he got off unpunished who before the trial was an adulterer, during the trial a pander, and who escaped conviction more vilely than he deserved it.

7. Do you believe that anything could be more disgraceful than such moral standards – when lust could not keep its hands either from religious worship or from the courts of law, when, in the very inquiry which was held in special session by order of the Senate, more crime was committed than investigated? The question at issue was whether one could be safe after committing adultery; it was shown that one could not be safe without committing adultery! 8. All this bargaining took place in the presence of Pompey

8. All this barganning took place in the presence of Pompey and Caesar, of Cicero and Cato, – yes, that very Cato whose presence, it is said, caused the people to refrain from demanding the usual quips and cranks of naked actresses at the Floralia*, – if you can believe that men were stricter in their conduct at a festival than in a court-room! Such things will be done in the future, as they have been done in the past; and the licentiousness of cities will sometimes abate through discipline and fear, never of itself. [* A plebeian festival, held April 28, in honour of Flora, an Italian divinity connected with Ceres and Venus.]

9. Therefore, you need not believe that it is we who have yielded most to lust and least to law. For the young men of to-day live far more simple lives than those of an epoch when a defendant would plead not guilty to an adultery charge before his judges, and his judges admit it before the defendant, when debauchery was practised to secure a verdict, and when Clodius, befriended by the very vices of which he was guilty, played the procurer during the actual hearing of the case. Could one believe this? He to whom one adultery brought condemnation was acquitted because of many.

10. All ages will produce men like Clodius, but not all ages men like Cato. We degenerate easily, because we lack neither guides nor associates in our wickedness, and the wickedness goes on of itself, even without guides or associates. The road to vice is not only downhill, but steep; and many men are rendered incorrigible by the fact that, while in all other crafts errors bring shame to good craftsmen and cause vexation to those who go astray, the errors of life are a positive source of pleasure.

11. The pilot is not glad when his ship is thrown on her beam-ends; the physician is not glad when he buries his patient; the orator is not glad when the defendant loses a case through the fault of his advocate; but on the other hand every man enjoys his own crimes. A. delights in an intrigue – for it was the very difficulty which attracted him thereto. B. delights in forgery and theft, and is only displeased with his sin when his sin has failed to hit the mark. And all this is the result of perverted habits.

12. Conversely, however, in order that you may know that there is an idea of good conduct present subconsciously in souls which have been led even into the most depraved ways, and that men are not ignorant of what evil is but indifferent – I say that all men hide their sins, and, even though the issue be successful, enjoy the results while concealing the sins themselves. A good conscience, however, wishes to come forth and be seen of men; wickedness fears the very shadows.

13. Hence I hold Epicurus's saying to be most apt: "That the guilty may haply remain hidden is possible, that he should be sure of remaining hidden is not possible," or, if you think that the meaning can be made more clear in this way: "The reason that it is no advantage to wrong-doers to remain hidden is that even though they have the good fortune they have not the assurance of remaining so." This is what I mean: crimes can be well guarded; free from anxiety they cannot be.

14. This view, I maintain, is not at variance with the principles of our school, if it be so explained. And why? Because the first and worst penalty for sin is to have committed sin; and crime, though Fortune deck it out with her favours, though she protect and take it in her charge, can never go unpunished; since the punishment of crime lies in the crime itself. But none the less do these second penalties press close upon the heels of the first – constant fear, constant terror, and distrust in one's own security. Why, then, should I set wickedness free from such a punishment? Why should I not always leave it trembling in the balance?

15. Let us disagree with Epicurus on the one point, when he declares that there is no natural justice, and that crime should be avoided because one cannot escape the fear which results therefrom; let us agree with him on the other – that bad deeds are lashed by the whip of conscience, and that conscience is tortured to the greatest degree because unending anxiety drives and whips it on, and it cannot rely upon the guarantors of its own peace of mind. For this, Epicurus, is the very proof that we are by nature reluctant to commit crime, because even in circumstances of safety there is no one who does not feel fear.

16. Good luck frees many men from punishment, but no man from fear. And why should this be if it were not that we have ingrained in us a loathing for that which Nature has condemned? Hence even men who hide their sins can never count upon remaining hidden; for their conscience convicts them and reveals them to themselves. But it is the property of guilt to be in fear. It had gone ill with us, owing to the many crimes which escape the vengeance of the law and the prescribed punishments, were it not that those grievous offences against nature must pay the penalty in ready money, and that in place of suffering the punishment comes fear. Farewell. SENECA LETTER 98. On the Fickleness of Fortune

1. You need never believe that anyone who depends upon happiness is happy! It is a fragile support — this delight in adventitious things; the joy which entered from without will some day depart. But that joy which springs wholly from oneself is leal and sound; it increases and attends us to the last; while all other things which provoke the admiration of the crowd are but temporary Goods. You may reply: "What do you mean? Cannot such things serve both for utility and for delight?" Of course. But only if they depend on us, and not we on them.

2. All things that Fortune looks upon become productive and pleasant, only if he who possesses them is in possession also of himself, and is not in the power of that which belongs to him. For men make a mistake, my dear Lucilius, if they hold that anything good, or evil either, is bestowed upon us by Fortune; it is simply the raw material of Goods and Ills that she gives to us – the sources of things which, in our keeping, will develop into good or ill. For the soul is more powerful than any sort of Fortune; by its own agency it guides its affairs in either direction, and of its own power it can produce a happy life, or a wretched one.

3. A bad man makes everything bad – even things which had come with the appearance of what is best; but the upright and honest man corrects the wrongs of Fortune, and softens hardship and bitterness because he knows how to endure them; he likewise accepts prosperity with appreciation and moderation, and stands up against trouble with steadiness and courage. Though a man be prudent, though he conduct all his interests with well-balanced judgement, though he attempt nothing beyond his strength, he will not attain the Good which is unalloyed and beyond the reach of threats, unless he is sure in dealing with that which is unsure.

4. For whether you prefer to observe other men (and it is easier to make up one's mind when judging the affairs of others), or whether you observe yourself, with all prejudice laid aside, you will perceive and acknowledge that there is no utility in all these desirable and beloved things, unless you equip yourself in opposition to the fickleness of chance and its consequences, and unless you repeat to yourself often and uncomplainingly, at every mishap, the words: "Heaven decreed it otherwise!"

5. Nay rather, to adopt a phrase which is braver and nearer the truth – one on which you may more safely prop your spirit – say to yourself, whenever things turn out contrary to your expectation: "Heaven decreed better!" If you are thus poised, nothing will affect you and a man will be thus poised if he reflects on the possible ups and downs in human affairs before he feels their force, and if he comes to regard children, or wife, or property, with the idea that he will not necessarily possess them always and that he will not necessarily possess the ceases to possess them.

6. It is tragic for the soul to be apprehensive of the future and wretched in anticipation of wretchedness, consumed with an anxious desire that the objects which give pleasure may remain in its possession to the very end. For such a soul will never be at rest; in waiting for the future it will lose the present blessings which it might enjoy. And there is no difference between grief for something lost and the fear of losing it.

7. But I do not for this reason advise you to be indifferent. Rather do you turn aside from you whatever may cause fear. Be sure to foresee whatever can be foreseen by planning. Observe and avoid, long before it happens, anything that is likely to do you harm. To effect this your best assistance will be a spirit of confidence and a mind strongly resolved to endure all things. He who can bear Fortune, can also beware of Fortune. At any rate, there is no dashing of billows when the sea is calm. And there is nothing more wretched or foolish than premature fear. What madness it is to anticipate one's troubles!

8. In fine, to express my thoughts in brief compass and portray to you those busybodies and self-tormentors – they are as uncontrolled in the midst of their troubles as they are before them. He suffers more than is necessary, who suffers before it is necessary; such men do not weigh the amount of their suffering, by reason of the same failing which prevents them from being ready for it; and with the same lack of restrain they fondly imagine that their luck will last for ever, and fondly imagine that their gains are bound to increase as well as merely continue. They forget this spring-board on which mortal things are tossed, and they guarantee for themselves exclusively a steady continuance of the gifts of chance.

9. For this very reason I regard as excellent the saying of Metrodorus, in a letter of consolation to his sister on the loss of her son, a lad of great promise: "All the Good of mortals is mortal." He is referring to those Goods towards which men rush in shoals. For the real Good does not perish; it is certain and lasting and it consists of wisdom and virtue; it is the only immortal thing that falls to mortal lot.

10. But men are so wayward, and so forgetful of their goal and of the point toward which every day jostles them, that they are surprised at losing anything, although some day they are bound to lose everything. Anything of which you are entitled the owner is in your possession but is not your own; for there is no strength in that which is weak, nor anything lasting and invincible in that which is frail. We must lose our lives as surely as we lose our property, and this, if we understand the truth, is itself a consolation. Lose it with equanimity; for you must lose your life also.

11. What resource do we find, then, in the face of these losses? Simply this – to keep in memory the things we have lost, and not to suffer the enjoyment which we have derived from them to pass away along with them. To have may be taken from us, to have had, never. A man is thankless in the highest degree if, after losing something, he feels no obligation for having received it. Chance robs us of the thing, but leaves us its use and its enjoyment – and we have lost this if we are so unfair as to regret.

12. Just say to yourself: "Of all these experiences that seem so frightful, none is insuperable. Separate trials have been overcome by many: fire by Mucius, crucifixion by Regulus, poison by Socrates, exile by Rutilus, and a sword-inflicted death by Cato; therefore, let us also overcome something."

13. Again, those objects which attract the crowd under the appearance of beauty and happiness, have been scorned by many men and on many occasions. Fabricius when he was general refused riches, and when he was censor branded them with disapproval. Tubero deemed poverty worthy both of himself and of the deity on the Capitol when, by the use of earthenware dishes at a public festival, he showed that man should be satisfied with that which the gods could still use. The elder Sextius rejected the honours of office; he was born with an obligation to take part in public affairs, and yet would not accept the broad stripe even when the deified Julius offered it to him. For he understood that what can be given can also be taken away. Let us also, therefore, carry out some courageous act of our own accord; let us be included among the ideal types of history.

14. Why have we been slack? Why do we lose heart? That which could be done, can be done, if only we purify our souls and follow Nature; for when one strays away from Nature one is compelled to crave, and fear, and be a slave to the things of chance. We may return to the true path; we may be restored to our proper state; let us therefore be so, in order that we may be able to endure pain, in whatever form it attacks our bodies, and say to Fortune: "You have to deal with a man; seek someone whom you can conquer!"

15. By these words, and words of a like kind, the malignity of the ulcer is quieted down; and I hope indeed that it can be reduced, and either cured or brought to a stop, and grow old along with the patient himself. I am, however, comfortable in my mind regarding him; what we are now discussing is our own loss – the taking-off of a most excellent old man. For he himself has lived a full life, and anything additional may be craved by him, not for his own sake, but for the sake of those who need his services.

16. In continuing to live, he deals generously. Some other person might have put an end to these sufferings; but our friend considers it no less base to flee from death than to flee towards death. "But," comes the answer, "if circumstances warrant, shall he not take his departure?" Of course, if he can no longer be of service to anyone, if all his business will be to deal with pain.

17. This, my dear Lucilius, is what we mean by studying philosophy while applying it, by practising it on truth – note what courage a prudent man possesses against death, or against pain, when the one approaches and the other weighs heavily. What ought to be done must be learned from one who does it.

18. Up to now we have dealt with arguments – whether any man can resist pain, or whether the approach of death can cast down even great souls. Why discuss it further? Here is an immediate fact for us to tackle – death does not make our friend braver to face pain, nor pain to face death. Rather does he trust himself in the face of both; he does not suffer with resignation because he hopes for death, nor does he die gladly because he is tired of suffering. Pain he endures, death he awaits. Farewell.

SENECA LETTER 99. On Consolation to the Bereaved

1. I enclose a copy of the letter which I wrote to Marullus [Possibly Iunius Marullus, consul designatus in A.D. 62 (Tac. Ann. 14. 48).] at the time when he had lost his little son and was reported to be rather womanish in his grief – a letter in which I have not observed the usual form of condolence: for I did not believe that he should be handled gently, since in my opinion he deserved criticism rather than consolation. When a man is stricken and is finding it most difficult to endure a grievous wound, one must humour him for a while; let him satisfy his grief or at any rate work off the first shock:

2. but those who have assumed an indulgence in grief should be rebuked forthwith, and should learn that there are certain follies even in tears. "Is it solace that you look for? Let me give you a scolding instead! You are like a woman in the way you take your son's death; what would you do if you had lost an intimate friend? A son, a little child of unknown promise, is dead; a fragment of time has been lost.

3. We hunt out excuses for grief; we would even utter unfair complaints about Fortune, as if Fortune would never give us just reason for complaining! But I had really thought that you possessed spirit enough to deal with concrete troubles, to say nothing of the shadowy troubles over which men make moan through force of habit. Had you lost a friend (which is the greatest blow of all), you would have had to endeavour rather to rejoice because you had possessed him than to mourn because you had lost him.

4. "But many men fail to count up how manifold their gains have been, how great their rejoicings. Grief like yours has this among other evils: it is not only useless, but thankless. Has it then all been for nothing that you have had such a friend? During so many years, amid such close associations, after such intimate communion of personal interests, has nothing been accomplished? Do you bury friendship along with a friend? And why lament having lost him, if it be of no avail to have possessed him? Believe me, a great part of those we have loved, though chance has removed their persons, still abides with us. The past is ours, and there is nothing more secure for us than that which has been.

5. We are ungrateful for past gains, because we hope for the future, as if the future – if so be that any future is ours – will not be quickly blended with the past. People set a narrow limit to their enjoyments if they take pleasure only in the present; both the future and the past serve for our delight – the one with anticipation, and the other with memories but the one is contingent and may not come to pass, while the other must have been. "What madness it is, therefore, to lose our grip on that which is the surest thing of all? Let us rest content with the pleasures we have quaffed in past days, if only, while we quaffed them, the soul was not pierced like a sieve, only to lose again whatever it had received.

6. There are countless cases of men who have without tears buried sons in the prime of manhood – men who have returned from the funeral pyre to the Senate chamber, or to any other official duties, and have straightway busied themselves with something else. And rightly; for in the first place it is idle to grieve if you get no help from grief. In the second place, it is unfair to complain about what has happened to one man but is in store for all. Again, it is foolish to lament one's loss, when there is such a slight interval between the lost and the loser. Hence we should be more resigned in spirit, because we follow closely those whom we have lost. 7. "Note the rapidity of Time – that swiftest of things:

7. "Note the rapidity of Time – that swiftest of things; consider the shortness of the course along which we hasten at top speed; mark this throng of humanity, all straining toward the same point with briefest intervals between them – even when they seem longest; he whom you count as passed away has simply posted on ahead. And what is more irrational than to bewail your predecessor, when you yourself must travel on the same journey?

8. Does a man bewail an event which he knew would take place? Or, if he did not think of death as man's lot, he has but cheated himself. Does a man bewail an event which he has been admitting to be unavoidable? Whoever complains about the death of anyone, is complaining that he was a man. Everyone is bound by the same terms: he who is privileged to be born. is destined to die.

9. Periods of time separate us, but death levels us. The period which lies between our first day and our last is shifting and uncertain: if you reckon it by its troubles, it is long even to a lad, if by its speed, it is scanty even to a greybeard. Everything is slippery, treacherous, and more shifting than any weather. All things are tossed about and shift into their opposites at the bidding of Fortune; amid such a turmoil of mortal affairs nothing but death is surely in store for anyone. And yet all men complain about the one thing wherein none of them is deceived.

10. 'But he died in boyhood.' I am not yet prepared to say that he who quickly comes to the end of his life has the better of the bargain; let us turn to consider the case of him who has grown to old age. How very little is he superior to the child! Place before your mind's eye the vast spread of time's abyss, and consider the universe; and then contrast our so-called human life with infinity: you will then see how scant is that for which we pray, and which we seek to lengthen.

11. How much of this time is taken up with weeping, how much with worry! How much with prayers for death before death arrives, how much with our health, how much with our fears! How much is occupied by our years of inexperience or of useless endeavour! And half of all this time is wasted in sleeping. Add, besides, our toils, our griefs, our dangers – and you will comprehend that even in the longest life real living is the least portion thereof.

12. Nevertheless, who will make such an admission as: 'A man is not better off who is allowed to return home quickly, whose journey is accomplished before he is wearied out?' Life is neither a Good nor an Evil; it is simply the place where good and evil exist. Hence this little boy has lost nothing except a hazard where loss was more assured than gain. He

might have turned out temperate and prudent; he might, with your fostering care, have been moulded to a better standard; but (and this fear is more reasonable) he might have become just like the many.

13. Note the youths of the noblest lineage whose extravagance has flung them into the arena; note those men who cater to the passions of themselves and others in mutual lust, whose days never pass without drunkenness or some signal act of shame; it will thus be clear to you that there was more to fear than to hope for. "For this reason you ought not to invite excuses for grief or aggravate slight burdens by getting indignant.

14. I am not exhorting you to make an effort and rise to great heights; for my opinion of you is not so low as to make me think that it is necessary for you to summon every bit of your virtue to face this trouble. Yours is not pain; it is a mere sting – and it is you yourself who are turning it into pain. "Of a surety philosophy has done you much service if you can bear courageously the loss of a boy who was as yet better known to his nurse than to his father!

15. And what, then? Now, at this time, am I advising you to be hard-hearted, desiring you to keep your countenance unmoved at the very funeral ceremony, and not allowing your soul even to feel the pinch of pain? By no means. That would mean lack of feeling rather than virtue – to behold the burial ceremonies of those near and dear to you with the same expression as you beheld their living forms, and to show no emotion over the first bereavement in your family. But suppose that I forbade you to show emotion; there are certain feelings which claim their own rights. Tears fall, no matter how we try to check them, and by being shed they ease the soul.

16. What, then, shall we do? Let us allow them to fall, but let us not command them do so; let us weep according as emotion floods our eyes, but not as much as mere imitation shall demand. Let us, indeed, add nothing to natural grief, nor augment it by following the example of others. The display of grief makes more demands than grief itself: how few men are sad in their own company! They lament the louder for being heard; persons who are reserved and silent when alone are stirred to new paroxysms of tears when they behold others near them! At such times they lay violent hands upon their own persons, – though they might have done this more easily if no one were present to check them; at such times they pray for death; at such times they toss themselves from their couches. But their grief slackens with the departure of onlookers.

17. In this matter, as in others also, we are obsessed by this fault – conforming to the pattern of the many, and regarding convention rather than duty. We abandon nature and surrender to the mob – who are never good advisers in anything, and in this respect as in all others are most inconsistent. People see a man who bears his grief bravely: they call him undutiful and savage-hearted; they see a man who collapses and clings to his dead: they call him womanish and weak.

18. Everything, therefore, should be referred to reason. But nothing is more foolish than to court a reputation for sadness and to sanction tears; for I hold that with a wise man some tears fall by consent, others by their own force.

"I shall explain the difference as follows: When the first news of some bitter loss has shocked us, when we embrace the form that will soon pass from our arms to the funeral flames – then tears are wrung from us by the necessity of Nature, and the life-force, smitten by the stroke of grief, shakes both the whole body, and the eyes also, from which it presses out and causes to flow the moisture that lies within.

19. Tears like these fall by a forcing-out process, against our will; but different are the tears which we allow to escape when we muse in memory upon those whom we have lost. And there is in them a certain sweet sadness when we remember the sound of a pleasant voice, a genial conversation, and the busy duties of yore; at such a time the eyes are loosened, as it were, with joy. This sort of weeping we indulge; the former sort overcomes us.

20. "There is, then, no reason why, just because a group of persons is standing in your presence or sitting at your side, you should either check or pour forth your tears; whether restrained or outpoured, they are never so disgraceful as when feigned. Let them flow naturally. But it is possible for tears to flow from the eyes of those who are quiet and at peace. They often flow without impairing the influence of the wise man – with such restraint that they show no want either of feeling or of self-respect.

21. We may, I assure you, obey Nature and yet maintain our dignity. I have seen men worthy of reverence, during the burial of those near and dear, with countenances upon which love was written clear even after the whole apparatus of mourning was removed, and who showed no other conduct than that which was allowed to genuine emotion. There is a comeliness even in grief. This should be cultivated by the wise man; even in tears, just as in other matters also, there is a certain sufficiency; it is with the unwise that sorrows, like joys, gush over.

22. "Accept in an unruffled spirit that which is inevitable. What can happen that is beyond belief? Or what that is new? How many men at this very moment are making arrangements for funerals! How many are purchasing grave-clothes! How many are mourning, when you yourself have finished mourning! As often as you reflect that your boy has ceased to be, reflect also upon man, who has no sure promise of anything, whom Fortune does not inevitably escort to the confines of old age, but lets him go at whatever point she sees fit.

23. You may, however, speak often concerning the departed, and cherish his memory to the extent of your power. This memory will return to you all the more often if you welcome its coming without bitterness; for no man enjoys converse with one who is sorrowful, much less with sorrow itself. And whatever words, whatever jests of his, no matter how much of a child he was, may have given you pleasure to hear – these I would have you recall again and again; assure yourself confidently that he might have fulfilled the hopes which you, his father, had entertained.

24. Indeed, to forget the beloved dead, to bury their memory along with their bodies, to bewail them bounteously and afterwards think of them but scantily – this is the mark of a soul below that of man. For that is the way in which birds and beasts love their young; their affection is quickly roused and almost reaches madness, but it cools away entirely when its object dies. This quality does not befit a man of sense; he should continue to remember, but should cease to mourn.

25. And in no wise do I approve of the remark of Metrodorus – that there is a certain pleasure akin to sadness, and that one should give chase thereto at such times as these. I am quoting the actual words of Metrodorus

26. I have no doubt what your feelings will be in these matters; for what is baser than to 'chase after' pleasure in the very midst of mourning – nay rather by means of mourning – and even amid one's tears to hunt out that which will give pleasure? These are the men who accuse us [i.e. the Stoics.] of too great strictness, slandering our precepts because of supposed harshness – because (say they) we declare that grief should either not be given place in the soul at all, or else should be driven out forthwith. But which is the more incredible or inhuman – to feel no grief at the loss of one's friend, or to go a-hawking after pleasure in the midst of grief?

27. That which we Stoics advise, is honourable; when emotion has prompted a moderate flow of tears, and has, so to speak, ceased to effervesce, the soul should not be surrendered to grief. But what do you mean, Metrodorus, by saying that with our very grief there should be a blending of pleasure? That is the sweetmeat method of pacifying children; that is the way we still the cries of infants, by pouring milk down their throats! "Even at the moment when your son's body is on the pyre, or your friend breathing his last, will you not suffer your pleasure? Which is the more honourable – to remove grief from your soul, or to admit pleasure even into the company of grief? Did I say 'admit'? Nay, I mean 'chase after,' and from the hands, too, of grief itself.

28. Metrodorus says: 'There is a certain pleasure which is related to sadness.' We Stoics may say that, but you may not. The only Good which you recognize, is pleasure, and the only Evil, pain; and what relationship can there be between a Good and an Evil? But suppose that such a relationship does exist; now, of all times, is it to be rooted out? Shall we examine grief also, and see with what elements of delight and pleasure it is surrounded?

29. Certain remedies, which are beneficial for some parts of the body, cannot be applied to other parts because these are, in a way, revolting and unfit; and that which in certain cases would work to a good purpose without any loss to one's selfrespect, may become unseemly because of the situation of the wound. Are you not, similarly, ashamed to cure sorrow by pleasure? No, this sore spot must be treated in a more drastic way. This is what you should preferably advise: that no sensation of evil can reach one who is dead; for if it can reach him. he is not dead.

30. And I say that nothing can hurt him who is as naught; for if a man can be hurt, he is alive. Do you think him to be badly off because he is no more, or because he still exists as somebody? And yet no torment can come to him from the fact that he is no more – for what feeling can belong to one who does not exist? – nor from the fact that he exists; for he has escaped the greatest disadvantage that death has in it – namely, non-existence.

31. "Let us say this also to him who mourns and misses the untimely dead: that all of us, whether young or old, live, in comparison with eternity, on the same level as regards our shortness of life. For out of all time there comes to us less than what any one could call least, since 'least' is at any rate some part; but this life of ours is next to nothing, and yet (fools that we are!), we marshal it in broad array!

32. "These words I have written to you, not with the idea that you should expect a cure from me at such a late date – for it is clear to me that you have told yourself everything that you will read in my letter – but with the idea that I should

rebuke you even for the slight delay during which you lapsed from your true self, and should encourage you for the future, to rouse your spirit against Fortune and to be on the watch for all her missiles, not as if they might possibly come, but as if they were bound to come." Farewell.

SENECA LETTER 100. On the Writings of Fabianus

1. You write me that you have read with the greatest eagerness the work by Fabianus Papirius entitled The Duties of a Citizen, and that it did not come up to your expectations; then, forgetting that you are dealing with a philosopher, you proceed to criticize his style.

Suppose, now, that your statement is true – that he pours forth rather than places his words; let me, however, tell you at the start that this trait of which you speak has a peculiar charm, and that it is a grace appropriate to a smoothlygliding style. For, I maintain, it matters a great deal whether it tumbles forth, or flows along. Moreover, there is a deal of difference in this regard also – as I shall make clear to you:

2. Fabianus seems to me to have not so much an "efflux" as a "flow" of words: so copious is it, without confusion, and yet not without speed. This is indeed what his style declares and announces – that he has not spent a long time in working his matter over and twisting it into shape. But even supposing the facts are as you would have them; the man was building up character rather than words, and was writing those words for the mind rather than for the ear.

3. Besides, had he been speaking them in his own person, you would not have had time to consider the details – the whole work would have so swept you along. For as a rule that which pleases by its swiftness is of less value when taken in hand for reading.

Nevertheless, this very quality, too, of attracting at first sight is a great advantage, no matter whether careful investigation may discover something to criticize.

4. If you ask me, I should say that he who has forced approval is greater than he who has earned it; and yet I know that the latter is safer, I know that he can give more confident guarantees for the future. A meticulous manner of writing does not suit the philosopher; if he is timid as to words, when will he ever be brave and steadfast, when will he ever really show his worth?

5. Fabianus's style was not careless, it was assured. That is why you will find nothing shoddy in his work: his words are well chosen and yet not hunted for; they are not unnaturally inserted and inverted, according to the present-day fashion; but they possess distinction, even though they are taken from ordinary speech. There you have honourable and splendid ideas, not fettered into aphorisms, but spoken with greater freedom. We shall of course notice passages that are not sufficiently pruned, not constructed with sufficient care, and lacking the polish which is in vogue nowaday; but after regarding the whole, you will see that there are no futile subtleties of argument.

6. There may, doubtless, be no variety of marbles, no watersupply which flows from one apartment to another, no "pauper-rooms," or any other device that luxury adds when ill content with simple charms; but, in the vulgar phrase, it is "a good house to live in." Furthermore, opinions vary with regard to the style. Some wish it to be polished down from all roughness; and some take so great a pleasure in the abrupt manner that they would intentionally break up any passage which may by chance spread itself out more smoothly, scattering the closing words in such a way that the sentences may result unexpectedly.

7. Read Cicero: his style has unity; it moves with a modulated pace, and is gentle without being degenerate. The style of Asinius Pollio, on the other hand, is "bumpy," jerky, leaving off when you least expect it. And finally, Cicero always stops gradually; while Pollio breaks off, except in the very few cases where he cleaves to a definite rhythm and a single pattern.

8. In addition to this, you say that everything in Fabianus seems to you commonplace and lacking in elevation; but I myself hold that he is free from such a fault. For that style of his is not commonplace, but simply calm and adjusted to his peaceful and well-ordered mind – not on a low level but on an even plane. There is lacking the verve and spur of the orator (for which you are looking), and a sudden shock of epigrams. But look, please, at the whole work, how well-ordered it is: there is a distinction in it. His style does not possess, but will suggest, dignity.

9. Mention someone whom you may rank ahead of Fabianus. Cicero, let us say, whose books on philosophy are almost as numerous as those of Fabianus. I will concede this point; but it is no slight thing to be less than the greatest. Or Asinius Pollio, let us say. I will yield again, and content myself by replying: "It is a distinction to be third in so great a field." You may also include Livy; for Livy wrote both dialogues (which should be ranked as history no less than as philosophy), and works which professedly deal with philosophy. I shall yield in the case of Livy also. But consider how many writers Fabianus outranks, if he is surpassed by three only – and those three the greatest masters of eloquence!

10. But, it may be said, he does not offer everything: though his style is elevated, it is not strong; though it flows forth copiously, it lacks force and sweep; it is not translucent, but it is lucid. "One would fail," you urge, "to find therein any rugged denunciation of vice, any courageous words in the face of danger, any proud defiance of Fortune, any scornful threats against self-seeking. I wish to see luxury rebuked, lust condemned, waywardness crushed out. Let him show us the keenness of oratory, the loftiness of tragedy, the subtlety of comedy." You wish him to rely on that pettiest of things, phraseology; but he has sworn allegiance to the greatness of his subject and draws eloquence after him as a sort of shadow, but not of set purpose.

11. Our author will doubtless not investigate every detail, nor subject it to analysis, nor inspect and emphasize each separate word. This I admit. Many phrases will fall short, or will fail to strike home, and at times the style will slip along indolently; but there will be plenty of light throughout the work; there will be long stretches which will not weary the reader. And, finally, he will offer this quality of making it clear to you that he meant what he wrote. You will understand that his aim was to have you know what pleased him, rather than that he should please you. All his work makes for progress and for sanity, without any search for applause.

12. I do not doubt that his writings are of the kind I have described, although I am harking back to him rather than retaining a sure memory of him, and although the general tone of his writings remains in my mind, not from a careful and recent perusal, but in outline, as is natural after an acquaintance of long ago. But certainly, whenever I heard him lecture, such did his work seem to me – not solid but full, the kind which would inspire young men of promise and rouse their ambition to become like him, without making them hopeless of surpassing him; and this method of encouragement seems to me the most helpful of all. For it is disheartening to inspire in a man the desire, and to take away from him the hope, of emulation. At any rate, his language was fluent, and though one might not approve every detail, the general effect was noble. Farewell.

SENECA LETTER 101. On the Futility of Planning Ahead

1. Every day and every hour reveal to us what a nothing we are, and remind us with some fresh evidence that we have forgotten our weakness; then, as we plan for eternity, they compel us to look over our shoulders at Death. Do you ask me what this preamble means? It refers to Cornelius Senecio, a distinguished and capable Roman knight, whom you knew: from humble beginnings he had advanced himself to fortune, and the rest of the path already lay downhill before him. For it is easier to grow in dignity than to make a start;

2. and money is very slow to come where there is poverty; until it can creep out of that, it goes halting. Senecio was already bordering upon wealth, helped in that direction by two very powerful assets – knowing how to make money and how to keep it also; either one of these gifts might have made him a rich man.

3. Here was a person who lived most simply, careful of health and wealth alike. He had, as usual, called upon me early in the morning, and had then spent the whole day, even up to nightfall, at the bedside of a friend who was seriously and hopelessly ill. After a comfortable dinner, he was suddenly seized with an acute attack of quinsy, and, with the breath clogged tightly in his swollen throat, barely lived until daybreak. So within a very few hours after the time when he had been performing all the duties of a sound and healthy man, he passed away.

4. He who was venturing investments by land and sea, who had also entered public life and left no type of business untried, during the very realization of financial success and during the very onrush of the money that flowed into his coffers, was snatched from the world!

Graft now thy pears, Meliboeus, and set out thy vines in their order!

But how foolish it is to set out one's life, when one is not even owner of the morrow! O what madness it is to plot out far-reaching hopes! To say: "I will buy and build, loan and call in money, win titles of honour, and then, old and full of years, I will surrender myself to a life of ease."

5. Believe me when I say that everything is doubtful, even for those who are prosperous. No one has any right to draw for himself upon the future. The very thing that we grasp slips through our hands, and chance cuts into the actual hour which we are crowding so full. Time does indeed roll along by fixed law, but as in darkness; and what is it to me whether Nature's course is sure, when my own is unsure?

6. We plan distant voyages and long-postponed homecomings after roaming over foreign shores, we plan for military service and the slow rewards of hard campaigns, we canvass for governorships and the promotions of one office after another – and all the while death stands at our side; but since we never think of it except as it affects our neighbour, instances of mortality press upon us day by day, to remain in our minds only as long as they stir our wonder.

7. Yet what is more foolish than to wonder that something which may happen every day has happened on any one day? There is indeed a limit fixed for us, just where the remorseless law of Fate has fixed it; but none of us knows how near he is to this limit. Therefore, let us so order our minds as if we had come to the very end. Let us postpone nothing. Let us balance life's account every day.

8. The greatest flaw in life is that it is always imperfect, and that a certain part of it is postponed. One who daily puts the finishing touches to his life is never in want of time. And yet, from this want arise fear and a craving for the future which eats away the mind. There is nothing more wretched than worry over the outcome of future events; as to the amount or the nature of that which remains, our troubled minds are set a-flutter with unaccountable fear.

9. How, then, shall we avoid this vacillation? In one way only, — if there be no reaching forward in our life, if it is withdrawn into itself. For he only is anxious about the future, to whom the present is unprofitable. But when I have paid my soul its due, when a soundly-balanced mind knows that a day differs not a whit from eternity — whatever days or problems the future may bring — then the soul looks forth from lofty heights and laughs heartily to itself when it thinks upon the ceaseless succession of the ages. For what disturbance can result from the changes and the instability of Chance, if you are sure in the face of that which is unsure?

10. Therefore, my dear Lucilius, begin at once to live, and count each separate day as a separate life. He who has thus prepared himself, he whose daily life has been a rounded whole, is easy in his mind; but those who live for hope alone find that the immediate future always slips from their grasp and that greed steals along in its place, and the fear of death, a curse which lays a curse upon everything else. Thence came that most debased of prayers, in which Maecenas does not refuse to suffer weakness, deformity, and as a climax the pain of crucifixion provided only that he may prolong the breath of life amid these sufferings:

11. Fashion me with a palsied hand,

Weak of foot, and a cripple;

Build upon me a crook-backed hump;

Shake my teeth till they rattle;

All is well, if my life remains. Save, oh, save it, I pray you,

Though I sit on the piercing cross!

12. There he is, praying for that which, if it had befallen him, would be the most pitiable thing in the world! And seeking a postponement of suffering, as if he were asking for life! I should deem him most despicable had he wished to live up to the very time of crucifixion: "Nay," he cries, "you may weaken my body if you will only leave the breath of life in my battered and ineffective carcase! Maim me if you will, but allow me, misshapen and deformed as I may be, just a little more time in the world! You may nail me up and set my seat upon the piercing cross!" Is it worth while to weigh down upon one's own wound, and hang impaled upon a gibbet, that one may but postpone something which is the balm of troubles, the end of punishment? Is it worth all this to possess the breath of life only to give it up?

13. What would you ask for Maecenas but the indulgence of Heaven? What does he mean by such womanish and indecent verse? What does he mean by making terms with panic fear? What does he mean by begging so vilely for life? He cannot ever have heard Vergil read the words:

Tell me, is Death so wretched as that?

He asks for the climax of suffering, and – what is still harder to bear – prolongation and extension of suffering; and what does he gain thereby? Merely the boon of a longer existence. But what sort of life is a lingering death?

14. Can anyone be found who would prefer wasting away in pain, dying limb by limb, or letting out his life drop by drop, rather than expiring once for all? Can any man be found willing to be fastened to the accursed tree, long sickly, already deformed, swelling with ugly tumours on chest and shoulders, and draw the breath of life amid long-drawn-out agony? I think he would have many excuses for dying even before mounting the cross!

Deny, now, if you can, that Nature is very generous in making death inevitable.

15. Many men have been prepared to enter upon still more shameful bargains: to betray friends in order to live longer themselves, or voluntarily to debase their children and so enjoy the light of day which is witness of all their sins. We must get rid of this craving for life, and learn that it makes no difference when your suffering comes, because at some time you are bound to suffer. The point is, not how long you live, but how nobly you live. And often this living nobly means that you cannot live long. Farewell.

SENECA LETTER 102. On the Intimations of Our Immortality

1. Just as a man is annoying when he rouses a dreamer of pleasant dreams (for he is spoiling a pleasure which may be unreal but nevertheless has the appearance of reality), even so your letter has done me an injury. For it brought me back abruptly, absorbed as I was in agreeable meditation and ready to proceed still further if it had been permitted me.

2. I was taking pleasure in investigating the immortality of souls, nay, in believing that doctrine. For I was lending a ready ear to the opinions of the great authors, who not only approve but promise this most pleasing condition. I was giving myself over to such a noble hope; for I was already weary of myself, beginning already to despise the fragments of my shattered existence*, and feeling that I was destined to pass over into that infinity of time and the heritage of eternity, when I was suddenly awakened by the receipt of your letter, and lost my lovely dream. But, if I can once dispose of you, I shall reseek and rescue it. [* Seneca, worn out by his political experiences, was at this time not less than sixty-seven years of age.]

3. There was a remark, at the beginning of your letter, that I had not explained the whole problem — wherein I was endeavouring to prove one of the beliefs of our school, that the renown which falls to one's lot after death is a good; for I had not solved the problem with which we are usually confronted: "No good can consist of things that are distinct and separate; yet renown consists of such things."

4. What you are asking about, my dear Lucilius, belongs to another topic of the same subject, and that is why I had postponed the arguments, not only on this one topic, but on other topics which also covered the same ground. For, as you know, certain logical questions are mingled with ethical ones. Accordingly, I handled the essential part of my subject which has to do with conduct – as to whether it is foolish and useless to be concerned with what lies beyond our last day, or whether our goods die with us and there is nothing left of him who is no more, or whether any profit can be attained or attempted beforehand out of that which, when it comes, we shall not be capable of feeling.

5. All these things have a view to conduct, and therefore they have been inserted under the proper topic. But the remarks of dialecticians in opposition to this idea had to be sifted out, and were accordingly laid aside. Now that you demand an answer to them all, I shall examine all their statements, and then refute them singly.

6. Unless, however, I make a preliminary remark, it will be impossible to understand my rebuttals. And what is that preliminary remark? Simply this: there are certain continuous bodies, such as a man; there are certain composite bodies, – as ships, houses, and everything which is the result of joining separate parts into one sum total: there are certain others made up of things that are distinct, each member remaining separate – like an army, a populace, or a senate. For the persons who go to make up such bodies are united by virtue of law or function; but by their nature they are distinct and individual. Well, what further prefatory remarks do I still wish to make?

7. Simply this: we believe that nothing is a good, if it be composed of things that are distinct. For a single good should be checked and controlled by a single soul; and the essential quality of each single good should be single. This can be proved of itself whenever you desire; in the meanwhile, however, it had to be laid aside, because our own weapons are being hurled at us.

8. Opponents speak thus: "You say, do you, that no good can be made up of things that are distinct? Yet this renown, of which you speak, is simply the favourable opinion of good men. For just as reputation does not consist of one person's remarks, and as ill repute does not consist of one person's disapproval, so renown does not mean that we have merely pleased one good person. In order to constitute renown, the agreement of many distinguished and praiseworthy men is necessary. But this results from the decision of a number – in other words, of persons who are distinct. Therefore, it is not a good.

9. You say, again, that renown is the praise rendered to a good man by good men. Praise means speech: now speech is utterance with a particular meaning; and utterance, even from the lips of good men, is not a good in itself. For any act of a good man is not necessarily a good; he shouts his applause and hisses his disapproval, but one does not call the shouting or the hissing good – although his entire conduct may be admired and praised – any more than one would applaud a sneeze or a cough. Therefore, renown is not a good.

10. Finally, tell us whether the good belongs to him who praises, or to him who is praised: if you say that the good belongs to him who is praised, you are on as foolish a quest as if you were to maintain that my neighbour's good health is my own. But to praise worthy men is an honourable action; thus the good is exclusively that of the man who does the praising, of the man who performs the action, and not of us, who are being praised. And yet this was the question under discussion."

11. I shall now answer the separate objections hurriedly. The first question still is, whether any good can consist of things that are distinct – and there are votes cast on both sides. Again, does renown need many votes? Renown can be satisfied with the decision of one good man: it is one good man who decides that we are good.

12. Then the retort is: "What! Would you define reputation as the esteem of one individual, and ill-repute as the rancorous chatter of one man? Glory, too, we take to be more widespread, for it demands the agreement of many men." But the position of the "many" is different from that of "the one." And why? Because, if the good man thinks well of me, it practically amounts to my being thought well of by all good men; for they will all think the same, if they know me. Their judgement is alike and identical; the effect of truth on it is equal. They cannot disagree, which means that they would all hold the same view, being unable to hold different views.

13. "One man's opinion," you say, "is not enough to create glory or reputation." In the former case, one judgement is a universal judgement, because all, if they were asked, would hold one opinion; in the other case, however, men of dissimilar character give divergent judgements. You will find perplexing emotions — everything doubtful, inconstant, untrustworthy. And can you suppose that all men are able to hold one opinion? Even an individual does not hold to a single opinion. With the good man it is truth that causes belief, and truth has but one function and one likeness; while among the second class of which I spoke, the ideas with which they agree are unsound. Moreover, those who are false are never steadfast: they are irregular and discordant.

14. "But praise," says the objector, "is nothing but an utterance, and an utterance is not a good." When they say that renown is praise bestowed on the good by the good, what they refer to is not an utterance but a judgement. For a good man may remain silent; but if he decides that a certain person is worthy, of praise, that person is the object of praise.

15. Besides, praise is one thing, and the giving of praise another; the latter demands utterance also. Hence no one speaks of "a funeral praise," but says "praise-giving" – for its function depends upon speech. And when we say that a man is worthy of praise, we assure human kindness to him, not in words, but in judgement. So the good opinion, even of one who in silence feels inward approval of a good man, is praise.

16. Again, as I have said, praise is a matter of the mind rather than of the speech; for speech brings out the praise that the mind has conceived, and publishes it forth to the attention of the many. To judge a man worthy of praise, is to praise him. And when our tragic poet sings to us that it is wonderful "to be praised by a well-praised hero," he means, "by one who is worthy of praise." Again, when an equally venerable bard says: "Praise nurtureth the arts," he does not mean the giving of praise, for that spoils that depend on hearing so much as popular approval.

17. Reputation necessarily demands words, but renown can be content with men's judgements, and suffice without the spoken word. It is satisfied not only amid silent approval, but even in the face of open protest. There is, in my opinion, this difference between renown and glory – the latter depends upon the judgements of the many; but renown on the judgements of good men.

18. The retort comes: "But whose good is this renown, this praise rendered to a good man by good men? Is it of the one praised, or of the one who praises?" Of both, I say. It is my own good, in that I am praised, because I am naturally born to love all men, and I rejoice in having done good deeds and congratulate myself on having found men who express their ideas of my virtues with gratitude; that they are grateful, is a good to the many, but it is a good to me also. For my spirit is so ordered that I can regard the good of other men as my own – in any case those of whose good I am myself the cause.

19. This good is also the good of those who render the praise, for it is applied by means of virtue; and every act of virtue is a good. My friends could not have found this blessing if I had not been a man of the right stamp. It is therefore a good belonging to both sides – this being praised when one deserves it – just as truly as a good decision is the good of him who makes the decision and also of him in whose favour the decision was given. Do you doubt that justice is a blessing to its possessor, as well as to the man to whom the just due was paid? To praise the deserving is justice; therefore, the good belongs to both sides.

20. This will be a sufficient answer to such dealers in subtleties. But it should not be our purpose to discuss things cleverly and to drag Philosophy down from her majesty to such petty quibbles. How much better it is to follow the open and direct road, rather than to map out for yourself a circuitous route which you must retrace with infinite trouble! For such argumentation is nothing else than the sport of men who are skilfully juggling with each other.

21. Tell me rather how closely in accord with nature it is to let one's mind reach out into the boundless universe! The human soul is a great and noble thing; it permits of no limits except those which can be shared even by the gods. First of all, it does not consent to a lowly birthplace, like Ephesus or Alexandria, or any land that is even more thickly populated than these, and more richly spread with dwellings. The soul's homeland is the whole space that encircles the, height and breadth of the firmament, the whole rounded dome within which lie land and sea, within which the upper air that sunders the human from the divine also unites them, and where all the sentinel stars are taking their turn on duty.

22. Again, the soul will not put up with a narrow span of existence. "All the years," says the soul, "are mine; no epoch is closed to great minds; all Time is open for the progress of thought. When the day comes to separate the heavenly from its earthly blend, I shall leave the body here where I found it, and shall of my own volition betake myself to the gods. I am not apart from them now, but am merely detained in a heavy and earthly prison."

23. These delays of mortal existence are a prelude to the longer and better life. As the mother's womb holds us for ten months, making us ready, not for the womb itself, but for the existence into which we seem to be sent forth when at last we are fitted to draw breath and live in the open; just so, throughout the years extending between infancy and old age, we are making ourselves ready for another birth. A different beginning, a different condition, await us.

24. We cannot yet, except at rare intervals, endure the light of heaven; therefore, look forward without fearing to that appointed hour, – the last hour of the body but not of the soul. Survey everything that lies about you, as if it were luggage in a guest-chamber: you must travel on. Nature strips you as bare at your departure as at your entrance.

25. You may take away no more than you brought in; what is more, you must throw away the major portion of that which you brought with you into life: you will be stripped of the very skin which covers you – that which has been your last protection; you will be stripped of the flesh, and lose the blood which is suffused and circulated through your body; you will be stripped of bones and sinews, the framework of these transitory and feeble parts.

26. That day, which you fear as being the end of all things, is the birthday of your eternity. Lay aside your burden – why delay? – just as if you had not previously left the body which was your hiding-place! You cling to your burden, you struggle; at your birth also great effort was necessary on your mother's part to set you free. You weep and wail; and yet this very weeping happens at birth also; but then it was to be excused – for you came into the world wholly ignorant and inexperienced. When you left the warm and cherishing protection of your mother's womb, a freer air breathed into your face; then you winced at the touch of a rough hand, and you looked in amaze at unfamiliar objects, still delicate and ignorant of all things.

27. But now it is no new thing for you to be sundered from that of which you have previously been a part; let go your already useless limbs with resignation and dispense with that body in which you have dwelt for so long. It will be torn sunder, buried out of sight, and wasted away. Why be downcast? This is what ordinarily happens: when we are born, the afterbirth always perishes. Why love such a thing as if it were your own possession? It was merely your covering. The day will come which will tear you forth and lead you away from the company of the foul and noisome womb.

28. Withdraw from it now too* as much as you can, and withdraw from pleasure, except such as may be bound up with essential and important things; estrange yourself from it even now, and ponder on something nobler and loftier. Some day the secrets of nature shall be disclosed to you, the haze will be shaken from your eyes, and the bright light will stream in upon you from all sides. [*The departure from life is compared to the release from the womb. There is also possibly a double meaning implied in the word venter.] Picture to yourself how great is the glow when all the stars mingle their fires; no shadows will disturb the clear sky. The whole expanse of heaven will shine evenly; for day and night are interchanged only in the lowest atmosphere. Then you will say that you have lived in darkness, after you have seen, in your perfect state, the perfect light - that light which now you behold darkly with vision that is cramped to the last degree. And yet, far off as it is, you already look upon it in wonder; what do you think the heavenly light will be when you have seen it in its proper sphere?

29. Such thoughts permit nothing mean to settle in the soul, nothing low, nothing cruel. They maintain that the gods are witnesses of everything. They order us to meet the gods' approval, to prepare ourselves to join them at some future time, and to plan for immortality. He that has grasped this idea shrinks from no attacking army, is not terrified by the trumpet-blast, and is intimidated by no threats.

30. How should it not be that a man feels no fear, if he looks forward to death? He also who believes that the soul abides only as long as it is fettered in the body, scatters it abroad forthwith when dissolved, so that it may be useful even after death. For though he is taken from men's sight, still

Often our thoughts run back to the hero, and often the glory Won by his race recurs to the mind

Consider how much we are helped by good example; you will thus understand that the presence of a noble man is of no less service than his memory. Farewell.

SENECA LETTER 103. On the Dangers of Association with our Fellow-Men

1. Why are you looking about for troubles which may perhaps come your way, but which may indeed not come your way at all? I mean fires, falling buildings, and other accidents of the sort that are mere events rather than plots against us. Rather beware and shun those troubles which dog our steps and reach out their hands against us. Accidents, though they may be serious, are few — such as being shipwrecked or thrown from one's carriage; but it is from his fellow-man that a man's everyday danger comes. Equip yourself against that, watch that with an attentive eye. There is no evil more frequent, no evil more insinuating.

2. Even the storm, before it gathers, gives a warning; houses crack before they crash; and smoke is the forerunner of fire. But damage from man is instantaneous, and the nearer it comes the more carefully it is concealed. You are wrong to trust the countenances of those you meet. They have the aspect of men, but the souls of brutes; the difference is that only beasts damage you at the first encounter; those whom they have passed by they do not pursue. For nothing ever goads them to do harm except when need compels them: it is hunger or fear that forces them into a fight. But man delights to ruin man.

3. You must, however, reflect thus what danger you run at the hands of man, in order that you may deduce what is the duty of man. Try, in your dealings with others, to harm not, in order that you be not harmed. You should reioice with all in their joys and sympathize with them in their troubles, remembering what you should offer and what you should withhold. 4. And what may you attain by living such a life? Not necessarily freedom from harm at their hands, but at least freedom from deceit. In so far, however, as you are able, take refuge with philosophy: she will cherish you in her bosom, and in her sanctuary you shall be safe, or, at any rate, safer than before. People collide only when they are travelling the same path. 5. But this very philosophy must never be vaunted by you; for philosophy when employed with insolence and arrogance has been perilous to many. Let her strip off your faults, rather than assist you to decry the faults of others. Let her not hold aloof from the customs of mankind, nor make it her business to condemn whatever she herself does not do. A man may be wise without parade and without arousing enmity. Farewell.

SENECA LETTER 104. On Care of Health and Peace of Mind

1 I have run off to my villa at Nomentum for what purpose do you suppose? To escape the city? No: to shake off a fever which was surely working its way into my system. It had already got a grip upon me. My physician kept insisting that when the circulation was upset and irregular, disturbing the natural poise, the disease was under way. I therefore ordered my carriage to be made ready at once, and insisted on departing, in spite of my wife Paulina's efforts to stop me [Pompeia Paulina, the second wife of Seneca; cf. Tac. Ann. xv. 60. Though much younger than her husband, she was a model of devotion, and remained loyal to him through all the Neronian persecution.]; for I remembered my master Gallio's* words, when he began to develop a fever in Achaia and took ship at once, insisting that the disease was not of the body but of the place. [*Elder brother of Seneca, whose name before his adoption by Lucius Iunius Gallio was Annaeus Novatus. He was governor of Achaia (Greece) from July 1, 51 to July 1, 52 AD.]

2. That is what I remarked to my dear Paulina, who always urges me to take care of my health. I know that her very lifebreath comes and goes with my own, and I am beginning, in my solicitude for her, to be solicitous for myself. And although old age has made me braver to bear many things, I am gradually losing this boon that old age bestows. For it comes into my mind that in this old man there is a youth also, and youth needs tenderness. Therefore, since I cannot prevail upon her to love me any more heroically, she prevails upon me to cherish myself more carefully.

3. For one must indulge genuine emotions; sometimes, even in spite of weighty reasons, the breath of life must be called back and kept at our very lips even at the price of great suffering, for the sake of those whom we hold dear; because the good man should not live as long as it pleases him, but as long as he ought. He who does not value his wife, or his friend, highly enough to linger longer in life – he who obstinately persists in dying – is a voluptuary. The soul should also enforce this command upon itself whenever the needs of one's relatives require; it should pause and humour those near and dear, not only when it desires, but even when it has begun, to die.

4. It gives proof of a great heart to return to life for the sake of others; and noble men have often done this. But this procedure also, I believe, indicates the highest type of kindness: that although the greatest advantage of old age is the opportunity to be more negligent regarding selfpreservation and to use life more adventurously, one should watch over one's old age with still greater care if one knows that such action is pleasing, useful, or desirable in the eyes of a person whom one holds dear.

5. This is also a source of no mean joy and profit; for what is sweeter than to be so valued by one's wife that one becomes more valuable to oneself for this reason? Hence my dear Paulina is able to make me responsible, not only for her fears, but also for my own.

6. So you are curious to know the outcome of this prescription of travel? As soon as I escaped from the oppressive atmosphere of the city, and from that awful odour of reeking kitchens which, when in use, pour forth a ruinous mess of steam and soot, I perceived at once that my health was mending. And how much stronger do you think I felt when I reached my vineyards! Being, so to speak, let out to pasture, I regularly walked into my meals! So I am my old self again, feeling now no wavering languor in my system, and no sluggishness in my brain. I am beginning to work with all my energy.

7. But the mere place avails little for this purpose, unless the mind is fully master of itself, and can, at its pleasure, find seclusion even in the midst of business; the man, however, who is always selecting resorts and hunting for leisure, will find something to distract his mind in every place. Socrates is reported to have replied, when a certain person complained of having received no benefit from his travels: "It serves you right! You travelled in your own company!"

8. O what a blessing it would be for some men to wander away from themselves! As it is, they cause themselves vexation, worry, demoralization, and fear! What profit is there in crossing the sea and in going from one city to another? If you would escape your troubles, you need not another place but another personality. Perhaps you have reached Athens, or perhaps Rhodes; choose any state you fancy, how does it matter what its character may be? You will be bringing to it your own.

9. Suppose that you hold wealth to be a good: poverty will then distress you, and, – which is most pitiable, – it will be an imaginary poverty. For you may be rich, and nevertheless, because your neighbour is richer, you suppose yourself to be poor exactly by the same amount in which you fall short of your neighbour. You may deem official position a good; you will be vexed at another's appointment or re-appointment to the consulship; you will be jealous whenever you see a name several times in the state records. Your ambition will be so frenzied that you will regard yourself last in the race if there is anyone in front of you.

10. Or you may rate death as the worst of evils, although there is really no evil therein except that which precedes death's coming – fear. You will be frightened out of your wits, not only by real, but by fancied dangers, and will be tossed for ever on the sea of illusion. What benefit will it be to

Have threaded all the towns of Argolis,

A fugitive through midmost press of foes?

For peace itself will furnish further apprehension. Even in the midst of safety you will have no confidence if your mind has once been given a shock; once it has acquired the habit of blind panic, it is incapable of providing even for its own safety. For it does not avoid danger, but runs away. Yet we are more exposed to danger when we turn our backs.

11. You may judge it the most grievous of ills to lose any of those you love; while all the same this would be no less foolish than weeping because the trees which charm your eve and adorn your home lose their foliage. Regard everything that pleases you as if it were a flourishing plant; make the most of it while it is in leaf, for different plants at different seasons must fall and die. But just as the loss of leaves is a light thing, because they are born afresh, so it is with the loss of those whom you love and regard as the delight of your life; for they can be replaced even though they cannot be born afresh. 12 'New friends, however, will not be the same." No, nor will you yourself remain the same; you change with every day and every hour. But in other men you more readily see what time plunders; in your own case the change is hidden, because it will not take place visibly. Others are snatched from sight; we ourselves are being stealthily filched away from ourselves. You will not think about any of these problems, nor will you apply remedies to these wounds. You will of your own volition be sowing a crop of trouble by alternate hoping and despairing. If you are wise, mingle these two elements: do not hope without despair, or despair without hope.

13. What benefit has travel of itself ever been able to give anyone? No restraint upon pleasure, no bridling of desire, no checking of bad temper, no crushing of the wild assaults of passion, no opportunity to rid the soul of evil. Travelling cannot give us judgement, or shake off our errors; it merely holds our attention for a moment by a certain novelty, as children pause to wonder at something unfamiliar.

14. Besides, it irritates us, through the wavering of a mind which is suffering from an acute attack of sickness; the very motion makes it more fitful and nervous. Hence the spots we had sought most eagerly we quit still more eagerly, like birds that flit and are off as soon as they have alighted.

15. What travel will give is familiarity with other nations: it will reveal to you mountains of strange shape, or unfamiliar

tracts of plain, or valleys that are watered by ever-flowing springs, or the characteristics of some river that comes to our attention. We observe how the Nile rises and swells in summer, or how the Tigris disappears, runs underground through hidden spaces, and then appears with unabated sweep; or how the Maeander, that oft-rehearsed theme and plaything of the poets, turns in frequent bendings, and often in winding comes close to its own channel before resuming its course. But this sort of information will not make better or sounder men of us.

16. We ought rather to spend our time in study, and to cultivate those who are masters of wisdom, learning something which has been investigated, but not settled; by this means the mind can be relieved of a most wretched serfdom, and won over to freedom. Indeed, as long as you are ignorant of what you should avoid or seek, or of what is necessary or superfluous, or of what is right or wrong, you will not be travelling, but merely wandering.

17. There will be no benefit to you in this hurrying to and fro; for you are travelling with your emotions and are followed by your afflictions. Would that they were indeed following you! In that case, they would be farther away; as it is, you are carrying and not leading them. Hence they press about you on all sides, continually chafing and annoying you. It is medicine, not scenery, for which the sick man must go a searching.

18. Suppose that someone has broken a leg or dislocated a joint: he does not take carriage or ship for other regions, but he calls in the physician to set the fractured limb, or to move it back to its proper place in the socket. What then? When the spirit is broken or wrenched in so many places, do you think that change of place can heal it? The complaint is too deep-seated to be cured by a journey.

19. Travel does not make a physician or an orator; no art is acquired by merely living in a certain place. Where lies the truth, then? Can wisdom, the greatest of all the arts, be picked up on a journey? I assure you, travel as far as you like, you can never establish yourself beyond the reach of desire, beyond the reach of bad temper, or beyond the reach of fear; had it been so, the human race would long ago have banded together and made a pilgrimage to the spot. Such ills, as long as you carry with you their causes, will load you down and worry you to skin and bone in your wanderings over land and sea.

20. Do you wonder that it is of no use to run away from them? That from which you are running, is within you. Accordingly, reform your own self, get the burden off your own shoulders, and keep within safe limits the cravings which ought to be removed. Wipe out from your soul all trace of sin. If you would enjoy your travels, make healthy the companion of your travels. As long as this companion is avaricious and mean, greed will stick to you; and while you consort with an overbearing man, your puffed-up ways will also stick close. Live with a hangman, and you will never be rid of your cruelty. If an adulterer be your club-mate, he will kindle the baser passions.

21. If you would be stripped of your faults leave far behind you the patterns of the faults. The miser, the swindler, the bully, the cheat, who will do you much harm merely by being near you, are within you. Change therefore to better associations: live with the Catos, with Laelius, with Tubero. Or, if you enjoy living with Greeks also, spend your time with Socrates and with Zeno: the former will show you how to die if it be necessary; the latter how to die before it is necessary.

22. Live with Chrysippus, with Posidonius: they will make you acquainted with things earthly and things heavenly; they will bid you work hard over something more than neat turns of language and phrases mouthed forth for the entertainment of listeners; they will bid you be stout of heart and rise superior to threats. The only harbour safe from the seething storms of this life is scorn of the future, a firm stand, a readiness to receive Fortune's missiles full in the breast, neither skulking nor turning the back.

23. Nature has brought us forth brave of spirit, and, as she has implanted in certain animals a spirit of ferocity, in others craft, in others terror, so she has gifted us with an aspiring and lofty spirit, which prompts us to seek a life of the greatest honour, and not of the greatest security, that most resembles the soul of the universe, which it follows and imitates as far as our mortal steps permit. This spirit thrusts itself forward, confident of commendation and esteem.

24. It is superior to all, monarch of all it surveys; hence it should be subservient to nothing, finding no task too heavy, and nothing strong enough to weigh down the shoulders of a man. Shapes dread to look upon, of toil or death are not in the least dreadful, if one is able to look upon them with unflinching gaze, and is able to pierce the shadows. Many a sight that is held a terror in the night-time, is turned to ridicule by day. "Shapes dread to look upon, of toil or death": our Vergil has excellently said that these shapes are dread, not in reality, but only "to look upon" – in other words, they seem terrible, but are not.

25. And in these visions what is there, I say, as fearinspiring as rumour has proclaimed? Why, pray, my dear Lucilius, should a man fear toil, or a mortal death? Countless cases occur to my mind of men who think that what they themselves are unable to do is impossible, who maintain that we utter words which are too big for man's nature to carry out.

26. But how much more highly do I think of these men! They can do these things, but decline to do them. To whom that ever tried have these tasks proved false? To what man did they not seem easier in the doing? Our lack of confidence is not the result of difficulty; the difficulty comes from our lack of confidence.

27. If, however, you desire a pattern, take Socrates, a longsuffering old man, who was sea-tossed amid every hardship and yet was unconquered both by poverty (which his troubles at home made more burdensome) and by toil, including the drudgery of military service. He was much tried at home, whether we think of his wife, a woman of rough manners and shrewish tongue, or of the children whose intractability showed them to be more like their mother than their father. And if you consider the facts, he lived either in time of war, or under tyrants, or under a democracy, which is more cruel than wars and tyrants.

28. The war lasted for twenty-seven years; then the state became the victim of the Thirty Tyrants, of whom many were his personal enemies. At the last came that climax of condemnation under the gravest of charges: they accused him of disturbing the state religion and corrupting the youth, for they declared that he had influenced the youth to defy the gods, to defy the council, and to defy the state in general. Next came the prison, and the cup of poison. But all these measures changed the soul of Socrates so little that they did not even change his features. What wonderful and rare distinction! He maintained this attitude up to the very end, and no man ever saw Socrates too much elated or too much depressed. Amid all the disturbance of Fortune, he was undisturbed.

29. Do you desire another case? Take that of the younger Marcus Cato, with whom Fortune dealt in a more hostile and more persistent fashion. But he withstood her, on all occasions, and in his last moments, at the point of death, showed that a brave man can live in spite of Fortune, can die in spite of her. His whole life was passed either in civil warfare, or under a political regime which was soon to breed civil war. And you may say that he, just as much as Socrates, declared allegiance to liberty in the midst of slavery – unless perchance you think that Pompey, Caesar, and Crassus were the allies of liberty!

30. No one ever saw Cato change, no matter how often the state changed: he kept himself the same in all circumstances – in the praetorship, in defeat, under accusation, in his province, on the platform, in the army, in death. Furthermore, when the republic was in a crisis of terror, when Caesar was on one side with ten embattled legions at his call, aided by so many foreign nations, and when Pompey was on the other, satisfied to stand alone against all comers, and when the citizens were leaning towards either Caesar or Pompey, Cato alone established a definite party for the Republic.

31. If you would obtain a mental picture of that period, you may imagine on one side the people and the whole proletariat eager for revolution – on the other the senators and knights, the chosen and honoured men of the commonwealth; and there were left between them but these two – the Republic and Cato.

I tell you, you will marvel when you see

Atreus' son, and Priam, and Achilles, wroth at both.

Like Achilles, he scorns and disarms each faction

32. And this is the vote which he casts concerning them both: "If Caesar wins, I slay myself; if Pompey, I go into exile." What was there for a man to fear who, whether in defeat or in victory, had assigned to himself a doom which might have been assigned to him by his enemies in their utmost rage? So he died by his own decision.

33. You see that man can endure toil: Cato, on foot, led an army through African deserts. You see that thirst can be endured: he marched over sun-baked hills, dragging the remains of a beaten army and with no train of supplies, undergoing lack of water and wearing a heavy suit of armour; always the last to drink of the few springs which they chanced to find. You see that honour, and dishonour too, can be despised: for they report that on the very day when Cato was defeated at the elections, he played a game of ball. You see also that man can be free from fear of those above him in rank: for Cato attacked Caesar and Pompey simultaneously, at a time when none dared fall foul of the one without endeavouring to oblige the other. You see that death can be scorned as well as exile: Cato inflicted exile upon himself and finally death, and war all the while.

34. And so, if only we are willing to withdraw our necks from the yoke, we can keep as stout a heart against such terrors as these. But first and foremost, we must reject pleasures; they render us weak and womanish; they make great demands upon us, and, moreover, cause us to make great demands upon Fortune. Second, we must spurn wealth is the diploma of slavery. Abandon gold and silver, and whatever else is a burden upon our richly-furnished homes; liberty cannot be gained for nothing. If you set a high value on liberty, you must set a low value on everything else. Farewell.

SENECA LETTER 105. On Facing the World with Confidence

1. I shall now tell you certain things to which you should pay attention in order to live more safely. Do you however, – such is my judgement, – hearken to my precepts just as if I were counselling you to keep safe your health in your countryplace at Ardea. Reflect on the things which goad man into destroying man: you will find that they are hope, envy, hatred, fear, and contempt.

2. Now, of all these, contempt is the least harmful, so much so that many have skulked behind it as a sort of cure. When a man despises you, he works you injury, to be sure, but he passes on; and no one persistently or of set purpose does hurt to a person whom he despises. Even in battle, prostrate soldiers are neglected: men fight with those who stand their ground.

3. And you can avoid the envious hopes of the wicked so long as you have nothing which can stir the evil desires of others, and so long as you possess nothing remarkable. For people crave even little things, if these catch the attention or are of rare occurrence. You will escape envy if you do not force yourself upon the public view, if you do not boast your possessions, if you understand how to enjoy things privately. Hatred comes either from running foul of others: and this can be avoided by never provoking anyone; or else it is uncalled for: and common-sense will keep you safe from it. Yet it has been dangerous to many; some people have been hated without having had an enemy.

4. As to not being feared, a moderate fortune and an easy disposition will guarantee you that; men should know that you are the sort of person who can be offended without danger; and your reconciliation should be easy and sure. Moreover, it is as troublesome to be feared at home as abroad; it is as bad to be feared by a slave as by a gentleman. For every one has strength enough to do you some harm. Besides, he who is feared, fears also; no one has been able to arouse terror and live in peace of mind.

5. Contempt remains to be discussed. He who has made this quality an adjunct of his own personality, who is despised because he wishes to be despised and not because he must be despised, has the measure of contempt under his control. Any inconveniences in this respect can be dispelled by honourable occupations and by friendships with men who have influence with an influential person; with these men it will profit you to engage but not to entangle yourself, lest the cure may cost you more than the risk.

6. Nothing, however, will help you so much as keeping still – talking very little with others, and as much as may be with yourself. For there is a sort of charm about conversation, something very subtle and coaxing, which, like intoxication or love, draws secrets from us. No man will keep to himself what he hears. No one will tell another only as much as he has heard. And he who tells tales will tell names, too. Everyone has someone to whom he entrusts exactly what has been entrusted to him. Though he checks his own garrulity, and is content with one hearer, he will bring about him a nation, if that which was a secret shortly before becomes common talk.

7. The most important contribution to peace of mind is never to do wrong. Those who lack self-control lead disturbed and tumultuous lives; their crimes are balanced by their fears, and they are never at ease. For they tremble after the deed, and they are embarrassed; their consciences do not allow them to busy themselves with other matters, and continually compel them to give an answer. Whoever expects punishment, receives it, but whoever deserves it, expects it.

8. Where there is an evil conscience something may bring safety, but nothing can bring ease; for a man imagines that, even if he is not under arrest, he may soon be arrested. His sleep is troubled; when he speaks of another man's crime, he reflects upon his own, which seems to him not sufficiently blotted out, not sufficiently hidden from view. A wrongdoer sometimes has the luck to escape notice but never the assurance thereof. Farewell.

SENECA LETTER 106. On the Corporeality of Virtue

1. My tardiness in answering your letter was not due to press of business. Do not listen to that sort of excuse; I am at liberty, and so is anyone else who wishes to be at liberty. No man is at the mercy of affairs. He gets entangled in them of his own accord, and then flatters himself that being busy is a proof of happiness. Very well; you no doubt want to know why I did not answer the letter sooner? The matter about which you consulted me was being gathered into the fabric of my volume.

2. For you know that I am planning to cover the whole of moral philosophy and to settle all the problems which concern it. Therefore I hesitated whether to make you wait until the proper time came for this subject, or to pronounce judgement out of the logical order; but it seemed more kindly not to keep waiting one who comes from such a distance. 3. So I propose both to pick this out of the proper sequence of correlated matter, and also to send you, without waiting to be asked, whatever has to do with questions of the same sort. Do you ask what these are? Questions regarding which knowledge pleases rather than profits; for instance, your question whether the good is corporeal.

4. Now the good is active: for it is beneficial; and what is active is corporeal. The good stimulates the mind and, in a way, moulds and embraces that which is essential to the body. The goods of the body are bodily; so therefore must be the goods of the soul. For the soul, too, is corporeal.

5. Ergo, man's good must be corporeal, since man himself is corporeal. I am sadly astray if the elements which support man and preserve or restore his health, are not bodily; therefore, his good is a body. You will have no doubt, I am sure, that emotions are bodily things (if I may be allowed to wedge in another subject not under immediate discussion), like wrath, love, sternness; unless you doubt whether they change our features, knot our foreheads, relax the countenance, spread blushes, or drive away the blood? What, then? Do you think that such evident marks of the body are stamped upon us by anything else than body? 6. And if emotions are corporeal, so are the diseases of the spirit – such as greed, cruelty, and all the faults which harden in our souls, to such an extent that they get into an incurable state. Therefore evil is also, and all its branches – spite, hatred, pride;

7. and so also are goods, first because they are opposite poles of the bad, and second because they will manifest to you the same symptoms. Do you not see how a spirit of bravery makes the eye flash? How prudence tends towards concentration? How reverence produces moderation and tranquility? How joy produces calm? How sternness begets stiffness? How gentleness produces relaxation? These qualities are therefore bodily; for they change the tones and the shapes of substances, exercising their own power in their own kingdoms. Now all the virtues which I have mentioned are goods, and so are their results.

8. Have you any doubt that whatever can touch is corporeal? Nothing but body can touch or be touched, as Lucretius says. Moreover, such changes as I have mentioned could not affect the body without touching it. Therefore, they are bodily.

9. Furthermore, any object that has power to move, force, restrain, or control, is corporeal. Come now! Does not fear hold us back? Does not boldness drive us ahead? Bravery spur us on, and give us momentum? Restraint rein us in and call us back? Joy raise our spirits? Sadness cast us down?

10. In short, any act on our part is performed at the bidding of wickedness or virtue. Only a body can control or forcefully affect another body. The good of the body is corporeal; a man's good is related to his bodily good; therefore, it is bodily.

11. Now that I have humoured your wishes, I shall anticipate your remark, when you say: "What a game of pawns!" [The Romans had a ludus latrunculorum, with features resembling both draughts and chess. The pieces (calculi) were perhaps of different values.] We dull our fine edge by such superfluous pursuits; these things make men clever, but not good.

12. Wisdom is a plainer thing than that; nay, it is clearly better to use literature for the improvement of the mind, instead of wasting philosophy itself as we waste other efforts on superfluous things. Just as we suffer from excess in all things, so we suffer from excess in literature; thus we learn our lessons, not for life, but for the lecture-room. Farewell.

SENECA LETTER 107. On Obedience to the Universal Will $% \left({{{\left[{{{\rm{A}}} \right]}_{{\rm{A}}}}_{{\rm{A}}}} \right)$

1. Where is that common-sense of yours? Where that deftness in examining things? That greatness of soul? Have you come to be tormented by a trifle? Your slaves regarded your absorption in business as an opportunity for them to run away. Well, if your friends deceived you (for by all means let them have the name which we mistakenly bestowed upon them, and so call them, that they may incur more shame by not being such friends) – if your friends, I repeat, deceived you, all your affairs would lack something; as it is, you merely lack men who damaged your own endeavours and considered you burdensome to your neighbours.

2. None of these things is unusual or unexpected. It is as nonsensical to be put out by such events as to complain of being spattered in the street or at getting befouled in the mud. The programme of life is the same as that of a bathing establishment, a crowd, or a journey: sometimes things will be thrown at you, and sometimes they will strike you by accident. Life is not a dainty business. You have started on a long journey; you are bound to slip, collide, fall, become weary, and cry out: "O for Death!" – or in other words, tell lies. At one stage you will leave a comrade behind you, at another you will bury someone, at another you will be apprehensive. It is amid stumblings of this sort that you must travel out this rugged journey.

3. Does one wish to die? Let the mind be prepared to meet everything; let it know that it has reached the heights round

which the thunder plays. Let it know that it has arrived where

Grief and avenging Care have set their couch, And pallid sickness dwells, and drear Old Age.

With such messmates must you spend your days. Avoid them you cannot, but despise them you can. And you will despise them, if you often take thought and anticipate the future. 4. Everyone approaches courageously a danger which he has prepared himself to meet long before, and withstands even hardships if he has previously practised how to meet them. But, contrariwise, the unprepared are panic-stricken even at the most trifling things. We must see to it that nothing shall come upon us unforeseen. And since things are all the more serious when they are unfamiliar, continual reflection will

play the unschooled boy. 5. "My slaves have run away from me!" Yes, other men have been robbed, blackmailed, slain, betrayed, stamped under foot, attacked by poison or by slander; no matter what trouble you mention, it has happened to many. Again, there are manifold kinds of missiles which are hurled at us. Some are planted in us, some are being brandished and at this very moment are on the way, some which were destined for other men graze us instead.

give you the power, no matter what the evil may be, not to

6. We should not manifest surprise at any sort of condition into which we are born, and which should be lamented by no one, simply because it is equally ordained for all. Yes, I say, equally ordained; for a man might have experienced even that which he has escaped. And an equal law consists, not of that which all have experienced, but of that which is laid down for all. Be sure to prescribe for your mind this sense of equity; we should pay without complaint the tax of our mortality.

7. Winter brings on cold weather; and we must shiver. Summer returns, with its heat; and we must sweat. Unseasonable weather upsets the health; and we must fall ill. In certain places we may meet with wild beasts, or with men who are more destructive than any beasts. Floods, or fires, will cause us loss. And we cannot change this order of things; but what we can do is to acquire stout hearts, worthy of good men, thereby courageously enduring chance and placing ourselves in harmony with Nature. 8. And Nature moderates this world-kingdom which you see, by her changing seasons: clear weather follows cloudy; after a calm, comes the storm; the winds blow by turns; day succeeds night; some of the heavenly bodies rise, and some set. Eternity consists of opposites.

9. It is to this law that our souls must adjust themselves, this they should follow, this they should obey. Whatever happens, assume that it was bound to happen, and do not be willing to rail at Nature. That which you cannot reform, it is best to endure, and to attend uncomplainingly upon the God under whose guidance everything progresses; for it is a bad soldier who grumbles when following his commander.

10. For this reason we should welcome our orders with energy and vigour, nor should we cease to follow the natural course of this most beautiful universe, into which all our future sufferings are woven. Let us address Jupiter, the pilot of this world-mass, as did our great Cleanthes in those most eloquent lines – lines which I shall allow myself to render in Latin, after the example of the eloquent Cicero. If you like them, make the most of them; if they displease you, you will understand that I have simply been following the practice of Cicero:

11. Lead me, O Master of the lofty heavens,

My Father, whithersoever thou shalt wish.

I shall not falter, but obey with speed. And though I would not, I shall go, and suffer,

In sin and sorrow what I might have done In noble virtue. Ave, the willing soul

Fate leads, but the unwilling drags along.

12. Let us live thus, and speak thus; let Fate find us ready and alert. Here is your great soul – the man who has given himself over to Fate; on the other hand, that man is a weakling and a degenerate who struggles and maligns the order of the universe and would rather reform the gods than reform himself. Farewell.

SENECA LETTER 108. On the Approaches to Philosophy 1. The topic about which you ask me is one of those where our only concern with knowledge is to have the knowledge. Nevertheless, because it does so far concern us, you are in a hurry; you are not willing to wait for the books which I am at this moment arranging for you, and which embrace the whole department of moral philosophy. I shall send you the books at once; but I shall, before doing that, write and tell you how this eagerness to learn, with which I see you are aflame, should be regulated, so that it may not get in its own way.

2. Things are not to be gathered at random; nor should they be greedily attacked in the mass; one will arrive at a knowledge of the whole by studying the parts. The burden should be suited to your strength, nor should you tackle more than you can adequately handle. Absorb not all that you wish, but all that you can hold. Only be of a sound mind, and then you will be able to hold all that you wish. For the more the mind receives, the more does it expand.

3. This was the advice, I remember, which Attalus gave me in the days when I practically laid siege to his class-room, the first to arrive and the last to leave. Even as he paced up and down, I would challenge him to various discussions; for he not only kept himself accessible to his pupils, but met them half-way. His words were: "The same purpose should possess both master and scholar – an ambition in the one case to promote, and in the other to progress."

4. He who studies with a philosopher should take away with him some one good thing every day: he should daily return home a sounder man, or in the way to become sounder. And he will thus return; for it is one of the functions of philosophy to help not only those who study her, but those also who associate with her. He that walks in the sun, though he walk not for that purpose, must needs become sunburned. He who frequents the perfumer's shop and lingers even for a short time, will carry with him the scent of the place. And he who follows a philosopher is bound to derive some benefit therefrom, which will help him even though he be remiss. Mark what I say: "remiss," not "recalcitrant."

5. "What then?" you say, "do we not know certain men who have sat for many years at the feet of a philosopher and yet have not acquired the slightest tinge of wisdom?" Of course I know such men. There are indeed persevering gentlemen who stick at it; I do not call them pupils of the wise, but merely "squatters." [Literally "tenants," "lodgers," of a temporary sort.]

6. Certain of them come to hear and not to learn, just as we are attracted to the theatre to satisfy the pleasures of the ear, whether by a speech, or by a song, or by a play. This class, as you will see, constitutes a large part of the listeners, who regard the philosopher's lecture-room merely as a sort of lounging-place for their leisure. They do not set about to lay aside any faults there, or to receive a rule of life, by which they may test their characters; they merely wish to enjoy to the full the delights of the ear. And yet some arrive even with notebooks, not to take down the matter, but only the words, that they may presently repeat them to others with as little profit to these as they themselves received when they heard them.

7. A certain number are stirred by high-sounding phrases, and adapt themselves to the emotions of the speaker with lively change of face and mind – just like the emasculated Phrygian priests who are wont to be roused by the sound of the flute and go mad to order. But the true hearer is ravished and stirred by the beauty of the subject matter, not by the jingle of empty words. When a bold word has been uttered in defiance of death, or a saucy fling in defiance of Fortune, we take delight in acting straightway upon that which we have heard. Men are impressed by such words, and become what they are bidden to be, should but the impression abide in the mind, and should the populace, who discourage honourable things, not immediately lie in wait to rob them of this noble impulse; only a few can carry home the mental attitude with which they were inspired.

8. It is easy to rouse a listener so that he will crave righteousness; for Nature has laid the foundations and planted the seeds of virtue in us all. And we are all born to these general privileges; hence, when the stimulus is added, the good spirit is stirred as if it were freed from bonds. Have you not noticed how the theatre re-echoes whenever any words are spoken whose truth we appreciate generally and confirm unanimously?

9. The poor lack much; the greedy man lacks all.

- A greedy man does good to none; he does
- Most evil to himself.

At such verses as these, your meanest miser claps applause and rejoices to hear his own sins reviled. How much more do you think this holds true, when such things are uttered by a philosopher, when he introduces verses among his wholesome precepts, that he may thus make those verses sink more effectively into the mind of the neophyte! 10. Cleanthes used to say: "As our breath produces a louder sound when it passes through the long and narrow opening of the trumpet and escapes by a hole which widens at the end, even so the fettering rules of poetry clarify our meaning." The very same words are more carelessly received and make less impression upon us, when they are spoken in prose; but when metre is added and when regular prosody has compressed a noble idea, then the selfsame thought comes, as it were, hurtling with a fuller fling. 11. We talk much about despising money, and we give advice on this subject in the lengthiest of speeches, that mankind may believe true riches to exist in the mind and not in one's bank account, and that the man who adapts himself to his slender means and makes himself wealthy on a little sum, is the truly rich man: but our minds are struck more effectively when a verse like this is repeated:

He needs but little who desires but little.

or,

He hath his wish, whose wish includeth naught Save that which is enough.

12. When we hear such words as these, we are led towards a confession of the truth.

Even men in whose opinion nothing is enough, wonder and applaud when they hear such words, and swear eternal hatred against money. When you see them thus disposed, strike home, keep at them, and charge them with this duty, dropping all double meanings, syllogisms, hair-splitting, and the other side-shows of ineffective smartness. Preach against greed, preach against high living; and when you notice that you have made progress and impressed the minds of your hearers, lay on still harder. You cannot imagine how much progress can be brought about by an address of that nature, when you are bent on curing your hearers and are absolutely devoted to their best interests. For when the mind is young, it may most easily be won over to desire what is honourable and upright; truth, if she can obtain a suitable pleader, will lay strong hands upon those who can still be taught, those who have been but superficially spoiled.

13. At any rate, when I used to hear Attalus denouncing sin, error, and the evils of life, I often felt sorry for mankind and regarded Attalus as a noble and majestic being, – above our mortal heights. He called himself a king, but I thought him more than a king, because he was entitled to pass judgement on kings.

14. And in truth, when he began to uphold poverty, and to show what a useless and dangerous burden was everything that passed the measure of our need, I often desired to leave his lecture-room a poor man. Whenever he castigated our pleasure-seeking lives, and extolled personal purity, moderation in diet, and a mind free from unnecessary, not to speak of unlawful, pleasures, the desire came upon me to limit my food and drink.

15. And that is why some of these habits have stayed with me, Lucilius. For I had planned my whole life with great resolves. And later, when I returned to the duties of a citizen, I did indeed keep a few of these good resolutions. That is why I have forsaken oysters and mushrooms for ever: since they are not really food, but are relishes to bully the sated stomach into further eating, as is the fancy of gourmands and those who stuff themselves beyond their powers of digestion: down with it quickly, and up with it quickly!

16. That is why I have also throughout my life avoided perfumes; because the best scent for the person is no scent at all. That is why my stomach is unacquainted with wine. That is why throughout my life I have shunned the bath, and have believed that to emaciate the body and sweat it into thinness is at once unprofitable and effeminate. Other resolutions have been broken, but after all in such a way that, in cases where I ceased to practice abstinence, I have observed a limit which is indeed next door to abstinence; perhaps it is even a little more difficult, because it is easier for the will to cut off certain things utterly than to use them with restraint.

17. Inasmuch as I have begun to explain to you how much greater was my impulse to approach philosophy in my youth than to continue it in my old age, I shall not be ashamed to tell you what ardent zeal Pythagoras inspired in me. Sotion used to tell me why Pythagoras abstained from animal food, and why, in later times, Sextius did also. In each case, the reason was different, but it was in each case a noble reason.

18. Sextius believed that man had enough sustenance without resorting to blood, and that a habit of cruelty is formed whenever butchery is practised for pleasure. Moreover, he thought we should curtail the sources of our luxury; he argued that a varied diet was contrary to the laws of health, and was unsuited to our constitutions.

19. Pythagoras, on the other hand, held that all beings were inter-related, and that there was a system of exchange between souls which transmigrated from one bodily shape into another. If one may believe him, no soul perishes or ceases from its functions at all, except for a tiny interval – when it is being poured from one body into another. We may question at what time and after what seasons of change the soul returns to man, when it has wandered through many a dwelling-place; but meantime, he made men fearful of guilt and parricide, since they might be, without knowing it, attacking the soul of a parent and injuring it with knife or with teeth – if, as is possible, the related spirit be dwelling temporarily in this bit of flesh!

20. When Sotion had set forth this doctrine, supplementing it with his own proofs, he would say: "You do not believe that souls are assigned, first to one body and then to another, and that our so-called death is merely a change of abode? You do not believe that in cattle, or in wild beasts, or in creatures of the deep, the soul of him who was once a man may linger? You do not believe that nothing on this earth is annihilated, but only changes its haunts? And that animals also have cycles of progress and, so to speak, an orbit for their souls, no less than the heavenly bodies, which revolve in fixed circuits? Great men have put faith in this idea;

21. therefore, while holding to your own view, keep the whole question in abeyance in your mind. If the theory is true, it is a mark of purity to refrain from eating flesh; if it be false, it is economy. And what harm does it do to you to give such

credence? I am merely depriving you of food which sustains lions and vultures."

22. I was imbued with this teaching, and began to abstain from animal food; at the end of a year the habit was as pleasant as it was easy. I was beginning to feel that my mind was more active; though I would not to-day positively state whether it really was or not. Do you ask how I came to abandon the practice? It was this way: The days of my youth coincided with the early part of the reign of Tiberius Caesar. Some foreign rites were at that time being inaugurated, and abstinence from certain kinds of animal food was set down as a proof of interest in the strange cult. So at the request of my father, who did not fear prosecution, but who detested philosophy. I returned to my previous habits; and it was no year hard matter to induce me to dine more comfortably.

23. Attalus used to recommend a pillow which did not give in to the body; and now, old as I am, I use one so hard that it leaves no trace after pressure. I have mentioned all this in order to show you how zealous neophytes are with regard to their first impulses towards the highest ideals, provided that some one does his part in exhorting them and in kindling their ardour. There are indeed mistakes made, through the fault of our advisers, who teach us how to debate and not how to live; there are also mistakes made by the pupils, who come to their teachers to develop, not their souls, but their wits. Thus the study of wisdom has become the study of words.

24. Now it makes a great deal of difference what you have in mind when you approach a given subject. If a man is to be a scholar, and is examining the works of Vergil, he does not interpret the noble passage

Time flies away, and cannot be restored

in the following sense: "We must wake up; unless we hasten, we shall be left behind. Time rolls swiftly ahead, and rolls us with it. We are hurried along ignorant of our destiny; we arrange all our plans for the future, and on the edge of a precipice are at our ease." Instead of this, he brings to our attention how often Vergil, in speaking of the rapidity of time, uses the word "flies" (fugit).

The choicest days of hapless human life

Fly first; disease and bitter eld succeed,

And toil, till harsh death rudely snatches all

25. He who considers these lines in the spirit of a philosopher comments on the words in their proper sense: "Vergil never says, 'Time goes,' but 'Time flies,' because the latter is the quickest kind of movement, and in every case our best days are the first to be snatched away; why, then, do we hesitate to bestir ourselves so that we may be able to keep pace with this swiftest of all swift things?" The good flies past and the bad takes its place.

26. Just as the purest wine flows from the top of the jar and the thickest dregs settle at the bottom; so in our human life, that which is best comes first. Shall we allow other men to quaff the best, and keep the dregs for ourselves? Let this phrase cleave to your soul; you should be satisfied thereby as if it were uttered by an oracle.

Each choicest day of hapless human life

Flies first.

27. Why "choicest day"? Because what's to come is unsure. Why "choicest day"? Because in our youth we are able to learn; we can bend to nobler purposes minds that are ready and still pliable; because this is the time for work, the time for keeping our minds busied in study and in exercising our bodies with useful effort; for that which remains is more sluggish and lacking in spirit – nearer the end. Let us therefore strive with all courage, omitting attractions by the way; let us struggle with a single purpose, lest, when we are left behind, we comprehend too late the speed of quick-flying time, whose course we cannot stay. Let every day, as soon as it comes, be welcome as being the choicest, and let it be made our own possession.

28. We must catch that which flees. Now he who scans with a scholar's eye the lines I have just quoted, does not reflect that our first days are the best because disease is approaching and old age weighs upon us and hangs over our heads while we are still thinking about our youth. He thinks rather of Vergil's usual collocation of disease and eld; and indeed rightly. For old age is a disease which we cannot cure.

29. "Besides," he says to himself, "think of the epithet that accompanies eld; Vergil calls it bitter," -

Disease and bitter eld succeed.

And elsewhere Vergil says: There dwelleth pale disease and bitter eld.

There is no reason why you should marvel that each man can collect from the same source suitable matter for his own studies; for in the same meadow the cow grazes, the dog hunts the hare, and the stork the lizard.

30. When Cicero's book On the State is opened by a philologist, a scholar, or a follower of philosophy, each man pursues his investigation in his own way. The philosopher wonders that so much could have been said therein against justice. The philologist takes up the same book and comments on the text as follows: There were two Roman kings – one without a father and one without a mother. For we cannot

settle who was Servius's mother, and Ancus, the grandson of Numa, has no father on record.

31. The philologist also notes that the officer whom we call dictator, and about whom we read in our histories under that title, was named in old times the magister populi; such is the name existing to-day in the augural records, proved by the fact that he whom the dictator chose as second in command was called magister equitum. He will remark, too, that Romulus met his end during an eclipse; that there was an appeal to the people even from the kings (this is so stated in the pontiffs' register and is the opinion of others, including Fenestella).

32. When the scholar unrolls this same volume, he puts down in his notebook the forms of words, noting that reapse, equivalent to re ipsa, is used by Cieero, and sepse just as frequently, which means se ipse. Then he turns his attention to changes in current usage. Cicero, for example, says: "Inasmuch as we are summoned back from the very calx by his interruption." Now the line in the circus which we call the creta was called the calx by men of old time.

33. Again, he puts together some verses by Ennius, especially those which referred to Africanus:

A man to whom nor friend nor foe could give

Due meed for all his efforts and his deed.

From this passage the scholar declares that he infers the word opem to have meant formerly not merely assistance, but efforts. For Ennius must mean that neither friend nor foe could pay Scipio a reward worthy of his efforts.

34. Next, he congratulates himself on finding the source of Vergil's words:

Over whose head the mighty gate of Heaven

Thunders,

remarking that Ennius stole the idea from Homer, and Vergil from Ennius. For there is a couplet by Ennius, preserved in this same book of Cicero's, On the State:

If it be right for a mortal to scale the regions of Heaven,

Then the huge gate of the sky opens in glory to me. 35. But that I, too, while engaged upon another task, may not slip into the department of the philologist or the scholar, my advice is this – that all study of philosophy and all reading should be applied to the idea of living the happy life, that we should not hunt out archaic or far-fetched words and eccentric metaphors and figures of speech, but that we should seek precepts which will help us, utterances of courage and spirit which may at once be turned into facts. We should so learn them that words may become deeds.

36. And I hold that no man has treated mankind worse than he who has studied philosophy as if it were some marketable trade, who lives in a different manner from that which he advises. For those who are liable to every fault which they castigate advertise themselves as patterns of useless training.

37. A teacher like that can help me no more than a sea-sick pilot can be efficient in a storm. He must hold the tiller when the waves are tossing him; he must wrestle, as it were, with the sea; he must furl his sails when the storm rages; what good is a frightened and vomiting steersman to me? And how much greater, think you, is the storm of life than that which tosses any ship! One must steer, not talk.

All the words that these men utter and juggle before a listening crowd, belong to others.

38. They have been spoken by Plato, spoken by Zeno, spoken by Chrysippus or by Posidonius, and by a whole host of Stoics as numerous as excellent. I shall show you how men can prove their words to be their own: it is by doing what they have been talking about. Since therefore I have given you the message I wished to pass on to you, I shall now satisfy your craving and shall reserve for a new letter a complete answer to your summons; so that you may not approach in a condition of weariness a subject which is thorny and which should be followed with an attentive and painstaking ear. Farewell.

SENECA LETTER 109. On the Fellowship of Wise Men

1. You expressed a wish to know whether a wise man can help a wise man. For we say that the wise man is completely endowed with every good, and has attained perfection; accordingly, the question arises how it is possible for anyone to help a person who possesses the Supreme Good.

Good men are mutually helpful; for each gives practice to the other's virtues and thus maintains wisdom at its proper level. Each needs someone with whom he may make comparisons and investigations.

2. Skilled wrestlers are kept up to the mark by practice; a musician is stirred to action by one of equal proficiency. The wise man also needs to have his virtues kept in action; and as he prompts himself to do things, so is he prompted by another wise man.

3. How can a wise man help another wise man? He can quicken his impulses, and point out to him opportunities for honourable action. Besides, he can develop some of his own ideas; he can impart what he has discovered. For even in the case of the wise man something will always remain to discover, something towards which his mind may make new ventures.

4. Evil men harm evil men; each debases the other by rousing his wrath, by approving his churlishness, and

praising his pleasures; bad men are at their worst stage when their faults are most thoroughly intermingled, and their wickedness has been, so to speak, pooled in partnership. Conversely, therefore, a good man will help another good man. "How?" you ask.

5. Because he will bring joy to the other, he will strengthen his faith, and from the contemplation of their mutual tranquillity the delight of both will be increased. Moreover, they will communicate to each other a knowledge of certain facts; for the wise man is not all-knowing. And even if he were all-knowing, someone might be able to devise and point out short cuts, by which the whole matter is more readily disseminated.

6. The wise will help the wise, not, mark you, because of his own strength merely, but because of the strength of the man whom he assists. The latter, it is true, can by himself develop his own parts; nevertheless, even one who is running well is helped by one who cheers him on. "But the wise man does not really help the wise; he helps himself. Let me tell you this: strip the one of his special powers, and the other will accomplish nothing."

7. You might as well, on that basis, say that sweetness is not in the honey: for it is the person himself who is to eat it, that is so equipped, as to tongue and palate, for tasting this kind of food that the special flavour appeals to him, and anything else displeases. For there are certain men so affected by disease that they regard honey as bitter. Both men should be in good health, that the one may be helpful and the other a proper subject for help.

8. Again they say: "When the highest degree of heat has been attained, it is superfluous to apply more heat; and when the Supreme Good has been attained, it is superfluous to have a helper. Does a completely stocked farmer ask for further supplies from his neighbours? Does a soldier who is sufficiently armed for going well-equipped into action need any more weapons? Very well, neither does the wise man; for he is sufficiently equipped and sufficiently armed for life."

9. My answer to this is, that when one is heated to the highest degree, one must have continued heat to maintain the highest temperature. And if it be objected that heat is self-maintaining, I say that there are great distinctions among the things that you are comparing; for heat is a single thing, but helpfulness is of many kinds. Again, heat is not helped by the addition of further heat, in order to be hot; but the wise man cannot maintain his mental standard without intercourse with friends of his own kind – with whom he may share his goodness.

10. Moreover, there is a sort of mutual friendship among all the virtues [In other words, Wisdom, Justice, Courage, and Self-Restraint, together with the other qualities of simplicity, kindness, etc., being "avatars" of Virtue herself, are interrelated.]. Thus, he who loves the virtues of certain among his peers, and in turn exhibits his own to be loved, is helpful. Like things give pleasure, especially when they are honourable and when men know that there is mutual approval.

11. And besides, none but a wise man can prompt another wise man's soul in an intelligent way, just as man can be prompted in a rational way by man only. As, therefore, reason is necessary for the prompting of reason, so, in order to prompt perfect reason, there is need of perfect reason.

12. Some say that we are helped even by those who bestow on us the so-called "indifferent" benefits, such as money, influence, security, and all the other valued or essential aids to living. If we argue in this way, the veriest fool will be said to help a wise man. Helping, however, really means prompting the soul in accordance with Nature, both by the prompter's excellence and by the excellence of him who is thus prompted. And this cannot take place without advantage to the helper also. For in training the excellence of another, a man must necessarily train his own.

13. But, to omit from discussion supreme goods or the things which produce them, wise men can none the less be mutually helpful. For the mere discovery of a sage by a sage is in itself a desirable event; since everything good is naturally dear to the good man, and for this reason one feels congenial with a good man as one feels congenial with oneself.

14. It is necessary for me to pass from this topic to another, in order to prove my point. For the question is asked, whether the wise man will weigh his opinions, or whether he will apply to others for advice. Now he is compelled to do this when he approaches state and home duties – everything, so to speak, that is mortal. He needs outside advice on such matters, as does the physician, the pilot, the attorney, or the pleader of cases. Hence, the wise will sometimes help the wise; for they will persuade each other. But in these matters of great import also, – aye, of divine import, as I have termed them, – the wise man can also be useful by discussing honourable things in common, and by contributing his thoughts and ideas.

15. Moreover, it is in accordance with Nature to show affection for our friends, and to rejoice in their advancement as if it were absolutely our own. For if we have not done this, even virtue, which grows strong only through exercising our perceptions, will not abide with us. Now virtue advises us to arrange the present well, to take thought regarding the future,

to deliberate and apply our minds; and one who takes a friend into council with him, can more easily apply his mind and think out his problem. Therefore he will seek either the perfect wise man or one who has progressed to a point bordering on perfection. The perfect wise man, moreover, will help us if he aids our counsels with ordinary good sense.

16. They say that men see farther in the affairs of others than in their own. A defect of character causes this in those who are blinded by self-love, and whose fear in the hour of peril takes away their clear view of that which is useful; it is when a man is more at ease and freed from fear that he will begin to be wise. Nevertheless, there are certain matters where even wise men see the facts more clearly in the case of others than in their own. Moreover, the wise man will, in company with his fellow sage, confirm the truth of that most sweet and honourable proverb – "always desiring and always refusing the same things": it will be a noble result when they draw the load "with equal yoke."

17. I have thus answered your demand, although it came under the head of subjects which I include in my volumes On Moral Philosophy. Reflect, as I am often wont to tell you, that there is nothing in such topics for us except mental gymnastics. For I return again and again to the thought: "What good does this do me? Make me more brave now, more just, more restrained! I have not yet the opportunity to make use of my training; for I still need the physician.

18. Why do you ask of me a useless knowledge? You have promised great things; test me, watch me! You assured me that I should be unterrified though swords were flashing round me, though the point of the blade were grazing my throat; you assured me that I should be at ease though fires were blazing round me, or though a sudden whirlwind should snatch up my ship and carry it over all the sea. Now make good for me such a course of treatment that I may despise pleasure and glory. Thereafter you shall teach me to work out complicated problems, to settle doubtful points, to see through that which is not clear; teach me now what it is necessary for me to know!" Farewell.

SENECA LETTER 110. On True and False Riches

1. From my villa at Nomentum I send you greeting and bid you keep a sound spirit within you – in other words, gain the blessing of all the gods, for he is assured of their grace and favour who has become a blessing to himself. Lay aside for the present the belief of certain persons – that a god is assigned to each one of us as a sort of attendant – not a god of regular rank, but one of a lower grade – one of those whom Ovid calls "plebeian gods." Yet, while laying aside this belief, I would have you remember that our ancestors, who followed such a creed, have become Stoics; for they have assigned a Genius or a Juno to every individual. [Every man had his Genius, and every woman her Juno. In the case of the Stoics, God dwelt in every soul.]

2. Later on we shall investigate whether the gods have enough time on their hands to care for the concerns of private individuals; in the meantime, you must know that whether we are allotted to special guardians, or whether we are neglected and consigned to Fortune, you can curse a man with no heavier curse than to pray that he may be at enmity with himself. There is no reason, however, why you should ask the gods to be hostile to anyone whom you regard as deserving of punishment; they are hostile to such a person, I maintain, even though he seems to be advanced by their favour.

3. Apply careful investigation, considering how our affairs actually stand, and not what men say of them; you will then understand that evils are more likely to help us than to harm us. For how often has so-called affliction been the source and the beginning of happiness! How often have privileges which we welcomed with deep thanksgiving built steps for themselves to the top of a precipice, still uplifting men who were already distinguished – just as if they had previously stood in a position whence they could fall in safety!

4. But this very fall has in it nothing evil, if you consider the end, after which nature lays no man lower. The universal limit is near; yes, there is near us the point where the prosperous man is upset, and the point where the unfortunate is set free. It is we ourselves that extend both these limits, lengthening them by our hopes and by our fears. If, however, you are wise, measure all things according to the state of man; restrict at the same time both your joys and your fears. Moreover, it is worth while not to rejoice at anything for long, so that you may not fear anything for long.

5. But why do I confine the scope of this evil? There is no reason why you should suppose that anything is to be feared. All these things which stir us and keep us a-flutter, are empty things. None of us has sifted out the truth; we have passed fear on to one another; none has dared to approach the object which caused his dread, and to understand the nature of his fear – aye, the good behind it. That is why falsehood and vanity still gain credit – because they are not refuted. 6. Let us account it worth while to look closely at the matter; then it will be clear how fleeting, how unsure, and how harmless are the things which kucretius detected:

Like boys who cower frightened in the dark,

So grown-ups in the light of day feel fear. What, then? Are we not more foolish than any child, we who "in the light of day feel fear"?

7. But you were wrong, Lucretius; we are not afraid in the daylight; we have turned everything into a state of darkness. We see neither what injures nor what profits us; all our lives through we blunder along, neither stopping nor treading more carefully on this account. But you see what madness it is to rush ahead in the dark. Indeed, we are bent on getting ourselves called back from a greater distance; and though we do not know our goal, yet we hasten with wild speed in the direction whither we are straining.

8. The light, however, may begin to shine, provided we are willing. But such a result can come about only in one way – if we acquire by knowledge this familiarity with things divine and human, if we not only flood ourselves but steep ourselves therein, if a man reviews the same principles even though he understands them and applies them again and again to himself, if he has investigated what is good, what is evil, and what has falsely been so entitled; and, finally, if he has investigated honour and baseness, and Providence.

9. The range of the human intelligence is not confined within these limits; it may also explore outside the universe – its destination and its source, and the ruin towards which all nature hastens so rapidly. We have withdrawn the soul from this divine contemplation and dragged it into mean and lowly tasks, so that it might be a slave to greed, so that it might forsake the universe and its confines, and, under the command of masters who try all possible schemes, pry beneath the earth and seek what evil it can dig up therefrom – discontented with that which was freely offered to it.

10. Now God, who is the Father of us all, has placed ready to our hands those things which he intended for our own good, he did not wait for any search on our part, and he gave them to us voluntarily. But that which would be injurious, he buried deep in the earth. We can complain of nothing but ourselves; for we have brought to light the materials for our destruction, against the will of Nature, who hid them from us. We have bound over our souls to pleasure, whose service is the source of all evil; we have surrendered ourselves to selfseeking and reputation, and to other aims which are equally idle and useless.

11. What, then, do I now encourage you to do? Nothing new – we are not trying to find cures for new evils – but this first of all: namely, to see clearly for yourself what is necessary and what is superfluous. What is necessary will meet you everywhere; what is superfluous has always to be hunted-out – and with great endeavour.

12. But there is no reason why you should flatter yourself over-much if you despise gilded couches and jewelled furniture. For what virtue lies in despising useless things? The time to admire your own conduct is when you have come to despise the necessities. You are doing no great thing if you can live without royal pomp, if you feel no craving for boars which weigh a thousand pounds, or for flamingo tongues, or for the other absurdities of a luxury that already wearies of game cooked whole, and chooses different bits from separate animals; I shall admire you only when you have learned to scorn even the common sort of bread, when you have made yourself believe that grass grows for the needs of men as well as of cattle, when you have found out that food from the treetop can fill the belly - into which we cram things of value as if it could keep what it has received. We should satisfy our stomachs without being over-nice. How does it matter what the stomach receives, since it must lose whatever it has received?

13. You enjoy the carefully arranged dainties which are caught on land and sea; some are more pleasing if they are brought fresh to the table, others, if after long feeding and forced fattening they almost melt and can hardly retain their own grease. You like the subtly devised flavour of these dishes. But I assure you that such carefully chosen and variously seasoned dishes, once they have entered the belly, will be overtaken alike by one and the same corruption. Would you despise the pleasures of eating? Then consider its result!

4. I remember some words of Attalus, which elicited general applause: "Riches long deceived me. I used to be dazed when I caught some gleam of them here and there. I used to think that their hidden influence matched their visible show. But once, at a certain elaborate entertainment, I saw embossed work in silver and gold equalling the wealth of a whole city, and colours and tapestry devised to match objects which surpassed the value of gold or of silver – brought not only from beyond our own borders, but from beyond the borders of our enemies; on one side were slave-boys notable for their training and beauty, on the other were throngs of slavewomen, and all the other resources that a prosperous and mighty empire could offer after reviewing its possessions.

15. What else is this, I said to myself, than a stirring-up of man's cravings, which are in themselves provocative of lust? What is the meaning of all this display of money? Did we gather merely to learn what greed was? For my own part I left the place with less craving than I had when I entered. I came

to despise riches, not because of their uselessness, but because of their pettiness.

16. Have you noticed how, inside a few hours, that programme, however slow-moving and carefully arranged, was over and done? Has a business filled up this whole life of ours, which could not fill up a whole day? "I had another thought also: the riches seemed to me to be as useless to the possessors as they were to the onlookers.

17. Accordingly, I say to myself, whenever a show of that sort dazzles my eyes, whenever I see a splendid palace with a well-groomed corps of attendants and beautiful bearers carrying a litter: Why wonder? Why gape in astonishment? It is all show; such things are displayed, not possessed; while they please they pass away.

18. Turn thyself rather to the true riches. Learn to be content with little, and cry out with courage and with greatness of soul: 'We have water, we have porridge; let us compete in happiness with Jupiter himself.' And why not, I pray thee, make this challenge even without porridge and water? For it is base to make the happy life depend upon silver and gold, and just as base to make it depend upon water and porridge. 'But,' some will say, 'what could I do without such things?'

19. Do you ask what is the cure for want? It is to make hunger satisfy hunger; for, all else being equal, what difference is there in the smallness or the largeness of the things that force you to be a slave? What matter how little it is that Fortune can refuse to you?

20. Your very porridge and water can fall under another's jurisdiction; and besides, freedom comes, not to him over whom Fortune has slight power, but to him over whom so power at all. This is what I mean: you must crave nothing, if you would vie with Jupiter; for Jupiter craves nothing." This is what Attalus told us. If you are willing to think often of these things, you will strive not to seem happy, but to be happy, and, in addition, to seem happy to yourself rather than to others. Farewell.

SENECA LETTER 111. On the Vanity of Mental Gymnastics

 You have asked me to give you a Latin word for the Greek sophismata. Many have tried to define the term, but no name has stuck. This is natural, inasmuch as the thing itself has not been admitted to general use by us; the name, too, has met with opposition. But the word which Cicero used seems to me most suitable: he calls them cavillationes.

2. If a man has surrendered himself to them, he weaves many a tricky subtlety, but makes no progress toward real living; he does not thereby become braver, or more restrained, or loftier of spirit. He, however, who has practised philosophy to effect his own cure, becomes high-souled, full of confidence, invincible, and greater as you draw near him.

3. This phenomenon is seen in the case of high mountains, which appear less lofty when beheld from afar, but which prove clearly how high the peaks are when you come near them; such, my dear Lucilius, is our true philosopher, true by his acts and not by his tricks. He stands in a high place, worthy of admiration, lofty, and really great. He does not stretch himself or walk on tiptoe like those who seek to improve their height by deceit, wishing to seem taller than they really are; he is content with his own greatness.

4. And why should he not be content with having grown to such a height that Fortune cannot reach her hands to it? He is therefore above earthly things, equal to himself under all conditions, – whether the current of life runs free, or whether he is tossed and travels on troubled and desperate seas; but this steadfastness cannot be gained through such hairsplittings as I have just mentioned. The mind plays with them, but profits not a whit; the mind in such cases is simply dragging philosophy down from her heights to the level ground.

5. I would not forbid you to practise such exercises occasionally; but let it be at a time when you wish to do nothing. The worst feature, however, that these indulgences present is that they acquire a sort of self-made charm, occupying and holding the soul by a show of subtlety; although such weighty matters claim our attention, and a whole life seems scarcely sufficient to learn the single principle of despisein? No; "controlling" is the second task; for no one has controlled his life aright unless he has first learned to despise it. Farewell.

SENECA LETTER 112. On Reforming Hardened Sinners

1. I am indeed anxious that your friend be moulded and trained, according to your desire. But he has been taken in a very hardened state, or rather (and this is a more difficult problem), in a very soft state, broken down by bad and inveterate habits. I should like to give you an illustration from my own handicraft. [Seneca was an extensive and prosperous vine-grower. Compare Ep. 104. 6 f. for his description of his hobby at the country-place near Nomentum. There are many figures which deal with the vine scattered through the Letters.] 2. It is not every vine that admits the grafting process; if it be old and decayed, or if it be weak and slender, the vine either will not receive the cutting, or will not nourish it and make it a part of itself, nor will it accommodate itself to the qualities and nature of the grafted part. Hence we usually cut off the vine above ground, so that if we do not get results at first, we may try a second venture, and on a second trial graft it below the ground.

3. Now this person, concerning whom you have sent me your message in writing, has no strength; for he has pampered his vices. He has at one and the same time become flabby and hardened. He cannot receive reason, nor can he nourish it. "But," you say, "he desires reason of his own free will." Don't believe him. Of course I do not mean that he is lying to you; for he really thinks that he desires it. Luxury has merely upset his stomach; he will soon become reconciled to it again.

4. "But he says that he is put out with his former way of living." Very likely. Who is not? Men love and hate their vices at the same time. It will be the proper season to pass judgement on him when he has given us a guarantee that he really hates luxury; as it is now, luxury and he are merely not on speaking terms. Farewell.

SENECA LETTER 113. On the Vitality of the Soul and Its Attributes

1. You wish me to write to you my opinion concerning this question, which has been mooted by our school – whether justice, courage, foresight, and the other virtues, are living things. By such niceties as this, my beloved Lucilius, we have made people think that we sharpen our wits on useless objects, and waste our leisure time in discussions that will be unprofitable. I shall, however, do as you ask, and shall set forth the subject as viewed by our school. For myself, I confess to another belief: I hold that there are certain things which befit a wearer of white shoes and a Greek mantle. But what the beliefs are that have stirred the ancients, or those which the ancients have stirred up for discussion, I shall explain to you.

2. The soul, men are agreed, is a living thing, because of itself it can make us living things, and because "living things" have derived their name therefrom. But virtue is nothing else than a soul in a certain condition; therefore it is a living thing. Again, virtue is active, and no action can take place without impulse. And if a thing has impulse, it must be a living thing; for none except a living thing possesses impulse.

3. A reply to this is: "If virtue is a living thing, then virtue itself possesses virtue." Of course it possesses its own self! Just as the wise man does everything by reason of virtue, so virtue accomplishes everything by reason of itself. "In that case," say they, "all the arts also are living things, and all our thoughts and all that the mind comprehends. It therefore follows that many thousands of living things dwell in man's tiny heart, and that each individual among us consists of, or at least contains, many living beings."

Are you gravelled for an answer to this remark? Each of these will be a living thing; but they will not be many separate living things. And why? I shall explain, if you will apply your subtlety and your concentration to my words.

4. Each living thing must have a separate substance; but since all the things mentioned above have a single soul, consequently they can be separate living things but without plurality. I myself am a living thing, and a man; but you cannot say that there are two of me for that reason. And why? Because, if that were so, they would have to be two separate existences. This is what I mean: one would have to be sundered from the other so as to produce two. But whenever you have that which is manifold in one whole, it falls into the category of a single nature, and is therefore single.

5. My soul is a living thing, and so am I; but we are not two separate persons. And why? Because the soul is part of myself. It will only be reckoned as a definite thing in itself, when it shall exist by itself. But as long as it shall be part of another, it cannot be regarded as different. And why? I will tell you: it is because that which is different, must be personal and peculiar to itself, a whole, and complete within itself.

6. I myself have gone on record as being of a different opinion; for if one adopts this belief, not only the virtues will be living things, but so will their contrary vices, and the emotions, like wrath, fear, grief, and suspicion. Nay, the argument will carry us still further - all opinions and all thoughts will be living things. This is by no means admissible; since anything that man does is not necessarily the man himself.

7. "What is Justice?" people say. Justice is a soul that maintains itself in a certain attitude. "Then if the soul is a living being, so is Justice." By no means. For Justice is really a state, a kind of power, of the soul; and this same soul is transformed into various likenesses and does not become a different kind of living thing as often as it acts differently. Nor is the result of soul-action a living thing.

8. If Justice, Bravery, and the other virtues have actual life, do they cease to be living things and then begin life over again, or are they always living things? But the virtues cannot cease 9. "No," is the answer, "not many, because they are all attached to the one, being parts and members of a single whole." We are then portraying for ourselves an image of the soul like that of a many-headed hydra – each separate head fighting and destroying independently. And yet there is no separate living thing to each head; it is the head of a living thing, and the hydra itself is one single living thing. No one ever believed that the Chimaera contained a living lion or a living serpent; these were merely parts of the whole Chimaera; and parts are not living things.

10. Then how can you infer that Justice is a living thing? "Justice," people reply, "is active and helpful; that which acts and is helpful, possesses impulse; and that which possesses impulse is a living thing." True, if the impulse is its own; (but in the case of justice it is not its own;) the impulse comes from the soul.

11. Every living thing exists as it began, until death; a man, until he dies, is a man, a horse is a horse, a dog a dog. They cannot change into anything else. Now let us grant that Justice – which is defined as "a soul in a certain attitude," is a living thing. Let us suppose this to be so. Then Bravery also is alive, being "a soul in a certain attitude." But which soul? That which was but now defined as Justice? The soul is kept within the first-named being, and cannot cross over into another; it must last out its existence in the medium where it had its origin.

12. Besides, there cannot be one soul to two living things, much less to many living things. And if Justice, Bravery, Restraint, and all the other virtues, are living things, how will they have one soul? They must possess separate souls, or else they are not living things.

13. Several living things cannot have one body; this is admitted by our very opponents. Now what is the "body" of justice? "The soul," they admit. And of bravery? "The soul also." And yet there cannot be one body of two living things.

14. "The same soul, however," they answer, "assumes the guise of Justice, or Bravery, or Restraint." This would be possible if Bravery were absent when Justice was present, and if Restraint were absent when Bravery was present; as the case stands now, all the virtues exist at the same time. Hence, how can the separate virtues be living things, if you grant that there is one single soul, which cannot create more than one single living thing?

15. Again, no living thing is part of another living thing. But Justice is a part of the soul; therefore Justice is not a living thing. It looks as if I were wasting time over something that is an acknowledged fact; for one ought to decry such a topic rather than debate it. And no two living things are equal. Consider the bodies of all beings: every one has its particular colour, shape, and size.

16. And among the other reasons for marvelling at the genius of the Divine Creator is, I believe, this, – that amid all this abundance there is no repetition; even seemingly similar things are, on comparison, unlike. God has created all the great number of leaves that we behold: each, however, is stamped with its special pattern. All the many animals: none resembles another in size – always some difference! The Creator has set himself the task of making unlike and unequal things that are different; but all the virtues, as your argument states, are equal. Therefore, they are not living things.

17. Every living thing acts of itself; but virtue does nothing of itself; it must act in conjunction with man. All living things either are gifted with reason, like men and gods, or else are irrational, like beasts and cattle. Virtues, in any case, are rational; and yet they are neither men nor gods; therefore they are not living things.

18. Every living thing possessed of reason is inactive if it is not first stirred by some external impression; then the impulse comes, and finally assent confirms the impulse. Now what assent is, I shall explain. Suppose that I ought to take a walk: I do walk, but only after uttering the command to myself and approving this opinion of mine. Or suppose that I ought to seat myself, but only after the same process. This assent is not a wart of virtue.

19. For let us suppose that it is Prudence; how will Prudence assent to the opinion: "I must take a walk"? Nature does not allow this. For Prudence looks after the interests of its possessor, and not of its own self. Prudence cannot walk or be seated. Accordingly, it does not possess the power of assent, and it is not a living thing possessed of reason. But if virtue is a living thing, it is rational. But it is not rational; therefore it is not a living thing.

20. If virtue is a living thing, and virtue is a Good – is not, then, every Good a living thing? It is. Our school professes it. Now to save a father's life is a Good; it is also a Good to pronounce one's opinion judiciously in the senate, and it is a Good to hand down just opinions; therefore the act of saving a father's life is a living thing, also the act of pronouncing judicious opinions. We have carried this absurd argument so far that you cannot keep from laughing outright: wise silence is a Good, and so is a frugal dinner; therefore silence and dining are living things.

21. Indeed I shall never cease to tickle my mind and to make sport for myself by means of this nice nonsense. Justice and Bravery, if they are living things, are certainly of the earth. Now every earthly living thing gets cold or hungry or thirsty; therefore, Justice goes a-cold, Bravery is hungry, and Kindness craves a drink!

22. And what next? Should I not ask our honourable opponents what shape these living beings have? Is it that of man, or horse, or wild beast? If they are given a round shape, like that of a god, I shall ask whether greed and luxury and madness are equally round. For these, too, are "living things." If I find that they give a rounded shape to these also, I shall go so far as to ask whether a modest gait is a living thing; they must admit it, according to their argument, and proceed to say that a gait is a living thing, and a rounded living thing, at that!

23. Now do not imagine that I am the first one of our school who does not speak from rules but has his own opinion: Cleanthes and his pupil Chrysippus could not agree in defining the act of walking. Cleanthes held that it was spirit transmitted to the feet from the primal essence, while Chrysippus maintained that it was the primal essence in itself. Why, then, following the example of Chrysippus himself, should not every man claim his own freedom, and laugh down all these "living things," – so numerous that the universe itself cannot contain them?

24. One might say: "The virtues are not many living things, and yet they are living things. For just as an individual may be both poet and orator in one, even so these virtues are living things, but they are not many. The soul is the same; it can be at the same time just and prudent and brave, maintaining itself in a certain attitude towards each virtue."

25. The dispute is settled, and we are therefore agreed. For I shall admit, meanwhile, that the soul is a living thing with the proviso that later on I may cast my final vote; but I deny that the acts of the soul are living beings. Otherwise, all words and all verses would be alive; for if prudent speech is a Good, and every Good a living thing, then speech is a living thing. A prudent line of poetry is a Good; everything alive is a Good; therefore, the line of poetry is a living thing. And so "Arms and the man I sing," is a living thing; but they cannot call it rounded, because it has six feet!

26. "This whole proposition," you say, "which we are at this moment discussing, is a puzzling fabric." I split with laughter whenever I reflect that solecisms and barbarisms and syllogisms are living things, and, like an artist, I give to each a fitting likeness. Is this what we discuss with contracted brow and wrinkled forehead? I cannot say now, after Caelius, "What melancholy trifling!" It is more than this; it is absurd. Why do we not rather discuss something which is useful and wholesome to ourselves, seeking how we may attain the virtues, and finding the path which will take us in that direction?

27. Teach me, not whether Bravery be a living thing, but prove that no living thing is happy without bravery, that is, unless it has grown strong to oppose hazards and has overcome all the strokes of chance by rehearsing and anticipating their attack. And what is Bravery? It is the impregnable fortress for our mortal weakness; when a man has surrounded himself therewith, he can hold out free from anxiety during life's siege; for he is using his own strength and his own weapons.

28. At this point I would quote you a saying of our philosopher Posidonius: "There are never any occasions when you need think yourself safe because you wield the weapons of Fortune; fight with your own! Fortune does not furnish arms against herself; hence men equipped against their foes are unarmed against Fortune herself."

29. Alexander, to be sure, harried and put to flight the Persians, the Hyrcanians, the Indians, and all the other races that the Orient spreads even to the Ocean; but he himself, as he slew one friend or lost another, would lie in the darkness lamenting sometimes his crime, and sometimes his loss; he, the conqueror of so many kings and nations, was laid low by anger and grief! For he had made it his aim to win control over everything excent his emotions.

30. Oh with what great mistakes are men obsessed, who desire to push their limits of empire beyond the seas, who judge themselves most prosperous when they occupy many provinces with their soldiery and join new territory to the old! Little do they know of that kingdom which is on an equality with the heavens in greatness!

31. Self-Command is the greatest command of all. Let her teach me what a hallowed thing is the Justice which ever regards another's good and seeks nothing for itself except its own employment. It should have nothing to do with ambition and reputation; it should satisfy itself. Let each man convince himself of this before all else – "I must be just without reward." And that is not enough; let him convince himself also of this: "May I take pleasure in devoting myself of my own free will to uphold this noblest of virtues." Let all his thoughts be turned as far as possible from personal interests. You need not look about for the reward of a just deed; a just deed in itself offers a still greater return.

32. Fasten deep in your mind that which I remarked a short space above: that it makes no difference how many persons are acquainted with your uprightness. Those who wish their virtue to be advertised are not striving for virtue but for renown. Are you not willing to be just without being renowned? Nay, indeed you must often be just and be at the same time disgraced. And then, if you are wise, let ill repute, well won, be a delight. Farewell.

SENECA LETTER 114. On Style as a Mirror of Character 1. You have been asking me why, during certain periods, a degenerate style of speech comes to the fore, and how it is that men's wits have gone downhill into certain vices - in such a way that exposition at one time has taken on a kind of puffedup strength, and at another has become mincing and modulated like the music of a concert piece. You wonder why sometimes bold ideas - bolder than one could believe - have been held in favour, and why at other times one meets with phrases that are disconnected and full of innuendo, into which one must read more meaning than was intended to meet the ear. Or why there have been epochs which maintained the right to a shameless use of metaphor. For answer, here is a phrase which you are wont to notice in the popular speech one which the Greeks have made into a proverb: "Man's speech is just like his life."

2. Exactly as each individual man's actions seem to speak, so people's style of speaking often reproduces the general character of the time, if the morale of the public has relaxed and has given itself over to effeminacy. Wantonness in speech is proof of public luxury, if it is popular and fashionable, and not confined to one or two individual instances.

3. A man's ability [i.e., that inborn quality which is compounded of character and intelligence.] cannot possibly be of one sort and his soul of another. If his soul be wholesome, well-ordered, serious, and restrained, his ability also is sound and sober. Conversely, when the one degenerates, the other is also contaminated. Do you not see that if a man's soul has become sluggish, his limbs drag and his feet move indolently? If it is womanish, that one can detect the effeminacy by his very gait? That a keen and confident soul quickens the step? That madness in the soul, or anger (which resembles madness), hastens our bodily movements from walking to rushing? And how much more do you think that this affects one's ability, which is entirely interwoven with the soul, – being moulded thereby, obeying its commands, and deriving therefrom its laws!

4. How Maecenas lived is too well-known for present comment. We know how he walked, how effeminate he was, and how he desired to display himself; also, how unwilling he was that his vices should escape notice. What, then? Does not the looseness of his speech match his ungirt attire? Are his habits, his attendants, his house, his wife, any less clearly marked than his words? He would have been a man of great powers, had he set himself to his task by a straight path, had he not shrunk from making himself understood, had he not been so loose in his style of speech also. You will therefore see that his eloquence was that of an intoxicated man – twisting, turning, unlimited in its slackness.

5. What is more unbecoming than the words: "A stream and a bank covered with long-tressed woods"? And see how "men plough the channel with boats and, turning up the shallows, leave gardens behind them." Or, "He curls his lady-locks, and bills and coos, and starts a-sighing, like a forest lord who offers prayers with down-bent neck." Or, "An unregenerate crew, they search out people at feasts, and assail households with the wine-cup, and, by hope, exact death." Or, "A Genius could hardly bear witness to his own festival"; or "threads of tiny tapers and crackling meal"; "mothers or wives clothing the hearth."

6. Can you not at once imagine, on reading through these words, that this was the man who always paraded through the city with a flowing tunic? For even if he was discharging the absent emperor's duties, he was always in undress when they asked him for the countersign. Or that this was the man who, as judge on the bench, or as an orator, or at any public function, appeared with his cloak wrapped about his head, leaving only the ears exposed, like the millionaire's runaway slaves in the farce? Or that this was the man who, at the very time when the state was embroiled in civil strife, when the city was in difficulties and under martial law, was attended in public by two eunuchs – both of them more men than himself? Or that this was the man who had but one wife, and yet was married countless times?

7. These words of his, put together so faultily, thrown off so carelessly, and arranged in such marked contrast to the usual practice, declare that the character of their writer was equally unusual, unsound, and eccentric. To be sure, we bestow upon him the highest praise for his humanity; he was sparing with the sword and refrained from bloodshed; and he made a show of his power only in the course of his loose living; but he spoiled, by such preposterous finickiness of style, this genuine praise, which was his due.

8. For it is evident that he was not really gentle, but effeminate, as is proved by his misleading word-order, his

inverted expressions, and the surprising thoughts which frequently contain something great, but in finding expression have become nerveless. One would say that his head was turned by too great success.

This fault is due sometimes to the man, and sometimes to his epoch.

9. When prosperity has spread luxury far and wide, men begin by paying closer attention to their personal appearance. Then they go crazy over furniture. Next, they devote attention to their houses – how to take up more space with them, as if they were country-houses, how to make the walls glitter with marble that has been imported over seas, how to adorn a roof with gold, so that it may match the brightness of the inlaid floors. After that, they transfer their exquisite taste to the dinner-table, attempting to court approval by novelty and by departures from the customary order of dishes, so that the courses which we are accustomed to serve at the end of the meal may be served first, and so that the departing guests may partake of the kind of food which in former days was set before them on their arrival.

10. When the mind has acquired the habit of scorning the usual things of life, and regarding as mean that which was once customary, it begins to hunt for novelties in speech also; now it summons and displays obsolete and old-fashioned words; now it coins even unknown words or misshapes them; and now a bold and frequent metaphorical usage is made a special feature of style, according to the fashion which has just become prevalent.

11. Some cut the thoughts short, hoping to make a good impression by leaving the meaning in doubt and causing the hearer to suspect his own lack of wit. Some dwell upon them and lengthen them out. Others, too, approach just short of a fault - for a man must really do this if he hopes to attain an imposing effect - but actually love the fault for its own sake. In short, whenever you notice that a degenerate style pleases the critics, you may be sure that character also has deviated from the right standard. Just as luxurious banquets and elaborate dress are indications of disease in the state, similarly a lax style, if it be popular, shows that the mind (which is the source of the word) has lost its balance. Indeed you ought not to wonder that corrupt speech is welcomed not merely by the more squalid mob but also by our more cultured throng; for it is only in their dress and not in their judgements that they differ.

12. You may rather wonder that not only the effects of vices, but even vices themselves, meet with approval. For it has ever been thus: no man's ability has ever been approved without something being pardoned. Show me any man, however famous; I can tell you what it was that his age forgave in him, and what it was that his age purposely overlooked. I can show you many men whose vices have caused them no harm, and not a few who have been even helped by these vices. Yes, I will show you persons of the highest reputation, set up as models for our admiration; and yet if you seek to correct their errors, you destroy them; for vices are so intertwined with virtues that they drag the virtues along with them.

13. Moreover, style has no fixed laws; it is changed by the usage of the people, never the same for any length of time. Many orators hark back to earlier epochs for their vocabulary, speaking in the language of the Twelve Tables [Fifth century BC]. Gracchus, Crassus, and Curio, in their eyes, are too refined and too modern; so back to Appius and Coruncanius! Conversely, certain men, in their endeavour to maintain nothing but well-worn and common usages, fall into a humdrum style.

14. These two classes, each in its own way, are degenerate; and it is no less degenerate to use no words except those which are conspicuous, high-sounding, and poetical, avoiding what is familiar and in ordinary usage. One is, I believe, as faulty as the other: the one class are unreasonably elaborate, the other are unreasonably negligent; the former depilate the leg, the latter not even the armpit.

15. Let us now turn to the arrangement of words. In this department, what countless varieties of fault I can show you! Some are all for abruptness and unevenness of style, purposely disarranging anything which seems to have a smooth flow of language. They would have jolts in all their transitions; they regard as strong and manly whatever makes an uneven impression on the ear. With some others it is not so much an "arrangement" of words as it is a setting to music; so wheedling and soft is their gliding style.

16. And what shall I say of that arrangement in which words are put off and, after being long waited for, just manage to come in at the end of a period? Or again of that softly-concluding style, Cicero-fashion, with a gradual and gently poised descent always the same and always with the customary arrangement of the rhythm! Nor is the fault only in the style of the sentences, if they are either petty and childish, or debasing, with more daring than modesty should allow, or if they are flowery and cloying, or if they end in emptiness, accomplishing mere sound and nothing more.

17. Some individual makes these vices fashionable – some person who controls the eloquence of the day; the rest follow his lead and communicate the habit to each other. Thus when

Sallust was in his glory, phrases were lopped off, words came to a close unexpectedly, and obscure conciseness was equivalent to elegance. L. Arruntius, a man of rare simplicity, author of a historical work on the Punic War, was a member and a strong supporter of the Sallust school. There is a phrase in Sallust: exercitum argento fecit, meaning thereby that he recruited an army by means of money. Arruntius began to like this idea; he therefore inserted the verb facio all through his book. Hence, in one passage, fugam nostris fecere; in another, Hiero, rex Syracusanorum, bellum fecit; and in another, quae audita Panhormitanos dedrer Romanis fecere.

18. I merely desired to give you a taste; his whole book is interwoven with such stuff as this. What Sallust reserved for occasional use, Arruntius makes into a frequent and almost continual habit – and there was a reason: for Sallust used the words as they occurred to his mind, while the other writer went afield in search of them. So you see the results of copying another man's vices.

19. Again, Sallust said: aquis hiemantibus. Arruntius, in his first book on the Punic War, uses the words: repente hiemavit tempestas. And elsewhere, wishing to describe an exceptionally cold year, he says: totus hiemavit annus. And in another passage: inde sexaginta onerarias leves praeter militem et necessarios nautarum hiemante aquilone misit; and he continues to bolster many passages with this metaphor. In a certain place, Sallust gives the words: inter arma civilia aequi bonique famas petit; and Arruntius cannot restrain himself from mentioning at once, in the first book, that there were extensive "reminders" concerning Regulus.

20. These and similar faults, which imitation stamps upon one's style, are not necessarily indications of loose standards or of debased mind; for they are bound to be personal and peculiar to the writer, enabling one to judge thereby of a particular author's temperament; just as an angry man will talk in an angry way, an excitable man in a flurried way, and an effeminate man in a style that is soft and unresisting.

21. You note this tendency in those who pluck out, or thin out, their beards, or who closely shear and shave the upper lip while preserving the rest of the hair and allowing it to grow, or in those who wear cloaks of outlandish colours, who wear transparent togas, and who never deign to do anything which will escape general notice; they endeavour to excite and attract men's attention, and they put up even with censure, provided that they can advertise themselves. That is the style of Maecenas and all the others who stray from the path, not by hazard, but consciously and voluntarily.

22. This is the result of great evil in the soul. As in the case of drink, the tongue does not trip until the mind is overcome beneath its load and gives way or betrays itself; so that intoxication of style – for what else than this can I call it? – never gives trouble to anyone unless the soul begins to totter. Therefore, I say, take care of the soul; for from the soul issue our thoughts, from the soul our words, from the soul our dispositions, our expressions, and our very gait. When the soul is sound and strong, the style too is vigorous, energetic, manly; but if the soul lose its balance, down comes all the rest in ruins.

23. If but the king be safe, your swarm will live

Harmonious; if he die, the bees revolt.

The soul is our king. If it be safe, the other functions remain on duty and serve with obedience; but the slightest lack of equilibrium in the soul causes them to waver along with it. And when the soul has yielded to pleasure, its functions and actions grow weak, and any undertaking comes from a nerveless and unsteady source.

24. To persist in my use of this simile – our soul is at one time a king, at another a tyrant. The king, in that he respects things honourable, watches over the welfare of the body which is entrusted to his charge, and gives that body no base, no ignoble commands. But an uncontrolled, passionate, and effeminate soul changes kingship into that most dread and detestable quality – tyranny; then it becomes a prey to the uncontrolled emotions, which dog its steps, elated at first, to be sure, like a populace idly sated with a largess which will ultimately be its undoing, and spoiling what it cannot consume.

25. But when the disease has gradually eaten away the strength, and luxurious habits have penetrated the marrow and the sinews, such a soul exults at the sight of limbs which, through its overindulgence, it has made useless; instead of its own pleasures, it views those of others; it becomes the gobetween and witness of the passions which, as the result of self-gratification, it can no longer feel. Abundance of delights is not so pleasing a thing to that soul as it is bitter, because it cannot send all the dainties of yore down through the overworked throat and stomach, because it can no longer whirl in the maze of eunuchs and mistresses, and it is melancholy because a great part of its happiness is shut off, through the limitations of the body.

26. Now is it not madness, Lucilius, for none of us to reflect that he is mortal? Or frail? Or again that he is but one individual? Look at our kitchens, and the cooks, who bustle about over so many fires; is it, think you, for a single belly that all this bustle and preparation of food takes place? Look at the old brands of wine and store-houses filled with the vintages of many ages; is it, think you, a single belly that is to receive the stored wine, sealed with the names of so many consuls, and gathered from so many vineyards? Look, and mark in how many regions men plough the earth, and how many thousands of farmers are tilling and digging; is it, think you, for a single belly that crops are planted in Sicily and Africa?

27. We should be sensible, and our wants more reasonable, if each of us were to take stock of himself, and to measure his bodily needs also, and understand how little he can consume, and for how short a time! But nothing will give you so much help toward moderation as the frequent thought that life is short and uncertain here below; whatever you are doing, have regard to death. Farewell.

SENECA LETTER 115. On the Superficial Blessings

1. I wish, my dear Lucilius, that you would not be too particular with regard to words and their arrangement; I have greater matters than these to commend to your care. You should seek what to write, rather than how to write it – and even that not for the purpose of writing but of feeling it, that you may thus make what you have felt more your own and, as it were, set a seal on it.

2. Whenever you notice a style that is too careful and too polished, you may be sure that the mind also is no less absorbed in petty things. The really great man speaks informally and easily; whatever he says, he speaks with assurance rather than with pains. You are familiar with the young dandies, natty as to their beards and locks, fresh from the bandbox; you can never expect from them any strength or any soundness. Style is the garb of thought: if it be trimmed, or dyed, or treated, it shows that there are defects and a certain amount of flaws in the mind. Elaborate elegance is not a manly garb.

3. If we had the privilege of looking into a good man's soul, oh what a fair, holy, magnificent, gracious, and shining face should we behold – radiant on the one side with justice and temperance, on another with bravery and wisdom! And, besides these, thriftiness, moderation, endurance, refinement, affability, and – though hard to believe – love of one's fellowmen, that Good which is so rare in man, all these would be shedding their own glory over that soul. There, too, forethought combined with elegance and, resulting from these, a most excellent greatness of soul (the noblest of all these virtues) – indeed what charm, O ye heavens, what authority and dignity would they contribute! What a wonderful combination of sweetness and power! No one could call such a face lovable without also calling it worshipful.

4. If one might behold such a face, more exalted and more radiant than the mortal eye is wont to behold, would not one pause as if struck dumb by a visitation from above, and utter a silent prayer, saying: "May it be lawful to have looked upon it!"? And then, led on by the encouraging kindliness of his expression, should we not bow down and worship? Should we not, after much contemplation of a far superior countenance, surpassing those which we are wont to look upon, mild-eyed and yet flashing with life-giving fire – should we not then, I say, in reverence and awe, give utterance to those famous lines of our poet Vergil:

5. O maiden, words are weak! Thy face is more

Than mortal, and thy voice rings sweeter far

Than mortal man's;

Blest be thou; and, whoe'er thou art, relieve Our heavy burdens.

And such a vision will indeed be a present help and relief to us, if we are willing to worship it. But this worship does not consist in slaughtering fattened bulls, or in hanging up offerings of gold or silver, or in pouring coins into a temple treasury; rather does it consist in a will that is reverent and upright.

6. There is none of us, I declare to you, who would not burn with love for this vision of virtue, if only he had the privilege of beholding it; for now there are many things that cut off our vision, piercing it with too strong a light, or clogging it with too much darkness. If, however, as certain drugs are wont to be used for sharpening and clearing the eyesight, we are likewise willing to free our mind's eye from hindrances, we shall then be able to perceive virtue, though it be buried in the body – even though poverty stand in the way, and even though lowliness and disgrace block the path. We shall then, I say, behold that true beauty, no matter if it be smothered by unloveliness.

7. Conversely, we shall get a view of evil and the deadening influences of a sorrow-laden soul – in spite of the hindrance that results from the widespread gleam of riches that flash round about, and in spite of the false light – of official position on the one side or great power on the other – which beats pitlessly upon the beholder.

8. Then it will be in our power to understand how contemptible are the things we admire – like children who regard every toy as a thing of value, who cherish necklaces bought at the price of a mere penny as more dear than their parents or than their brothers. And what, then, as Aristo says, is the difference between ourselves and these children, except that we elders go crazy over paintings and sculpture, and that our folly costs us dearer? Children are pleased by the smooth and variegated pebbles which they pick up on the beach, while we take delight in tall columns of veined marble brought either from Egyptian sands or from African deserts to hold up a colonnade or a dining-hall large enough to contain a city crowd:

9. we admire walls veneered with a thin layer of marble, although we know the while what defects the marble conceals. We cheat our own eyesight, and when we have overlaid our ceilings with gold, what else is it but a lie in which we take such delight? For we know that beneath all this gilding there lurks some ugly wood. Nor is such superficial decoration spread merely over walls and ceilings; nay, all the famous men whom you see strutting about with head in air, have nothing but a gold-leaf prosperity. Look beneath, and you will know how much evil lies under that thin coating of titles.

10. Note that very commodity which holds the attention of so many magistrates and so many judges, and which creates both magistrates and judges – that money, I say, which ever since it began to be regarded with respect, has caused the ruin of the true honour of things; we become alternately merchants and merchandise, and we ask, not what a thing truly is, but what it costs; we fulfil duties if it pays, or neglect them if it pays, and we follow an honourable course as long as it encourages our expectations, ready to veer across to the opposite course if crooked conduct shall promise more.

11. Our parents have instilled into us a respect for gold and silver; in our early years the craving has been implanted, settling deep within us and growing with our growth. Then too the whole nation, though at odds on every other subject, agrees upon this; this is what they regard, this is what they ask for their children, this is what they dedicate to the gods when they wish to show their gratitude – as if it were the greatest of all man's possessions! And finally, public opinion has come to such a pass that poverty is a hissing and a reproach, despised by the rich and loathed by the poor.

12. Verses of poets also are added to the account – verses which lend fuel to our passions, verses in which wealth is praised as if it were the only credit and glory of mortal man. People seem to think that the immortal gods cannot give any better gift than wealth – or even posses anything better:

13. The Sun-god's palace, set with pillars tall,

And flashing bright with gold.

Or they describe the chariot of the Sun:

Gold was the axle, golden eke the pole,

And gold the tires that bound the circling wheels,

And silver all the spokes within the wheels. And finally, when they would praise an epoch as the best,

they call it the "Golden Age."

14. Even among the Greek tragic poets there are some who regard pelf as better than purity, soundness, or good report: Call me a scoundrel, only call me rich!

All ask how great my riches are, but none

Whether my soul is good.

None asks the means or source of your estate,

But merely how it totals.

All men are worth as much as what they own.

What is most shameful for us to possess?

Nothing!

If riches bless me, I should love to live; Yet I would rather die, if poor.

A man dies nobly in pursuit of wealth.

Money, that blessing to the race of man,

Cannot be matched by mother's love, or lisp

Of children, or the honour due one's sire.

And if the sweetness of the lover's glance

Be half so charming, Love will rightly stir

The hearts of gods and men to adoration.

15. When these last-quoted lines were spoken at a performance of one of the tragedies of Euripides, the whole audience rose with one accord to hiss the actor and the play off the stage. But Euripides jumped to his feet, claimed a hearing, and asked them to wait for the conclusion and see the destiny that was in store for this man who gaped after gold. Bellerophon, in that particular drama, was to pay the penalty which is exacted of all men in the drama of life.

16. For one must pay the penalty for all greedy acts; although the greed is enough of a penalty in itself. What tears and toil does money wring from us! Greed is wretched in that which it craves and wretched in that which it wins! Think besides of the daily worry which afflicts every possessor in proportion to the measure of his gain! The possession of riches means even greater agony of spirit than the acquisition of riches. And how we sorrow over our losses – losses which fall heavily upon us, and yet seem still more heavy! And finally, though Fortune may leave our property intact, whatever we cannot eain in addition. is sheer loss!

17. "But," you will say to me, "people call yonder man happy and rich; they pray that some day they may equal him in possessions." Very true. What, then? Do you think that there is any more pitiable lot in life than to possess misery and hatred also? Would that those who are bound to crave wealth could compare notes with the rich man! Would that those who are bound to seek political office could confer with ambitious men who have reached the most sought-after honours! They would then surely alter their prayers, seeing that these grandees are always gaping after new gain, condemning what is already behind them. For there is no one in the world who is contented with his prosperity, even if it comes to him on the run. Men complain about their plans and the outcome of their plans; they always prefer what they have failed to win.

18. So philosophy can settle this problem for you, and afford you, to my mind, the greatest boon that exists – absence of regret for your own conduct. This is a sure happiness; no storm can ruffle it; but you cannot be steered safely through by any subtly woven words, or any gently flowing language. Let words proceed as they please, provided only your soul keeps its own sure order, provided your soul is great and holds unruffled to its ideals, pleased with itself on account of the very things which displease others, a soul that makes life the test of its progress, and believes that its knowledge is in exact proportion to its freedom from desire and its freedom from fear. Farewell.

SENECA LETTER 116. On Self-Control

1. The question has often been raised whether it is better to have moderate emotions, or none at all. Philosophers of our school reject the emotions; the Peripatetics keep them in check. I, however, do not understand how any half-way disease can be either wholesome or helpful. Do not fear; I am not robbing you of any privileges which you are unwilling to lose! I shall be kindly and indulgent towards the objects for which you strive – those which you hold to be necessary to our existence, or useful, or pleasant; I shall simply strip away the vice. For after I have issued my prohibition against the desires, I shall still allow you to wish that you may do the same things fearlessly and with greater accuracy of judgement, and to feel even the pleasures more than before; and how can these pleasures help coming more readily to your call, if you are their lord rather than their slave!

2. "But," you object, "it is natural for me to suffer when I am bereaved of a friend; grant some privileges to tears which have the right to flow! It is also natural to be affected by men's opinions and to be cast down when they are unfavourable; so why should you not allow me such an honourable aversion to bad opinion?" There is no vice which lacks some plea; there is no vice that at the start is not modest and easily entreated; but afterwards the trouble spreads more widely. If you allow it to begin, you cannot make sure of its ceasing.

3. Every emotion at the start is weak. Afterwards, it rouses itself and gains strength by progress; it is more easy to forestall it than to forgo it. Who does not admit that all the emotions flow as it were from a certain natural source? We are endowed by Nature with an interest in our own well-being; but this very interest, when overindulged, becomes a vice. Nature has intermingled pleasure with necessary things – not in order that we should seek pleasure, but in order that the addition of pleasure may make the indispensable means of existence attractive to our eyes. Should it claim rights of its own, it is luxury. Let us therefore resist these faults when they are demanding entrance, because, as I have said, it is easier to deny them admittance than to make them depart.

4. And if you cry: "One should be allowed a certain amount of grieving, and a certain amount of fear," I reply that the "certain amount" can be too long-drawn-out, and that it will refuse to stop short when you so desire. The wise man can safely control himself without becoming over-anxious; he can halt his tears and his pleasures at will; but in our case, because it is not easy to retrace our steps, it is best not to push ahead at all.

5. I think that Panaetius gave a very neat answer to a certain youth who asked him whether the wise man should become a lover: "As to the wise man, we shall see later; but you and I, who are as yet far removed from wisdom, should not trust ourselves to fall into a state that is disordered, uncontrolled, enslaved to another, contemptible to itself. If our love be not spurned, we are excited by its kindness; if it be scorned, we are kindled by our pride. An easily-won love hurts us as much as one which is difficult to win; we are captured by that which is compliant, and we struggle with that which is hard. Therefore, knowing our weakness, let us remain quiet. Let us not expose this unstable spirit to the temptations of drink, or beauty, or flattery, or anything that coaxes and allures."

6. Now that which Panaetius replied to the question about love may be applied, I believe, to all the emotions. In so far as we are able, let us step back from slippery places; even on dry ground it is hard enough to take a sturdy stand.

7. At this point, I know, you will confront me with that common complaint against the Stoics: "Your promises are too great, and your counsels too hard. We are mere manikins, unable to deny ourselves everything. We shall sorrow, but not to any great extent; we shall feel desires, but in moderation; we shall give way to anger, but we shall be appeased." 8. And do you know why we have not the power to attain this Stoic ideal? It is because we refuse to believe in our power. Nay, of a surety, there is something else which plays a part: it is because we are in love with our vices; we uphold them and prefer to make excuses for them rather than shake them off. We mortals have been endowed with sufficient strength by nature, if only we use this strength, if only we concentrate our powers and rouse them all to help us or at least not to hinder us. The reason is unwillingness, the excuse, inability. Farewell.

SENECA LETTER 117. On Real Ethics as Superior to Syllogistic Subtleties

1. You will be fabricating much trouble for me, and you will be unconsciously embroiling me in a great discussion, and in considerable bother, if you put such petty questions as these; for in settling them I cannot disagree with my fellow-Stoics without impairing my standing among them, nor can I subscribe to such ideas without impairing my conscience. Your query is, whether the Stoic belief is true: that wisdom is a Good, but that being wise is not a Good. I shall first set forth the Stoic view, and then I shall be bold enough to deliver my own opinion.

2. We of the Stoic school believe that the Good is corporeal, because the Good is active, and whatever is active is corporeal. That which is good, is helpful. But, in order to be helpful, it must be active; so, if it is active, it is corporeal. They (the Stoics) declare that wisdom is a Good; it therefore follows that one must also call wisdom corporeal.

3. But they do not think that being wise can be rated on the same basis. For it is incorporeal and accessory to something else, in other words, wisdom; hence it is in no respect active or helpful. "What, then?" is the reply; "Why do we not say that being wise is a Good?" We do say so; but only by referring it to that on which it depends – in other words, wisdom itself.

4. Let me tell you what answers other philosophers make to these objectors, before I myself begin to form my own creed and to take my place entirely on another side. "Judged in that light," they say, "not even living happily is a Good. Willy nilly, such persons ought to reply that the happy life is a Good, but that living happily is not a Good."

5. And this objection is also raised against our school: "You wish to be wise. Therefore, being wise is a thing to be desired. And if it be a thing to be desired it is a Good." So our philosophers are forced to twist their words and insert another syllable into the word "desired," – a syllable which our language does not normally allow to be inserted. But, with your permission, I shall add it. "That which is good," they say, "is a thing to be desired; the desirable thing is that which falls to our lot after we have attained the Good. For the desirable is not sought as a Good; it is an accessory to the Good has been attained."

6. I myself do not hold the same view, and I judge that our philosophers [i.e., the Stoics as mentioned above (with whom Seneca often disagrees on minor details).] have come down to this argument because they are already bound by the first link in the chain and for that reason may not alter their definition. People are wont to concede much to the things which all men take for granted; in our eyes the fact that all men agree upon something is a proof of its truth. For instance, we infer that the gods exist, for this reason, among others - that there is implanted in everyone an idea concerning deity, and there is no people so far beyond the reach of laws and customs that it does not believe at least in gods of some sort. And when we discuss the immortality of the soul, we are influenced in no small degree by the general opinion of mankind, who either fear or worship the spirits of the lower world. I make the most of this general belief: you can find no one who does not hold that wisdom is a Good, and being wise also.

7. I shall not appeal to the populace, like a conquered gladiator; let us come to close quarters, using our own weapons. When something affects a given object, is it outside the object which it affects, or is it inside the object it affects? If it is inside the object it affects, it is a scorporeal as the object which it affects. For nothing can affect another object without touching it, and that which touches is corporeal. If it is outside, it withdraws after having affected the object. And withdrawal means motion. And that which possesses motion, is corporeal.

8. You expect me, I suppose, to deny that "race" differs from "running," that "heat" differs from "being hot," that "light" differs from "giving light." I grant that these pairs vary, but hold that they are not in separate classes. If good health is an indifferent quality, then so is being in good health; if beauty is an indifferent quality, then so is being beautiful. If justice is a Good, then so is being just. And if baseness is an evil, then it is an evil to be base – just as much as, if sore eyes are an evil, the state of having sore eyes is also an evil. Neither quality, you may be sure, can exist without the other. He who is wise is a man of wisdom; he who is a man of wisdom is wise. So true it is that we cannot doubt the quality of the one to equal the quality of the other, that they are both regarded by certain persons as one and the same.

9. Here is a question, however, which I should be glad to put: granted that all things are either good or bad or

indifferent – in what class does being wise belong? People deny that it is a Good; and, as it obviously is not an evil, it must consequently be one of the "media." But we mean by the "medium," or the "indifferent" quality that which can fall to the lot of the bad no less than to the good – such things as money, beauty, or high social position. But the quality of being wise can fall to the lot of the good man alone; therefore being wise is not an indifferent quality. Nor is it an evil, either; because it cannot fall to the lot of the bad man; therefore, it is a Good. That which the good man alone can possess, is a Good; now being wise is the possession of the good man only; therefore it is a Good.

10. The objector replies: "It is only an accessory of wisdom." Very well, then, I say, this quality which you call being wise – does it actively produce wisdom, or is it a passive concomitant of wisdom? It is corporeal in either case. For that which is acted upon and that which acts, are alike corporeal; and, if corporeal, each is a Good. The only quality which could prevent it from being a Good, would be incorporeality.

11. The Peripatetics believe that there is no distinction between wisdom and being wise, since either of these implies the other also. Now do you suppose that any man can be wise except one who possesses wisdom? Or that anyone who is wise does not possess wisdom?

12. The old masters of dialectic, however, distinguish between these two conceptions; and from them the classification has come right down to the Stoics. What sort of a classification this is, I shall explain: A field is one thing, and the possession of the field another thing; of course, because "possessing the field" refers to the possessor rather than to the field itself. Similarly, wisdom is one thing and being wise another. You will grant, I suppose, that these two are separate ideas – the possessed and the possessor: Now wisdom being wise? I cannot call it "Mind Perfected," but rather that which falls to the lot of him who possesses a "mind perfected"; thus a good mind is one thing, and the so-called possession of a good mind another.

13. "There are," it is said, "certain natural classes of bodies; we say: 'This is a man,' 'this is a horse.' Then there attend on the bodily natures certain movements of the mind which declare something about the body. And these have a certain essential quality which is sundered from body; for example: 'I see Cato walking.' The senses indicate this, and the mind believes it. What I see, is body, and upon this I concentrate my eves and my mind. Again, I say: 'Cato walks.' What I say, they continue, "is not body; it is a certain declarative fact concerning body - called variously an 'utterance,' a 'declaration,' a 'statement.' Thus, when we say 'wisdom,' we mean something pertaining to body; when we say 'he is wise,' we are speaking concerning body. And it makes considerable difference whether you mention the person directly, or speak concerning the person.

14. Supposing for the present that these are two separate conceptions (for I am not yet prepared to give my own opinion); what prevents the existence of still a third – which is none the less a Good? I remarked a little while ago that a "field" so nothing, and the "possession of a field" another; of course, for possessor and possessed are of different natures; the latter is the land, and the former is the man who owns the land. But with regard to the point now under discussion, both are of the same nature – the possessor of wisdom, and wisdom itself.

15. Besides, in the one case that which is possessed is one thing, and he who possesses it is another; but in this case the possessed and the possessor come under the same category. The field is owned by virtue of law, wisdom by virtue of nature. The field can change hands and go into the ownership of another; but wisdom never departs from its owner. Accordingly, there is no reason why you should try to compare things that are so unlike one another. I had started to say that these can be two separate conceptions, and yet that both can be Goods – for instance, wisdom and the wise man being two separate things and yet granted by you to be equally good. And just as there is no objection to regarding both wisdom and the possessor of wisdom as Goods, so there is no objection to regarding as a good both wisdom and the possession of wisdom, – in other words, being wise.

16. For I only wish to be a wise man in order to be wise. And what then? Is not that thing a Good without the possession of which a certain other thing cannot be a Good? You surely admit that wisdom, if given without the right to be used, is not to be welcomed! And wherein consists the use of wisdom? In being wise; that is its most valuable attribute; if you withdraw this, wisdom becomes superfluous. If processes of torture are evil, then being tortured is an evil – with this reservation, indeed, that if you take away the consequences, the former are not evil. Wisdom is a condition of "mind perfected," and being wise is the employment of this "mind perfected." How can the employment of that thing not be a Good, which without employment is not a Good?

17. If I ask you whether wisdom is to be desired, you admit that it is. If I ask you whether the employment of wisdom is to be desired, you also admit the fact; for you say that you will not receive wisdom if you are not allowed to employ it. Now that which is to be desired is a Good. Being wise is the employment of wisdom, just as it is of eloquence to make a speech, or of the eyes to see things. Therefore, being wise is the employment of wisdom, and the employment of wisdom is to be desired. Therefore being wise is a different set is a food.

18. Lo, these many years I have been condemning myself for imitating these men at the very time when I am arraigning them, and of wasting words on a subject that is perfectly clear. For who can doubt that, if heat is an evil, it is also an evil to be hot? Or that, if cold is an evil, at is an evil to be cold? Or that, if life is a Good, so is being alive? All such matters are on the outskirts of wisdom, not in wisdom itself. But our abiding-place should be in wisdom itself.

19. Even though one takes a fancy to roam, wisdom has large and spacious retreats: we may investigate the nature of the gods, the fuel which feeds the constellations, or all the varied courses of the stars; we may speculate whether our affairs move in harmony with those of the stars, whether the impulse to motion comes from thence into the minds and bodies of all, and whether even these events which we call fortuitous are fettered by strict laws and nothing in this universe is unforeseen or unregulated in its revolutions. Such topics have nowadays been withdrawn from instruction in morals, but they uplift the mind and raise it to the dimensions of the subject which it discusses; the matters, however, of which I was speaking a while ago, wear away and wear down the mind, not (as you and yours maintain) whetting, but weakening it.

20. And I ask you, are we to fritter away that necessary study which we owe to greater and better themes, in discussing a matter which may perhaps be wrong and is certainly of no avail? How will it profit me to know whether wisdom is one thing, and being wise another? How will it profit me to know that the one is, and the other is not, a Good? Suppose I take a chance, and gamble on this prayer: "Wisdom for you, and being wise for me!" We shall come out even.

21. Try rather to show me the way by which I may attain those ends. Tell me what to avoid, what to seek, by what studies to strengthen my tottering mind, how I may rebuff the waves that strike me abeam and drive me from my course, by what means I may be able to cope with all my evils, and by what means I can be rid of the calamities that have plunged in upon me and those into which I myself have plunged. Teach me how to bear the burden of sorrow without a groan on my part, and how to bear prosperity without making others groan; also, how to avoid waiting for the ultimate and inevitable end, and to beat a retreat of my own free will, when it seems proper to me to do so.

22. I think nothing is baser than to pray for death. For if you wish to live, why do you pray for death? And if you do not wish to live, why do you ask the gods for that which they gave you at birth? For even as, against your will, it has been settled that you must die some day, so the time when you shall wish to die is in your own hands. The one fact is to you a necessity, the other a privilege.

23. I read lately a most disgraceful doctrine, uttered (more shame to him!) by a learned gentleman: "So may I die as soon as possible!" Fool, thou art praying for something that is already thine own! "So may I die as soon as possible!" Perhaps thou didst grow old while uttering these very words! At any rate, what is there to hinder? No one detains thee: escape by whatsoever way thou wilt! Select any portion of Nature, and bid it provide thee with a means of departure! These, namely, are the elements, by which the world's work is carried on water, earth, air. All these are no more the causes of life than they are the ways of death. 24. "So may I die as soon as possible!" And what is thy wish with regard to this "as soon as possible"? What day dost thou set for the event? It may be sooner than thy prayer requests. Words like this come from a weak mind, from one that courts pity by such cursing; he who prays for death does not wish to die. Ask the gods for life and health; if thou art resolved to die, death's reward is to have done with prayers.

25. It is with such problems as these, my dear Lucilius, that we should deal, by such problems that we should mould our minds. This is wisdom, this is what being wise means – not to bandy empty subtleties in idle and petty discussions. Fortune has set before you so many problems – which you have not yet solved – and are you still splitting hairs? How foolish it is to practise strokes after you have heard the signal for the fight! Away with all these dummy-weapons; you need armour for a fight to the finish. Tell me by what means sadness and fear may be kept from disturbing my soul, by what means I may shift off this burden of hidden cravings. Do something!

26. "Wisdom is a Good, but being wise is not a Good;" such talk results for us in the judgement that we are not wise, and in making a laughing-stock of this whole field of study – on the ground that it wastes its effort on useless things. Suppose

you knew that this question was also debated: whether future wisdom is a Good? For, I beseech you, how could one doubt whether barns do not feel the weight of the harvest that is to come, and that boyhood does not have premonitions of approaching young manhood by any brawn and power? The sick person, in the intervening period, is not helped by the health that is to come, any more than a runner or a wrestler is refreshed by the period of repose that will follow many months later.

27. Who does not know that what is yet to be is not a Good, for the very reason that it is yet to be? For that which is good is necessarily helpful. And unless things are in the present, they cannot be helpful; and if a thing is not helpful, it is not a Good; if helpful, it is already. I shall be a wise man some day; and this Good will be mine when I shall be a wise man, but in the meantime it is non-existent. A thing must exist first, then may be of a certain kind.

28. How, I ask you, can that which is still nothing be already a Good? And in what better way do you wish it to be proved to you that a certain thing is not, than to say: "It is yet to be"? For it is clear that something which is on the way has not yet arrived. "Spring will follow": I know that winter is here now. "Summer will follow:" I know that it is not summer. The best proof to my mind that a thing is not yet present is that it is yet to be.

29. I hope some day to be wise, but meanwhile I am not wise. For if I possessed that Good, I should now be free from this Evil. Some day I shall be wise; from this very fact you may understand that I am not yet wise. I cannot at the same time live in that state of Good and in this state of Evil; the two ideas do not harmonize, nor do Evil and Good exist together in the same person.

30. Let us rush past all this clever nonsense, and hurry on to that which will bring us real assistance. No man who is anxiously running after a midwife for his daughter in her birth-pangs will stop to read the praetor's edict or the order of events at the games. No one who is speeding to save his burning house will scan a checker-board to speculate how the imprisoned piece can be freed.

31. But good heavens! — in your case all sorts of news are announced on all sides — your house afire, your children in danger, your country in a state of siege, your property plundered. Add to this shipwreck, earthquakes, and all other objects of dread; harassed amid these troubles, are you taking time for matters which serve merely for mental entertainment? Do you ask what difference there is between wisdom and being wise? Do you tie and untie knots while such a ruin is hanging over your head?

32. Nature has not given us such a generous and freehanded space of time that we can have the leisure to waste any of it. Mark also how much is lost even when men are very careful: people are robbed of one thing by ill-health and of another thing by illness in the family; at one time private, at another public, business absorbs the attention; and all the while sleep shares our lives with us. Out of this time, so short and swift, that carries us away in its flight, of what avail is it to spend the greater part on useless things?

33. Besides, our minds are accustomed to entertain rather than to cure themselves, to make an aesthetic pleasure out of philosophy, when philosophy should really be a remedy. What the distinction is between wisdom and being wise I do not know; but I do know that it makes no difference to me whether I know such matters or am ignorant of them. Tell me: when I have found out the difference between wisdom and being wise, shall I be wise? Why then do you occupy me with the words rather than with the works of wisdom? Make me braver, make me calmer, make me the equal of Fortune, make me her superior. And I can be her superior, if I apply to this end everything that I learn. Farewell.

SENECA LETTER 118. On the Vanity of Place-Seeking

1. You have been demanding more frequent letters from me. But if we compare the accounts, you will not be on the credit side. We had indeed made the agreement that your part came first, that you should write the first letters, and that I should answer. However, I shall not be disagreeable; I know that it is safe to trust you, so I shall pay in advance, and yet not do as the eloquent Cicero bids Atticus do: "Even if you have nothing to say, write whatever enters your head."

2. For there will always be something for me to write about, even omitting all the kinds of news with which Cicero fills his correspondence: what candidate is in difficulties, who is striving on borrowed resources and who on his own; who is a candidate for the consulship relying on Caesar, or on Pompey, or on his own strong-box, what a merciless usurer is Caecilius, out of whom his friends cannot screw a penny for less than one per cent each month. But it is preferable to deal with one's own ills, rather than with another's – to sift oneself and see for how many vain things one is a candidate, and cast a vote for none of them.

3. This, my dear Lucilius, is a noble thing, this brings peace and freedom – to canvass for nothing, and to pass by all the elections of Fortune. How can you call it enjoyable, when the tribes are called together and the candidates are making offerings in their favourite temples – some of them promising money gifts and others doing business by means of an agent, or wearing down their hands with the kisses of those to whom they will refuse the least finger-touch after being elected – when all are excitedly awaiting the announcement of the herald, do you call it enjoyable, I say, to stand idle and look on at this Vanity Fair without either buying or selling?

4. How much greater joy does one feel who looks without concern, not merely upon the election of a praetor or of a consul, but upon that great struggle in which some are seeking yearly honours, and others permanent power, and others riches, or marriage and offspring, or the welfare of themselves and their relatives! What a great-souled action it is to be the only person who is canvassing for nothing, offering prayers to no man, and saying: "Fortune, I have nothing to do with you. I am not at your service. I know that men like Cato are spurned by you, and men like Vatinius made by you. I ask no favours." This is the way to reduce Fortune to the ranks.

5. These, then, are the things about which we may write in turn, and this is the ever fresh material which we may dig out as we scan the restless multitudes of men, who, in order to attain something ruinous, struggle on through evil to evil, and seek that which they must presently shun or even find surfeiting.

6. For who was ever satisfied, after attainment, with that which loomed up large as he prayed for it? Happiness is not, as men think, a greedy thing; it is a lowly thing; for that reason it never gluts a man's desire. You deem lofty the objects you seek, because you are on a low level and hence far away from them; but they are mean in the sight of him who has reached them. And I am very much mistaken if he does not desire to climb still higher; that which you regard as the top is merely a rung on the ladder.

7. Now all men suffer from ignorance of the truth; deceived by common report, they make for these ends as if they were good, and then, after having won their wish, and suffered much, they find them evil, or empty, or less important than they had expected. Most men admire that which deceives them at a distance, and by the crowd good things are supposed to be big things.

8. Now, lest this happen also in our own case, let us ask what is the Good. It has been explained in various ways; different men have described it in different ways. Some define it in this way. "That which attracts and calls the spirit to itself is a Good." But the objection at once comes up – what if it does attract, but straight to ruin? You know how seductive many evils are. That which is true differs from that which looks like the truth; hence the Good is connected with the true, for it is not good unless it is also true. But that which attracts and allures, is only like the truth; it steals your attention, demands your interest, and draws you to itself.

9. Therefore, some have given this definition: "That is good which inspires desire for itself, or rouses towards itself the impulse of a struggling soul." There is the same objection to this idea; for many things rouse the soul's impulses, and yet the search for them is harmful to the seeker. The following definition is better: "That is good which rouses the soul's impulse towards itself in accordance with nature, and is worth seeking only when it begins to be thoroughly worth seeking." It is by this time an honourable thing; for that is a thing completely worth seeking.

10. The present topic suggests that I state the difference between the Good and the honourable. Now they have a certain quality which blends with both and is inseparable from either: nothing can be good unless it contains an element of the honourable, and the honourable is necessarily good. What, then, is the difference between these two qualities? The honourable is the perfect Good, and the happy life is fulfilled thereby; through its influence other things also are rendered good.

11. I mean something like this: there are certain things which are neither good nor bad – as military or diplomatic service, or the pronouncing of legal decisions. When such pursuits have been honourably conducted, they begin to be good, and they change over from the "indifferent" class into the Good. The Good results from partnership with the honourable, but the honourable is good in itself. The Good springs from the honourable, but the latter from itself. What is good might have been bad; what is honourable could never have been anything but good.

12. Some have defined as follows: "That is good which is according to nature." Now attend to my own statement: that which is good is according to nature, but that which is according to nature does not also become immediately good; for many things harmonize with nature, but are so petty that it is not suitable to call them good. For they are unimportant and deserve to be despised. But there is no such thing as a very small and despicable good, for, as long as it is scanty, it is not good, and when it begins to be good, it ceases to be scanty. How, then, can the Good be recognized? Only if it is completely according to nature.

13. People say: "You admit that that which is good is according to nature; for this is its peculiar quality. You admit, too, that there are other things according to nature, which, however, are not good. How then can the former be good, and the latter not? How can there be an alteration in the peculiar quality of a thing, when each has, in common with the other, the special attribute of being in accord with nature?"

14. Surely because of its magnitude. It is no new idea that certain objects change as they grow. A person, once a child, becomes a youth; his peculiar quality is transformed; for the child could not reason, but the youth possesse reason. Certain things not only grow in size as they develop, but grow into something else. 15. Some reply: "But that which becomes greater does not

15. Some reply: "But that which becomes greater does not necessarily become different. It matters not at all whether you pour wine into a flask or into a vat; the wine keeps its peculiar quality in both vessels. Small and large quantities of honey are not distinct in taste." But these are different cases which you mention; for wine and honey have a uniform quality; no matter how much the quantity is enlarged, the quality is the same.

16. For some things endure according to their kind and their peculiar qualities, even when they are enlarged. There are others, however, which, after many increments, are altered by the last addition; there is stamped upon them a new character, different from that of yore. One stone makes an archway – the stone which wedges the leaning sides and holds the arch together by its position in the middle. And why does the last addition, although very slight, make a great deal of difference? Because it does not increase; it fills up.

17. Some things, through development, put off their former shape and are altered into a new figure. [This argument (that complete virtue is a sort of transforming climax of life) is not to be confused with the theory of accessio (a term used also in Roman law), or "addition"; for virtue does not permit of accessio, or the addition of any external advantage.] When the mind has for a long time developed some idea, and in the attempt to grasp its magnitude has become weary, that thing begins to be called "infinite." And then this has become something far different from what it was when it seemed great but finite. In the same way we have thought of something as difficult to divide; at the very end, as the task grows more and more hard, the thing is found to be "indivisible." Similarly, from that which could scarcely or with difficulty be moved we have advanced on and on - until we reach the "immovable." By the same reasoning a certain thing was according to nature; its greatness has altered it into some other peculiar quality and has rendered it a Good. Farewell.

SENECA LETTER 119. On Nature as our Best Provider

1. Whenever I have made a discovery, I do not wait for you to cry "Shares!" I say it to myself in your behalf. If you wish to know what it is that I have found, open your pocket; it is clear profit. What I shall teach you is the ability to become rich as speedily as possible. How keen you are to hear the news! And rightly; I shall lead you by a short cut to the greatest riches. It will be necessary, however, for you to find a loan; in order to be able to do business, you must contract a debt, although I do not wish you to arrange the loan through a middle-man, nor do I wish the brokers to be discussing your rating.

2. I shall furnish you with a ready creditor, Cato's famous one, who says: "Borrow from yourself!" No matter how small it is, it will be enough if we can only make up the deficit from our own resources. For, my dear Lucilius, it does not matter whether you crave nothing, or whether you possess something. The important principle in either case is the same – freedom from worry. But I do not counsel you to deny anything to nature – for nature is insistent and cannot be overcome; she demands her due – but you should know that anything in excess of nature's wants is a mere "extra" and is not necessary.

3. If I am hungry, I must eat. Nature does not care whether the bread is the coarse kind or the finest wheat; she does not desire the stomach to be entertained, but to be filled. And if I am thirsty, Nature does not care whether I drink water from the nearest reservoir, or whether I freeze it artificially by sinking it in large quantities of snow. Nature orders only that the thirst be quenched; and it does not matter whether it be a golden, or crystal, or murrine goblet, or a cup from Tibur, or the hollow hand.

4. Look to the end, in all matters, and then you will cast away superfluous things. Hunger calls me; let me stretch forth my hand to that which is nearest; my very hunger has made attractive in my eyes whatever I can grasp. A starving man despises nothing.

5. Do you ask, then, what it is that has pleased me? It is this noble saying which I have discovered: "The wise man is the keenest seeker for the riches of nature." "What," you ask, "will you present me with an empty plate? What do you mean? I had already arranged my coffers; I was already looking about to see some stretch of water on which I might embark for purposes of trade, some state revenues that I might handle, and some merchandise that I might acquire. That is deceit – showing me poverty after promising me riches." But, friend, do you regard a man as poor to whom nothing is wanting? "It is, however," you reply, "thanks to himself and his endurance, and not thanks to his fortune." Do you, then, hold that such a man is not rich, just because his wealth can never fail?

6. Would you rather have much, or enough? He who has much desires more – a proof that he has not yet acquired enough; but he who has enough has attained that which never fell to the rich man's lot – a stopping-point. Do you think that this condition to which I refer is not riches, just because no man has ever been proscribed as a result of possessing them? Or because sons and wives have never thrust poison down one's throat for that reason? Or because in war-time these riches are unmolested? Or because they bring leisure in time of peace? Or because it is not dangerous to possess them, or troublesome to invest them?

7. "But one possesses too little, if one is merely free from cold and hunger and thirst." Jupiter himself however, is no better off. Enough is never too little, and not-enough is never too much. Alexander was poor even after his conquest of Darius and the Indies. Am I wrong? He seeks something which he can really make his own, exploring unknown seas, sending new fleets over the Ocean, and, so to speak, breaking down the very bars of the universe. But that which is enough for nature, is not enough for man.

8. There have been found persons who crave something more after obtaining everything; so blind are their wits and so readily does each man forget his start after he has got under way. He who [Alexander the Great.] was but lately the disputed lord of an unknown corner of the world, is dejected when, after reaching the limits of the globe, he must march back through a world which he has made his own.

9. Money never made a man rich; on the contrary, it always smites men with a greater craving for itself. Do you ask the reason for this? He who possesses more begins to be able to possess still more. To sum up, you may hale forth for our inspection any of the millionaires whose names are told off when one speaks of Crassus and Licinus. Let him bring along his rating and his present property and his future expectations, and let him add them all together: such a man, according to my belief, is poor; according to yours, he may be poor some day.

10. He, however, who has arranged his affairs according to nature's demands, is free from the fear, as well as from the sensation, of poverty. And in order that you may know how hard it is to narrow one's interests down to the limits of nature – even this very person of whom we speak, and whom you call poor, possesses something actually superfluous.

11. Wealth, however, blinds and attracts the mob, when they see a large bulk of ready money brought out of a man's house, or even his walls crusted with abundance of gold, or a retinue that is chosen for beauty of physique, or for attractiveness of attire. The prosperity of all these men looks to public opinion; but the ideal man, whom we have snatched from the control of the people and of Fortune, is happy inwardly.

12. For as far as those persons are concerned, in whose minds bustling poverty has wrongly stolen the title of riches – these individuals have riches just as we say that we "have a fever," when really the fever has us. Conversely, we are accustomed to say: "A fever grips him." And in the same way we should say: "Riches grip him." There is therefore no advice – and of such advice no one can have too much – which I would rather give you than this: that you should measure all things by the demands of Nature; for these demands can be satisfied either without cost or else very cheaply. Only, do not mix any vices with these demands.

13. Why need you ask how your food should be served, on what sort of table, with what sort of silver, with what wellmatched and smooth-faced young servants? Nature demands nothing except mere food.

Dost seek, when thirst inflames thy throat, a cup of gold?

Dost scorn all else but peacock's flesh or turbot

When the hunger comes upon thee?

14. Hunger is not ambitious; it is quite satisfied to come to an end; nor does it care very much what food brings it to an end. Those things are but the instruments of a luxury which is not "happiness"; a luxury which seeks how it may prolong hunger even after repletion, how to stuff the stomach, not to fill it, and how to rouse a thirst that has been satisfied with the first drink. Horace's words are therefore most excellent when he says that it makes no difference to one's thirst in what costly goblet, or with what elaborate state, the water is served. For if you believe it to be of importance how curly-haired your slave is, or how transparent is the cup which he offers you, you are not thirsty.

15. Among other things, Nature has bestowed upon us this special boon: she relieves sheer necessity of squeamishness. The superfluous things admit of choice; we say: "That is not suitable"; "this is not well recommended"; "that hurts my eyesight." The Builder of the universe, who laid down for us the laws of life, provided that we should exist in well-being, but not in luxury. Everything conducive to our well-being is prepared and ready to our hands; but what luxury requires

can never be got together except with wretchedness and anxiety.

16. Let us therefore use this boon of Nature by reckoning it among the things of high importance; let us reflect that Nature's best title to our gratitude is that whatever we want because of sheer necessity we accept without squeamishness. Farewell.

SENECA LETTER 120. More about Virtue

 Your letter roamed over several little problems, but finally dwelt upon this alone, asking for explanation: "How do we acquire a knowledge of that which is good and that which is honourable?" In the opinion of other schools, these two qualities are distinct; among our followers, however, they are merely divided.

2. This is what I mean: Some believe the Good to be that which is useful; they accordingly bestow this title upon riches, horses, wine, and shoes; so cheaply do they view the Good, and to such base uses do they let it descend. They regard as honourable that which agrees with the principle of right conduct – such as taking dutiful care of an old father, relieving a friend's poverty, showing bravery on a campaign, and uttering prudent and well-balanced opinions.

3. We, however, do make the Good and the honourable two things, but we make them out of one: only the honourable can be good; also, the honourable is necessarily good. I hold it superfluous to add the distinction between these two qualities, inasmuch as I have mentioned it so many times. But I shall say this one thing – that we regard nothing as good which can be put to wrong use by any person. And you see for yourself to what wrong uses many men put their riches, their high position, or their physical powers. To return to the matter on which you desire information: "How we first acquire the knowledge of that which is good and that which is honourable."

4. Nature could not teach us this directly; she has given us the seeds of knowledge, but not knowledge itself. Some say that we merely happened upon this knowledge; but it is unbelievable that a vision of virtue could have presented itself to anyone by mere chance. We believe that it is inference due to observation, a comparison of events that have occurred frequently; our school of philosophy hold that the honourable and the good have been comprehended by analogy. Since the word "analogy" has been admitted to citizen rank by Latin scholars, I do not think that it ought to be condemmed, but I do think it should be brought into the citizenship which it can justly claim. I shall, therefore, make use of the word, not merely as admitted, but a setablished. Now what this "analogy" is I shall explain.

5. We understood what bodily health was: and from this basis we deduced the existence of a certain mental health also. We knew, too, bodily strength, and from this basis we inferred the existence of mental sturdiness. Kindly deeds, humane deeds, brave deeds, had at times amazed us; so we began to admire them as if they were perfect. Underneath, however, there were many faults, hidden by the appearance and the brilliancy of certain conspicuous acts; to these we shut our eyes. Nature bids us amplify praiseworthy things: everyone exalts renown beyond the truth. And thus from such deeds we deduced the conception of some great good.

6. Fabricius rejected King Pyrrhus's gold, deeming it greater than a king's crown to be able to scorn a king's money. Fabricius also, when the royal physician promised to give his master poison, warned Pyrrhus to beware of a plot. The selfsame man had the resolution to refuse either to be won over by gold or to win by poison. So we admired the hero, who could not be moved by the promises of the king or against the king, who held fast to a noble ideal, and who – is anything more difficult? – was in war sinless; for he believed that wrongs could be committed even against an enemy, and in that extreme poverty which he had made his glory, shrank from receiving riches as he shrank from using poison. "Live," he cried, "O Pyrrhus, thanks to me, and rejoice, instead of grieving as you have done till now, that Fabricius cannot be brihed!"

7. Horatius Cocles blocked the narrow bridge alone, and ordered his retreat to be cut off, that the enemy's path might be destroyed; then he long withstood his assailants until the crash of the beams, as they collapsed with a huge fall, rang in his ears. When he looked back and saw that his country, through his own danger, was free from danger, "Whoever," he cried, "wishes to pursue me this way, let him come!" He plunged headlong, taking as great care to come out armed from the midst of the dashing river-channel as he did to come out unhurt; he returned, preserving the glory of his conquering weapons, as safely as if he had come back over the bridge.

8. These deeds and others of the same sort have revealed to us a picture of virtue. I will add something which may perhaps astonish you: evil things have sometimes offered the appearance of what is honourable, and that which is best has been manifested through, its opposite. For there are, as you know, vices which are next-door to virtues; and even that which is lost and debased can resemble that which is upright.

So the spendthrift falsely imitates the liberal man – although it matters a great deal whether a man knows how to give, or does not know how to save, his money. I assure you, my dear Lucilus, there are many who do not give, but simply throw away; and I do not call a man liberal who is out of temper with his money. Carelessness looks like ease, and rashness like bravery.

9. This resemblance has forced us to watch carefully and to distinguish between things which are by outward appearance closely connected, but which actually are very much at odds with one another; and in watching those who have become forced to observe what persons have done some deed with noble spirit and lofty impulse, but have done it only once. We have marked one man who is brave in war and cowardly in civil affairs, enduring poverty courageously and disgrace shamefacedly; we have praised the deed but we have despised the man.

10. Again, we have marked another man who is kind to his friends and restrained towards his enemies, who carries on his political and his personal business with scrupulous devotion, not lacking in longsuffering where there is anything that must be endured, and not lacking in prudence when action is to be taken. We have marked him giving with lavish hand when it was his duty to make a payment, and, when he had to toil, striving resolutely and lightening his bodily weariness by his resolution. Besides, he has always been the same, consistent in all his actions, not only sound in his judgement but trained by habit to such an extent that he not only can act rightly, but cannot help acting rightly. We have formed the conception that in such a man perfect virtue exists.

11. We have separated this perfect virtue into its several parts. The desires had to be reined in, fear to be suppressed, proper actions to be arranged, debts to be paid; we therefore included self-restraint, bravery, prudence, and justice – assigning to each quality its special function. How then have we formed the conception of virtue? Virtue has been manifested to us by this man's order, propriety, steadfastness, absolute harmony of action, and a greatness of soul that rises superior to everything. Thence has been derived our conception of the happy life, which flows along with steady course, completely under its own control.

12. How then did we discover this fact? I will tell you: that perfect man, who has attained virtue, never cursed his luck, and never received the results of chance with dejection; he believed that he was citizen and soldier of the universe, accepting his tasks as if they were his orders. Whatever happened, he did not spurn it, as if it were evil and borne in upon him by hazard; he accepted it as if it were assigned to be his duty. "Whatever this may be," he says, "it is my lot; it is rough and it is hard, but I must work diligently at the task."

13. Necessarily, therefore, the man has shown himself great who has never grieved in evil days and never bewailed his destiny; he has given a clear conception of himself to many men; he has shone forth like a light in the darkness and has turned towards himself the thoughts of all men, because he was gentle and calm and equally compliant with the orders of man and of God.

14. He possessed perfection of soul, developed to its highest capabilities, inferior only to the mind of God - From whom a part flows down even into this heart of a mortal. But this heart is never more divine than when it reflects upon its mortality, and understands that man was born for the purpose of fulfilling his life, and that the body is not a permanent dwelling, but a sort of inn (with a brief sojourn at that) which is to be left behind when one perceives that one is a burden to the host.

15. The greatest proof, as I maintain, my dear Lucilius, that the soul proceeds from loftier heights, is if it judges its present situation lowly and narrow, and is not afraid to depart. For he who remembers whence he has come knows whither he is to depart. Do we not see how many discomforts drive us wild, and how ill-assorted is our fellowship with the flesh?

16. We complain at one time of our headaches, at another of our bad digestions, at another of our hearts and our throats. Sometimes the nerves trouble us, sometimes the feet; now it is diarrhoea, and again it is catarrh [A chronic disease of Seneca himself. See the autobiographic fragment in Ep. 78.1 f.]; we are at one time full-blooded, at another anaemic; now this thing troubles us, now that, and bids us move away: it is just what happens to those who dwell in the house of another.

17. But we, to whom such corruptible bodies have been allotted, nevertheless set eternity before our eyes, and in our hopes grasp at the utmost space of time to which the life of man can be extended, satisfied with no income and with no influence. What can be more shameless or foolish than this? Nothing is enough for us, though we must die some day, or rather, are already dying; for we stand daily nearer the brink, and every hour of time thrusts us on towards the precipice over which we must fall.

18. See how blind our minds are! What I speak of as in the future is happening at this minute, and a large portion of it has already happened; for it consists of our past lives. But we

are mistaken in fearing the last day, seeing that each day, as it passes, counts just as much to the credit of death. The failing step does not produce, it merely announces, weariness. The last hour reaches, but every hour approaches, death. Death wears us away, but does not whirl us away. For this reason the noble soul, knowing its better nature, while taking care to conduct itself honourably and seriously at the post of duty where it is placed, counts none of these extraneous objects as its own, but uses them as if they were a loan, like a foreign visitor hastening on his way.

19. When we see a person of such steadfastness, how can we help being conscious of the image of a nature so unusual? Particularly if, as I remarked, it was shown to be true greatness by its consistency. It is indeed consistency that abides; false things do not last. Some men are like Vatinius or like Cato by turns; at times they do not think even Curius stern enough, or Fabricius poor enough, or Tubero sufficiently frugal and contented with simple things; while at other times they vie with Licinus in wealth, with Apicius in banqueting, or with Maecenas in daintiness.

20. The greatest proof of an evil mind is unsteadiness, and continued wavering between pretence of virtue and love of vice.

He'd have sometimes two hundred slaves at hand And sometimes ten. He'd speak of kings and grand Moguls and naught but greatness. Then he'd say: "Give me a three-legged table and a tray Of good clean salt, and just a coarse-wove gown To keep the cold out." If you paid him down (So sparing and content!) a million cool, In five short days he'd be a penceless fool.

21. The men I speak of are of this stamp; they are like the man whom Horatius Flaccus describes – a man never the same, never even like himself; to such an extent does he wander off into opposites. Did I say many are so? It is the case with almost all. Everyone changes his plans and prayers day by day. Now he would have a wife, and now a mistress; now he would be king, and again he strives to conduct himself so that no slave is more cringing; now he puffs himself up until he becomes unpopular; again, he shrinks and contracts into greater humility than those who are really unassuming; at one time he scatters monev, at another he steals it.

22. That is how a foolish mind is most clearly demonstrated: it shows first in this shape and then in that, and is never like itself – which is, in my opinion, the most shameful of qualities. Believe me, it is a great rôle – to play the rôle of one man. But nobody can be one person except the wise man; the rest of us often shift our masks. At times you will think us thrifty and serious, at other times wasteful and idle. We continually change our characters and play a part contrary to that which we have discarded. You should therefore force yourself to maintain to the very end of life's drama the character which you assumed at the beginning. See to it that men be able to praise you; if not, let them at least identify you. Indeed, with regard to the man whom you saw but yesterday, the question may properly be asked: "Who is he?" So great a change has there been!.

SENECA LETTER 121. On Instinct in Animals

1. You will bring suit against me, I feel sure, when I set forth for you to-day's little problem, with which we have already fumbled long enough. You will cry out again: "What has this to do with character?" Cry out if you like, but let me first of all match you with other opponents, against whom you may bring suit – such as Posidonius and Archidemus; these men will stand trial. I shall then go on to say that whatever deals with character does not necessarily produce good character.

2. Man needs one thing for his food, another for his exercise, another for his clothing, another for his instruction, and another for his pleasure. Everything, however, has reference to man's needs, although everything does not make him better. Character is affected by different things in different ways: some things serve to correct and regulate character, and others investigate its nature and origin.

3. And when I seek the reason why Nature brought forth man, and why she set him above other animals, do you suppose that I have left character-study in the rear? No; that is wrong. For how are you to know what character is desirable, unless you have discovered what is best suited to man? Or unless you have studied his nature? You can find out what you should do and what you should avoid, only when you have learned what you owe to your own nature.

4. "I desire," you say, "to learn how I may crave less, and fear less. Rid me of my unreasoning beliefs. Prove to me that so-called felicity is fickle and empty, and that the word easily admits of a syllable's increase." I shall fulfil your want, encouraging your virtues and lashing your vices. People may decide that I am too zealous and reckless in this particular; but I shall never cease to hound wickedness, to check the most unbridled emotions, to soften the force of pleasures which will do this; for it is the greatest evils that we have prayed for, and from that which has made us give thanks comes all that demands consolation.

5. Meanwhile, allow me to discuss thoroughly some points which may seem now to be rather remote from the present inquiry. We were once debating whether all animals had any feelings about their "constitution." That this is the case is proved particularly by their making motions of such fitness and nimbleness that they seem to be trained for the purpose. Every being is clever in its own line. The skilled workman handles his tools with an ease born of experience; the pilot knows how to steer his ship skilfully; the artist can quickly lay on the colours which he has prepared in great variety for the purpose of rendering the likeness, and passes with ready eye and hand from palette to canvas. In the same way an animal is agile in all that pertains to the use of its body.

6. We are apt to wonder at skilled dancers because their gestures are perfectly adapted to the meaning of the piece and its accompanying emotions, and their movements match the speed of the dialogue. But that which art gives to the craftsman, is given to the animal by nature. No animal handles its limbs with difficulty, no animal is at a loss how to use its body. This function they exercise immediately at birth. They come into the world with this knowledge; they are born full-trained.

7. But people reply: "The reason why animals are so dexterous in the use of their limbs is that if they move them unnaturally, they will feel pain. They are compelled to do thus, according to your school, and it is fear rather than will-power which moves them in the right direction." This idea is wrong. Bodies driven by a compelling force move slowly; but those which move of their own accord possess alertness. The proof that it is not fear of pain which prompts them thus, is, that even when pain checks them they struggle to carry out their natural motions.

8. Thus the child who is trying to stand and is becoming used to carry his own weight, on beginning to test his strength, falls and rises again and again with tears until through painful effort he has trained himself to the demands of nature. And certain animals with hard shells, when turned on their backs, twist and grope with their feet and make motions side-ways until they are restored to their proper position. The tortoise on his back feels no suffering; but he is restless because he misses his natural condition, and does not cease to shake himself about until he stands once more upon his feet.

9. So all these animals have a consciousness of their physical constitution, and for that reason can manage their limbs as readily as they do; nor have we any better proof that they come into being equipped with this knowledge than the fact that no animal is unskilled in the use of its body.

10. But some object as follows: "According to your account, one's constitution consists of a ruling power* in the soul which has a certain relation towards the body. [* i.e. the "soul of the world," of which each living soul is a part. The Stoics believed that it was situated in the heart. Zeno called it "ruling power"; while the Romans used the term principale or principatus. The principle described above is "impulse" or "tension".] But how can a child comprehend this intricate and subtle principle, which I can scarcely explain even to you? All living creatures should be born logicians, so as to understand a definition which is obscure to the majority of Roman citizens!"

11. Your objection would be true if I spoke of living creatures as understanding "a definition of constitution," and not "their actual constitution." Nature is easier to understand than to explain; hence, the child of whom we were speaking does not understand what "constitution" is, but understands its own constitution. He does not know what "a living creature" is, but he feels that he is an animal.

12. Moreover, that very constitution of his own he only understands confusedly, cursorily, and darkly. We also know that we possess souls, but we do not know the essence, the place, the quality, or the source, of the soul. Such as is the consciousness of our souls which we possess, ignorant as we are of their nature and position, even so all animals possess a consciousness of their own constitutions. For they must necessarily feel this, because it is the same agency by which they feel other things also; they must necessarily have a feeling of the principle which they obey and by which they are controlled.

13. Everyone of us understands that there is something which stirs his impulses, but he does not know what it is. He knows that he has a sense of striving, although he does not know what it is or its source. Thus even children and animals have a consciousness of their primary element, but it is not very clearly outlined or portrayed.

14. "You maintain, do you," says the objector, "that every living thing is at the start adapted to its constitution, but that man's constitution is a reasoning one, and hence man is adapted to himself not merely as a living, but as a reasoning, being? For man is dear to himself in respect of that wherein he is a man. How, then, can a child, being not yet gifted with reason, adapt himself to a reasoning constitution?"

15. But each age has its own constitution, different in the case of the child, the boy, and the old man; they are all adapted to the constitution wherein they find themselves. The child is toothless, and he is fitted to this condition. Then his teeth grow, and he is fitted to that condition also. Vegetation also, which will develop into grain and fruits, has a special constitution when young and scarcely peeping over the tops of the furrows, another when it is strengthened and stands upon a stalk which is soft but strong enough to bear its weight, and still another when the colour changes to yellow, prophesies threshing-time, and hardens in the ear – no matter what may be the constitution into which the plant comes, it keeps it, and conforms thereto.

16. The periods of infancy, boyhood, youth, and old age, are different; but I, who have been infant, boy, and youth, am still the same. Thus, although each has at different times a different constitution, the adaptation of each to its constitution is the same. For nature does not consign boyhood or youth, or old age, to me; it consigns me to them. Therefore, the child is adapted to that constitution which is his at the present moment of childhood, not to that which will be his in youth. For even if there is in store for him any higher phase into which he must be changed, the state in which he is born is also according to nature.

17. First of all, the living being is adapted to itself, for there must be a pattern to which all other things may be referred. I seek pleasure; for whom? For myself. I am therefore looking out for myself. I shrink from pain; on behalf of whom? Myself. Therefore, I am looking out for myself. Since I gauge all my actions with reference to my own welfare, I am looking out for myself before all else. This quality exists in all living beings – not engrafted but inborn.

18. Nature brings up her own offspring and does not cast them away; and because the most assured security is that which is nearest, every man has been entrusted to his own self. Therefore, as I have remarked in the course of my previous correspondence, even young animals, on issuing from the mother's womb or from the egg, know at once of their own accord what is harmful for them, and avoid death-dealing things. [Seneca is both sound and modern in his account of animal "intelligence." It is instinct, due to sensory-motor reactions, and depending largely upon type heredity.] They even shrink when they notice the shadow of birds of prey which flit overhead. No animal, when it enters upon life, is free from the fear of death.

19. People may ask: "How can an animal at birth have an understanding of things wholesome or destructive?" The first question, however, is whether it can have such understanding, and not how it can understand. And it is clear that they have such understanding from the fact that, even if you add understanding, they will act no more adequately than they did in the first place. Why should the hen show no fear of the peacock or the goose, and yet run from the hawk, which is a so much smaller animal not even familiar to the hen? Why should young chickens fear a cat and not a dog? These fowls clearly have a presentiment of harm – one not based on actual experiments; for they avoid a thing before they can possibly have experience of it.

20. Furthermore, in order that you may not suppose this to be the result of chance, they do not shrink from certain other things which you would expect them to fear, nor do they ever forget vigilance and care in this regard; they all possess equally the faculty of avoiding what is destructive. Besides, their fear does not grow as their lives lengthen. Hence indeed it is evident that these animals have not reached such a condition through experience; it is because of an inborn desire for self-preservation. The teachings of experience are slow and irregular; but whatever Nature communicates belongs equally to everyone, and comes immediately.

21. If, however, you require an explanation, shall I tell you how it is that every living thing tries to understand that which is harmful? It feels that it is constructed of flesh; and so it perceives to what an extent flesh may be cut or burned or crushed, and what animals are equipped with the power of doing this damage; it is of animals of this sort that it derives an unfavourable and hostile idea. These tendencies are closely connected; for each animal at the same time consults its own safety, seeking that which helps it, and shrinks from that which will harm it. Impulses towards useful objects, and revulsion from the opposite, are according to nature; without any reflection to prompt the idea, and without any advice, whatever Nature has prescribed, is done.

22. Do you not see how skillful bees are in building their cells? How completely harmonious in sharing and enduring toil? Do you not see how the spider weaves a web so subtle that man's hand cannot imitate it; and what a task it is to arrange the threads, some directed straight towards the centre, for the sake of making the web solid, and others running in circles and lessening in thickness – for the purpose of tangling and catching in a sort of net the smaller insects for whose ruin the spider spreads the web?

23. This art is born, not taught; and for this reason no animal is more skilled than any other. You will notice that all spider-webs are equally fine, and that the openings in all honeycomb cells are identical in shape. Whatever art communicates is uncertain and uneven; but Nature's assignments are always uniform. Nature has communicated nothing except the duty of taking care of themselves and the skill to do so; that is why living and learning begin at the same time.

24. No wonder that living things are born with a gift whose absence would make birth useless. This is the first equipment that Nature granted them for the maintenance of their existence – the quality of adaptability and self-love. They could not survive except by desiring to do so. Nor would this desire alone have made them prosper, but without it nothing could have prospered. In no animal can you observe any low esteem, or even any carelessness, of self. Dumb beasts, sluggish in other respects, are clever at living. So you will see that creatures which are useless to others are alert for their own preservation. Farewell.

SENECA LETTER 122. On Darkness as a Veil for Wickedness

1. The day has already begun to lessen. It has shrunk considerably, but yet will still allow a goodly space of time if one rises, so to speak, with the day itself. We are more industrious, and we are better men if we anticipate the day and welcome the dawn; but we are base churls if we lie dozing when the sun is high in the heavens, or if we wake up only when noon arrives; and even then to many it seems not yet dawn.

2. Some have reversed the functions of light and darkness; they open eyes sodden with yesterday's debauch only at the approach of night. It is just like the condition of those peoples whom, according to Vergil, Nature has hidden away and placed in an abode directly opposite to our own:

When in our face the Dawn with panting steeds

Breathes down, for them the ruddy evening kindles Her late-lit fires.

It is not the country of these men, so much as it is their life, that is "directly opposite" to our own.

3. There may be Antipodes dwelling in this same city of ours who, in Cato's words, "have never seen the sun rise or set." Do you think that these men know how to live, if they do not know when to live? Do these men fear death, if they have buried themselves alive? They are as weird as the birds of night. Although they pass their hours of darkness amid wine and perfumes, although they spend the whole extent of their unnatural waking hours in eating dinners – and those too cooked separately to make up many courses – they are not really banqueting; they are conducting their own funeral services. And the dead at least have their banquets by daylight.

But indeed to one who is active no day is long. So let us lengthen our lives; for the duty and the proof of life consist in action. Cut short the night; use some of it for the day's business.

4. Birds that are being prepared for the banquet, that they may be easily fattened through lack of exercise, are kept in darkness; and similarly, if men vegetate without physical activity, their idle bodies are overwhelmed with flesh, and in their self-satisfied retirement the fat of indolence grows upon them. Moreover, the bodies of those who have sworn allegiance to the hours of darkness have a loathsome appearance. Their complexions are more alarming than those of anaemic invalids; they are lackadaisical and flabby with dropsy; though still alive, they are already carrion. But this, to my thinking, would be among the least of their evils. How much more darkness there is in their souls! Such a man is internally dazed; his vision is darkened; he envies the blind. And what man ever had eyes for the purpose of seeing in the dark?

5. You ask me how this depravity comes upon the soul – this habit of reversing the daylight and giving over one's whole existence to the night? All vices rebel against Nature; they all abandon the appointed order. It is the motto of luxury to enjoy what is unusual, and not only to depart from that which is right, but to leave it as far behind as possible, and finally even take a stand in opposition thereto.

6. Do you not believe that men live contrary to Nature who drink fasting [A vice which Seneca especially abhors], who take wine into empty veins, and pass to their food in a state of intoxication? And yet this is one of youth's popular vices – to perfect their strength in order to drink on the very threshold of the bath, amid the unclad bathers; nay even to soak in wine and then immediately to rub off the sweat which they have promoted by many a hot glass of liquor! To them, a glass after lunch or one after dinner is bourgeois; it is what the country squires do, who are not connoisseurs in pleasure. This unmixed wine delights them just because there is no food to float in it, because it readily makes its way into their muscles; this boozing pleases them just because the stomach is empty.

7. Do you not believe that men live contrary to Nature who exchange the fashion of their attire with women [By wearing silk gowns of transparent material.]? Do not men live contrary to Nature who endeavour to look fresh and boyish at an age unsuitable for such an attempt? What could be more cruel or more wretched? Cannot time and man's estate ever carry such a person beyond an artificial boyhood? [Not literally translated. It means roughly: "Will he never become a man, so that he can continue to be screwed by men? And though his sex ought to spare him this insult, will even not his age spare him?"]

8. Do not men live contrary to Nature who crave roses in winter, or seek to raise a spring flower like the lily by means of hot-water heaters and artificial changes of temperature? Do not men live contrary to Nature who grow fruit-trees on the top of a wall? Or raise waving forests upon the roofs and battlements of their houses – the roots starting at a point to which it would be outlandish for the tree-tops to reach? Do not men live contrary to Nature who lay the foundations of bathrooms in the sea and do not imagine that they can enjoy their swim unless the heated pool is lashed as with the waves of a storm?

9. When men have begun to desire all things in opposition to the ways of Nature, they end by entirely abandoning the ways of Nature. They cry: "It is daytime – let us go to sleep! It is the time when men rest: now for exercise, now for our drive, now for our lunch! Lo, the dawn approaches: it is dinner-time! We should not do as mankind do. It is low and mean to live in the usual and conventional way. Let us abandon the ordinary sort of day. Let us have a morning that is a special feature of ours, peculiar to ourselves!"

10. Such men are, in my opinion, as good as dead. Are they not all but present at a funeral – and before their time too – when they live amid torches and tapers? I remember that this sort of life was very fashionable at one time: among such men as Acilius Buta, a person of praetorian rank, who ran through a tremendous estate and on confessing his bankruptcy to Tiberius, received the answer: "You have waked up too late!"

11. Julius Montanus was once reading a poem aloud; he was a middling good poet, noted for his friendship with Tiberius, as well as his fall from favour. He always used to fill his poems with a generous sprinkling of sunrises and sunsets. Hence, when a certain person was complaining that Montanus had read all day long, and declared that no man should attend any of his readings, Natta Pinarius remarked: "I couldn't make a fairer bargain than this: I am ready to listen to him from sunrise to sunset!"

12. Montanus was reading, and had reached the words:

'Gins the bright morning to spread forth his flames clearburning; the red dawn

Scatters its light; and the sad-eyed swallow returns to her nestlings,

Bringing the chatterers' food, and with sweet bill sharing and serving.

Then Varus, a Roman knight, the hanger-on of Marcus Vinicius, and a sponger at elegant dinners which he earned by his degenerate wit, shouted: "Bed-time for Buta!"

13. And later, when Montanus declaimed

Lo, now the shepherds have folded their flocks, and the slow-moving darkness $% \left({{{\rm{s}}_{\rm{s}}}} \right)$

'Gins to spread silence o'er lands that are drowsily lulled into slumber,

this same Varus remarked: "What? Night already? I'll go and pay my morning call on Buta!" You see, nothing was more notorious than Buta's upside-down manner of life. But this life, as I said, was fashionable at one time.

14. And the reason why some men live thus is not because they think that night in itself offers any greater attractions, but because that which is normal gives them no particular pleasure; light being a bitter enemy of the evil conscience, and, when one craves or scorns all things in proportion as they have cost one much or little, illumination for which one does not pay is an object of contempt. Moreover, the luxurious person wishes to be an object of gossip his whole life; if people are silent about him, he thinks that he is wasting his time. Hence he is uncomfortable whenever any of his actions escape notorietv.

Many men eat up their property, and many men keep mistresses. If you would win a reputation among such persons, you must make your programme not only one of luxury but one of notoriety; for in such a busy community wickedness does not discover the ordinary sort of scandal.

15. I heard Pedo Albinovanus, that most attractive storyteller, speaking of his residence above the town-house of Sextus Papinius. Papinius belonged to the tribe of those who shun the light. "About nine o'clock at night I hear the sound of whips. I ask what is going on, and they tell me that Papinius is going over his accounts. About twelve there is a strenuous shouting; I ask what the matter is, and they say he is exercising his voice. About two A.M. I ask the significance of the sound of wheels; they tell me that he is off for a drive.

16. And at dawn there is a tremendous flurry-calling of slaves and butlers, and pandemonium among the cooks. I ask the meaning of this also, and they tell me that he has called for his cordial and his appetizer, after leaving the bath. His dinner," said Pedo, "never went beyond the day, for he lived very sparingly; he was lavish with nothing but the night. Accordingly, if you believe those who call him tight-fisted and mean, you will call him also a 'slave of the lamp."

17. You should not be surprised at finding so many special manifestations of the vices; for vices vary, and there are countless phases of them, nor can all their various kinds be classified. The method of maintaining righteousness is simple; the method of maintaining wickedness is complicated, and has infinite opportunity to swerve. And the same holds true of character; if you follow nature, character is easy to manage, free, and with very slight shades of difference; but the sort of person I have mentioned possesses badly warped character, out of harmony with all things, including himself.

18. The chief cause, however, of this disease seems to me to be a squeamish revolt from the normal existence. Just as such persons mark themselves off from others in their dress, or in the elaborate arrangement of their dinners, or in the elegance of their carriages; even so they desire to make themselves peculiar by their way of dividing up the hours of their day. They are unwilling to be wicked in the conventional way, because notoriety is the reward of their sort of wickedness. Notoriety is what all such men seek – men who are, so to speak, living backwards.

19. For this reason, Lucilius, let us keep to the way which Nature has mapped out for us, and let us not swerve therefrom. If we follow Nature, all is easy and unobstructed; but if we combat Nature, our life differs not a whit from that of men who row against the current. Farewell.

SENECA LETTER 123. On the Conflict between Pleasure and Virtue

1. Wearied with the discomfort rather than with the length of my journey. I have reached my Alban villa late at night, and I find nothing in readiness except myself. So I am getting rid of fatigue at my writing-table: I derive some good from this tardiness on the part of my cook and my baker. For I am communing with myself on this very topic – that nothing is heavy if one accepts it with a light heart, and that nothing need provoke one's anger if one does not add to one's pile of troubles by getting angry.

2. My baker is out of bread; but the overseer, or the housesteward, or one of my tenants can supply me therewith. "Bad bread!" you say. But just wait for it; it will become good. Hunger will make even such bread delicate and of the finest flavour. For that reason I must not eat until hunger bids me; so I shall wait and shall not eat until I can either get good bread or else cease to be squeamish about it.

3. It is necessary that one grow accustomed to slender fare: because there are many problems of time and place which will cross the path even of the rich man and one equipped for pleasure, and bring him up with a round turn. To have whatsoever he wishes is in no man's power; it is in his power not to wish for what he has not, but cheerfully to employ what comes to him. A great step towards independence is a good-humoured stomach, one that is willing to endure rough treatment.

4. You cannot imagine how much pleasure I derive from the fact that my weariness is becoming reconciled to itself; I am asking for no slaves to rub me down, no bath, and no other restorative except time. For that which toil has accumulated, rest can lighten. This repast, whatever it may be, will give me more pleasure than an inaugural banquet [i.e., a dinner given by an official when he entered upon his office.].

5. For I have made trial of my spirit on a sudden – a simpler and a truer test. Indeed, when a man has made preparations and given himself a formal summons to be patient, it is not equally clear just how much real strength of mind he possesses; the surest proofs are those which one exhibits off-hand, viewing one's own troubles not only fairly but calmly, not flying into fits of temper or wordy wranglings, supplying one's own needs by not craving something which was really due, and reflecting that our habits may be unsatisfied, but never our own real selves.

6. How many things are superfluous we fail to realize until they begin to be wanting; we merely used them not because we needed them but because we had them. And how much do we acquire simply because our neighbours have acquired such things, or because most men possess them! Many of our troubles may be explained from the fact that we live according to a pattern, and, instead of arranging our lives according to reason, are led astray by convention.

There are things which, if done by the few, we should refuse to imitate; yet when the majority have begun to do them, we follow along - just as if anything were more honourable because it is more frequent! Furthermore, wrong views, when they have become prevalent, reach, in our eyes, the standard of righteousness.

7. Everyone now travels with Numidian outriders preceding him, with a troop of slave-runners to clear the way; we deem it disgraceful to have no attendants who will elbow crowds from the road, or will prove, by a great cloud of dust, that a high dignitary is approaching! Everyone now possesses mules that are laden with crystal and myrrhine cups carved by skilled artists of great renown; it is disgraceful for all your baggage to be made up of that which can be rattled along without danger. Everyone has pages who ride along with ontment-covered faces, so that the heat or the cold will not

harm their tender complexions; it is disgraceful that none of your attendant slave-boys should show a healthy cheek, not covered with cosmetics.

8. You should avoid conversation with all such persons: they are the sort that communicate and engraft their bad habits from one to another. We used to think that the very worst variety of these men were those who vaunted their words; but there are certain men who vaunt their wickedness. Their talk is very harmful; for even though it is not at once convincing, yet they leave the seeds of trouble in the soul, and the evil which is sure to spring into new strength follows us about even when we have parted from them.

9. Just as those who have attended a concert carry about in their heads the melodies and the charm of the songs they have heard – a proceeding which interferes with their thinking and does not allow them to concentrate upon serious subjects, – even so the speech of flatterers and enthusiasts over that which is depraved sticks in our minds long after we have heard them talk. It is not easy to rid the memory of a catching tune; it stays with us, lasts on, and comes back from time to time. Accordingly, you should close your ears against evil talk, and right at the outset, too; for when such talk has gained an entrance and the words are admitted and are in our minds, they become more shameless.

10. And then we begin to speak as follows: "Virtue, Philosophy, Justice - this is a jargon of empty words. The only way to be happy is to do yourself well. To eat, drink, and spend your money is the only real life, the only way to remind vourself that you are mortal. Our days flow on, and life which we cannot restore - hastens away from us. Why hesitate to come to our senses? This life of ours will not always admit pleasures; meantime, while it can do so, while it clamours for them, what profit lies in imposing thereupon frugality? Therefore get ahead of death, and let anything that death will filch from you be squandered now upon yourself. You have no mistress, no favourite slave to make your mistress envious; you are sober when you make your daily appearance in public; you dine as if you had to show your account-book to 'Papa'; but that is not living, it is merely going shares in someone else's existence

11. And what madness it is to be looking out for the interests of your heir, and to deny yourself everything, with the result that you turn friends into enemies by the vast amount of the fortune you intend to leave! For the more the heir is to get from you, the more he will rejoice in your taking-off! All those sour fellows who criticize other men's lives in a spirit of priggishness and are real enemies to their own lives, playing schoolmaster to the world – you should not consider them as worth a farthing, nor should you hesitate to prefer good living to a good reputation."

12. These are voices which you ought to shun just as Ulysses did; he would not sail past them until he was lashed to the mast. They are no less potent; they lure men from country, parents, friends, and virtuous ways; and by a hope that, if not base, is ill-starred, they wreck them upon a life of baseness. How much better to follow a straight course and attain a goal where the words "pleasant" and "honourable" have the same meaning!

13. This end will be possible for us if we understand that there are two classes of objects which either attract us or repel us. We are attracted by such things as riches, pleasures, beauty, ambition, and other such coaxing and pleasing objects; we are repelled by toil, death, pain, disgrace, or lives of greater frugality. We ought therefore to train ourselves so that we may avoid a fear of the one or a desire for the other. Let us fight in the opposite fashion: let us retreat from the objects that allure, and rouse ourselves to meet the objects that attack.

14. Do you not see how different is the method of descending a mountain from that employed in climbing upwards? Men coming down a slope bend backwards; men ascending a steep place lean forward. For, my dear Lucilius, to allow yourself to put your body's weight ahead when coming down, or, when climbing up, to throw it backward is to comply with vice. The pleasures take one down hill but one must work upwards toward that which is rough and hard to climb; in the one case let us throw our bodies forward, in the others let us put the check-rein on them.

15. Do you believe me to be stating now that only those men bring ruin to our ears, who praise pleasure, who inspire us with fear of pain – that element which is in itself provocative of fear? I believe that we are also in injured by those who masquerade under the disguise of the Stoic school and at the same time urge us on into vice. They boast that only the wise man and the learned is a lover [Meaning, in line with the Stoic paradoxes, that only the sage knows how to be rightly in love.]. "He alone has wisdom in this art; the wise man too is best skilled in drinking and feasting. Our study ought to be this alone: up to what age the bloom of love can endure!"

16. All this may be regarded as a concession to the ways of Greece; we ourselves should preferably turn our attention to words like these: "No man is good by chance. Virtue is something which must be learned. Pleasure is low, petty, to be deemed worthless, shared even by dumb animals – the tiniest and meanest of whom fly towards pleasure. Glory is an empty and fleeting thing, lighter than air. Poverty is an evil to no man unless he kick against the goads [Transcriber's note: The Latin is "Paupertas nulli malum est nisi repugnanti," i.e. "Poverty is an evil to noone unless they resist." Gummere's odd phrase "kick against the goads" is actually from the Bible (Acts 26:14). Death is not an evil; why need you ask? Death alone is the equal privilege of mankind. Superstition is the misguided idea of a lunatic; it fears those whom it ought to love; it is an outrage upon those whom it worships. For what difference is there between denying the gods and dishonouring them?"

17. You should learn such principles as these, nay rather you should learn them by heart; philosophy ought not to try to explain away vice. For a sick man, when his physician bids him live recklessly, is doomed beyond recall. Farewell.

SENECA LETTER 124. On the True Good as Attained by Reason

1. Full many an ancient precept could I give,

Didst thou not shrink, and feel it shame to learn

Such lowly duties.

But you do not shrink, nor are you deterred by any subtleties of study. For your cultivated mind is not wont to investigate such important subjects in a free-and-easy manner. I approve your method in that you make everything count towards a certain degree of progress, and in that you are disgruntled only when nothing can be accomplished by the greatest degree of subtlety. And I shall take pains to show that this is the case now also. Our question is, whether the Good is grasped by the senses or by the understanding; and the corollary thereto is that it does not exist in dumb animals or little children.

2. Those who rate pleasure as the supreme ideal hold that the Good is a matter of the senses; but we Stoics maintain that it is a matter of the understanding, and we assign it to the mind. If the senses were to pass judgement on what is good, we should never reject any pleasure; for there is no pleasure that does not attract, no pleasure that does not please. Conversely, we should undergo no pain voluntarily; for there is no pain that does not clash with the senses.

3. Besides, those who are too fond of pleasure and those who fear pain to the greatest degree would in that case not deserve reproof. But we condemn men who are slaves to their appetites and their lusts, and we scorn men who, through fear of pain, will dare no manly deed. But what wrong could such men be committing if they looked merely to the senses as arbiters of good and evil? For it is to the senses that you and yours have entrusted the test of things to be sought and things to be avoided!

4. Reason, however, is surely the governing element in such a matter as this; as reason has made the decision concerning the happy life, and concerning virtue and honour also, so she has made the decision with regard to good and evil. For with them the vilest part is allowed to give sentence about the better, so that the senses – dense as they are, and dull, and even more sluggish in man than in the other animals, – pass judgement on the Good.

5. Just suppose that one should desire to distinguish tiny objects by the touch rather than by the eyesight! There is no special faculty more subtle and acute than the eye, that would enable us to distinguish between good and evil. You see, therefore, in what ignorance of truth a man spends his days and how abjectly he has overthrown lofty and divine ideals, if he thinks that the sense of touch can pass judgement upon the nature of the Supreme Good and the Supreme Evil!

6. He says: "Just as every science and every art should possess an element that is palpable and capable of being grasped by the senses (their source of origin and growth), even so the happy life derives its foundation and its beginnings from things that are palpable, and from that which falls within the scope of the senses. Surely you admit that the happy life takes its beginnings from things palpable to the senses."

7. But we define as "happy" those things that are in accord with Nature. And that which is in accord with Nature is obvious and can be seen at once -just as easily as that which is complete. That which is according to Nature, that which is given us as a gift immediately at our birth, is, I maintain, not a Good, but the beginning of a Good. You, however, assign the Supreme Good, pleasure, to mere babies, so that the child at its birth begins at the point whither the perfected man arrives. You are placing the tree-top where the root ought to be

8. If anyone should say that the child, hidden in its mother's womb, of unknown sex too, delicate, unformed, and shapeless – if one should say that this child is already in a state of goodness, he would clearly seem to be astray in his ideas. And yet how little difference is there between one who has just lately received the gift of life, and one who is still a hidden burden in the bowels of the mother! They are equally developed, as far as their understanding of good or evil is concerned; and a child is as yet no more capable of comprehending the Good than is a tree or any dumb beast.

But why is the Good non-existent in a tree or in a dumb beast? Because there is no reason there, either. For the same cause, then, the Good is non-existent in a child, for the child also has no reason; the child will reach the Good only when he reaches reason. [According to the Stoics (and other schools also), the "innate notions," or groundwork of knowledge, begin to be subject to reason after the attainment of a child's seventh year.]

9. There are animals without reason, there are animals not yet endowed with reason, and there are animals who possess reason, but only incompletely; in none of these does the Good exist, for it is reason that brings the Good in its company. What, then, is the distinction between the classes which I have mentioned? In that which does not possess reason, the Good will never exist. In that which is not yet endowed with reason, the Good cannot be existent at the time. And in that which possesser reason but only incompletely, the Good is capable of existing, but does not yet exist.

10. This is what I mean, Lucilius: the Good cannot be discovered in any random person, or at any random age; and it is as far removed from infancy as last is from first, or as that which is complete from that which has just sprung into being. Therefore, it cannot exist in the delicate body, when the little frame has only just begun to knit together. Of course not – no more than in the seed.

11. Granting the truth of this, we understand that there is a certain kind of Good of a tree or in a plant; but this is not true of its first growth, when the plant has just begun to spring forth out of the ground. There is a certain Good of wheat: it is not yet existent, however, in the swelling stalk, nor when the soft ear is pushing itself out of the husk, but only when summer days and its appointed maturity have ripened the wheat. Just as Nature in general does not produce her Good until she is brought to perfection, even so man's Good does not exist in man until both reason and man are perfected.

12. And what is this Good? I shall tell you: it is a free mind, an upright mind, subjecting other things to itself and itself to nothing. So far is infancy from admitting this Good that boyhood has no hope of it, and even young manhood cherishes the hope without justification; even our old age is very fortunate if it has reached this Good after long and concentrated study. If this, then, is the Good, the good is a matter of the understanding.

13. "But," comes the retort, "you admitted that there is a certain Good of trees and of grass; then surely there can be a certain Good of a child also." But the true Good is not found in trees or in dumb animals the Good which exists in them is called "good" only by courtesy. "Then what is it?" you say. Simply that which is in accord with the nature of each. The real Good cannot find a place in dumb animals – not by any means; its nature is more blest and is of a higher class. And where there is no place for reason, the Good does not exist.

14. There are four natures which we should mention here: of the tree, animal, man, and God. The last two, having reasoning power, are of the same nature, distinct only by virtue of the immortality of the one and the mortality of the other. Of one of these, then – to wit God – it is Nature that perfects the Good; of the other – to wit man – pains and study do so. All other things are perfect only in their particular nature, and not truly perfect, since they lack reason. Indeed, to sum up, that alone is perfect which is perfect according to nature as a whole, and nature as a whole is possessed of reason. Other things can be perfect according to their kind.

15. That which cannot contain the happy life cannot contain that which produces the happy life; and the happy life is produced by Goods alone. In dumb animals there is not a trace of the happy life, nor of the means whereby the happy life is produced; in dumb animals the Good does not exist.

16. The dumb animal comprehends the present world about him through his senses alone. He remembers the past only by meeting with something which reminds his senses; a horse, for example, remembers the right road only when he is placed at the starting-point. In his stall, however, he has no memory of the road, no matter how often he may have stepped along it. The third state – the future – does not come within the ken of dumb beasts.

17. How, then, can we regard as perfect the nature of those who have no experience of time in its perfection? For time is three-fold, – past, present, and future. Animals perceive only the time which is of greatest moment to them within the limits of their coming and going – the present. Rarely do they recollect the past – and that only when they are confronted with present reminders.

18. Therefore the Good of a perfect nature cannot exist in an imperfect nature; for if the latter sort of nature should possess the Good, so also would mere vegetation. I do not indeed deny that dumb animals have strong and swift impulses toward actions which seem according to nature, but such impulses are confused and disordered. The Good however, is never confused or disordered.

19. "What!" you say, "do dumb animals move in disturbed and ill-ordered fashion?" I should say that they moved in disturbed and ill-ordered fashion, if their nature admitted of order; as it is, they move in accordance with their nature. For that is said to be "disturbed" which can also at some other time be "not disturbed"; so, too, that is said to be in a state of trouble which can be in a state of peace. No man is vicious except one who has the capacity of virtue; in the case of dumb animals their motion is such as results from their nature. 20. But, not to weary you, a certain sort of good will be found in a dumb animal, and a certain sort of virtue, and a certain sort of perfection — but neither the Good, nor virtue, nor perfection in the absolute sense. For this is the privilege of reasoning beings alone, who are permitted to know the cause, the degree, and the means. Therefore, good can exist only in that which possesses reason.

21. Do you ask now whither our argument is tending, and of what benefit it will be to your mind? I will tell you: it exercises and sharpens the mind, and ensures, by occupying it honourably, that it will accomplish some sort of good. And even that is beneficial which holds men back when they are hurrying into wickedness. However, I will say this also: I can be of no greater benefit to you than by revealing the Good that is rightly yours, by taking you out of the class of dumb animals, and by placing you on a level with God.

22. Why, pray, do you foster and practise your bodily strength? Nature has granted strength in greater degree to cattle and wild beasts. Why cultivate your beauty? After all your efforts, dumb animals surpass you in comeliness. Why dress your hair with such unending attention? Though you let it down in Parthian fashion, or tie it up in the German style, or, as the Scythians do, let it flow wild – yet you will see a mane of greater thickness tossing upon any horse you choose, and a mane of greater beauty bristling upon the neck of any lion. And even after training yourself for speed, you will be no match for the hare.

23. Are you not willing to abandon all these details wherein you must acknowledge defeat, striving as you are for something that is not your own - and come back to the Good that is really yours? And what is this Good? It is a clear and flawless mind, which rivals that of God*, raised far above mortal concerns, and counting nothing of its own to be outside itself. You are a reasoning animal. [* One of the most conspicuous Stoic paradoxes maintained that "the wise man is a God." However a more logical explanation may focus on the viewpoint of people who are untrained in knowledge and skill. as for them, a man with knowledge and skill often represents a god, or obtains a godlike status, good and bad. Examples are many in history: Zarathustra, Krishna, Buddha, Confucius, Laozi, Alexander the Great, Julius Caesar, Saul of Tarsos (Paul the Apostle), Mani(chaeus), Constantine the Great, Mohammed Richard the Lionheart Tamerlane Mozart Napoleon, Nelson, Marx, Queen Victoria, Einstein, Roosevelt, as well as most of the cruel and genocidal dictators of the 20th century. And it is very hard to kill any of those Gods indeed. Therefore, for good reasons, Seneca asks you:] What Good, then, lies within you? Perfect reason. Are you willing to develop this to its farthest limits - to its greatest degree of increase?

24. Only consider yourself happy when all your joys are born of reason, and when – having marked all the objects which men clutch at, or pray for, or watch over – you find nothing which you will desire; mind, I do not say prefer. Here is a short rule by which to measure yourself, and by the test of which you may feel that you have reached perfection: "You will come to your own when you shall understand that those whom the world calls fortunate are really the most unfortunate of all." Farewell.

FLAVIUS ARRIANUS' DISCOURSES OF EPICTETUS In Four Books (The other books are lost)

Or: Epictetus, the Discourses as reported by Arrian, the Manual, and Fragments By Epictetus of Hierapolis Translation: William Abbott Oldfather, 1925 Estimated Range of Dating: 128 - 132 A.D.

(The Discourses of Epictetus (Greek: Epiktetou diatribai) are a series of informal lectures by the Stoic philosopher Epictetus written down by his disciple Arrian around 108 AD. Four books out of an original eight are still extant. The Stoic philosophy of Epictetus is intensely practical and reminds us of the equally practical teachings of Siddharta Gautama Buddha. It does not surprise much as with the arrival of Alexander in India motivated disciples of the Buddha began to travel to Greece.

Epictetus taught that philosophy is a way of life and not just a theoretical discipline. To Epictetus, all external events are beyond our control; we should accept calmly and dispassionately whatever happens. However, individuals are responsible for their own actions, which they can examine and control through rigorous self-discipline. He directs his students to focus attention on their opinions, anxieties, passions and desires, so that "they may never fail to get what they desire, nor fall into what they avoid." True education lies in learning to distinguish what is our own from what does not belong to us, and in learning to correctly assent or dissent to

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3029 external impressions. The purpose of his teaching was to make people free and happy.

Épictetus of Hierapolis (Greek: Epiktetos; c. 50–135 AD) was born a slave at Hierapolis, Phrygia (present day Pamukkale, southwestern Turkey). He was a Greek philosopher, or better, a teacher. Epictetus obtained his freedom sometime during the reign of Titus Flavius Vespasianus in 69-79 AD when he lived in Rome. The Flavian family were also Stoics which was reflected in the gospels of Matthew, Mark and Luke that were written at this time. He founded a philosophical school teaching Stoicism. Later, he was banished from Rome by Titus Flavius Domitianus like many other scholars, when he went to Nicopolis in northwestern Greece for the rest of his life.

His Stoic teachings were written down and published by his student Arrian in his Discourses and Enchiridion. Arrian of Nicomedia [whose name of Roman citizenship was Lucius Flavius Arrianus; c. 86-160 AD] was a Greek-speaking historian, public servant, military commander and philosopher of the Roman Empire. His name tells us that his father or Grandfather owed their Roman citizenship to the emperors of the Flavian Dynasty. Lucius Flavius Arrianus was elected Roman Consul in around 130, and since forty-two was the standard age for that position, he would have been at the correct age of around twenty in 108 AD. He wrote, besides The Anabasis of Alexander [the Expedition of Alexander], The Moral letters to Lucilius by Lucius Annaeus Seneca (also known as Seneca the Younger; c. 4 BC – 65 AD), and the Discourses and Enchiridion by the Greek Stoic philosopher Epictetus [c. 50–135 AD]. It is generally agreed that the Discourses were composed sometime in the years around 108 AD. Epictetus himself refers to the coins of Trajan [Discourses, 4.5.17], which shows he was teaching during that reign.

Based on teachings of Platon, Antisthenes, Socrates, Diogenes, Aristoteles, we have here before us a steady development of a range of teachings that led directly to the teachings of a man called Zeno of Citium (or Kition), in Greek called Zenon ho Kitieus. Zeno (c. 334-262 BC) was the founder of the Stoic school of philosophy, which he taught in Athens from about 300 BC.

Following the ideas of the Old Academy, Zeno divided philosophy into three parts: logic (a wide subject including rhetoric, grammar, and the theories of perception and thought); physics (not just science, but the divine nature of the universe as well); and ethics, the end goal of which was to achieve eudaimonia through the right way of living according to Nature. With logic, physics, and ethics, he tried to explain the world to his students as it really is, with all ramification that can occur to any individual.

Stoicism was originally known as "Zenonism", after the founder Zeno of Citium. But this name was soon dropped, probably because the Stoics did not consider their founders to be perfectly wise, and to avoid the risk of the philosophy becoming a cult of personality. The name "Stoicism" derives from the Stoa Poikile, Greek for "painted porch", a colonnade decorated with mythic and historical battle scenes, on the north side of the Agora in Athens, where Zeno and his followers gathered to discuss their ideas. Sometimes Stoicism is therefore referred to as "The Stoa", or the philosophy of "The Porch".

There are about 100 names of Stoic teachers on record. The most famous are: Zeno of Citium [Kition, southeast Cyprus]; the brothers Aratus and Athenodorus of Soli [Pompeiopolis, 11 km west of Mersin, southern Turkey, c. 315-245 BC) disciples of Zeno; Apollophanes of Antioch [Antakya, southern Turkey, fl. 250 BC]; Herillus of Carthage [north Africa, fl. 250 BC]; Eratosthenes of Cyrene [Kyrene, Libya, fl. 225 BCJ, Chief librarian at Alexandria; Cleanthes of Assos [331-232 BC], 2nd leader of the Stoic school; Zeno of Tarsus [Tarsos, southeast Turkey, fl. 200 BC], 4th leader of the Stoic school; Diogenes of Babylon [southern Iraq, c. 230-150 BC], 5th leader of the Stoic school; Antipater of Tarsus [Tarsos, southeast Turkey, c. 200-129 BC], 6th leader of the Stoic school; Panaetius of Rhodes [Rhodos, southwest Turkey. 185-109 BC], 7th leader of the Stoic school; Boethus of Sidon [Saida, Phoenicia, southern Lebanon, fl. 150 BC], disciple of Diogenes; Lucius Flavius Arrianus of Nicomedia [near Contantinople, c. 90-175 ADJ, disciple of Epictetus Marcus Aurelius Antoninus [Rome, 121-180 AD], final leader of the Stoic school, Roman emperor from 161 to 180 AD. There are about half a dozen Stoic philosophers from Tarsos Isoutheast Turkey] and Stoicism florished there for 500 years. One notable person comes exactly from this city: Saul of Tarsos, known as Paul the Apostle. Therefore it is not exactly surprising that Roman Christianity had a Stoic touch right from its beginning. It would be surprising if this were not the case. It is reported in Acts 17:16–18 that Paul met with Stoics during his stay in Athens. In his letters. Paul reflected heavily from his knowledge of Stoic philosophy, using Stoic terms and metaphors to assist his new Gentile converts in their understanding of his Roman-Stoic Christianity. Stoic influence can also be seen in the works of St. Ambrose, Marcus Minucius Felix. and Tertullian.

The early Church Fathers regarded Stoicism as a "pagan philosophy"; nonetheless, they embraced many of the central philosophical concepts of Stoicism. Examples include the terms "logos", "virtue", "Spirit", and "conscience". But the parallels go well beyond the sharing and borrowing of terminology. Both Stoicism and Christianity assert an inner freedom in the face of the external world, a belief in human kinship with Nature or God, a sense of the innate depravityor "persistent evil"-of humankind, and the futility and temporary nature of worldly possessions and attachments. Both encourage Ascesis with respect to the passions and inferior emotions, such as lust, and envy, so that the higher possibilities of one's humanity can be awakened and developed Pauls mixture of Stoicism [as an ethic teaching that makes sencel, and his concept of a divine Jesus who suffered death that brings consolation by redeeming the immortal soul [that attracted the spiritual believers], proved to be an irresistable teaching. This teaching probably made the Stoic schools fade away as Christianity made them superflous. And for those who do not care about spirituality or gods, the Stoic teachings of Epictetus of Hierapolis, Lucius Flavius Arrianus, and Marcus Aurelius brought them, throughout the centuries. the foundation on which our Western civilisation still stands.

The surviving Discourses contain Book 1 to Book 4 [the other four books are lost], the Fragments, and The Encheiridion or The Manual [which is summary].)

DISCOURSES OF EPICTETUS BOOK 1

EPICTETUS CHAPTER 1 - Of The Things Which Are Under Our Control And Not Under Our Control

Among the arts and faculties in general you will find none that is self-contemplative, and therefore none that is either self-approving or self-disapproving. How far does the art of grammar possess the power of contemplation? Only so far as to pass judgement upon what is written. How far the art of music? Only so far as to pass judgement upon the melody. Does either of them, then, contemplate itself? Not at all. But if you are writing to a friend and are at a loss as to what to write, the art of grammar will tell you; yet whether or no you are to write to your friend at all, the art of grammar will not tell. The same holds true of the art of music with regard to melodies; but whether you are at this moment to sing and play on the lyre, or neither sing nor play, it will not tell. What art or faculty, then, will tell? That one which contemplates both itself and everything else. And what is this? The reasoning faculty: for this is the only one we have inherited which will take knowledge both of itself-what it is, and of what it is capable, and how valuable a gift it is to us-and likewise of all the other faculties. For what else is it that tells us gold is beautiful? For the gold itself does not tell us. Clearly it is the faculty which makes use of external impressions. What else judges with discernment the art of music, the art of grammar. the other arts and faculties, passing judgement upon their uses and pointing out the seasonable occasions for their use? Nothing else does.

As was fitting, therefore, the gods have put under our control only the most excellent faculty of all and that which dominates the rest, namely, the power to make correct use of external impressions, but all the others they have not put under our control. Was it indeed because they would not? I for one think that had they been able they would have entrusted us with the others also; but they were quite unable to do that. For since we are upon earth and trammelled by an earthy body and by earthy associates, how was it possible that, in respect of them, we should not be hampered by external things?

But what says Zeus? "Epictetus, had it been possible I should have made both this paltry body and this small estate of thine free and unhampered. But as it is—let it not escape thee—this body is not thine own, but only clay cunningly compounded. Yet since I could not give thee this, we have given thee a certain portion of ourself, this faculty of choice and refusal, of desire and aversion, or, in a word, the faculty which makes use of external impressions; if thou care for this and place all that thou hast therein, thou shalt never be thwarted, never hampered, shalt not flatter any man. What then? Are these things small in thy sight?" "Far be it from me!" "Art thou, then, content with them?" "I pray the Gods I may be."

But now, although it is in our power to care for one thing only and devote ourselves to but one, we choose rather to care for many things, and to be tied fast to many, even to our body and our estate and brother and friend and child and slave. Wherefore, being tied fast to many things, we are burdened and dragged down by them. That is why, if the weather keeps us from sailing, we sit down and fidget and keep constantly peering about. "What wind is blowing?" we ask. Boreas. "What have we to do with it? When will Zephyrus blow?" When it pleases, good sir, or rather when Aeolus pleases. For God has not made you steward of the winds, but Aeolus. "What then?" We must make the best of what is under our control, and take the rest as its nature is. "How, then, is its nature?" As God wills.

"Must I, then, be the only one to be beheaded now?" Why, did you want everybody to be beheaded for your consolation? Are you not willing to stretch out your neck as did a certain Lateranus at Rome, when Nero ordered him to be beheaded? For he stretched out his neck and received the blow, but, as it was a feeble one, he shrank back for an instant, and then stretched out his neck again. Yes, and before that, when Epaphroditus, a freedman of Nero, approached a certain man and asked about the ground of his offlence, he answered, "If I wish anything, I will speak to your master."

"What aid, then, must we have ready at hand in such circumstances?" Why, what else than the knowledge of what is mine, and what is not mine, and what is permitted me, and what is not permitted me? I must die: must I, then, die groaning too? I must be fettered: and wailing too? I must go into exile: does anyone, then, keep me from going with a smile and cheerful and serene? "Tell your secrets." I say not a word; for this is under my control. "But I will fetter you." What is that you say, man? fetter me? My leg you will fetter, but my moral purpose not even Zeus himself has power to overcome. "I will throw you into prison." My paltry body, rather! "I will behead you." Well, when did I ever tell you that mine was the only neck that could not be severed? These are the lessons that philosophers ought to rehearse, these they ought to write down daily, in these they ought to exercise themselves.

Thrasea used to say: "I would rather be killed to-day than banished to-morrow." What, then, did Rufus say to him? "If you choose death as the heavier of two misfortunes, what folly of choice! But if as the lighter, who has given you the choice? Are you not willing to practise contentment with what has been given you?"

Wherefore, what was it that Agrippinus used to remark? "I am not standing in my own way." Word was brought him, "Your case is being tried in the Senate."—"Good luck betide! But it is the fifth hour now" (he was in the habit of taking his exercise and then a cold bath at that hour); "let us be off and take our exercise." After he had finished his exercise someone came and told him, "You have been condemned."—"To exile," says he, "or to death?"—"To exile."—"What about my propert??"—"It has not been confiscated."—"What about my propert??"—"It has not been confiscated."—"Well then, let us go to Aricia and take our lunch there." This is what it means to have rehearsed the lessons one ought to rehearse, to have set desire and aversion free from every hindrance and made them proof against chance. I must die. If forthwith, I die; and if a little later, I will take lunch now, since the hour for lunch has come, and afterwards I will die at the appointed time. How? As becomes the man who is giving back that which was another's.

EPICTETUS CHAPTER 2 - How May A Man Preserve His Proper Character Upon Every Occasion?

To the rational being only the irrational is unendurable, but the rational is endurable. Blows are not by nature unendurable.-How so?-Observe how: Lacedaemonians take a scourging once they have learned that it is rational.-But is it not unendurable to be hanged?-Hardly; at all events whenever a man feels that it is rational he goes and hangs himself. In short, if we observe, we shall find mankind distressed by nothing so much as by the irrational, and again attracted to nothing so much as to the rational. Now it so happens that the rational and the irrational are different for different persons, precisely as good and evil, and the profitable and the unprofitable, are different for different persons. It is for this reason especially that we need education, so as to learn how, in conformity with nature, to adapt to specific instances our preconceived idea of what is rational and what is irrational. But for determining the rational and the irrational, we employ not only our estimates of the value of external things, but also the criterion of that which is in keeping with one's own character. For to one man it is reasonable to hold a chamber-pot for another, since he considers only that, if he does not hold it, he will get a beating and will not get food, whereas, if he does hold it, nothing harsh or painful will be done to him: but some other man feels that it is not merely unendurable to hold such a pot himself, but even to tolerate another's doing so. If you ask me, then, "Shall I hold the pot or not?" I will tell you that to get food is of greater value than not to get it, and to be flayed is of greater detriment than not to be; so that if you measure your interests by these standards, go and hold the pot. "Yes, but it would be unworthy of me." That is an additional consideration, which you, and not I, must introduce into the question. For you are the one that knows yourself, how much you are worth in your own eyes and at what price you sell yourself. For different men sell themselves at different prices.

Wherefore, when Florus was debating whether he should enter Nero's festival, so as to make some personal contribution to it, Agrippinus said to him, "Enter." And when Florus asked, "Why do you not enter yourself?" he replied, "I? why, I do not even raise the question." For when a man once stoops to the consideration of such questions, I mean to estimating the value of externals, and calculates them one by one, he comes very close to those who have forgotten their own proper character. Come, what is this you ask me? "Is death or life preferable?" I answer, life. "Pain or pleasure?" I answer, pleasure. "But unless I take a part in the tragedy I shall be beheaded." Go, then, and take a part, but I will not take a part. "Why not?" Because you regard yourself as but a single thread of all that go to make up the garment. What follows, then? This, that you ought to take thought how you may resemble all other men, precisely as even the single thread wants to have no point of superiority in comparison with the other threads. But I want to be the red, that small and brilliant portion which causes the rest to appear comely and beautiful. Why, then, do you say to me, "Be like the majority of people?" And if I do that, how shall I any longer be the red?

This is what Helvidius Priscus also saw, and, having seen, did. When Vespasian sent him word not to attend a meeting of the Senate, he answered, "It is in your power not to allow me to be a member of the Senate, but so long as I am one I must attend its meetings." "Very well then, but when you attend, hold your peace." "Do not ask for my opinion and I will hold my peace." "But I must ask for your opinion." "And I must answer what seems to me right." "But if you speak, I shall put you to death." "Well, when did I ever tell you that I was immortal? You will do your part and I mine. It is yours to put me to death, mine to die without a tremor; yours to banish, mine to leave without sorrow." What good, then, did Priscus do, who was but a single individual? And what good does the red do the mantle? What else than that it stands out conspicuous in it as red, and is displayed as a goodly example to the rest? But had Caesar [here generally meaning the 'Roman emperor'] told another man in such circumstances not to attend the meetings of the Senate, he would have said, "I thank you for excusing me." A man like that Caesar would not even have tried to keep from attending, but would have known that he would either sit like a jug, or, if he spoke, would say what he knew Caesar wanted said, and would pile up any amount more on the top of it. In like manner also a certain athlete acted, who was in danger of dying unless his private parts were amputated. His brother (and he was a philosopher) came to him and said, "Well, brother, what are you going to do? Are we going to cut off this member, and step forth once more into the gymnasium?" He would not submit, but hardened his heart and died. And as someone asked, "How did he do this? As an athlete, or as a philosopher?" As a man, replied Epictetus; and as a man who had been proclaimed at the Olympic games and had striven in them, who had been at home in such places, and had not merely been rubbed down with oil in Bato's wrestling school. But another would have had even his neck cut off, if he could have lived without his neck. This is what we mean by regard for one's proper character; and such is its strength with those who in their deliberations habitually make it a personal contribution. "Come then, Epictetus, shave off your beard." If I am a philosopher, I answer, "I will not shave it off" "But I will take off your neck." If that will do you any good, take it off.

Someone inquired, "How, then, shall each of us become aware of what is appropriate to his own proper character?" How comes it, replied he, that when the lion charges, the bull alone is aware of his own prowess and rushes forward to defend the whole herd? Or is it clear that with the possession of the prowess comes immediately the consciousness of it also? And so, among us too, whoever has such prowess will not be unaware of it. Yet a bull does not become a bull all at once, any more than a man becomes noble, but a man must undergo a winter training, he must prepare himself and must not plunge recklessly into what is inappropriate for him.

Only consider at what price you sell your freedom of will. If you must sell it, man, at least do not sell it cheap. But the great and pre-eminent deed, perhaps, befits others, Socrates and men of his stamp.—Why then, pray, if we are endowed by nature for such greatness, do not all men, or many, become like him? What, do all horses become swift, all dogs keen to follow the scent? What then? Because I have no natural gifts, shall I on that account give up my discipline? Far be it from mel Epictetus will not be better than Socrates; but if only I am not worse, that suffices me. For I shall not be a Milo, either, and yet I do not neglect my body; nor a Croesus, and yet I do not neglect my property; nor, in a word, is there any other field in which we give up the appropriate discipline merely from despair of attaining the highest.

EPICTETUS CHAPTER 3 - From The Thesis That God Is The Father Of Mankind How May One Proceed To The Consequences?

IF a man could only subscribe heart and soul, as he ought, to this doctrine, that we are all primarily begotten of God, and that God is the father of men as well as of gods, I think that he will entertain no ignoble or mean thought about himself. Yet, if Caesar adopts you no one will be able to endure your conceit, but if you know that you are a son of Zeus, will you not be elated? As it is, however, we are not, but inasmuch as these two elements were comingled in our begetting, on the one hand the body, which we have in common with the brutes, and, on the other, reason and intelligence, which we have in common with the gods, some of us incline toward the former relationship, which is unblessed by fortune and is mortal, and only a few toward that which is divine and blessed. Since, then, it is inevitable that every man, whoever he be, should deal with each thing according to the opinion which he forms about it, these few, who think that by their birth they are called to fidelity, to self-respect, and to unerring judgement in the use of external impressions, cherish no mean or ignoble thoughts about themselves, whereas the multitude do quite the opposite. "For what am I? A miserable, paltry man," say they, and, "Lo, my wretched, paltry flesh." Wretched indeed, but you have also something better than your paltry flesh. Why then abandon that and cleave to this?

It is because of this kinship with the flesh that those of us who incline toward it become like wolves, faithless and treacherous and hurtful, and others like lions, wild and savage and untamed; but most of us become foxes, that is to say, rascals of the animal kingdom. For what else is a slanderous and malicious man but a fox, or something even more rascally and degraded? Take heed, therefore, and beware that you become not one of these rascally creatures.

EPICTETUS CHAPTER 4 - Of Progress

He who is making progress, having learned of the philosophers that desire is for things good and aversion is toward things evil, and having also learned that serenity and calm are not attained by a man save as he succeeds in securing the objects of desire and as he avoids encountering the objects of aversion-such a one has utterly excluded desire from himself, or else deferred it to another time, and feels aversion only toward the things which involve freedom of choice. For if he avoids anything that is not a matter of free choice, he knows that some time he will encounter something in spite of his aversion to it, and will come to grief. Now if it is virtue that holds out the promise thus to create happiness and calm and serenity, then assuredly progress toward virtue is progress toward each of these states of mind. For it is always true that whatsoever the goal toward which perfection in anything definitely leads, progress is an approach thereto.

How comes it, then, that we acknowledge virtue to be a thing of this sort, and yet seek progress and make a display of it in other things? What is the work of virtue? Serenity. Who, then, is making progress? The man who has read many treatises of Chrysippus? What, is virtue no more than thisto have gained a knowledge of Chrysippus? For if it is this, progress is confessedly nothing else than a knowledge of many of the works of Chrysippus. But now, while acknowledging that virtue produces one thing, we are declaring that the approach to virtue, which is progress, produces something else. "So-and-so," says someone, "is already able to read Chrysippus all by himself." It is fine headway, by the gods, that you are making, man! Great progress this! "Why do you mock him? And why do you try to divert him from the consciousness of his own shortcomings? Are you not willing to show him the work of virtue, that he may learn where to look for his progress?" Look for it there, wretch, where your work lies. And where is your work? In desire and aversion, that you may not miss what you desire and encounter what you would avoid: in choice and in refusal, that you may commit no fault therein; in giving and withholding assent of judgement, that you may not be deceived. But first come the first and most necessary points. Yet if you are in a state of fear and grief when you seek to be proof against encountering what you would avoid, how, pray, are you making progress?

Do you yourself show me, therefore, your own progress in matters like the following. Suppose, for example, that in talking to an athlete I said, "Show me your shoulders," and then he answered, "Look at my jumping-weights." Go to, you and your jumping-weights! What I want to see is the effect of the jumping-weights. "Take the treatise Upon Choice and see how I have mastered it." It is not that I am looking into, you slave, but how you act in your choices and refusals, your desires and aversions, how you go at things, and apply vourself to them, and prepare yourself, whether you are acting in harmony with nature therein, or out of harmony with it. For if you are acting in harmony, show me that, and I will tell you that you are making progress; but if out of harmony, begone, and do not confine yourself to expounding your books, but go and write some of the same kind yourself. And what will you gain thereby? Do you not know that the whole book costs only five denarii? Is the expounder of it, then, think you, worth more than five denarii? And so never look for your work in one place and your progress in another.

Where, then, is progress? If any man among you, withdrawing from external things, has turned his attention to the question of his own moral purpose, cultivating and perfecting it so as to make it finally harmonious with nature, elevated, free, unhindered, untrammelled, faithful, and honourable; and if he has learned that he who craves or shuns the things that are not under his control can be neither faithful nor free, but must himself of necessity be changed and tossed to and fro with them, and must end by subordinating himself to others, those, namely, who are able to procure or prevent these things that he craves or shuns: and if, finally, when he rises in the morning he proceeds to keep and observe all this that he has learned; if he bathes as a faithful man, eats as a self-respecting man,-similarly, whatever the subject matter may be with which he has to deal, putting into practice his guiding principles, as the runner does when he applies the principles of running, and the voice-trainer when he applies the principles of voice-training.-this is the man who in all truth is making progress, and the man who has not travelled at random is this one. But if he has striven merely to attain the state which he finds in his books and works only at that, and has made that the goal of his travels, I bid him go home at once and not neglect his concerns there, since the goal to which he has travelled is nothing; but not so that other goal-to study how a man may rid his life of sorrows and lamentations, and of such cries as "Woe is me!" and "Wretch that I am!" and of misfortune and failure, and to learn the meaning of death, exile, prison, hemlock; that he may be able to say in prison, "Dear Crito, if so it pleases the gods, so be it," rather than, "Alas, poor me, an old man, it is for this that I have kept my grey hairs!" Who says such things? Do you think that I will name you some man held in small esteem and of low degree? Does not Priam say it? Does not Oedipus? Nay more, all kings say it! For what are tragedies but the portrayal in tragic verse of the sufferings of men who have admired things external? If indeed one had to be deceived into learning that among things external and independent of our free choice none concerns us. I, for my part, should consent to a deception which would result in my living thereafter serenely and without turmoil; but as for you, you will yourselves see to your own preference.

What, then, does Chrysippus furnish us? "That you may know," he says, "that these things are not false from which serenity arises and tranquillity comes to us, take my books and you shall know how conformable and harmonious with nature are the things which render me tranquil." O the great good fortune! O the great benefactor who points the way! To Triptolemus, indeed, all men have established shrines and altars, because he gave us as food the fruits of cultivation, but to him who has discovered, and brought to light, and imparted to all men the truth which deals, not with mere life. but with a good life,-who among you has for that set up an altar in his honour, or dedicated a temple or a statue, or bows down to God in gratitude for him? But because the gods have given us the vine or wheat, for that do we make sacrifice, and yet because they have brought forth such a fruit in a human mind, whereby they purposed to show us the truth touching happiness, shall we fail to render thanks unto God for this?

EPICTETUS CHAPTER 5 - Against The Academics

If a man, says Epictetus, resists truths that are all too evident, in opposing him it is not easy to find an argument by which one may cause him to change his opinion. The reason for this is neither the man's ability nor the teacher's weakness; nay, when a man who has been trapped in an argument hardens to stone, how shall one any longer deal with him by argument?

Now there are two kinds of petrifaction: one is the petrifaction of the intellect, the other of the sense of shame, when a man stands in array, prepared neither to assent to manifest truths nor to leave the fighting line. Most of us dread the deadening of the body and would resort to all means so as to avoid falling into such a state, but about the deadening of the soul we care not at all. Indeed, by Zeus, even in the case of the soul itself, if a man be in such a state that he cannot follow an argument step by step, or even understand one, we regard him too as being in a bad way; but if a man's sense of shame and self-respect be deadened, this we go so far as to call strength of character!

Do your senses tell you that you are awake? "No," he answers, "any more than they do when in dreams I have the impression that I am awake." Is there, then, no difference between these two impressions? "None." Can I argue with this man any longer? And what cautery or lancet shall I apply to him, to make him realise that he is deadened? He does realise it, but pretends that he does not; he is even worse than a corpse. One man does not notice the contradiction—he is in a bad way; another man notices it, indeed, but is not moved and does not improve—he is in a still worse state. His self-respect and sense of shame have been lopped off, and his reasoning faculty has been—I will not say cut away, but brutalized. Am I to call this strength of character? Far from it, unless I am so to describe the strength that lewd fellows have, which enables them to say and do in public anything that comes into their heads.

EPICTETUS CHAPTER 6 - Of Providence

From everything that happens in the universe it is easy for a man to find occasion to praise providence, if he has within himself these two qualities: the faculty of taking a comprehensive view of what has happened in each individual instance, and the sense of gratitude. Otherwise, one man will not see the usefulness of what has happened, and another, even if he does see it, will not be grateful therefor. If God had made colours, but had not made the faculty of seeing them, of what good had it been?—None at all.—But, conversely, if He had made the faculty, but in making objects, had made them incapable of falling under the faculty of vision, in that case also of what good had it been?—None at all.—What then, if He had even made both of these, but had not made light?— Even thus it would have been of no use.—Who is it, then, that has fitted this to that and that to this? And who is it that has fitted the sword to the scabbard, and the scabbard to the sword? No one? Assuredly from the very structure of all made objects we are accustomed to prove that the work is certainly the product of some artificer, and has not been constructed at random.

Does, then, every such work reveal its artificer, but do visible objects and vision and light not reveal him? And the male and the female, and the passion of each for intercourse with the other, and the faculty which makes use of the organs which have been constructed for this purpose, do these things not reveal their artificer either? Well, admit it for these things; but the marvellous constitution of the intellect whereby, when we meet with sensible objects, we do not merely have their forms impressed upon us, but also make a selection from among them, and subtract and add, and make these various combinations by using them, yes, and, by Zeus, pass from some things to certain others which are in a manner related to them-is not even all this sufficient to stir our friends and induce them not to leave the artificer out of account? Else let them explain to us what it is that produces each of these results, or how it is possible that objects so wonderful and so workmanlike should come into being at random and spontaneously

What then? Is it in the case of man alone that these things occur? You will, indeed, find many things in man only, things of which the rational animal had a peculiar need, but you will also find many possessed by us in common with the irrational animals. Do they also, then, understand what happens? No! for use is one thing, and understanding another. God had need of the animals in that they make use of external impressions, and of us in that we understand the use of external impressions. And so for them it is sufficient to eat and drink and rest and procreate, and whatever else of the things within their own province the animals severally do; while for us, to whom He has made the additional gift of the faculty of understanding, these things are no longer sufficient, but unless we act appropriately, and methodically, and in conformity each with his own nature and constitution, we shall no longer achieve our own ends. For of beings whose constitutions are different, the works and the ends are likewise different. So for the being whose constitution is adapted to use only, mere use is sufficient, but where a being has also the faculty of understanding the use, unless the principle of propriety be added, he will never attain his end. What then? Each of the animals God constitutes, one to be eaten, another to serve in farming, another to produce cheese, and yet another for some other similar use; to perform these functions what need have they to understand external impressions and to be able to differentiate between them? But God has brought man into the world to be a spectator of Himself and of His works, and not merely a spectator, but also an interpreter. Wherefore, it is shameful for man to begin and end just where the irrational animals do; he should rather begin where they do, but end where nature has ended in dealing with us. Now she did not end until she reached contemplation and understanding and a manner of life harmonious with nature. Take heed, therefore, lest you die without ever having been spectators of these things.

But you travel to Olympia to behold the work of Pheidias, and each of you regards it as a misfortune to die without seeing such sights; yet when there is no need to travel at all, but where Zeus is already, and is present in his works, will you not yearn to behold these works and know them? Will you decline, therefore, to perceive either who you are, or for what you have been born, or what that purpose is for which you have received sight?-But some unpleasant and hard things happen in life.-And do they not happen at Olympia? Do you not swelter? Are you not cramped and crowded? Do you not bathe with discomfort? Are you not drenched whenever it rains? Do you not have your fill of tumult and shouting and other annoyances? But I fancy that you hear and endure all this by balancing it off against the memorable character of the spectacle. Come, have you not received faculties that enable you to bear whatever happens? Have you not received magnanimity? Have you not received courage? Have you not received endurance? And what care I longer for anything that may happen, if I be magnanimous? What shall perturb me, or trouble me, or seem grievous to me? Shall I fail to use my faculty to that end for which I have received it, but grieve and lament over events that occur?

"Yes, but my nose is running." What have you hands for, then, slave? Is it not that you may wipe your nose? "Is it reasonable, then, that there should be running noses in the world?"—And how much better it would be for you to wipe your nose than to find fault! Or what do you think Heracles

would have amounted to, if there had not been a lion like the one which he encountered, and a hydra, and a stag, and a boar, and wicked and brutal men, whom he made it his business to drive out and clear away? And what would he have been doing had nothing of the sort existed? Is it not clear that he would have rolled himself up in a blanket and slept? In the first place, then, he would never have become Heracles by slumbering away his whole life in such luxury and ease; but even if he had, of what good would he have been? What would have been the use of those arms of his and of his prowess in general, and his steadfastness and nobility, had not such circumstances and occasions roused and exercised him? What then? Ought he to have prepared these for himself, and sought to bring a lion into his own country from somewhere or other, and a boar. and a hydra? This would have been folly and madness. But since they did exist and were found in the world, they were serviceable as a means of revealing and exercising our Heracles.

Come then, do you also, now that you are aware of these things, contemplate the faculties which you have, and, after contemplating, say: "Bring now, O Zeus, what difficulty Thou wilt; for I have an equipment given to me by Thee, and resources wherewith to distinguish myself by making use of the things that come to pass," But no, you sit trembling for fear something will happen, and lamenting, and grieving, and groaning about other things that are happening. And then you blame the gods! For what else can be the consequence of so ignoble a spirit but sheer impiety? And yet God has not merely given us these faculties, to enable us to bear all that happens without being degraded or crushed thereby, but-as became a good king and in very truth a father-He has given them to us free from all restraint, compulsion, hindrance; He has put the whole matter under our control without reserving even for Himself any power to prevent or hinder. Although you have these faculties free and entirely your own, you do not use them, nor do you realise what gifts you have received, and from whom, but you sit sorrowing and groaning, some of you blinded toward the giver himself and not even acknowledging your benefactor, and others,-such is their ignoble spiritturning aside to fault-finding and complaints against God. And yet, though I can show you that you have resources and endowment for magnanimity and courage, do you, pray, show me what resources you have to justify faultfinding and complaining!

EPICTETUS CHAPTER 7 - Of The Use Of Equivocal Premisses, Hypothetical Arguments And The Like

Most men are unaware that the handling of arguments which involve equivocal and hypothetical premisses, and, further, of those which derive syllogisms by the process of interrogation, and, in general, the handling of all such arguments, has a bearing upon the duties of life. For our aim in every matter of inquiry is to learn how the good and excellent man may find the appropriate course through it and the appropriate way of conducting himself in it. Let them say, then, either that the good man will not enter the contest of question and answer, or that, once he has entered, he will be at no pains to avoid conducting himself carelessly and at haphazard in question and answer; or else, if they accept neither of these alternatives, they must admit that some investigation should be made of those topics with which question and answer are principally concerned.

For what is the professed object of reasoning? To state the true, to eliminate the false, to suspend judgement in doubtful cases. Is it enough, then, to learn this alone?-It is enough, says one.-Is it, then, also enough for the man who wants to make no mistake in the use of money to be told the reason why you accept genuine drachmas and reject the counterfeit?-It is not enough.-What, then, must be added to this? Why, what else but the faculty that tests the genuine drachmas and the counterfeit and distinguishes between them? Wherefore, in reasoning also the spoken word is not enough, is it? On the contrary, is it not necessary to develop the power of testing the true and the false and the uncertain and of distinguishing between them?-It is necessary.-What else besides this is proposed in reasoning? Pray accept the consequence of what you have properly granted. Come, is it enough, then, in this case also merely to know that this particular thing is true? It is not enough, but one must learn in what way a thing follows as a consequence upon certain other things, and how sometimes one thing follows upon one, and at other times upon several conjointly. Is it not, then, necessary that a man should also acquire this power, if he is to acquit himself intelligently in argument, and is himself not only to prove each point when he tries to prove it, but also to follow the argument of those who are conducting a proof, and is not to be misled by men who quibble as though they were proving something? There has consequently arisen among us, and shown itself to be necessary, a science which deals with inferential arguments and with logical figures and trains men therein.

But of course there are times when we have with sound reasoning granted the premisses, and the inference from them is so-and-so; and, in spite of its being false, it is none the less the inference. What, then, should I do? Accept the fallacy? And how is that possible? Well, should I say, "It was not sound reasoning for me to grant the premisses"? Nay, but this is not permissible either. Or, "This does not follow from what has been granted"? But that is not permissible, either. What, then, must be done in these circumstances? Is it not this, that the fact of having borrowed is not enough to prove that one is still in debt, but we must add the circumstance that one abides by the loan-that is, has not paid it-and just so our having once granted the premisses is not enough to compel us to accept the inference, but we must abide by our acceptance of the premisses? And what is more, if the premisses remain until the end what they were when they were granted, there is every necessity for us to abide by our acceptance of them, and to allow the conclusion that has been drawn from them; . . . for from our point of view and to our way of thinking this inference does not now result from the premisses, since we have withdrawn from our previous assent to the premisses. It is necessary, therefore, to enquire into premisses of this kind and into such change and equivocal modification of them, whereby, at the very moment the question is put, or the answer made, or the deduction drawn, or at some other similar stage in the argument, the premisses take on modified meanings and give occasion to the unthinking to be disconcerted, if they do not see what follows in consequence. Why is it necessary? In order that in this matter we may not behave unsuitably, nor at haphazard, nor confusedly.

And the same holds true of hypotheses and hypothetical arguments. For it is necessary at times to postulate some hypothesis as a sort of stepping-stone for the subsequent argument. Are we, therefore, to grant any and every hypothesis that is proposed, or not every one? And if not every one, what one? And when a man has granted an hypothesis, must he abide for ever by it and maintain it, or are there times when he should abandon it and accept only the consequences which follow from it without accepting those which are opposed to it?—Yes.—But someone says, "If you once admit an hypothesis that involves a possibility, I will compel you to be drawn on to an impossibility." Shall the prudent man refuse to engage with this person, and avoid enquiry and discussion with him? Yet who but the prudent is capable of using argument and skilful in question and answer, and, by Zeus, proof against deceit and sophistic fallacies? But shall he argue, indeed, and then not take pains to avoid conducting himself recklessly and at haphazard in argument? And if he does not, how will he any longer be the sort of man we think he is? But without some such exercise and preparation in formal reasoning, how will he be able to maintain the continuity of the argument? Let them show that he will be able, and all these speculations become mere superfluity; they were absurd and inconsistent with our preconception of the good man.

Why are we still indolent and easy-going and sluggish, seeking excuses whereby we may avoid toiling or even late hours, as we try to perfect our own reason?-If, then, I err in these matters, I have not murdered my own father, have I?-Slave, pray where was there in this case a father for you to murder? What, then, have you done, you ask? You have committed what was the only possible error in the matter. Indeed this is the very remark I made to Rufus when he censured me for not discovering the one omission in a certain syllogism. "Well," said I, "it is not as bad as if I had burned down the Capitol." But he answered, "Slave, the omission here is the Capitol." Or are there no other errors than setting fire to the Capitol and murdering one's father? But to make a reckless and foolish and haphazard use of the external impressions that come to one, to fail to follow an argument, or demonstration, or sophism-in a word, to fail to see in question and answer what is consistent with one's position or inconsistent—is none of these things an error?

EPICTETUS CHAPTER 8 - That The Reasoning Faculties, In The Case Of The Uneducated, Are Not Free From Error

In as many ways as it is possible to vary the meaning of equivalent terms, in so many ways may a man also vary the forms of his controversial arguments and of his enthymemes in reasoning. Take this syllogism, for instance: If you have borrowed and have not repaid; you owe me the money; now you have not borrowed and have not repaid; therefore you do not owe me the money. And no man is better fitted to employ such variations skilfully than the philosopher. For if, indeed, the enthymeme is an incomplete syllogism, it is clear that he who has been exercised in the perfect syllogism would be no less competent to deal with the imperfect also.

Why, then, do we neglect to exercise ourselves and one another in this way? Because, even now, without receiving exercise in these matters, or even being, by me at least, diverted from the study of morality, we nevertheless make no progress toward the beautiful and the good. What, therefore, must we expect, if we should take on this occupation also? And especially since it would not merely be an additional occupation to draw us away from those which are more necessary, but would also be an exceptional excuse for conceit and vanity. For great is the power of argumentation and persuasive reasoning, and especially if it should enjoy excessive exercise and receive likewise a certain additional ornament from language. The reason is that, in general, every faculty which is acquired by the uneducated and the weak is dangerous for them, as being apt to make them conceited and puffed up over it. For by what device might one any longer persuade a young man who excels in these faculties to make them an appendage to himself instead of his becoming an appendage to them? Does he not trample all these reasons under foot, and strut about in our presence, all conceited and puffed up, much less submitting if any one by way of reproof reminds him of what he lacks and wherein he has gone astray?

What then? Was not Plato a philosopher? Yes, and was not Hippocrates a physician? But you see how eloquently Hippocrates expresses himself. Does Hippocrates, then, express himself so eloquently by virtue of his being a physician? Why, then, do you confuse things that for no particular reason have been combined in the same man? Now if Plato was handsome and strong, ought I to sit down and strive to become handsome, or become strong, on the assumption that this is necessary for philosophy, because a certain philosopher was at the same time both handsome and a philosopher? Are you not willing to observe and distinguish just what that is by virtue of which men become philosophers, and what qualities pertain to them for no particular reason? Come now, if I were a philosopher, ought you to become lame like me? What then? Am I depriving you of these faculties? Far be it from me! No more than I am depriving you of the faculty of sight. Yet, if you enquire of me what is man's good, I can give you no other answer than that it is a kind of moral purpose.

EPICTETUS CHAPTER 9 - How From The Thesis That We Are Akin To God May A Man Proceed To The Consequences?

If what is said by the philosophers regarding the kinship of God and men be true, what other course remains for men but that which Socrates took when asked to what country he belonged, never to say "I am an Athenian," or "I am a Corinthian," but "I am a citizen of the universe"? For why do you say that you are an Athenian, instead of mentioning merely that corner into which your paltry body was cast at birth? Or is it clear you take the place which has a higher degree of authority and comprehends not merely that corner of yours, but also your family and, in a word, the source from which your race has come, your ancestors down to yourself, and from some such entity call yourself "Athenian," or "Corinthian"? Well, then, anyone who has attentively studied the administration of the universe and has learned that "the greatest and most authoritative and most comprehensive of all governments is this one, which is composed of men and God, and that from Him have descended the seeds of being, not merely to my father or to my grandfather, but to all things that are begotten and that grow upon earth, and chiefly to rational beings, seeing that by nature it is theirs alone to have communion in the society of God, being intertwined with him through the reason,"-why should not such a man call himself a citizen of the universe? Why should he not call himself a son of God? And why shall he fear anything that, happens among men? What? Shall kinship with Caesar or any other of them that have great power at Rome be sufficient to enable men to live securely, proof against contempt, and in fear of nothing whatsoever, but to have God as our maker, and father, and guardian.--shall this not suffice to deliver us from griefs and fears?-And wherewithal shall I be fed, asks one, if I have nothing?-And how of slaves, how of runaways, on what do they rely when they leave their masters? On their lands, their slaves, or their vessels of silver? No, on nothing but themselves; and nevertheless food does not fail them. And shall it be necessary for our philosopher, forsooth, when he goes abroad, to depend upon others for his assurance and his refreshment, instead of taking care of himself, and to be more vile and craven than the irrational animals, every one of which is sufficient to himself, and lacks neither its own proper food nor that way of life which is appropriate to it and in harmony with nature?

As for me, I think that the elder man ought not to be sitting here devising how to keep you from thinking too meanly of yourselves or from taking in your debates a mean or ignoble position regarding yourselves; he should rather be striving to prevent there being among you any young men of such a sort that, when once they have realised their kinship to the gods and that we have these fetters as it were fastened upon us, the body and its possessions, and whatever things on their account are necessary to us for the management of life, and our tarrying therein,-they may desire to throw aside all these things as burdensome and vexatious and unprofitable and depart to their kindred. And this is the struggle in which your teacher and trainer, if he really amounted to anything, ought to be engaged; you, for your part, would come to him saving: "Epictetus, we can no longer endure to be imprisoned with this paltry body, giving it food and drink, and resting and cleansing it, and, to crown all, being on its account brought into contact with these people and those. Are not these things indifferent-indeed, nothing-to us? And is not death no evil? And are we not in a manner akin to God, and

have we not come from Him? Suffer us to go back whence we came; suffer us to be freed at last from these fetters that are fastened to us and weigh us down. Here are despoilers and thieves, and courts of law, and those who are called tyrants; they think that they have some power over us because of the paltry body and its possessions. Suffer us to show them that they have power over no one." And thereupon it were my part to say: "Men, wait upon God. When He shall give the signal and set you free from this service, then shall you depart to Him; but for the present endure to abide in this place, where He has stationed you. Short indeed is this time of your abiding here, and easy to bear for men of your convictions. For what tyrant, or what thief, or what courts of law are any longer formidable to those who have thus set at naught the body and its possessions? Stay, nor be so unrational as to depart."

Some such instruction should be given by the teacher to the youth of good natural parts. But what happens now? A corpse is your teacher and corpses are you. As soon as you have fed your fill to-day, you sit lamenting about the morrow, wherewithal you shall be fed. Slave, if you get it, you will have it; if you do not get it, you will depart; the door stands open. Why grieve? Where is there yet room for tears? What occasion longer for flattery? Why shall one man envy another? Why shall he admire those who have great possessions, or those who are stationed in places of power, especially if they be both strong and prone to anger? For what will they do to us? As for what they have power to do, we shall pay no heed thereto; as for the things we care about, over them they have no power. Who, then, will ever again be ruler over the man who is thus disposed?

How did Socrates feel with regard to these matters? Why, how else than as that man ought to feel who has been convinced that he is akin to the gods? "If you tell me now," says he, "We will acquit you on these conditions, namely, that you will no longer engage in these discussions which you have conducted hitherto, nor trouble either the young or the old among us,' I will answer, 'You make yourselves ridiculous by thinking that, if your general had stationed me at any post, I ought to hold and maintain it and choose rather to die ten thousand times than to desert it, but if God has stationed us in some place and in some manner of life we ought to desert that." This is what it means for a man to be in very truth a kinsman of the gods. We, however, think of ourselves as though we were mere bellies, entrails, and genitals, just because we have fear, because we have appetite, and we flatter those who have power to help us in these matters, and these same men we fear

A certain man asked me to write to Rome in his behalf. Now he had met with what most men account misfortune: though he had formerly been eminent and wealthy, he had afterwards lost everything and was living here. And I wrote in humble terms in his behalf. But when he had read the letter he handed it back to me, and said, "I wanted your help, not your pity; my plight is not an evil one." So likewise Rufus was wont to say, to test me, "Your master is going to do such-and-such a thing to you." And when I would say in answer. "'Tis but the lot of man," he would reply. "What then? Am I to go on and petition him, when I can get the same result from you?" For, in fact, it is foolish and superfluous to try to obtain from another that which one can get from oneself. Since, therefore, I am able to get greatness of soul and nobility of character from myself, am I to get a farm, and money, or some office, from you? Far from it! I will not be so unaware of what I myself possess. But when a man is cowardly and abject, what else can one possibly do but write letters in his behalf as we do in behalf of a corpse: "Please to grant us the carcase of so-andso and a pint of paltry blood?" For really, such a person is but a carcase and a pint of paltry blood, and nothing more. But if he were anything more he would perceive that one man is not unfortunate because of another

EPICTETUS CHAPTER 10 - To Those Who Have Set Their Hearts On Preferment At Rome

If we philosophers had applied ourselves to our own work as zealously as the old men at Rome have applied themselves to the matters on which they have set their hearts, perhaps we too should be accomplishing something. I know a man older than myself who is now in charge of the grain supply at Rome. When he passed this place on his way back from exile, I recall what a tale he told as he inveighed against his former life and announced for the future that, when he had returned to Rome he would devote himself solely to spending the remainder of his life in peace and quiet, "For how little is yet left to me!" And I told him, "You will not do it, but when once you have caught no more than a whiff of Rome you will forget all this." And if also admission to court should be granted, I added that he would rejoice, thank God and push his way in.-"If you find me, Epictetus," said he, "putting so much as one foot inside the court, think of me what you will." Well, now, what did he do? Before he reached Rome, letters from Caesar met him; and as soon as he received them, he forgot all those resolutions of his, and ever since he has been piling up one property after another. I wish I could stand by his side now

and remind him of the words that he uttered as he passed by here, and remark, "How much more clever a prophet I am than you!"

What then? Do I say that man is an animal made for inactivity? Far be it from me! But how can you say that we philosophers are not active in affairs? For example, to take myself first: as soon as day breaks I call to mind briefly what author I must read over. Then forthwith I say to myself: "And vet what difference does it really make to me how so-and-so reads? The first thing is that I get my sleep." Even so, in what are the occupations of those other men comparable to ours? If you observe what they do, you will see. For what else do they do but all day long cast up accounts, dispute, consult about a bit of grain, a bit of land, or similar matters of profit? Is it. then, much the same thing to receive a little petition from someone and read: "I beseech you to allow me to export a small quantity of grain," and this one: "I beseech you to learn from Chrysippus what is the administration of the universe, and what place therein the rational animal has; and consider also who you are, and what is the nature of your good and evil"? Is this like that? And does it demand the like kind of study? And is it in the same way shameful to neglect the one and the other? What then? Is it we philosophers alone who take things easily and drowse? No, it is you young men far sooner. For, look you, we old men, when we see young men playing, are eager to join in the play ourselves. And much more, if I saw them wide-awake and eager to share in our studies, should I be eager to join, myself, in their serious pursuits.

EPICTETUS CHAPTER 11 - Of Family Affection

When an official came to see him, Epictetus, after making some special enquiries about other matters, asked him if he had children and a wife, and when the other replied that he had. Epictetus asked the further question. What, then, is your experience with marriage?-Wretched, he said.-To which Epictetus, How so? For men do not marry and beget children just for this surely, to be wretched, but rather to be happy. And yet, as for me, the other replied, I feel so wretched about the little children, that recently when my little daughter was sick and was thought to be in danger, I could not bear even to stay by her sick bed, but I up and ran away, until someone brought me word that she was well again .-- What then, do you feel that you were acting right in doing this?-I was acting naturally, he said .- But really, you must first convince me of this, that you were acting naturally, said he, and then I will convince you that whatever is done in accordance with nature is rightly done.—This is the way, said the man, all, or at least most, of us fathers feel.-And I do not contradict you either, answered Epictetus, and say that it is not done, but the point at issue between us is the other, whether it is rightly done. For by your style of reasoning we should have to say of tumours also that they are produced for the good of the body, just because they occur, and in brief, that to err is in accordance with nature, just because practically all of us, or at least most of us, do err. Do you show me, therefore, how your conduct is in accordance with nature.-I cannot, said the man; but do you rather show me how it is not in accordance with nature, and not rightly done. And Epictetus said: Well, if we were enquiring about white and black objects, what sort of criterion should we summon in order to distinguish between them?-The sight, said the man.-And if about hot and cold, and hard and soft objects, what criterion?--The touch.-Very well, then, since we are disputing about things which are in accordance with nature and things which are rightly or not rightly done, what criterion would you have us take?-I do not know, he said.-And yet, though it is, perhaps, no great harm for one not to know the criterion of colours and odours, and so, too, of flavours, still do you think that it is a slight harm for a man to be ignorant of the criterion of good and evil things, and of those in accordance with nature and those contrary to nature?-On the contrary, it is the very greatest harm. Come, tell me, are all the things that certain persons regard as good and fitting, rightly so regarded? And is it possible at this present time that all the opinions which Jews, and Syrians, and Egyptians and Romans hold on the subject of food are rightly held?-And how can it be possible?-But, I fancy, it is absolutely necessary, if the views of the Egyptians are right, that those of the others are not right; if those of the Jews are well founded, that those of the others are not .- Yes, certainly .- Now where there is ignorance, there is also lack of knowledge and the lack of instruction in matters which are indispensable.--He agreed .- You, then, said he, now that you perceive this, will henceforth study no other have learned the criterion of what is in accordance with nature, you shall apply that criterion and thus determine each special case.

But for the present I can give you the following assistance toward the attainment of what you desire. Does family affection seem to you to be in accordance with nature and good?—Of course.—What then? Is it possible that, while family affection is in accordance with nature and good, that which is reasonable is not good?—By no means.—That which is reasonable is not, therefore, incompatible with things are incompatible and one of them is in accordance with nature, the other must be contrary to nature, must it not? Even so, said he .- Whatever, therefore, we find to be at the same time both affectionate and reasonable, this we confidently assert to be both right and good?-Granted, said he.-What then? I suppose you will not deny that going away and leaving one's child when it is sick is at least not reasonable. But we have vet to consider whether it is affectionate.-Yes. let us consider that .-- Were you, then, since you were affectionately disposed to your child, doing right when you ran away and left her? And has the mother no affection for her child?-On the contrary, she has affection.-Ought then the mother also to have left her child, or ought she not?-She ought not .- What of the nurse? Does she love her child?-She does, he said .- Ought, then, she also to have left her?-By no means.-What about the school attendant? Does not he love the child?-He does.-Ought, then, he as well to have gone away and left her, so that the child would thus have been left alone and helpless because of the great affection of you her parents and of those in charge of her, or, perhaps, have died in the arms of those who neither loved her nor cared for her?-Far from it!-And yet is it not unfair and unfeeling, when a man thinks certain conduct fitting for himself because of his affection, that he should not allow the same to others who have as much affection as he has?-That were absurd.-Come, if it had been you who were sick, would you have wanted all your relatives, your children and your wife included, to show their affection in such a way that you would be left all alone and deserted by them?-By no means.-And would you pray to be so loved by your own that, because of their excessive affection, you would always be left alone in sickness? Or would you, so far as this is concerned, have prayed to be loved by your enemies rather, if that were possible, so as to be left alone by them? And if this is what you would have praved for, the only conclusion left us is that your conduct was, in the end, not an act of affection at all.

family affection?-It is not. I think.-Otherwise, when two

What, then; was the motive nothing at all which actuated you and induced you to leave your child? And how can that be? But it was a motive like that which impelled a certain man in Rome to cover his head when the horse which he backed was running,---and then, when it won unexpectedly, they had to apply sponges to him to revive him from his faint! What motive, then, is this? The scientific explanation, perhaps, is not in place now; but it is enough for us to be convinced that, if what the philosophers say is sound, we ought not to look for the motive anywhere outside of ourselves, but that in all cases it is one and the same thing that is the cause of our doing a thing or of our not doing it, of our saving things, or of our not saying them, of our being elated, or of our being cast down, of our avoiding things, or of our pursuing them-the very thing, indeed, which has even now become a cause of my action and of yours; yours in coming to me and sitting here now listening, mine in saying these things. And what is that? Is it, indeed, anything else than that we wanted to do this?-Nothing .- And supposing that we had wanted to do something else, what else would we be doing than that which we wanted to do? Surely, then, in the case of Achilles also, it was this that was the cause of his grief-not the death of Patroclus (for other men do not act this way when their comrades die), but that he wanted to grieve. And in your case the other day, the cause of your running away was just that you wanted to do so; and another time, if you stay with her, it will be because you wanted to stay. And now you are going back to Rome, because you want to do so, and if you change your mind and want something else, you will not go. And, in brief, it is neither death, nor exile, nor toil, nor any such thing that is the cause of our doing, or of our not doing, anything, but only our opinions and the decisions of our will.

Do I convince you of this, or not?-You convince me, said he.-Of such sort, then, as are the causes in each case, such likewise are the effects. Very well, then, whenever we do anything wrongly, from this day forth we shall ascribe to this action no other cause than the decision of our will which led us to do it, and we shall endeavour to destroy and excise that cause more earnestly than we try to destroy and excise from the body its tumours and abscesses. And in the same way we shall declare the same thing to be the cause of our good actions. And we shall no longer blame either slave, or neighbour, or wife, or children, as being the causes of any evils to us, since we are persuaded that, unless we decide that things are thus-and-so, we do not perform the corresponding actions; and of our decision, for or against something, we ourselves, and not things outside of ourselves, are the -Even so, he said .- From this very day, therefore, masters.the thing whose nature or condition we shall investigate and examine will be neither our farm, nor our slaves, nor our horses, nor our dogs, but only the decisions of our will.-I hope so, he said .- You see, then, that it is necessary for you to become a frequenter of the schools,-that animal at which all men laugh,-if you really desire to make an examination of the decisions of your own will. And that this is not the work of a single hour or day you know as well as I do.

EPICTETUS CHAPTER 12 - Of Contentment

Concerning gods there are some who say that the divine does not so much as exist; and others, that it exists, indeed, but is inactive and indifferent, and takes forethought for nothing; and a third set, that it exists and takes forethought, though only for great and heavenly things and in no case for terrestrial things; and a fourth set, that it also takes forethought for things terrestrial and the affairs of men, but only in a general way, and not for the individual in particular; and a fifth set, to which Odysseus and Socrates belonged, who say Nor when I move am I concealed from thee.

We must, therefore, first of all enquire about each of these statements, to see whether it is sound or not sound. For if gods do not exist, how can it be an end to follow the gods? And if they exist, indeed, but care for nothing, how even thus will that conclusion be sound? But if, indeed, they both exist and exercise care, yet there is no communication from them to men,-yes, and, by Zeus, to me personally,-how even in this case can our conclusion still be sound? The good and excellent man must, therefore, inquire into all these things, before he subordinates his own will to him who administers the universe precisely as good citizens submit to the law of the state. And he that is being instructed ought to come to his instruction with this aim, "How may I follow the gods in everything, and how may I be acceptable to the divine administration, and how may I become free?" Since he is free for whom all things happen according to his moral purpose, and whom none can restrain. What then? Is freedom insanity? Far from it: for madness and freedom are not consistent with one another. 'But I would have that which seems best to me happen in every case, no matter how it comes to seem so." You are mad; you are beside yourself. Do you not know that freedom is a noble and precious thing? But for me to desire at haphazard that those things should happen which have at haphazard seemed best to me, is dangerously near being, not merely not noble, but even in the highest degree shameful. For how do we act in writing? Do I desire to write the name "Dio" as I choose? No, but I am taught to desire to write it as it ought to be written. What do we do in music? The same. And what in general, where there is any art or science? The same; otherwise knowledge of anything would be useless, if it were accommodated to every individual's whims. Is it, then, only in this matter of freedom, the greatest and indeed the highest of all, that I am permitted to desire at haphazard? By no means, but instruction consists precisely in learning to desire each thing exactly as it happens. And how do they happen? As he that ordains them has ordained. And he has ordained that there be summer and winter and abundance and dearth and virtue and vice, and all such opposites, for the harmony of the whole, and he has given each of us a body, and members of the body, and property and companions.

Mindful, therefore, of this ordaining we should go to receive instruction, not in order to change the constitution of things.—for this is neither vouchsafed us nor is it better that it should be ----but in order that, things about us being as they are and as their nature is, we may, for our own part, keep our wills in harmony with what happens. For, look you, can we escape from men? And how is it possible? But can we, if they associate with us, change them? And who vouchsafes us that power? What alternative remains, then, or what method can we find for living with them? Some such method as that, while they will act as seems best to them, we shall none the less be in a state comformable to nature. But you are impatient and peevish, and if you are alone, you call it a solitude, but if you are in the company of men, you call them schemers and brigands, and you find fault even with your own parents and children and brothers and neighbours. But you ought, when staying alone, to call that peace and freedom, and to look upon yourself as like the gods; and when you are in the company of many, you ought not call that a mob, nor a tumult, nor a disgusting thing, but a feast and a festival, and so accept all things contentedly.

What, then, is the punishment of those who do not accept? To be just as they are. Is one peevish because he is alone? Let him be in solitude! Is he peevish with his parents? Let him be an evil son and grieve! Is he peevish with his children? Let him be a bad father! "Throw him into prison." What sort of prison? Where he now is. For he is there against his will, and where a man is against his will, that for him is a prison. Just as Socrates was not in prison, for he was there willingly. "Alas, that I should be lame in my leg!" Slave, do you, then, because of one paltry leg blame the universe? Will you not make a free gift of it to the whole? Will you not relinquish it? Will you not gladly yield it to the giver? And will you be angry and peevish at the ordinances of Zeus, which he defined and ordained together with the Fates who spun in his presence the thread of your begetting? Do you not know how small a part you are compared with the whole? That is, as to the body; for as to the reason you are not inferior to the gods, nor less than they; for the greatness of the reason is not determined by length nor by height, but by the decisions of its will.

Will you not, therefore, set what is for you the good in that wherein you are equal to the gods? "Wretched man that I am; such a father and such a mother as I have!" Well, was it

permitted you to step forward and make selection, saying, 'Let such-and-such man have intercourse with such-and-such woman at this hour, that I may be born"? It was not permitted you; but your parents had to exist first, then you had to be born as you were born. Of what kind of parents? Of such as they were. What then? Since they are such, is no remedy given you? Again, supposing that you were ignorant of the purpose for which you possess the faculty of vision, you would be unfortunate and wretched if you closed your eves when men brought some colour before them; but in that you have greatness of mind and nobility for use for everyone of the things may happen to you, and know it not, are you not yet more unfortunate and wretched? Things proportionate to the faculty which you possess are brought before you, but you turn that faculty away at the very moment when you ought to keep it wide open and discerning. Do you not rather render thanks to the gods that they have allowed you to be superior to all the things that they did not put under your control, and have rendered you accountable only for what is under your control? As for parents, the gods have released you from accountability: as for brothers, they have released you: as for body, they have released you; and for property, death, life. Well, for what have they made you accountable? For the only thing that is under your control-the proper use of impressions. Why, then, do you draw upon yourself that for which you are not responsible? This is to make trouble for vourself

EPICTETUS CHAPTER 13 - How May Each Several Thing Be Done Acceptably To The Gods?

Now when someone asked him how it is possible to eat acceptably to the gods, he said, If it is done justly and graciously and fairly and restrainedly and decently, is it not also done acceptably to the gods? And when you have asked for warm water and the slave does not heed you: or if he does heed you but brings in tepid water; or if he is not even to be found in the house, then to refrain from anger and not to explode, is not this acceptable to the gods?-How, then, can a man bear with such persons?-Slave, will you not bear with your own brother, who has Zeus as his progenitor and is, as it were, a son born of the same seed as yourself and of the same sowing from above; but if you have been stationed in a like position above others, will you forthwith set yourself up as a tyrant? Do you not remember what you are, and over whom you rule-that they are kinsmen, that they are brothers by nature, that they are the offspring of Zeus?-But I have a deed of sale for them, and they have none for me.-Do you see whither you bend your gaze, that it is to the earth, that it is to the pit, that it is to these wretched laws of ours, the laws of the dead, and that it is not to the laws of the gods that you look?

EPICTETUS CHAPTER 14 - That The Deity Oversees All Men

Now when someone asked him how a man could be convinced that each thing which he does is under the eye of God, Do you not think, he answered, that all things are united in one?-I do, said the other.-Very well, do you not think that what is on earth feels the influence of that which is in heaven?-I do, he replied.-For how else comes it that so regularly, as if from God's command, when He bids the plants flower, they flower, when He bids them put forth shoots, they put them forth, when He bids them bear their fruit, they bear it, when to ripen, they ripen; when again He bids them drop their fruit and let fall their leaves and gather themselves together and remain quiet and take their rest, they remain quiet and take their rest? And how else comes it that at the waxing and waning of the moon and at the approach and recession of the sun we see among the things that are on earth so great an alteration and change to the opposite? But are the plants and our own bodies so closely bound up with the universe, and do they so intimately share its affections, and is not the same much more true of our own souls? But if our souls are so bound up with God and joined together with Him, as being parts and portions of His being, does not God perceive their every motion as being a motion of that which is His own and of one body with Himself? And yet you have power to think about the divine dispensation and about each several item among things divine, and at the same time also about human affairs, and you have the faculty of being moved by myriads of matters at the same time both in your senses and in your intelligence, and at the same time you assent to some. while you dissent from others, or suspend judgement about them; and you guard in your own soul so many impressions derived from so many and various matters, and, on being moved by these impressions, your mind falls upon notions corresponding to the impressions first made, and so from myriads of matters you derive and retain arts, one after the other, and memories. All this you do, and is God not able to oversee all things and to be present with all and to have a certain communication from them all? Yet the sun is capable of illuminating so large a portion of the universe, and of leaving unilluminated only the small space which is no larger than can be covered by the shadow that the earth casts; and is

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3034

He who has created the sun, which is but a small portion of Himself in comparison with the whole, and causes it to revolve, is He not able to perceive all things?

And yet, says one, I cannot follow all these things at one and the same time.-But does anyone go so far as to tell you this, namely, that you possess a faculty which is equal to that of Zeus? Yet none the less He has stationed by each man's side as guardian his particular genius,-and has committed the man to his care,—and that too a guardian who never sleeps and is not to be beguiled. For to what other guardian, better and more careful, could He have committed each one of us? Wherefore, when you close your doors and make darkness within, remember never to say that you are alone, for you are not alone; nay, God is within, and your own genius is within. And what need have they of light in order to see what you are doing? Yes, and to this God you also ought to swear allegiance, as the soldiers do to Caesar. They are but hirelings, yet they swear that they will put the safety of Caesar above everything; and shall you, indeed, who have been counted worthy of blessings so numerous and so great be unwilling to swear, or, when you have sworn, to abide by your oath? And what shall you swear? Never to disobey under any circumstances, never to prefer charges, never to find fault with anything that God has given, never to let your will rebel when you have either to do or to suffer something that is inevitable. Can the oath of the soldiers in any way be compared with this of ours? Out there men swear never to prefer another in honour above Caesar; but here we swear to prefer ourselves in honour above everything else.

EPICTETUS CHAPTER 15 - What Does Philosophy Profess?

When someone consulted Epictetus as to how he could persuade his brother to cease being angry with him, he replied, Philosophy does not profess to secure for man any external possession. Otherwise it would be undertaking something that lies outside its proper subject-matter. For as wood is the material of the carpenter, bronze that of the statuary, just so each man's own life is the subject-matter of the art of living .--- Well, what about my brother's life?--- That again is the subject-matter of his own art of living, but with respect to your art of living it comes under the category of externals. like a farm, like health, like good repute. Philosophy promises none of these things, but rather, "In every circumstance I will keep the governing principle in a state of accord with nature."-Whose governing principle?-"His in whom I am."-How, then, shall I keep my brother from being angry at me?-Bring him to me and I will tell him, but I have nothing to say to you on the subject of his anger.

And when the man who was consulting him said. What I seek to know is this, how, even if my brother refuses to be reconciled with me, I may yet be in accord with nature, Epictetus replied: Nothing great comes into being all at once; why, not even does the bunch of grapes, or a fig. If you say to me now, "I want a fig," I shall answer, "That requires time." Let the tree blossom first, then put forth its fruit, and finally let the fruit ripen. Now although the fruit of even a fig-tree is not brought to perfection all at once and in a single hour, would you still seek to secure the fruit of a man's mind in so short a while and so easily? Do not expect it, not even if I should tell you so myself.

EPICTETUS CHAPTER 16 - Of Providence

Marvel not that the animals other than man have furnished them, ready prepared by nature, what pertains to their bodily needs-not merely food and drink, but also a bed to lie on,and that they have no need of shoes, or bedding, or clothing, while we are in need of all these things. For in the case of animals, born not for their own sake, but for service, to have created them in need of other things was not beneficial. Why, consider what it would be for us to have to take thought not for merely ourselves, but also for our sheep and our asses, how they are to be clothed and shod, how they are to find food and drink. But just as soldiers appear before their general, all ready for service, shod, clothed and armed, and it would be shocking if the colonel had to go around and equip his regiment with shoes or uniforms; so also nature has made animals, which are born for service, ready for use, equipped, and in need of no further attention. Consequently one small child with a rod can drive a flock of sheep.

But as it is, we first forbear to give thanks for these beasts, because we do not have to bestow upon them the same care as we require for ourselves, and then proceed to complain against God on our own account! Yet, by Zeus and the gods, one single gift of nature would suffice to make a man who is reverent and grateful perceive the providence of God. Do not talk to me now of great matters: take the mere fact that milk is produced from grass, and cheese from milk, and that wool grows from skin—who is it that has created or devised these things? "No one," somebody says. Oh, the depth of man's stupidity and shamelessness!

Come, let us leave the chief works of nature, and consider merely what she does in passing. Can anything be more useless than the hairs on a chin? Well, what then? Has not nature

used even these in the most suitable way possible? Has she not by these means distinguished between the male and the female? Does not the nature of each one among us cry aloud forthwith from afar, "I am a man; on this understanding approach me, on this understanding talk with me; ask for nothing further; behold the signs"? Again, in the case of women, just as nature has mingled in their voice a certain softer note, so likewise she has taken the hair from their chins. Not so, you say; on the contrary the human animal ought to have been left without distinguishing features, and each of us ought to proclaim by word of mouth, "I am a man." Nay, but how fair and becoming and dignified the sign is! How much more fair than the cock's comb, how much more magnificent than the lion's mane! Wherefore, we ought to preserve the signs which God has given: we ought not to throw them away: we ought not. so far as in us lies, to confuse the sexes which have been distinguished in this fashion.

Are these the only works of Providence in us? Nay, what language is adequate to praise them all or bring them home to our minds as they deserve? Why, if we had sense, ought we to be doing anything else, publicly and privately, than hymning and praising the Deity, and rehearsing His benefits? Ought we not, as we dig and plough and eat, to sing the hymn of praise to God? "Great is God, that He hath furnished us these instruments wherewith we shall till the earth. Great is God, that He hath given us hands, and power to swallow, and a belly, and power to grow unconsciously, and to breathe while asleep." This is what we ought to sing on every occasion, and above all to sing the greatest and divinest hymn, that God has given us the faculty to comprehend these things and to follow the path of reason. What then? Since most of you have become blind, ought there not to be someone to fulfil this office for you, and in behalf of all sing the hymn of praise to God? Why, what else can I, a lame old man, do but sing hymns to God? If, indeed, I were a nightingale, I should be singing as a nightingale; if a swan, as a swan. But as it is, I am a rational being, therefore I must be singing hymns of praise to God. This is my task; I do it, and will not desert this post, as long as it may be given me to fill it; and I exhort you to join me in this same song

EPICTETUS CHAPTER 17 - That The Art Of Reasoning Is Indispensable

Since it is reason that analyzes and perfects all else, and reason itself ought not to remain unanalyzed, wherewithal shall it be analysed? Why, clearly, either by itself, or by something else. This latter is assuredly either reason, or it will prove to be something else superior to reason, which is impossible. If it be reason, who again will analyze that reason? For if it analyses its own self, the reason with which we started can do as much. If we are going to require something else at each step, our process will be endless and unceasing.

'Yes," says someone, "but the cure (of the decisions of our will) is a much more pressing need (than the study of logic)," and the like. Do you then wish to hear about this other matter? Very well, listen. But if you say to me, "I do not know whether your argument is true or false," and, if I use some ambiguous term, and you should then say, "Distinguish," I shall bear with you no longer, but shall tell you, "Nay, but there is a much more pressing need." This is the reason, I suppose, why the Stoic philosophers put Logic first, just as in the measuring of grain we put first the examination of the measure. And if we do not define first what a modius is, and do not define first what a scale is, how shall we be able to proceed with measuring or weighing anything? So, in the field of our present enquiry, if we have neglected the thorough knowledge and intellectual mastery of our standard of judgement for all other things, whereby they come to be known thoroughly, shall we ever be able to attain intellectual mastery and thorough knowledge of the rest of the world? And how could we possibly? "Yes," we are told, "but the modius is made out of wood and bears no fruit." True, but it is something with which we can measure grain. "Logic also bears no fruit." Now as for this statement we shall see later; but if one should grant even this, it is enough to say in defence of Logic that it has the power to discriminate and examine everything else, and. as one might say, to measure and weigh them. Who says this? Only Chrysippus and Zeno and Cleanthes? Well, does not Antisthenes say it? And who is it that wrote, "The beginning of education is the examination of terms"? Does not Socrates, too, say the same thing? And of whom does Xenophon write, that he began with the examination of terms, asking about each, "What does it mean?

Is this, then, your great and admirable achievement—the ability to understand and to interpret Chrysippus? And who says that? What, then, is your admirable achievement? To understand the will of nature. Very well; do you understand it all by yoursell? And if that is the case, what more do you need? For if it is true that "all men err involuntarily," and you have learned the truth, it must needs be that you are doing right already. But, so help me Zeus, I do not comprehend the will of nature. Who, then, interprets it? Men say, Chrysippus. I go and try to find out what this interpreter of nature says. I begin not to understand what he says, and look for the man who can interpret him. "Look and consider what this passage means," says the interpreter, "just as if it were in Latin! What place is there here, then, for pride on the part of the interpreter? Why, there is no just place for pride even on the part of Chrysippus, if he merely interprets the will of nature, but himself does not follow it; how much less place for pride, then, in the case of his interpreter! For we have no need of Chrysippus on his own account, but only to enable us to follow nature. No more have we need of him who divines through sacrifice, considered on his own account, but simply because we think that through his instrumentality we shall understand the future and the signs given by the gods; nor do we need the entrails on their own account, but only because through them the signs are given: nor do we admire the crow or the raven, but God, who gives His signs through them.

Wherefore, I go to this interpreter and diviner and say, "Examine for me the entrails, and tell me what signs they give." The fellow takes and spreads them out and then interprets: "Man, you have a moral purpose free by nature from hindrances and constraint. This stands written here in these entrails. I will prove you that first in the sphere of assent. Can anyone prevent you from assenting to truth? No one at all. Can anyone force you to accept the false? No one at all. Do you see that in this sphere you have a moral purpose free from hindrance, constraint, obstruction? Come, in the sphere of desire and choice is it otherwise? And what can overcome one impulse but another impulse? And what can overcome one desire or aversion but another desire or aversion?" "But." says someone, "if a person subjects me to the fear of death, he compels me." "No, it is not what you are subjected to that impels you, but the fact that you decide it is better for you to do something of the sort than to die. Once more, then, it is the decision of your own will which compelled you, that is, moral purpose compelled moral purpose. For if God had so constructed that part of His own being which He has taken from Himself and bestowed upon us, that it could be subjected to hindrance or constraint either from Himself or from some other. He were no longer God, nor would He be caring for us as He ought. This is what I find," says the diviner, "in the sacrifice. These are the signs vouchsafed you. If you will, you are free; if you will, you will not have to blame anyone, or complain against anyone; everything will be in accordance with what is not merely your own will, but at the same time the will of God." This is the prophecy for the sake of which I go to this diviner-in other words, the philosopher,-not admiring him because of his interpretation, but rather the interpretation which he gives.

EPICTETUS CHAPTER 18 - That We Ought Not To Be Angry With The Erring

If what the philosophers say is true, that in all men thought and action start from a single source, namely feeling-as in the case of assent the feeling that a thing is so, and in the case of dissent the feeling that it is not so, yes, and, by Zeus, in the case of suspended judgement the feeling that it is uncertain, so also in the case of impulse towards a thing, the feeling that it is expedient for me and that it is impossible to judge one thing expedient and yet desire another, and again, to judge one thing fitting, and yet be impelled to another-if all this be They are thieves," says someone, "and robbers."-What do you mean by "thieves and robbers?" They have simply gone astray in questions of good and evil. Ought we, therefore, to be angry with them, or rather pity them? Only show them their error and you will see how quickly they will desist from their mistakes. But if their eves are not opened, they have nothing superior to their mere opinion.

Ought not this brigand, then, and this adulterer to be put to death? you ask. Not at all, but you should ask rather, "Ought not this man to be put to death who is in a state of error and delusion about the greatest matters, and is in a state of blindness, not, indeed, in the vision which distinguishes between white and black, but in the judgement which distinguishes between the good and the evil?" And if you put it this way, you will realise how inhuman a sentiment it is that you are uttering, and that it is just as if you should say, "Ought not this blind man, then, or this deaf man to be put to death?" For if the loss of the greatest things is the greatest harm that can befall a man, while the greatest thing in each man is a right moral purpose, and if a man is deprived of this very thing, what ground is left for you to be angry at him? Why, man, if you must needs be affected in a way that is contrary to nature at the misfortunes of another, pity him rather, but do not hate him: drop this readiness to take offence and this spirit of hatred; do not introduce those words which the multitude of the censorious use: "Well, then, these accursed and abominable fools!" Very well; but how is it that you have so suddenly been converted to wisdom that you are angry at fools? Why, then, are we angry? Because we admire the goods of which these men rob us. For, mark you, stop admiring your clothes, and you are not angry at the man who steals them; stop admiring your wife's beauty, and you are not angry at her adulterer. Know that a thief or an adulterer has

no place among the things that are your own, but only among the things that are another's and that are not under your control. If you give these things up and count them as nothing, at whom have you still ground to feel angry? But so long as you admire these things, be angry at yourself and not at the men that I have just mentioned. For consider; you have fine clothes and your neighbour does not; you have a window and wish to air them. He does not know wherein the true good of man consists, but fancies that it consists in having fine clothes, the very same fancy that you also entertain. Shall he not come, then, and carry them off? Why, when you show a cake to gluttonous men and then gulp it down all to yourself, are you not wanting them to snatch it? Stop provoking them, stop having a window, stop airing your clothes.

Something similar happened to me also the other day. I keep an iron lamp by the side of my household gods, and, on hearing a noise at the window, I ran down. I found that the lamp had been stolen. I reflected that the man who stole it was moved by no unreasonable motive. What then? To-morrow, I say, you will find one of earthenware. Indeed, a man loses only that which he already has. "I have lost my cloak." Yes, for you had a cloak. "I have a pain in my head." You do not have a pain in your horns, do you? Why, then, are you indignant? For our losses and our pains have to do only with the things which we possess.

"But the tyrant will chain————" What? Your leg. "But he will cut off————" What? Your neck. What, then, will he neither chain nor cut off? Your moral purpose. This is why the ancients gave us the injunction, "Know thyself." What follows, then? Why, by the Gods, that one ought to practise in small things, and beginning with them pass on to the greater. "I have a head-ache." Well, do not say "Alas!" "I have an ear-ache." Do not say "Alas!" And I am not saying that it is not permissible to groan, only do not groan in the centre of your being. And if your slave is slow in bringing your bandage, do not cry out and make a wry face and say, "Everybody hates me." Why, who would not hate such a person? For the future put your confidence in these doctrines and walk about erect, free, not putting your confidence in the size of your body, like an athlete; for you ought not to be invincible in the way an ass is invincible.

Who, then, is the invincible man? He whom nothing that is outside the sphere of his moral purpose can dismay. I then proceed to consider the circumstances one by one, as I would do in the case of the athlete. "This fellow has won the first round. What, then, will he do in the second? What if it be scorching hot? And what will he do at Olympia?" It is the same way with the case under consideration. If you put a bit of silver coin in a man's way, he will despise it. Yes, but if you put a bit of a wench in his way, what then? Or if it be in the dark, what then? Or abuse, what then? Or praise, what then? Or death, what then? All these things he can overcome. What, then, if it be scorching hot—that is, what if ableep? The man who passes all these tests is what I mean by the invincible athlete.

EPICTETUS CHAPTER 19 - How Ought We To Bear Ourselves Toward Tyrants?

If a man possesses some superiority, or thinks at least that he does, even though he does not, it is quite unavoidable that this man, if he is uneducated, becomes puffed up on account of it. For example, the tyrant exclaims, "I am the mightiest in the world." Very well, what can you do for me? Can you secure for me desire that is free from any hindrance? How can you? Do you have it yourself? Can you secure for me aversion proof against encountering what it would avoid? Do you have it yourself? Or infallible choice? And where can you claim a share in that? Come, when you are on board ship, do you feel confidence in yourself, or in the skilled navigator? And when you are in a chariot, in whom do you feel confidence other than the skilled driver. And how is it in the other arts? The same way. What does your power amount to, then? "All men pay attention to me." Yes, and I pay attention to my little plate and wash it and wipe it out, and for the sake of my oilflask I drive a peg in the wall. What follows, then? Are these things superior to me? No, but they render me some service, and therefore I pay attention to them. Again, do I not pay attention to my donkey? Do I not wash his feet? Do I not curry him? Do you not know that every man pays attention to himself, and to you just as he does to his donkey? For who pays attention to you as to a man? Point him out to me. Who wishes to become like you? Who becomes a zealous follower of yours as men did of Socrates? "But I can cut off your head." Well said! I had forgotten that I ought to pay attention to you, as to fever or cholera, and set up an altar to you, just as in Rome there is an altar to the God Fever.

What is it, then, that disturbs and bewilders the multitude? Is it the tyrant and his bodyguards? How is that possible? Nay, far from it! It is not possible that that which is by nature free should be disturbed or thwarted by anything but itself. But it is a man's own judgements that disturb him. For when the tyrant says to a man, "I will chain your leg,," the man who has set a high value on his leg replies, "Nay, have mercy upon me," while the man who has set a high value on his moral purpose replies, "If it seems more profitable to you to do so, chain it." "Do you not care?" "No, I do not care." "I will show you that I am master." "How can you be my master? Zeus has set me free. Or do you really think that he was likely to let his own son be made a slave? You are, however, master of my dead body, take it." "You mean, then, that when you approach me you will not pay attention to me?" "No, I pay attention only to myself. But if you wish me to say that I pay attention to my pot."

This is not mere self-love; such is the nature of the animal man; everything that he does is for himself. Why, even the sun does everything for its own sake, and, for that matter, so does Zeus himself. But when Zeus wishes to be "Rain-bringer." and "Fruit-giver," and "Father of men and of gods," you can see for yourself that he cannot achieve these works, or win these appellations, unless he proves himself useful to the common interest; and in general he has so constituted the nature of the rational animal man, that he can attain nothing of his own proper goods unless he contributes something to the common interest. Hence it follows that it can no longer be regarded as unsocial for a man to do everything for his own sake. For what do you expect? That a man should neglect himself and his own interest? And in that case how can there be room for one and the same principle of action for all, namely, that of appropriation to their own needs?

What then? When men entertain absurd opinions about what lies outside the province of the moral purpose, counting it good or bad, it is altogether unavoidable for them to pay attention to the tyrant. Aye, would that it were merely the tyrants and not their chamberlains too! And yet how can the man suddenly become wise when Caesar puts him in charge of his chamberpot? How can we forthwith say "Felicio has spoken wisely to me"? I would that he were deposed from the superintendency of the dunghill, that you may think him a fool again! Epaphroditus owned a certain cobbler whom he sold because he was useless; then by some chance the fellow was bought by a member of Caesar's household and became cobbler to Caesar. You should have seen how Epaphroditus honoured him! "How is my good Felicio, I pray you?" he used to say. And then if someone asked us, "What is your master doing?" he was told, "He is consulting Felicio about something or other." Why, had he not sold him as being useless? Who, then, had suddenly made a wise man out of him? This is what it means to honour something else than what lies within the province of the moral purpose.

"He has been honoured with a tribuneship," someone says. All who meet him offer their congratulations; one man kisses him on the eyes, another on the neck, his slaves kiss his hands. He goes home; he finds lamps being lighted. He climbs up the Capitol and offers sacrifice. Now who ever sacrificed as a thank-offering for having had right desire, or for having exercised choice in accordance with nature? For we give thanks to the gods for that wherein we set the good.

To-day a man was talking to me about a priesthood of Augustus. I say to him, "Man, drop the matter; you will be spending a great deal to no purpose." "But," says he, "those who draw up deeds of sale will inscribe my name." "Do you really expect, then, to be present when the deeds are read and say, 'That is my name they have written'? And even supposing you are now able to be present whenever anyone reads them, what will you do if you die?" "My name will remain after me." "Inscribe it on a stone and it will remain after you. Come now, who will remember you outside of Nicopolis?" "But I shall wear a crown of gold." "If you desire a crown at all, take a crown of roses and put it on; you will look much more elegant in that."

EPICTETUS CHAPTER 20 - How The Reasoning Faculty Contemplates Itself

Every art and faculty makes certain things the special object of its contemplation. Now when the art or faculty itself is of like kind with what it contemplates, it becomes inevitably self-contemplative; but when it is of unlike kind, it cannot contemplate itself. For example, the art of leather-working has to do with hides, but the art itself is altogether different from the material of hides, wherefore it is not selfcontemplative. Again, the art of grammar has to do with written speech; it is not, therefore, also itself written speech, is it? Not at all. For this reason it cannot contemplate itself. Well then, for what purpose have we received reason from nature? For the proper use of external impressions. What, then, is reason itself? Something composed out of a certain kind of external impressions. Thus it comes naturally to be also self-contemplative. Once more, what are the things that wisdom has been given us to contemplate? Things good, bad, and neither good nor bad. What, then, is wisdom itself? A good. And what is folly? An evil. Do you see, then, that wisdom inevitably comes to contemplate both itself and its opposite? Therefore, the first and greatest task of the philosopher is to test the impressions and discriminate between them, and to apply none that has not been tested. You all see in the matter of coinage, in which it is felt that we

have some interest, how we have even invented an art, and how many means the tester employs to test the coinage—sight, touch, smell, finally hearing; he throws the denarius down and then listens to the sound, and is not satisfied with the sound it makes on a single test, but, as a result of his constant attention to the matter, he catches the tune, like a musician. Thus, where we feel that it makes a good deal of difference to us whether we go wrong or do not go wrong, there we apply any amount of attention to discriminating between things that are capable of making us go wrong, but in the case of our governing principle, poor thing, we yawn and sleep and erroneously accept any and every external impression; for here the loss that we suffer does not attract our attention.

When, therefore, you wish to realise how careless you are about the good and the evil, and how zealous you are about that which is indifferent, observe how you feel about physical blindness on the one hand, and mental delusion on the other, and you will find out that you are far from feeling as you ought about things good and things evil. "Yes, but this requires much preparation, and much hard work, and learning many things." Well, what then? Do you expect it to be possible to acquire the greatest art with a slight effort? And yet the chief doctrine of the philosophers is extremely brief. If you would know, read what Zeno has to say and you will see. For what is there lengthy in his statement: follow the gods is man's end, and the essence of good is the proper use of external impressions"? Ask, "What, then, is God, and what is an external impression? And what is nature in the individual and nature in the universe?" You already have a lengthy statement. If Epicurus should come and say that the good ought to be in the flesh, again the explanation becomes lengthy, and you must be told what is the principal faculty within us, and what our substantial, and what our essential, nature is. Since it is not probable that the good of a snail lies in its shell, is it, then, probable that the good of man lies in his flesh? But take your own case. Epicurus: what more masterful faculty do you yourself possess? What is that thing within you which takes counsel, which examines into all things severally, which, after examining the flesh itself, decides that it is the principal matter? And why do you light a lamp and toil in our behalf, and write such quantities of books? Is it that we may not fail to know the truth? Who are we? And what are we to you? And so the argument becomes lengthy.

EPICTETUS CHAPTER 21 - To Those Who Would Be Admired

When a man has his proper station in life, he is not all agape for things beyond it. Man, what is it you want to have happen to you? As for myself, I am content if I exercise desire and aversion in accordance with nature, if I employ choice and refusal as my nature is, and similarly employ purpose and design and assent. Why, then, do you walk around in our presence as though you had swallowed a spit? "It has always been my wish that those who meet me should admire me and as they follow me should exclaim, 'O the great philosopher!" Who are those people by whom you wish to be admired? Are they not these about whom you are in the habit of saying that they are mad? What then? Do you wish to be admired by the mad?

EPICTETUS CHAPTER 22 - Of Our Preconceptions

Preconceptions are common to all men, and one preconception does not contradict another. For who among us does not assume that the good is profitable and something to be chosen, and that in every circumstance we ought to seek and pursue it? And who among us does not assume that righteousness is beautiful and becoming? When, then, does contradiction arise? It arises in the application of our preconceptions to the particular cases, when one person says, 'He did nobly, he is brave"; another, "No, but he is out of his mind." Thence arises the conflict of men with one another. This is the conflict between Jews and Syrians and Egyptians and Romans, not over the question whether holiness should be put before everything else and should be pursued in all circumstances, but whether the particular act of eating swine's flesh is holy or unholy. This, you will find, was also the cause of conflict between Agamemnon and Achilles. Come, summon them before us. What do you say, Agamemnon? Ought not that to be done which is proper, and that which is noble? "Indeed it ought." And what do you say, Achilles? Do you not agree that what is noble ought to be done? "As for me, I agree most emphatically with that principle." Very well, then, apply your preconceptions to the particular cases. It is just there the conflict starts. The one says, "I ought not to be compelled to give back Chryseis to her father," while the other says, "Indeed you ought." Most certainly one of the two is making a bad application of the preconception "what one ought to do." Again, the one of them says, "Very well, if I ought to give back Chryseis, then I ought to take from some one of you the prize he has won," and the other replies, "Would you, then, take the woman I love?" "Yes, the woman you love," the first answers. "Shall I, then, be the only one

What, then, does it mean to be getting an education? It means to be learning how to apply the natural preconceptions to particular cases, each to the other in conformity with nature, and, further, to make the distinction, that some things are under our control while others are not under our control. Under our control are moral purpose and all the acts of moral purpose; but not under our control are the body, the parts of the body, possessions, parents, brothers, children, countryin a word, all that with which we associate. Where, then, shall we place "the good"? To what class of things are we going to apply it? To the class of things that are under our control?-What, is not health, then, a good thing, and a sound body, and life? Nay, and not even children, or parents, or country?-And who will tolerate you if you deny that? Therefore, let us transfer the designation "good" to these things. But is it possible, then, for a man to be happy if he sustains injury and fails to get that which is good?-It is not possible.--And to maintain the proper relations with his associates? And how can it be possible? For it is my nature to look out for my own interest. If it is my interest to have a farm, it is my interest to take it away from my neighbour; if it is my interest to have a cloak, it is my interest also to steal it from a bath. This is the source of wars, seditions, tyrannies, plots. And again, how shall I any longer be able to perform my duty towards Zeus? For if I sustain injury and am unfortunate, he pays no heed to me. And then we hear men saying, "What have I to do with him, if he is unable to help us?" And again. "What have I to do with him, if he wills that I be in such a state as I am now?" The next step is that I begin to hate him. Why, then, do we build temples to the gods, and make statues of them, as for evil spirits—for Zeus as for a god of Fever? And how can he any longer be "Saviour," and "Rainbringer," and "Fruit-giver?" And, in truth, if we set the nature of the good somewhere in this sphere, all these things follow.

What, then, shall we do?—This is a subject of enquiry for the man who truly philosophises and is in travail of thought. Says such a man to himself, "I do not now see what is the good and what is the evil; am I not mad?" Yes, but suppose I set the good somewhere here, among the things that the will controls, all men will laugh at me. Some white-haired old man with many a gold ring on his fingers will come along, and then he will shake his head and say, "Listen to me, my son; one ought of course to philosophise, but one ought also to keep one's head; this is all nonsense. You learn a syllogism from the philosophers, but you know better than the philosophers what you ought to do." Man, why, then, do you censure me, if I know? What shall I say to this slave? If I hold my peace, the fellow bursts with indignation. So I must say, "Forgive me as you would lovers; I am not my own master; I am mad."

EPICTETUS CHAPTER 23 - In Answer To Epicurus

Even Epicurus understands that we are by nature social beings, but having once set our good in the husk which we wear, he cannot go on and say anything inconsistent with this. For, he next insists emphatically upon the principle that we ought neither to admire nor to accept anything that is detached from the nature of the good; and he is right in so doing. But how, then, can we still be social beings, if affection for our own children is not a natural sentiment? Why do you dissuade the wise man from bringing up children? Why are you afraid that sorrow will come to him on their account? What, does sorrow come to him on account of his house-slave Mouse? Well, what does it matter to him if his little Mouse in his home begins to cry? Nay he knows, that if once a child is born, it is no longer in our power not to love it or to care for it. For the same reason Epicurus says that a man of sense does not engage in politics either; for he knows what the man who engages in politics has to do-since, of course, if you are going to live among men as though you were a fly among flies, what is to hinder you? Yet, despite the fact that he knows this, he still has the audacity to say, "Let us not bring up children." But a sheep does not abandon its own offspring, nor a wolf; and yet does a man abandon his? What do you wish us to do? Would you have us be foolish as sheep? But even they do not desert their offspring. Would you have us be fierce as wolves? But even they do not desert their offspring. Come now, who follows your advice when he sees his child fallen on the ground and crying? Why, in my opinion, your mother and your father, even if they had divined that you were going to say such things, would not have exposed you!

EPICTETUS CHAPTER 24 - How Should We Struggle Against Difficulties?

It is difficulties that show what men are. Consequently, when a difficulty befalls, remember that God, like a physical trainer, has matched you with a rugged young man. What for? some one says. So that you may become an Olympic victor; but that cannot be done without sweat. To my way of thinking no one has got a finer difficulty than the one which you have got, if only you are willing to make use of it as an athlete makes use of a young man to wrestle with. And now

THE GRAND BIBLE

we are sending you to Rome as a scout, to spy out the land. But no one sends a coward as a scout, that, if he merely hears a noise and sees a shadow anywhere, he may come running back in terror and report "The enemy is already upon us." So now also, if you should come and tell us, "The state of things at Rome is fearful; terrible is death, terrible is exile, terrible is reviling, terrible is poverty; flee, sirs, the enemy is upon us!" we shall say to you, "Away, prophesy to yourself! Our one mistake was that we sent a man like you as a scout.

Diogenes, who before you was sent forth as a scout, has brought us back a different report. He says, "Death is not an evil, since it is not dishonourable"; he says, "Ill repute is a noise made by madmen." And what a report this scout has made us about toil and about pleasure and about poverty! He says. "To be naked is better than any scarlet robe; and to sleep on the bare ground," he says, "is the softest couch." And he offers as a proof of each statement his own courage, his tranquillity, his freedom, and finally his body, radiant with health and hardened. "There is no enemy near," says he; "all is full of peace." How so, Diogenes? "Why, look!" says he, "I have not been struck with any missile, have I, or received any wound? I have not fled from anyone, have I?" This is what it means to be a proper scout, but you return and tell us one thing after another. Will you not go away again and observe more accurately, without this cowardice?

What am I to do, then?-What do you do when you disembark from a ship? You do not pick up the rudder, do you, or the oars? What do you pick up, then? Your own luggage, your oil-flask, your wallet. So now, if you are mindful of what is your own property, you will never lay claim to that which is another's. He says to you, "Lay aside your broad scarlet hem" Behold, the narrow hem. "Lay aside this also." Behold, the plain toga. "Lay aside your toga. Behold, I am naked. "But you arouse my envy." Well, then Well, then, take the whole of my paltry body. Do I any longer fear the man to whom I can throw my body? But he will not leave me as his heir. What then? Did I forget that none of these things is my own? How, then, do we call them "my own"? Merely as we call the bed in the inn "my own." If, then, the inn-keeper dies and leaves you the beds, you will have them; but if he leaves them to someone else, he will have them, and you will look for another bed. If, then, you do not find one, you will have to sleep on the ground; only do so with good courage, snoring and remembering that tragedies find a place among the rich and among kings and tyrants, but no poor man fills a tragic role except as a member of the chorus. Now the kings commence in a state of prosperity: "Hang the palace with garlands";

then, about the third or fourth act, comes-

"Alas, Cithaeron, why didst thou receive me?"

Slave, where are your crowns, where your diadem? Do your guards avail you not at all? When, therefore, you approach one of those great men, remember all this-that you are approaching a tragic character, not the actor, but Oedipus himself. "Nay, but so-and-so is blessed; for he has many companions to walk with." So have I; I fall in line with the multitude and have many companions to walk with. But, to sum it all up: remember that the door has been thrown open. Do not become a greater coward than the children, but just as they say, "I will not play any longer," when the thing does not please them, so do you also, when things seem to you to have reached that stage, merely say, "I will not play any longer, and take your departure; but if you stay, stop lamenting.

EPICTETUS CHAPTER 25 - Upon The Same Theme

If all this is true and we are not silly nor merely playing a part when we say, "Man's good and man's evil lies in moral choice, and all other things are nothing to us," why are we still distressed and afraid? Over the things that we seriously care for no one has authority; and the things over which other men have authority do not concern us. What kind of thing have we left to discuss?-"Nay, give me directions."-What directions shall I give you? Has not Zeus given you directions? Has he not given you that which is your own, unhindered and unrestrained, while that which is not your own is subject to hindrance and restraint? What directions, then, did you bring with you when you came from him into this world, what kind of an order? Guard by every means that which is your own, but do not grasp at that which is another's. Your faithfulness is your own, your self-respect is your own; who, then, can take these things from you? Who but yourself will prevent you from using them? But you, how do you act? When you seek earnestly that which is not your own, you lose that which is your own. Since you have such promptings and directions from Zeus, what kind do you still want from me? Am I greater than he, or more trustworthy? But if you keep these commands of his, do you need any others besides? But has he not given you these directions? Produce your preconceptions, produce the demonstrations of the philosophers, produce what you have often heard, and produce what you have said yourself, produce what you have read, produce what you have practised.

How long, then, is it well to keep these precepts and not to break up the game? As long as it is played pleasantly. At the Saturnalia a king is chosen by lot; for it has been decided to play this game. The king gives his commands: "You drink, you mix wine, you sing, you go, you come." I obey, so as not to be the one to break up the game. "Come, suppose that you are in an evil plight." I do not so suppose; and who is there to compel me so to suppose? Again, we have agreed to play the story of Agamemnon and Achilles. The one who has been appointed to play the part of Agamemnon says to me, "Go to Achilles, and drag away Briseis." I go. He says, "Come," and I come. For as we behave in the matter of hypothetical proposals, so we ought to behave in life also. "Let it be night." So be it. "What then? Is it day?" No, for I have accepted the assumption that it is night. "Let us suppose that you assume it to be night" So be it. "But go on and assume that it is night." That is not consistent with the hypothesis. So also in the present case. "Let us suppose that you are unhappy." So be it, "Are you, then, unfortunate?" Yes. 'What then? Are you troubled with ill-fortune?" Yes. "But go on and assume that you are in a wretched plight." That is not consistent with the hypothesis; moreover, there is Another who forbids me so to think.

How long, then, should we obey such commands? As long as it is beneficial, and that means, as long as I preserve what is becoming and consistent. Further, some men are unduly crabbed and have too sharp tongues and say, "I cannot dine at this fellow's house, where I have to put up with his telling every day how he fought in Moesia: 'I have told you, brother, how I climbed up to the crest of the hill: well now. I begin to be besieged again." But another says, "I would rather dine and hear him babble all he pleases." And it is for you to compare these estimates; only do nothing as one burdened, or afflicted, or thinking that he is in a wretched plight; for no one forces you to this. Has some one made a smoke in the house? If he has made a moderate amount of smoke I shall stay; if too much, I go outside. For one ought to remember and hold fast to this, that the door stands open. But some one says, "Do not dwell in Nicopolis." I agree not to dwell there. "Nor in Athens." I agree not to dwell in Athens, either. "Nor in Rome." I agree not to dwell in Rome, either. "Dwell in Gyara." I agree to dwell there. But to dwell in Gyara seems to me to be like a great quantity of smoke in the house. I leave for a place where no one will prevent me from dwelling; for that dwelling-place stands open to every man. And as for the last inner tunic, that is, my paltry body, beyond that no one has any authority over me. That is why Demetrius said to 'You threaten me with death, but nature threatens Nero, you." If I admire my paltry body, I have given myself away as a slave; if I admire my paltry property, I have given myself away as a slave; for at once I show thereby to my own hurt what I can be caught with. Just as when the snake draws in his head, I say, "Strike that part of him which he is protecting"; so do you be assured that your master will attack you at that point which you particularly wish to protect. If you remember all this, whom will you flatter or fear any more?

But I wish to sit where the senators do -Do you realise that you are making close quarters for yourself, that you are crowding yourself?—How else, then, shall I have a good view in the amphitheatre?-Man, do not become spectator and you will not be crowded. Why do you make trouble for yourself? Or else wait a little while, and when the show is over sit down among the seats of the senators and sun yourself. For in general remember this-that we crowd ourselves, we make close quarters for ourselves, that is to say, the decisions of our will crowd us and make us close quarters. Why, what is this matter of being reviled? Take your stand by a stone and revile it; and what effect will you produce? If, then, a man listens like a stone, what profit is there to the reviler? But if the reviler has the weakness of the reviled as a point of vantage, then he does accomplish something. "Strip him." Why do you say 'him'? Take his cloak and strip that off. "I have outraged you." Much good may it do you! This is what Socrates practised, and that is why he always wore the same expression on his face. But we prefer to practise and rehearse anything rather than how to be untrammelled and free. "The philosophers talk paradoxes," you say. But are there not paradoxes in the other arts? And what is more paradoxical than to lance a man in the eye in order that he may see? If anyone said this to a man who was inexperienced in the art of surgery, would he not laugh at the speaker? What is there to be surprised at, then, if in philosophy also many things which are true appear paradoxical to the inexperienced?

EPICTETUS CHAPTER 26 - What Is The Rule Of Life?

As some one was reading the hypothetical arguments, Epictetus said, This also is a law governing hypotheses-that we must accept what the hypothesis or premiss demands. But much more important is the following law of life-that we must do what nature demands. For if we wish in every matter and circumstance to observe what is in accordance with nature. it is manifest that in everything we should make it our aim neither to avoid that which nature demands, nor to accept that which is in conflict with nature. The philosophers, therefore, exercise us first in the theory where there is less difficulty, and then after that lead us to the more difficult

matters; for in theory there is nothing which holds us back from following what we are taught, but in the affairs of life there are many things which draw us away. He is ridiculous, then, who says that he wishes to begin with the latter; for it is not easy to begin with the more difficult things. And this is the defence that we ought to present to such parents as are angry because their children study philosophy. "Very well then, father, I go astray, not knowing what is incumbent upon me or what my duty is. Now if this is a thing that can neither be taught nor learned, why do you reproach me? But if it can be taught, teach me; and if you cannot do this, allow me to learn from those who profess to know. Really, what is your idea? That I intentionally fall into evil and miss the good? Far from it! What, then, is the cause of my going astray? Ignorance. Very well, do you not want me to put away my ignorance? Whom did anger ever teach the art of steering, or music? Do you think, then, that your anger will make me learn the art of living?

Only he can so speak who has applied himself to philosophy in such a spirit. But if a man reads upon the subject and resorts to the philosophers merely because he wants to make a display at a banquet of his knowledge of hypothetical arguments, what else is he doing but trying to win the admiration of some senator sitting by his side? For there in Rome are found in truth the great resources, while the riches of Nicopolis look to them like mere child's-play. Hence it is difficult there for a man to control his own external impressions, since the distracting influences at Rome are great. I know a certain man who clung in tears to the knees of Epaphroditus and said that he was in misery; for he had nothing left but a million and a half sesterces. What, then, did Epaphroditus do? Did he laugh at him as you are laughing? No: he only said, in a tone of amazement, "Poor man, how, then, did you manage to keep silence? How did you endure it?

Once when he had disconcerted the student who was reading the hypothetical arguments, and the one who had set the other the passage to read laughed at him, Epictetus said to the latter, "You are laughing at yourself. You did not give the young man a preliminary training, nor discover whether he was able to follow these arguments, but you treat him merely as a reader. Why is it, then," he added, "that to a mind unable to follow a judgement upon a complex argument we entrust the assigning of praise or blame, or the passing of a judgement upon what is done well or ill? If such a person speaks ill of another, does the man in question pay any attention to him, or if he praises another, is the latter elated? when the one who is dispensing praise or blame is unable, in matters as trivial as these, to find the logical consequence? This, then, is a starting point in philosophy-a perception of the state of one's own governing principle; for when once a man realises that it is weak, he will no longer wish to employ it upon great matters. But as it is, some who are unable to swallow the morsel buy a whole treatise and set to work to eat that. Consequently they throw up, or have indigestion; after that come colics and fluxes and fevers. But they ought first to have considered whether they have the requisite capacity. However, in a matter of theory it is easy enough to confute the man who does not know, but in the affairs of life a man does not submit himself to confutation, and we hate the person who has confuted us. But Socrates used to tell us not to live a life unsubjected to examination.

EPICTETUS CHAPTER 27 - In How Many Ways Do The External Impressions Arise, And What Aids Should We Have Ready At Hand To Deal With Them?

The external impressions come to us in four ways; for either things are, and seem so to be; or they are not, and do not seem to be, either; or they are, and do not seem to be; or they are not, and yet seem to be. Consequently, in all these cases it is the business of the educated man to hit the mark. But whatever be the thing that distresses us, against that we ought to bring up our reinforcements. If the things that distress us are sophisms of Pyrrho and the Academy, let us bring up our reinforcements against them; if they are the plausibilities of things, whereby we are led to think that certain things are good when they are not, let us seek reinforcements at that point; if the thing that distresses us is a habit, we should try to hunt up the reinforcements with which to oppose that. What reinforcements, then, is it possible to find with which to oppose habit? Why, the contrary habit. You hear the common folk saying, "That poor man! He is dead; his father perished, and his mother; he was cut off, yes, and before his time, and in a foreign land." Listen to the arguments on the other side, tear yourself away from these expressions, set over against one habit the contrary habit. To meet sophistic arguments we must have the processes of logic and the exercise and the familiarity with these; against the plausibilities of things we must have our preconceptions clear, polished like weapons, and ready at hand.

When death appears to be an evil, we must have ready at hand the argument that it is our duty to avoid evils, and that death is an inevitable thing. For what can I do? Where shall I go to escape it? Suppose that I am Sarpedon the son of Zeus,

in order that I may nobly say, as he did: "Seeing that I have left my home for the war. I wish either to win the prize of valour myself, or else to give someone else the chance to win it; if I am unable to succeed in something myself, I shall not begrudge another the achievement of some noble deed." Granted that such an act as Sarpedon's is beyond us, does not the other alternative fall within the compass of our powers? And where can I go to escape death? Show me the country, show me the people to whom I may go, upon whom death does not come; show me a magic charm against it. If I have none, what do you wish me to do? I cannot avoid death. Instead of avoiding the fear of it, shall I die in lamentation and trembling? For the origin of sorrow is this-to wish for something that does not come to pass. Therefore, if I can change externals according to my own wish. I change them: but if I cannot, I am ready to tear out the eyes of the man who stands in my way. For it is man's nature not to endure to be deprived of the good, not to endure to fall into the evil. Then, finally, when I can neither change the circumstances, nor tear out the eyes of the man who stands in my way, I sit down and groan, and revile whom I can-Zeus and the rest of the gods; for if they do not care for me, what are they to me? "Yes," you say, "but that will be impious of you." What, then, shall I get that is worse than what I have now? In short, we must remember this-that unless piety and self-interest be conjoined, piety cannot be maintained in any man. Do not these considerations seem urgent?

Let the follower of Pyrrho or of the Academy come and oppose us. Indeed I, for my part, have no leisure for such matters, nor can I act as advocate to the commonly received opinion. If I had a petty suit about a mere bit of land, I should have called in some one else to be my advocate. With what evidence, then, am I satisfied? With that which belongs to the matter in hand. To the question how perception arises, whether through the whole body, or from some particular part, perhaps I do not know how to give a reasonable answer. and both views perplex me. But that you and I are not the same persons, I know very certainly. Whence do I get this knowledge? When I want to swallow something, I never take the morsel to that place but to this; when I wish to take bread I never take sweepings, but I always go after the bread as to a mark. And do you yourselves, who take away the evidence of the senses, do anything else? Who among you when he wishes to go to a bath goes to a mill instead?-What then? Ought we not to the best of our ability hold fast also to this-maintain, that is, the commonly received opinion, and be on our guard against the arguments that seek to overthrow it?-And who disputes that? But only the man who has the power and the leisure should devote himself to these studies: while the man who is trembling and perplexed and whose heart is broken within him, ought to devote his leisure to something else.

EPICTETUS CHAPTER 28 - That We Ought Not To Be Angry With Men; And What Are The Little Things And The Great Among Men?

What is the reason that we assent to anything? The fact that it appears to us to be so. It is impossible, therefore, to assent to the thing that appears not to be so. Why? Because this is the nature of the intellect-to agree to what is true, to be dissatisfied with what is false, and to withhold judgement regarding what is uncertain. What is the proof of this? "Feel, if you can, that it is now night." That is impossible. "Put away the feeling that it is day." That is impossible. "Either feel or put away the feeling that the stars are even in number." That is impossible. When, therefore, a man assents to a falsehood, rest assured that it was not his wish to assent to it as false; "for every soul is unwillingly deprived of the truth," as Plato says; it only seemed to him that the false was true. Well now, in the sphere of actions what have we corresponding to the true and the false here in the sphere of perceptions? Duty and what is contrary to duty, the profitable and the unprofitable, that which is appropriate to me and that which is not appropriate to me, and whatever is similar to these. "Cannot a man, then, think that something is profitable to him, and yet not choose it?" He cannot. How of her who says.

Now, now, I learn what horrors I intend:

But passion overmastereth sober thought?

It is because the very gratification of her passion and the taking of vengeance on her husband she regards as more profitable than the saving of her children. "Yes, but she is deceived." Show her clearly that she is deceived, and she will not do it; but so long as you do not show it, what else has she to follow but that which appears to her to be true? Nothing. Why, then, are you angry with her, because the poor woman has gone astray in the greatest matters, and has been transformed from a human being into a viper? Why do you not, if anything, rather pity her? As we pity the blind and the halt, why do we not pity those who have been made blind and halt in their governing faculties?

Whoever, then, bears this clearly in mind, that the measure of man's every action is the impression of his senses (now this impression may be formed rightly or wrongly; if rightly, the man is blameless; if wrongly, the man himself pays the penalty; for it is impossible that the man who has gone astray, is one person, while the man who suffers is another).---whoever remembers this, I say, will not be enraged at anyone, will not be angry with anyone, will not revile anyone, will not blame, nor hate, nor take offence at anyone. So you conclude that such great and terrible things have their origin in this-the impression of one's senses? In this and nothing else. The Iliad is nothing but a sense-impression and a poet's use of senseimpressions. There came to Alexander an impression to carry off the wife of Menelaus, and an impression came to Helen to follow him. Now if an impression had led Menelaus to feel that it was a gain to be deprived of such a wife, what would have happened? We should have lost not merely the Iliad, but the Odyssey as well.-Then do matters of such great import depend upon one that is so small:-But what do you mean by 'matters of such great import"? Wars and factions and deaths of many men and destructions of cities? And what is there great in all this?-What, nothing great in this?-Why, what is there great in the death of many oxen and many sheep and the burning and destruction of many nests of swallows or storks?-Is there any similarity between this and that?-A great similarity. Men's bodies perished in the one case, and bodies of oxen and sheep in the other. Petty dwellings of men were burned, and so were nests of storks. What is there great or dreadful about that? Or else show me in what respect a man's house and a stork's nest differ as a place of habitation.-Is there any similarity between a stork and a man?—What is that you say? As far as the body is concerned, a great similarity: except that the petty houses of men are made of beams and tiles and bricks, but the nest of a stork is made of sticks and clay.

Does a man, then, differ in no wise from a stork?-Far from it; but in these matters he does not differ.-In what wise, then, does he differ?-Seek and you will find that he differs in some other respect. See whether it be not in his understanding what he does, see whether it be not in his capacity for social action, in his faithfulness, his self-respect, his steadfastness, his security from error, his intelligence. Where, then, is the great evil and the great good among men? Just where the difference is; and if that element wherein the difference lies be preserved and stands firm and well fortified on every side, and neither his self-respect, nor his faithfulness, nor his intelligence be destroyed, then the man also is preserved; but if any of these qualities be destroyed or taken by storm, then the man also is destroyed. And it is in this sphere that the great things are. Did Alexander come to his great fall when the Hellenes assailed Troy with their ships, and when they were devastating the land, and when his brothers were dying? Not at all: for no one comes to his fall because of another's deed: but what went on then was merely the destruction of storks' nests. Nay, he came to his fall when he lost his self-respect, his faithfulness, his respect for the laws of hospitality, his decency of behaviour. When did Achilles come to his fall? When Patroclus died? Far from it; but when Achilles himself was enraged, when he was crying about a paltry damsel, when he forgot that he was there, not to get sweethearts, but to make war. These are the falls that come to mankind, this is the siege of their city, this is the razing of it-when their correct judgements are torn down, when these are destroyed .- Then when women are driven off into captivity, and children are enslaved, and when the men themselves are slaughtered, are not all these things evils?—Where do you get the justification for adding this opinion? Let me know also.-No, on the contrary, do you let me know where you get the justification for saying that they are not evils?-Let us turn to our standards, produce your preconceptions.

For this is why I cannot be sufficiently astonished at what men do. In a case where we wish to judge of weights, we do not judge at haphazard; where we wish to judge what is straight and what is crooked, we do not judge at haphazard; in short, where it makes any difference to us to know the truth in the case, no one of us will do anything at haphazard. Yet where there is involved the first and only cause of acting aright or erring, of prosperity or adversity, of failure or success, there alone are we haphazard and headlong. There I have nothing like a balance, there nothing like a standard. but some sense-impression comes and immediately I go and act upon it. What, am I any better than Agamemnon or Achilles-are they because of following the impressions of their senses to do and suffer such evils, while I am to be satisfied with the impression of my senses? And what tragedy has any other source than this? What is the Atreus of Euripides? His sense-impression. The Oedipus of Sophocles? His sense-impression. The Phoenix? His sense-impression. The Hippolytus? His sense-impression. What kind of a man, then, do you think he is who pays no attention to this matter? What are those men called who follow every impression of their senses?-Madmen.-Are we, then, acting differently?

EPICTETUS CHAPTER 29 - Of Steadfastness

The essence of the good is a certain kind of moral purpose, and that of the evil is a certain kind of moral purpose. What, then, are the external things? They are materials for the moral purpose, in dealing with which it will find its own proper

good or evil. How will it find the good? If it does not admire the materials. For the judgements about the materials, if they be correct, make the moral purpose good, but if they be crooked and awry, they make it evil. This is the law which God has ordained, and He says, "If you wish any good thing, get it from yourself." You say, "No, but from someone else." Do not so, but get it from yourself. For the rest, when the tyrant threatens and summons me, I answer "Whom are you threatening?" If he says, "I will put you in chains," I reply, "He is threatening my hands and my feet." If he says, "I will behead you," I answer, "He is threatening my neck." If he says, "I will throw you into prison," I say, "He is threatening my whole paltry body"; and if he threatens me with exile, I give the same answer.-Does he, then, threaten you not at all?-If I feel that all this is nothing to me,—not at all; but if I am afraid of any of these threats, it is I whom he threatens. Who is there left, then, for me to fear? The man who is master of what? The things that are under my control? But there is no such man. The man who is master of the things that are not under my control? And what do I care for them?

Do you philosophers, then, teach us to despise our kings?-Far from it. Who among us teaches you to dispute their claim to the things over which they have authority? Take my paltry body, take my property, take my reputation, take those who are about me. If I persuade any to lay claim to these things, let some man truly accuse me. "Yes, but I wish to control your judgements also." And who has given you this authority? How can you have the power to overcome another's judgement? "By bringing fear to bear upon him," he says, "I shall overcome him." You fail to realise that the judgement overcame itself, it was not overcome by something else; and nothing else can overcome moral purpose, but it overcomes itself. For this reason too the law of God is most good and most just: "Let the better always prevail over the worse. Ten are better than one," you say. For what? For putting in chains, for killing, for dragging away where they will, for taking away a man's property. Ten overcome one, therefore, in the point in which they are better. In what, then, are they worse? If the one has correct judgements, and the ten have not. What then? Can they overcome in this point? How can they? But if we are weighed in the balance, must not the heavier draw down the scales?

So that a Socrates may suffer what he did at the hands of the Athenians?-Slave, why do you say "Socrates"? Speak of the matter as it really is and say: That the paltry body of Socrates may be carried off and dragged to prison by those who were stronger than he, and that some one may give hemlock to the paltry body of Socrates, and that it may grow cold and die? Does this seem marvellous to you, does this seem unjust, for this do you blame God? Did Socrates, then, have no compensation for this? In what did the essence of the good consist for him? To whom shall we listen, to you or to Socrates himself? And what does he say? "Anytus and Meletus can kill me, but they cannot hurt me." And again, "If so it is pleasing to God, so let it be." But do you prove that one who holds inferior judgements prevails over the man who is superior in point of judgements. You will not be able to prove this; no, nor even come near proving it. For this is a law of nature and of God: "Let the better always prevail over the worse." Prevail in what? In that in which it is better. One body is stronger than another body; several persons are stronger than one; the thief is stronger than the man who is not a thief. That is why I lost my lamp, because in the matter of keeping awake the thief was better than I was. However, he bought a lamp for a very high price; for a lamp he became a thief, for a lamp he became faithless, for a lamp he became beast-like. This seemed to him to be profitable!

Very well; but now someone has taken hold of me by my cloak and pulls me into the market-place, and then others shout at me, "Philosopher, what good have your judgements done you? See, you are being dragged off to prison; see, you are going to have your head cut off." And what kind of Introduction to Philosophy could I have studied, which would prevent me from being dragged off, if a man who is stronger than I am should take hold of my cloak? Or would prevent me from being thrown into the prison, if ten men should hustle me and throw me unto it? Have I, then, learned nothing else? I have learned to see that everything which happens, if it be outside the realm of my moral purpose, is nothing to me.-Have you, then, derived no benefit from this principle for the present case? Why, then, do you seek your benefit in something other than that in which you have learned that it is?—Well, as I sit in the prison I say, "The fellow who shouts this at me neither understands what is meant, nor follows what is said, nor has he taken any pains at all to know what philosophers say, or what they do. Don't mind him." "But come out of the prison again." If you have no further need of me in the prison. I shall come out: if you ever need me there again, I shall go back in. For how long? For so long as reason chooses that I remain with my paltry body; but when reason does not so choose, take it and good health to you! Only let me not give up my life irrationally, only let me not give up my life faintheartedly, or from some casual pretext. For again, God does not so desire; for He has

need of such a universe, and of such men who go to and fro upon earth. But if He gives the signal to retreat, as He did to Socrates, I must obey Him who gives the signal, as I would a general.

What then? Must I say these things to the multitude? For what purpose? Is it not sufficient for a man himself to believe them? For example, when the children come up to us and clap their hands and say, "To-day is the good Saturnalia," do we say to them, "All this is not good"? Not at all; but we too clap our hands to them. And do you too, therefore, when you are unable to make a man change his opinion, realise that he is a child and clap your hands to him; but if you do not want to do this, you have merely to hold your peace.

All this a man ought to remember, and when he is summoned to meet some such difficulty, he ought to know that the time has come to show whether we are educated. For a young man leaving school and facing a difficulty is like one who has practised the analysis of syllogisms, and if someone propounds him one that is easy to solve, he says, "Nay, rather propound me one that is cunningly involved, so that I may get exercise from it." Also the athletes are displeased with the youths of light weight: "He cannot lift me," says one. 'Yonder is a sturdy young man." Oh no; but when the crisis calls, he has to weep and say, "I wanted to keep on learning." Learning what? If you do not learn these things so as to be able to manifest them in action, what did you learn them for? I fancy that someone among these who are sitting here is in travail within his own soul and is saying, "Alas, that such a difficulty does not come to me now as that which has come to this fellow! Alas, that now I must be worn out sitting in a corner, when I might be crowned at Olympia! When will someone bring me word of such a contest?" You ought all to be thus minded. But among the gladiators of Caesar there are some who complain because no one brings them out, or matches them with an antagonist, and they pray God and go to their managers, begging to fight in single combat; and vet will no one of you display a like spirit? I wanted to sail to Rome for this very purpose and to see what my athlete is doing, what practice he is following in his task. "I do not want," says he, "this kind of a task." What, is it in your power to take any task you want? You have been given such a body, such parents, such brothers, such a country, such a position in it; and then do you come to me and say, "Change the task for me"? What, do you not possess resources to enable you to utilize that which has been given? You ought to say, "It is yours to set the task, mine to practise it well." No, but you do say, "Do not propose to me such-and-such a hypothetical syllogism but rather such-and-such a one: do not urge upon me such-and-such a conclusion, but rather such-and-such a one." A time will soon come when the tragic actors will think that their masks and buskins and the long robe are themselves. Man, all these things you have as a subject-matter and a task. Say something, so that we may know whether you are a tragic actor or a buffoon; for both of these have everything but their lines in common Therefore if one should take away from him both his buskins and his mask, and bring him on the stage as a mere shade of an actor, is the tragic actor lost, or does he abide? If he has a voice, he abides.

And so it is in actual life. "Take a governorship." I take it and having done so I show how an educated man comports himself. "Lay aside the laticlave, and having put on rags come forward in a character to correspond." What then? Has it not been given me to display a fine voice. "In what role, then, do you mount the stage now?" As a witness summoned by God. God says, "Go you and bear witness for Me; for you are worthy to be produced by me as a witness. Is any of those things which lie outside the range of the moral purpose either good or evil? Do I injure any man? Have I put each man's advantage under the control of any but himself?" What kind of witness do you bear for God?" I am in sore straits, O Lord, and in misfortune; no one regards me, no one gives me anything, all blame me and speak ill of me? Is this the witness that you are going to bear, and is this the way in which you are going to disgrace the summons which He gave you, in that He bestowed this honour upon you and deemed you worthy to be brought forward in order to bear testimony so important?

But the one who has authority over you declares, "I pronounce you impious and profane." What has happened to you? "I have been pronounced impious and profane." Nothing else? "Nothing." But if he had passed judgement upon some hypothetical syllogism and had made a declaration, "I judge the statement, 'If it is day, there is light,' to be false," what has happened to the hypothetical syllogism? Who is being judged in this case, who has been condemned? The hypothetical syllogism, or the man who has been deceived in his judgement about it? Who in the world, then, is this man who has authority to make any declaration about you? Does he know what piety or impiety is? Has he pondered the matter? Has he learned it? Where? Under whose instruction? And yet a musician pays no attention to him, if he declares that the lowest string is the highest, nor does a geometrician, if the man decides that the lines extending from the centre to the circumference of a circle are not equal; but shall the truly educated man pay attention to an uninstructed person when he passes judgement on what is holy and unholy, and on what is just and unjust?

How great is the injustice committed by the educated in so doing! Is this, then, what you have learned here? Will you not leave to others, mannikins incapable of taking pains, the petty quibbles about these things, so that they may sit in a corner and gather in their petty fees, or grumble because nobody gives them anything, and will you not yourself come forward and make use of what you have learned? For what is lacking now is not quibbles; nay, the books of the Stoics are full of quibbles. What, then, is the thing lacking now? The man to make use of them, the man to bear witness to the arguments by his acts. This is the character I would have you assume, that we may no longer use old examples in the school, but may have some example from our own time also. Whose part is it, then, to contemplate these matters? The part of him who devotes himself to learning; for man is a kind of animal that loves contemplation. But it is disgraceful to contemplate these things like runaway slaves; nay, sit rather free from distractions and listen, now to tragic actor and now to the citharoede, and not as those runaways do. For at the very moment when one of them is paying attention and praising the tragic actor, he takes a glance around, and then if someone mentions the word "master," they are instantly all in a flutter and upset. It is disgraceful for men who are philosophers to contemplate the works of nature in this spirit. For what is a "master"? One man is not master of another man, but death and life and pleasure and hardship are his masters. So bring Caesar to me, if he be without these things, and you shall see how steadfast I am. But when he comes with them, thundering and lightening, and I am afraid of them, what else have I done but recognised my master, like the runaway slave? But so long as I have, as it were, only a respite from these threats, I too am acting like a runaway slave who is a spectator in a theatre; I bathe, I drink, I sing, but I do it all in fear and misery. But if I emancipate myself from my masters. that is, from those things which render masters terrifying, what further trouble do I have, what master any more?

What then? Must I proclaim this to all men? No, but I must treat with consideration those who are not philosophers by profession, and say, "This man advises for me that which he thinks good in his own case; therefore I excuse him." For Socrates excused the jailor who wept for him when he was about to drink the poison, and said, "How generously he has wept for us!" Does he, then, say to the jailor, "This is why we sent the women away"? No, but he makes this latter remark to his intimate friends, to those who were fit to hear it; but the jailor he treats with consideration like a child.

EPICTETUS CHAPTER 30 - What Aid Ought We To Have Ready At Hand In Difficulties?

When you come into the presence of some prominent man, remember that Another looks from above on what is taking place, and that you must please Him rather than this man. He. then, who is above asks of you, "In your school what did you call exile and imprisonment and bonds and death and disrepute?" "I called them 'things indifferent."" "What, then, do you call them now? Have they changed at all?" "No.' "Have you, then, changed?" "No." "Tell me, then, what things are 'indifferent." "Those that are independent of the moral purpose." "Tell me also what follows." "Things independent of the moral purpose are nothing to me." "Tell "A proper me also what you thought were 'the good things.'" moral purpose and a proper use of external impressions." "And what was the 'end'?" "To follow Thee." "Do you say all that even now?" "I say the same things even now." Then enter in, full of confidence and mindful of all this, and you shall see what it means to be a young man who has studied what he ought, when he is in the presence of men who have not studied. As for me, by the gods, I fancy that you will feel somewhat like this: "Why do we make such great and elaborate preparations to meet what amounts to nothing? Was this what authority amounted to? Was this what the vestibule, the chamberlains, the armed guards amounted to? Was it for all this that I listened to those long discourses? Why, all this never amounted to anything, but I was preparing for it as though it were something great.'

DISCOURSES OF EPICTETUS BOOK 2

EPICTETUS CHAPTER 1 - That Confidence Does Not Conflict With Caution

Perhaps the following contention of the philosophers appears paradoxical to some, but nevertheless let us to the best of our ability consider whether it is true that "we ought to do everything both cautiously and confidently at the same time." For caution seems to be in a way contrary to confidence, and contraries are by no means consistent. But that which appears to many to be paradoxical in the matter under discussion seems to me to involve something of this sort: If we demanded that a man should employ both caution and confidence in regard to the same things, then we would be justly charged with uniting qualities that are not to be united. But, as a matter of fact, what is there strange about the saving? For if the statements which have often been made and often proved are sound, namely that "the nature of the good as well as of the evil lies in a use of the impressions of the senses, but the things which lie outside the province of the moral purpose admit neither the nature of the evil, nor the nature of the good"; what is there paradoxical about the contention of the philosophers, if they say, "Where the things that lie outside the province of the moral purpose are involved, there show confidence, but where the things that lie within the province of the moral purpose are involved, there show caution"? For if the evil lies in an evil exercise of the moral purpose, it is only in regard to matters of this kind that it is right to employ caution; but if the things which lie outside the province of the moral purpose and are not under our control are nothing to us, we ought to employ confidence in regard to them. And so we shall be at one and the same time both cautious and confident, yes, and, by Zeus, confident because of our caution. For because we are cautious about the things which are really evil, the result will be that we shall have confidence in regard to the things which are not of that nature.

However, we act like deer: when the hinds are frightened by the feathers and run away from them, where do they turn, and to what do they fly for refuge as a safe retreat? Why, to the nets; and so they perish because they have confused the objects of fear with the objects of confidence. So it is with us also; where do we show fear? About the things which lie outside the province of the moral purpose. Again, in what do we behave with confidence as if there were no danger? In the things which lie within the province of the moral purpose. To be deceived, or to act impetuously, or to do something shameless, or with base passion to desire something, makes no difference to us, if only in the matters which lie outside the province of the will we succeed in our aim. But where death, or exile, or hardship, or ignominy faces us, there we show the spirit of running away, there we show violent agitation. Therefore, as might be expected of those men who err in matters of the greatest concern, we transform our natural confidence into boldness, desperateness, recklessness, shamelessness, while our natural caution and self-respect we transform into cowardice and abjectness, full of fears and perturbations. For if a man should transfer his caution to the sphere of the moral purpose and the deeds of the moral purpose, then along with the desire to be cautious he will also at once have under his control the will to avoid; whereas, if he should transfer his caution to those matters which are not under our control and lie outside the province of the moral purpose, inasmuch as he is applying his will to avoid towards those things which are under the control of others, he will necessarily be subject to fear, instability, and perturbation. For it is not death or hardship that is a fearful thing, but the fear of hardship or death. That is why we praise the man who said

Not death is dreadful, but a shameful death.

Our confidence ought, therefore, to be turned toward death. and our caution toward the fear of death; whereas we do just the opposite-in the face of death we turn to flight, but about the formation of a judgement on death we show carelessness, disregard, and unconcern. But Socrates did well to call all such things "bugbears." For just as masks appear fearful and terrible to children because of inexperience, in some such manner we also are affected by events, and this for the same reason that children are affected by bugbears. For what is a child? Ignorance. What is a child? Want of instruction. For where a child has knowledge, he is no worse than we are. What is death? A bugbear. Turn it about and learn what it is; see, it does not bite. The paltry body must be separated from the bit of spirit, either now or later, just as it existed apart from it before. Why are you grieved, then, if it be separated now? For if it be not separated now, it will be later. Why? So that the revolution of the universe may be accomplished; for it has need of the things that are now coming into being, and the things that shall be, and the things that have been accomplished. What is hardship? A bugbear. Turn it about and learn what it is. The poor flesh is subjected to rough treatment, and then again to smooth. If you do not find this profitable, the door stands open; if you do find it profitable, bear it. For the door must be standing open for every emergency, and then we have no trouble.

What, then, is the fruit of these doctrines? Precisely that which must needs be both the fairest and the most becoming for those who are being truly educated—tranquillity, fearlessness, freedom. For on these matters we should not trust the multitude, who say, "Only the free can be educated," but rather the philosophers, who say, "Only the educated are free."—How is that?—Thus: At this time is freedom anything but the right to live as we wish? "Nothing else." Tell me, then, O men, do you wish to live in error? "We do not." Well, no one who lives in error is free. Do you wish to live in fear, in sorrow, in turmoil? "By no means." Well then, no man who is in fear, or sorrow, or turmoil, is free, but whoever is rid of sorrows and fears and turmoils, this man is by the self-same course rid also of slavery. How, then, shall we any longer trust you, O dearest lawgivers? Do we allow none but the free to get an education? For the philosophers say, "We do not allow any but the educated to be free"; that is, God does not allow it.—When, therefore, in the presence of the practor a man turns his own slave about, has he done nothing?—He has done something.—What?—He has turned his slave about in the presence of the praetor,—Nothing more?—Yes, he is bound to pay a tax of five per cent, of the slave's value.— What then? Has not the man to whom this has been done become free?—He has no more become free than he has acquired peace of mind. You, for example, who are able to turn others about, have you no master? Have you not as your master money, or a mistress, or a boy favourite, or the tyrant, or some friend of the tyrant? If not, why do you tremble when you go to face some circumstance involving those things? That is why I say over and over again. "Practise these thines

and have them ready at hand, that is, the knowledge of what you ought to face with confidence, and what you ought to face with caution-that you ought to face with confidence that which is outside the province of the moral purpose, with caution that which is within the province of the moral purpose."-But have I not read to you, and do you not know what I am doing?—What have you been engaged upon? Trifling phrases! Keep your trifling phrases! Show me rather how you stand in regard to desire and aversion, whether you do not fail to get what you wish, or do not fall into what you do not wish. As for those trifling periods of yours, if you are wise, you will take them away somewhere and blot them out.—What then? Did not Socrates write?—Yes, who wrote as much as he? But how? Since he could not have always at hand someone to test his judgements, or to be tested by him in turn, he was in the habit of testing and examining himself, and was always in a practical way trying out some particular primary conception. That is what a philosopher writes; but trifling phrases, and "said he," "said I" he leaves to others, to the stupid or the blessed, those who by virtue of their tranquillity live at leisure, or those who by virtue of their folly take no account of logical conclusions.

And now, when the crisis calls, will you go off and make an exhibition of your compositions, and give a reading from them, and boast, "See, how I write dialogues"? Do not so, man. but rather boast as follows: "See how in my desire I do not fail to get what I wish. See how in my aversions I do not fall into things that I would avoid. Bring on death and you shall know; bring on hardships, bring on imprisonment, bring on disrepute, bring on condemnation." This is the proper exhibition of a young man come from school. Leave other things to other people; neither let anyone ever hear a word from you about them, nor, if anyone praises you for them, do you tolerate it, but let yourself be accounted a nobody and a know-nothing. Show that you know this onlyhow you may never either fail to get what you desire or fall into what you avoid. Let others practise lawsuits, others problems, others syllogisms; do you practise how to die, how to be enchained, how to be racked, how to be exiled. Do all these things with confidence, with trust in Him who has called you to face them and deemed you worthy of this position, in which having once been placed you shall exhibit what can be achieved by a rational governing principle when arrayed against the forces that lie outside the province of the moral purpose. And thus the paradox of which we were speaking will no longer appear either impossible or paradoxical, namely, that at the same time we ought to be both cautious and confident, confident in regard to those things that lie outside the province of the moral purpose, and cautious in regard to those things that lie within the province of the moral purpose.

EPICTETUS CHAPTER 2 - On Tranquillity

Consider, you who are going to court, what you wish to maintain and wherein you wish to succeed; for if you wish to maintain freedom of moral purpose in its natural condition, all security is yours, every facility yours, you have no trouble. For if you are willing to keep guard over those things which are under your direct authority and by nature free, and if you are satisfied with them, what else do you care about? For who is master of them, who can take them away from you? If you wish to be self-respecting and honourable, who is it that will not allow you? If you wish not to be hindered nor compelled, what man will compel you to desire what does not seem to you to be desirable, to avoid what you do not feel should be avoided? Well, what then? The judge will do some things to you which are thought to be terrifying; but how can he make you try to avoid what you suffer? When, therefore, desire and aversion are under your own control, what more do you care for? This is your introduction, this the setting forth of your case, this your proof, this your victory, this your peroration, this your approbation. That is why Socrates, in reply to the man who was reminding him to make preparation for his trial. said, "Do you not feel, then, that with my whole life I am making preparation for this?"-"What kind of preparation?"—"I have maintained," says he, "that which is under my control."—"How then?"—"I have never done anything that was wrong either in my private or in my public life." But if you wish to maintain also what is external, your

paltry body and your petty estate and your small reputation, I have this to say to you: Begin this very moment to make all possible preparation, and furthermore study the character of your judge and your antagonist. If you must clasp men's knees, clasp them; if you must wail, then wail; if you must groan, then groan. For when you subject what is your own to externals, then from henceforth be a slave, and stop letting yourself be drawn this way and that, at one moment wishing to be a slave, at another not, but be either this or that simply and with all your mind, either a free man or a slave, either educated or uneducated, either a spirited fighting cock or a spiritless one, either endure to be beaten until you die, or give in at once. Far be it from you to receive many blows and yet at the last give in! But if that is disgraceful, begin this very moment to decide the question, "Where is the nature of good and evil to be found? Where truth also is. Where truth and where nature are, there is caution; where truth is, there is confidence, where nature is

Why, do you think that if Socrates had wished to maintain his external possessions he would have come forward and said, 'Anytus and Meletus are able indeed to kill me, but they cannot harm me"? Was he so foolish as not to see that this course does not lead to that goal, but elsewhere? Why is it unreasonable, then, to add also a word of provocation? Just as my friend Heracleitus, who had an unimportant lawsuit about a small piece of land in Rhodes; after he had pointed out the justice of his claim he went on to the peroration in which he said, "But neither will I entreat you, nor do I care what your decision is going to be, and it is you who are on trial rather than I." And so he ruined his case. What is the use of acting like that? Merely make no entreaties, but do not add the words "Yes, and I make no entreaties," unless the right time has come for you, as it did for Socrates, deliberately to provoke your judges. If you, for your part, are preparing a peroration of that sort, why do you mount the platform at all. why answer the summons? For if you wish to be crucified, wait and the cross will come; but if reason decides that you should answer the summons and do your best to have what you say carry conviction, you must act in accordance therewith, but always maintaining what is your own proper character.

Looked at in this way it is also absurd to say. "Advise me." What advice am I to give you? Nay, say rather, "Enable my mind to adapt itself to whatever comes." Since the other expression is just as if an illiterate should say, "Tell me what to write when some name is set me to write." For if I say, "Write Dio," and then his teacher comes along and sets him not the name "Dio," but "Theo," what will happen? What will he write? But if you have practised writing, you are able also to prepare yourself for everything that is dictated to you; if you have not practised, what advice can I now offer you? For if circumstances dictate something different, what will you say or what will you do? Bear in mind, therefore, this general principle and you will not be at a loss for a suggestion. But if you gape open-mouthed at externals, you must needs be tossed up and down according to the will of your master. And who is your master? He who has authority over any of the things upon which you set your heart or which you wish to avoid

EPICTETUS CHAPTER 3 - To Those Who Recommend Persons To The Philosophers

That is an excellent answer of Diogenes to the man who asked for a letter of recommendation from him: "That you are a man," he says, "he will know at a glance; but whether you are a good or a bad man he will discover if he has the skill to distinguish between good and bad, and if he is without that skill he will not discover the facts, even though I write him thousands of times." For it is just as though a drachma asked to be recommended to someone, in order to be tested. If the man in question is an assayer of silver, you will recommend yourself. We ought, therefore, to have also in everyday life the sort of thing that we have in the case of silver, so that I may be able to say, as the assayer of silver says, "Bring me any drachma you please, and I will appraise it." Now in the case of syllogisms I say, "Bring me any you please and I will distinguish for you between the one that is capable of analysis and the one that is not." How so? Because, I know how to analyze syllogisms myself; I have the faculty which the man must have who is going to appraise those who handle syllogisms properly. But in everyday life what do I do? Sometimes I call a thing good, and sometimes bad. What is the reason? The opposite of what was true in the case of syllogisms, namely, ignorance and inexperience.

EPICTETUS CHAPTER 4 - To The Man Who Had Once Been Caught In Adultery

AS Epictetus was remarking that man is born to fidelity, and that the man who overthrows this is overthrowing the characteristic quality of man, there entered one who had the reputation of being a scholar, and who had once been caught in the city in the act of adultery. But, goes on Epictetus, if we abandon this fidelity to which we are by nature born, and make designs against our neighbour's wife, what are we doing?

Why, what but ruining and destroying? Whom? The man of fidelity, of self-respect, of piety. Is that all? Are we not overthrowing also neighbourly feeling, friendship, the state? In what position are we placing ourselves? As what am I to treat you, fellow? As a neighbour, as a friend? Of what kind? As a citizen? What confidence am I to place in you? If you were a vessel so cracked that it was impossible to use you for anything, you would be cast forth upon the dunghills and even from there no one would pick you up; but if, although a man, you cannot fill a man's place, what are we going to do with you? For, assuming that you cannot hold the place of a friend, can you hold that of a slave? And who is going to trust you? Are you not willing, therefore, that you too should be cast forth upon some dunghill as a useless vessel, as a piece of dung? For all that will you say, "Nobody cares for me, a scholar!"? No, for you are an evil man, and useless. It is just as if the wasps complained that nobody cares for them, but all run away from them, and, if anyone can, he strikes them and knocks them down. You have such a sting that you involve in trouble and pain whomever you strike. What do you want us to do with you? There is no place where you can be put.

What then, you say: are not women by nature common property? I agree. And the little pig is the common property of the invited guests; but when portions have been assigned, if it so pleases you, approach and snatch up the portion of the guest who reclines at your side, steal it secretly, or slip in your hand and glut your greed, and if you cannot tear off a piece of the meat, get your fingers greasy and lick them. A fine companion you would make at a feast, and a dinner-guest worthy of Socrates! Come now, is not the theatre the common property of the citizens? When, therefore, they are seated there, go, if it so pleases you, and throw someone of them out of his seat. In the same way women also are by nature common property. But when the law-giver, like a host at a banquet, has apportioned them, are you not willing like the rest to look for your own portion instead of filching away and glutting your greed upon that which is another's? "But I am a scholar and understand Archedemus." Very well then, understand Archedemus and be an adulterer and faithless and a wolf or an ape instead of a man; for what is there to prevent you?

EPICTETUS CHAPTER 5 - How Are Magnanimity And Carefulness Compatible?

Materials are indifferent, but the use which we make of them is not a matter of indifference. How, therefore, shall a man maintain steadfastness and peace of mind, and at the same time the careful spirit and that which is neither reckless nor negligent? If he imitates those who play at dice. The counters are indifferent, the dice are indifferent; how am I to know what is going to fall? But to make a careful and skilful use of what has fallen, that is now my task. In like manner, therefore, the principal task in life is this: distinguish matters and weigh them one against another, and say to yourself, "Externals are not under my control; moral choice is under my control. Where am I to look for the good and the evil? Within me, in that which is my own." But in that which is another's never employ the words "good" or "evil," or "benefit" or "injury," or anything of the sort.

What then? Are these externals to be used carelessly? Not at all. For this again is to the moral purpose an evil and thus unnatural to it. They must be used carefully, because their use is not a matter of indifference, and at the same time with steadfastness and peace of mind, because the material is indifferent. For in whatever really concerns us, there no man can either hinder or compel me. The attainment of those things in which I can be hindered or compelled is not under my control and is neither good nor bad, but the use which I make of them is either good or bad, and that is under my control. It is, indeed, difficult to unite and combine these two things-the carefulness of the man who is devoted to material things and the steadfastness of the man who disregards them, but it is not impossible. Otherwise happiness were impossible. But we act very much as though we were on a voyage. What is possible for me? To select the helmsman, the sailors, the day, the moment. Then a storm comes down upon us. Very well. what further concern have I? For my part has been fulfilled. The business belongs to someone else, that is, the helmsman. But, more than that, the ship goes down. What, then, have I to do? What I can; that is the only thing I do; I drown without fear, neither shrieking nor crying out against God, but recognising that what is born must also perish. For I am not eternal, but a man; a part of the whole, as an hour is part of a day. I must come on as the hour and like an hour pass away. What difference, then, is it to me how I pass away, whether by drowning or by a fever? For by something of the sort I must needs pass away.

This is what you will see skilful ball players doing also. None of them is concerned about the ball as being something good or bad, but about throwing and catching it. Accordingly, form has to do with that, skill with that, and speed, and grace; where I cannot catch the ball even if I spread out my cloak, the expert catches it if I throw. Yet if we catch or throw the ball in a flurry or in fear, what fun is there left, and how can a man be steady, or see what comes next in the game? But one player will say "Throw!" another, "Do not throw!" and yet another, "Do not throw it up!" That, indeed, would be a strife and not a game.

In that sense, then, Socrates knew how to play ball. How so? He knew how to play in the law-court. "Tell me," says he, "Anytus, what do you mean when you say that I do not believe in God. In your opinion who are the daemones? Are they not either the offspring of the gods or a hybrid race, the offspring of men and gods?" And when Anytus had agreed to that statement Socrates went on, "Who, then, do you think, can believe that mules exist, but not asses?" In so speaking he was like a man playing ball. And at that place and time what was the ball that he was playing with? Imprisonment, exile, drinking poison, being deprived of wife, leaving children orphans. These were the things with which he was playing, but none the less he played and handled the ball in good form. So ought we also to act, exhibiting the ball-player's carefulness about the game, but the same indifference about the object played with, as being a mere ball. For a man ought by all means to strive to show his skill in regard to some of the external materials, yet without making the material a part of himself, but merely lavishing his skill in regard to it, whatever it may be. So also the weaver does not make wool, but he lavishes his skill on whatever wool he receives. Another gives you sustenance and property and can likewise take them away, yes, and your paltry body itself. Do you accordingly accept the material and work it up. Then if you come forth without having suffered any harm, the others who meet you will congratulate you on your escape, but the man who knows how to observe such matters, if he sees that you have exhibited good form in this affair, will praise you and rejoice with you; but if he sees that you owe your escape to some dishonourable action, he will do the opposite. For where a man may rejoice with good reason, there others may rejoice with him.

How, then, can it be said that some externals are natural. and others unnatural? It is just as if we were detached from them. For I will assert of the foot as such that it is natural for it to be clean, but if you take it as a foot, and not as a thing detached, it will be appropriate for it to step into mud and trample on thorns and sometimes to be cut off for the sake of the whole body: otherwise it will no longer be a foot. We ought to hold some such view also about ourselves. What are you? A man. Now if you regard yourself as a thing detached, it is natural for you to live to old age, to be rich, to enjoy health. But if you regard yourself as a man and as a part of some whole, on account of that whole it is fitting for you now to be sick, and now to make a voyage and run risks, and now to be in want, and on occasion to die before your time. Why, then, are you vexed? Do you not know that as the foot, if detached, will no longer be a foot, so you too, if detached, will no longer be a man? For what is a man? A part of a state; first of that state which is made up of gods and men, and then of that which is said to be very close to the other, the state that is a small copy of the universal state. "Must I, then, be put on trial now?" Well, would you have someone else be sick of a fever now, someone else go on a voyage, someone else die, someone else be condemned? For it is impossible in such a body as ours, in this universe that envelops us, among these fellow-creatures of ours, that such things should not happen, some to one man and some to another. It is your task, therefore, to step forward and say what you should, to arrange these matters as is fitting. Then the judge says, "I adjudge you guilty." I reply, "May it be well with you. I have done my part; and it is for you to see whether you have done yours." For the judge too runs a risk, do not forget that.

EPICTETUS CHAPTER 6 - Of Indifference In Things

The hypothetical syllogism in itself is a matter of indifference; yet the judgement about it is not indifferent, but is either knowledge, or opinion, or delusion. In like manner, although life is a matter of indifference, the use which you make of it is not a matter of indifference. Therefore, when someone tells you, "These things also are indifferent," do not become careless, and when someone exhorts you to be careful, do not become abject and overawed by material things. It is good also to know one's own training and capacity, so that where you have had no training you may keep quiet and not be annoyed if some other persons outshine you in those matters. For you in your turn will expect to outshine them in syllogisms, and if they are annoyed at that, you will console them by saying, "I have learned this, and you have not." So also in a case where some acquired skill is needed, do not seek that which only practice can give, but leave that to those who have acquired the knack, and be content yourself to remain steadfast.

"Go and salute so-and-so." "I salute him." "How?" "In no abject spirit." "But the door was shut in your face." "Yes, for I have not learned how to crawl in at the window; but when I find the door closed, I must either go away or crawl in at the window." "But go and do speak to him." "I do so speak." "In what manner?" "In no abject spirit." "But you did not get what you wanted." Surely that was not your business, was it? Nay, it was his. Why, then, lay claim to that which is another's? If you always bear in mind what is your own and what is another's, you will never be disturbed. Therefore Chrysippus well says, "As long as the consequences are not clear to me, I cleave ever to what is better adapted to secure those things that are in accordance with nature; for God himself has created me with the faculty of choosing things. But ifI really knew that it was ordained for me to be ill at this present moment, I would even seek illness: for the foot also, if it had a mind, would seek to be covered with mud."

For example, why do heads of grain grow? Is it not that they may also become dry? But when they become dry, is it not that they may also be harvested? Since they do not grow for themselves alone. If, therefore, they had feeling, ought they to pray that they should never at all be harvested? But never to be harvested at all is a curse for heads of grain. In like manner I would have you know that in the case of men as well it is a curse never to die; it is like never growing ripe, never being harvested. But, since we are ourselves those who must both be harvested and also be aware of the very fact that we are being harvested, we are angry on that account. For we neither know who we are, nor have we studied what belongs to man, as horsemen study what belongs to horses. But Chrysantas, when he was on the point of striking the foe, refrained because he heard the bugle sounding the recall; it seemed so much more profitable to him to do the bidding of his general than to follow his own inclination. Yet no one of us is willing, even when necessity calls, to obey her readily, but what we suffer we suffer with fears and groans, and call it "circumstances." What do you mean by "circumstances," man? If you call "circumstances" your surroundings, all things are "circumstances"; but if you use the word of hardships, what hardship is involved when that whicli has come into being is destroyed? The instrument of destruction is a sword, or a wheel, or the sea, or a tile, or a tyrant. What concern is it to you by what road you descend to the House of Hades? They are all equal. But if you care to hear the truth, the road by which the tyrant sends you is the shorter. No tyrant ever took six months to cut a man's throat, but a fever often takes more than a year. All these things are a mere noise and a vaunting of empty names.

"I run the risk of my life in Caesar's presence." But do I not run a risk by living in Nicopolis, where there are so many earthquakes? And what risk do you yourself take when you cross the Adriatic? Do you not risk your life? "But I also risk my opinion at court." Your own opinion? How so? Why, who can compel you to opine anything against your will? But do you mean some other man's opinion? And what kind of risk is it of yours that others should entertain false opinions? "But I run the risk of banishment." What is banishment? To be somewhere else than in Rome? "Yes." What then? "Suppose I am sent to Gyara." If it is to your good, you will go; if not, you have a place to which you may go instead of Gyarawhere he too will go, whether he will or no, who is sending you to Gyara. Then why do you go up to Rome as though it were some great thing? It amounts to less than your preparation for it; so that a young man of parts may say, "It was not worth so much to have listened to so many lectures, and to have written so many exercises, and to have sat so long at the side of a little old man, who was not worth very much himself." Only remember that distinction which is drawn between what is yours and what is not yours. Never lay claim to anything that is not your own. A platform and a prison is each a place, the one high, and the other low; but your moral purpose can be kept the same, if you wish to keep it the same, in either place. And then we shall be emulating Socrates, when we are able to write paeans in prison. But considering what has been our state hitherto, I wonder if we should have endured it, had some one else said to us in prison, "Would you like to have me read you paeans?" "Why bother me? Do you not know the trouble that I am in? What, is it possible for me -?" In what condition, then? "I am in this conditionabout to die." But will other men be immortal?

EPICTETUS CHAPTER 7 - How Should One Employ Divination?

Because we employ divination when there is no occasion for it, many of us neglect many of the duties of life. For what can the diviner see that is of greater import than death, or danger, or illness, or in general such things as these? If, then, it becomes necessary for me to risk my life for my friend, and if it becomes my duty even to die for him, where do I find beyond that any occasion to employ divination? Have I not within me the diviner that has told me the true nature of good and of evil, that has set forth the signs characteristic of both of them? What further use have I, then, of entrails, or of birds? But when he says, "It is expedient for you," do I accept it? Why, does he know what is expedient? Does he know what is good? Has he learned the signs characteristic of things good and things evil as he has the signs characteristic of entrails? For if he knows the signs characteristic of these, he knows also those of things honourable and base, and right and wrong. Man, it is for you to tell me what is indicated by signs-life or death, poverty or wealth; but whether these things are expedient or inexpedient, am I going to ask of you? Why don't you speak on points of grammar? Well then, on this matter, in which we mortals are all astray and in conflict with one another, you do speak? Wherefore, that was an admirable answer which the woman gave who wished to send a boatload of supplies to Gratilla after she had been exiled. To a man who said, "Domitian [Titus Flavius Domitianus] will confiscate them," she replies, "I should rather have him confiscate them than myself fail to send them."

What, then, induces us to employ divination so constantly? Cowardice, fear of the consequences. This is why we flatter the diviners, saying: "Master, shall I inherit my father's property?" "Let us see; let us offer a sacrifice about that matter." "Yes, master, as fortune wills." Then if the diviner says, "You will inherit the property," we thank him as though we had received the inheritance from him. That is why they in their turn go on making mock of us. Well, what then? We ought to go to them without either desire or aversion, just as the wayfarer asks the man who meets him which of two roads leads to his destination, without any desire to have the righthand road lead there any more than the left-hand road; for he does not care to travel one particular road of the two, but merely the one that leads to his destination. So also we ought to go to God as a guide, making use of Him as we make use of our eyes; we do not call upon them to show us such-and-such things by preference, but we accept the impressions of precisely such things as they reveal to us. But as it is, we tremble before the bird-augur, lay hold upon him, and appealing to him as if he were a god, we beg of him, saying: "Master, have mercy; grant that I come off safe." You slave! What, do you want anything but what is best for you? Is anything else best for you than what pleases God? Why do you do all that in you lies to corrupt your judge, to mislead your counsellor?

EPICTETUS CHAPTER 8 - What Is The True Nature Of The Good?

God is helpful; but the good also is helpful. It would seem, therefore, that the true nature of the good will be found to be where we find that of God to be. What, then, is the true nature of God? Flesh? Far from it! Land? Far from it! Fame? Far from it! It is intelligence, knowledge, right reason. Here, therefore, and only here, shall you seek the true nature of the good. Surely you do not seek it at all in a plant, do you? No. Nor in an irrational creature? No. If, then, you seek it in that which is rational, why do you keep on seeking it somewhere else than in that which differentiates the rational from the irrational? Plants are incapable of dealing even with external impressions: for that reason you do not speak of the "good" in referring to them. The good requires, therefore, the faculty of using external impressions. Can that be all that it requires? For, if that be all, then you must assert that things good, and happiness and unhappiness, are to be found in the other animals as well as in man. But, as a matter of fact, you do not so assert, and you are right; for even if they have in the highest degree the faculty of using external impressions, still they do not have the faculty of understanding, at all events, their use of the external impressions. And with good reason; for they are born to serve others, and are not themselves of primary importance. The ass, for example, is not born to be of primary importance, is it? No; but because we had need of a back that was able to carry something. But, by Zeus, we had need that it should be able also to walk around: therefore it has further received the faculty of using external impressions; for otherwise it would not be able to walk around. And at about that stage there was an end. But if it, like man, had somehow received the faculty of understanding the use of its external impressions, it is also clear that consequently it would no longer be subject to us, nor would it be performing these services, but would be our equal and our peer. Will vou not, therefore, seek the true nature of the good in that quality the lack of which in all creatures other than man prevents you from using the term "good" of any of these? "But what then? Are not those creatures also works of God?" They are, but they are not of primary importance, nor portions of Divinity. But you are a being of primary importance; you are a fragment of God; you have within you a part of Him. Why, then, are you ignorant of your own kinship? Why do you not know the source from which you have sprung? Will you not bear in mind, whenever you eat, who you are that eat, and whom you are nourishing? Whenever you indulge in intercourse with women, who you are that do this? Whenever you mix in society, whenever you take physical exercise, whenever you converse, do you not know that you are nourishing God, exercising God? You are bearing God about with you, you poor wretch, and know it not! Do you suppose I am speaking of some external God, made of silver or gold? It is within yourself that you bear Him, and do not perceive that you are defiling Him with impure thoughts and filthy actions. Yet in the presence of even an image of God you would not dare to do anything of the things you are now doing. But when God Himself is present within you, seeing and hearing everything, are you not ashamed to be thinking and doing such things as these, O insensible of your own nature, and object of God's wrath!

15Again, when we send a young man forth from the school to sundry activities, why are we afraid that he will do something amiss-eat amiss, have intercourse with women amiss, be abased if dressed in rags or conceited if he has on fine clothes? This fellow does not know the God within him, this fellow does not know the companion with whom he is setting forth. Nay, can we allow him to say, "O God, would that I had Thee here"? Have you not God there, where you are? And when you have Him, do you seek for someone else? Or will He have other commands for you than these? Nay, if you were a statue of Pheidias, his Athena or his Zeus, you would have remembered both yourself and your artificer, and if you had any power of perception you would have tried to do nothing unworthy of him that had fashioned you, nor of yourself, and you would have tried not to appear in an unbecoming attitude before the eyes of men; but as it is, because Zeus has made you, do you on that account not care what manner of person you show yourself to be? And yet what comparison is there between the one artificer and the other, or between the one work of art and the other? And what work of an artificer has forthwith within itself the faculties which its workmanship discloses? Is it not mere stone, or bronze, or gold, or ivory And the Athena of Pheidias, when once it had stretched out its hand and received the Nike upon it, stands in this attitude for all time to come; but the works of God are capable of movement, have the breath of life, can make use of external impressions, and pass judgement upon them. Do you dishonour the workmanship of this Craftsman, when you are yourself that workmanship? Nay more, do you go so far as to forget, not only that He fashioned you, but also that He entrusted and committed you to yourself alone, and moreover, by forgetting, do you dishonour your trust? Yet if God had committed some orphan to your care, would you so neglect Him? He has delivered your own self into your keeping, saying, "I had no one more faithful than you: keep this man for me unchanged from the character with which nature endowed him-reverent, faithful, high-minded, undismayed, unimpassioned, unperturbed." After that do you fail so to keep him?

"But men will say, 'Where do you suppose our friend here got his proud look and his solemn countenance?" Ah, but my bearing is not yet what it should be! For I still lack confidence in what I have learned and agreed to; I am still afraid of my own weakness. Just let me gain confidence and then you will see the right look in my eye and the right bearing; then, when the statue is finished and polished, I will show it to you. What do you think of it? A lofty air, say you? Heaven forbid! For the Zeus at Olympia does not show a proud look, does he? No, but his gaze is steady, as befits one who is about to say.

No word of mine can be revoked or prove untrue.

Of such character will I show myself to you—faithful, reverent, noble, unperturbed. You do not mean, therefore, immortal, or ageless, or exempt from disease? No, but one who dies like a god, who bears disease like a god. This is what I have; this is what I can do; but all else I neither have nor can do. I will show you the sinews of a philosopher. What do you mean by sinews? A desire that fails not of achievement, an aversion proof against encountering what it would avoid, an appropriate choice, a thoughtful purpose, a well-considered assent. This is what you shall see.

EPICTETUS CHAPTER 9 - That Although We Are Unable To Fulfil The Profession Of A Man, We Adopt That Of A Philosopher

It is no simple task, this of fulfilling merely the profession of a man. For what is a man? A rational, mortal animal, someone says. To begin with, from what are we distinguished by the rational element? From the wild beasts. And from what else? From sheep and the like. See to it, then, that you never act like a wild beast; if you do, you will have destroyed the man in you, you have not fulfilled your profession. See to it that you never act like a sheep; if you do, the man in you is destroyed in this way also. Well, when do we act like sheep? When we act for the sake of the belly, or of our sex-organs, or at random, or in a filthy fashion, or without due consideration, to what level have we degenerated? To the level of sheep. What have we destroyed? The reason. When we act pugnaciously, and injuriously, and angrily, and rudely, to what level have we degenerated? To the level of the wild beasts Well, the fact is that some of us are wild beasts of a larger size, while others are little animals, malignant and petty, which give us occasion to say, "Let it be a lion that devours me!" By means of all these actions the profession of a man is destroyed. For when is a complex thing preserved? When it fulfils its profession; consequently, the salvation of a complex thing is to be composed of parts that are true. When is a discrete thing preserved? When it fulfils its profession. When are flutes, a lyre, a horse, a dog preserved? What is there to be surprised at, then, if a man also is preserved in the same way and in the same way destroyed? Now deeds that correspond to his true nature strengthen and preserve each particular man; carpentry does that for the carpenter, grammatical studies for the grammarian. But if a man acquires the habit of writing ungrammatically, his art must necessarily be destroyed and

perish. So modest acts preserve the modest man, whereas immodest acts destroy him; and faithful acts preserve the faithful man while acts of the opposite character destroy him. And again, acts of the opposite character strengthen men of the opposite character; shamelessness strengthens the shameless man, faithlessness the faithless, abuse the abusive, wrath the wrathful, a disproportion between what he receives and what he pays out the miserly.

That is why the philosophers admonish us not to be satisfied with merely learning, but to add thereto practice also, and then training. For in the course of years we have acquired the habit of doing the opposite of what we learn and have in use opinions which are the opposite of the correct ones. If, therefore, we do not also put in use the correct opinions, we shall be nothing but the interpreters of other men's judgements. For who is there among us here and now that cannot give a philosophical discourse about good and evil? It will run like this: Of things that be, some are good, others evil, and others indifferent; now good things are virtues and everything that partakes in the virtues; evil are the opposite; while indifferent are wealth, health, reputation. Then, if we are interrupted in the midst of our speech by some unusually loud noise, or if someone in the audience laughs at us, we are upset. Where, you philosopher, are the things you are talking about? Where did you get what you were just saying? From your lips, and that is all. Why, then, do you pollute the helpful principles that are not your own? Why do you gamble about matters of the very utmost concern? For to store away bread and wine in a pantry is one thing, and to eat them is another. What is eaten is digested, distributed, becomes sinews, flesh, bones, blood, a good complexion, easy breathing. What is stored away you can readily take and show whenever you please, but you get no good from it except in so far as you are reputed to possess it. For how much better is it to set forth these principles than those of other schools of thought? Sit down now and give a philosophical discourse upon the principles of Epicurus, and perhaps you will discourse more effectively than Epicurus himself. Why, then, do you call yourself a Stoic, why do you deceive the multitude, why do you act the part of a Jew [It would appear (especially from the expression "counterfeit 'baptists'" below) that Epictetus is here speaking really of the Christians, who were in his time frequently confused with the Jews.], when you are a Greek? Do you not see in what sense men are severally called Jew, Syrian, or Egyptian? For example, whenever we see a man halting between two faiths, we are in the habit of saying, "He is not a Jew, he is only acting the part." But when he adopts the attitude of mind of the man who has been baptized and has made his choice, then he both is a Jew in fact and is also called one. So we also are counterfeit "baptists," ostensibly Jews [or Christians; contemporaries could not distinguish them because both were messianist movements at that time], but in reality something else, not in sympathy with our own reason, far from applying the principles which we profess, yet priding ourselves upon them as being men who know them. So, although we are unable even to fulfil the profession of man, we take on the additional profession of the philosopher-so huge a burden! It is as though a man who was unable to raise ten pounds wanted to lift the stone of Aias [The huge one with which he beat down Aeneas. Homer, Iliad, 7 2641

EPICTETUS CHAPTER 10 - How Is It Possible To Discover A Man's Duties From The Designations Which He Bears?

Consider who you are. To begin with, a Man; that is, one who has no quality more sovereign than moral choice, but keeps everything else subordinate to it, and this moral choice itself free from slavery and subjection. Consider, therefore, what those things are from which you are separated by virtue of the faculty of reason. You are separated from wild beasts, you are separated from sheep. In addition to this you are a citizen of the world, and a part of it, not one of the parts destined for service, but one of primary importance; for you possess the faculty of understanding the divine administration of the world, and of reasoning upon the consequences thereof. What, then, is the profession of a citizen? To treat nothing as a matter of private profit, not to plan about anything as though he were a detached unit, but to act like the foot or the hand, which, if they had the faculty of reason and understood the constitution of nature, would never exercise choice or desire in any other way but by reference to the whole. Hence the philosophers well say that if the good and excellent man knew what was going to happen, he would help on the processes of disease and death and maiming, because he would realise that this allotment comes from the orderly arrangement of the whole, and the whole is more sovereign than the part, and the state more sovereign than the citizen. But as it is, seeing that we do not know beforehand what is going to happen, it is our duty to cleave to that which is naturally more fit to be chosen, since we are born for this purpose.

Next bear in mind that you are a Son. What is the profession of this character? To treat everything that is his

own as belonging to his father, to be obedient to him in all things, never to speak ill of him to anyone else, nor to say or do anything that will harm him, to give way to him in everything and yield him precedence, helping him as far as is within his power.

Next know that you are also a Brother. Upon this character also there is incumbent deference, obedience, kindly speech, never to claim as against your brother any of the things that lie outside the realm of your free moral choice, but cheerfully to give them up, so that in the things that do lie within the realm of your free moral choice you may have the best of it. For see what it is, at the price of a head of lettuce, if it so chance, or of a seat, for you to acquire his goodwill—how greatly you get the best of it thre!

Next, if you sit in the town council of some city, remember that you are a councillor; if you are young, remember that you are young; if old, that you are an elder; if a father, that you are a father. For each of these designations, when duly considered, always suggests the acts that are appropriate to it. But if you go off and speak ill of your brother, I say to you, 'You have forgotten who you are and what your designation is " Why, if you were a smith and used your hammer amiss, you would have forgotten the smith you were; but if you forget the brother you are, and become an enemy instead of a brother, will you seem to yourself to have exchanged nothing for nothing? And if, instead of being a man, a gentle and social being, you have become a wild beast, a mischievous, treacherous, biting animal, have you lost nothing? What, must you lose a bit of pelf so as to suffer damage, and does the loss of nothing else damage a man? Yet, if you lost your skill in the use of language or in music, you would regard the loss of it as damage; but if you are going to lose self-respect and dignity and gentleness, do you think that does not matter? And yet those former qualities are lost from some external cause that is beyond the power of our will, but these latter are lost through our own fault: and it is neither noble to have nor disgraceful to lose these former qualities, but not to have these latter, or having had them to lose them, is a disgrace and a reproach and a calamity. What is lost by the victim of unnatural lust? His manhood. And by the agent? Beside a good many other things he also loses his manhood no less than the other. What does the adulterer lose? He loses the man of self-respect that was, the man of self-control, the gentleman, the citizen, the neighbour. What does the man lose who is given to anger? Something else. Who is given to fear? Something else. No one is evil without loss and damage. Furthermore, if you look for your loss in pelf, all those whom I have just mentioned suffer neither injury nor loss nay if it so chance, they even get gain and profit, when, through some of their deeds just mentioned, they also acquire pelf. But observe that if you make paltry pelf your standard for everything, not even the man who loses his nose will in your eyes have suffered an injury.—"Oh yes, he has," someone says, "for his body is mutilated."—Come now, and does the man who has lost his entire sense of smell lose nothing? Is there then, no such thing as a faculty of the mind, the possession of which means gain to a man, and the loss, injury?-What faculty do you mean? Have we not a natural sense of selfrespect?-We have.-Does not the man who destroys this suffer a loss, is he not deprived of something, does he not lose something that belonged to him? Do we not have a natural sense of fidelity, a natural sense of affection, a natural sense of helpfulness, a natural sense of keeping our hands off one another? Shall, therefore, the man who allows himself to suffer loss in such matters, be regarded as having suffered neither injury nor loss?

Well, what then? Am I not to injure the man who has injured me?-First consider what injury is, and call to mind what you have heard the philosophers say. For if the good lies in moral purpose, and the evil likewise in moral purpose, see if what you are saying does not come to something like this, "Well, what then? Since so-and-so has injured himself by doing me some wrong, shall I not injure myself by doing him some wrong?" Why, then, do we not represent the case to ourselves in some such light as that? Instead of that, where there is some loss affecting our body or our property, there we count it injury; but is there no injury where the loss affects our moral purpose? For the man who has been deceived or who has done some wrong has no pain in his head, or his eye, or his hip, neither does he lose his land. But these are the things we care for and nothing else; yet the question whether we are going to have a moral purpose characterized by selfrespect and good faith, or by shamelessness and bad faith, does not so much as begin to disturb us, except only in so far as we make it a topic of trivial discussion in the classroom. Therefore, so far as our trivial discussions go, we do make some progress, but, apart from them, not even the very least.

EPICTETUS CHAPTER 11 - What Is The Beginning Of Philosophy?

The beginning of philosophy with those who take it up as they should, and enter in, as it were, by the gate, is a consciousness of a man's own weakness and impotence with reference to the things of real consequence in life. For we come into being without any innate concept of a right-angled triangle, or of a half-tone musical interval, but by a certain systematic method of instruction we are taught the meaning of each of these things, and for that reason those who do not know them also do not fancy that they do. But, on the other hand, who has come into being without an innate concept of what is good and evil, honourable and base, appropriate and inappropriate, and happiness, and of what is proper and falls to our lot, and what we ought to do and what we ought not to do? Wherefore, we all use these terms and endeavour to adapt our preconceptions about them to the individual instances. "He has done well, as he ought, or as he ought not; he has been unfortunate, or fortunate; he is a wicked man, or he is a just man"-who of us refrains from expressions of this kind? Who of us waits before he uses them until he has learned what they mean, as those who have no knowledge of lines or sounds wait before they use the terms relating to them? The reason is that we come into the world with a certain amount of instruction upon this matter already given us, as it were, by nature, and that starting with this we have added thereto our opinion.—Yes, by Zeus, for do I in my own case not have by gift of nature knowledge of what is noble and base: do I not have a concept of the matter?-You do.-Do I not apply it to individual instances?-You do.-Do I not, then, apply it properly?-There lies the whole question, and there opinion comes in. For men start with these principles upon which they are agreed, but then, because they make an unsuitable application of them, get into disputes. Since if, in addition to having the principles themselves, they really possessed also the faculty of making suitable application of the same, what could keep them from being perfect? But now, since you think that can also apply your preconceptions suitably to the individual cases, tell me, whence do you get this gift?-It is because I think so .- But on this precise point someone else does not think so, and yet he too fancies that he is applying the principles properly, does he not?-He does so fancy. Can both of you, then, be making suitable applications of your preconceptions in the matters upon which your opinions are at variance?-We cannot.-Can you, then, show us anything higher than your own opinion which will make it possible for us to apply our preconceptions better? And does the madman do anything else but that which seems to him to be good? Is this criterion, then, sufficient in his case also?-It is not.-Go, therefore, to something higher than your own opinion, and tell us what that is.

Behold the beginning of philosophy!-a recognition of the conflict between the opinions of men, and a search for the origin of that conflict and a condemnation of mere opinion coupled with scepticism regarding it, and a kind of investigation to determine whether the opinion is rightly held, together with the invention of a kind of standard of judgement, as we have invented the balance for the determination of weights, or the carpenter's rule for the determination of things straight and crooked.-Is this the beginning of philosophy? Is everything right that every man thinks? Nay, how is it possible for conflicting opinions to be right? Consequently, not all opinions are right.-But are our opinions right? Why ours, rather than those of the Syrians; why ours, rather than those of the Egyptians; why ours, rather than my own, or those of so-and-so?-There is no reason why.-Therefore, the opinion which each man holds is not a sufficient criterion for determining the truth; for also in the case of weights and measures we are not satisfied with the mere appearance, but we have invented a certain standard to test each. In the present case, then, is there no standard higher than opinion? And yet how can it possibly be that matters of the utmost consequence among men should be undeterminable and undiscoverable.-Therefore, there is some standard.-Then why do we not look for it and find it, and when we have found it thenceforth use it unswervingly, not so much as stretching out our finger without it? For this is something, I think, the discovery of which frees from madness those who use only opinion as the measure of all things, so that thenceforward, starting with certain principles that are known and clearly discriminated, we may use in the judgement of specific cases an organically articulated system of preconceived ideas.

What subject has arisen that we wish to investigate?— Pleasure.—Subject it to the standard, put it into the balance. Should the good be the sort of thing that we can properly have confidence and trust in?—It should.—Can we properly have confidence, then, in something that is insecure?—No.— Pleasure contains no element of security, does it?—No.— Away with it, then, and throw it out of the balance, and drive it far away from the region of things good. But if you are not endowed with keen eyesight and if one balance is not enough for you, bring another. Can one properly feel elated over the good?—Yes.—Can one properly feel elated, then, over the moment's pleasure? See that you do not say that it is proper; if you do, I shall no longer regard you as a proper person even to have a balance!

And so are matters judged and weighed, if we have the standards ready with which to test them; and the task of philosophy is this—to examine and to establish the standards; but to go ahead and use them after they have become known is the task of the good and excellent man.

EPICTETUS CHAPTER 12 - Upon The Art Of Argumentation

What a man ought to learn before he will know how to conduct an argument has been precisely defined by the philosophers of our school; but as to the proper use of what we have learned we are still utterly inexperienced. At all events, give to anyone of us you please some layman with whom to carry on an argument; he will find no way of dealing with him, but after moving the man a little, in case the latter thwarts him, our man gives up trying to handle him, and thereafter either reviles him, or laughs him to scorn, and remarks. "He is a mere layman: it is impossible to do anything with him." But the real guide, whenever he finds a person going astray, leads him back to the right road, instead of leaving him with a scornful laugh or an insult. So also do you show him the truth and you will see that he follows. But so long as you do not show him the truth, do not laugh him to scorn, but rather recognise your own incapacity.

How did Socrates act? He used to force the man who was arguing with him to be his witness, and never needed any other witness. That is why he could say, "I can dispense with all the others, and am always satisfied to have my fellowdisputant for a witness; and the votes of the rest I do not take, but only that of my fellow-disputant." [A free paraphrase of Plato, Gorgias, 474A; compare also 472C. A still freer paraphrase of the same general idea appears in 2. 26, 6.] For he used to make so clear the consequences which followed from the concepts, that absolutely everyone realised the contradiction involved and gave up the battle. "And so does the man who feels envy rejoice in it?"—"Not at all; but he experiences pain rather than joy." (By the contradiction in terms he has moved the other party to the argument.) "Very well, does envy seem to you to be feeling of pain at evils? And yet what envy is there of evils?" (Consequently, he has made his opponent say that envy is a feeling of pain at good things.) "Very well, would a man feel envy about matters that did not concern him in the least?"—"Not at all." And so he filled out and articulated the concept, and after that went his way; he did not start in by saying, "Define envy for me," and then, when the other had defined it, remark, "That is a bad definition you have made, for the definition term does not fit the subject defined." Those are technical terms, and for that reason wearisome to the layman and hard for him to follow, and yet we are unable to dispense with them. But as to terms which the lavman could himself follow, and so, by the assistance of his own external impressions, be able to accept or reject some proposition-we are absolutely unable to move him by their use. The result is that, recognising this incapacity of ours, we naturally refrain from attempting the matter, those of us, I mean, who are at all cautious. But the rash multitude of men, when once they have let themselves in for something of this sort, get confused themselves and confuse others, and finally, after reviling their opponents and being themselves reviled, they walk away.

Now this was the first and most characteristic thing about Socrates, that he never got wrought up during an argument, never used any term of abuse or insolence, but endured the abuse of others, and put an end to strife. If you wish to know how great was the faculty he had in this field, read the Symposium of Xenophon, and you will see how many cases of strife he settled. Therefore, and with good reason, among the poets also very high praise has been accorded to the following sentiment:

"Soon doth he shrewdly make an end of a quarrel though weighty."

Well, what then? Nowadays this activity is not a very safe one, and especially so in Rome. For the man who engages in it will clearly be under obligation not to do it in a corner, but he must go up to some rich person of consular rank, if it so chance, and ask him, "You there, can you tell to whose care you have entrusted your horses?" "I can, indeed," answers the man. "Is it, then, some chance comer, a man who knows nothing about the care of horses?" "Not at all." "And what then? Can you tell me to whom you have entrusted your gold, or your silver, or your clothing?" "I have not entrusted these, either, to a chance comer," "And have you ever thought about entrusting your body to someone to look after it?" "Why, certainly." "And, of course, he too is a man of special skill in the art of physical training, or medicine, is he not?" "Yes. indeed." "Are these your most valuable possessions, or have you something else that is better than all of them?" "Just what do you mean?" "That, by Zeus, which utilizes these other things, and puts each of them to the test, and exercises deliberation?" "Ah so, you are talking about my soul, are vou?" 'You have understood me aright, for it is precisely this that I am talking about." "By Zeus, I regard this as far and away the most valuable of all my possessions." "Can you, then, tell in what way you have taken care of your soul? For it is not to be supposed that as wise a man as yourself and one so honoured in the city is recklessly and at random allowing the very best of his possessions to go to ruin through neglect."

"Certainly not." "But have you yourself taken care of that possession? Did you learn how to take care of it from somebody else, or did you discover how yourself?" Then comes the danger that first he will say, "What is that to you, good sir? Are you my master?" and after that, if you persist in annoying him, that he will lift his fist and give you a blow. This was a pursuit that I too was very fond of once upon a time, before I fell to my present estate.

EPICTETUS CHAPTER 13 - Of Anxiety

When I see a man in anxiety, I say to myself, What can it be that this fellow wants? For if he did not want something that was outside of his control, how could he still remain in anxiety? That is why the citharoede when singing all alone shows no anxiety, but does so when he enters the theatre, even though he has a very beautiful voice and plays the cithara admirably; for he does not wish merely to sing well, but also to win applause, and that is no longer under his control. Accordingly, where he has skill, there he shows confidence. Set before him any layman that you please, and the musician pays no attention to him; but in a matter of which he has no knowledge, and which he has never studied, there he is in anxiety. What is the meaning of this? Why, he simply does not know what a crowd is, or the applause of a crowd; to be sure, he has learned how to strike the lowest and the highest strings on the cithara, but what the praise of the multitude is, and what function it has in life, that he neither knows nor has studied. Hence he must needs tremble and turn pale.

Now then. I cannot say that the man is not a citharoede. when I see anyone in a state of fear, but I can say something else of him, and, indeed, not one thing only, but a number of things. And first of all, I call him a stranger and say: This man does not know where in the world he is, but though he has been living here so long a time, he is ignorant of the laws of the city and its customs, what he is allowed to do and what he is not allowed to do. Nay more, he has never even called in a lawyer to tell him and explain to him what are the usages conformable with law; yet he does not write a will without knowing how he ought to write it or else calling in an expert, nor does he just casually affix his seal to a bond or give a written guarantee; but without the services of a lawyer he exercises desire and aversion and choice and design and purpose. How do I mean "without the services of a lawyer"? Why, he does not know that he is wishing for things that are not vouchsafed him, and wishing to avoid the inevitable, and he does not know either what is his own or what is another's. Did he but know, he would never feel hindered, never constrained would not be anxious. How could he? Is any man in fear about things that are not evil?-No.-What then? Is he in fear about things that are evil, indeed, but that are in his own power to prevent?-Not at all.-If, then, things indifferent are neither good nor bad, but all matters of moral purpose are under our control, and no man can either take them away from us, or bring upon us such of them as we do not wish what room is there left for anxiety? Yet we are anxious about our wretched body, about our trifling estate, about what Caesar will think, but are anxious about none of the things that are within us. We are not anxious about not conceiving a false opinion, are we?-No, for that is under my control.-Or about making a choice contrary to nature?-No, not about this, either.—Then, whenever you see a man looking pale, just as the physician judging from the complexion says, "This mans spleen is affected, and this man's liver," so do you also say, "This man's desire and aversion are affected, he is not getting along well, he is feverish." For there is nothing else that changes a man's complexion, or makes him tremble, or his teeth to chatter, or to

'Shift from knee to knee and rest on either foot."

That is why Zeno was not anxious when he was about to meet Antigonus; for over none of the things that Zeno regarded highly did Antigonus have power, and what Antigonus did have power over Zeno cared nothing about. But Antigonus was anxious when he was about to meet Zeno, and very naturally so; for he wanted to please him, and that lay outside of his control; yet Zeno did not care about pleasing him, any more than any other artist cares about pleasing one who has no knowledge of his art.

Do I care to please you? What do I gain thereby? For do you know the standards according to which man is judged by man? Have you been concerned to know what a good man is, and what an evil man, and how each becomes what he is? Why, then, are you not a good man yourself?-How do you make out, he answers, that I am not a good man?-Why, because no good man grieves or groans, no good man laments, no good man turns pale and trembles, or asks, "How will he receive me? How will he listen to me?" You slave! He will receive you and listen to you as seems best to him. Why, then, are you concerned about things that are not your own? Now is it not his own fault if he gives a bad reception to what you have to say?—Of course.—Is it possible for one man to make the mistake and yet another suffer the harm?-No.then, are you anxious over what is not your own?-That is all very well, but I am anxious over how I shall speak to him. What, are you not privileged to speak to him as you please?-

THE GRAND BIBLE

Yes, but I am afraid that I shall be disconcerted.-You are not afraid of being disconcerted when you are about to write the name Dio, are you?-No, not at all.-What is the reason? Is it not that you have practised writing?-Yes, of course.-What then? If you were about to read something, would you not feel the same way about it?-Quite the same.-What is the reason? Why, because every art has an element of strength and confidence inside its own field. Have you, then, not practised speaking? And what else did you practise in your school?-Syllogisms and arguments involving equivocal To what end? Was it not to enable you to premisses.conduct an argument skilfully? And does not "skilfully" mean seasonably and securely and intelligently, and, more than that, without making mistakes and without embarrassment, and, in addition to all this, with confidence?—Surely.—Well then, if you are on horseback and have ridden out upon the plain against a man who is on foot, are you in anxiety, assuming that you are in practice and the other is not?-Yes, that is all very well, but Caesar has authority to put me to death .-Then tell the truth, wretch, and do not brag, nor claim to be a philosopher, nor fail to recognise your masters; but as long as you let them have this hold on you through your body, follow everyone that is stronger than you are. But Socrates used to practise speaking to some purpose-Socrates, who discoursed as he did to the Tyrants, to his judges, and in the prison. Diogenes had practised speaking-Diogenes, who talked to Alexander as he did, to Philip, to the pirates, to the man who had bought him . . . [Leave such matters] to those who are seriously interested in them, to the brave; but do you walk away to your own concerns and never depart from them again; go into your corner and sit down, and spin syllogisms and propound them to others:

"In thee the State hath found no leader true."

EPICTETUS CHAPTER 14 - To Naso

Once when a certain Roman citizen accompanied by his son had come in and was listening to one of his readings, Epictetus said: This is the style of my teaching, and then lapsed into silence. But when the other requested to know what came next, he replied: Instruction in the technique of any art is boring to the layman who has had no experience in it. Now the products of the arts show immediately their use towards the purpose for which they are made, and most of them possess also a certain attractiveness and charm. For example, to stand by and watch the process by which a shoemaker learns his trade is, indeed, not pleasant, yet the shoe is useful and not an unpleasant thing to look at either. And the process of education in the case of a carpenter is especially tiresome to the layman who happens to be watching. but the work which the carpenter does shows the use of his art. You will find the same much more true in the case of music; for if you are standing by when someone is taking a lesson, the process of instruction will strike you as the most unpleasant of all, yet the results of music are sweet and pleasing to the ear of the lavman.

So also in our own case, we picture the work of the philosopher to be something like this: He should bring his own will into harmony with what happens, so that neither anything that happens happens against our will, nor anything that fails to happen fails to happen when we wish it to happen. The result of this for those who have so ordered the work of philosophy is that in desire they are not disappointed, and in aversion they do not fall into what they would avoid; that each person passes his life to himself, free from pain, fear, and perturbation, at the same time maintaining with his associates both the natural and the acquired relationships, those namely of son, father, brother, citizen, wife, neighbour, fellowtraveller, ruler, and subject.

Something like this is our picture of the work of the philosopher. The next thing after this is that we seek the means of achieving it. We see, then, that the carpenter becomes a carpenter by first learning something, the helmsman becomes a helmsman by first learning something. May it not be, then, that in our case also it is not sufficient to wish to become noble and good, but that we are under the necessity of learning something first? We seek, then, what this is. Now the philosophers say that the first thing we must learn is this: That there is a God, and that He provides for the universe, and that it is impossible for a man to conceal from Him, not merely his actions, but even his purposes and his thoughts. Next we must learn what the gods are like; for whatever their character is discovered to be, the man who is going to please and obey them must endeavour as best he can to resemble them. If the deity is faithful, he also must be faithful; if free, he also must be free; if beneficent, he also must be beneficent; if high-minded, he also must be high-minded, and so forth; therefore, in everything he says and does, he must act as an imitator of God

Where, then, ought I to start?—If you enter upon this task, I will say that in the first place you ought to understand the meaning of terms.—So you imply that I do not now understand the meaning of terms?—You do not.—How comes it, then, that I use them?—Why, you use them as the illiterate use written speech, as the cattle use external

impressions; for use is one thing, and understanding another. But if you think you understand terms, propose any term you please, and let us put ourselves to the test, to see whether we understand it.-But it is unpleasant to be subjected to an examination when one is already somewhat advanced in years, and, if it so chance, has served his three campaigns .--- I realise that myself. For now you have come to me like a man who stood in need of nothing. But what could anyone even imagine you to be in need of? You are rich, you have children, possibly also a wife, and many slaves; Caesar knows you, you have many friends in Rome, you perform the duties incumbent upon you, and when a man has done you either good or harm you know how to pay him back in kind. What do you still lack? If, therefore, I show you that what you lack are things most necessary and important for happiness, and that hitherto you have devoted your attention to everything but what was appropriate for you to do, and if I add the colophon, saying: You know neither what God is, nor what man is, nor what good, nor what evil is-20if I say that you are ignorant of these other matters you may possibly endure that; but if I say that you do not understand your own self, how can you possibly bear with me, and endure and abide my questioning? You cannot do so at all, but immediately you go away offended. And yet what harm have I done you? None at all, unless the mirror also does harm to the ugly man by showing him what he looks like; unless the physician insults the patient, when he says to him, "Man, you think there is nothing the matter with you; but you have a fever; fast to-day and drink only water"; and no one says, "What dreadful insolence!" Yet if you tell a man, "Your desires are feverish, your attempts to avoid things are humiliating, your purposes are inconsistent, your choices are out of harmony with your nature, your conceptions are hit-or-miss and false," why, immediately he walks out and says, "He insulted me."

Our position is like that of those who attend a fair. Cattle and oxen are brought there to be sold, and most men engage in buying and selling, while there are only a few who go merely to see the fair, how it is conducted, and why, and who are promoting it, and for what purpose. So it is also in this "fair" of the world in which we live; some persons, like cattle, are interested in nothing but their fodder; for to all of you that concern yourselves with property and lands and slaves and one office or another, all this is nothing but fodder! And few in number are the men who attend the fair because they are fond of the spectacle. "What, then, is the universe," they ask, "and who governs it? No one? Yet how can it be that, while it is impossible for a city or a household to remain even a very short time without someone to govern and care for it. nevertheless this great and beautiful structure should be kept in such orderly arrangement by sheer accident and chance? There must be, therefore, One who governs it. What kind of a being is He, and how does He govern it? And what are we, who have been created by Him, and for what purpose were we created? Do we, then, really have some contact and relation with Him or none at all?" That is the way these few are affected; and thenceforward they have leisure for this one thing only-to study well the "fair" of life before they leave it. With what result, then? They are laughed to scorn by the crowd, quite as in the real fair the mere spectators are laughed at by the traffickers; yes, and if the cattle themselves had any comprehension like ours of what was going on, they too would laugh at those who had wonder and admiration for anything but their fodder!

EPICTETUS CHAPTER 15 - To Those Who Cling Obstinately To The Judgements Which They Have Once Formed

Some men, when they hear the following precepts: That one ought to be steadfast, and that the moral purpose is naturally free and not subject to compulsion, while everything else is liable to interference and compulsion, subject to others and not our own—some men, I say, fancy that whenever they have formed a judgement they ought to stand by it immovably. And yet the first requirement is that the judgement formed be a sound one. For I want vigour in the body, but it must be the vigour of the body in a state of health and physical exercise; whereas, if you show me that you possess the vigour of a madman, and boast about it, I will say to you, "Man, look, for someone to cure you. This is not vigour, but feebleness."

The following is another way in which the minds of those are affected who hear these precepts amiss. For example, a friend of mine for no reason at all made up his mind to starve himself to death. Ilearned about it when he was already in the third day of his fasting, and went and asked what had happened.—I have decided, he answered.—Very well, but still what was it that induced you to make up your mind? For if your judgement was good, see, we are at your side and ready judgement was irrational, change it.—I must abide by my decisions.—Why, man, what are you about? You mean not all your decisions, but only the right ones. For example, if you are convinced at this moment that it is night, do not change your opinion, if that seems best to you, but abide by it and say that you ought to abide by your decisions! Do you not

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3044 wish to make your beginning and your foundation firm, that is, to consider whether your decision is sound or unsound, and only after you have done that proceed to rear thereon the structure of your determination and your firm resolve? But if you lay a rotten and crumbling foundation, you cannot rear thereon even a small building, but the bigger and the stronger your superstructure is the more quickly it will fall down. Without any reason you are taking out of this life, to our detriment, a human being who is a familiar friend, a citizen of the same state, both the large state and the small; and then, though in the act of murder, and while engaged in the destruction of a human being that has done no wrong, you say that you "must abide by your decisions"! But if the idea ever entered your head to kill me, would you have to abide by your decisions?

Well, it was hard work to persuade that man; but there are some men of to-day whom it is impossible to move. So that I feel that I now know what I formerly did not understandthe meaning of the proverb, "A fool you can neither persuade nor break." God forbid that I should ever have for a friend a wise fool! There is nothing harder to handle. "I have decided," he says! Why yes, and so have madmen; but the more firm their decision is about what is false, the more hellebore they need. Will you not act like a sick man, and summon a physician? "I am sick, sir; help me. Consider what I ought to do; it is my part to obey you." So also in the present instance. "I know not what I ought to be doing, but I have come to find out." Thus one should speak. No, but this is what one hears, "Talk to me about anything else, but on this point I have made my decision." "Anything else" indeed! Why, what is more important or more to your advantage than to be convinced that it is not sufficient for a man merely to have reached decisions, and to refuse to change? These are the sinews of madness, not health. "If you force me to this, I would gladly die." What for, man? What has happened? "I have decided!" It was fortunate for me that you did not decide to kill me! Or again, another says, "I take no money for my services." Why so? "Because I have decided." Rest assured that there is nothing to prevent you from some day turning irrationally to taking money for your services, and that with the same vehemence with which you now refuse to take it, and then saying again, "I have decided"; precisely as in a diseased body, suffering from a flux, the flux inclines now in this direction and now in that. Such is also the sick mind; it is uncertain which way it is inclined, but when vehemence also is added to this inclination and drift, then the evil gets past help and past cure.

EPICTETUS CHAPTER 16 - That We Do Not Practise The Application Of Our Judgements About Things Good And Evil

Wherein lies the good?-In moral purpose.-Wherein lies evil?-In moral purpose.-Wherein lies that which is neither good nor evil?-In the things that lie outside the domain of moral purpose.-Well, what of it? Does any one of us remember these statements outside the classroom? Does any one of us when by himself practise answering facts in the way he answers these questions? "So it is day, is it?" "Yes." "What then? Is it night?" "No." "What then? Is the number of the stars even?" "I cannot say." When you are shown money, have you practised giving the proper answer, namely, that it is not a good thing? Have you trained yourself in answers of this kind, or merely to answer sophisms? Why, then, are you surprised to find that in the fields in which you have practised you surpass yourself, but in that in which you have not practised you remain the same? For why is it that the orator, although he knows that he has composed a good speech, has memorized what he has written and is bringing a pleasing voice to his task, is still anxious despite all that? Because he is not satisfied with the mere practice of oratory. What, then, does he want? He wants to be praised by his audience. Now he has trained himself with a view to being able to practise oratory, but he has not trained himself with reference to praise and blame. For when did he ever hear any one say what praise is, what blame is, and what is the nature of each? What kinds of praise are to be sought, and what kinds of blame are to be avoided? And when did he ever go through this course of training in accordance with these principles? Why, then, are you any longer surprised because he surpasses all others in the field in which he has studied, but in that in which he has not practised he is no better than the multitude? He is like a citharoede who knows how to play to the harp, sings well, has a beautiful flowing gown, and still trembles when he comes upon the stage; for all that has gone before he knows, but what a crowd is he does not know, nor what the shouting and the scornful laughter of a crowd are. Nay, he does not even know what this anxiety itself is, whether it is something that we can control, or beyond our powers, whether he can stop it or not. That is why, if he is praised, he goes off the stage all puffed up; but if he is laughed to scorn, that poor windbag of his conceit is pricked and flattens out.

We too experience something of the same kind. What do we admire? Externals. What are we in earnest about? About externals. Are we, then, at a loss to know how it comes about

that we are subject to fear and anxiety? Why, what else can possibly happen, when we regard impending events as things evil? We cannot help but be in fear, we cannot help but be in anxiety. And then we say, "O Lord God, how may I escape anxiety?" Fool, have you not hands? Did not God make them for you? Sit down now and pray forsooth that the mucus in your nose may not run! Nay, rather wipe your nose and do not blame God! What then? Has he given you nothing that helps in the present case? Has he not given you endurance, has he not given you magnanimity, has he not given you courage? When you have such serviceable hands as these do you still look for someone to wipe your nose? But these virtues we neither practise nor concern ourselves withal. Why, show me one single man who cares how he does something, who is concerned, not with getting something, but with his own action. Who is there that is concerned with his own action while he is walking around? Who, when he is planning, is concerned with the plan itself, and not with getting what he is planning about? And then if he gets it, he is all set up and says, 'Yes, indeed, what a fine plan we made! Did I not tell you, brother, that, if there was anything at all in my views, it was impossible for the plan to fall out otherwise?" But if the plan goes the other way, he is humble and wretched, and cannot even find any explanation of what has happened. Who of us ever called in a seer for a case of this kind? Who of us ever slept in a temple for enlightenment about our action? Who? Show me but one, that I may see him, the man that I have long been looking for, the truly noble and gifted man; be he young or old, only show him!

Why, then, do we wonder any longer that, although in material things we are thoroughly experienced, nevertheless in our actions we are dejected, unseemly, worthless, cowardly, unwilling to stand the strain, utter failures one and all? For we have not troubled ourselves about these matters in time past, nor do we even now practise them. Yet if we were afraid. not of death or exile, but of fear itself, then we should practise how not to encounter those things that appear evil to us. But as it is, we are fiery and fluent in the schoolroom, and if some trivial question about one of these points comes up, we are able to pursue the logical consequences; yet drag us into practical application, and you will find us miserable shipwrecked mariners. Let a disturbing thought come to us and you will find out what we have been practising and for what we have been training! As a result, because of our lack of practice, we are ever going out of our way to heap up terrors and to make them out greater than they actually are. For example, whenever I go to sea, on gazing down into the deep or looking around upon the expanse of waters and seeing no land, I am beside myself, fancying that if I am wrecked I shall have to swallow this whole expanse of waters; but it does not occur to me that three pints are enough. What is it, then, that disturbs me? The expanse of sea? No, but my judgement. Again, when there is an earthquake, I fancy that the whole city is going to fall upon me; what, is not a little stone enough to knock my brains out?

What, then, are the things that weigh upon us and drive us out of our senses? Why, what else but our judgements? For when a man goes hence abandoning the comrades, the places, and the social relations to which he is accustomed, what else is the burden that is weighing him down but a judgement? Children, indeed, when they cry a little because their nurse has left, forget their troubles as soon as they get a cookie. Would you, therefore, have us resemble children? No, by Zeus! For I claim that we should be influenced in this way, not by a cookie, but by true judgements. And what are these? The things which a man ought to practise all day long, without being devoted to what is not his own, either comrade, or place or gymnasia, nay, not even to his own body; but he should remember the law and keep that before his eyes. And what is the law of God? To guard what is his own, not to lay claim to what is not his own, but to make use of what is given him, and not to yearn for what has not been given; when something is taken away, to give it up readily and without delay, being grateful for the time in which he had the use of it-all this if you do not wish to be crying for your nurse and your mammy! For what difference does it make what object a man has a weakness for and depends upon? In what respect are you superior to the man who weeps for a maid, if you grieve for a trivial gymnasium, a paltry colonnade, a group of youngsters, and that way of spending your time? Someone else comes and grieves because he is no longer going to drink the water of Dirce. What, is the water of the Marcian aqueduct inferior to that of Dirce? "Nay, but I was accustomed to that water." And you will get accustomed to this in turn. And then, if you become addicted to something of this kind, weep for this too in turn, and try to write a line after the pattern of that of Euripides:

To Nero's baths and Marcian founts once more.

Behold how tragedy arises, when everyday events befall fools!

"When, then, shall I see Athens once more and the Acropolis?" Poor man, are you not satisfied with what you are seeing every day? Have you anything finer or greater to look at than the sun, the moon, the stars, the whole earth, the sea? And if you really understand Him that governs the universe, and bear Him about within you, do you yet yearn for bits of stone and a pretty rock? When, therefore, you are about to leave the sun and the moon, what will you do? Will you sit and cry as little children cry? What was it you did at school? What was it you heard and learned? Why did you record yourself as a philosopher when you might have recorded the truth in these words: "I studied a few introductions, and did some reading in Chrysippus, but I did not even get past the door of a philosopher? Since what part have I in that business in which Socrates, who died so nobly, and so nobly lived, had a part? Or in that in which Diogenes had a part?" Can you imagine one of these men crying or fretting because he is not going to see such-and-such a man, or such-and-such a woman, or to live in Athens or in Corinth. but, if it so happen, in Susa or in Ecbatana? What, does he who is at liberty to leave the banquet when he will, and to play the game no longer, keep on annoying himself by staying? Does he not stay, like children, only as long as he is entertained? Such a man would be likely, forsooth, to endure going into exile for life or the exile of death. if this were his sentence.

Are you not willing, at this late date, like children, to be weaned and to partake of more solid food, and not to cry for mammies and nurses-old wives' lamentations? "But if I leave, shall cause those women sorrow?" You cause them sorrow? Not at all, but it will be the same thing that causes sorrow to you yourself-bad judgement. What, then, can you do? Get rid of that judgement, and, if they do well, they will themselves get rid of their judgement; otherwise, they will come to grief and have only themselves to thank for it. Man, do something desperate, as the expression goes, now if never before, to achieve peace, freedom, and mindedness. Lift up your neck at last like a man escaped from bondage, be bold to look towards God and say, "Use me henceforward for whatever Thou wilt; I am of one mind with Thee; I am Thine; I crave exemption from nothing that seems good in Thy sight; where Thou wilt, lead me; in what raiment Thou wilt, clothe me. Wouldst Thou have me to hold office, or remain in private life; to remain here or go into exile; to be poor or be rich? I will defend all these Thy acts before men: I will show what the true nature of each thing is." Nay, you will not: sit rather in the house as girls do [† 2] and wait for your mammy until she feeds you! If Heracles had sat about at home, what would he have amounted to? He would have been Eurystheus and no Heracles. Come, how many acquaintances and friends did he have with him as he went up and down through the whole world? Nay, he had no dearer friend than God. That is why he was believed to be a son of God, and was. It was therefore in obedience to His will that he went about clearing away wickedness and lawlessness. But you are no Heracles, you say, and you cannot clear away the wickedness of other men, nay, nor are you even a Theseus, to clear away the ills of Attica merely. Very well, clear away your own then. From just here, from out your own mind, cast not Procrustes and Sciron, but grief, fear, desire, envy, joy at others' ills; cast out greed, effeminacy, incontinency. These things you cannot cast out in any other way than by looking to God alone, being specially devoted to Him only, and consecrated to His commands. But if you wish anything else, with lamentation and groaning you will follow that which is stronger than you are, ever seeking outside yourself for peace, and never able to be at peace. For you seek peace where it is not, and neglect to seek it where it is.

EPICTETUS CHAPTER 17 - How Ought We Adjust Our Preconceptions To Individual Instances?

What is the first business of one who practises philosophy? To get rid of thinking that one knows; for it is impossible to get a man to begin to learn that which he thinks he knows. However, as we go to the philosophers we all babble hurlyburly about what ought to be done and what ought not, good and evil, fair and foul, and on these grounds assign praise and blame, censure and reprehension, passing judgement on fair and foul practices, and discriminating between them. But what do we go to the philosophers for? To learn what we do not think we know. And what is that? General principles. For some of us want to learn what the philosopliers are saying, thinking it will be witty and shrewd, others, because they wish to profit thereby. But it is absurd to think that when a man wishes to learn one thing he will actually learn something else, or, in short, that a man will make progress in anything without learning it. But the multitude are under the same misapprehension as was Theopompus, the orator, who actually censures Plato for wishing to define every term. Well, what does he say? "Did none of us before your time ever use the words 'good' or 'just'? Or, without understanding what each of these terms severally mean, did we merely utter them as vague and empty sounds?" Why, who tells you, Theopompus, that we did not have a natural conception of each term, that is, a preconceived idea of it? But it is impossible to adjust our preconceived ideas to the appropriate facts without having first systematized them and having raised precisely this question-what particular fact is to be classified

under each preconception. Suppose, for example, that you make the same sort of remark to the physicians: "Why, who among us did not use terms 'healthy' and 'diseased' before Hippocrates was born? Or were we merely making an empty noise with these sounds?" For, of course, we have a certain preconception of the idea "healthy." But we are unable to apply it. That is why one person says, "Keep abstaining from food," and another, "Give nourishment"; again, one says, "Cut a vein," and another says, "Use the cupping-glass." What is the reason? Is it really anything but the fact that a person is unable properly to apply the preconceived idea of "healthy" to the specific instances?

So it stands here also, in the affairs of life. Who among us has not upon his lips the words "good" and "evil," "advantageous" and "disadvantageous"? For who among us does not have a preconceived idea of each of these terms? Very well, is it fitted into a system and complete? Prove that it is. "How shall I prove it?" Apply it properly to specific facts. To start with, Plato classifies definitions under the preconception "the useful," but you classify them under that of "the useless." Is it, then, possible for both of you to be right? How can that be? Does not one man apply his preconceived idea of "the good" to the fact of wealth, while another does not? And another to that of pleasure, and yet another to that of health? Indeed, to sum up the whole matter, if all of us who have these terms upon our lips possess no mere empty knowledge of each one severally, and do not need to devote any pains to the systematic arrangement of our preconceived ideas, why do we disagree, why fight, why blame one another?

And yet what need is there for me to bring forward now our strife with one another and make mention of that? Take your own case; if you apply properly your preconceived ideas, why are you troubled, why are you hampered? Let us pass by for the moment the second field of study-that which has to do with our choices and the discussion of what is our duty in regard to them. Let us pass by also the third-that which has to do with our assents. I make you a present of all this. Let us confine our attention to the first field, one which allows an almost palpable proof that you do not properly apply your preconceived ideas. Do you at this moment desire what is possible in general and what is possible for you in particular? If so, why are you hampered? Why are you troubled? Are you not at this moment trying to escape what is inevitable? If so, why do you fall into any trouble, why are you unfortunate? Why is it that when you want something it does not happen, and when you do not want it, it does happen? For this is the strongest proof of trouble and misfortune. I want something, and it does not happen: and what creature is more wretched than I? I do not want something, and it does happen; and what creature is more wretched than I?

Medea, for example, because she could not endure this, came to the point of killing her children. In this respect at least hers was the act of a great spirit. For she had the proper conception of what it means for anyone's wishes not to come true. "Very well, then," says she, "in these circumstances I shall take vengeance upon the man who has wronged and insulted me. Yet what good do I get out of his being in such an evil plight? How can that be accomplished? I kill my children. But I shall be punishing myself also. Yet what do I care?" This is the outbursting of a soul of great force. For she did not know where the power lies to do what we wish-that we cannot get this from outside ourselves, nor by disturbing and deranging things. Give up wanting to keep your husband, and nothing of what you want fails to happen. Give up wanting him to live with you at any cost. Give up wanting to remain in Corinth, and, in a word, give up wanting anything but what God wants. And who will prevent you, who will compel you? No one, any more than anyone prevents or compels Zeus.

When you have such a leader as Zeus and identify your wishes and your desires with His, why are you still afraid that you will fail? Give to poverty and to wealth your aversion and your desire: you will fail to get what you wish, and you will fall into what you would avoid. Give them to health: you will come to grief; so also if you give them to offices, honours, country, friends, children, in short to anything that lies outside the domain of moral purpose. But give them to Zeus and the other gods; entrust them to their keeping, let them exercise the control; let your desire and your aversion be ranged on their side-and how can you be troubled any longer? But if you show envy, wretched man, and pity, and jealousy, and timidity, and never let a day pass without bewailing yourself and the gods, how can you continue to say that you have been educated? What kind of education, man, do you mean? Because you have worked on syllogisms, and arguments with equivocal premisses? Will you not unlearn all this, if that be possible, and begin at the beginning, realising that hitherto you have not even touched the matter; and for the future, beginning at this point, add to your foundations that which comes next in order-provision that nothing shall be that you do not wish, and that nothing shall fail to be that you do wish?

Give me but one young man who has come to school with this purpose in view, who has become an athlete in this activity, saying, "As for me, let everything else go; I am satisfied if I shall be free to live untrammelled and untroubled, to hold up my neck in the face of facts like a free man, and to look up to heaven as a friend of God, without fear of what may possibly happen." Let one of you show me such a person, so that I can say to him: Enter, young man, into your own, for it is your destiny to adorn philosophy, yours are these possessions, yours these books, yours these discourses. Then. when he has worked his way through this first field of study and mastered it like an athlete, let him come to me again and "I want, it is true, to be tranquil and free from turmoil, sav. but I want also, as a god-fearing man, a philosopher and a diligent student, to know what is my duty towards the gods, towards parents, towards brothers, towards my country, towards strangers." Advance now to the second field of study: this also is yours. "Yes, but I have already studied this second field. What I wanted was to be secure and unshaken, and that not merely in my waking hours, but also when asleep, and drunk, and melancholy-mad." Man, you are a god, great are the designs you cherish!

No, that is not the way it goes, but someone says, "I wish to know what Chrysippus means in his treatise on The Liar." If that is your design, go hang, you wretch! And what good will knowing that do you? With sorrow you will read the whole treatise, and with trembling you will talk about it to others. This is the way you also, my hearers, behave. You say: "Shall I read aloud to you, brother, and you to me?" "Man, you write wonderfully." And again, "You have a great gift for writing in the style of Xenophon," "You for that of Plato," "You for that of Antisthenes." And then, when you have told dreams to one another, you go back to the same things again; you have exactly the same desires as before, the same aversions, in the same way you make your choices, your designs, and your purposes, you pray for the same things and are interested in the same things. In the second place, you do not even look for anybody to give you advice, but you are annoved if you are told what I am telling you. Again, you say: "He is an old man without the milk of human kindness in him; he did not weep when I left, nor say, 'I fear you are going into a very difficult situation, my son; if you come through safely, I will light lamps." Is this what a man with the milk of human kindness in him would say? It will be a great piece of good luck for a person like you to come through safely, a thing worth lighting lamps to celebrate! Surely you ought to be free from death and free from disease!

It is this conceit of fancying that we know something useful, that, as I have said, we ought to cast aside before we come to philosophy, as we do in the case of geometry and music. Otherwise we shall never even come near to making progress, even if we go through all the Introductions and the Treatises of Chrysippus, with those of Antipater and Archedemus thrown in!

EPICTETUS CHAPTER 18 - How Must We Struggle Against Our External Impressions?

Every habit and faculty is confirmed and strengthened by the corresponding actions, that of walking by walking, that of running by running. If you wish to be a good reader, read; if you wish to be a good writer, write. If you should give up reading for thirty days one after the other, and be engaged in something else, you will know what happens. So also if you lie in bed for ten days, get up and try to take a rather long walk, and you will see how wobbly your legs are. In general, therefore, if you want to do something, make a habit of it; if you want not to do something, refrain from doing it, and accustom yourself to something else instead. The same principle holds true in the affairs of the mind also; when you are angry, you may be sure, not merely that this evil has befallen you, but also that you have strengthened the habit, and have, as it were, added fuel to the flame. When you have yielded to someone in carnal intercourse, do not count merely this one defeat, but count also the fact that you have fed your incontinence, you have given it additional strength. For it is inevitable that some habits and faculties should, in consequence of the corresponding actions, spring up, though they did not exist before, and that others which were already there should be intensified and made strong.

In this way, without doubt, the infirmities of our mind and character spring up, as the philosophers say. For when once you conceive a desire for money, if reason be applied to bring you to a realisation of the evil, both the passion is stilled and our governing principle is restored to its original authority: but if you do not apply a remedy, your governing principle does not revert to its previous condition, but, on being aroused again by the corresponding external impression, it bursts into the flame of desire more quickly than it did before. And if this happens over and over again, the next stage is that a callousness results and the infirmity strengthens the avarice. For the man who has had a fever and then recovered is not the same as he was before the fever, unless he has experienced a complete cure. Something like this happens also with the affections of the mind. Certain imprints and weals are left behind on the mind, and unless a man erases them perfectly, the next time he is scourged upon the old scars, he has weals

no longer but wounds. If, therefore, you wish not to be hottempered, do not feed your habit, set before it nothing on which it can grow. As the first step, keep quiet and count the days on which you have not been angry. "I used to be angry every day, after that every other day, then every third, and then every fourth day." If you go as much as thirty days without a fit of anger, sacrifice to God. For the habit is first weakened and then utterly destroyed. "To-day I was not grieved" (and so the next day, and thereafter for two or three months); "but I was on my guard when certain things happened that were capable of provoking grief." Know that things are going splendidly with you.

To-day when I saw a handsome lad or a handsome woman I did not say to myself, "Would that a man might sleep with her," and "Her husband is a happy man," for the man who uses the expression "happy" of the husband means "Happy is the adulterer" also; I do not even picture to myself the next scene—the woman herself in my presence, disrobing and lying down by my side. I pat myself on the head and say. Well done, Epictetus, you have solved a clever problem, one much more clever than the so-called "Master": But when the wench is not only willing, but nods to me and sends for me, yes, and when she even lays hold upon me and snuggles up to me, if I still hold aloof and conquer, this has become a solved problem greater than The Liar, and The Quiescent. On this score a man has a right to be proud indeed, but not about his proposing "The Master" problem.

How, then, may this be done? Make it your wish finally to satisfy your own self, make it your wish to appear beautiful in the sight of God. Set your desire upon becoming pure in the presence of your pure self and of God. "Then when an external mpression of that sort comes suddenly upon you," says Plato, 'go and offer an expiatory sacrifice, go and make offering as a suppliant to the sanctuaries of the gods who avert evil"; it is enough if you only withdraw "to the society of the good and excellent men," and set yourself to comparing your conduct with theirs, whether you take as your model one of the living, or one of the dead. Go to Socrates and mark him as he lies down beside Alcibiades and makes light of his youthful beauty. Bethink yourself how great a victory he once won and knew it himself, like an Olympic victory, and what his rank was, counting in order from Heracles: so that, by the gods, one might justly greet him with the salutation, "Hail, wondrous for he was victor over something more than these man!' rotten boxers and pancratiasts, and the gladiators who resemble them. If you confront your external impression with such thoughts, you will overcome it, and not be carried away by it. But, to begin with, be not swept off your feet. I beseech you, by the vividness of the impression, but say, "Wait for me a little, O impression; allow me to see who you are, and what you are an impression of; allow me to put you to the test.' And after that, do not suffer it to lead you on by picturing to you what will follow. Otherwise, it will take possession of you and go off with you wherever it will. But do you rather introduce and set over against it some fair and noble impression, and throw out this filthy one. And if you form the habit of taking such exercises, you will see what mighty shoulders you develop, what sinews, what vigour; but as it is, you have merely your philosophic quibbles, and nothing more.

The man who exercises himself against such external impressions is the true athlete in training. Hold, unhappy man; be not swept along with your impressions! Great is the struggle, divine the task; the prize is a kingdom, freedom, serenity, peace. Remember God; call upon Him to help you and stand by your side, just as voyagers, in a storm, call upon the Dioscuri. For what storm is greater than that stirred up by powerful impressions which unseat the reason? As for the storm itself, what else is it but an external impression? To prove this, just take away the fear of death, and then bring on as much thunder and lightning as you please, and you will realise how great is the calm, how fair the weather, in your governing principle. But if you be once defeated and say that by and by you will overcome, and then a second time do the same thing, know that at last you will be in so wretched a state and so weak that by and by you will not so much as notice that you are doing wrong, but you will even begin to offer arguments in justification of your conduct; and then you will confirm the truth of the saying of Hesiod:

Forever with misfortunes dire must he who loiters cope

EPICTETUS CHAPTER 19 - To Those Who Take Up The Teachings Of The Philosophers Only To Talk About Them

The "Master argument" appears to have been propounded on the strength of some such principles as the following. Since there is a general contradiction with one another between these three propositions, to wit: (1st) Everything true as an event in the past is necessary, and (2nd) An impossible does not follow a possible, and (3rd) What is not true now and never will be, is nevertheless possible. Diodorus, realising this contradiction, used the plausibility of the first two propositions to establish the principle, Nothing is possible which is neither true now nor ever will be. But one man will maintain, among the possible combinations of two at a time, the following, namely, (3) Something is possible, which is not true now and never will be, and (2) An impossible does not follow a possible; yet he will not grant the third proposition (1), Everything true as an event in the past is necessary, which is what Cleanthes and his group, whom Antipater has stoutly supported, seem to think. But others will maintain the other two propositions, (3) A thing is possible which is not true now and never will be, and (1) Everything true as an event in the past is necessary, and then will assert that, An impossible does follow a possible. But there is no way by which one can maintain all three of these propositions, because of their mutual contradiction.

If, then, someone asks me, "But which pair of these do you yourself maintain?" I shall answer him that I do not know; but I have received the following account: Diodorus used to maintain one pair, Panthoides and his group, I believe, and Cleanthes another, and Chrysippus and his group the third. "What, then, is your opinion?" I do not know, and I was not made for this purpose-to test my own external impression upon the subject, to compare the statements of others, and to form a judgement of my own. For this reason I am no better than the grammarian. When asked, "Who was the father of Hector?" he replied, "Priam." "Who were his brothers?" 'Alexander and Dephobus." "And who was their mother?" "Hecuba. This is the account that I have received." "From whom?" "From Homer," he said. "And Hellanicus also, I believe, writes about these same matters, and possibly others like him." And so it is with me about the "Master Argument"; what further have I to say about it? But if I am a vain person, I can astonish the company, especially at a banquet, by enumerating those who have written on the subject. "Chrysippus also has written admirably on this topic in the first book of his treatise On Things Possible. And Cleanthes has written a special work on the subject, and Archedemus. Antipater also has written, not only in his book On Things Possible, but also a separate monograph in his discussion of The Master Argument. Have you not read the treatise?" "I have not read it." "Then read it." And what good will it do him? He will be more trifling and tiresome than he is already. You, for example, what have you gained by the reading of it? What judgement have you formed on the subject? Nay, you will tell us of Helen, and Priam, and the island of Calypso which never was and never will be!

And in the field of literary history, indeed, it is of no great consequence that you master the received account without having formed any judgement of your own. But in questions of conduct we suffer from this fault much more than we do in literary matters. "Tell me about things good and evil." "Listen:

The wind that blew me from the Trojan shore

Brought me to the Ciconians.

Of things some are good, others bad, and yet others indifferent. Now the virtues and everything that shares in them are good, while vices and everything that shares in vice are evil, and what falls in between these, namely, wealth, health, life, death, pleasures, pain, are indifferent." "Where do you get that knowledge?" "Hellanicus says so in his History of Egypt." For what difference does it make whether you say this, or that Diogenes says so in his Treatise on Ethics, or Chrysippus, or Cleanthes? Have you, then, tested any of these statements and have you formed your own judgement upon them? Show me how you are in the habit of conducting vourself in a storm on board ship. Do you bear in mind this logical distinction between good and evil when the sail crackles, and you have screamed and some fellow-passenger, untimely humorous, comes up and says, "Tell me, I beseech you by the gods, just what you were saying a little while ago. Is it a vice to suffer shipwreck? Is there any vice in that?" Will you not pick up a piece of wood and cudgel him? "What have we to do with you, fellow? We are perishing and you come and crack jokes!" And if Caesar sends for you to answer an accusation, do you bear in mind this distinction? Suppose someone approaches you when you are going in pale and trembling, and says, "Why are you trembling, fellow? What is the affair that concerns you? Does Caesar inside the palace bestow virtue and vice upon those who appear before him? "Why do you also make mock of me and add to my other ills?" "But yet, philosopher, tell me, why are you trembling? Is not the danger death, or prison, or bodily pain, or exile, or disrepute? Why, what else can it be? Is it a vice at all, or anything that shares in vice? What was it, then, that you used to call these things?" "What have I to do with you, fellow? My own evils are enough for me" And in that you are right. For your own evils art enough for you—your baseness, your cowardice, the bragging that you indulged in when you were sitting in the lecture room. Why did you pride yourself upon things that were not your own? Why did you call yourself a Stoic?

Observe yourselves thus in your actions and you will find out to what sect of the philosophers you belong. You will find that most of you are Epicureans, some few Peripatetics, but these without any backbone; for wherein do you in fact show that you consider virtue equal to all things else, or even superior? But as for a Stoic, show me one if you can! Where, or how? Nay, but you can show me thousands who recite the petty arguments of the Stoics. Yes, but do these same men recite the petty arguments of the Epicureans any less well? Do they not handle with the same precision the petty arguments of the Peripatetics also? Who, then, is a Stoic? As we call a statue "Pheidian" that has been fashioned according to the art of Pheidias, in that sense show me a man fashioned according to the judgements which he utters. Show me a man who though sick is happy, though in danger is happy, though dving is happy, though condemned to exile is happy, though in disrepute is happy. Show him! By the gods, I would fain see a Stoic! But you cannot show me a man completely so fashioned; then show me at least one who is becoming so fashioned, one who has begun to tend in that direction; do me this favour; do not begrudge an old man the sight of that spectacle which to this very day I have never seen. Do you fancy that you are going to show me the Zeus or the Athena of Pheidias, a creation of ivory and gold? Let one of you show me the soul of a man who wishes to be of one mind with God, and never again to blame either God or man, to fail in nothing that he would achieve, to fall into nothing that he would avoid, to be free from anger, envy and jealousy-but why use circumlocutions?-a man who has set his heart upon changing from a man into a god, and although he is still in this paltry body of death, does none the less have his purpose set upon fellowship with Zeus. Show him to me! But you cannot. Why, then, do you mock your own selves and cheat everybody else? And why do you put on a guise that is not your own and walk about as veritable thieves and robbers who have stolen these designations and properties that in no sense belong to you?

And so now I am your teacher, and you are being taught in my school. And my purpose is this-to make of you a perfect work, secure against restraint, compulsion, and hindrance free, prosperous, happy, looking to God in everything both small and great; and you are here with the purpose of learning and practising all this. Why, then, do you not complete the work, if it is true that you on your part have the right kind of purpose and I on my part, in addition to the purpose, have the right kind of preparation? What is it that is lacking? When I see a craftsman who has material lying ready at hand, I look for the finished product. Here also, then, is the craftsman, and here is the material: what do we vet lack? Can the matter not be taught? It can. Is it, then, not under our control? Nay, it is the only thing in the whole world that is under our control. Wealth is not under our control, nor health, nor fame, nor, in a word, anything else except the right use of external impressions. This alone is by nature secure against restraint and hindrance. Why, then, do you not finish the work? Tell me the reason. For it lies either in me, or in you, or in the nature of the thing. The thing itself is possible and is the only thing that is under our control. Consequently, then, the fault lies either in me, or in you, or, what is nearer the truth, in us both. What then? Would you like to have us at last begin to introduce here a purpose such as I have described? Let us let bygones be bygones. Only let us begin, and, take my word for it, you shall see.

EPICTETUS CHAPTER 20 - Against Epicureans And Academics

The propositions which are true and evident must of necessity be employed even by those who contradict them; and one might consider as perhaps the strongest proof of a proposition being evident the fact that even the man who contradicts it finds himself obliged at the same time to employ it. For example, if a man should contradict the proposition that there is a universal statement which is true, it is clear that he must assert the contrary, and say: No universal statement is true. Slave, this is not true, either. For what else does this assertion amount to than: If a statement is universal, it is false? Again, if a man comes forward and says, "I would have you know that nothing is knowable, but that everything is uncertain"; or if someone else says, "Believe me, and it will be to your advantage, when I say: One ought not to believe a man at all"; or again, someone else, "Learn from me, man, that it is impossible to learn anything; it is I who tell you this and I will prove it to you, if you wish," what difference is there between these persons and-whom shall I say?-those who call themselves Academics? "O men," say the Academics, give your assent to the statement that no man assents to any statement; believe us when we say that no man can believe anybody." So also Epicurus, when he wishes to do away with the natural fellowship of men with one another, at the same time makes use of the very principle that he is doing away with. For what does he say? "Be not deceived, men, nor led astray, nor mistaken; there is no natural fellowship with one another among rational beings; believe me. Those who say the contrary are deceiving you and leading you astray with false reasons." Why do you care, then? Allow us to be deceived. Will you fare any the worse, if all the rest of us are persuaded that we do have a natural fellowship with one another, and that we ought by all means to guard it? Nay, your position will be much better and safer. Man, why do you worry about us, why keep vigil on our account, why light your lamp, why rise betimes, why write such big books? Is it to keep one or

another of us from being deceived into the belief that the gods care for men, or is it to keep one or another of us from supposing that the nature of the good is other than pleasure? For if this is so, off to your couch and sleep, and lead the life of a worm, of which you have judged yourself worthy; eat and drink and copulate and defecate and snore. What do you care how the rest of mankind will think about these matters, or whether their ideas be sound or not? For what have you to do with us? Come, do you interest yourself in sheep because they allow themselves to be shorn by us, and milked, and finally to be butchered and cut up? Would it not be desirable if men could be charmed and bewitched into slumber by the Stoics and allow themselves to be shorn and milked by you and your kind? Is not this something that you ought to have said to your fellow Epicureans only and to have concealed your views from outsiders, taking special pains to persuade them, of all people, that we are by nature born with a sense of fellowship, and that self-control is a good thing, so that everything may be kept for you? Or ought we to maintain this fellowship with some, but not with others? With whom, then, ought we to maintain it? With those who reciprocate by maintaining it with us, or with those who are transgressors of it? And who are greater transgressors of it than you Epicureans who have set up such doctrines?

What, then, was it that roused Epicurus from his slumbers and compelled him to write what he did? What else but that which is the strongest thing in men-nature, which draws a man to do her will though he groans and is reluctant? "For," says she, "since you hold these anti-social opinions, write them down and bequeathe them to others and give up your sleep because of them and become in fact yourself the advocate to denounce your own doctrines." Shall we speak of Orestes as being pursued by the Furies and roused from his slumbers? But are not the Furies and the Avengers that beset Epicurus more savage? They roused him from sleep and would not let him rest, but compelled him to herald his own miseries, just as madness and wine compel the Galli [Priests of Cybele who mutilated themselves in frenzy.]. Such a powerful and invincible thing is the nature of man. For how can a vine be moved to act, not like a vine, but like an olive, or again an olive to act, not like an olive, but like a vine? It is impossible, inconceivable. Neither, then, is it possible for a man absolutely to lose the affections of a man, and those who cut off their bodily organs are unable to cut off the really important thing-their sexual desires. So with Epicurus: he cut off everything that characterizes a man, the head of a household, a citizen, and a friend, but he did not succeed in cutting off the desires of human beings; for that he could not do, any more than the easy-going Academics are able to cast away or blind their own sense-perceptions, although they have made every effort to do so.

Ah, what a misfortune! A man has received from nature measures and standards for discovering the truth, and then does not go on and take the pains to add to these and to work out additional principles to supply the deficiencies, but does exactly the opposite, endeavouring to take away and destroy whatever faculty he does possess for discovering the truth. What do you say, philosopher? What is your opinion of piety and sanctity? "If you wish, I shall prove that it is good." By all means, prove it, that our citizens may be converted and may honour the Divine and at last cease to be indifferent about the things that are of supreme importance. "Do you, then, possess the proofs?" I do, thank heaven. "Since, then, you are quite satisfied with all this, hear the contrary: The gods do not exist, and even if they do, they pay no attention to men, nor have we any fellowship with them, and hence this piety and sanctity which the multitude talk about is a lie told by impostors and sophists, or, I swear, by legislators to frighten and restrain evildoers." Well done, philosopher! You have conferred a service upon our citizens, you have recovered our young men who were already inclining to despise things divine. "What then? Does not all this satisfy you? Learn now how righteousness is nothing, how reverence is folly, how a father is nothing, how a son is nothing." Well done, philosopher! Keep at it; persuade the young men, that we may have more who feel and speak as you do. It is from principles like these that our well-governed states have grown great! Principles like these have made Sparta what it was! These are the convictions which Lycurgus wrought into the Spartans by his laws and his system of education, namely that neither is slavery base rather than noble, nor freedom noble rather than base! Those who died at Thermopylae died because of these judgements regarding slavery and freedom! And for what principles but these did the men of Athens give up their city? And then those who talk thus marry and beget children and fulfil the duties of citizens and get themselves appointed priests and prophets! Priests and prophets of whom? Of gods that do not exist! And they themselves consult the Pythian priestess-in order to hear lies and to interpret the oracles to others! Oh what monstrous shamelessness and imposture!

Man, what are you doing? You are confuting your own self every day, and are you unwilling to give up these frigid attempts of yours? When you eat, where do you bring your hand? To your mouth, or to your eye? When you take a bath,

into what do you step? When did you ever call the pot a plate, or the ladle a spit? If I were slave to one of these men, even if I had to be soundly flogged by him every day, I would torment him. "Boy, throw a little oil into the bath." I would have thrown a little fish sauce in, and as I left would pour it down on his head. "What does this mean?" "I had an external impression that could not be distinguished from olive oil; indeed, it was altogether like it. I swear by your fortune. "Here, give me the gruel." I would have filled a side dish with vinegar and fish sauce and brought it to him. "Did I not ask for the gruel?" "Yes, master; this is gruel." "Is not this vinegar and fish sauce?" "How so, any more than gruel." "Take and smell it, take and taste it." "Well, how do you know, if the senses deceive us?" If I had had three or four fellow-slaves who felt as I did. I would have made him burst with rage and hang himself, or else change his opinion. But as it is, such men are toying with us; they use all the gifts of nature, while in theory doing away with them.

Grateful men indeed and reverential: Why, if nothing else, at least they eat bread every day, and yet have the audacity to say, "We do not know if there is a Demeter, or a Kore, or a Pluto"; not to mention that, although they enjoy night and day, the changes of the year and the stars and the sea and the earth and the co-operation of men, they are not moved in the least by any one of these things, but look merely for a chance to belch out their trivial "problem," and after thus exercising their stomach to go off to the bath. But what they are going to say, or what they are going to talk about, or to whom, and what their hearers are going to get out of these things that they are saying, all this has never given them a moment's concern. I greatly fear that a noble-spirited young man may hear these statements and be influenced by them, or, having been influenced already, may lose all the germs of the nobility which he possessed; that we may be giving an adulterer grounds for brazening out his acts; that some embezzler of public funds may lay hold of a specious plea based upon these theories; that someone who neglects his own parents may gain additional affrontery from them.

What, then, in your opinion is good or bad, base or noble? This or that? What then? Is there any use in arguing further against any of these persons, or giving them a reason, or listening to one of theirs, or trying to convert them? By Zeus, one might much rather hope to convert a filthy degenerate than men who have become so deaf and blind!

EPICTETUS CHAPTER 21 - Of Inconsistency

Some of their faults men readily admit, but others not so readily. Now no one will admit that he is foolish or unintelligent, but, quite the contrary, you hear everyone say, "I wish I had as much luck as I have sense." But they readily admit that they are timid, and say, "I am a bit timid, I admit; but in general you will not find me to be a fool" A man will not readily admit that he is incontinent, not at all that he is unjust, and will never admit that he is envious or meddlesome: but most men will admit that they are moved by pity. What is the reason for this? The principal reason is confusion of thought and an unwilligness to admit a fault in matters which involve good and evil; but, apart from that, different people are affected by different motives, and, as a rule, they will never admit anything that they conceive to be disgraceful; timidity, for example, they conceive to be an indication of a prudent disposition, and the same is true of pity, but stupidity they conceive to be a slave's quality altogether; also they will never plead guilty to offences against society. Now in the case of most errors, the principal reason why men are inclined to admit them is because they conceive that there is an involuntary element in them, as, for instance, in timidity and pity. And if a man ever does, grudgingly, admit that he is incontinent, he adds that he is in love, expecting to be excused as for an involuntary act. But injustice they do not at all conceive of as involuntary. In jealousy there is also, as they fancy, an element of the involuntary, and therefore this too is a fault which men grudgingly admit.

When such are the men we live among-so confused, so ignorant both of what they mean by "evil" and what evil quality they have, or whether they have one, or, if so, how they come to have it, or how they will get rid of it-among such men I wonder whether it is not worth while for us also to watch ourselves, each one asking himself the questions: "Is it possible that I too am one of these people? What conceit am I cherishing regarding myself? How do I conduct myself? Do I for my part act like a wise man? Do I for my part act like a man of self-control? Do I for my part ever say that I have been educated to meet whatever comes? Have I the consciousness, proper to a man who knows nothing, that I do know nothing? Do I go to my teacher, like one who goes to consult an oracle, prepared to obey? Or do I, too, like a sniffling child, go to school to learn only the history of philosophy and to understand the books which I did not understand before, and, if chance offers, to explain them to others?" Man, at home you have fought a regular prize-fight with your slave, you have driven your household into the street, you have disturbed your neighbours' peace; and now do you come to me with a solemn air, like a philosopher, and sitting down pass judgement on the explanation I gave of the reading of the text and on the application, forsooth, of the comments I made as I babbled out whatever came into my head? You have come in a spirit of envy, in a spirit of humiliation because nothing is being sent you from home, and you sit there while the lecture is going on, thinking, on your part, of nothing in the world but how you stand with your father or your brother! You reflect: "What are my people at home saying about me? At this moment they are thinking that I am making progress in my studies, and they are saying 'He will know everything when he comes back home!' I did want, at one time, I suppose, to learn everything before going back home, but that requires a great deal of hard work, and nobody sends me anything, and at Nicopolis they have rotten accommodations at the baths, and my lodgings are bad, and the school here is bad."

And then people say: "Nobody gets any good from going to school." Well, who goes to school-who, I repeat-with the expectation of being cured? Who with the expectation of submitting his own judgements for purification? Who with the expectation of coming to a realisation of what judgements he needs? Why, then, are you surprised, if you carry back home from your school precisely the judgements you bring to it? For you do not come with the expectation of laying them aside, or of correcting them, or of getting others in exchange for them. Not at all, nor anything like it. Look rather to this at least-whether you are getting what you came for. You want to be able to speak fluently about philosophic principles. Well, are you not becoming more of an idle babbler? Do not these petty philosophic principles supply you with material for making exhibitions? Do you not resolve syllogisms, and arguments with equivocal premisses? Do you not examine the assumptions in The Liar syllogism, and in hypothetical syllogisms? Why, then, are you still vexed, if you are getting what you came for? "Yes, but if my child or my brother dies, or if I must die, or be tortured, what good will such things do me?" But was it really for this that you came? Is it really for this that you sit by my side? Did you ever really light your lamp, or work late at night, for this? Or when you went out into the covered walk did you ever set before yourself, instead of a syllogism, some external impression and examine this with your fellow-students? When did you ever do that? And then you say, "The principles are useless," To whom? To those who do not use them properly. For instance, eye-salves are not useless to those who rub them on when and as they ought, and poultices are not useless, jumping-weights are not useless; but they are useless to some people, and, on the other hand, useful to others. If you ask me now, "Are our syllogisms useful?" I will tell you that they are, and, if you wish, I will show how they are useful "Have they, then, helped me at all?" Man, you did not ask, did you? whether they are useful to you, but whether they are useful in general? Let the man who is suffering from dysentery ask me whether vinegar is useful; I will tell him that it is useful. "Is it useful, then, to me?" I will say, "No. Seek first to have your discharge stopped, the little ulcers healed." So do you also, men, first cure your ulcers, stop your discharges, be tranquil in mind, bring it free from distraction into the school; and then you will know what power reason has.

EPICTETUS CHAPTER 22 - Of Friendship

Whatever a man is interested in he naturally loves. Now do men take an interest in things evil? Not at all. Well, and do they take an interest in things which in no respect concern them? No, not in these, either. It remains, therefore, that men take an interest in good things only; and if they take an interest in them, they love them. Whoever, then, has knowledge of good things, would know how to love them too; but when a man is unable to distinguish things good from things evil, and what is neither good nor evil from both the others, how could he take the next step and have the power to love? Accordingly, the power to love belongs to the wise man and to him alone.

How so? says someone; for I am foolish myself, but yet I love my child.-By the gods, I am surprised at you; at the very outset you have admitted that you are foolish. For something is lacking in you; what is it? Do you not use sense perception. do you not distinguish between external impressions, do you not supply the nourishment for your body that is suitable to it, and shelter, and a dwelling? How comes it, then, that you admit you are foolish? Because, by Zeus, you are frequently bewildered and disturbed by your external impressions, and overcome by their persuasive character; and at one moment you consider these things good, and then again you consider them, though the very same, evil, and later on as neither good nor evil; and, in a word, you are subject to pain, fear, envy, turmoil, and change; that is why you are foolish, as you admit you are. And in loving are you not changeable? But as for wealth, and pleasure, and, in a word, material things, do you not consider them at one moment good, at another bad? And do you not consider the same persons at one moment good, and at another bad, and do you not at one moment feel friendly towards them, and at another unfriendly, and at one moment praise them, while at another you blame them?-Yes, I am subject to exactly these emotions.—What then? Do you

think that the man who has been deceived about someone can be his friend?-No. indeed.-And can the man whose choice of a friend is subject to change show good will to that friend?-No, neither can he.-And the man who now reviles someone, and later on admires him?-No, neither can he. What then? Did you never see dogs fawning on one another and playing with one another, so that you say, "Nothing could be more friendly"? But to see what their friendship amounts to, throw a piece of meat between them and you will find out. Throw likewise between yourself and your son a small piece of land, and you will find out how much your son wants to bury you, the sooner the better, and how earnestly you pray for your son's death. Then you will change your mind again and say, "What a child I have brought up! All this time he has been ready to carry me to my grave." Throw between you a pretty wench, and the old man as well as the young one falls in love with her; or, again, a bit of glory. And if you have to risk your life you will say what the father of Admetus did:

"Thou joyest seeing daylight: dost suppose Thy father joys not too?"

Do you imagine that he did not love his own child when it was small, and that he was not in agony when it had the fever, and that he did not say over and over again, "If only I had the fever instead"? And then, when the test comes and is upon him, just see what words he utters! Were not Eteocles and Polyneices born of the same mother and the same father? Had they not been brought up together, lived together, played together, slept together, many a time kissed one another? So that I fancy if anyone had seen them, he would have laughed at the philosophers for their paradoxical views on friendship. But when the throne was cast between them, like a piece of meat between the dogs, see what they say:

Eteo. Where before the wall dost mean to stand?

- Poly. Why asked thou this of me?
- Eteo. I shall range myself against thee. Poly. Mine is also that desire!
- Such also are the prayers they utter.

It is a general rule-be not deceived-that every living thing is to nothing so devoted as to its own interest. Whatever, then, appears to it to stand in the way of this interest, be it a brother, or father, or child, or loved one, or lover, the being hates, accuses, and curses it. For its nature is to love nothing so much as its own interest; this to it is father and brother and kinsmen and country and God. When, for instance, we think that the gods stand in the way of our attainment of this, we revile even them, cast their statues to the ground, and burn their temples, as Alexander ordered the temples of Asclepius to be burned when his loved one died. For this reason, if a man puts together in one scale his interest and righteousness and what is honourable and country and parents and friends, they are all safe; but if he puts his interest in one scale, and in the other friends and country and kinsmen and justice itself, all these latter are lost because they are outweighed by his interest. For where one can say "I" and "mine " to that side must the creature perforce incline; if they* are in the flesh, there must the ruling power be; if they are in the moral purpose, there must it be; if they are in externals, there must it be. [*That is, the things with which a man identifies himself and his personal interest.] If, therefore, I am where my moral purpose is, then, and then only, will I be the friend and son and the father that I should be. For then this will be my interest-to keep my good faith, my self-respect, my forbearance, my abstinence, and my co-operation, and to maintain my relations with other men. But if I put what is mine in one scale, and what is honourable in the other, then the statement of Epicurus assumes strength, in which he declares that "the honourable is either nothing at all, or at best only what people hold in esteem."

It was through ignorance of this that the Athenians and Lacedaemonians quarrelled, and the Thebans with both of them, and the Great King with Greece, and the Macedonians with both of them, and in our days the Romans with the Getae, and yet earlier than any of these, what happened at Ilium was due to this. Alexander was a guest of Menelaus, and if anyone had seen their friendly treatment of one another, he would have disbelieved any man who said they were not friends. But there was thrown in between them a morsel, a pretty woman, and to win her war arose. So now, when you see friends, or brothers, who seem to be of one mind, do not instantly make pronouncement about their friendship, not even if they swear to it, nor even if they say that they cannot be separated from one another. The ruling principle of the bad man is not to be trusted; it is insecure, incapable of judgement, a prey now to one external impression and now to another. Nay, do not make the same enquiry that most men do, asking whether two men are of the same parents, or were brought up together, or had the same school attendant, but this, and this only: Where do they put their interest-outside themselves, or in their moral purpose? If outside, call them not friends, any more than you would call them faithful, steadfast, courageous, or free; nay, call them not even human beings, if you are wise. For it is no judgement of human sort which makes them bite (that is revile) one another, and take

to the desert (that is, to the market-place) as wild beasts take to the mountains, and in courts of law act the part of brigands; nor is it a judgement of human sort which makes them profligates and adulterers and corrupters; nor is it any such thing which makes men guilty of any of the many other crimes which they commit against one another; it is because of one single judgement, and this alone-because they put themselves and what belongs to themselves in the category of things which lie outside the sphere of moral purpose. But if you hear these men assert that in all sincerity they believe the good to be where moral purpose lies, and where there is the right use of external impressions, then you need no longer trouble yourself as to whether they are son and father, or brothers, or have been schoolmates a long time and are comrades: but though this is the only knowledge you have concerning them, you may confidently declare them "friends," just as you may declare them "faithful" and "upright." For where else is friendship to be found than where there is fidelity, respect, a devotion to things honourable and to naught beside?

'But he has paid attention to me all these years; and did he not love me?" How do you know, slave, whether he has paid attention to you just as he sponges his shoes, or curries his horse? How do you know but that, when you have lost your utility, as that of some utensil, he will throw you away like a broken plate? "But she is my wife and we have lived together all these years." But how long did Eriphyle live with Amphiaraus, yes, and bore him children, and many of them? But a necklace came in between them. And what does a necklace signify? One's judgement about things like a necklace. That was the brutish element, that was what sundered the bond of love, what would not allow a woman to be a wife, a mother to remain a mother. So let every one of you who is eager to be a friend to somebody himself, or to get somebody else for a friend, eradicate these judgements, hate them, banish them from his own soul. When this is done, first of all, he will not be reviling himself, fighting with himself, repenting, tormenting himself: and, in the second place, in relation to his comrade, he will be always straightforward to one who is like him himself, while to one who is unlike he will be tolerant, gentle, kindly, forgiving, as to one who is ignorant or is making a mistake in things of the greatest importance; he will not be harsh with anybody, because he knows well the saving of Plato, that "every soul is unwillingly deprived of the truth." But if you fail to do this, you may do everything else that friends do-drink together, and share the same tent, and sail on the same ship-and you may be sons of the same parents; yes, and so may snakes! But they will never be friends and no more will you, as long as you retain these brutish and abominable judgements.

EPICTETUS CHAPTER 23 - Of The Faculty Of Expression

Éveryone would read with greater pleasure and ease the book that is written in the clearer characters. Therefore everyone would also listen with greater ease to those discourses that are expressed in appropriate and attractive language. We must not, therefore, say that there is no faculty of expression, for this is to speak both as an impious man and as a coward. As an impious man, because one is thereby disparaging the gifts received from God, as though one were denying the usefulness of the faculty of vision, or that of hearing, or that of speech itself. Did God give you eyes to no purpose, did He to no purpose put in them a spirit* so strong and so cunningly devised that it reaches out to a great distance and fashions the forms of whatever is seen? [*In Stoic physiology the spirit of vision connected the central mind with the pupil (Latin: pupilla) of the eye, and sight was produced by the action of this spirit upon external objects, not by the passive reception of rays.] And what messenger is so swift and so attentive as the eye? And did He to no purpose make also the intervening air so active and so intent that the vision passes through it as through some tense medium? And did He to no purpose create light, without the presence of which all else were useless?

Man, be neither ungrateful for these gifts, nor yet forgetful of the better things, but for sight and hearing, yes and, by Zeus, for life itself and for what is conducive to it, for dry fruits, for wine, for olive oil, give thanks unto God; and at the same time remember that He has given you something better than all these things-the faculty which can make use of them, pass judgement upon them, estimate the value of each. For what is that which, in the case of each of these faculties, shows what it is worth? Is it each faculty itself? Did you ever hear the faculty of sight say anything about itself? Or the faculty of vision? No, but they have been appointed as servants and slaves to minister to the faculty which makes use of external impressions. And if you ask, what each thing is worth, of whom do you ask? Who is to answer you? How, then, can any other faculty be superior to this which both uses the rest as its servants, and itself passes judgement upon each several thing and pronounces upon it? For which one of them knows what it is and what it is worth? Which one of them knows when one ought to use it, and when not? What is the faculty that opens and closes the eyes, and turns them away from the things from

which it should turn them, but directs them toward other things? The faculty of sight? No, but the faculty of moral purpose. What is the faculty that closes and opens the ears? What is that faculty by virtue of which men are curious and inquisitive, or again, unmoved by what is said? The faculty of hearing? No, it is none other than the faculty of moral purpose. When, then, this faculty sees that all the other faculties which surround it are blind and deaf, and unable to see anything but the very acts for which they have been appointed to serve and minister unto it, while it alone sees clearly and surveys, not only all the rest, determining what each is worth, but itself also, is it likely to pronounce that anything else is supreme but itself? And what else can the open eye do but see? But whether it ought to see someone's wife and how, what faculty tells it? That of moral purpose. And what faculty tells a man whether he ought to believe what he has been told, or disbelieve, and, if he believes, whether he ought to be provoked by it or not? Is it not that of moral purpose? And this faculty of speech and of the adornment of language, if it really is a separate faculty, what else does it do, when discourse arises about some topic, but ornament and compose the words, as hairdressers do the hair? But whether it is better to speak than to keep silence, and to do so in this way, or in that, and whether this is appropriate or not appropriate, and the proper occasion and utility of each action-what else tells us all this but the faculty of moral purpose? Would you, then, have it come forward and condemn itself?

'What then," says an objector, "if the matter stands like this, and it is possible for that which serves to be superior to what it serves-the horse to the rider, or the dog to the hunter, or his instrument to the harper, or his servants to the king?" Well, what faculty is it that uses the services of the rest in this way? Moral purpose. What is it that attends to everything? Moral purpose. What is it that destroys the whole man. sometimes by hunger, sometimes by a noose, sometimes by hurling him over a cliff? Moral purpose. Is there, then, anything stronger than this among men? Yet how can the things that are subject to hindrance be stronger than that which is unhindered? What are by their very nature capable of hindering the faculty of vision? Both moral purpose and things that lie outside its sphere. The same hinder vision: and so it is also with speech. But what is by its very nature capable of hindering moral purpose? Nothing that lies outside its sphere, but only itself when perverted. For this reason moral purpose becomes the only vice, or the only virtue.

Therefore, since it is so great a faculty and has been set over everything else, let it come before us and say that the flesh is of all things the most excellent. Nay, even if the flesh itself called itself most excellent, one would not have tolerated such a statement. But now what is it, Epicurus, that makes such a declaration? that composed the treatise On the End, or The Physics, or On the Standard? that caused you to let your beard grow long? that wrote as it was dying: "We are spending what is our last and at the same time a happy day?" Was it the flesh or the moral purpose? Come, do you confess that you have something superior to the flesh, and you are not insane, either? Are you, in all truth, so blind and deaf?

Well, what then? Does a man despise his other faculties? Far from it! Does a man say there is no use or advancement save in the faculty of moral purpose? Far from it! That is unintelligent, impious, ungrateful towards God. Nay, he is but assigning its true value to each thing. For there is some use in an ass, but not as much as there is in an ox; there is use also in a dog, but not as much as there is in a slave; there is use also in a slave, but not as much as there is in your fellowcitizens; there is use also in these, but not as much as there is in the magistrates. Yet because some things are superior we ought not to despise the use which the others give. There is a certain value also in the faculty of eloquence, but it is not as great as that of the faculty of moral purpose. When, therefore, I say this, let no one suppose that I am bidding you neglect speech, any more than I bid you neglect eyes, or ears, or hands, or feet, or dress, or shoes. But if you ask me, "What, then, is the highest of all things?" what shall I say? The faculty of eloquence? I cannot; but rather that of moral purpose, when it becomes a right moral purpose. For it is this which uses not only that faculty of eloquence but also all the other faculties both small and great; when this has been set right a man becomes good, when it has failed a man becomes bad; it is through this that we are unfortunate, and are fortunate, blame one another, and are pleased with one another; in a word, it is this which, when ignored, produces wretchedness, but when attended to produces happiness.

30But to do away with the faculty of eloquence and to say that in all truth it is nothing is the act not merely of a man ungrateful to those who have given it, but also cowardly. For such a person seems to me to be afraid that, if there really is a faculty of this kind, we may not be able to despise it. Such also are those who assert that there is no difference between beauty and ugliness. What! could a man be affected in the same way by the sight of Thersites and that of Achilles? Or by the sight of Helen and that of some ordinary woman? But these are the notions of foolish and boorish persons who do not know the nature of each several thing, but are afraid that if a man notices the superiority of the faculty in question he will immediately be carried away by it and come off worsted. Nay, the great thing is this: to leave each in the possession of his own proper faculty, and, so leaving him, to observe the value of the faculty, and to learn what is the highest of all things, and in everything to pursue after this, to be zealous about this, treating all other things as of secondary value in comparison with it, though without neglecting these, as far as this is possible. For we must take care of our eyes too, yet not as the highest thing, but we must take care of them for the sake of the highest; because this latter will not have its natural perfection unless it uses the eyes with reason and chooses one thing instead of another.

What, then, generally takes place? Men act like a traveller on the way to his own country who stops at an excellent inn. and, since the inn pleases him, stays there. Man, you have forgotten your purpose; you were not travelling to this but through it. "But this is a fine inn." And how many other inns are fine, and how many meadows-yet simply for passing through. But your purpose is the other thing, to return to your country, to relieve the fear of your kinsmen, to do the duties of a citizen yourself, to marry, bring up children, hold the customary offices. For you did not come into the world to select unusually fine places, I ween, but to live and go about your business in the place where you were born and were enrolled as a citizen. Something like this takes place also in the matter which we are considering. Since a man must advance to perfection through the spoken word and such instruction as you receive here, and must purify his own moral purpose and correct the faculty which makes use of external impressions, and since the instruction must necessarily be given by means of certain principles, and in a particular style, and with a certain variety and impressiveness in the form of these principles, some persons are captivated by all these things and stay where they are: one is captivated by style. another by syllogisms, another by arguments with equivocal premisses, another by some other "inn" of that sort, and staying there they moulder away as though they were among the Sirens.

Man, your purpose was to make yourself competent to use conformably with nature the external impressions that came to you, in desire not to fail in what you would attain, and in avoidance not to fail into what you would avoid, never suffering misfortune, never ill fortune, free, unhindered, unconstrained, conforming to the governance of Zeus, obeying this, well satisfied with this, blaming no one, charging no one, able to say with your whole heart the verses, beginning:

"Lead thou me on, O Zeus, and Destiny."

And then, although you have this purpose, because some petty trick of style, or certain principles, catch your fancy, are you going to stay just where you are and choose to dwell there, forgetful of the things at home and saying "This is fine"? Well, who says that it is not fine? But only like a passageway, like an "inn." For what is to prevent a man having the eloquence of Demosthenes and yet being unhappy, and what is to prevent him from analysing syllogisms like Chrysippus, and yet being wretched, from sorrowing, envying, in a word, from being disturbed and miserable? Absolutely nothing. You see, then, that these were "inns" of no value, while your purpose was something else. When I speak thus to some people they think that I am disparaging the study of rhetoric or that of general principles. Yet I am not disparaging this, but only the habit of dwelling unceasingly on these matters and setting one's hopes in them. If a man does his hearers harm by presenting this view, set me down too as one of those who work harm. But when I see that one thing is highest and supreme, I cannot say the same of something else, in order to gratify you, my hearers.

EPICTETUS CHAPTER 24 - To One Of Those Whom He Did Not Deem Worthy

Someone said to him: I have often come to you, wishing to hear you and you have never given me an answer; and now, if it be possible, I beg you to say something to me. He answered: Do you think that, just as in anything else there is an art, so there is also an art in speaking, and that he who has this art will speak with skill, while he who does not have it will speak without skill?-I do.-Then he who by speaking benefits himself and is able to benefit others would be speaking with skill, while he who confers injury rather than benefit would be without skill in this art of speaking? You would find that some are injured and others benefited. And are all those who hear benefited by what they hear, or would you find that of them too some are benefited but others injured?-Yes, that is true of them also, he said .- Then in this case too are all those that show skill in listening benefited, but all those that do not show such skill are injured?-He agreed.-Is there, therefore, also a certain skill in listening, just as there is in speaking?-So it seems .- But, if you please, look at the matter from this angle also: whose part do you think it is to handle an instrument musically?-The musician's.-Very well, and whose part does it appear to you to be to make a statue properly?-The sculptor's.-Does it appear to you to

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3049 require no art to look at a statue with skill?—This also requires art.—If, then, to speak as one ought is the part of a skilled person, do you see that to hear with benefit to himself is also the part of the skilled person? Now as for perfection and benefit, if you please, let us drop the consideration of them for the present, since both of us are far removed from anything of that sort; but this I think everyone would admit, that the man who is going to listen to the philosophers needs at least a certain amount of practice in listening. Is it not so?

What, then, shall I talk to you about? Tell me. What are you capable of hearing about? About things good and evil? Good and evil for what? Do you mean for a horse?-No. Well then, for an ox?-No.-What then? For a man?-Yes.-Do we know, then, what a man is, what his nature is, what the concept of man is? And have we ears that are to any degree open with regard to this? Nay, have you a conception of what nature is, or can you in any measure follow me when I speak? But shall I use a demonstration for you? How can I? For do you really understand what a proof is, or how anything is demonstrated, or by what means? Or what things resemble demonstration, but are not demonstration? Do you know, for instance, what is true, or what is false; what follows what, what contradicts, or is out of agreement, or out of harmony with what? But am I to interest you in philosophy? How shall I set before you the contradiction in the ideas of the multitude, which leads them to disagree about things good and evil, advantageous and disadvantageous, when you do not know what contradiction itself is? Show me, then, what I shall accomplish by a discussion with you. Arouse in me an eagerness for it. Just as suitable grass when shown to the sheep arouses in it an eagerness to eat, whereas if you set before it a stone or a loaf of bread, it will not be moved to eat, so we have certain moments of natural eagerness for speech also, when the suitable hearer appears, and when he himself stimulates us. But when the would-be hearer by our side is like a stone, or grass, how can he arouse desire in the breast of a man? Does the vine say to the husbandman, "Pay attention to me"? Nay, but the vine by its very appearance shows that it will profit him to pay attention to it, and so invites him to devote his attention. Who is not tempted by attractive and wide-awake children to join their sports, and crawl on all fours with them, and talk baby talk with them? But who is eager to play with an ass, or to join its braying? For however small it may be, it is still nothing but a little ass.

Why, then, have you nothing to say to me?-There is only one thing I can say to you-that the man who does not know who he is, and what he is born for, and what sort of a world this is that he exists in and whom he shares it with and does not know what the good things are and what are the evil, what the noble and what the base; and is unable to follow either reason or demonstration, or what is true and what is false, and cannot distinguish one from the other; and will manifest neither desire, nor aversion, nor choice, nor purpose in accordance with nature; will not assent, will not dissent, will not withhold judgement—such a man, to sum it all up, will go about deaf and blind, thinking that he is somebody, when he really is nobody. What I do you think that this is something new? Has it not been true from the time when the human race began to be, that every mistake and every misfortune has been due to this kind of ignorance? Why did Agamemnon and Achilles quarrel? Was it not because they did not know what things are expedient and what are inexpedient? Does not one of them say that it is expedient to give Chryseïs back to her father, while the other says that it is not expedient? Does not one of them say that he ought to get some other man's meed of honour, while the other says that he ought not? Is it not true that this made them forget who they were and what they had come for? Ho, there, man, what have you come for? To get sweethearts or to fight? "To fight" With whom? The Trojans or the Greeks? "The Trojans." Well, then, are you turning your back on Hector and drawing your sword against your own king? As for you, O best of men, are you turning your back on your duties as king,

Who has the charge of nations and sustains Such mighty cares, and for the sake of a paltry damsel engage in a fist-fight with the greatest warrior among your allies, a man whom you ought to honour and protect in every way? And do you sink below the level of an elegant high priest who treats the noble gladiators with all respect? Do you see the sort of thing that ienorance of what is expedient leads to?

ignorance of what is expedient leads to? "But I too am rich." You are not, then, richer than Agamemnon, are you? "But I am also handsome." You are not, then, handsomer than Achilles, are you? "But I have also a fine head of hair." And did not Achilles have a finer, and golden hair, too? And did he not comb it elegantly and dress it up? "But I am also strong." You are not, then, able to lift as large a stone as Hector or Aias lifted, are you? "But I am also noble born." Your mother is not a goddess, is she, or your father of the seed of Zeus? What good, then, does all this do him when he sits in tears about the damsel? "But I am an orator." And was not he? Do you not observe how he has dealt with Odysseus and Phoenix, the most skilful of the Greeks in eloquence, how he stopped their mouths? This is all I have to say to you, and even for this I have no heart.—Why so?—Because you have not stimulated me. For what is there in you that I may look at and be stimulated, as experts in horseflesh are stimulated when they see thoroughbred horses? At your paltry body? But you make it ugly by the shape which you give to it. At your clothes? There is something too luxurious about them, also. At your air, at your countenance? I have nothing to look at. When you wish to hear a philosopher, do not ask him, "Have you nothing to say to me?" but only show yourself capable of hearing him, and you will see how you will stimulate the speaker.

EPICTETUS CHAPTER 25 - How Is Logic Necessary?

When someone in his audience said, Convince me that logic is necessary, he answered: Do you wish me to demonstrate this to you?—Yes.—Well, then, must I use a demonstrative argument?—And when the questioner had agreed to that, Epictetus asked him. How, then, will you know if I impose upon you?—As the man had no answer to give, Epictetus said: Do you see how you yourself admit that all this instruction is necessary, if, without it, you cannot so much as know whether it is necessary or not?

EPICTETUS CHAPTER 26 - What Is The Distinctive Characteristic Of $\ensuremath{\mathsf{Error}}\xspace^2$

Every error involves a contradiction. For since he who is in error does not wish to err, but to be right, it is clear that he is not doing what he wishes. For what does the thief wish to achieve? His own interest. Therefore, if thievery is against his interest, he is not doing what he wishes. Now every rational soul is by nature offended by contradiction; and so, as long as a man does not understand that he is involved in contradiction, there is nothing to prevent him from doing contradiction, he must of necessity abandon and avoid it, just as a bitter necessity compels a man to renounce the false when he perceives that it is false; but as long as the falsehood does not appear, he assents to it as the truth.

He, then, who can show to each man the contradiction which causes him to err, and can clearly bring home to him how he is not doing what he wishes, and is doing what he does not wish, is strong in argument, and at the same time effective both in encouragement and refutation. For as soon as anyone shows a man this, he will of his own accord abandon what he is doing. But so long as you do not point this out, be not surprised if he persists in his error; for he does it because he has an impression that he is right. That is why Socrates, because he trusted in this faculty, used to say: "I am not in the habit of calling any other witness to what I say, but I am always satisfied with my fellow-disputant, and I call for his vote and summon him as a witness, and he, though but a single person, is sufficient for me in place of all men." For Socrates knew what moves a rational soul, and that like the beam of a balance it will incline, whether you wish or no. Point out to the rational governing faculty a contradiction and it will desist; but if you do not point it out, blame yourself rather than the man who will not be persuaded

DISCOURSES OF EPICTETUS BOOK 3

EPICTETUS CHAPTER 1 - Of Personal Adornment Once, when he was visited by a young student of rhetoric whose hair was somewhat too elaborately dressed, and whose attire in general was highly embellished, Epictetus said: Tell me if you do not think that some dogs are beautiful, and some horses, and so every other creature.---I do, said the young man.-Is not the same true also of men, some of them are handsome, and some ugly?-Of course.-Do we, then, on the same grounds, pronounce each of these creatures in its own kind beautiful, or do we pronounce each beautiful on special grounds? I shall show you what I mean. Since we see that a dog is born to do one thing, and a horse another, and, if you will, a nightingale for something else, in general it would not be unreasonable for one to declare that each of them was beautiful precisely when it achieved supreme excellence in terms of its own nature; and, since each has a different nature, each one of them, I think, is beautiful in a different fashion. Is that not so?-He agreed.-Does it not follow, then, that precisely what makes a dog beautiful, makes a horse ugly, and precisely what makes a horse beautiful, makes a dog ugly, if, that is, their natures are different?-So it appears.- Yes, for. to my way of thinking, what makes a pancratiast beautiful does not make a wrestler good, and, more than that, makes a runner quite absurd: and the same man who is beautiful for the pentathlon is very ugly for wrestling?-That is so, said -What, then, makes a man beautiful other than just that he.which makes a dog or a horse beautiful in its kind?-Just that said he.-What is it, then, that makes a dog beautiful? The presence of a dog's excellence. What makes a horse beautiful? The presence of a horse's excellence. What, then, makes a man beautiful? Is it not the presence of a man's excellence? Very well, then, young man, do you too, if you wish to be beautiful, labour to achieve this, the excellence that characterizes a

man.—And what is that?—Observe who they are whom you yourself praise, when you praise people dispassionately; is it the just, or the unjust?—The just;—is it the temperate, or the dissolute?—The temperate;—and is it the self-controlled, or the uncontrolled?—The self-controlled.—In making yourself that kind of person, therefore, rest assured that you will be making yourself beautiful; but so long as you neglect all this, you must needs be ugly, no matter if you employ every artifice to make yourself look beautiful.

Beyond that I know not what more I can say to you; for if I say what I have in mind, I shall hurt your feelings, and you will leave, perhaps never to return; but if I do not say it, consider the sort of thing I shall be doing. Here you are coming to me to get some benefit, and I shall be bestowing no benefit at all; and you are coming to me as to a philosopher. and I shall be saying nothing to you as a philosopher. Besides, is it anything but cruel for me to leave you unreformed? If some time in the future you come to your senses, you will have good reason to blame me: "What did Epictetus observe in me," you will say to yourself, "that, although he saw me in such a condition and coming to him in so disgraceful a state, he should let me be so and say never a word to me? Did he so completely despair of me? Was I not young? Was I not ready to listen to reason? And how many other young fellows make any number of mistakes of the same kind in their youth? I am told that once there was a certain Polemo who from being a very dissolute young man underwent such an astonishing transformation. Well, suppose he did not think that I should be another Polemo; he could at least have set my hair right, he could have stripped me of my ornaments, he could have made me stop plucking my hairs; but although he saw me looking like-what shall I say?-he held his peace." As for me, I do not say what it is you look like, but you will say it, when you come to yourself, and will realise what it is and the kind of people those are who act this way.

If you bring this charge against me some day, what shall I be able to say in my own defence? Yes; but suppose I speak and he not obey. And did Laius obey Apollo? Did he not go away and get drunk and say good-bye to the oracle? What then? Did that keep Apollo from telling him the truth? Whereas I do not know whether you will obey me or not. Apollo knew perfectly well that Laius would not obey, and yet he spoke.— But why did he speak?—And why is he Apollo? And why does he give out oracles? And why has he placed himself in this position, to be a prophet and a fountain of truth, and for the inhabitants of the civilized world to come to him? And why has the placed himself in this position, to be a prophet and a fountain of truth, and for the inhabitants of the civilized world to come to him? And why has the place to the front of his temple, although no one pays attention to them?

Did Socrates succeed in prevailing upon all his visitors to keep watch over their own characters? No, not one in a thousand. Nevertheless, once he had been assigned this post, as he himself says, by the ordinance of the Deity, he never abandoned it. Nay, what does he say even to his judges? "If you acquit me," he says, "on these conditions, namely, that I no longer engage in my present practices. I will not accept your offer, neither will I give up my practices, but I will go up to young and old, and, in a word, to everyone that I meet, and put to him the same question that I put now, and beyond all others I will especially interrogate you," he says, "who are my fellow-citizens, inasmuch as you are nearer akin to me." Are you so inquisitive, O Socrates, and meddlesome? And why do you care what we are about? "Why, what is that you are saying? You are my partner and kinsman, and yet you neglect yourself and provide the State with a bad citizen, and your kin with a bad kinsman, and your neighbours with a bad neighbour." "Well, who are you?" Here it is a bold thing to "I am he who must needs take interest in men." For no sav. ordinary ox dares to withstand the lion himself: but if the bull comes up and withstands him, say to the bull, if you think fit, 'But who are you?" and "What do you care?" Man, in every species nature produces some superior individual, among cattle, dogs, bees, horses. Pray do not say to the superior individual, "Well, then, who are you?" Or if you do, it will get a voice from somewhere and reply to you, "I am the same sort of thing as red in a mantle; do not expect me to resemble the rest, and do not blame my nature because it has made me different from the rest."

What follows? Am I that kind of person? Impossible. Are you, indeed, the kind of person to listen to the truth? I would that you were! But nevertheless, since somehow or other I have been condemned to wear a grey beard and a rough cloak, and you are coming to me as to a philosopher, I shall not treat you cruelly, nor as though I despaired of you, but I shall say: Young man, whom do you wish to make beautiful? First learn who you are, and then, in the light of that knowledge, adorn yourself. You are a human being; that is, a mortal animal gifted with the ability to use impressions rationally. And what is "rationally"? In accordance with nature and perfectly What element of superiority, then, do you possess? The animal in you? No. Your mortality? No. Your ability to use impressions? No. Your reason is the element of superiority which you possess; adorn and beautify that; but leave your hair to Him who fashioned it as He willed. Come, what other designations apply to you? Are you a man or a woman?-A

man.-Very well then, adorn a man, not a woman. Woman is born smooth and dainty by nature, and if she is very hairy she is a prodigy, and is exhibited at Rome among the prodigies. But for a man not to be hairy is the same thing, and if by nature he has no hair he is a prodigy, but if he cuts it out and plucks it out of himself, what shall we make of him? Where shall we exhibit him and what notice shall we post? "I will show you," we say to the audience, "a man who wishes to be a woman rather than a man." What a dreadful spectacle! No one but will be amazed at the notice; by Zeus, I fancy that even the men who pluck out their own hairs do what they do without realising what it means. Man, what reason have you to complain against your nature? Because it brought you into the world as a man? What then? Ought it to have brought all persons into the world as women? And if that had been the case, what good would you be getting of your self-adornment? For whom would you be adorning yourself, if all were women? Your paltry body doesn't please you, eh? Make a clean sweep of the whole matter; eradicate your-what shall I call it?the cause of your hairiness; make yourself a woman all over, so as not to deceive us, not half-man and half-woman. Whom do you wish to please? Frail womankind? Please them as a "Yes, but they like smooth men." Oh, go hang! And if man. they liked sexual perverts, would you have become such a pervert? Is this your business in life, is this what you were born for, that licentious women should take pleasure in you? Shall we make a man like you a citizen of Corinth, and perchance a warden of the city, or superintendent of ephebi, or general, or superintendent of the games? Well, and when you have married are you going to pluck out your hairs? For whom and to what end? And when you have begotten boys, are you going to introduce them into the body of citizens as plucked creatures too? A fine citizen and senator and orator! Is this the kind of young men we ought to pray to have born and brought up for us?

By the gods, young man, may such not be your fate! But once you have heard these words go away and say to yourself, "It was not Epictetus who said these things to me; why, how could they have occurred to him? but it was some kindly god or other speaking through him. For it would not have occurred to Epictetus to say these things, because he is not in the habit of speaking to anyone. Come then, let us obey God, that we rest not under His wrath." Nay, but if a raven gives you a sign by his croaking, it is not the raven that gives the sign, but God through the raven; whereas if He gives you a sign through a human voice, will you pretend that it is the man who is saying these things to you, so that you may remain ignorant of the power of the divinity, that He gives signs to some men in this way, and to others in that, but that in the greatest and most sovereign matters He gives His sign through His noblest messenger? What else does the poet mean when he says:

Since ourselves we did warn him,

Sending down Hermes, the messenger god, the slayer of Argus,

Neither to murder the husband himself, nor make love to his consort?

As Hermes descended to tell Aegisthus that, so now the gods tell you the same thing.

Sending down Hermes, the messenger god, the slayer of Argus,

not to distort utterly nor to take useless pains about that which is already right, but to leave the man a man, and the woman a woman, the beautiful person beautiful as a human being, the ugly ugly as a human being. Because you are not flesh, nor hair, but moral purpose; if you get that beautiful, then you will be beautiful. So far I do not have the courage to tell you that you are ugly, for it looks to me as though you would rather hear anything than that. But observe what Socrates says to Alcibiades, the most handsome and youthfully beautiful of men: "Try, then, to be beautiful." What does he tell him? "Dress your locks and pluck the hairs out of your legs?" God forbid! No, he says, "Make beautiful your moral purpose, eradicate your worthless opinions." How treat your paltry body, then? As its nature is. This is the concern of Another; leave it to Him .- What then? Does the body have to be left unclean?-God forbid! but the man that you are and were born to be, keep that man clean, a man to be clean as a man, a woman as a woman, a child as a child. No, but let's pluck out also the lion's mane, so that he may not fail to be "cleaned up," and the cock's comb, for he too ought to be "cleaned up"! Clean? Yes, but clean as a cock, and the other clean as a lion, and the hunting dog clean as a hunting dog!

EPICTETUS CHAPTER 2 - The Fields Of Study In Which The Man Who Expects To Make Progress Will Have To Go Into Training; And That We Neglect What Is Most Important

There are three fields of study in which the man who is going to be good and excellent must first have been trained. The first has to do with desires and aversions, that he may never fail to get what he desires, nor fall into what he avoids; the second with cases of choice and of refusal, and, in general, with duty, that he may act in an orderly fashion, upon good reasons, and not carelessly; the third with the avoidance of error and rashness in judgement, and, in general, about cases of assent. Among these the most important and especially pressing is that which has to do with the stronger emotions; for a strong emotion does not arise except a desire fails to attain its object, or an aversion falls into what it would avoid. This is the field of study which introduces to us confusions, tumults, misfortunes and calamities; and sorrows, lamentations, envies; and makes us envious and jealous passions which make it impossible for us even to listen to reason. The second field of study deals with duty; for I ought not to be unfeeling like a statue, but should maintain my relations, both natural and acquired, as a religious man, as a son, a brother, a father, a citizen.

The third belongs only to those who are already making progress: it has to do with the element of certainty in the matters which have just been mentioned, so that even in dreams, or drunkenness, or a state of melancholy-madness, a man may not be taken unawares by the appearance of an untested sense-impression .- This, says someone, is beyond us.-But philosophers nowadays pass by the first and second fields of study, and concentrate upon the third, upon arguments which involve equivocal premisses, which derive syllogisms by the process of interrogation, which involve hypothetical premisses, and sophisms like The Liar .-- Of course, he says, even when a man is engaged in subjects of this kind he has to preserve his freedom from deception.-But what kind of a man ought to engage in them?-Only the one who is already good and excellent .- Do you, then, fall short in this? Have you already attained perfection in the other subjects? Are you proof against deception in handling small change? If you see a pretty wench, do you resist the senseimpression? If your neighbour receives an inheritance, do you not feel a twinge of envy? And is security of judgement now the only thing in which you fall short? Wretch, even while you are studying these very topics you tremble and are worried for fear someone despises you, and you ask whether anybody is saying anything about you. And if someone should come and "A discussion arising as to who was the best of the say, philosophers, someone who was there said that So-and-so was the only real philosopher," immediately your poor little oneinch soul shoots up a yard high. But if another party to the discussion says, "Nonsense, it is a waste of time to listen to Soand-so. Why, what does he know? He has the rudiments, but nothing else," you are beside yourself, you grow pale, immediately you shout, "I shall show him who I am, that I am a great philosopher!" Yet we see what a man is by just such conduct. Why do you wish to show it by anything else? Do you not know that Diogenes showed one of the sophists thus. pointing out his middle finger at him, and then when the man was furious with rage, remarked, "That is So-and-so; I have pointed him out to you." For a man is not something like a stone or a stick of wood to be pointed out with a finger, but when one shows a man's judgements, then one shows him as a man

Let us take a look at your judgements too. Is it not evident that you set no value on your own moral purpose, but look beyond to the things that lie outside the province of the moral purpose, namely, what So-and-so will say, and what impression you will make, whether men will think you a scholar, or that you have read Chrysippus or Antipater? Why, if you have read them and Archedemus too, you have everything! Why are you any longer worried for fear you will not show us who you are? Do you wish me to tell you what kind of a man you have shown us that you are? A person who comes into our presence mean, hypercritical, quick-tempered, cowardly, finding fault with everything, blaming everybody, never quiet, vain-glorious; these are the qualities which you have exhibited to us. Go away now and read Archedemus; then if a mouse falls down and makes a noise, you are dead with fright. For the same kind of death awaits you that carried off-what's his name?-oh, yes, Crinus. He, too, was proud of himself because he could understand Archedemus. Wretch, are you not willing to let alone those things that do not concern you? They are appropriate for those who can study them without disturbance of spirit, who have the right to say, "I do not vield to anger, or sorrow, or envy; I am not subject to restraint, or to compulsion. What do I yet lack? I enjoy leisure, I have peace of mind. Let us see how we ought to deal with equivocal premisses in arguments; let us see how a person may adopt an hypothesis and yet not be led to an absurd conclusion." These things belong to men of that type. When men are prospering it is appropriate to light a fire, to take luncheon, and, if you will, even to sing and dance; but when the ship is already sinking you come up to me and start to hoist the topsails!

EPICTETUS CHAPTER 3 - What Is The Subject-Matter With Which The Good Man Has To Deal; And What Should He The Chief Object Of Our Training?

The subject-matter with which the good and excellent man has to deal is his own governing principle, that of a physician and the masseur is the body, of a farmer is his farm; but the function of the good and excellent man is to deal with his impressions in accordance with nature. Now just as it is the nature of every soul to assent to the true, dissent from the false, and to withhold judgement in a matter of uncertainty, so it is its nature to be moved with desire toward the good, with aversion toward the evil, and feel neutral toward what is neither evil nor good. For just as neither the banker nor the greengrocer may legally refuse the coinage of Caesar, but if you present it, whether he will or no, he must turn over to you what you are purchasing with it, so it is also with the soul. The instant the good appears it attracts the soul to itself, while the evil repels the soul from itself. A soul will never refuse a clear sense-impression of good, any more than a man will refuse the coinage of Caesar, On this concept of the good hangs every impulse to act both of man and of God.

That is why the good is preferred above every form of kinship. My father is nothing to me, but only the good. "Are you so hard-hearted?" Yes, that is my nature. This is the coinage which God has given me. For that reason, if the good is something different from the noble and the just, then father and brother and country and all relationships simply disappear. But shall I neglect my good, so that you may have it, and shall I make way for you? What for? "I am your father." But not a good. "I am your brother." But not a good. If, however, we define the good as consisting in a right moral purpose, then the mere preservation of the relationships of life becomes a good; and furthermore, he who gives up some of the externals achieves the good. "My father is taking away my money," But he is doing you no harm, "My brother is going to get the larger part of the farm," Let him have all he wants. That does not help him at all to get a part of your modesty. does it, or of your fidelity, or of your brotherly love? Why, from a possession of this kind who can eject you? Not even Zeus. Nay, nor did He even wish to, but this matter He put under my control, and He gave it to me even as He had it Himself, free from hindrance, compulsion, restraint.

When, therefore, different persons have different pieces of coinage, a man offers the coin and gets what is bought by it. A thief has come to the province as Proconsul. What coinage does he use? Silver. Offer it and carry away what you wish. An adulterer has come. What coinage does he use? Frail wenches. "Take," says one, "the coin and sell me the little baggage." Give, and buy. Another is interested in boys. Give him the coin and take what you wish. Another is fond of hunting. Give him a fine horse or dog; with sighs and groans he will sell for it what you wish; for Another constrains him from within, the one who has established this currency.

It is chiefly with this principle in mind that a man must exercise himself. Go out of the house at early dawn, and no matter whom you see or whom you hear, examine him and then answer as you would to a question. What did you see? A handsome man or a handsome woman? Apply your rule. Is it outside the province of the moral purpose, or inside? Outside. Away with it. What did you see? A man in grief over the death of his child? Apply your rule. Death lies outside the province of the moral purpose. Out of the way with it. Did a Consul meet you? Apply your rule. What sort of thing is a consulship? Outside the province of the moral purpose, or inside? Outside. Away with it, too, it does not meet the test; throw it away, it does not concern you. If we had kept doing this and had exercised ourselves from dawn till dark with this principle in mind,-by the gods, something would have been achieved! But as it is, we are caught gaping straightway at every external impression that comes along, and we wake up a little only during the lecture, if indeed we do so even then. After that is over we go out, and if we see a man in grief, we say, "It is all over with him"; if we see a Consul, we say, "Happy man"; if we see an exile, "Poor fellow"; or a poverty-stricken person, Wretched man, he has nothing with which to get a bite to eat." These, then, are the vicious judgements which we ought to eradicate; this is the subject upon which we ought to concentrate our efforts. Why, what is weeping and sighing? A judgement. What is misfortune? A judgement. What are strife, disagreement, faultfinding, accusing, impiety, foolishness? They are all judgements, and that, too, judgements about things that lie outside the province of moral purpose, assumed to be good or evil. Let a man but transfer his judgements to matters that lie within the province of the moral purpose, and guarantee that he will be steadfast, whatever be the state of things about him.

The soul is something like a bowl of water, and the external impressions something like the ray of light that falls upon the water. Now when the water is disturbed, it looks as though the ray of light is disturbed too, but it is not disturbed. And so, therefore, when a man has an attack of vertigo, it is not the arts and the virtues that are thrown into confusion, but the spirit in which they exist; and when this grows steady again, so do they too.

EPICTETUS CHAPTER 4 - To The Man Who Look Sides, In An Undignified Manner, While In A Theatre

The Procurator of Epirus took the side of a comic actor in a somewhat undignified manner and was reviled by the people for doing so. Thereupon he brought word to Epictetus that he had been reviled, and gave expression to his indignation at the men who had so reviled him. Why, what wrong were they doing? said Epictetus. They too were taking sides, just as you vourself were. But when the other asked. Is that the way, then, in which a man takes sides? he replied, Yes, they saw you, their Governor, the friend and Procurator of Caesar, taking sides in this way, and weren't they likely to take sides themselves in the same way? Why, if people should not take sides in this way, you had better not do so yourself; but if they should, why are you angry if they imitated you? For whom have the people to imitate but you, their superior? Whom do they look to but you, when they go to the theatres? "See," says one of them, "how the Procurator of Caesar acts in the theatre; he shouts; very well, I'll shout too. He jumps up and down; I'll jump up and down too. His claque of slaves sit in different parts of the house and shout, whereas I haven't any slaves; very well. I'll shout as loud as I can to make up for all of them." You ought to know, then, that when you enter the theatre, you enter as a standard of behaviour and as an example to the rest, showing them how they ought to act in the theatre. Why, then, did they revile you? Because every man hates what stands in his way. They wanted So-and-so to get the crown, while you wanted the other man to get it. They were standing in your way, and you in theirs. You turned out to be the stronger; they did what they could, and reviled what was standing in their way. What, then, do you wish? That you should be able to do what you wish, but that they should not even say what they wish? And what is there surprising in all that? Don't the farmers revile Zeus, when he stands in their way? Don't the sailors revile Zeus? Do men ever stop reviling Caesar? What then? Doesn't Zeus know about it? Isn't Caesar informed of what is said? What, then, does he do? He knows that if he punishes all who revile him he will have no one left to rule over. What then? Ought you upon entering the theatre to say, "Come, let's see that Sophron gets the crown"? and not rather, "Come, let me in this subject-matter maintain my moral purpose in accord with nature"? No one is dearer to me than myself; it is absurd, therefore, for me to let myself be hurt in order that another man may win a victory as a comic actor.-Whom, then, do I wish to win the victory? The victor; and so the one whom I wish to win the victory will always win it .--- But I wish Sophron to get the crown.--- Stage as many contests as you will in your own house, and proclaim him victor in the Nemean, Pythian, Isthmian, and Olympic games; but out in public do not arrogate to yourself more than your due, and do not filch away a public privilege. Otherwise you must put up with being reviled; because, when you do the same things that the people do, you are putting yourself on their level

EPICTETUS CHAPTER 5 - To Those Who Leave School [Or Education] Because Of Illness

I am ill here, says one of the students, and want to go back home.-What, were you free from illness at home? Do you not raise the question whether you are doing here any of the things that have a bearing upon your moral purpose, so that it shall be improved? For if you are not accomplishing anything, it was no use for you to have come in the first place. Go back and tend to your affairs at home. For if your governing principle cannot be brought into conformity with nature, no doubt your paltry piece of land can be made to conform with it. You will increase the amount of your small change; you will care for your father in his old age, you will walk up and down in the market, you will hold office: a poor wretch yourself, you will do wretchedly whatever comes next. But if you understand yourself, namely, that you are putting away certain bad judgements and taking on others in their place, and that you have transferred your status from what lies outside the province of the moral purpose to what lies inside the same, and that if ever you say "Alas!" you are speaking, not for your father's sake, or your brother's sake, but "for my own sake," then why take account of illness any longer? Do you not know that disease and death needs must overtake us, no matter what we are doing? They overtake the farmer at his work in the fields, the sailor on the sea. What do you wish to be doing when it overtakes you? For no matter what you do you will have to be overtaken by death. If you have anything better to be doing when you are so overtaken, get to work on that.

As for me, I would fain that death overtook me occupied with nothing but my own moral purpose, trying to make it tranquil, unhampered, unconstrained, free. This is what I wish to be engaged in when death finds me, so that I may be able to say to God, "Have I in any respect transgressed Thy commands? Have I in any respect misused the resources which Thou gavest me, or used my senses to no purpose, or my preconceptions? Have I ever found any fault with Thee? Have I blamed Thy governance at all? I fell sick, when it was Thy will; so did other men, but I willingly. I became poor, it being Thy will, but with joy, I have held no office, because Thou didst not will it, and I never set my heart upon office. Hast Thou ever seen me for that reason greatly dejected? Have I not ever come before Thee with a radiant countenance, ready for any injunctions or orders Thou mightest give? And now it is Thy will that I leave this festival; I go, I am full of gratitude to Thee that Thou hast deemed me worthy to take part in this festival with Thee, and to see Thy works, and to understand Thy governance." Be this my thought, this my writing, this my reading, when death comes upon me.

But my mother will not hold my head in her arms when I am ill.—Very well, go back to your mother; you are just the sort of person that deserves to have his head held in somebody's arms when he is ill!—But at home I used to have a nice bed to lie on.—Go back to your bed; without doubt you deserve to lie on such a fine bed even when you are well! Pray, then, do not lose by staying here what you can do there.

But what does Socrates say? "As one man rejoices," remarks he, "in improving his own farm, and another his own horse, so I rejoice day by day in following the course of my own improvement." [The closest parallels from Xenophon (Mem. I 6. 8 and 14) and Plato (Prot. 318 A) express the idea so differently that we have here probably (through Chrysippus) a fragment from one of the lost Socratic dialogues, of which there was a large body.] In what respect; in little philosophic phrases?-Man, hold your tongue.-In little philosophic theories, then?-What are you doing?-Well, I don't see anything else that the philosophers spend their time on.—Is it nothing in your eyes never to bring accusation against anyone be it God or man? Never to blame anyone? Always to wear the same expression on one's face, whether one is coming out or going in? These are the things which Socrates knew, and yet he never said that he either knew or taught anything. But if someone called for little philosophic phrases or theories, he used to take him over to Protagoras or Hippias. It was just as though someone had come to him for fresh vegetables, and he would have taken him over to the market gardener. Who, then, among you makes this purpose of Socrates the purpose of his own life? Why, if you did, you would have been glad even to be ill, and to go hungry, and to die. If any one of you was ever in love with a pretty wench, he knows that what I say is true.

EPICTETUS CHAPTER 6 - Some Scattered Sayings

When someone asked how it was that, despite the greater amount of work which was done nowadays in logic, there was more progress made in former times, Epictetus replied. On what has labour been expended in our time, and in what was the progress greater in those days? For in that upon which labour has been expended in our time, progress also will be found in our time. The fact is that in our time labour has been expended upon the solution of syllogisms, and there is progress along that line; but in the early days not only had labour been expended upon maintaining the governing principle in a state of accord with nature, but there was also progress along that line. Do not, therefore, substitute one thing for the other, and do not expect, when you devote labour to one thing, to be making progress in another. But see whether any one of us who is devoting himself to keeping in a state of conformity with nature, and to spending his life so, fails to make progress. For you will find that there is none of whom that is true

The good man is invincible; naturally, for he enters no contest where he is not superior. "If you want my property in the country," says he, "take it; take my servants, take my office, take my paltry body. But you will not make my desire fail to get what I will, nor my aversion fall into what I would avoid." This is the only contest into which the good man enters, one, namely, that is concerned with the things which belong in the province of the moral purpose; how, then, can he help but be invincible?

When someone asked him what "general perception" was, he replied. Just as a sense of hearing which distinguishes merely between sounds would be called "general," but that which distinguishes between tones is no longer "general," but "technical," so there are certain things which those men who are not altogether perverted see by virtue of their general faculties. Such a mental constitution is called "general perception."

It is not an easy thing to prevail upon soft young men; no, and you can't catch soft cheese on a fishhook either—but the gifted young men, even if you try to turn them away, take hold of reason all the more firmly. And so also Rufus for the most part tried to dissuade men, using such efforts to dissuade as a means of discriminating between those who were gifted and those who were not. For he used to say, "Just as a stone, even if you throw it upwards, will fall downwards to earth by virtue of its very constitution, so is also the gifted man; the more one beats him back, the more he inclines toward his natural object."

EPICTETUS CHAPTER 7 - A Conversation With The Imperial Bailiff* Of The Free Cities, Who Was An Epicurean [* Called by the Romans Corrector, an extraordinary official, of senatorial rank, appointed by the Emperor, and charged with carrying out administrative reforms in matters which lay outside the general competence of the ordinary civil authorities.]

When the Imperial Bailiff, who was an Epicurean, came to visit him, Epictetus said: It is proper for us laymen to make inquiry of you philosophers what the best thing in the world is-just as those who have come to a strange town make inquiry of the citizens and people who are familiar with the place-so that, having learned what it is, we may go in quest of it ourselves and behold it, as do strangers with the sights in the cities. Now that three things belong to man, soul, and body, and things external, hardly anyone denies; all you have to do, then, is to answer the question, Which is the best? what are we going to tell men? The flesh? And was it for this that Maximus sailed all the way to Cassiope during the winter with his son, to see him on his way? Was it to have pleasure in the flesh? When the other had denied that and said "God forbid!" Epietetus continued: Is it not proper to have been very zealous for that which is best?-It is certainly most proper. -What have we better, then, than the flesh?-The soul, said he. Are the goods of the best thing better, or those of the inferior?-Those of the best thing.-Do goods of the soul belong in the sphere of the moral purpose, or do they not?-To the sphere of the moral purpose.--Is the pleasure of the soul, therefore, something that belongs in this sphere?-He agreed.-At what is this produced? At itself? But that is inconceivable. For we must assume that there is already in existence a certain antecedent essence of the good, by partaking of which we shall feel pleasure of soul.-He agreed to this also .- At what, then, are we going to feel this pleasure of soul? If it is at the goods of the soul, the essence of the good has already been discovered. For it is impossible that one thing be good, and yet that it is justifiable for us to take delight in something else; nor again, that when the antecedent is not good the consequent be good; because, in order to justify the consequent, the antecedent must be good. But say not so, you Epicureans, if you are in your right mind; for you will be saying what is inconsistent both with Epicurus and with the rest of your doctrines. The only thing left for you to say is that pleasure of soul is pleasure in the things of the body, and then they become matters of prime importance, and the true nature of the good.

That is why Maximus acted foolishly if he made his voyage for the sake of anything but the flesh, that is, for the sake of anything but the best. And a man acts foolishly too, if, when he is judge and able to take the property of other men, he keeps his hands off it. But, if you please, let us consider this point only, that the stealing be done secretly, safely, without anybody's knowledge. For even Epicurus himself does not declare the act of theft evil, but only getting caught, and merely because it is impossible to feel certain that one will not be detected, he says, "Do not steal." But I tell you that if it is done adroitly and circumspectly, we shall escape detection; besides that we have influential friends in Rome both men and women; and the Greeks are a feeble folk, none of them will have the courage to go up to Rome for that purpose. Why refrain from your own good? This is foolish, it is silly. And again, I shall not believe you, even if you tell me that you do refrain. For just as it is impossible to assent to what is seen to be false, and to reject what is true, so it is impossible to reject what is seen to be good. Now wealth is a good, and when it comes to pleasures is, so to speak, the thing most productive of them. Why should you not acquire it? And why should we not seduce our neighbour's wife, if we can escape detection? And if her husband talks nonsense, why should we not break his neck to boot? That is, if you wish to be a proper sort of philosopher, a perfect one, consistent with your own doctrines. If not, you will be no better than we who bear the name of Stoics; for we too talk of one thing and do another. We talk of the noble and do the base; but you will be perverse in the opposite way, laving down base doctrines, and doing noble deeds.

In the name of God, I ask you, can you imagine an Epicurean State? One man says, "I do not marry." "Neither do I," says another, "for people ought not to marry." No, nor have children; no, nor perform the duties of a citizen. And what, do you suppose, will happen then? Where are the citizens to come from? Who will educate them? Who will be superintendent of the ephebi, or gymnasium director? Yes, and what will either of these teach them? What the young men of Lacedaemon or Athens were taught? Take me a young man; bring him up according to your doctrines. Your doctrines are bad, subversive of the State, destructive to the family, not even fit for women. Drop these doctrines, man. You live in an imperial State; it is your duty to hold office, to judge uprightly, to keep your hands off the property of other people; no woman but your wife ought to look handsome to you, no boy handsome, no silver plate handsome, no gold plate. Look for doctrines consistent with these principles of conduct, doctrines which will enable you to refrain gladly from matters so persuasive to attract and to overpower a man. If, however, in addition to the persuasive power of the things just mentioned, we shall have gone ahead and invented also some such doctrine as this of yours, which helps to push us on into them, and gives them additional strength, what is going to happen?

In a piece of plate what is the best thing, the silver or the art? The substance of the hand is mere flesh, but the important thing is the works of the hand. Now duties are of three kinds; first, those that have to do with mere existence, second, those that have to do with existence of a particular sort, and third, the principal duties themselves. So also in the case of man, it is not his material substance that we should honour, his bits of flesh, but the principal things. What are these? The duties of citizenship, marriage, begetting children, reverence to God, care of parents, in a word, desire, avoidance, choice, refusal, the proper performance of each one of these acts, and that is, in accordance with our nature. And what is our nature? To act as free men, as noble, as self-respecting. Why, what other living being blushes, what other comprehends the impression of shame? And it is our nature to subordinate pleasure to these duties as their servant, their minister, so as to arouse our interest and keep us acting in accordance with nature.

But I am rich and need nothing .- Why, then, do you still pretend to be a philosopher? Your gold and silver plate are enough to satisfy you; what do you need doctrines for?-Yes, but I sit too as judge over the Hellenes .- Do you know how to sit as judge? What has brought you to know that?-Caesar wrote credentials for me.-Let him write you credentials that will allow you to sit as a judge in music and literature; and what good will it do you? However this may be, there is another question, and that is, how did you come to be a judge? Whose hand did you kiss-that of Symphorus or that of Numenius? In front of whose bedroom door did you sleep? To whom did you send presents? After all, don't you recognise that the office of judge is worth exactly as much as Numenius is?-But I can throw whom I will into prison.-As you can a stone.-But I can have beaten to death with a club whom I will.-As you can an ass.-That is not governing men. Govern us as rational beings by pointing out to us what is profitable, and we will follow you; point out what is unprofitable, and we will turn away from it. Bring us to admire and emulate you, as Socrates brought men to admire and emulate him. He was the one person who governed people as men, in that he brought them to subject to him their desire, their aversion, their choice, their refusal. "Do this; do not do this; otherwise I will throw you into prison." Say that, and yours ceases to be a government as over rational beings. Nay, rather, say, "As Zeus has ordained, do this; if you do not do so, you will be punished, you will suffer injury." What kind of injury? No injury but that of not doing what you ought; you will destroy the man of fidelity in you, the man of honour, the man of decent behaviour. You need not look for greater injuries than these.

EPICTETUS CHAPTER 8 - How Ought We To Exercise Ourselves To Deal With The Impressions Of Our Senses?

As we exercise ourselves to meet the sophistical interrogations, so we ought also to exercise ourselves daily to meet the impressions of our senses, because these too put interrogations to us. So-and-so's son is dead. Answer, ' lies outside the sphere of the moral purpose, it is not an evil." His father has disinherited So-and-so; what do you think of it? "That lies outside the sphere of the moral purpose, it is not an evil." Caesar has condemned him. "That lies outside the sphere of the moral purpose, it is not an evil." He was grieved at all this. "That lies within the sphere of the moral purpose, it is an evil." He has borne up under it manfully. "That lies within the sphere of the moral purpose, it is a good." Now if we acquire this habit, we shall make progress; for we shall never give our assent to anything but that of which we get a convincing sense-impression. His son is dead. What happened? His son is dead. Nothing else? Not a thing. His ship is lost. What happened? His ship is lost. He was carried off to prison. What happened? He was carried off to prison. But the observation: "He has fared ill," is an addition that each man makes on his own responsibility. "But," you say, "Zeus does not do right in all this." What makes you think so? Because He has made you capable of patient endurance, and highminded, because He has taken from these things the quality of being evils, because you are permitted to suffer these things and still to be happy, because He has opened for you the door, whenever they are not to your good? Man, go out, and do not complain

Hear how the Romans feel about philosophers, if you care to know. Italicus, who has a very great reputation among them as a philosopher, once, when I was present, got angry at his friends, as though he were suffering something intolerable, and said, "I cannot bear it: you are the death of me! you will make me just like him," and pointed at me!

EPICTETUS CHAPTER 9 - To A Certain Rhetorician Who Was Going To Rome For A Lawsuit

There came in to visit Epictetus one day a man who was on his way to Rome, where he was engaged in a lawsuit involving an honour to be bestowed on him. Epictetus asked what the reason was for the trip to the Capital, and the man proceeded to ask what opinion he had about the matter. If you ask me what you are going to do in Rome, says Epictetus, whether you will succeed or fail, I have no precept to offer. If, however, you ask how you are going to fare, I have this to say: If you have sound judgements, you will fare well; if unsound judgements, ill; since in every case the way a man fares is determined by his judgement. For what is it that made you eager to be elected patron of the people of Cnossos? Your judgement. What is it that impels you now to go up to Rome? Your judgement. And that in stormy weather, in danger, and at expense?-Yes, but I have to.-Who tells you that? Your judgement. Very well, then, if a man's judgements determine everything, and if a man has unsound judgements, whatever be the cause such also will be the consequence. Do we all, then, have sound judgements, both you and your opponent? If so, then how do you come to disagree? But do you have sound judgements rather than he? Why? You think so. So does he, and so do madmen. This is a poor criterion. But show me that you have made any study of your own judgements and have paid attention to them. And as now you are sailing to Rome so as to become patron of the men of Cnossos, and you are not satisfied to stay at home and keep the honours which you had but you have set your heart upon something greater and more conspicuous, so did you ever make a voyage for the purpose of studying your own judgements, and of rejecting one, if it is unsound? Whom have you ever visited for this purpose? What time have you set yourself, what period of your life? Review the periods of your life, all to yourself, if you are ashamed to do so before me. When you were a boy were you in the habit of examining your judgements? Did you not habitually do what you then did just as you do everything now? And when you grew to be a youth and were attending the lectures of the rhetoricians, and were yourself practising, what did you fancy that you yet lacked? And when you were a young man and began to take part in politics, and to plead cases yourself, and to have a good reputation, who any longer seemed in your eyes to be your equal? Would you under any circumstances have submitted to be put through an examination on the charge that you had wretched judgements? Very well then, what do you wish me to say to you?-Help me in this affair .--- I have no precepts to offer for this; and you too, if you came to me for this purpose, have not come to me as to a philosopher, but as to a vegetable-dealer, as to a cobbler.-To what end, then, do philosophers have precepts to offer?-To this end, that whatever happen, our governing principle shall be, and abide to the end, in accord with nature. Do you regard that as a trifle?-No; it is of the utmost moment. What then? Does this require only a little time, and is it possible to acquire it on a passing visit? Acquire it, then, if you can!

Then you will say, "When I met Epictetus it was like meeting a stone, a statue." Yes, for you took a look at me, and nothing more. The person who meets a man as a man is one who learns to understand the other's judgements, and in his turn exhibits his own. Learn to know my judgements; show me your own, and then say you have met me. Let us put one another to the test; if I cherish any evil judgement, take it away; if you cherish one, bring it forward. That is what it means to meet a philosopher. Oh no; but your way is: "We are passing, and while we are hiring our ship, we have a chance to take a look at Epictetus; let's see what in the world he has to say." Then you leave with the remark: "Epictetus was nothing at all, his language was full of solecisms and barbarisms." What else were you capable of judging, when you came in like that?

"But," says someone, "if I devote myself to these things, I shall not own a farm any more than you do, I shall not have silver goblets any more than you, or fine cattle any more than To all this it is perhaps enough to answer: "I do not you. need them; but you, even if you acquire many possessions, need still others, and whether you will or not, are more poverty-stricken than I am."—What, then, do I need?— What you do not have; steadfastness, your mind in a state of conformity with nature, freedom from vexation of spirit. Patron or not patron, what do I care? But you care. I am richer than you are: I am not worried about what Caesar is going to think of me; I flatter no man for that purpose. All this is what I have as an offset to your silver plate, and your gold plate. You have furnishings of gold, but your reason, your judgements, your assent, your choice, your desire-of earthenware. But when I have these in a state of conformity with nature, why should I not take up logic also as a sort of hobby? For, I have plenty of leisure: my mind is not being dragged this way and that. What shall I do, seeing there is nothing that disturbs me? What have I which more becomes a man than this? You and your kind when you have nothing to do are restless, go to the theatre, or wander up and down aimlessly. Why should not the philosopher develop his own reason? You turn to vessels of crystal. I to the syllogism called "The Liar"; you to myrrhine ware, I to the syllogism called "The Denyer." [The exact nature of this argument is unknown, although Chrysippus wrote two works on the subject (Diogenes Laertius 7, 197), and it is casually mentioned also by Clement (Titus Flavius Clemens) of Alexandria, Stromata, 11.] Everything that you already have seems small in your sight, but everything that I have seems important to me. Your strong desire is insatiate, mine is already satisfied. The same thing happens to the children who put their hand down into a narrow-necked jar and try to take out figs and nuts: if they get their hand full, they can't get it out, and then they cry. Drop a few and you will get it out. And so do you too drop

your desire; do not set your heart upon many things and you will obtain.

EPICTETUS CHAPTER 10 - How Ought We To Bear Our Illnesses?

When the need arises for each separate judgement, we ought to have it ready; at lunch our judgements about lunch, at the bath our judgements about a bath, in bed our judgements about a bed.

"Also allow not sleep to draw nigh to your languorous eyelids,

Ere you have reckoned up each several deed of the daytime: 'Where went I wrong? Did what? And what to be done was left undone?'

Starting from this point review, then, your acts, and thereafter remember:

Censure yourself for the acts that are base, but rejoice in the goodly."

And keep these verses on hand to use, not by way of exclamations, as we cry, "Paean Apollo!" Again, in a fever have ready the judgements which apply to that. Let us not, if we fall into a fever, abandon and forget all our principles. saying: "If I ever study philosophy again, let anything happen that will! I'll have to go away somewhere and take care of my poor body." Yes indeed, if fever does not go there too! But what is philosophy? Does it not mean making preparation to meet the things that come upon us? Do you not understand, then, that what you are saying amounts to something like this: 'If I ever again prepare to bear quietly the things that come upon me, let anything happen that will"? It is just as if a man should give up the pancratium because he has received blows. The only difference is that in the pancratium a man may stop, and so avoid a severe beating, but in life, if we stop the pursuit of philosophy, what good does it do? What, then, ought a man to say to himself at each hardship that befalls him? "It was for this that I kept training, it was to meet this that I used to practise." God says to you, "Give Me proof, whether you have striven lawfully*, eaten what is prescribed, taken exercise, heeded your trainer." [*The same phrase appears in 2 Timothy 2:5.] After that, do you flinch when the time for action arrives? Now it is time for your fever, let it come upon you in the right way: for thirst, bear your thirst in the right way: to go hungry, bear hunger in the right way. It is not in your power, you say? Who is there to prevent you? Nay, your physician will prevent you from drinking, but he cannot prevent you from thirsting in the right way; and he will prevent you from eating, but he cannot prevent you from bearing hunger in the right way

But am I not a scholar?-And for what purpose do you devote yourself to scholarship? Slave, is it not that you may be happy? Is it not that you may be secure? Is it not that you may conform to nature and live your life in that way. What prevents you, when you have a fever, from having your governing principle conform with nature? Here is the proof of the matter, the test of the philosopher. For this too is a part of life; like a stroll, a voyage, a journey, such is also a fever. I presume you do not read while taking a stroll, do you?-No.-No more than when you have a fever. But if you stroll in the right way, you perform what is expected of a stroller; if you have fever in the right way, you perform the things expected of the man who has a fever. What does it mean to have fever in the right way? Not to blame God, or man, not to be overwhelmed by what happens to you, to await death bravely and in the right way, to do what is enjoined upon you; when your physician comes to see you, not to be afraid of what he will say, and at the same time not to be carried away with joy, if he says, "You are doing splendidly"; for what good to you lay in that remark? Why, when you were well, what good was it to you? It means not to be downhearted, too. if he says, "You are in a bad way." For what does it mean to be in a bad way? That you are close to a separation of the soul from the body. What, then, is terrifying about that? If you do not draw near now, will you not draw near later? And is the universe going to be upset when you die? Why, then, do you wheedle your physician? Why do you say, "If you wish, Master, I shall get well"? Why do you give him occasion to put on airs? Why not give him just what is his due? As I give the shoemaker his due about my foot, the builder his due about my house, so also the physician his due about my paltry body, something that is not mine, something that is by nature dead. These are the things that the moment demands for a man who is in a fever; if he meets these demands, he has what properly belongs to him. For it is not the business of the philosopher to guard these external matters-neither his paltry wine, nor his paltry oil, nor his paltry body-but what? His own governing principle. And how treat externals? Only so far as not to act thoughtlessly about them. What proper occasion is there, then, any longer for fear? What proper occasion, then, any longer for anger? Or for fear about things that are not his own concern, worthless things? For here are the two principles that you ought to have ready at hand: Outside the sphere of the moral purpose there is nothing either good or bad; and, We ought not to lead events, but to follow them. "My brother ought not to have treated me so." No; but it is

for him to look to that. As for me, no matter how he behaves, I shall observe all my relations to him as I ought. For this is my part, the other does not belong to me; in this nobody can hinder me, the other is subject to hindrance.

EPICTETUS CHAPTER 11 - Some Scattered Sayings

There are certain punishments, assigned as it were by law, for those who are disobedient to the divine dispensation. "Whoever shall regard as good anything but the things that fall within the scope of his moral purpose, let him envy, yearn, flatter, feel disturbed; whoever shall regard anything else as evil, let him sorrow, grieve, lament, be unhappy." Nevertheless, for all that we are so severely punished, we cannot desist.

Remember what the poet says about the stranger:

Stranger, I may not with right dishonour a stranger, not even

Worse man were he than art thou; for of God are all strangers and beggars.

This, then, is what one should have ready to use in the case of a father: "I may not rightfully dishonour a father, not even if a worse man than art thou should come; for of Zeus, the God of Fathers, are they all"; and so in the case of a brother: "For of Zeus, the God of Kindred, are they all." And similarly, in the other social relations, we shall find Zeus overseeing them all.

EPICTETUS CHAPTER 12 - Of Training

We ought not to take our training in things that are unnatural or fantastic, since in that case we who profess to be philosophers will be no better than the mountebanks. For it is a hard thing also to walk a tight-rope, and not merely hard but dangerous too. Ought we also for this reason to practise walking a tight-rope, or setting up a palm, or throwing our arms about statues? Not a bit of it. Not every difficult and dangerous thing is suitable for training, but only that which is conducive to success in achieving the object of our effort. And what is the object of our effort? To act without hindrance in choice and in aversion. And what does this mean? Neither to fail to get what we desire, nor to fall into what we would avoid. Toward this end, therefore, our training also should tend. For since it is impossible without great and constant training to secure that our desire fail not to attain, and our aversion fall not into what it would avoid, be assured that, if you allow training to turn outwards, towards the things that are not in the realm of the moral purpose, you will have neither your desire successful in attaining what it would, nor your aversion successful in avoiding what it would. And since habit is a powerful influence, when we have accustomed ourselves to employ desire and aversion only upon these externals, we must set a contrary habit to counteract this habit, and where the very slippery nature of sense-impressions is in play, there we must set our training as a counteracting force

I am inclined to pleasure: I will betake myself to the opposite side of the rolling ship, and that beyond measure, so as to train myself I am inclined to avoid hard work; I will strain and exercise my sense-impressions to this end, so that my aversion from everything of this kind shall cease. For who is the man in training? He is the man who practises not employing his desire, and practises employing his aversion only upon the things that are within the sphere of his moral purpose, yes, and practises particularly in the things that are difficult to master. And so different men will have to practise particularly to meet different things. To what purpose is it, then, under these conditions, to set up a palm tree, or to carry around a leather tent, or a mortar and pestle? Man, practise, if you are arrogant, to submit when you are reviled, not to be disturbed when you are insulted, then you will make such progress, that, even if someone strikes you, you will say to yourself, "Imagine that you have thrown your arms about a statue." Next train yourself to use wine with discretion, not with a view to heavy drinking (for there are some clumsy fools who practise with this in mind), but first for the purpose of achieving abstention from wine, and keeping your hands off a wench, or a sweet-cake. And then some day, if the occasion for a test really comes, you will enter the lists at a proper time for the sake of discovering whether your sense-impressions still overcome you just as they did before. But first of all flee far away from the things that are too strong for you. It is not a fair match that, between a pretty wench and a young beginner in philosophy. "A pot," as they say, "and a stone do not go together.

After your desire and your aversion the next topic has to do with your choice and refusal. Here the object is to be obedient to reason, not to choose or to refuse at the wrong time, or the wrong place, or contrary to some other similar propriety.

The third topic has to do with cases of assent; it is concerned with the things that are plausible and attractive. For, just as Socrates used to tell us not to live a life unsubjected to examination, so we ought not to accept a sense-impression unsubjected to examination, but should say, "Wait, allow me to see who you are and whence you come" (just as the night-watch say, "Show me your tokens"). "Do you have your token from nature, the one which every senseimpression which is to be accepted must have?" And, in conclusion, all the methods which are applied to the body by the persons who are giving it exercise, might also themselves be conducive to training, if in some such way as this they tend toward desire and aversion; but if they tend toward display, they are characteristic of a man who has turned toward the outside world, and is hunting for something other than the ing itself which he is doing, and is looking for spectators who will say, "Ah, what a great man!" It is this consideration which renders admirable the remark that Apollonius used to make: "When you wish to train for your own sake, then when you are thirsty some hot day take a mouthful of cold water, and spit it out— and don't tell anybody about it!"

EPICTETUS CHAPTER 13 - The Meaning Of A Forlorn State, And The Kind Of Person A Forlorn Man Is

A forlorn state is the condition of one who is without help. For a man is not forlorn merely because he is alone, any more than a man in the midst of a crowd is necessarily not forlorn. At all events, when we have lost a brother, or a son, or a friend with whom we have shared the same bed, we say that we have been left forlorn, though often we are in Rome, with such large crowds meeting us in the streets, and so many people living in the same house with us, and sometimes even though we have a multitude of slaves. For according to the nature of the concept the 'forlorn' means the person who is without help, and exposed to those who wish to injure him. That is why, when we go on a journey, we call ourselves forlorn most especially at the moment that we encounter robbers. For it is not the sight of a human being as such which puts an end to our forlorn condition, but the sight of a faithful, and unassuming, and helpful human being. Why, if being alone is enough to make one forlorn, you will have to say that even Zeus himself is forlorn at the World-Conflagration, and bewails himself: "Wretched me! I have neither Hera, nor Athena, nor Apollo, nor, in a word, brother, or son, or grandson, or kinsman." There are even those who say that this is what he does when left alone at the World-Conflagration; for they cannot conceive of the mode of life of one who is all alone, starting as they do from a natural principle, namely, the facts of natural community of interest among men, and mutual affection, and joy in intercourse. But one ought none the less to prepare oneself for this also, that is, to be able to be self-sufficient, to be able to commune with oneself; even as Zeus communes with himself, and is at peace with himself, and contemplates the character of his governance, and occupies himself with ideas appropriate to himself, so ought we also to be able to converse with ourselves. not to be in need of others, not to be at a loss for some way to spend our time; we ought to devote ourselves to the study of the divine governance, and of our own relation to all other things; to consider how we used to act toward the things that happen to us, and how we act now; what the things are that still distress us how these too can be remedied or how removed; if any of these matters that I have mentioned need to be brought to perfection, to perfect them in accordance with the principle of reason inherent in them.

Behold now, Caesar seems to provide us with profound peace, there are no wars any longer, nor battles, no brigandage on a large scale, nor piracy, but at any hour we may travel by land, or sail from the rising of the sun to its setting. Can he, then, at all provide us with peace from fever too, and from shipwreck too, and from fire, or earthquake, or lightning? Come, can he give us peace from love? He cannot. From sorrow? From envy? He cannot-from absolutely none of these things. But the doctrine of the philosophers promises to give us peace from these troubles too. And what does it say? "Men, if you heed me, wherever you may be, whatever you may be doing, you will feel no pain, no anger, no compulsion, no hindrance, but you will pass your lives in tranquillity and in freedom from every disturbance." When a man has this kind of peace proclaimed to him, not by Caesar-why, how could he possibly proclaim it?-but proclaimed by God through the reason, is he not satisfied, when he is alone? When he contemplates and reflects, "Now no evil can befall me, for me there is no such thing as a brigand, for me there is no such thing as an earthquake, everything is full of peace, everything full of tranquillity; every road, every city, every fellow-traveller, neighbour, companion, all are harmless. Another, whose care it is, supplies food; Another supplies raiment; Another has given senses; Another preconceptions. Now whenever He does not provide the necessities for existence, He sounds the recall; He has thrown open the door and says to you, "Go." Where? To nothing you need fear, but back to that from which you came, to what is friendly and akin to you, to the physical elements. What there was of fire in you shall pass into fire, what there was of earth into earth. what there was of spirit into spirit, what there was of water into water. There is no Hades, nor Acheron, nor Cocytus, nor Pyriphlegethon, but everything is filled with gods and divine powers." A man who has this to think upon, and who beholds the sun, and moon, and stars, and enjoys land and sea, is no more forlorn than he is without help. "Why, what then? What

if someone should attack me when I am alone and murder me?" Fool, not murder you but your trivial body.

What kind of forlornness is left, then, to talk about? What kind of helplessness? Why make ourselves worse than little children? When they are left alone, what do they do? They gather up sherds and dust and build something or other, then tear it down and build something else again; and so they are never at a loss as to how to spend their time. Am I, then, if you set sail, to sit down and cry because I am left alone and forlorn in that fashion? Shall I not have sherds, shall I not have dust? But they act thus out of folly, and are we miserable out of wisdom?

Great power is always dangerous for the beginner. We ought, therefore, to bear such things according to our power-nay, in accordance with nature . . . but not for the consumptive. Practise at some one time a style of living like an invalid, that at some other time you may live like a healthy man. Take no food, drink only water; refrain at some one time altogether from desire, that at some other time you may exercise desire, and then with good reason. And if you do so with good reason, whenever you have some good in you, you will exercise your desire aright. No, that's not our way, but we wish to live like wise men from the very start, and to help mankind. Help indeed! What are you about? Why, have you helped yourself? But you wish to help them progress. Why, have you made progress yourself? Do you wish to help them? Then show them, by your own example, the kind of men philosophy produces, and stop talking nonsense. As you eat, help those who are eating with you; as you drink, those who are drinking with you; by yielding to everybody, giving place, submitting-help men in this way, and don't bespatter them with your own sputum

EPICTETUS CHAPTER 14 - Some Scattered Sayings

As the good chorus-singers in tragedy cannot render solos, but can sing perfectly well with a number of other voices, so some men cannot walk around by themselves. Man, if you are anybody, both walk around by yourself, and talk to yourself, and do not hide yourself in the chorus. Let yourself be laughed at sometimes, look about you, shake yourself up, so as to find out who you actually are.

Whenever a man drinks water only, or has some ascetic practice, he takes every opportunity to talk about it to everybody: "I drink water only." Why, do you drink water just for the sake of drinking water? Man, if it is good for you to drink water, drink it! Otherwise your conduct is absurd. But if it does you good and you drink water only, don't say a word about it to the people who are annoyed by such persons. Why, what's your object? Are these just the ones you wish to please?

Among actions some are performed primarily on their own account, others on occasion, or as a matter of good management, or as required by tact, or as part of a formal plan.

Here are two things of which one must rid men, conceit and diffidence. Now conceit is to fancy that one needs nothing further. And diffidence is to assume that one cannot enjoy a life of serenity under so many adverse circumstances. Now conceit is removed by cross-examination, and this is what Socrates starts with. . . . But that the matter is not impossible, consider and search—this kind of search will do you no harm; and, indeed, to philosophise practically amounts to this, that is, to search how it is possible to employ desire and aversion without hindrance.

"I am superior to you, for my father has consular rank." Another says, "I have been a tribune, and you have not." And if we were horses, you would be saying: "My sire was swifter than yours," or, "I have quantities of barley and fodder," or, "I have pretty neck-trappings." What then, if, when you were talking like this, I said, "Granted all that, let's run a race, then"? Come now, is there, then, nothing in man like running in the case of a horse, whereby the worse and the better will be recognised? Isn't there such a thing as reverence, faith, justice? Prove yourself superior in these points, in order to be superior as a human being. If you tell me, "I can deliver a mighty kick," I shall say to you in my turn, "You are proud over what is the act of an ass."

EPICTETUS CHAPTER 15 - That We Ought To Approach Each Separate Thing With Circumspection

In each separate thing that you do consider the matters which come first, and those which follow after, and only then approach the thing itself. Otherwise, at the start you will come to it enthusiastically because you have never reflected upon any of the subsequent steps, but later on, when some of them appear, you will give up disgracefully. "I wish to win an Olympic victory." But consider the matters which come before that and those which follow after; and only when you have done that, then, if it profits you, put your hand to the task. You have to submit to discipline, follow a strict diet, give up sweet-cakes, train under compulsion, at a fixed hour, in heat or in cold; you must not drink cold water, nor wine just whenever you feel like it; you must have turned yourself over to your trainer precisely as you would to a physician. Then

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3054 when the contest comes on, you have to "dig in" beside your opponent, sometimes dislocate your wrist, sprain your ankle. swallow quantities of sand, take a scourging; yes, and then sometimes get beaten along with all that. After you have counted up these points, go on into the games, if you still wish to; otherwise, I would have you observe that you will be turning back like children. Sometimes they play athletes, again gladiators, again they blow trumpets, and then act a play about anything that they have seen and admired. So you too are now an athlete, now a gladiator, then a philosopher, after that a rhetorician, yet with your whole soul nothing, but like an ape you imitate whatever you see, and one thing after another is always striking your fancy, but what you are accustomed to bores you. For you have never gone out after anything with circumspection, nor after you have examined the whole matter all over and tested it, but you act at haphazard and half-heartedly.

In the same way, when some people have seen a philosopher and heard someone speaking like Euphrates (though, indeed, who can speak like him?), they wish to be philosophers themselves Man consider first what the business is and then your own natural ability, what you can bear. If you wish to be a wrestler, look to your shoulders, your thighs, your loins. For one man has a natural talent for one thing, another for another. Do you suppose that you can do the things you do now, and yet be a philosopher? Do you suppose that you can eat in the same fashion, drink in the same fashion, give way to anger and to irritation, just as you do now? You must keep vigils, work hard, overcome certain desires, abandon your own people, be despised by a paltry slave, be laughed to scorn by those who meet you, in everything get the worst of it, in office, in honour, in court. Look these drawbacks over carefully, and then, if you think best, approach philosophy, that is, if you are willing at the price of these things to secure tranquillity, freedom, and calm. Otherwise, do not approach: don't act like a child-now a philosopher, later on a taxgatherer, then a rhetorician, then a procurator of Caesar. These things do not go together. You must be one person, either good or bad; you must labour to improve either your own governing principle or externals; you must work hard either on the inner man, or on things outside; that is, play the rôle of a philosopher, or else that of a lavman.

When Galba [one of the the Roman emperors who succeeded Nero in 69 AD]. was assassinated, someone said to Rufus, "Is the universe governed now by Providence?" But he replied, "Did I ever, even in passing, take the case of Galba as the basis for an argument that the universe is governed by Providence?"

EPICTETUS CHAPTER 16 - That One Should Enter Cautiously Into Social Intercourse

The man who consorts frequently with one person or another either for conversation, or for banquets, or for social purposes in general, is compelled either to become like them himself, or else to bring them over to his own style of living: for if you put by the side of a live coal one that has gone out, either the dead coal will put the live one out, or the latter will kindle the former. Since the risk, then, is so great, we ought to enter cautiously into such social intercourse with the laymen, remembering that it is impossible for the man who brushes up against the person who is covered with soot to keep from getting some soot on himself. For what are you going to do if he talks about gladiators, or horses, or athletes, or, worse still, about people: "So-and-so is bad, So-and-so is good; this was well done, this ill"; or again, if he scoffs, or jeers, or shows an ugly disposition? Has any of you the capacity of the expert lyre-player when he takes up his lyre, which enables him, the instant he touches the strings, to recognise the ones which are off pitch, and to tune the instrument? Or the power that Socrates had, which enabled him in every kind of social intercourse to bring over to his own side those who were in his company? How could you have? But you must necessarily be converted by the laymen.

Why, then, are they stronger than you are? Because their rotten talk is based on judgements, but your fine talk comes merely from your lips: that's why what you say is languid and dead, and why a man may well feel nausea when he hears your exhortations and your miserable "virtue," which you babble to and fro. And thus the laymen get the better of you; for everywhere judgement is strong, judgement is invincible. Therefore, until these fine ideas of yours are firmly fixed within you, and you have acquired some power which will guarantee you security, my advice to you is to be cautious about joining issue with the laymen; otherwise whatever you write down in the lecture-room will melt away by day like wax in the sun. Retire, then, to some spot or other far away from the sun, so long as the ideas which you have are waxen. It is for this reason that the philosophers advise us to leave even our own countries because old habits distract us and do not allow a beginning to be made of another custom, and we cannot bear to have men meet us and say, "Look, So-and-so is philosophizing, although he is this sort of a person or that." Thus also physicians send away to a different region and a different climate those who are suffering from chronic disorders, and that is well. Do you also introduce different habits; fix your ideas, exercise yourselves in them. But no, you go from the class-room to a show, a gladiatorial combat, a gymnasium-colonnade, a circus; and then you come back here from these places, and you go back there again from here, and remain the same persons all the time. And so you acquire no fine habit; you pay no regard or attention to your own self; you do not observe: "How do I deal with the external impressions which befall me? In accordance with nature, or contrary to it? How shall I respond to these impressions? As I should, or as I should not? Do I declare to the things which lie outside the sphere of my moral purpose that they mean nothing to me?" Why, if you have not yet acquired this state of mind, flee from your former habits, flee from the laymen, if you would begin to be somebody some time.

EPICTETUS CHAPTER 17 - Of Providence

Whenever you find fault with Providence, only consider and you will recognise that what happens is in accordance with reason. "Yes," you say, "but the wicked man is better off." In what respect? In money; for in respect to that he is superior to you, because he flatters, is shameless, lies awake nights. What is surprising in that? But look rather and see if he is better off than you are in being faithful, and considerate. For you will not find that to be the case; but where you are superior, there you will find that you are better off than he is. And so I once asked a man who was complaining about the prosperity of Philostorgus, "Would you have been willing to cohabit with Sura?" "May that day never come!" said he. Why, then, are you indignant if he gets something for what he sells? Or how can you deem him blessed who acquires what he has by means which you abhor? Or what harm does Providence do if it gives the better thing to the better men? Or is it not better to be considerate than to be rich? He agreed that it was. Why, then, are you indignant, man, when you have the better part? I would have the rest of you always remember, then, and be ready to apply the following truth: That this is a law of nature for the superior to have the better of the inferior, in the respect in which he is superior; and then you will never be indignant. "But my wife treats me badly." Very well; if someone asks you what this amounts to, say, "My wife treats me badly." "Nothing else, then?" Nothing. "My father does not give me anything"...... [This lacuna is probably to be filled out thus: What does this amount to? Merely that your father does not give you anything.] But is it necessary in your own mind to add to the preceding statement, that to receive nothing from your father is an evil, and at that to add a lie too? For this reason we ought not to cast out poverty but only our judgement about poverty, and so we shall be serene.

EPICTETUS CHAPTER 18 - That We Ought Not To Allow Any News To Disturb Us

Whenever some disturbing news is reported to you, you ought to have ready at hand the following principle: News, on any subject, never falls within the sphere of the moral purpose. Can anyone bring you word that you have been wrong in an assumption or in a desire?-By no means.-But he can bring you word that someone is dead. Very well, what is that to you? That someone is speaking ill of you. Very well, what is that to you? That your father is making certain preparations. Against whom? Surely not against your moral purpose, is it? Why, how can he? But against your paltry body, against your paltry possessions; you are safe, it is not against you. But the judge condemns you on the charge of impiety. And did not the judges similarly condemn Socrates? Surely it is no concern of yours that the judge pronounced you guilty, is it?-No.-Why, then, are you any further concerned? Your father has a certain function, and if he does not perform it, he has destroyed the father in him, the man who loves his offspring, the man of gentleness within him. Do not seek to make him lose anything else on this account. For it never happens that a man goes wrong in one thing, but is injured in another. Again, it is your function to defend yourself firmly, respectfully, without passion. Otherwise, you have destroyed within you the son, the respectful man, the man of honour. What then? Is the judge secure? No: but he too runs just as great a risk. Why then, are you afraid of what decision he is going to render's What have you to do with another man's evil? Your own evil is to make a bad defence; only guard against that, but just as being condemned or not being condemned is another's function, so it is another's evil. "So-and-so threatens you." Me? No. "He blames you." He himself will attend to how he is performing his own proper function. "He is on the point of condemning you unjustly." Poor devil!

The first difference between a layman and a philosopher: The one says, "Woe is me because of my child, my brother, woe because of my father"; and the other, if he can ever be compelled to say, "Woe is me," adds, after a pause, "because of myself." For nothing outside the sphere of the moral purpose can hamper or injure the moral purpose; it alone can hamper or injure itself. If, then, we too tend in this latter direction so that, whenever we go amiss, we blame ourselves, and bear in mind that nothing but judgement is responsible for the disturbance of our peace of mind and our inconstancy, swear to you by all the gods that we have been making progress. But as it is, we have taken a different course from the start. Even while we were still children, our nurse, if ever we bumped into something, when we were going along with our mouths open, did not scold us, but used to beat the stone. Why, what did the stone do? Ought it to have moved out of the road because of your childish folly? And again, if we when children don't find something to eat after our bath, our attendant never checks our appetite, but he cudgels the cook. Man, we did not make you the cook's attendant, did we? but our child's. Correct him, help him. So, even when we have grown up, we look like children. For it is being a child to be unmusical in things musical, to he unlettered in things literary, to be uneducated in life.

EPICTETUS CHAPTER 20 - That It Is Possible To Derive Advantage From Everything External

In the case of our intellectual impressions practically all men have agreed that the good and the evil are in ourselves. and not in externals. Nobody calls the statement that it is day, good, or that it is night, bad, and the greatest of evils, the statement that three is four. But what? They call knowledge good, and error evil; so that even in regard to what is false there arises a good, that is, the knowledge that the false is false. So it ought to be, then, also with our life. Is health a good, and illness an evil? No, man. What then? To be well for a good end is good, to be well for an evil end is evil.-So that it is possible to derive advantage even from illness, you mean? -Why, I call God to witness, isn't it possible to derive advantage from death? Why, is it not possible from lameness? Do you think that Menoeceus [Who gave his life to save his native city, Thebes.] derived but little good when he died?-May the one who says anything like that derive the same sort of good that he did!-Ho, there, man, did he not maintain the patriot that he was, the high-minded man, the man of fidelity, the man of honour? And had he lived on, would he not have lost all these? Would he not have won the very opposite? Would he not have acquired the character of the coward, the ignoble man, the disloval, the lover of his own life? Come now, do you think that Menoeceus derived but little good by his death? Oh, no! But the father of Admetus derived great good from living so ignobly and wretchedly, did he? Why, didn't he die later? Make an end, I adjure you by the gods, of admiring material things, make an end of turning vourselves into slaves, in the first place, of things, and then, in the second place, on their account, slaves also of the men who are able to secure or to take away these things.

Is it possible, then, to derive advantage from these things?-Yes, from everything.-Even from the man who reviles me?-And what good does his wrestling-companion do the athlete? The very greatest. So also my reviler becomes one who prepares me for my contest; he exercises my patience, my dispassionateness, my gentleness. You say: No. But the man who lays hold of my neck and gets my loins and my shoulders into proper shape helps me, and the rubber does well when he says, "Lift the pestle with both hands," and the heavier it is, the more good I get out of doing so; whereas, if a man trains me to be dispassionate, does he do me no good? Your attitude means that you do not know how to derive advantage from men. Is your neighbour bad? Yes, for himself; but for me he is good; he exercises my good disposition, my fair-mindedness. Is your father bad? Yes, for himself; but for me he is good. This is the magic wand of Hermes. "Touch what you will," the saying goes, "and it will turn into gold." Nay, but bring whatever you will and I will turn it into a good. Bring disease, bring death, bring poverty, reviling, peril of life in court; all these things will become helpful at a touch from the magic wand of Hermes. "What will you make of death?" Why, what else but make it your glory, or an opportunity for you to show in deed thereby what sort of person a man is who follows the will of nature. "What will you make of disease?" I will show its character, I will shine in it. I will be firm. I will be serene. I will not fawn upon my physician, I will not pray for death. What else do you still seek? Everything that you give I will turn into something blessed, productive of happiness, august, enviable.

Not so you; but, "Watch out that you don't get ill; it's bad." Just as if someone said, "Watch out that you never get the impression that three are four; it's bad." Man, how do you mean "bad"? If I get the right idea of it, how is it going to hurt me any more? Will it not rather even do me good? If, then, I get the right idea about poverty, or disease, or not holding office, am I not satisfied? Will they not be helpful to me? How, then, would you have me seek any longer amongst externals for things evil and things good?

But what? These things go thus far, but nobody takes them home with him; nay, as soon as we leave here, there is war on with our slave attendant, our neighbours, those that mock, and those that laugh at us. Blessed be Lesbius, because he convicts me every day of knowing nothing!

Those who have learned the principles and nothing else are eager to throw them up immediately, just as persons with a weak stomach throw up their food. First digest your principles, and then you will surely not throw them up this way. Otherwise they are mere vomit, foul stuff and unfit to eat. But after you have digested these principles, show us some change in your governing principle that is due to them; as the athletes show their shoulders as the results of their exercising and eating, and as those who have mastered the arts can show the results of their learning. The builder does not come forward and say, "Listen to me deliver a discourse about the art of building"; but he takes a contract for a house, builds it, and thereby proves that he possesses the art. Do something of the same sort yourself too; eat as a man, drink as a man, adorn yourself, marry, get children, be active as a citizen; endure revilings, bear with an unreasonable brother, father, son, neighbour, fellow-traveller. Show us that you can do these things, for us to see that in all truth you have learned something of the philosophers. No, but "Come and listen to me deliver my comments," you say. Go to! Look for people on whom to throw up! "Yes, but I will set forth to you the doctrines of Chrysippus as no one else can; his language I will analyse so as to make it perfectly clear; possibly I will throw in a bit of the vivacity of Antipater and Archedemus."

And then it's for this, is it, that the young men are to leave their fatherlands and their own parents,---to come and listen to you interpreting trifling phrases? Ought they not to be, when they return home, forbearing, ready to help one another, tranquil, with a mind at peace, possessed of some such provision for the journey of life, that, starting out with it, they will be able to bear well whatever happens, and to derive honour from it? And where did you get the ability to impart to them these things which you do not possess yourself? Why, from the first did you ever do anything but wear yourself out over the question how solutions can be found for syllogisms, for the arguments that involve equivocal premisses, and those which derive syllogisms by the process of interrogation? "But So-and-so lectures; why should I not too?" Slave, these things are not done recklessly, nor at random, but one ought to be of a certain age, and lead a certain kind of life, and have God as his guide. You say: No. But no man sails out of a harbour without first sacrificing to the gods and invoking their aid, nor do men sow hit-or-miss, but only after first calling upon Demeter; and yet will a man, if he has laid his hand to so great a task as this without the help of the gods, be secure in so doing, and will those who come to him be fortunate in so coming? What else are you doing, man, but vulgarizing the Mysteries, and saying, "There is a chapel at Eleusis; see, there is one here too. There is a hierophant there; I too will make a hierophant. There is a herald there; I too will appoint a herald. There is a torch-bearer there; I too will have a torchbearer. There are torches there: and here too. The words said are the same: and what is the difference between what is done here and what is done there?"? Most impious man, is there no difference? Are the same acts helpful, if they are performed at the wrong place and at the wrong time? Nay, but a man ought to come also with a sacrifice, and with prayers, and after a preliminary purification, and with his mind predisposed to the idea that he will be approaching holy rites, and holy rites of great antiquity. Only thus do the Mysteries become helpful. only thus do we arrive at the impression that all these things were established by men of old time for the purpose of education and for the amendment of our life. But you are publishing the Mysteries abroad and vulgarizing them, out of time, out of place, without sacrifices, without purification; you do not have the dress which the hierophant ought to wear, you do not have the proper head of hair, nor head-band, nor voice, nor age; you have not kept yourself pure as he has, but you have picked up only the words which he utters, and recite them. Have the words a sacred force all by themselves?

One ought to approach these matters in a different fashion; the affair is momentous, it is full of mystery, not a chance gift, nor given to all comers. Nay, it may be that not even wisdom is all that is needed for the care of the young; one ought also to have a certain readiness and special fitness for this task, by Zeus, and a particular physique, and above all the counsel of God advising him to occupy this office, as God counselled Socrates to take the office of examining and confuting men, Diogenes the office of rebuking men in a kingly manner, and Zeno that of instructing men and laving down doctrines. But you are opening up a doctor's office although you possess no equipment other than drugs, but when or how these drugs are applied you neither know nor have ever taken the trouble to learn. "See," you say, "that man has these eye-salves, and so have I." Have you, then, at all the faculty of using them aright? Do you know at all when and how and for whom they will do good? Why, then, do you play at hazard in matters of the utmost moment, why do you take things lightly, why do you put your hand to a task that is altogether inappropriate for you? Leave it to those who are able to do it, and do it with distinction. Do not yourself by your own actions join the number of those who bring disgrace upon philosophy, and do

EPICTETUS CHAPTER 19 - What Is The Position Of The Layman, And What That Of The Philosopher?

not become one of those who disparage the profession. If, however, you find the principles of philosophy entertaining, sit down and turn them over in your mind all by yourself, but don't ever call yourself a philosopher, and don't allow anyone else to say it of you, but say, rather, "He is mistaken; for my desire is no different from what it used to be, nor my choice, nor my assent, nor, in a word, have I changed at all, in my use of external impressions, from my former state." Think this and say this about yourself, if you wish to think aright. If not, keep on playing at hazard and doing what you are doing now; for it becomes you.

EPICTETUS CHAPTER 22 - On The Calling Of A Cynic* [*The Cynics were the intransigent and uncompromising moralists, resembling the holy men, ascetics, and dervishes of the Orient. Epictetus idealises them somewhat in this discourse, regarding them as a kind of perfected wise men, like some of the early Christian anchorites, but points out very clearly that their style of life was not practicable for every man, indeed not even for one so humble and frugal as he himself was.]

When one of his acquaintances, who seemed to have an inclination to take up the calling of a Cynic, asked him what sort of a man the Cynic ought to be, and what was the fundamental conception of his calling, Epictetus said: We will consider it at leisure; but I can tell you this much, that the man who lays his hand to so great a matter as this without God. is hateful to Him, and his wish means nothing else than disgracing himself in public. For in a well-ordered house no one comes along and says to himself, "I ought to be manager of this house"; or if he does, the lord of the mansion, when he turns around and sees the fellow giving orders in a high and mighty fashion, drags him out and gives him a dressing down. So it goes also in this great city, the world; for here also there is a Lord of the Mansion who assigns each and every thing its place. "You are the sun; you have the power, as you make the circuit of the heavens, to produce the year and the seasons, to give increase and nourishment to the fruits, to stir and to calm the winds, and to give warmth in moderation to the bodies of men; arise, make the circuit of the heavens, and so set in motion all things from the greatest to the least. You are a calf: when a lion appears, do what is expected of you: otherwise you will smart for it. You are a bull; come on and fight, for this is expected of you, it befits you, and you are able to do it. You are able to lead the host against Ilium; be Agamemnon. You are able to fight a duel with Hector; be Achilles." But if Thersites came along and claimed command, either he would not have got it, or if he had, he would have disgraced himself in the presence of a multitude of witnesses.

So do you also think about the matter carefully; it is not what you think it is. "I wear a rough cloak even as it is, and I shall have one then; I have a hard bed even now, and so I shall then; I shall take to myself a wallet and a staff, and I shall begin to walk around and beg from those I meet, and revile them; and if I see someone who is getting rid of superfluous hair by the aid of pitch-plasters, or has a fancy cut to his hair, or is strolling about in scarlet clothes, I will come down hard on him." If you fancy the affair to be something like this, give it a wide berth; do not come near it, it is nothing for you. But if your impression of it is correct, and you do not think too meanly of yourself, consider the magnitude of the enterprise that you are taking in hand.

First, in all that pertains to yourself directly you must change completely from your present practices, and must cease to blame God or man; you must utterly wipe out desire, and must turn your aversion toward the things which lie within the province of the moral purpose, and these only; you must feel no anger, no rage, no envy, no pity; no wench must look fine to you, no petty reputation, no boy-favourite, no little sweet-cake. For this you ought to know: Other men have the protection of their walls and their houses and darkness, when they do anything of that sort, and they have many things to hide them. A man closes his door, stations someone at the entrance to his bedroom: "If anyone comes, tell him 'He is not at home, he is not at leisure." But the Cynic, instead of all these defences, has to make his self-respect his protection; if he does not, he will be disgracing himself naked and out of doors. His self-respect is his house, his door, his guards at the entrance to his bedroom, his darkness. For neither ought he to wish to keep concealed anything that is his (otherwise he is lost, he has destroyed the Cynic within him, the man of outdoor life, the free man; he has begun to fear something external, he has begun to need something to conceal him), nor can he keep it concealed when he wishes to do so. For where will he conceal himself, or how? And if this instructor of us all. this "pedagogue," chance to get caught, what must he suffer! Can, then, a man who is afraid of all this continue with all his heart to supervise the conduct of other men? It cannot be done. it is impossible

In the first place, then, you must make your governing principle pure, and you must make the following your plan of life: "From now on my mind is the material with which I have to work, as the carpenter has his timbers, the shoemaker his hides; my business is to make the right use of my impressions. My paltry body is nothing to me; the parts of it are nothing to me. Death? Let it come when it will, whether it be the death of the whole or some part. Exile? And to what place can anyone thrust me out? Outside the universe he cannot. But wherever I go, there are sun, moon, stars, dreams, omens, my converse with gods."

In the next place, the true Cynic, when he is thus prepared, cannot rest contented with this, but he must know that he has been sent by Zeus to men, partly as a messenger, in order to show them that in questions of good and evil they have gone astray, and are seeking the true nature of the good and the evil where it is not, but where it is they never think; and partly, in the words of Diogenes, when he was taken off to Philip, after the battle of Chaeroneia, as a scout. For the Cynic is truly a scout, to find out what things are friendly to men and what hostile; and he must first do his scouting accurately, and on returning must tell the truth, not driven by fear to designate as enemies those who are not such, nor in any other fashion be distraught or confused by his external impressions.

He must, accordingly, be able, if it so chance, to lift up his voice, and, mounting the tragic stage, to speak like Socrates: "Alas! men, where are you rushing? What are you doing, O wretched people? Like blind men you go tottering all around. You have left the true path and are going off upon another; you are looking for serenity and happiness in the wrong place, where it does not exist, and you do not believe when another points them out to you. Why do you look for it outside? It does not reside in the body. If you doubt that, look at Myron, or Ophellius. It is not in possessions. If you doubt that, look at Croesus, look at the rich nowadays, the amount of lamentation with which their life is filled. It is not in office. Why, if it were, then those who have been consul two or three times ought to be happy men, but they are not. Whom are we going to believe about this question? You who look upon their estate from the outside and are dazzled by the external appearance, or the men themselves? What do they say? Listen to them when they lament, when they groan, when they think that their condition is more wretched and dangerous because of these very consulships, and their own reputation, and their prominence. It is not in royalty. Otherwise Nero would have been a happy man, and Sardanapalus, Nav, even Agamemnon was not a happy man, though a much finer fellow than Sardanapalus or Nero; but while the rest are snoring what is he doing?

"Many a hair did he pluck, by the roots, from his forehead." And what are his own words?

"Thus do I wander,

he says, and

"To and fro am I tossed, and my heart is

Leaping forth from my bosom."

Poor man, what about you is in a bad state? Your possessions? No, it is not; rather you "are possessed of much gold and of much bronze." Your body? No, it is not. What, then, is wrong with you? Why, this: You have neglected and ruined whatever that is within you by which we desire, avoid, choose, and refuse. How neglected? It remains ignorant of the true nature of the good, to which it was born, and of the true nature of the evil, and of what is its own proper possession, and what is none of its own concern. And whenever some one of these things that are none of its own concern is in a bad way, "Woe is me, for the Greeks are in danger." it says. Ah miserable governing principle, the only thing neglected and uncared for! "They are going to perish, slain by the Trojans." But if the Trojans do not kill them, will they not die anyway? "Yes, but not all at once." What difference does it make, then? For if death is an evil, whether they die all at once, or die one at a time, it is equally an evil. Nothing else is going to happen, is it, but the separation of the paltry body from the soul? 'Nothing." And is the door closed for you, if the Greeks perish? Are you not permitted to die? "I am." Why, then, do you grieve? "Woe is me, a king, and holding the sceptre of Zeus!" A king does not become unfortunate any more than a god becomes unfortunate. What are you, then? Truly a shepherd! for you wail as the shepherds do when a wolf carries off one of their sheep; and these men over whom you rule are sheep. But why did you come here in the first place? Your desire was not in danger, was it, or your avoidance, your choice, or your refusal? "No," he answers, "but my brother's frail wife was carried off." Was it not, then, a great gain to lose a frail and adulterous wife? "Shall we, then, be despised by the Trojans?" Who are they? Wise men or foolish? If wise, why are you fighting with them? If foolish, why do you care?

"In what, then, is the good, since it is not in these things? Tell us. Sir messenger and scout." "It is where you do not expect it, and do not wish to look for it. For if you had wished, you would have found it within you, and you would not now be wandering outside, nor would you be seeking what does not concern you, as though it were your own possession. Turn your thoughts upon yourselves, find out the kind of preconceived ideas which you have. what sort of a thing do you imagine the good to be? Serenity, happiness, freedom from restraint. Come, do you not imagine it to be something naturally great? Something precious? Something not

injurious? In what kind of subject-matter for life ought one to seek serenity, and freedom from restraint? In that which is slave, or in that which is free?" "In the free." "Is the paltry body which you have, then, free or is it a slave?" "We know not." "You do not know that it is a slave of fever, gout, ophthalmia, dysentery, a tyrant, fire, iron, everything that is "How, then, can stronger?" "Yes, it is their servant." anything that pertains to the body be unhampered? And how can that which is naturally lifeless, earth, or clay, be great or precious? What then? Have you nothing that is free?" Perhaps nothing." "And who can compel you to assent to that which appears to you to be false?" "No one." "And who to refuse assent to that which appears to you to be true?" "No "Here, then, you see that there is something within you one ' which is naturally free. But to desire, or to avoid, or to choose, or to refuse, or to prepare, or to set something before yourself-what man among you can do these things without first conceiving an impression of what is profitable, or what is "No one." "You have, therefore, here too, not fitting?" something unhindered and free. Poor wretches, develop this, pay attention to this, seek here your good."

And how is it possible for a man who has nothing, who is naked, without home or hearth, in squalor, without a slave, without a city, to live serenely? Behold, God has sent you the man who will show in practice that it is possible. "Look at me," he says, "I am without a home, without a city, without property, without a slave; I sleep on the ground; I have neither wife nor children, no miserable governor's mansion, but only earth, and sky, and one rough cloak. Yet what do I lack? Am I not free from pain and fear, am I not free? When has anyone among you seen me failing to get what I desire, or falling into what I would avoid? When have I ever found fault with either God or man? When have I ever blamed anyone? Has anyone among you seen me with a gloomy face? And how do I face those persons before whom you stand in fear and awe? Do I not face them as slaves? Who, when he lays eyes upon me, does not feel that he is seeing his king and his master?

Lo, these are words that befit a Cynic, this is his character, and his plan of life. But no, you say, what makes a Cynic is a contemptible wallet, a staff, and big jaws; to devour everything you give him, or to stow it away, or to revile tactlessly the people he meets, or to show off his fine shoulder. Do you see the spirit in which you are intending to set your hand to so great an enterprise? First take a mirror, look at your shoulders, find out what kind of loins and thighs you have. Man, it's an Olympic contest in which you are intending to enter your name, not some cheap and miserable contest or other. In the Olympic games it is not possible for you merely to be beaten and then leave; but, in the first place, you needs must disgrace yourself in the sight of the whole civilized world, not merely before the men of Athens, or Lacedaemon, or Nicopolis; and, in the second place, the man who carelessly gets up and leaves must needs be flogged, and before he is flogged he has to suffer thirst, and scorching heat, and swallow quantities of wrestler's sand

Think the matter over more carefully, know yourself, ask the Deity, do not attempt the task without God. For if God so advises you, be assured that He wishes you either to become great, or to receive many stripes. For this too is a very pleasant strand woven into the Cynic's pattern of life; he must needs be flogged like an ass, and while he is being flogged he must love the men who flog him, as though he were the father or brother of them all. But that is not your way. If someone flogs you, go stand in the midst and shout, "O Caesar, what do I have to suffer under your peaceful rule? let us go before the Proconsul." But what to a Cynic is Caesar, or a Proconsul, or anyone other than He who has sent him into the world, and whom he serves, that is, Zeus? Does he call upon anyone but Zeus? And is he not persuaded that whatever of these hardships he suffers, it is Zeus that is exercising him? Nay, but Heracles, when he was being exercised by Eurystheus, did not count himself wretched, but used to fulfil without hesitation everything that was enjoined upon him: and yet is this fellow, when he is being trained and exercised by Zeus, prepared to cry out and complain? Is he a man worthy to carry the staff of Diogenes? Hear his words to the passers-by as he lies ill of a fever: "Vile wretches," he said, "are you not going to stop? Nay, you are going to take that long, long journey to Olympia, to see the struggle of worthless athletes; but do you not care to see a struggle between fever and a man?"* [*An ancient scholiast, probably Arethas (cf. Schenkl, p. 80), remarks at this point, that Epictetus had probably read the Gospels and Jewish literature. But this particular passage does not furnish any very cogent argument, for the evidence adduced, namely the injunctions about "turning the other cheek" and "loving your enemies" (Matthew 5:39 and 44), has nothing in common with the somewhat vainglorious speech of Diogenes. Probably, however, the scholium actually belongs at § 4, where there is, indeed, a certain resemblance. Fairly apposite, also, is the citation of James 1:2: "My brethren, count it all joy when ye fall into divers temptations," in connexion with the next sentence. But even at the best, these words from the New Testament are only parallels, certainly not sources.] No doubt a man of that sort would have blamed

God, who had sent him into the world, for mistreating him! Nay, he took pride in his distress, and demanded that those who passed by should gaze upon him. Why, what will he blame God for? Because he is living a decent life? What charge does he bring against Him? The charge that He is exhibiting his virtue in a more brilliant style? Come, what says Diogenes about poverty, death, hardship? How did he habitually compare his happiness with that of the Great King? Or rather, he thought there was no comparison between them. For where there are disturbances, and griefs, and fears, and ineffectual desires, and unsuccessful avoidances, and envies, and jealousies—where is there in the midst of all this a place for happiness to enter? But wherever worthless judgements are held, there all these passions must necessarily exist.

And when the young man asked whether he, as a Cynic, should consent, if, when he had fallen ill, a friend asked him to come to his house, so as to receive proper nursing, Epictetus replied: But where will you find me a Cynic's friend? For such a person must be another Cynic, in order to be worthy of being counted his friend. He must share with him his sceptre and kingdom, and be a worthy ministrant, if he is going to be deemed worthy of friendship, as Diogenes became the friend of Antisthenes, and Crates of Diogenes. Or do you think that if a man as he comes up greets the Cynic, he is the Cynic's friend, and the Cynic will think him worthy to receive him into his house? So if that is what you think and have in mind, you had much better look around for some nice dunghill, on which to have your fever, one that will give you shelter from the north wind, so that you won't get chilled. But you give me the impression of wanting to go into somebody's house for a while and to get filled up. Why, then, are you even laying your hand to so great an enterprise?

But, said the young man, will marriage and children be undertaken by the Cynic as a matter of prime importance? If, replied Epictetus, you grant me a city of wise men, it might very well be that no one will lightly adopt the Cynic's profession. For in whose interest would he take on this style of life? If, nevertheless, we assume that he does so act, there will be nothing to prevent him from both marrying and having children; for his wife will be another person like himself, and so will his father-in-law, and his children will be brought up in the same fashion. But in such an order of things as the present, which is like that of a battle-field, it is a question, perhaps, if the Cynic ought not to be free from distraction, wholly devoted to the service of God, free to go about among men, not tied down by the private duties of men, nor involved in relationships which he cannot violate and still maintain his role as a good and excellent man, whereas, on the other hand, if he observes them, he will destroy the messenger. the scout, the herald of the gods, that he is. For see, he must show certain services to his father-in-law, to the rest of his wife's relatives, to his wife herself; finally, he is driven from his profession, to act as a nurse in his own family and to provide for them. To make a long story short, he must get a kettle to heat water for the baby, for washing it in a bath-tub; wool for his wife when she has had a child, oil, a cot, a cup (the vessels get more and more numerous); not to speak of the rest of his business, and his distraction. Where, I beseech you, is left now our king, the man who has leisure for the public interest

Who hath charge of the folk and for many a thing must be watchful?

Where, pray, is this king, whose duty it is to oversee the rest of men; those who have married; those who have had children; who is treating his wife well, and who ill; who quarrels; what household is stable, and what not; making his rounds like a physician, and feeling pulses? "You have a fever, you have a headache, you have the gout. You must abstain from food, you must eat, you must give up the bath; you need the surgeon's knife, you the cautery." Where is the man who is tied down to the duties of everyday life going to find leisure for such matters? Come, does he not have to get little cloaks for the children? Doesn't he have to send them off to a schoolteacher with their little tablets and writing implements, and little notebooks; and, besides, get the little cot ready for them? For they cannot be Cynics from the moment they leave the womb. And if he doesnot do all this, it would have been better to expose them at birth, rather than to kill them in this fashion. See to what straits we are reducing our Cynic, how we are taking away his kingdom from him.-Yes, but Crates married.-You are mentioning a particular instance which arose out of passionate love, and you are assuming a wife who is herself another Crates. But our inquiry is concerned with ordinary marriage apart from special circumstances, and from this point of view we do not find that marriage, under present conditions, is a matter of prime importance for the Cynic.

How, then, said the young man, will the Cynic still be able to keep society going?—In the name of God, sir, who do mankind the greater service? Those who bring into the world some two or three ugly-snouted children to take their place, or those who exercise oversight, to the best of their ability, over all mankind, observing what they are doing, how they are spending their lives, what they are careful about, and what they undutifully neglect? And were the Thebans helped more by all those who left them children than by Epaminondas who died without offspring? And did Priam, who begot fifty sons, all rascals, or Danaus, or Aeolus, contribute more to the common weal than did Homer? What? Shall high military command or writing a book prevent a man from marrying and having children, while such a person will not be regarded as having exchanged his childlessness for naught, and yet shall the Cynic's kingship not be thought a reasonable compensation? Can it be that we do not perceive the greatness of Diogenes, and have no adequate conception of his character, but have in mind the present-day representatives of the profession, these "dogs of the table, guards of the gate," who follow the masters not at all, except it be in breaking wind in public, forsooth, but in nothing else? Otherwise such points as these you have been raising would never have disturbed us, we should never have wondered why a Cynic will never marry or have children. Man, the Cynic has made all mankind his children; the men among them he has as sons, the women as daughters; in that spirit he approaches them all and cares for them all. Or do you fancy that it is in the spirit of idle impertinence he reviles those he meets? It is as a father he does it, as a brother, and as a servant of Zeus, who is Father of us all.

If you will, ask me also if he is to be active in politics. you ninny, are you looking for any nobler politics than that in which he is engaged? Or would you have someone in Athens step forward and discourse about incomes and revenues, when he is the person who ought to talk with all men, Athenians, Corinthians, and Romans alike, not about revenues, or income, or peace, or war, but about happiness and unhappiness, about success and failure, about slavery and freedom? When a man is engaging in such exalted politics, do you ask me if he is to engage in politics? Ask me also, if he will hold office. Again I will tell you: Fool, what nobler office will he hold than that which he now has?

And yet such a man needs also a certain kind of body, since if a consumptive comes forward, thin and pale, his testimony no longer carries the same weight. For he must not merely, by exhibiting the qualities of his soul, prove to the laymen that it is possible, without the help of the things which they admire, to be a good and excellent man, but he must also show, by the state of his body, that his plain and simple style of life in the open air does not injure even his body: "Look," he says, "both I and my body are witnesses to the truth of my contention." That was the way of Diogenes, for he used to go about with a radiant complexion, and would attract the attention of the common people by the very appearance of his body. But a Cynic who excites pity is regarded as a beggar; everybody turns away from him, everybody takes offence at him. No. and he ought not to look dirty either, so as not to scare men away in this respect also; but even his squalor ought to be cleanly and attractive.

Furthermore, the Cynic ought to possess great natural charm and readiness of wit—otherwise he becomes mere snivel, and nothing else—so as to be able to meet readily and aptly whatever befalls; as Diogenes answered the man who said: "Are you the Diogenes who does not believe in the existence of the gods?" by saying, "And how can that be? You I regard as hated by the gods!" Or again, when Alexander stood over him as he was sleeping and said,

Sleeping the whole night through beseems not the giver of counsel,

he replied, still half asleep,

Who hath charge of the folk, and for many a thing must be watchful.

But above all, the Cynic's governing principle should be purer than the sun; if not, he must needs be a gambler and a man of no principle, because he will be censuring the rest of mankind, while he himself is involved in some vice. For see what this means. To the kings and tyrants of this world their bodyguards and their arms used to afford the privilege of censuring certain persons, and the power also to punish those who do wrong, no matter how guilty they themselves were; whereas to the Cynic it is his conscience which affords him this power, and not his arms and his bodyguards. When he sees that he has watched over men, and toiled in their behalf; and that he has slept in purity, while his sleep leaves him even purer than he was before; and that every thought which he thinks is that of a friend and servant to the gods, of one who shares in the government of Zeus; and has always ready at hand the verse

Lead thou me on, O Zeus, and Destiny,

and "If so it pleases the gods, so be it," why should he not have courage to speak freely to his own brothers, to his children, in a word, to his kinsmen?

That is why the man who is in this frame of mind is neither a busybody nor a meddler; for he is not meddling in other people's affairs when he is overseeing the actions of men, but these are his proper concern. Otherwise, go call the general a meddler when he oversees and reviews and watches over his troops, and punishes those who are guilty of a breach of discipline. But if you censure other men while you are hiding a little sweet-cake under your arm, I shall say to you: Would you not rather go off into a corner and eat up what you have stolen? What have you to do with other people's business? Why who are you? Are you the bull in the herd, or the queen bee of the hive? Show me the tokens of your leadership, like those which nature gives the queen bee. But if you are a drone and lay claim to the sovereignty over the bees, don't you suppose your fellow-citizens will overthrow you, just as the bees so treat the drones?

Now the spirit of patient endurance the Cynic must have to such a degree that common people will think him insensate and a stone; nobody reviles him, nobody beats him, nobody insults him; but his body he has himself given for anyone to use as he sees fit. For he bears in mind that the inferior, in that respect in which it is inferior, must needs be overcome by the superior, and that his body is inferior to the crowd-the physically weaker, that is, inferior to the physically stronger. Therefore, he never enters this contest where he can be beaten, but immediately gives up what is not his own; he makes no claim to what is slavish. But in the realm of the moral purpose, and the use of his sense-impressions, there you will see he has so many eyes that you will say Argus was blind in comparison with him. Is there anywhere rash assent, reckless choice, futile desire, unsuccessful aversion, incompleted purpose, faultfinding, self-disparagement, or envy? Here is concentrated his earnest attention and energy; but, as far as other things go, he lies flat on his back and snores; he is in perfect peace. There rises up no thief of his moral purpose, nor any tyrant over it. But of his body? Certainly. And of his paltry possessions? Certainly: and of his offices and honours. Why, then, does he pay any attention to these? So when anyone tries to terrify him by means of these things, he says to him, "Go to, look for children; they are scared by masks; but I know that they are made of earthenware, and have nothing inside.'

Such is the nature of the matter about which you are deliberating. Wherefore, in the name of God I adjure you, put off your decision, and look first at your endowment. For see what Hector says to Andromache. "Go," says he, "rather into the house and weave;

but for men shall war be the business.

Men one and all, and mostly for me."

So did he recognise not only his own special endowment, but also her incapacity.

EPICTETUS CHAPTER 23 - To Those Who Read And Discuss For The Purpose Of Display

Tell yourself, first of all, what kind of man you want to be; and then go ahead with what you are doing. For in practically every other pursuit we see this done. The athletes first decide what kind of athletes they want to be, and then they act accordingly. If a man wants to be a distance-runner, he adopts a suitable diet, walking, rubbing, and exercise; if he wants to be a sprinter, all these details are different; if he wants to contend in the pentathlon, they are still more different. You will find the same thing in the arts. If you want to be a carpenter, you will have such and such exercises; if a blacksmith, such and such other. For in everything that we do, if we do not refer it to some standard, we shall be acting at random; but if we refer it to the wrong standard, we shall make an utter failure. Furthermore, there are two standards to go by, the one general, the other individual. First of all, I must act as a man. What is included in this? Not to act as a sheep, gently but without fixed purpose; nor destructively, like a wild beast. The individual standard applies to each man's occupation and moral purpose. The citharoede is to act as a citharoede, the carpenter as a carpenter, the philosopher as a philosopher, the rhetor as a rhetor. When, therefore, you say, "Come and listen to me as I read you a lecture," see to it first that you are not acting without fixed purpose. And then, if you find that you are using a standard of judgement, see if it is the right one. Do you wish to do good or to be praised? you ask. Immediately you get the answer, "What do I care for praise from the mob?" And that is an excellent answer. Neither does the musician, in so far as he is a musician, nor the geometrician. Do you wish to do good, then? To what end? men reply. Tell us, also, that we too may run to your lectureroom. Now can anybody do good to others unless he has received good himself? No more than the non-carpenter can help others in carpentry, or the non-cobbler in cobbling.

Do you wish, then, to know whether you have received any good? Produce your judgements, philosopher. What does desire promise? Not to fail in getting. What does aversion? Not to fail into what we are avoiding. Well, do we fulfil their promise? Tell me the truth; but if you lie, I will say to you: "The other day, when your audience gathered rather coolly, and did not shout applause, you walked out of the hall in low spirits. And again the other day, when you were received with applause, you walked around and asked everybody, 'What did you think of me?' 'It was marvellous, sir, I swear by my life.' 'How did I render that particular passage?' Which one?' 'Where I drew a picture of Pan and the Nymphs?' It was superb.''' And after all this you tell me that you follow nature in desire and aversion? Go to; try to get somebody else to believe you! Didn't you, just the other day, praise So-and-so contrary to your honest opinion? And did you not flatter Soand-so, the senator?' Did you want your children to be like that?—Far from it!—Why then did you praise him and palaver over him?—He is a gifted young man and fond of listening to discourses.—How do you know that?—He is an admirer of mine.—There you gave your proof!

After all, what do you think? Don't these very same persons secretly despise you? When, therefore, a person who is conscious of never having either thought or done a good thing finds a philosopher who tells him, "You are a genius, straightforward and unspoiled," what else do you suppose the man says to himself but, "This man wants to use me for something or other"? Or else tell me; what work of genius has he displayed? Look, he has been with you all this time, he has listened to your discourse, he has heard you lecture. Has he settled down? Has he come to himself? Has he realised the evil plight in which he is? Has he cast aside his self-conceit? Is he looking for the man who will teach him?-He is looking, the man says .- The man who will teach him how he ought to live? No, fool, but only how he ought to deliver a speech; for that is why he admires even you. Listen to him, and hear what he "This fellow has a most artistic style; it is much finer than Dio's." That's altogether different. He doesn't say, does he, "The man is respectful, he is faithful and unperturbed"? And even if he had said this, I would have replied: "Since this man is faithful, what is your definition of the faithful man?" And if he had no answer to give, I would have added: "First find out what you are talking about, and then do your talking."

When you are in such a sorry state as this, then, gaping for men to praise you, and counting the number of your audience, is it your wish to do good to others? "To-day I had a much larger audience." "Yes, indeed, there were great numbers." "Five hundred, I fancy." "Nonsense, make it a thousand." "Dio never had so large an audience." "How could you expect him to?" "Yes, and they are clever at catching the points." "Beauty, sir, can move even a stone." There are the words of a philosopher for you! That is the feeling of one who is on his way to do good to men! There you have a man who has listened to reason, who has read the accounts of Socrates as coming from Socrates, not as though they were from Lysias, or Isocrates! "'I have often wondered by what arguments literature just as you would music-hall songs, haven't you? Because, if you had read them in the right way, you would not have lingered on these points, but this is the sort of thing rather that would have caught your eye: "Anytus and Meletus can kill me, but they cannot hurt me"; and: "I have always been the kind of man to pay attention to none of my own affairs, but only to the argument which strikes me as best upon reflection." And for that reason who ever heard Socrates saying, "I know something and teach it"? But he used to send one person here and another there. Therefore men used to go to him to have him introduce them to philosophers, and he used to take them around and introduce them. But no, your idea of him, no doubt, is that, as he was taking them along, he used to say, "Come around to-day and hear me deliver a discourse in the house of Quadratus"

Why should I listen to you? Do you want to exhibit to me the clever way in which you put words together? You do compose them cleverly, man; and what good is it to you? "But praise me." What do you mean by "praise"? "Cry out to me, 'Bravo!' or 'Marvellous!"' All right, I shall say it. But if praise is some one of those things which the philosophers put in the category of the good, what praise can I give you? If it is a good thing to speak correctly, teach me and I will praise you. What then? Ought one to take no pleasure in listening to such efforts? Far from it. I do not fail to take pleasure in listening to a citharoede; surely I am not bound for that reason to stand and sing to my own accompaniment on the harp, am I? Listen, what does Socrates say? "Nor would it be seemly for me, O men of Athens, at my time of life to appear before you like some lad, and weave a cunning discourse." "Like some lad," he says. For it is indeed a dainty thing, this small art of selecting trivial phrases and putting them together, and of coming forward and reading or reciting them gracefully, and then in the midst of the delivery shouting out. 'There are not many people who can follow this, by your lives, I swear it!'

Does a philosopher invite people to a lecture?-Is it not rather the case that, as the sun draws its own sustenance to itself, so he also draws to himself those to whom he is to do good? What physician ever invites a patient to come and be healed by him? Although I am told that in these days the physicians in Rome do advertise; however, in my time they were called in by their patients. "I invite you to come and hear that you are in a bad way, and that you are concerned with anything rather than what you should be concerned with, and that you are ignorant of the good and the evil, and are wretched and miserable." That's a fine invitation! And yet if the philosopher's discourse does not produce this effect, it is lifeless and so is the speaker himself Rufus used to say, "If you have nothing better to do than to praise me, then I am speaking to no purpose." Wherefore he spoke in such a way that each of us as we sat there fancied someone had gone to Rufus and told him of our faults; so effective was his grasp of what men actually do, so vividly did he set before each man's eyes his particular weaknesses.

Men, the lecture-room of the philosopher is a hospital; you ought not to walk out of it in pleasure, but in pain. For you are not well when you come; one man has a dislocated shoulder, another an abscess, another a fistula, another a headache. And then am I to sit down and recite to you dainty little notions and clever little mottoes, so that you will go out with words of praise on your lips, one man carrying away his shoulder just as it was when he came in, another his head in the same state, another his fistula, another his abscess? And so it is for this, is it, that young men are to travel from home, and leave their parents, their friends, their relatives, and their bit of property, merely to cry "Bravo!" as you recite your clever little mottoes? Was this what Socrates used to do, or Zeno, or Cleanthes?

Well! but is there not such a thing as the right style for exhortation?-Why yes, who denies that? Just as there is the style for refutation, and the style for instruction. Who, then, has ever mentioned a fourth style along with these, the style of display? Why, what is the style for exhortation? The ability to show to the individual, as well as to the crowd, the warring inconsistency in which they are floundering about, and how they are paying attention to anything rather than what they truly want. For they want the things that conduce to happiness, but they are looking for them in the wrong place. To achieve that must a thousand benches be placed, and the prospective audience be invited, and you put on a fancy cloak, or dainty mantle, and mount the speaker's stand, and paint a word-picture of-how Achilles died? By the gods, I beseech you, have done with discrediting, as far as it is in your power to discredit, words and actions that are noble! There is nothing more effective in the style for exhortation than when the speaker makes clear to his audience that he has need of them. Or tell me, who that ever heard you reading a lecture or conducting a discourse felt greatly disturbed about himself, or came to a realisation of the state he was in, or on going out said, "The philosopher brought it home to me in fine style; I must not act like this any longer"? But does he not say to a companion, if you make an unusually fine impression, "That was beautiful diction in the passage about Xerxes"; and does the other not answer, "No, I preferred the one about the battle of Thermopylae"? Is this what listening to a philosopher amounts to?

EPICTETUS CHAPTER 24 - That We Ought Not To Yearn For The Things Which Are Not Under Our Control

Let not that which in the case of another is contrary to nature become an evil for you; for you are born not to be humiliated along with others, nor to share in their misfortunes, but to share in their good fortune. If, however, someone is unfortunate, remember that his misfortune concerns himself. For God made all mankind to be happy, to be serene. To this end He gave them resources, giving each man some things for his own, and others not for his own. The things that are subject to hindrance, deprivation, and compulsion are not a man's own, but those which cannot be hindered are his own. The true nature of the good and the evil, as was fitting for Him who watches over and protects us like a father. He gave to man to be among his own possessions. "But I have parted from So-and-so, and he is stricken with grief.' Yes, but why did he regard what was not his own as his own? Why, when he was glad to see you, did he not reflect that you are mortal, and likely to go on a journey? And therefore he is paying the penalty for his own folly. But why are you bewailing yourself, and to what end? Or did you also neglect to study this matter, but, like worthless women, did you enjoy everything in which you took delight as though you were to enjoy it for ever, your surroundings, human beings, your ways of life? And now you sit and wail because you no longer lay eyes upon the same persons, and do not spend your life in the same places. Yes, for that's what you deserve, to be more wretched than crows and ravens, which can fly away wherever they please, and change their nests, and cross the seas. without groaning or longing for their first home.-Yes, but they feel that way because they are irrational creatures.-Has, then, reason been given us by the gods for misfortune and misery, so that we may spend our lives in wretchedness and mourning? Or shall all men be immortal, and no one leave home, but shall we stay rooted in the ground like the plants? And if any one of our acquaintances leaves home, shall we sit down and wail, and then again, if he comes back, dance and clap our hands as the children do?

Shall we not wean ourselves at last, and call to mind what we have heard from the philosophers?—if, indeed, we did not listen to them as to enchanters—when they said that this universe is but a single state, and the substance out of which it has been fashioned is single, and it needs must be that there is a certain periodic change and a giving place of one thing to another, and that some things must be dissolved and others come into being, some things to remain in the same place and others to be moved. Further, that all things are full of friends, first gods, and then also men, who by nature have been made of one household with one another; and that some must

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3058 remain with each other, while others must depart, and that though we must rejoice in those who dwell with us, yet we must not grieve at those who depart. And man, in addition to being by nature high-minded and capable of despising all the things that are outside the sphere of his moral purpose, possesses also this further quality, that, namely, of not being rooted nor growing in the earth, but of moving now to one place and now to another, at one time under the pressure of certain needs, and at another merely for the sake of the spectacle.

Now it was something of this sort which fell to the lot of Odysseus:

Many the men whose towns he beheld, and he learned of their temper.

And even before his time it was the fortune of Heracles to traverse the entire inhabited world,

Seeing the wanton behaviour of men and the lawful,

casting forth the one and clearing the world of it, and introducing the other in its place. Yet how many friends do you suppose he had in Thebes, in Argos, in Athens, and how many new friends he made on his rounds, seeing that he was even in the habit of marrying when he saw fit, and begetting children, and deserting his children, without either groaning or yearning for them, or as though leaving them to be orphans? It was because he knew that no human being is an orphan, but all men have ever and constantly the Father, who cares for them. Why, to him it was no mere story which he had heard, that Zeus is father of men, for he always thought of Him as his own father, and called Him so, and in all that he did he looked to Him. Wherefore he had the power to live happily in every place. But it is impossible that happiness, and yearning for what is not present, should ever be united. For happiness must already possess everything that it wants; it must resemble a replete person: he cannot feel thirst or hunger.-Still, Odysseus felt a longing for his wife, and sat upon a rock and wept.—And do you take Homer and his tales as authority for everything? If Odysseus really wept, what else could he have been but miserable? But what good and excellent man is miserable? In all truth the universe is badly managed, if Zeus does not take care of His own citizens, that they be like Him, that is, happy. Nay, it is unlawful and unholy to think of such an alternative, but if Odysseus wept and wailed, he was not a good man. Why, what man could be good who does not know who he is? And who knows that, if he has forgotten that the things which come into being are corruptible, and that it is impossible for one human being always to live with another? What then? To reach out for the impossible is slavish and foolish: it is acting like a stranger in the universe, one who is fighting against God with the only weapons at his command, his own judgements.

But my mother mourns because she does not see me.but why did she not learn the meaning of these words of the philosophers? And I am not saying that you ought to take no pains to keep her from lamenting, but only that a person ought not to want at all costs what is not his own. Now another's grief is no concern of mine, but my own grief is. Therefore, I will put an end at all costs to what is my own concern, for it is under my control: and that which is another's concern I will endeavour to check to the best of my ability, but my effort to do so will not be made at all costs. Otherwise I shall be fighting against God, I shall be setting myself in opposition to Zeus, I shall be arraying myself against Him in regard to His administration of the universe. And the wages of this fighting against God and this disobedience will not be paid by "children's children," but by me myself in my own person, by day and by night, as I start up out of dreams and am disturbed, trembling at every message, with my own peace of mind depending upon letters not my own. Someone has arrived from Rome. "If only there is no bad news!" But how can anything bad for you happen in a place, if you are not there? Someone arrives from Greece. "If only there is no bad news!" In this way for you every place can cause misfortune. Is it not enough for you to be miserable where you are? Must you needs be miserable even beyond the seas, and by letter? Is this the fashion in which all that concerns you is secure?-Yes, but what if my friends over there die?-Why, what else than that mortal men died? Or how can you wish to reach old age yourself, and at the same time not behold the death of any that you love? Do you not know that in the long course of time many different things must needs happen; fever must overcome one man, a brigand another, a tyrant a third? Because such is the character of the air about us, such that of our associates; cold and heat and unsuitable food, and journeys by land and by sea, and winds and all manner of perils; this man they destroy, that man they drive into exile, another they send on an embassy, and yet another on a campaign. Sit down, therefore, and get all wrought up at each one of these events, mourning, unfortunate, miserable, depend on something other than yourself, and that not one thing or two, but tens upon tens of thousands of things!

Is that what you used to hear when you sat at the feet of the philosophers? Is that what you learned? Do you not know that the business of life is a campaign? One man must mount guard, another go out on reconnaissance, and another out to fight. It is not possible for all to stay in the same place, nor is it better so. But you neglect to perform the duties assigned you by your commanding officer, and complain when some rather hard order is given you, and fail to understand to what a state you are bringing the army, as far as in you lies; because, if they all imitate you, no one will dig a trench, no one construct a palisade, or watch through the night, or risk his life in fighting, but they will seem useless soldiers. Again, if you take ship as a sailor, take up one place and stick to that! and if you have to climb the mast, be unwilling; if you have to run to the bow, be unwilling! And what ship's captain will put up with you? Will he not throw you overboard like a piece of junk, nothing but a nuisance, and a bad example to the other sailors? So also in this world: each man's life is a kind of campaign, and a long and complicated one at that. You have to maintain the character of a soldier, and do each separate act at the bidding of the General, if possible divining what He wishes. For there is no comparison between this General and an ordinary one, either in His power, or in the pre-eminence of His character. You have been given a post in an imperial city, and not in some mean place; not for a short time either, but you are a senator for life. Do you not know that a man in such a post has to give only a little attention to the affairs of his own household, but for most of the time has to be away, in command, or under command, or serving some official, or in the field, or on the judge's bench? And then you want to be attached to the same spot and rooted in it like a plant?-Yes, it is pleasant.-Why deny it? But soup is pleasant too, and a pretty woman is a pleasant thing. What else do those say who make pleasure their end?

Do you not realise the kind of men they are whose language you have just uttered? That they are Epicureans and blackguards? And yet, while doing their deeds and holding their opinions, you recite to us the words of Zeno and Socrates? Will you not cast away from you, as far as you can fling them, these alien trappings with which you adorn yourself, although they do not at all become you? Or what else do these fellows want but to sleep without hindrance or compulsion, and after they have arisen, to yawn at their ease, and wash their faces; then to write and read what they please. then to babble something or other, to the applause of their friends, no matter what they say; then to go out for a stroll, and after a short walk to take a bath; then to eat, then to seek their rest, and sleep in such a bed as you might expect such persons to enjoy-why should I say the word? For you can infer what it is like.

Come now, do you also tell me your style of life, the one on which you have set your heart, you eager follower of the truth, and of Socrates, and of Diogenes! What do you want to do in Athens? Just what I have described? Nothing at all different? Why, then, do you call yourself a Stoic? Well, but those who falsely claim Roman citizenship are severely punished, and ought those who falsely claim so great and so dignified a calling and title to get off scot-free? Or is that impossible? whereas the divine and mighty and inescapable law is the law which exacts the greatest penalties from those who are guilty of the greatest offences. Now what are its terms? "Let him who makes pretence to things which in no wise concern him be a braggart, let him be a vainglorious man; let him who disobeys the divine governance be abject, be a slave, suffer grief, envy, pity,—in a word, be miserable, and lament,"

Well, what then? Do you want me to pay court to So-andso? go to his front-door?-If reason so decides, for the sake of your country, your kinsmen, mankind in general, why not go? Why, you are not ashamed to go to the door of the cobbler when you need shoes, nor to that of the market-gardener when you need lettuce; and are you ashamed to go to the door of the rich when you want something that rich men have?-Verv true, for as to the cobbler, I do not have to admire him.-Do not admire the rich man, either.-And I shall not have to flatter the market-gardener.-Don't flatter the rich man either.—How, then, shall I get what I need?—Am I telling you, "Go like a man who is certain to get what he and not simply, "Go in order to do what becomes wants you"?-Why, then, do I go at all?-So as to have gone, so as to have performed the function of the citizen that you are, of a brother, of a friend. And furthermore, remember that you have come to see a cobbler, a vegetable-dealer, a man who has authority over nothing great or important, even if he sell it for a high price. You are going, as it were, for heads of lettuce; they are worth an obol, not a talent. So it is in our life also. The matter in hand is worth going to a person's door about: very well, I will go. It is also worth an interview; very well, I will interview him about it. Yes, but I will have to kiss his hand also, and flatter him with words of praise. Go to! that is paying a talent for a head of lettuce! It is not profitable to me, nor to the State, nor to my friends, to ruin by so acting a good citizen and friend.

Yes, but if you fail, people will think that you didn't try hard. Have you gone and forgotten again why you went? Do you not know that a good and excellent man does nothing for the sake of appearances, but only for the sake of having acted right?—What good does he get, then, from acting right?— And what good does the person get for writing the name "Dio" as it ought to be written? The mere fact of writing it that way.—Is there, then, no further reward?—And are you looking for some further reward in the case of a good man, a reward which is greater than the doing of what is fine and right? At Olympia nobody wants anything else, but you feel content with having received an Olympic crown. Does it seem to you so small and worthless a thing to be good, and excellent, and happy? Therefore, when you have been introduced into this city-state by the gods, and find it now your duty to lay hand to the work of a man, do you yearn for nurses and the breast, and does the weeping of poor silly women move you and make you effeminate? And so will you never get over being an infant? Don't you know that, when a person acts like a child, the older he is the more ridiculous he is?

In Athens did you see nobody when you went to his house?-Yes, the man I wanted to see.-Here also make up your mind to see this man, and you will see the man you want; only do not go humbly, not with desire or aversion, and all will be well with you. But this result is not to be found by mere going, nor by standing at gates, but in one's judgements within. When you have contemned things external and outside the province of your moral purpose, and have come to regard none of them as your own, but only the being right in judgement, in thinking, in choosing, in desiring, in avoiding,-where is there any longer room for flattery, where for an abject spirit? Why any longer yearn for the quiet you enjoyed there, or your familiar haunts? Wait a little while and you will find the places here familiar in their turn. And then, if you are so ignoble in spirit, weep and wail again when you leave these too!

How, then, shall I become affectionate?-As a man of noble spirit, as one who is fortunate; for it is against all reason to be abject, or broken in spirit, or to depend on something other than yourself, or even to blame either God or man. I would have you become affectionate in such a way as to maintain at the same time all these rules; if, however, by virtue of this natural affection, whatever it is you call by that name, you are going to be a slave and miserable, it does not profit you to be affectionate. And what keeps you from loving a person as one subject to death, as one who may leave you? Did not Socrates love his own children? But in a free spirit, as one who remembers that it was his first duty to be a friend to the gods. That is why he succeeded in everything that becomes a good man, both in making his defence, and in assessing his own penalty, and before that time in his services as senator or soldier. But we abound in all manner of excuses for being ignoble: with some it is a child with others a mother and then again it is brothers. But it is not becoming for us to be unhappy on any person's account, but to be happy because of all, and above all others because of God, who has made us for this end. Come, was there anybody that Diogenes did not love, a man who was so gentle and kind-hearted that he gladly took upon himself all those troubles and physical hardships for the sake of the common weal? But what was the manner of his loving? As became a servant of Zeus, caring for men indeed, but at the same time subject unto God. That is why for him alone the whole world, and no special place, was his fatherland; and when he had been taken prisoner he did not hanker for Athens nor his acquaintances and friends there, but he got on good terms with the pirates and tried to reform them. And later, when he was sold into slavery at Corinth he kept on living there just as he had formerly lived at Athens; yes, and if he had gone off to the Perrhaebians he would have acted in quite the same way. That is how freedom is achieved. That is why he used to say, "From the time that Antisthenes set me free, I have ceased to be a slave." How did Antisthenes set him free? Listen to what Diogenes says. "He taught me what was mine, and what was not mine. Property is not mine; kinsmen, members of my household, friends, reputation, familiar places, converse with men-all these are not my own. 'What, then, is yours? Power to deal with external impressions.' He showed me that I possess this beyond all hindrance and constraint; no one can hamper me; no one can force me to deal with them otherwise than as I will. Who, then, has authority over me? Philip, or Alexander, or Perdiccas, or the Great King? Where can they get it? For the man who is destined to be overpowered by a man must long before that have been overpowered by things." Therefore, the man over whom pleasure has no power, nor evil, nor fame, nor wealth, and who, whenever it seems good to him, can spit his whole paltry body into some oppressor's face and depart from this life-whose slave can he any longer be, whose subject? But if he had gone on living pleasantly in Athens, and had been enamoured of his life there, his fortune would have been in every man's control, and the man who was stronger than he would have had power to cause him grief. How do you imagine he would have wheedled the pirates to sell him to some Athenian so that he might some time see the beautiful Piraeus, and the Long Walls and the Acropolis! Who are you that you should see them, slave? A thrall and a person of abject spirit; and what good are they to you?-No, not a slave, but a free man.-Show me how you are free. See, some person or other has laid hands on you-the man who takes

you away from your accustomed way of life, and says, "You are my slave; for it is in my power to prevent you from living as you will, it is in my power to lighten your servitude, or to humble you; whenever I wish, you can be happy again, and go off to Athens in high spirits." What do you say to this man who makes you his slave? Whom have you to offer him as your emancipator? Or do you not even look him in the face at all, but cutting all argument short do you implore him to set you free? Man, you ought to go gladly to prison, in haste, outstripping those who lead you away. And then, I do beseech you, are you loath to live in Rome, and do you yearn for Greece? And when you have to die, then also, I suppose, will you weep all over us, because you are never going to see Athens again or stroll in the Lvecum?

Was that what you went abroad for? Was it for this that you sought to meet someone-that he might do you good? Good indeed! That you might analyse syllogisms more readily, or run down hypothetical arguments? It was for this reason, was it, you left brother, country, friends, and those of your own household-so as to return with this kind of learning? And so you did not go abroad to acquire constancy of character, or peace of mind; not to become secure yourself and thenceforward blame and find fault with no man; not to make it impossible for another to do you wrong, and so maintain without hindrance your relations in society? A fine exchange of goods this which you have achieved, syllogisms, and arguments with equivocal and hypothetical premisses! Yes, and if you see fit, seat yourself in the marketplace, and hang out a sign, as the drug-peddlers do. Ought you not rather to deny that you know even all you have learned, so as not to bring your philosophical precepts into ill repute as being useless? What harm has philosophy done you? How has Chrysippus wronged you that you should prove by your own conduct his labours to be useless? Were not the ills at home enough for you, all that you had to cause you grief and sorrow, even if you had not gone abroad, but did you add yet others in addition to them? And if you get other intimates and friends again, you will have more reasons for lamentation, yes, and if you get attached to another land. Why, then, live? Is it to involve yourself in one grief after another that makes you miserable? And then, I ask you, do you call this natural affection? Natural affection forsooth, man! If it is good, it is the source of no evil; if it is evil, I have nothing to do with it. I am born for the things that are good and belong to me, not for things evil.

What, then, is the proper discipline for this? In the first place, the highest and principal discipline, and one that stands at the very gates of the subject, is this: Whenever you grow attached to something, do not act as though it were one of those things that cannot be taken away, but as though it were something like a jar or a crystal goblet, so that when it breaks you will remember what it was like, and not be troubled. So too in life; if you kiss your child, your brother, your friend, never allow your fancy free rein, nor your exuberant spirits to go as far as they like, but hold them back, stop them, just like those who stand behind generals when they ride in triumph, and keep reminding them that they are mortal. In such fashion do you too remind yourself that the object of your love is mortal; it is not one of your own possessions; it has been given you for the present, not inseparably nor for ever, but like a fig, or a cluster of grapes, at a fixed season of the year, and that if you hanker for it in the winter, you are a fool. If in this way you long for your son, or your friend, at a time when he is not given to you, rest assured that you are hankering for a fig in winter-time. For as winter-time is to a fig, so is every state of affairs, which arises out of the universe, in relation to the things which are destroyed in accordance with that same state of affairs.

Furthermore, at the very moment when you are taking delight in something, call to mind the opposite impressions. What harm is there if you whisper to yourself, at the very moment you are kissing your child, and say, "To-morrow you will die"? So likewise to your friend, "To-morrow you will go abroad, or I shall, and we shall never see each other again"?-Nay, but these are words of bad omen.-Yes, and so are certain incantations, but because they do good, I do not care about that, only let the incantation do us good. But do you call any things ill-omened except those which signify some evil for us? Cowardice is ill-omened, a mean spirit, grief, sorrow, shamelessness; these are words of ill-omen. And yet we ought not to hesitate to utter even these words, in order to guard against the things themselves. Do you tell me that any word is ill-omened which signifies some process of nature? Say that also the harvesting of ears of grain is ill-omened, for it signifies the destruction of the ears; but not of the universe. Say that also for leaves to fall is ill-omened, and for the fresh fig to turn into a dried fig, and a cluster of grapes to turn into raisins. For all these things are changes of a preliminary state into something else; it is not a case of destruction, but a certain ordered dispensation and management. This is what going abroad means, a slight change; this is the meaning of death, a greater change of that which now is, not into what is not, but into what is not now .- Shall I, then, be no more ?-No, you will not be, but something else will be, something

different from that of which the universe now has need. And this is but reasonable, for you came into being, not when you wanted, but when the universe had need of you.

95For this reason the good and excellent man, bearing in mind who he is, and whence he has come, and by whom he was created, centres his attention on this and this only, how he may fill his place in an orderly fashion, and with due obedience to God. "Is it Thy will that I should still remain? I will remain as a free man, as a noble man, as Thou didst wish it; for Thou hast made me free from hindrance in what was mine own. And now hast Thou no further need of me? Be it well with Thee. I have been waiting here until now because of Thee and of none other, and now I obey Thee and depart.' "How do you depart?" "Again, as Thou didst wish it, as a free man, as Thy servant, as one who has perceived Thy commands and Thy prohibitions. But so long as I continue to live in Thy service, what manner of man wouldst Thou have me be? An official or a private citizen, a senator or one of the common people, a soldier or a general, a teacher or the head of a household? Whatsoever station and post Thou assign me, I will die ten thousand times, as Socrates says, or ever I abandon it. And where wouldst Thou have me be? In Rome, or in Athens, or in Thebes, or in Gyara? Only remember me there. If Thou sendest me to a place where men have no means of living in accordance with nature, I shall depart this life, not in disobedience to Thee, but as though Thou wert sounding for me the recall. I do not abandon Thee-far be that from me but I perceive that Thou hast no need of me. Yet if there be vouchsafed a means of living in accordance with nature. I will seek no other place than that in which I am, or other men than those who are now my associates."

Have thoughts like these ready at hand by night and by day; write them, read them, make your conversation about them, communing with yourself, or saying to another, "Can you give me some help in this matter?" And again, go now to one man and now to another. Then, if some one of those things happens which are called undesirable, immediately the thought that it was not unexpected will be the first thing to lighten the burden. For in every case it is a great help to be able to say, "I knew that the son whom I had begotten was mortal." For that is what you will say, and again, "I knew that I was mortal," "I knew that I was likely to leave home," "I knew that I was liable to banishment," "I knew that I might be sent off" to prison." And in the next place, if you reflect with yourself and look for the quarter from which the happening comes, immediately you will be reminded of the principle: "It comes from the quarter of the things that are outside the sphere of the moral purpose, that are not mine own; what, then, is it to me?" Then comes the most decisive consideration: "Who was it that has sent the order?" Our Prince, or our General, the State, or the law of the State? "Give it to me, then, for I must always obey the law in every particular." Later on, when your imagination bites you (for this is something you cannot control), fight against it with your reason, beat it down, do not allow it to grow strong, or to take the next step and draw all the pictures it wants, in the way it wants to do. If you are at Gyara, don't picture the style of life at Rome, and all the relaxations a man had who was living there, as well as all that he might have upon his return; but since you have been stationed there, you ought to strive to live manfully at Gyara, as beseems the man whose life is spent in Gvara. And again, if you are in Rome, do not picture the style of life at Athens, but make your life in Rome the one object of your study and practice.

Then, in the place of all the other relaxations, introduce that which comes from the consciousness that you are obedient to God, and that you are playing the part of the good and excellent man, not ostensibly but in reality. For what a fine thing it is to be able to say to oneself, "Now I am actually performing what the rest talk solemnly about in their lectures, and are thought to be uttering paradoxes. Yes, they sit and expound my virtues, and study about me, and sing my praise. And of this Zeus wished me to get a demonstration in my own person, while at the same time He wished to know whether He has the right kind of soldier, the right kind of citizen, and to present me before all other men as a witness about the things which lie outside the sphere of the moral purpose. 'Behold,' says He, 'your fears are at haphazard, it is in vain that you desire what you desire. Do not look for your blessings outside, but look for them within yourselves; otherwise you will not find them.' These are the terms upon which now He. brings me here, and again He sends me there; to mankind exhibits me in poverty, without office, in sickness; sends me away to Gyara, brings me into prison. Not because He hates me-perish the thought! And who hates the best of his servants? Nor because He neglects me, for He does not neglect any of even the least of His creatures; but because He is training me, and making use of me as a witness to the rest of men. When I have been appointed to such a service, am I any longer to take thought as to where I am, or with whom, or what men say about me? Am I not wholly intent upon God, and His commands and ordinances?"

If you have these thoughts always at hand and go over them again and again in your own mind, and keep them in readiness, you will never need a person to console you, or strengthen you. For disgrace does not consist in not having anything to eat, but in not having reason sufficient to secure you against fear and against grief. But if once you win for yourself security against grief and fear, will there any longer exist for you a tyrant, or a guardsman, or members of Caesar's household; or will some appointment to office sting you with envy, or those who perform sacrifices on the Capitol in taking the auspices, you who have received so important an office from Zeus? Only make no display of your office, and do not boast about it; but prove it by your conduct; and if no one perceives that you have it, be content to live in health and happiness yourself.

EPICTETUS CHAPTER 25 - To Those Who Fail To Achieve Their Purposes

Consider which of the things that you purposed at the start you have achieved, and which you have not; likewise, how it gives you pleasure to recall some of them, and pain to recall others, and, if possible, recover also those things which have slipped out of your grasp. For men who are engaged in the greatest of contests ought not to flinch, but to take also the blows; for the contest before us is not in wrestling or the pancratium, in which, whether a man succeeds or fails, he may be worth a great deal, or only a little,-yes, by Zeus, he may even be extremely happy or extremely miserable,-but it is a contest for good fortune and happiness itself. What follows? Why here, even if we give in for the time being, no one prevents us from struggling again, and we do not have to wait another four-year period for another Olympic festival to come around, but the moment a man has picked himself up, and recovered himself, and exhibits the same eagerness, he is allowed to contest; and if you give in again, you can enter again; and if once you win a victory, you are as though you had never given in at all. Only do not begin cheerfully to do the same thing over again out of sheer habit, and end up as a bad athlete, going the whole circuit of the games, and getting beaten all the time, like quails that have once run away. "I am overcome by the impression of a pretty maid. Well, what of it? Wasn't I overcome just the other day?" "I feel strongly inclined to censure somebody, for didn't I censure somebody just the other day?" You talk thus to us as though you had come off scot-free; just as if a man should say to his physician who was forbidding him to bathe, "Why, but did I not bathe just the other day?" If, then, the physician is able to say to him, Very well, after you had bathed, then, how did you feel? Did not you have a fever? Did not your head ache?" So, too, when you censured somebody the other day, did you not act like an ugly-spirited man, like a silly babbler? Did you not feed this habit by citing the example of your own previous acts? And when you were overcome by the maid, did you escape scot-free? Why, then, do you talk about what you were doing just the other day? In my opinion, you ought to have remembered, as slaves remember their blows, and to have kept away from the same mistakes. But one case is not like the other: for with slaves it is the suffering which produces the memory, but in the case of your mistakes, what suffering is there, what penalty do you feel? Why, when did you ever acquire the habit of avoiding evil activities?

EPICTETUS CHAPTER 26 - To Those Who Fear Want

Are you not ashamed to be more cowardly and ignoble than a runaway slave? How do they, when they run off, leave their masters? in what estates or slaves do they put their confidence? Do they not steal just a little bit to last them for the first few days, and then afterwards drift along over land or sea, contriving one scheme after another to keep themselves fed? And what runaway slave ever died of hunger? But you tremble, and lie awake at night, for fear the necessities of life will fail you. Wretch, are you so blind, and do you so fail to see the road to which lack of the necessities of life leads? Where, indeed, does it lead? Where also fever, or a stone that drops on your head, lead,-to death. Have you not, then, often said this same thing yourself to your companions, read much of the same sort, and written much? How many times have you boasted that, as far as death at least was concerned, you are in a fairly good state?-Yes, but my family too will starve.-What then? Their starvation does not lead to some other end than yours, does it? Have they not also much the same descent thereto, and the same world below? Are you not willing, then, to look with courage sufficient to face every necessity and want, at that place to which the wealthiest needs must go, and those who have held the highest offices, and very kings and tyrants? Only you will descend hungry, if it so happen, and they bursting with indigestion and drunkenness. Did you ever easily find a beggar who was not an old man? Wasn't he extremely old? But though they are cold night and day, and lie forlorn on the ground, and have to eat only what is absolutely necessary, they approach a state where it is almost impossible for them to die; yet you who are physically perfect, and have hands and feet, are you so alarmed about starving? Can you not draw water, or write, or escort boys to and from school, or be another's doorkeeper?-But it is disgraceful to come to such a necessity .-- Learn, therefore, first of all, what

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3060 the disgraceful things are, and after you have done that, come into our presence and call yourself a philosopher. But as the case stands now, do not even allow anyone else to call you one!

Is anything disgraceful to you which is not your own doing, for which you are not responsible, which has befallen you accidentally, as a headache or a fever? If your parents were poor, or if they were rich but left others as their heirs, and if they give you no help though they are living, is all this disgraceful to you? Is that what you learned at the feet of the philosophers? Have you never heard that the disgraceful thing is censurable, and the censurable is that which deserves censure? And whom do you censure for what is not his own doing, which he didn't produce himself? Well, did you produce this situation? did you make your father what he is? Or is it in your power to reform him? Is that youchsafed you? What follows? Ought you to wish for what is not given you, or to be ashamed when you fail to get it? And did you really, while studying philosophy, acquire the habit of looking to other persons, and of hoping for nothing yourself from yourself? Very well then, lament and groan, and eat in fear of not having food to-morrow; tremble about your paltry slaves, for fear they will steal something, or run away, or die! Live in this spirit and never cease to live so, you who in name only have approached philosophy, and, as far as in you lay, have discredited its principles by showing them to be useless and good for nothing to those who receive them! But you never desired stability, serenity, peace of mind; you never cultivated anybody's acquaintance for that purpose, but many persons' acquaintance for the sake of syllogisms; you never thoroughly tested for yourself any one of these external impressions, asking the questions: "Am I able to bear it, or am I not? What may I expect next?" but just as though everything about you were in an excellent and safe condition, you have been devoting your attention to the last of all topics, that which deals with immutability, in order that you may have immutable-what? your cowardice, your ignoble character, your admiration of the rich, your ineffectual desire, your aversion that fails of its mark! These are the things about whose security you have been anxious!

Ought you not, first, to have acquired something from reason, and then to have made that something secure? Why, did vou ever see anvone building a cornice all around without first having a wall about which to build it? And what kind of doorkeeper is placed on guard where there isn't any door? But you practise to get the power to demonstrate; demonstrate what? You practise to avoid being shaken by sophisms; shaken from what? Show me first what you are maintaining, what you are measuring, or what you are weighing: and after that, and under those conditions, show me your scales or your bushel-measure. Or how long will you keep measuring ashes? Are not these what you ought to be demonstrating, the things, namely, that make men happy, that make their affairs prosper for them as they desire, that make it unnecessary for them to blame anybody, and to find fault with anybody, but to acquiesce in the government of the universe? Show me these. "See, I do show you," a man says; "I will analyse syllogisms for you." Slave, this is a mere measuring instrument, it is not the thing measured. That is why you are now being punished for what you neglected; you tremble, lie awake, take counsel with everyone, and, if your plans are not likely to win the approval of all men, you think that your deliberations have been faulty.

And then you fear hunger, as you fancy. Yet it is not hunger that you fear, but you are afraid that you will not have a professional cook, you will not have another servant to buy the delicacies, another to put on your shoes for you, another to dress you, others to give you your massage, others to follow at your heels, in order that when you have undressed in a bath, and stretched yourself out like men who have been crucified, you may be massaged on this side and on that; and that then the masseur may stand over you and say, "Move over, give me his side, you take his head, hand me his shoulder"; and then, when you have left the bath and gone home, that you may shout out, "Is no one bringing me something to eat?" and after that, "Clear away the tables; wipe them off with a sponge." What you are afraid of is this-that you may not be able to live the life of an invalid, since, I tell you, you have only to learn the life of healthy men-how the slaves live, the workmen, the genuine philosophers, how Socrates lived--he too with a wife and children-how Diogenes lived, how Cleanthes, who combined going to school and pumping water. If this is what you want, you will have it everywhere, and will live with full confidence. Confidence in what? In the only thing in which one can have confidence-in what is faithful, free from hindrance, cannot be taken away, that is, in your own moral purpose. And why have you made yourself so useless and unprofitable, that no one is willing to take you into his house, no one willing to take care of you? But when a whole and useful implement has been thrown out anyone who finds it will pick it up and count it gain; yet not when he picks up you, but everyone will count you a loss. You are so unable to serve the purpose of even a dog or a cock. Why, then, do you care to keep on living, if that is the sort of person you are?

Does a good man fear that food will fail him? It does not fail the blind, it does not fail the lame; will it fail a good man? A good soldier does not lack someone to give him pay, or a workman, or a cobbler; and shall a good man? Does God so neglect His own creatures, His servants, His witnesses, whom alone He uses as examples to the uninstructed, to prove that He both is, and governs the universe well, and does not neglect the affairs of men, and that no evil befalls a good man either in life or in death?-Yes, but what if He does not provide food?-Why, what else but that as a good general He has sounded the recall? I obey, I follow, lauding my commander, and singing hymns of praise about His deeds. For I came into the world when it so pleased Him, and I leave it again at His pleasure, and while I live this was my functionto sing hymns of praise unto God, to myself and to others, be it to one or to many. God does not give me much, no abundance. He does not want me to live luxuriously; He did not give much to Heracles, either, though he was His own son, but someone else was king over Argos and Mycenae, while he was subject, and suffered labours and discipline. And Eurystheus, such as he was, was not king over either Argos or Mycenae, for he was not king even over himself; but Heracles was ruler and leader of all the land and sea, purging them of injustice and lawlessness, and introducing justice and righteousness; and all this he did naked and by himself. And when Odysseus was shipwrecked and cast ashore, did his necessity make abject his spirit, or break it? Nay, but how did he advance upon the maidens to ask for food, which is regarded as being the most disgraceful thing for one person to ask of another?

As a lion reared in the mountains.

In what did he trust? Not in reputation, or money, or office, but in his own might, that means, his judgements about the things which are under our control, and those which are not under our control. For these are the only things that make men free, that make men unhampered, that lift up the neck of those who have become abject, that make them look with level eyes into the faces of the rich, and the faces of tyrants. And all this was what the philosopher had to give, yet will you not come forth bold, instead of trembling for your paltry clothes and silver plate? Miserable man, have you so wasted your time down to the present?

Yes, but what if I fall ill?—You will bear illness well.— Who will nurse me?—God and your friends.—I shall have a hard bed to lie on.—But like a man.—I shall not have a suitable house.—Then you will fall ill in an unsuitable house.—Who will prepare my food for me?—Those who prepare it for others also. You will be ill like Manes.—And what is also the end of the illness?—Anything but death? Will you, then, realise that this epitome of all the ills that befall man, of his ignoble spirit, and his cowardice, is not death, but it is rather the fear of death? Against this fear, then, I would have you discipline yourself, toward this let all your reasoning tend, your exercises, your reading; and then you will know that this is the only way in which men achieve freedom.

DISCOURSES OF EPICTETUS BOOK 4

EPICTETUS CHAPTER 1 - Of Freedom

He is free who lives as he wills, who is subject neither to compulsion, nor hindrance, nor force, whose choices are unhampered, whose desires attain their end, whose aversions do not fall into what they would avoid. Who, then, wishes to live in error?—No one.—Who wishes to live deceived, impetuous, unjust, unrestrained, peevish, abject?—No one.—Therefore, there is no bad man who lives as he wills, and accordingly no bad man is free. And who wishes to live in grief, fear, envy, pity, desiring things and failing to get them, avoiding things and falling into them?—No one at all.—Do we find, then, any bad man free from grief or fear, not falling into what he would avoid, nor failing to achieve what he desires?—No one.—Then we find no bad man free. either.

Now if some man who has been consul twice hear this, he will forgive you, if you add, "But you are a wise man; this does not apply to you." Yet if you tell him the truth, to wit: "In point of being a slave you are not a whit better than those who have been thrice sold," what else can you expect but a flogging? "Why, how am I a slave?" says he. "My father was free, my mother free; no one has a deed of sale for me. More than that. I am a member of the senate, and a friend of Caesar. and I have been consul, and I own many slaves." Now in the first place, most worthy senator, it is very likely that your father was the same kind of slave that you are, and your mother, and your grandfather, and all your ancestors from first to last. But even if they were free to the limit, what does that prove in your case? Why, what does it prove if they were noble, and you are mean-spirited? If they were brave, and you a coward? If they were self-controlled, and you unrestrained?

And what, says someone, has this to do with being a slave?—Does it not strike you as "having to do with being a slave" for a man to do something against his will, under compulsion?—Granted the point, he replies. But who can put

me under compulsion, except Caesar, the lord of all?—There, you have yourself admitted that you have one master. And let it not comfort you that he is, as you say, the common master of all men, but realise that you are a slave in a great house. So also the men of Nicopolis are wont to shout: "Yea, by the fortune of Caesar, we are free men!"

However, let us leave Caesar out of account, if you please, for the present, but answer me this: Were you never in love slave or free?---Were you never commanded by your sweetheart to do something you did not wish to do? Did you never cozen your pet slave? Did you never kiss his feet? Yet if someone should compel you to kiss the feet of Caesar, you would regard that as insolence and most extravagant tyranny. What else, then, is slavery? Did you never go out at night where you did not want to go? Did you never spend more than you wanted to spend? Did you never utter words with groaning and lamentation, endure to be reviled, to have the door shut in your face? Well, if you are ashamed to admit such things about yourself, observe what Thrasonides says and does. a man who had served on so many campaigns-perhaps more even than you have. First, he went out at night when Geta has not the courage to go abroad, but, if the latter had been compelled by him to do so, he would have gone out crying aloud and bewailing his bitter slavery. And then what does Thrasonides say? Says he,

A cheap little wench has made of me a perfect slave.

Of me, though never a one among all my foemen might. Sad wretch, to be the slave of a wench, and a cheap one at that! Why, then, do you call yourself free any longer? And why do you talk of your campaigns? Then he calls for a sword, and gets angry at the man who refuses out of good-will to give it to him, and sends presents to the girl who hates him, and bees, and weeps, and again, when he has had a little success.

he is elated. And yet even then, so long as he had not learned

to give up passionate desire or fear, could this man have been in possession of freedom? Consider now, in the case of the animals, how we employ the concept of freedom. Men shut up tame lions in a cage, and bring them up, and feed them, and some take them around with them. And yet who will call such a lion free? Is it not true that the more softly the lion lives the more slavishly he lives? And what lion, were he to get sense and reason, would care to be one of these lions? Why, yes, and the birds yonder, when they are caught and brought up in cages, what do they suffer in their efforts to escape? And some of them starve to death rather than endure such a life while even such as live harely do so, and suffer and pine away, and if ever they find any opening, make their escape. Such is their desire for physical freedom, and a life of independence and freedom from restraint. And what is wrong with you here in your cage? 'What a question! My nature is to fly where I please, to live in the open air, to sing when I please. You rob me of all this, and then ask, 'What is wrong with you?"

That is why we shall call free only those animals which do not submit to captivity, but escape by dying as soon as they are captured. So also Diogenes says somewhere: "The one sure way to secure freedom is to die cheerfully"; and to the Persian king he writes: "You cannot enslave the Athenian State any more than you can enslave the fish. "How so? Shall I not lay hold of them?" "If you do," he replies, "they will forthwith leave you and escape, like the fish. And that is true, for if you lay hold of one of them, it dies; and if these Athenians die when you lay hold of them, what good will you get from your armament?" That is the word of a free man who has seriously examined the matter, and, as you might expect, had discovered truth about it. But if you look for it where it does not exist, why be surprised if you never find it?

It is the slave's prayer that he be set free immediately. Why? Do you think it is because he is eager to pay his money to the men who collect the five per cent tax? No, it is because he fancies that up till now he is hampered and uncomfortable, because he has not obtained his freedom from slavery. "If I am set free," he says, "immediately it is all happiness, I shall pay no attention to anybody. I talk to everybody as an equal and as one in the same station in life, I go where I please, I come whence I please, and where I please." Then he is emancipated, and forthwith, having no place to which to go and eat, he looks for someone to flatter, for someone at whose house to dine. Next he either earns a living by prostitution, and so endures the most dreadful things, and if he gets a manger at which to eat he has fallen into a slavery much more severe than the first; or even if he grows rich, being a vulgarian he has fallen in love with a chit of a girl, and is miserable, and laments, and yearns for his slavery again. "Why, what was wrong with me? Someone else kept me in clothes, and shoes, and supplied me with food, and nursed me when I was sick: I served him in only a few matters. But now miserable man that I am, what suffering is mine, who am a slave to several instead of one! However, if I get rings on my fingers," he says, "then indeed I shall live most prosperously and happily." And so, first, in order to get them he submits to-what he deserves! Then when he has got them, you have the same thing over again. Next he says, "If I serve in a campaign, I am rid of all my troubles." He serves in a campaign, he submits to all that a jail-bird suffers, but none the less he demands a second campaign and a third. After that, when he adds the very colophon, and becomes a senator, then he becomes a slave as he enters the senate, then he serves in the handsomest and sleekest slavery.

Come, let him not be a fool, let him learn, as Socrates used to say, "What each several thing means," and not apply his preconceptions at random to the particular cases. For this is the cause to men of all their evils, namely, their inability to apply their general preconceptions to the particular instances. But some of us think one thing and some another. One man fancies he is ill. Not at all; the fact is that he is not applying his preconceptions. Another fancies he is a beggar: another that he has a hard-hearted father or mother; still another that Caesar is not gracious to him. But this means one thing and one thing only-ignorance of how to apply their preconceptions. Why, who does not have a preconception of evil, that it is harmful, that it is to be avoided, that it is something to get rid of in every way? One preconception does not conflict with another, but conflict arises when one proceeds to apply them. What, then, is this evil that is harmful and is to be avoided? One person says it is not to be Caesar's friend; he is off the course, he has missed the proper application, he is in a bad way, he is looking for what is not pertinent to the case in hand; because, when he has succeeded in being Caesar's friend, he has none the less failed to get what he was seeking. For what is it that every man is seeking? To live securely, to be happy, to do everything as he wishes to do, not to be hindered, not to be subject to compulsion. When, therefore, he becomes a friend of Caesar, has he been relieved of hindrance, reheved of compulsion, does he live securely, does he live serenely? From whom shall we inquire? What better witness have we than this very man who has become Caesar's friend? Come into the midst and tell us. When did you sleep more peacefully, now or before you became Caesar's friend? Immediately the answer comes: "Stop, I implore you by the gods, and do not jest at my lot; you don't know what I suffer, miserable man that I am; no sleep visits me, but first one person comes in and then another and reports that Caesar is already awake, and is already coming out; then troubles, then worries!" Come, when did you dine more pleasantly, now or formerly? Listen to him and to what he has to say on this topic. If he is not invited, he is hurt, and if he is invited, he dines like a slave at a master's table, all the time careful not to say or do something foolish. And what do you suppose he is afraid of? That he be scourged like a slave? How can be expect to get off as well as that? But as befits so great a man, a friend of Caesar, he is afraid he will lose his head. When did you take your bath in greater peace? And when did you take your exercise at greater leisure? In a word, which life would you rather live, your present life or the old one? I can take oath that no one is so insensate or so incurable as not to lament his misfortunes the more he is a friend of Caesar

When, therefore, neither those who are styled kings live as they will, nor the friends of these kings, what free men are left?-Seek and you will find. For nature has given you resources to find the truth. But if you are unable of yourself, by employing these resources alone, to find the next step, listen to those who have already made the search. What do they say? Does freedom seem to you to be a good?—Yes, the greatest.-Is it possible, then, for a man who has this greatest good to be unhappy, or to fare ill?-No.-When, therefore, you see men unhappy, miserable, grieving, declare confidently that they are not free.-I do so declare.-Very well, then, we have now got away from buying and selling and arrangements of that kind in the acquisition of property. For if you are right in agreeing to these propositions, whether it be the Great King who is unhappy, or a little king, whether it be a man of consular rank, or one who has been a consul twice, he could not be free.-Granted.

Answer me, then, this further question: Does freedom seem to you to be a great and noble thing, and precious?-Of course.-Is it possible, then, for a man who achieves a thing so great and precious and noble, to be of abject spirit?-It is not.-When, therefore, you see one man cringing before another, or flattering him contrary to his own opinion, say confidently of this man also that he is not free; and that not merely if he be doing so for the sake of a paltry meal, but even if it be for a governorship or a consulship. Call rather those who do these things for certain small ends slaves on a small scale, and the others, as they deserve, slaves on a grand scale-This also I grant.-And does freedom seem to you to be something independent and self-governing?-Of course.-When, therefore, it is in another's power to put hindrances in a man's way and subject him to compulsion, say confidently that this man is not free. And please don't look at his grandfathers and great-grandfathers, or look for a deed of sale or purchase, but if you hear him say "Master," in the centre of his being and with deep emotion, call him a slave, even if twelve fasces precede him; and if you hear him say, "Alas! What I must suffer!" call him a slave; and, in short, if you see him wailing, complaining, in misery, call him a slave

in a toga praetexta. However, if he does none of these things, do not call him free yet, but find out what his judgements are. whether they are in any respect subject to compulsion, to hindrance, to unhappiness; and if you find him to be that kind of a person, call him a slave on holiday at the Saturnalia; say that his master is out of town; later on he will return, and then you will learn what the fellow suffers.-Who will return?—Anyone who has control over the things which some man desires, to get these for him or to take them away.-Have we, then, so many masters?-Yes, so many. For even before these personal masters we have masters in the form of circumstances, and these are many. Hence, it needs must follow that those too who have authority over some one of these circumstances are our masters. Why, look you, no one is afraid of Caesar himself, but he is afraid of death, exile, loss of property, prison, disfranchisement. Nor does anyone love Caesar himself, unless in some way Caesar is a person of great merit; but we love wealth, a tribuneship, a praetorship, a consulship. When we love and hate and fear these things, it needs must be that those who control them are masters over us. That is why we even worship those persons as gods; for we consider that what has power to confer the greatest advantage is divine. And then we lay down the wrong minor premiss: "This man has power to confer the greatest advantage." It needs must be that the conclusion from these premisses is wrong too.

What, then, is it which makes a man free from hindrance and his own master? For wealth does not do it, nor a consulship, nor a province, nor a kingdom, but something else has to be found. What, therefore, is it which makes a man free from hindrance and restraint in writing?-The knowledge of how to write.-And what in playing on the harp?-The knowledge of how to play on the harp.-So also in living, it is the knowledge of how to live. Now you have already heard this, as a general principle, but consider it also in its particular applications. Is it possible for the man who is aiming at some one of these things which are under the control of others to be free from hindrance?-No.-Is it possible for him to be free from restraint?-No.-Therefore, it is not possible for him to be free, either. Consider then: Have we nothing which is under our own exclusive control, or is everything in that state: or are some things under our control and others under the control of others?-How do you mean?-When you want your body to be whole, is the matter under your control, or not?-It is not.-And when you want it to be well?-Nor that, either.-And to live or to die?-Nor that, either.-Therefore, your body is not your own possession it is subject to everyone who is stronger than you are.-Granted.-And your farm, is it under your control to have it when you want, and as long as you want; and in the condition that you want?-No.-And your paltry slaves? No.-And your clothes?-No.-And your paltry house?--And your horses?-None of these things.-And if you No wish by all means your children to live, or your wife, or your brother, or your friends, is the matter under your control?-No, nor that, either.

Have you, then, nothing subject to your authority, which is under your control and yours only, or do you have something of that sort?-I do not know.-Look, then, at the matter this way, and consider it. No one can make you assent to what is false, can he?-No one.-Well, then, in the region of assent you are free from hindrance and restraint. Granted.-Come, can anyone force you to choose something that you do not want?-He can; for when he threatens me with death or bonds, he compels me to choose.-If, however, you despise death and bonds, do you pay any further heed to him?-No.-Is it, then, an act of your own to despise death. or is it not your own act?-It is mine.-So it is your own act to choose, or is it not?—Granted that it is mine.—And to refuse something? This also is yours .--- Yes, but suppose I choose to go for a walk and the other person hinders me?-What part of you will he hinder? Surely not your assent?-No; but my poor body.-Yes, as he would a stone.-Granted that, but I do not proceed to take my walk.-But who told you, "It is your own act to take a walk unhindered"? As for me. I told you that the only unhindered thing was the desire: but where there is a use of the body and its co-operation, you have heard long ago that nothing is your own.-Granted that also .- Can anyone force you to desire what you do not want?-No one.-Or to purpose or plan, or, in a word, to deal with the impressions that come to you?-No, nor that, either: but he will hinder me, when I set my desire upon something, from achieving what I desire.--If you desire something which is your own and not subject to hindrance, how will he hinder you?-Not at all.-Who, then, tells you that the man who sets his desire upon what is not his own is free from hindrance?

Shall I not, then, set my desire on health?—No, not at all, nor on anything else which is not your own. For that which is not in your power to acquire or to keep is none of yours. Keep far away from it not merely your hands, but above all your desire; otherwise, you have delivered yourself into slavery, you have bowed your neck to the burden, if you admire anything that is not your own, if you conceive a violent passion for anything that is in subjection to another and mortal.—Is not my hand my own?—It is a part of you, but by nature it is clay, subject to hindrance and compulsion, a slave to everything that is stronger than you are. And why do I name you the hand? You ought to treat your whole body like a poor loaded-down donkey, as long as it is possible, as long as it is allowed; and if it be commandeered and a soldier lay hold of it, let it go, do not resist nor grumble. If you do, you will get a beating and lose your little donkey just the same. But when this is the way in which you should act as regards the body, consider what is left for you to do about all the other things that are provided for the sake of the body. Since the body is a little donkey, the other things become little bridles for a little donkey, little pack-saddles, little shoes, and barley, and fodder. Let them go too, get rid of them more quickly and cheerfully than of the little donkey itself.

Once prepared and trained in this fashion to distinguish what is not your own from what is your own possession, the things which are subject to hindrance from those which are free from it, to regard these latter as your concern, and the former as no concern of yours, diligently to keep your desire fixed on the latter, and your aversion directed toward the former, then have you any longer anyone to fear?-No one.-Of course; what is there to be fearful about? About the things that are your own, wherein is the true nature of good and evil for you? And who has authority over these? Who can take them away, who can hinder them, any more than one can hinder God? But shall you be fearful about your body and your property? About the things that are not your own? About the things that are nothing to you? And what else have you been studying, from the very outset, but how to discriminate between what is your own and what is not your own, what is under your control and what is not under your control, what is subject to hindrance and what is free from it? For what purpose did you go to the philosophers? That you might no less than before be unfortunate and miserable? You will not, then, in that case, be free from fear and perturbation. And what has pain to do with you? For fear of things anticipated becomes pain when these things are present. And what will you any longer passionately seek? For you possess a harmonious and regulated desire for the things that are within the sphere of the moral purpose, as being excellent, and as being within your reach; and you desire nothing outside the sphere of the moral purpose, so as to give place to that other element of unreason, which pushes you along and is impetuous beyond all measure.

Now when you face things in this fashion, what man can inspire fear in you any longer? For what has one human being about him that is calculated to inspire fear in another human being, in either his appearance, or conversation, or intercourse in general, any more than one horse, or dog, or bee inspires fear in another horse, or dog, or bee? Nay, it is things that inspire man with fear; and when one person is able to secure them for another, or to take them away, then he becomes capable of inspiring fear.

How, then, is a citadel destroyed? Not by iron, nor by fire, but by judgements. For if we capture the citadel in the city, have we captured the citadel of fever also, have we captured that of pretty wenches also, in a word, the acropolis within us, and have we cast out the tyrants within us, whom we have lording it over each of us every day, sometimes the same tyrants, and sometimes others? But here is where we must begin, and it is from this side that we must seize the acropolis and cast out the tyrants; we must yield up the paltry body, its members, the faculties, property, reputation, offices, honours, children, brothers, friends-count all these things as alien to us. And if the tyrants he thrown out of the spot, why should I any longer raze the fortifications of the citadel, on my own account, at least? For what harm does it do me by standing? Why should I go on and throw out the tyrant's bodyguard? For where do I feel them? Their rods, their spears, and their swords they are directing against others. But I have never been hindered in the exercise of my will, nor have I ever been subjected to compulsion against my will. And how is this possible? I have submitted my freedom of choice unto God. He wills that I shall have fever; it is my will too. He wills that I should choose something; it is my will too. He wills that I should desire something; it is my will too. He wills that I should get something; it is my wish too. He does not will it; I do not wish it. Therefore, it is my will to die; therefore, it is my will to be tortured on the rack. Who can hinder me any longer against my own views, or put compulsion upon me? That is no more possible in my case than it would be with Zeus.

This is the way also with the more cautious among travellers. A man has heard that the road which he is taking is infested with robbers; he does not venture to set forth alone, but he waits for a company, either that of an ambassador, or of a quaestor, or of a proconsul, and when he has attached himself to them he travels along the road in safety. So in this world the wise man acts. Says he to himself: "There are many robber-bands, tyrants, storms, difficulties, losses of what is most dear. Where shall a man flee for refuge? How shall he travel secure against robbery? What company shall he wait for that he may pass through in safety? To whom shall he attach himself? To So-and-so, the rich man, or the proconsul? And what is the good of that? He himself is stripped, groans, sorrows. Yes, and what if my fellow-traveller himself turn upon me and rob me? What shall I do? I will become a friend of Caesar; no one will wrong me if I am a companion of his. But, in the first place, the number of things I must suffer and endure in order to become his friend! and the number of times. and the number of persons by whom I must first be robbed! And then, even if I do become his friend, he too is mortal. And if some circumstance lead him to become my enemy, where indeed had I better retire? To a wilderness? What, does not fever go there? What, then, is to become of me? Is it impossible to find a fellow-traveller who is safe, faithful, strong, free from the suspicion of treachery?" Thus he reflects and comes to the thought that, if he attach himself to God, he will pass through the world in safety.

How do you mean "attach himself"?---Why, so that whatever God wills, he also wills, and whatever God does not will, this he also does not will.-How, then, can this be done?---Why, how else than by observing the choices of God and His governance? What has He given me for my own and subject to my authority, and what has He left for Himself? Everything within the sphere of the moral purpose He has given me, subjected them to my control, unhampered and unhindered. My body that is made of clay, how could He make that unhindered? Accordingly He has made it subject to the revolution of the universe-my property, my furniture, my house, my children, my wife. Why, then, shall I strive against God? Why shall I will what is not in the province of the will, to keep under all circumstances what has not been given me outright? But how should I keep them? In accordance with the terms upon which they have been given, and for as long as they can be given. But He who gave also takes away [As Job 1:21: "The Lord gave, and the Lord hath taken away."]. Why, then, shall I resist? I do not say that I shall be a fool for trying to use force upon one who is stronger than I am, but before that I shall be wicked. For where did I get these things when I came into the world? My father gave them to me. And who gave them to him? Who has made the sun, who the fruits, who the seasons, who the union and fellowship of men one with another?

And so, when you have received everything, and your very self, from Another, do you yet complain and blame the Giver, if He take something away from you? Who are you, and for what purpose have you come? Did not He bring you into the world? Did not He show you the light? Did not He give you fellow-workers? Did not He give you senses also and reason? And as what did He bring you into the world? Was it not as a mortal being? Was it not as one destined to live upon earth with a little portion of paltry flesh, and for a little while to be a spectator of His governance, and to join with Him in His pageant and holiday? Are you not willing, then, for so long as has been given you, to be a spectator of His pageant and His festival, and then when He leads you forth, to go, after you have made obeisance and returned thanks for what you have heard and seen? "No," you say, "but I wanted to go on with the holiday." Yes, and so do the initiates in the mysteries want to go on with the initiation, and no doubt the spectators at Olympia want to see still other athletes; but the festival has come to an end; leave, depart as a grateful and reverent spectator departs; make room for others; yet others must be born, even as you were born, and once born they must have land, and houses, and provisions. But if the first-comers do not move along, what is left for those who follow after? Why are you insatiate? Why never satisfied? Why do you crowd the world?

Yes, but I want my little children and my wife to be with me.-Are they yours? Do they not belong to Him who gave them? To Him who made your Will you not, therefore, give up what is not your own? Will you not yield to your superior?-Why, then, did He bring me into the world on these conditions?-And if they do not suit you, leave; God has no need of a fault-finding spectator. He needs those who join in the holiday and the dance, that they may applaud rather, and glorify, and sing hymns of praise about the festival. But the peevish and the cowardly He will not be distressed to see left out of the festival; for when they were present they did not act as though they were on a holiday, nor did they fill the proper rôle; but they were distressed, found fault with the Deity, with fate, and with the company; insensible to what had been vouchsafed them, and to their own powers which they had received for the very opposite use-high-mindedness, nobility of character, courage, and the very freedom for which we are now seeking .-- For what purpose, then, did I receive these gifts?-To use them.-How long?-For as long as He who lent them to you wills.-But what if they are necessary to me?-Do not set your heart upon them, and they will not be necessary to you. Do not say to yourself that they are necessary, and they will not be.

This is what you ought to practise from morning till evening. Begin with the most trilling things, the ones most exposed to injury, like a pot, or a cup, and then advance to a tunic, a paltry dog, a mere horse, a bit of land; thence to yourself, your body, and its members, your children, wife, brothers. Look about on every side and cast these things away from you. Purify your judgements, for fear lest something of what is not your own may be fastened to them, or grown together with them, and may give you pain when it is torn loose. And every day while you are training yourself, as you do in the gymnasium, do not say that you are "pursuing philosophy" (indeed an arrogant phrase!), but that you are a slave presenting your emancipator in court; for this is the true freedom. This is the way in which Diogenes was set free by Antisthenes, and afterwards said that he could never be enslaved again by any man. How, in consequence, did he behave when he was captured! How he treated the pirates! He called none of them master, did he? And I am not referring to the name! it is not the word that I fear, but the emotion, which produces the word. How he censures them because they gave bad food to their captives! How he behaved when he was sold! Did he look for a master? No, but for a slave. And how he behaved toward his master after he had been sold! He began immediately to argue with him, telling him that he ought not to dress that way, or have his hair cut that way, and about his sons, how they ought to live. And what is there strange about that? Why, if he had bought a gymnastic trainer, would he have employed him as a servant, or as a master, in the exercises of the palaestra? And if he had bought a physician, or a master-builder, the same would have been true. And thus in every subject-matter, it is quite unavoidable that the man of skill should be superior to the man without skill. In general, therefore, whoever possesses the science of how to live, how can he help but be the master? For who is master in a ship?-The helmsman.-Why? Because the man who disobeys him is punished .- But my master is able to give me a sound flogging.-He cannot do so with impunity, can he?-So I thought.-But because he cannot do so with impunity, therefore he has no authority to do it; no man can do wrong with impunity.-And what is the punishment that befalls the man who has put his own slave in chains, when he felt like it?-The putting of him in chains; this is something which you will admit yourself, if you wish to maintain the proposition that man is not a wild beast but a tame animal. For when is a vine faring badly? When it is acting contrary to its own nature. When is a cock faring badly? Under the same conditions. So also man. What, then, is his nature? To bite, and kick, and throw into prison, and behead? No, but to do good, to work together, and to pray for the success of others. Therefore, he is faring badly, whether you will or no, when he acts unfeelingly.

You imply, then, that Socrates did not fare badly?-He did not; it was his judges and accusers who fared badly .--- Nor Helvidius at Rome?-No, but the man who put him to death.-How so?-Just as you too do not say that the cock which has won a victory, even though he be severely cut up, has fared badly, but rather the one who has been beaten without suffering a blow. Nor do you call a dog happy when he is neither in pursuit nor toiling hard, but when you see him sweating, suffering, bursting from the chase. What is there paradoxical in the statement, if we say that everything's evil is what is contrary to its own nature? Is that paradoxical? Do you not say it yourself in the case of everything else? Why, then, do you take a different course in the case of man alone? But our statement that the nature of man is gentle, and affectionate, and faithful, is this not paradoxical?-No, that is not paradoxical, either.-How, then, does it come about that he suffers no harm, even though he is soundly flogged, or imprisoned, or beheaded? Is it not thus-if he bears it all in a noble spirit, and comes off with increased profit and advantage, while the other man is the one who suffers harm, the man who is subjected to the most pitiful and disgraceful experience, who becomes a wolf, or a snake, or a wasp, instead of a human being?

Come, now, and let us review the points on which we have reached agreement. The unhampered man, who finds things ready to hand as he wants them, is free. But the man who can be hampered, or subjected to compulsion, or hindered, or thrown into something against his will, is a slave. And who is unhampered? The man who fixes his aim on nothing that is not his own. And what are the things which are not our own? All that are not under our control, either to have, or not to have, or to have of a certain quality, or under certain conditions. Therefore, the body is not our own, its members are not our own, property is not our own. If, then, you conceive a strong passion for some one of these things, as though it were your immediate possession, you will be punished as he should be who fixes his aim upon what is not his own. This is the road which leads to freedom, this is the only surcease of slavery, to be able to say at any time with your whole heart.

Lead thou me on, O Zeus, and Destiny,

To that goal long ago to me assigned.

But what say you, philosopher? The tyrant calls upon you to say something that is unworthy of you. Do you say it, or not say it? Tell me.—Let me think about it.—Think about it now? But what were you thinking about when you were attending lectures? Did you not study the questions, what things are good, and what bad, and what are neither good

nor bad?-I did.-What conclusions were approved, then, by you and your fellows?-That things righteous and excellent were good, things unrighteous and disgraceful bad.-Life is not a good thing, is it?-No.-Nor death a bad thing? --- No.--- Nor imprisonment?--- No.--- But ignoble speech and faithless, and betrayal of a friend, and flattery of a tyrant, what did you and your fellows think of these?---We thought them evil.-What then? You are not thinking about the question now, nor have you thought about it and considered it hitherto. Why, what kind of inquiry is it, to raise the question whether it is fitting, when it is in my power to get for myself the greatest goods, not to get for myself the greatest evils! A fine and necessary question, forsooth, that requires a great deal of deliberation. Why are you making fun of us, man? Such an inquiry is never made. Besides, if you had honestly imagined that disgraceful things were bad, and all else indifferent, you would never have approached this inquiry, no, nor anything near it; but you would have been able to settle the question on the spot, by intuition, just as in a case involving sight. Why, when do you stop to "think about it," if the question is, Are black things white, or, Are heavy things light? Do you not follow the clear evidence of your senses? How comes it, then, that now you say you are thinking it over, whether things indifferent are more to be avoided than things bad? But you do not have these judgements; on the contrary, imprisonment and death do not appear to you to be indifferent, but rather the greatest evils, and dishonourable words and deeds are not bad in your sight, but rather things that do not concern us. For that is the habit which you developed from the start. "Where am I?" you say. "In school. And who are listening to me? I am talking in the company of philosophers. But now I have left the school; away with those sayings of pedants and fools!" That is how a friend is condemned on the testimony of a philosopher, that is how a philosopher turns parasite, that is how he hires himself out for money, that is how at a meeting of the senate a man does not say what he thinks, while within his breast his judgement shouts loudly, no cold and miserable remnant suspended from idle argumentations as by a hair, but a strong and serviceable judgement, and familiar with its business by having been trained in action. Watch yourself, and see how you take the word-I do not say the word that your child is dead; how could you possibly bear that?---but the word that your oil is spilled, or your wine drunk up. Well might someone stand over you, when you are in this excited condition, and say simply, "Philosopher, you talk differently in the school; why are you deceiving us? Why, when you are a worm, do you claim that you are a man?" I should like to stand over one of these philosophers when he is engaged in sexual intercourse, so as to see how he exerts himself, what manner of words he utters, whether he remembers his own name, or the arguments that he hears, or repeats, or reads!

And what has all this to do with freedom?-Nay, nothing but all this has to do with freedom, whether you rich people so wish or not — And what is your witness to this?—Why what else but you yourselves who have this mighty master, and live at his nod and gesture, who faint away if he but look at one of you with a scowl on his face, paying court to the old women and the old men, and saying, "I cannot do this; I am not allowed"? Why are you not allowed? Were you not just now arguing with me and claiming that you were free? "But Aprulla has prevented me." Tell the truth, then, slave, and do not run away from your masters, nor make denial, nor dare to present your emancipator, when you have so many proofs to convict you of slavery. And, indeed, when a man out of passionate love is under the compulsion to do something contrary to his opinion, all the time seeing the better thing but lacking the strength to follow, one might be all the more inclined to regard him as deserving pity, because he is in the grip of something violent, and, in a manner of speaking, divine. But who could endure you with your passion for old women and old men, wiping the noses and washing the faces of old women, corrupting them with presents, and all the while you are nursing them, like a slave, in some illness, praying for them to die, and asking the physicians if they are finally on their deathbed? Or again, when for the sake of these mighty and dignified offices and honours you kiss the hands of other men's slaves, so as to be the slave of men who are not even free? And then, God save the mark, you walk around in your dignity as a praetor or a consul! Do I not know how you came to be praetor, how you got your consulship, who gave it to you? As for me. I should not care even to live, if I had to owe my life to Felicio, putting up with his insolence and slavish arrogance; for I know what a slave is, who is prosperous as the world goes, and puffed up with pride.

Are you, then, free, says someone?—By the gods I wish to be, and pray to be, but I am not yet able to look into the face of my masters, I still honour my paltry body, I take great pains to keep it sound, although it is not sound in any case. But I can show you a free man, so that you will never again have to look for an example, Diogenes was free. How did that come? It was not because he was born of free parents, for he was not, but because he himself was free, because he had cast off all the handles of slavery, and there was no way in which a

person could get close and lay hold of him to enslave him. Everything he had was easily loosed, everything was merely tied on. If you had laid hold of his property, he would have let it go rather than followed you for its sake; if you had laid hold of his leg, he would have let his leg go; if of his whole paltry body, his whole paltry body; and so also his kindred, friends, and country. He knew the source from which he had received them, and from whom, and upon what conditions. His true ancestors, indeed, the gods, and his real Country he would never have abandoned, nor would he have suffered another to yield them more obedience and submission, nor could any other man have died more cheerfully for his Country. For it was never his wont to seek to appear to do anything in behalf of the Universe, but he bore in mind that everything which has come into being has its source there, and is done on behalf of that Country, and is entrusted to us by Him who governs it. Therefore, see what he himself says and writes: "For this reason," he says, "you are permitted, O Diogenes, to converse as you please with the king of the Persians and with Archidamus, the king of the Lacedaemonians." Was it, indeed, because he was born of free parents? No doubt it was because they were all the children of slaves that the Athenians, and Lacedaemonians, and Corinthians were unable to converse with these monarchs as they pleased, but were afraid of them and paid court to them! Why, then, someone asks, are you permitted? "Because I do not regard my paltry body as my own; because I need nothing; because the law, and nothing else, is everything to me." This it was which allowed him to be a free man.

And that you may not think I am showing you an example of a man who was solitary, and had neither wife, nor children, nor country, nor friends, nor kinsmen, who might have bent him and diverted him from his purpose, take Socrates and observe a man who had a wife and little children, but regarded them as not his own, who had a country, as far as it was his duty, and in the way in which it was his duty, and friends, and kinsmen, one and all subject to the law and to obedience to the law. That is why, when it was his duty to serve as a soldier, he was the first to leave home, and ran the risks of battle most ungrudgingly; and when he was sent by the Tyrants to fetch Leon, because he regarded it as disgraceful, he never deliberated about the matter at all, although he knew that he would have to die, if it so chanced. And what difference did it make to him? For there was something else that he wished to preserve; not his paltry flesh, but the man of honour, the man of reverence, that he was. These are things which are not to be entrusted to another, not to be made subject. Later on when he had to speak in defence of his life, he did not behave as one who had children, or a wife, did he? Nay, but as one who was alone in the world. Yes, and when he had to drink the poison, how does he act? When he might have saved his life, and when Crito said to him, "Leave the prison for the sake of your children," what is his reply? Did he think it a bit of good luck? Impossible! No, he regards what is fitting, and as for other considerations, he does not so much as look at or consider them. For he did not care, he says, to save his paltry body, but only that which is increased and preserved by right conduct, and is diminished and destroyed by evil conduct. Socrates does not save his life with dishonour, the man who refused to put the vote when the Athenians demanded it of him, the man who despised the Tyrants, the man who held such noble discourse about virtue and moral excellence; this man it is impossible to save by dishonour, but he is saved by death, and not by flight. Yes, and the good actor, too, is saved when he stops at the right time, rather than the one who acts out of season. What, then, will the children do? "If I had gone to Thessaly, you would have looked after them; but when I have gone down to the house of Hades, will there be no one to look after them?" See how he calls death soft names, and jests at it. But if it had been you or I, we should forthwith have fallen into the philosophic vein, and said, "One ought to repay evil-doers in kind," and added, "If I save my life I shall be useful to many persons, but if I die I shall be useful to no one"; yes, indeed, and if we had had to crawl out through a hole to escape, we should have done so! And how should we have been of use to anybody? For where could we have been of use, if the others still remained in Athens? Or if we were useful to men by living, should we not have done much more good to men by dying when we ought, and as we ought? And now that Socrates is dead the memory of him is no less useful to men, nay, is perhaps even more useful, than what he did or said while he still lived.

Study these things, these judgements, these arguments, look at these examples, if you wish to be free, if you desire the thing itself in proportion to its value. And what wonder is there if you buy something so great at the price of things so many and so great? For the sake of what is called freedom some men hang themselves, others leap over precipices, sometimes whole cities perish; for true freedom, which cannot be plotted against and is secure, will you not yield up to God, at His demand, what He has given? Will you not, as Plato says, study not merely to die, but even to be tortured on the rack, and to go into exile, and to be severely flogged, and, in a word, to give up everything that is not your own? If not, you will be a slave among slaves; even if you are consul ten thousand times, even if you go up to the Palace—a slave none the less; and you will perceive that, as Cleanthes used to say, "Possibly the philosophers say what is contrary to opinion, but assuredly not what is contrary to reason." For you will learn by experience that what they say is true, and that none of these things which are admired and sought after are of any good to those who attain them; while those who have not yet attained them get an impression that, if once these things come to them. they will be possessed of all things good, and then, when they do come, the burning heat is just as bad, there is the same tossing about on the sea, the same sense of surfeit, the same desire for what they do not have. For freedom is not acquired by satisfying yourself with what you desire, but by destroying your desire. And that you may learn the truth of all this, as you have toiled for those other things, so also transfer your toil to these; keep vigils for the sake of acquiring a judgement which will make you free, devote yourself to a philosopher instead of to a rich old man, be seen about his doors; it will be no disgrace to be so seen, you will not retire thence empty and without profit, if you approach him in the right fashion. Anyway, try it at least: there is no disgrace in making the attempt.

EPICTETUS CHAPTER 2 - Of Social Intercourse

To this topic you ought to devote yourself before every other, how, namely, you may avoid ever being so intimately associated with some one of your acquaintances or friends as to descend to the same level with him: otherwise you will ruin yourself. But if there slips into your mind the thought, "He will think me unmannerly and will not be as friendly as he used to be," remember that nothing is done without paying for it, and that it is impossible for a man to remain the same person that he used to be, if he does not do the same things. Choose, therefore, which you prefer; either to be loved just as much as you used to be by the same persons, remaining like your former self, or else, by being superior to your former self, to lose the same affection. Because if this latter alternative is the better choice, turn forthwith in that direction, and let not the other considerations draw you away; for no man is able to make progress when he is facing both ways. But if you have preferred this course to every other, if you wish to devote yourself to this alone, and labour to perfect it, give up everything else. Otherwise this facing both ways will bring about a double result: You will neither make progress as you ought, nor will you get what you used to get before. For before, when you frankly aimed at nothing worth while, you made a pleasant companion. You cannot achieve distinction along both lines, but you must needs fall short in the one to the degree in which you take part in the other. If you do not drink with those you used to drink with, you cannot in their eyes be as pleasant a companion as you used to be; choose, therefore, whether you wish to be a hard drinker and pleasant to those persons, or a sober man and unpleasant. If you do not sing with those you used to sing with, you cannot be loved by them as you used to be; choose, therefore, here also, which you wish. For if it is better to be a man of respectful and modest behaviour than for someone to say of you, "He is a pleasant fellow," give up all other considerations, renounce them, turn your back upon them, have nothing to do with them. But if that does not please you, turn about, the whole of you, to the opposite: become one of the addicts to unnatural vice, one of the adulterers, and act in the corresponding fashion, and you will get what you wish. Yes, and jump up and shout your applause to the dancer. But different characters do not mix in this fashion; you cannot act the part of Thersites and that of Agamemnon too. If you wish to be a Thersites, you ought to be humpbacked and bald; if an Agamemnon, you ought to be tall and handsome. and to love those who have been made subject to you.

EPICTETUS CHAPTER 3 - What Things Should Be Exchanged For What Things?

Here is a thought to keep ready at hand whenever you lose some external thing: What are you acquiring in its place? and if this be more valuable than the other, never say, "I have suffered a loss." You have lost nothing if you get a horse for an ass, an ox for a sheep, a noble action for a small piece of money, the proper kind of peace for futile discourse, and selfrespect for smutty talk. If you bear this in mind you will everywhere maintain your character as it ought to be. If not, I would have you observe that your time is being spent to no purpose, and all the pains you are now taking with yourself you are sure to spill out utterly and upset. Little is needed to ruin and upset everything, only a slight aberration from reason. For the helmsman to upset his ship he does not need the same amount of preparation that he does to keep it safe; but if he heads it a little too much into the wind he is lost ves even if he does nothing by his own deliberate choice, but merely falls to thinking about something else for a moment, he is lost. In life also it is very much the same; if you doze but for a moment, all that you have amassed hither to is gone. Pay attention, therefore, to your sense-impressions, and watch over them sleeplessly. For it is no small matter that you are

guarding, but self-respect, and fidelity, and constancy, a state of mind undisturbed by passion, pain, fear, or confusion-in a word, freedom. What are the things for which you are about to sell these things? Look, how valuable are they?-But, you say, I shall not get anything of that kind in return for what I am giving up.-Observe also, when you do get something in the exchange, just what it is you are getting for what you give up. "I have a modest behaviour, he has a tribuneship; he has a praetorship. I have self-respect. But I do not shout where it is unseemly; I shall not stand up where I ought not; for I am a free man and a friend of God, so as to obey Him of my own free will. No other thing ought I to claim, not body, or property, or office, or reputation-nothing, in short; nor does He wish me to claim them. Had He so desired He would have made them good for me. But as it is. He has not so made them; therefore I cannot transgress any of His commands." Guard your own good in everything you do; and for the rest be content to take simply what has been given you, in so far as you can make a rational use of it. If you do not, you will have bad luck and no good luck, you will be hampered and hindered. These are the laws that have been sent you from God, these are His ordinances; it is of these you ought to become an interpreter, to these you ought to subject yourself, not the laws of Masurius and Cassius [Two distinguished jurists of the first half of the first century AD.].

EPICTETUS CHAPTER 4 - To Those Who Have Set Their Hearts Upon Living In Peace

Remember that it is not merely desire for office and wealth which makes men abject and subservient to others, but desire also for peace, and leisure, and travel, and scholarship. For it makes no difference what the external object be, the value you set upon it makes you subservient to another. What difference, then, does it make for you to set your heart on the senate, or on not becoming a senator? What difference does it make to desire office or to desire not to hold office? What difference does it make to say, "I am in a bad way, I have nothing to do, but am tied to my books as though I were a corpse," or to say, "I am in a bad way, I have no leisure to read"? For just as salutations and office-holding are among things external and those which lie outside the province of the moral purpose, so also is a book. Or for what purpose do you wish to read? Tell me. If you turn to reading merely for entertainment, or in order to learn something, you are futile and lazy. But if you refer reading to the proper standard, what else is this but a life of serenity? However, if reading does not secure for you a life of serenity, of what good is it?-Nay, it does secure me serenity, one says, and that is why I am discontented because I am deprived of it.--And what kind of serenity is this which any chance comer can impede, not merely Caesar, or a friend of Caesar, but a crow, a flutist, fever, thirty thousand other things? But no feature of serenity is so characteristic as continuity and freedom from hindrance.

At this instant I am being called to do something; at this instant I shall go home with the purpose of observing the due measure which I ought to maintain, acting with self-respect, with security, apart from desire and avoidance of things external; and in the second place I observe men, what they say, how they move, and this in no malignant spirit, nor in order to have something to censure or ridicule, but I look at myself the while, to see if I too am making the same mistakes. "How, then, shall I cease to make mistakes?" There was a time when I too made mistakes, but now no longer, thanks be to God...

Come, if you have acted like this and devoted yourself to these things, have you done anything worse than reading a thousand lines, or writing a thousand? For when you eat, are you annoyed because you are not reading? Are you not satisfied to be eating in accordance with the principles you learned by reading? And when you bathe and take exercise? Why, then, are you not consistent in everything, both when you approach Caesar, and when you approach So-and-so? If you are maintaining the character of a man of tranquillity, of imperturbability, of sedateness, if you are observing what happens rather than being yourself observed, if you are not envying those who are preferred in honour above you, if the mere subject-matter of actions does not dazzle you, what do you lack? Books? How, or for what end? What, is not the reading of books a kind of preparation for the act of living? But the full measure of the act of living is made up of things other than books. It is as though the athlete on entering the stadium were to fall a-wailing because he is not exercising outside. This was what you exercised for, this is the purpose of your jumping-weights, your wrestler's sand, your young training partners. And are you now asking for these things, when the time for action is come? It is as if, when in the sphere of assent we were surrounded with sense-impressions, some of them convincing, and others not convincing, we should not wish to distinguish between them, but to read a treatise On Comprehension!

What, then, is the reason for this? It is because we have never read for this purpose, we have never written for this purpose—in our actions, to treat in accordance with nature the sense-impressions which come to us; but we stop with having learned what is said, and with the ability to explain it

examining the hypothetical argument. That is why, where our heart is set, there also our impediment lies. Do you wish at any cost to have the things that are not under your control? Very well then, be hindered, be obstructed, fail. If we should read a treatise On Choice, not in order to know about the subject, but in order to make correct choices: a treatise On Desire and Aversion, in order that we may never fail in our desire nor fall into that which we are trying to avoid; a treatise On Duty, in order that we may remember our relations in society and do nothing irrationally or contrary to the principles of duty; we should not be vexed by being hindered in regard to what we have read, but we should find satisfaction in doing the deeds required by our mutual relations, and we should be reckoning, not the things which we have been accustomed hitherto to reckon: "To-day I have read so many lines, I have written so many," but, "To-day I made a choice in the way that the philosophers teach, I did not entertain desire, I avoided only those things that are in the sphere of the moral purpose, I was not overawed by So-and-so, I was not put out of countenance by So-and-so, I exercised my patience, my abstinence, my co-operation," and thus we should be giving thanks to God for those things for which we ought to give Him thanks. But as it is, we do not realise that we ourselves, though in a different fashion, grow like the multitude. Another man is afraid that he will not have an office; you are afraid that you will. Do not so, man! But just as you laugh at the man who is afraid he will not have an office, so also laugh at yourself. For it makes no difference whether a person is thirsty with fever, or is afraid of water like a man with the rabies. Or how can you any longer say with Socrates, "If so it please God, so be it"? Do you suppose that, if Socrates had yearned to spend his leisure in the Lyceum or the Academy, and to converse daily with the young men, he would have gone forth cheerfully on all the military expeditions in which he served? Would he not have wailed and groaned, "Wretched man that I am I here I am now in misery and misfortune, when I might be sunning myself in the Lyceum"? What, was this your function in life, to sun yourself? Was it not rather to be serene, to be unhampered, to be unhindered? And how would he have been Socrates any longer, if he had wailed like this? How would he have gone on to write paeans in prison?

to someone else, and with analysing the syllogism, and

In a word, then, remember this-that if you are going to honour anything at all outside the sphere of the moral purpose, you have destroyed your moral purpose. And outside the sphere of your moral purpose lie not merely office, but also freedom from office: not merely business, but also leisure "Am I now, therefore, to pass my life in this turmoil?" What do you mean by "turmoil"? Among many people? And what is there hard about that? Imagine that you are in Olympia, regard the turmoil as a festival. There, too, one man shouts this and another that; one man does this and another that; one man jostles another; there is a crowd in the baths. And yet who of us does not take delight in the Olympic festival and leave it with sorrow? Do not become peevish or fastidious towards events. "The vinegar is rotten, for it is sour." "The honey is rotten, for it upsets my digestion." "I don't like vegetables." In the same fashion you say, "I do not like leisure, it is a solitude." "I do not like a crowd, it is turmoil." Say not so, but if circumstances bring you to spend your life alone or in the company of a few, call it peace, and utilize the condition for its proper end; converse with yourself, exercise your sense-impressions, develop your preconceptions. If, however, you fall in with a crowd, call it games, a festival, a holiday, try to keep holiday with the people. For what is pleasanter to a man who loves his fellow-men than the sight of large numbers of them? We are glad to see herds of horses or cattle; when we see many ships we are delighted; is a person annoyed at the sight of many human beings? "Yes, but they deafen me with their shouting." Oh, well, it is your hearing that is interfered with! What, then, is that to you? Your faculty of employing external impressions is not interfered with, is it? And who prevents you from making natural use of desire and aversion, of choice and refusal? What manner of turmoil avails to do that?

Do but keep in remembrance your general principles: "What is mine? What is not mine? What has been given me? What does God will that I do now, what does He not will?" A little while ago it was His will for you to be at leisure, to converse with yourself, to write about these things, to read, to listen, to prepare yourself; you had time sufficient for that. Now, God says to you, "Come at length to the contest, show us what you have learned, how you have trained yourself. How long will you exercise alone? Now the time has come for you to discover whether you are one of the athletes who deserve victory, or belong to the number of those who travel about the world and are everywhere defeated." Why, then, are you discontented? No contest is held without turmoil. There must be many training-partners, many to shout applause, many officials, many spectators .- But I wanted to live a life of peace.-Wail, then, and groan, as you deserve to do. For what greater penalty can befall the man who is uninstructed and disobedient to the divine injunctions than to grieve, to sorrow, to envy, in a word to have no good fortune but only misfortune? Do you not wish to free yourself from all this?

And how shall I free myself?—Have you not heard over and over again that you ought to eradicate desire utterly, direct your aversion towards the things that lie within the sphere of the moral purpose, and these things only, that you ought to give up everything, your body, your property, your reputation, your books, turmoil, office, freedom from office? For if once you swerve aside from this course, you are a slave, you are a subject, you have become liable to hindrance and to compulsion, you are entirely under the control of others. Nay, the word of Cleanthes is ready at hand,

Lead thou me on, O Zeus, and Destiny,

Will ye have me go to Rome? I go to Rome. To Gyara? I go to Gyara. To Athens? I go to Athens. To prison? I go to prison. If but once you say, "Oh, when may a man go to Athens?" you are lost. This wish, if unfulfilled, must necessarily make you unfortunate; if fulfilled, vain and puffed up over the wrong kind of thing; again, if you are hindered, you suffer a misfortune, falling into what you do not wish. Give up, then, all these things. "Athens is beautiful." But happiness is much more beautiful, tranquillity, freedom from turmoil, having your own affairs under no man's control. "There is turmoil in Rome, and salutations." But serenity is worth all the annoyances. If, then, the time for these things has come, why not get rid of your aversion for them: Why must you needs bear burdens like a belaboured donkey? Otherwise, I would have you see that you must be ever the slave of the man who is able to secure your release, to the man who is able to hinder you in everything, and you must serve him as an Evil Genius.

There is but one way to serenity (keep this thought ready for use at dawn, and by day, and at night), and that is to yield up all claim to the things that lie outside the sphere of the moral purpose, to regard nothing as your own possession; to surrender everything to the Deity, to Fortune; to yield everything to the supervision of those persons whom even Zeus has made supervisors; and to devote yourself to one thing only, that which is your own, that which is free from hindrance, and to read referring your reading to this end, and so to write and so to listen. That is why I cannot call a man industrious, if I hear merely that he reads or writes, and even if one adds that he sits up all night, I cannot yet say that the man is industrious, until I know for what end he does so. For neither do you call a man industrious who loses sleep for the sake of a wench; no more do I. But if he acts this way for the sake of reputation, I call him ambitious; if for the sake of money L call him fond of money not fond of toil. If however the end for which he toils is his own governing principle, to have it be, and live continually, in accordance with nature, then and then only I call him industrious. For I would not have you men ever either praise or blame a man for things that may be either good or bad, but only for judgements. Because these are each man's own possessions, which make his actions either base or noble. Bearing all this in mind, rejoice in what you have and be satisfied with what the moment brings. If you see any of the things that you have learned and studied thoroughly coming to fruition for you in action, rejoice in these things. If you have put away or reduced a malignant disposition, and reviling, or impertinence, or foul language, or recklessness, or negligence; if you are not moved by the things that once moved you, or at least not to the same degree. then you can keep festival day after day; to-day because you behaved well in this action, to-morrow because you behaved well in another. How much greater cause for thanksgiving is this than a consulship or a governorship! these things come to you from your own self and from the gods. Remember who the Giver is, and to whom He gives, and for what end. If you are brought up in reasonings such as these, can you any longer raise the questions where you are going to be happy, and where you will please God? Are not men everywhere equally distant from God? Do they not everywhere have the same view of what comes to pass?

EPICTETUS CHAPTER 5 - Against The Contentious And Brutal

The good and excellent man neither contends with anyone, nor, as far as he has the power, does he allow others to contend. We have an example before us of this also, as well as of everything else, in the life of Socrates, who did not merely himself avoid contention upon every occasion, but tried to prevent others as well from contending. See in Xenophon's Symposium how many contentions he has resolved, and again how patient he was with Thrasymachus, Polus, and Callicles, and habitually so with his wife, and also with his son when the latter tried to confute him with sophistical arguments. For Socrates bore very firmly in mind that no one is master over another's governing principle. He willed, accordingly, nothing but what was his own And what is that? [Not to try to make other people act] in accordance with nature, for that does not belong to one; but, while they are attending to their own business as they think best, himself none the less to be and to remain in a state of harmony with nature, attending only to his own business, to the end that they also may be in

harmony with nature. For this is the object which the good and excellent man has ever before him. To become praetor? No; but if this be given him, to maintain his own governing principle in these circumstances. To marry? No; but if marriage be given him, to maintain himself as one who in these circumstances is in harmony with nature. But if he wills that his son or his wife make no mistake, he wills that what is not his own should cease to be not his own. And to be getting an education means this: To be learning what is your own, and what is not your own.

Where, then, is there any longer room for contention, if a man is in such a state? Why, he is not filled with wonder at anything that happens, is he? Does anything seem strange to him? Does he not expect worse and harsher treatment from the wicked than actually befalls him? Does he not count it as gain whenever they fail to go to the limit? "So-and-so reviled you." I am greatly obliged to him for not striking me. "Yes, but he struck you too." I am greatly obliged to him for not wounding me. "Yes, but he wounded you too," I am greatly obliged to him for not killing me. For when, or from what teacher, did he learn that man is a tame animal, that he manifests mutual affection, that injustice in itself is a great injury to the unjust man? If, therefore, he has never learned this, or become persuaded of this, why shall he not follow what appears to him to be his advantage? "My neighbour has thrown stones." You have not made a mistake, have you? "No, but my crockery is broken." Are you a piece of crockery, then? No, but you are moral purpose. What, then, has been given you with which to meet this attack? If you seek to act like a wolf, you can bite back and throw more stones than your neighbour did; but if you seek to act like a man, examine your store, see what faculties you brought with you into the world. You brought no faculty of brutality, did you? No faculty of bearing grudges, did you? When, then, is a horse miserable? When he is deprived of his natural faculties. Not when he can't sing "cuckoo!" but when he can't run. And a dog? Is it when he cannot fly? No, but when he cannot keep the scent. Does it not follow, then, that on the same principles a man is wretched, not when he is unable to choke lions, or throw his arms about statues (for no man has brought with him from nature into this world faculties for this), but when he has lost his kindness, and his faithfulness? This is the kind of person for whom "men should come together and mourn, because of all the evils into which he has come"; not, by Zeus, "the one who is born," or "the one who has died," but the man whose misfortune it has been while he still lives to lose what is his own; not his patrimony, his paltry farm, and paltry dwelling, and his tayern, and his poor slaves (for none of these things is a man's own possession, but they all belong to others, are subservient and subject, given by their masters now to one person and now to another); but the qualities which make him a human being, the imprints which he brought with him in his mind, such as we look for also upon coins, and, if we find them, we accept the coins, but if we do not find them, we throw the coins away. "Whose imprint does this sestertius bear? Trajan's? Give it to me. Nero's? Throw it out, it will not pass, it is rotten." [This reference is most obscure, for the coins of Nero still preserved are numerous and excellent, and there was a great systematic reform of coinage in 64 AD, which became "the most complete monetary system of ancient times" (Mattingly and Sydenham, The Roman Imperial Coinage (1923), 1, 138). After the death of Caligula, indeed. the senate ordered all his bronze coinage to be melted down (Dio, 60. 22, 3), but nothing of the sort is recorded, so far as I know, for Nero.] So also in the moral life. What imprint do his judgements bear? "He is gentle, generous, patient, affectionate." Give him to me, I accept him, I make this man a citizen, I accept him as a neighbour and a fellow-voyager. Only see that he does not have the imprint of Nero. Is he choleric, furious, querulous? "If he feels like it, he punches the heads of the people he meets." Why, then, did you call him a human being? For surely everything is not judged by its outward appearance only, is it? Why, if that is so, you will have to call the lump of beeswax an apple. No, it must have the smell of an apple and the taste of an apple; its external outline is not enough. Therefore, neither are the nose and the eyes sufficient to prove that one is a human being, but you must see whether one has the judgements that belong to a human being. Here is a man who does not listen to reason, he does not understand when he is confuted; he is an ass. Here is one whose sense of self-respect has grown numb; he is useless, a sheep, anything but a human being. Here is a man who is looking for someone whom he can kick or bite when he meets him; so that he is not even a sheep or an ass, but some wild beast

What then? Do you want me to be despised?—By whom? By men of understanding? And how will men of understanding despise the gentle and the self-respecting person? No, but by men without understanding? What difference is that to you? Neither you nor any other craftsman cares about those who are not skilled in his art.—Yes, but they will fasten themselves upon me all the more.—What do you mean by the word "me"? Can anyone hurt your moral purpose, or prevent you from employing in a natural way the sense-impressions which come to you?—No.—Why, then, are you any longer disturbed, and why do you want to show that you are a timid person? Why do you not come forth and make the announcement that you are at peace with all men, no matter what they do, and that you are especially amused at those who think that they are hurting you? "These slaves do not know either who I am, or where my good and my evil are; they cannot get at the things that are mine."

In this way also those who inhabit a strong city laugh at the besiegers: "Why are these men taking trouble now to no end? Our wall is safe, we have food for ever so long a time, and all other supplies." These are the things which make a city strong and secure against capture, and nothing but judgements make similarly secure the soul of man. For what manner of wall is so strong, or what manner of body so invincible, or what manner of possession so secure against theft, or what manner of reputation so unassailable? For all things everywhere are perishable, and easy to capture by assault, and the man who in any fashion sets his mind upon any of them must needs be troubled in mind, be discouraged, suffer fear and sorrow, have his desires fail, and his aversions fall into what they would avoid. If this be so, are we not willing to make secure the one means of safety which has been vouchsafed us? And are we not willing to give up these perishable and slavish things, and devote our labours to those which are imperishable and by nature free? And do we not remember that no man either hurts or helps another, but that it is his judgement about each of these things which is the thing that hurts him, that overturns him; this is contention, and civil strife, and war? That which made Eteocles and Polyneices what they were was nothing else but this-their judgement about a throne, and their judgement about exile, namely, that one was the greatest of evils, the other the greatest of goods. And this is the nature of every being, to pursue the good and to flee from the evil; and to consider the man who robs us of the one and invests us with the other as an enemy and an aggressor, even though he be a brother, even though he be a son, even though he be a father; for nothing is closer kin to us than our good. It follows, then, that if these externals are good or evil, neither is a father dear to his sons, nor a brother dear to a brother, but everything on all sides is full of enemies, aggressors, slanderers. But if the right kind of moral purpose and that alone is good, and if the wrong kind of moral purpose and that alone is bad, where is there any longer room for contention, where for reviling? About what? About the things that mean nothing to us? Against whom? Against the ignorant, against the unfortunate, against those who have been deceived in the most important values?

All this is what Socrates bore in mind as he managed his house, putting up with a shrewish wife and an unkindly son. For to what end was she shrewish? To the end that she might pour all the water she pleased over his head, and might trample underfoot the cake. Yet what is that to me, if I regard these things as meaning nothing to me? But this control over the moral purpose is my true business, and in it neither shall a tyrant hinder me against my will, nor the multitude the single individual, nor the stronger man the weaker; for this has been given by God to each man as something that cannot be hindered. These are the judgements which produce love in the household, concord in the State, peace among the nations, make a man thankful toward God, confident at all times, on the ground that he is dealing with things not his own, with worthless things. We, however, although we are capable of writing and reading these things, and praising them when read, are nowhere near capable of being persuaded of them. Wherefore, the proverb about the Lacedaemonians,

Lions at home, but at Ephesus foxes,

will fit us too: Lions in the school-room, foxes outside.

EPICTETUS CHAPTER 6 - To Those Who Are Vexed At Being Pitied

I am annoyed, says one, at being pitied .- Is it, then, some doing of yours that you are pitied, or the doing of those who show the pity? Or again; is it in your power to stop it?-It is, if I can show them that I do not deserve their pity.-And do you now possess the power of not being deserving of pity, or do you not possess it?-It seems to me, indeed, that I possess it. Yet these people do not pity me for what would deserve pity, if anything does, that is, my mistakes; but for poverty, and for not holding office, and for things like disease, and death, and the like.—Are you, then, prepared to convince the multitude that none of these things is bad, but that it is possible for a poor man, and one who holds no office or position of honour, to be happy; or are you prepared to show vourself off to them as a rich man and an official? Of these alternatives the second is the part of a braggart, and a tasteless and worthless person. Besides, observe the means by which you must achieve your pretence: You will have to borrow some paltry slaves; and possess a few pieces of silver plate, and exhibit these same pieces conspicuously and frequently, if you can, and try not to let people know that they are the same; and possess contemptible bright clothes, and all other kinds of finery, and show yourself off as the one who is honoured by the most distinguished persons; and try to

dine with them, or at least make people think that you dine with them; and resort to base arts in the treatment of your person, so as to appear more shapely and of gentler birth than you actually are. All these contrivances you must adopt, if you wish to take the way of the second alternative and avoid pity.

But the first way is ineffectual and tedious-to attempt the very thing which Zeus himself has been unable to accomplish, that is, to convince all men of what things are good, and what evil. Why, that has not been vouchsafed to you, has it? Nay, this only has been vouchsafed-to convince yourself. And you have not convinced yourself yet! And despite that, bless me! are you now trying to convince all other men? Yet who has been living with you so long as you have been living with yourself? And who is so gifted with powers of persuasion to convince you, as you are to convince yourself? Who is more kindly disposed and nearer to you than you are to yourself? How comes it, then, that you have not persuaded yourself to learn? Are not things now upside down? Is this what you have been in earnest about? Not to learn how to get rid of pain, and turmoil, and humiliation, and so become free? Have you not heard that there is but a single way which leads to this end. and that is to give up the things which lie outside the sphere of the moral purpose, and to abandon them, and to admit that they are not your own? To what class of things, then, does another's opinion about you belong?-To that which lies outside the sphere of the moral purpose.-And so it is nothing to you?-Nothing.-So long, then, as you are stung and disturbed by the opinions of others, do you still fancy that you have been persuaded as to things good and evil?

Will you not, then, let other men alone, and become your own disciple and your own teacher? "All other men shall see to it, whether it is profitable for them to be in a state out of accord with nature and so to live, but as for me no one is closer to myself than I am. What does it mean, then, that I have heard the words of the philosophers and assent to them. but that in actual fact my burdens have become no lighter? Can it be that I am so dull? And yet, indeed, in everything else that I have wanted I was not found to be unusually dull, but I learned my letters rapidly, and how to wrestle, and do my geometry, and analyse syllogisms. Can it be, then, that reason has not convinced me? Why, indeed, there is nothing to which I have so given my approval from the very first, or so preferred, and now I read about these matters, and hear them, and write about them. Down to this moment we have not found a stronger argument than this. What is it, then, that I yet lack? Can it be that the contrary judgements have not all been put away? Can it be that the thoughts themselves are unexercised and unaccustomed to face the facts and like old pieces of armour that have been stowed away, are covered with rust, and can no longer be fitted to me? Yet in wrestling, or in writing, or in reading, I am not satisfied with mere learning, but I turn over and over the arguments presented to me, and fashion new ones, and likewise syllogisms with equivocal premisses. However, the necessary principles, those which enable a man, if he sets forth from them, to get rid of grief, fear, passion, hindrance, and become free, these I do not exercise, nor do I take the practice that is appropriate for them. After all that, am I concerned with what everyone else will say about me, whether I shall appear important or happy in their eyes?

O miserable man. will you not see what you are saying about yourself? What sort of a person are you in your own What sort of a person in thinking, in desiring, in eves? avoiding; what sort of a person in choice, preparation, design, and the other activities of men? Yet you are concerned whether the rest of mankind pity you?-Yes, but I do not deserve to be pitied .- And so you are pained at that? And is the man who is pained worthy of pity?-Yes.-How, then, do you fail to deserve pity after all? By the very emotion which you feel concerning pity you make yourself worthy of pity. What, then, says Antisthenes? Have you never heard? "It is the lot of a king, O Cyrus, to do well, but to be ill spoken of." My head is perfectly sound and yet everybody thinks I have a headache. What do I care? I have no fever, and yet everybody sympathizes with me as though I had: "Poor fellow. you have had a fever for ever so long." I draw a long face too, "Yes, it truly is a long time that I have been in a bad and say. way." "What is going to happen, then?" As God will, I reply, and at the same time I smile quietly to myself at those who are pitying me.

What, then, prevents me from doing the same thing in my moral life also? I am poor, but I have a correct judgement about poverty. Why, then, am I concerned, if men pity me for my poverty? I do not hold office, while others do. But I have the right opinion about holding office and not holding it. Let those who pity me look to it, but as for myself, I am neither hungry, nor thirsty, nor cold, but from their own hunger and thirst they think I too am hungry and thirsty. What, then, am I to do for them? Shall I go about and make proclamation, and say, "Men, be not deceived, it is well with me. I take heed neither of poverty, nor lack of office, nor, in a word, anything else, but only correct judgements; these I possess free from hindrance, I have taken thought of nothing further"? And yet, what foolish talk is this? How do I any longer hold correct judgements when I am not satisfied with being the man that I am, but am excited about what other people think of me?

But others will get more than I do, and will be preferred in honour above me.-Well, and what is more reasonable than for those who have devoted themselves to something to have the advantage in that to which they have devoted themselves? They have devoted themselves to office, you to judgements; and they to wealth, you to dealing with your senseimpressions. See whether they have the advantage over you in what you have devoted yourself to, but they neglect; whether their assent is more in accord with natural standards, whether their desire is less likely to achieve its aim than is yours whether their aversion is less likely to fall into what it would avoid, whether in design, purpose, and choice they hit the mark better, whether they observe what becomes them as men. as sons, as parents, and then, in order, through all the other terms for the social relations. But if they hold office, will you not tell yourself the truth, which is. that you do nothing in order to get office, while they do everything, and that it is most unreasonable for the man who pays attention to something to come off with less than the man who neglects it?

Nay, but because I greatly concern myself with correct judgements, it is more reasonable for me to rule.-Yes, in what you greatly concern yourself with, that is, judgements; but in that with which other men have concerned themselves more greatly than you have, give place to them. It is as though, because you have correct judgements, you insisted that you ought in archery to hit the mark better than the archers, or to surpass the smiths at their trade. Drop, therefore, your earnestness about judgements, and concern yourself with the things which you wish to acquire, and then lament if you do not succeed, for you have a right to do that. But as it is, you claim to be intent upon other things, to care for other things, and there is wisdom in what common people say, "One serious business has no partnership with another." One man gets up at early dawn and looks for someone of the household of Caesar to salute, someone to whom he may make a pleasant speech, to whom he may send a present, how he may please the dancer, how he may gratify one person by maliciously disparaging another. When he prays, he prays for these objects, when he sacrifices, he sacrifices for these objects. The word of Pythagoras.

Also allow not sleep to draw nigh to your languorous eyelids,

he has wrested to apply here. "'Where did I go wrong-' in matters of flattery? 'What did I do?' Can it be that I acted as a free man, or as a man of noble character?" And if he find an instance of the sort, he censures and accuses himself: "Why, what business did you have to say that? For wasn't it possible to lie? Even the philosophers say that there is nothing to hinder one's telling a lie." But if in all truth you have concerned yourself greatly with nothing but the proper use of sense-impressions, then as soon as you get up in the morning bethink you, "What do I yet lack in order to achieve tranquillity? What to achieve calm? What am I? I am not a paltry body, not property, not reputation, am I? None of these. Well, what am I? A rational creature." What, then, are the demands upon you? Rehearse your actions. "'Where did I go wrong?' in matters conducive to serenity? 'What did I do' that was unfriendly, or unsocial, or unfeeling? 'What to be done was left undone' in regard to these matters?'

Since, therefore, there is so great a difference between the things which men desire, their deeds, and their prayers, do you still wish to be on an equal footing with them in matters to which you have not devoted yourself, but they have? And after all that, are you surprised if they pity you, and are you indignant? But they are not indignant if you pity them. And why? Because they are convinced that they are getting good things, while you are not so convinced in your own case. That is why you are not satisfied with what you have, but reach out for what they have. Because, if you had been truly convinced that, in the case of the things which are good, you are the one who is attaining them, while they have gone astray, you would not even have taken account of what they say about you.

EPICTETUS CHAPTER 7 - Of Freedom From Fear

What makes the tyrant an object of fear?-His guards, someone says, and their swords, and the chamberlain, and those who exclude persons who would enter.-Why, then, is it that, if you bring a child into the presence of the tyrant while he is with his guards, the child is not afraid? Is it because the child does not really feel the presence of the guards? If, then, a man really feels their presence, and that they have swords, but has come for that very purpose, for the reason that he wishes to die because of some misfortune, and he seeks to do so easily at the hand of another, he does not fear the guards, does he?—No, for what makes them terrible is just what he wants.-If, then, a man who has set his will neither upon dying nor upon living at any cost, but only as it is given him to live, comes into the presence of the tyrant, what is there to prevent such a man from coming into his presence without fear?-Nothing.-If, then, a man feel also about his property just as this other person feels about his

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3066 body, and so about his children, and his wife, and if, in brief, he be in such a frame of mind, due to some madness or despair, that he cares not one whit about having, or not having, these things; but, as children playing with potsherds strive with one another about the game, but take no thought about the potsherds themselves, so this man also has reckoned the material things of life as nothing, but is glad to play with them and handle them—what kind of tyrant, or guards, or swords in the hands of guards can any more inspire fear in the breast of such a man?

Therefore, if madness can produce this attitude of mind toward the things which have just been mentioned, and also habit, as with the Galilaeans [Obviously referring to the Roman Pauline Christians, as the Scholiast saw. Cf. also 2.9, 19-21 and note, and Introd, p. 26 f.l. cannot reason and demonstration teach a man that God has made all things in the universe, and the whole universe itself, to be free from hindrance, and to contain its end in itself, and the parts of it to serve the needs of the whole? Now all other animals have been excluded from the capacity to understand the governance of God, but the rational animal, man, possesses faculties that enable him to consider all these things, both that he is a part of them, and what kind of part of them he is, and that it is well for the parts to yield to the whole. And furthermore, being by nature noble, and high-minded, and free, the rational animal, man, sees that he has some of the things which are about him free from hindrance and under his control, but that others are subject to hindrance and under the control of others. Free from hindrance are those things which lie in the sphere of the moral purpose, and subject to hindrance are those which lie outside the sphere of the moral purpose. And so, if he regards his own good and advantage as residing in these things alone, in those, namely, which are free from hindrance and under his control, he will be free, serene, happy, unharmed, high-minded, reverent, giving thanks for all things to God, under no circumstances finding fault with anything that has happened, nor blaming anything; if, however, he regards his good and advantage as residing in externals and things outside the sphere of his moral purpose, he must needs be hindered and restrained, be a slave to those who have control over these things which he has admired and fears: he must needs be irreverent, for as he thinks that God is injuring him, and be unfair, always trying to secure for himself more than his share, and must needs be of an abject and mean spirit.

When a man has once grasped all this, what is there to prevent him from living with a light heart and an obedient disposition; with a gentle spirit awaiting anything that may yet befall, and enduring that which has already befallen? "Would you have me bear poverty?" Bring it on and you shall see what poverty is when it finds a good actor to play the part. "Would you have me hold office?" Bring it on. "Would you have me suffer deprivation of office?" Bring it on. "Well, and would you have me bear troubles?" Bring them on too. "Well, and exile?" Wherever I go it will be well with me, for here where I am it was well with me, not because of my location, but because of my judgements, and these I shall carry away with me; nor, indeed, can any man take these away from me, but they are the only things that are mine, and they cannot be taken away, and with the possession of them I am content, wherever I be and whatever I do. "But it is now time to die ' Why say "die"? Make no tragic parade of the matter, but speak of it as it is: "It is now time for the material of which you are constituted to be restored to those elements from which it came." And what is there terrible about that? What one of the things that make up the universe will be lost, what novel or unreasonable thing will have taken place? Is it for this that the tyrant inspires fear? Is it because of this that his guards seem to have long and sharp swords? Let others see to that; I have considered all this, no one has authority over me. I have been set free by God, I know His commands, no one has power any longer to make a slave of me, I have the right kind of emancipator, and the right kind of judges. "Am I not master of your body?" Very well, what is that to me? "Am I not master of your paltry property?" Very well, what is that to me? "Am I not master of exile or bonds?" Again I yield up to you all these things and my whole paltry body itself, whenever you will. Do make trial of your power, and you will find out how far it extends.

Who is there, then, that I can any longer be afraid of? Shall I be afraid of the chamberlains? For fear they do what? Lock the door in my face? If they find me wanting to enter, let them lock the door in my face!—Why, then, do you go to the gate of the palace?—Because I think it fitting for me to join in the game while the game lasts.—How, then, is it that you are not locked out?—Because, if anyone will not receive me, I do not care to go in, but always I wish rather the thing which takes place. For I regard God's will as better than my will. I shall attach myself to Him as a servant and follower, my choice is one with His, my desire one with His, in a word, my will is one with His will. No door is locked in my face, but rather in the face of those who would force themselves in. Why, then, do I not force myself in? Why, because I know that within nothing good is distributed among those who have entered.

But when I hear someone called blessed, because he is being honoured by Caesar, I say, "What is his portion? Does he, then, get also a judgement such as he ought to have for governing a province? Does he, then, get also the ability to administer a procuratorship? Why should I any longer push my way in? Somebody is scattering dried figs and nuts; the children snatch them up and fight with one another, the men do not, for they count this a small matter. But if somebody throws potsherds around, not even the children snatch them up. Governorships are being passed around. The children shall see to that. Money. The children shall see to that. A praetorship, a consulship. Let the children snatch them up; let the children have the door locked in their faces, take a beating, kiss the hands of the giver, and the hands of his slaves. As for me, it's a mere scattering of dried figs and nuts." But what, then, if, when the man is throwing them about, a dried fig chances to fall into my lap? I take it up and eat it. For I may properly value even a dried fig as much as that. But neither a dried fig, nor any other of the things not good, which the philosophers have persuaded me not to think good, is of sufficient value to warrant my grovelling and upsetting someone else, or being upset by him, or flattering those who have flung the dried figs among us.

Show me the swords of the guards. "See how large and how sharp they are!" What, then, do these large and sharp swords do? "They kill." And what does fever do? "Nothing else." And what does a tile do? "Nothing else." Do you want me, then, to respect and do obeisance to all these things, and to go about as the slave of them all? Far from it! But if once I have learned that what is born must also perish, so that the world may not stand still, nor be hampered, it makes no difference to me whether a fever shall bring that consummation, or a tile, or a soldier; but, if I must make a comparison, I know that the soldier will bring it about with less trouble and more speed. Seeing, therefore, that I neither fear anything of all that the tyrant is able to do with me, nor greatly desire anything of all that he is able to provide, why do I any longer admire him, why any longer stand in awe of him? Why am I afraid of his guards? Why do I rejoice if he speaks kindly to me and welcomes me, and why do I tell others how he spoke to me? He is not Socrates, is he, or Diogenes, so that his praise should be a proof of what I am? I have not been ambitious to imitate his character, have I? Nay, but acting as one who keeps the game going, I come to him and serve him so long as he commands going, i come to min and seve min so long as ne commands me to do nothing foolish or unseemly. If, however, he says, "Go and bring Leon of Salamis," I reply, "Try to get someone else, for I am not playing any longer." "Take him off to prison," says the tyrant about me. "I follow, because that is part of the game." "But your head will be taken off." And does the tyrant's head always stay in its place, and the heads of you who obey him? "But you will be thrown out unburied." If the corpse is I, then I shall be thrown out; but if I am something different from the corpse, speak with more discrimination, as the fact is, and do not try to terrify me. These things are terrifying to the children and the fools. But if a man who has once entered a philosopher's lecture does not know what he himself is, he deserves to be in a state of fear, and also to flatter those whom he used to flatter before; if he has not yet learned that he is not flesh, nor bones, nor sinews, but that which employs these, that which both governs the impressions of the senses and understands them.

Oh ves, but statements like these make men despise the laws.-Quite the contrary, what statements other than these make the men who follow them more ready to obey the laws? Law is not simply anything that is in the power of a fool. And yet see how these statements make us behave properly even toward these fools, because they teach us to claim against such persons nothing in which they can surpass us. They teach us to give way when it comes to our paltry body, to give way when it comes to our property, to our children, parents, brothers, to retire from everything, let everything go; they except only our judgements, and it was the will of Zeus also that these should be each man's special possession. What do you mean by speaking of lawlessness and stupidity here? Where you are superior and stronger, there I give way to you; and again, where I am superior, you retire in favour of me. For I have made these matters my concern, and you have not. It is your concern how to live in marble halls, and further, how slaves and freedmen are to serve you, how you are to wear conspicuous clothing, how to have many hunting dogs, citharoedes, and tragedians. I do not lay claim to any of these, do I? You, then, have never concerned yourself with judgements, have you? Or with your own reason, have you? You do not know, do you, what are its constituent parts, how it is composed, what its arrangement is, what faculties it has, and what their nature is? Why, then, are you disturbed if someone else, the man, namely, who has concerned himself with these matters, has the advantage of you therein?-But these are the most important things that there are.-And who is there to prevent you from concerning yourself with these matters, and devoting your attention to them? And who is better provided with books, leisure, and persons to help you? Only begin some time to turn your mind to these matters; devote a little time, if no more, to your own governing

principle; consider what this thing is which you possess, and where it has come from, the thing which utilizes everything else, submits everything else to the test, selects, and rejects. But so long as you concern yourself with externals, you will possess them in a way that no one else can match, but you will have this governing faculty in the state in which you want to have it, that is, dirty and neglected.

EPICTETUS CHAPTER 8 - To Those Who Hastily Assume The Guise Of The Philosophers

Never bestow either praise or blame upon a man for the things which may be either good or bad, nor credit him with either skill or want of skill; and by so doing you will escape from both rashness and malice. "This man is hasty about bathing." Does he, therefore, do wrong? Not at all. But what is he doing? He is hasty about bathing .- Is all well, then?-That by no means follows; but only the act which proceeds from correct judgements is well done, and that which proceeds from bad judgements is badly done. Yet until you learn the judgement from which a man performs each separate act, neither praise his action nor blame it. But a judgement is not readily determined by externals. "This man is a carpenter. Why? "He uses an adze." What, then, has that to do with the case? "This man is a musician, for he sings." And what has that to do with the case? "This man is a philosopher." Why? "Because he wears a rough cloak and long hair." And what do hedge-priests wear? That is why, when a man sees some one of them misbehaving, he immediately says, "See what the philosopher is doing." But he ought rather to have said, judging from the misbehaviour, that the person in question was not a philosopher. For if the prime conception and profession of the philosopher is to wear a rough cloak and long hair, their statement would be correct; but if it is rather this, to be free from error, why do they not take away from him the designation of philosopher, because he does not fulfil the profession of one? For that is the way men do in the case of the other arts. When someone sees a fellow hewing clumsily with an axe, he does not say, "What's the use of carpentry? See the bad work the carpenters do!" but quite the contrary, he says, "This fellow is no carpenter, for he hews clumsily with the axe." And, similarly, if a man hears somebody singing badly, he does not say, "See how the musicians sing!" but rather, "This fellow is no musician." But it is only in the case of philosophy that men behave like this; when they see somebody acting contrary to the profession of the philosopher, they do not take away from him the designation of philosopher, but, assuming that he is a philosopher, and then taking from what goes on that he is misbehaving, they conclude that there is no good in being a philosopher.

What, then, is the reason for this? It is because we respect the prime conception of the carpenter, and the musician, and so also of all the other artisans and artists, while we do not respect that of the philosopher, but as if it were confused and inarticulate in our minds we judge of it only from externals. And what other art is there that is acquired by guise and hairdress, and does not have also principles, and subject-matter, and end? What, then, is subject-matter for the philosopher? It is not a rough cloak, is it? No, but reason. what is end for the philosopher? It is not to wear a rough cloak, is it? No, but to keep his reason right. What is the nature of his principles? They do not have to do with the question how to grow a long beard, or a thick head of hair, do they? Nay, rather, as Zeno says, to understand the elements of reason, what the nature of each one is, and how they are fitted one to another, and all the consequences of these facts. Will you not, therefore, observe first of all whether the philosopher fulfils his profession by misbehaving, and then, if that be the case, blame his way of acting? But as it is, when you yourself are behaving decently, you say, on the basis of the evil that he seems to you to be doing, "Look at the philosopher," just as though it were proper to call a man who acts like that a philosopher; and again, "Is that what a philosopher is?" But you do not say, 'Look at the carpenter," when you know that a man is an adulterer, or see a man eating greedily, nor do you say, under similar circumstances, "Look at the musician." Thus to a certain degree you too realise what the philosopher's profession is, but you backslide and get confused through carelessness.

But even those who are styled philosophers pursue their calling with means which are sometimes good and sometimes bad. For example, when they have taken a rough cloak and let their beards grow, they say, "I am a philosopher." But nobody will say, "I am a musician," if he buys a plectrum and a cithara; nor, "I am a smith," if he puts on a felt cap and an apron; but the guise is fitted to the art, and they get their name from the art, but not from the guise. That is why Euphrates was right when he used to say: "For a long time I tried not to let people know that I was a philosopher, and this," he says, "was useful to me. For, in the first place, I knew that whatever I did well, I did so, not on account of the spectators, but on my own account; it was for my own sake that I ate well, and kept my countenance and gait composed; it was all for myself and for God. And, secondly, as the contest was mine alone. so also I alone ran the risks: in no respect

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3067 through me, if I did what was disgraceful or unseemly, did the cause of philosophy come into danger, nor did I do harm to the multitude by going wrong as a philosopher. For that reason those who were ignorant of my purpose wondered how it was that, although I was familiar with all the philosophers and lived with them, I was myself not acting in the role of a philosopher. And what harm was there in having the philosopher that I was, recognised by what I did, rather than by the outward signs?"

See how I eat, how drink, how sleep, how endure, how refrain, how help, how employ desire and how aversion, how I observe my relationships, whether they be natural or acquired, without confusion and without hindrance; judge me on the basis of all this, if you know how. But if you are so deaf and blind as not to regard even Hephaestus as a good smith unless you see the felt cap resting on his head, what harm can come from passing un recognised by a judge so foolish?

In this way the great majority of men failed to recognise Socrates, and so they used to come to him and ask to be introduced to philosophers! Was he, then, irritated as we are, and would he say, "And do I not look like a philosopher to you?" No, but he used to take them and introduce them, and was satisfied with one thing, that is, being a philosopher, and glad that he was not annoyed at not being taken for one; for he habitually bore in mind his own proper function. What is the function of a good and excellent man? To have many disciples? Not at all. Those who have set their hearts on it shall see to that. Well, is it to set forth difficult principles with great precision? Other men shall see to these things also. In what field was he, then, somebody, and wished so to be? In the field where there was hurt and help. "If," says he, "a man can hurt me, what I am engaged in amounts to nothing; if I wait for somebody else to help me, I am myself nothing. If I want something and it does not happen, it follows that I am miserable." This was the mighty ring to which he challenged every man whomsoever, and therein he would not, I believe, have given way before anyone in-what do you suppose?-—in proclaiming and asserting "I am such and such a man"? Far from it! but in being such and such a man. For, again, it is the part of a fool and blowhard to say, "I am tranquil and serene; be not ignorant, O men, that while you are tossed about and are in turmoil over worthless things, I alone am free from every perturbation." So is it not enough for you yourself to feel no pain without proclaiming, "Come together, all you who are suffering from gout, headaches, and fever, the halt, and the blind, and see how sound I am, and free from every disorder"? That is a vain and vulgar thing to say, unless, like Asclepius, you are able at once to show by what treatment those others will also become well again, and for this end are producing your own good health as an example.

Such is the way of the Cynic who is deemed worthy of the sceptre and diadem of Zeus, and says, "That you may see yourselves, O men, to be looking for happiness and serenity, not where it is, but where it is not, behold, God has sent me to you as an example; I have neither property, nor house, nor wife, nor children, no, not even so much as a bed, or a shirt, or a piece of furniture, and yet you see how healthy I am. Make trial of me, and if you see that I am free from turmoil, hear my remedies and the treatment which cured me." For this, at length, is an attitude both humane and noble. But see whose work it is; the work of Zeus, or of him whom Zeus deems worthy of this service, to the end that he shall never lay bare to the multitudes anything whereby he shall himself invalidate the testimony which it is his to give in behalf of virtue, and against externals.

"Never there fell o'er his beauteous features a pallor, nor ever

Wiped he the tears from his cheeks."

And not merely that, but he must neither yearn for anything, nor seek after it-be it human being, or place, or manner of life-like children seeking after the season of vintage, or holidays; he must be adorned on every side with self-respect, as all other men are with walls, and doors, and keepers of doors. But, as it is, being merely moved towards philosophy, like dyspeptics who are moved to some paltry foods, which they are bound in a short while to loathe, immediately these men are off to the sceptre, to the kingdom. One of them lets his hair grow long, he takes up a rough cloak, he shows his bare shoulder, he quarrels with the people he meets, and if he sees somebody in an overcoat he quarrels with him. Man, take a winter's training first; look at your own choice, for fear it is like that of a dyspeptic, or a woman with the strange cravings of pregnancy. Practise first not to let men know who you are; keep your philosophy to yourself a little while. That is the way fruit is produced: the seed has to be buried and hidden for a season, and be grown by slow degrees, in order that it may come to perfection. But if it heads out before it produces the jointed stock, it never matures, it is from a garden of Adonis. That is the kind of plant you are too: you have blossomed prematurely, and the winter will blight you utterly. See what the farmers say about their seeds, when the hot weather comes before its proper time. They are in utmost anxiety lest the seeds should grow insolently lush, and then but a single frost should lay hold of them and expose

their weakness. Man, do you also beware; you have grown insolently lush, you have leaped forward to occupy some petty reputation before its due time; you think yourself somebody, fool that you are among fools; you will be bitten by the frost, or rather, you have already been bitten by the frost, down at the root, while your upper part still blooms a little, and for that reason you seem to be still alive and flourishing. Allow us at least to ripen as nature wishes. Why do you expose us to the elements, why force us? We are not yet able to stand the open air. Let the root grow, next let it acquire the first joint, and then the second, and then the third; and so finally the fruit will forcibly put forth its true nature, even against my will.

For who that has conceived and is big with such great judgements is not aware of his own equipment, and does not hasten to act in accordance with them? Why, a bull is not ignorant of his own nature and equipment, when some wild beast appears, nor does he hang back for someone to encourage him; neither does a dog, when he sees some wild animal; and shall I, if I have the equipment of a good man, hang back, so that you may encourage me to do what is my own proper work? But as yet I do not have the equipment, believe me. Why, then, do you wish to have me wither away before my time, as you yourself have withered?

EPICTETUS CHAPTER 9 - To The Man Who Had Become Shameless

Whenever you see another person holding office, set over against this the fact that you possess the ability to get along without office: whenever you see another person wealthy, see what you have instead. For if you have nothing instead, you are wretched; but if you are capable of feeling no need of wealth, know that you are better off, and have something worth far more than wealth. Another has a comely wife, you the ability not to yearn for a comely wife. Is all this small in your eyes? Yet how much would these men give, who are rich and hold office, and live with beautiful women, to be able to despise wealth and offices, and these very same women whom they passionately love and win? Do you not know what kind of thing the thirst of a man in fever is? It is quite unlike that of a man in health. The latter drinks and his thirst is gone, but the other gets a momentary satisfaction, and then becomes nauseated, turns the water into bile, throws up, has a pain in his bowels, and suffers more violent thirst than before. A similar thing it is to be rich and have strong desire, to hold office and have strong desire, to sleep by the side of a beautiful woman and have strong desire; jealousy is added to one's lot, fear of loss, disgraceful words, disgraceful thoughts, unseemly deeds

And what do I lose? says somebody.---Man, you used to be modest, and are no longer so; have you lost nothing? Instead of Chrysippus and Zeno you now read Aristeides and Evenus*; have you lost nothing? Instead of Socrates and Diogenes you have come to admire the man who is able to corrupt and seduce the largest number of women. [* Typical erotic writers, the former the author of the celebrated Milesian Tales, the latter of an erotic work admired by Menander.] You wish to be handsome and make yourself up, though you are not handsome, and you wish to make a show of gay attire, so as to attract the women, and you think yourself blessed if perchance you light upon some trivial perfume. But formerly you used never even to think of any of these things, but only where you might find decent speech, a worthy man, a noble thought. Therefore you used to sleep as a man, to go forth as a man, to wear the clothes of a man, to utter the discourse that was suitable for a good man; and after all that do you still say, "I have lost nothing"? And is it nothing but small change that men lose in this way? Is not self-respect lost, is not decency lost? Or is it impossible that the loss of these things counts for anything? To you, indeed, the loss of none of these things, perhaps, seems any longer serious; but there once was a time when you thought it the only serious loss and harm, when you were in great anxiety lest anyone should dislodge you from these good words and deeds.

Behold, you have been dislodged, though by no one else but yourself. Fight against yourself, vindicate yourself for decency, for respect, for freedom. If anyone ever told you about me that someone was forcing me to commit adultery, to wear clothes like yours, or to perfume myself, would you not have gone and murdered the man who was so maltreating me? And now, therefore, are you not willing to come to your own rescue? Yet how much easier is the work of rescue in the latter case! It is not necessary to kill somebody, put him in bonds, or assault him; you do not have to come out into the market-place, but only to talk to yourself, the man most likely to be persuaded, to whom no one is more persuasive than yourself. And first of all condemn what you are doing; then, when you have passed your condemnation, do not despair of yourself, nor act like the spiritless people who, when once they have given in, surrender themselves completely, and are swept off by the current, as it were, but learn how the gymnastic trainer of boys acts. The boy he is training is thrown; "get up," he says, "and wrestle again, till you get strong." React in some such way yourself, for I would have you know that there is nothing more easily prevailed upon than a human soul. You have but

to will a thing and it has happened, the reform has been made; as, on the other hand, you have but to drop into a doze and all is lost. For it is within you that both destruction and deliverance lie.—But what good do I get after all that?— And what greater good than this are you looking for? Instead of shameless, you will be self-respecting; instead of faithless, faithful; instead of dissolute, self-controlled. If you are looking for anything else greater than these things, go ahead and do what you are doing; not even a god can any longer save you.

EPICTETUS CHAPTER 10 - What Ought We To Despise And On What Place A High Value?

Men find all their difficulties in externals, their perplexities in externals. "What shall I do? How is it to take place? How is it to turn out? I am afraid that this will befall me, or that." All these are the expressions of men who concern themselves with the things that lie outside the sphere of the moral purpose. For who says, "How am I to avoid giving assent to the false? How am I to refuse to swerve aside from the true?"? If a man is so gifted by nature as to be in great anxiety about these things, I shall remind him, "Why are you in great anxiety? It is under your own control; rest secure. Do not be in a hurry to give your assent before applying the rule of nature."

Again, if a man is in great anxiety about desire, for fear lest it become incomplete and miss its mark, or about aversion, for fear lest it fall into what it would avoid. I shall first give him a kiss of congratulation, because he has got rid of what the rest of mankind are excited about, and their fears, and has turned his serious thought to his own true business in the realm where he himself is. And after that I shall say to him, "If you do not wish to desire without failing to get, or to avoid without falling into the object of your aversion, desire none of those things which are not your own, and avoid none of those things which are not under your control. If not, you are of necessity bound to fail in achieving your desires, and to fall into what you would avoid." Where is there any difficulty in that case? What room is there to ask, "How is it to take place?" and "How is it to turn out?" and to say, "I am afraid that this will befall me, or that"?

Is not the future outside the sphere of the moral purpose now?-Yes.-And is not the true nature of the good and evil inside the sphere of the moral purpose?-Yes.-Are you permitted, then, to make a natural use of every outcome? No one can prevent you, can he?-No one.-Therefore, say no longer to me, "How is it to take place?" Because, whatever takes place, you will turn it to good purpose, and the outcome will be a blessing for you. Or what would Heracles have been had he said "How am I to prevent a great lion from appearing, or a great boar, or savage men?"? And what do you care for that? If a great boar appears, the struggle in which you are to engage will be greater; if evil men appear, you will clear the world of evil men.- But if I die in so doing?-You will die as a good man, bringing to fulfilment a noble action. Why, since you have to die in any event, you must be found doing something or other-farming, or digging, or engaged in commerce, or holding a consulship, or suffering with dyspepsia or dysentery. What is it, then, you wish to be doing when death finds you? I for my part should wish it to be some work that befits a man, something beneficent, that promotes the common welfare, or is noble. But if I cannot be found doing such great things as these, I should like at least to be engaged upon that which is free from hindrance, that which is given me to to do, and that is, correcting myself, as I strive to perfect the faculty which deals with the external impressions, labouring to achieve calm, while yet giving to each of my human relationships its due; and, if I am so fortunate, striving to attain to the third field of study, that which has to do with security in the formation of judgements.

If death finds me occupied with these matters, it is enough for me if I can lift up my hands unto God, and say, "The faculties which I received from Thee to enable me to understand Thy governance and to follow it, these I have not neglected; I have not dishonoured Thee as far as in me lay, Behold how I have dealt with my senses, behold how I have dealt with my preconceptions. Have I ever blamed Thee? Have I been discontented with any of these things which happen, or wished it to have been otherwise? Have I at all violated my relationships with others? For that Thou didst beget me I am grateful; for what Thou hast given I am grateful also. The length of time for which I have had the use of Thy gifts is enough for me. Take them back again and assign them to what place Thou wilt, for they were all Thine, and Thou gavest them me." Is it not enough for a man to take his departure from the world in this state of mind? And what among all the kinds of life is superior to this, or more seemly than his who is so minded, and what kind of end is more fortunate?

But that this may take place a man must accept no small troubles, and must miss no small things. You cannot wish for a consulship and at the same time wish for this; you cannot have set your heart upon having lands and this too; you cannot at the same time be solicitous for your paltry slaves

and yourself too. But if you wish for any one of the things that are not your own, what is your own is lost. This is the nature of the matter: Nothing is done except for a price. And why be surprised? If you wish to be consul you must keep vigils, run around, kiss men's hands, rot away at other men's doors, say and do many slavish things, send presents to many persons, and guest-gifts to some people every day. And what is the outcome of it all? Twelve bundles of rods, and the privilege of sitting three or four times on the tribune, and giving games in the Circus, and lunches in little baskets. Or else let someone show me what there is in it beyond this. For calm, then, for peace of mind, for sleeping when you are asleep, and being awake when you are awake, for fearing nothing, for being in great anxiety about nothing, are you unwilling to spend anything, to make any exertion? But if something that belongs to you be lost while you are engaged in these affairs, or be spent to no purpose, or someone else get what you ought to have got, are you going to be vexed immediately at what has happened? Will you not balance off what you are getting in return for what, how much in return for how much? Nay, do you wish to get such valuable things for nothing? And how can you? "One serious business with another."

You cannot be continually giving attention to both externals and your own governing principle. But if you want the former, let the latter go; otherwise you will have neither the latter nor the former, being drawn in both directions. If you want the latter, you must let the former go. The oil will be spilled, my paltry furniture will perish, but I shall be calm. There will be a fire when I am not at home, and my books will perish, yet I shall deal with my external impressions according to nature. But I shall have nothing to eat. If I am so badly off as all that, death is my harbour. And this is the harbour of all men, even death, and this their refuge. That is why no one of the things that befall us in our life is difficult. Whenever you wish, you walk out of the house, and are no longer bothered by the smoke. Why, then, are you consumed with anxiety? Why do you keep vigils? And why do you not forthwith reckon up where your good and your evil lie, and say, "They are both under my control; no man can either rob me of the one, or plunge me in the other against my will? Why, then, do I not throw myself down and snore? What is mine is safe. What is not mine shall be the concern of whoever gets it. according to the terms upon which it may be given by Him who has authority over it. Who am I to wish that what is not mine should be either thus or so? For it has not been given me to make a choice among these things, has it? For no one has made me an administrator of them, has he? I am satisfied with the things over which I have authority. These I ought to treat so that they may become as beautiful as possible, but everything else as their master may desire.'

Does any man who has all this before his eyes keep vigils, and does he "toss hither and thither"? What does he wish, or what does he yearn for? For Patroclus, or Antilochus, or Protesilaus? Why, when did he regard any of his friends as immortal? Yes, and when did he not have before his eyes the fact that on the morrow or the day after either he or his friend must die? "Yes," he says, "but I had thought he was going to survive me, and bring up my son." No doubt, but then you were a fool, and were thinking of things that were uncertainties. Why, then, do you not blame yourself, instead of sitting and crying like little girls? "Nay, but he used to set my food before me." Yes, fool, for then he was alive; and now he cannot. But Automedon will set your food before you, and if Automedon too die, you will find somebody else. If the pot in which your meat used to be boiled gets broken, do you have to die of hunger because you do not have your accustomed pot? Will you not send out and buy a new one to take its place? He savs

Ill no greater than this could befall me.

Why, is this what you call an ill? And then, forbearing to get rid of it, do you blame your mother, because she did not foretell it to you, so that you might continue to lament from that time forth?

What do you men think? Did not Homer compose this in order for us to see that there is nothing to prevent the persons of highest birth, of greatest strength, of most handsome appearance, from being most miserable and wretched, when they do not hold the right kind of judgements?

EPICTETUS CHAPTER 11 - Of Cleanliness [And Purity]

Some people raise the question whether the social instinct is a necessary element in the nature of man; nevertheless, even these people, as it seems to me, would not question that the instinct of cleanliness is most assuredly a necessary element, and that man is distinguished from the animals by this quality if by anything. When, therefore, we see some other animal cleaning itself, we are in the habit of saying in surprise that it is acting "like a human being." And again, if one finds fault with some beast, we are in the habit of saying immediately, as though in apology, "Well, of course it is not a human being." So true it is that we consider cleanliness to be a special characteristic of man, deriving it in the first instance from the gods. For since they are by nature pure* and undefiled, in so far as men have approached them by virtue of reason, just so far are they attached to purity and cleanliness. [*Both words "clean" and "pure," and their derivatives, is in the Greek expressed by a single word. Zoroastrians, Jews, early Christians, and Muslims have been obsessed with the idea of purity and it encompasses both, body, soul, meaning religion.] But since it is impossible for the nature of men to be altogether pure, seeing that it is composed of such material as it is, the reason which they have received from the gods endeavours to render this material clean as far as is possible.

Therefore, the prime and highest purity is that which appears in the soul, and the same is true of impurity. But you would not find the same impurity in a soul as you would in a body, and as being soul, what else would you find impure about it than that which makes it dirty for the performance of its own functions? And the functions of a soul are the exercise of choice, of refusal, of desire, of aversion, of preparation, of purpose, and of assent. What, then, can that be which makes the soul dirty and unclean in these functions? Nothing but its erroneous decisions. It follows, therefore, that impurity of a soul consists of bad judgements, and purification consists in creating within it the proper kind of judgements; and a pure soul is the one which has the proper kind of judgements, for this is the only soul which is secure against confusion and pollution in its own functions.

Now one ought to be eager to achieve, as far as may be, something similar to this in the case of the body also. It was impossible that there should be no discharge of mucus from the nose, since man's body has been composed as it is; for that reason nature made hands, and the nostrils like tubes to discharge the humours. If, therefore, a man snuffs back these discharges of mucus, I say that he is not acting as a human being should. It was impossible that the feet should not get muddy, nor dirty at all, when they pass through certain such substances; for that reason nature has provided water, for that hands. It was impossible that some impurity from eating should not remain on the teeth; for that reason nature says, "Wash your teeth." Why? In order that you may be a human being, and not a beast or a pig. It was impossible that something dirty and needing to be cleaned off should not be left on the person from our sweat and the pressure of our clothes: for that reason we have water, oil, hands, a towel, a strigil, nitre, and, on occasion, every other kind of equipment to cleanse the body. Not so you. But the smith will remove the rust from his iron tool, and will have implements made for this purpose, and you yourself will wash your plate when you are going to eat, unless you are utterly unclean and dirty; but will you not wash nor make clean your poor body?---Why? says someone.--Again I will tell you: First, so as to do what befits a man; and second, so as not to offend those whom you meet. You are doing something of the sort even here, and do not realise it. You think that you are worthy of the smell. Very well, be worthy of it. Do you think, though, that those who sit by your side, those who recline beside you, those who kiss you, are worthy of it too? Bah, go away into a wilderness somewhere or other, a place worthy of you, and live alone, smelling of yourself? For it is only right that you should enjoy your uncleanliness all by yourself. But since you are living in a city, what kind of character do you fancy you are exhibiting, to behave so thoughtlessly and inconsiderately? If nature had committed to your care a horse, would you have utterly neglected it? And now I would have you think that your body has been entrusted to you like a horse; wash it, rub it down, make it so that nobody will turn his back on you or move aside. But who does not avoid a dirty fellow that smells and has an unsightly skin, even more than a man bespattered with dung? In this latter case the smell is external and acquired, in the other it comes from slovenliness that is internal, and is characteristic of one who has grown rotten through and through.

But Socrates bathed infrequently, says someone.—Why, his body was radiant; why, it was so attractive and sweet that the handsomest and most high-born were in love with him, and yearned to sit by his side rather than beside those who had the prettiest forms and features. He might have neither bathed nor washed, had he so desired; yet even his infrequent bathings were effective.—But Aristophanes says, The pallid men I mean, who shoeless go.—

Oh, yes, but then he says also that Socrates "trod the air," and stole people's clothes from the wrestling school. And yet all who have written about Socrates unite in bearing testimony to the precise opposite of this; that he was not merely pleasant to hear, but also to see. Again, men write the same thing about Diogenes. For a man ought not to drive away the multitude from philosophy, even by the appearance of his body, but as in everything else, so also on the side of the body, he ought to show himself cheerful and free from perturbation. "See, O men, that I have nothing, and need nothing. See how, although I am without a house, and without a city, and an exile, if it so chance. and without a hearth, I still live a life more tranquil and serene than that of all the noble and the rich. Yes, and you see that even my paltry body is not disfigured by my hard way of living." But if I am told this by a person who has the bearing and face of a condemned man, what one of all the gods shall persuade me to approach philosophy, if she makes people like that? Far be it from me! I should not be willing to do so, not even if it would make me a wise man.

As for me, by the gods, I should rather have the young man who was experiencing the first stirrings towards philosophy come to me with his hair carefully dressed, than with it in a state of desperate neglect and dirty. For the first case shows that there exists in the young man a sort of imaging of beauty, and an aiming at comeliness, and where he fancies it to be, there also he devotes his efforts. With that as a starting-point, all that it is necessary to do is to show him the way, and say, "Young man, you are seeking the beautiful, and you do well. Know, then, that it arises in that part of you where you have your reason; seek it there where you have your choices and vour refusals, where you have your desires and your aversions. For this part is something of a special kind which you have within you, but your paltry body is by nature only clay. Why do you toil for it to no purpose? If you learn nothing else, time at least will teach you that it is nothing." But if he comes to me bespattered with dung, dirty, his moustache reaching down to his knees, what have I to say to him, from what point of resemblance can I start so as to prevail upon him? For what is there to which he is devoted, that bears any resemblance to the beautiful, so that I may turn him about and say, "Beauty is not there, but here"? Do you want me to say to him, "Beauty does not consist in being bespattered with dung, but in reason"? For is he aiming at beauty? Has he any manifestation of it? Go and talk to a pig, that he may wallow no more in mud! That is why the words of Xenocrates laid hold even of a Polemo, because he was a young man who loved beauty. For he came to Xenocrates with glimmerings of a zeal for the beautiful, but was looking for it in the wrong place.

Why, look you, nature has not made dirty even the animals which associate with man. A horse doesn't roll around in the mud, does he? or a highly bred dog? No, but the hog, and the miserable rotten geese, and worms, and spiders, the creatures farthest removed from association with human beings. Do you, then, who are a human being, wish to be not even an animal of the kind that associates with men, but rather a worm, or a spider? Will you not take a bath somewhere, some time, in any form you please? Will you not wash yourself? If you don't care to bathe in hot water, then use cold. Will you not come to us clean, that your companions may be glad? What, and do you in such a state go with us even into the temples, where it is forbidden by custom to spit or blow the nose, yourself being nothing but a mass of spit and drivel?

Well, what then? Is anyone demanding that you beautify yourself? Heaven forbid! except you beautify that which is our true nature—the reason, its judgements, its activities; but your body only so far as to keep it cleanly, only so far as to avoid giving offence. But if you hear that one ought not to wear scarlet, go bespatter your rough cloak with dung—or tear it to pieces! Yet where am I to get a rough cloak that looks well?—Man, you have water, wash it! See, here is a lovable young man, here an elderly man worthy to love and to be loved in return, to whom a person will entrust the education of his son, to whom daughters and young men will come, if it so chance—all for the purpose of having him deliver his lectures sitting on a dunghill? Good Lord, no! Every eccentricity arises from some human trait, but this trait comes close to being non-human.

EPICTETUS CHAPTER 12 - Of Attention

When you relax your attention for a little while, do not imagine that whenever you choose you will recover it, but bear this in mind, that because of the mistake which you have made to-day, your condition must necessarily be worse as regards everything else. For, to begin with-and this is the worst of all-a habit of not paying attention is developed; and after that a habit of deferring attention; and always you grow accustomed to putting off from one time to another tranquil and appropriate living, the life in accordance with nature, and persistence in that life. Now if the postponement of such matters is profitable, it is still more profitable to abandon them altogether; but if it is not profitable, why do "To-day I vou not maintain your attention continuously? want to play." What is to prevent your playing, then,-but with attention? "I want to sing." What is to prevent your singing, then,-but with attention? There is no part of the activities of your life excepted, to which attention does not extend, is there? What, will you do it worse by attention, and better by inattention? And yet what other thing, of all that go to make up our life, is done better by those who are inattentive? Does the inattentive carpenter do his work more accurately? The inattentive helmsman steer more safely? And is there any other of the lesser functions of life which is done better by inattention? Do you not realise that when once you let your mind go wandering, it is no longer within your power to recall it, to bring it to bear upon either seemliness, or self-respect, or moderation? But you do anything that comes into your head, you follow your inclinations.

What are the things, then, to which I ought to pay attention?—First, these general principles, and you ought to have them at your command, and without them neither go to sleep, nor rise up, nor drink, nor eat, nor mingle with men; I mean the following: No man is master of another's moral purpose; and: In its sphere alone are to be found one's good and evil. It follows, therefore, that no one has power either to procure me good, or to involve me in evil, but I myself alone have authority over myself in these matters. Accordingly, when these things are secure for me, what excuse have I for being disturbed about things external? What kind of tyrant inspires fear, what kind of disease, or poverty, or obstacle?-But I have not pleased So-and-so.-He is not my function, is he? He is not my judgement, is he?-No.-Why, then, do I care any longer?-But he has the reputation of being somebody.-He and those who think so highly of him will have to see to that, but I have one whom I must please, to whom I must submit, whom I must obey, that is, God, and after Him, myself. God has commended me to myself, and He has subjected to me alone my moral purpose, giving me standards for the correct use of it; and when I follow these standards, I pay heed to none of those who say anything else, I give not a thought to anyone in arguments with equivocal premisses. Why, then, in the more important matters am I annoved by those who censure me? What is the reason for this perturbation of spirit? Nothing but the fact that in this field I lack training. For, look you, every science is entitled to despise ignorance and ignorant people, and not merely the sciences, but also the arts. Take any cobbler you please, and he laughs the multitude to scorn when it comes to his own work: take any carpenter you please.

First, therefore, we ought to have these principles at command, and to do nothing apart from them, but keep the soul intent upon this mark; we must pursue none of the things external, none of the things which are not our own, but as He that is mighty has ordained; pursuing without any hesitation the things that lie within the sphere of the moral purpose, and all other things as they have been given us. And next we must remember who we are, and what is our designation, and must endeavour to direct our actions, in the performance of our duties, to meet the possibilities of our social relations. We must remember what is the proper time for song, the proper time for play, and in whose presence; also what will be out of place; lest our companions despise us, and we despise ourselves; when to jest, and whom to laugh at, and to what end to engage in social intercourse, and with whom; and, finally, how to maintain one's proper character in such social intercourse. But whenever you deviate from any one of these principles, immediately you suffer loss, and that not from anywhere outside, but from the very nature of the activity.

What then? Is it possible to be free from fault altogether? No, that cannot be achieved, but it is possible ever to be intent upon avoiding faults. For we must be satisfied, if we succeed in escaping at least a few faults by never relaxing our attention. But now, when you say, "To-morrow I will pay attention," I would have you know that this is what you are saying: "To-day I will be shameless, tactless, abject; it will be in the power of other men to grieve me; I will get angry to day, I will give way to envy." Just see all the evils that you are allowing yourself! But if it is good for you to pay attention to-morrow, how much better is it to-day! If it is to your interest to-morrow, it is much more so to-day, that you may be able to do the same to-morrow also, and not put it off again, this time to the day after to-morrow.

EPICTETUS CHAPTER 13 - To Those Who Lightly Talk About Their Own Affairs

When someone gives us the impression of having talked to us frankly about his personal affairs, somehow or other we are likewise led to tell him our own secrets, and to think that is frankness! The first reason for this is because it seems unfair for a man to have heard his neighbour's affairs, and yet not to let him too have, in his turn, a share in ours. Another reason, after that, is because we feel that we shall not give the impression to these men of being frank, if we keep our own private affairs concealed. Indeed, men are frequently in the habit of saying, "I have told you everything about myself, aren't you willing: to tell me anything about yourself? Where do people act like that?" Furthermore, there is also the thought that we can safely trust the man who has already entrusted knowledge of his own affairs; for the idea occurs to us that this man would never spread abroad knowledge of our affairs, because he would be careful to guard against our too spreading abroad knowledge of his affairs. In this fashion the rash are ensnared by the soldiers in Rome. A soldier, dressed like a civilian, sits down by your side, and begins to speak ill of Caesar, and then you too, just as though you had received from him some guarantee of good faith in the fact that he began the abuse, tell likewise everything you think, and the next thing is-you are led off to prison in chains [It may possibly be, as Upton suggests, that this abuse led John the Baptist to warn soldiers specifically, "Neither accuse any falsely" (Luke 3:14).]. We experience something of the same sort also in the general course of our life. For even though this particular man has safely entrusted knowledge of his own affairs to me, I do not myself in like manner tell my affairs to any chance comer; no, I listen and keep still, if, to be sure, I

happen to be that kind of a person, but he goes out and tells everybody. And then, when I find out what has happened, if I myself resemble the other person, because I want to get even with him I tell about his aflairs, and confound him and am myself confounded. If, however, I remember that one person does not harm another, but that it is a man's own actions which both harm and help him, this much I achieve, namely, that I do not act like the other person, but despite that I get into the state in which I am because of my own foolish talking.

Yes, but it is not fair to hear your neigbour's secrets and then give him no share of your own in return.-Man, I did not invite your confidences, did I? You did not tell about your affairs on certain conditions, that you were to hear about mine in return, did you? If you are a babbler, and think that every person you meet is a friend, do you also want me to be like yourself? And why, if you did well to entrust your affairs to me, but it is impossible for me to do well in trusting you, do you wish me to be rash? It is just as though I had a jar that was sound, and you one with a hole in it, and you came to me and deposited your wine with me, for me to store it in my jar; and then you complained because I do not entrust to you my wine also; why, your jar has a hole in it! How, then, is equality any longer to be found? You made your deposit with a faithful man, with a respectful man, with a man who regards only his own activities as either harmful or helpful, and nothing that is external. Do you wish me to make a deposit with you-a man who has dishonoured his own moral purpose, and wants to get paltry cash, or some office, or advancement at court, even if you are going to cut the throats of your children, as Medea did? Where is there equality in that? Nay, show yourself to me as a faithful, respectful, dependable man; show that your judgements are those of a friend, show that your vessel has no hole in it, and you shall see how I will not wait for you to entrust the knowledge of your affairs to me. but I will go of myself and ask you to hear about mine. For who does not wish to use a good vessel, who despises a friendly and faithful counsellor, who would not gladly accept the man who is ready to share his difficulties, as he would share a burden with him, and to make them light for him by the very fact of his sharing in them?

Yes, but I trust you, while you do not trust me.-First, you do not trust me, either, but you are a babbler, and that is the reason why you cannot keep anything pack. Why, look you, if that statement of yours is true, entrust these matters to me alone; but the fact is that whenever you see anybody at leisure you sit down beside him and say, "Brother, I have no one more kindly disposed or dearer to me than you, I ask you to listen to my affairs"; and you act this way to people whom you have not known for even a short time. And even if you do trust me, it is clear you trust me as a faithful and respectful person, not because I have already told you about my affairs. Allow me also, then, to have the same thought about you. Show me that, if a man unbosoms himself to somebody about his own affairs, he is faithful and respectful. For if that were so, I should have gone about and told my own affairs to all men, that is, if that was going to make me faithful and respectful. But that is not the case; to be faithful and respectful a man needs judgements of no casual sort. If, therefore, you see someone very much in earnest about the things that lie outside the province of his moral purpose, and subordinating his own moral purpose to them, rest assured that this man has tens of thousands of persons who subject him to compulsion and hinder him. He has no need of pitch or the wheel to get him to speak out what he knows, but a little nod from a wench, if it so happen, will upset him, a kindness from one of those who frequent Caesar's court, desire for office, or an inheritance, and thirty thousand other things of the sort. Remember, therefore, in general, that confidences require faithfulness and faithful judgements; and where can one readily find these things nowadays? [Cf. "When the Son of man cometh, shall he find faith on the earth?" (Luke 18:8).] Or, let someone show me the man who is so minded that he can say, "I care only for what is my own, what is not subject to hindrance, what is by nature free. This, which is the true nature of the good, I have; but let everything else be as God has granted, it makes no difference to me.

EPICTETUS FRAGMENTS

(Introductory Note: The genuine fragments of Epictetus are not very numerous, and since several of them are of unusual interest, it has seemed best to add them at this point. One fragment, No. 28 b, I have added to those listed by Schenkl, since its discovery was subsequent to his latest edition.

Earlier editions have included a large number of aphorisms gathered from Stobaeus, and from a gnomology purporting to contain excerpts from Democritus, Isocrates, and Epicetus. The researches of a group of scholars, principally H. Schenkl, R. Asmus, and A. Elter, have thrown such doubt upon the authenticity of these aphorisms that it would scarcely serve any useful purpose to reproduce them in the present work.)

FRAGMENTS OF EPICTETUS

FRAGMENT 1 From Arrian the disciple of Epictetus. To the man who was bothering himself about the problem of being

What do I care, says Epictetus, whether all existing things are composed of atoms, or of indivisibles, or of fire and earth? Is it not enough to learn the true nature of the good and the evil, and the limits of the desires and aversions, and also of the choices and refusals, and, by employing these as rules, to order the affairs of our life, and dismiss the things that are beyond us? It may very well be that these latter are not to be comprehended by the human mind, and even if one assume that they are perfectly comprehensible, well, what profit comes from comprehending them? And ought we not to say that those men trouble themselves in vain who assign all this as necessary to the philosopher's system of thought? Is, therefore, also the precept at Delphi superfluous, "Know thyself"?-That, indeed, no, the man answers.-What, then, does it mean? If one bade a singer in a chorus to "know himself," would he not heed the order by paying attention both to his fellows in the chorus and to singing in harmony with them?-Yes.-And so in the case of a sailor? or a soldier? Does it seem to you, then, that man has been made a creature to live all alone by himself, or for society?-For society .--- By whom?---By Nature .--- What Nature is, and how she administers the universe, and whether she really exists or not, these are questions about which there is no need to go on to bother ourselves.

FRAGMENT 2 From Arrian the disciple of Epictetus

He who is dissatisfied with what he has and what has been given him by fortune is a layman in the art of living, but the man who bears all this in a noble spirit and makes a reasonable use of all that comes from it deserves to be considered a good man.

FRAGMENT 3 From Arrian the disciple of Epictetus

All things obey and serve the Cosmos, both earth, and sea, and sun, and the other stars, and the plants and animals of earth; obedient to it also is our body, both in sickness and in health, when the Cosmos wishes, both in youth and in old age, and when passing through all the other changes. Therefore it is reasonable also that the one thing which is under our control, that is, the decision of our will, should not be the only thing to stand out against it. For the Cosmos is mighty and superior to us, and has taken better counsel for us than we can, by uniting us together with the universe under its governance. Besides, to act against it is to side with unreason, and while accomplishing nothing but a vain struggle, it involves us in pains and sorrows.

FRAGMENT 4 Rufus. From the remarks of Epictetus on friendship

Of things that are, God has put some under our control, and others not under our control. Under our control He put the finest and most important matter, that, indeed, by virtue of which He Himself is happy, the power to make use of external impressions. For when this power has its perfect work, it is freedom, serenity, cheerfulness, steadfastness; it is also justice, and law, and self-control, and the sum and substance of virtue. But all other things He has not put under our control. Therefore we also ought to become of one mind with God, and, dividing matters in this way, lay hold in every way we can upon the things that are under our control, but what is not under our control we ought to leave to the Cosmos, and gladly resign to it whatever it needs, be that our children, our country, our body, or anything whatsoever.

FRAGMENT 5 Rufus. From Epictetus on friendship

What man among us does not admire the saying of Lycurgus the Lacedaemonian? For when he had been blinded in one eye by one of his fellow-citizens, and the people had turned over the young man to him, to take whatever vengeance upon the culprit he might desire, this he refrained from doing, but brought him up and made a good man of him, and presented him in the theatre. And when the Lacedaemonians expressed their surprise, he said, "This man when I received him at your hands was insolent and violent; I am returning him to you a reasonable and public-spirited person."

FRAGMENT 6 Rufus. From Epictetus on friendship

But above all else this is the function of nature, to bind together and to harmonise our choice with the conception of what is fitting and helpful.

FRAGMENT 7 Rufus. From Epictetus on friendship

To fancy that we shall be contemptible in the sight of other men, if we do not employ every means to hurt the first enemies we meet, is characteristic of extremely ignoble and thoughtless men. For it is a common saying among us that the contemptible man is recognised among other things by his incapacity to do harm; but he is much better recognised by his incapacity to extend help.

FRAGMENT 8 Rufus. From the remarks of Epictetus on friendship

Such was, and is, and will be, the nature of the universe, and it is not possible for the things that come into being to come into being otherwise than they now do. And not only has mankind participated in this process of change and transformation, and all the other living beings upon earth, but also those which are divine, and, by Zeus, even the four elements, which are changed and transformed upwards and downwards, as earth becomes water, and water air, and air again is transformed into ether; and there is the same kind of transformation also downwards. If a man endeavours to incline his mind to these things, and to persuade himself to accept of his own accord what needs must befall him, he will have a very reasonable and harmonious life.

FRAGMENT 9 A philosopher who is well known in the Stoic school . . . brought out of his handbag the fifth book of the Discourses of the philosopher Epictetus, which had been arranged by Arrian, and agree, no doubt, with the writings of Zeno and Chrysippus. In that book, written of course in Greek, we find, a passage to this purport: Things seen by the mind (which the philosophers call $\varphi a v \tau a \sigma i a \varsigma$), whereby the intellect of man is struck at the very first sight of anything which penetrates to the mind, are not subject to his will. nor to his control, but by virtue of a certain force of their own thrust themselves upon the attention of men; but the assents (which they call συγκαταθέσεις), whereby these same things seen by the mind are recognised, are subject to man's will, and fall under his control. Therefore, when some terrifying sound comes from the sky, or from the collapse of a building, or sudden word comes of some peril or other, or something else of the same sort happens, the mind of even the wise man cannot help but be disturbed, and shrink, and grow pale for a moment, not from any anticipation of some evil, but because of certain swift and unconsidered motions which forestall the action of the intellect and the reason. Soon, however, our wise man does not give his assent (that is, these terrifying things seen by his mind), but rejects and repudiates them, and sees in them nothing to cause him fear. And this, they say, is the difference between the mind of the fool and the mind of the wise man, that the fool thinks the cruel and harsh things seen by his mind, when it is first struck by them, actually to be what they appear, and likewise afterwards, just as though they really were formidable he confirms them by his own approval also, καὶ προσεπιδοξάζει (the word the Stoics use when they discuss this matter); whereas the wise man, when his colour and expression have changed for a brief instant, ou συγκατατίθεται, but keeps the even tenor and strength of the opinion which he has always had about mental impressions of this kind, as things that do not deserve to be feared at all, but terrify only with a false face and a vain fear.

This is the sentiment and expression of the philosopher Epictetus, derived from the doctrines of the Stoics, that we have read in the book of which I spoke above.

FRAGMENT 10 I have heard Favorinus say that he had heard the philosopher Epictetus say, that most of those who gave the appearance of philosophizing were philosophers of this kind: apart from deeds, as far as words". There is a still more vigorous expression which he was accustomed to use, that Arrian has recorded in the books which he wrote about his discourses. For Arrian says that when Epictetus had noticed a man lost to shame, of misdirected energy, and evil habits, bold, impudent in speech, and concerned with everything else but his soul, when he saw a man of that kind. continues Arrian, handling also the studies and pursuits of philosophy, and taking up physics, and studying dialectics, and taking up and investigating many a theoretical principle of this sort, he would call upon gods and men, and frequently, in the midst of that appeal, he would denounce the man in these words: "Surely there is nothing weightier, nothing truer than these words, in which the greatest of philosophers declared that the writings and teachings of philosophy, when poured into a false and low-lived person, as though into a dirty and defiled vessel, turn, change, are spoiled, and become urine, or something, it may be, dirtier than urine.

The same Epictetus, moreover, as we have heard from Favorinus, was in the habit of saying that there were two vices which are far more severe and atrocious than all others, want of endurance and want of self-control, when we do not endure or bear the wrongs which we have to bear, or do not abstain from, or forbear, those matters and pleasures which we ough to forbear. "And so," he says, "if a man should take to heart these two words and observe them in controlling and keeping watch over himself, he will, for the most part, be free from wrongdoing, and will live a highly peaceful life." These two words, he used to say, were Anechou and Apechou.

FRAGMENT 10a When the salvation of our souls and regard for our true selves are at stake, something has to be

done, even without stopping to think about it, a saying of Epictetus which Arrian quotes with approval.

FRAGMENT 11 From the homilies of Arrian, exhorting to virtue

Now when Archelaus sent for Socrates with the intention of making him rich, the latter bade the messenger take back the following answer: "At Athens four quarts of barley-meal can be bought for an obol, and there are running springs of water." For, look you, if what I have is not sufficient for me, still, I am sufficient for it, and so it too is sufficient for me. Or do you not see that Polus was not accustomed to act Oedipus the King with any finer voice or more pleasure to his audience than Oedipus at Colonus, the outcast and beggar? And then shall the man of noble nature make a poorer showing than Polus, and not play well any role to which the Deity assigns him? And will he not follow the example of Odysseus, who was no less pre-eminent in his rags than in his rich and purple cloak?

FRAGMENT 12 From Arrian

There are certain persons who exhibit their high spirit rather gently, and in a sort of passionless manner do everything that even those who are swept away by their anger do. We must be on our guard, therefore, against the error of these persons, as something much worse than violent anger. For those who give way to violent anger are soon sated with their revenge, but the others prolong it like men who have a light fever.

FRAGMENT 13 From the Memorabilia of Epictetus

But, says someone I see the good and excellent perishing from hunger and cold.—And do you not see those who are not good and excellent perishing from luxury, and bombast, and vulgarity?—Yes, but it is disgraceful to be supported by another.—And who, O miserable fellow, is supported by himself alone, except the Cosmos? Whoever accuses Providence, therefore, because the wicked are not punished, and because they are strong and rich, is acting just as though, when the wicked had lost their eyes, he said they were not being punished because their finger-nails were in good condition. Now, as for me, I assert that there is much more difference between virtue and property than there is between eyes and finger-nails.

FRAGMENT 14 From the Memorabilia of Epictetus

... bring forward the ill-natured philosophers, who think that pleasure is not something natural, but a sequel of things that are natural, as justice, self-control, and freedom. Why indeed, then, does the soul take delight in the lesser goods of the body, and enjoy calm therein, as Epicurus says, and yet not find pleasure in its own goods, which are very great? Verily nature has also given me a sense of shame, and frequently I blush, when I feel that I am saying something disgraceful. It is this emotion which does not allow me to lay down pleasure as the good and end of life.

FRAGMENT 15 From the Memorabilia of Epictetus

At Rome the women have in their hands Plato's Republic, because he insists on community of women. For they pay attention only to the words, and not to the meaning of the man; the fact is, he does not bid people marry and live together, one man with one woman, and then go on to advocate the community of women, but he first abolishes that kind of marriage altogether, and introduces another kind in its place. And in general people delight in finding excuses for their own faults; for, indeed, philosophy says we ought not to stretch out even our finger at random!

FRAGMENT 16 From the Memorabilia of Epictetus

One ought to know that it is not easy for a man to acquire a fixed judgement, unless he should day by day state and hear the same principles, and at the same time apply them to his life.

FRAGMENT 17 From Epictetus

Now when we have been invited to a banquet, we take what is set before us; and if a person should bid his host to set before him fish or cakes, he would be regarded as eccentric. Yet in the world at large we ask the gods for things which they do not give us, and that too when there are many things which they actually have given us.

FRAGMENT 18 From Epictetus

Those are amusing persons, he said, who take great pride in the things which are not under our control. A man says, "I am better than you; for I have many estates, and you are half-dead with hunger." Another says, "I am a consular." Another, "I am a procurator." Another, "I have thick curly hair." But one horse does not say to another horse, "I am better than you, for I have quantities of fodder, and a great deal of barley, and my bridles are of gold, and my saddle-cloths are embroidered," but "I can run faster than you can." And every creature is better or worse because of its own particular virtue or vice. Can it be, then, that man is the only creature without a special

FRAGMENT 19 From Epictetus

When men are sick and their physician gives them no advice, they are annoyed, and think that he has given them up. And why should not a man feel that way toward the philosopher, and so conclude that he has given up hope of one's ever coming to a sound state of mind, if he no longer tells one anything that is of any use?

20 The same

Those whose bodies are in good condition can endure heat and cold; so also those whose souls are in an excellent condition can endure anger, and grief, and great joy, and every other emotion.

FRAGMENT 21 From Epictetus

For this reason it is right to praise Agrippinus, because, although he was a man of the very highest worth, he never praised himself, but used to blush even if someone else praised him. His character was such, said Epictetus, that when any hardship befell him he would compose a eulogy upon it; on fever, if he had a fever; on disrepute, if he suffered from disrepute; on exile, if he went into exile. And once, he said, when Agrippinus was preparing to take lunch, a man brought him word that Nero ordered him into exile; "Very well," said he, "we shall take our lunch in Aricia."

FRAGMENT 22 From Agrippinus

When Agrippinus was governor, he used to try to persuade the persons whom he sentenced that it was proper for them to be sentenced. "For," he would say, "it is not as an enemy or as a brigand that I record my vote against them, but as a curator and guardian; just as also the physician encourages the man upon whom he is operating, and persuades him to submit to the operation."

FRAGMENT 23 From Epictetus

Nature is wonderful, and, as Xenophon says, "fond of her creatures." At all events we love and tend our body, the most unpleasant and dirtiest thing that there is; why, if we had had to tend our neighbour's body for no more than five days, we could not have endured it. Just consider what a nuisance it is to get up in the morning and brush some other person's teeth, and then after attending to a call of nature to wash those parts. Truly it is wonderful to love a thing for which we perform so many services every day. I stuff this bag here; and then I empty it: what is more tiresome? But I must serve God. For that reason I remain, and endure to wash this miserable paltry body, and to feed and shelter it; and when I was younger, there was still another behest which it laid upon me, yet nevertheless I endured it. Why, then, when Nature, which gave us our body, takes it away, do you not bear it?-I love it, says somebody.-Well, but as I was just now saying, is it not Nature that has given you this very affection? But the same Nature also says, "Let it go now, and have no more trouble with it.'

FRAGMENT 24 From Epictetus

If a man dies young, he blames the gods
because he is carried off before his time. But if a man fails to die when he is old, he too blames the gods>, because, when it was long since time for him to rest, he has trouble; yet none the less, when death draws nigh, he wishes to live, and sends for the doctor, and implores him to spare no zeal and pains. People are very strange, he used to say, wishing neither to live nor to die.

FRAGMENT 25 From Epictetus

When you attack someone with vehemence and threatening, remember to tell yourself beforehand that you are a tame animal; and then you will never do anything fierce, and so will come to the end of your life without having to repent, or to be called to account.

FRAGMENT 26 You are a little soul, carrying around a corpse, as Epictetus used to say.

FRAGMENT 27 We must discover, said he, an art that deals with assent, and in the sphere of the choices we must be careful to maintain close attention, that they be made with due reservations, that they be social, and that they be according to merit; and from desire we must refrain altogether, and must exercise aversion towards none of the things that are not under our control.

FRAGMENT 28 It is no ordinary matter that is at stake, said he, but it is a question of either madness or sanity.

FRAGMENT 28a Socrates used to say, "What do you want? To have souls of rational or irrational animals?" "Of rational animals." "Of what kind of rational animals? Sound or vicious?" "Sound." "Why, then, do you not try to get them?" "Because we have them." "Why, then, do you strive and quarrel?"

FRAGMENT 28b "Me miserable, that this has befallen me!" Say not so, but rather, "Fortunate that I am, because, although this has befallen me, I continue to live untroubled, being neither crushed by the present nor afraid of the future. For something of this kind might have befallen anyone; but not everyone would have continued to live untroubled by it. Why, then, count the former aspect of the matter a misfortune, rather than this latter good fortune? And in general do you call a man's misfortune that which is not an aberration from man's nature? And does that seem to you to be an aberration from the nature of man which does not contravene the will of his nature? What then? This will of man's nature you have already learned; this, then, which has befallen you does not prevent you, does it, from being just, high-minded, selfcontrolled, self-possessed, deliberate, free from deceit, selfrespecting, free, and everything else, the possession of which enables the nature of man to come into its own?

Remember for the future, whenever anything begins to trouble you, to make use of the following judgement: This thing is not a misfortune, but to bear it in a noble spirit is good fortune.

DOUBTFUL AND SPURIOUS FRAGMENTS

29 From the Encheiridion of Epictetus

Under all circumstances take thought of nothing so much as safety; for it is safer to keep silence than to speak; and refrain from saying what will be devoid of sense and full of censure.

FRAGMENT 30 From Epictetus

We ought neither to fasten our ship to one small anchor nor our life to a single hope.

FRAGMENT 31 From the same

We ought to measure both the length of our stride, and the extent of our hope, by what is possible.

FRAGMENT 32 From Epictetus

It is much more necessary to cure the soul than the body; for death is better than a bad life.

FRAGMENT 33 From Epictetus

Those of our pleasures which come most rarely give the greatest delight.

FRAGMENT 34 From Epictetus

If a man should overpass the mean, the most delightful things would become least delightful.

FRAGMENT 35 No man is free who is not master of himself.

FRAGMENT 36 The truth is something immortal and eternal, and does not present us with a beauty that withers from the passage of time, nor a freedom of speech which can be taken away by justice, but it presents us with what is just and lawful, distinguishing the unlawful therefrom, and refuting it.

THE ENCHEIRIDION, OR MANUAL [SUMMARY]

This celebrated work is a compilation made by Arrian himself from the Discourses, and the great majority of those who know Epictetus at all have come to do so from this little book alone. That is a pity, because the necessary aridity and formalism of such a systematization obscure the more modest, human, and sympathetic aspects of the great teacher's character. Most of the unfavourable criticism which has been passed upon Epictetus—and there is some of this, although not much—is clearly based upon the occasionally somewhat inadequate impressions which any compendium must produce. For it may be doubted whether even so noble a statement as the Apostles' Creed has ever made a single convert.

Occasionally Arrian has modified to a slight degree the form of statement, as we may observe from the numerous instances, amounting to somewhat more than half of the book, where material from the first four books of the Discourses has been employed; but the substance seems to have been faithfully preserved, wherever it is possible to follow his procedure in detail.

The separate editions and translations of the Encheiridion are extremely numerous. Few, however, have been of any notable value, except, perhaps, the celebrated translations by Politian and Leopardi, and Schweighäuser's separate edition of 1798, which is still the last independent critical text, and has been reprinted by most subsequent editors, even Schenkl, although the latter has added much useful critical material in his notes, especially those which indicate the probable sources of such passages as seem to be derived from the four books of the Discourses, and in particular has arranged the apparatus criticus in more convenient terms.

THE ENCHEIRIDION OF EPICTETUS

1. Some things are under our control, while others are not under our control. Under our control are conception, choice, desire, aversion, and, in a word, everything that is our own

THE GRAND BIBLE

doing; not under our control are our body, our property, reputation, office, and, in a word, everything that is not our own doing. Furthermore, the things under our control are by nature free, unhindered, and unimpeded; while the things not under our control are weak, servile, subject to hindrance, and not our own. Remember, therefore, that if what is naturally slavish you think to be free, and what is not your own to be your own, you will be hampered, will grieve, will be in turmoil, and will blame both gods and men; while if you think only what is your own to be your own, and what is not your own to be, as it really is, not your own, then no one will ever be able to exert compulsion upon you, no one will hinder you, you will blame no one, will find fault with no one, will do absolutely nothing against your will, you will have no personal enemy, no one will harm you, for neither is there any harm that can touch you.

With such high aims, therefore, remember that you must bestir yourself with no slight effort to lay hold of them, but you will have to give up some things entirely, and defer others for the time being. But if you wish for these things also, and at the same time for both office and wealth, it may be that you will not get even these latter, because you aim also at the former, and certainly you will fail to get the former, which alone bring freedom and happiness.

Make it, therefore, your study at the very outset to say to every harsh external impression, "You are an external impression and not at all what you appear to be." After that examine it and test it by these rules which you have, the first and most important of which is this: Whether the impression has to do with the things which are under our control, or with those which are not under our control, and, if it has to do with some one of the things not under our control, have ready to hand the answer, "It is nothing to me."

2 Remember that the promise of desire is the attainment of what you desire, that of aversion is not to fall into what is avoided, and that he who fails in his desire is unfortunate, while he who falls into what he would avoid experiences misfortune. If, then, you avoid only what is unnatural among those things which are under your control, you will fall into none of the things which you avoid; but if you try to avoid disease, or death, or poverty, you will experience misfortune. Withdraw, therefore, your aversion from all the matters that are not under our control, and transfer it to what is unnatural among those which are under our control. But for the time being remove utterly your desire; for if you desire some one of the things that are not under our control you are bound to be unfortunate; and, at the same time, not one of the things that are under our control which it would be excellent for you to desire, is within your grasp. But employ only choice and refusal, and these too but lightly, and with reservations, and without straining.

3 With everything which entertains you, is useful, or of which you are fond, remember to say to yourself, beginning with the very least things, "What is its nature?" If you are fond of a jug, say, "I am fond of a jug"; for when it is broken you will not be disturbed. If you kiss your own child or wife, say to yourself that you are kissing a human being; for when it dies you will not be disturbed.

4 When you are on the point of putting your hand to some undertaking, remind yourself what the nature of that undertaking is. If you are going out of the house to bathe, put before your mind what happens at a public bath—those who splash you with water, those who jostle against you, those who vilify you and rob you. And thus you will set about your undertaking more securely if at the outset you say to yourself, "I want to take a bath, and, at the same time, to keep my moral purpose in harmony with nature." And so do in every undertaking. For thus, if anything happens to hinder you in your bathing, you will be ready to say, "Oh, well, this was not the only thing that I wanted, but I wanted also to keep my moral purpose in harmony with nature; and I shall not so keep it if I am vexed at what is going on."

5 It is not the things themselves that disturb men, but their judgements about these things. For example, death is nothing dreadful, or else Socrates too would have thought so, but the judgement that death is dreadful, this is the dreadful thing. When, therefore, we are hindered, or disturbed, or grieved, let us never blame anyone but ourselves, that means, our own judgements. It is the part of an uneducated person to blame others where he himself fares ill; to blame himself is the part of one whose education has begun; to blame neither another nor his own self is the part of one whose education is already complete.

6 Be not elated at any excellence which is not your own. If the horse in his elation were to say, "I am beautiful," it could be endured; but when you say in your elation, "I have a beautiful horse," rest assured that you are elated at something good which belongs to a horse. What, then, is your own? The use of external impressions. Therefore, when you are in harmony with nature in the use of external impressions, then be elated; for then it will be some good of your own at which you will be elated.

7 Just as on a voyage, when your ship has anchored, if you should go on shore to get fresh water, you may pick up a small

shell-fish or little bulb on the way, but you have to keep your attention fixed on the ship, and turn about frequently for fear lest the captain should call; and if he calls, you must give up all these things, if you would escape being thrown on board all tied up like the sheep. So it is also in life: If there be given you, instead of a little bulb and a small shell-fish, a little wife and child, there will be no objection to that; only, if the Captain calls, give up all these things and run to the ship, without even turning around to look back. And if you are an old man, never even get very far away from the ship, for fear that when He calls you may be missing.

8 Do not seek to have everything that happens happen as you wish, but wish for everything to happen as it actually does happen, and your life will be serene.

9 Disease is an impediment to the body, but not to the moral purpose, unless that consents. Lameness is an impediment to the leg, but not to the moral purpose. And say this to yourself at each thing that befalls you; for you will find the thing to be an impediment to something else, but not to yourself.

10 In the case of everything that befalls you, remember to turn to yourself and see what faculty you have to deal with it. If you see a handsome lad or woman, you will find continence the faculty to employ here; if hard labour is laid upon you, you will find endurance; if reviling, you will find patience to bear evil. And if you habituate yourself in this fashion, your external impressions will not run away with you.

11 Never say about anything, "I have lost it," but only "I have given it back." Is your child dead? It has been given back. Is your wife dead? She has been given back. "I have had my farm taken away." Very well, this too has been given back. "Yet it was a rascal who took it away." But what concern is it of yours by whose instrumentality the Giver called for its return? So long as He gives it you, take care of it as of a thing that is not your own, as travellers treat their inn.

12 If you wish to make progress, dismiss all reasoning of this sort: "If I neglect my affairs, I shall have nothing to live on." "If I do not punish my slave-boy he will turn out bad." For it is better to die of hunger, but in a state of freedom from grief and fear, than to live in plenty, but troubled in mind. And it is better for your slave-boy to be bad than for you to be unhappy. Begin, therefore, with the little things. Your paltry oil gets spilled, your miserable wine stolen; say to yourself, "This is the price paid for a calm spirit, this the price for peace of mind." Nothing is got without a price. And when you call your slave-boy, bear in mind that it is possible he may not heed you, and again, that even if he does heed, he may not do what you want done. But he is not in so happy a condition that your peace of mind depends upon him.

13 If you wish to make progress, then be content to appear senseless and foolish in externals, do not make it your wish to give the appearance of knowing anything; and if some people think you to be an important personage, distrust yourself. For be assured that it is no easy matter to keep your moral purpose in a state of conformity with nature, and, at the same time, to keep externals; but the man who devotes his attention to one of these two things must inevitably neglect the other.

14 If you make it your will that your children and your wife and your friends should live for ever, you are silly; for you are making it your will that things not under your control should be under your control, and that what is not your own should be your own. In the same way, too, if you make it your will that your slave-boy be free from faults, you are a fool; for you are making it your will that vice be not vice, but something else. If, however, it is your will not to fail in what you desire, this is in your power. Wherefore, exercise yourself in that which is in your power. Each man's master is the person who has the authority over what the man wishes or does not wish, so as to secure it, or take it away. Whoever, therefore, wants to be free, let him neither wish for anything, nor avoid anything, that is under the control of others; or else he is necessarily a slave.

15 Remember that you ought to behave in life as you would at a banquet. As something is being passed around it comes to you; stretch out your hand and take a portion of it politely. It passes on; do not detain it. Or it has not come to you yet; do not project your desire to meet it, but wait until it comes in front of you. So act toward children, so toward a wife, so toward office, so toward wealth; and then some day you will be worthy of the banquets of the gods. But if you do not take these things even when they are set before you, but despise them, then you will not only share the banquet of the gods, but share also their rule. For it was by so doing that Diogenes and Heracleitus, and men like them, were deservedly divine and deservedly so called.

16 When you see someone weeping in sorrow, either because a child has gone on a journey, or because he has lost his property, beware that you be not carried away by the impression that the man is in the midst of external ills, but straightway keep before you this thought: "It is not what has happened that distresses this man (for it does not distress another), but his judgement about it." Do not, however, hesitate to sympathize with him so far as words go, and, if

occasion offers, even to groan with him; but be careful not to fear groan also in the centre of your being. 17 Remember that you are an actor in a play, the character

of which is determined by the Playmright: if He wishes the play to be short, it is short; if long, it is long; if He wishes you to play the part of a beggar, remember to act even this rôle adroitly; and so if your rôle be that of a cripple, an official, or a layman. For this is your business, to play admirably the rôle assigned you; but the selection of that rôle is Another's.

18 When a raven croaks inauspiciously, let not the external impression carry you away, but straightway draw a distinction in your own mind, and say, "None of these portents are for me, but either for my paltry body, or my paltry estate, or my paltry opinion, or my children, or my wife. But for me every portent is favourable, if I so wish; for whatever be the outcome, it is within my power to derive benefit from it."

19 You can be invincible if you never enter a contest in which victory is not under your control. Beware lest, when you see some person preferred to you in honour, or possessing great power, or otherwise enjoying high repute, you are ever carried away by the external impression, and deem him happy. For if the true nature of the good is one of the things that are under our control, there is no place for either envy or jealousy; and you yourself will not wish to be a praetor, or a senator, or a consul, but a free man. Now there is but one way that leads to this, and that is to despise the things that are not under our control.

20 Bear in mind that it is not the man who reviles or strikes you that insults you, but it is your judgement that these men are insulting you. Therefore, when someone irritates you, be assured that it is your own opinion which has irritated you. And so make it your first endeavour not to be carried away by the external impression; for if once you gain time and delay, you will more easily become master of yourself.

21 Keep before your eyes day by day death and exile, and everything that seems terrible, but most of all death; and then you will never have any abject thought, nor will you yearn for anything beyond measure.

22 If you yearn for philosophy, prepare at once to be met with ridicule, to have many people jeer at you, and say, "Here he is again, turned philosopher all of a sudden," and "Where do you suppose he got that high brow?" But do you not put on a high brow, and do you so hold fast to the things which to you seem best, as a man who has been assigned by God to this post; and remember that if you abide by the same principles, those who formerly used to laugh at you will later come to admire you, but if you are worsted by them, you will get the laugh on yourself twice.

23 If it should ever happen to you that you turn to externals with a view to pleasing someone, rest assured that you have lost your plan of life. Be content, therefore, in everything to be a philosopher, and if you wish also to be taken for one, show to yourself that you are one, and you will be able to accomplish it.

24 Let not these reflections oppress you: "I shall live without honour, and be nobody anywhere." For, if lack of honour is an evil, you cannot be in evil through the instrumentality of some other person, any more than you can be in shame. It is not your business, is it, to get office, or to be invited to a dinner-party? Certainly not. How, then, can this be any longer a lack of honour? And how is it that you will be "nobody anywhere," when you ought to be somebody only in those things which are under your control, wherein you are privileged to be a man of the very greatest honour? But your friends will be without assistance? What do you mean by being "without assistance"? They will not have paltry coin from you, and you will not make them Roman citizens. Well, who told you that these are some of the matters under our control, and not rather things which others do? And who is able to give another what he does not himself have? "Get money, then," says some friend, "in order that we too may have it." If I can get money and at the same time keep myself self-respecting, and faithful, and high-minded, show me the way and I will get it. But if you require me to lose the good things that belong to me, in order that you may acquire the things that are not good, you can see for yourselves how unfair and inconsiderate you are. And which do you really prefer? Money, or a faithful and self-respecting friend? Help me, therefore, rather to this end, and do not require me to do those things which will make me lose these qualities.

"But my country," says he, "so far as lies in me, will be without assistance." Again I ask, what kind of assistance do you mean? It will not have loggias or baths of your providing. And what does that signify? For neither does it have shoes provided by the blacksmith, nor has it arms provided by the cobbler; but it is sufficient if each man fulfil his own proper function. And if you secured for it another faithful and selfrespecting citizen, would you not be doing it any good? "Yes." Very well, and then you also would not be useless to it. "What place, then, shall I have in the State?" says he. Whatever place you can have, and at the same time maintain the man of fidelity and self-respect that is in you. But if, through your desire to help the State, you lose these qualities, of what good would you become to it, when in the end you turned out to be shameless and unfaithful?

25 Has someone been honoured above you at a dinner-party, or in salutation, or in being called in to give advice? Now if these matters are good, you ought to be happy that he got them; but if evil, be not distressed because you did not get them; and bear in mind that, if you do not act the same way that others do, with a view to getting things which are not under our control, you cannot be considered worthy to receive an equal share with others. Why, how is it possible for a person who does not haunt some man's door, to have equal shares with the man who does? For the man who does not do escort duty, with the man who does? For the man who does not praise, with the man who does? You will be unjust, therefore, and insatiable, if, while refusing to pay the price for which such things are bought, you want to obtain them for nothing. Well, what is the price for heads of lettuce? An obol, perhaps. If, then, somebody gives up his obol and gets his heads of lettuce, while you do not give your obol, and do not get them, do not imagine that you are worse off than the man who gets his lettuce. For as he has his heads of lettuce, so you have your obol which you have not given away

Now it is the same way also in life. You have not been invited to somebody's dinner-party? Of course not; for you didn't give the host the price at which he sells his dinner. He sells it for praise; he sells it for personal attention. Give him the price, then, for which it is sold, if it is to your interest. But if you wish both not to give up the one and yet to get the other, you are insatiable and a simpleton. Have you, then, nothing in place of the dinner? Indeed you have; you have not had to praise the man you did not want to praise; you have not had to put up with the insolence of his doorkeepers.

26 What the will of nature is may be learned from a consideration of the points in which we do not differ from one another. For example, when some other person's slave-boy breaks his drinking-cup, you are instantly ready to say, "That's one of the things which happen." Rest assured, then, that when your own drinking-cup gets broken, you ought to behave in the same way that you do when the other man's cup is broken. Apply now the same principle to the matters of greater importance. Some other person's child or wife has died; no one but would say, "Such is the fate of man." Yet when a man's own child dies, immediately the cry is, "Alas! Woe is me!" But we ought to remember how we feel when we hear of the same misfortune befalling others.

27 Just as a mark is not set up in order to be missed, so neither does the nature of evil arise in the universe.

28 If someone handed over your body to any person who met you, you would be vexed; but that you hand over your mind to any person that comes along, so that, if he reviles you, it is disturbed and troubled—are you not ashamed of that?

29 In each separate thing that you do, consider the matters which come first and those which follow after, and only then approach the thing itself. Otherwise, at the start you will come to it enthusiastically, because you have never reflected upon any of the subsequent steps, but later on, when some difficulties appear, you will give up disgracefully. Do you wish to win an Olympic victory? So do I, by the gods! for it is a fine thing. But consider the matters which come before that, and those which follow after, and only when you have done that, put your hand to the task. You have to submit to discipline, follow a strict diet, give up sweet cakes, train under compulsion, at a fixed hour, in heat or in cold; you must not drink cold water, nor wine just whenever you feel like it; you must have turned yourself over to your trainer precisely as you would to a physician. Then when the contest comes on, you have to "dig in" beside your opponent, and sometimes dislocate your wrist, sprain your ankle, swallow quantities of sand, sometimes take a scourging, and along with all that get beaten. After you have considered all these points, go on into the games, if you still wish to do so; otherwise, you will be turning back like children. Sometimes they play wrestlers, again gladiators, again they blow trumpets, and then act a play. So you too are now an athlete, now a gladiator, then a rhetorician, then a philosopher, yet with your whole soul nothing; but like an ape you imitate whatever you see, and one thing after another strikes your fancy. For you have never gone out after anything with circumspection, nor after you had examined it all over, but you act at haphazard and halfheartedly.

In the same way, when some people have seen a philosopher and have heard someone speaking like Euphrates (though, indeed, who can speak like him?), they wish to be philosophers themselves. Man, consider first the nature of the business, and then learn your own natural ability, if you are able to bear it. Do you wish to be a contender in the pentathlon, or a wrestler? Look to your arms, your thighs, see what your loins are like. For one man has a natural talent for one thing, another for another. Do you suppose that you can eat in the same fashion, drink in the same fashion, give way to impulse and to irritation, just as you do now? You must keep vigils, work hard, abandon your own people, be despised by a paltry slave, be laughed to scorn by those who meet you, in everything get the worst of it, in honour, in office, in court, in every paltry affair. Look these drawbacks over carefully, if you are willing at the price of these things to secure tranquility, freedom and calm. Otherwise, do not approach philosophy; don't act like a child—now a philosopher, later on a tax-gatherer, then a rhetorician, then a procurator of Caesar. These things do not go together. You must be one person, either good or bad; you must labour to improve either your own governing principle or externals; you must work hard either on the inner man, or on things outside; that is, play either the rôle of a philosopher or else that of a lawan.

30 Our duties are in general measured by our social relationships. He is a father. One is called upon to take care of him, to give way to him in all things, to submit when he reviles or strikes you. "But he is a bad father." Did nature, then, bring you into relationship with a good father? No, but simply with a father. "My brother does me wrong." Very well, then, maintain the relation that you have toward him; and do not consider what he is doing, but what you will have to do, if your moral purpose is to be in harmony with nature. For no one will harm you without your consent; you will have been harmed only when you think you are harmed. In this way, therefore, you will discover what duty to expect of your acquire the habit of looking at your social relations with them.

31 In piety towards the gods, I would have you know, the chief element is this, to have right opinions about them-as existing and as administering the universe well and justlyand to have set yourself to obey them and to submit to everything that happens, and to follow it voluntarily, in the belief that it is being fulfilled by the highest intelligence. For if you act in this way, you will never blame the gods, nor find fault with them for neglecting you. But this result cannot be secured in any other way than by withdrawing your idea of the good and the evil from the things which are not under our control, and placing it in those which are under our control, and in those alone. Because, if you think any of those former things to be good or evil, then, when you fail to get what you want and fall into what you do not want, it is altogether inevitable that you will blame and hate those who are responsible for these results. For this is the nature of every living creature, to flee from and to turn aside from the things that appear harmful, and all that produces them, and to pursue after and to admire the things that are helpful, and all that produces them. Therefore, it is impossible for a man who thinks that he is being hurt to take pleasure in that which he thinks is hurting him, just as it is also impossible for him to take pleasure in the hurt itself. Hence it follows that even a father is reviled by a son when he does not give his child some share in the things that seem to be good; and this it was which made Polyneices and Eteocles enemies of one another, the thought that the royal power was a good thing. That is why the farmer reviles the gods, and so also the sailor, and the merchant, and those who have lost their wives and their children. For where a man's interest lies, there is also his piety. Wherefore, whoever is careful to exercise desire and aversion as he should, is at the same time careful also about piety. But it is always appropriate to make libations, and sacrifices, and to give of the firstfruits after the manner of our fathers, and to do all this with purity, and not in a slovenly or careless fashion, nor, indeed, in a niggardly way, nor yet beyond our means

32 When you have recourse to divination, remember that you do not know what the issue is going to be, but that you have come in order to find this out from the diviner; yet if you are indeed a philosopher, you know, when you arrive, what the nature of it is. For if it is one of the things which are not under our control, it is altogether necessary that what is going to take place is neither good nor evil. Do not, therefore. bring to the diviner desire or aversion, and do not approach him with trembling, but having first made up your mind that every issue is indifferent and nothing to you, but that, whatever it may be, it will be possible for you to turn it to good use, and that no one will prevent this. Go, then, with confidence to the gods as to counsellors; and after that, when some counsel has been given you, remember whom you have taken as counsellors, and whom you will be disregarding if you disobey. But go to divination as Socrates thought that men should go, that is, in cases where the whole inquiry has reference to the outcome, and where neither from reason nor from any other technical art are means vouchsafed for discovering the matter in question. Hence, when it is your duty to share the danger of a friend or of your country, do not ask of the diviner whether you ought to share that danger. For if the diviner forewarns you that the omens of sacrifice have been unfavourable, it is clear that death is portended, or the injury of some member of your body, or exile; yet reason requires that even at this risk you are to stand by your friend. and share the danger with your country. Wherefore, give heed to the greater diviner, the Pythian Apollo, who cast out of his temple the man who had not helped his friend when he was being murdered.

33 Lay down for yourself, at the outset, a certain stamp and type of character for yourself, which you are to maintain

whether you are by yourself or are meeting with people. And be silent for the most part, or else make only the most necessary remarks, and express these in few words. But rarely, and when occasion requires you to talk, talk, indeed, but about no ordinary topics. Do not talk about gladiators, or horse-races, or athletes, or things to eat or drink—topics that arise on all occasions; but above all, do not talk about people, either blaming, or praising, or comparing them. If, then, you can, by your own conversation bring over that of your companions to what is seemly. But if you happen to be left alone in the presence of aliens, keep silence.

Do not laugh much, nor at many things, nor boisterously. Refuse, if you can, to take an oath at all, but if that is impossible, refuse as far as circumstances allow.

Avoid entertainments given by outsiders and by persons ignorant of philosophy; but if an appropriate occasion arises for you to attend, be on the alert to avoid lapsing into the behaviour of such laymen. For you may rest assured, that, if a man's companion be dirty, the person who keeps close company with him must of necessity get a share of his dirt, even though he himself happens to be clean.

In things that pertain to the body take only as much as your bare need requires, I mean such things as food, drink, clothing, shelter, and household slaves; but cut down everything which is for outward show or luxury.

In your sex-life preserve purity, as far as you can, before marriage, and, if you indulge, take only those privileges which are lawful. However, do not make yourself offensive, or censorious, to those who do indulge, and do not make frequent mention of the fact that you do not yourself indulge.

If someone brings you word that So-and-so is speaking ill of you, do not defend yourself against what has been said, but answer, "Yes, indeed, for he did not know the rest of the faults that attach to me; if he had, these would not have been the only ones he mentioned."

It is not necessary, for the most part, to go to the public shows. If, however, a suitable occasion ever arises, show that your principal concern is for none other than yourself, which means, wish only for that to happen which does happen, and for him only to win who does win; for so you will suffer no hindrance. But refrain utterly from shouting, or laughter at anyone, or great excitement. And after you have left, do not talk a great deal about what took place, except in so far as it contributes to your own improvement; for such behaviour indicates that the spectacle has aroused your admiration.

Do not go rashly or readily to people's public readings, but when you do go, maintain your own dignity and gravity, and at the same time be careful not to make yourself disagreeable.

When you are about to meet somebody, in particular when it is one of those men who are held in very high esteem, propose to yourself the question, "What would Socrates or Zeno have done under these circumstances?" and then you will not be at a loss to make proper use of the occasion. When you go to see one of those men who have great power, propose to yourself the thought, that you will not find him at home, that you will be shut out, that the door will be slammed in your face, that he will pay no attention to you. And if, despite all this, it is your duty to go, go and take what comes, and never say to yourself, "It was not worth all the trouble." For this is characteristic of the layman, that is, a man who is vexed at externals.

In your conversation avoid making mention at great length and excessively of your own deeds or dangers, because it is not as pleasant for others to hear about your adventures, as it is for you to call to mind your own dangers.

Avoid also raising a laugh, for this is a kind of behaviour that slips easily into vulgarity, and at the same time is calculated to lessen the respect which your neighbours have of you. It is dangerous also to lapse into foul language. When, therefore, anything of the sort occurs, if the occasion be suitable, go even so far as to reprove the person who has made such a lapse; if, however, the occasion does not arise, at all events show by keeping silence, and blushing, and frowning, that you are displeased by what has been said.

34 When you get an external impression of some pleasure, guard yourself, as with impressions in general, against being carried away by it; nay, let the matter wait upon your leisure, and give yourself a little delay. Next think of the two periods of time, first, that in which you will enjoy your pleasure, and second, that in which, after the enjoyment is over, you will later repent and revile your own self; and set over against these two periods of time how much joy and self-satisfaction you will get if you refrain. However, if you feel that a suitable occasion has arisen to do the deed, be careful not to allow its enticement, and sweetness, and attractiveness to overcome you; but set over against all this the thought, how much better is the consciousness of having won a victory over it.

35 When you do a thing which you have made up your mind ought to be done, never try not to be seen doing it, even though most people are likely to think unfavourably about it. If, however, what you are doing is not right, avoid the deed itself altogether; but if it is right, why fear those who are going to rebuke you wrongly? 36 Just as the propositions, "It is day," and "It is night," are full of meaning when separated, but meaningless if united; so also, granted that for you to take the larger share at a dinner is good for your body, still, it is bad for the maintenance of the proper kind of social feeling. When, therefore, you are eating with another person, remember to regard, not merely the value for your body of what lies before you, but also to maintain your respect for your host.

37 If you undertake a rôle which is beyond your powers, you both disgrace yourself in that one, and at the same time neglect the rôle which you might have filled with success.

38 Just as you are careful, in walking about, not to step on a nail or to sprain your ankle, so be careful also not to hurt your governing principle. And if we observe this rule in every action, we shall be more secure in setting about it.

39 Each man's body is a measure for his property, just as the foot is a measure for his shoe. If, then, you abide by this principle, you will maintain the proper measure, but if you go beyond it, you cannot help but fall headlong over a precipice, as it were, in the end. So also in the case of your shoe; if once you go beyond the foot, you get first a gilded shoe, then a purple one, then an embroidered one. For once you go beyond the measure there is no limit.

40 Immediately after they are fourteen, women are called "ladies" by men. And so when they see that they have nothing else but only to be the bed-fellows of men, they begin to beautify themselves, and put all their hopes in that. It is worth while for us to take pains, therefore, to make them understand that they are honoured for nothing else but only for appearing modest and self-respecting.

41 It is a mark of an ungifted man to spend a great deal of time in what concerns his body, as in much exercise, much eating, much drinking, much evacuating of the bowels, much copulating. But these things are to be done in passing; and let your whole attention be devoted to the mind.

42 When someone treats you ill or speaks ill of you, remember that he acts or speaks thus because he thinks it is incumbent upon him. That being the case, it is impossible for him to follow what appears good to you, but what appears good to himself; whence it follows, that, if he gets a wrong view of things, the man that suffers is the man that has been deceived. For if a person thinks a true composite judgement to be false, the composite judgement does not suffer, but the person who has been deceived. If, therefore, you start from this point of view, you will be gentle with the man who reviles you. For you should say on each occasion, "He thought that way about it."

43 Everything has two handles, by one of which it ought to be carried and by the other not. If your brother wrongs you, do not lay hold of the matter by the handle of the wrong that he is doing, because this is the handle by which the matter ought not to be carried; but rather by the other handle—that he is your brother, that you were brought up together, and then you will be laying hold of the matter by the handle by which it ought to be carried.

44 The following statements constitute a non sequitur: "I am richer than you are, therefore I am superior to you"; or, "I am more eloquent than you are, therefore I am superior to you." But the following conclusions are better: "I am richer than you are, therefore my property is superior to yours"; or, "I am more eloquent than you are, therefore my elocution is superior to yours." But you are neither property nor elocution.

45 Somebody is hasty about bathing; do not say that he bathes badly, but that he is hasty about bathing. Somebody drinks a good deal of wine; do not say that he drinks badly, but that he drinks a good deal. For until you have decided what judgement prompts him, how do you know that what he is doing is bad? And thus the final result will not be that you receive convincing sense-impressions of some things, but give your assent to others.

46 On no occasion call yourself a philosopher, and do not, for the most part, talk among laymen about your philosophic principles, but do what follows from your principles. For example, at a banquet do not say how people ought to eat, but eat as a man ought. For remember how Socrates had so completely eliminated the thought of ostentation, that people came to him when they wanted him to introduce them to philosophers, and he used to bring them along. So well did he submit to being overlooked. And if talk about some philosophic principle arises among laymen, keep silence for the most part, for there is great danger that you will spew up immediately what you have not digested. So when a man tells you that you know nothing, and you, like Socrates, are not hurt, then rest assured that you are making a beginning with the business you have undertaken. For sheep, too, do not bring their fodder to the shepherds and show how much they have eaten, but they digest their food within them, and on the outside produce wool and milk. And so do you, therefore, make no display to the laymen of your philosophical principles, but let them see the results which come from these principles when digested.

47 When you have become adjusted to simple living in regard to your bodily wants, do not preen yourself about the

accomplishment; and so likewise, if you are a water-drinker, do not on every occasion say that you are a water-drinker. And if ever you want to train to develop physical endurance, do it by yourself and not for outsiders to behold; do not throw your arms around statues, but on occasion, when you are very thirsty, take cold water into your mouth, and then spit it out, without telling anybody.

48 This is the position and character of a layman: He never looks for either help or harm from himself, but only from externals. This is the position and character of the philosopher: He looks for all his help or harm from himself.

Signs of one who is making progress are: He censures no one, praises no one, blames no one, finds fault with no one, says nothing about himself as though he were somebody or knew something. When he is hampered or prevented, he blames himself. And if anyone compliments him, he smiles to himself at the person complimenting; while if anyone censures him, he makes no defence. He goes about like an invalid, being careful not to disturb, before it has grown firm, any part which is getting well. He has put away from himself his only, of what is under our control, which are contrary to nature. He exercises no pronounced choice in regard to anything. If he gives the appearance of being foolish or ignorant he does not care. In a word, he keeps guard against himself as though he were his own enemy lying in wait.

49 When a person gives himself airs because he can understand and interpret the books of Chrysippus, say to yourself, "If Chrysippus had not written obscurely, this man would have nothing about which to give himself airs."

But what is it I want? To learn nature and to follow her. I seek, therefore, someone to interpret her; and having heard that Chrysippus does so, I go to him. But I do not understand what he has written; I seek, therefore, the person who interprets Chrysippus. And down to this point there is nothing to justify pride. But when I find the interpreter, what remains is to put his precepts into practice; this is the only thing to be proud about. If, however, I admire the mere act of interpretation, what have I done but turned into a grammarian instead of a philosopher? The only difference, indeed, is that I interpret Chrysippus instead of Homer. Far from being proud, therefore, when somebody says to me, "Read me Chrysippus," I blush the rather, when I am unable to show him such deeds as match and harmonize with his words.

50 Whatever principles are set before you, stand fast by these like laws, feeling that it would be impiety for you to transgress them. But pay no attention to what somebody says about you, for this is, at length, not under your control.

51 How long will you still wait to think yourself worthy of the best things, and in nothing to transgress against the distinctions set up by the reason? You have received the philosophical principles which you ought to accept, and you have accepted them. What sort of a teacher, then, do you still wait for, that you should put off reforming yourself until he arrives? You are no longer a lad, but already a full-grown man. If you are now neglectful and easy-going, and always making one delay after another, and fixing first one day and then another, after which you will pay attention to yourself, then without realising it you will make no progress, but, living and dying, will continue to be a layman throughout. Make up your mind, therefore, before it is too late, that the fitting thing for you to do is to live as a mature man who is making progress, and let everything which seems to you to be best be for you a law that must not be transgressed. And if you meet anything that is laborious, or sweet, or held in high repute, or in no repute, remember that now is the contest, and here before you are the Olympic games, and that it is impossible to delay any longer, and that it depends on a single day and a single action, whether progress is lost or saved. This is the way Socrates became what he was, by paying attention to nothing but his reason in everything that he encountered. And even if you are not yet a Socrates, still you ought to live as one who wishes to be a Socrates.

52 The first and most necessary division in philosophy is that which has to do with the application of the principles, as, for example, Do not lie. The second deals with the demonstrations, as, for example. How comes it that we ought not to lie? The third confirms and discriminates between these processes, as, for example, How does it come that this is a proof? For what is a proof, what is logical consequence, what contradiction, what truth, what falsehood? Therefore, the third division is necessary because of the second, and the second because of the first; while the most necessary of all, and the one in which we ought to rest, is the first. But we do the opposite; for we spend our time in the third division, and all our zeal is devoted to it, while we utterly neglect the first. Wherefore, we lie, indeed, but are ready with the arguments which prove that one ought not to lie.

53 Upon every occasion we ought to have the following thoughts at our command:

Lead thou me on, O Zeus, and Destiny, To that goal long ago to me assigned.

I shall follow and not falter: if my will

Prove weak and craven, still I shall follow on. "Whoso has rightly with necessity complied, We count him wise, and skilled in things divine." "Well, O Crito, if so it is pleasing to the gods, so let it be." "Anytus and Meletus can kill me, but they cannot hurt me."

MEDITATIONS - THINGS TO ONE'S SELF or Writings To Himself By Emperor Marcus Aurelius Antoninus Source: Codex Palatinus, Codex Vaticanus 1950 Translation: R. Graves, 1911 Estimated Range of Dating: 160-180 A.D.

(Meditations [Greek: Ta eis heauton, lit. 'things to one's sell'] is a series of personal writings, a diary if you will, written by Marcus Aurelius Antoninus who was a Stoic philosopher but also Roman Emperor from 161 to 180 AD. Marcus Aurelius' work Meditations, written while on campaign between 170 and 180, is still loved by many readers because it gives good advice. Like all other Romans of the upper class, he used Greek as this has been the language of the Roman upper class for hundreds of years.

Meditations serves as an example of how Marcus approached the Platonic ideal of a philosopher-king, and how he symbolised much of what was best about Roman civilisation. His text belongs to a genre known as "wisdom literature" in religious texts. So, it is no surprise that the oldest copy of his Meditations has been found together with the four canonical gospels in the Codex Palatinus and other codex collections. Marcus Aurelius wrote the 12 books of the Meditations as a source for his own guidance and selfimprovement and it seems unlikely that he ever intended the writings to be published. This is the reason why the work has no official title. There are several titles that have been proposed such as "Writings to Himself" or "Things to One's Self ". Although these titles might reflect well the contents, they were perceived as somewhat awkward, and most publishers chose "Meditations" to assign his entire text collection. It is possible that large portions of the work were written at Sirmium [now Sremska, Serbia], where he spent much time planning military campaigns from 170 to 180. Some of it was written while he was positioned at Aquincum on campaign in Pannonia, because internal notes tell us that the first book was written when he was campaigning against the Quadi on the river Granova (modern-day Hron) and the second book was written at Carnuntum [32 km / 20 mi east of Viennal

Before we read these texts, we ought to take a closer look at the man as the scarce information about him reveals his extraordinary character. It also explains why you find his writings here. The major sources depicting the life and rule of Marcus are frequently unreliable. The most important group of sources, the biographies contained in the Historia Augusta, claim to be written by a group of authors at the turn of the 4th century AD, but it is believed they were in fact written by a single author (referred to here as 'the biographer') from about 395 AD. The later biographies and the biographies of subordinate emperors and usurpers are unreliable, but the earlier biographies, derived primarily from now-lost earlier sources (Marius Maximus or Ignotus), are much more accurate. For Marcus' life and rule, the biographies of Hadrian, Antoninus, Marcus, and Lucius are largely reliable, but those of Aelius Verus and Avidius Cassius are not. Some surviving letters, between Marcus and his teacher Fronto from c. 138 to 166, look as patchy as the biographies written on him. The only texts that offer a window on his inner life are the Meditations. At the first glimpse, his writings have nothing to do with Christianity but when we know that his displayed philosophy was also the mindset of the Flavian Dynasty and when we know that the Flavians had their editing hand in the creation of the first three gospels [Matthew, Mark, and Luke] then we immediately grasp why these gospels are full of Stoic teachings. And this is the reason why we find Marcus writings frequently in company of Christian writings.

Marcus Aurelius Antoninus (121–180 AD) was Roman Emperor from 161 to 180. He ruled with Lucius Verus as coemperor from 161 until Verus' death in 169. He is knowns as the last of the Five Good Emperors*, and is considered one of the most important Stoic philosophers mainly because his writings are the only Stoic texts that have survived when the Roman Christians came to power in the 4th century and burned most non-Christian books. [* The rulers commonly known as the "Five Good Emperors" were Nerva, Trajan, Hadrian, Antoninus Pius, and Marcus Aurelius. The term was coined by Niccolò Machiavelli in The Discourses on Livy (Book 1, Chapter 10.). Machiavelli argued that these adopted emperors earned the respect of those around them through good governing: "Titus, Nerva, Trajan, Hadrian, Antoninus, and Marcus had no need of praetorian cohorts, or of countless legions to guard them, but were defended by their own good lives, the good-will of their subjects, and the attachment of the senate.1

Marcus' reign was marked by at least five important events: (1st) The constant wars against the German tribes who tried to break into the territory of the Roman Empire due to the westward pressure of Goths and subsequently the arriving Huns, (2nd) a decisive victory over the Persian Parthian Empire, (3rd) a plague of smallpox that ravaged the Roman Empire and probably weakened the Parthian Empire before its defeat, (4th) the official begin of diplomatic relations between the Roman Empire and the Chinese Han Empire, (5th) sensible politics within the Roman Empire according to the teachings of Stoicism.

At the start of his reign, the Empire, under the joint rule of Marcus and Lucius Verus, defeated the Parthian Empire in a war from 161 to 166. The unforeseen consequences for the Empire were great. The returning troops brought with them the so-called Antonine Plague, which may have been smallpox. It would eventually kill about 5 million people, and severely weaken the Empire.

Aurelius fought the German tribes during a long war from 166 to 180. The pressure from the Goths moving west, pushed settled Germanic tribes into invading Roman territory at the entire Limes [Roman border] from the River Rhine to the River Danube. Those Goths and other Germans were pressed westwards by the arriving hordes of the Huns [Chinese: Xiong-nu]. The Plague raging in the Empire limited Rome's ability to respond. The German Marcomanni tribe entered Italy, which had not been invaded for nearly 200 years, and defeated the army of the Praetorian Prefect.

This disaster forced Marcus to collect forces from other frontiers, and move them against the Marcomanni. The Roman army was commanded by Claudius Pompeianus, Marcus' son-in-law, with the future emperor Pertinax as one of his lieutenants. The invaders were thrown out of Italy, and Marcus began planning to cross the Danube into their territory. The practice to recruit more and more foreign mercenaries for the Roman Army began already at this time to show the weakness of the Roman military which obviously could not rely on willingness and support from a fast degenerating mindset of the Roman populace itself.

Instead of reforming the military, by means such as conscription from the own Roman citizens as duty towards the state, Marcus Aurelius tried to find allies outside the Empire. Intense diplomatic activity followed, as the Romans tried to win over various barbarian tribes in preparation for a crossing of the Danube. A peace treaty was signed with some tribes, while others became direct Roman allies.

After its defeat, the Partian Empire could no longer resist a direct Roman contact with Han China which immediately occurred in 166 AD when a Roman envoy visited the Han court and was greeted by Emperor Hàn Huán [132–168 AD], introducing himself to be an ambassador representing a certain Andun (Chinese for Antoninus), ruler of Da Qin [lit. "Greater China", meaning the Roman Empire], who can be identified with Marcus Aurelius Antoninus. In this context it seems possible that the Roman envoy tried to figure out a closer co-operation with China against the Parthian Empire.

In fact, according to the Book of Han, Chinese troops had already occupied some Parthian areas west of the Pamir Mountains, in the Fergana Valley* with its capital Alexandria Eschate that once was founded by Alexander the Great. [* called Da Yuan, "Great Ionia" or "Greek Empire" by the Chinese, today part of eastern Uzbekistan, southern Kyrgyzstan and northern Tajikistan. The "Greek Empire" here refers to the Greek Bactrian Empire and also to the following Kushan Empire that had the size of India.] In other words: China and Bactria-Kushan from the east, Rome from the west, and the arriving Huns from the north, put the screws on the Parthian Empire. Time and again, Rome conquered Armenia and Mesopotamia.

With the Huns or the Chinese came the Plague the to Parthian Empire and then swapped over to the Roman Empire with the unfortunate consequence that both empires were severely weakened by this pandemic. The "Antonine Plague" started in Mesopotamia in 165 or 166 at the end of Lucius' campaign against the Parthians. It may have continued into the reign of Commodus. Galen of Pergamon [Greek: Galenos, Latin: Galenus, 129-216 AD], the Greek physician of Marcus Aurelius who was in Rome when the plague spread to the city in 166, described that "fever, diarrhoea, and inflammation of the pharynx, along with dry or pustular eruptions of the skin after nine days" were among the symptoms. It is therefore believed that the plague was smallpox. The disease also caused damage to the Roman maritime trade in the Indian Ocean as proven by the archaeological record spanning from Egypt to India, as well as decreased Roman commercial activity in Southeast Asia for a while.

A part of Rome's fleet patrouilled the Red Sea and the Indian Ocean with their fast and seagoing galleys. The Kushan Empire had diplomatic relations with Rome as well as with Chang-an [Xian, China]. So, we even can reconstruct the route that the envoy of Rome took: He most likely went down the Red Sea, to the southern coast of today's Pakistan [belonging to the Kushan Empire], up the River Indus, through east Afghanistan to Sogdiana, then to Alexandria Eschate in the Fergana Valley, taking a pass through the Pamir mountains to either Kashgar or Khotan, then to Dunhuang, straight to Chang-an. The Roman embassies reached the Han Chinese capital in 166 AD and onwards. The expeditions of Roman traders and other individuals to the Han Chinese court in 166 may well have started a new era of Roman–Far East trade.

The prehistory of direct Mediterranean-Chinese relation most likely started off with the arrival of Alexander the Great at the outposts of the Chinese sphere of influence in Sogdiana in the Fergana Valley. During the reign of Emperor Han Wudi (156-87 BC), the Chinese tried to get Fergana into their grip. According to the Han dynasty "Records of the Grand Historian" [or "Shiji", based on the travels of Zhang Qian and published around 126 BC], the region of Fergana is presented as the country of the Da Yuan, possibly descendants of Greeks colonists (Da Yuan is a transliteration of "Great Ionians"). The area was renowned for its "Heavenly Horses" [descendants of the far Greek horses that were much larger and taller than Chinese horses], which the Chinese tried to obtain from the Da Yuan with little success until they waged war against them in 104 BC. In 97 AD, the Chinese general Ban Chao tried to send his envoy Gan Ying to Rome, but Gan was dissuaded by Parthians from venturing beyond the Persian Gulf.

The diplomatic relations had a huge impact on the flow of trade goods, information, and occasional travellers between the Roman Empire and Han Empire of China, as well as between the later Eastern Roman Empire and various Chinese dynasties. We know that the ancient Romans imported Han Chinese silk while the Han Dynasty Chinese imported Roman glasswares, high-quality cloth, silverware and amber jewellery from the Baltic Sea, as they have been found in their tombs, including a hoard of sixteen Roman coins found at Xi'an, China (formerly Chang'an). They were dated to the reigns of various emperors from Tiberius (14-37 AD) to Aurelian (270-275 AD). In addition to Republican-era Roman glasswares, found at Guangzhou along the South China Sea, Roman golden medallions made during the reign of Emperor Antoninus Pius and his adopted son Marcus Aurelius Antoninus have been found at Oc Eo. near the Chinese province of Jiaozhi (in northern Vietnam), then part of the Kingdom of Funan, the same region at which Chinese sources claim the Romans first landed. This may have been the port city of Kattigara, described by Ptolemy [Claudius Ptolemaeus, c. 100-170 AD; a Greek Egyptian geographer, astronomer, mathematician.] in c. 150 AD as being visited by a Greek sailor named Alexander and lving beyond the Golden Chersonese (i.e. Malay Peninsula). Roman coins from the reigns of Tiberius to Aurelian have been found in Xi'an, China (site of the Han capital Chang'an), although the far greater amount of Roman coins in India suggests the Roman maritime trade for purchasing Chinese silk was centred there, not in China. Roman coins and glass beads have also been found in Japan.

The reason why we mention these events here is the probable impact that the ideas of those faraway cultures had on one another. As someone may ask himself in what language those people might have talked to one another, the answer is quite straight forward. The main language of the Roman upper class [and this includes also the traders] was Greek which was well-known among many people up to India starting with the colonisation of Alexander the Great. With them also came Aramaic speaking Jews who founded settlements at Kerala in the northwest of India and also settled along the Silk Road and in some parts of China, including the capital Chang-an [Xian]

These empires inched progressively closer in the course of the Roman expansion into the ancient Near East and simultaneous Han Chinese military incursions into Central Asia. Only a few attempts at direct contact are known from records. Intermediate empires such as the Parthians and Kushans, seeking to maintain lucrative control over the silk trade, inhibited direct contact between these two Eurasian powers.

Several Roman emissaries to China continued to be recorded by ancient Chinese historians. Roman envoys are recorded as arriving in 226 and the last in 284 AD. In Chinese records, the Roman Empire came to be known in China as Da Qin or Great Qin [China]. Da Qin was directly associated with the later Fu Lin in Chinese sources, which has been identified as the Eastern Roman Empire. The next recorded embassy from the Eastern Roman Empire arrived in Tang Dynasty China in 643 AD. The records even mention the siege of Constantinople by the Islamic forces of Muawiyah I in 674– 678 AD.

The rest of his life Marcus had to keep on fighting. In 172, he defeated the Marcommani, and in 174 their allies, the Quadi. Marcus was now interrupted by a revolt in the east, led by the Roman general Avidius Cassius. He was suppressed by Marcus' army. Marcus then returned to Rome. A triumph was celebrated with his son Commodus. In 177 the Quadi rebelled again, and the Marcommani joined them. Marcus arrived on the scene in August 178, and in due course the Romans won a decisive battle in what is now Slovakia. Marcus Aurelius died near Vindobona [Vienna] in 180 AD, still fighting the German tribes.

Manuscripts

There is no certain mention of the Meditations until the early 10th century. A doubtful mention is made by the orator Themistius in about AD 364. In an address to the emperor Valens, On Brotherly Love, he says: "You have no need of the exhortations (Greek: $\pi\alpha\rho\alpha\gamma\gamma\delta\lambda\mu\alpha\alpha$) of Marcus." Another possible reference is in the collection of Greek poems known as the Palatine Anthology, a work dating to the 10th-century but containing much earlier material. The anthology contains an epigram dedicated to "the Book of Marcus". It has been proposed that this epigram was written by the Eastern Roman scholar Theophylact Simocatta in the 7th-century.

The first direct mention of the work comes from Arethas of Caesarea (c. 860-935), a bishop who was a great collector of manuscripts. At some date before 907 he sent a volume of the Meditations to Demetrius, Archbishop of Heracleia, with a letter saving: "I have had for some time an old copy of the Emperor Marcus' most profitable book, so old indeed that it is altogether falling to pieces This I have had copied and am able to hand down to posterity in its new dress." Arethas also mentions the work in marginal notes (scholia) to books by Lucian and Dio Chrysostom where he refers to passages in the "Treatise to Himself", and it was this title which the book bore in the manuscript from which the first printed edition was made in the 16th-century. Arethas' own copy has now vanished, but it is thought to be the likely ancestor of the surviving manuscripts.

The present text of Meditations is based almost entirely upon two manuscripts. One is the Codex Palatinus, also known as the Codex Toxitanus, first published in 1558/9 but now lost. The other manuscript is the Codex Vaticanus 1950 in the Vatican Library. The Codex Palatinus, is a 5th-century Latin Gospel Book. The text, written on purple dyed vellum in gold and silver ink, is a version of the old Latin. Most of the manuscript was in the Austrian National Library at Vienna (Cod. 1185) until 1919, when it was transferred to Trento, where it is now being kept as Ms 1589 in the Library of Buonconsiglio Castle. Two leaves were separated from the manuscript in the 18th century: one is now in the library of Trinity College, Dublin (MS 1709), the other in the British Library (Add. MS 40107) in London (Digital images). The manuscript contains the text of the four Gospels. The Codex Vaticanus Graecus 1950 is contained in a codex which passed to the Vatican Library from the collection of Stefano Gradi in 1683. This is a 14th-century manuscript which survives in a very corrupt state, and about forty-two lines have dropped out by accidental omissions.

The First Modern Editions: The editio princeps (first print edition) of the original Greek was published by Conrad Gessner and his cousin Andreas in 1559. Both it and the accompanying Latin translation were produced by Wilhelm Xylander. His source was a manuscript from Heidelberg University, provided by Michael Toxites. By 1568, when Xylander completed his second edition, he no longer had access to the source and it has been lost ever since. The first English translation was published in 1634 by Meric Casaubon.)

Text:

MARCUS AURELIUS MEDITATIONS BOOK 1

1 From my grandfather Verus I learned good morals and the government of my temper.

2 From the reputation and remembrance of my father, modesty and a manly character.

3 From my mother, piety and beneficence, and abstinence, not only from evil deeds, but even from evil thoughts; and further simplicity in my way of living, far removed from the habits of the rich.

4 From my great-grandfather, not to have frequented public schools, and to have had good teachers at home, and to know that on such things a man should spend liberally.

5 From my governor, to be neither of the green nor of the blue party at the games in the Circus, nor a partizan either of the Parmularius or the Scutarius at the gladiators' fights; from him too I learned endurance of labour, and to want little, and to work with my own hands, and not to meddle with other people's affairs, and not to be ready to listen to slander.

6 From Diognetus, not to busy myself about trifling things, and not to give credit to what was said by miracle-workers and jugglers about incantations and the driving away of daemons and such things; and not to breed quails (for fighting), nor to give myself up passionately to such things; and to endure freedom of speech; and to have become intimate with philosophy; and to have been a hearer, first of Bacchius, then of Tandasis and Marcianus; and to have written dialogues in my youth; and to have desired a plank bed and skin, and whatever else of the kind belongs to the Grecian discipline.

7 From Rusticus I received the impression that my character required improvement and discipline; and from him I learned not to be led astray to sophistic emulation, nor to writing on speculative matters, nor to delivering little hortatory orations, nor to showing myself off as a man who practises much discipline, or does benevolent acts in order to make a display; and to abstain from rhetoric, and poetry, and fine writing; and not to walk about in the house in my outdoor dress, nor to do other things of the kind; and to write my letters with simplicity, like the letter which Rusticus wrote from Sinuessa to my mother; and with respect to those who have offended me by words, or done me wrong, to be easily disposed to be pacified and reconciled, as soon as they have shown a readiness to be reconciled, and to read carefully, and not to be satisfied with a superficial understanding of a book; nor hastily to give my assent to those who talk overmuch; and I am indebted to him for being acquainted with the discourses of Epictetus, which he communicated to me out of his own collection.

8 From Apollonius I learned freedom of will and undeviating steadiness of purpose; and to look to nothing else, not even for a moment, except to reason; and to be always the same in sharp pains, on the occasion of the loss of a child, and in long illness; and to see clearly in a living example that the same man can be both most resolute and yielding, and not peevish in giving his instruction; and to have had before my eyes a man who clearly considered his experience and his skill in expounding philosophical principles as the smallest of his merits; and from him I learned how to receive from friends what are esteemed favours, without being either humbled by them or letting them pass unnoticed.

9 From Sextus, a benevolent disposition, and the example of a family governed in a fatherly manner, and the idea of living conformably to nature; and gravity without affectation, and to look carefully after the interests of friends, and to tolerate ignorant persons, and those who form opinions without consideration: he had the power of readily accommodating himself to all, so that intercourse with him was more agreeable than any flattery; and at the same time he was most highly venerated by those who associated with him; and he had the faculty both of discovering and ordering, in an intelligent and methodical way, the principles necessary for life; and he never showed anger or any other passion, but was entirely free from passion, and also most affectionate; and he could express approbation without noisy display, and he possessed much knowledge without ostentation.

10 From Alexander, the grammarian, to refrain from faultfinding, and not in a reproachful way to chide those who uttered any barbarous or solecistic or strange-sounding expression; but dexterously to introduce the very expression which ought to have been used, and in the way of answer or giving confirmation, or joining in an inquiry about the thing itself, not about the word, or by some other fit suggestion.

11 From Fronto I learned to observe what envy and duplicity and hypocrisy are in a tyrant, and that generally those among us who are called Patricians are rather deficient in paternal affection.

12 From Alexander the Platonic, not frequently nor without necessity to say to any one, or to write in a letter, that I have no leisure; nor continually to excuse the neglect of duties required by our relation to those with whom we live, by alleging urgent occupations.

13 From Catulus, not to be indifferent when a friend finds fault, even if he should find fault without reason, but to try to restore him to his usual disposition; and to be ready to speak well of teachers, as it is reported of Domitius and Athenodotus; and to love my children truly.

14 From my brother Severus, to love my kin, and to love truth, and to love justice; and through him I learned to know Thrasea, Helvidius, Cato, Dion, Brutus; and from him I received the idea of a polity in which there is the same law for all, a polity administered with regard to equal rights and equal freedom of speech, and the idea of a kingly government which respects most of all the freedom of the governed; I learned from him also consistency and undeviating steadiness in my regard for philosophy, and a disposition to do good, and to give to others readily, and to cherish good hopes, and to believe that I am loved by my friends; and in him I observed no concealment of his opinions with respect to those whom he condemned, and that his friends had no need to conjecture what he wished or did not wish, but it was quite plain.

15 From Maximus I learned self-government, and not to be led aside by anything; and cheerfulness in all circumstances, as well as in illness; and a just admixture in the moral character of sweetness and dignity, and to do what was set before me without complaining. I observed that everybody believed that he thought as he spoke, and that in all that he did he never had any bad intention; and he never showed amazement and surprise, and was never in a hurry, and never put off doing a thing, nor was perplexed nor dejected, nor did he ever laugh to disguise his vexation, nor, on the other hand, was he ever passionate or suspicious. He was accustomed to do acts of beneficence and was ready to forgive, and was free from all falsehood; and he presented the appearance of a man who could not be diverted from right rather than of a man who had been improved. I observed, too, that no man could ever think that he was despised by Maximus, or ever venture to think himself a better man. He had also the art of being humorous in an agreeable way.

16 In my father I observed mildness of temper, and unchangeable resolution in the things which he had determined after due deliberation; and no vainglory in those things which men call honours; and a love of labour and perseverance; and a readiness to listen to those who had anything to propose for the common weal; and undeviating firmness in giving to every man according to his deserts; and a knowledge derived from experience of the occasions for vigorous action and for remission. And I observed that he had overcome all passion for joys; and he considered himself no more than any other citizen, and he released his friends from all obligation to sup with him or to attend him of a necessity when he went abroad, and those who failed to accompany him by reason of any urgent circumstances, always found him the same. I observed, too, his habit of careful inquiry in all matters of deliberation, and his persistency, and that he never stopped his investigation through being satisfied with appearances which first present themselves; and that his disposition was to keep his friends, and not to be soon tired of them, nor yet to be extravagant in his affection; and to be satisfied on all occasions, and cheerful; and to foresee things a long way off, and to provide for the smallest without display; and to check immediately popular applause and flattery, and to be ever watchful over the things which were necessary for the administration of the empire, and to be a good manager of the expenditure, and patiently to endure the blame which he got for such conduct; and he was neither superstitious with respect to the gods, nor did he court men by gifts or by trying to please them, or by flattering the populace; but he showed sobriety in all things and firmness, and never any mean thoughts or action, nor love of novelty. And the things which conduce in any way to the commodity of life, and of which fortune gives an abundant supply, he used without arrogance and without excusing himself; so that when he had them, he enjoyed them without affectation, and when he had them not he did not want them. No one could ever say of him that he was either a sophist or a (home-bred) flippant slave or a pedant; but every one acknowledged him to be a man ripe, perfect, above flattery, able to manage his own and other men's affairs. Besides this, he honoured those who were true philosophers, and he did not reproach those who pretended to be philosophers, nor yet was he easily led by them. He was also easy in conversation and he made himself agreeable without any offensive affectation. He took a reasonable care of his body's health, not as one who was greatly attached to life, nor out of regard to personal appearance, nor yet in a careless way, but so that, through his own attention, he very seldom stood in need of the physician's art or of medicine or external applications. He was most ready to give way without envy to those who possessed any particular faculty, such as that of eloquence or knowledge of the law or of morals, or of anything else; and he gave them his help, that each might enjoy reputation according to his deserts; and he always acted conformably to the institutions of his country, without showing any affectation of doing so. Further, he was not fond of change, nor unsteady, but he loved to stay in the same places, and to employ himself about the same things; and after his paroxysms of headache he came immediately fresh and vigorous to his usual occupations. His secrets were not many, but very few and very rare, and these only about public matters; and he showed prudence and economy in the exhibition of the public spectacles and the construction of public buildings, his donations to the people, and in such things, for he was a man who looked to what ought to be done, not to the reputation which is got by a man's act. He did not take the bath at unseasonable hours; he was not fond of building houses, nor curious about what he eat, nor about the texture and colour of his clothes, nor about the beauty of his slaves. His dress came from Lorium, his villa on the coast, and from Lanuvium generally. We know how he behaved to the toll-collector at Tusculum who asked his pardon; and such was all his behaviour. There was in him nothing harsh, nor implacable, nor violent, nor, as one may say, anything carried to the sweating point; but he examined all things severally as if he had abundance of time, and without confusion, in an orderly way, vigorously and consistently. And that might be applied to him which is recorded of Socrates, that he was able both to abstain from, and to enjoy, those things which many are too weak to abstain from, and cannot enjoy without excess. But to be strong enough both to bear the one and to be sober in the other is the mark of a man who has a perfect and invincible soul, such as he showed in the illness of Maximus.

17 To the gods I am indebted for having good grandfathers, good parents, a good sister, good teachers, good associates, good kinsmen and friends, nearly everything good. Further, I owe it to the gods that I was not hurried into any offence against any of them, though I had a disposition which, if opportunity had offered, might have led me to do something of this kind; but, through their favour, there never was such a

am thankful to the gods that I was not longer brought up with my grandfather's concubine, and that I preserved the flower of my youth, and that I did not make proof of my virility before the proper season, but even deferred the time; that I was subjected to a ruler and a father who was able to take away all pride from me, and to bring me to the knowledge that it is possible for a man to live in a palace without wanting either guards or embroidered dresses, or torches and statues, and suchlike show; but it is in such a man's power to bring himself very near to the fashion of a private person, without being for this reason either meaner in thought, or more remiss in action, with respect to the things which must be done for the public interest in a manner that befits a ruler. I thank the gods for giving me such a brother. who was able by his moral character to rouse me to vigilance over myself, and who, at the same time, pleased me by his respect and affection; that my children have not been stupid nor deformed in body; that I did not make more proficiency in rhetoric, poetry, and the other studies, in which I should perhaps have been completely engaged, if I had seen that I was making progress in them: that I made haste to place those who brought me up in the station of honour which they seemed to desire without putting them off with hope of my doing it some time after, because they were then still young; that I knew Apollonius, Rusticus, Maximus; that I received clear and frequent impressions about living according to nature, and what kind of a life that is, so that, so far as depended on the gods, and their gifts and help, and inspirations, nothing hindered me from forthwith living according to nature, though I still fall short of it through my own fault, and though not observing the admonitions of the gods, and, I may almost say, their direct instructions; that my body has held out so long in such a kind of life; that I never touched either Benedicta or Theodotus, and that, after having fallen into amatory passions. I was cured: and, though I was often out of humour with Rusticus, I never did anything of which I had occasion to repent; that, though it was my mother's fate to die young, she spent the last years of her life with me; that, whenever I wished to help any man in his need, or on any other occasion. I was never told that I had not the means of doing it; and that to myself the same necessity never happened. to receive anything from another; that I have such a wife, so obedient, and so affectionate, and so simple; that I had abundance of good masters for my children; and that remedies have been shown to me by dreams, both others, and against blood-spitting and giddiness;... and that, when I had an inclination to philosophy. I did not fall into the hands of any sophist, and that I did not waste my time on writers (of histories), or in the resolution of syllogisms, or occupy myself about the investigation of appearances in the heavens; for all these things require the help of the gods and fortune. Written near the Quadi at the river Granua.

concurrence of circumstances as put me to the trial. Further, I

MARCUS AURELIUS MEDITATIONS BOOK 2

I Begin the morning by saying to thyself, I shall meet with the busybody, the ungrateful, arrogant, deceitful, envious, unsocial. All these things happen to them by reason of their ignorance of what is good and evil. But I who have seen the nature of the good that it is beautiful and of the bad that it is ugly, and the nature of him who does wrong, that it is akin to me, not (only) of the same blood or seed, but that it participates in (the same) intelligence and (the same) portion of the divinity, I can neither be injured by any of them, for no one can fix on me what is ugly, nor can I be angry with my kinsman, nor hate him. For we are made for co-operation, like feet, like hands, like eyelids, like the rows of the upper and lower teeth. To act against one another then is contrary to nature; and it is acting against one another to be vexed and to turn away.

2 Whatever this is that I am, it is a little flesh and breath, and the ruling part. Throw away thy books; no longer distract thyself: it is not allowed; but as if thou wast now dying, despise the flesh, it is blood and bones and a network, a contexture of nerves, veins and arteries. See the breath also, what kind of a thing it is; air, and not always the same, but every moment sent out and again sucked in. The third then is the ruling part: consider thus: Thou art an old man; no longer let this be a slave, no longer be pulled by the strings like a puppet to unsocial movements, no longer be either dissatisfied with thy present lot, or shrink from the future.

3 All that is from the gods is full of providence. That which is from fortune is not separated from nature or without an interweaving and involution with the things which are ordered by Providence. From thence all things flow; and there is besides necessity, and that which is for the advantage of the whole universe, of which thou art a part. But that is good for every part of nature which the nature of the whole brings, and what serves to maintain this nature. Now the universe is preserved, as by the changes of the elements, so by the changes of things compounded of the elements. Let these principles be enough for the; let them always be fixed opinions. But cast away the thirst after books, that thou mayest not die

murmuring, but cheerfully, truly, and from thy heart thankful to the gods.

4 Remember how long thou hast been putting off these things, and how often thou hast received an opportunity from the gods, and yet dost not use it. Thou must now at last perceive of what universe thou art a part, and of what administrator of the universe thy existence is an efflux, and that a limit of time is fixed for thee, which if thou dost not use for clearing away the clouds from thy mind, it will go and thou wilt go, and it will never return.

5 Every moment think steadily as a Roman and a man to do what thou hast in hand with perfect and simple dignity, and feeling of affection, and freedom, and justice; and to give thyself relief from all other thoughts. And thou wilt give thyself relief, if thou doest every act of thy life as if it were the last, laying aside all carelessness and passionate aversion from the commands of reason, and all hypocrisy, and self-love, and discontent with the portion which has been given to thee. Thou seest how few the things are, the which if a man lays hold of, he is able to live a life which flows in quiet, and is like the existence of the gods; for the gods on their part will require nothing more from him who observes these things.

⁶ Do wrong to thyself, do wrong to thyself, my soul; but thou wilt no longer have the opportunity of honouring thyself. Every man's life is sufficient. But thine is nearly finished, though thy soul reverences not itself, but places thy felicity in the souls of others.

7 Do the things external which fall upon thee distract thee? Give thyself time to learn something new and good, and cease to be whirled around. But then thou must also avoid being carried about the other way. For those too are triflers who have wearied themselves in life by their activity, and yet have no object to which to direct every movement, and, in a word, all their thoughts.

8 Through not observing what is in the mind of another a man has seldom been seen to be unhappy; but those who do not observe the movements of their own minds must of necessity be unhappy.

9 This thou must always bear in mind, what is the nature of the whole, and what is my nature, and how this is related to that, and what kind of a part it is of what kind of a whole; and that there is no one who hinders thee from always doing and saying the things which are according to the nature of which thou art a part.

10 Theophrastus, in his comparison of bad acts (such a comparison as one would make in accordance with the common notions of mankind) says, like a true philosopher, that the offences which are committed through desire are more blamable than those which are committed through anger. For he who is excited by anger seems to turn away from reason with a certain pain and unconscious contraction; but he who offends through desire, being overpowered by pleasure, seems to be in a manner more intemperate and more womanish in his offences. Rightly then, and in a way worthy of philosophy, he said that the offence which is committed with pleasure is more blamable than that which is committed with pain; and on the whole the one is more like a person who has been first wronged and through pain is compelled to be angry; but the other is moved by his own impulse to do wrong, being carried toward doing something by desire.

11 Since it is possible that thou mayest depart from life this very moment, regulate every act and thought accordingly. But to go away from among men, if there are gods, is not a thing to be afraid of, for the gods will not involve thee in evil; but if indeed they do not exist, or if they have no concern about human affairs, what is it to me to live in a universe devoid of gods or devoid of providence? But in truth they do exist, and they do care for human things, and they have put all the means in man's power to enable him not to fall into real evils. And as to the rest, if there was anything evil, they would have provided for this also, that it should be altogether in a man's power not to fall into it. Now, that which does not make a man worse, how can it make a man's life worse? But neither through ignorance, nor having the knowledge, but not the power to guard against or correct these things, is it possible that the nature of the universe has overlooked them: nor is it possible that it has made so great a mistake, either through want of power or want of skill, that good and evil should happen indiscriminately to the good and the bad. But death certainly, and life, honour and dishonour, pain and pleasure, all these things equally happen to good men and bad, being things which make us neither better nor worse. Therefore they are neither good nor evil.

12 How quickly all these things disappear, in the universe the bodies themselves, but in time the remembrance of them; what is the nature of all sensible things, and particularly those which attract with the bait of pleasure or terrify by pain, or are noised about by vapoury fame; how worthless, and contemptible, and sordid, and perishable, and dead they are; all this it is the part of the intellectual faculty to observe. To observe, too, who these are whose opinions and voices give reputation; what death is, and the fact that, if a man looks at it in itself, and by the abstractive power of reflection resolves into their parts all the things which present themselves to the imagination in it, he will then consider it to be nothing else than an operation of nature; and if any one is afraid of an operation of nature he is a child. This, however, is not only an operation of nature, but it is also a thing which conduces to the purposes of nature. To observe, too, how man comes near to the Deity, and by what part of him, and when this part of man is so disposed.

13 Nothing is more wretched than a man who traverses everything in a round, and pries into things beneath the earth, as the poet says, and seeks by conjecture what is in the minds of his neighbours, without perceiving that it is sufficient to attend to the daemon within him, and to reverence it sincerely. And reverence of the daemon consists in keeping it pure from passion and thoughtlessness, and dissatisfaction with what comes from gods and men. For the things from the gods merit veneration for their excellence; and the things from men should be dear to us by reason of kinship; and sometimes even, in a manner, they move our pity by reason of men's ignorance of good and bad; this defect being not less than that which deprives us of the power of distinguishing things that are white and black.

14 Though thou shouldest be going to live three thousand years, and as many times ten thousand years, still remember that no man loses any other life than this which he now lives, nor lives any other than this which he now loses. The longest and shortest are thus brought to the same. For the present is the same to all, though that which perishes is not the same: and so that which is lost appears to be a mere moment. For a man cannot lose either the past or the future: for what a man has not, how can any one take this from him? These two things then thou must bear in mind: the one, that all things from eternity are of like forms and come round in a circle, and that it makes no difference whether a man shall see the same things during a hundred years or two hundred, or an infinite time: and the second, that the longest liver and he who will die soonest lose just the same. For the present is the only thing of which a man can be deprived, if it is true that this is the only thing which he has, and that a man cannot lose a thing if he has it not.

15 Remember that all is opinion. For what was said by the Cynic Monimus is manifest: and manifest too is the use of what was said, if a man receives what may be got out of it as far as it is true.

16 The soul of man does violence to itself, first of all when it becomes as abscess and, as it were, a tumour on the universe, so far as it can. For to be vexed at anything which happens is a separation of ourselves from nature, in some part of which the natures of all other things are contained. In the next place, the soul does violence to itself when it turns away from any man. or even moves towards him with the intention of injuring, such as are the souls of those who are angry. In the third place, the soul does violence to itself when it is overpowered by pleasure or by pain. Fourthly, when it plays a part, and does or says anything insincerely and untruly. Fifthly, when it allows any act of its own and any movement to be without an aim, and does anything thoughtlessly and without considering what it is, being right that even the smallest things be done with reference to an end; and the end of rational animals is to follow the reason and the law of the most ancient city and polity.

17 Of human life the time is a point, and the substance is in a flux, and the perception dull, and the composition of the whole body subject to putrefaction, and the soul of a whirl, and fortune hard to divine, and fame a thing devoid of judgement. And, to say all in a word, everything which belongs to the body is a stream, and what belongs to the soul is a dream and vapour, and life is a warfare and a stranger's sojourn, and after-fame is oblivion. What, then, is that which is able to conduct a man? One thing, and only one: philosophy. But this consists in keeping the daemon within a man free from violence and unharmed, superior to pains and pleasures, doing nothing without a purpose, nor yet falsely and with hypocrisy, not feeling the need of another man's doing or not doing anything; and besides, accepting all that happens, and all that is allotted, as coming from thence, wherever it is, from whence he himself came; and, finally, waiting for death with a cheerful mind, as being nothing else than a dissolution of the elements of which every living being is compounded. But if there is no harm to the elements themselves in each continually changing into another, why should a man have any apprehension about the change and dissolution of all the elements? For it is according to nature, and nothing is evil which is according to nature. Written at Carnuntum.

MARCUS AURELIUS MEDITATIONS BOOK 3

1 We ought to consider not only that our life is daily wasting away and a smaller part of it is left, but another thing also must be taken into the account, that if a man should live longer it is quite uncertain whether the understanding will still continue sufficient for the comprehension of things, and retain the power of contemplation which strives to acquire the knowledge of the divine and the human. For if he shall begin to fall into dotage, perspiration and nutrition and imagination and appetite, and whatever else there is of the kind, will not fail; but the power of making use of ourselves, and filling up the measure of our duty, and clearly separating all appearances, and considering whether a man should now depart from life, and whatever else of the kind absolutely requires a disciplined reason, all this is already extinguished. We must make haste then, not only because we are daily nearer to death, but also because the conception of things and the understanding of them cease first.

2 We ought to observe also that even the things which follow after the things which are produced according to nature contain something pleasing and attractive. For instance, when bread is baked some parts are split at the surface, and these parts which thus open, and have a certain fashion contrary to the purpose of the baker's art, are beautiful in a manner, and in a peculiar way excite a desire for eating. And again, figs, when they are quite ripe, gape open, and in the ripe olives the very circumstance of their being near to rottenness adds a peculiar beauty to the fruit. And the ears of corn bending down, and the lion's eyebrows, and the foam which flows from the mouth of wild boars and many other things (though they are far from being beautiful, if a man should examine them severally) still, because they are consequent upon the things which are formed by nature, help to adorn them, and they please the mind; so that if a man should have a feeling and deeper insight with respect to the things which are produced in the universe, there is hardly one of those which follow by way of consequence which will not seem to him to be in a manner disposed so as to give pleasure. And so he will see even the real gaping jaws of wild beasts with no less pleasure than those which painters and sculptors show by imitation; and in an old woman and an old man he will be able to see a certain maturity and comeliness; and the attractive loveliness of young persons he will be able to look on with chaste eves; and many such things will present themselves, not pleasing to every man, but to him only who has become truly familiar with nature and her works.

3 Hippocrates after curing many diseases himself fell sick and died. The Chaldæi foretold the deaths of many, and then fate caught them too. Alexander, and Pompeius, and Caius Caesar, after so often completely destroying whole cities, and in battle cutting to pieces many ten thousands of cavalry and infantry, themselves too at last departed from life. Heraclitus, after so many speculations on the conflagration of the universe, was filled with water internally and died smeared all over with mud. And lice destroyed Democritus; and other lice killed Socrates. What means all this? Thou hast embarked, thou hast made the voyage, thou art come to shore; get out. If indeed to another life, there is no want of gods, not even there. But it to a state without sensation, thou wilt cease to be held by pains and pleasures, and to be a slave to the vessel which is as much inferior as that which serves it is superior; for the one is intelligence and deity; the other is earth and corruption.

4 Do not waste the remainder of thy life in thoughts about others, when thou dost not refer thy thoughts to some object of common utility. For thou losest the opportunity of doing something else when thou hast such thoughts as these, What is such a person doing, and why, and what is he saying, and what is he thinking of, and what is he contriving, and whatever else of the kind makes us wander away from the observation of our own ruling power. We ought then to check in the series of our thoughts everything that is without a purpose and useless, but most of all the overcurious feeling and the malignant; and a man should use himself to think of those things only about which if one should suddenly ask, What hast thou now in thy thoughts? with perfect openness thou mightest immediately answer. This or That: so that from thy words it should be plain that everything in thee is simple and benevolent, and such as befits a social animal, one that cares not for thoughts about pleasure or sensual enjoyments at all, nor has any rivalry or envy and suspicion, or anything else for which thou wouldst blush if thou shouldst say that thou hadst it in thy mind. For the man who is such and no longer delays being among the number of the best, is like a priest and minister of the gods, using too the (deity) which is planted within him, which makes the man uncontaminated by pleasure, unharmed by any pain, untouched by any insult, feeling no wrong, a fighter in the noblest fight, one who cannot be overpowered by any passion, dyed deep with justice, accepting with all his soul everything which happens and is assigned to him as his portion; and not often, nor yet without great necessity and for the general interest, imagining what another says, or does, or thinks. For it is only what belongs to himself that he makes the matter for his activity; and he constantly thinks of that which is allotted to himself out of the sum total of things, and he makes his own act fair, and he is persuaded that his own portion is good. For the lot which is assigned to each man is carried along with him and carries him along with it. And he remembers also that every rational animal is his kinsman, and that to care for all men is according to man's nature; and a man should hold on to the opinion not of all but of those only who confessedly live according to nature. But as to those who live not so, he always bears in mind what kind of men they are both at home and from home, both by night and

by day, and what they are, and with what men they live an impure life. Accordingly, he does not value at all the praise which comes from such men, since they are not even satisfied with themselves.

5 Labour not unwillingly, nor without regard to the common interest, nor without due consideration, nor with distraction; nor let studied ornament set off thy thoughts, and be not either a man of many words, or busy about too many things. And further, let the deity which is in thee be the guardian of a living being, manly and of ripe age, and engaged in matter political, and a Roman, and a ruler, who has taken his post like a man waiting for the signal which summons him from life, and ready to go, having need neither of oath nor of any man's testimony. Be cheerful also, and seek not external help nor the tranquility which others give. A man then must stand erect, not be kept erect by others.

6 If thou findest in human life anything better than justice, truth, temperance, fortitude, and, in a word, anything better than thy own mind's self-satisfaction in the things which it enables thee to do according to right reason, and in the condition that is assigned to thee without thy own choice; if. I say, thou seest anything better than this, turn to it with all thy soul, and enjoy that which thou hast found to be the best. But if nothing appears to be better than the deity which is planted in thee, which has subjected to itself all thy appetites, and carefully examines all the impressions, and, as Socrates said, has detached itself from the persuasions of sense, and has submitted itself to the gods, and cares for mankind; if thou findest everything else smaller and of less value than this, give place to nothing else, for if thou dost once diverge and incline to it, thou wilt no longer without distraction be able to give the preference to that good thing which is thy proper possession and thy own; for it is not right that anything of any other kind, such as praise from the many, or power, or enjoyment of pleasure, should come into competition with that which is rationally and politically or, practically good. All these things, even though they may seem to adapt themselves to the better things in a small degree, obtain the superiority all at once, and carry us away. But do thou, I say, simply and freely choose the better, and hold to it. But that which is useful is the better. Well then, if it is only useful to thee as a rational being, keep to it; but if it is only useful to thee as an animal, say so, and maintain thy judgement without arrogance; only take care that thou makest the inquiry by a sure method.

7 Never value anything as profitable to thyself which shall compel thee to break thy promise, to lose thy self-respect, to hate any man, to suspect, to curse, to act the hypocrite, to desire anything which needs walls and curtains: for he who has preferred to everything else his own intelligence and daemon and the worship of its excellence, acts no tragic part, does not groan, will not need either solitude or much company; and, what is chief of all, he will live without either pursuing or flying from death; but whether for a longer or a shorter time he shall have the soul inclosed in the body he cares not at all; for even if he must depart immediately, he will go as readily as if he were going to do anything else which can be done with decency and order; taking care of this only all through life, that his thoughts turn not away from anything which belongs to an intelligent animal and a member of a civil community.

8 In the mind of one who is chastened and purified thou wilt find no corrupt matter, not impurity, nor any sore skinned over. Nor is his life incomplete when fate overtakes him, as one may say of an actor who leaves the stage before ending and finishing the play. Besides, there is in him nothing servile, nor affected, nor too closely bound to other things, nor yet detached from other things, nothing worthy of blame, nothing which seeks a hiding-place.

9 Reverence the faculty which produces opinion. On this faculty it entirely depends whether there shall exist in thy ruling part any opinion inconsistent with nature and the constitution of the rational animal. And this faculty promises freedom from hasty judgement, and friendship towards men, and obedience to the gods.

10 Throwing away then all things, hold to these only which are few; and besides bear in mind that every man lives only this present time, which is an indivisible point, and that all the rest of his life is either past or it is uncertain. Short then is the time which every man lives, and small the nook of the earth where he lives; and short too the longest posthumous fame, and even this only continued by a succession of poor human beings, who will very soon die, and who know not even themselves, much less him who died long ago.

11 To the aids which have been mentioned let this one still be added: Make for thyself a definition or description of the thing which is presented to thee, so as to see distinctly what kind of a thing it is in its substance, in its nudity, in its complete entirety, and tell thyself its proper name, and the names of the things of which it has been compounded, and into which it will be resolved. For nothing is so productive of elevation of mind as to be able to examine methodically and truly every object which is presented to thee in life, and always to look at things so as to see at the same time what kind of universe this is, and what kind of use everything performs in it, and what value everything has with reference to the whole. and what with reference to man, who is a citizen of the highest city, of which all other cities are like families; what each thing is, and of what it is composed, and how long it is the nature of this thing to endure which now makes an impression on me, and what virtue I have need of with respect to it, such as gentleness, manliness, truth, fidelity, simplicity, contentment, and the rest. Wherefore, on every occasion a man should say: This comes from God; and this is according to the apportionment and spinning of the thread of destiny, and suchlike coincidence and chance; and this is from one of the same stock and a kinsman and partner, one who knows not however what is according to his nature. But I know; for this reason I behave towards him according to the natural law of fellowship with benevolence and justice. At the same time however in things indifferent I attempt to ascertain the value of each

12 If thou workest at that which is before thee, following right reason seriously, vigorously, calmly, without allowing anything else to distract thee, but keeping thy divine part pure, as if thou shouldst be bound to give it back immediately; if thou holdest to this, expecting nothing, fearing nothing, but satisfied with thy present activity according to nature, and with heroic truth in every word and sound which thou utterest, thou wilt live happy. And there is no man who is able to prevent this.

13 As physicians have always their instruments and knives ready for cases which suddenly require their skill, so do thou have principles ready for the understanding of things divine and human, and doing everything, even the smallest, with a recollection of the bond which unites the divine and human to one another. For neither wilt thou do anything well which pertains to man without at the same time having a reference to things divine; nor the contrary.

14 No longer wander at hazard; for neither wilt thou read thy own memoirs, nor the acts of the ancient Romans and Hellenes, and the selections from books which thou wast reserving for thy old age. Hasten then to the end which thou hast before thee, and, throwing away idle hopes, come to thy own aid, if thou carest at all for thyself, while it is in thy power.

15 They know not how many things are signified by the words stealing, sowing, buying, keeping quiet, seeing what ought to be done; for this is not effected by the eyes, but by another kind of vision.

16 Body, soul, intelligence: to the body belong sensations, to the soul appetites, to the intelligence principles. To receive the impressions of forms by means of appearances belongs even to animals; to be pulled by the strings of desire belongs both to wild beasts and to men who have made themselves into women, and to a Phalaris and a Nero: and to have the intelligence that guides to the things which appear suitable belongs also to those who do not believe in the gods, and who betray their country, and do their impure deeds when they have shut the doors. If then everything else is common to all that I have mentioned, there remains that which is peculiar to the good man, to be pleased and content with what happens, and with the thread which is spun for him; and not to defile the divinity which is planted in his breast, nor disturb it by a crowd of images, but to preserve it tranquil, following it obediently as a god, neither saying anything contrary to the truth, nor doing anything contrary to justice. And if all men refuse to believe that he lives a simple, modest, and contented life, he is neither angry with any of them, nor does he deviate from the way which leads to the end of life, to which a man ought to come pure, tranquil, ready to depart, and without any compulsion perfectly reconciled to his lot.

MARCUS AURELIUS MEDITATIONS BOOK 4

I That which rules within, when it is according to nature, is so affected with respect to the events which happen, that it always easily adapts itself to that which is possible and is presented to it. For it requires no definite material, but it moves towards its purpose, under certain conditions however; and it makes a material for itself out of that which opposes it, as fire lays hold of what falls into it, by which a small light would have been extinguished: but when the fire is strong, it soon appropriates to itself the matter which is heaped on it, and consumes it, and rises higher by means of this very material.

2 Let no act be done without a purpose, nor otherwise than according to the perfect principles of art.

3 Men seek retreats for themselves, houses in the country, seashores, and mountains; and thou too art wont to desire such things very much. But this is altogether a mark of the most common sort of men, for it is in thy power whenever thou shalt choose to retire into thyself. For nowhere, either with more quiet or more freedom from trouble, does a man retire than into his own soul, particularly when he has within him such thoughts that by looking into them he is immediately in perfect tranquillity; and I affirm that tranquillity is nothing else than the good ordering of the mind. Constantly then give to thyself this retreat, and renew

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3078 thyself; and let thy principles be brief and fundamental, which, as soon as thou shalt recur to them, will be sufficient to cleanse the soul completely, and to send thee back free from all discontent with the things to which thou returnest. For with what art thou discontented? With the badness of men? Recall to thy mind this conclusion, that rational animals exist for one another, and that to endure is a part of justice, and that men do wrong involuntarily; and consider how many already, after mutual enmity, suspicion, hatred, and fighting, have been stretched dead, reduced to ashes; and be quiet at last. But perhaps thou art dissatisfied with that which is assigned to thee out of the universe. Recall to thy recollection this alternative; either there is providence or fortuitous concurrence of things; or remember the arguments by which it has been proved that the world is a kind of political community and be quiet at last. But perhaps corporeal things will still fasten upon thee. Consider then further that the mind mingles not with the breath, whether moving gently or violently, when it has once drawn itself apart and discovered its own power, and think also of all that thou hast heard and assented to about pain and pleasure (and be quiet at last). But perhaps the desire of the thing called fame will torment thee. See how soon everything is forgotten, and look at the chaos of infinite time on each side of (the present), and the emptiness of applause, and the changeableness and want of judgement in those who pretend to give praise, and the narrowness of the space within which it is circumscribed (and be quiet at last). For the whole earth is a point, and how small a nook in it is this thy dwelling, and how few are there in it, and what kind of people are they who will praise thee.

This then remains: Remember to retire into this little territory of thy own, and, above all, do not distract or strain thyself, but be free, at look and things as a man, as a human being, as a citizen, as a mortal. But among the things readiest to thy hand to which thou shalt turn, let there be these, which are two. One is that things do not touch the soul, for they are external and remain immovable; but our perturbations come only from the opinion which is within. The other is that all these things, which thou seest, change immediately and will no longer be; and constantly bear in mind how many of these changes thou hast already witnessed. The universe is transformation: life is opinion.

4 If our intellectual part is common, the reason also, in respect of which we are rational beings, is common: if this is so, common also is the reason which commands us what to do, and what not to do; if this is so, there is a common law also; if this is so, we are fellow-citizens; if this is so, we are members of some political community: if this is so, the world is in a manner a state. For of what other common political community will any one say that the whole human race are members? And from thence, from this common political community comes also our very intellectual faculty and reasoning faculty and our capacity for law; or whence do they come? For as my earthly part is a portion given to me from certain earth, and that which is watery from another element, and that which is hot and fiery from some peculiar source (for nothing comes out of that which is nothing, as nothing also returns to non-existence), so also the intellectual part comes from some source.

5 Death is such as generation is, a mystery of nature; a composition out of the same elements, and a decomposition into the same; and altogether not a thing of which any man should be ashamed, for it is not contrary to the nature of a reasonable animal, and not contrary to the reason of our constitution.

6 It is natural that these things should be done by such persons, it is a matter of necessity; and if a man will not have it so, he will not allow the fig-tree to have juice. But by all means bear this in mind, that within a very short time both thou and he will be dead; and soon not even your names will be left behind.

7 Take away thy opinion, and then there is taken away the complaint, 'I have been harmed'. Take away the complaint, 'I have been harmed' and the harm is taken away.

8 That which does not make a man worse than he was, also does not make his life worse, nor does it harm him either from without or from within.

 $9\,$ The nature of that which is universally useful has been compelled to do this.

10 Consider that everything which happens, happens justly, and if thou observest carefully, thou wilt find it to be so. I do not say only with respect to the continuity of the series of things, but with respect to what is just, and as if it were done by one who assigns to each thing its value. Observe then as thou hast begun; and whatever thou doest, do it in conjunction with this, the being good, and in the sense in which a man is properly understood to be good. Keep to this in every action.

11 Do not have such an opinion of things as he has who does thee wrong, or such as he wishes thee to have, but look at them as they are in truth.

12 A man should always have these two rules in readiness; the one, to do only whatever the reason of the ruling and legislating faculty may suggest for the use of men; the other, to change thy opinion, if there is any one at hand who sets thee right and moves thee from any opinion. But this change of opinion must proceed only from a certain persuasion, as of what is just or of common advantage, and the like, not because it appears pleasant or brings reputation.

13 Hast thou reason? I have. Why then dost not thou use it? For if this does its own work, what else dost thou wish?

14 Thou hast existed as a part. Thou shalt disappear in that which produced thee; but rather thou shalt be received back into its seminal principle by transmutation.

15 Many grains of frankincense on the same altar: one falls before, another falls after; but it makes no difference. 16 Within ten days thou wilt seem a god to those to whom

thou art now a beast and an ape, if thou wilt return to thy principles and to worship of reason. 17 Do not act as if thou wert going to live ten thousand

years. Death hangs over thee. While thou livest, while it is in thy power, be good.

18 How much trouble he avoids who does not look to see what his neighbour says or does or thinks, but only to what he does himself, that it may be just and pure; or, as Agathon says, look not round at the depraved morals of others, but run straight along the line without deviating from it.

19 He who has a vehement desire for posthumous fame does not consider that every one of those who remember him will himself also die very soon; then again also they who have succeeded them, until the whole remembrance shall have been extinguished as it is transmitted through men who foolishly admire and perish. But suppose that those who will remember are even immortal, and that the remembrance will be immortal, what then is this to thee? And I say not, what is it to the dead? but, what is it to the living? What is praise, except indeed so far as it has a certain utility? For thou now rejectest unseasonably the gift of nature, clinging to something else....

20 Everything which is in any way beautiful is beautiful in itself, and terminates in itself, not having praise as part of itself. Neither worse then nor better is a thing made by being praised. I affirm this also of the things which are called beautiful by the vulgar; for example, material things and works of art. That which is really beautiful has no need of anything; not more than law, not more than truth, not more than benevolence or modesty. Which of these things is beautiful because it is praised, or spoiled by being blamed? Is such a thing as an emerald made worse than it was, if it is not praised? or gold, ivory, purple, a lyre, a little knife, a flower, a shrub?

21 If souls continue to exist how does the air contain them from eternity? But how does the earth contain the bodies of those who have been buried from time so remote? For as here the mutation of these bodies after a certain continuance, whatever it may be, and their dissolution make room for other dead bodies; so the souls which are removed into the air after subsisting for some time are transmuted and diffused, and assume a fiery nature by being received into the seminal intelligence of the universe, and in this way make room for the fresh souls which come to dwell there. And this is the answer which a man might give on the hypothesis of souls continuing to exist. But we must not only think of the number of bodies which are thus buried, but also of the number of animals which are daily eaten by us and the other animals. For what a number is consumed, and thus in a manner buried in the bodies of those who feed on them! And nevertheless this earth receives them by reason of the changes of these bodies into blood, and the transformations into the aërial or the fiery element.

What is the investigation into the truth in this matter? The division into that which is material and that which is the cause of form.

22 Do not be whirled about, but in every movement have respect to justice, and on the occasion of every impression maintain the faculty of understanding.

23 Everything harmonizes with me which is harmonious to thee, O Universe. Nothing for me is too early nor too late, which is in due time for thee. Everything is fruit to me which thy seasons bring, O Nature: from thee are all things, in thee are all things, to thee all things return. The poet says, Dear city of Cecrops; and wilt not thou say, Dear city of Zeus?

24 Occupy thyself with few things, says the philosopher, if thou wouldst be tranquil. But consider if it would not be better to say, Do what is necessary, and whatever the reason of the animal which is naturally social requires, and as it requires. For this brings not only the tranquillity which comes from doing well, but also that which comes from doing few things. For the greatest part of what we say and do being unnecessary, if a man takes this away, he will have more leisure and less uneasiness. Accordingly on every occasion a man should ask himself, Is this one of the unnecessary things? Now a man should take away not only unnecessary acts but also unnecessary thoughts, for thus superfluous acts will not follow after.

25 Try how the life of the good man suits thee, the life of him who is satisfied with his portion out of the whole, and satisfied with his own just acts and benevolent disposition.

26 Hast thou seen those things? Look also at these. Do not disturb thyself. Make thyself all simplicity. Does any one do wrong? It is to himself that he does the wrong. Has anything happened to thee? Well, out of the universe from the beginning everything which happens has been apportioned and spun out to thee. In a word, thy life is short. Thou must turn to profit the present by the aid of reason and justice. Be sober in thy relaxation.

27 Either it is a well arranged universe or a chaos huddled together, but still a universe. But can a certain order subsist in thee, and disorder in the All? And this, too, when all things are so separated and diffused and sympathetic.

28 A black character, a womanish character, a stubborn character, bestial, childish, animal, stupid, counterfeit, scurrilous, fraudulent, tyrannical.

29 If he is a stranger to the universe who does not know what is in it, no less is he a stranger who does not know what is going on in it. He is a runaway, who flies from social reason; he is blind, who shuts the eyes of the understanding; he is poor, who has need of another, and has not from himself all things which are useful for life. He is an abscess on the universe, who withdraws and separates himself from the reason of our common nature through being displeased with the things which happen, for the same nature produces this, and has produced thee too; he is a piece rent asunder from the state, who tears his own soul from that of reasonable animals, which is one.

30 The one is a philosopher without a tunic, and the other without a book: here is another half naked: Bread I have not, he says, and I abide by reason. And I do not get the means of living out of my learning, and I abide by my reason.

31 Love the art, poor as it may be, which thou hast learned, and be content with it; and pass through the rest of life like one who has intrusted to the gods with his whole soul all that he has, making thyself neither the tyrant nor the slave of any man.

32 Consider, for example, the times of Vespasian. Thou wilt see all these things, people marrying, bringing up children, sick, dying, warring, feasting, trafficking, cultivating the ground, flattering, obstinately arrogant, suspecting, plotting, wishing for some to die, grumbling about the present, loving, heaping up treasure, desiring consulship, kingly power, Well, then, that life of these people no longer exists at all. Again, remove to the times of Trajan. Again, all is the same. Their life, too, is gone. In like manner view also the other epochs of time and of whole nations, and see how many after great efforts soon fell and were resolved into the elements. But chiefly thou shouldst think of those whom thou hast thyself known distracting themselves about idle things, neglecting to do what was in accordance with their proper constitution, and to hold firmly to this and to be content with it. And herein it is necessary to remember that the attention given to everything has its proper value and proportion. For thus thou wilt not be dissatisfied, if thou appliest thyself to smaller matters no further than is fit

33 The words which were formerly familiar are now antiquated; so also the names of those who were famed of old, are now in a manner antiquated: Camillus, Caeso, Volesus, Leonnatus, and a little after also Scipio and Cato, then Augustus, then also Hadrianus and Antoninus. For all things soon pass away and become a mere tale, and complete oblivion soon buries them. And I say this of those who have shone in a wondrous way. For the rest, as soon as they have breathed out their breath, they are gone, and no man speaks of them. And, to conclude the matter, what is even an eternal remembrance? A mere nothing. What, then, is that about which we ought to employ our serious pains? This one thing, thoughts just, and acts social, and words which never lie, and a disposition which gladly accepts all that happens, as necessary, as usual, as flowing from a principle and source of the same kind.

34 Willingly give thyself up to one of the fates, allowing her to spin thy thread into whatever things she pleases.

35 Everything is only for a day, both that which remembers and that which is remembered.

36 Observe constantly that all things take place by change, and accustom thyself to consider that the nature of the Universe loves nothing so much as to change the things which are and to make new things like them. For everything that exists is in a manner the seed of that which will be. But thou art thinking only of seeds which are cast into the earth or into a womb: but this is a very vulgar notion.

37 Thou wilt soon die, and thou art not yet simple, not free from perturbations, nor without suspicion of being hurt by external things, nor kindly disposed towards all; nor dost thou yet place wisdom only in acting justly.

38 Examine men's ruling principles, even those of the wise, what kind of things they avoid, and what kind they pursue.

39 What is evil to thee does not subsist in the ruling principle of another; nor yet in any turning and mutation of thy corporeal covering. Where is it then? It is in that part of thee in which subsists the power of forming opinions about evils. Let this power then not form (such) opinions, and all is well. And if that which is nearest to it, the poor body, is cut, burnt, filled with matter and rottenness, nevertheless let the part which forms opinions about these things be quiet, that is, let it judge that nothing is either bad or good which can happen equally to the bad man and the good. For that which happens equally to him who lives contrary to nature and to him who lives according to nature, is neither according to nature nor contrary to nature.

40 Constantly regard the universe as one living being, having one substance and one soul; and observe how all things have reference to one perception, the perception of this one living being; and how all things act with one movement; and how all things are the cooperating causes of all things which exist; observe too the continuous spinning of the thread and the contexture of the web.

41 Thou art a little soul bearing about a corpse, as Epictetus used to say.

42 It is no evil for things to undergo change, and no good for things to subsist in consequence of change.

43 Time is like a river made up of the events which happen, and a violent stream; for as soon as a thing has been seen, it is carried away, and another comes in its place, and this will be carried away too.

44 Everything which happens is as familiar and well known as the rose in spring and the fruit in summer; for such is disease, and death, and calumny, and treachery, and whatever else delights fools or vexes them.

45 In the series of things those which follow are always aptly fitted to those which have gone before; for this series is not like a mere enumeration of disjointed things, which has only a necessary sequence, but it is a rational connection: and as all existing things are arranged together harmoniously, so the things which come into existence exhibit no mere succession, but a certain wonderful relationship.

46 Always remember the saying of Heraclitus, that the death of earth is to become water, and the death of water is to become air, and the death of air is to become fire, and reversely. And think too of him who forgets whither the way leads, and that men quarrel with that with which they are most constantly in communion, the reason which governs the universe; and the things which they daily meet with seem to them strange: and consider that we ought not to act and speak as if we were asleep, for even in sleep we seem to act and speak; and that we ought not, like children who learn from their parents, simply to act and speak as we have been taught.

47 If any god told thee that thou shalt die to-morrow, or certainly on the day after to-morrow, thou wouldst not care much whether it was on the third day or on the morrow, unless thou wast in the highest degree mean-spirited-for how small is the difference?-so think it no great thing to die after as many vears as thou canst name rather than to-morrow.

48 Think continually how many physicians are dead after often contracting their eyebrows over the sick; and how many astrologers after predicting with great pretensions the deaths of others; and how many philosophers after endless discourses on death or immortality; how many heroes after killing thousands; and how many tyrants who have used their power over men's lives with terrible insolence as if they were immortal; and how many cities are entirely dead, so to speak, Helice and Pompeii and Herculaneum, and others innumerable. Add to the reckoning all whom thou hast known, one after another. One man after burying another has been laid out dead, and another buries him; and all this in a short time. To conclude, always observe how ephemeral and worthless human things are, and what was yesterday a little mucus, to-morrow will be a mummy or ashes. Pass then through this little space of time conformably to nature, and end thy journey in content, just as an olive falls off when it is ripe, blessing nature who produced it, and thanking the tree on which it grew.

49 Be like the promontory against which the waves continually break, but it stands firm and tames the fury of the water around it.

Unhappy am I, because this has happened to me. Not so, but Happy am I, though this has happened to me, because I continue free from pain, neither crushed by the present nor fearing the future. For such a thing as this might have happened to every man; but every man would not have continued free from pain on such an occasion. Why, then, is that rather a misfortune than this a good fortune? And dost thou in all cases call that a man's misfortune, which is not a deviation from man's nature? And does a thing seem to thee to be a deviation from man's nature, when it is not contrary to the will of man's nature? Well, thou knowest the will of nature. Will then this which has happened prevent thee from being just, magnanimous, temperate, prudent, secure against inconsiderate opinions and falsehood; will it prevent thee from having modesty, freedom, and everything else, by the presence of which man's nature obtains all that is its own? Remember, too, an every occasion which leads thee to vexation to apply this principle: not that this is a misfortune. but that to bear it nobly is good fortune.

50 It is a vulgar but still a useful help towards contempt of death, to pass in review those who have tenaciously stuck to life. What more then have they gained than those who have died early? Certainly they lie in their tombs somewhere at last, Cadicianus, Fabius, Julianus, Lepidus, or any one else like them, who have carried out many to be buried, and then were carried out themselves. Altogether the interval is small (between birth and death); and consider with how much trouble, and in company with what sort of people, and in what a feeble body this interval is laboriously passed. Do not then consider life a thing of any value. For look to the immensity of time behind thee, and to the time which is before thee, another boundless space. In this infinity then what is the difference between him who lives three days and him who lives three generations?

51 Always run to the short way; and the short way is the natural: accordingly say and do everything in conformity with the soundest reason. For such a purpose frees a man from trouble, and warfare, and all artifice and ostentatious display.

MARCUS AURELIUS MEDITATIONS BOOK 5

1 In the morning when thou risest unwillingly, let this thought be present-I am rising to the work of a human being. Why then am I dissatisfied if I am going to do the things for which I exist and for which I was brought into the world? Or have I been made for this, to lie in the bedclothes and keep myself warm? But this is more pleasant. Dost thou exist then to take thy pleasure, and not at all for action or exertion? Dost thou not see the little plants, the little birds, the ants, the spiders, the bees working together to put in order their several parts of the universe? And art thou unwilling to do the work of a human being, and dost thou not make haste to do that which is according to thy nature? But it is necessary to take rest also. It is necessary: however nature has fixed bounds to this too: she has fixed bounds both to eating and drinking, and yet thou goest beyond these bounds, beyond what is sufficient; yet in thy acts it is not so, but thou stoppest short of what thou canst do. So thou lovest not thyself, for if thou didst, thou wouldst love thy nature and her will. But those who love their several arts exhaust themselves in working at them unwashed and without food; but thou valuest thy own nature less than the turner values the turning art, or the dancer the dancing art, or the lover of money values his money, or the vainglorious man his little glory. And such men, when they have a violent affection to a thing. choose neither to eat nor to sleep rather than to perfect the things which they care for. But are the acts which concern society more vile in thy eyes and less worthy of thy labour?

2 How easy it is to repel and to wipe away every impression which is troublesome or unsuitable, and immediately to be in all tranquillity.

3 Judge every word and deed which are according to nature to be fit for thee, and be not diverted by the blame which follows from any people, nor by their words, but if a thing is good to be done or said, do not consider it unworthy of thee. For those persons have their peculiar leading principle and follow their peculiar movement; which things do not thou regard, but go straight on, following thy own nature and the common nature; and the way of both is one.

4 I go through the things which happen according to nature until I shall fall and rest, breathing out my breath into that element out of which I daily draw it in, and falling upon that earth out of which my father collected the seed, and my mother the blood, and my nurse the milk; out of which during so many years I have been supplied with food and drink; which bears me when I tread on it and abuse it for so many purposes.

5 Thou sayest, men cannot admire the sharpness of thy wits. Be it so; but there are many other things of which thou canst not say, I am not formed for them by nature. Show those qualities then which are altogether in thy power: sincerity, gravity, endurance of labour, aversion to pleasure, contentment with thy portion and with few things, benevolence, frankness, no love of superfluity, freedom from trifling magnanimity. Dost thou not see how many qualities thou art immediately able to exhibit, in which there is no excuse of natural incapacity and unfitness, and yet thou still remainest voluntarily below the mark? or art thou compelled through being defectively furnished by nature to murmur, and to be stingy, and to flatter, and to find fault with thy poor body, and to try to please men, and to make great display, and to be restless in thy mind? No, by the gods: but thou mightest have been delivered from these things long ago. Only if in truth thou canst be charged with being rather slow and dull of comprehension, thou must exert thyself about this also. not neglecting it nor vet taking pleasure in thy dullness.

6 One man, when he has done a service to another, is ready to set it down to his account as a favour conferred. Another is not ready to do this, but still in his own mind he thinks of the man as his debtor, and he knows what he has done. A third in a manner does not even know what he has done, but he is like a vine which has produced grapes, and seeks for nothing more after it has once produced its proper fruit. As a horse when he has run, a dog when he has tracked the game, a bee when it has made the honey, so a man when he has done a good act, does not call out for others to come and see, but he goes on to another act, as a vine goes on to produce again the grapes in season. Must a man then be one of these, who in a manner act thus without observing it? Yes. But this very thing is necessary, the observation of what a man is doing; for it may be said, it is characteristic of the social animal to perceive that he is working in a social manner, and indeed to wish that his social partner also should perceive it. It is true what thou sayest, but thou dost not rightly understand what is now said; and for this reason thou wilt become one of those of whom I spoke before, for even they are misled by a certain show of reason. But if thou wilt choose to understand the meaning of what is said, do not fear that for this reason thou wilt omit any social act.

 $\tilde{7}$ A prayer of the Athenians: Rain, rain, O dear Zeus, down on the plowed fields of the Athenians and on the plains. In truth we ought not to pray at all, or we ought to pray in this simple and noble fashion.

8 Just as we must understand when it is said, That Æsculapius prescribed to this man horse-exercise, or bathing in cold water, or going without shoes, so we must understand it when it is said, That the nature of the universe prescribed to this man disease or mutilation or loss or anything else of the kind. For in the first case prescribed means something like this: he prescribed this for this man as a thing adapted to procure health; and in the second case it means, That which happens to every man is fixed in a manner for him suitably to his destiny. For this is what we mean when we say that things are suitable to us, as the workmen say of squared stones in walls or the pyramids, that they are suitable, when they fit them to one another in some kind of connection. For there is altogether one harmony. And as the universe is made up out of all bodies to be such a body as it is, so out of all existing causes necessity and destiny is made up to be such a cause as it is. And even those who are completely ignorant understand what I mean, for they say, Necessity and destiny brought this to such a person. This then was brought and this was prescribed to him. Let us then receive these things, as well as those which Æsculapius prescribes. Many, as a matter of course, even among his prescriptions, are disagreeable, but we accept them in the hope of health. Let the perfecting and accomplishment of the things, which the common nature judges to be good, be judged by thee to be of the same kind as thy health. And so accept everything which happens, even if it seem disagreeable, because it leads to this, to the health of the universe and to the prosperity and felicity of Zeus (the universe). For he would not have brought on any man what he has brought, if it were not useful for the whole. Neither does the nature of anything, whatever it may be, cause anything which is not suitable to that which is directed by it. For two reasons, then, it is right to be content with that which happens to thee; the one, because it was done for thee and prescribed for thee, and in a manner had reference to thee, originally from the most ancient causes spun with thy destiny; and the other, because even that which comes severally to every man is to the power which administers the universe a cause of felicity and perfection, nay even of its very continuance. For the integrity of the whole is mutilated, if thou cuttest off anything whatever from the conjunction and the continuity either of the parts or of the causes. And thou dost cut off, as far as it is in thy power, when thou art dissatisfied, and in a manner triest to put anything out of the way

9 Be not disgusted, nor discouraged, nor dissatisfied, if thou dost not succeed in doing everything according to right principles; but when thou hast failed, return back again, and be content if the greater part of what thou doest is consistent with man's nature, and love this to which thou returnest; and do not return to philosophy as if she were a master, but act like those who have sore eyes and apply a bit of sponge and egg, or as another applies a plaster, or drenching with water. For thus thou wilt not fail to obey reason and thou wilt repose in it. And remember that philosophy requires only the things which thy nature requires; but thou wouldst have something else which is not according to nature. It may be objected, Why, what is more agreeable than this (which I am doing)? But is not this the very reason why pleasure deceives us? And consider if magnanimity, freedom, simplicity, equanimity, piety are not more agreeable. For what is more agreeable than wisdom itself, when thou thinkest of the security and the happy course of all things which depend on the faculty of understanding and knowledge?

10 Things are in such a kind of envelopment that they have seemed to philosophers, not a few nor those common philosophers, altogether unintelligible; nay even to the Stoics themselves they seem difficult to understand. And all our assent is changeable; for where is the man who never changes? Carry thy thoughts then to the objects themselves, and consider how short-lived they are and worthless, and that they may be in the possession of a filthy wretch or a whore or a robber. Then turn to the morals of those who live with thee, and it is hardly possible to endure even the most agreeable of them, to say nothing of a man being hardly able to endure himself. In such darkness, then, and dirt, and in so constant a flux, both of substance and of time, and of motion, and of things moved, what there is worth being highly prized, or even an object of serious pursuit, I cannot imagine. But on the

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3080 contrary it is a man's duty to comfort himself, and to wait for the natural dissolution and not to be vexed at the delay, but to rest in these principles only: the one, that nothing will happen to me which is not conformable to the nature of the universe; and the other, that it is in my power never to act contrary to my god and daemon: for there is no man who will compel me to this.

11 About what am I now employing my own soul? On every occasion I must ask myself this question, and inquire, what have I now in this part of me which they call the ruling principle? and whose soul have I now? that of a child, or of a young man, or of a feeble woman, or of a tyrant, or of a domestic animal, or of a wild beast?

12 What kind of things those are which appear good to the many, we may learn even from this. For if any man should conceive certain things as being really good, such as prudence, temperance, justice, fortitude, he would not after having first conceived these endure to listen to anything which should not be in harmony with what is really good. But if a man has first conceived as good the things which appear to the many to be good, he will listen and readily receive as very applicable that which was said by the comic writer. Thus even the many perceive the difference. For were it not so, this saying would not offend and would not be rejected in the first case, while we receive it when it is said of wealth, and of the means which further luxury and fame, as said fitly and wittily. Go on then and ask if we should value and think those things to be good, to which after their first conception in the mind the words of the comic writer might be applied-that he who has them, through pure abundance has not a place to ease himself in.

13 I am composed of the formal and the material; and neither of them will perish into non-existence, as neither of them came into existence out of non-existence. Every part of me then will be reduced by change into some part of the universe, and that again will change into another part of the universe, and so on forever. And by consequence of such a change I too exist, and those who begot me, and so on forever in the other direction. For nothing hinders us from saying so, even if the universe is administered according to definite periods.

¹⁴ Reason and the reasoning art of philosophy are powers which are sufficient for themselves and for their own works. They move then from a first principle which is their own, and they make their way to the end which is proposed to them; and this is the reason why such acts are named Catorthoseis or right acts, which word signifies that they proceed by the right road.

15 None of these things ought to be called a man's which do not belong to a man, as man. They are not required of a man, nor does man's nature promise them, nor are they the means of man's nature attaining its end. Neither then does the end of man lie in these things, nor yet that which aids to the accomplishment of this end, and that which aids toward this end is that which is good. Besides, if any of these things did belong to man, it would not be right for a man to despise them and to set himself against them; nor would a man be worthy of praise who showed that he did not want these things, nor would he who stinted himself in any of them be good, if indeed these things were good. But now the more of these things a man deprives himself of, or of other things like them, or even when he is deprived of any of them, the more patiently he endures the loss, just in the same degree he is a better man.

16 Such as are thy habitual thoughts, such also will be the character of thy mind; for the soul is dyed by the thoughts. Dye it then with a continuous series of such thoughts as these: for instance, that where a man can live, there he can also live well. But he must live in a palace. Well then, he can also live well in a palace. And again, consider that for whatever purpose each thing has been constituted, for this it has been constituted, and toward this it is carried; and its end is in that toward which it is carried; and where the end is, there also is the advantage and the good of each thing. Now the good for the reasonable animal is society; for that we are made for society has been shown above. Is it not plain that the inferior exist for the sake of the superior? but the things which have life are superior to those which have not life, and of those which have life the superior are those which have reason.

17 To seek what is impossible is madness: and it is impossible that the bad should not do something of this kind.

18 Nothing happens to any man which he is not formed by nature to bear. The same things happen to another, and either because he does not see that they have happened or because he would show a great spirit he is firm and remains unharmed. It is a shame then that ignorance and conceit should be stronger than wisdom.

19 Things themselves touch not the soul, not in the least degree; nor have they admission to the soul, nor can they turn or move the soul: but the soul turns and moves itself alone, and whatever judgements it may think proper to make, such it makes for itself the things which present themselves to it.

20 In one respect man is the nearest thing to me, so far as I must do good to men and endure them. But so far as some men

make themselves obstacles to my proper acts, man becomes to me one of the things which are indifferent, no less than the sun or wind or a wild beast. Now it is true that these may impede my action, but they are no impediments to my affects and disposition, which have the power of acting conditionally and changing: for the mind converts and changes every hindrance to its activity into an aid; and so that which is a hindrance is made a furtherance to an act; and that which is an obstacle on the road helps us on this road.

21 Reverence that which is best in the universe; and this is that which makes use of all things and directs all things. And in like manner also reverence that which is best in thyself; and this is of the same kind as that. For in thyself also, that which makes use of everything else, is this, and thy life is directed by this.

22 That which does no harm to the state, does no harm to the citizen. In the case of every appearance of harm apply this rule: if the state is not harmed by this, neither am I harmed. But if the state is harmed, thou must not be angry with him who does harm to the state. Show him where his error is.

23 Often think of the rapidity with which things pass by and disappear, both the things which are and the things which are produced. For substance is like a river in a continual flow, and the activities of things are in constant change, and the causes work in infinite varieties; and there is hardly anything which stands still. And consider this which is near to thee, this boundless abyss of the past and of the future in which all things disappear. How then is he not a fool who is puffed up with such things or plagued about them or makes himself miserable? for they yex him only for a time, and a short time.

24 Think of the universal substance, of which thou hast a very small portion; and of universal time, of which a short and indivisible interval has been assigned to thee; and of that which is fixed by destiny, and how small a part of it thou art.

25 Does another do me wrong? Let him look to it. He has his own disposition, his own activity. I now have what the universal nature wills me to have; and I do what my nature now wills me to do.

26 Let the part of thy soul which leads and governs be undisturbed by the movements in the flesh, whether of pleasure or of pain; and let it not unite with them, but let it circumscribe itself and limit those affects to their parts. But when these affects rise up to the mind by virtue of that other sympathy that naturally exists in a body which is all one, then thou must not strive to resist the sensation, for it is natural: but let not the ruling part of itself add to the sensation the opinion that it is either good or bad.

27 Live with the gods. And he does live with the gods who constantly shows to them that his own soul is satisfied with that which is assigned to him, and that it does all that the daemon wishes, which Zeus hath given to every man for his guardian and guide, a portion of himself. And this is every man's understanding and reason.

28 Art thou angry with him whose arm-pits stink? art thou angry with him whose mouth smells foul? What good will this anger do thee? He has such a mouth, he has such arm-pits: it is necessary that such an emanation must come from such things. But the man has reason, it will be said, and he is able, if he takes pains, to discover wherein he offends. I wish thee well of thy discovery. Well then, and thou hast reason: by thy rational faculty stir up his rational faculty; show him his error, admonish him. For if he listens, thou wilt cure him, and there is no need of anger, no need to mourn about and there is also no need to be too complaisant.

29 As thou intendest to live when thou are gone out,... so it is in thy power to live here. But if men do not permit thee, then get away out of life, yet so as if thou wert suffering no harm. The house is smoky, and I quit it. Why dost thou think that this is any trouble? But so long as nothing of the kind drives me out, I remain, am free, and no man shall hinder me from doing what I choose; and I choose to do what is according to the nature of the rational and social animal.

30 The intelligence of the universe is social. Accordingly it has made the inferior things for the sake of the superior, and it has fitted the superior to one another. Thou seest how it has subordinated, co-ordinated and assigned to everything its proper portion, and has brought together into concord with one another the things which are the best.

31 How hast thou behaved hitherto to the gods, thy parents, brethren, children, teachers, to those who looked after thy infancy, to thy friends, kinsfolk, to thy slaves? Consider if thou hast hitherto behaved to all in such a way that this may be said of thee:

Never has wronged a man in deed or word.

And call to recollection both how many things thou hast passed through, and how many things thou hast been able to endure: and that the history of thy life is now complete, and thy service is ended: and how many beautiful things thou hast seen: and how many pleasures and pains thou hast despised; and how many things called honourable thou hast spurned; and to how many ill-minded folks thou hast shown a kind disposition.

32 Why do unskilled and ignorant souls disturb him who has skill and knowledge? What soul then has skill and

knowledge? That which knows beginning and end, and knows the reason which pervades all substance and through all time by fixed periods administers the universe.

33 Soon, very soon, thou wilt be ashes, or a skeleton, and either a name or not even a name; but name is sound and echo, and the things which are much valued in life are empty and rotten and trifling, and like little dogs biting one another, and little children quarrelling, laughing, and then straightway weeping. But fidelity and modesty and justice and truth are lled

Up to Olympus from the wide-spread earth.

What then is there which still detains thee here? if the objects of sense are easily changed and never stand still, and the organs of perception are dull and easily receive false impressions; and the poor soul itself is an exhalation from blood. But to have good repute amid such a world as this is an empty thing. Why then dost thou not wait in tranquillity for thy end, whether it is extinction or removal to another state? And until that time comes, what is sufficient? Why, what else than to venerate the gods and bless them, and to do good to men, and to practise tolerance and self-restraint; but as to everything which is beyond the limits of the poor flesh and breath, to remember that this is neither thine nor in thy power.

34 Thou canst pass thy life in an equable flow of happiness, if thou canst go by the right way, and think and act in the right way. These two things are common both to the soul of God and to the soul of man, and to the soul of every rational being, not to be hindered by another; and to hold good to consist in the disposition to justice and the practice of it, and in this to let thy desire find its termination.

35 If this is neither my own badness, nor an effect of my own badness, and the common weal is not injured, why am I troubled about it? and what is the harm to the common weal?

36 Do not be carried along inconsiderately by the appearance of things, but give help (to all) according to thy ability and their fitness; and if they should have sustained loss in matters which are indifferent, do not imagine this to be a damage. For it is a bad habit. But as the old man, when he went away, asked back his foster-child's top, remembering that it was a top, so do thou in this case also.

When thou art calling out on the Rostra, hast thou forgotten, man, what these things are? Yes; but they are objects of great concern to these people. Wilt thou too then be made a fool for these things? I was once a fortunate man, but I lost it, I know not how. But fortunate means that a man has assigned to himself a good fortune; and a good fortune is good disposition of the soul, good emotions, good actions.

MARCUS AURELIUS MEDITATIONS BOOK 6

1 The substance of the universe is obedient and compliant; and the reason which governs it has in itself no cause for doing evil, for it has no malice, nor does it do evil to anything, nor is anything harmed by it. But all things are made and perfected according to this reason.

2 Let it make no difference to thee whether thou art cold or warm, if thou art doing thy duty; and whether thou art drowsy or satisfied with sleep; and whether ill-spoken of or praised; and whether dying or doing something else. For it is one of the acts of this life, this act by which we die; it is sufficient then in this act also to do well what we have in hand.

3 Look within. Let neither the peculiar quality of anything nor its value escape thee.4 All existing things soon change, and they will either be

reduced to vapour, if indeed all substance is one, or they will be dispersed.

5 The reason which governs knows what its own disposition is, and what it does, and on what material it works.

6 The best way of avenging thyself is not to become like the wrong doer.

7 Take pleasure in one thing and rest in it, in passing from one social act to another social act, thinking of God.

8 The ruling principle is that which rouses and turns itself, and while it makes itself such as it is and such as it wills to be, it also makes everything which happens appear to itself to be such as it wills.

9 In conformity to the nature of the universe every single thing is accomplished, for certainly it is not in conformity to any other nature that each thing is accomplished, either a nature which externally comprehends this, or a nature which is comprehended within this nature, or a nature external and independent of this.

10 The universe is either a confusion, and a mutual involution of things, and a dispersion; or it is unity and order and providence. If then it is the former, why do I desire to tarry in a fortuitous combination of things and such a disorder? and why do I care about anything else than how I shall at last become earth? and why am I disturbed, for the dispersion of my elements will happen whatever I do. But if the other supposition is true, I venerate, and I am firm, and I trust in him who governs.

11 When thou hast been compelled by circumstances to be disturbed in a manner, quickly return to thyself and do not continue out of tune longer than the compulsion lasts; for

thou wilt have more mastery over the harmony by continually recurring to it.

12 If thou hadst a step-mother and a mother at the same time, thou wouldst be dutiful to thy step-mother, but still thou wouldst constantly return to thy mother. Let the court and philosophy now be to thee step-mother and mother; return to philosophy frequently and repose in her, through whom what thou meetest with in the court appears to thee tolerable, and thou appearest tolerable in the court.

13 When we have meat before us and such eatables, we receive the impression, that this is the dead body of a fish, and this is the dead body of a bird or of a pig; and again, that this Falernian is only a little grape juice, and this purple robe some sheep's wool dved with the blood of a shell-fish: such then are these impressions, and they reach the things themselves and penetrate them, and so we see what kind of things they are. Just in the same way ought we to act all through life, and where there are things which appear most worthy of our approbation, we ought to lay them bare and look at their worthlessness, and strip them of all the words by which they are exalted. For outward show is a wonderful perverter of the reason, and when thou art most sure that thou art employed about things worth thy pains, it is then that it cheats thee most. Consider then what Crates says of Xenocrates himself.

14 Most of the things which the multitude admire are referred to objects of the most general kind, those which are held together by cohesion or natural organization, such as stones, wood, fig-trees, vines, olives. But those which are admired by men who are a little more reasonable are referred to the things which are held together by a living principle, as flocks, herds. Those which are admired by men who are still more instructed are the things which are held together by a rational soul, not however a universal soul, but rational so far as it is a soul skilled in some art, or expert in some other way. or simply rational so far as it possesses a number of slaves. But he who values a rational soul, a soul universal and fitted for political life, regards nothing else except this; and above all things he keeps his soul in a condition and in an activity conformable to reason and social life, and he co-operates to this end with those who are of the same kind as himself.

15 Some things are hurrying into existence, and others are hurrying out of it; and of that which is coming into existence part is already extinguished. Motions and changes are continually renewing the world, just as the uninterrupted course of time is always renewing the infinite duration of ages. In this flowing stream then, on which there is no abiding, what is there of the things which hurry by on which a man would set a high price? It would be just as if a man should fall in love with one of the sparrows which fly by, but it has already passed out of sight. Something of this kind is the very life of every man, like the exhalation of the blood and the respiration of the air. For such as it is to have once drawn in the air and to have given it back, which we do every moment, just the same is it with the whole respiratory power, which thou didst receive at thy birth vesterday and the day before, to give it back to the element from which thou didst first draw it.

16 Neither is transpiration, as in plants, a thing to be valued, nor respiration, as in domesticated animals and wild beasts, nor the receiving of impressions by the appearances of things, nor being moved by desires as puppets by strings, nor assembling in herds, nor being nourished by food; for this is just like the act of separating and parting with the useless part of our food. What then is worth being valued? To be received with clapping of hands? No. Neither must we value the clapping of tongues, for the praise which comes from the many is a clapping of tongues. Suppose then that thou hast given up this worthless thing called fame, what remains that is worth valuing? This, in my opinion, to move thyself and to restrain thyself in conformity to thy proper constitution, to which end both all employments and arts lead. For every art aims at this, that the thing which has been made should be adapted to the work for which it has been made; and both the vine-planter who looks after the vine, and the horse-breaker, and he who trains the dog, seek this end. But the education and the teaching of youth aim at something. In this then is the value of the education and the teaching. And if this is well, thou wilt not seek anything else. Wilt thou not cease to value many other things too? Then thou wilt be neither free, nor sufficient for thy own happiness, nor without passion. For of necessity thou must be envious, jealous, and suspicious of those who can take away those things, and plot against those who have that which is valued by thee. Of necessity a man must be altogether in a state of perturbation who wants any of these things; and besides, he must often find fault with the gods. But to reverence and honour thy own mind will make thee content with thyself, and in harmony with society, and in agreement with the gods, that is, praising all that they give and have ordered

17 Above, below, all around are the movements of the elements. But the motion of virtue is in none of these: it is something more divine, and advancing by a way hardly observed it goes happily on its road.

18 How strangely men act. They will not praise those who are living at the same time and living with themselves; but to be themselves praised by posterity, by those whom they have never seen or ever will see, this they set much value on. But this is very much the same as if thou shoulds the grieved because those who have lived before thee did not praise thee.

19 If a thing is difficult to be accomplished by thyself, do not think that it is impossible for man; but if anything is possible for man and conformable to his nature, think that this can be attained by thyself too.

20 In the gymnastic exercises suppose that a man has torn thee with his nails, and by dashing against thy head has inflicted a wound. Well, we neither show any signs of vexation, nor are we offended, nor do we suspect him afterward as a treacherous fellow; and yet we are on our guard against him, not however as an enemy, nor yet with suspicion, but we quietly get out of his way. Something like this let thy behaviour be in all the other parts of life, let us overlook many things in those who are like antagonists in the gymnasium. For it is in our power, as I said, to get out of the way, and to have no suspicion nor harted.

21 If any man is able to convince me and show me that I do not think or act right, I will gladly change; for I seek the truth by which no man was ever injured. But he is injured who abides in his error and ignorance.

22 I do my duty: other things trouble me not; for they are either things without life, or things without reason, or things that have rambled and know not the way.

23 As to the animals which have no reason, and generally all things and objects, do thou, since thou hast reason and they have none, make use of them with a generous and liberal spirit. But toward human beings, as they have reason, behave in a social spirit. And on all occasions call on the gods, and do not perplex thyself about the length of time in which thou shalt do this; for even three hours so spent are sufficient.

24 Alexander the Macedonian and his groom by death were brought to the same state; for either they were received among the same seminal principles of the universe, or they were alike dispersed among the atoms.

25 Consider how many things in the same indivisible time take place in each of us, things which concern the body and things which concern the soul; and so thou wilt not wonder if many more things, or rather all things which come into existence in that which is the one and all, which we call Cosmos, exist in it at the same time.

26 If any man should propose to thee the question, how the name Antoninus is written, wouldst thou with a straining of the voice utter each letter? What then if they grow angry, wilt thou be angry too? Wilt thou not go on with composure and number every letter? Just so then in this life also remember that every duty is made up of certain parts. These it is thy duty to observe and without being disturbed or showing anger toward those who are angry with thee to go on thy way and finish that which is set before thee.

27 How cruel it is not to allow men to strive after the things which appear to them to be suitable to their nature and profitable! And yet in a manner thou dost not allow them to do this, when thou art vexed because they do wrong. For they are certainly moved toward things because they suppose them to be suitable to their nature and profitable to them. But it is not so. Teach them then, and show them without being angry.

28 Death is a cessation of the impressions through the senses, and of the pulling of the strings which move the appetites, and of the discursive movements of the thoughts, and of the service to the flesh.

29 It is a shame for the soul to be first to give way in this life, when thy body does not give way.

30 Take care that thou art not made into a Caesar, that thou art not dyed with this dye; for such things happen. Keep thyself then simple, good, pure, serious, free from affectation, a friend of justice, a worshiper of the gods, kind, affectionate, strenuous in all proper acts. Strive to continue to be such as philosophy wished to make thee. Reverence the gods, and help men. Short is life. There is only one fruit of this terrene life, a pious disposition and social acts. Do everything as a disciple of Antoninus. Remember his constancy in every act which was conformable to reason, and his evenness in all things, and his piety, and the serenity of his countenance, and his sweetness, and his disregard of empty fame, and his efforts to understand things; and how he would never let anything pass without having first most carefully examined it and clearly understood it: and how he bore with those who blamed him unjustly without blaming them in return; how he did nothing in a hurry; and how he listened not to calumnies, and how exact an examiner of manners and actions he was: and not given to reproach people, nor timid, nor suspicious, nor a sophist; and with how little he was satisfied, such as lodging, bed, dress, food, servants; and how laborious and patient; and how he was able on account of his sparing diet to hold out to the evening, not even requiring to relieve himself by any evacuations except at the usual hour; and his firmness and uniformity in his friendships; and how he tolerated freedom of speech in those who opposed his opinions; and the pleasure that he had when any man showed him anything better; and

how religious he was without superstition. Imitate all this that thou mayest have as good a conscience, when thy last hour comes, as he had.

31 Return to thy sober senses and call thyself back; and when thou hast roused thyself from sleep and hast perceived that they were only dreams which troubled thee, now in thy waking hours look at these (the things about thee) as thou didst look at those (the dreams).

32 I consist of a little body and soul. Now to this little body all things are indifferent, for it is not able to perceive differences. But to the understanding those things only are indifferent, which are not the works of its own activity. But whatever things are the works of its own activity, all these are in its power. And of these however only those which are done with reference to the present; for as to the future and the past activities of the mind, even these are for the present indifferent.

33 Neither the labour which the hand does nor that of the foot is contrary to nature, so long as the foot does the foot's work and the hand the hand's. So then neither to a man as a man is his labour contrary to nature, so long as it does the things of a man. But if the labour is not contrary to his nature, neither is it an evil to him.

34 How many pleasures have been enjoyed by robbers, patricides, tyrants.

35 Dost thou not see how the handicraftsmen accommodate themselves up to a certain point to those who are not skilled in their craft—nevertheless they cling to the reason (the principles) of their art and do not endure to depart from it? Is it not strange if the architect and the physician shall have more respect to the reason (the principles) of their own arts than man to his own reason, which is common to him and the gods?

36 Asia, Europe are corners of the universe; all the sea a drop in the universe; Athos a little clod of the universe; all the present time is a point in eternity. All things are little, changeable, perishable. All things come from thence, from that universal ruling power either directly proceeding or by way of sequence. And accordingly the lion's gaping jaws, and that which is poisonous, and every harmful thing, as a thorn, as mud, are after-products of the grand and beautiful. Do not then imagine that they are of another kind from that which hou dost venerate. but form a just opinion of the source of all.

37 He who has seen present things has seen all, both everything which has taken place from all eternity and everything which will be for time without end; for all things are of one kin and of one form.

38 Frequently consider the connection of all things in the universe and their relation to one another. For in a manner all things are implicated with one another, and all in this way are friendly to one another; for one thing comes in order after another, and this is by virtue of the active movement and mutual conspiration and the unity of the substance.

39 Adapt thyself to the things with which thy lot has been cast; and the men among whom thou hast received thy portion, love them, but do it truly.

40 Every instrument, too, vessel, if it does that for which it has been made, is well, and yet he who made it is not there. But in the things which are held together by nature there is within and there abides in them the power which made them; wherefore the more is it fit to reverence this power, and to think that, if thou dost live and act according to its will, everything in the is in conformity to intelligence. And thus also in the universe the things which belong to it are in conformity to intelligence.

41 Whatever of the things which are not within thy power thou shalt suppose to be good for thee or evil, it must of necessity be that, if such a bad thing befall thee or the loss of such a good thing, thou wilt blame the gods, and hate men too, those who are the cause of the misfortune or the loss, or those who are suspected of being likely to be the cause; and indeed we do much injustice, because we make a difference between these things (because we do not regard these things as indifferent). But if we judge only those things which are in our power to be good or bad, there remains no reason either for finding fault with God or standing in a hostile attitude to man.

42 We are all working together to one end, some with knowledge and design, and others without knowing what they do; as men also when they are asleep, of whom it is Heraclitus, I think, who says that they are labourers and cooperators in the things which take place in the universe. But men co-operate after different fashions: and even those cooperate abundantly, who find fault with what happens and those who try to oppose it and to hinder it; for the universe had need even of such men as these. It remains then for thee to understand among what kind of workmen thou placest thyself; for he who rules all things will certainly make a right use of thee, and he will receive thee among some part of the cooperators and of those whose labours conduce to one end. But be not thou such a part as the mean and ridiculous verse in the play, which Chrysippus speaks of.

43 Does the sun undertake to do the work of the rain, or Æsculapius the work of the Fruit-bearer (the earth)? And

how is it with respect to each of the stars, are they not different, and yet they work together to the same end?

44 If the gods have determined about me and about the things which must happen to me, they have determined well, for it is not easy even to imagine a deity without forethought; and as to doing me harm, why should they have any desire towards that? for what advantage would result to them from this or to the whole, which is the special object of their providence? But if they have not determined about me individually, they have certainly determined about the whole at least, and the things which happen by way of sequence in this general arrangement I ought to accept with pleasure and to be content with them. But if they determine about nothing, which it is wicked to believe, or if we do believe it, let us neither sacrifice nor pray nor swear by them, nor do anything else which we do as if the gods were present and lived with us, but if however the gods determine about none of the things which concern us, I am able to determine about myself, and I can inquire about that which is useful; and that is useful to every man which is conformable to his own constitution and nature. But my nature is rational and social: and my city and country, so far as I am Antoninus, is Rome, but so far as I am a man, it is the world. The things then which are useful to these cities are alone useful to me.

45 Whatever happens to every man, this is for the interest of the universal: this might be sufficient. But further thou wilt observe this also as a general truth, if thou dost observe, that whatever is profitable to any man is profitable also to other men. But let the word profitable be taken here in the common sense as said of things of the middle kind neither good nor bad.

46 As it happens to thee in the amphitheatre and such places, that the continual sight of the same things and the uniformity make the spectacle wearisome, so it is in the whole of life; for all things above, below, are the same and from the same. How long then?

47 Think continually that all kinds of men and of all kinds of pursuits and of all nations are dead, so that thy thoughts come down even to Philistion and Phoebus and Origanion. Now turn thy thoughts to the other kinds of men. To that place then we must remove, where there are so many great orators, and so many noble philosophers, Heraclitus, Pythagoras, Socrates; so many heroes of former days, and so many generals after them, and tyrants; besides these, Eudoxus, Hipparchus, Archimedes, and other men of acute natural talents, great minds, lovers of labour, versatile, confident, mockers even of the perishable and ephemeral life of man, as Menippus and such as are like him. As to all these consider that they have long been in the dust. What harm then is this to them; and what to those whose names are altogether unknown? One thing here is worth a great deal, to pass thy life in truth and justice, with a benevolent disposition even to liars and unjust men.

48 When thou wishest to delight thyself, think of the virtues of those who live with thee; for instance, the activity of one, and the modesty of another, and the liberality of a third, and some other good quality of a fourth. For nothing delights so much as the examples of the virtues, when they are exhibited in the morals of those who live with us and present themselves in abundance, as far as is possible. Wherefore we must keep them before us.

49 Thou art not dissatisfied, I suppose, because thou weighest only so many litre and not three hundred. Be not dissatisfied then that thou must live only so many years and not more; for as thou art satisfied with the amount of substance which has been assigned to thee, so be content with the time.

50 Let us try to persuade them (men). But act even against their will, when the principles of justice lead that way. If, however, any man using force stands in thy way, betake thyself to contentment and tranquillity, and at the same time employ the hindrance toward the exercise of some other virtue; and remember that thy attempt was with a reservation (conditionally), that thou didst not desire to do impossibilities. What then didst thou desire? Some such effort as this. But thou attainest thy object, if the things to which thou wast moved are not accomplished.

51 He who loves fame considers another man's activity to be his own good; and he who loves pleasure, his own sensations; but he who has understanding, considers his own acts to be his own good.

52 It is in our power to have no opinion about a thing, and not to be disturbed in our soul, for things themselves have no natural power to form our judgements.

53 Accustom thyself to attend carefully to what is said by another, and as much as it is possible, be in the speaker's mind. 54 That which is not good for the swarm, neither is it good for the bee.

55 If sailors abused the helmsman or the sick the doctor, would they listen to anybody else; or how could the helmsman secure the safety of those in the ship or the doctor the health of those whom he attends?

56 How many together with whom I came into the world are already gone out of it.

57 To the jaundiced honey tastes bitter, and to those bitten by mad dogs water causes fear; and to little children the ball is a fine thing. Why then am I angry? Dost thou think that a false opinion has less power than the bile in the jaundiced or the poison in him who is bitten by a mad dog?

58 No man will hinder thee from living according to the reason of thy own nature: nothing will happen to thee contrary to the reason of the universal nature.

59 What kind of people are those whom men wish to please, and for what objects, and by what kind of acts? How soon will time cover all things, and how many it has covered already.

MARCUS AURELIUS MEDITATIONS BOOK 7

I what is badness? It is that which thou hast often seen. And on the occasion of everything which happens keep this in mind, that it is that which thou hast often seen. Everywhere up and down thou wilt find the same things, with which the old histories are filled, those of the middle ages and those of our own day; with which cities and houses are filled now. There is nothing new; all things are both familiar and shortlived.

2 How can our principles become dead, unless the impressions (thoughts) which correspond to them are extinguished? But it is in thy power continuously to fan these thoughts into a flame. I can have that opinion about anything, which I ought to have. If I can, why am I disturbed? The things which are external to my mind have no relation at all to my mind. Let this be the state of thy affects, and thou standest erect. To recover thy life is in thy power. Look at things again as thou didst use to look at them; for in this consists the recovery of thy life.

3 The idle business of show, plays on the stage, flocks of sheep, herds, exercises with spears, a bone to cast to little dogs, a bit of bread into fish-ponds, labourings of ants and burdencarrying, runnings about of frightened little mice, puppets pulled by strings (all alike). It is thy duty then in the midst of such things to show good humour and not a proud air; to understand, however, that every man is worth just so much as the things are worth about which he busies himself.

4 In discourse thou must attend to what is said, and in every movement thou must observe what is doing. And in the one thou shouldst see immediately to what end it refers, but in the other watch carefully what is the thing signified.

5 Is my understanding sufficient for this or not? If it is sufficient I use it for the work as an instrument given by the universal nature. But if it is not sufficient, then either I retire from the work and give way to him who is able to do it better, unless there be some reason why I ought not to do so; or I do it as well as I can, taking to help me the man who with the aid of my ruling principle can do what is now fit and useul for the general good. For whatsoever either by myself or with another I can do, ought to be directed to this only, to that which is useful and well suited to society.

6 How many after being celebrated by fame have been given up to oblivion; and how many who have celebrated the fame of others have long been dead.

7 Be not ashamed to be helped; for it is thy business to do thy duty like a soldier in the assault on a town. How then, if being lame thou canst not mount up on the battlements alone, but with the help of another it is possible?

8 Let not future things disturb thee, for thou wilt come to them, if it shall be necessary, having with thee the same reason which now thou usest for present things.

9 All things are implicated with one another, and the bond is holy; and there is hardly anything unconnected with any other thing. For things have been co-ordinated, and they combine to form the same universe order. For there is one universe made up of all things, and one god who pervades all things, and one substance, and one law, one common reason in all intelligent animals, and one truth; if indeed there is also one perfection for all animals which are of the same stock and participate in the same reason.

10 Everything material soon disappears in the substance of the whole; and everything causal is very soon taken back into the universal reason; and the memory of everything is very soon overwhelmed in time.

11 To the rational animal the same act is according to nature and according to reason.

12 Be thou erect, or be made erect.

13 Just as it is with the members in those bodies which are united in one, so it is with rational beings which exist separate, for they have been constituted for one co-operation. And the perception of this will be more apparent to thee, if thou often sayest to thyself that I am a member of the system of rational beings. But if thou sayest that thou art a part, thou dost not yet love men from thy heart; beneficence does not yet delight thee for its own sake; thou still doest it barely as a thing of propriety, and not yet as doing good to thyself.

14 Let there fall externally what will on the parts which can feel the effects of this fall. For those parts which have felt will complain, if they choose. But I, unless I think that what has happened is an evil, am not injured. And it is in my power not to think so. 15 Whatever any one does or says, I must be good, just as if the gold, or the emerald, or the purple were always saying this: Whatever any one does or says, I must be emerald and keep my colour.

16 The ruling faculty does not disturb itself; I mean, does not frighten itself or cause itself pain. But if any one else can frighten or pain it, let him do so. For the faculty itself will not by its own opinion turn into such ways. Let the body itself take care, if it can, that it suffer nothing, and let it speak, if it suffers. But the soul itself, that which is subject to fear, to pain, which has completely the power of forming an opinion about these things, will suffer nothing, for it will never deviate into such a judgement. The leading principle in itself wants nothing, unless it makes a want for itself; and therefore it is both free from perturbation and unimpeded, if it does not disturb and impede itself.

17 Happiness is a good daemon, or a good thing. What then art thou doing here, O imagination? go away, I entreat thee by the gods, as thou didst come, for I want thee not. But thou art come according to thy old fashion. I am not angry with thee: only go away. 18 Is any man afraid of change? Why, what can take place

18 Is any man afraid of change? Why, what can take place without change? What then is more pleasing or more suitable to the universal nature? And canst thou take a bath unless the wood undergoes a change? And canst thou be nourished unless the food undergoes a change? And can anything else that is useful be accomplished without change? Dost thou not see then that for thyself also to change is just the same, and eoually necessary for the universal nature?

19 Through the universal substance as through a furious torrent all bodies are carried, being by their nature united with and cooperating with the whole, as the parts of our body with one another. How many a Chrysippus, how many a Socrates, how many an Epictetus has time already swallowed up? And let the same thought occur to thee with reference to every man and thing.

20 One thing only troubles me, lest I should do something which the constitution of man does not allow, or in the way which it does not allow, or what it does not allow now.

21 Near is thy forgetfulness of all things; and near the forgetfulness of thee by all.

22 It is peculiar to man to love even those who do wrong. And this happens, if when they do wrong it occurs to thee that they are kinsmen, and that they do wrong through ignorance and unintentionally, and that soon both of you will die; and above all, that the wrong-doer has done thee no harm, for he has not made thy ruling faculty worse than it was before.

23 The universal nature out of the universal substance, as if it were wax, now moulds a horse, and when it has broken this up, it uses the material for a tree, then for a man, then for something else; and each of these things subsists for a very short time. But it is no hardship for the vessel to be broken up, just as there was none in its being fastened together.

24 A scowling look is altogether unnatural; when it is often assumed, the result is that all comeliness dies away, and at last is so completely extinguished that it cannot be again lighted up at all. Try to conclude from this very fact that it is contrary to reason. For if even the perception of doing wrong shall depart, what reason is there for living any longer?

25 Nature which governs the whole will soon change all things which thou seest, and out of their substance will make other things, and again other things from the substance of them, in order that the world may be ever new.

26 When a man has done thee any wrong, immediately consider with what opinion about good or evil he has done wrong. For when thou hast seen this, thou wilt pity him, and wilt neither wonder nor be angry. For either thou thyself thinkest the same thing to be good that he does, or another thing of the same kind. It is thy duty then to pardon him. But if thou dost not think such things to be good or evil, thou wilt more readily be well-disposed to him who is in error.

27 Think not so much of what thou hast not as of what thou hast: but of the things which thou hast select the best, and then reflect how eagerly they would have been sought, if thou hadst them not. At the same time, however, take care that thou dost not through being so pleased with them accustom thyself to overvalue them, so as to be disturbed if ever thou shouldst not have them.

28 Retire into thyself. The rational principle which rules has this nature, that it is content with itself when it does what is just, and so secures tranquillity.

29 Wipe out the imagination. Stop the pulling of the strings. Confine thyself to the present. Understand well what happens either to thee or to another. Divide and distribute every object and being into its causal form and its material contents. Think of thy last hour. Let the wrong which is done by a man stay there where the wrong was done.

30 Direct thy attention to what is said. Let thy understanding enter into the things that are doing and the things which do them.

31 Adorn thyself with simplicity and modesty and with indifference towards the things which lie between virtue and vice. Love mankind. Follow God. The poet says that Law rules all. And it is enough to remember that law rules all. 32 About death: whether it is a dispersion, or a resolution into atoms, or annihilation, it is either extinction or change.

33 About pain: the pain which is intolerable carries us off; but that which lasts a long time is tolerable; and the mind maintains its own tranquillity by retiring into itself, and the ruling faculty is not made worse. But the parts which are harmed by pain, let them, if they can, give their opinion about it.

34 About fame: look at the minds of those who seek fame, observe what they are, and what kind of things they avoid, and what kind of things they pursue. And consider that as the heaps of sand piled on one another hide the former sands, so in life the events which go before are soon covered by those which come after.

35 From Plato: the man who has an elevated mind and takes a view of all time and of all substance, dost thou suppose it possible for him to think that human life is anything great? It is not possible, he said. Such a man then will think that death also is no evil. Certainly not.

36 From Antisthenes: It is royal to do good and to be abused.

37 It is a base thing for the countenance to be obedient and to regulate and compose itself as the mind commands, and for the mind not to be regulated and composed by itself.

38 It is not right to vex ourselves at things, for they care nought about it.

39 To the immortal gods and us give joy.

40 Life must be reaped like the ripe ears of corn: One man is born; another dies.

 $41\,{\rm If}$ gods care not for me and for my children, there is a reason for it.

42 For the good is with me, and the just.

43 No joining others in their wailing, no violent emotion. 44 From Plato: But I would make this man a sufficient answer, which is this: Thou sayest not well, if thou thinkest that a man who is good for anything at all ought to compute the hazard of life or death, and should not rather look to this only in all that he does, whether he is doing what is just or unjust, and the works of a good or a bad man.

45 For thus it is, men of Athens, in truth: wherever a man has placed himself thinking it the best place for him, or has been placed by a commander, there in my opinion he ought to stay and to abide the hazard, taking nothing into the reckoning, either death or anything else, before the baseness of deserting his post.

46 But, my good friend, reflect whether that which is noble and good is not something different from saving and being saved; for as to a man living such or such a time, at least one who is really a man, consider if this is not a thing to be dismissed from the thoughts: and there must be no love of life: but as to these matters a man must intrust them to the deity and believe what the women say, that no man can escape his destiny, the next inquiry being how he may best live the time that he has to live.

47 Look round at the courses of the stars, as if thou wert going along with them; and constantly consider the changes of the elements into one another; for such thoughts purge away the fifth of the terrene life.

48 This is a fine saying of Plato: That he who is discoursing about men should look also at earthly things as if he viewed them from some higher place; should look at them in their assemblies, armies, agricultural labours, marriages, treaties, births, deaths, noise of the courts of justice, desert places, various nations of barbarians, feasts, lamentations, markets, a mixture of all things and an orderly combination of contraries.

49 Consider the past; such great changes of political supremacies. Thou mayest foresee also the things which will be. For they will certainly be of like form, and it is not possible that they should deviate from the order of the things which take place now: accordingly to have contemplated human life for forty years is the same as to have contemplated it for ten thousand years. For what more wilt thou see?

50 That which has grown from the earth to the earth, but that which has sprung from heavenly seed, back to the heavenly realms returns. This is either a dissolution of the mutual involution of the atoms, or a similar dispersion of the insentient elements.

51 With food and drinks and cunning magic arts turning the channel's course to 'scape from death. The breeze which heaven has sent. We must endure, and toil without complaining.

52 Another may be more expert in casting his opponent; but he is not more social, nor more modest, nor better disciplined to meet all that happens, nor more considerate with respect to the faults of his neighbours.

53 Where any work can be done conformably to the reason which is common to gods and men, there we have nothing to fear; for where we are able to get profit by means of the activity which is successful and proceeds according to our constitution, there no harm is to be suspected.

54 Everywhere and at all times it is in thy power piously to acquiesce in thy present condition, and to behave justly to those who are about thee, and to exert thy skill upon thy

present thoughts, that nothing shall steal into them without being well examined.

55 Do not look around thee to discover other men's ruling principles, but look straight to this, to what nature leads thee, both the universal nature through the things which happen to thee, and thy own nature through the acts which must be done by thee. But every being ought to do that which is according to its constitution; and all other things have been constituted for the sake of rational beings, just as among irrational things the inferior for the sake of the superior, but the rational for the sake of one another.

The prime principle then in man's constitution is the social. And the second is not to yield to the persuasions of the body, for it is the peculiar office of the rational and intelligent motion to circumscribe itself, and never to be overpowered either by the motion of the senses or of the appetites, for both are animal; but the intelligent motion claims superiority and does not permit itself to be overpowered by the others. And with good reason, for it is formed by nature to use all of them. The third thing in the rational constitution is freedom from error and from deception. Let then the ruling principle holding fast to these things go straight on, and it has what is its own.

56 Consider thyself to be dead, and to have completed thy life up to the present time; and live according to nature the remainder which is allowed thee.

57 Love that only which happens to thee and is spun with the thread of thy destiny. For what is more suitable?

58 In everything which happens keep before thy eyes those to whom the same things happened, and how they were vexed, and treated them as strange things, and found fault with them; and now where are they? Nowhere. Why then dost thou too choose to act in the same way? and why dost thou not leave these agitations which are foreign to nature, to those who cause them and those who are moved by them? And why art thou not altogether intent upon the right way of making use of the things which happen to the? for then thou wilt use them well, and they will be a material for thee (to work on). Only attend to thyself, and resolve to be a good man in every act which thou doest: and remember.

act which thou doest; and remember... 59 Look for qualities inside of thyself. Within is the fountain of good, and it will ever bubble up, if thou wilt ever dig.

60 The body ought to be compact, and to show no irregularity either in motion or attitude. For what the mind shows in the face by maintaining in it the expression of intelligence and propriety, that ought to be required also in the whole body. But all these things should be observed without affectation.

61 The art of life is more like the wrestler's art than the dancer's, in respect of this, that it should stand ready and firm to meet onsets which are sudden and unexpected.

62 Constantly observe who those are whose approbation thou wishest to have, and what ruling principles they possess. For then thou wilt neither blame those who offend involuntarily, nor wilt thou want their approbation, if thou lookest to the sources of their opinions and appetites.

63 Every soul, the philosopher says, is involuntarily deprived of truth; consequently in the same way it is deprived of justice and temperance and benevolence and everything of the kind. It is most necessary to bear this constantly in mind, for thus thou wilt be more gentle towards all.

64 In every pain let this thought be present, that there is no dishonour in it, nor does it make the governing intelligence worse, for it does not damage the intelligence either so far as the intelligence is rational or so far as it is social. Indeed in the case of most pains let this remark of Epicurus aid thee, that pain is neither intolerable nor everlasting, if thou bearest in mind that it has its limits, and if thou addest nothing to it in imagination: and remember this too, that we do not perceive that many things which are disagreeable to us are the same as pain, such as excessive drowsiness, and the being scorched by heat, and the having no appetite. When then thou art discontented about any of these things, say to thyself that thou art yielding to pain.

65 Take care not to feel towards the inhuman as they feel towards men.

66 How do we know if Telauges was not superior in character to Socrates? for it is not enough that Socrates dies a more noble death, and disputed more skilfully with the sophists, and passed the night in the cold with more endurance, and that when he was bid to arrest Leon of Salamis, he considered it more noble to refuse, and that he walked in a swaggering way in the streets-though as to this fact one may have great doubts if it was true. But we ought to inquire, what kind of a soul it was that Socrates possessed. and if he was able to be content with being just towards men and pious towards the gods, neither idly vexed on account of men's villainy, nor yet making himself a slave to any man's ignorance, nor receiving as strange anything that fell to his share out of the universal, nor enduring it as intolerable, nor allowing his understanding to sympathize with the affects of the miserable flesh.

67 Nature has not so mingled (the intelligence) with the composition of the body, as not to have allowed thee the power of circumscribing thyself and of bringing under subjection to thyself all that is thy own; for it is very possible to be a divine man and to be recognized as such by no one. Always bear this in mind; and another thing too, that very little indeed is necessary for living a happy life. And because thou hast despaired of becoming a dialectician and skilled in the knowledge of nature, do not for this reason renounce the hope of being both free and modest and social and obedient to God.

68 It is in thy power to live free from all compulsion in the greatest tranquillity of mind, even if all the world cry out against thee as much as they choose, and even if wild beasts tear in pieces the members of this kneaded matter which has grown around thee. For what hinders the mind in the midst of all this from maintaining itself in tranquillity, and in a just judgement of all surrounding things, and in a ready use of the objects which are presented to it, so that the judgement may say to the thing which falls under its observation: This thou art in substance (reality), though in men's opinion thou mayest appear to be of a different kind; and the use shall say to that which falls under the hand: Thou art the thing that I was seeking; for to me that which presents itself is always a material for virtue, both rational and political, and, in a word, for the exercise of art, which belongs to man or God. For everything which happens has a relationship either to God or man, and is neither new nor difficult to handle, but usual and apt matter to work on.

69 The perfection of moral character consists in this, in passing every day as the last, and in being neither violently excited, nor torpid, nor playing the hypocrite.

70 The gods who are immortal are not vexed because during so long a time they must tolerate continually men such as they are and so many of them bad; and besides this, they also take care of them in all ways. But thou, who art destined to end so soon, art thou wearied of enduring the bad, and this too when thou art one of them?

71 It is a ridiculous thing for a man not to fly from his own badness, which is indeed possible, but to fly from other men's badness, which is impossible.

72 Whatever the rational and political (social) faculty finds to be neither intelligent nor social, it properly judges to be inferior to itself.

73 When thou hast done a good act and another has received it, why dost thou still look for a third thing besides these, as fools do, either to have the reputation of having done a good act or to obtain a return?

74 No man is tired of receiving what is useful. But it is useful to act according to nature. Do not then be tired of receiving what is useful by doing it to others.

75 The nature of the All moved to make the universe. But now either everything that takes place comes by way of consequence or (continuity); or even the chief things towards which the ruling power of the universe directs its own movement are governed by no rational principle. If this is remembered it will make thee more tranquil in many things.

MARCUS AURELIUS MEDITATIONS BOOK 8

1 This reflection also tends to the removal of the desire of empty fame, that it is no longer in thy power to have lived the whole of thy life, or at least thy life from thy youth upwards, like a philosopher; but both to many others and to thyself it is plain that thou art far from philosophy. Thou hast fallen into disorder then, so that it is no longer easy for thee to get the reputation of a philosopher; and thy plan of life also opposes it. If then thou hast truly seen where the matter lies, throw away the thought, How thou shalt seem (to others), and be content if thou shalt live the rest of thy life in such wise as thy nature wills. Observe then what it wills, and let nothing else distract thee; for thou hast had experience of many wanderings without having found happiness anywhere, not in syllogisms, nor in wealth, nor in reputation, nor in enjoyment, nor anywhere. Where is it then? In doing what man's nature requires. How then shall a man do this? If he has principles from which come his affects and his acts. What principles? Those which relate to good and bad: the belief that there is nothing good for man, which does not make him just, temperate, manly, free; and that there is nothing bad, which does not do the contrary to what has been mentioned.

2 On the occasion of every act ask thyself, How is this with respect to me? Shall I repent of it? A little time and I am dead, and all is gone. What more do I seek, if what I am doing now is the work of an intelligent living being, and a social being, and one who is under the same law with God?

3 Alexander and Caius and Pompeius, what are they in comparison with Diogenes and Heraclitus and Socrates? For they were acquainted with things, and their causes, and their matter, and the ruling principles of these men were the same and conformable to their pursuits. But as to the others, how many things had they to care for, and to how many things were they slaves.

4 Consider that men will do the same things nevertheless, even though thou shouldst burst.

5 This is the chief thing: Be not perturbed, for all things are according to the nature of the universal; and in a little time thou wilt be nobody and nowhere, like Hadrianus and Augustus. In the next place having fixed thy eyes steadily on thy business look at it, and at the same time remembering that it is thy duty to be a good man, and what man's nature demands, do that without turning aside; and speak as it seems to thee most just, only let it be with a good disposition and with modesty and without hypocrisy.

6 The nature of the universal has this work to do, to remove to that place the things which are in this, to change them, to take them away hence, and to carry them there. All things are change, yet we need not fear anything new. All things are familiar (to us); but the distribution of them still remains the same.

7 Every nature is contented with itself when it goes on its way well; and a rational nature goes on its way well, when in its thoughts it assents to nothing false or uncertain, and when it directs its movements to social acts only, and when it confines its desires and aversions to the things which are in its power, and when it is satisfied with everything that is assigned to it by the common nature. For of this common nature every particular nature is a part, as the nature of the leaf is a part of the nature of the plant; except that in the plant the nature of the leaf is part of a nature which has not perception or reason, and is subject to be impeded; but the nature of man is part of a nature which is not subject to impediments, and is intelligent and just, since it gives to everything in equal portions and according to its worth, times, substance, cause (form), activity, and incident. But examine, not to discover that any one thing compared with any other single thing is equal in all respects, but by taking all the parts together of one thing and comparing them with all the parts together of another.

8 Thou hast no ability to read. But thou hast the ability to check arrogance: thou hast the ability to be superior to pleasure and pain: thou hast ability to be superior to love of fame, and not to be vexed at stupid and ungrateful people, nay even to care for them.

9 Let no man any longer hear thee finding fault with the court life or with thy own.

10 Repentance is a kind of self-reproof for having neglected something useful; but that which is good must be something useful, and the perfect good man should look after it. But no such man would ever repent of having refused any sensual pleasure. Pleasure then is neither good nor useful.

11 This thing, what is it in itself, in its own constitution? What is its substance and material? And what is its causal nature and form? And what is it doing in the world? And how long does it subsist?

12 When thou risest from sleep with reluctance, remember that it is according to thy constitution and according to human nature to perform social acts, but sleeping is common also to irrational animals. But that which is according to each individual's nature is also more peculiarly its own, and more suitable to its nature, and indeed also more agreeable.

13 Constantly and, if it be possible, on the occasion of every impression on the soul, apply to it the principles of Physic, of Ethic, and of Dialectic.

14 Whatever man thou meetest with, immediately say to thyself: What opinions has this man about good and bad? For it with respect to pleasure and pain and the causes of each, and with respect to fame and ignominy, death and life, he has such and such opinions, it will seem nothing wonderful or strange to me, if he does such and such things; and I shall bear in mind that he is compelled to do so.

15 Remember that as it is a shame to be surprised if the figtree produces figs, so it is to be surprised if the world produces such and such things of which it is productive; and for the physician and the helmsman it is a shame to be surprised, if a man has a fever, or if the wind if unfavourable.

I6 Remember that to change thy opinion and to follow him who corrects thy error is as consistent with freedom as it is to persist in thy error. For it is thy own, the activity which is exercted according to thy own understanding too.

17 If a thing is in thy own power, why dost thou do it? but if it is in the power of another, whom dost thou blame? the atoms (chance) or the gods? Both are foolish. Thou must blame nobody. For if thou canst, correct (that which is the cause); but if thou canst not do this, correct at least the thing itself; but if thou canst not do even this, of what use is it to thee to find fault? for nothing should be done without a purpose.

18 That which has died falls not out of the universe. If it stays here, it also changes here, and is dissolved into its proper parts, which are elements of the universe and of thyself. And these too change, and they murmur not.

19 Everything exists for some end, a horse, a vine. Why dost thou wonder? Even the sun will say, I am for some purpose, and the rest of the gods will say the same. For what purpose then art thou? to enjoy pleasure? See if common sense allows this.

 $20~\rm Nature$ has had regard in everything no less to the end than to the beginning and the continuance, just like the man

who throws up a ball. What good is it then for the ball to be thrown up, or harm for it to come down, or even to have fallen? and what good is it to the bubble while it holds together, or what harm when it is burst? The same may be said of a light also.

21 Turn it (the body) inside out, and see what kind of thing it is; and when it has grown old, what kind of thing it becomes, and when it is diseased. Short-lived are both the praiser and the praised, and the rememberer and the remembered: and all this in a nook of this part of the world; and not even here do all agree, no, not any one with himself: and the whole earth too is a point.

22 Attend to the matter which is before thee, whether it is an opinion or an act or a word. Thou sufferest this justly: for thou choosest rather to become good to-morrow than to be good to-day.

23 Am I doing anything? I do it with reference to the good of mankind. Does anything happen to me? I receive it and refer it to the gods, and the source of all things, from which all that happens is derived.

24 Such as bathing appears to thee, oil, sweat, dirt, filthy water, all things disgusting, so is every part of life and everything.

25 Lucilla saw Verus die, and then Lucilla died. Secunda saw Maximus die, and then Secunda died. Epitynchanus saw Diotimus die, and then Epitynchanus died. Antoninus saw Faustina die, and then Antoninus died. Such is everything. Celer saw Hadrianus die, and then Celer died. And those sharp-witted men, either seers or men inflated with pride, where are they? for instance, the sharp-witted men, Charax and Demetrius the Platonist and Eudæmon, and any one else like them. All ephemeral, dead long ago. Some indeed have become the heroes of fables, and again others have disappeared even from fables. Remember this, then, that this little compound, thyself, must either be dissolved, or thy poor breath must be extinguished, or be removed and placed elsewhere.

26 It is satisfaction to a man to do the proper works of a man. Now it is a proper work of a man to be benevolent to his own kind, to despise the movements of the senses, to form a just judgement of plausible appearances, and to take a survey of the nature of the universe and of the things which happen in it.

27 There are three relations between thee and other things: the one to the body which surrounds thee; the second to the divine cause from which all things come to all; and the third to those who live with thee.

28 Pain is either an evil to the body, then let the body say what it thinks of it, or to the soul; but it is in the power of the soul to maintain its own serenity and tranquillity, and not to think that pain is an evil. For every judgement and movement and desire and aversion is within, and no evil ascends so high.

29 Wipe out thy imaginations by often saying to thyself: now it is in my power to let no badness be in this soul, nor desire, nor any perturbation at all; but looking at all things I see what is their nature, and I use each according to its value. Remember this power which thou hast from nature.

30 Speak both in the senate and to every man, whoever he may be, appropriately, not with any affectation: use plain discourse.

31 Augustus' court, his wife, his daughter, his descendants, his ancestors, his sister, his friend Agrippa, his kinsmen, his intimates, his friends Areius and Mæcenas, the physicians and the sacrificing priests; the whole court is the loot of father Death. Then turn to the rest, not considering the death of a single man, but of a whole family, as of the Pompeii-Family; and that which is inscribed on the tombs: 'the last of his family'. Then consider what trouble those before them have had that they might leave a successor; and then, that of necessity some one must be the last. Again here consider the death of a whole race.

32 It is thy duty to order thy life well in every single act; and if every act does its duty, as far as is possible, be content; and no one is able to hinder thee so that each act shall not do its duty. But something external will stand in the way. Nothing will stand in the way of thy acting justly and soberly and considerately, but perhaps some other active power will be hindered. Well, but by acquiescing in the hindrance and by being content to transfer thy efforts to that which is allowed, another opportunity of action is immediately put before thee in place of that which was hindered, and one which will adapt itself to this ordering of which we are speaking.

33 Receive wealth and prosperity without arrogance; and be ready to let it go.

34 If thou didst ever see a hand cut off, or a foot, or a head, lying anywhere apart from the rest of the body, such does a man make himself, as far as he can, who is not content with what happens, and separates himself from others, or does anything unsocial. Suppose that thou hast detached thyself from the natural unity - for thou wast made by nature a part, but now thou hast cut thyself off - yet here there is this beautiful provision, that it is in thy power again to unite thyself. God has allowed this to no other part, after it has been separated and cut asunder, to come together again. But consider the kindness by which he has distinguished man, for he has put it in his power not to be separated at all from the universal; and when he has been separated, he has allowed him to return and to be united and to resume his place as a part.

35 As the nature of the universal has given to every rational being all the other powers that it has, so we have received from it this power also. For as the universal nature converts and fixes in its predestined place everything which stands in the way and opposes it, and makes such things a part of itself, so also the rational animal is able to make every hindrance its own material, and to use it for such purposes as it may have designed.

36 Do not disturb thyself by thinking of the whole of thy life. Let not thy thoughts at once embrace all the various troubles which thou mayest expect to befall thee: but on every occasion ask thyself, What is there in this which is intolerable and past bearing? for thou wilt be ashamed to confess. In the next place remember that neither the future nor the past pains thee, but only the present. But this is reduced to a very little, if thou only circumscribest it, and chidest thy mind, if it is unable to hold out against even this.

37 Does Panthea or Pergamus now sit by the tomb of Verus? Does Chaurias or Diotimus sit by the tomb of Hadrianus? That would be ridiculous. Well, suppose they did sit there, would the dead be conscious of it? and if the dead were conscious, would they be pleased? and if they were pleased, would that make them immortal? Was it not in the order of destiny that these persons too should first become old women and old men and then die? What then would those do after these were dead? All this is foul smell and blood in a bag.

38 If thou canst see sharp, look and judge wisely, says the philosopher.

39 In the constitution of the rational animal I see no virtue which is opposed to justice; but I see a virtue which is opposed to love of pleasure, and that is temperance.

40 If thou takest away thy opinion about that which appears to give thee pain, thou thyself standest in perfect security. Who is this self? The reason. But I am not reason. Be it so. Let then the reason itself not trouble itself. But if any other part of thee suffers, let it have its own opinion about itself.

41 Hindrance to the perceptions of sense is an evil to the animal nature. Hindrance to the movements of desires is equally an evil to the animal nature. And something else also is equally an impediment and evil to the constitution of plants. So then that which is a hindrance to the intelligence is an evil to the intelligent nature. Apply all these things then to thyself. Does pain or sensuous pleasure affect thee? The senses will look to that. Has any obstacle opposed thee in thy efforts towards an object? if indeed thou wast making this effort absolutely, unconditionally and without any reservation, certainly this obstacle is an evil to thee considered as a rational animal. But if thou takest (into consideration) the usual course of things, thou hast not vet been injured nor even impeded. The things however which are proper to the understanding no other man is used to impede, for neither fire, nor iron, nor tyrant, nor abuse, touches it in any way. When it has been made a sphere, it continues a sphere.

42 It is not fit that I should give myself pain, for I have never intentionally given pain even to another.

43 Different things delight different people. But it is my delight to keep the ruling faculty sound without turning away either from any man or from any of the things which happen to men, but looking at and receiving all with welcome eyes and using everything according to its value.

44 See that thou secure this present time to thyself; for those who rather pursue posthumous fame do not consider that the men of after-time will be exactly such as these whom they cannot bear now; and both are mortal. And what is it in any way to thee if these men of after-time utter this or that sound, or have this or that opinion about thee?

45 Take me and cast me where thou wilt; for there I shall keep my divine part tranquil, that is, content, if it can feel and act conformably to its proper constitution. Is this (change of place) sufficient reason why my soul should be unhappy and worse than it was, depressed, expanded, shrinking, affrighted? and what wilt thou find which is sufficient reason for this?

46 Nothing can happen to any man which is not human accident, nor to an ox which is not according to the nature of an ox, nor to a vine which is not according to the nature of a vine, nor to a stone which is not proper to a stone. If then there happens to each thing both what is usual and natural, why shouldst thou complain? For the common nature brings nothing which may not be borne by thee.

47 If thou art pained by any external thing, it is not this that disturbs thee, but thy own judgement about it. And it is in thy power to wipe out this judgement now. But if anything in thy own disposition gives thee pain, who hinders thee from correcting thy opinion? And even if thou art pained because thou art not doing some particular thing which seems to thee to be right, why dost thou not rather act than complain? But some insuperable obstacle is in the way? Do not be grieved then, for the cause of its not being done depends not on thee.

But it is not worth while to live, if this cannot be done. Take thy departure then from life contentedly, just as he dies who is in full activity, and well pleased too with the things which are obstacles.

48 Remember that the ruling faculty is invincible, when self-collected it is satisfied with itself, if it does nothing which it does not choose to do, even if it resist from mere obstinacy. What then will it be when it forms a judgement about anything aided by reason and deliberately? Therefore the mind which is free from passions is a citadel, for man has nothing more secure to which he can fly for refuge and for the future be inexpugnable. He then who has not seen this is an ignorant man; but he who has seen it and does not fly to this refuge is unhappy.

49 Say nothing more to thyself than what the first appearances report. Suppose that it has been reported to thee that a certain person speaks ill of thee. This has been reported. I but that thou hast been injured, that has not been reported. I see that my child is sick. I do see; but that he is in danger, I do not see. Thus then always abide by the first appearances, and add nothing thyself from within, and then nothing happens to thee. Or rather add something, like a man who knows everything that happens in the world.

50 A cucumber is bitter. Throw it away. There are briars in the road. Turn aside from them. This is enough. Do not add, And why were such things made in the world? For thou wilt be ridiculed by a man who is acquainted with nature, as thou wouldst be ridiculed by a carpenter and shoemaker if thou didst find fault because thou seest in their workshop shavings and cuttings from the things which they make. And yet they have places into which they can throw these shavings and cuttings, and the universal nature has no external space; but the wondrous part of her art is that though she has circumscribed herself, everything within her which appears to decay and to grow old and to be useless she changes into herself, and again makes other new things from these very same, so that she requires neither substance from without nor wants a place into which she may cast that which decays. She is content then with her own space, and her own matter, and her own art

51 Neither in thy actions be sluggish, nor in thy conversation without method, nor wandering in thy thoughts, nor let there be in thy soul inward contention nor external effusion, nor in life be so busy as to have no leisure.

Suppose that men kill thee, cut thee in pieces, curse thee. What then can these things do to prevent thy mind from remaining pure, wise, sober, just? For instance, if a man should stand by a limpid pure spring, and curse it, the spring never ceases sending up potable water; and if he should cast clay into it or filth, it will speedily disperse them and wash them out, and will not be at all polluted. How then shalt thou possess a perpetual fountain (and not a mere well)? By forming thyself hourly to freedom conjoined with contentment, simplicity and modesty.

52 He who does not know what the world is, does not know where he is. And he who does not know for what purpose the world exists, does not know who he is, nor what the world is. But he who has failed in any one of these things could not even say for what purpose he exists himself. What then dost thou think of him who (avoids or) seeks the praise of those who applaud, of men who know not either where they are or who they are?

53 Dost thou wish to be praised by a man who curses himself thrice every hour? Wouldst thou wish to please a man who does not please himself? Does a man please himself who repents of nearly everything that he does?

54 No longer let thy breathing only act in concert with the air which surrounds thee, but let thy intelligence also now be in harmony with the intelligence which embraces all things. For the intelligent power is no less diffused in all parts and pervades all things for him who is willing to draw it to him than the aërial power for him who is able to respire it.

55 Generally, wickedness does no harm at all to the universe; and particularly, the wickedness of one man does no harm to another. It is only harmful to him who has it in his power to be released from it, as soon as he shall choose.

56 To my own free will the free will of my neighbour is just as indifferent as his poor breath and flesh. For though we are made especially for the sake of one another, still the ruling power of each of us has its own office, for otherwise my neighbour's wickedness would be my harm, which God has not willed in order that my unhappiness may not depend on another.

57 The sun appears to be poured down, and in all directions indeed it is diffused, yet it is not effused. For this diffusion is extension: Accordingly its rays are called Extensions because they are extended. But one may judge what kind of a thing a ray is, if he looks at the sun's light passing through a narrow opening into a darkened room, for it is extended in a right line, and, as it were, is divided when it meets with any solid body which stands in the way and intercepts the air beyond; but there the light remains fixed and does not glide or fall off. Such then ought to be the outpouring and diffusion of the understanding, and it should in no way be an effusion, but an

extension, and it should make no violent or impetuous collision with the obstacles which are in its way; nor yet fall down, but be fixed and enlighten that which receives it. For a body will deprive itself of the illumination, if it does not admit it.

58 He who fears death either fears the loss of sensation or a different kind of sensation. But if thou shalt have no sensation, neither wilt thou feel any harm; and if thou shalt acquire another kind of sensation, thou wilt be a different kind of living being, and thou wilt not cease to live.

 $59\ \mathrm{Men}$ exist for the sake of one another. Teach them then or bear with them.

60 In one way an arrow moves, in another way the mind. The mind, indeed, both when it exercises caution and when it is employed about inquiry, moves straight onward not the less, and to its object.

61 Enter into every man's ruling faculty; and also let every other man enter into thine.

MARCUS AURELIUS MEDITATIONS BOOK 9

1 He who acts unjustly acts impiously. For since the universal nature has made rational animals for the sake of one another to help one another according to their deserts, but in no way to injure one another, he who transgresses her will, is clearly guilty of impiety towards the highest divinity. And he too who lies is guilty of impiety to the same divinity; for the universal nature is the nature of things that are; and things that are have a relation to all things that come into existence. And further, this universal nature is named truth, and is the prime cause of all things that are true. He then who lies intentionally is guilty of impiety inasmuch as he acts unjustly be deceiving; and he also who lies unintentionally, inasmuch as he is at variance with the universal nature, and inasmuch as he disturbs the order by fighting against the nature of the world: for he fights against it, who is moved of himself to that which is contrary to truth, for he had received powers from nature through the neglect of which he is not able now to distinguish falsehood from truth. And indeed he who pursues pleasure as good, and avoids pain as evil, is guilty of impiety. For of necessity such a man must often find fault with the universal nature, alleging that it assigns things to the bad and the good contrary to their deserts, because frequently the bad are in the enjoyment of pleasure and possess the things which procure pleasure, but the good have pain for their share and the things which cause pain. And further, he who is afraid of pain will sometimes also be afraid of some of the things which will happen in the world, and even this is impiety. And he who pursues pleasure will not abstain from injustice, and this is plainly impiety. Now with respect to the things towards which the universal nature is equally affected (for it would not have made both, unless it was equally affected towards both) towards these they who wish to follow nature should be of the same mind with it, and equally affected. With respect to pain, then, and pleasure, or death and life, or honour and dishonour which the universal nature employs equally whoever is not equally affected is manifestly acting impiously. And I say that the universal nature employs them equally, instead of saying that they happen alike to those who are produced in continuous series and to those who come after them by virtue of a certain original movement of Providence, according to which it moved from a certain beginning to this ordering of things, having conceived certain principles of the things which were to be, and having determined powers productive of beings and of changes and of suchlike successions

2 It would be a man's happiest lot to depart from mankind without having had any taste of lying and hyporisy and luxury and pride. However to breathe out one's life when a man has had enough of these things is the next best voyage, as the saying is. Hast thou determined to abide with vice, and has not experience yet induced thee to fly from this pestilence? For the destruction of the understanding is a pestilence, much more indeed than any such corruption and change of this atmosphere which surrounds us. For this corruption is a pestilence of men so far as they are men.

3 Do not despise death, but be well content with it, since this too is one of those things which nature wills. For such as it is to be young and to grow old, and to increase and to reach maturity, and to have teeth and beard and gray hairs, and to beget, and to be pregnant, and to bring forth, and all the other natural operations which the seasons of thy life bring. such also is dissolution. This then, is consistent with the character of a reflecting man, to be neither careless nor impatient nor contemptuous with respect to death, but to wait for it as one of the operations of nature. As thou now waitest for the time when the child shall come out of thy wife's womb, so be ready for the time when thy soul shall fall out of this envelope. But if thou requirest also a vulgar kind of comfort which shall reach thy heart, thou wilt be made best reconciled to death by observing the objects from which thou art going to be removed, and the morals of those with whom thy soul will no longer be mingled. For it is no way right to be offended with men, but it is thy duty to care for them and

to bear with them gently; and yet to remember that thy departure will be not from men who have the same principles as thyself. For this is the only thing, if there be any, which could draw us the contrary way and attach us to life, to be permitted to live with those who have the same principles as ourselves. But now thou seest how great is the trouble arising from the discordance of those who live together, so that thou mayst say, Come quick, O death, lest perchance I, too, should forget myself.

4 He who does wrong does wrong against himself. He who acts unjustly acts unjustly to himself, because he makes himself bad.

5 He often acts unjustly who does not do a certain thing; not only he who does a certain thing. 6 Thy present opinion founded on understanding, and thy

6 Thy present opinion founded on understanding, and thy present conduct directed to social good, and thy present disposition of contentment with everything which happens that is enough.

7 Wipe out imagination: check desire: extinguish appetite: keep the ruling faculty in its own power.

8 Among the animals which have not reason one life is distributed; but among reasonable animals one intelligent soul is distributed: just as there is one earth of all things which are of an earthy nature, and we see by one light, and breathe one air, all of us that have the faculty of vision and all that have life.

9 All things which participate in anything which is common to them all move towards that which is of the same kind with themselves. Everything which is earthy turns towards the earth, everything which is liquid flows together, and everything which is of an aërial kind does the same, so that they require something to keep them asunder, and the application of force. Fire indeed moves upwards on account of the elemental fire, but it is so ready to be kindled together with all the fire which is here, that even every substance which is somewhat dry, is easily ignited, because there is less mingled with it of that which is a hindrance to ignition. Accordingly then everything also which participates in the common intelligent nature moves in like manner towards that which is of the same kind with itself, or moves even more. For so much as it is superior in comparison with all other things, in the same degree also is it more ready to mingle with and to be fused with that which is akin to it. Accordingly among animals devoid of reason we find swarms of bees, and herds of cattle, and the nurture of young birds, and in a manner, loves; for even in animals there are souls, and that power which brings them together is seen to exert itself in the superior degree, and in such a way as never has been observed in plants nor in stones nor in trees. But in rational animals there are political communities and friendships, and families and meetings of people; and in wars, treaties and armistices. But in the things which are still superior, even though they are separated from one another, unity in a manner exists, as in the stars. Thus the ascent to the higher degree is able to produce a sympathy even in things which are separated. See then what now takes place. For only intelligent animals have now forgotten this mutual desire and inclination, and in them alone the property of flowing together is not seen. But still, though men strive to avoid (this union), they are caught and held by it, for their nature is too strong for them; and thou wilt see what I say, if thou only observest. Sooner then will one find anything earthy which comes in contact with no earthy thing than a man altogether separated from other men.

10 Both man and God and the universe produce fruit; at the proper seasons each produces it. But if usage has especially fixed these terms to the vine and like things, this is nothing. Reason produces fruit both for all and for itself, and there are produced from it other things of the same kind as reason itself.

11 If thou art able, correct by teaching those who do wrong; but if thou canst not, remember that indulgence is given to thee for this purpose. And the gods, too, are indulgent to such persons; and for some purposes they even help them to get health, wealth, reputation; so kind they are. And it is in thy power also; or say, who hinders thee?

12 Labour not as one who is wretched, nor yet as one who would be pitied or admired; but direct thy will to one thing only, to put thyself in motion and to check thyself, as the social reason requires.

13 To-day I have got out of all trouble, or rather I have cast out all trouble, for it was not outside, but within and in my opinions.

14 All things are the same, familiar in experience, and ephemeral in time, and worthless in the matter. Everything now is just as it was in the time of those whom we have buried.

15 Things stand outside of us, themselves by themselves, neither knowing aught of themselves, nor expressing any judgement. What is it, then, which does judge about them? The ruling faculty.

16 Not in passivity, but in activity, lie the evil and the good of the rational social animal, just as his virtue and his vice lie not in passivity, but in activity.

17 For the stone which has been thrown up it is no evil to come down, nor indeed any good to have been carried up.

18 Penetrate inwards into men's leading principles, and thou will see what judges thou art afraid of, and what kind of judges they are of themselves.

19 All things are changing; and thou thyself art in continuous mutation and in a manner in continuous destruction, and the whole universe too.

20 It is thy duty to leave another man's wrongful act there where it is.

21 Termination of activity, cessation from movement and opinion, and in a sense their death, is no evil. Turn thy thoughts now to the consideration of thy life, thy life as a child, as a youth, thy manhood, thy old age, for in these also every change was a death. Is this anything to fear? Turn thy thoughts now to thy life under thy grandfather, then to thy life under thy mother, then to thy life under thy father; and as thou findest many other differences and changes and terminations, ask thyself. Is this anything to fear? In like manner, then, neither are the termination and cessation and change of thy whole life a thing to be afraid of.

22 Hasten (to examine) thy own ruling faculty and that of the universe and that of thy neighbour: thy own, that thou mayst make it just; and that of the universe, that thou mayst remember of what thou art a part; and that of thy neighbour, that thou mayst know whether he has acted ignorantly or with knowledge, and that thou mayst also consider that his ruling faculty is akin to thine.

23 As thou thyself art a component part of a social system, so let every act of thine be a component part of social life. Whatever act of thine then has no reference, either immediately or remotely, to a social end, this tears asunder thy life, and does not allow it to be one, and it is of the nature of a mutiny, just as when in a popular assembly a man acting by himself stands apart from the general agreement.

24 Quarrels of little children and their sports, and poor spirits carrying about dead bodies (such is everything); and so what is exhibited in the representation of the mansions of the dead strikes our eyes more clearly.

25 Examine into the quality of the form of an object, and detach it altogether from its material part, and then contemplate it; then determine the time, the longest which a thing of this peculiar form is naturally made to endure.

26 Thou hast endured infinite troubles through not being contented with thy ruling faculty, when it does the things which it is constituted by nature to do. But enough (of this).

27 When another blames thee or hates thee, or when men say about thee anything injurious, approach their poor souls, penetrate within, and see what kind of men they are. Thou wilt discover that there is no reason to take any trouble that these men may have this or that opinion about thee. However thou must be well-disposed towards them, for by nature they are friends. And the gods too aid them in all ways, by dreams, by signs, towards the attainment of those things on which they set a value.

28 The periodic movements of the universe are the same, up and down from age to age. And either the universal intelligence puts itself in motion for every separate effect, and if this is so, be thou content with that which is the result of its activity; or it puts itself in motion once, and everything else comes by way of sequence in a manner; or indivisible elements are the origin of all things. In a word, if there is a god, all is well; and if chance rules, do not thou also be governed by it.

Soon will the earth cover us all: then the earth, too, will change, and the things also which result from change will continue to change forever, and these again forever. For if a man reflects on the changes and transformations which follow one another like wave after wave and their rapidity, he will despise everything which is perishable.

29 The universal cause is like a winter torrent: it carries everything along with it. But how worthless are all these poor people who are engaged in matters political, and, as they suppose, are playing the philosopher! All drivelers. Well then, man: do what nature now requires. Set thyself in motion, if it is in thy power, and do not look about thee to see if any one will observe it; nor yet expect Plato's Republic: but be content if the smallest thing goes on well, and consider such an event to be no small matter. For who can change men's opinions? And without a change of opinions what else is there than the slavery of men who groan while they pretend to obey? Come now and tell me of Alexander and Philippus and Demetrius and Phalerum. They themselves shall judge whether they discovered what the common nature required, and trained themselves accordingly. But if they acted like tragedy heroes, no one has condemned me to imitate them. Simple and modest is the work of philosophy. Draw me not aside to insolence and pride.

30 Look down from above on the countless herds of men and their countless solemnities, and the infinitely varied voyagings in storms and calms, and the differences among those who are born, who live together, and die. And consider, too, the life lived by others in olden time, and the life of those who will live after thee, and the life now lived among barbarous nations, and how many know not even thy name, and how many will soon forget it, and how they who perhaps now are praising thee will very soon blame thee, and that neither a posthumous name is of any value, nor reputation, nor anything else.

31 Let there be freedom from perturbations with respect to the things which come from the external cause; and let there be justice in the things done by virtue of the internal cause, that is, let there be movement and action terminating in this, in social acts, for this is according to thy nature.

32 Thou canst remove out of the way many useless things among those which disturb thee, for they lie entirely in thy opinion; and thou wilt then gain for thyself ample space by comprehending the whole universe in thy mind, and by contemplating the eternity of time, and observing the rapid change of every several thing, how short is the time from birth to dissolution, and the illimitable time before birth as well as the equally boundless time after dissolution.

33 All that thou seest will quickly perish, and those who have been spectators of its dissolution will very soon perish too. And he who dies at the extremest old age will be brought into the same condition with him who died prematurely.

34 What are these men's leading principles, and about what kind of things are they busy, and for what kind of reasons do they love and honour? Imagine that thou seest their poor souls laid bare. When they think that they do harm by their blame or good by their praise, what an idea!

35 Loss is nothing else than change. But the universal nature delights in change, and in obedience to her all things are now done well, and from eternity have been done in like form, and will be such to time without end. What then dost thou say? That all things have been and all things always will be bad, and that no power has ever been found in so many gods to rectify these things, but the world has been condemned to be bound in never-ceasing evil?

36 The rottenness of the matter which is the foundation of everything! water, dust, bones, filth; or again, marble rocks, the callosities of the earth; and gold and silver, the sediments; and garments, only bits of hair; and purple dye, blood; and everything else is of the same kind. And that which is of the nature of breath, is also another thing of the same kind, changing from this to that.

37 Enough of this wretched life and murmuring and apish tricks. Why art thou disturbed? What is there new in this? What unsettles thee? Is it the form of the thing? Look at it. Or is it the matter? Look at it. But besides these there is nothing. Towards the gods, then, now become at last more simple and better. It is the same whether we examine these things for a hundred years or three.

38 If any man has done wrong, the harm is his own. But perhaps he has not done wrong.

39 Either all things proceed from one intelligent source and come together as in one body, and the part ought not to find fault with what is done for the benefit of the whole; or there are only atoms, and nothing else than mixture and dispersion. Why, then, art thou disturbed? Say to the ruling faculty. Art thou dead, art thou corrupted, art thou playing the hypocrite, art thou become a heast dost thou part and feed with the rest?

40 Either the gods have no power or they have power. If, then, they have no power, why dost thou pray to them? But if they have power, why dost thou not pray for them to give thee the faculty of not fearing any of the things which thou fearest, or of not desiring any of the things which thou desirest, or not being pained at anything, rather than pray that any of these things should not happen or happen? for certainly if they can co-operate with men, they can co-operate for these purposes. But perhaps thou wilt say, the gods have placed them in thy power. Well, then, is it not better to use what is in thy power like a free man than to desire in a slavish and abject way what is not in thy power? And who has told thee that the gods do not aid us even in the things which are in our power? Begin, then, to pray for such things, and thou wilt see. One man prays thus: How shall I be able to lie with that woman? Do thou prays thus: How shall I not desire to lie with her? Another prays thus: How shall I be released from this? Another prays: How shall I not desire to be released? Another thus: How shall I not lose my little son? Thou thus: How shall I not be afraid to lose him? In fine, turn thy prayers this way, and see what comes.

41 Epicurus says, In my sickness my conversation was not about my bodily sufferings, nor, says he, did I talk on such subjects to those who visited me; but I continued to discourse on the nature of things as before, keeping to this main point, how the mind, while participating in such movements as go on in the poor flesh, shall be free from perturbations and maintain its proper good. Nor did I, he says, give the physicians an opportunity of putting on solemn looks, as if they were doing something great, but my life went on well and happily. Do, then, the same that he did both in sickness, if thou art sick, and in any other circumstances; for never to desert philosophy in any events that may befall us, nor to hold trifling talk either with an ignorant man or with one unacquainted with nature, is a principle of all schools of philosophy; but to be intent only on that which thou art now doing and on the instrument by which thou doest it.

42 When thou art offended with any man's shameless conduct, immediately ask thyself, Is it possible, then, that

shameless men should not be in the world? It is not possible. Do not, then, require what is impossible. For this man also is one of those shameless men who must of necessity be in the world. Let the same considerations be present to thy mind in the case of the knave, and the faithless man, and of every man who does wrong in any way. For at the same time that thou dost remind thyself that it is impossible that such kind of men should not exist, thou wilt become more kindly disposed towards every one individually. It is useful to perceive this, too, immediately when the occasion arises, what virtue nature has given to man to oppose to every wrongful act. For she has given to man, as an antidote against the stupid man, mildness, and against another kind of man some other power. And in all cases it is possible for thee to correct by teaching the man who is gone astray: for every man who errs misses his object and is gone astray. Besides wherein hast thou been injured? For thou wilt find that no one among those against whom thou art irritated has done anything by which thy mind could be made worse; but that which is evil to thee and harmful has its foundation only in the mind. And what harm is done or what is there strange, if the man who has not been instructed does the acts of an uninstructed man? Consider whether thou shouldst not rather blame thyself, because thou didst not expect such a man to err in such a way. For thou hadst means given thee by thy reason to suppose that it was likely that he would commit this error, and yet thou hast forgotten and art amazed that he has erred. But most of all when thou blamest a man as faithless or ungrateful, turn to thyself. For the fault is manifestly thy own, whether thou didst trust that a man who had such a disposition would keep his promise, or when conferring thy kindness thou didst not confer it absolutely, nor yet in such way as to have received from thy very act all the profit. For what more dost thou want when thou hast done a man a service? Art thou not content that thou hast done something conformable to thy nature, and dost thou seek to be paid for it? Just as if the eye demanded a recompense for seeing, or the feet for walking. For as these members are formed for a particular purpose, and by working according to their several constitutions obtain what is their own; so also as man is formed by nature to acts of benevolence, when he has done anything benevolent or in any other way conducive to the common interest, he has acted conformably to his constitution, and he gets what is his own.

MARCUS AURELIUS MEDITATIONS BOOK 10

1 Wilt thou then, my soul, never be good and simple and one and naked, more manifest than the body which surrounds thee? Wilt thou never enjoy an affectionate and contented disposition? Wilt thou never be full and without a want of any kind, longing for nothing more, nor desiring anything, either animate of inanimate, for the enjoyment of pleasures? nor yet desiring time wherein thou shalt have longer enjoyment, or place, or pleasant climate, or society of men with whom thou mayst live in harmony? but wilt thou be satisfied with thy present condition, and pleased with all that is about thee. and wilt thou convince thyself that thou hast everything and that it comes from the gods, that everything is well for thee, and will be well whatever shall please them, and whatever they shall give for the conservation of the perfect living being, the good and just and beautiful, which generates and holds together all things, and contains and embraces all things which are dissolved for the production of other like things? Wilt thou never be such that thou shalt so dwell in community with gods and men as neither to find fault with them at all, nor to be condemned by them?

2 Observe what thy nature requires, so far as thou art governed by nature only; then do it and accept it, if thy nature, so far as thou art a living being, shall not be made worse by it. And next thou must observe what thy nature requires so far as thou art a living being. And all this thou mayst allow thyself, if thy nature, so far as thou art a rational animal, shall not be made worse by it. But the rational animal is consequently also a political (social) animal. Use these rules then, and trouble thyself about nothing else.

3 Everything which happens either happens in such wise as thou art formed by nature to bear it, or as thou art not formed by nature to bear it. If then it happens to thee in such way as thou art formed by nature to bear it, do not complain, but bear it as thou art formed by nature to bear it. But if it happens in such wise as thou art not formed by nature to bear it, do not complain, for it will perish after it has consumed thee. Remember, however, that thou art formed by nature to bear everything, with respect to which it depends on thy own opinion to make it endurable and tolerable, by thinking that it is either thy interest or thy duty to do this.

4 If a man is mistaken, instruct him kindly and show him his error. But if thou art not able, blame thyself, or blame not even thyself.

5 Whatever may happen to thee, it was prepared for thee from all eternity; and the implication of causes was from eternity spinning the thread of thy being, and of that which is incident to it.

6 Whether the universe is (a concourse of) atoms, or nature (is a system), let this first be established, that I am a part of

the whole which is governed by nature; next, I am in a manner intimately related to the parts which are of the same kind with myself. For remembering this, inasmuch as I am a part, I shall be discontented with none of the things which are assigned to me out of the whole; for nothing is injurious to the part, if it is for the advantage of the whole. For the whole contains nothing which is not for its advantage; and all natures indeed have this common principle, but the nature of the universe has this principle besides, that it cannot be compelled even by any external cause to generate anything harmful to itself. By remembering then that I am a part of such a whole, I shall be content with everything that happens. And inasmuch as I am in a manner intimately related to the parts which are of the same kind with myself, I shall do nothing unsocial, but I shall rather direct myself to the things which are of the same kind with myself, and I shall turn all my efforts to the common interest, and divert them from the contrary. Now, if these things are done so, life must flow on happily, just as thou mayst observe that the life of a citizen is happy, who continues a course of action which is advantageous to his fellow-citizens, and is content with whatever the state may assign to him.

7 The parts of the whole, everything. I mean, which is naturally comprehended in the universe, must of necessity perish; but let this be understood in this sense, that they must undergo change. But if this is naturally both an evil and a necessity for the parts, the whole would not continue to exist in a good condition, the parts being subject to change and constituted so as to perish in various ways. For whether did nature herself design to do evil to the things which are parts of herself, and to make them subject to evil and of necessity fall into evil, or have such results happened without her knowing it? Both these suppositions, indeed, are incredible. But if a man should even drop the term Nature (as an efficient power), and should speak of these things as natural, even then it would be ridiculous to affirm at the same time that the parts of the whole are in their nature subject to change, and at the same time to be surprised or vexed as if something were happening contrary to nature, particularly as the dissolution of things is into those things of which each thing is composed. For there is either a dispersion of the elements out of which everything has been compounded, or a change from the solid to the earthy and from the airy to the aërial, so that these parts are taken back into the universal reason, whether this at certain periods is consumed by fire or renewed by eternal changes. And do not imagine that the solid and the airy part belong to thee from the time of generation. For all this received its accretion only yesterday, and the day before, as one may say, from the food and the air which is inspired. This, then, which has received the accretion, changes, not that which thy mother brought forth. But suppose that this which thy mother brought forth implicates thee very much with that other part, which has the peculiar quality of change, this is nothing in fact in the way of objection to what is said.

8 When thou hast assumed these names, good, modest, true, rational, a man of equanimity, and magnanimous, take care thou dost not change these names; and if thou shouldst lose them, quickly return to them. And remember that the term Rational was intended to signify a discriminating attention to every several thing and freedom from negligence; and that Equanimity is the voluntary acceptance of the things which are assigned to thee by the common nature; and that Magnanimity is the elevation of the intelligent part above the pleasurable or painful sensations of the flesh, and above that poor thing called fame, and death, and all such things. If, then, thou maintainest thyself in the possession of these names, without desiring to be called by these names by others, thou wilt be another person and wilt enter on another life. For to continue to be such as thou hast hitherto been, and to be torn in pieces and defiled in such a life, is the character of a very stupid man and one overfond of his life, and like those halfdevoured fighters with wild beasts, who, though covered with wounds and gore, still entreat to be kept to the following day, though they will be exposed in the same state to the same claws and bites. Therefore fix thyself in the possession of these few names: and if thou art able to abide in them, abide as if thou wast removed to certain islands of the Happy. But if thou shalt perceive that thou fallest out of them and dost not maintain thy hold, go courageously into some nook where thou shalt maintain them, or even depart at once from life, not in passion, but with simplicity and freedom and modesty, after doing this one laudable thing at least in thy life, to have gone out of it thus. In order, however, to the remembrance of these names, it will greatly help thee, if thou rememberest the gods, and that they wish not to be flattered, but wish all reasonable beings to be made like themselves; and if thou rememberest that what does the work of a fig-tree is a fig-tree, and that what does the work of a dog is a dog, and that what does the work of a bee is a bee, and that what does the work of a man is a man

9 Mimi, war, astonishment, torpor, slavery, will daily wipe out those holy principles of thine. How many things without studying nature dost thou imagine, and how many dost thou neglect? But it is thy duty so to look on and so to do everything, that at the same time the power of dealing with circumstances is perfect, and the contemplative faculty is exercised, and the confidence which comes from the knowledge of each several thing is maintained without showing it, buy yet not concealed. For when wilt thou enjoy simplicity, when gravity, and when the knowledge of every several thing, both what it is in substance, and what place it has in the universe, and how long it is formed to exist, and of what things it is compounded, and to whom it can belong, and who are able both to give it and take it away?

10 A spider is proud when it has caught a fly, and another when he has caught a poor hare, and another when he has taken the little fish in a net, and another when he has taken wild boars, and another when he has taken bears, and another when he has taken Sarmatians. Are not these robbers, if thou examinest their opinions?

11 Acquire the contemplative way of seeing how all things change into one another, and constantly attend to it, and exercise thyself about this part of philosophy. For nothing is so much adapted to produce magnanimity. Such a man has put off the body, and as he sees that he must, no one knows how soon, go away from among men and leave everything here, he gives himself up entirely to just doing in all his actions, and in everything else that happens he resigns himself to the universal nature. But as to what any man shall say or think about him, or do against him, he never even thinks of it, being himself contented with these two things, with acting justly in what he now does, and being satisfied with what is now assigned to him; and he lays aside all distracting and busy pursuits, and desires nothing else than to accomplish the straight course through the law, and by accomplishing the straight course to follow God.

12 What need is there of suspicious fear, since it is in thy power to inquire what ought to be done? And if thou seest clear, go by this way content, without turning back: but if thou dost not see clear, stop and take the best advisers. But if any other things oppose thee, go on according to thy powers with due consideration, keeping to that which appears to be just. For it is best to reach this object, and if thou dost fail, let thy failure be in attempting this. He who follows reason in all things is both tranquil and active at the same time, and also cheerful and collected.

13 Inquire of thyself as soon as thou wakest from sleep whether it will make any difference to thee, if another does what is just and right. It will make no difference.

Thou hast not lorgotten, I suppose, that those who assume arrogant airs in bestowing their praise or blame on others, are such as they are at bed and at board, and thou hast not forgotten what they do, and what they avoid and what they pursue, and how they steal and how they rob, not with hands and feet, but with their most valuable part, by means of which there is produced, when a man chooses, fidelity, modesty, truth, law, a good genius?

14 To her who gives and takes back all, to nature, the man who is instructed and modest says, Give what thou wilt; take back what thou wilt. And he says this not proudly, but obediently and well pleased with her.

15 Short is the little which remains to thee of life. Live as on a mountain. For it makes no difference whether a man lives there or here, if he lives everywhere in the world as in a state (political community). Let men see, let them know a real man who lives according to nature. If they cannot endure him, let them kill him. For that is better than to live thus as men do.

16 No longer talk at all about the kind of man that a good man ought to be, but be such.

17 Constantly contemplate the whole of time and the whole of substance, and consider that all individual things as to substance are a grain of a fig, and as to time the turning of a gimlet.

18 Look at everything that exists, and observe that it is already in dissolution and in change, and as it were putrefaction or dispersion, or that everything is so constituted by nature as to die.

19 Consider what men are when they are eating, sleeping, generating, easing themselves and so forth. Then what kind of men they are when they are imperious and arrogant, or angry and scolding from their elevated place. But a short time ago to how many they were slaves and for what things: and after a little time consider in what a condition they will be.

20 That is for the good of each thing, which the universal nature brings to each. And it is for its good at the time when nature brings it.

21 'The earth loves the shower'; and 'the solemn aether loves': and the universe loves to make whatever is about to be. I say then to the universe, that I love as thou lovest. And is not this too said, that 'this or that loves to be happened'?

22 Either thou livest here and hast already accustomed thyself to it, or thou art going away, and this was thy own will; or thou art dying and hast discharged thy duty. But besides these things there is nothing. Be of good cheer, then.

23 Let this always be plain to thee, that this piece of land is like any other; and that all things here are the same with things on the top of a mountain, or on the sea-shore, or wherever thou choosest to be. For thou wilt find just what Plato says, Dwelling within the walls of a city as in a shepherd's fold on a mountain.

24 What is my ruling faculty now to me? and of what nature am I now making it? and for what purpose am I now using it? is it void of understanding? is it loosed and rent asunder from social life? is it melted into and mixed with the poor flesh so as to move together with it?

25 He who flies from his master is a runaway; but the law is master, and he who breaks the law is a runaway. And he also who is grieved or angry or afraid, is dissatisfied because something has been or is or shall be of the things which are appointed by him who rules all things, and he is Law, and assigns to every man what is fit. He then who fears or is grieved or is angry is a runaway.

26 A man deposits seed in a womb and goes away, and then another cause takes it, and labours on it and makes a child. What a thing from such a material! Again, the child passes food down through the throat, and then another cause takes it and makes perception and motion, and in fine life and strength and other things; how many and how strange! Observe then the things which are produced in such a hidden way, and see the power just as we see the power which carries things downwards and upwards, not with the eyes, but still no less plainly.

27 Constantly consider how all things such as they now are, in time past also were; and consider that they will be the same again. And place before thy eyes entire dramas and stages of the same form, whatever thou hast learned from thy experience or from older history; for example, the whole court of Hadrianus, and the whole court of Antoninus, and the whole court of Philippus, Alexander, Croesus; for all those were such dramas as we see now, only with different actors.

28 Imagine every man who is grieved at anything or discontented to be like a pig which is sacrificed and kicks and screams.

Like this pig also is he who on his bed in silence laments the bonds in which we are held. And consider that only to the rational animal is it given to follow voluntarily what happens; but simply to follow is a necessity imposed on all.

29 Severally on the occasion of everything that thou doest, pause and ask thyself, if death is a dreadful thing because it deprives thee of this.

30 When thou art offended at any man's fault, forthwith turn to thyself and reflect in what like manner thou dost err thyself; for example, in thinking that money is a good thing, or pleasure, or a bit of reputation, and the like. For by attending to this thou wilt quickly forget thy anger, if this consideration also is added, that the man is compelled; for what else could he do? or, if thou art able, take away from him the compulsion.

31 When thou hast seen Satyron the Socratic, think of either Eutyches or Hymen, and when thou hast seen Euphrates, think of Eutychion or Silvanus, and when thou hast seen Alciphron, think of Tropaeophorus, and when thou hast seen Xenophon. think of Crito of Severus, and when thou hast looked on thyself, think of any other Caesar, and in the case of every one do in like manner. Then let this thought be in thy mind, Where then are those men? Nowhere, or nobody knows where. For thus continuously thou wilt look at human things as smoke and nothing at all; especially if thou reflectest at the same time that what has once changed will never exist again in the infinite duration of time. But thou, in what a brief space of time is thy existence? And why art thou not content to pass through this short time in an orderly way? What matter and opportunity for thy activity art thou avoiding? For what else are all these things, except exercises for the reason, when it has viewed carefully and by examination into their nature the things which happen in life? Persevere then until thou shalt have made these things thy own, as the stomach which is strengthened makes all things its own, as the blazing fire makes flame and brightness out of everything that is thrown into it.

32 Let it not be in any man's power to say truly of thee that thou art not simple or that thou art not good; but let him be a liar whoever shall think anything of this kind about thee; and this is altogether in thy power. For who is he that shall hinder thee from being good and simple? Do thou only determine to live no longer, unless thou shalt be such. For neither does reason allow thee to live, if thou art not such.

33 What is that which as to this material (our life) can be done or said in the way most conformable to reason? For whatever this may be, it is in thy power to do it or to say it, and do not make excuses that thou art hindered. Thou wilt not cease to lament till thy mind is in such a condition that, what luxury is to those who enjoy pleasure, such shall be to thee, in the matter which is subjected and presented to thee, the doing of the things which are conformable to man's constitution; for a man ought to consider as an enjoyment everything which it is in his power to do according to his own nature. And it is in his power everywhere. Now, it is not given to a cylinder to move everywhere by its own motion, nor yet to water nor to fire nor to anything else which is governed by nature of an irrational soul, for the things which check them and stand in the way are many. But intelligence and reason are able to go through everything that opposes them, and in such manner as they are formed by nature and as they choose. Place before thy eyes this facility with which the reason will be carried through all things, as fire upwards, as a stone downwards, as a cylinder down an inclined surface, and seek for nothing further. For all other obstacles either affect the body only which is a dead thing; or, except through opinion and the yielding of the reason itself, they do not crush nor do any harm of any kind; for if they did, he who felt it would immediately become bad. Now, in the case of all things which have a certain constitution, whatever harm may happen to any of them, that which is so affected becomes consequently worse; but in the like case, a man becomes both better, if one may say so, and more worthy of praise by making a right use of these accidents. And finally remember that nothing harms him who is really a citizen, which does not harm the state; nor yet does anything harm the state which does not harm law (order); and of these things which are called misfortunes not one harms law. What then does not harm law does not harm either state or citizen.

34 To him who is penetrated by true principles even the briefest precept is sufficient, and any common precept, to remind him that he should be free from grief and fear. For example:

Leaves, some the wind scatters on the ground - -

- - So is the race of men.

Leaves, also, are thy children; and leaves, too, are they who cry out as if they were worthy of credit and bestow their praise, or on the contrary curse, or secretly blame and sneer; and leaves, in like manner, are those who shall receive and transmit a man's fame to aftertimes. For all such things as these 'are produced in the season of spring', as the poet says; then the wind casts them down; then the forest produces other leaves in their places. But a brief existence is common to all things, and yet thou avoidest and pursuest all things as if they would be eternal. A little time, and thou shalt close thy eyes' and him who has attended thee to thy grave another soon will lament.

35 The healthy eye ought to see all visible things and not to say, I wish for green things; for this is the condition of a diseased eye. And the healthy hearing and smelling ought to be ready to perceive all that can be heard and smelled. And the healthy stomach ought to be with respect to all food just as the mill with respect to all things which it is formed to grind. And accordingly the healthy understanding ought to be prepared for everything which happens; but that which says, Let my dear children live, and let all men praise whatever I may do, is an eye which seeks for green things, or teeth which seek for soft things.

36 There is no man so fortunate that there shall not be by him when he is dying some who are pleased with what is going to happen. Suppose that he was a good and wise man, will there not be at last some one to say to himself, Let us at last breathe freely, being relieved from this schoolmaster? It is true that he was harsh to none of us, but I perceived that he tacitly condemns us. This is what is said of a good man. But in our own case how many other things are there for which there are many who wish to get rid of us. Thou wilt consider this then when thou art dying, and thou wilt depart more contentedly by reflecting thus: I am going away from such a life, in which even my associates in behalf of whom I have striven so much, prayed, and cared, themselves wish me to depart, hoping perchance to get some little advantage by it. Why then, should a man cling to a longer stay here? Do not, however, for this reason go away less kindly disposed to them, but preserving thy own character, and friendly and benevolent and mild, and on the other hand not as if thou wast torn away; but as when a man dies a quiet death, the poor soul is easily separated from the body, such also ought thy departure from men to be, for nature united thee to them and associated thee. But does she now dissolve the union? Well, I am separated as from kinsmen, not, however, dragged resisting, but without compulsion; for this too is one of the things according to nature.

37 Accustom thyself as much as possible on the occasion of anything being done by any person to inquire with thyself, For what object is this man doing this? but begin with thyself, and examine thyself first.

38 Remember that this which pulls the strings is the thing which is hidden within: this is the power of persuasion, this is life; this, if one may so say, is man. In contemplating thyself never include the vessel which surrounds thee, and these instruments which are attached about it. For they are like to an ax, differing only in this, that they grow to the body. For indeed there is no more use in these parts without the cause which moves and checks them than in the weaver's shuttle, and the writer's pen, and the driver's whip.

MARCUS AURELIUS MEDITATIONS BOOK 11

I These are the properties of the rational soul: it sees itself, analyzes itself, and makes itself such as it chooses; the fruit which it bears itself enjoys (for the fruits of plants and that in animals which corresponds to fruits others enjoy) it obtains its own end, wherever the limit of life may be fixed. Not as in a

dance and in a play and in suchlike things, where the whole action is incomplete, if anything cuts it short; but in every part and wherever it may be stopped, it makes what has been set before it full and complete, so that it can say, I have what is my own. And further it traverses the whole universe, and the surrounding vacuum, and surveys its form, and it extends itself into the infinity of time, and embraces and comprehends the periodical renovation of all things, and it comprehends that those who come after us will see nothing new, nor have those before us seen anything more, but in a manner he who is forty years old, if he has any understanding at all, has seen by virtue of the uniformity that prevails all things which have been and all that will be. This too is a property of the rational soul, love of one's neighbour, and truth and modesty, and to value nothing more than itself, which is also the property of Law. Thus then right reason differs not at all from the reason of justice.

2 Thou wilt set little value on pleasing song and dancing and the pancratium, if thou wilt distribute the melody of the voice into its several sounds, and ask thyself as to each, if thou art mastered by this; for thou wilt be prevented by shame from confessing it: and in the matter of dancing, if at each movement and attitude thou wilt do the same; and the like also in the matter of the pancratium. In all things, then, except virtue and the acts of virtue, remember to apply thyself to their several parts, and by this division to come to value them little: and apply this rule also to thy whole life.

3 What a soul that is which is ready, if at any moment it must be separated from the body, and ready to be extinguished or dispersed or continue to exist; but so that this readiness comes from a man's own judgement, not from mere obstinacy, as with the Christians, but considerately and with dignity and in a way to persuade another, without tragic show.

4 Have I done something for the general interest? Well, then, I have had my reward. Let this always be present to thy mind, and never stop (doing such good).

5 What is thy art? to be good. And how is this accomplished well except by general principles, some about the nature of the universe, and others about the proper constitution of man?

6 At first tragedies were brought on the stage as means of reminding men of the things which happen to them, and that it is according to nature for things to happen so, and that, if you are delighted with what is shown on the stage, you should not be troubled with that which takes place on the larger stage. For you see that these things must be accomplished thus, and that even they bear them who cry out, 'O Cithaeron'.And, indeed, some things are said well by the dramatic writers, of which kind is the following especially

Me and my children if the gods neglect, This has its reason too. And again

We must not chafe and fret at that which happens. And

Life's harvest reap like the wheat's fruitful ear. And other things of the same kind.

After tragedy the old comedy was introduced, which had a magisterial freedom of speech, and by its very plainness of speaking was useful in reminding men to beware of insolence; and for this purpose too Diogenes used to take from these writers.

But as to the middle comedy which came next, observe what it was, and again, for what object the new comedy was introduced, which gradually sunk down into a mere mimic artifice. That some good things are said even by these writers, everybody knows: but the whole plan of such poetry and dramaturgy, to what end does it look!

7 How plain does it appear that there is not another condition of life so well suited for philosophizing as this in which thou now happenest to be.

8 A branch cut off from the adjacent branch must of necessity be cut off from the whole tree also. So too a man when he is separated from another man has fallen off from the whole social community. Now as to a branch, another cuts it off, but a man by his own act separates himself from his neighbour when he hates him and turns away from him, and he does not know that he has at the same time cut himself off from the whole social system. Yet he has this privilege certainly from Zeus who framed society, for it is in our power to grow again to that which is near to us, and again to become a part which helps to make up the whole. However, if it often happens, this kind of separation, it makes it difficult for that which detaches itself to be brought to unity and to be restored to its former condition. Finally, the branch, which from the first grew together with the tree, and has continued to have one life with it, is not like that which after being cut off is then ingrafted, for this is something like what the gardeners mean when they say that it grows with the rest of the tree, but that it has not the same mind with it.

9 As those who try to stand in thy way when thou art proceeding according to right reason, will not be able to turn thee aside from thy proper action, so neither let them drive thee from thy benevolent feelings towards them, but be on thy guard equally in both matters, not only in the matter of steady judgement and action, but also in the matter of gentleness towards those who try to hinder or otherwise trouble thee. For this also is a weakness, to be vexed at them, as well as to be diverted from thy course of action and to give way through fear; for both are equally deserters from their post, the man who does it through fear, and the man who is alienated from him who is by nature a kinsman and a friend.

10 There is no nature which is inferior to art, for the arts imitate the natures of things. But if this is so, that nature which is the most perfect and the most comprehensive of all natures, cannot fall short of the skill of art. Now all arts do the inferior things for the sake of the superior; therefore the universal nature does so too. And, indeed, hence is the origin of justice, and in justice the other virtues have their foundation: for justice will not be observed, if we either care for indifferent things, or are easily deceived and careless and changeable.

11 If the things do not come to thee, the pursuits and avoidances of which disturb thee, still in a manner thou goest to them. Let then thy judgement about them be at rest, and they will remain quiet, and thou wilt not be seen either pursuing or avoiding.

12 The spherical form of the soul maintains its figure, when it is neither extended towards any object, nor contracted inwards, nor dispersed nor sinks down, but is illuminated by light, by which it sees the truth, the truth of all things and the truth that is in itself.

13 Suppose any man shall despise me. Let him look to that himself. But I will look to this, that I be not discovered doing or saying anything deserving of contempt. Shall any man hate me? Let him look to it. But I will be mild and benevolent towards every man, and ready to show even him his mistake, not reproachfully, nor yet as making a display of my endurance, but nobly and honestly, like the great Phocion, unless indeed he only assumed it. For the interior parts ought to be such, and a man ought to be seen by the gods neither dissatisfied with anything nor complaining. For what evil is it to thee, if thou art now doing what is agreeable to thy own nature, and art satisfied with that which at this moment is suitable to the nature of the universe, since thou art a human being placed at thy post in order that what is for the common advantage may be done in some way?

14 Men despise one another and flatter one another; and men wish to raise themselves above one another, and crouch before one another.

15 How unsound and insincere is he who says, I have determined to deal with thee in a fair way. What art thou doing, man? There is no occasion to give this notice. It will soon show itself by acts. The voice ought to be plainly written on the forehead. Such as a man's character is, he immediately shows it in his eyes, just as he who is beloved forthwith reads everything in the eyes of lovers. The man who is honest and good ought to be exactly like a man who smells strong, so that the bystander as soon as he comes near him must smell whether he choose or not. But the affectation of simplicity is like a crooked stick. Nothing is more disgraceful than a wolfish and false friendship. Avoid this most of all. The good and simple and benevolent show all these things in the eyes, and there is no mistaking.

16 As to living in the best way, this power is in the soul, if it be indifferent to things which are indifferent. And it will be indifferent, if it looks on each of these things separately and all together, and if it remembers that not one of them produces in us an opinion about itself, nor comes to us; but these things remain immovable, and it is we ourselves who produce the judgements about them, and, as we may say, write them in ourselves, it being in our power not to write them, and it being in our power, if perchance these judgements have imperceptibly got admission to our minds, to wipe them out; and if we remember also that such attention will only be for a short time, and then life will be at an end. Besides, what trouble is there at all in doing this? For if these things are according to nature, rejoice in them, and they will be easy to thee: but if contrary to nature, seek what is conformable to thy own nature, and strive towards this, even if it bring no reputation; for every man is allowed to seek his own good.

17 Consider whence each thing is come, and of what it consists, and into what it changes, and what kind of a thing it will be when it has changed, and that it will sustain no harm.

18 (If any have offended against thee, consider first): What is my relation to men, and that we are made for one another; and in another respect, I was made to be set over them, as a ram over the flock or a bull over the herd. But examine the matter from first principles, from this: If all things are not mere atoms, it is nature which orders all things: if this is so, the inferior things exist for the sake of the superior, and these for the sake of one another.

Second, consider what kind of men they are at table, in bed, and so forth; and particularly, under what compulsions in respect of opinions they are; and as to their acts, consider with what pride they do what they do.

Third, that if men do rightly what they do, we ought not to be displeased; but if they do not right, it is plain that they do so involuntarily and in ignorance. For as every soul is unwillingly deprived of the truth, so also is it unwillingly deprived of the power of behaving to each man according to his deserts. Accordingly men are pained when they are called unjust, ungrateful, and greedy, and in a word wrong-doers to their neighbours.

Fourth, consider that thou also doest many things wrong, and that thou art a man like others; and even if thou dost abstain from certain faults, still thou hast the disposition to commit them, though either through cowardice, or concern about reputation or some such mean motive, thou dost abstain from such faults.

Fifth, consider that thou dost not even understand whether men are doing wrong or not, for many things are done with a certain reference to circumstances. And, in short, a man must learn a great deal to enable him to pass a correct judgement on another man's acts.

Sixth, consider when thou art much vexed or grieved, that man's life is only a moment, and after a short time we are all laid out dead.

Seventh, that it is not men's acts which disturb us, for those acts have their foundation in men's ruling principles, but it is our own opinions which disturb us. Take away these opinions then, and resolve to dismiss thy judgement about an act as if it were something grievous, and thy anger is gone. How then shall I take away these opinions? By reflecting that no wrongful act of another brings shame on thee: for unless that which is shameful is alone bad, thou also must of necessity do many things wrong, and become a robber and everything else.

Eighth, consider how much more pain is brought on us by the anger and vexation caused by such acts than by the acts themselves, at which we are angry and vexed.

Ninth, consider that a good disposition is invincible, if it be genuine, and not an affected smile and acting a part. For what will the most violent man do to thee, if thou continuest to be of a kind disposition towards him, and if, as opportunity offers, thou gently admonishest him and calmly correctest his errors at the very time when he is trying to do thee harm, saying, Not so, my child: we are constituted by nature for something else: I shall certainly not be injured, but thou art injuring thyself, my child. And show him with gentle tact and by general principles that this is so, and that even bees do not do as he does, nor any animals which are formed by nature to be gregarious. And thou must do this neither with any double meaning nor in the way of reproach, but affectionately and without any rancour in thy soul; and not as if thou wert lecturing him, nor yet that any bystander may admire, but either when he is alone, and if others are present.

Remember these nine rules, as if thou hadst received them as a gift from the Muses, and begin at last to be a man while thou livest. But thou must equally avoid flattering men and being vexed at them, for both are unsocial and lead to harm. And let this truth be present to thee in the excitement of anger, that to be moved by passion is not manly, but that mildness and gentleness, as they are more agreeable to human nature, so also are they more manly; and he who possesses these qualities possesses strength, nerves and courage, and not the man who is subject to fits of passion and discontent. For in the same degree in which a man's mind is nearer to freedom from all passion, in the same degree also is it nearer to strength: and as the sense of pain is a characteristic of weakness, so also is anger. For he who yields to pain and he who yields to anger, both are wounded and both submit.

But if thou wilt, receive also a tenth present from the leader of the Muses, and it is this, that to expect bad men not to do wrong is madness, for he who expects this desires an impossibility. But to allow men to behave so to others, and to expect them not to do thee any wrong, is irrational and tyrannical.

19 There are four principal aberrations of the superior faculty against which thou shouldst be constantly on thy guard, and when thou hast detected them, thou shouldst wipe them out and say on each occasion thus: this thought is not necessary: this tends to destroy social union: this which thou art going to say comes not from the real thoughts; for thou shouldst consider it among the most absurd of things for a man not to speak from his real thoughts. But the fourth is when thou shalt reproach thyself for anything, for this is an evidence of the diviner part within the being overpowered and yielding to the less honourable and to the perishable part, the body, and to its gross pleasures.

20 Thy aërial part and all the fiery parts which are mingled in thee, though by nature they have an upward tendency, still in obedience to the disposition of the universe they are overpowered here in the compound mass of the body. And also the whole of the earthy part in thee and the watery, though their tendency is downwards, still are raised up and occupy a position which is not their natural one. In this manner then the elemental parts obey the universal, for when they have been fixed in any place perforce they remain there until again the universal shall sound the signal for dissolution. Is it not then strange that thy intelligent part only should be disobedient and discontented with its own place? And yet no force is imposed on it, but only those things which are conformable to its nature: still it does not submit, but is carried in the opposite direction. For the movement towards injustice and intemperance and to anger and grief and fear is

nothing else than the act of one who deviates from nature. And also when the ruling faculty is discontented with anything that happens, then too it deserts its post: for it is constituted for piety and reverence towards the gods no less than for justice. For these qualities also are comprehended under the generic term of contentment with the constitution of things, and indeed they are prior to acts of justice.

21 He who has not one and always the same object in life, cannot be one and the same all through his life. But what I have said is not enough, unless this also is added, what this object ought to be. For as there is not the same opinion about all the things which in some way or other are considered by the majority to be good, but only about some certain things, that is, things which concern the common interest; so also ought we to propose to ourselves an object which shall be of a common kind social and political. For he who directs all his own efforts to this object, will make all his acts alike, and thus will always be the same.

22 Think of the country mouse and of the town mouse, and of the alarm and trepidation of the town mouse.

23 Socrates used to call the opinions of the many by the name of Lamiae, bugbears to frighten children.

24 The Lacedaemonians at their public spectacles used to set seats in the shade for strangers, but themselves sat down anywhere.

25 Socrates excused himself to Perdiccas for not going to him, saying, It is because I would not perish by the worst of all ends, that is, I would not receive a favour and then be unable to return it.

26 In the writings of the Ephesians there was this precept, constantly to think of some one of the men of former times who practised virtue.

27 The Pythagoreans bid us in the morning look to the heavens that we may be reminded of those bodies which continually do the same things and in the same manner perform their work, and also be reminded of their purity and mudity. For there is no veil over a star.

28 Consider what a man Socrates was when he dressed himself in a skin, after Xanthippe had taken his cloak and gone out, and what Socrates said to his friends - fine feathers make fine birds - who were ashamed of him and drew back from him when they saw him dressed thus.

29 Neither in writing nor in reading wilt thou be able to lay down rules for others before thou shalt have first learned to obey rules thyself. Much more is this so in life.

30 A slave thou art: free speech is not for thee.

31 And my heart laughed within.

32 Hesiod wrote: And virtue they will curse speaking harsh words.

33 Epictetus said: To look for the fig in winter is a madman's act: such is he who looks for his child when it is no longer allowed.

34 When a man kisses his child, said Epictetus, he should whisper to himself, 'To-morrow perchance thou wilt die'. But those are words of bad omen. 'No word is a word of bad omen', said Epictetus, 'which expresses any work of nature; or if it is so, it is also a word of bad omen to speak of the ears of corn being reaped'.

35 Epictetus said: The unripe grape, the ripe bunch, the dried grape all are changes, not into nothing, but into something which exists not yet.

36 Epictetus said: No man can rob us of our free will.

37 Epictetus also said, a man must discover an art (or rules) with respect to giving his assent; and in respect to his movements he must be careful that they be made with regard to circumstances, that they be consistent with social interests, that they have regard to the value of the object; and as to sensual desire, he should altogether keep away from it; and as to avoidance and aversion, he should not show it with respect to any of the things which are not in our power.

38 The dispute then, he said, is not about any common matter; but about being mad or not.

39 Socrates used to say, What do you want? Souls of rational men or irrational? Souls of rational men! Of what rational men? Sound or unsound? Sound! Why then do you not seek for them? Because we have them! Why then do you fight and quarrel?

MARCUS AURELIUS MEDITATIONS BOOK 12

1 All those things at which thou wishest to arrive by a circuitous road, thou canst have now, if thou dost not refuse them to thyself. And this means, if thou wilt take no notice of all the past, and trust the future to providence, and direct the present only conformably to piety and justice. Conformably to piety, that thou mayest be content with the lot which is assigned to thee, for nature designed it for thee and thee for it. Conformably to justice, that thou mayest always speak the truth freely and without disguise, and do the things which are agreeable to law and according to the worth of each. And let neither another man's wickedness hinder thee, nor opinion nor voice, nor yet the sensations of the poor flesh which has grown about thee; for the passive part will look to this. If then, whatever the time may be when thou shalt be near to thy departure, neglecting everything else thou shalt respect only

thy ruling faculty and the divinity within thee, and if thou shalt be afraid not because thou must sometime cease to live, but if thou shalt fear never to have begun to live according to nature, then thou wilt be a man worthy of the universe which has produced thee, and thou wilt cease to be a stranger in thy native land, and to wonder at things which happen daily as if they were something unexpected, and to be dependent on this or that.

2 God sees the minds of all men bared of the material vesture and rind and impurities. For with his intellectual part alone he touches the intelligence only which has flowed and been derived from himself into these bodies. And if thou also usest thyself to do this, thou wilt rid thyself of thy much trouble. For he who regards not the poor flesh which envelops him, surely will not trouble himself by looking after raiment and dwelling and fame and suchlike externals and show.

3 The things are three of which thou art composed, the body, the breath of life, the capability of thinking. Of these the first two are thine, so far as it is thy duty to take care of them; but the third alone is properly thine. Therefore, if thou shalt separate from thyself, that is, from thy understanding, whatever others do or say, and whatever thou hast done or said thyself, and whatever future things trouble thee because they may happen, and whatever in the body which envelops thee, or in the breath (life), which is by nature associated with the body, is attached to thee independent of thy will, and whatever the external circumfluent vortex whirls round, so that the intellectual power exempt from the things of fate can live pure and free by itself, doing what is just and accepting what happens and saying the truth: if thou wilt separate, I say, from this ruling faculty the things which are attached to it by the impressions of sense, and the things of time to come and of time that is past, and wilt make thyself like Empedocles' sphere, All round, and in its joyous rest reposing; and if thou shalt strive to live only what is really thy life, that is, the present, then thou wilt be able to pass that portion of life which remains for thee up to the time of thy death, free from perturbations, nobly, and obedient to thy own daemon, to the god that is within thee.

4 I have often wondered how it is that every man loves himself more than all the rest of men, but yet sets less value on his own opinion of himself than on the opinion of others. If then a god or a wise teacher should present himself to a man and bid him to think of nothing and to design nothing which he would not express as soon as he conceived it, he could not endure it even for a single day. So much more respect have we to what our neighbours shall think of us than to what we shall think of ourselves.

5 How can it be that the gods, after having arranged all things well and benevolently for mankind, have overlooked this alone, that some men and very good men, and men who, as we may say, have had most communion with the divinity, and through pious acts and religious observances have been most intimate with the divinity, when they have once died should never exist again, but should be completely extinguished?

But if this is so, be assured that if it ought to have been otherwise, the gods would have done it. For if it were just, it would also be possible; and if it were according to nature, nature would have had it so. But because it is not so, if in fact it is not so, be thou convinced that it ought not to have been so: for thou seest even of thyself that in this inquiry thou art disputing with the deity; and we should not thus dispute with the gods, unless they were most excellent and most just; but if this is so, they would not have allowed anything in the ordering of the universe to be neglected unjustly and irrationally.

6 Practise thyself even in the things which thou despairest of accomplishing. For even the left hand, which is ineffectual for all other things for want of practice, holds the bridle more vigorously than the right hand; for it has been practised in this.

7 Consider in what condition, both in body and soul, a man should be when he is overtaken by death; and consider the shortness of life, the boundless abyss of time, past and future, the feebleness of all matter.

8 Contemplate the formative principles (forms) of things bare of their coverings; the purposes of actions; consider what pain is, what pleasure is, and death, and fame; who is to himself the cause of his uneasines; how no man is hindered by another; that everything is opinion.

9 In the application of thy principles thou must be like the pancratiast, not like the gladiator; for the gladiator lets fall the sword which he uses and is killed; but the other always has his hand, and needs to do nothing else than use it.

10 See what things are in themselves, dividing them into matter, form and purpose.

11 What a power man has to do nothing except what God will approve, and to accept all that God may give him.

12 With respect to that which happens conformably to nature, we ought to blame neither gods, for they do nothing wrong either voluntarily or involuntarily, nor men, for they do nothing wrong except involuntarily. Consequently we should blame nobody. 13 How ridiculous and what a stranger he is who is surprised at anything which happens in life.

14 Either there is a fatal necessity and invincible order, or a kind providence, or a confusion without a purpose and without a director. If then there is an invincible necessity, why dost thou resist? But if there is a providence which allows itself to be propitiated, make thyself worthy of the help of the divinity. But if there is a confusion without a governor, be content that in such a tempest thou hast in thyself a certain ruling intelligence. And even if the tempest carry thee away, let it carry away the poor flesh, the poor breath, everything else; for the intelligence at least it will not carry away.

15 Does the light of the lamp shine without losing its splendour until it is extinguished; and shall the truth which is in thee and justice and temperance be extinguished (before thy death)?

16 When a man has presented the appearance of having done wrong, (say), How then do I know if this is a wrongful act? And even if he has done wrong, how do I know that he has not condemned himself? and so this is like tearing his own face. Consider that he who would not have the bad man do wrong, is like the man who would not have the fig-tree to bear juice in the figs and infants to cry and the horse to neigh, and whatever else must of necessity be. For what must a man do who has such a character? If then thou art irritable, cure this man's disposition.

17 If it is not right, do not do it: if it is not true, do not say it. For let thy efforts be... (Note: There is something wrong, or incomplete here).

18 In everything always observe what the thing is which produces for thee an appearance, and resolve it by dividing it into the formal, the material, the purpose, and the time within which it must end.

19 Perceive at last that thou hast in thee something better and more divine than the things which cause the various effects, and as it were pull thee by the strings. What is there now in my mind? is it fear, or suspicion, or desire, or anything of the kind?

20 First, do nothing inconsiderately, nor without a purpose. Second, make thy acts refer to nothing else than to a social end.

21 Consider that before long thou wilt be nobody and nowhere, nor will any of the things exist which thou now seest, nor any of those who are now living. For all things are formed by nature to change and be turned and to perish in order that other things in continuous succession may exist.

22 Consider that everything is opinion, and opinion is in thy power. Take away then, when thou choosest, thy opinion, and like a mariner, who has doubled the promontory, thou wilt find calm, everything stable, and a waveless bay.

23 Any one activity, whatever it may be, when it has ceased at its proper time, suffers no evil because it has ceased; nor he who has done this act, does he suffer any evil for this reason that the act has ceased. In like manner then the whole which consists of all the acts, which is our life, if it cease at its proper time, suffers no evil for this reason that it has ceased; nor he who has terminated this series at the proper time, has he been ill dealt with. But the proper time and the limit nature fixes, sometimes as in old age the peculiar nature of man, but always the universal nature, by the change of whose parts the whole universe continues ever young and perfect. And everything which is useful to the universal is always good and in season. Therefore the termination of life for every man is no evil, because neither is it shameful, since it is both independent of the will and not opposed to the general interest, but it is good, since it is seasonable and profitable to and congruent with the universal. For thus too he is moved by the deity who is moved in the same manner with the deity and moved towards the same things in his mind.

24 These three principles thou must have in readiness. In the things which thou doest do nothing either inconsiderately or otherwise than as justice herself would act; but with respect to what may happen to thee from without, consider that it happens either by chance or according to providence, and thou must neither blame chance nor accuse providence. Second, consider what every being is from the seed to the time of its receiving a soul, and from the reception of a soul to the giving back of the same, and of what things every being is compounded and into what things it is resolved. Third, if thou shouldst suddenly be raised up above the earth, and shouldst look down on human beings, and observe the variety of them how great it is, and at the same time also shouldst see at a glance how great is the number of beings who dwell all around in the air and the aether, consider that as often as thou shouldst be raised up, thou wouldst see the same things, sameness of form and shortness of duration. Are these things to be proud of?

25 Cast away opinion: thou art saved. Who then hinders thee from casting it away?

26 When thou art troubled about anything, thou hast forgotten this, that all things happen according to the universal nature; and forgotten this, that a man's wrongful act is nothing to thee; and further thou hast forgotten this, that everything which happens, always happened so and will

happen so, and now happens so everywhere; forgotten this too, how close is the kinship between a man and the whole human race, for it is a community, not of a little blood or seed, but of intelligence. And thou hast forgotten this too, that every man's intelligence is a god, and is an efflux of the deity; and forgotten this, that nothing is a man's own, but that his child and his body and his very soul came from the deity; forgotten this, that everything is opinion; and lastly thou hast forgotten that every man lives the present time only. and loses only this.

27 Constantly bring to thy recollection those who have complained greatly about anything, those who have been most conspicuous by the greatest fame or misfortunes or enmities or fortunes of any kind: then think where are they all now? Smoke and ash and a tale, or not even a tale. And let there be present to thy mind also everything of this sort, how Fabius Catullinus lived in the country, and Lucius Lupus in his gardens, and Stertinius at Baiae, and Tiberius at Capreae, and Velius Rufus (or Rufus at Velia); and in fine think of the eager pursuit of anything conjoined with pride; and how worthless everything is after which men violently strain; and how much more philosophical it is for a man in the opportunities presented to him to show himself just, temperate, obedient to the gods, and to do this with all simplicity: for the pride which is proud of its want of pride is the most intolerable of all.

28 To those who ask, Where hast thou seen the gods or how dost thou comprehend that they exist and so worshipest them? I answer, in the first place, they may be seen even with the eyes; in the second place, neither have I seen even my own soul and yet I honour it. Thus then with respect to the gods, from what I constantly experience of their power, from this I comprehend that they exist and I venerate them.

29 The safety of life is this, to examine everything all through, what it is itself, what is its material, what the formal part; with all thy soul to do justice and to say the truth. What remains except to enjoy life by joining one good thing to another so as not to leave even the smallest intervals between?

30 There is one light of the sun, though it is interrupted by walls, mountains, and other things infinite. There is one common substance, though it is distributed among countless bodies which have their several qualities. There is one soul, though it is distributed among infinite natures and individuals. There is one intelligent soul, though it seems to be divided. Now in the things which have been mentioned all the other parts, such as those which are air and matter, are without sensation and have no fellowship: and yet even these parts the intelligent principle holds together, and the gravitation towards the same. But intellect in a peculiar manner tends to that which is of the same kin, and combines with it, and the feeling for communion is not interrupted.

31 What dost thou wish? to continue to exist? Well, dost thou wish to have sensation? movement? growth? and then again to cease to grow? to use thy speech? to think? What is there of all these things which seems to thee worth desiring? But if it is easy to set little value on all these things, turn to that which remains, which is to follow reason and god. But it is inconsistent with honouring reason and god to be troubled because by death a man will be deprived of the other things.

32 How small a part of the boundless and unfathomable time is assigned to every man! for it is very soon swallowed up in the eternal. And how small a part of the whole substance! and how small a part of the universal soul! and on what a small clod of the whole earth thou creepest! Reflecting on all this, consider nothing to be great, except to act as thy nature leads thee, and to endure that which the common nature brings.

33 How does the ruling faculty make use of itself? for all lies in this. But everything else, whether it is in the power of thy will or not, is only lifeless ashes and smoke.

34 This reflection is most adapted to move us to contempt of death, that even those who think pleasure to be a good and pain an evil still have despised it.

35 The man to whom that only is good which comes in due season, and to whom it is the same thing whether he has done more or fewer acts conformable to right reason, and to whom it makes no difference whether he contemplates the world for a longer or a shorter time. For this man neither is death a terrible thing.

36 Man, thou hast been a citizen in this great state (the world): what difference does it make to thee whether for five years (or three)? for that which is conformable to the laws is just for all. Where is the hardship then, if no tyrant nor yet an unjust judge sends thee away from the state, but nature who brought thee into it? the same as if a praetor who has employed an actor dismisses him from the stage. 'But I have not finished the five acts, but only three of them'. Thou sayest well, but in life the three acts are the whole drama; for what shall be a complete drama is determined by him who was once the cause of its composition, and now of its dissolution: but thou art the cause of neither. Depart then satisfied, for he also who releases thee is satisfied.

THE END

THE STROMATA, OR MISCELLANIES The Stromateis (The Patchwork) Author: Titus Flavius Clemens (Clement of Alexandria) From: Ante-Nicene Fathers Vol 2 1886, pp. 40-92. Translation: Alexander Roberts and James Donaldson, 1886 Translation: Henry Chadwick, 1954, Book 3 Estimated Range of Dating: 180-215 A.D.

(The Stromata, a wrong writing for "Stromateis" [meaning "Patchwork," i.e., Miscellanies], attributed to Clement of Alexandria [c. 150–215 AD], is the third of a trilogy of works regarding the Christian life. The oldest extant manuscripts date to the 11th century AD. The work is titled Stromateis ("patchwork") because it deals with such a variety of matters. It goes further than its two predecessors and aims at the perfection of the Christian life by initiation into complete knowledge. It attempts, on the basis of Scripture and tradition, to give such an account of the Christian faith as shall answer all the demands of learned men, and conduct the student into the innermost realities of his belief.

The full title of the Stromata, according to Eusebius and Photius, was "Titus Flavius Clement's miscellaneous collections of speculative (gnostic) notes bearing upon the true philosophy." The aim of the work, in accordance with this title, is, in opposition to Gnosticism, to furnish the materials for the construction of a true gnosis, a Christian philosophy, on the basis of faith, and to lead on to this higher knowledge those who, by the discipline of the Paedagogus, had been trained for it. The work consisted originally of eight books. The eighth book is lost; that which appears under this name has plainly no connection with the rest of the Stromata. Various accounts have been given of the meaning of the distinctive word in the title Stromateis; but all agree in regarding it as indicating the miscellaneous character of its contents. And they are very miscellaneous. They consist of the speculations of Greek philosophers, of heretics, and of those who cultivated the true Christian gnosis, and of quotations from sacred Scripture. The latter he affirms to be the source from which the higher Christian knowledge is to be drawn; as it was that from which the germs of truth in Plato and the Hellenic philosophy were derived. He describes philosophy as a divinely ordered preparation of the Greeks for faith in Christ, as the law was for the Hebrews; and shows the necessity and value of literature and philosophic culture for the attainment of true Christian knowledge, in opposition to the numerous body among Christians who regarded learning as useless and dangerous. He proclaims himself an eclectic, believing in the existence of fragments of truth in all systems, which may be separated from error; but declaring that the truth can be found in unity and completeness only in Christ, as it was from Him that all its scattered germs originally proceeded.

The contents of the Stromateis, as its title suggests, are miscellaneous. Its place in the trilogy is disputed – Clement initially intended to write the Didascalus, a work which would complement the practical guidance of the Paedagogus with a more intellectual schooling in theology. The Stromata is less systematic and ordered than Clement's other works.

The sole authority for the Stromateis is preserved at the Laurentian Library in Florence. How it came to Florence is unknown. The editio princeps was published by Piero Vettori in 1550.

In the 19th century, Percy Mordaunt Barnard and Otto Stählin posited that this manuscript was copied out in the 910s for Arethas of Caesarea, the remainder of whose extant library is held by the Bibliothèque nationale de France. Their theory is generally accepted today. As with the library of Arethas held at Paris, the Laurentian manuscript contains numerous misspellings, omitted words and sentences and even marginalia integrated into the text. However, Frederic G. Kenyon argued that this is not the fault of the copyist, but that an ancestral manuscript had caused the damage, perhaps even a payvrus.

Contents of the books:

The 1st book starts on the topic of Greek philosophy. Consistent with his other writing, Clement affirms that philosophy had a propaedeutic role for the Greek, similar to the function of the law for the Jews. He then embarks on a discussion of the origins of Greek culture and technology, arguing that most of the important figures in the Greek world were foreigners, and that Jewish culture was the most significant influence on Greece. In an attempt to demonstrate the primacy of Moses, Clement gives an extended chronology of the world, wherein he dates the birth of Christ to 25 April or May, 4-2 B.C., and the creation of the world to 5592 B.C. The book ends with a discussion on the origin of languages and the possibility of a Jewish influence on Plato.

While many scholars keep themselves busy by exploring how much much Titus Flavius Clemens knew about early Christianity, it is acually far more significant to see how he knew about the religions and philosophies of Hinduism, Jainism, and Buddhism. It goes even so far that he mentions Vedic terms and the Buddha by name and that he gained a godlike status due to "his precepts," [which clearly refers to his Four Noble Truths, the analysis of all human suffering. and The Eightfold Path, the only effective therapy, which consists of eight practices: right view, right resolve, right speech, right conduct, right livelihood, right effort, right mindfulness, and right meditative absorption of these truths or the union with them.]. In Book 1, Chapter 15 he reports: "Thus philosophy, a thing of the highest utility, flourished in antiquity among the barbarians, shedding its light over the nations. And afterwards it came to Greece. First in its ranks were the prophets of the Egyptians; and the Chaldeans [Babylonians] among the Assyrians [whose state language was Aramaic]; and the Druids among the Gauls; and the Samanaeans* [Shramana, a Vedic term, in Sanskrit and Pali: Samana, means "one who labours, toils, or exerts themselves for some higher or religious purpose" or "seeker or researcher who is extremely diligent but also austere and ascetic".] among the Bactrians [Indians, Hindus]; and the philosophers of the Celts; and the Magi of the Persians [Zoroastrians], who foretold the Saviour's birth, and came into the land of Judaea guided by a star. The Indian gymnosophists are also in the number, and the other barbarian philosophers. And of these there are two classes, some of them called Sarmanae [Sramana, Samana], and others Brahmins [Brahmanai]. And those of the Sarmanae who are called Hylobii neither inhabit cities, nor have roofs over them, but are clothed in the bark of trees, feed on nuts. and drink water in their hands. Like those called Encratites in the present day, they know not marriage nor begetting of children. Some, too, of the Indians obey the precepts of Buddha [Boutta]; whom, on account of his extraordinary sanctity, they have raised to divine honours."

Who was the man who was so well informed? His real name was Titus Flavius Clemens, also known as Clement of Alexandria (c. 150–215 AD) in order to avoid confusion with a man of the same name who was a close relative to Titus Flavius Clemens, whom we know as the [Clement of Rome] who is the first historically verifyable Pope. Whether these two Clements were related to one another is not known.

Neither Clement's birthdate or birthplace is known with any degree of certainty. It is conjectured that he was born sometime around 150 AD. According to Epiphanius of Salamis, he was born in Athens. Clement converted to Christianity as a young man. In the Protrepticus he displays an extensive knowledge of Greek religion and mystery religions. He travelled in Greece, Asia Minor, Palestine, and Egypt. Clement's journeys were primarily a religious undertaking. In Greece, he encountered an Ionian theologian, who has been identified as Athenagoras of Athens: while in the east, he was taught by an Assyrian, sometimes identified with Tatian, and a Jew, possibly Theophilus of Caesarea. In around 180 AD, Clement reached Alexandria,[10] where he met Pantaenus, who taught at the Catechetical School of Alexandria. Clement studied under Pantaenus, and was ordained to the priesthood by Pope Julian before 189. Otherwise, virtually nothing is known of Clement's personal life in Alexandria. He may have been married, a conjecture supported by his writings. During the persecutions of the Roman emperor Lucius Septimius Severus [145-211, born in Leptis Magna, Libya, Africa] in the years 202-203, Clement left Alexandria. In 211, Alexander of Jerusalem wrote a letter commending him to the Church of Antioch, which may imply that Clement was living in Cappadocia or Jerusalem at that time. The date and location of his death are unknown.

Clement of Alexandria was strongly influenced by Stoics, Pythagoras, Plato, Heraclitus, Pantaenus, Xenophanes and Homer. Clement was not only with classical Greek and Roman philosophy and literature but surprisingly also with Hinduism, Jainism, and Buddhism.He taught at the Catechetical School of Alexandria. Among his pupils were Origen and Alexander of Jerusalem.

The 2nd book is largely devoted to the respective roles of faith and philosophical argument. Clement contends that while both are important, the fear of God is foremost, because through faith one receives divine wisdom. To Clement, scripture is an innately true primitive philosophy which is complemented by human reason through the Logos. Faith is voluntary, and the decision to believe is a crucial fundamental step in becoming closer to God. It is never irrational, as it is founded on the knowledge of the truth of the Logos, but all knowledge proceeds from faith, as first principles are unprovable outside a systematic structure.

The 3rd book covers asceticism. He discusses marriage, which is treated similarly in the Paedagogus. Clement rejects the Gnostic opposition to marriage, arguing that only men who are uninterested in women should remain celibate, and that sex is a positive good if performed within marriage for the purposes of procreation. However it has not always been so: the Fall occurred because Adam and Eve succumbed to their desire for each other, and copulated before the allotted time. He argues against the idea that Christians should reject their family for an ascetic life, which stems from Luke 14:25– 27, contending that Jesus would not have contradicted the precept to "Honour thy Father and thy Mother" (Exotus 20:12), one of the Ten Commandments. Clement concludes that asceticism will only be rewarded if the motivation is Christian in nature, and thus the asceticism of non-Christians such as the gymnosophists is pointless.

The 4th book locuses on martyrdom. While all good Christians should be unafraid of death, Clement condemns those who actively seek out a martyr's death, arguing that they do not have sufficient respect for God's gift of life. He is ambivalent whether any believing Christian can become a martyr by virtue of the manner of their death, or whether martyrdom is reserved for those who have lived exceptional lives. Marcionites cannot become martyrs, because they do not believe in the divinity of God the Father – their sufferings are in vain. There is then a digression to the subject of theological epistemology. According to Clement, there is no way of empirically testing the existence of God the Father, because the Logos has revelatory, not analysable meaning, although Christ was an object of the senses. God had no beginning, and is the universal first principle; this is clearly a Hindu teaching.

The 5th book returns to the subject of faith. Clement begins the fourth book with a belated explanation of the disorganised nature of the work, and gives a brief description of his aims for the remaining three or four books. Then he argues that truth, justice and goodness can be seen only by the mind, not the eye; faith is a way of accessing the unseeable. He stresses that knowledge of God can only be achieved through faith once one's moral faults have been corrected. This parallels Clement's earlier insistence that martyrdom can only be achieved by those who practice their faith in Christ through good deeds, not those who simply profess their faith. God transcends matter entirely, and thus the materialist cannot truly come to know God. Although Christ was God incarnate, it is our spiritual, not physical comprehension of him which is important.

In the beginning of the 6th book, Clement intends to demonstrate that the works of Greek poets were derived from the prophetic books of the Bible. In order to reinforce his position that the Greeks were inclined towards plagiarism, he cites numerous instances of such inappropriate appropriation by classical Greek writers, reported second-hand from On Plagiarism, an anonymous 3rd century BC work sometimes ascribed to Aretades. Clement then digresses to the subject of sin and hell, arguing that Adam was not perfect when created, but given the potential to achieve perfection. He espouses broadly universalist doctrine, holding that Christ's promise of salvation is available to all, even those condenmed to hell.

The final extant book begins with a description of the nature of Christ, and that of the true Christian, who aims to be as similar as possible to both the Father and the Son Clement then criticises the simplistic anthropomorphism of most ancient religions, quoting Xenophanes' famous description of African, Thracian and Egyptian deities. The Greek gods may also have had their origins in the personification of material objects: Ares representing iron, and Dionysus wine. Prayer, and the relationship between love and knowledge are then discussed. 1 Corinthians 13:8 seems to contradict the characterisation of the true Christian as one who knows; but to Clement knowledge vanishes only in that it is subsumed by the universal love expressed by the Christian in his reverence for his Creator. Following Socrates, he argues that vice arises from a state of ignorance, not from intention. The Christian is a "laborer in God's vineyard", responsible both for his own path to salvation and that of his neighbor. The work ends with an extended passage against the contemporary divisions and heresies within the church.

Question of the 8th book: Clement intended to make but one book of this; at least seven grew out of it, without his having treated all the subjects proposed. The absence of certain things definitely promised has led scholars to ask whether he wrote an eighth book, as would appear from Eusebius (6,13,1) and the Florilegia, and various attempts have been made to identify short or fragmentary treatises of his work that may have been part of this book. Photius, writing in the 9th century, found various texts appended to manuscripts of the seven canonical books, which lead Daniel Heinsius (1580-1655) to suggest that the original eighth book is lost, and he identified the text purported to be from the eighth book as fragments of the Hypopotoses. In any case the "excerpts" and "selections", which, with part of a treatise on logical method, are designated as the eighth book of the Stromateis in a single 11th-century manuscript, are not parts of the Hypotyposes, which Clement is known to have written.)

THE STROMATA, BOOK 1

CHAPTER 1 -- PREFACE. THE AUTHOR'S OBJECT. THE UTILITY OF WRITTEN COMPOSITIONS.

[Missing the beginning] that you may read them under your hand, and may be able to preserve them. Whether written compositions are not to be left behind at all; or if they are, by whom? And if the former, what need there is for written compositions? and if the latter, is the composition of them to be assigned to earnest men, or the opposite? It were certainly ridiculous for one to disapprove of the writing of earnest men, and approve of those, who are not such, engaging in the work of composition. Theopompus and Timaeus, who composed fables and slanders, and Epicurus the leader of atheism, and Hipponax and Archilochus, are to be allowed to write in their own shameful manner. But he who proclaims the truth is to be prevented from leaving behind him what is to benefit posterity. It is a good thing, I reckon, to leave to posterity good children. This is the case with children of our bodies. But words are the progeny of the soul. Hence we call those who have instructed us, fathers, Wisdom is a communicative and philanthropic thing. Accordingly, Solomon says, "My son, if thou receive the saying of my commandment, and hide it with thee, thine ear shall hear wisdom." He points out that the word that is sown is hidden in the soul of the learner, as in the earth, and this is spiritual planting. Wherefore also he adds, "And thou shall apply thine heart to understanding, and apply it for the admonition of thy son." For soul, me thinks, joined with soul, and spirit with spirit, in the sowing of the word, will make that which is sown grow and germinate. And every one who is instructed, is in respect of subjection the son of his instructor. "Son," says he, "forget not my laws."

And if knowledge belong not to all (set an ass to the lyre, as the proverb goes), yet written compositions are for the many. "Swine, for instance, delight in dirt more than in clean water." "Wherefore," says the Lord, "I speak to them in water." parables: because seeing, they see not; and hearing, they hear not, and do not understand; " not as if the Lord caused the ignorance: for it were impious to think so. But He prophetically exposed this ignorance, that existed in them, and intimated that they would not understand the things spoken. And now the Saviour shows Himself, out of His abundance, dispensing goods to His servants according to the ability of the recipient, that they may augment them by exercising activity, and then returning to reckon with them; when, approving of those that had increased His money, those faithful in little, and commanding them to have the charge over many things, He bade them enter into the joy of the Lord. But to him who had hid the money, entrusted to him to be given out at interest, and had given it back as he had received it, without increase, He said, "Thou wicked and slothful servant, thou oughtest to have given my money to the bankers, and at my coming I should have received mine own.' Wherefore the useless servant "shall be cast into outer darkness." "Thou, therefore, be strong," says Paul, "in the grace that is in Christ Jesus. And the things which thou hast heard of me among many witnesses, the same commit thou to faithful men, who shall be able to teach others also." And again: "Study to show thyself approved unto God, a workman that needeth not to be ashamed, rightly dividing the word of truth."

If, then, both proclaim the Word -- the one by writing, the other by speech -- are not both then to be approved, making, as they do, faith active by love? It is by one's own fault that he does not choose what is best; God is free of blame. As to the point in hand, it is the business of some to lay out the word at interest, and of others to test it, and either choose it or not. And the judgment is determined within themselves.

But there is that species of knowledge which is characteristic of the herald, and that which is, as it were, characteristic of a messenger, and it is serviceable in whatever way it operates, both by the hand and tongue. "For he that soweth to the Spirit, shall of the Spirit reap life everlasting. And let us not be weary in well-doing." On him who by Divine Providence meets in with it, it confers the very highest advantages, -- the beginning of faith, readiness for adopting a right mode of life, the impulse towards the truth, a movement of inquiry, a trace of knowledge; in a word, it gives the means of salvation. And those who have been rightly reared in the words of truth, and received provision for eternal life, wing their way to heaven. Most admirably, therefore, the apostle says, "In everything approving ourselves as the servants of God; as poor, and yet making many rich; as having nothing, yet possessing all things. Our mouth is opened to you." "I charge thee," he says, writing to Timothy, "before God, and Christ Jesus, and the elect angels, that thou observe these things, without preferring one before another, doing nothing by partiality.

Both must therefore test themselves: the one, if he is qualified to speak and leave behind him written records; the other, if he is in a right state to hear and read: as also some in the dispensation of the Eucharist, according to custom enjoin that each one of the people individually should take his part. One's own conscience is best for choosing accurately or shunning. And its firm foundation is a right life, with suitable instruction. But the imitation of those who have already been proved, and who have led correct lives, is most excellent for the understanding and practice of the commandments. "So that whosoever shall eat the bread and drink the cup of the Lord unworthily, shall be guilty of the body and blood of the Lord. But let a man examine himself, and so let him eat of the bread and drink of the cup." It therefore follows, that every one of those who undertake to promote the good of their neighbours, ought to consider whether he has betaken himself to teaching rashly and out of rivalry to any; if his

communication of the word is out of vainglory; if the t only reward he reaps is the salvation of those who hear, and if he speaks not in order to win favour: if so, he who speaks by writings escapes the reproach of mercenary motives. "For neither at any time used we flattering words, as ye know," says the apostle, "nor a cloak of covetousness. God is witness. Nor of men sought we glory, neither of you, nor yet of others, when we might have been burdensome as the apostles of Christ. But we were gentle among you, even as a nurse cherisheth her children."

In the same way, therefore, those who take part in the divine words, ought to guard against betaking themselves to this, as they would to the building of cities, to examine them out of curiosity; that they do not come to the task for the sake of receiving worldly things, having ascertained that they who are consecrated to Christ are given to communicate the necessaries of life. But let such be dismissed as hypocrites. But if any one wishes not to seem, but to be righteous, to him it belongs to know the things which are best. If, then, "the harvest is plenteous, but the labourers few," it is incumbent on us "to pray" that there may be as great abundance of labourers as possible.

But the husbandry is twofold, -- the one unwritten, and the other written. And in whatever way the Lord's labourer sow the good wheat, and grow and reap the ears, he shall appear a truly divine husbandman. "Labour," says the Lord, "not for the meat which perisheth, but for that which endureth to everlasting life." And nutriment is received both by bread and by words. And truly "blessed are the peace-makers," who instructing those who are at war in their life and errors here, lead them back to the peace which is in the Word, and nourish for the life which is according to God, by the distribution of the bread, those "that hunger after righteousness." For each soul has its own proper nutriment; some growing by knowledge and science, and others feeding on the Hellenic philosophy, the whole of which, like nuts, is not eatable. 'And he that planteth and he that watereth," "being ministers" of Him "that gives the increase, are one" in the ministry. "But every one shall receive his own reward, according to his own work. For we are God's husbandmen, God's husbandry. Ye are God's building," according to the apostle. Wherefore the hearers are not permitted to apply the test of comparison. Nor is the word, given for investigation, to be committed to those who have been reared in the arts of all kinds of words, and in the power of inflated attempts at proof; whose minds are already pre-occupied, and have not been previously emptied. But whoever chooses to banquet on faith, is stedfast for the reception of the divine words, having acquired already faith as a power of judging, according to reason. Hence ensues to him persuasion in abundance. And this was the meaning of that saying of prophecy, "If ye believe not, neither shall ye understand." "As, then, we have opportunity, let us do good to all, especially to the household of faith." And let each of these, according to the blessed David, sing, giving thanks. "Thou shalt sprinkle me with hyssop, and I shall be cleansed. Thou shalt wash me, and I shall be whiter than the snow. Thou shalt make me to hear gladness and joy, and the bones which have been humbled shall rejoice. Turn Thy face from my sins. Blot out mine iniquities. Create in me a clean heart, O God, and renew a right spirit in my inward parts. Cast me not away from Thy face, and take not Thy Holy Spirit from me. Restore to me the joy of Thy salvation, and establish me with Thy princely spirit.

He who addresses those who are present before him, both tests them by time, and judges by his judgment, and from the others distinguishes him who can hear; watching the words, the manners, the habits, the life, the motions, the attitudes, the look, the voice; the road, the rock, the beaten path, the fruitful land, the wooded region, the fertile and fair and cultivated spot, that is able to multiply the seed. But he that speaks through books, consecrates himself before God, crying in writing thus: Not for gain, not for vainglory, not to be vanquished by partiality, nor enslaved by fear nor elated by pleasure; but only to reap the salvation of those who read, which he does, not at present participate in, but awaiting in expectation the recompense which will certainly be rendered by Him, who has promised to bestow on the labourers the reward that is meet. But he who is enrolled in the number of men ought not to desire recompense. For he that vaunts his good services, receives glory as his reward. And he who does any duty for the sake of recompense, is he not held fast in the custom of the world, either as one who has done well, hastening to receive a reward, or as an evil-doer avoiding retribution? We must, as far as we can, imitate the Lord.I And he will do so, who complies with the will of God, receiving freely, giving freely, and receiving as a worthy reward the citizenship itself. "The hire of an harlot shall not come into the sanctuary," it is said: accordingly it was forbidden to

bring to the altar the price of a dog. And in whomsoever the eye of the soul has been blinded by ill-nurture and teaching, let him advance to the true light, to the truth, which shows by writing the things that are unwritten. "Ye that thirst, go to the waters," says Esaias, And "drink water from thine own vessels," Solomon exhorts.

Accordingly in "The Laws," the philosopher who learned from the Hebrews, Plato, commands husbandmen not to irrigate or take water from others, until they have first dug down in their own ground to what is called the virgin soil, and found it dry. For it is right to supply want, but it is not well to support laziness. For Pythagoras said that, "although it be agreeable to reason to take a share of a burden, it is not a duty to take it away."

Now the Scripture kindles the living spark of the soul, and directs the eye suitably for contemplation; perchance inserting something, as the husbandman when he ingrafts, but, according to the opinion of the divine apostle, exciting what is in the soul. "For there are certainly among us many weak and sickly, and many sleep. But if we judge ourselves, we shall not be judged." Now this work of mine in writing is not artfully constructed for display; but my memoranda are stored up against old age, as a remedy against forgetfulness, truly an image and outline of those vigorous and animated discourses which I was privileged to hear, and of blessed and truly remarkable men.

Of these the one, in Greece, an Ionic; the other in Magna Graecia: the first of these from Coele-Syria, the second from Egypt, and others in the East. The one was born in the land of Assyria, and the other a Hebrew in Palestine.

When I came upon the last (he was the first in power), having tracked him out concealed in Egypt, I found rest. He, the true, the Sicilian bee, gathering the spoil of the flowers of the prophetic and apostolic meadow, engendered in the souls of his hearers a deathless element of knowledge.

Well, they preserving the tradition of the blessed doctrine derived directly from the holy apostles, Peter, James, John, and Paul, the sons receiving it from the father (but few were like the fathers), came by God's will to us also to deposit those ancestral and apostolic seeds. And well I know that they will exult; I do not mean delighted with this tribute, but solely on account of the preservation of the truth, according as they delivered it. For such a sketch as this, will, I think, be agreeable to a soul desirous of preserving from escape the blessed tradition.

"In a man who loves wisdom the father will be glad." Wells, when pumped out, yield purer water; and that of which no one partakes, turns to putrefaction. Use keeps steel brighter, but disuse produces rust in it. For, in a word, exercise produces a healthy condition both in souls and bodies. "No one lighteth a candle, and putteth it under a bushel, but upon a candlestick, that it may give light to those who are regarded worthy of the feast." For what is the use of wisdom, if it makes not him who can hear it wise? For still the Saviour saves, "and always works, as He sees the Father," For by teaching, one learns more; and in speaking, one is often a hearer along with his audience. For the teacher of him who speaks and of him who hears is one -- who waters both the mind and the word. Thus the Lord did not hinder from doing good while keeping the Sabbath; but allowed us to communicate of those divine mysteries and of that holy light to those who are able to receive them. He did not certainly disclose to the many what did not belong to the many; but to the few to whom He knew that they belonged, who were capable of receiving and being moulded according to them. But secret things are entrusted to speech, not to writing, as is the case with God

And if one say that it is written, "There is nothing secret which shall not be revealed, nor hidden which shall not be disclosed," let him also hear from us, that to him who hears secretly, even what is secret shall be manifested. This is what was predicted by this oracle. And to him who is able secretly to observe what is delivered to him. that which is veiled shall be disclosed as truth; and what is hidden to the many, shall appear manifest to the few. For why do not all know the truth? why is not righteousness loved, if righteousness belongs to all? But the mysteries are delivered mystically, that what is spoken may be in the mouth of the speaker; rather not in his voice, but in his understanding. "God gave to the Church, some apostles, and some prophets, and some evangelists, and some work of the ministry, for the edifying of the body of Christ."

The writing of these memoranda of mine, I well know, is weak when compared with that spirit, full of grace, which I was privileged to hear. But it will be an image to recall the archetype to him who was struck with the thyrsus. For "speak," it is said, "to a wise man, and he will grow wiser; and to him that hath, and there shall be added to him." And we profess not to explain secret things sufficiently -- far from it -- but only to recall them to memory, whether we have forgot aught, or whether for the purpose of not forgetting. Many things, I well know, have escaped us, through length of time, that have dropped away unwritten. Whence, to aid the weakness of my memory, and provide for myself a salutary help to my recollection in a systematic arrangement of chapters, I necessarily make use of this form. There are then some things of which we have no recollection; for the power that was in the blessed men was great. There are also some things which remained unnoted long, which have now escaped; and others which are effaced, having faded away in the mind

itself, since such a task is not easy to those not experienced; these I revive in my commentaries. Some things I purposely omit, in the exercise of a wise selection, afraid to write what I guarded against speaking: not grudging -- for that were wrong -- but fearing for my readers, lest they should stumble by taking them in a wrong sense; and, as the proverb says, we should be found "reaching a sword to a child." For it is impossible that what has been written should not escape, although remaining unpublished by me. But being always revolved, using the one only voice, that of writing, they answer nothing to him that makes inquiries beyond what is written; for they require of necessity the aid of some one, either of him who wrote, or of some one else who has walked in his footsteps. Some things my treatise will hint; on some it will linger: some it will merely mention. It will try to speak imperceptibly, to exhibit secretly, and to demonstrate silently. The dogmas taught by remarkable sects will be adduced; and to these will be opposed all that ought to be premised in accordance with the profoundest contemplation of the knowledge, which, as we proceed to the renowned and venerable canon of tradition from the creation of the world will advance to our view; setting before us what according to natural contemplation necessarily has to be treated of beforehand, and clearing off what stands in the way of this arrangement. So that we may have our ears ready for the reception of the tradition of true knowledge; the soil being previously cleared of the thorns and of every weed by the husbandman, in order to the planting of the vine. For there is a contest, and the prelude to the contest; and them are some mysteries before other mysteries.

Our book will not shrink from making use of what is best in philosophy and other preparatory instruction. "For not only for the Hebrews and those that are under the law," according to the apostle, "is it right to become a Jew, but also a Greek for the sake of the Greeks, that we may gain all." Also in the Epistle to the Colossians he writes, "Admonishing every man, and teaching every man in all wisdom, that we may present every man perfect in Christ." The nicety of speculation, too, suits the sketch presented in my commentaries. In this respect the resources of learning are like a relish mixed with the food of an athlete, who is not indulging in luxury, but entertains a noble desire for distinction.

By music we harmoniously relax the excessive tension of gravity. And as those who wish to address the people, do so often by the herald, that what is said may be better heard; so also in this case. For we have the word, that was spoken to many, before the common tradition. Wherefore we must set forth the opinions and utterances which cried individually to them, by which those who hear shall more readily turn.

And, in truth, to speak briefly: Among many small pearls there is the one; and in a great take of fish there is the beautyfish; and by time and toil truth will gleam forth, if a good helper is at hand. For most benefits are supplied, from God, through men. All of us who make use of our eyes see what is presented before them. But some look at objects for one reason, others for another. For instance, the cook and the shepherd do not survey the sheep similarly: for the one examines it if it be fat; the other watches to see if it be of good breed. Let a man milk the sheep's milk if he need sustenance: let him shear the wool if he need clothing. And in this way let me produce the fruit of the Greek erudition.

For I do not imagine that any composition can be so fortunate as that no one will speak against it. But that is to be regarded as in accordance with reason, which nobody speaks against, with reason. And that course of action and choice is to be approved, not which is faultless, but which no one rationally finds fault with. For it does not follow, that if a man accomplishes anything not purposely, he does it through force of circumstances. But he will do it, managing it by wisdom divinely given, and in accommodation to circumstances. For it is not he who has virtue that needs the way to virtue, any more than he, that is strong, needs recovery. For, like farmers who irrigate the land beforehand, so we also water with the liquid stream of Greek learning what in it is earthy; so that it may receive the spiritual seed cast into it, and may be capable of easily nourishing it. The Stromata will contain the truth mixed up in the dogmas of philosophy, or rather covered over and hidden, as the edible part of the nut in the shell. For, in my opinion, it is fitting that the seeds of truth be kept for the husbandmen of faith, and no others. I am not oblivious of what is babbled by some, who in their ignorance are frightened at every noise, and say that we ought to occupy ourselves with what is most necessary, and which contains the faith; and that we should pass over what is beyond and superfluous, which wears out and detains us to no purpose, in things which conduce nothing to the great end. Others think that philosophy was introduced into life by an evil influence, for the ruin of men, by an evil inventor. But I shall show throughout the whole of these Stromata that evil has an evil nature, and can never turn out the producer of aught that is good; indicating that philosophy is in a sense a work of Divine Providence

CHAPTER 2 -- OBJECTION TO THE NUMBER OF EXTRACTS FROM PHILOSOPHICAL WRITINGS IN THESE BOOKS ANTICIPATED AND ANSWERED.

In reference to these commentaries, which contain as the exigencies of the case demand, the Hellenic opinions, I say thus much to those who are fond of finding fault. First, even if philosophy were useless, if the demonstration of its uselessness does good, it is yet useful. Then those cannot condemn the Greeks, who have only a mere hearsay knowledge of their opinions, and have not entered into a minute investigation in each department, in order to acquaintance with them. For the refutation, which is based on experience, is entirely trustworthy. For the knowledge of what is condemned is found the most complete demonstration. Many things, then, though not contributing to the final result, equip the artist. And otherwise erudition commends him, who sets forth the most essential doctrines so as to produce persuasion in his hearers, engendering admiration in those who are taught, and leads them to the truth. And such persuasion is convincing, by which those that love learning admit the truth; so that philosophy does not ruin life by being the originator of false practices and base deeds, although some have calumniated it. though it be the clear image of truth, a divine gift to the Greeks; nor does it drag us away from the faith, as if we were bewitched by some delusive art, but rather, so to speak, by the use of an ampler circuit, obtains a common exercise demonstrative of the faith. Further, the juxtaposition of doctrines, by comparison, saves the truth, from which follows knowledge.

Philosophy came into existence, not on its own account, but for the advantages reaped by us from knowledge, we receiving a firm persuasion of true perception, through the knowledge of things comprehended by the mind. For I do not mention that the Stromata, forming a body of varied erudition, wish artfully to conceal the seeds of knowledge. As, then, he who is fond of hunting captures the game after seeking, tracking, scenting, hunting it down with dogs; so truth, when sought and got with toil, appears a delicious thing. Why, then, you will ask, did you think it fit that such an arrangement should be adopted in your memoranda? Because there is great danger in divulging the secret of the true philosophy to those, whose delight it is unsparingly to speak against everything, not justly; and who shout forth all kinds of names and words indecorously, deceiving themselves and beguiling those who adhere to them. "For the Hebrews seek signs," as the apostle says, "and the Greeks seek after wisdom."

CHAPTER 3 -- AGAINST THE SOPHISTS.

There is a great crowd of this description: some of them, enslaved to pleasures and willing to disbelieve, laugh at the truth which is worthy of all reverence, making sport of its barbarousness. Some others, exalting themselves, endeavour to discover calumnious objections to our words, furnishing captious questions, hunters out of paltry sayings, practisers of miserable artifices, wranglers, dealers in knotty points, as that Abderite says: "For mortals' tongues are glib, and on them are many speeches; And a wide range for words of all sorts in this place and that." And -- "Of whatever sort the word you have spoken, of the same sort you must hear."

Inflated with this art of theirs, the wretched Sophists, babbling away in their own jargon; toiling their whole life about the division of names and the nature of the composition and conjunction of sentences, show themselves greater chatterers than turtle-doves; scratching and tickling, not in a manly way, in my opinion, the ears of those who wish to be tickled.

"A river of silly words -- not a dropping;" just as in old shoes, when all the rest is worn and is falling to pieces, and the tongue alone remains. The Athenian Solon most excellently enlarges, and writes: "Look to the tongue, and to the words of the glozing man, But you look on no work that has been done; But each one of you walks in the steps of a fox, And in all of you is an empty mind."

This, I think, is signified by the utterance of the Saviour, "The foxes have holes, but the Son of man hath not where to lay His head." For on the believer alone, who is separated entirely from the rest, who by the Scripture are called wild beasts, rests the head of the universe, the kind and gentle "who taketh the wise in their own craftiness. For the Word. Lord knoweth the thoughts of the wise, that they axe vain;" the Scripture calling those the wise (sofous) who are skilled in words and arts, sophists (sofistas) Whence the Greeks also applied the denominative appellation of wise and sophists (sofoi sofistai) to those who were versed in anything Cratinus accordingly, having in the Archilochii enumerated the poets, said: "Such a hive of sophists have ye examined." And similarly Iophon, the comic poet, in Flute-playing Satyrs, says: "For there entered A band of sophists, all equipped."

Of these and the like, who devote their attention to empty words, the divine Scripture most excellently says, "I will destroy the wisdom of the wise, and bring to nothing the understanding of the prudent." CHAPTER 4 -- HUMAN ARTS AS WELL AS DIVINE KNOWLEDGE PROCEED FROM GOD.

Homer calls an artificer wise; and of Margites, if that is his work, he thus writes: "Him, then, the Gods made neither a delver nor a ploughman, Nor in any other respect wise; but he missed every art."

Hesiod further said the musician Linus was "skilled in all manner of wisdom;" and does not hesitate to call a mariner wise, seeing he writes: "Having no wisdom in navigation."

And Daniel the prophet says, "The mystery which the king asks, it is not in the power of the wise, the Magi, the diviners, the Gazarenes, to tell the king; but it is God in heaven who revealeth it."

Here he terms the Babylonians wise. And that Scripture calls every secular science or art by the one name wisdom (there are other arts and sciences invented over and above by human reason), and that artistic and skilful invention is from God, will be clear if we adduce the follow ing statement: "And the Lord spake to Moses, See, I have called Bezaleel, the son of Uri, the son of Or, of the tribe of Judah; and I have filled him with the divine spirit of wisdom, and understanding, and knowledge, to devise and to execute in all manner of work, to work gold, and silver, and brass, and blue, and purple, and scarlet, and in working stone work, and in the art of working wood," and even to "all works." And then He adds the general reason, "And to every understanding heart I have given understanding;" that is, to every one capable of acquiring it by pains and exercise. And again, it is written expressly in the name of the Lord "And speak thou to all that are wise in mind, whom I have filled with the spirit of perception."

Those who are wise in mind have a certain attribute of nature peculiar to themselves; and they who have shown themselves capable, receive from the Supreme Wisdom a spirit of perception in double measure. For those who practise the common arts, are in what pertains to the senses highly gifted: in hearing, he who is commonly called a musician; in touch, he who moulds clay; in voice the singer, in smell the perfumer, in sight the engraver of devices on seals. Those also that are occupied in instruction, train the sensibility according to which the poets are susceptible to the influence of measure; the sophists apprehend expression: the dialecticians, syllogisms; and the philosophers are capable of the contemplation of which themselves are the objects. For sensibility finds and invents; since it persuasively exhorts to application. And practice will increase the application which has knowledge for its end. With reason, therefore, the apostle has called the wisdom of God" manifold." and which has manifested its power "in many departments and in many modes" -- by art, by knowledge, by faith, by prophecy -- for our benefit. "For all wisdom is from the Lord, and is with Him for ever," as says the wisdom of Jesus.

For if thou call on wisdom and knowledge with a loud voice, and seek it as treasures of silver, and eagerly track it out, thou shalt understand godliness and find divine knowledge." The prophet says this in contradiction to the knowledge according to philosophy, which teaches us to investigate in a magnanimous and noble manner, for our progress in piety. He opposes, therefore, to it the knowledge which is occupied with piety, when referring to knowledge, when he speaks as follows: "For God gives wisdom out of His own mouth, and knowledge along with understanding, and treasures up help for the righteous." For to those who have been justified by philosophy, the knowledge which leads to piety is laid up as a help.

CHAPTER 5 -- PHILOSOPHY THE HANDMAID OF THEOLOGY.

Accordingly, before the advent of the Lord, philosophy was necessary to the Greeks for righteousness. And now it becomes conducive to piety; being a kind of preparatory training to those who attain to faith through demonstration. "For thy foot," it is said, "will not stumble, if thou refer what is good, whether belonging to the Greeks or to us, to Providence." For God is the cause of all good things; but of some primarily, as of the Old and the New Testament; and of others by consequence, as philosophy. Perchance, too, philosophy was given to the Greeks. For this was a schoolmaster to bring "the Hellenic mind," as the law, the Hebrews, "to Christ." Philosophy, therefore, was a preparation, paving the way for him who is perfected in Christ.

"Now," says Solomon, "defend wisdom, and it will exalt thee, and it will shield thee with a crown of pleasure." For when thou hast strengthened wisdom with a cope by philosophy, and with right expenditure, thou wilt preserve it unassailable by sophists. The way of truth is therefore one. But into it, as into a perennial river, streams flow from all sides. It has been therefore said by inspiration: "Hear, my son, and receive my words; that thine may be the many ways of life. For I teach thee the ways of wisdom; that the fountains fail thee not," which gush forth from the earth itself. Not only did He enumerate several ways of salvation for any one righteous man, but He added many other ways of many righteous. speaking thus: "The paths of the righteous shine like the light." The commandments and the modes of preparatory training are to be regarded as the ways and appliances of life.

"Jerusalem, Jerusalem, how often would I have gathered thy children, as a hen her chickens!" And Jerusalem is, when interpreted, "a vision of peace." He therefore shows prophetically, that those who peacefully contemplate sacred things are in manifold ways trained to their calling. What then? He "would," and could not. How often, and where? Twice; by the prophets, and by the advent. The expression, then, "How often," shows wisdom to be manifold; every mode of quantity and quality, it by all means saves some, both in time and in eternity. "For the Spirit of the Lord fills the earth." And if any should violently say that the reference is to the Hellenic culture, when it is said, "Give not heed to an evil woman; for honey drops from the lips of a harlot," let him hear what follows: "who lubricates thy throat for the time." But philosophy does not flatter. Who, then, does He allude to as having committed fornication? He adds expressly, "For the feet of folly lead those who use her, after death, to Hades. But her steps are not supported." Therefore remove thy way far from silly pleasure. "Stand not at the doors of her house, that thou yield not thy life to others." And He testifies, "Then shall thou repent in old age, when the flesh of thy body is consumed." For this is the end of foolish pleasure. Such, indeed, is the case. And when He says, "Be not much with a strange woman," He admonishes us to use indeed, but not to linger and spend time with, secular culture. For what was bestowed on each generation advantageously, and at seasonable times, is a preliminary training for the word of the Lord. "For already some men, ensnared by the charms of handmaidens, have despised their consort philosophy, and have grown old, some of them in music, some in geometry, others in grammar, the most in rhetoric." "But as the encyclical branches of study contribute to philosophy, which is their mistress: so also philosophy itself co-operates for the acquisition of wisdom. For philosophy is the study of wisdom, and wisdom is the knowledge of things divine and human; and their causes." Wisdom is therefore queen of philosophy, as philosophy is of preparatory culture. For if philosophy" professes control of the tongue, and the belly, and the parts below the belly, it is to be chosen on its own account. But it appears more worthy of respect and pre-eminence, if cultivated for the honour and knowledge of God." And Scripture will afford a testimony to what has been said in what follows. Sarah was at one time barren, being Abraham's wife. Sarah having no child, assigned her maid, by name Hagar, the Egyptian, to Abraham, in order to get children. Wisdom, therefore, who dwells with the man of faith (and Abraham was reckoned faithful and righteous), was still barren and without child in that generation, not having brought forth to Abraham aught allied to virtue. And she, as was proper, thought that he, being now in the time of progress, should have intercourse with secular culture first (by Egyptian the world is designated figuratively); and afterwards should approach to her according to divine providence, and beget Isaac."

And Philo interprets Hagar to mean "sojourning." For it is said in connection with this, "Be not much with a strange woman." Sarah he interprets to mean "my princedom." He, then, who has received previous training is at liberty to approach to wisdom, which is supreme, from which grows up the race of Israel. These things show that that wisdom can be acquired through instruction, to which Abraham attained, passing from the contemplation of heavenly things to the faith and righteousness which are according to God. And Isaac is shown to mean "self-taught;" wherefore also he is discovered to be a type of Christ. He was the husband of one wife Rebecca, which they translate "Patience." And Jacob is said to have consorted with several, his name being interpreted" Exerciser." And exercises are engaged in by means of many and various dogmas. Whence, also, he who is really "endowed with the power of seeing" is called Israel, having much experience, and being fit for exercise.

Something else may also have been shown by the three patriarchs, namely, that the sure seal of knowledge is composed of nature, of education, and exercise.

You may have also another image of what has been said, in Thamar sitting by the way, and presenting the appearance of a harlot, on whom the studious Judas (whose name is interpreted "powerful"), who left nothing unexamined and uninvestigated looked; and turned aside to her, preserving his profession towards God. Wherefore also, when Sarah was jealous at Hagar being preferred to her, Abraham, as choosing only what was profitable in secular philosophy, said, "Behold, thy maid is in thine hands: deal with her as it pleases thee;" manifestly meaning, "I embrace secular culture as youthful, and a handmaid; but thy knowledge I honour and reverence as true wife " And Sarah afflicted her: which is equivalent to corrected and admonished her. It has therefore been well said, "My son, despise not thou the correction of God; nor faint when thou art rebuked of Him. For whom the Lord loveth He chasteneth, and scourgeth every son whom He receiveth." And the foresaid Scriptures, when examined in

other places, will be seen to exhibit other mysteries. We merely therefore assert here, that philosophy is characterized by investigation into truth and the nature of things (this is the truth of which the Lord Himself said, "I am the truth"; that, again, the preparatory training for rest in Christ exercises the mind, rouses the intelligence, and begets an inquiring shrewdness, by means of the true philosophy, which the initiated possess, having found it, or rather received it, from the truth itself.

CHAPTER 6 -- THE BENEFIT OF CULTURE.

The readiness acquired by previous training conduces much to the perception of such things as are requisite; but those things which can be perceived only by mind are the special exercise for the mind. And their nature is triple according as we consider their quantity, their magnitude, and what can be predicated of them. For the discourse which consists of demonstrations, implants in the spirit of him who follows it, clear faith; so that he cannot conceive of that which is demonstrated being different; and so it does not allow us to succumb to those who assail us by fraud. In such studies, therefore, the soul is purged from sensible things, and is excited, so as to be able to see truth distinctly. For nutriment, and the training which is maintained gentle, make noble natures I; and noble natures, when they have received such training, become still better than before both in other respects, but especially in productiveness, as is the case with the other creatures. Wherefore it is mid. "Go to the ant, thou sluggard, and become wiser than it, which provide h much and, varied food in the harvest against the inclemency of winter." Or go to the bee, and learn how laborious she is; for she, feeding on the whole meadow, produces one honey-comb. And if "thou prayest in the closet," as the Lord taught, "to worship in spirit," thy management will no longer be solely occupied about the house, but also about the soul, what must be bestowed on it, and how, and how much; and what must be laid aside and treasured up in it; and when it ought to be produced, and to whom. For it is not by nature, but by learning, that people become noble and good, as people also become physicians and pilots. We all in common, for example, see the vine and the horse. But the husbandman will know if the vine be good or bad at fruit-bearing; and the horseman will easily distinguish between the spiritless and the swift animal. But that some are naturally predisposed to virtue above others, certain pursuits of those, who are so naturally predisposed above others, show. But that perfection in virtue is not the exclusive property of those, whose natures are better, is proved, since also those who by nature are ill-disposed towards virtue, in obtaining suitable training, for the most part attain to excellence; and, on the other hand, those whose natural dispositions are apt, become evil through neglect.

Again, God has created us naturally social and just; whence justice must not be said to take its rise from implantation alone. But the good imparted by creation is to be conceived of as excited by the commandment; the soul being trained to be willing to select what is noblest.

But as we say that a man can be a believer without learning, so also we assert that it is impossible for a man without learning to comprehend the things which are declared in the faith. But to adopt what is well said, and not to adopt the reverse, is caused not simply by faith, but by faith combined with knowledge. But if ignorance is want of training and of instruction, then teaching produces knowledge of divine and human things. But just as it is possible to live rightly in penury of this world's good things, so also in abundance. And we avow, that at once with more ease and more speed will one attain to virtue through previous training. But it is not such as to be unattainable without it; but it is attainable only when they have learned, and have had their senses exercised. "For hatred," says Solomon, "raises strife, but instruction guardeth the ways of life;" in such a way that we are not deceived nor deluded by those who are practised in base arts for the injury of those who hear. "But instruction wanders reproachless," it is said. We must be conversant with the art of reasoning, for the purpose of confuting the deceitful opinions of the sophists. Well and felicitously, therefore, does Anaxarchus write in his book respecting "kingly rule:" "Erudition benefits greatly and hurts greatly him who possesses it; it helps him who is worthy, and injures him who utters readily every word, and before the whole people. It is necessary to know the measure of time. For this is the end of wisdom. And those who sing at the doors, even if they sing skilfully, are not reckoned wise, but have the reputation of folly." And Hesiod: "Of the Muses, who make a man loquacious, divine, vocal."

For him who is fluent in words he calls loquacious; and him who is clever, vocal; and "divine," him who is skilled, a philosopher, and acquainted with the truth.

CHAPTER 7 -- THE ECLECTIC PHILOSOPHY PAVES THE WAY FOR DIVINE VIRTUE.

The Greek preparatory culture, therefore, with philosophy itself, is shown to have come down from God to men, not with a definite direction but in the way in which showers fail down on the good land, and on the dunghill, and on the houses. And similarly both the grass and the wheat sprout; and the figs and any other reckless trees grow on sepulchres. And things that grow, appear as a type of truths. For they enjoy the same influence of the rain. But they have not the same grace as those which spring up in rich soil, inasmuch as they are withered or plucked up. And here we are aided by the parable of the sower, which the Lord interpreted. For the husbandman of the soil which is among men is one: He who from the beginning, from the foundation of the world, sowed nutritious seeds; He who in each age rained down the Lord, the Word. But the times and places which received [such gifts], created the differences which exist. Further, the husbandman sows not only wheat (of which there are many varieties), but also other seeds -- barley, and beam, and peas, and vetches. and vegetable and flower seeds. And to the same husbandry belongs both planting and the operations necessary in the nurseries, and gardens, and orchards, and the planning and rearing of all sorts of trees In like manner, not only the care of sheep, but the care of herds, and breeding of horses, and dogs, and bee-craft, all arts, and to speak comprehensively, the care of flocks and the rearing of animals, differ from each other more or less, but are all useful for life. And philosophy -- I do not mean the Stoic, or the Platonic, or the Epicurean, or the Aristotelian, but whatever has been well said by each of those sects, which teach righteousness along with a science pervaded by piety, -- this eclectic whole I call philosophy. But such conclusions of human reasonings, as men have cut away and falsified. I would never call divine.

And now we must look also at this, that if ever those who know not how to do well, live well; for they have lighted on well-doing. Some, too, have aimed well at the word of truth through understanding. "But Abraham was not justified by works, but by faith." It is therefore of no advantage to them after the end of life, even if they do good works now, if they have not faith. Wherefore also the Scriptures were translated into the language of the Greeks, in order that they might never be able to allege the excuse of ignorance, inasmuch as they are able to hear also what we have in our hands, if they only wish. One speaks in one way of the truth, in another way the truth interprets itself. The guessing at truth is one thing, and truth itself is another. Resemblance is one thing, the thing itself is another. And the one results from learning and practice, the other from power and faith. For the teaching of piety is a gift, but faith is grace. "For by doing the will of God we know the will of God." "Open, then," says the Scripture, "the gates of righteousness; and I will enter in, and confess to the Lord." But the paths to righteousness (since God saves in many ways, for He is good) are many and various. and lead to the Lord's way and gate. And if you ask the royal and true entrance, you will hear, "This is the gate of the Lord, the righteous shall enter in by it." While there are many gates open, that in righteousness is in Christ, by which all the blessed enter, and direct their steps in the sanctity of knowledge. Now Clemens, in his Epistle to the Corinthians. while expounding the differences of those who are approved according to the Church, says expressly, "One may be a believer; one may be powerful in uttering knowledge; one may be wise in discriminating between words; one may be terrible in deeds

CHAPTER 8 -- THE SOPHISTICAL ARTS USELESS.

But the art of sophistry, which the Greeks cultivated, is a fantastic power, which makes false opinions like true by means of words. For it produces rhetoric in order to persuasion, and disputation for wrangling. These arts, therefore, if not conjoined with philosophy, will be injurious to every one. For Plato openly called sophistry "an evil art." And Aristotle, following him, demonstrates it to be a dishonest art. which abstracts in a specious manner the whole business of wisdom. and professes a wisdom which it has not studied. To speak briefly, as the beginning of rhetoric is the probable, and an attempted proof the process, and the end persuasion, so the beginning of disputation is what is matter of opinion, and the process a contest, and the end victory. For in the same manner, also, the beginning of sophistry is the apparent, and the process twofold; one of rhetoric, continuous and exhaustive; and the other of logic, and is interrogatory. And its end is admiration.

The dialectic in vogue in the schools, on the other hand, is the exercise of a philosopher in matters of opinion, for the sake of the faculty of disputation. But truth is not in these at all. With reason, therefore, the noble apostle, depreciating these superfluous arts occupied about words, says, "If any man do not give heed to wholesome words, but is puffed up by a kind of teaching, knowing nothing, but doting (noswn) about questions and strifes of words, whereof cometh contention, envy, railings, evil surmisings, perverse disputings of men of corrupt minds, destitute of the truth."

You see how he is moved against them, calling their art of logic -- on which, those to whom this garrulous mischievous art is dear, whether Greeks or barbarians, plume themselves -- a disease (nosos). Very beautifully, therefore, the tragic poet

Euripides says in the Phoenissoe,- "But a wrongful speech Is diseased in itself, and needs skilful medicines."

For the saving Word is called "wholesome," He being the truth; and what is wholesome (healthful) remains ever deathless. But separation from what is healthful and divine is impiety, and a deadly malady. These are rapacious wolves hid in sheep-skins, men-stealers, and glozing soul-seducers, secretly, but proved to be robbers; striving by fraud and force to catch us who are unsophisticated and have less power of speech.

"Often a man, impeded through want of words, carries less weight In expressing what is right, than the man of eloquence. But now in fluent mouths the weightiest truths They disguise, so that they do not seem what they ought to seem," says the tragedy. Such are these wranglers, whether they follow the sects, or practise miserable dialectic arts. These are they that "stretch the warp and weave nothing," says the Scripture; prosecuting a bootless task, which the apostle has called "cunning craftiness of men whereby they lie in wait to deceive." "For there are," he says, "many unruly and vain talkers and deceivers:" Wherefore it was not said to all, "Ye are the salt of the earth." For there are some even of the hearers of the word who are like the fishes of the sea, which, reared from their birth in brine, yet need salt to dress them for food. Accordingly I wholly approve of the tragedy, when it says: "O son, false words can be well spoken, And truth may be vanquished by beauty of words.

But this is not what is most correct, but nature and what is right; He who practises eloquence is indeed wise, But I consider deeds always better than words." We must not, then, aspire to please the multitude. For we do not practise what will please them, but what we know is remote from their disposition. "Let us not be desirous of vainglory,," says the apostle, "provoking one another, envying one another." Thus the truth-loving Plato says, as if divinely inspired, "Since I am such as to obey nothing but the word, which, after reflection, appears to me the best." Accordingly he charges those who credit opinions without intelligence and knowledge, with abandoning right and sound reason unwarrantably, and believing him who is a partner in falsehood. For to cheat one's self of the truth is bad; but to speak the truth, and to hold as our opinions positive realities, is good.

Men are deprived of what is good unwillingly. Nevertheless they are deprived either by being deceived or beguiled, or by being compelled and not believing. He who believes not, has already made himself a willing captive; and he who changes his persuasion is cozened, while he forgets that time imperceptibly takes away some things, and reason others. And after an opinion has been entertained, pain and anguish, and on the other hand contentiousness and anger, compel. Above all, men are beguiled who are either bewitched by pleasure or terrified by fear. And all these are voluntary changes, but by none of these will knowledge ever be attained.

CHAPTER 9 -- HUMAN KNOWLEDGE NECESSARY FOR THE UNDERSTANDING OF THE SCRIPTURES.

Some, who think themselves naturally gifted, do not wish to touch either philosophy or logic; nay more, they do not wish to learn natural science. They demand bare faith alone, as if they wished, without bestowing any care on the vine, straightway to gather clusters from the first. Now the Lord is figuratively described as the vine, from which, with pains and the art of husbandry, according to the word, the fruit is to be gathered.

We must lop, dig, bind, and perform the other operations. The pruning-knife, I should think, and the pick-axe, and the other agricultural implements, are necessary for the culture of the vine, so that it may produce eatable fruit. And as in husbandry, so also in medicine: he has learned to purpose, who has practised the various lessons, so as to be able to cultivate and to heal. So also here, I call him truly learned who brings everything to bear on the truth; so that, from geometry, and music, and grammar, and philosophy itself, culling what is useful, he guards the faith against assault. Now, as was said, the athlete is despised who is not furnished for the contest. For instance, too, we praise the experienced helmsman who "has seen the cities of many men," ' and the physician who has had large experience; thus also some describe the empiric. And he who brings everything to bear on a fight life, procuring examples from the Greeks and barbarians, this man is an experienced searcher after truth, and in reality a man of much counsel, like the touch-stone (that is, the Lydian), which is believed to possess the power of distinguishing the spurious from the genuine gold. And our much-knowing gnostic can distinguish sophistry from philosophy, the art of decoration from gymnastics, cookery from physic, and rhetoric from dialectics, and the other sects which are according to the barbarian philosophy, from the truth itself. And how necessary is it for him who desires to be partaker of the power of God, to treat of intellectual subjects by philosophising! And how serviceable is it to distinguish expressions which are ambiguous, and which in the Testaments are used synonymously! For the Lord, at the time of His temptation, skilfully matched the devil by an

ambiguous expression. And I do not yet, in this connection, see how in the world the inventor of philosophy and dialectics, as some suppose, is seduced through being deceived by the form of speech which consists in ambiguity. And if the prophets and apostles knew not the arts by which the exercises of philosophy are exhibited, yet the mind of the prophetic and instructive spirit, uttered secretly, because all have not an intelligent ear, demands skilful modes of teaching in order to clear exposition. For the prophets and disciples of the Spirit knew infallibly their mind. For they knew it by faith, in a way which others could not easily, as the Spirit has said. But it is not possible for those who have not learned to receive it thus. "Write," it is said, "the commandments doubly, in counsel and knowledge, that thou mayest answer the words of truth to them who send unto thee." What, then, is the knowledge of answering? or what that of asking? It is dialectics. What then? Is not speaking our business, and does not action proceed from the Word? For if we act not for the Word, we shall act against reason. But a rational work is accomplished through God. "And nothing," it is said, "was made without Him" -the Word of God

And did not the Lord make all things by the Word? Even the beasts work, driven by compelling fear. And do not those who are called orthodox apply themselves to good works, knowing not what they do?

CHAPTER 10 -- TO ACT WELL OF GREATER CONSEQUENCE THAN TO SPEAK WELL.

Wherefore the Saviour, taking the bread, first spake and blessed. Then breaking the bread, He presented it, that we might eat it, according to reason, and that knowing the Scriptures s we might walk obediently. And as those whose speech is evil are no better than those whose practice is evil (for calumny is the servant of the sword, and evil-speaking inflicts pain; and from these proceed disasters in life, such being the effects of evil speech); so also those who accomplish good speech are near neighbours to those who accomplish good deeds. Accordingly discourse refreshes the soul and entices it to nobleness; and happy is he who has the use of both his hands. Neither, therefore, is he who can act well to be vilified by him who is sable to speak well; nor is he who is able to speak well to be disparaged by him who is capable of acting well. But let each do that for which he is naturally fitted.

What the one exhibits as actually done, the other speaks, preparing, as it were, the way for well-doing, and leading the hearers to the practice of good. For there is a saving word, as there is a saving work. Righteousness, accordingly, is not constituted without discourse. And as the receiving of good is abolished if we abolish the doing of good; so obedience and faith are abolished when neither the command, nor one to expound the command, is taken along with us. But now we are benefited mutually and reciprocally by words and deeds; but we must repudiate entirely the art of wrangling and sophistry, since these sentences of the sophists not only bewitch and beguile the many, but sometimes by violence win a Cadmean victory. For true above all is that Psalm. "The just shall live to the end, for he shall not see corruption, when he beholds the wise dying." And whom does he call wise? Hear from the Wisdom of Jesus: "Wisdom is not the knowledge of evil." Such he calls what the arts of speaking and of discussing have invented. "Thou shalt therefore seek wisdom among the wicked, and shalt not find it." And if you inquire again of what sort this is, you are told, "The mouth of the righteous man will distil wisdom." And simi larly with truth, the art of sophistry is called wisdom.

But it is my purpose, as I reckon, and not without reason, to live according to the Word, and to understand what is revealed; but never affecting eloquence, to be content merely with indicating my meaning. And by what term that which I wish to present is shown. I care not. For I well know that to be saved, and to aid those who desire to be saved, is the best thing, and not to compose paltry sentences like gewgaws. "And if," says the Pythagorean in the Politicus of Plato, "you guard against solicitude about terms, you will be richer in wisdom against old age." And in the Theaetetus you will find again. "And carelessness about names, and expressions, and the want of nice scrutiny, is not vulgar and illiberal for the most part, but rather the reverse of this, and is sometimes necessary." This the Scripture has expressed with the greatest possible brevity, when it said, "Be not occupied much about words." For expression is like the dress on the body. The matter is the flesh and sinews. We must not therefore care more for the dress than the safety of the body. For not only a simple mode of life, but also a style of speech devoid of superfluity and nicety, must be cultivated by him who has adopted the true life, if we are to abandon luxury as treacherous and profligate, as the ancient Lacedaemonians adjured ointment and purple, deeming and calling them rightly treacherous garments and treacherous unguents; since neither is that mode of preparing food right where there is more of seasoning than of nutriment; nor is that style of speech elegant which can please rather than benefit the hearers. Pythagoras exhorts us to consider the Muses more pleasant than the Sirens, teaching us to cultivate wisdom apart from pleasure, and exposing the other mode of attracting the soul

as deceptive. For sailing past the Sirens one man has sufficient strength, and for answering the Sphinx another one, or, if you please, not even one. We ought never, then, out of desire for vainglory, to make broad the phylacteries. It suffices the gnostic if only one hearer is found for him. You may hear therefore Pindar the Boeotian, who writes, "Divulge not before all the ancient speech. The way of silence is sometimes the surest. And the mightiest word is a spur to the fight." Accordingly, the blessed apostle very appropriately and urgently exhorts us "not to strive about words to no profit, but to the subverting of the hearers, but to shun profane and vain babblings, for they increase unto more ungodliness, and their word will eat as doth a canker."

CHAPTER 11 -- WHAT IS THE PHILOSOPHY WHICH THE APOSTLE BIDS US SHUN?

This, then, "the wisdom of the world is foolishness with God," and of those who are "the wise the Lord knoweth their thoughts that they are vain." Let no man therefore glory on account of pre-eminence in human thought. For it is written well in Jeremiah, "Let not the wise man glory in his wisdom, and let not the mighty man glory in his might, and let not the rich man glory in his riches: but let him that glorieth glory in this, that he understandeth and knoweth that I am the Lord, that executeth mercy and judgment and righteousness upon the earth: for in these things is my delight, saith the Lord." "That we should trust not in ourselves, but in God who raiseth the dead," says the apostle, "who delivered us from so great a death, that our faith should not stand in the wisdom of men, but in the power of God." "For the spiritual man judgeth all things, but he himself is judged of no man." I hear also those words of his, "And these things I say, lest any man should beguile you with enticing words, or one should enter in to spoil you." And again, "Beware lest any man spoil you through philosophy and vain deceit, after the tradition of men, after the rudiments of the world, and not after Christ;' branding not all philosophy, but the Epicurean, which Paul mentions in the Acts of the Apostles, which abolishes providence and deifies pleasure, and whatever other philosophy honours the elements, but places not over them the efficient cause, nor apprehends the Creator.

The Stoics also, whom he mentions too, say not well that the Deity, being a body, pervades the vilest matter. He calls the jugglery of logic "the tradition of men." Wherefore also he adds, "Avoid juvenile questions. For such contentions are puerile." "But virtue is no lover of boys," says the philosopher Plato. And our struggle, accOrding to Gorgias Leontinus, requires two virtues -- boldness and wisdom -- boldness to undergo danger, and wisdom to understand the enigma. For the Word, like the Olympian proclamation, calls him who is wiring, and crowns him who is able to continue unmoved as far as the truth is concerned. And, in truth, the Word does not wish him who has believed to be idle. For He says, "Seek, and ye shall find." But seeking ends in finding, driving out the empty trifling, and approving of the contemplation which confirms our faith. "And this I say, lest any man beguile you with enticing words," says the apostle, evidently as having learned to distinguish what was said by him, and as being taught to meet objections. "As ye have therefore received Christ Jesus the Lord, so walk in Him, rooted and built up in Him, and stablished in the faith." Now persuasion is [the means of] being established in the faith. "Beware lest any man spoil you of faith in Christ by philosophy and vain deceit, which does away with providence, "after the tradition of men;" for the philosophy which is in accordance with divine tradition establishes and confirms providence, which, being done away with, the economy of the Saviour appears a myth, while we are influenced "after the elements of the world, and not after Christ." For the teaching which is agreeable to Christ deifies the Creator, and traces providence in particular events, and knows the nature of the elements to be capable of change and production, and teaches that we ought to aim at rising up to the power which assimilates to God, and to prefer the dispensation as holding the first rank and superior to all training.

The elements are worshipped, -- the air by Diogenes, the water by Thales, the fire by Hippasus; and by those who suppose atoms to be the first principles of things, arrogating the name of philosophers, being wretched creatures devoted to pleasure. "Wherefore I pray," says the apostle, "that your love may abound yet more and more, in knowledge and in all judgment, that ye may approve things that are excellent." "Since, when we were children," says the same apostle, "we were kept in bondage under the rudiments of the world. And the child, though heir, differeth nothing from a servant, till the time appointed of the father." Philosophers, then, are children, unless they have been made men by Christ. "For if the son of the bond woman shall not be heir with the son of the free," at least he is the seed of Abraham, though not of promise, receiving what belongs to him by free gift. "But strong meat belongeth to those that are of full age, even those who by reason of use have their senses exercised to discern both good and evil." "For every one that useth milk is unskilful in the word of righteousness; for he is a babe," and

not yet acquainted with the word, according to which he has believed and works, and not able to give a reason in himself. "Prove all things," the apostle says, "and hold fast that which is good," speaking to spiritual men, who judge what is said according to truth, whether it seems or truly holds by the truth. "He who is not corrected by discipline errs, and stripes and reproofs give the discipline of wisdom," the reproofs manifestly that are with love. "For the right heart seeketh knowledge." "For he that seeketh the Lord shall find knowledge with righteousness; and they who have sought it rightly have found peace." "And I will know," it is said, "not the speech of those which are puffed up, but the power." In rebuke of those who are wise in appearance, and think themselves wise, but are not in reality wise, he writes: "For the kingdom of God is not in word." It is not in that which is not true, but which is only probable according to opinion; but he said "in power," for the truth alone is powerful. And again: "If any man thinketh that he knoweth anything, he knoweth nothing yet as he ought to know." For truth is never mere opinion. But the "supposition of knowledge inflates," and fills with pride; "but charity edifieth," which deals not in supposition, but in truth. Whence it is said, "If any man loves, he is known.

CHAPTER 12 -- THE MYSTERIES OF THE FAITH NOT TO BE DIVULGED TO ALL.

But since this tradition is not published alone for him who perceives the magnificence of the word; it is requisite, therefore, to hide in a mystery the wisdom spoken, which the Son of God taught. Now, therefore, Isaiah the prophet has his tongue purified by fire, so that he may be able to tell the vision. And we must purify not the tongue alone, but also the ears, if we attempt to be partaken of the truth.

Such were the impediments in the way of my writing. And even now I fear, as it is said, "to cast the pearls before swine, lest they tread them under foot, and turn and rend us." For it is difficult to exhibit the really pure and transparent words respecting the true light, to swinish and untrained hearers. For scarcely could anything which they could hear be more ludicrous than these to the multitude; nor any subjects on the other hand more admirable or more inspiring to those of noble nature. "But the natural man receiveth not the things of the Spirit of God; for they are foolishness to him." But the wise do not utter with their mouth what they reason in council. "But what ye hear in the ear," says the Lord, 'proclaim upon the houses;" bidding them receive the secret traditions of the true knowledge, and expound them aloft and conspicuously; and as we have heard in the ear, so to deliver them to whom it is requisite; but not enjoining us to communicate to all without distinction, what is said to them in parables. But there is only a delineation in the memoranda, which have the truth sowed sparse and broadcast, that it may escape the notice of those who pick up seeds like jackdaws; but when they find a good husbandman, each one of them will germinate and produce corn.

CHAPTER 13 -- ALL SECTS OF PHILOSOPHY CONTAIN A GERM OF TRUTH.

Since, therefore, truth is one (for falsehood has ten thousand by-paths); just as the Bacchantes tore asunder the limbs of Pentheus, so the sects both of barbarian and Hellenic philosophy have done with truth, and each vaunts as the whole truth the portion which has fallen to its lot. But all, in my opinion, are illuminated by the dawn of Light. Let all, therefore, both Greeks and barbarians, who have aspired after the truth, -- both those who possess not a little, and those who have any portion, -- produce whatever they have of the word of truth.

Eternity, for instance, presents in an instant the future and the present, also the past of time. But truth, much more powerful than limitless duration, can collect its proper germs, though they have fallen on foreign soil. For we shall find that very many of the dogmas that are held by such sects as have not become utterly senseless, and are not cut out from the order of nature (by cutting off Christ, as the women of the fable dismembered the man), though appearing unlike one another, correspond in their origin and with the truth as a whole. For they coincide in one, either as a part, or a species, or a genus. For instance, though the highest note is different from the lowest note, yet both compose one harmony. And in numbers an even number differs from an odd number; but both suit in arithmetic: as also is the case with figure, the circle, and the triangle, and the square, and whatever figures differ from one another. Also, in the whole universe, all the parts, though differing one from another, preserve their relation to the whole. So, then, the barbarian and Hellenic philosophy has torn off a fragment of eternal truth not from the mythology of Dionysus, but from the theology of the everliving Word. And He who brings again together the separate fragments, and makes them one, will without peril, be assured, contemplate the perfect Word, the truth. Therefore it is written in Ecclesiastes: "And I added wisdom above all who were before me in Jerusalem; and my heart saw many things; and besides, I knew wisdom and knowledge, parables and

understanding. And this also is the choice of the spirit, because in abundance of wisdom is abundance of knowledge." He who is conversant with all kinds of wisdom, will be preeminently a gnostic.

Now it is written, "Abundance of the knowledge of wisdom will give life to him who is of it." And again, what is said is confirmed more clearly by this saying, "All things are in the sight of those who understand" -- all things, both Hellenic and barbarian; but the one or the other is not all. "They are right to those who wish to receive understanding. Choose instruction, and not silver, and knowledge above tested gold," and prefer also sense to pure gold; "for wisdom is better than precious stones, and no precious thing is worth it."

CHAPTER 14 -- SUCCESSION OF PHILOSOPHERS IN GREECE.

The Greeks say, that after Orpheus and Linus, and the most ancient of the poets that appeared among them, the seven, called wise, were the first that were admired for their wisdom. Of whom four were of Asia -- Thales of Miletus, and Bias of Priene, Pittacus of Mitylene, and Cleobulus of Lindos: and two of Europe, Solon the Athenian, and Chilon the Lacedaemonian; and the seventh, some say, was Periander of Corinth; others, Anacharsis the Scythian; others, Epimenides the Cretan, whom Paul knew as a Greek prophet, whom he mentions in the Epistle to Titus, where he speaks thus: "One of themselves, a prophet of their own, said. The Cretans are always liars, evil beasts, slow bellies. And this witness is true." You see how even to the prophets of the Greeks he attributes something of the truth, and is not ashamed, when discours ing for the edification of some and the shaming of others, to make use of Greek poems. Accordingly to the Corinthians (for this is not the only instance), while discoursing on the resurrection of the dead, he makes use of a tragic lambic line, when he said, "What advantageth it me if the dead are not raised? Let us eat and drink, for to-morrow we die. Be not deceived; evil communications corrupt good manners." Others have enumerated Acusilaus the Argive among the seven wise men; and others, Pherecydes of Syros. And Plato substitutes Myso the Chenian for Periander, whom he deemed unworthy of wisdom, on account of his having reigned as a tyrant. That the wise men among the Greeks flourished after the age of Moses, will, a little after, be shown. But the style of philosophy among them, as Hebraic and enigmatical, is now to be considered. They adopted brevity, as suited for exhortation, and most useful.

Even Plato says, that of old this mode was purposely in vogue among all the Greeks, especially the Lacedaemonians and Cretans, who enjoyed the best laws. The expression, "Know thyself," some supposed to be Chilon's. But Chamaeleon, in his book About the Gods, ascribes it to Thales; Aristotle to the Pythian. It may be an injunction to the pursuit of knowledge. For it is not possible to know the parts without the essence of the whole; and one must study the genesis of the universe, that thereby we may be able to learn the nature of man. Again, to Chilon the Lacedaemonian they attribute, "Let nothing be too much." Strato, in his book Of Inventions, ascribes the apophthegm to Stratodemus of Tegea. Didymus assigns it to Solon; as also to Cleobulus the saying, "A middle course is best." And the expression, "Come under a pledge, and mischief is at hand," Cleomenes says, in his book Concerning Hesiod, was uttered before by Homer in the lines: "Wretched pledges, for the wretched, to be pledged."

The Aristotelians judge it to be Chilon's; but Didymus says the advice was that of Thales. Then, next in order, the saying, "All men are bad," or, "The most of men are bad" (for the same apophthegm is expressed in two ways), Sotades the Byzantian says that it was Bias's. And the aphorism, "Practice conquers everything," they will have it to be Periander's; and likewise the advice, "Know the opportunity," to have been a saying of Pittacus. Solon made laws for the Athenians, Pittacus for the Mitylenians. And at a late date, Pythagoras, the pupil of Pherecydes, first called himself a philosopher. Accordingly, after the fore-mentioned three men, there were three schools of philosophy, named after the places where they lived: the Italic from Pythagoras, the Ionic from Thales, the Eleatic from Xenophanes. Pythagoras was a Samian, the son of Mnesarchus, as Hippobotus says: cording to Aristoxenus, in his life of Pythagoras and Aristarchus and Theopompus, he was a Tuscan; and according to Neanthes, a Syrian or a Tyrian. So that Pythagoras was, according to the most, of barbarian extraction. Thaies, too, as Leander and Herodotus relate, was a Phoenician; as some suppose, a Milesian. He alone seems to have met the prophets of the Egyptians. But no one is described as his teacher, nor is any one mentioned as the teacher of Pherecydes of Syros, who had Pythagoras as his pupil. But the Italic philosophy, that of Pythagoras, grew old in Metapontum in Italy Anaximander of Miletus, the son of Praxiades, succeeded Thales; and was himself succeeded by Anaximenes of Miletus, the son of Eurustratus; after whom came Anaxagoras of Clazomenae, the son of Hegesibulus. He transferred his school from Ionia to Athens. He was succeeded by Archelaus, whose pupil Socrates was.

"From these turned aside, the stone-mason; Talker about laws: the enchanter of the Greeks," says Timon in his Satirical Poems, on account of his guitting physics for ethics. Antisthenes, after being a pupil of Socrates, introduced the Cynic philosophy; and Plato withdrew to the Academy. Aristotle, after studying philosophy under Plato, withdrew to the Lyceum, and founded the Peripatetic sect. He was succeeded by Theophrastus, who was succeeded by Strato, and he by Lycon, then Critolaus, and then Diodorus. Speusippus was the successor of Plato; his successor was Xenocrates; and the successor of the latter, Polemo. And the disciples of Polemo were Crates and Crantor, in whom the old Academy founded by Plato ceased. Arcesilaus was the associate of Crantor; from whom, down to Hegesilaus, the Middle Academy flourished. Then Carneades succeeded Hegesilaus. and others came in succession. The disciple of Crates was Zeno of Citium, the founder of the Stoic sect. He was succeeded by Cleanthes; and the latter by Chrysippus, and others after him. Xenophanes of Colophon was the founder of the Eleatic school, who, Timaeus says, lived in the time of Hiero, lord of Sicily, and Epicharmus the poet; and Apollodorus says that he was born in the fortieth Olympiad, and reached to the times of Darius and Cyrus.

Parmenides, accordingly, was the disciple of Xenophanes, and Zeno of him; then came Leu cippus, and then Democritus. Disciples of Democritus were Protagoras of Abdera, and Metrodorus of Chios, whose pupil was Diogenes of Smyrna; and his again Anaxarchus, and his Pyrrho, and his Nausiphanes. Some say that Epicurus was a scholar of his.

Such, in an epitome, is the succession of the philosophers among the Greeks. The periods of the originators of their philosophy are now to be specified successively, in order that, by comparison, we may show that the Hebrew: philosophy was older by many generations.

It has been said of Xenophanes that he was the founder of the Eleatic philosophy. And Eudemus, in the Astrological Histories, says that Thales foretold the eclipse of the sun, which took place at the time that the Medians and the Lydians fought, in the reign of Cyaxares the father of Astyages over the Medes, and of Alyattus the son of Croesus over the Lydians. Herodotus in his first book agrees with him. The date is about the fiftieth Olympiad. Pythagoras is ascertained to have lived in the days of Polycrates the tyrant, about the sixty-second Olympiad. Mnesiphilus is described as a follower of Solon, and was a contemporary of Themistocles. Solon therefore flourished about the forty-sixth Olympiad. For Heraclitus, the son of Bauso, persuaded Melancomas the tyrant to abdicate his sovereignty. He despised the invitation of king Darius to visit the Persians.

CHAPTER 15 -- THE GREEK PHILOSOPHY IN GREAT PART DERIVED FROM THE BARBARIANS.

These are the times of the oldest wise men and philosophers among the Greeks. And that the most of them were barbarians by extraction, and were trained among barbarians, what need is there to say? Pythagoras is shown to have been either a Tuscan or a Tyrian. And Antisthenes was a Phrygian. And Orpheus was an Odrysian or a Thracian. The most, too, show Homer to have been an Egyptian. Thales was a Phoenician by birth, and was said to have consorted with the prophets of the Egyptians; as also Pythagoras did with the same persons, by whom he was circumcised, that he might enter the adytum and learn from the Egyptians the mystic philosophy. He held converse with the chief of the Chaldeans and the Magi; and he gave a hint of the church, now so called, in the common hall which he maintained.

And Plato does not deny that he procured all that is most excellent in philosophy from the barbarians; and he admits that he came into Egypt. Whence, writing in the Phoedo that the philosopher can receive aid from all sides, he said: "Great indeed is Greece, O Cebes, in which everywhere there are good men, and many are the races of the barbarians." Thus Plato thinks that some of the barbarians, too, are philosophers. But Epicurus, on the other hand, supposes that only Greeks can philosophise. And in the Symposium, Plato, landing the barbarians as practising philosophy with conspicuous excellence, truly says: "And in many other instances both among Greeks and barbarians, whose temples reared for such sons are already numerous." And it is clear that the barbarians signally honoured their lawgivers and teachers, designating them gods. For, according to Plato, "they think that good souls, on quitting the supercelestial region, submit to come to this Tartarus; and assuming a body, share in all the ills which are involved in birth, from their solicitude for the race of men;" and these make laws and publish philosophy, "than which no greater boon ever came from the gods to the race of men, or will come."

And as appears to me, it was in consequence of perceiving the great benefit which is conferred through wise men, that the men themselves Were honoured and philosophy cultivated publicly by all the Brahmins, and the Odrysi, and the Getae. And such were strictly deified by the race of the Egyptians, by the Chaldeans and the Arabians, called the Happy, and those that inhabited Palestine, by not the least portion of the Persian race, and by innumerable other races besides these. And it is well known that Plato is found perpetually celebrating the barbarians, remembering that both himself and Pythagoras learned the most and the noblest of their dogmas among the barbarians. Wherefore he also called the races of the barbarians, "races of barbarian philosophers," recognising, in the Phaedrus, the Egyptian king, and shows him to us wiser than Theut, whom he knew to be Hermes. But in the Charmides, it is manifest that he knew certain Thracians who were said to make the soul immortal. And Pythagoras is reported to have been a disciple of Sonches the Egyptian arch-prophet; and Plato, of Sechnuphis of Heliopolis; and Eudoxus, of Cnidius of Konuphis, who was also an Egyptian. And in his book, On the Saul, Plato again manifestly recognises prophecy, when he introduces a prophet announcing the word of Lachesis, uttering predictions to the souls whose destiny is becoming fixed. And in the Timoeus he introduces Solon, the very wise, learning from the barbarian. The substance of the declaration is to the following effect: "O Solon, Solon, you Greeks are always children. And no Greek is an old man. For you have no learning that is hoary with age.

Democritus appropriated the Babylonian ethic discourses, for he is said to have combined with his own compositions a translation of the column of Acicarus. And you may find the distinction notified by him when he writes, "Thus says Democritus." About himself, too, where, pluming himself on his erudition, he says, "I have roamed over the most ground of any man of my time, investigating the most remote parts. I have seen the most skies and lands, and I have heard of learned men in very great numbers. And in composition no one has surpassed me; in demonstration, not even those among the Egyptians who are called Arpenodaptae, with all of whom I lived in exile up to eighty years." For he went to Babylon, and Persis, and Egypt, to learn from the Magi and the priests.

Zoroaster the Magus, Pythagoras showed to be a Persian. Of the secret books of this man, those who follow the heresy of Prodicus boast to be in possession. Alexander, in his book On the Pythagorean Symbols, relates that Pythagoras was a pupil of Nazaratus the Assyrian a (some think that he is Ezekiel; but he is not, as will afterwards be shown), and will have it that, in addition to these, Pythagoras was a hearer of the Galatae and the Brahmins.

Clearchus the Peripatetic says that he knew a Jew who associated with Aristotle. Heraclitus says that, not humanly, but rather by God's aid, the Sibyl spoke. They say, accordingly, that at Delphi a stone was shown beside the oracle on which it is said sat the first Sibyl who came from Helicon, and had been reared by the Muses. But some say that she came from Milea, being the daughter of Lamia of Sidon. And Serapion, in his epic verses, says that the Sibyl, even when dead ceased not from divination. And he writes that, what proceeded from her into the air after her death, was what gave oracular utterances in voices and omens: and on her body being changed into earth, and the grass as natural growing out of it, whatever beasts happening to be in that place fed on it exhibited to men an accurate knowledge of futurity by their entrails. He thinks also, that the face seen in the moon is her soul. So much for the Sibyl.

Numa the king of the Romans was a Pythagorean, and aided by the precepts of Moses, prohibited from making an image of God in human form, and of the shape of a living creature. Accordingly, during the first hundred and seventy years, though building temples, they made no cast or graven image. For Numa secretly showed them that the Best of Beings could not be apprehended except by the mind alone. Thus philosophy, a thing of the highest utility, flourished in antiquity among the barbarians, shedding its light over the nations. And afterwards it came to Greece. First in its ranks were the prophets of the Egyptians; and the Chaldeans among the Assyrians; and the Druids among the Gauls; and the Samanaeans among the Bactrians; and the philosophers of the Celts; and the Magi of the Persians, who foretold the Saviour's birth, and came into the land of Judaea guided by a star. The Indian gymnosophists are also in the number, and the other barbarian philosophers. And of these there are two classes, some of them called Sarmanae, and others Brahmins. And those of the Sarmanae who are called Hylobii neither inhabit cities, nor have roofs over them, but are clothed in the bark of trees, feed on nuts, and drink water in their hands. Like those called Encratites in the present day, they know not marriage nor begetting of children.

Some, too, of the Indians obey the precepts of Buddha; whom, on account of his extraordinary sanctity, they have raised to divine honours.

Anacharsis was a Scythian, and is recorded to have excelled many philosophers among the Greeks. And the Hyperboreans, Hellanicus relates, dwelt beyond the Riphaean mountains, and inculcated justice, not eating flesh, but using nuts. Those who are sixty years old they take without the gates, and do away with. There are also among the Germans those called sacred women, who, by inspecting the whirlpools of rivers and the eddies, and observing the noises of streams, presage and predict future events. These did not allow the men to fight against Caesar till the new moon shone.

Of all these, by far the oldest is the Jewish race; and that their philosophy committed to writing has the precedence of philosophy among the Greeks, the Pythagorean Philo shows at large; and, besides him, Aristobulus the Peripatetic, and several others, not to waste time, in going over them by name. Very clearly the author Megasthenes, the contemporary of Seleucus Nicanor, writes as follows in the third of his books, On Indian Affairs: "All that was said about nature by the ancients is said also by those who philosophise beyond Greece: some things by the Brahmins among the Indians, and others by those called Jews in Syria." Some more. fabulously say that certain of those called the Idaean Dactyli were the first wise men: to whom are attributed the invention of what are called the "Ephesian letters," and of numbers in music. For which reason dactyls in music received their name. And the Idaean Dactyli were Phrygians and barbarians. Herodotus relates that Hercules, having grown a sage and a student of physics, received from the barbarian Atlas, the Phrygian, the columns of the universe; the fable meaning that he received by instruction the knowledge of the heavenly bodies. And Hermippus of Berytus calls Charon the Centaur wise; about whom, he that wrote The Battle of the Titans says, "that he first led the race of mortals to righteousness, by teaching them the solemnity of the oath, and propitiatory sacrifices and the figures of Olympus." By him Achilles, who fought at Troy, was taught. And Hippo, the daughter of the Centaur, who dwelt with Æolus, taught him her father's science, the knowledge of physics. Euripides also testifies of Hippo as follows: "Who first, by oracles, presaged, And by the rising stars, events divine.

By this Æolus, Ulysses was received as a guest after the taking of Troy. Mark the epochs by comparison with the age of Moses, and with the high antiquity of the philosophy promulgated by him.

CHAPTER 16 -- THAT THE INVENTORS OF OTHER ARTS WERE MOSTLY BARBARIANS.

And barbarians were inventors not only of philosophy, but almost of every art. The Egyptians were the first to introduce astrology among men. Similarly also the Chaldeans. The Egyptians first showed how to burn lamps, and divided the year into twelve months, prohibited intercourse with women in the temples, and enacted that no one should enter the temples from a woman without bathing. Again, they were the inventors of geometry. There are some who say that the Carians invented prognostication by the stars. The Phrygians were the first who attended to the flight of birds. And the Tuscans, neighbours of Italy, were adepts at the art of the Haruspex. The Isaurians and the Arabians invented augury, as the Telmesians divination by dreams. The Etruscans invented the trumpet, and the Phrygians the flute. For Olympus and Marsyas were Phrygians. And Cadmus, the inventor of letters among the Greeks, as Euphorus says, was a Phoenician; whence also Herodotus writes that they were called Phoenician letters. And they say that the Phoenicians and the Syrians first invented letters; and that Apis, an aboriginal inhabitant of Egypt, invented the healing art before Io came into Egypt. But afterwards they say that Asclepius improved the art. Atlas the Libyan was the first who built a ship and navigated the sea. Kelmis and Damnaneus, Idaean Dactyli, first discovered iron in Cyprus. Another Idaean discovered the tempering of brass; according to Hesiod, a Scythian. The Thracians first invented what is called a scimitar (arph), -- it is a curved sword, -- and were the first to use shields on horseback. Similarly also the Illyrians invented the shield (pelth). Besides, they say that the Tuscans invented the art of moulding clay; and that Itanus (he was a Samnite) first fashioned the oblong shield (qureos). Cadmus the Phoenician invented stonecutting, and discovered the gold mines on the Pangaean mountain. Further, another nation, the Cappadocians, first invented the instrument called the nabla, and the Assyrians in the same way the dichord. The Carthaginians were the first that constructed a triterme: and it was built by Bosporus, an aboriginal. Medea, the daughter of Æetas, a Colchian, first invented the dyeing of hair. Besides, the Noropes (they are a Paeonian race, and are now called the Norici) worked copper, and were the first that purified iron. Amycus the king of the Bebryci was the first inventor of boxing-gloves. In music, Olympus the Mysian practised the Lydian harmony: and the people called Troglodytes invented the sambuca, a musical instrument. It is said that the crooked pipe was invented by Satyrus the Phrygian; likewise also diatonic harmony by Hyagnis, a Phrygian too; and notes by Olympus, a Phrygian; as also the Phrygian harmony, and the half-Phrygian and the half-Lydian, by Marsyas, who belonged to the same region as those mentioned above. And the Doric was invented by Thamyris the Thracian. We have heard that the Persians were the first who fashioned the chariot, and bed, and footstool; and the Sidonians the first to construct a trireme. The Sicilians, close to Italy, were the first inventors of the phorminx, which is not much inferior to the lyre. And they invented castanets. In the time of Semiramis

queen of the Assyrians, they relate that linen garments were invented. And Hellanicus says that Atossa queen of the Persians was the first who composed a letter. These things are reported by Seame of Mitylene, Theophrastus of Ephesus, Cydippus of Mantinea also Antiphanes, Aristodemus, and Aristotle and besides these, Philostephanus, and also Strato the Peripatetic, in his books Concerning Inventions. I have added a few details from them, in order to confirm the inventive and practically useful genius of the barbarians, by whom the Greeks profited in their studies. And if any one objects to the barbarous language, Anacharsis says, "All the Greeks speak Scythian to me." It was he who was held in admiration by the Greeks, who said, "My covering is a cloak; my supper, milk and cheese." You see that the barbarian philosophy professes deeds, not words. The apostle thus speaks: "So likewise ye, except ye utter by the tongue a word easy to be understood, how shall ye know what is spoken? for ye shall speak into the air. There are, it may be, so many kind of voices in the world, and none of them is without signification. Therefore if I know not the meaning of the voice, I shall be unto him that speaketh a barbarian, and he that speaketh shall be a barbarian unto me." And, "Let him that speaketh in an unknown tongue pray that he may interpret.

Nay more, it was late before the teaching and writing of discourses reached Greece. Alcmaeon, the son of Perithus, of Crotona, first composed a treatise on nature. And it is related that Anaxagoras of Clazomenae, the son of Hegesibulus, first published a book in writing. The first to adapt music to poetical compositions was Terpander of Antissa; and he set the laws of the Lacedaemonians to music. Lasus of Hermione invented the dithyramb; Stesichorus of Himera, the hymn; Alcman the Spartan, the choral song; Anacreon of Tees, love songs; Pindar the Theban, the dance accompanied with song. Timotheus of Miletus was the first to execute those musical compositions called nomoi on the lyre, with dancing. Moreover, the iambus was invented by Archilochus of Pares, and the choliambus by Hipponax of Ephesus. Tragedy owed its origin to Thespis the Athenian, and comedy to Susarion of Icaria. Their dates are handed down by the grammarians. But it were tedious to specify them accurately: presently, however, Dionysus, on whose account the Dionysian spectacles are celebrated, will be shown to be later than Moses. They say that Antiphon of Rhamnusium, the son of Sophilus, first invented scholastic discourses and rhetorical figures, and was the first who pied causes for a fee, and wrote a forensic speech for delivery, as Diodorus says. And Apollodorus of Cuma first assumed the name of critic, and was called a grammarian. Some say it was Eratosthenes of Cyrene who was first so called since he published two books which he entitled Grammatica. The first who was called a grammarian, as we now use the term, was Praxiphanes, the son of Disnysophenes of Mitylene. Zeleucus the Locrian was reported to have been the first to have framed laws (in writing) Others say that it was Menos the son of Zeus, in the time of Lynceus. He comes after Danaus. in the eleventh generation from Inachus and Moses: as we shall show a little further on. And Lycurgus, who lived many years after the taking of Troy, legislated for the Lacedaemonians a hundred and fifty years before the Olympiads. We have spoken before of the age of Solon. Draco (he was a legislator too) is discovered to have lived about the three hundred and ninth Olympiad. Antilochus, again, who wrote of the learned men from the age of Pythagoras to the death of Epicurus, which took place in the tenth day of the month Gamelion, makes up altogether three hundred and twelve years. Moreover, some say that Phanothea, the wife of Icarius, invented the heroic hexameter; others Themis, one of the Titanides. Didymus, however, in his work On the Pythagorean Philosophy, relates that Theano of Crotona was the first woman who cultivated philosophy and composed poems The Hellenic philosophy then, according to some, apprehended the truth accidentally, dimly, partially; as others will have it, was set a-going by the devil. Several suppose that certain powers, descending from heaven, inspired the whole of philosophy. But if the Hellenic philosophy comprehends not the whole extent of the truth, and besides is destitute of strength to perform the commandments of the Lord, yet it prepares the way for the truly royal teaching; training in some way or other, and moulding the character, and fitting him who believes in Providence for the reception of the truth

CHAPTER 17 -- ON THE SAYING OF THE SAVIOUR, "ALL THAT CAME BEFORE ME WERE THIEVES AND ROBBERS."

But, say they, it is written, "All who were before the Lord's advent are thieves and robbers." All, then, who are in the Word (for it is these that were previous to the incarnation of the Word) are understood generally. But the prophets, being sent and inspired by the Lord, were not thieves, but servants.

The Scripture accordingly says, "Wisdom sent her servants, inviting with loud proclamation to a goblet of wine." But philosophy, it is said, was not sent by the Lord, but came stolen, or given by a thief. It was then some power or angel that had learned something of the truth, but abode not in it, that inspired and taught these things, not without the Lord's knowledge, who knew before the constitution of each essence the issues of futurity, but without His prohibition.

For the theft which reached men then, had some advantage; not that he who perpetrated the theft had utility in his eye, but Providence directed the issue of the audacious deed to utility. I know that many are perpetually assailing us with the allegation, that not to prevent a thing happening, is to be the cause of it happening. For they say, that the man who does not take precaution against a theft, or does not prevent it, is the cause of it: as he is the cause of the conflagration who has not quenched it at the beginning; and the master of the vessel who does not reef the sail, is the cause of the shipwreck Certainly those who are the causes of such events are punished by the law. For to him who had power to prevent, attaches the blame of what happens. We say to them, that causation is seen in doing, working, acting; but the not preventing is in this respect inoperative. Further, causation attaches to activity; as in the case of the shipbuilder in relation to the origin of the vessel, and the builder in relation to the construction of the house. But that which does not prevent is separated from what takes place. Wherefore the effect will be accomplished; because that which could have prevented neither acts nor prevents. For what activity does that which prevents not exert? Now their assertion is reduced to absurdity, if they shall say that the cause of the wound is not the dart, but the shield, which did not prevent the dart from passing through; and if they blame not the thief, but the man who did not prevent the theft. Let them then say, that it was not Hector that burned the ships of the Greeks, but Achilles; because, having the power to prevent Hector, he did not prevent him; but out of anger (and it depended on himself to be angry or not) did not keep back the fire, and was a concurring cause. Now the devil, being possessed of free-will, was able both to repent and to steal; and it was he who was the author of the theft, not the Lord, who did not prevent him. But neither was the gift hurtful, so as to require that prevention should intervene.

But if strict accuracy must be employed in dealing with them, let them know, that that which does not prevent what we assert to have taken place in the theft, is not a cause at all; but that what prevents is involved in the accusation of being a cause. For he that protects with a shield is the cause of him whom he protects not being wounded; preventing him, as he does, from being wounded. For the demon of Socrates was a cause, not by not preventing, but by exhorting, even if (strictly speaking) he did not exhort. And neither praises nor censures, neither rewards nor punishments, are right, when the soul has not the power of inclination and disinclination. but evil is involuntary. Whence he who prevents is a cause: while he who prevents not judges justly the soul's choice. So in no respect is God the author of evil. But since free choice and inclination originate sins, and a mistaken judgment sometimes prevails, from which, since it is ignorance and stupidity, we do not take pains to recede, punishments are rightly inflicted. For to take fever is involuntary; but when one takes fever through his own fault, from excess, we blame him. Inasmuch, then, as evil is involuntary, -- for no one prefers evil as evil; but induced by the pleasure that is in it, and imagining it good, considers it desirable; -- such being the case, to free ourselves from ignorance, and from evil and voluptuous choice, and above all, to withhold our assent from those delusive phantasies, depends on ourselves. The devil is called "thief and robber," having mixed false prophets with the prophets, as tares with the wheat. "All, then, that came before the Lord, were thieves and robbers;" not absolutely all men, but all the false prophets, and all who were not properly sent by Him. For the false prophets possessed the prophetic name dishonestly, being prophets, but prophets of the liar. For the Lord says, "Ye are of your father the devil; and the lusts of your father ye will do. He was a murderer from the beginning, and abode not in the truth, because there is no truth in him. When he speaketh a lie, he speaketh of his own; for he is a liar, and the father of it."

But among the lies, the false prophets also told some true things. And in reality they prophesied "in an ecstasy," as the servants of the apostate. And the Shepherd, the angel of repentance, says to Hermas, of the false prophet: "For he speaks some truths. For the devil fills him with his own spirit, if perchance he may be able to cast down any one from what is right." All things, therefore, are dispensed from heaven for good, "that by the Church may be made known the manifold wisdom of God, according to the eternal foreknowledge, which He purposed in Christ." Nothing withstands God: nothing opposes Him: seeing He is Lord and omnipotent.

Further, the counsels and activities of those who have rebelled, being partial, proceed from a bad disposition, as bodily diseases from a bad constitution, but are guided by universal Providence to a salutary issue, even though the cause be productive of disease. It is accordingly the greatest achievement of divine Providence, not to allow the evil, which has sprung from voluntary apostasy, to remain useless, and for no good, and not to become in all respects injurious. For it is the work of the divine wisdom, and excellence, and power, not alone to do good (for this is, so to speak, the nature of God, as it is of fire to warm and of light to illumine), but especially to ensure that what happens through the evils hatched by any, may come to a good and useful issue, and to use to advantage those things which appear to be evils, as also the testimony which accrues from temptation.

There is then in philosophy, though stolen as the fire by Prometheus, a slender spark, capable of being fanned into flame, a trace of wisdom and an impulse from God. Well, be it so that "the thieves and robbers" are the philosophers among the Greeks, who from the Hebrew prophets before the coming of the Lord received fragments of the truth, not with full knowledge, and claimed these as their own teachings, disguising some points, treating others sophistically by their ingenuity, and discovering other things, for perchance they had "the spirit of perception." Aristotle, too, assented to Scripture, and declared sophistry to have stolen wisdom, as we intimated before. And the apostle says, "Which things we speak, not in the words which man's wisdom teacheth, but which the Holy Ghost teacheth." For of the prophets it is said, "We have all received of His fulness," that is, of Christ's. So that the prophets are not thieves. "And my doctrine is not Mine," saith the Lord, "but the Father's which sent me." And of those who steal He says: "But he that speaketh of himself, seeketh his own glory." Such are the Greeks, "lovers of their own selves, and boasters." Scripture, when it speaks of these as wise, does not brand those who are really wise, but those who are wise in appearance.

CHAPTER 18 -- HE ILLUSTRATES THE APOSTLE'S SAYING, "I WILL DESTROY THE WISDOM OF THE WISE."

And of such it is said, "I will destroy the wisdom of the wise: I will bring to nothing the understanding of the prudent." The apostle accordingly adds, "Where is the wise? Where is the scribe? Where is the disputer of this world?" setting in contradistinction to the scribes, the disputers of this world, the philosophers of the Gentiles. "Hath not God made foolish the wisdom of the world?" which is equivalent to, showed it to be foolish, and not true, as they thought. And if you ask the cause of their seeming wisdom, he will say, "because of the blindness of their heart;" since "in the wisdom of God," that is, as proclaimed by the prophets, "the world knew not," in the wisdom "which spake by the prophets," "Him," that is, God, -- "it pleased God by the foolishness of preaching" what seemed to the Greeks foolishness -- "to save them that believe. For the Jews require signs," in order to faith; "and the Greeks seek after wisdom," plainly those reasonings styled "irresistible," and those others, namely, syllogisms. "But we preach Jesus Christ crucified: to the Jews a stumbling-block. because, though knowing prophecy, they did not believe the event: "to the Greeks, foolishness;" for those who in their own estimation are wise, consider it fabulous that the Son of God should speak by man and that God should have a Son, and especially that that Son should have suffered. Whence their preconceived idea inclines them to disbelieve. For the advent of the Saviour did not make people foolish, and hard of heart, and unbelieving, but made them understanding, amenable to persuasion, and believing. But those that would not believe, by separating themselves from the voluntary adherence of those who obeyed, were proved to be without understanding, unbelievers and fools. "But to them who are called, both Jews and Greeks, Christ is the power of God, and the wisdom of God." Should we not understand (as is better) the words rendered, "Hath not God made foolish the wisdom of the world?" negatively: "God hath not made foolish the wisdom of the world?" -- so that the cause of their hardness of heart may not appear to have proceeded from God, "making foolish the wisdom of the world." For on all accounts, being wise, they incur greater blame in not believing the proclamation. For the preference and choice of truth is voluntary. But that declaration, "I will destroy the wisdom of the wise," declares Him to have sent forth light, by bringing forth in opposition the despised and contemned barbarian philosophy; as the lamp, when shone upon by the sun, is said to be extinguished, on account of its not then exert ing the same power. All having been therefore called, those who are willing to obey have been named "called." For there is no unright-eousness with God. Those of either race who have believed, are "a peculiar people." And in the Acts of the Apostles you will find this, word for word, "Those then who received his word were baptized;" but those who would not obey kept themselves aloof. To these prophecy says, "If ye be willing and hear me, ye shall eat the good things of the land;" proving that choice or refusal depends on ourselves. The apostle designates the doctrine which is according to the Lord, "the wisdom of God," in order to show that the true philosophy has been communicated by the Son. Further, he, who has a show of wisdom, has certain exhortations enjoined on him by the apostle: "That ve put on the new man, which after God is renewed in righteousness and true holiness. Wherefore, putting away lying, speak every man truth. Neither give place to the devil. Let him that stole, steal no more; but rather let him labour, working that which is good" (and to work is to labour in seeking the truth; for it is accompanied with

rational well-doing), "that ye may have to give to him that has need," both of worldly wealth and of divine wisdom. For he wishes both that the word be taught, and that the money be put into the bank, accurately tested, to accumulate interest. Whence he adds, "Let no corrupt communication proceed out of your mouth," -- that is "corrupt communication" which proceeds out of conceit, -- "but that which is good for the use of edifying, that it may minister grace to the hearers." And the word of the good God must needs be good. And how is it possible that he who saves shall not be good?

CHAPTER 19 -- THAT THE PHILOSOPHERS HAVE ATTAINED TO SOME PORTION OF TRUTH.

Since, then, the Greeks are testified to have laid down some true opinions, we may from this point take a glance at the testimonies. Paul, in the Acts of the Apostles, is recorded to have said to the Areopagites, "I perceive that ye are more than ordinarily religious. For as I passed by, and beheld your devotions, I found an altar with the inscription, To The Unknown God. Whom therefore ye ignorantly worship, Him declare I unto you. God, that made the world and all things therein, seeing that He is Lord of heaven and earth, dwelleth not in temples made with hands; neither is worshipped with men's hands, as though He needed anything, seeing He giveth to all life, and breath, and all things; and hath made of one blood all nations of men to dwell on all the face of the earth, and hath determined the times before appointed, and the bounds of their habitation; that they should seek God, if haply they might feel after Him, and find Him; though He be not far from every one of us: for in Him we live, and move, and have our being; as certain also of your own poets have said, For we also are His offspring." Whence it is evident that the apostle, by availing himself of poetical examples from the Phenomena of Aratus, approves of what had been well spoken by the Greeks; and intimates that, by the unknown God, God the Creator was in a roundabout way worshipped by the Greeks; but that it was necessary by positive knowledge to apprehend and learn Him by the Son. "Wherefore, then, I send thee to the Gentiles," it is said, "to open their eyes, and to turn them from darkness to light, and from the power of Satan unto God; that they may receive forgiveness of sins, and inheritance among them that are sanctified by faith which is in Me." Such, then, are the eyes of the blind which are opened. The knowledge of the Father by the Son is the comprehension of the "Greek circumlocution;" and to turn from the power of Satan is to change from sin, through which bondage was produced. We do not, indeed, receive absolutely all philosophy, but that of which Socrates speaks in Plato. "For there are (as they say) in the mysteries many bearers of the thyrsus, but few bacchanals;" meaning, "that many are called, but few chosen." He accordingly plainly adds: "These, in my opinion, are none else than those who have philosophized right; to belong to whose number, I myself have left nothing undone in life, as far as I could, but have endeavoured in every way. Whether we have endeavoured rightly and achieved aught, we shall know when we have gone there, if God will, a little afterwards." Does he not then seem to declare from the Hebrew Scriptures the righteous man's hope, through faith, after death? And in Demodocus (if that is really the work of Plato): "And do not imagine that I call it philosophizing to spend life pottering about the arts, or learning many things, but something different; since I, at least, would consider this a disgrace." For he knew, I reckon, "that the knowledge of many things does not educate the mind," according to Heraclitus. And in the fifth book of the Republic. he says, Shall we then call all these, and the others which study such things, and those who apply themselves to the meaner arts, philosophers?' 'By no means,' I said, 'but like philosophers. And whom,' said he, 'do you call true?' 'Those,' said I,' who delight in the contemplation of truth. For philosophy is not in geometry, with its postulates and hypotheses; nor in music, which is conjectural; nor in astronomy, crammed full of physical, fluid, and probable causes. But the knowledge of the good and truth itself are requisite, -- what is good being one thing, and the ways to the good another." So that he does not allow that the curriculum of training suffices for the good, but co-operates in rousing and training the soul to intellectual objects. Whether, then, they say that the Greeks gave forth some utterances of the true philosophy by accident, it is the accident of a divine administration (for no one will, for the sake of the present argument with us, deify chance); or by good fortune, good fortune is not unforeseen. Or were one, on the other hand, to say that the Greeks possessed a natural conception of these things, we know the one Creator of nature; just as we also call righteousness natural; or that they had a common intellect, let us reflect who is its father, and what righteousness is in the mental economy. For were one to name "prediction," and assign as its cause

For were one to name "prediction," and assign as its cause "combined utterance," he specifies forms of prophecy. Further, others will have it that some truths were uttered by the philosophers, in appearance. The divine apostle writes accordingly respecting us: "For now we see as through a glass;" knowing ourselves in it by reflection, and simultaneously contemplating, as we can, the efficient cause, from

that, which, in us, is divine. For it is said, "Having seen thy brother, thou hast seen thy God:" methinks that now the Saviour God is declared to us. But after the laying aside of the flesh, "face to face," -- then definitely and comprehensively, when the heart becomes pure. And by reflection and direct vision, those among the Greeks who have philosophized accurately, see God. For such, through our weakness, are our true views, as images are seen in the water, and as we see things through pellucid and transparent bodies. Excellently therefore Solomon says: "He who soweth righteousness, worketh faith." "And there are those who, sewing their own, make increase." And again: "Take care of the verdure on the plain, and thou shalt cut grass and gather ripe hay, that thou mayest have sheep for clothing." You see how care must be taken for external clothing and for keeping. "And thou shalt intelligently know the souls of thy flock." "For when the Gentiles, which have not the law, do by nature the things contained in the law, these, having not the law, are a law unto themselves; uncircumcision observing the precepts of the law," according to the apostle, both before the law and before the advent. As if making comparison of those addicted to philosophy with those called heretics, the Word most clearly says: "Better is a friend that is near, than a brother that dwelleth afar off." "And he who relies on falsehoods, feeds on the winds, and pursues winged birds." I do not think that philosophy directly declares the Word, although in many instances philosophy attempts and persuasively teaches us probable arguments; but it assails the sects. Accordingly it is added: "For he hath forsaken the ways of his own vineyard, and wandered in the tracks of his own husbandry." Such are the sects which deserted the primitive Church. Now he who has fallen into heresy passes through an arid wilderness, abandoning the only true God, destitute of God, seeking waterless water, reaching an uninhabited and thirsty land, collecting sterility with his hands. And those destitute of prudence, that is, those involved in heresies, "I enjoin, remarks Wisdom, saying, "Touch sweetly stolen bread and the sweet water of theft;" the Scripture manifestly applying the terms bread and water to nothing else but to those heresies, which employ bread and water in the oblation, not according to the canon of the Church. For there are those who celebrate the Eucharist with mere water. "But begone, stay not in her place:" dace is the synagogue, not the Church. He calls it by the equivocal name, place. Then He subjoins: "For so shalt thou pass through the water of another;" reckoning heretical baptism not proper and true water. "And thou shalt pass over another's river," that rushes along and sweeps down to the sea; into which he is cast who, having diverged from the stability which is according to truth, rushes back into the heathenish and tumultous waves of life.

CHAPTER 20 -- IN WHAT RESPECT PHILOSOPHY CONTRIBUTES TO THE COMPREHENSION OF DIVINE TRUTH.

As many men drawing down the ship, cannot be called many causes, but one cause consisting of many; -- for each individual by himself is not the cause of the ship being drawn, but along with the rest; -- so also philosophy, being the search for truth, contributes to the comprehension of truth; not as being the cause of comprehension, but a cause along with other things, and co-operator; perhaps also a joint cause. And as the several virtues are causes of the happiness of one individual; and as both the sun, and the fire, and the bath, and clothing are of one getting warm: so while truth is one, many things contribute to its investigation. But its discovery is by the Son. If then we consider, virtue is, in power, one. But it is the case, that when exhibited in some things, it is called prudence, in others temperance, and in others manliness or righteousness. By the same analogy, while truth is one, in geometry there is the truth of geometry; in music, that of music; and in the right philosophy, there will be Hellenic truth. But that is the only authentic truth, unassailable, in which we are instructed by the Son of God. In the same way we say, that the drachma being one and the same, when given to the shipmaster, is called the fare; to the tax-gatherer, tax; to the landlord, rent: to the teacher, fees: to the seller, an earnest. And each, whether it be virtue or truth, called by the same name, is the cause of its own peculiar effect alone; and from the blending of them arises a happy life. For we are not made happy by names alone, when we say that a good life is happiness, and that the man who is adorned in his soul with virtue is happy. But if philosophy contributes remotely to the discovery of truth, by reaching, by diverse essays, after the knowledge which touches close on the truth, the knowledge possessed by us, it aids him who aims at grasping it, in ccordance with the Word, to apprehend knowledge. But the Hellenic truth is distinct from that held by us (although it has got the same name), both in respect of extent of knowledge, certainly of demonstration, divine power, and the like. For we are taught of God, being instructed in the truly "sacred letters" by the Son of God. Whence those, to whom we refer, influence souls not in the way we do, but by different teaching. And if, for the sake of those who are fond of fault-finding, we must draw a distinction, by saying that philosophy is a

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3099 concurrent and cooperating cause of true apprehension, being the search for truth, then we shall avow it to be a preparatory training for the enlightened man (tou gnwstikou); not assigning as the cause that which is but the joint-cause; nor as the upholding cause, what is merely co-operative; nor giving to philosophy the place of a sine qua non. Since almost all of us, without training in arts and sciences, and the Hellenic philosophy, and some even without learning at all, through the influence of a philosophy divine and barbarous, and by power, have through faith received the word concerning God, trained by self-operating wisdom. But that which acts in conjunction with something else, being of itself incapable of operating by itself, we describe as co-operating and concausing, and say that it becomes a cause only in virtue of its being a joint-cause, and receives the name of cause only in respect of its concurring with something else, but that it cannot by itself produce the right effect.

Although at one time philosophy justified the Greeks, not conducting them to that entire righteousness to which it is ascertained to cooperate, as the first and second flight of steps help you in your ascent to the upper room, and the grammarian helps the philosopher. Not as if by its abstraction, the perfect Word would be rendered incomplete, or truth perish; since also sight, and hearing, and the voice contribute to truth, but it is the mind which is the appropriate faculty for knowing it. But of those things which co-operate, some contribute a greater amount of power; some, a less. Perspicuity accordingly aids in the communication of truth, and logic in preventing us from falling under the heresies by which we are assailed. But the teaching, which is according to the Saviour, is complete in itself and without defect, being "the power and wisdom of God;" and the Hellenic philosophy does not, by its approach, make the truth more powerful; but rendering powerless the assault of sophistry against it, and frustrating the treacherous plots laid against the truth, is said to be the proper "fence and wall of the vineyard." And the truth which is according to faith is as necessary for life as bread; while the preparatory discipline is like sauce and sweetmeats. "At the end of the dinner, the dessert is pleasant," according to the Theban Pindar. And the Scripture has expressly said, "The innocent will become wiser by understanding, and the wise will receive knowledge." "And he that speaketh of himself," saith the Lord, "seeketh his own glory; but He that seeketh His glory that sent Him is true, and there is no unrighteousness in Him." On the other hand, therefore, he who appropriates what belongs to the barbarians, and vaunts it is his own, does wrong, increasing his own glory, and falsifying the truth. It is such an one that is by Scripture called a "thief." It is therefore said, "Son, be not a liar; for falsehood leads to theft."

Nevertheless the thief possesses really, what he has possessed himself of dishonestly, whether it be gold, or silver, or speech, or dogma. The ideas, then, which they have stolen, and which are partially true, they know by conjecture and necessary logical deduction: on becoming disciples, therefore, they will know them with intelligent apprehension.

CHAPTER 21 -- THE JEWISH INSTITUTIONS AND LAWS OF FAR HIGHER ANTIQUITY THAN THE PHILOSOPHY OF THE GREEKS.

On the plagiarizing of the dogmas of the philosophers from the Hebrews, we shall treat a little afterwards. But first, as due order demands, we must now speak of the epoch of Moses, by which the philosophy of the Hebrews will be demonstrated beyond all contradiction to be the most ancient of all wisdom. This has been discussed with accuracy by Tatian in his book To the Greeks, and by Cassian in the first book of his Exegetics. Nevertheless our commentary demands that we too should run over what has been said on the point. Apion, then, the grammarian, surnamed Pleistonices, in the fourth book of The Egyptian Histories, although of so hostile a disposition towards the Hebrews, being by race an Egyptian, as to compose a work against the Jews, when referring to Amosis king of the Egyptians, and his exploits, adduces, as a witness, Ptolemy of Mendes. And his remarks are to the following effect: Amosis, who lived in the time of the Argive Inachus, overthrew Athyria, as Ptolemy of Mendes relates in his Chronology. Now this Ptolemy was a priest; and setting forth the deeds of the Egyptian kings in three entire books, he says, that the exodus of the Jews from Egypt, under the conduct of Moses, took place while Amosis was king of Egypt. Whence it is seen that Moses flourished in the time of Inachus. And of the Hellenic states, the most ancient is the Argolic, I mean that which took its rise from Inachus, as Dionysius of Halicarnassus teaches in his Times. And younger by forty generations than it was Attica, founded by Cecrops, who was an aboriginal of double race, as Tatian expressly says; and Arcadia, founded by Pelasgus, younger too by nine generations; and he, too, is said to have been an aboriginal. And more recent than this last by fifty-two generations, was Pthiotis, rounded by Deucalion.

And from the time of Inachus to the Trojan war twenty generations or more are reckoned; let us say, four hundred years and more. And if Ctesias says that the Assyrian power is many years older than the Greek, the exodus of Moses from Egypt will appear to have taken place in the forty-second year of the Assyrian empire, in the thirty-second year of the reign of Belochus, in the time of Amosis the Egyptian, and of Inachus the Argive. And in Greece, in the time of Phoroneus, who succeeded Inachus, the flood of Ogyges occurred; and monarchy subsisted in Sicyon first in the person of Ægialeus, then of Europs, then of Telches; in Crete, in the person of Cres For Acusilaus says that Phoroneus was the first man. Whence, too, the author of Phoronis said that he was "the father of mortal men." Thence Plato in the Timaeus, following Acusilaus, writes: "And wishing to draw them out into a discussion respecting antiquities, he said that he ventured to speak of the most remote antiquities of this city respecting Phoroneus, called the first man, and Niobe, and what happened after the deluge." And in the time of Phorbus lived Actaeus, from whom is derived Actaia, Attica; and in the time of Triopas lived Prometheus, and Atlas, and Epimetheus, and Cecrops of double race, and Ino.

And in the time of Crotopus occurred the burning of Phaethon, and the deluge s of Deucalion; and in the time of Sthenelus, the reign of Amphictyon, and the arrival of Danaus in the Peloponnesus; and trader Dardanus happened the building of Dardania, whom, says Homer, "First cloudcompelling Zeus begat,"- and the transmigration from Crete into Phoenicia. And in the time of Lynceus took place the abduction of Proserpine, and the dedication of the sacred enclosure in Eleusis, and the husbandry of Triptolemus, and the arrival of Cadmus in Thebes, and the reign of Minos. And in the time of Proetus the war of Eumolpus with the Athenians took place; and in the time of Acrisius, the removal of Pelops from Phrygia, the arrival of Ion at Athens; and the second Cecrops appeared, and the exploits of Perseus and Dionysus took place, and Orpheus and Musaeus lived. And in the eighteenth year of the reign of Agamemnon, Troy was taken, in the first year of the reign of Demophon the son of Theseus at Athens, on the twelfth day of the month Thargelion, as Dionysius the Argive says; but Ægias and Dercylus, in the third book, say that it was on the eighth day of the last division of the month Panemus; Hellanicus says that it was on the twelfth of the month Thargelion: and some of the authors of the Attica say that it was on the eighth of the last division of the month in the last year of Menestheus, at full moon.

"It was midnight," says the author of the Little Iliad, "And the moon shone clear." Others say, it took place on the same day of Scirophorion. But Theseus, the rival of Hercules, is older by a generation than the Trojan war. Accordingly Tlepolemus, a son of Hercules, is mentioned by Homer, as having served at Troy.

Moses, then, is shown to have preceded the deification of Dionysus six hundred and four years, if he was deified in the thirty-second year of the reign of Perseus, as Apollodorus says in his Chronology. From Bacchus to Hercules and the chiefs that sailed with Jason in the ship Argo, are comprised sixtythree years. Æsculapius and the Dioscuri sailed with them, as Apollonius Rhodius testifies in his Argonautics. And from the reign of Hercules, in Argos, to the deification of Hercules and of Æsculapius, are comprised thirty-eight years, according to Apollodorus the chronologist; from this to the deification of Castor and Pollux, fifty-three years. And at this time Troy was taken. And if we may believe the poet Hesiod, let us hear him: "Then to Jove, Maia, Atlas' daughter, bore renowned Hermes, Herald of the immortals, having ascended the sacred couch.

And Semele, the daughter of Cadmus, too, bore an illustrious son, Dionysus, the joy-inspiring, when she mingled with him in love." Cadmus, the father of Semele, came to Thebes in the time of Lynceus, and was the inventor of the Greek letters. Triopas was a contemporary of Isis, in the seventh generation from Inachus. And Isis, who is the same as Io, is so called, it is said, from her going (ienai) roaming over the whole earth. Her, Istrus, in his work on the migration of the Egyptians, calls the daughter of Prometheus. Prometheus lived in the time of Triopas, in the seventh generation after Moses. So that Moses appears to have flourished even before the birth of men, according to the chronology of the Greeks. Leon, who treated of the Egyptian divinities, says that Isis by the Greeks was called Ceres, who lived in the time of Lynceus, in the eleventh generation after Moses. And Apis the king of Argos built Memphis, as Aristippus says in the first book of the Arcadica. And Aristeas the Argive says that he was named Serapis, and that it is he that the Egyptians worship. And Nymphodorus of Amphipolis, in the third book of the Institutions of Asia, says that the bull Apis, dead and laid in a coffin (soros), was deposited in the temple of the god (daimonos) there worshipped, and thence was called Soroapis, and afterwards Serapis by the custom of the natives. And Apis is third after Inachus. Further, Latona lived in the time of Tityus. "For he dragged Latona, the radiant consort of Zeus." Now Tityus was contemporary with Tantalus. Rightly, therefor, the Boeotian Pindar writes, "And in time was Apollo born;" and no wonder when he is found along with Hercules, serving Admetus "for a long year." Zethus and

Amphion, the inventors of music, lived about the age of Cadmus. And should one assert that Phemonoe was the first who sang oracles in verse to Acrisius, let him know that twenty-seven years after Phemonoe, lived Orpheus, and Musaeus, and Linus the teacher of Hercules. And Homer and Hesiod are much more recent than the Trojan war; and after them the legislators among the Greeks are far more recent, Lycurgus and Solon, and the seven wise men, and Pherecydes of Syros, and Pythagoras the great, who lived later, about the Olympiads, as we have shown. We have also demonstrated Moses to be more ancient, not only than those called poets and wise men among the Greeks, but than the most of their deities. Nor he alone, but the Sibyl also is more ancient than Orpheus. For it is said, that respecting her appellation and her oracular utterances there are several accounts: that being a Phrygian, she was called Artemis; and that on her arrival at Delphi, she sang- "O Delphians, ministers of far-darting Apollo, I come to declare the mind of Ægis-bearing Zeus, Enraged as I am at my own brother Apollo.'

There is another also, an Erythraean, called Herophile. These are mentioned by Heraclides of Pontus in his work On Oracles. I pass over the Egyptian Sibyl, and the Italian, who inhabited the Carmentale in Rome, whose son was Evander, who built the temple of Pan in Rome, called the Lupercal.

It is worth our while, having reached this point, to examine the dates of the other prophets among the Hebrews who succeeded Moses. After the close of Moses's life, Joshua succeeded to the leadership of the people, and he, after warring for sixty-five years, rested in the good land other fiveand-twenty. As the book of Joshua relates, the above mentioned man was the successor of Moses twenty-seven years. Then the Hebrews having sinned, were delivered to Chusachar king of Mesopotamia for eight years, as the book of Judges mentions. But having afterwards besought the Lord, they receive for leader Gothoniel, the younger brother of Caleb, of the tribe of Judah, who, having slain the king of Mesopotamia, ruled over the people forty years in succession. And having again sinned, they were delivered into the hands of Æglom king of the Moabites for eighteen years. But on their repentance, Aod, a man who had equal use of both hands, of the tribe of Ephraim, was their leader for eighty years. It was he that despatched Æglom. On the death of Aod, and on their sinning again, they were delivered into the hand of Jabim king of Canaan twenty years. After him Deborah the wife of Lapidoth, of the tribe of Ephraim, prophesied; and Ozias the son of Rhiesu was high priest. At her instance Barak the son of Bener, of the tribe of Naphtali, commanding the army, having joined battle with Sisera, Jabim's commander-in-chief. conquered him. And after that Deborah ruled, judging the people forty years. On her death, the people having again sinned, were delivered into the hands of the Midianites seven years. After these events, Gideon, of the tribe of Manasseh, the son of Joas, having fought with his three hundred men, and killed a hundred and twenty thousand, ruled forty years; after whom the son of Ahimelech three years. He was succeeded by Boleas, the son of Bedan, the son of Charran, of the tribe of Ephraim, who ruled twenty-three years. After whom, the people having sinned again, were delivered to the Ammonites eighteen years; and on their repentance were commanded by Jephtha the Gileadite, of the tribe of Manasseh; and he ruled six years. After whom, Abatthan of Bethlehem, of the tribe of Juda, ruled seven years. Then Ebron the Zebulonite. eight years. Then Eglom of Ephraim, eight years. Some add to the seven years of Abatthan the eight of Ebrom. And after him, the people having again transgressed, came under the power of the foreigners, the Philistines, for forty years. But on their returning [to God], they were led by Samson, of the tribe of Dan, who conquered the foreigners in battle. He ruled twenty years. And after him, there being no governor, Eli the priest judged the people for forty years. He was succeeded by Samuel the prophet; contemporaneously with whom Saul reigned, who held sway for twenty-seven years. He anointed David. Samuel died two years before Saul, while Abimelech was high priest. He anointed Saul as king, who was the first that bore regal sway over Israel after the judges; the whole duration of whom, down to Saul, was four hundred and sixty-three years and seven months.

Then in the first book of Kings there are twenty years of Saul, during which he reigned after he was renovated. And after the death of Saul, David the son of Jesse, of the tribe of Judah, reigned next in Hebron, forty years, as is contained in the second book of Kings. And Abiathar the son of Abimelech, of the kindred of Eli, was high priest. In his time Gad and Nathan prophesied. From Joshua the son of Nun, then, till David received the kingdom, there intervene, according to some, four hundred and fifty years. But, as the chronology set forth shows, five hundred and twenty-three years and seven months are comprehended till the death of David.

And after this Solomon the son of David reigned forty years. Under him Nathan continued to prophesy, who also exhorted him respecting the building of the temple. Achias of Shilo also prophesied. And both the kings, David and Solomon, were prophets. And Sadoc the high priest was the first who ministered in the temple which Solomon built, being the eighth from Aaron, the first high priest. From Moses, then, to the age of Solomon, as some say, are five hundred and ninetyfive years, and as others, five hundred and seventy-six.

And if you count, along with the four hundred and fifty years from Joshua to David, the forty years of the rule of Moses, and the other eighty years of Moses's life previous to the exodus of the Hebrews from Egypt, you will make up the sum in all of six hundred and ten years. But our chronology will run more correctly, if to the five hundred and twentythree years and seven months till the death of David, you add the hundred and twenty years of Moses and the forty years of Solomon. For you will make up in all, down to the death of Solomon, six hundred and eighty-three years and seven months.

Hiram gave his daughter to Solomon about the time of the arrival of Menelaus in Phoenicia, after the capture of Troy, as is said by Menan-der of Pergamus, and Laetus in The Phoenicia. And after Solomon, Roboam his son reigned for seventeen years; and Abimelech the son of Sadoc was high priest. In his reign, the kingdom being divided, Jeroboam, of the tribe of Ephraim, the servant of Solomon, reigned in Samaria; and Achias the Shilonite continued to prophesy; also Samaeas the son of Amame, and he who came from Judah to Jeroboam, and prophesied against the altar. After him his son Abijam, twenty-three years; and likewise his son Asaman. The last, in his old age, was diseased in his feet; and in his reign prophesied Jehu the son of Ananias.

After him Jehosaphat his son reigned twenty-five years. In his reign prophesied Elias the Thesbite, and Michaeas the son of Jebla, and Abdias the son of Ananias. And in the time of Michaeas there was also the false prophet Zedekias, the son of Chonaan. These were followed by the reign of Joram the son of Jehosaphat, for eight years; during whose time prophesied Elias; and after Elias, Elisaeus the son of Saphat. In his reign the people in Samaria ate doves' dung and their own children. The period of Jehosaphat extends from the close of the third book of Kings to the fourth. And in the reign of Joram, Elias was translated, and Elisaeus the son of Saphat commenced prophesying, and prophesied for six years, being forty years old.

Then Ochozias reigned a year. In his time Elisaeus continued to prophesy, and along with him Adadonaeus. After him the mother of Ozias, Gotholia, reigned eight years, having slain the children of her brother. For she was of the family of Ahab. But the sister of Ozias, Josabaea, stole Joas the son of Ozias, and invested him afterwards with the kingdom. And in the time of this Gotholia, Elisaeus was still prophesying. And after her reigned, as I said before, Joash, rescued by Josabaea the wife of Jodae the high priest, and lived in all forty years.

There are comprised, then, from Solomon to the death of Elisaeus the prophet, as some say, one hundred and five years; according to others, one hundred and two; and, as the chronology before us shows, from the reign of Solomon an hundred and eighty-one.

Now from the Trojan war to the birth of Homer, according to Philochorus, a hundred and eighty years elapsed; and he was posterior to the Ionic migration. But Aristarchus, in the Archilochian Memoirs, says that he lived during the Ionic migration, which took place a hundred and twenty years after the siege of Troy. But Apollodorus alleges it was an hundred and twenty years after the Ionic migration, while Agesilaus son of Doryssaeus was king of the Lacedaemonians: so that he brings Lycurgus the legislator, while still a young man, near him. Euthymenes, in the Chronicles, says that he flourished contemporaneously with Hesiod, in the time of Acastus, and was born in Chios about the four hundredth year after the capture of Troy. And Archimachus, in the third book of his Euboean History), is of this opinion. So that both he and Hesiod were later than Elisaeus, the prophet. And if you choose to follow the grammarian Crates, and say that Homer was born about the time of the expedition of the Heraclidae, eighty years after the taking of Troy, he will be found to be later again than Solomon, in whose days occurred the arrival of Menelaus in Phenicia, as was said above. Eratosthenes says that Homer's age was two hundred years after the capture of Troy. Further, Theopompus, in the forty-third book of the.Philippics, relates that Homer was born five hundred years after the war at Troy. And Euphorion, in his book about the Aleuades, maintains that he was born in the time of Gyges, who began to reign in the eighteenth Olympiad, who, also he says, was the first that was called tyrant turannos. Sosibius Lacon, again, in his Record of Dates, brings Homer down to the eighth year of the reign of Charillus the son of Polydectus. Charillus reigned for sixty-four years, after whom the son of Nicander reigned thirty-nine years. In his thirtyfourth year it is said that the first Olympiad was instituted; so that Homer was ninety years before the introduction of the Olympic games

After Joas, Amasias his son reigned as his successor thirtynine years. He in like manner was succeeded by his son Ozias, who reigned for fifty-two years, and died a leper. And in his time prophesied Amos, and Isaiah his son, and Hosea the son of Beeri, and Jonas the son of Amathi, who was of Gethchober. who preached to the Ninevites, and passed through the whale's belly.

Then Jonathan the son of Ozias reigned for sixteen years. In his time Esaias still prophesied, and Hosea, and Michaeas the Morasthite, and Joel the son of Bethuel.

Next in succession was his son Ahaz, who reigned for sixteen years. In his time, in the fifteenth year, Israel was carried away to Babylon. And Salmanasar the king of the Assyrians carried away the people of Samaria into the country of the Medes and to Babylon.

Again Ahaz was succeeded by Osee, who reigned for eight years. Then followed Hezekiah, for twenty-nine years. For his sanctity, when he had approached his end, God, by Isaiah, allowed him to live for other fifteen years, giving as a sign the going back of the sun. Up to his times Esaias, Hosea, and Micah continued prophesying.

And these are said to have lived after the age of Lycurgus, the legislator of the Lacedaemonians. For Dieuchidas, in the fourth book of the Megarics, places the era of Lycurgus about the two hundred and ninetieth year after the capture of Troy.

After Hezekiah, his son Manasses reigned for fifty-five years. Then his son Amos for two years. After him reigned his son Josias, distinguished for his observance of the law, for thirtyone years. He "laid the carcases of men upon the carcases of the idols," as is written in the book of Leviticus. In his reign, in the eighteenth year, the passover was celebrated, not having been kept from the days of Samuel in the intervening period. Then Chelkias the priest, the father of the prophet Jeremiah, having fallen in with the book of the law, that had been laid up in the temple, read it and died. And in his days Olda prohesied, and Sophonias, and Jeremiah. And in the days of Jeremiah was Ananias the son of Azor, the false prophet. He having disobeyed Jeremiah the prophet, was slain by Pharaoh Necho king of Egypt at the river Euphrates, having encountered the latter, who was marching on the Assvrians.

Josiah was succeeded by Jechoniah, called also Joachas, his son, who reigned three months and ten days. Necho king of Egypt bound him and led him to Egypt, after making his brother Joachim king in his stead, who continued his tributary for eleven years. After him his namesake Joakim reigned for three months. Then Zedekiah reigned for eleven years; and up to his time Jeremiah continued to prophesy. Along with him Ezekiel the son of Buzi, and Urias the son of Samaeus, and Ambacum prophesied. Here end the Hebrew kings.

There are then from the birth of Moses till this captivity nine hundred and seventy-two years; but according to strict chronological accuracy, one thousand and eighty-five, six months, ten days. From the reign of David to the captivity by the Chaldeans, four hundred and fifty-two years and six months; but as the accuracy we have observed in reference to dates makes out, four hundred and eighty-two and six months ten days.

And in the twelfth year of the reign of Zedekiah, forty years before the supremacy of the Persians, Nebuchodonosor made war against the Phoenicians and the Jews, as Berosus asserts in his Chaldaean Histories. And Joabas, writing about the Assyrians, acknowledges that he had received the history from Berosus, and testifies to his accuracy. Nebuchodonosor, therefore, having put out the eyes of Zedekiah, took him away to Babylon, and transported the whole people (the captivity lasted seventy years), with the exception of a few who fled to Egypt.

Jeremiah and Ambacum were still prophesying in the time of Zedekiah. In the fifth year of his reign Ezekiel prophesied at Babylon: after him Nahum, then Daniel. After him, again, Haggai and Zechariah prophesied in the time of Darius the First for two years; and then the angel among the twelve. After Haggai and Zechariah, Nehemiah, the chief cup-bearer of Artaxerxes, the son of Acheli the Israelite, built the city of Jerusalem and restored the temple. During the captivity lived Esther and Mordecai, whose book is still extant, as also that of the Maccabees. During this captivity Mishael, Ananias, and Azarias, refusing to worship the image, and being thrown into a furnace of fire, were saved by the appearance of an angel. At that time, on account of the serpent, Daniel was thrown into the den of lions; but being preserved through the providence of God by Ambacub, he is restored on the seventh day. At this period, too, occurred the sign of Jona; and Tobias, through the assistance of the angel Raphael, married Sarah, the demon having killed her seven first suitors; and after the marriage of Tobias, his father Tobit recovered his sight. At that time Zorobabel, having by his wisdom overcome his opponents, and obtained leave from Darius for the rebuilding of Jerusalem, returned with Esdras to his native land; and by him the redemption of the people and the revisal and restoration of the inspired oracles were effected. and the passover of deliverance celebrated and marriage with aliens dissolved.

Cyrus had, by proclamation, previously enjoined the restoration of the Hebrews. And his promise being accomplished in the time of Darius, the feast of the dedication was held, as also the feast of tabernacles.

There were in all, taking in the duration of the captivity down to the restoration of the people, from the birth of Moses, one thousand one hundred and fifty-five years, six months, and ten days; and from the reign of David, according to some, four hundred and fifty-two; more correctly, five hundred and seventy-two years, six months, and ten days.

From the captivity at Babylon, which took place in the time of Jeremiah the prophet, was fulfilled what was spoken by Daniel the prophet as follows: "Seventy weeks are determined upon thy people, and upon thy holy city, to finish the transgression, and to seal sins, and to wipe out and make reconciliation for iniquity, and to bring in everlasting righteousness, and to seal the vision and the prophet, and to anoint the Holy of Holies. Know therefore, and understand, that from the going forth of the word commanding an answer to be given, and Jerusalem to be built, to Christ the Prince, are seven weeks and sixty-two weeks; and the street shall be again built, and the wall; and the times shall be expended. And after the sixty-two weeks the anointing shall be overthrown, and judgment shall not be in him; and he shall destroy the city and the sanctuary along with the coming Prince. And they shall be destroyed in a flood, and to the end of the war shall be cut off by: desolations. And he shall confirm the covenant with many for one week; and in the middle of the week the sacrifice and oblation shall be taken away; and in the holy place shall be the abomination of desolations, and until the consummation of time shall the consummation be assigned for desolation. And in the midst of the week shall he make the incense of sacrifice cease, and of the wing of destruction, even till the consummation, like the destruction of the oblation." That the temple accordingly was 1 built in seven weeks, is evident; for it is written in Esdras. And thus Christ became King of the Jews, reigning in Jerusalem in the fulfilment of the seven weeks. And in the sixty and two weeks the whole of Judaea was quiet, and without wars. And Christ our Lord, "the Holy of Holies," having come and fulfilled the vision and the prophecy, was anointed in His flesh by the Holy Spirit of His Father.

In those "sixty and two weeks," as the prophet said, and "in the one week," was He Lord. The half of the week Nero held sway, and in the holy city Jerusalem placed the abomination; and in the half of the week he was taken away, and Otho, and Galba, and Vitellius. And Vespasian rose to the supreme power, and destroyed Jerusalem, and desolated the holy place. And that such are the facts of the case, is clear to him that is able to understand, as the prophet said.

On the completion, then, of the eleventh year, in the beginning of the following, in the reign of Joachim, occurred the carrying away captive to Babylon by Nabuchodonosor the king, in the seventh year of his reign over the Assyrians, in the second year of the reign of Vaphres over the Egyptians, in the archonship of Philip at Athens, in the first year of the fortyeighth Olympiad. The captivity lasted for seventy years, and ended in the second year of Darius Hystaspes, who had become king of the Persians, Assyrians, and Egyptians; in whose reign, as I said above, Haggai and Zechariah and the angel of the twelve prophesied. And the high priest was Joshua the son of Josedec. And in the second year of the reign of Darius, who, Herodotus says, destroyed the power of the Magi, Zorobabel the son of Salathiel was despatched to raise and adorn the temple at Jerusalem.

The times of the Persians are accordingly summed up thus: Cyrus reigned thirty years; Cambyses, nineteen; Darius, fortysix; Xerxes, twenty-six; Artaxerxes, forty-one; Darius, eight; Artaxerxes, forty-two; Ochus or Arses, three. The sum total of the years of the Persian monarchy is two hundred and thirtyfive years.

Alexander of Macedon, having despatched this Darius, during this period, began to reign. Similarly, therefore, the times of the Macedonian kings are thus computed: Alexander, eighteen years; Ptolemy the son of Lagus, forty years; Ptolemy Philadelphus, twenty-seven years; then Euergetes, five-and-twenty years; then Philopator, seventeen years; then Epiphanes, four-and-twenty years; he was succeeded by Philometer, who reigned five-and-thirty years; after him Physcon, twenty-nine years; then Lathurus, thirty-six years; then he that was surnamed I Dionysus, twenty-nine years; and last Cleopatra reigned twenty-two years. And after her was the reign of the Cappadocians for eighteen days.

Accordingly the period embraced by the Macedonian kings is, in all, three hundred and twelve years and eighteen days.

Therefore those who prophesied in the time of Darius Hystaspes, about the second year of his reign, -- Haggai, and Zechariah, and the angel of the twelve, who prophesied about the first year of the forty-eighth Olympiad, -- are demonstrated to be older than Pythagoras, who is said to have lived in the sixty-second Olympiad, and than Thales, the oldest of the wise men of the Greeks, who lived about the fiftieth Olympiad. Those wise men that are classed with Thales were then contemporaneous, as Andron says in the Tripos. For Heraclitus being posterior to Pythagoras, mentions him in his book. Whence indisputably the first Olympiad, which was demonstrated to be four hundred and seven years later than the Trojan war, is found to be prior to the age of the above-mentioned prophets, together with those called the seven wise men.

Accordingly it is easy to perceive that Solomon, who lived in the time of Menelaus (who was during the Trojan war), was earlier by many years than the wise men among the Greeks. And how many years Moses preceded him we showed, in what we said above. And Alexander, surnamed Polyhistor, in his work on the Jews, has transcribed some letters of Solomon to Vaphres king of Egypt, and to the king of the Phoenicians at Tyre, and theirs to Solomon; in which it is shown that Vaphres sent eighty thousand Egyptian men to him for the building of the temple, and the other as many, along with a Tyrian artificer, the son of a Jewish mother, of the tribe of Dan, as is there written, of the name of Hyperon. Further, Onomacritus the Athenian, who is said to have been the author of the poems ascribed to Orpheus, is ascertained to have lived in the reign of the Pisistratidae, about the fiftieth Olympiad. And Orpheus, who sailed with Hercules, was the pupil of Musaeus. Amphion precedes the Trojan war by two generations. And Demodocus and Phemius were posterior to the capture of Troy; for they were famed for playing on the lyre, the former among the Phaeacians, and the latter among the suitors. And the Orades ascribed to Musaeus are said to be the production of Onomacritus, and the Crateres of Orpheus the production of Zopyrus of Heraclea, and The Descent to Hades that of Prodicus of Samos. Ion of Chios relates in the Triagmi, that Pythagoras ascribed certain works [of his own] to Orpheus. Epigenes, in his book respecting The Poetry attributed to Orpheus, says that The Descent to Hades and the Sacred Discourse were the production of Cecrops the Pythagorean; and the Peplus and the Physics of Brontinus. also make Terpander out ancient. Hellanicus, Some accordingly, relates that he lived in the time of Midas: but Phanias, who places Lesches the Lesbian before Terpander, makes Terpander younger than Archilochus, and relates that Lesches contended with Arctinus, and gained the victory. Xanthus the Lydian says that he lived about the eighteenth Olympiad; as also Dionysius says that Thasus was built about the fifteenth Olympiad: so that it is clear that Archilochus was already known after the twentieth Olympiad. He accordingly relates the destruction of Magnetes as having recently taken place. Simonides is assigned to the time of Archilochus. Callinns is not much older; for Archilochus refers to Magnetes as destroyed, while the latter refers to it as flourishing. Eumelus of Corinth being older, is said to have met Archias, who founded Syracuse.

We were induced to mention these things, because the poets of the epic cycle are placed amongst those of most remote antiquity. Already, too, among the Greeks, many diviners are said to have made their appearance, as the Bacides, one a Boeotian, the other an Arcadian, who uttered many predictions to many. By the counsel of Amphiletus the Athenian, who showed the time for the onset, Pisistratus, too, strengthened his government. For we may pass over in silence Cometes of Crete, Cinyras of Cyprus, Admetus the Thessalian, Aristaeas the Cyrenian, Amphiaraus the Athenian, Timoxeus the Corcyraean, Demaenetus the Phocian, Epigenes the Thespian, Nicias the Carystian, Aristo the Thessalian, Dionysius the Carthaginian, Cleophon the Corinthian, Hippo the daughter of Chiro, and Boeo, and Manto, and the host of Sibyls, the Samian, the Colophonian, the Cumaean, the Erythraean, the Pythian, the Taraxandrian, the Macetian, the Thessalian, and the Thesprotian. And Calchas again, and Mopsus, who lived during the Trojan war. Mopsus, however, was older, having sailed along with the Argonants. And it is said that Battus the Cyrenian composed what is called the Divination of Mop-sus. Dorotheus in the first Pandect relates that Mopsus was the disciple of Alcyon and Corone. And Pythagoras the Great always applied his mind to prognostication, and Abaris the Hyperborean, and Aristaeas the Proconnesian, and Epimenides the Cretan, who came to Sparta, and Zoroaster the Mede, and Empedocles of Agrigentum, and Phormion the Lacedaemonian: Polvaratus, too, of Thasus, and Empedotimus of Syracuse; and in addition to these, Socrates the Athenian in particular.

"For," he says in the Theages, "I am attended by a supernatural intimation, which has been assigned me from a child by divine appointment. This is a voice which, when it comes, prevents What I am about to do, but exhorts never."

And Execestus, the tyrant of the Phocians, wore two enchanted rings, and by the sound which they uttered one against the other determined the proper times for actions. But he died, nevertheless, treacherously murdered, although warned beforehand by the sound, as Aristotle says in the Polity of the Phocians.

Of those, too, who at one time lived as men among the Egyptians, but were constituted gods by human opinion, were Hermes the Theban, and Asclepius of Memphis; Tireseus and Manto, again, at Thebes, as Euripides says. Helenus, too, and Laocoon, and OEnone, and Crenus in Ilium. For Crenus, one of the Heraclidae, is said to have been a noted prophet. Another was Jamus in Elis, from whom came the Jamidae; and Polyidus at Argos and Megara, who is mentioned by the tragedy. Why enumerate Telemus, who, being a prophet of the Cyclops, predicted to Polyphemus the events of Ulysses' wandering; or Onomacritus at Athens; or Amphiaraus, who campaigned with the seven at Thebes, and is reported to be a generation older than the capture of Troy; or Theoclymenus in Cephalonia, or Telmisus in Caria, or Galeus in Sicily?

There are others, too, besides these: Idmon, who was with the Argonauts, Phemonoe of Delphi, Mopsus the son of Apollo and Manto in Pamphylia, and Amphilochus the son of Amphiaraus in Cilicia, Alcmaeon among the Acarnanians, Anias in Delos, Aristander of Telmessus, who was along with Alexander. Philochorus also relates in the first book of the work, On Divination, that Orpheus was a seer. And Theopompus, and Ephorus, and Timaeus, write of a seer called Orthagoras; as the Samian Pythocles in the fourth book of The Italics writes of Caius Julius Nepos.

But some of these "thieves and robbers," as the Scripture says, predicted for the most part from observation and probabilities, as physicians and soothsayers judge from natural signs; and others were excited by demons, or were disturbed by waters, and fumigations, and air of a peculiar kind. But among the Hebrews the prophets were moved by the power and inspiration of God. Before the law, Adam spoke prophetically in respect to the woman, and the naming of the creatures; Noah preached repentance; Abraham, Isaac, and Jacob gave many clear utterances respecting future and present things. Contemporaneous with the law, Moses and Aaron; and after these prophesied Jesus the son of Nave, Samuel, Gad, Nathan, Achias, Samaeas, Jehu, Elias, Michaeas, Abdiu, Elisaeus, Abbadonai, Amos, Esaias, Osee, Jonas, Joel, Jeremias, Sophonias the son of Buzi, Ezekiel, Urias, Ambacum, Naum, Daniel, Misael, who wrote the syllogisms, Aggai, Zacharias, and the angel among the twelve. These are, in all, five-and-thirty prophets. And of women (for these too prophesied), Sara, and Rebecca, and Mariam, and Debbora, and Olda, i.e., Huldah,

Then within the same period John prophesied till the baptism of salvation; and after the birth of Christ, Anna and Simeon. For Zacaharias, John's father, is said in the Gospels to have prophesied before his son. Let us then draw up the chronology of the Greeks from Moses.

From the birth of Moses to the exodus of the Jews from Egypt, eighty years j and the period down to his death, other forty years. The exodus took place in the time of Inachus, before the wandering of Sothis, Moses having gone forth from Egypt three hundred and forty-five years before. From the rule of Moses, and from Inachus to the flood of Deucalion, I mean the second inundation, and to the conflagration of Phaethon, which events happened in the time of Crotopus, forty generations are enumerated (three generations being reckoned for a century). From the flood to the conflagration of Ida, and the discovery of iron, and the Idaean Dactyls, are seventy-three years, according to Thrasyllus; and from the conflagration of Ida to the rape of Ganymede, sixty-five years. From this to the expedition of Perseus, when Glaucus established the Isthmian games in honour of Melicerta, fifteen years; and from the expedition of Perseus to the building of Troy, thirty-four years. From this to the voyage of the Argo, sixty-four years. From this to Theseus and the Minotaur, thirty-two years; then to the seven at Thebes, ten years. And to the Olympic contest, which Hercules instituted in honour of Pelops, three years; and to the expedition of the Amazons against Athens, and the rape of Helen by Theseus, nine years. From this to the deification of Hercules, eleven years; then to the rape of Helen by Alexander, four years. From the taking of Troy to the descent of Æneas and the founding of Lavinium ten years; and to the government of Ascanius, eight years; and to the descent of the Heraclidae, sixty-one years; and to the Olympiad of Iphitus, three hundred and thirty-eight years. Eratosthenes thus sets down the dates: "From the capture of Troy to the descent of the Heraclidae, eighty years. From this to the founding of Ionia, sixty years; and the period following to the protectorate of Lycurgus, a hundred and fifty-nine years; and to the first year of the first Olympiad, a hundred and eight years. From which Olympiad to the invasion of Xerxes, two hundred and ninety-seven years; from which to the beginning of the Peloponnesian war, forty-eight years; and to its close, and the defeat of the Athenians, twenty-seven years; and to the battle at Leuctra, thirty-four years; after which to the death of Philip, thirty-five years. And after this to the decease of Alexander, twelve years.'

Again, from the first Olympiad, some say, to the building of Rome, are comprehended twenty-four years; and after this to the expulsion of the kings,' when consuls were created, about two hundred and forty-three years. And from the taking of Babylon to the death of Alexander, a hundred and eighty-six years. From this to the victory of Augustus, when Antony killed himself at Alexandria, two hundred and ninety-four years, when Augustus was made consul for the fourth time. And from this time to the games which Domitian instituted at Rome, are a hundred and fourteen years; and from the first games to the death of Commodus, a hundred and elven years.

There are some that from Cecrops to Alexander of Macedon reckon a thousand eight hundred and twenty-eight years; and from Demophon, a thousand two hundred and fifty; and from the taking of Troy to the expedition of the Heraclidae, a hundred and twenty or a hundred and eighty years. From this to the archonship of Evaenetus at Athens, in whose time Alexander is said to have marched into Asia, according to Phanias, are seven hundred and fifty years; according to Ephorus, seven hundred and thirty-five; according to Timaeus and Clitarchus, eight hundred and twenty; according to Eratosthenes, seven hundred and seventy-four. As also Duris, from the taking of Troy to the march of Alexander into Asia, a thousand years; and from that to the archonship of Hegesias, in whose time Alexander died eleven years. From this date to the reign of Germanicus Claudius Caesar, three hundred and sixty-five years. From which time the years summed up to the death of Commodus are manifest.

After the Grecian period, and in accordance with the dates, as computed by the barbarians, very large intervals are to be assigned.

From Adam to the deluge are comprised two thousand one hundred and forty-eight years, four days. From Shem to Abraham, a thousand two hundred and fifty years. From Isaac to the division of the land, six hundred and sixteen years. Then from the judges to Samuel, four hundred and sixty-three years, seven months. And after the judges there were five hundred and seventy-two years, six months, ten days of kings.

After which periods, there were two hundred and thirty-five years of the Persian monarchy. Then of the Macedonian, till the death of Antony, three hundred and twelve years and eighteen days. After which time, the empire of the Romans, till the death of Commodus, lasted for two hundred and twenty-two years.

Then, from the seventy years' captivity, and the restoration of the people into their own land to the captivity in the time of Vespasian, are comprised four hundred and ten years: Finally, from Vespasian to the death of Commodus, there are ascertained to be one hundred and twenty-one years, six months, and twenty-four days.

Demetrius, in his book, On the Kings in Judaea, says that the tribes of Juda, Benjamin, and Levi were not taken captive by Sennacherim; but that there were from this captivity to the last, which Nabuchodonosor made out of Jerusalem, a hundred and twenty-eight years and six months; and from the time that the ten tribes were carried captive from Samaria till Ptolemy the Fourth, were five hundred and seventy-three years, nine months; and from the time that the captivity from Jerusalem took place, three hundred and thirty-eight years and three months.

Philo himself set down the kings differently from Demetrius. Besides, Eupolemus, in a similar work, says that all the years from Adam to the fifth year of Ptolemy Demetrius, who reigned twelve years in Egypt, when added, amount to five thousand a hundred and forty-nine; and from the time that Moses brought out the Jews from Egypt to the abovementioned date, there are, in all, two thousand five hundred and eighty years. And from this time till the consulship in Rome of Caius Domitian and Casian, a hundred and twenty years are computed.

Euphorus and many other historians say that there are seventy-five nations and tongues, in consequence of hearing the statement made by Moses: "All the souls that sprang from Jacob, which went down into Egypt, were seventy-five." According to the true reckoning, there appear to be seventytwo generic dialects, as our Scriptures hand down. The rest of the vulgar tongues are formed by the blending of two, or three, or more dialects.

A dialect is a mode of speech which exhibits a character peculiar to a locality, or a mode of speech which exhibits a character peculiar or common to a race. The Greeks say, that among them are five dialects – the Attic, Ionic, Doric, Aeolic, and the fifth the Common; and that the languages of the barbarians, which are innumerable, are not called dialects, but tongues.

Plato attributes a dialect also to the gods, forming this conjecture mainly from dreams and oracles, and especially from demoniacs, who do not speak their own language or dialect, but that of the demons who have taken possession of them. He thinks also that the irrational creatures have dialects, which those that belong to the same genus understand. Accordingly, when an elephant falls into the mud and bellows out any other one that is at hand, on seeing what has happened, shortly turns, and brings with him a herd of elephants, and saves the one that has fallen in. It is said also in Libya, that a scorpion, if it does not succeed in stinging a man, goes away and returns with several more; and that, hanging on one to the other like a chain they make in this way the attempt to succeed in their cunning design.

The irrational creatures do not make use of an obscure intimation, or hint their meaning by assuming a particular attitude, but, as I think, by a dialect of their own. And some others say, that if a lish which has been taken escape by breaking the line, no fish of the same kind will be caught in the same place that day. But the first and generic barbarous dialects have terms by nature, since also men confess that prayers uttered in a barbariant tongue are more powerful. And Plato, in the Cratylus, when wishing to interpret pyr (fire), says that it is a barbaric term. He testifies, accordingly, that the Phrygians use this term with a slight deviation.

And nothing, in my opinion, after these details, need stand in the way of stating the periods of the Roman emperors, in order to the demonstration of the Saviour's birth. Augustus, forty-three years; Tiberius, twenty-two years; Caius, four years; Claudius, fourteen years; Nero, fourteen years; Galba, one year; Vespasian, ten years; Titus, three years; Domitian, fiften years; Nerva, one year; Trajan, nineteen years; Adrian, twenty-one years; Antoninus, twenty-one years; Iikewise again, Antoninus and Commodus, thirty-two. In all, from Augustus to Commodus, are two hundred and twenty-two years; and from Adam to the death of Commodus, five thousand seven hundred and eighty-four years, two months, twelve days.

Some set down the dates of the Roman emperors thus: Caius Julius Caesar, three years, four months, five days; after him Augustus reigned forty-six years, four months, one day. Then Tiberius, twenty-six years, six months, nineteen days. He was succeeded by Caius Caesar, who reigned three years, ten months, eight days; and be by Claudius for thirteen years, eight months, twenty-eight days. Nero reigned thirteen years, eight months, twenty-eight days; Galba, seven months and six days; Otho, five months, one day; Vitellius, seven months, one day; Vespasian, eleven years, eleven months, twenty-two days; Titus, two years, two months; Domitian, fifteen years, eight months, five days; Nerva, one year, four months, ten days; Trajan, nineteen years, seven months, ten days; Adrian, twenty years, ten months, twenty-eight days. Antoninus, twenty-two years, three months, and seven days; Marcus Aurelius Antoninus, nineteen years, eleven days; Commodus, twelve years, nine months, fourteen days.

From Julius Caesar, therefore, to the death of Commodus, are two hundred and thirty-six years, six months. And the whole from Romulus, who founded Rome, till the death of Commodus, amounts to nine hundred and fifty-three years, six months. And our Lord was born in the twenty-eighth year, when first the census was ordered to be taken in the reign of Augustus. And to prove that this is true, it is written in the Gospel by Luke as follows: "And in the fifteenth year, in the reign of Tiberius Caesar, the word of the Lord came to John. the son of Zacharias." And again in the same book: "And Jesus was coming to His baptism, being about thirty years old," and so on. And that it was necessary for Him to preach only a year, this also is written: "He hath sent Me to proclaim the acceptable year of the Lord." This both the prophet spake, and the Gospel. Accordingly, in fifteen years of Tiberius and fifteen years of Augustus: so were completed the thirty years till the time He suffered. And from the time that He suffered till the destruction of Jerusalem are forty-two years and three months: and from the destruction of Jerusalem to the death of Commodus, a hundred and twenty-eight years, ten months, and three days. From the birth of Christ, therefore, to the death of Commodus are, in all, a hundred and ninety-four years, one month, thirteen days. And there are those who have determined not only the year of our Lord's birth, but also the day; and they say that it took place in the twenty-eighth year of Augustus, and in the twenty-fifth day of Pachon. And the followers of Basilides hold the day of his baptism as a festival, spending the night before in readings.

And they say that it was the fifteenth year of Tiberius Caesar, the fifteenth day of the month Tubi; and some that it was the eleventh of the same month, And treating of His passion, with very great accuracy, some say that it took place in the sixteenth year of Tiberius, on the twenty-fifth of Phamenoth; and others the twenty-fifth of Pharmuthi and others say that on the nineteenth of Pharmuthi the Saviour suffered. Further, others say that He was born on the twentyfourth or twenty-fifth of Pharmuthi.

We have still to add to our chronology the following, -- I mean the days which Daniel indicates from the desolation of Jerusalem, the seven years and seven months of the reign of Vespasian. For the two years are added to the seventeen months and eighteen days of Otho, and Galba, and Vitellius; and the result is three years and six months, which is "the half of the week," as Daniel the prophet said. For he said that there were two thousand three hundred days from the time that the abomination of Nero stood in the holy city, till its destruction. For thus the declaration, which is subjoined, shows: "How long shall be the vision, the sacrifice taken away, the abomination of desolation, which is given, and the power and the holy place shall be trodden undre foot? And he said to hund, Till the evening and morning, two thousand three hundred days, and the holy place shall be taken away."

These two thousand three hundred days, then, make six years four months, during the half of which Nero held sway, and it was half a week; and for a half, Vespasian with Otho, Galba, and Vitellius reigned. And on this account Daniel says, "Blessed is he that cometh to the thousand three hundred and thirty-five days." For up to these days was war, and after them it ceased. And this number is demonstrated from a subsequent chapter, which is as follows: "And from the time of the change of continuation, and of the giving of the abomination of desolation, there shall be a thousand two hundred and ninety days. Blessed is he that waiteth, and cometh to the thousand three hundred and thirty-five days."

Flavius Josephus the Jew, who composed the history of the Jews, computing the periods, says that from Moses to David were five hundred and eighty-five years; from David to the second year of Vespasian, a thousand one hundred and seventy-nine; then from that to the tenth year of Antoninus, seventy-seven. So that from Moses to the tenth year of Antoninus there are, in all, two thousand one hundred and thirty-three years.

Of others, counting from Inachus and Moses to the death of Commodus, some say there were three thousand one hundred and forty-two years; and others, two thousand eight hundred and thirty-one years.

And in the Gospel according to Matthew, the genealogy which begins with Abraham is continued down to Mary the mother of the Lord. "For," it is said, "from Abraham to David are fourteen generations; and from David to the carrying away into Babylon are fourteen generations; and from the carrying away into Babylon till Christ are likewise other fourteen generations," -- three mystic intervals completed in six weeks.

CHAPTER 22 -- ON THE GREEK TRANSLATION OF THE OLD TESTAMENT.

So much for the details respecting dates, as stated variously by many, and as set down by us.

It is said that the Scriptures both of the law and of the prophets were translated from the dialect of the Hebrews into the Greek language in the reign of Ptolemy the son of Lagos, or, according to others, of Ptolemy surnamed Philadelphus; Demetrius Phalereus bringing to this task the greatest earnestness, and employing painstaking accuracy on the materials for the translation. For the Macedonians being still in possession of Asia, and the king being ambitious of adorning the library he had at Alexandria with all writings, desired the people of Jerusalem to translate the prophecies they possessed into the Greek dialect. And they being the subjects of the Macedonians, selected from those of highest character among them seventy elders, versed in the Scriptures, and skilled in the Greek dialect, and sent them to him with the divine books. And each having severally translated each prophetic book, and all the translations being compared together, they agreed both in meaning and expression. For it was the counsel of God carried out for the benefit of Grecian ears. It was not alien to the inspiration of God, who gave the prophecy, also to produce the translation, and make it as it were Greek prophecy. Since the Scriptures having perished in the captivity of Nabuchodonosor. Esdras the Levite, the priest, in the time of Artaxerxes king of the Persians, having become inspired in the exercise of prophecy restored again the whole of the ancient Scriptures. And Aristobulus, in his first book addressed to Philometor, writes in these words: "And Plato followed the laws given to us, and had manifestly studied all that is said in them." And before Demetrius there had been translated by another, previous to the dominion of Alexander and of the Persians, the account of the departure of our countrymen the Hebrews from Egypt, and the fame of all that happened to them, and their taking possession of the land and the account of the whole code of laws; so that it is perfectly clear that the above-mentioned philosopher derived a great deal from this source, for he was very learned, as also Pythagoras, who transferred many things from our books to his own system of doctrines. And Numenius, the Pythagorean philosopher, expressly writes: "For what is Plato, but Moses speak ing in Attic Greek?" This Moses was a theologian and prophet, and as some say, an interpreter of sacred laws. His family, his deeds, and life, are related by the Scriptures themselves, which are worthy of all credit; but have nevertheless to be stated by us also as well as we can.

CHAPTER 23 -- THE AGE, BIRTH, AND LIFE OF MOSES.

Moses, originally of a Chaldean family, was born in Egypt, his ancestors having migrated from Babylon into Egypt on account of a protracted famine. Born in the seventh generation and having received a royal education, the following are the circumstances of his history. The Hebrews having increased in Egypt to a great multitude, and the king of the country being afraid of insurrection in consequence of their numbers, he ordered all the female children born to the Hebrews to be reared (woman being unfit for war), but the male to be destroyed, being suspicious of stalwart youth. But the child being goodly, his parents nursed him secretly three months, natural affection being too strong for the monarch's cruelty. But at last, dreading lest they should be destroyed along with the child, they made a basket of the papyrus that grew there, put the child in it, and laid it on the banks of the marshy river. The child's sister stood at a distance, and watched what would happen. In this emergency, the king's daughter, who for a long time had not been pregnant, and who longed for a child, came that day to the river to bathe and wash herself; and hearing the child cry, she ordered it to be brought to her; and touched with pity, sought a nurse. At

that moment the child's sister ran up, and said that, if she wished, she could procure for her as nurse one of the Hebrew women who had recently had a child. And on her consenting and desiring her to do so, she brought the child's mother to be nurse for a stipulated fee, as if she had been some other person. Thereupon the queen gave the babe the name of Moses, with etymological propriety, from his being drawn out of "the water," -- for the Egyptians call water "mou," -- in which he had been exposed to die. For they call Moses one who "who breathed [on being taken] from the water." It is clear that previously the parents gave a name to the child on his circumcision; and he was called Joachim. And he had a third name in heaven, after his ascension, as the mystics say -Melchi. Having reached the proper age, he was taught arithmetic, geometry, poetry, harmony, and besides, medicine and music, by those that excelled in these arts among the Egyptians; and besides, the philosophy which is conveyed by symbols, which they point out in the hieroglyphical inscriptions. The rest of the usual course of instruction, Greeks taught him in Egypt as a royal child, as Philo says in his life of Moses. He learned, besides, the literature of the Egyptians, and the knowledge of the heavenly bodies from the Chaldeans and the Egyptians; whence in the Acts he is said "to have been instructed in all the wisdom of the Egyptians." And Eupolemus, in his book On the Kings in Judea, says that "Moses was the first wise man, and the first that imparted grammar to the Jews, that the Phoenicians received it from the Jews, and the Greeks from the Phoenicians." And betaking himself to their philosophy, he increased his wisdom, being ardently attached to the training received from his kindred and ancestors, till he struck and slew the Egyptian who wrongfully attacked the Hebrew. And the mystics say that he slew the Egyptian by a word only; as, certainly, Peter in the Acts is related to have slain by speech those who appropriated part of the price of the field, and lied. And so Artapanus, in his work On the Jews, relates "that Moses, being shut up in custody by Chenephres, king of the Egyptians, on account of the people demanding to be let go from Egypt, the prison being opened by night, by the interposition of God, went forth, and reaching the palace, stood before the king as he slept, and aroused him; and that the latter, struck with what had taken place, bade Moses tell him the name of the God who had sent him; and that he, bending forward, told him in his ear; and that the king on hearing it fell speechless, but being supported by Moses, revived again." And respecting the education of Moses, we shall find a harmonious account in Ezekiel, the composer of Jewish tragedies in the drama entitled The Exodus. He thus writes in the person of Moses: "For, seeing our race abundantly increase, His treacherous snares King Pharaoh 'gainst us laid, And cruelly in brick-kilns some of us, And some, in toilsome works of building, plagued.

And towns and towers by toil of ill-starred men He raised. Then to the Hebrew race proclaimed, That each male child should in deep-flowing Nile Be drowned. My mother bore and hid me then Three months (so afterwards she told). Then took, And me adorned with fair array, and placed On the deep sedgy marsh by Nilus bank, While Miriam, my sister, watched afar.

Then, with her maids, the daughter of the king, To bathe her beauty in the cleansing stream, Came near, straight saw, and took and raised me up; And knew me for a Hebrew. Miriam My sister to the princess ran, and said, 'Is it thy pleasure, that I haste and find A nurse for thee to rear this child Among the Hebrew women?' The princess Gave assent. The maiden to her mother sped, And told, who quick appeared. My own Dear mother took me in her arms. Then said The daughter of the king: 'Nurse me this child, And I will give thee wages.' And my name Moses she called, because she drew and saved Me from the waters on the river's bank.

And when the days of childhood had flown by, My mother brought me to the palace where The princess dwelt, after disclosing all About my ancestry, and God's great gifts.

In boyhood's years I royal nurture had, And in all princely exercise was trained, As if the princess's very son. But when The circling days had run their course, I left the royal palace."

Then, after relating the combat between the Hebrew and the Egyptian, and the burying of the Egyptian in the sand, he says of the other contest: "Why strike one feebler than thyself? And he rejoined: Who made the judge o'er us, Or ruler? Wilt thou slay me, as thou didst Him yesterday? And I m terror said. How is this known?"

Then he fled from Egypt and fed sheep, being thus trained beforehand for pastoral rule. For the shepherd's life is a preparation for sovereignty in the case of him who is destined to rule over the peaceful flock of men, as the chase for those who are by nature warlike. Thence God brought him to lead the Hebrews. Then the Egyptians, oft admonished, continued unwise; and the Hebrews were spectators of the calamities that others suffered, learning in safety the power of God. And when the Egyptians gave no heed to the effects of that power, through their foolish infatuation disbelieving, then, as is said, "the children knew" what was done; and the Hebrews afterwards going forth, departed carrying much spoil from the Egyptians, not for avarice, as the cavillers say, for God did not persuade them to covet what belonged to others. But, in the first place, they took wages for the services they had rendered the Egyptians all the time; and then in a way recompensed the Egyptians, by afflicting them in requital as avaricious, by the abstraction of the booty, as they had done the Hebrews by enslaving them. Whether, then, as may be alleged is done in war, they thought it proper, in the exercise of the rights of conquerors, to take away the property of their enemies, as those who have gained the day do from those who are worsted (and there was just cause of hostilities. The Hebrews came as suppliants to the Egyptians on account of famine; and they, reducing their guests to slavery, compelled them to serve them after the manner of captives, giving them no recompense); or as in peace, took the spoil as wages against the will of those who for a long period had given them no recompense, but rather had robbed them, [it is all one.]

CHAPTER 24 -- HOW MOSES DISCHARGED THE PART OF A MILITARY LEADER.

Our Moses then is a prophet, a legislator, skilled in military tactics and strategy, a politician, a philosopher. And in what sense he was a prophet, shall be by and by told, when we come to treat of prophecy. Tactics belong to military command, and the ability to command an army is among the attributes of kingly rule. Legislation, again, is also one of the functions of the kingly office, as also judicial authority.

Of the kingly office one kind is divine, -- that which is according to God and His holy Son, by whom both the good things which are of the earth, and external and perfect felicity too, are supplied. "For," it is said, "seek what is great, and the little things shall be added." And there is a second kind of royalty, inferior to that administration which is purely rational and divine, which brings to the task of government merely the high mettle of the soul; after which fashion Hercules ruled the Argives, and Alexander the Macedonians. The third kind is what aims after one thing -- merely to conquer and overturn; but to turn conquest either to a good or a bad purpose, belongs not to such rule. Such was the aim of the Persians in their campaign against Greece. For, on the one hand, fondness for strife is solely the result of passion, and acquires power solely for the sake of domination; while, on the other, the love of good is characteristic of a soul which uses its high spirit for noble ends. The fourth, the worst of all, is the sovereignty which acts according to the promptings of the passions, as that of Sardanapalus, and those who propose to themselves as their end the gratification of the passions to the utmost. But the instrument of regal sway -- the instrument at once of that which overcomes by virtue, and that which does so by force -- is the power of managing (or tact). And it, varies according to the nature and the material. In the case of arms and of fighting animals the ordering power is the soul and mind, by means animate and inanimate; and in the case of the passions of the soul, which we master by virtue, reason is the ordering power, by affixing the seal of continence and selfrestraint, along with holiness, and sound knowledge with truth, making the result of the whole to terminate in piety towards God. For it is wisdom which regulates in the case of those who so practise virtue; and divine things are ordered by wisdom, and human affairs by politics -- all things by the kingly faculty. He is a king, then, who governs according to the laws, and possesses the skill to sway willing subjects. Such is the Lord, who receives all who believe on Him and by Him. For the Father has delivered and subjected all to Christ our King," that at the name of Jesus every knee may bow, of things in heaven, and things in earth, and things under the earth, and every tongue confess that Jesus Christ is Lord, to the glory of God the Father.'

Now, generalship involves three ideas: caution, enterprise, and the union of the two. And each of these consists of three things, acting as they do either by word, or by deeds, or by both together. And all this can be accomplished either by persuasion, or by compulsion, or by inflicting harm in the way of taking vengeance on those who ought to be punished; and this either by doing what is right, or by telling what is untrue, or by telling what is true, or by adopting any of these means conjointly at the same time.

Now, the Greeks had the advantage of receiving from Moses all these, and the knowledge of how to make use of each of them. And, for the sake of example, I shall cite one or two instances of leadership. Moses, on leading the people forth, suspecting that the Egyptians would pursue, left the short and direct route, and turned to the desert, and marched mostly by night. For it was another kind of arrangement by which the Hebrews were trained in the great wilderness, and for a protracted time, to belief in the existence of one God alone, being inured by the wise discipline of endurance to which they were subjected. The strategy of Moses, therefore, shows the necessity of discerning what will be of service before the approach of dangers, and so to encounter them. It turned out precisely as he suspected, for the Egyptians pursued with horses and chariots, but were quickly destroyed by the sea breaking on them and overwhelming them with their horses and chariots, so that not a remnant of them was left. Afterwards the pillar of fire, which accompanied them (for it

went before them as a guide), conducted the Hebrews by night through an untrodden region, training and bracing them, by toils and hardships, to manliness and endurance, that after their experience of what appeared formidable difficulties, the benefits of the land, to which from the trackless desert he was conducting them, might become apparent. Furthermore, he put to flight and slew the hostile occupants of the land, falling upon them from a desert and rugged line of march (such was the excellence of his generalship). For the taking of the land of those hostile tribes was a work of skill and strategy.

Perceiving this, Miltiades, the Athenian general, who conquered the Persians in battle at Marathon, imitated it in the following fashion. Marching over a trackless desert, he led on the Athenians by night, and eluded the barbarians that were set to watch him. For Hippias, who had deserted from the Athenians, conducted the barbarians into Attica, and seized and held the points of vantage, in consequence of having a knowledge of the ground. The task was then to elude Hippias. Whence rightly Miltiades, traversing the desert and attacking by night the Persians commanded by Dates, led his soldiers to victory.

But further, when Thrasybulus was bringing back the exiles from Phyla, and wished to elude observation, a pillar became his guide as he marched over a trackless region. To Thrasybulus by night, the sky being moonless and stormy, a fire appeared leading the way, which, having conducted them safely, left them near Munychia, where is now the altar of the light-bringer (Phosphorus).

From such an instance, therefore, let our accounts become credible to the Greeks, namely, that it was possible for the omnipotent God to make the pillar of fire, which was their guide on their march, go before the Hebrews by night. It is said also in a certain oracle, "A pillar to the Thebans is joyinspiring Bacchus," from the history of the Hebrews. Also Euripides says, in Antiope,- "In the chambers within, the herdsman, With chaplet of ivy, pillar of the Evoean god."

The pillar indicates that God cannot be portrayed. The pillar of light, too, in addition to its pointing out that God cannot be represented, shows also the stability and the permanent duration of the Deity, and His unchangeable and inexpressible light. Before, then, the invention of the forms of images, the ancients erected pillars, and reverenced them as statues of the Deity.

Accordingly, he who composed the Pharonis writes,-"Callithoe, key-bearer of the Olympian queen: Argive Hera, who first with fillets and with fringes The queen's tall column all around adorned."

Further, the author of Europia relates that the statue of Apollo at Delphi was a pillar in these words: "That to the god first-fruits and tithes we may On sacred pillars and on lofty column hang."

Apollo, interpreted mystically by "privation of many," means the one God. Well, then, that fire like a pillar, and the fire in the desert, is the symbol of the holy light which passed through from earth and returned again to heaven, by the wood [of the cross], by which also the gift of intellectual vision was bestowed on us.

CHAPTER 25 -- PLATO AN IMITATOR OF MOSES IN FRAMING LAWS.

Plato the philosopher, aided in legislation by the books of Moses, censured the polity of Minos, and that of Lycurgus, as having bravery alone as their aim; while he praised as more seemly the polity which expresses some one thing, and directs according to one precept. For he says that it becomes us to philosophize with strength, and dignity, and wisdom, -holding unalterably the same opinions about the same things, with reference to the dignity of heaven. Accordingly, therefore, he interprets what is in the law, enjoining us to look to one God and to do justly. Of politics, he says there are two kinds, -- the department of law, and that of politics, strictly so called.

And he refers to the Creator, as the Statesman (o politikos) by way of eminence, in his book of this name (o politikos); and those who lead an active and just life, combined with contemplation, he calls statesmen (politiko). That department of politics which is called "Law," he divides into administrative magnanimity and private good order, which he calls orderliness; and harmony, and sobriety, which are seen when rulers suit their subjects, and subjects are obedient to their rulers; a result which the system of Moses sedulously aims at effecting. Further, that the department of law is founded on generation, that of politics on friendship and consent, Plato, with the aid he received, affirms; and so, coupled with the laws the philosopher in the Epinomis, who knew the course of all generation, which takes place by the instrumentality of the planets; and the other philosopher, Timaeus, who was an astronomer and student of the motions of the stars, and of their sympathy and association with one another, he consequently joined to the "polity" (or "republic"). Then, in my opinion, the end both of the statesman, and of him who lives according to the law, is contemplation. It is necessary, therefore, that public affairs should be rightly managed. But to philosophize is best. For

he who is wise will live concentrating all his energies on knowledge, directing his life by good deeds, despising the opposite, and following the pursuits which contribute to truth. And the law is not what is decided by law (for what is seen is not vision), nor every opinion (not certainly what is evil). But law is the opinion which is good, and what is good is that which is true, and what is true is that which finds "true being," and attains to it. "He who is," says Moses, "sent me." In accordance with which, namely, good opinion, some have called law, right reason, which enjoins what is to be done and forbids what is not to be done.

CHAPTER 26 -- MOSES RIGHTLY CALLED A DIVINE LEGISLATOR, AND, THOUGH INFERIOR TO CHRIST, FAR SUPERIOR TO THE GREAT LEGISLATORS OF THE GREEKS, MINOS AND LYCURGUS.

Whence the law was rightly said to have been given by Moses, being a rule of fight and wrong; and we may call it with accuracy the divine ordinance (qesmos, inasmuch as it was given by God through Moses. It accordingly conducts to the divine. Paul says: "The law was instituted because of transgressions, till the seed should come, to whom the promise was made." Then, as if in explanation of his meaning, he adds: "But before faith came, we were kept under the law, shut up, manifestly through fear, in consequence of sins, "unto the faith which should afterwards be revealed; so that the law was a schoolmaster to bring us to Christ, that we should be justified by faith." The true legislator is he who assigns to each department of the soul what is suitable to it and to its operations. Now Moses, to speak comprehensively, was a living law, governed by the benign Word. Accordingly, he furnished a good polity, which is the right discipline of men in social life. He also handled the administration of justice. which is that branch of knowledge which deals with the correction of transgressors in the interests of justice. Coordinate with it is the faculty of dealing with punishments, which is a knowledge of the due measure to be observed in punishments. And punishment, in virtue of its being so, is the correction of the soul. In a word, the whole system of Moses is suited for the training of such as are capable of becoming good and noble men, and for hunting out men like them; and this is the art of command. And that wisdom, which is capable of treating rightly those who have been caught by the Word, is legislative wisdom. For it is the property of this wisdom, being most kingly, to possess and use, It is the wise man, therefore, alone whom the philosophers proclaim king, legislator, general, just, holy, God-beloved. And if we discover these qualities in Moses, as shown from the Scriptures themselves, we may, with the most assured persuasion, pronounce Moses to be truly wise. As then we say that it belongs to the shepherd's art to care for the sheep; for so "the good shepherd giveth his life for the sheep;" so also we shall say that legislation, inasmuch as it presides over and cares for the flock of men, establishes the virtue of men, by fanning into flame, as far as it can, what good there is in humanity

And if the flock figuratively spoken of as belonging to the Lord is nothing but a flock of men, then He Himself is the good Shepherd and Lawgiver of the one flock, "of the sheep who hear Him," the one who cares for them, "seeking," and finding by the law and the word, "that which was lost;" since, in truth, the law is spiritual and leads to felicity. For that which has arisen through the Holy Spirit is spiritual. And he is truly a legislator, who not only announces what is good and noble, but understands it. The law of this man who possesses knowledge is the saving precept; or rather, the law is the precept of knowledge. For the Word is "the power and the wisdom of God." Again, the expounder of the laws is the same one by whom the law was given; the first expounder of the divine commands, who unveiled the bosom of the Father, the only-begotten Son.

Then those who obey the law, since they have some knowledge of Him. cannot disbelieve or be ignorant of the truth. But those who disbelieve, and have shown a repugnance to engage in the works of the law, whoever else may, certainly confess their ignorance of the truth.

What, then, is the unbelief of the Greeks? Is it not their unvillingness to believe the truth which declares that the law was divinely given by Moses, whilst they honour Moses in their own writers? They relate that Minos received the laws from Zeus in, nine years, by frequenting the cave of Zeus; and Plato, and Aristotle, and Ephorus write that Lycurgus was trained in legislation by going constantly to Apollo at Delphi. Chamaeleo of Heraclea, in his book On Drunkenness, and Aristotle in The Polity of Locrians, mention that Zaleucus the Locrian received the laws from Athene.

But those who exalt the credit of Greek legislation as far as in them lies, by referring it to a divine source, after the model of Mosaic prophecy, are senseless in not owning the truth, and the archetype of what is related among them. CHAPTER 27 -- THE LAW, EVEN IN CORRECTING AND PUNISHING, AIMS AT THE GOOD OF MEN.

Let no one then, run down law, as if, on account of the penalty, it were not beautiful and good. For shall he who drives away bodily disease appear a benefactor; and shall not he who attempts to deliver the soul from iniquity, as much more appear a friend, as the soul is a more precious thing than the body? Besides, for the sake of bodily health we submit to incisions, and cauterizations, and medicinal draughts; and he who administers them is called saviour and healer even though amputating parts, not from grudge or ill-will towards the patient, but as the principles of the art prescribe, so that the sound parts may not perish along with them, and no one accuses the physician's art of wickedness; and shall we not similarly submit, for the soul's Sake, to either banishment, or punishment, or bonds, provided only from unrighteousness we shall attain to righteousness?

For the law, in its solicitude for those who obey, trains up to piety, and prescribes what is to be done, and restrains each one from sins, imposing penalties even on lesser sins.

But when it sees any one in such a condition as to appear incurable, posting to the last stage of wickedness, then in its solicitude for the rest, that they may not be destroyed by it (just as if amputating a part from the whole body), it condemns such an one to death, as the course most conducive to health. "Being judged by the Lord," says the apostle, "we are chastened, that we may not be condemned with the world." For the prophet had said before, "Chastening, the Lord hath chastised me, but hath not given me over unto " "For in order to teach thee His righteousness," it is death. said, "He chastised thee and tried thee, and made thee to hunger and thirst in the desert land; that all His statutes and His judgments may be known in thy heart, as I command thee this day; and that thou mayest know in thine heart, that just as if a man were chastising his son, so the Lord our God shall chastise thee

And to prove that example corrects, he says directly to the purpose: "A clever man, when he seeth the wicked punished, will himself be severely chastised, for the fear of the Lord is the source of wisdom."

But it is the highest and most perfect good, when one is able to lead back any one from the practice of evil to virtue and well-doing, which is the very function of the law. So that, when one fails into any incurable evil, -- when taken possession of, for example, by wrong or covetousness, -- it will be for his good if he is put to death. For the law is beneficent, being able to make some righteous from unrighteous, if they will only give ear to it, and by releasing others from present evils; for those who have chosen to live temperately and justly, it conducts to immortality. To know the law is characteristic of a good disposition. And again: "Wicked men do not understand the law; but they who seek the Lord shall have understanding in all that is good."

It is essential, certainly, that the providence which manages all, be both supreme and good. For it is the power of both that dispenses salvation -- the one correcting by punishment, as supreme, the other showing kindness in the exercise of beneficence, as a benefactor. It is in your power not to be a son of disobedience, but to pass from darkness to life, and lending your ear to wisdom, to be the legal slave of God, in the first instance, and then to become a faithful servant, fearing the Lord God. And if one ascend higher, he is enrolled among the sons.

But when "charity covers the multitude of sins," by the consummation of the blessed hope, then may we welcome him as one who has been enriched in love, and received into the elect adoption, which is called the beloved of God, while he chants the prayer, saying, "Let the Lord be my God." The beneficent action of the law, the apostle showed in the

The beneficent action of the law, the apostle showed in the passage relating to the Jews, writing thus: "Behold, thou art called a Jew and restest in the law, and makest thy boast in God, and knowest the will of God, and approvest the things that are more excellent, being instructed out of the law, and art confident that thou thyself art a guide of the blind, a light of them who are in darkness, an instructor of the foolish, a teacher of babes, who hast the form of knowledge and of truth in the law." For it is admitted that such is the power of the law, although those whose conduct is not according to the law, make a false pretence, as if they lived in the law.

"Blessed is the man that hath found wisdom, and the mortal who has seen understanding; for out of its mouth," manifestly Wisdom's, "proceeds righteousness, and it bears law and mercy on its tongue." For both the law and the Gospel are the energy of one Lord, who is "the power and wisdom of God;" and the terror which the law begets is merciful and in order to salvation. "Let not alms, and faith, and truth fail thee, but hang them around thy neck." In the same way as Paul, prophecy upbraids the people with not understanding the law. "Destruction and misery are in their ways, and the way of peace have they not known." "There is no fear of God before their eyes." "Professing themselves wise, they became fools." "And we know that the law is good, if a man use it lawfully." "Destring to be teachers of the law, they understand," says the apostle, "neither what they say, nor whereof they affirm." "Now the end of the commandment is charity out of a pure heart, and a good conscience, and faith unfeigned."

CHAPTER 28 -- THE FOURFOLD DIVISION OF THE MOSAIC LAW.

The Mosaic philosophy is accordingly divided into four parts, -- into the historic, and that which is specially called the legislative, which two properly belong to an ethical treatise: and the third, that which, relates to sacrifice, which belongs to physical science; and the fourth, above all, the department of theology, "vision," which Plato predicates of the truly great mysteries. And this species Aristotle calls metaphysics. Dialectics, according to Plato, is, as he says in The Statesman, a science devoted to the discovery of the explanation of things. And it is to be acquired by the wise man, not for the sake of saying or doing aught of what we find among men (as the dialecticians, who occupy themselves in sophistry, do), but to be able to say and do, as far as possible, what is pleasing to God. But the true dialectic, being philosophy mixed with truth, by examining things, and testing forces and powers, gradually ascends in relation to the most excellent essence of all, and essays to go beyond to the God of the universe, professing not the knowledge of mortal affairs, but the science of things divine and heavenly; in accordance with which follows a suitable course of practice with respect to words and deeds, even in human affairs Rightly, therefore, the Scripture, in its desire to make us such dialecticians, exhorts us: "Be ye skilful money-changers" rejecting some things, but retaining what is good. For this true dialectic is the science which analyses the objects of thought, and shows abstractly and by itself the individual substratum of existences, or the power of dividing things into genera, which descends to their most special properties, and presents each individual object to be contemplated simply such as it is.

Wherefore it alone conducts to the true wisdom, which is the divine power which deals with the knowledge of entities as entities, which grasps what is perfect, and is freed from all passion; not without the Saviour, who withdraws, by the divine word, the gloom of ignorance arising from evil training, which had overspread the eye of the soul, and bestows the best of gifts,- "That we might well know or God or man."

It is He who truly shows how we are to know ourselves. It is He who reveals the Father of the universe to whom He wills, and as far as human nature can comprehend. "For no man knoweth the Son but the Father, nor the Father but the Son, and he to whom the Son shall reveal Him." Rightly, then, the apostle says that it was by revelation that he knew the mystery: "As I wrote afore in few words, according as ye are able to understand my knowledge in the mystery of Christ.' "According as ye are able," he said, since he knew that some had received milk only, and had not yet received meat, nor even milk simply. The sense of the law is to be taken in three ways, -- either as exhibiting a symbol, or laying down a precept for right conduct, or as uttering a prophecy. But I well know that it belongs to men [of full age] to distinguish and declare these things. For the whole Scripture is not in its meaning a single Myconos, as the proverbial expression has it; but those who hunt after the connection of the divine teaching. must approach it with the utmost perfection of the logical faculty.

CHAPTER 29 -- THE GREEKS BUT CHILDREN COMPARED WITH THE HEBREWS.

Whence most beautifully the Egyptian priest in Plato said, "O Solon, Solon, you Greeks are always children, not having in your souls a single ancient opinion received through tradition from antiquity. And not one of the Greeks is an old man;" meaning by old, I suppose, those who know what belongs to the more remote antiquity, that is, our literature; and by young, those who treat of what is more recent and made the subject of study by the Greeks, -- things of yesterday and of recent date as if they were old and ancient. Wherefore he added, "and no study hoary with time;" for we, in a kind of barbarous way, deal in homely and rugged metaphor. Those, therefore, whose minds are rightly constituted approach the interpretation utterly destitute of artifice. And of the Greeks, he says that their opinions" differ but little from myths." For neither puerile fables nor stories current among children are it for listening to. And he called the myths themselves "children," as if the progeny of those, wise in their own conceits among the Greeks, who had but little insight meaning by the "hoary studies" the truth which was possessed by the barbarians, dating from the highest antiquity. To which expression he opposed the phrase "child fable,' censuring the mythical character of the attempts of the moderns, as, like children, having nothing of age in them, and affirming both in common -- their fables and their speeches -to be puerile.

Divinely, therefore, the power which spoke to Hermas by revelation said, "The visions and revelations are for those who are of double mind, who doubt in their hearts if these things are or are not."

Similarly, also, demonstrations from the resources of erudition, strengthen, confirm, and establish demonstrative reasonings, in so far as men's minds are in a wavering state like young people's. "The good commandment," then. according to the Scripture, "is a lamp, and the law is a light to the path; for instruction corrects the ways of life." "Law is monarch of all, both of mortals and of immortals," says Pindar. I understand, however, by these words, Him who enacted law. And I regard, as spoken of the God of all, the following utterance of Hesiod, though spoken by the poet at "For the Saturnian random and not with comprehension: framed for men this law: Fishes, and beasts, and winged birds may eat Each other, since no rule of right is theirs; But Right (by far the best) to men he gave."

Whether, then, it be the law which is connate and natural, or that given afterwards, which is meant, it is certainly of God; and both the law of nature and that of instruction are one. Thus also Plato, in The Statesman, says that the lawgiver is one; and in The Laws, that he who shall understand music is one; teaching by these words that the Word is one, and God is one. And Moses manifestly calls the Lord a covenant: "Behold I am my Covenant with thee," having previously told him not to seek the covenant in writing. For it is a covenant which God, the Author of all, makes. For God is called from qesis (placing), and order or arrangement. And in the Preaching of Peter you will find the Lord called Law and Word. But at this point, let our first Miscellany of gnostic notes, according to the true philosophy, come to a close.

THE STROMATA, BOOK 2

CHAPTER 1 -- INTRODUCTORY.

As Scripture has called the Greeks pilferers of the Barbarian philosophy, it will next have to be considered how this may be briefly demonstrated. For we shall not only show that they have imitated and copied the marvels recorded in our books; but we shall prove, besides, that they have plagiarized and falsified (our writings being, as we have shown, older) the chief dogmas they hold, both on faith and knowledge and science, and hope and love, and also on repentance and temperance and the fear of God, -- a whole swarm, verily, of the virtues of truth.

Whatever the explication necessary on the point in hand shall demand, shall be embraced, and especially what is occult in the barbarian philosophy, the department of symbol and enigma; which those who have subjected the teaching of the ancients to systematic philosophic study have affected, as being in the highest degree serviceable, nay, absolutely necessary to the knowledge of truth. In addition, it will in my opinion form an appropriate sequel to defend those tenets, on account of which the Greeks assail us, making use of a few Scriptures, if perchance the Jew also may listen and be able quietly to turn from what he has believed to Him on whom he has not believed. The ingenuous among the philosophers will then with propriety be taken up in a friendly exposure both of their life and of the discovery of new dogmas, not in the way of our avenging ourselves on our detractors (for that is far from being the case with those who have learned to bless those who curse, even though they needlessly discharge on us words of blasphemy), but with a view to their conversion; if by any means these adepts in wisdom may feel ashamed, being brought to their senses by barbarian demonstration: so as to be able, although late, to see clearly of what sort are the intellectual acquisitions for which they make pilgrimages over the seas. Those they have stolen are to be pointed out, that we may thereby pull down their conceit; and of those on the discovery of which through investigation they plume themselves, the refutation will be furnished. By consequence, also we must treat of what is called the curriculum of study -how far it is serviceable; and of astrology, and mathematics, and magic, and sorcery. For all the Greeks boast of these as the highest sciences. "He who reproves boldly is a peacemaker." We lave often said already that we have neither practised nor do we study the expressing ourselves in pure Greek; for this suits those who seduce the multitude from the truth. But true philosophic demonstration will contribute to the profit not of the listeners' tongues, but of their minds. And, in my opinion, he who is solicitous about truth ought not to frame his language with artfulness and care, but only to try to express his meaning as he best can. For those who are particular about words, and devote their time to them, miss the things. It is a feat fit for the gardener to pluck without injury the rose that is growing among the thorns; and for the craftsman to find out the pearl buried in the oyster's flesh. And they say that fowls have flesh of the most agreeable quality, when, through not being supplied with abundance of food, they pick their sustenance with difficulty, scraping with their feet. If any one, then, speculating on what is similar, wants to arrive at the truth [that is] in the numerous Greek plausibilities, like the real face beneath masks, he will hunt it out with much pains. For the power that appeared in the vision to Hermas said, "Whatever may be revealed to you, shall be revealed."

"Be not elated on account of thy wisdom," say the Proverbs. "In all thy ways acknowledge her, that she may direct thy ways, and that thy foot may not stumble." By these remarks he means to show that our deeds ought to be conformable to reason, and to manifest further that we ought to select and possess what is useful out of all culture. Now the wavs of wisdom are various that lead right to the way of truth. Faith is the way. "Thy foot shall not stumble" is said with reference to some who seem to oppose the one divine administration of Providence. Whence it is added, "Be not wise in thine own eyes," according to the impious ideas which revolt against the administration of God. "But fear God," who alone is powerful. Whence it follows as a consequence that we are not to oppose God. The sequel especially teaches clearly, that "the fear of God is departure from evil;" for it is said, "and depart from all evil." Such is the discipline of wisdom ("for whom the Lord loveth He chastens"), causing pain in order to produce understanding, and restoring to peace and immortality. Accordingly, the Barbarian philosophy, which we follow, is in reality perfect and true. And so it is said in the book of Wisdom: "For He hath given me the unerring knowledge of things that exist, to know the constitution of the word,' and so forth, down to "and the virtues of roots." Among all these he comprehends natural science, which treats of all the phenomena in the world of sense. And in continuation, he alludes also to intellectual objects in what he subjoins: "And what is hidden or manifest I know; for Wisdom, the artificer of all things, taught me." You have, in brief, the professed aim of our philosophy; and the learning of these branches, when pursued with right course of conduct, leads through Wisdom, the artificer of all things, to the Ruler of all, -- a Being difficult to grasp and apprehend, ever receding and withdrawing from him who pursues. But He who is far off has -- oh ineffable marvel! -- come very near. "I am a God: that draws near," says the Lord. He is in essence remote; "for how is it that what is begotten can have approached the Unbegotten?" But He is very near in virtue of that power which holds all things in its embrace. "Shall one do aught in secret, and I see him not?" For the power of God is always present, in contact with us, in the exercise of inspection, of beneficence, of instruction. Whence Moses, persuaded that God is not to be known by human wisdom, said, "Show me Thy glory;" and into the thick darkness where God's voice was, pressed to enter -- that is, into the inaccessible and invisible ideas respecting Existence. For God is not in darkness or in place, but above both space and time, and qualities of objects. Wherefore neither is He at any time in a part, either as containing or as contained, either by limitation or by section. "For what house will ye build to Me?" saith the Lord? Nay, He has not even built one for Himself, since He cannot be contained. And though heaven be called His throne, not even thus is He contained, but He rests delighted in the creation

It is clear, then, that the truth has been hidden from us; and if that has been already shown by one example, we shall establish it a little after by several more. How entirely worthy of approbation are they who are both willing to learn, and able, according to Solomon, "to know wisdom and instruction, and to perceive the words of wisdom, to receive knotty words, and to perceive true righteousness," there being another [righteousness as well], not according to the truth, taught by the Greek laws, and by the rest of the philosophers. "And to direct judgments," it is said -- not those of the bench, but he means that we must preserve sound and free of error the judicial faculty which is within us --"That I may give subtlety to the simple, to the young man sense and understanding." "For the wise man," who has been persuaded to obey the commandments, "having heard these things, will become wiser" by knowledge; and "the intelligent man will acquire rule, and will understand a parable and a dark word, the sayings and enigmas of the wise." For it is not spurious words which those inspired by God and those who are gained over by them adduce, nor is it snares in which the most of the sophists entangle the young, spending their time on nought true. But those who possess the Holy Spirit "search the deep things of God," -- that is, grasp the secret that is in the prophecies. "To impart of holy things to the dogs" is forbidden, so long as they remain beasts. For never ought those who are envious and perturbed, and still infidel in conduct, shameless in barking at investigation, to dip in the divine and clear stream of the living water. "Let not the waters of thy fountain overflow, and let thy waters spread over thine own streets." For it is not many who understand such things as they fall in with; or know them even after learning them, though they think they do, according to the worthy Heraclitus. Does not even he seem to thee to censure those who believe not? "Now my just one shall live by faith," the prophet said. And another prophet also says, "Except ye believe, neither shall ye understand." For how ever could the soul admit the transcendental contemplation of such themes, while unbelief respecting what was to be learned struggled within? But faith, which the Greeks disparage, deeming it

futile and barbarous, is a voluntary preconception the assent of piety -- " the subject of things hoped for, the evidence of things not seen," according to the divine apostle. "For hereby," pre-eminently, "the elders obtained a good report. But without faith it is impossible to please God." Others have defined faith to be a uniting assent to an unseen object, as certainly the proof of an unknown thing is an evident assent. If then it be choice, being desirous of something, the desire is in this instance intellectual. And since choice is the beginning of action, faith is discovered to be the beginning of action, being the foundation of rational choice in the case of any one who exhibits to himself the previous demonstration through faith. Voluntarily to follow what is useful, is the first principle of understanding. Unswerving choice, then, gives considerable momentum in the direction of knowledge. The exercise of faith directly becomes knowledge, reposing on a sure foundation. Knowledge, accordingly, is defined by the sons of the philosophers as a habit, which cannot be overthrown by reason. Is there any other true condition such as this, except piety, of which alone the Word is teacher? I think not

Theophrastus says that sensation is the root of faith. For from it the rudimentary principles extend to the reason that is in us, and the understanding. He who believeth then the divine Scriptures with sure judgment, receives in the voice of God, who bestowed the Scripture, a demonstration that cannot be impugned. Faith, then, is not established by demonstration. "Blessed therefore those who, not having seen, yet have believed." The Siren's songs, exhibiting a power above human, fascinated those that came near, conciliating them, almost against their will, to the reception of what was said.

CHAPTER 3 -- FAITH NOT A PRODUCT OF NATURE.

Now the followers of Basilides regard faith as natural, as they also refer it to choice, [representing it] as finding ideas by intellectual comprehension without demonstration; while the followers of Valentinus assign faith to us, the simple, but will have it that knowledge springs up in their own selves (who are saved by nature) through the advantage of a germ of superior excellence, saying that it is as far removed from faith as s the spiritual is from the animal. Further, the followers of Basilides say that faith as well as choice is proper according to every interval; and that in consequence of the supramundane selection mundane faith accompanies all nature, and that the free gift of faith is comformable to the hope of each. Faith, then, is no longer the direct result of free choice, if it is a natural advantage.

Nor will he who has not believed, not being the author [of his unbelief], meet with a due recompense; and he that has believed is not the cause [of his belief]. And the entire peculiarity and difference of belief and unbelief will not fall under either praise or censure, if we reflect rightly, since there attaches to it the antecedent natural necessity proceeding from the Almighty. And if we are pulled like inanimate things by the puppet-strings of natural powers, willingness and unwillingness, and impulse, which is the antecedent of both, are mere redundancies. And for my part, I am utterly incapable of conceiving such an animal as has its appetencies, which are moved by external causes, under the dominion of necessity. And what place is there any longer for the repentance of him who was once an unbeliever, through which comes forgiveness of sins? So that neither is baptism rational, nor the blessed seal, nor the Son, nor the Father. But God, as I think, turns out to be the distribution to men of natural powers, which has not as the foundation of salvation voluntary faith.

CHAPTER 4 -- FAITH THE FOUNDATION OF ALL KNOWLEDGE.

But we, who have heard by the Scriptures that selfdetermining choice and refusal have been given by the Lord to men, rest in the infallible criterion of faith, manifesting a willing spirit, since we have chosen life and believe God through His voice. And he who has believed the Word knows the matter to be true; for the Word is truth. But he who has disbelieved Him that speaks, has disbelieved God.

"By faith we understand that the worlds were framed by the word of God, so that what is seen was not made of things which appear," says the apostle. "By faith Abel offered to God a fuller sacrifice than Cain, by which he received testimony that he was righteous, God giving testimony to him respecting his gifts; and by it he, being dead, yet speaketh," and so forth, down to "than enjoy the pleasures of sin for a season." Faith having, therefore, justified these before the law, made them heirs of the divine promise. Why then should I review and adduce any further testimonies of faith from the history in our hands? "For the time would fail me were I to tell of Gideon, Barak, Samson, Jephtha, David, and Samuel, and the prophets," and what follows. Now, inasmuch as there are four things in which the truth resides -- Sensation, Understanding, Knowledge, Opinion, -intellectual apprehension is first in the order of nature; but in our case, and in relation to ourselves, Sensation is first, and of

Sensation and Understanding the essence of Knowledge is formed; and evidence is common to Understanding and Sensation. Well Sensation is the ladder to Knowledge; while Faith, advancing over the pathway of the objects of sense, leaves Opinion behind, and speeds to things free of deception, and reposes in the truth.

Should one say that Knowledge is founded on demonstration by a process of reasoning, let him hear that first principles are incapable of demonstration; for they are known neither by art nor sagacity. For the latter is conversant about objects that are susceptible of change, while the former is practical solely, and not theoretical. Hence it is thought that the first cause of the universe can be apprehended by faith alone. For all knowledge is capable of being taught; and what is capable of being taught is rounded on what is known before. But the first cause of the universe was not previously known to the Greeks; neither, accordingly, to Thales, who came to the conclusion that water was the first i cause; nor to the other natural philosophers who succeeded him, since it was Anaxagoras who was the first who assigned to Mind the supremacy over material things. But not even he preserved the dignity suited to the efficient cause, describing as he did certain silly vortices, together with the inertia and even foolishness of Mind. Wherefore also the Word says, "Call no man master on earth." For knowledge is a state of mind that results from demonstration; but faith is a grace which from what is indemonstrable conducts to what is universal and simple, what is neither with matter, nor matter, nor under matter. But those who believe not, as to be expected, drag all down from heaven, and the region of the invisible, to earth, "absolutely grasping with their hands rocks and oaks," according to Plato. For, clinging to all such things, they asseverate that that alone exists which can be touched and handled, defining body and essence to be identical: disputing against themselves, they very piously defend the existence of certain intellectual and bodiless forms descending somewhere from above from the invisible world, vehemently maintaining that there is a true essence. "Lo, I make new things," saith the Word, "which eye hath not seen, nor ear heard, nor hath it entered into the heart of man." With a new eye, a new ear, a new heart, whatever can be seen and heard is to be apprehended, by the faith and understanding of the disciples of the Lord, who speak, hear, and act spiritually. For there is genuine coin, and other that is spurious; which no less deceives unprofessionals, that it does not the money-changers; who know through having learned how to separate and distinguish what has a false stamp from what is genuine. So the money-changer only says to the unprofessional man that the coin is counterfeit. But the reason why, only the banker's apprentice, and he that is trained to this department, learns.

Now Aristotle says that the judgment which follows knowledge is in truth faith. Accordingly, faith is something superior to knowledge, and is its criterion. Conjecture, which is only a feeble supposition, counterfeits faith; as the flatterer counterfeits a friend, and the wolf the dog. And as the workman sees that by learning certain things he becomes an artificer, and the helmsman by being instructed in the art will be able to steer; he does not regard the mere wishing to become excellent and good enough, but he must learn it by the exercise of obedience. But to obey the Word, whom we call Instructor, is to believe Him, going against Him in nothing. For how can we take up a position of hostility to God? Knowledge, accordingly, is characterized by faith; and faith, by a kind of divine mutual and reciprocal correspondence, becomes characterized by knowledge.

Epicurus, too, who very greatly preferred pleasure to truth, supposes faith to be a preconception of the mind; and defines preconception to be a grasping at something evident, and at the clear understanding of the thing; and asserts that, without preconception, no one can either inquire, or doubt, or judge, or even argue. How can one, without a preconceived idea of what he is aiming after, learn about that which is the subject of his investigation? He, again, who has learned has already turned his preconception into comprehension. And if he who learns, learns not without a preconceived idea which takes. in what is expressed, that man has ears to hear the truth. And happy is the man that speaks to the ears of those who hear; as happy certainly also is he who is a child of obedience. Now to hear is to understand. If, then, faith is nothing else than a preconception of the mind in regard to what is the subject of discourse, and obedience is so called, and understanding and persuasion; no one shall learn aught without faith, since no one [learns aught] without preconception. Consequently there is a more ample demonstration of the complete truth of what was spoken by the prophet, "Unless ye believe, neither will ye understand." Paraphrasing this oracle, Heraclitus of Ephesus says, "If a man hope not, he will not find that which is not hoped for, seeing it is inscrutable and inaccessible." Plato the philosopher, also, in The Laws, says, "that he who would be blessed and happy, must be straight from the beginning a partaker of the truth, so as to live true for as long a period as possible; for he is a man of faith. But the unbeliever is one to whom voluntary falsehood is agreeable; and the man to whom involuntary falsehood is agreeable is senseless; neither of

which is desirable. For he who is devoid of friendliness, is faithless and ignorant." And does he not enigmatically say in Euthydemus, that this is "the regal wisdom"? In The Statesman he says expressly, "So that the knowledge of the true king is kingly; and he who possesses it, whether a prince or private person, shall by all means, in consequence of this act, be rightly styled royal." Now those who have believed in Christ both are and are called Chrestoi (good), as those who are cared for by the true king are kingly. For as the wise are wise by their wisdom, and those observant of law are so by the law; so also those who belong to Christ the King are kings, and those that are Christ's Christians. Then, in continuation, he adds clearly, "What is right will turn out to be lawful, law being in its nature right reason, and not found in writings or elsewhere." And the stranger of Elea pronounces the kingly and statesmanlike man "a living law." Such is he who fulfils the law, "doing the will of the Father," inscribed on a lofty pillar, and set as an example of divine virtue to all who possess the power of seeing. The Greeks are acquainted with the staves of the Ephori at Lacedaemon, inscribed with the law on wood. But my law, as was said above, is both royal and living: and it is right reason. "Law, which is king of all -- of mortals and immortals," as the Boeotian Pindar sings. For Speusippus, in the first book against Cleophon, seems to write like Plato on this wise: "For if royalty be a good thing, and the wise man the only king and ruler, the law, which is fight reason, is good;" which is the case. The Stoics teach what is in conformity with this, assigning kinghood, priesthood, prophecy, legislation, riches, true beauty, noble birth, freedom, to the wise man alone. But that he is exceedingly difficult to find, is confessed even by them.

CHAPTER 5 -- HE PROVES BY SEVERAL EXAMPLES THAT THE GREEKS DREW FROM THE SACRED WRITERS.

Accordingly all those above-mentioned dogmas appear to have been transmitted from Moses the great to the Greeks. That all things belong to the wise man, is taught in these words: "And because God hath showed me mercy, I have all things." And that he is beloved of God, God intimates when He says, "The God of Abraham, the God of Isaac, the God of Jacob." For the first is found to have been expressly called "friend," and the second is shown to have received a new name, signifying "he that sees God;" while Isaac, God in a figure selected for Himself as a consecrated sacrifice, to be a type to us of the economy of salvation.

Now among the Greeks, Minos the king of nine years' reign, and familiar friend of Zeus, is celebrated in song; they having heard how once God conversed with Moses, "as one speaking with his friend." Moses, then, was a sage, king, legislator. But our Saviour surpasses all human nature." He is so lovely, as to be alone loved by us, whose hearts are set on the true beauty, for "He was the true light." He is shown to be a King, as such hailed by unsophisticated children and by the unbelieving and ignorant Jews, and heralded by the prophets. So rich is He, that He despised the whole earth, and the gold above and beneath it, with all glory, when given to Him by the adversary. What need is there to say that He is the only High Priest, who alone possesses the knowledge of the worship of God? He is Melchizedek, "King of peace," the most fit of all to head the race of men. A legislator too, inasmuch as He gave the law by the mouth of the prophets, enjoining and teaching most distinctly what things are to be done, and what not. Who of nobler lineage than He whose only Father is God? Come, then, let us produce Plato assenting to those very dogmas. The wise man he calls rich in the Phoedrus, when he says, "O dear Pan, and whatever other gods are here, grant me to become fair within; and whatever external things I have, let them be agreeable to what is within. I would reckon the wise man rich." And the Athenian stranger, finding fault with those who think that those who have many possessions are rich, speaks thus: "For the very rich to be also good is impossible -those, I mean, whom the multitude count rich. Those they call rich, who, among a few men, are owners of the possessions worth most money; which any bad man may possess." "The whole world of wealth belongs to the believer," Solomon says, "but not a penny to the unbeliever." Much more, then, is the Scripture to be believed which says, "It is easier for a camel to go through the eye of a needle, than for a rich man " to lead a philosophic life. But, on the other hand, it blesses "the poor;" as Plato understood when he said, "It is not the diminishing of one's resources, but the augmenting of insatiableness, that is to be considered poverty; for it is not slender means that ever constitutes poverty, but insatiableness, from which the good man being free, will also be rich." And in Alcibiades he calls vice a servile thing, and virtue the attribute of freemen. "Take away from you the heavy yoke, and take up the easy one," says the Scripture; as also the poets call [vice] a slavish yoke. And the expression, "Ye have sold yourselves to your sins," agrees with what is said above: "Every one, then, who committeth sin is a slave; and the slave abideth not in the house for ever. But if the Son shall make you free, then shall ye be free, and the truth shall make you free."

And again, that the wise man is beautiful, the Athenian stranger asserts, in the same way as if one were to affirm that certain persons were just, even should they happen to be ugly in their persons. And in speaking thus with respect to eminent rectitude of character, no one who should assert them to be on this account beautiful would be thought to speak extravagantly. And "His appearance was inferior to all the Sons of men," prophecy predicted.

Plato, moreover, has called the wise man a king, in The Statesman. The remark is quoted above.

These points being demonstrated, let us recur again to our discourse on faith. Well, with the fullest demonstration, Plato proves, that there is need of faith everywhere, celebrating peace at the same time: "For no man will ever be trusty and sound in seditions without entire virtue. There are numbers of mercenaries full of fight, and willing to die in war; but, with a very few exceptions, the most of them are desperadoes and villains, insolent and senseless." If these observations are right, "every legislator who is even of slight use, will, in making his laws, have an eye to the greatest virtue. Such is fidelity, which we need at all times, both in peace and in war, and in all the rest of our life, for it appears to embrace the other virtues. "But the best thing is neither war nor sedition, for the necessity of these is to be deprecated. But peace with one another and kindly feeling are what is best."

From these remarks the greatest prayer evidently is to have peace, according to Plato. And faith is the greatest mother of the I virtues. Accordingly it is rightly said in Solomon, "Wisdom is in the mouth of the faithful." Since also Xenocrates, in his book on "Intelligence," says "that wisdom is the knowledge of first causes and of intellectual essence." He considers intelligence as twofold, practical and theoretical, which latter is human wisdom. Consequently wisdom is intelligence, but all intelligence is not wisdom. And it has been shown, that the knowledge of the first cause of the universe is of faith, but is not demonstration. For it were strange that the followers of the Samian Pythagoras, rejecting demonstrations of subjects of question, should regard the bare ipse dixit as ground of belief; and that this expression alone sufficed for the confirmation of what they heard, while those devoted to the contemplation of the truth, presuming to disbelieve the trustworthy Teacher. God the only Saviour. should demand of Him tests of His utterances. But He says, "He that hath ears to hear, let him hear." And who is he? Let Epicharmus say: "Mind sees, mind hears; all besides is deaf and blind."

Rating some as unbelievers, Heraclitus says, "Not knowing how to hear or to speak;" aided doubtless by Solomon, who says, "If thou lovest to hear, thou shalt comprehend; and if thou incline thine ear, thou shalt be wise.

CHAPTER 6 -- THE EXCELLENCE AND UTILITY OF FAITH.

"Lord, who hath believed our report?" Isaiah says. For "faith cometh by hearing, and hearing by the word of God," saith the apostle. "How then shall they call on Him in whom they have not believed? And how shall they believe on Him whom they have not heard? And how shall they hear without a preacher? And how shall they preach except they be sent? As it is written, How beautiful are the feet of those that publish glad tidings of good things! "3 You see how he brings faith by hearing, and the preaching of the apostles, up to the word of the Lord, and to the Son of God. We do not yet understand the word of the Lord to be demonstration.

As, then, playing at ball not only depends on one throwing the ball skilfully, but it requires besides one to catch it dexterously, that the game may be gone through according to the rules for ball; so also is it the case that teaching is reliable when faith on the part of those who hear, being, so to speak, a sort of natural art, contributes to the process of learning. So also the earth co-operates, through its productive power, being fit for the sowing of the seed. For there is no good of the very best instruction without the exercise of the receptive faculty on the part of the learner, not even of prophecy, when there is the absence of docility on the part of those who hear. For dry twigs, being ready to receive the power of fire, are kindled with great ease; and the far-famed stone attracts steel through affinity, as the amber tear-drop drags to itself twigs, and the lump sets chaff in motion. And the substances attracted obey them, influenced by a subtle spirit, not as a cause, but as a concurring cause.

There being then a twofold species of vice -- that characterized by craft and stealth, and that which leads and drives with violence -- the divine Word cries, calling all together; knowing perfectly well those that will not obey; notwithstanding then since to obey or not is in our own power, provided we have not the excuse of ignorance to adduce. He makes a just call, and demands of each according to his strength. For some are able as well as willing, having reached this point through practice and being purified; while others, if they are not yet able, already have the will. Now to will is the act of the soul, but to do is not without the body. Nor are actions estimated by their issue alone; but they are judged also according to the element of free choice in each, -- if he chose easily, if he repented of his sins, if he reflected on his failures and repented (metegnw), which is (meta tauta egnw) "afterwards knew." For repentance is a tardy knowledge, and primitive innocence is knowledge. Repentance, then, is an effect of faith. For unless a man believe that to which he was addicted to be sin, he will not abandon it; and if he do not believe punishment to be impending over the transgressor, and salvation to be the portion of him who lives according to the commandments, he will not reform.

Hope, too, is based on faith. Accordingly the followers of Basilides define faith to be, the assent of the soul to any of those things, that do not affect the senses through not being present. And hope is the expectation of the possession of good. Necessarily, then, is expectation founded on faith. Now he is faithful who keeps inviolably what is entrusted to him; and we are entrusted with the utterances respecting God and the divine words, the commands along with the execution of the injunctions. This is the faithful servant, who is praised by the Lord. And when it is said, "God is faithful," it is intimated that He is worthy to be believed when declaring aught. Now His Word declares; and "God" Himself is "faithful." How, then, if to believe is to suppose, do the philosophers think that what proceeds from themselves is sure? For the voluntary assent to a preceding demonstration is not supposition, but it is assent to something sure. Who is more powerful than God? Now unbelief is the feeble negative supposition of one opposed to Him; as incredulity is a condition which admits faith with difficulty. Faith is the voluntary supposition and anticipation of pre-comprehension. Expectation is an opinion about the future, and expectation about other things is opinion about uncertainty. Confidence is a strong judgment about a thing. Wherefore we believe Him in whom we have confidence unto divine glory and salvation. And we confide in Him. who is God alone, whom we know, that those things nobly [promised to us, and for this end benevolently created and bestowed by Him on us, will not fail.

Benevolence is the wishing of good things to another for his sake. For He needs nothing; and the beneficence and benignity which flow from the Lord terminate in us, being divine benevolence, and benevolence resulting in beneficence. And if to Abraham on his believing it was counted for righteousness; and if we are the seed of Abraham, then we must also believe through heating. For we are Israelites, who are convinced not by signs, but by hearing. Wherefore it is said, "Rejoice, O barren, that barest not; break forth and cry, thou that didst not travail with child: for more are the children of the desolate than of her who hath an husband." "Thou hast lived for the fence of the people, thy children were blessed in the tents of their fathers." And if the same mansions are promised by prophecy to us and to the patriarchs, the God of both the covenants is shown to be one. Accordingly it is added more clearly, "Thou hast inherited

the covenant of Israel," speaking to those called from among the nations that were once barren, being formerly destitute of this husband, who is the Word, -- desolate formerly, -- of the bridegroom. "Now the just shall live by faith," which is according to the covenant and the commandments; since these, which are two in name and time, given in accordance with the [divine] economy -- being in power one -- the old and the new, are dispensed through the Son by one God. As the apostle also says in the Epistle to the Romans, "For therein is the righteousness of God revealed from faith to faith," teaching the one salvation which from prophecy to the Gospel is perfected by one and the same Lord. "This charge," he says, "I commit to thee, son Timothy, according to the prophecies which went before on thee, that thou by them mightest war the good warfare; holding faith, and a good conscience; which some having put away concerning faith have made shipwreck," because they defiled by unbelief the conscience that comes from God. Accordingly, faith may not, any more, with reason, be disparaged in an offhand way, as simple and vulgar, appertaining to anybody.

For, if it were a mere human habit, as the Greeks supposed, it would have been extinguished. But if it grow, and there be no place where it is not: then I affirm, that faith, whether founded in love, or in fear, as its disparagers assert, is something divine; which is neither rent asunder by other mundane friendship, nor dissolved by the presence of fear. For love, on account of its friendly alliance with faith, makes men believers; and faith, which is the foundation of love, in its turn introduces the doing of good; since also fear, the paedagogue of the law, is believed to be fear by those, by whom it is believed. For, if its existence is shown in its working, it is yet believed when about to do and threatening, and when not working and present; and being believed to exist, it does not itself generate faith, but is by faith tested and proved trustworthy. Such a change, then, from unbelief to faith -- and to trust in hope and fear, is divine. And, in truth, faith is discovered, by us, to be the first movement towards salvation; after which fear, and hope, and repentance, advancing in company with temperance and patience, lead us to love and knowledge. Rightly, therefore, the Apostle Barnabas says, "From the portion I have received I have done

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3107 my diligence to send by little and little to you; that along with your faith you may also have perfect knowledge.

Fear and patience are then helpers of your faith; and our allies are long-suffering and temperance. These, then," he says, "in what respects the Lord, continuing in purity, there rejoice along with them, wisdom, understanding, intelligence, knowledge." The fore-mentioned virtues being, then, the elements of knowledge; the result is that faith is more elementary, being as necessary to the Gnostic, as respiration to him that lives in this world is to life. And as without the four elements it is not possible to live, so neither can knowledge be attained without faith. It is then the support of truth.

CHAPTER 7 -- THE UTILITY OF FEAR. OBJECTIONS ANSWERED.

Those, who denounce fear, assail the law; and if the law, plainly also God, who gave the law. For these three elements are of necessity presented in the subject on hand: the ruler, his administration, and the ruled. If, then, according to hypothesis, they abolish the law; then, by necessary consequence, each one who is led by lust, courting pleasure, must neglect what is right and despise the Deity, and fearlessly indulge in impiety and injustice together, having dashed away from the truth.

Yea, say they, fear is an irrational aberration and perturbation of mind. What sayest thou? And how can this definition be any longer maintained, seeing the commandment is given me by the Word? But the commandment forbids, hanging fear over the head of those who have incurred admonition for their discipline.

Fear is not then irrational. It is therefore rational. How could it be otherwise, exhorting as it does, Thou shalt not kill, Thou shalt not commit adultery, Thou shalt not steal, Than shalt not bear false witness? But if they will quibble about the names, let the philosophers term the fear of the law, cautious fear, (eulabeia) which is a shunning (ekklisis) agreeable to reason. Such Critolaus of Phasela not inaptly called fighters about names (onomatomakoi). The commandment, then, has already appeared fair and lovely even in the highest degree, when conceived under a change of name. Cautious fear (eulabeia) is therefore shown to be reasonable being the shunning of what hurts; from which arises repentance for previous sins. "For the fear of the Lord is the beginning of wisdom; good understanding is to all that do it." He calls wisdom a doing, which is the fear of the Lord paving the way for wisdom. But if the law produces fear, the knowledge of the law is the beginning of wisdom; and a man is not wise without law. Therefore those who reject the law are unwise; and in consequence they are reckoned godless (aqeoi). Now instruction is the beginning of wisdom. "But the ungodly despise wisdom and instruction," saith the Scripture.

Let us see what terrors the law announces. If it is the things which hold an intermediate place between virtue and vice, such as poverty, disease, obscurity, and humble birth, and the like, these things civil laws hold forth, and are: praised for so doing. And those of the Peripatetic school, who introduce three kinds of good things, and think that their opposites are evil, this opinion suits. But the law given to us enjoins us to shun what are in reality bad things -- adultery, uncleanness, paederasty, ignorance, wickedness, soul-disease, death (not that which severs the soul from the body, but that which severs the soul from truth). For these are vices in reality, and the workings that proceed from them are dreadful and terrible. "For not unjustly," say the divine oracles, "are the nets spread for birds; for they who are accomplices in blood treasure up evils to themselves." How, then, is the law still said to be not good by certain heresies that clamorously appeal to the apostle, who says, "For by the law is the knowledge of sin?" To whom we say, The law did not cause, but showed sin. For, enjoining what is to be done, it reprehended what ought not to be done. And it is the part of the good to teach what is salutary, and to point out what is deleterious; and to counsel the practice of the one, and to command to shun the other. Now the apostle, whom they do not comprehend, said that by the law the knowledge of sin was manifested, not that from it it derived its existence. And how can the law be not good, which trains, which is given as the instructor (paidagwgos) to Christ, s that being corrected by fear, in the way of discipline, in order to the attainment of the perfection which is by Christ? "I will not," it is said, "the death of the sinner, as his repentance." Now the commandment works repentance; inasmuch as it deters from what ought not to be done, and enjoins good deeds. By ignorance he means, in my opinion, death. "And he that is near the Lord is full of stripes." Plainly, he, that draws near to knowledge, has the benefit Of perils, fears, troubles, afflictions, by reason of his desire for the truth. "For the son who is instructed turns out wise and an intelligent son is saved from burning. And an intelligent son will receive the commandments." And Barnabas the apostle having said, "Woe to those who are wise in their own conceits, clever in their own eyes," added, "Let us become spiritual, a perfect temple to God; let us, as far as in us lies, practise the fear of God, and strive to keep His commands, that we may rejoice in His judgments." Whence "the fear of God" is divinely said to be the beginning of wisdom.

CHAPTER 8 -- THE VAGARIES OF BASILIDES AND VALENTINUS AS TO FEAR BEING THE CAUSE OF THINGS.

Here the followers of Basilides, interpreting this expression, say, "that the Prince, having heard the speech of the Spirit, who was being ministered to, was struck with amazement both with the voice and the vision, having had glad tidings beyond his hopes announced to him; and that his amazement was called fear, which became the origin of wisdom, which distinguishes classes, and discriminates, and perfects, and restores. For not the world alone, but also the election, He that is over all has set apart and sent forth."

And Valentinus appears also in an epistle to have adopted such views. For he writes in these very words: "And as terror fell on the angels at this creature, because he uttered things greater than proceeded from his formation, by reason of the being in him who had invisibly communicated a germ of the supernal essence, and who spoke with free utterance; so also among the tribes of men in the world, the works of men became terrors to those who made them, -- as, for example, images and statues. And the hands of all fashion things to bear the name of God: for Adam formed into the name of man inspired the dread attaching to the pre-existent man, as having his being in him; and they were terror-stricken, and speedily marred the work."

But there being but one First Cause, as will be shown afterwards, these men will be shown to be inventors of chatterings and chirpings. But since God deemed it advantageous, that from the law and the prophets, men should receive a preparatory discipline by the Lord, the fear of the Lord was called the beginning of wisdom, being given by the Lord, through Moses, to the disobedient and hard of heart. For those whom reason convinces not, fear tames; which also the Instructing Word, foreseeing from the first, and purifying by each of these methods, adapted the instrument suitably for piety. Consternation is, then, fear at a strange apparition, or at an unlooked-for representation -such as, for example, a message; while fear is an excessive wonderment on account of something which arises or is. They do not then perceive that they represent by means of amazement the God who is highest and is extolled by them, as subject to perturbation and antecedent to amazement as having been in ignorance. If indeed ignorance preceded amazement: and if this amazement and fear, which is the beginning of wisdom, is the fear of God, then in all likelihood ignorance as cause preceded both the wisdom of God and all creative work, and not only these, but restoration and even election itself. Whether, then, was it ignorance of what was good or what was evil?

Well, if of good, why does it cease through amazement? And minister and preaching and baptism are [in that case] superfluous to them. And if of evil, how can what is bad be the cause of what is best? For had not ignorance preceded, the minister would not have come down, nor would have amazement seized on "the Prince," as they say; nor would he have attained to a beginning of wisdom from fear, in order to discrimination between the elect and those that are mundane. And if the fear of the pre-existent man made the angels conspire against their own handiwork, under the idea that an invisible germ of the supernal essence was lodged within that creation, or through unfounded suspicion excited envy, which is incredible, the angels became murderers of the creature which had been entrusted to them, as a child might be, they being thus convicted of the grossest ignorance. Or suppose they were influenced by being involved in foreknowledge. But they would not have conspired against what they foreknew in the assault they made; nor would they have been terror-struck at their own work, in consequence of foreknowledge, on their perceiving the supernal germ. Or, finally, suppose, trusting to their knowledge, they dared (but this also were impossible for them), on learning the excellence that is in the Pleroma, to conspire against man. Furthermore also they laid hands on that which was according to the image, in which also is the archetype, and which, along with the knowledge that remains, is indestructible

To these, then, and certain others, especially the Marcionites, the Scripture cries, though they listen not, "He that heareth Me shall rest with confidence in peace, and shall be tranquil, fearless of all evil."

What, then, will they have the law to be? They will not call it evil, but just; distinguishing what is good from what is just. But the Lord, when He enjoins us to dread evil, does not exchange one evil for another, but abolishes what is opposite by its opposite. Now evil is the opposite of good, as what is just is of what is unjust. If, then, that absence of fear, which the fear of the Lord produces, is called the beginning of what is good, fear is a good thing. And the fear which proceeds from the law is not only just, but good, as it takes away evil. But introducing absence of fear by means of mental perturbation, but moderation of feeling by discipline. When, then, we hear, "Honour the Lord, and be strong: but fear not another besides Him," we understand it to be meant fearing to sin, and following the commandments given by God, which is the honour that cometh from God. For the fear of God is Deos [in Greek]. But if fear is perturbation of mind, as some will have it that fear is perturbation of mind, yet all fear is not perturbation. Superstition is indeed perturbation of mind: being the fear of demons, that produce and are subject to the excitement of passion. On the other hand, consequently, the fear of God, who is not subject to perturbation, is free of perturbation. For it is not God, but failing away from God, that the man is terrified for. And he who fears this -- that is, falling into evils -- fears and dreads those evils. And he who fears a fall, wishes himself to be free of corruption and perturbation. "The wise man, fearing, avoids evil: but the foolish, trusting, mixes himself with it," says the Scripture; and again it says, "In the fear of the Lord is the hope of strength.

CHAPTER 9 -- THE CONNEXION OF THE CHRISTIAN VIRTUES.

Such a fear, accordingly, leads to repentance and hope. Now hope is the expectation of good things, or an expectation sanguine of ab sent good; and favourable circumstances are assumed in order to good hope, which we have learned leads on to love. Now love turns out to be consent in what pertains to reason, life, and manners, or in brief, fellowship in life, or it is the intensity of friendship and of affection, with fight reason, in the enjoyment of associates. And an associate (etairos) is another self; just as we call those, brethren, who are regenerated by the same word. And akin to love is hospitality, being a congenial an devoted to the treatment of strangers. And those are strangers, to whom the things of the world are strange. For we regard as worldly those, who hope in the earth and carnal lusts. "Be not conformed," says the apostle, "to this world: but be ye transformed in the renewal of the mind, that ye may prove what is that good, and acceptable, and perfect, will of God."

Hospitality, therefore, is occupied in what is useful for strangers; and guests (epixenoi) are strangers (xenoi); and friends are guests; and brethren are friends. "Dear brother," says Homer.

Philanthropy, in order to which also, is natural affection, being a loving treatment of men, and natural affection, which is a congenial habit exercised in the love of friends or domestics, follow in the train of love. And if the real man within us is the spiritual, philanthropy is brotherly love to those who participate, in the same spirit, Natural affection, on the other hand, the preservation of good-will, or of affection; and affection is its perfect demonstration; and to be beloved is to please in behaviour, by drawing and attracting. And persons are brought to sameness by consent, which is the knowledge of the good things that are enjoyed in common. For community of sentiment (omognymosunh) is harmony of opinions (sumfwnia gnwmpn). "Let your love be without dissimulation," it is said; "and abhorring what is evil, let us become attached to what is good, to brotherly love," and so on, down to "If it be possible, as much as lieth in you, living peaceably with all men." Then "be not overcome of evil," it is said, "but overcome evil with good." And the same apostle owns that he bears witness to the Jews, "that they have a zeal of God, but not according to knowledge. For, being ignorant of God's righteousness, and seeking to establish their own, they have not submitted themselves to the righteousness of God." For they did not know and do the will of the law; but what they supposed, that they thought the law wished. And they did not believe the law as prophesying, but the bare word; and they followed through fear, not through disposition and faith. "For Christ is the end of the law for righteousness, who was prophesied by the law to every one that believeth. Whence it was said to them by Moses, "I will provoke you to jealousy by them that are not a people; and I will anger you by a foolish nation, that is, by one that has become disposed to obedience." And by Isaiah it is said, "I was found of them that sought Me not: I was made manifest to them that inquired not after Me," -- manifestly previous to the coming of the Lord; after which to Israel, the things prophesied, are now appropriately spoken: "I have stretched out My hands all the day long to a disobedient and gainsaying people." Do you see the cause of the calling from among the nations, clearly declared, by the prophet, to be the disobedience and gainsaying of the people? Then the goodness of God is shown also in their case. For the apostle says, "But through their transgression salvation is come to the Gentiles, to provoke them to jealousy," and to willingness to repent. And the Shepherd, speaking plainly of those who had fallen asleep, recognises certain righteous among Gentiles and Jews, not only before the appearance of Christ, but before the law, in virtue of acceptance before God, -- as Abel, as Noah, as any other righteous man. He says accordingly, "that the apostles and teachers, who had preached the name of the Son of God, and had fallen asleep, in power and by faith, preached to those

that had fallen asleep before." Then he subjoins: "And they gave them the seal of preaching. They descended, therefore, with them into the water, and

They descended, therefore, with them into the water, and again ascended. But these descended alive, and again ascended alive. But those, who had fallen asleep before, descended dead, but ascended alive. By these, therefore, they were made alive, and knew the name of the Son of God. Wherefore also they ascended with them, and fitted into the structure of the tower, and unhewn were built up together; they fell asleep in righteousness and in great purity, but wanted only this seal." "For when the Gentiles, which have not the law, do by nature the things of the law, these, having not the law, are a law unto themselves," according to the apostle.

As, then, the virtues follow one another, why need I say what has been demonstrated already, that faith hopes through repentance, and fear through faith; and patience and practice in these along with learning terminate in love, which is perfected by knowledge? But that is necessarily to be noticed, that the Divine alone is to be regarded as naturally wise. Therefore also wisdom, which has taught the truth, is the power of God; and in it the perfection of knowledge is embraced. The philosopher loves and likes the truth, being now considered as a friend, on account of his love, from his being a true servant. The beginning of knowledge is wondering at objects, as Plato says is in his Theoetetus; and Matthew exhorting in the Traditions, says, "Wonder at what is before you;" laying this down first as the foundation of further knowledge. So also in the Gospel to the Hebrews it is written. "He that wonders shall reign, and he that has reigned shall rest. It is impossible, therefore, for an ignorant man, while he remains ignorant, to philosophize, not having apprehended the idea of wisdom; since philosophy is an effort to grasp that which truly is, and the studies that conduce thereto. And it is not the rendering of one accomplished in good habits of conduct, but the knowing how we are to use and act and labour, according as one is assimilated to God. I mean God the Saviour, by serving the God of the universe through the High Priest, the Word, by whom what is in truth good and right is beheld. Piety is conduct suitable and corresponding to God.

CHAPTER 10 -- TO WHAT THE PHILOSOPHER APPLIES HIMSELF.

These three things, therefore, our philosopher attaches himself to: first, speculation; second, the performance of the precepts; third, the forming of good men; -- which, concurring, form the Gnostic. Whichever of these is wanting, the elements of knowledge limp. Whence the Scripture divinely says, "And the Lord spake to Moses, saying, Speak to the children of Israel, and thou shalt say to them, I am the Lord your God. According to the customs of the land of Egypt, in which ye have dwelt, ye shall not do; and according to the customs of Canaan, into which I bring you, ye shall not do; and in their usages ye shall not walk. Ye shall perform My judgments, and keep My precepts, and walk in them: I am the Lord your God. And ye shall keep all My commandments, and do them. He that doeth them shall live in them. I am the Lord your God." Whether, then, Egypt and the land of Canaan be the symbol of the world and of deceit, or of sufferings and afflictions; the oracle shows us what must be abstained from, and what, being divine and not worldly, must be observed. And when it is said, "The man that doeth them shall live in it declares both the correction of the Hebrews them themselves, and the training and advancement of us who are nigh: it declares at once their life and ours. For "those who were dead in sins are quickened together with Christ," by our covenant. For Scripture, by the frequent reiteration of the expression, "I am the Lord your God," shames in such a way as most powerfully to dissuade, by teaching us to follow God who gave the commandments, and gently admonishes us to seek God and endeavour to know Him as far as possible; which is the highest speculation, that which scans the greatest mysteries, the real knowledge, that which becomes irrefragable by reason. This alone is the knowledge of wisdom, from which rectitude of conduct is never disjoined.

CHAPTER 11 -- THE KNOWLEDGE WHICH COMES THROUGH FAITH THE SUREST OF ALL.

But the knowledge of those who think themselves wise, whether the barbarian sects or the philosophers among the Greeks, according to the apostle, "puffeth up." But that knowledge, which is the scientific demonstration of what is delivered according to the true philosophy, is rounded on faith. Now, we may say that it is that process of reason which, from what is admitted, procures faith in what is disputed. Now, faith being twofold -- the faith of knowledge and that of opinion -- nothing prevents us from calling demonstration wofold, the one resting on knowledge, the other on opinion; since also knowledge and foreknowledge are designated as twofold, that which is essentially accurate, that which is defective. And is not the demonstration, which we possess, that alone which is true, as being supplied out of the divine Scriptures, the sacred writings, and out of the "God-taught wisdom," according to the apostle? Learning, then, is also

obedience to the commandments, which is faith in God. And faith is a power of God, being the strength of the truth. For example, it is said, "If ye have faith as a grain of mustard, ye shall remove the mountain." And again, "According to thy faith let it be to thee." And one is cured, receiving healing by faith; and the dead is raised up in consequence of the power of one believing that he would be raised. The demonstration, however, which rests on opinion is human, and is the result of rhetorical arguments or dialectic syllogisms. For the highest demonstration, to which we have alluded, produces intelligent faith by the adducing and opening up of the Scrip tures to the souls of those who desire to learn; the result of which is knowledge (gnosis). For if what is adduced in order to prove the point at issue is assumed to be true, as being divine and prophetic, manifestly the conclusion arrived at by inference from it will consequently he inferred truly; and the legitimate result of the demonstration will be knowledge. When, then, the memorial of the celestial and divine food was commanded to be consecrated in the golden pot, it was said, "The omer was the tenth of the three measures." For in ourselves, by the three measures are indicated three criteria; sensation of objects of sense, speech, -- of spoken names and words, and the mind, -- of intellectual objects. The Gnostic, therefore, will abstain from errors in speech, and thought, and sensation, and action, having heard "that he that looks so as to lust hath committed adultery;" and reflecting that "blessed are the pure in heart, for they shall see God;" and knowing this, "that not what enters into the mouth defileth, but that it is what cometh forth by the mouth that defileth the man. For out of the heart proceed thoughts." This, as I think, is the true and just measure according to God, by which things capable of measurement are measured, the decad which is comprehensive of man; which summarily the three abovementioned measures pointed out. There are body and soul, the five senses, speech, the power of reproduction -- the intellectual or the spiritual faculty, or whatever you choose to call it. And we must, in a word, ascending above all the others, stop at the mind; as also certainly in the universe overleaping the nine divisions, the first consisting of the four elements put in one place for equal interchange: and then the seven wandering stars and the one that wanders not, the ninth, to the perfect number, which is above the nine, and the tenth division, we must reach to the knowledge of God, to speak briefly, desiring the Maker after the creation. Wherefore the tithes both of the ephah and of the sacrifices were presented to God; and the paschal feast began with the tenth day, being the transition from all trouble, and from all objects of sense.

The Gnostic is therefore fixed by faith; but the man who thinks himself wise touches not what pertains to the truth, moved as he is by unstable and wavering impulses. It is therefore reasonably written, "Cain went forth from the face of God, and dwelt in the land of Naid, over against Eden." Now Naid is interpreted commotion, and Eden delight; and Faith, and Knowledge, and Peace are delight, from which he that has disobeyed is cast out. But he that is wise in his own eyes will not so much as listen to the beginning of the divine commandments; but, as if his own teacher, throwing off the reins, plunges voluntarily into a billowy commotion, sinking down to mortal and created things from the uncreated knowledge, holding various opinions at various times. "Those who have no guidance fall like leaves."

Reason, the governing principle, remaining unmoved and guiding the soul, is called its pilot. For access to the Immutable is obtained by a truly immutable means. Thus Abraham was stationed before the Lord, and approaching spoke. And to Moses it is said, "But do thou stand there with Me." And the followers of Simon wish be assimilated in manners to the standing form which they adore. Faith, therefore, and the knowledge of the truth, render the soul, which makes them its choice, always uniform and equable. For congenial to the man of falsehood is shifting, and change, and turning away, as to the Gnostic are calmness, and rest, and peace. As, then, philosophy has been brought into evil repute by pride and self-conceit, so also ghosts by false ghosts called by the same name; of which the apostle writing says, "O Timothy, keep that which is committed to thy trust, avoiding the profane and vain babblings and oppositions of science (gnosis) falsely so called; which some professing, have erred concerning the faith."

Convicted by this utterance, the heretics reject the Epistles. to Timothy. Well, then, if the Lord is the truth, and wisdom, and power of God, as in truth He is, it is shown that the real Gnostic is he that knows Him, and His Father by Him. For his sentiments are the same with him who said, "The lips of the righteous know high things."

CHAPTER 12 -- TWOFOLD FAITH.

Faith as also Time being double, we shall find virtues in pairs both dwelling together. For memory is related to past time, hope to future. We believe that what is past did, and that what is future will take place. And, on the other I hand, we love, persuaded by faith that the past was as it was, and by hope expecting the future. For in everything love attends the Gnostic, who knows one God. "And, behold, all things which He created were very good." He both knows and admires. Godliness adds length of life; and the fear of the Lord adds days. As, then, the days are a portion of life in its progress, so also fear is the beginning of love, becoming by development faith, then love. But it is not as I fear and hate a wild beast (since fear is twofold) that I fear the father, whom I fear and love at once. Again, fearing lest I be punished, I love myself in assuming fear. He who fears to offend his father, loves himself. Blessed then is he who is found possessed of faith, being, as he is, composed of love and fear. And faith is power in order to salvation, and strength to eternal life. Again, prophecy is foreknowledge; and knowledge the understanding of prophecy; being the knowledge of those things known before by the Lord who reveals all things.

The knowledge, then, of those things which have been predicted shows a threefold result -- either one that has happened long ago, or exists now, or about to be. Then the extremes either of what is accomplished or of what is hoped for fall under faith; and the present action furnishes persuasive arguments of the confirmation of both the extremes. For if, prophecy being one, one part is accomplishing and another is fulfilled; hence the truth, both what is hoped for and what is passed is confirmed. For it was first present; then it became past to us; so that the belief of what is past is the apprehension of a past event, and a hope which is future the apprehension of a future event.

And not only the Platonists, but the Stoics, say that assent is in our own power. All opinion then, and judgment, and supposition, and knowledge, by which we live and have perpetual intercourse with the human race, is an assent; which is nothing else than faith. And unbelief being defection from faith, shows both assent and faith to be possessed of power; for non-existence cannot be called privation. And if you consider the truth, you will find man naturally misled so as to give assent to what is false, though possessing the resources necessary for belief in the truth. "The virtue, then, that encloses the Church in its grasp," as the Shepherd says, "is Faith, by which the elect of God are saved; and that which acts the man is Self-restraint. And these are followed by Simplicity, Knowledge, Innocence, Decorum, Love," and all these are the daughters of Faith. And again, "Faith leads the way, fear upbuilds, and love perfects." Accordingly he says, the Lord is to be feared in order to edification, but not the devil to destruction. And again, the works of the Lord -- that is, His commandments -- are to be loved and done; but the works of the devil are to be dreaded and not done. For the fear of God trains and restores to love; but the fear of the works of the devil has hatred dwelling along with it. The same also says" that repentance is high intelligence. For he that repents of what he did, no longer does or says as he did. But by torturing himself for his sins, he benefits his soul. Forgiveness of sins is therefore different from repentance; but both show what is in our power."

CHAPTER 13 -- ON FIRST AND SECOND REPENTANCE.

He, then, who has received the forgiveness of sins ought to sin no more. For, in addition to the first and only repentance from sins (this is from the previous sins in the first and heathen life -- I mean that in ignorance), there is forthwith proposed to those who have been called, the repentance which cleanses the seat of the soul from transgressions, that faith may be established. And the Lord, knowing the heart, and foreknowing the future, foresaw both the fickleness of man and the craft and subtlety of the devil from the first, from the beginning; how that, envying man for the forgiveness of sins, he would present to the servants of God certain causes of sins: skilfully working mischief, that they might fall together with himself. Accordingly, being very merciful, He has vouch-safed, in the case of those who, though in faith, fall into any transgression, a second repentance; so that should any one be tempted after his calling, overcome by force and fraud, he may receive still a repentance not to be repented of. "For if we sin wilfully after that we have received the knowledge of the truth, there remaineth no more sacrifice for sins, but a certain fearful looking for of judgment and fiery indignation, which shah devour the adversaries." But continual and successive repentings for sins differ nothing from the case of those who have not believed at all, except only in their consciousness that they do sin. And I know not which of the two is worst, whether the case of a man who sins knowingly, or of one who, after having repented of his sins, transgresses again. For in the process of proof sin appears on each side, -- the sin which in its commission is condemned by the worker of the iniquity, and that of the man who, foreseeing what is about to be done, yet puts his hand to it as a wickedness. And he who perchance gratifies himself in anger and pleasure, gratifies himself in he knows what; and he who, repenting of that in which he gratified himself, by rushing again into pleasure, is near neighbour to him who has sinned wilfully at first. For one, who does again that of which he has repented, and condemning what he does, performs it willingly.

He, then, who from among the Gentiles and from that old life has betaken himself to faith, has obtained forgiveness of

sins once. But he who has sinned after this, on his repentance, though he obtain pardon, ought to fear, as one no longer washed to the forgiveness of sins. For not only must the idols which he formerly held as gods, but the works also of his former life, be abandoned by him who has been "born again, not of blood, nor of the will of the flesh," but in the Spirit; which consists in repenting by not giving way to the same fault. For frequent repentance and readiness to change easily from want of training, is the practice of sin again. The frequent asking of forgiveness, then, for those things in which we often transgress, is the semblance of repentance, not repentance itself. "But the righteousness of the blameless cuts straight paths," says the Scripture. And again, "The righteousness of the innocent will make his way right." Nay, "as a father pitieth his children, so the Lord pitieth them that fear Him." David writes, "They who sow," then, "in tears, shall reap in joy; " those, namely, who confess in penitence. "For blessed are all those that fear the Lord." You see the corresponding blessing in the Gospel. "Fear not," it is said, when a man is enriched, and when the glory of his house is increased: because when he dieth he shall leave all, and his glory shall not descend after him." "But I in Thy I mercy will enter into Thy house. I will worship I toward Thy holy temple, in Thy fear: Lord, lead me in Thy righteousness." Appetite is then the movement of the mind to or from something. Passion is an excessive appetite exceeding the measures of reason, or appetite unbridled and disobedient to the word. Passions. then, are a perturbation of the soul contrary to nature. in disobedience to reason. But revolt and distraction and disobedience are in our own power, as obedience is in our power. Wherefore voluntary actions are judged. But should one examine each one of the passions, he will find them irrational impulses.

CHAPTER 14 -- HOW A THING MAY BE INVOLUNTARY.

What is involuntary is not matter for judgment. But this is twofold, -- what is done in ignorance, and what is done through necessity. For how will you judge concerning those who are said to sin in involuntary modes? For either one knew not himself, as Cleomenes and Athamas, who were mad; or the thing which he does, as Aeschvlus, who divulged the mysteries on the stage, who, being tried in the Areopagus, was absolved on his showing that he had not been initiated. Or one knows not what is done, as he who has let off his antagonist, and slain his domestic instead of his enemy; or that by which it is done, as he who, in exercising with spears having buttons on them has killed some one in consequence of the spear throwing off the button: or knows not the manner how, as he who has killed his antagonist in the stadium, for it was not for his death but for victory that he contended; or knows not the reason why it is done, as the physician gave a salutary antidote and killed, for it was not for this purpose that he gave it, but to save. The law at that time punished him who had killed involuntarily, as e.g., him who was subject involuntarily to gonorrhoea, but not equally with him who did so voluntarily.

Although he also shall be punished as for a voluntary action, if one transfer the affection to the truth. For, in reality, he that cannot contain the generative word is to be punished; for this is an irrational passion of the soul approaching garrulity. "The faithful man chooses to conceal things in his spirit." Things, then, that depend on choice are subjects for judgment. "For the Lord searcheth the hearts and reins." "And he that looketh so as to lust" is judged. Wherefore it is said, "Thou shalt not lust." And "this people honoureth Me with their lips," it is said, "but their heart is far from Me." For God has respect to the very thought, since Lot's wife, who had merely voluntarily turned towards worldly wickedness, He left a senseless mass, rendering her a pillar of salt, and fixed her so that she advanced no further, not as a stupid and useless image, but to season and salt him who has the power of spiritual perception.

CHAPTER 15 -- ON THE DIFFERENT KINDS OF VOLUNTARY ACTIONS, AND THE SINS THENCE PROCEEDING.

What is voluntary is either what is by desire, or what is by choice, or what is of intention. Closely allied to each other are these things -- sin, mistake, crime. It is sin, for example, to live luxuriously and licentiously; a misfortune, to wound one's friend in ignorance, taking him for an enemy; and crime, to violate graves or commit sacrilege. Sinning arises from being unable to determine what ought to be done, or being unable to do it; as doubtless one falls into a ditch either through not knowing, or through inability to leap across through feebleness of body. But application to the training of ourselves, and subjection to the commandments, is in our own power; with which if we will have nothing to do, by abandoning ourselves wholly to lust, we shall sin, nay rather, wrong our own soul. For the noted Laius says in the tragedy: "None of these things of which you admonish me have escaped me; But notwithstanding that I am in my senses, Nature compels me;" i.e., his abandoning himself to passion. Medea,

too, herself cries on the stage: "And I am aware what evils I am to perpetrate, But passion is stronger than my resolutions."

Further, not even Ajax is silent; but, when about to kill himself, cries: - "No pain gnaws the soul of a free man like dishonour.

Thus do I suffer; and the deep stain of calamity Ever stirs me from the depths, agitated By the bitter stings of rage."

Anger made these the subjects of tragedy, and lust made ten thousand others -- Phaedra, Anthia, Eriphyle,- "Who took the precious gold for her dear husband."

For another play represents Thrasonides of the comic drama as saying: "A worthless wench made me her slave."

Mistake is a sin contrary to calculation; and voluntary sin is crime (adikia); and crime is voluntary wickedness. Sin, then, is on my part voluntary. Wherefore says the apostle, "Sin shall not have dominion over you; for ye are not under the law, but under grace." Addressing those who have believed, he says, "For by His stripes we were healed." Mistake is the involuntary action of another towards me, while a crime (adikia) alone is voluntary, whether my act or another's. These differences of sins are alluded to by the Psalmist, when he calls those blessed whose iniquities (anomias) God hath blotted out, and whose sins (amartias) He hath covered. Others He does not impute, and the rest He forgives. For it is written, "Blessed are they whose iniquities are forgiven, whose sins are covered. Blessed is the man to whom the Lord will not impute sin, and in whose mouth there is no fraud. This blessedness came on those who had been chosen by Cod through Jesus Christ our Lord. For "love hides the multitude of sins." And they are blotted out by Him "who desireth the repentance rather than the death of a sinner." And those are not reckoned that are not the effect of choice; "for he who has lusted has already committed adultery," it is said. And the illuminating Word forgives sins: "And in that time, saith the Lord, they shall seek for the iniquity of Israel, and it shall not exist; and the sins of Judah, and they shall not be found.' "For who is like Me? and who shall stand before My face? You see the one God declared good, rendering according to desert, and forgiving sins. John, too, manifestly teaches the differences of sins, in his larger Epistle, in these words: "If any man see his brother sin a sin that is not unto death, he shall ask, and he shall give him life: for these that sin not unto death," he says. For "there is a sin unto death: I do not say that one is to pray for it. All unrighteousness is sin; and there is a sin not unto death.'

David, too, and Moses before David, show the knowledge of the three precepts in the following words: "Blessed is the man who walks not in the counsel of the ungodly:" as the fishes go down to the depths in darkness; for those which have not scales, which Moses prohibits touching, feed at the bottom of the sea. "Nor standeth in the way of sinners," as those who, while appearing to fear the Lord, commit sin, like the sow, for when hungry it cries, and when full knows not its owner. "Nor sitteth in the chair of pestilences," as birds ready for prey. And Moses enjoined not to eat the sow, nor the eagle. nor the hawk, nor the raven, nor any fish without scales. So far Barnabas. And I heard one skilled in such matters say that "the counsel of the ungodly" was the heathen, and "the way of sinners" the Jewish persuasion, and explain "the chair of pestilence" of heresies. And another said, with more propriety that the first blessing was assigned to those who had not followed wicked sentiments which revolt from God; the second to those who do not remain in the wide and broad road, whether they be those who have been brought up in the law, or Gentiles who have repented. And "the chair of pestilences" will be the theatres and tribunals, or rather the compliance with wicked and deadly powers, and complicity with their deeds. "But his delight is in the law of the Lord." Peter in his Preach ing called the Lord, Law and Logos. The legislator seems to teach differently the interpretation of the three forms of sin -- understanding by the mute fishes sins of word, for there are times in which silence is better than speech, far silence has a safe recompense; sins of deed, by the rapacious and carnivorous birds. The sow delights in dirt and dung; and we ought not to have "a conscience" that is "defiled.

Justly, therefore, the prophet says, "The ungodly are not so: but as the chaff which the wind driveth away from the face of the earth. Wherefore the ungodly shall not stand in the judgment" (being already condemned, for "he that believeth not is condemned already"), "nor sinners in the counsel of the righteous," inasmuch as they are already condemned, so as not to be united to those that have lived without stumbling. "For the Lord knoweth the way of the righteous; and the way of the ungodly shall perish."

Again, the Lord clearly shows sins and transgressions to be in our own power, by prescribing modes of cure corresponding to the maladies; showing His wish that we should be Corrected by the shepherds, in Ezekiel; blaming, I am of opinion, some of them for not keeping the commandments. "That which was enfeebled ye have not strengthened," and so forth, down to, "and there was none to search out or turn away." For "great is the joy before the Father when one sinner is saved," saith the Lord. So Abraham was much to be praised, because "he walked as the Lord spake to him." Drawing from this instance, one of the wise men among the Greeks uttered the maxim, "Follow God." "The godly," says Esaias, "framed wise counsels." Now counsel is seeking for the right way of acting in present circumstances, and good counsel is wisdom in our counsels. And what?

Does not God, after the pardon bestowed on Cain, suitably not long after introduce Enoch, who had repented? showing that it is the nature of repentance to produce pardon; but pardon does not consist in remission, but in remedy. An instance of the same is the making of the calf by the people before Aaron. Thence one of the wise men among the Greeks uttered the maxim, "Pardon is better than punishment;" as also, "Become surety, and mischief is at hand," is derived from the utterance of Solomon which says, "My son, if thou become surety for thy friend, thou wilt give thine hand to thy enemy; for a man's own lips are a strong snare to him, and he is taken in the words of his own mouth." And the saying, "Know thyself," has been taken rather more mystically from this, Thou hast seen thy brother, thou hast seen thy God." Thus "Thou shalt love the Load thy God with all thy heart, also. and thy neighbour as thyself;" for it is said, "On these commandments the law and the prophets hang and are suspended." With these also agree the following: "These things have I spoken to you, that My joy might be fulfilled: and this is My commandment, That ye love one another, as I have loved you." "For the Lord is merciful and pitiful; and gracious is the Lord to all." "Know thyself" is more clearly and often expressed by Moses, when he enjoins, "Take heed to thyself." "By alms then, and acts of faith, sins are purged." 'And by the fear of the Lord each one departs from evil." 'And the fear of the Lord is instruction and wisdom.'

CHAPTER 16 -- HOW WE ARE TO EXPLAIN THE PASSAGES OF SCRIPTURE WHICH ASCRIBE TO GOD HUMAN AFFECTIONS.

Here again arise the cavaliers, who say that joy and pain are passions of the soul: for they define joy as a rational elevation and exultation, as rejoicing on account of what is good; and pity as pain for one who suffers undeservedly; and that such affections are moods and passions of the soul. But we, as would appear, do not cease in such matters to understand the Scriptures carnally; and starting from our own affections, interpret the will of the impassible Deity similarly to our perturbations; and as we are capable of hearing; so, supposing the same to be the case with the Omnipotent err impiously. For the Divine Being cannot be declared as it exists: but as we who are lettered in the flesh were able to listen, so the prophets spake to us; the Lord savingly accommodating Himself to the weakness of men. Since, then, it is the will of God that he, who is obedient to the commands and repents of his sins should be saved, and we rejoice on account of our salvation, the Lord, speaking by the prophets, appropriated our joy to Himself; as speaking lovingly in the Gospel He says, "I was hungry, and ye gave Me to eat: I was thirsty, and ye gave Me to drink. For inasmuch as ye did it to one of the least of these, ye did it to Me." As, then, He is nourished, though not personally, by the nourishing of one whom He wishes nourished; so He rejoices, without suffering change, by reason of him who has repented being in joy, as He wished. And since God pities richly, being good, and giving commands by the law and the prophets, and more nearly still by the appearance of his Son, saving and pitying, as was said, those who have found mercy; and properly the greater pities the less; and a man cannot be greater than man, being by nature man; but God in everything is greater than man; if, then, the greater pities the less, it is God alone that will pity us. For a man is made to communicate by righteousness, and bestows what he received from God, in consequence of his natural benevolence and relation, and the commands which he obeys. But God has no natural relation to us, as the authors of the heresies will have it; neither on the supposition of His having made us of nothing, nor on that of having formed us from matter; since the former did not exist at all, and the latter is totally distinct from God unless we shall dare to say that we are a part of Him, and of the same essence as God. And I know not how one, who knows God, can bear to hear this when he looks to our life, and sees in what evils we are involved. For thus it would turn out, which it were impiety to utter, that God sinned in [certain] portions, if the portions are parts of the whole and complementary of the whole; and if not complementary, neither can they be parts. But God being by nature rich in pity, in consequence of His own goodness, cares for us, though neither portions of Himself, nor by nature His children. And this is the greatest proof of the goodness of God: that such being our relation to Him, and being by nature wholly estranged. He nevertheless cares for us. For the affection in animals to their progeny is natural, and the friendship of kindred minds is the result of intimacy. But the mercy of God is rich toward us, who are in no respect related to Him; I say either in our essence or nature, or in the peculiar energy of our essence, but only in our being the work of His will. And

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3110 him who willingly, with discipline and teaching, accepts the knowledge of the truth, He calls to adoption, which is the greatest advancement of all. "Transgressions catch a man; and in the cords of his own sins each one is bound." And God is without blame. And in reality, "blessed is the man who feareth alway through piety."

CHAPTER 17 -- ON THE VARIOUS KINDS OF KNOWLEDGE.

As, then, Knowledge (episthmh) is an intellectual state, from which results the act of knowing, and becomes apprehension irrefragable by reason; so also ignorance is a receding impression, which can be dislodged by reason. And that which is overthrown as well as that which is elaborated by reason, is in our power. Akin to Knowledge is experience, cognition (eidhsis), Comprehension (sunesis), perception, and Science. Cognition (eidhsis) is the knowledge of universals by species; and Experience is comprehensive knowledge, which investigates the nature of each thing. Perception (nohsis) is the knowledge of intellectual objects; and Comprehension (sunesis) is the knolwedge of what is compared, or a comparison that cannot be annulled, or the faculty of comparing the objects with which Judgment and Knowledge are occupied, both of one and each and all that goes to make up one reason. And Science (gnwsis) is the knowledge of the thing in itself, or the knowledge which harmonizes with what takes place. Truth is the knowledge of the true; and the mental habit of truth is the knowledge of the things which are true. Now knowledge is constituted by the reason, and cannot be overthrown by another reason. What we do not, we do not either from not being able, or not being willing -- or both. Accordingly we don't fly, since we neither can nor wish; we do not swim at present, for example, since we can indeed, but do not choose; and we are not as the Lord, since we wish, but cannot be: "for no disciple is above his master, and it is sufficient if we be as the master:" not m essence (for it is impossible for that, which is by adoption, to be equal in substance to that, which is by nature); but [we are as Him] only in our having been made immortal, and our being conversant with the contemplation of realities, and beholding the Father through what belongs to Him.

Therefore volition takes the precedence of all; for the intellectual powers are ministers of the Will. "Will," it is said, "and thou shalt be able." And in the Gnostic, Will, Judgment, and Exertion are identical. For if the determinations are the same, the opinions and judgments will be the same too; so that both his words, and life, and conduct, are conformable to rule. "And a right heart seeketh knowl edge, and heareth it." "God taught me wisdom, and I knew the knowledge of the holy."

CHAPTER 18 -- THE MOSAIC LAW THE FOUNTAIN OF ALL ETHICS, AND THE SOURCE FROM WHICH THE GREEKS DREW THEIRS.

It is then clear also that all the other virtues, delineated in Moses, supplied the Greeks with the rudiments of the whole department of morals. I mean valour, and temperance, and wisdom, and justice, and endurance, and patience, and decorum, and self-restraint; and in addition to these, piety.

But it is clear to every one that piety, which teaches to worship and honour, is the highest and oldest cause; and the law itself exhibits justice, and teaches wisdom, by abstinence from sensible images, and by inviting to the Maker and Father of the universe. And from this sentiment, as from a fountain, all intelligence increases. "For the sacrifices of the wicked are abomination to the Lord; but the prayers of the upright are acceptable before Him," since "righteousness is more acceptable before God than sacrifice." Such also as the following we find in Isaiah: "To what purpose to me is the multitude of your sacrifices? saith the Lord;" and the whole section. "Break every bond of wickedness; for this is the sacrifice that is acceptable to the Lord, a contrite heart that seeks its Maker." "Deceitful balances are abomination before God; but a just balance is acceptable to Him." Thence Pythagoras exhorts "not to step over the balance;" and the profession of heresies is called deceitful righteousness; and the tongue of the unjust shall be destroyed, but the mouth of the righteous droppeth wisdom." "For they call the wise and prudent worthless." But it were tedious to adduce testimonies respecting these virtues, since the whole Scripture celebrates them. Since, then, they define manliness to be knowledge of things formidable, and not formidable, and what is intermediate; and temperance to be a state of mind which by choosing and avoiding preserves the judgments of wisdom; and conjoined with manliness is patience, which is called endurance, the knowledge of what is bearable and what is unbearable; and magnanimity is the knowledge which rises superior to circumstances. With temperance also is conjoined caution which is avoidance in accordance with reason And observance of the commandments, which is the innoxious keeping of them, is the attainment of a secure life. And there is no endurance without manliness, nor the exercise of selfrestraint without temperance. And these virtues follow one another; and with whom are the sequences of the virtues, with

him is also salvation, which is the keeping of the state of wellbeing. Rightly, therefore, in treating of these virtues, we shall inquire into them all; for he that has one virtue gnostically. by reason of their accompanying each other, has them all Self-restraint is that quality which does not overstep what appears in accordance with right reason. He exercises selfrestraint, who curbs the impulses that are contrary to right reason, or curbs himself so as not to indulge in desires contrary to right reason. Temperance, too, is not without manliness; since from the commandments spring both wisdom, which follows God who enjoins, and that which imitates the divine character, namely righteousness; in virtue of which, in the exercise of self-restraint, we address ourselves in purity to piety and the course of conduct thence resulting, in conformity with God; being assimilated to the Lord as far as is possible for us beings mortal in nature. And this is being just and holy with wisdom; for the Divinity needs nothing and suffers nothing; whence it is not, strictly speaking, capable of self-restraint, for it is never subjected to perturbation, over which to exercise control; while our nature, being capable of perturbation, needs self-constraint, by which disciplining itself to the need of little, it endeavours to approximate in character to the divine nature. For the good man, standing as the boundary between an immortal and a mortal nature, has few needs; having wants in consequence of his body, and his birth itself, but taught by rational self-control to want few things

What reason is there in the law's prohibiting a man from "wearing woman's clothing "? Is it not that it would have us to be manly, and not to be effeminate neither in person and actions, nor in thought and word? For it would have the man, that devotes himself to the truth, to be masculine both in acts of endurance and patience, in life, conduct, word, and discipline by night and by day; even if the necessity were to occur, of witnessing by the shedding of his blood. Again, it is said. "If any one who has newly built a house, and has not previously inhabited it; or cultivated a newly-planted vine, and not yet partaken of the fruit; or betrothed a virgin, and not yet married her;" -- such the humane law orders to be relieved from military service: from military reasons in the first place, lest, bent on their desires, they turn out sluggish in war: for it is those who are untrammelled by passion that boldly encounter perils; and from motives of humanity, since, in view of the uncertainties of war, the law reckoned it not right that one should not enjoy his own labours, and another should without bestowing pains, receive what belonged to those who had laboured. The law seems also to point out manliness of soul, by enacting that he who had planted should reap the fruit, and he that built should inhabit, and he that had betrothed should marry: for it is not vain hopes which it provides for those who labour; according to the gnostic word: "For the hope of a good man dead or living does not perish," says Wisdom; "I love them that love me; and they who seek me shall find peace," and so forth. What then? Did not the women of the Midianites, by their beauty, seduce from wisdom into impiety, through licentiousness, the Hebrews when making war against them? For, having seduced them from a grave mode of life, and by their beauty ensnared them in wanton delights, they made them insane upon idol sacrifices and strange women; and overcome by women and by pleasure at once, they revolted from God, and revolted from the law. And the whole people was within a little of falling under the power of the enemy through female stratagem, until when they were in peril, fear by its admonitions pulled them back. Then the survivors, valiantly undertaking the struggle for piety, got the upper hand of their foes. "The beginning, then, of wisdom is piety, and the knowledge of holy things is understanding; and to know the law is the characteristic of a good understanding." Those, then, who suppose the law to be productive of agitating fear, are neither good at understanding the law, nor have they in reality comprehended it; for "the fear of the Lord causes life, but he who errs shall be afflicted with pangs which knowledge views not." Accordingly, Barnabas says mystically, "May God who rules the universe vouchsafe also to you wisdom, and understanding, and science, and knowledge of His statutes, and patience. Be therefore God-taught, seeking what the Lord seeks from you, that He may find you in the day of judgment lying in wait for these things.

"Children of love and peace," he called them gnostically. Respecting imparting and communicating, though much might be said, let it suffice to remark that the law prohibits a brother from taking usury: designating as a brother not only him who is born of the same parents, but also one of the same race and sentiments, and a participator in the same word; deeming it right not to take usury for money, but with open hands and heart to bestow on those who need. For God, the author and the dispenser of such grace, takes as suitable usury the most precious things to be found among men -- mildness, gentleness, magnanimity, reputation, renown. Do you not regard this command as marked by philanthropy? As also the following, "To pay the wages of the poor daily," teaches to discharge without delay the wages due for service; for, as I think, the alacrity of the poor with reference to the future is paralyzed when he has suffered want. Further, it is said. "Let not the creditor enter the debtor's house to take the pledge with violence." But let the former ask it to be brought out, and let not the latter, if he have it, hesitate. And in the harvest the owners are prohibited from appropriating what falls from the handfuls; as also in reaping [the law] enjoins a part to be left unreaped; signally thereby training those who possess to sharing and to large-heartedness, by foregoing of their own to those who are in want, and thus providing means of subsistence for the poor? You see how the law proclaims at once the righteousness and goodness of God, who dispenses food to all ungrudgingly. And in the vintage it prohibited the grape-gatherers from going back again on what had been left, and from gathering the fallen grapes; and the same injunctions are given to the olive-gatherers. Besides, the tithes of the fruits and of the flocks taught both piety towards the Deity, and not covetously to grasp everything, but to communicate gifts of kindness to one's neighbours. For it was from these, I reckon, and from the first-fruits that the priests were maintained. We now therefore understand that we are instructed in piety, and in liberality, and in justice, and in humanity by the law. For does it not command the land to be left fallow in the seventh year, and bids the poor fearlessly use the fruits that grow by divine agency, nature cultivating the ground for behoof of all and sundry? How, then, can it be maintained that the law is not humane, and the teacher of righteousness? Again, in the fiftieth year, it ordered the same things to be performed as in the seventh; besides restoring to each one his own land, if from any circumstance he had parted with it in the meantime; setting bounds to the desires of those who covet possession, by measuring the period of enjoyment, and choosing that those who have paid the penalty of protracted penury should not suffer a life-long punishment. 'But alms and acts of faith are royal guards, and blessing is on the head of him who bestows; and he who pities the poor shall be blessed." For he shows love to one like himself, because of his love to the Creator of the human race. The abovementioned particulars have other explanations more natural, both respecting rest and the recovery of the inheritance; but they are not discussed at present.

Now love is conceived in many ways, in the form of meekness, of mildness, of patience, of liberality, of freedom from envy, of absence of hatred, of forgetfulness of injuries. In all it is incapable of being divided or distinguished: its nature is to communicate. Again, it is said, "If you See the beast of your relatives, or friends, or, in general, of anybody you know, wandering in the wilderness, take it back and restore it; and if the owner be far away, keep it among your own till he return, and restore it." It teaches a natural communication, that what is found is to be regarded as a deposit, and that we are not to bear malice to an enemy. "The command of the Lord being a fountain of life" truly, "causeth to turn away from the snare of death." And what? Does it not command us "to love strangers not only as friends and relatives, but as ourselves, both in body and soul?" Nay more, it honoured the nations, and bears no grudge against those who have done ill. Accordingly it is expressly said, "Thou shalt not abhor an Egyptian, for thou wast a sojourner in Egypt;" designating by the term Egyptian either one of that race, or any one in the world. And enemies, although drawn up before the walls attempting to take the city, are not to be regarded as enemies till they are by the voice of the herald summoned to peace.

Further, it forbids intercourse with a female captive so as to dishonour her. "But allow her," it says, "thirty days to mourn according to her wish, and changing her clothes, associate with her as your lawful wife." s For it regards it not right that this should take place either in wantonness or for hire like harlots, but only for the birth of children. Do you see humanity combined with continence? The master who has fallen in love with his captive maid it does not allow to gratify his pleasure, but puts a check on his lust by specifying an interval of time; and further, it cuts off the captive's hair, in order to shame disgraceful love: for if it is reason that induces him to marry, he will cleave to her even after she has become disfigured. Then if one, after his lust, does not care to consort any longer with the captive, it ordains that it shall not be lawful to sell her, or to have her any longer as a servant, but desires her to be freed and released from service, lest on the introduction of another wife she bear any of the intolerable miseries caused through jealousy.

What more? The Lord enjoins to ease and raise up the beasts of enemies when labouring beneath their burdens; remotely teaching us not to indulge in joy at our neighbour's ills, or exult over our enemies; in order to teach those who are trained in these things to pray for their enemies. For He does not allow us either to grieve at our neighbour's good, or to reap joy at our neighbour's ill. And if you find any enemy's beast straying, you are to pass over the incentives of difference, and take it back and restore it. For oblivion of injuries is followed by goodness, and the latter by dissolution of enmity. From this we are fitted for agreement, and this conducts to felicity. And should you suppose one habitually hostile, and discover him to be unreasonably mistaken either through lust or anger, turn him to goodness. Does the law then which

same God, good, while characterized by righteousness from the beginning to the end, employ each kind suitably in order "Be merciful," says the Lord, "that you may to salvation? receive mercy; forgive, that you may be forgiven. As ye do, so shall it be done to you; as ye give, so shall it be given to you; as ye judge, so shall ye be judged; as ye show kindness, so shall kindness be shown to you: with what measure ye mete, it shall be measured to you again." Furthermore, [the law] prohibits those, who are in servitude for their subsistence, to be branded with disgrace; and to those, who have been reduced to slavery through money borrowed, it gives a complete release in the seventh year. Further, it prohibits suppliants from being given up to punishment. True above all, then, is that oracle. "As gold and silver are tried in the furnace, so the Lord chooseth men's hearts. The merciful man is longsuffering; and in every one who shows solicitude there is wisdom. For on a wise man solicitude will fall; and exercising thought, he will seek life; and he who seeketh God shall find knowledge with righteousness. And they who have sought Him rightly have found peace." And Pythagoras seems to me, to have derived his mildness towards irrational creatures from the law. For instance, he interdicted the immediate use of the young in the flocks of sheep, and goats, and herds of cattle, on the instant of their birth; not even on the pretext of sacrifice allowing it, both on account of the young ones and of the mothers; training man to gentleness by what is beneath him, by means of the irrational creatures. "Resign accordingly," he says. "the young one to its dam for even the first seven days." For if nothing takes place without a cause, and milk comes in a shower to animals in parturition for the sustenance of the progeny, he that tears that, which has been brought forth, away from the supply of the milk, dishonours nature. Let the Greeks, then, feel ashamed, and whoever else inveighs against the law: since it shows mildness in the case of the irrational creatures, while they expose the offspring of men though long ago and prophetically, the law, in the above-mentioned commandment, threw a check in the way of their cruelty. For if it prohibits the progeny of the irrational creatures to be separated from the dam before sucking, much more in the case of men does it provide beforehand a cure for cruelty and savageness of disposition: so that even if they despise nature. they may not despise teaching. For they are permitted to satiate themselves with kids and lambs, and perhaps there might be some excuse for separating the progeny from its dam. But what cause is there for the exposure of a child? For the man who did not desire to beget children had no right to marry at first; certainly not to have become, through licentious indulgence, the murderer of his children. Again, the humane law forbids slaying the offspring and the dam together on the same day. Thence also the Romans, in the case of a pregnant woman being condemned to death, do not allow her to undergo punishment till she is delivered. The law too, expressly prohibits the slaying of such animals as are pregnant till they have brought forth, remotely restraining the proneness of man to do wrong to man. Thus also it has extended its clemency to the irrational creatures; that from the exercise of humanity in the case of creatures of different species, we might practise among those of the same species a large abundance of it. Those, too, that kick the bellies of certain animals before parturition, in order to feast on flesh mixed with milk, make the womb created for the birth of the foetus its grave, though the law expressly commands, "But neither shalt thou see the a lamb in its mother's milk." For the nourishment of the living animal, it is meant, may not become sauce for that which has been deprived of life; and that, which is the cause of life, may not co-operate in the consumption of the body. And the same law commands "not to muzzle the ox which treadeth out the corn: for the labourer must be reckoned worthy of his food.'

conducts to Christ appear humane and mild? And does not the

And it prohibits an ox and ass to be yoked in the plough together; pointing perhaps to the want of agreement in the case of the animals; and at the same time teaching not to wrong any one belonging to another race, and bring him under the yoke, when there is no other cause to allege than difference of race, which is no cause at all, being neither wickedness nor the effect of wickedness. To me the allegory also seems to signify that the husbandry of the Word is not to be assigned equally to the clean and the unclean, the believer and the unbeliever; for the ox is clean, but the ass has been reckoned among the unclean animals. But the benignant Word, abounding in humanity, teaches that neither is it right to cut down cultivated trees, or to cut down the grain before the harvest, for mischiefs sake; nor that cultivated fruit is to be destroyed at all -- either the fruit of the soil or that of the soul: for it does not permit the enemy's country to be laid waste.

Further, husbandmen derived advantage from the law in such things. For it orders newly planted trees to be nourished three years in succession, and the superfluous growths to be cut off, to prevent them being loaded and pressed down; and to prevent their strength being exhausted from want, by the nutriment being frittered away, enjoins tilling and digging round them, so that [the tree] may not, by sending out suckers, hinder its growth. And it does not allow imperfect fruit to be plucked from immature trees, but after three years, in the fourth year; dedicating the first-fruits to God after the tree has attained maturity.

This type of husbandry may serve as a mode of instruction, teaching that we must cut the growths of sins, and the useless weeds of the mind that spring up round the vital fruit, till the shoot of faith is perfected and becomes strong. For in the fourth year, since there is need of time to him that is being solidly catechized, the four virtues are consecrated to God, the third alone being already joined to the fourth, the person of the Lord. And a sacrifice of praise is above holocausts: "for He," it is said, "giveth strength to get power." And if your affairs are in the sunshine of prosperity, get and keep strength, and acquire power in knowledge. For by these instances it is shown that both good things and gifts are supplied by God; and that we, becoming ministers of the divine grace, ought to sow the benefits of God, and make those who approach us noble and good; so that, as far as possible, the temperate man may make others continent, he that is manly may make them noble, he that is wise may make them intelligent, and the just may make them just.

CHAPTER 19 -- THE TRUE GNOSTIC IS AN IMITATOR OF GOD, ESPECIALLY IN BENEFICENCE.

He is the Gnostic, who is after the image and likeness of God, who imitates God as far as possible, deficient in none of the things which contribute to the likeness as far as compatible, practising self-restraint and endurance, living righteously, reigning over the passions, bestowing of what he has as far as possible, and doing good both by word and deed. "He is the greatest," it is said, "in the kingdom who shall do and teach;" imitating God in conferring like benefits. For God's gifts are for the common good. "Whoever shall attempt to do aught with presumption, provokes God," it is said. For haughtiness is a vice of the soul, of which, as of other sins, He commands us to repent; by adjusting our lives from their state of derangement to the change for the better in these three things -- mouth, heart, hands. These are signs -- the hands of action, the heart of volition, the mouth of speech. Beautifully, therefore, has this oracle been spoken with respect to penitents: "Thou hast chosen God this day to be thy God: and God hath chosen thee this day to be His people." For him who hastes to serve the self-existent One, being a suppliant, God adopts to Himself; and though he be only one in number, he is honoured equally with the people. For being a part of the people, he becomes complementary of it, being restored from what he was: and the whole is named from a part

But nobility is itself exhibited in choosing and practising what is best. For what benefit to Adam was such a nobility as he had? No mortal was his father; for he himself was father of men that are born. What is base he readily chose, following his wife, and neglected what is true and good; on which account he exchanged his immortal life for a mortal life, but not for ever. And Noah, whose origin was not the same as Adam's, was saved by divine care, For he took and consecrated himself to God. And Abraham, who had children by three wives, not for the indulgence of pleasure, but in the hope, as I think, of multiplying the race at the first, was succeeded by one alone, who was heir of his father's blessings, while the rest were separated from the family; and of the twins who sprang from him, the younger having won his father's favour and received his prayers, became heir, and the eider served him. For it is the greatest boon to a bad man not to be master of himself.

And this arrangement was prophetical and typical. And that all things belong to the wise, Scripture clearly indicates when it is said, "Because God hath had mercy on me, I have all things." For it teaches that we are to desire one thing, by which are all things, and what is promised is assigned to the worthy. Accordingly, the good man who has become heir of the kingdom, it registers also as fellow-citizen, through divine wisdom, with the righteous of the olden time, who under the law and before the law lived according to law, whose deeds have become laws to us; and again, teaching that the wise man is king, introduces people of a different race, saying to him, "Thou art a king before God among us;" those who were governed obeying the good man of their own accord, from admiration of his virtue.

Now Plato the philosopher, defining the end of happiness, says that it is likeness to God as far as possible; whether concurring with the precept of the law (for great natures that are free of passions somehow hit the mark respecting the truth, as the Pythagorean Philo says in relating the history of Moses), or whether instructed by certain oracles of the time, thirsting as he always was for instruction. For the law says, "Walk after the Lord your God, and keep my commandments." For the law calls assimilation following; and such a following to the utmost of its power assimilates. "Be," says the Lord, "merciful and pitiful, as your heavenly Father is pitiful." Thence also the Stoics have laid down the doctrine, that living agreeably to nature is the end, fitly altering the name of God into nature; since also nature extends to plants, to seeds, to trees, and to stones. It is therefore plainly said, "Bad men do not understand the law; but they who love the law fortify themselves with a wall." "For the wisdom of the clever knows its ways; but the folly of the foolish is in error." "For on whom will I look, but on him who is mild and gentle, and trembleth at my words?" says the prophecy.

We are taught that there are three kinds of friendship: and that of these the first and the best is that which results from virtue, for the love that is founded on reason is firm; that the second and intermediate is by way of recompense, and is social, liberal, and useful for life; for the friendship which is the result of favour is mutual.

And the third and last we assert to be that which is founded on intimacy; others, again, that it is that variable and changeable form which rests on pleasure. And Hipppodamus the Pythagorean seems to me to describe friendships most admirably: "That founded on knowledge of the gods, that founded on the gifts of men, and that on the pleasures of animals." There is the friendship of a philosopher, -- that of a man and that of an animal. For the image of God is really the man who does good, in which also he gets good: as the pilot at once saves, and is saved. Wherefore, when one obtains his request, he does not say to the giver, Thou hast given well, but, Thou hast received well. So he receives who gives, and he gives who receives. "But the righteous pity and show mercy." "But the mild shall be inhabitants of the earth, and the innocent shall be left in it. But the transgressors shall be extirpated from it." And Homer seems to me to have said prophetically of the faithful, "Give to thy friend." And an enemy must be aided, that he may not continue an enemy. For by help good feeling is compacted, and enmity dissolved. "But if there be present readiness of mind, according to what a man hath it is acceptable, and not according to what he hath not: for it is not that there be ease to others, but tribulation to you, but of equality at the present time," and so forth. "He hath dispersed, he hath given to the poor; his righteousness endureth for ever," the Scripture says. For conformity with the image and likeness is not meant of the body (for it were wrong for what is mortal to be made like what is immortal), but in mind and reason, on which fitly the Lord impresses the seal of likeness, both in respect of doing good and of exercising rule. For governments are directed not by corporeal qualities, but by judgments of the mind. For by the counsels of holy men states are managed well, and the household also.

CHAPTER 20 -- THE TRUE GNOSTIC EXERCISES PATIENCE AND SELF-RESTRAINT.

Endurance also itself forces its way to the divine likeness. reaping as its fruit impassibility. through patience, if what is related of Ananias be kept in mind; who belonged to a number, of whom Daniel the prophet, filled with divine faith, was one. Daniel dwelt at Babylon, as Lot at Sodom, and Abraham, who a little after became the friend of God, in the land of Chaldea. The king of the Babylonians let Daniel down into a pit full of wild beasts; the King of all, the faithful Lord, took him up unharmed. Such patience will the Gnostic, as a Gnostic, possess. He will bless when under trial, like the noble Job; like Jonas, when swallowed up by the whale, he will pray, and faith will restore him to prophesy to the Ninevites; and though shut up with lions, he will tame the wild beasts; though cast into the fire, he will be besprinkled with dew, but not consumed. He will give his testimony by night; he will testify by day; by word, by life, by conduct, he will testify. Dwelling with the Lord? he will continue his familiar friend, sharing the same hearth according to the Spirit; pure in the flesh, pure in heart, sanctified in word. "The world," it is said, "is crucified to him, and he to the world." He, bearing about the cross of the Saviour, will follow the Lord's footsteps, as God, having become holv of holies.

The divine law, then, while keeping in mind all virtue, trains man especially to self-restraint, laying this as the foundation of the virtues; and disciplines us beforehand to the attainment of self-restraint by forbidding us to partake of such things as are by nature fat, as the breed of swine, which is full-fleshed. For such a use is assigned to epicures. It is accordingly said that one of the philosophers, giving the etymology of us (sow), said that it was qus, as being fit only for slaughter (qusin) and killing; for life was given to this animal for no other purpose than that it might swell in flesh. Similarly, repressing our desires, it forbade partaking of fishes which have neither fins nor scales; for these surpass other fishes in fleshiness and fatness. From-this it was, in my opinion, that the mysteries not only prohibited touching certain animals, but also withdrew certain parts of those slain in sacrifice, for reasons which are known to the initiated. If, then, we are to exercise control over the belly, and what is below the belly, it is clear that we have of old heard from the Lord that we are to check lust by the law

And this will be completely effected, if we unfeignedly condemn what is the fuel of lust. I mean pleasure. Now they say that the idea of it is a gentle and bland excitement, accompanied with some sensation. Enthralled by this, Menelaus, they say, after the capture of Troy, having rushed to put Helen to death, as having been the cause of such calamities, was nevertheless not able to effect it, being subdued by her beauty, which made him think of pleasure. Whence the tragedians, jeering, exclaimed insultingly against him: "But thou, when on her breast thou lookedst, thy sword Didst cast away, and with a kiss the traitress, Ever-beauteous wretch, thou didst embrace."

And again: Was the sword then by beauty blunted?"

And I agree with Antisthenes when he says, "Could I catch Aphrodite, I would shoot her; for she has destroyed many of our beautiful and good women." And he says that "Love is a vice of nature, and the wretches who fall under its power call the disease a deity." For in these words it is shown that stupid people are overcome from ignorance of pleasure, to which we ought to give no admittance, even though it be called a god. that is, though it be given by God for the necessity of procreation. And Xenophon, expressly calling pleasure a vice, "Wretch, what good dost thou know, or what savs: honourable aim hast thou? which does not even wait for the appetite for sweet things, eating before being hungry, drinking before being thirsty; and that thou mayest eat pleasantly, seeking out fine cooks; and that thou mayest drink pleasantly, procuring costly wines; and in summer runnest about seeking snow; and that thou mayest sleep pleasantly, not only providest soft beds, but also supports to the couches." Whence, as Aristo said, "against the whole tetrachord of pleasure, pain, fear, and lust, there is need of much exercise and struggle."

"For it is these, it is these that go through our bowels, And throw into disorder men's hearts."

"For the minds of those even who are deemed grave, pleasure makes waxen," according to Plato; since "each pleasure and pain nails to the body the soul" of the man, that does not sever and crucify himself from the passions. "He that loses his life," says the Lord, "shall save it;" either giving it up by exposing it to danger for the Lord's sake, as He did for us, or loosing it from fellowship with its habitual life. For if you would loose, and withdraw, and separate (for this is what the cross means) your soul from the delight and pleasure that is in this life, you will possess it, found and resting in the lookedfor hope. And this would be the exercise of death, if we would be content with those desires which are measured according to nature alone, which do not pass the limit of those which are in accordance with nature -- by going to excess, or going against nature -- in which the possibility of sinning arises. "We must therefore put on the panoply of God, that we may be able to stand against the wiles of the devil; since the weapons of our war fire are not carnal, but mighty through God to the pulling down of strongholds, casting down reasonings, and every lofty thing which exalteth itself against the knowledge of God, and bringing every thought into captivity unto the obedience of Christ," says the divine apostle. There is need of a man who shall use in a praiseworthy and discriminating manner the things from which passions take their rise, as riches and poverty, honour and dishonour, health and sickness, life and death, toil and pleasure. For, in order that we may treat things, that are different, indifferently, there is need of a great difference in us, as having been previously afflicted with much feebleness, and in the distortion of a bad training and nurture ignorantly indulged ourselves. The simple word, then, of our philosophy declares the passions to be impressions on the soul that is soft and yielding, and, as it were, the signatures of the spiritual powers with whom we have to straggle. For it is the business, in my opinion, of the malificent powers to endeavour to produce somewhat of their own constitution in everything, so as to overcome and make their own those who have renounced them. And it follows as might be expected, that some are worsted; but in the case of those who engage in the contest with more athletic energy, the powers mentioned above, after carrying on the conflict in all forms, and advancing even as far as the crown wading in gore, decline the battle, and admire the victors.

For of objects that are moved, some are moved by impulse and appearance, as animals; and some by transposition, as inanimate objects. And of things without life, plants, they say, are moved by transposition in order to growth, if we will concede to them that plants are without life. To stones, then, belongs a permanent state. Plants have a nature; and the irrational animals possess impulse and perception, and likewise the two characteristics already specified. But the reasoning faculty, being peculiar to the human soul, ought not to be impelled similarly with the irrational animals, but ought to discriminate appearances, and not to be carried away by them. The powers, then, of which we have spoken hold out beautiful sights, and honours, and adulteries, and pleasures, and such like alluring phantasies before facile spirits; as those who drive away cattle hold, out branches to them. Then, having beguiled those incapable of distinguishing the true from the false pleasure, and the fading and meretricious from the holy beauty, they lead them into slavery. And each deceit, by pressing constantly on the spirit, impresses its image on it; and the soul unwittingly carries about the image of the passion, which takes its rise from the bait and our consent

The adherents of Basilides are in the habit of calling the passions appendages: saving that these are in essence certain spirits attached to the rational soul, through some original perturbation and confusion; and that, again, other bastard and heterogeneous natures of spirits grow on to them, like that of the wolf, the ape, the lion, the goat, whose properties showing themselves around the soul, they say, assimilate the lusts of the soul to the likeness of the animals. For they imitate the actions of those whose properties they bear. And not only are they associated with the impulses and perceptions of the irrational animals, but they affect the motions and the beauties of plants, on account of their bearing also the properties of plants attached to them. They have also the properties of a particular state, as the hardness of steel. But against this dogma we shall argue subsequently, when we treat of the soul. At present this only needs to be pointed out, that man, according to Basilides, preserves the appearance of a wooden horse, according to the poetic myth, embracing as he does in one body a host of such different spirits. Accordingly, Basilides' son himself, Isidorus, in his book, About the Soul attached to us, while agreeing in the dogma, as if condemning himself, writes in these words: "For if I persuade any one that the soul is undivided, and that the passions of the wicked are occasioned by the violence of the appendages, the worthless among men will have no slight pretence for saying,' I was compelled, I was carried away, I did it against my will, I acted unwillingly;' though he himself led the desire of evil things, and did not fight against the assaults of the appendages. But we must, by acquiring superiority in the rational part, show ourselves masters of the inferior creation in us." For he too lays down the hypothesis of two souls in us, like the Pythagoreans, at whom we shall glance afterwards

Valentinus too, in a letter to certain people, writes in these very words respecting the appendages: "There is one good, by whose presence is the manifestation, which is by the Son, and by Him alone can the heart become pure, by the expulsion of every evil spirit from the heart: for the multitude of spirits dwelling in it do not suffer it to be pure; but each of them performs his own deeds, insulting it oft with unseemly lusts. And the heart seems to be treated somewhat like a caravanserai. For the latter has holes and ruts made in it, and is often filled with dung; men living filthily in it, and taking no care for the place as belonging to others. So fares it with the heart as long as there is no thought taken for it, being unclean, and the abode of many demons. But when the only good Father visis it, it is sanctified, and gleams with light. And he who possesses such a heart is so blessed, that "he shall see God."

What, then, let them tell us, is the cause of such a soul not being cared for from the beginning? Either that it is not worthy (and somehow a care for it comes to it as from repentance), or it is a saved nature, as he would have it; and this, of necessity, from the beginning, being cared for by reason of its affinity, afforded no entrance to the impure spirits, unless by being forced and found feeble. For were he to grant that on repentance it preferred what was better, he will say this unwillingly, being what the truth we hold teaches; namely, that salvation is from a change due to obedience, but not from nature. For as the exhalations which arise from the earth, and from marshes, gather into mists and cloudy masses; so the vapours of fleshly lusts bring on the soul an evil condition, scattering about the idols of pleasure before the soul. Accordingly they spread darkness over the light of intelligence, the spirit attracting the exhalations that arise from lust, and thickening the masses of the passions by persistency in pleasures. Gold is not taken from the earth in the lump, but is purified by smelting; then, when made pure it is called gold, the earth being purified. For "Ask, and it shall be given you," it is said to those who are able of themselves to choose what is best. And how we say that the powers of the devil, and the unclean spirits, sow into the sinner's soul, requires no more words from me, on adducing as a witness the apostolic Barnabas (and he was one of the seventy? and a fellow-worker of Paul), who speaks in these words: "Before we believed in God, the dwelling-place of our heart was unstable, truly a temple built with hands

For it was full of idolatry, and was a house of demons, through doing what was opposed to God."

He says, then, that sinners exercise activities appropriate to demons; but he does not say that the spirits themselves dwell in the soul of the unbeliever. Wherefore he also adds, "See that the temple of the Lord be gloriously built. Learn, having received remission of sins; and having set our hope on the Name, let us become new, created again from the beginning." For what he says is not that demons are driven out of us, but that the sins which like them we commit before believing are remitted. Rightly thus he puts in opposition what follows: "Wherefore God truly dwells in our home. He dwells in us. How? The word of His faith, the calling of His promise, the wisdom of His statutes, the commandments of His communication, [dwell in us]."

"I know that I have come upon a heresy; and its chief was wont to say that he fought with pleasure by pleasure, this worthy Gnostic advancing on pleasure in reigned combat, for he said he was a Gnostic; since he said it was no great thing for a man that had not tried pleasure to abstain from it, but for one who had mixed in it not to be overcome [was something]; and that therefore by means of it he trained himself in it. The wretched man knew not that he was deceiving himself by the artfulness of voluptuousness. To this opinion, then, manifestly Aristippus the Cyrenian adhered -that of the sophist who boasted of the truth. Accordingly, when reproached for continually cohabiting with the Corinthian courtezan, he said, "I possess Lais, and am not possessed by her."

Such also are those (who say that they follow Nicolaus, quoting an adage of the man, which they pervert, "that the flesh must be abused." But the worthy man showed that it was necessary to check pleasures and lusts, and by such training to waste away the impulses and propensities of the flesh. But they, abandoning themselves to pleasure like goats, as if insulting the body, lead a life of self-indulgence; not knowing that the body is wasted, being by nature subject to dissolution; while their soul is buffed in the mire of vice; following as they do the teaching of pleasure itself, not of the apostolic man. For in what do they differ from Sardanapalus, whose life is shown in the epigram: "I have what I ate -- what I enjoyed wantonly; And the pleasures I felt in love. But those Many objects of happiness are left, For I too am dust, who ruled great Ninus."

For the feeling of pleasure is not at all a necessity, but the accompaniment of certain natural needs -- hunger, thirst, cold, marriage. If, then, it were possible to drink without it, or take food, or beget children, no other need of it could be shown. For pleasure is neither a function, nor a state, nor any part of us; but has been introduced into life as an auxiliary, as they say salt was to season food. But when it casts off restraint and rules the house, it generates first concupiscence, which is an irrational propension and impulse towards that which gratifies it; and it induced Epicurus to lay down pleasure as the aim of the philosopher. Accordingly he deifies a sound condition of body, and the certain hope respecting it. For what else is luxury than the voluptuous gluttony and the superfluous abundance of those who are abandoned to selfindulgence? Diogenes writes significantly in a tragedy: "Who to the pleasures of effeminate And filthy luxury attached in heart, Wish not to undergo the slightest toil.

And what follows, expressed indeed in foul language, but in a manner worthy of the voluptuaries.

Wherefore the divine law appears to me necessarily to menace with fear, that, by caution and attention, the philosopher may acquire and retain absence of anxiety. continuing without fall and without sin in all things. For peace and freedom are not otherwise won, than by ceaseless and unyielding struggles with our lusts. For these stout and Olympic antagonists are keener than wasps, so to speak; and Pleasure especially, not by day only, but by night, is in dreams with witchcraft ensnaringly plotting and biting. How, then, can the Greeks any more be right in running down the law when they themselves teach that Pleasure is the slave of fear? Socrates accordingly bids "people guard against enticements to eat when they are not hungry, and to drink when not thirsty, and the glances and kisses of the fair, as fitted to inject a deadlier poison than that of scorpions and spiders." And Antisthenes chose rather "to be demented than delighted." And the Theban Crates says: "Master these, exulting in the disposition of the soul, Vanquished neither by gold nor by languishing love, Nor are they any longer attendants to the wanton."

And at length infers: "Those, unenslaved and unbended by servile Pleasure, Love the immortal kingdom and freedom."

He writes expressly, in other words, "that the stop to the unbridled propensity to amorousness is hunger or a halter."

And the comic poets attest, while they depreciate the teaching of Zeno the Stoic, to be to the following effect: "For he philosophizes a vain philosophy:

He teaches to want food, and gets pupils One loaf, and for seasoning a dry fig, and to drink water."

All these, then, are not ashamed clearly to confess the advantage which accrues from caution. And the wisdom which is trite and not contrary to reason, trusting not in mere words and oracular utterances, but in invulnerable armour of defence and energetic mysteries, and devoting itself to divine commands, and exercise, and practice, receives a divine power according to its inspiration from the Word.

Already, then, the aegis of the poetic Jove is described as "Dreadful, crowned all around by Terror, And on it Strife and Prowess, and chilling Rout; On it, too, the Gorgon's head, dread monster, Terrible, dire, the sign of Ægis-bearing Jove."

But to those, who are able rightly to understand salvation, I know not what will appear dearer than the gravity of the Law, and Reverence, which is its daughter. For when one is said to pitch too high, as also the Lord says, with reference to certain; so that some of those whose desires are towards Him may not sing out of pitch and tune, I do not understand it as pitching too high in reality, but only as spoken with reference to such as will not take up the divine yoke. For to those, who are unstrung and feeble, what is medium seems too high; and to those, who are unrighteous, what befalls them seems severe justice. For those, who, on account of the favour they entertain for sins, are prone to pardon, suppose truth to be harshness, and severity to be savageness, and him who does not sin with them, and is not dragged with them, to be pitiless. Traggedy writes therefore well of Pluto: "And to what sort of a deity wilt thou come, dost thou ask, Who knows neither clemency nor favour, But loves bare justice alone."

For although you are not yet able to do the things enjoined by the Law, yet, considering that the noblest examples are set before us in it, we are able to nourish and increase the love of liberty; and so we shall profit more eagerly as far as we can, inviting some things, imitating some things, and fearing others. For thus the righteous of the olden time, who lived according to the law, "were not from a storied oak, or from a rock;" because they wish to philosophize truly, took and devoted themselves entirely to God, and were classified under faith. Zeno said well of the Indians, that he would rather have seen one Indian roasted, than have learned the whole of the arguments about bearing pain. But we have exhibited before our eves every day abundant sources of martyrs that are burnt. impaled, beheaded. All these the fear inspired by the law, -leading as a paedagogue to Christ, trained so as to manifest their piety by their blood. "God stood in the congregation of the gods; He judgeth in the midst of the gods." Who are they? Those that are superior to Pleasure, who rise above the passions, who know what they do -- the Gnostics, who are greater than the world. "I said, Ye are Gods; and all sons of the Highest." To whom speaks the Lord? To those who reject as far as possible all that is of man. And the apostle says, "For ye are not any longer in the flesh, but in the Spirit." And "Though in the flesh, we do not war after the again he says, "For flesh and blood cannot inherit the kingdom of flesh." God, neither doth corruption inherit incorruption." "Lo, ye shall die like men," the Spirit has said, confuting us.

We must then exercise ourselves in taking care about those things which fall under the power of the passions, fleeing like those who are truly philosophers such articles of food as excite lust, and dissolute licentiousness in chambering and luxury; and the sensations that tend to luxury, which are a solid reward to others, must no longer be so to us. For God's greatest gift is self-restraint. For He Himself has said, "I will neyer leave thee, nor forsake thee," as having judged thee worthy according to the true election. Thus, then, while we attempt piously to advance, we shall have put on us the mild yoke of the Lord from faith to faith, one charioteer driving each of us onward to salvation, that the meet fruit of beatitude may be won. "Exercise is" according to Hippocrates of Cos, "not only the health of the body, but of the soul – fearlessness of labours – a ravenous appetite for food."

CHAPTER 21 -- OPINIONS OF VARIOUS PHILOSOPHERS ON THE CHIEF GOOD.

Epicurus, in placing happiness in not being hungry, or thirsty, or cold, uttered that godlike word, saving impiously that he would tight in these points even with Father Jove; teaching, as if it were the case of pigs that live in filth and not that of rational philosophers, that happiness was victory. For of those that are ruled by pleasure are the Cyrenaics and Epicurus; for these expressly said that to live pleasantly was the chief end, and that pleasure was the only perfect good. Epicurus also says that the removal of pain is pleasure; and says that that is to be preferred, which first attracts from itself to itself, being, that is, wholly in motion. Dinomachus and Callipho said that the chief end was for one to do what he could for the attainment and enjoyment of pleasure; and Hieronymus the Peripatetic said the great end was to live unmolested, and that the only final good was happiness; and Diodorus likewise, who belonged to the same sect, pronounces the end to be to live undisturbed and well. Epicurus indeed, and the Cyrenaics, say that pleasure is the first duty; for it is for the sake of pleasure, they say, that virtue was introduced, and produced pleasure. According to the followers of Calliphon, virtue was introduced for the sake of pleasure, but that subsequently, on seeing its own beauty, it made itself equally prized with the first principle, that is, pleasure.

But the Aristotelians lay it down, that to live in accordance with virtue is the end, but that neither happiness nor the end is reached by every one who has virtue. For the wise man, vexed and involved in involuntary mischances, and wishing gladly on these accounts to flee from life, is neither fortunate nor happy. For virtue needs time; for that is not acquired in one day which exists [only] in the perfect man since, as they say, a child is never happy. But human life is a perfect time, and therefore happiness is completed by the three kinds of good things. Neither, then, the poor, nor the mean nor even the diseased, nor the slave, can be one of them.

Again, on the other hand, Zeno the Stoic thinks the end to be living according to virtue; and, Cleanthes, living agreeably to nature in the fight exercise of reason, which he held to consist of the selection of things according to nature. And Antipatrus, his friend, supposes the end to consist in choosing

THE GRAND BIBLE which is characterized by one word of old date: Like will be

continually and unswervingly the things which are according to nature, and rejecting those contrary to nature. Archedamus, on the other hand, explained the end to be such, that in selecting the greatest and chief things according to nature, it was impossible to overstep it. In addition to these, Panictius pronounced the end to be, to live according to the means given to us by nature. And finally, Posidonius said that it was to live engaged in contemplating the truth and order of the universe, and forming himself as he best can, in nothing influenced by the irrational part of his soul. And some of the later Stoics defined the great end to consist in living agreeably to the constitution of man. Why should I mention Aristo? He said that the end was indifferent.

Shall I bring forward the opinions of Herillus? Herillus states the end to be to live according to science. For some think that the more recent disciples of the Academy define the end to be, the steady abstraction of the mind to its own impressions. Further, Lycus the Peripatetic used to say that the final end was the true joy of the soul; as Leucimus, that it was the joy it had in what was good. Critolaus, also a Peripatetic, said that it was the perfection of a life flowing rightly according to nature, referring to the perfection accomplished by the three kinds according to tradition.

We must, however, not rest satisfied with these, but endeavour as we best can to adduce the doctrines laid down on the point by the naturalist; for they say that Anaxagoras of Clazomenae affirmed contemplation and the freedom, flowing from it to be the end of life; Heraclitus the Ephesian, complacency. The Pontic Heraclides relates, that Pythagoras taught that the knowledge of the perfection of the numbers I was happiness of the soul. The Abderites also teach the existence of an end. Democritus, in his work On the Chief End, said it was cheerfulness, which he also called well-being, and often exclaims, "For delight and its absence are the boundary of those who have reached full age;" Hecataeus, that it was sufficiency to one's self; Apollodotus of Cyzicum, that it was delectation as Nausiphanes, that it was undauntedness, for he said that it was this that was called by Democritus imperturbability.

In addition to these still, Diotimus declared the end to be perfection of what is good, which he said was termed wellbeing. Again, Antisthenes, that it was humility. And those called Annicereans, of the Cyrenaic succession, laid down no definite end for the whole of life; but said that to each action belonged, as its proper end, the pleasure accruing from the action. These Cyrenaics reject Epicurus' definition of pleasure, that is the removal of pain, calling that the condition of a dead mar; because we rejoice not only on account of pleasures, but companionships and distinctions; while Epicurns thinks that all joy of the soul arises from previous sensations of the flesh. Metrodorus, in his book On the Source of Happiness in Ourselves being greater than that which arises from Objects, says: What else is the good of the soul but the sound state of the flesh, and the sure hope of its continuance?

CHAPTER 22-- PLATO'S OPINION, THAT THE CHIEF GOOD CONSISTS IN ASSIMILATION TO GOD, AND ITS AGREEMENT WITH SCRIPTURE.

Further, Plato the philosopher says that the end is twofold: that which is communicable, and exists first in the ideal forms themselves, which he also calls "the good:" and that which partakes of it, and receives its likeness from it, as is the case in the men who appropriate virtue and true philosophy. Wherefore also Cleanthes, in the second book, On Pleasure, says that Socrates everywhere teaches that the just man and the happy are one and the same, and execrated the first man who separated the just from the useful, as having done an impious thing. For those are in truth impious who separate the useful from that which is tight according to the law. Plato himself says that happiness (eudai monia) is to possess rightly the daemon, and that the ruling faculty of the soul is called the daemon; and he terms happiness (eudaimonia) the most perfect and complete good. Sometimes he calls it a consistent and harmonious life, sometimes the highest perfection in accordance with virtue; and this he places in the knowledge of the Good, and in likeness to God, demonstrating likeness to be justice and holiness with wisdom. For is it not thus that some of our writers have understood that man straightway on his creation received what is "according to the image," but that what is according "to the likeness" he will receive afterwards on his perfection? Now Plato, teaching that the virtuous man shall have this likeness accompanied with humility, explains the following: "He that humbleth himself shall be exalted." He says, accordingly, in The Laws: "God indeed, as the ancient saying has it, occupying the beginning, the middle, and the end of all things, goes straight through while He goes round the circumference. And He is always attended by Justice, the avenger of those who revolt from the divine law." You see how he connects fear with the divine law. He adds, therefore: "To which he, who would be happy, cleaving, will follow lowly and beautified." Then, connecting what follows these words, and admonishing by fear, he adds: "What conduct, then, is dear and conformable to God? That

dear to like, as to what is in proportion: but things out of proportion are neither dear to one another, nor to those which are in proportion. And that therefore he that would be dear to God, must, to the best of his power, become such as He is And in virtue of the same reason, our self-controlling man is dear to God. But he that has no self-control is unlike and diverse." In saying that it was an ancient dogma, he indicates the teaching which had come to him from the law. And having in the Theaoetus admitted that evils make the circuit of mortal nature and of this spot, he adds: "Wherefore we must try to flee hence as soon as possible. For flight is likeness to God as far as possible. And likeness is to become holy and just with wisdom." Speusippus, the nephew of Plato, says that happiness is a perfect state in those who conduct themselves in accordance with nature, or the state of the good: for which condition all men have a desire, but the good only attained to quietude; consequently the virtues are the authors of happiness. And Xenocrates the Chalcedonian defines happiness to be the possession of virtue, strictly so called, and of the power subservient to it. Then he clearly says, that the seat in which it resides is the soul: that by which it is effected. the virtues; and that of these as parts are formed praiseworthy actions, good habits and dispositions, and motions, and relations; and that corporeal and external objects are not without these. For Polemo, the disciple of Xenocrates, seems of the opinion that happiness is sufficiency of all good things, or of the most and greatest. He lays down the doctrine, then, that happiness never exists without virtue; and that virtue, apart from corporeal and external objects, is sufficient for happiness. Let these things be so. The contradictions to the opinions specified shall be adduced in due time. But on us it is incumbent to reach the unaccomplished end, obeying the commands -- that is, God -- and living according to them, irreproachably and intelligently, through knowledge of the divine will; and assimilation as far as possible in accordance with right reason is the end, and restoration to perfect adoption by the Son, which ever glorifies the Father by the great High Priest who has deigned to call us brethren and fellow-heirs. And the apostle, succinctly describing the end, writes in the Epistle to the Romans: "But now, being made free from sin, and become servants to God, ye have your fruit unto holiness, and the end everlasting life." And viewing the hope as twofold -- that which is expected, and that which has been received -- he now teaches the end to be the restitution of the hope. "For patience," he says, "worketh experience, and experience hope: and hope maketh not ashamed; because the love of God is shed abroad in our hearts by the Holy Spirit that is given to us." On account of which love and the restoration to hope, he says, in another place, "which rest is laid up for us." You will find in Ezekiel the like, as follows: "The soul that sinneth, it shall die. And the man who shall be righteous, and shall do judgment and justice, who has not eaten on the mountains, nor lifted his eyes to the idols of the house of Israel, and hath not defiled his neighbour's wife, and hath not approached to a woman in the time of her uncleanness (for he does not wish the seed of man to be dishonoured), and will not injure a man; will restore the debtor's pledge, and will not take usury; will turn away his hand from wrong; will do true judgment between a man and his neighbour; will walk in my ordinances, and keep my commandments, so as to do the truth; he is righteous, he shall surely live, saith Adonai the Lord." Isaiah too, in exhorting him that hath not believed to gravity of life, and the Gnostic to attention, proving that man's virtue and God's are not the same, speaks thus: "Seek the Lord, and on finding Him call on Him. And when He shall draw near to you, let the wicked forsake his ways, and the unrighteous man his ways; and let him return to the Lord, and he shall obtain mercy," down to 'and your thoughts from my thoughts." We then according to the noble apostle, "wait for the hope of righteousness by faith. For in Christ neither circumcision availeth anything, nor uncircumcision, but faith which worketh by love." And we desire that every one of you show the same diligence to the full assurance of hope," down to 'made an high priest for ever, after the order of Similarly with Paul "the All-virtuous Melchizedek." Wisdom" says, "He, that heareth me shall dwell trusting in hope." For the restoration of hope is called by the same term "hope." To the expression "will dwell" it has most beautifully added" trusting," showing that such an one has obtained rest, having received the hope for which he hoped. Wherefore also it is added, "and shall be quiet, without fear of any evil." And openly and expressly the apostle, in the first Epistle to the Corinthians says, "Be ye followers of me, as also I am of Christ," s in order that that may take place. If ye are of me, and I am of Christ, then ye are imitators of Christ, and Christ of God. Assimilation to God, then, so that as far as possible a man becomes righteous and holy with wisdom he lays down as the aim of faith, and the end to be that restitution of the promise which is effected by faith. From these doctrines gush the fountains, which we specified above, of those who have dogmatized about "the end." But of these enough.

CHAPTER 23 -- ON MARRIAGE.

Since pleasure and lust seem to fall under marriage, it must also be treated of. Marriage is the first conjunction of man and woman for the procreation of legitimate children. Accordingly Menander the comic poet says: "For the begetting of legitimate children, I give thee my daughter."

We ask if we ought to marry; which is one of the points, which are said to be relative. For some must marry, and a man must be in some condition, and he must marry some one in some condition. For every one is not to marry, nor always. But there is a time in which it is suitable, and a person for whom it is suitable, and an age up to which it is suitable. Neither ought every one to take a wife, nor is it every woman one is to take, nor always, nor in every way, nor inconsiderately. But only he who is in certain circumstances. and such an one and at such time as is requisite, and for the sake of children, and one who is in every respect similar, and who does not by force or compulsion love the husband who loves her. Hence Abraham, regarding his wife as a sister, says, "She is my sister by my father, but not by my mother; and she became my wife," teaching us that children of the same mothers ought not to enter into matrimony. Let us briefly follow the history. Plato ranks marriage among outward good things, providing for the perpetuity of our race, and handing down as a torch a certain perpetuity to children's children. Democritus repudiates marriage and the procreation of children, on account of the many annovances thence arising, and abstractions from more necessary things. Epicurus agrees, and those who place good in pleasure, and in the absence of trouble and pain. According to the opinion of the Stoics, marriage and the rearing of children are a thing indifferent; and according to the Peripatetics, a good. In a word, these, following out their dogmas in words, became enslaved to pleasures; some using concubines, some mistresses, and the most vouths. And that wise quaternion in the garden with a mistress, honoured pleasure by their acts. Those, then, will not escape the curse of yoking an ass with an ox, who, judging certain things not to suit them, command others to do them, or the reverse. This Scripture has briefly showed, when it says, "What thou hatest, thou shalt not do to another."

But they who approve of marriage say. Nature has adapted us for marriage, as is evident from the structure of our bodies, which are male and female. And they constantly proclaim that command, "Increase and replenish." And though this is the case, yet it seems to them shameful that man, created by God, should be more licentious than the irrational creatures, which do not mix with many licentiously, but with one of the same species, such as pigeons and ringdoves, and creatures like them. Furthermore, they say, "The childless man fails in the perfection which is according to nature, not having substituted his proper successor in his place. For he is perfect that has produced from himself his like, or rather, when he sees that he has produced the same; that is, when that which is begotten attains to the same nature with him who begat Therefore we must by all means marry, both for our country's sake, for the succession of children, and as far as we are concerned, the perfection of the world; since the poets also pity a marriage half-perfect and childless, but pronounce the fruitful one happy. But it is the diseases of the body that principally show marriage to be necessary. For a wife's care and the assiduity of her constancy appear to exceed the endurance of all other relations and friends, as much as to excel them in sympathy; and most of all, she takes kindly to patient watching. And in truth, according to Scripture, she is a needful help. The comic poet then, Menander, while running down marriage, and yet alleging on the other side its advantages, replies to one who had said: "I am averse to the thing, For you take it awkwardly."

Then. he adds: "You see the hardships and the things which annoy you in it.

But you do not look on the advantages." And so forth.

Now marriage is a help in the case of those advanced in years, by furnishing a spouse to take care of one, and by rearing children of her to nourish one's old age.

"For to a man after death his children bring renown, Just as corks bear the net, Saving the fishing-line from the deep." according to the tragic poet Sophocles.

Legislators, moreover, do not allow those who are unmarried to discharge the highest magisterial offices. For instance, the legislator of the Spartans imposed a fine not on bachelorhood only, but on monogamy? and late marriage, and single life. And the renowned Plato orders the man who has not married to pay a wife's maintenance into the public treasury, and to give to the magistrates a suitable sum of money as expenses. For if they shall not beget children, not having married, they produce, as far as in them lies, a scarcity of men and dissolve states and the world that is composed of them, impiously doing away with divine generation. It is also unmanly and weak to shun living with a wife and children. For of that of which the loss is an evil, the possession is by all means a good; and this is the case with the rest of things. But the loss of children is, they say, among the chiefest evils: the possession of children is consequently a good thing; and if it be so, so also is marriage. It is said: "Without a father there never could be a child, And without a mother conception of a child could not be.

Marriage makes a father, as a husband a mother."

Accordingly Homer makes a thing to be earnestly prayed for: "A husband and a house;" yet not simply, but along with good agreement. For the marriage of other people is an agreement for indulgence; but that of philosophers leads to that agreement which is in accordance with reason, bidding wives adorn themselves not in outward appearance, but in character; and enjoining husbands not to treat their wedded wives as mistresses, making corporeal wantonness their aim; but to take advantage of marriage for help in the whole of life, and for the best self-restraint.

Far more excellent, in my opinion, than the seeds of wheat and barley that are sown at appropriate seasons, is man that is sown, for whom all things grow; and those seeds temperate husbandmen ever sow. Every foul and polluting practice must therefore be purged away from marriage; that the intercourse of the irrational animals may not be cast in our teeth, as more accordant with nature than human conjunction in procreation. Some of these, it must be granted, desist at the time in which they are directed, leaving creation to the working of Providence.

By the tragedians, Polyxena, though being murdered, is described nevertheless as having, when dying, taken great care to fall decently,- "Concealing what ought to be hid from the eyes of men."

Marriage to her was a calamity. To be subjected, then, to the passions, and to yield to them, is the extremest slavery; as to keep them in subjection is the only liberty. The divine Scripture accordingly says, that those who have transgressed the commandments are sold to strangers, that is, to sins alien to nature, till they return and repent. Marriage, then, as a sacred image, must be kept pure from those things which defile it. We are to rise from our slumbers with the Lord, and retire to sleep with thanksgiving and prayer,- "Both when you sleep, and when the holy light comes," confessing the Lord in our whole life; possessing piety in the soul, and extending self-control to the body. For it is pleasing to God to lead decorum from the tongue to our actions. Filthy speech is the way to effrontery; and the end of both is filthy conduct.

Now that the Scripture counsels marriage, and allows no release from the union, is expressly contained in the law, "Thou shalt not put away thy wife, except for the cause of fornication;" and it regards as fornication, the marriage of those separated while the other is alive. Not to deck and adorn herself beyond what is becoming, renders a wife free of calumnious suspicion, while she devotes herself assiduously to prayers and supplications; avoiding frequent departures from the house, and shutting herself up as far as possible from the view of all not related to her, and deeming housekeeping of more consequence than impertinent trifling. "He that taketh a woman that has been put away," it is said, "committeth adultery; and if one puts away his wife. he makes her an adulteress," that is, compels her to commit adultery. And not only is he who puts her away guilty of this, but he who takes her, by giving to the woman the opportunity of sinning; for did he not take her, she would return to her husband. What, then, is the law? In order to check the impetuosity of the passions, it commands the adulteress to be put to death, on being convicted of this: and if of priestly family, to be committed to the flames. And the adulterer also is stoned to death, but not in the same place, that not even their death may be in common. And the law is not at variance with the Gospel, but agrees with it. How should it be otherwise, one Lord being the author of both? She who has committed fornication liveth in sin, and is dead to the commandments: but she who has repented, being as it were born again by the change in her life, has a regeneration of life; the old harlot being dead, and she who has been regenerated by repentance having come back again to life. The Spirit testifies to what has been said by Ezekiel, declaring, "I desire not the death of the sinner, but that he should turn." Now they are stoned to death; as through hardness of heart dead to the law which they believed not. But in the case of a priestess the punishment is increased, because "to whom much is given, from him shall more be required."

Let us conclude this second book of the Stromata at this point, on account of the length and number of the chapters.

THE STROMATA BOOK 3

[Translation from: Henry Chadwick, ed, The Ethereal Library of Christian Classics: Volume II, Alexandrian Christianity (Philadelphia: Westminster Press, 1954), pp. 40-92.]

CHAPTER 1

The Valentinians, who hold that the union of man and woman is derived from the divine emanation in heaven above, approve of marriage. The followers of Basilides, on the other hand, say that when the apostles asked whether it was not better not to marry, the Lord replied: "Not all can receive this saying; there are some enunchs who are so from their birth, others are so of necessity." And their explanation of this saying is roughly as follows: Some men, from their birth, have a natural sense of repulsion from a woman; and those who are naturally so constituted do well not to marry. Those who are eunuchs of necessity are those theatrical ascetics who only control themselves because they have a passion for the limelight. [And those who have suffered accidental castration have become eunuchs of necessity.] Those, then, who are eunuchs of necessity have no sound reason for their abstinence from marriage. But those who for the sake of the eternal kingdom have made themselves eunuchs derive this idea, they say, from a wish to avoid the distractions involved in marriage, because they are afraid of having to waste time in providing for the necessities of life.

And they say that by the words "it is better to marry than to burn" the apostle means this: "Do not cast your soul into the fire, so that you have to endure night and day and go in fear lest you should fall from continence. For a soul which has to concentrate upon 'endurance has lost hope." In his Ethics, Isidore says in these very words: " Abstain, then, from a quarrelsome woman lest you are distracted from the grace of God. But when you have rejected the fire of the seed, then pray with an undisturbed conscience. And when your prayer of thanksgiving," he says, "descends to a prayer of request, and your request is not that in future you may do right, but that you may do no wrong, then marry. But perhaps a man is too young or poor or suffers from weak health, and has not the will to marry as the apostle's saying suggests. Such a man should not separate himself from his brother Christian. He should say. I have come into the sanctuary. I can suffer nothing. And if he has a presentiment that he may fall, he may say, Brother, lay your hand on me lest I sin, and he will receive help both spiritually and physically. Let him only wish to accomplish what is right and he will achieve his object.

"Sometimes, however, we say with our mouth 'I wish not to sin' while our mind is really inclined towards sin. Such a man does not do what he wishes for fear lest any punishment should be in store for him. Human nature has some wants which are necessary and natural, and others which are only natural. To be clothed is necessary and natural; sexual intercourse is natural but not necessary."

I have quoted these remarks to prove in error those Basilidians who do not live purely, supposing either that they have the power even to commit sin because of their perfection, or indeed that they will be saved by nature even if they sin in this life because they possess an innate election. For the original teachers of their doctrines do not allow one to do the same as they are now doing. They ought not, therefore, to take as a covering cloak the name of Christ and, by living lewder lives than the most uncontrolled heathen, bring blasphemy upon his name. "For such people are false apostles, deceitful workers" as far as the words "whose end shall be like their works." Continence is an ignoring of the body in accordance with the confession of faith in God. For continence is not merely a matter of sexual abstinence, but applies also to the other things for which the soul has an evil desire because it is not satisfied with the necessities of life. There is also a continence of the tongue, of money, of use, and of desire. It does not only teach us to exercise self-control; it is rather that self-control is granted to us, since it is a divine power and grace. Accordingly I must declare what is the opinion of our people about this subject. Our view is that we welcome as blessed the state of abstinence from marriage in those to whom this has been granted by God. We admire monogamy and the high standing of single marriage, holding that we ought to share suffering with another and "bear one another's burdens," lest anyone who thinks he stands securely should himself fall. It is of second marriage that the apostle says, If you burn, marry.

CHAPTER 2

But the followers of Carpocrates and Epiphanes think that wives should be common property. Through them the worst calumny has become current against the Christian name. This fellow Epiphanes, whose writings I have at hand, was a son of Carpocrates and his mother was named Alexandria. On his father's side he was an Alexandrine, on his mother's a Cephallenian. He lived in all only seventeen years, and at Same in Cephallenia was honoured as a god. There a temple of vast blocks of stone was erected and dedicated to him, with altars, sacred precincts, and a "museum." The Cephallenians gather at the temple every new moon and celebrate with sacrifices the day when Epiphanes became a god as his birthday; they pour libations to him, feast in his honour, and sing his praises. He was educated by his father in the general education and in Platonism, and he was instructed in the knowledge of the Monad, which is the root-origin of the Carpocratians' heresy.

This is what he says, then, in the book Concerning Righteousness: "The righteousness of God is a kind of universal fairness and equality. There is equality in the heaven which is stretched out in all directions and contains the entire earth in its circle. The night reveals equally all the stars. The light of the sun, which is the cause of the daytime and the father of light, God pours out from above upon the earth in equal measure on all who have power to see. For all see alike. There is no distinction between rich and poor, people and governor, stupid and clever, female and male, free men and slaves. Even the irrational animals are not accorded any different treatment; but in just the same way God pours out from above sunlight equally upon all the animals. He establishes his righteousness to both good and bad by seeing that none is able to get more than his share and to deprive his neighbour, so that he has twice the light his neighbour has. The sun causes food to grow for all living beings alike; the universal righteousness is given to all equally. In this respect there is no difference between the entire species of oxen and any individual oxen, between the species of pigs and particular pigs, between the species of sheep and particular sheep, and so on with all the rest. In them the universality of God's fairness is manifest. Furthermore all plants of whatever sort are sown equally in the earth. Common nourishment grows for all beasts which feed on the earth's produce; to all it is alike. It is regulated by no law, but rather is harmoniously available to all through the gift of him who gives it and makes it to grow.

"And for birth there is no written law (for otherwise it would have been transcribed). All beings beget and give birth alike, having received by God's righteousness an innate equality. The Creator and Father of all with his own righteousness appointed this, just as he gave equally the eye to all to enable them to see. He did not make a distinction between female and male, rational and irrational, nor between anything and anything else at all; rather he shared out sight equally and universally. It was given to all alike by a single command. As the laws (he says) could not punish men who were ignorant of them, they taught men that they were transgressors. But the laws, by pre-supposing the existence of private property, cut up and destroyed the universal equality decreed by the divine law." As he does not understand the words of the apostle where he says "Through the law I knew he says that the idea of Mine and Thine came into sin." existence through the laws so that the earth and money were no longer put to common use. And so also with marriage. "For God has made vines for all to use in common, since they are not protected against sparrows and a thief; and similarly corn and the other fruits. But the abolition, contrary to divine law, of community of use and equality begat the thief of domestic animals and fruits.

8.He brought female to be with male and in the same way united all animals. He thus showed righteousness to be a universal fairness and equality. But those who have been born in this way have denied the universality which is the corollary of their birth and say, 'Let him who has taken one woman keep her,' whereas all alike can have her, just as the other animals do." After this, which is quoted word for word, he again continues in the same spirit as follows: "With a view to the permanence of the race, he has implanted in males a strong and ardent desire which neither law nor custom nor any other restraint is able to destroy. For it is God's decree."

And how can this man still be reckoned among our number when he openly abolishes both law and gospel by these words. The one says: "Thou shalt not commit adultery." The other says: "Everyone who looks lustfully has already committed adultery." The saying in the law, "Thou shalt not covet," It shows that one God is proclaimed by law, prophets, and gospel; for it says: "Thou shalt not covet thy neighbour" wife." But for a Jew the "neighbour" is not a Jew, for he is a brother and has the same spirit. Therefore it remains that "neighbour" means one of another race. But how can he not be a neighbour who is able to share in the same spirit? For Abraham is father not only of the Hebrews, but also of the Gentiles.

If the adulteress and he who committed fornication with her are punished with death, clearly the command which says "Thou shalt not covet thy neighbour's wife" speaks of the Gen- tiles, in order that anyone who, as the law directs, abstains from his neighbour's wife and from his sister may hear clearly from the Lord, "But I say unto you, Thou shalt not lust." The addition of the word "I," however, shows the stricter force of the commandment, and that Carpocrates fights against God, and Epiphanes likewise. The latter in the same notorious book, I mean Concerning Righteousness, writes in one passage as follows: "Consequently one must understand the saying 'Thou shalt not covet' as if the lawgiver was making a jest, to which he added the even more comic words 'thy neighbour's goods'. For he himself who gave the desire to sustain the race orders that it is to be suppressed, though he removes it from no other animals. And by the words 'thy neighbour's wife' he says something even more ludicrous, since he forces what should be common property to be treated as a private possession."

These then are the doctrines of the excellent Carpocratians. These, so they say, and certain other enthusiasts for the same wickednesses, gather together for feasts (I would not call their meeting an Agape), men and women together. After they have sated their appetites ("on repletion Cypris, the goddess of love, enters,"21 as it is said), then they overturn the lamps and so extinguish the light that the shame of their adulterous

"righteousness" is hidden, and they have intercourse where they will and with whom they will.23 After they have practiced community of use in this love-feast, they demand by daylight of whatever women they wish that they will be obedient to the law of Carpocrates-it would not be right to say the law of God. Such, I think, is the law that Carpocrates must have given for the copulations of dogs and pigs and goats. He seems to me to have misunderstood the saving of Plato in the Republic24 that the women of all are to be common. Plato means that the unmarried are common for those who wish to ask them, as also the theatre is open to the public for all who wish to see, but that when each one has chosen his wife, then the married woman is no longer common to all

In his book entitled Magica Xanthus says: "The Magi think it permissible to have sexual intercourse with mothers and daughters and sisters, and that wives are to be held in common, not by force and in secret, but both parties may agree when one man wishes to marry another's wife. "Of these and other similar sects Jude, I think, spoke prophetically in his letter- "In the same way also these dreamers" (for they do not seek to find the truth in the light of day) as far as the words "and their mouth speaks arrogant things.

CHAPTER 3

If Plato himself and the Pythagoreans, as indeed later also followers of Marcion, regard birth as something evil (though the last named was far from thinking that wives were to be held in common), yet by the Marcionites nature is regarded as evil because it was created out of evil matter and by a just Creator. On this ground, that they do not wish to fill the world made by the Creator-God, they decide to abstain from marriage. Thus they are in opposition to their Maker and hasten towards him who is called the good God, but not to the God, as they say, of the other kind. As they wish to leave nothing of their own behind them on this earth, they are continent, not of their own free choice, but from hatred of the Creator, being unwilling to use what he has made. But these folk, who in their blasphemous fight against God have abandoned natural reasoning, and despise the long-suffering and goodness of God, even if they do not wish to marry, use the food made by the Creator and breathe his air: for they are his works and dwell in his world. They say they have received the gospel of the knowledge of the Strange God; yet at least they ought to acknowledge gratitude to the. Lord of the world because they receive this gospel on this earth.

But we shall give a detailed answer to these people when we discuss the doctrine of First Principles. The philosophers whom we have mentioned, from whom the Marcionites blasphemously derived their doctrine that birth is evil, on which they then plumed themselves as if it were their own idea, do not hold that it is evil by nature, but only for the soul which has perceived the truth. For they think the soul is divine and has come down here to this world as a place of punishment. In their view souls which have become embodied need to be purified. But this doctrine is not that of the Marcionites, but of those who believe that the souls are enclosed in bodies and change from this prison and undergo transmigration. There will be an opportunity to reply to these when we come to speak about the soul.

It is clear that Heraclitus regards birth as something evil when he says: "When men are born they are fain to live and suffer death," or rather go to their rest, "and they leave children who also suffer death." Empedocles is obviously in agreement with him when he says:

'When I saw the place, so strange it was, I wept and wailed '

And further:

"For out of the living he made the dead, changing their forms.

And again;

"O woe, unhappy race of mortals, wretched men!

Out of what kind of dissensions and groans were you born!" And the Sibyl also says:

"Mortal men are ye, and fleshly, being nothing," like the poet who writes:

'Earth nurtures nothing weaker than a man."

Moreover Theognis shows that birth is evil when he

speaks as follows:

"For mortals best it is not to be born at all

And never to see the rays of the bright sun,

But if born to pass the gates of Hades as soon as possible. With this agrees also the tragic poet Euripides when he writes:

"Where a man is born we ought to assemble only to bewail His lot in coming into so much evil.

But when one dies and comes to the end of troubles

Then we should rejoice and praise his happy departure.' And again he says the same in these words:

"Who knows if life be not in truth but death And death be life.'

Herodotus, it is clear, makes Solon say the same as this: "O Croesus, every man is a misfortune." And his myth about Cleobis and Biton has obviously no other intention than to disparage birth and praise death. " As scattered leaves, so is mankind," says Homer.41 And in the Cratylus Plato attributes to Orpheus the doctrine that the soul in this body is suffering punishment. This is what he says: "Some say that the body is a tomb of the soul, as being buried in it for the present life. And because the soul expresses (semainei) by this body whatever it may wish to express, so it is rightly called a tomb (sema). The Orphics, in particular, seem to have given it this name, as they think the soul suffers punishment for its misdeeds.'

It is also worth mentioning the remark of Philolaus. This Pythagorean speaks as follows: "The ancient theologians and seers testify that the soul is conjoined to the body to suffer certain punishments, and is, as it were, buried in this tomb. And Pindar speaks of the Eleusinian mysteries as follows: Blessed is he who has seen before he goes under the earth; for he knows the end of life and knows also its divine beginning. Similarly in the Phaedo Plato does not hesitate to write as follows: "And these men who established our mysteries. . down to the words "and will dwell with the gods." And what when he says, "As long as we have still the body and our soul is involved in such evil, shall we never have sufficient possession of that which we desire?" Does he not hint that birth is the cause; of the worst evils? And in the Phaedo he bears witness again: "All who have rightly been concerned with philosophy run the risk that other men will fail to notice that their sole object is to pursue death and dying."

And in another place: " Accordingly here the soul of the philosopher mostly disregards his body and flees from it, and seeks to be existent by itself." Does he not agree to some extent with the divine apostle when he says, "O wretched man that I am, who shall deliver me from this body of death?" unless he speaks of "body of death" in a figurative sense to refer to the agreement of those who have been enticed into evil. And that sexual intercourse, as the cause of birth, was rejected long before Marcion by Plato is clear from the first book of the Republic. For after praising old age he continues: "Mark it well, for me the more the other pleasures of the body fade away, the more grow the desires and pleasures of rational enquiry." And with reference to sex relations: "Be silent, O man, it is with the greatest joy that I escaped from it-as if I had escaped from a wild and raging tyrant.

Again in the Phaedo he disparages birth when he writes of "the doctrine which is secretly taught about this that we men are in a sort of prison." And again, "Those who are manifestly distinguished for their holiness of life are liberated from these places on earth and are set free as if this earth were a prison, and go to the pure home above." Nevertheless, although he says this, he perceives that the administration of this world is good, and says: "One ought not to set oneself free and run away."And to sum up briefly, he has given Marcion no opening for his view that matter is evil, when he himself reverently says of the world, "All that is good the world has received from him who has composed it; but from its previous state arise all the recalcitrant and unjust things in the heaven and from this it derives these elements and causes them in living beings."

20. With even greater clarity he adds: "The cause of these things was the material element in the world's constitution, which was at one time bound up with its ancient nature. For before it came into its present ordered state it was in a condition of great chaos." To the same effect in the Laws he laments the of men saying: "The gods had mercy on mankind which born for trouble, and to give them rest from their labours appointed the changing cycle of feasts." And in the Epinomis discusses the causes of this pitiful condition and says this:)m the beginning birth was difficult for every human being; to get to the state of being an embryo, then to be born, and 1 to be nourished and educated, all this is attended by count- pains, as we all agree.

What then? Does not Heraclitus call birth death, just as Pythagoras and Socrates in the Gorgias, when he says: "Death is what we see when we are awake; and what we see in our sleep is a dream." But enough of this. When we discuss First Principles we consider the difference between the views of the philosophers and those of the Marcionites. But I think I have shown clearly enough that Marcion took from Plato the starting-point of his "strange" doctrines, without either grateful acknowledgment or understanding.

Now we may continue our discussion about continence. We were saying that from a dislike of its inconveniences the Greeks have made many adverse observations about the birth of children, and that the Marcionites have interpreted them in a godless sense and are ungrateful to their Creator. For the tragedy says:

'For mortals it is better not to be born than to be born;

Children I bring to birth with bitter pains; And then when I have borne them they lack understanding. In vain I groan, that I must look on wicked offspring

While I lose the good. If the good survive, My wretched heart is melted by alarm.

What is this goodness then? Is it not enough That I should care for one alone

And bear the pain for this one soul?'

And further to the same effect

'So now I think and have long so thought Man ought never children to beget, Seeing into what agonies we are born.'

But in the following verses he clearly attributes the cause of evil to the primal origins, when he speaks as follows:

"O thou who art born for misfortune and disaster, thou art born a man, and thine unhappy life thou didst receive from the place where the air of heaven, which gives breath to mortals, first began to give food for all. Complain not of thy mortal state, thou who art mortal."

Again he puts the same idea in these words:

"No mortal is content and happy Nor is any born free from sorrow."

And then again:

'Alas, alas, how many are the chances of mortal calamity! How many forms it takes! None can tell the end."

And further likewise:

'Of what is mortal there is nothing which is happy without end."

It is asserted that on this ground the Pythagoreans exercised abstinence. But to me, on the contrary, it seems that they marry for the sake of procreating children, but after they have begotten children they desire to control sexual indulgence. That is why they give the mysterious command to abstain from beans, not because pulse leads to flatulence and is indigestible and causes troubled dreams, nor because the bean is shaped like a man's head: as the verse has it. "It is alike to eat beans and the head of one's parents." The real reason is that if beans are eaten they make women barren. At any rate Theophrastus in the fifth book of his Causes of Plants relates that if the pods of beans are put round the roots of newly planted trees the shoots dry up and that if birds that live round houses are continuously fed on beans they become unable to lay eggs.

CHAPTER 4

Of the heretics we mentioned Marcion of Pontus as forbidding the use of this world's goods on the ground of opposition to the Creator. The Creator himself is thus the reason for continence, if this can be called continence; for this giant o thinks he can resist God is not continent by an act of free choice, in that he attacks the creation and the process by which n is formed. If they quote the Lord's words to Philip, "Let dead bury their dead, but do thou follow me," they ought to consider that Philip's flesh is also formed in the same way; body is not a polluted corpse. How then could he have a body of flesh which is not a corpse? Because he rose from the tomb when the Lord killed his passions and he began to live unto Christ. We also mentioned the blasphemous immorality of Carpocrates. But when we spoke about the saying of Nicolaus we omitted to say this. Nicolaus, they say, had a lovely wife. When after the Saviour's ascension he was accused before the apostles of jealousy, he brought his wife into the concourse and allowed anyone who so desired to marry her. For, they say, this action was appropriate to the saying: "One must abuse the flesh." Those who share his heresy follow both his action and his words simply and without qualification by indulging in the gravest enormity.

I am informed, however, that Nicolaus never had relations with any woman other than the wife he married, and that of his children his daughters remained virgins to their old age, and his son remained uncorrupted. In view of this it was an act of suppression of passion when he brought before the apostles the wife on whose account he was jealous. He taught what it meant to "abuse the flesh" by restraining the distracting passions. For, as the Lord commanded, he did not wish to serve two masters, pleasure and God. It is said that Matthias also taught that one should fight the flesh and abuse it, never allowing it to give way to licentious pleasure, so that the soul might grow by faith and knowledge.

There are some who call Aphrodite Pandemos [i.e., physical love] a mystical communion. This is an insult to the name of communion. To do something wrong is called an action, just as also to do right is likewise called an action. Similarly communion is good when the word refers to sharing of money and food and clothing. But they have impiously called by the name of communion any common sexual intercourse. The story goes that one of them came to a virgin of our church who had a lovely face and said to her: "Scripture says, 'Give to everyone that asks you." She, however, not understanding the lascivious intention of the man gave the dignified reply: "On the subject of marriage, talk to my mother." What godlessness! Even the words of the Lord are perverted by these immoral fellows, the brethren of lust, a shame not only to philosophy but to all human life, who corrupt the truth, or rather destroy it; as far as they can. These thrice wretched men treat carnal and sexual intercourse as a sacred religious mystery, and think that it will bring them to the kingdom of God

It is to the brothels that this "communion" leads. They can have pigs and goats as their associates. Those who have most to hope from them are the public harlots who shamelessly receive all who want to come to them. "But you have not so learned Christ, if you have heard him and have been taught by

him as the truth is in Christ Jesus; put off with the ways of your former life your old man which is corrupted by the deceitful lusts. Be renewed in the spirit of your mind and put on the new man which after God is created in righteousness and true holiness," so as to be made like unto God. "Be therefore imitators of God, as dear children, and walk in love as Christ also loved us and gave himself for us as an offering and sacrifice to God for a sweet smelling savor. But fornication and all impurity and covetousness and shamefulness and foolish talk, let them not be mentioned among you as is fitting for saints." Moreover, the apostle teaches us to be chaste in speech when he writes, "Know this well that no fornicator..." and so on as far as the words "but rather expose them."

They derived their doctrines from an apocryphal work. I will quote the text which is the mother of their licentiousness. And whether they themselves, I mean the authors of the book, bare responsible (see their madness, for by their licence they do grievous wrong to God) or whether they derived their ideas from some others whom they fell in with, they have taken a sound doctrine and perversely misapplied it. The passage reads as follows: "All things were one; but as it seemed good to its f unity not to be alone, an idea came forth from it, and it had intercourse with it and made the beloved. In consequence of this there came forth from him an idea with which he had intercourse and made powers which cannot be seen or heard. .." : down to the words "each by her own name." If these people spoke of acts of spiritual union like the Valentinians, perhaps one could accept their view. But to suppose that the holy prophets spoke of carnal and wanton intercourse is the way of a man who has renounced salvation.

These are also the doctrines of the adherents of Prodicus, who falsely entitle themselves gnostics, asserting that they are by nature sons of the first God. But they misuse their noble birth and freedom and life as they desire. And their desire is for pleasure, thinking that no one is superior to them, as they are lords of the sabbath and are royal sons far above the rest of mankind. To a king, they say, there is no law prescribed. But in the first place they cannot do all they desire and essay to do it. And even what they can do, they do not like kings, but like cringing slaves. For it is only in secret that they commit adultery, as they are scared of being caught. They want to avoid condemnation and are afraid of punishment. What freedom is there in their license and filthy talk? "Everyone who sins is a slave," says the apostle.

The Lord has said: "But I say unto you, you shall not lust." How then can he live according to God's will who surrenders himself to every desire? And is a man to decide of his own free will that he can sin, and lay it down as a principle that one may commit adultery and revel in sin and break up other men's marriages, when we even take pity on others if they fall into sin against their will? And if they regard the world into which they have come as an alien country they will not possess the truth if they have not been faithful in that which is another's. Does a foreign visitor insult the citizens and do them injury? Does he not rather behave as a guest and conform to the necessary rules, living without causing offence to the citizens? And how can they say that they alone know God when they do the same things as those who are loathed by the heathen because they do not do what the laws direct, that is, as the wicked and incontinent and covetous and adulterous? They ought to live good lives even while they are dwelling in an alien country, to manifest their truly kingly nature.

But because they have chosen to disobey the laws, they make themselves objects of hatred both to human lawgivers and to the law of God. At any rate in Numbers the man who thrust his spear into the fornicator is evidently blessed by God. And John says in his epistle: "If we say that we have fellowship with him and walk in darkness, we lie and do not the truth; but if we walk in the light as he is in the light, we have fellowship with him, and the blood of Jesus his Son cleanses us from sin."

How then are they who do these things superior to worldly men when they behave like the very worst men of this world? Those whose actions are alike are in my opinion of like nature. Those who think they are superior to others by their nobility of birth ought to be superior to them also in their moral characters, that they may escape incarceration in the prison. For indeed as the Lord said: "Except your righteousness exceed that of the scribes and Pharisees, you shall not enter the kingdom of God." However, abstinence from food is exemplified in the book of Daniel. And to sum up in a word, concerning obedience David speaks in the Psalms: "How shall a young man correct his way?" And at once he hears "by keeping thy word with his whole heart." And Jeremiah says: "Thus saith the Lord, You shall not walk in the ways of the heathen."

Because of this certain other depraved and worthless fellows have been impelled to assert that man was formed by various powers, and that down as far as the navel his body shows the work of godlike craftsmanship, but his lower parts indicate inferior workmanship. In consequence of the latter man has a sexual impulse. They fail to observe that the upper parts also want food and in some men are lustful. And they contradict Christ when he said to the Pharisees that the same God made both our outer and our inner man. Moreover, desire is not a bodily thing, though it occurs because of the body.

Certain others, whom we may call Antitactae [i.e., opponents], assert that the God of the universe is our Father by nature, and all that he has made is good. But one of the beings made by him sowed tares and so caused the origin of evils. He involved us all in them and so made us opponents of the Father. Therefore even we ourselves are set in opposition to him to avenge the Father, and act contrary to the will of the second. Since, then, the latter has said, "Thou shalt not commit adultery," Let us, say they, commit adultery to abolish his commandment.

To them we would say: We have been taught to recognize by their works false prophets and all who merely pretend to the truth. And your works tell against you. How can you still assert that you adhere to the truth? For either nothing evil exists, in which case there is no question of finding fault with him whom you attack as being in opposition to God, and he is not the originator of anything evil (both the fruit and the tree are done away together), or, if wickedness really does exist, let them tell us what they have to say of the commandments given to us about righteousness, self-control, patience, long suffering, and other such virtues, whether they think them bad or good? If the command is bad which forbids one to do almost all that is disgraceful, then evil must enact laws against itself in order t(l destroy its own fruit, which is impossible. If it is good, by opposing good commandments they must confess that they are opposing what is right and doing wrong.

But the Saviour himself, whom alone they think one should obey, has forbidden hatred and reviling and says: "When you go with your adversary to court, try to achieve a friendly reconciliation with him." Accordingly, they will either refuse to accept Christ's exhortation, in that they are in opposition to the adversary, or they will become his friends and cease to oppose him. What then? Do you not realize, my worthy friends (I speak as if you were present with me) that by conflict with these excellent commandments you fight against your own salvation? You overturn yourselves, not these beneficial instructions. The Lord said, "Let your good works shine out." But you make your licentiousness manifest to all. Besides, if your aim is to destroy the lawgiver's commands, why is it the commands "Thou shalt not commit adultery' and "Thou shalt not corrupt boys," and all the commandments enjoining purity, which through your incontinence you seek to destroy? Why do you not abolish winter which he made and make it summer when it is still midwinter, and make dry land navigable and the sea pass- able on foot, as the historians say Xerxes the barbarian desired to do?

Why do you not oppose all the commandments? For he says, "Increase and multiply." you who are opposed to him ought to abstain from sexual relations altogether. And if he says, "I have given you all things for food and enjoyment," you ought to enjoy nothing at all. Moreover, he says, "An eye for an eye." you ought not, therefore, to repay opposition with opposition. If he tells the thief to restore fourfold, you ought even to give something to the thief. Similarly again, you who oppose the command "Thou shalt love the Lord" ought not to love the God of the universe at all. And if he says, "Thou shalt not make any graven or molten image," it follows that you ought to bow down to graven images. Are you not blasphemous, therefore, when you oppose, as you say, the Creator, and endeavour to do the same as fornicators and adulterers? Do you not perceive that you make him all the greater whom you regard as weak if what is taking place is what he wishes and not what the good God wills? For, on the contrary, your father, as you call him, is shown to be weak by vou vourselves.

These folk also collect extracts from the prophets, making a selection and mischievously stringing them together. They interpret in a literal sense sayings intended to be understood allegorically. It is written, they say, "They resisted God and were saved." But they add the "shameless" God, and interpret this saving as if it gave them advice, thinking it will bring them salvation if they resist the Creator. In fact, scripture does not mention the " shameless" God. And if it did, you fools, you should have understood the word "shameless" to refer to him who is called the devil, either because he slanders men, or because he accuses sinners, or because he is an apostate. The people to whom the passage refers were unwilling to be punished for their sins, and they spoke the words quoted in a spirit of complaining and grumbling, on the ground that other nations were not punished when they transgressed, and that on every occasion they alone were humiliated, so that even Jeremiah said, "Why is the way of the ungodly easy?" Similar in sense to this is the saying in Malachi which has been quoted: "They resisted God and were saved." In uttering their oracles the prophets do not only say that they have heard some message from God; it is also evident that they take up phrases in common use among the people and reply to them, as if they were reporting certain questions

raised by them. The saying under discussion is an instance of this.

Perhaps it is such people that the apostle attacks in the epistle to the Romans when he writes: " And not as we are blasphemously accused and some assert that we say, Let us do evil that good may come, an argument which is rightly condemned." These are they who when reading the Bible pervert the sense to their own desires by their tone of voice, and by changing certain accents and marks of punctuation twist words that are wise and useful to conform to their own lusts. "You who provoke God with your words," says Malachi, "have even said Wherein have we provoked him? In this, that you have said, Anyone who does evil is good in the Lord's sight, and he is well pleased with them; and, Where is the God of righteousness?"

CHAPTER 5

It is not our aim to pursue this subject in further detail and to mention further senseless heresies. To put them to shame we should be forced to deal with each one, and to state our objections to each point, which would extend these notes to an un- conscionable length. Accordingly we may divide all the heresies into two groups in making answer to them. Either they teach that one ought to live on the principle that it is a matter of indifference whether one does right or wrong, or they set a too ascetic tone and proclaim the necessity of continence on the ground of opinions which are godless and arise from hatred of what God has created. First we may discuss the former group. If it is lawful to live any sort of life one likes, obviously one may live in continence; or if any kind of life has no dangers for the elect, obviously one of virtue and self-control is far less dangerous. If the "lord of the sabbath" has been given the right to pass uncorrected if he lives an immoral life, a fortiori there will be no correction for him who behaves decently. "All things are lawful, but all things are not expedient," says the apostle. If all things are lawful, obviously this includes self-control.

Therefore if one who uses his power to live a virtuous life receives praise, then much more worthy of reverence and honour is he who has given us this free and sovereign power and has allowed us to live as we choose, not allowing us to become en- slaved and subjected to necessity by our acts of choice and rejection. But if both can have no anxiety, he who chooses incontinence and he who chooses abstinence, yet the honour is not equal. He who indulges his pleasures gratifies his body; but he who is controlled liberates from its passions his soul which is master of the body. And if they tell us that we are called to freedom, only let us not use our freedom as an opportunity for the flesh, as the apostle says. If lust is to be gratified and a life of sin regarded as morally neutral, as they say, either we ought to indulge our desires in every direction and, if this is our desire, do the most lascivious and immoral acts, in that we are following our instincts in every way; or we may suppress certain desires and live no longer a life which recognizes no distinction of right and wrong, nor be absolute slaves to our most dishonourable members, the stomach and the private parts, gratifying our carcase for the sake of desire. For desire is nourished and invigorated if it is encouraged in indulgence, just as, on the other hand, it loses strength if it is kept in check.

But how is it possible to become like the Lord and have knowledge of God if one is subject to physical pleasures? Every pleasure is the consequence of an appetite, and an appetite is a certain pain and anxiety, caused by need, which requires some object. In my opinion those who choose this kind of life are simply "suffering pain to their shame," as the well-known verse puts it, choosing evil which they bring upon themselves, now and hereafter. If, then, all things were lawful and one need have no fear that because of one's wicked deeds one's hope of salvation would be lost, perhaps they might have some excuse for living this wicked and wretched life. But through the commandments a life of blessedness is shown to us. We must all keep to them without misinterpreting any of the words or neglecting any of our duties, however minute. We must follow where the word leads; and if we depart from it, we must fall into "endless evil." And by following the divine scripture, the path by which believers travel, we are to be made like unto the Lord as far as possible. We must not live as if there were no difference between right and wrong, but, to the best of our power, must purify ourselves from indulgence and lust and take care for our soul which must continually be devoted to the Deity alone. For when it is pure and set free from all evil the mind is somehow capable of receiving the power of God and the divine image is set up in it. And everyone who has this hope in the Lord purifies himself," says the Scripture, "even as he is pure."

To attain the knowledge of God is impossible for those who are still under the control of their passions. Therefore they cannot attain the salvation they hope for as they have not obtained any knowledge of God. He who fails to attain this end is clearly subject to the charge of being ignorant of God, and ignorance of God is shown by a man's manner of life. It is absolutely impossible at the same time to be a man of understanding and not to be ashamed to gratify the body.

Nor can the view that pleasure is the supreme Good be reconciled with the view that only the beautiful is good, or that only the Lord is beautiful, and God alone is good and is alone to be loved. "You are circumcised in Christ with a circumcision not done with hands, which consists rather in the putting away of the carnal body, in the circumcision of Christ."

"If you then are risen with Christ, seek those things which are above; have in mind higher things, not earthly things. For you are dead, and your life is hid with Christ in God" --but not the fornication which they practice. "Mortify therefore your earthly members, fornication, uncleanness, passion, lust; for on account of these wrath is coming." Let them also therefore "put away anger, wrath, wickedness, blasphemy, filthy talk from their mouth, putting off the old man with its lusts, and putting on the new man which is renewed to possess full knowledge according to the image of him who created it."

It is the manner of life which shows up those who know the commandments; for as a man's word is, so is his life. The tree is known by its fruit, not by its blossom and leaves. Knowledge, then, comes from the fruit and from behaviour, not from talk and from blossom. We say that knowledge is not mere talk, but a certain divine knowledge, that light which is kindled in the soul as a result of obedience to the commandments, and which reveals all that is in a state of becoming, enables man to know himself and teaches him to become possessed of God. What the eye is in the body, knowledge is in the mind. Let them not call bondage to pleasure freedom, as if bitterness were sweet. We have learnt to recognize as freedom that which the Lord alone confers on us when he liberates us from lusts and desires and the other passions. "He who says, I know the Lord, and does not keep his commandments, is a liar and the truth is not in him." says John.

CHAPTER 6

To those, on the other hand, who under a pious cloak blaspheme by their continence both the creation and the holy Creator, the almighty, only God, and teach that one must reject marriage and begetting of children, and should not bring others in their place to live in this wretched world, nor give any sustenance to death, our reply is as follows. We may first quote the word of the apostle John: "And now are many antichrists come, whence we know that it is the last hour. They went out from us, but they were not of us. For if they had been of us, they would have remained with US." Next we may destroy their case on the ground that they pervert the sense of the books they quote, as follows. When Salome asked the Lord: "How long shall death hold sway?" he answered: "As long as you women bear children." Her words do not imply that this life is evil and the' creation bad, and his reply only teaches the ordinary course of nature. For birth is invariably followed by death.

The task of the law is to deliver us from a dissolute life and all disorderly ways. Its purpose is to lead us from unrighteousness to righteousness, so that it would have us self-controlled in marriage, in begetting children, and in general behavior. The Lord is not "come to destroy the law but to fulfill it."

"To fulfill" does not imply that it was defective, but that by his coming the prophecies of the law are accomplished, since before the law the demand for right conduct was proclaimed by the Logos to those also who lived good lives. The multitude who know nothing of continence live for the body, not for the spirit. But the body without spirit is "earth and ashes." Now the Lord judges adultery which is only committed in thought. What then? Is it not possible to remain continent even in the married state and not to seek to "put asunder what God has joined together" For such is the teaching of those who divide the yoke of marriage, by reason of whom the Christian name is blasphemed. If it is the view of these people who themselves owe their existence to sexual relations that such relations are impure, must not they be impure? But I hold that even the seed of the sanctified is holy.

In us it is not only the spirit which ought to be sanctified, but also our behaviour, manner of life, and our body. What does the apostle Paul mean when he says that the wife is sanctified by the husband and the husband by the wife? And what is the meaning of the Lord's words to those who asked concerning divorce whether it is lawful to put away one's wife as Moses commande? "Because of the hardness of your hearts," he says, "Moses wrote this; but have you not read that God said to the first man, You two shall be one flesh? Therefore he who divorces his wife except for fornication makes her an adulteress." But "after the resurrection," he says, "they neither marry nor are given in marriage." Moreover, concerning the belly and its food it is written: "Food is for the belly and the belly for food; but God shall destroy both the one and the other .." In this saying he attacks those who think they can live like wild pigs and goats, lest they should indulge their physical appetites without restraint.

If, as they say, they have already attained the state of resurrection, and on this account reject marriage let them neither eat nor drink. For the apostle says that in the resurrection the belly and food shall be destroyed. Why then do they hunger and thirst and suffer the weaknesses of the flesh and all the other needs which will not affect the man who through Christ has attained to the hoped for resurrection? Furthermore those who worship idols abstain both from food and from sexual intercourse. "But the kingdom of God does not consist in eating and drinking," he says. And indeed the Magi make a point of abstaining from wine and the meat of animals and from sexual intercourse while they are worshipping angels and daemons. But just as humility consists in meckness and not in treating one's body roughly, so also continence is a virtue of the soul which is not manifest to others, but is in secret.

There are some who say outright that marriage is fornication and teach that it was introduced by the devil. They proudly say that they are imitating the Lord who neither married nor had any possession in this world, boasting that. they understand the gospel better than anyone else. The Scripture says to them: "God resists the proud but gives grace to the humble." Further, they do not know the reason why the Lord did not marry .In the first place he had his own bride, the Church; and in the next place he was no ordinary man that he should also be in need of some helpmeet after the flesh. Nor was it necessary for him to beget children since he abides eternally and was born the only Son of God. It is the Lord himself who says: "That which God has joined together, let no man put asunder." And again: "As it was in the days of Noah, they were marrying, and giving in marriage, building and planting, and as it was in the days of Lot, so shall be the coming of the Son of man." And to show that he is not referring to the heathen he adds: "When the Son of man is come, shall he find faith on the earth?" And again: "Woe to those who are with child and are giving suck in those days," a saying, I admit, to be understood allegorically. The reason why he did not determine "the times which the Father has appointed by his own power" was that the world might continue from generation to generation.

Concerning the words, "Not all can receive this saying. There are some eunuchs who were born so, and some who were made eunuchs by men, and some who have made themselves eunuchs for the sake of the kingdom of heaven; let him receive it who can receive it," they do not realise the context. After his word about divorce some asked him whether, if that is the position in relation to woman, it is better not to marry; and it was then that the Lord said: "Not all can receive this saying, but those to whom it is granted." What the questioners wanted to know was whether, when a man's wife has been condemned for fornication, it is allowable for him to marry another.

It is said, however, that several athletes abstained from sexual intercourse, exercising continence to keep their bodies in training, as Astylos of Croton and Crison of Himera. Even the cithara-player, Amoebeus, though newly married, kept away from his bride. And Aristotle of Cyrene was the only man to disdain the love of Lais when she fell for him.

As he had sworn to the courtesan that he would take her to his home country if she rendered him some assistance against his antagonists, when she had rendered it, he kept his oath in an amusing manner by painting the closest possible likeness of her and setting it up in Cyrene. The story is told by Istros in his book on The Peculiarity of Athletic Contests. Therefore there is nothing meritorious about abstinence from marriage unless it arises from love to God. At any rate the blessed Paul says of those who revile marriage: "In the last times some shall depart from the faith, turning to spirits of error and doctrines inspired by daemons, forbidding to marry and commanding abstinence from food." And again he says: "Let no one disqualify you by demanding self-imposed ascetic practices and severe treatment of the body." And the same writer has "Are you bound to a wife? Do not seek to be this also. separated from her? Are you free from any wife? Do not seek to find one." And again: "Let every man have his own wife lest Satan tempt you.

How then? Did not the righteous in ancient times partake of what God made with thanksgiving? Some begat children and lived chastely in the married state. To Elijah the ravens brought bread and meat for food. And Samuel the prophet brought as food for Saul the remnant of the thigh, of which he had already eaten. But whereas they say that they are superior to them in behaviour and conduct, they cannot even be compared with them in their deeds. "He who does not eat," then, "let him not despise him who eats; and he who eats let him not judge him who does not eat; for God has accepted him." Moreover, the Lord says of himself: "John came neither eating nor drinking, and they say, He has a devil. The Son of man came eating and drinking and they say, Behold a gluttonous man and a wine-bibber, a friend of publicans and a sinner."

Or do they also scorn the apostles? Peter and Philip had children, and Philip gave his daughters in marriage.

Even Paul did not hesitate in one letter to address his consort. The only reason why he did not take her about with him was that it would have been an inconvenience for his ministry. Accordingly he says in a letter: "Have we not a right

to take about with us a wife that is a sister like the other apostles?" But the latter, in accordance with their particular ministry, devoted themselves to preaching without any distraction, and took their wives with them not as women with whom they had marriage relations, but as sisters, that they might be their fellow-ministers in dealing with housewives. I t was through them that the Lord's teaching penetrated also the women's quarters without any scandal being aroused. We also know the directions about women deacons which are given by the noble Paul in his second letter to Timothy. Furthermore, the selfsame man cried aloud that "the kingdom of God does not consist in food and drink," not indeed in abstinence from wine and meat, "but in righteousness, peace, and joy in the Holy Spirit." Which of them goes about like Elijah clad in a sheepskin and a leather girdle? Which of them goes about like Isaiah, naked except for a piece of sacking and without shoes? Or clothed merely in a linen loincloth like Jeremiah? Which of them will imitate John's gnostic way of life? The blessed prophets also lived in this manner and were thankful to the Creator .

The "righteousness" of Carpocrates, however, and those like him who pursue immoral "communion" is to be refuted by an argument along the following lines. Immediately after the words "Give to him that asks you," he continues: " And do not turn away from him who wishes to borrow. "Thus it is this kind of communion which he is teaching, not the immoral kind. How can there be one who asks and receives and borrows unless there is someone who possesses and gives and lends? What, then, is the position when the Lord says, "I was hungry and you fed me, I was thirsty and you gave me drink, I was a stranger and you took me in, naked and you clothed me," after which he adds "inasmuch as you did it to one of these little ones, you did it to me"? And does he not lay down the same principle in the Old Testament? "He who gives to the poor lends to God," and "Do not avoid giving to the needy," he says.

And again: "Let not your almsgiving and faithfulness lapse." And: "Poverty brings a man low, but the hands of the energetic are made rich." And he adds: "Behold the man who has not given his money on usury is accepted." And does he not declare expressly, "A man's wealth is judged to be his soul's ransom"? Just as the world is composed of opposites, of heat and cold, dry and wet, so also is it made up of givers and receivers. Again when he says, "If you would be perfect, sell your possessions and give to the poor," he convicts the man who boasts that he has kept all the commandments~ from his youth up. For he had not fulfilled "Thou shalt love thy neighbour as thyself." Only then was he taught by the Lord who wished to make him perfect, to give for love's sake.

Accordingly he has not forbidden us to be rich in the right way, but only a wrongful and insatiable grasping of money. For "property gained unlawfully is diminished." "There are some who sow much and gain the more, and those who hoard become impoverished." Of them it is written: "He distributed, he gave to the poor, his righteousness endures for ever." For he who sows and gathers more is the man who by giving away his earthly and temporal goods has obtained a heavenly and eternal prize; the other is he who gives to no one, but vainly "lays up treasure on earth where moth and rust corrupt"; of him it is written: "In gathering motley, he has gathered it into a condemned cell." Of his land the Lord says in the gospel that it produced plentifully; then wishing to store the fruits he built larger store-houses, saying to himself in the words dramatically put into his mouth "You have many good things laid up for many years to come, eat, drink, and be merry. You fool," says the Lord, "this night your soul shall be required of you. Whose then shall be the things you have prepared?

CHAPTER 7

The human ideal of continence, I mean that which is set forth by Greek philosophers, teaches that one should fight desire and not be subservient to it so as to bring it to practical effect. But our ideal is not to experience desire at all. Our aim is not that while a man feels desire he should get the better of it, but that he should be continent even respecting desire itself. This chastity cannot be attained in any other way except by God's grace. That was why he said "Ask and it shall be given you." This grace was received even by Moses, though clothed in his needy body, so that for forty days he felt neither thirst nor hunger. Just as it is better to be in good health than for a sick man to talk about health, so to be light is better than to discuss light, and true chastity is better than that taught by the philosophers. Where there is light there is no darkness. But where there is inward desire, even if it goes no further than desire and is quiescent so far as bodily action is concerned, union takes place in thought with the object of desire, although that object is not present.

Our general argument concerning marriage, food, and other matters, may proceed to show that we should do nothing from desire. Our will is to be directed only towards that which is necessary. For we are children not of desire but of will. A man who marries for the sake of begetting children must practise continence so that it is not desire he feels for his wife, whom he ought to love, and that he may beget children with a chaste and controlled will. For we have learnt not to "have thought for the flesh to fulfil its desires." We are to "walk honourably as in the way", that is in Christ and in the enlightened conduct of the Lord's way, "not in revelling and drunkenness, not in debauchery and lasciviousness, not in strife and envy."

However, one ought to consider continence not merely in relation to one form of it, that is, sexual relations, but in relation to all the other indulgences for which the soul craves when it is ill content with what is necessary and seeks for luxury. It is continence to despise money, softness, property, to hold in small esteem outward appearance, to control one's tongue, to master evil thoughts. In the past certain angels became incontinent and were seized by desire so that they fell from heaven to earth. And Valentine says in the letter to Agathopus: "Jesus endured " all things and was continent; It was his endeavour to earn a divine nature; he ate and drank in a manner peculiar to himself, and the food did not pass out of his body. Such was the power of his continence that food was not corrupted within him; for he himself was not subject to the process of corruption." As for ourselves, we set high value on continence which arises from love to the Lord and seeks that which is good for its own sake, sanctifying the temple of the Spirit. It is good if for the sake of the kingdom of heaven a man emasculates himself from all desire, and "purifies his conscience from dead works to serve the living God.

But those who from a hatred for the flesh ungratefully long to have nothing to do with the marriage union and the eating of reasonable food, are both blockheads and atheists, and exercise an irrational chastity like the other heathen. For example, the Brahmans neither eat animal flesh nor drink wine. But some of them take food every way, as we do, while others do so only on every third day, as Alexander Polyhistor says in his Indian History. They despise deaths and reckon life of no account. For they are persuaded that there is a regeneration. The gods they worship are Heracles and Pan. And the Indians who are called Holy Men go naked throughout their entire life. They seek for the truth, and predict the future, and reverence a certain pyramid beneath which, they think, lie the bones of a certain god. Neither the Gymnosophists nor the so-called Holy Men have wives. They think sexual relations are unnatural and contrary to law. For this cause they keep themselves chaste. The Holy Women are also virgins. They observe, it seems, the heavenly bodies and from what they indicate foretell future events.

CHAPTER 8

Those who hold that for them there is no difference between right and wrong force a few passages of Scripture and think they favour their own immoral opinions. In particular they quote the saying: "Sin shall not have dominion over you; for you are not under the law but under grace," and others of this sort, which there is no reason to add, for I am not proposing to fit out a pirate ship. Let us then briefly put a stop to their argument. The noble apostle himself refutes the charge against him implied in their false exegesis by the words with which he continues after the saying just quoted: "What then? Shall we sin because we are not under the law but under grace? God forbid." In this inspired and prophetic way he at once destroys the device of these licentious sophists.

They fail to understand, it seems, that "we must all stand before the judgment seat of Christ that each man may be rewarded for what he has done with his body, whether it is good or bad," that is, in order that a man may receive his reward for what he has done by means of his body. So then, "if any man be in Christ he is a new creation," no longer inclined to sin; "old things are passed away," we have washed off the old life; "behold new things have happened," there is chastity instead of fornication, continence instead of incontinence; righteousness instead of unrighteousness. "What is there in common between righteousness and lawlessness? Or what fellowship between light and darkness? Or what harmony between Christ and Belial? What community is there between a believer and an unbeliever? What agreement between the temple of God and idols? Having then these promises let us cleanse ourselves from all defilement of flesh and spirit. perfecting holiness in the fear of God.

CHAPTER 9

Those who are opposed to God's creation, disparaging it under the fair name of continence, also quote the words to Salome which we mentioned earlier. They are found, I believe, in the Gospel according to the Egyptians. They say that the Saviour himself said "I came to destroy the works of the female," meaning by "female" desire, and by "works" birth and corruption. What then would they say? Has this destruction in fact been accomplished? They could not say so, for the world continues exactly as before. Yet the Lord did not lie. For in truth he did destroy the works of desire, love of money, contentiousness, vanity, mad lust for women, paederasty, gluttony, licentious- ness, and similar vices. Their birth is the soul's corruption, since then we are "dead in sins." And this is the incontinence referred to as "female." Birth and the corruption chiefly involved in the creation must necessarily continue until the achievement of complete separation and the restoration of the elect, on whose account even the beings mingled with this world are restored to their proper condition.

64. It is probably therefore with reference to the consummation that Salome says: "Until when shall men die?" The Scripture uses the word "man" in two senses, the outward man and the soul, and again of him who is being saved and him who is not: and sin is said to be the death of the soul. That is why the Lord gave a cautious answer-" As long as women bear children," that is, as long as the desires are active. "Therefore, as through one man sin entered into the world, and through sin death came to all men, in that all sinned, and death reigned from Adam to Moses," says the apostle. By natural necessity in the divine plan death follows birth, and the coming together of soul and body is followed by their dissolution. If birth exists for the sake of learning and knowledge, dissolution leads to the final restoration. As woman is regarded as the cause of death because she brings to birth, so also for the same reason she may be called the originator of life.

In fact the woman who first began transgression was named "Life" because she became responsible for the succession of those who were born and fell into sin, the mother of righteous and unrighteous alike, since each one of us makes him- self either righteous or disobedient. On this account I for my part do not think the apostle was expressing disgust at life in the flesh when he said: "But with all boldness both now and ever Christ shall be magnified in my body, whether by life or by death. For to me to live is Christ and to die is gain. If, however, it is to be life in the flesh, that also means for me fruitful work. I do not know which I prefer. I am constrained on both sides: I have a desire to depart and to be with Christ. which is far better; but to abide in the flesh is more needful for your sakes." Here he showed clearly, I think, that the perfect reason for departing from the body is love for God, and that if one is to be in the flesh one should thankfully remain here for the sake of those who need salvation.

But why do they not go on to quote the words after those spoken to Salome, these people who do anything rather than walk according to the truly evangelical rule? For when she says, "I would have done better had I never given birth to a child," suggesting that she might not have been right in giving birth to a child, the Lord replies to her saying: "Eat of every plant, but eat not of that which has bitterness in it." For by this saying also he indicates that whether we are continent or married is a matter for our free choice and that there is no absolute prohibition which would impose continence upon us as a necessity. And he further makes it clear that marriage is co-operation with the work of creation.

Therefore a man ought not to think that marriage on rational principles is a sin, supposing that he does not look on the bringing up of children as being bitter (on the contrary to many childlessness is most grievous); but if a man regards the rearing of children as bitter because it distracts him from the things of God on account of the time it takes up, he may yet desire to marry because he does not take easily to a bachelor's life. What he wants to do is not harmful if it is done with selfcontrol; and each one of us is master of his own will in deciding whether to beget children. But I am aware that because of marriage there are some who have kept clear of it and against the principles of holy knowledge have lapsed into hatred of humanity so that the spirit of charity has departed from them. There are others who have become absorbed by marriage and fulfil their desires in the indulgence which the law permits, and, as the prophet says, "have become like heasts

CHAPTER 10

But who are the two or three gathered in the name of Christ in whose midst the Lord is? Does he not by the "three" mean husband, wife, and child? For a wife is bound to her husband by God. If, however, a man wishes to be undistracted, and prefers to avoid begetting children because of the business it involves, "let him remain unmarried," says the apostle, "even as I am." They explain that what the Lord meant was this. By the plurality he means the Creator, the God who is the cause of the world's existence; and by the one, the elect, he meant the Saviour who is Son of another God, the good God. But this is not correct. Through his Son, God is with those who are soberly married and have children. By the same mediation the same God is also with the man who exercises continence on rational grounds.

According to another view the three may be passion, desire, and thought; another interpretation makes them flesh, soul, and spirit.

Perhaps the triad mentioned refers to the called, and in the second place to the chosen, and in the third place to the race appointed to receive the greatest honour . With them is the power of God watching over all things which is indivisibly divided among them. He, then, who uses the soul's natural powers as is right, desires those things which are appropriate, and hates what is harmful, as the commandments prescribe: "Thou shalt bless him who blesses thee and curse him who curses thee." But when he has risen above these, passion and desire, and in very deed has begun to love the creation of the God and Creator of all things, then he will live a gnostic life, as he has become like the Saviour and has attained to a state of continence no longer maintained with difficulty. He has united knowledge, faith, and love. Thenceforth he is one in his judgment and truly spiritual, wholly incapable of thoughts arising from passion and desire, one who is to be made perfect after the image of the Lord by the artist himself, a perfect man, already worthy to be called a brother to the Lord as well as his friend and son. Thus the "two" and the "three" come together into one and the same thing -- a gnostic man.

The agreement of many, which is indicated by the number "three," with whom the Lord is present, might also be the one Church, the one man, and the one race. Or could it mean this? The Lord when he gave the law was with the one, that is the Jew. Later when he inspired the prophets and sent Jeremiah to Babylon and, moreover, called believers from the Gentiles by the teaching of the prophets, he brought the two peoples together. And was not the third the one which is made out of the two into a new man in which he walks and dwells, in the Church itself? And the law, the prophets, and also the gospel were brought together in Christ's name into a single knowledge. Accordingly, those who from hatred do not marry or from desire use the flesh as if it were not a matter of right and wrong,6 are not in the number of the saved with whom the Lord is present.

CHAPTER 11

The demonstration of these matters being concluded, let us now quote all the Scriptures which oppose these heretical sophists, and show the right rule of continence that is preserved on grounds of reason. The man of understanding will find out the particular Scripture which deals with each individual heresy, and at the right time will quote it to refute those who teach doctrines contrary to the commandments. Right from the beginning the law, as we have already said, lays down the command, "Thou shalt not covet thy neighbour's wife," long before the Lord's closely similar utterance in the New Testament, -- where the same idea is expressed in his own mouth: "You have heard that the law commanded. Thou shalt not commit adultery. But I say, Thou shalt not lust."9 That the law intended husbands to cohabit with their wives with self-control and only for the purpose of begetting children is evident from the prohibition which forbids the unmarried man from having immediate sexual relations with a captive woman. If the man has conceived a desire for her he is directed to mourn for thirty days while she is to have her hair cut; if after this the desire has not passed off. then they may proceed to beget children, because the appointed period enables the overwhelming impulse to be tested and to become a rational act of will.

For this reason you could not point to any place in Scripture where one of the ancients approached a pregnant woman; later, after the child is born and weaned, you might find that marriage relations of husbands and wives were resumed. You will find that Moses' father kept this principle in mind. After Aaron's birth three years passed before Moses was born. Again, the tribe of Levi observed this law of nature given by God, although they were fewer in number than any others which came into the promised land. For a tribe does not easily grow to great numbers if their men have intercourse only within the legal marriage relationship and then wait until the end not only of pregnancy but also of breast-feeding.

It was, therefore, reasonable when Moses in his attempt to bring the Jews to continence by degrees, directed that after sexual intercourse they must abstain for three days before they heard the divine words. "We are God's temples; as the prophet said, I will dwell among them and walk among them, and I will be their God, and they shall be my people, if our behaviour conforms to the commandments both as individuals and also as a society, as the Church. "Wherefore come out from among them and be separate, saith the Lord, and touch not the unclean thing, and I will receive you and be to you a Father, and you shall be my sons and daughters, saith the Lord Almighty." Is He prophetically commands us to be separate not from those who are married, as they assert, but from the heathen who are still living in immorality, and also from the heretics we have mentioned, as unclean and godless persons.

Hence Paul speaks against people who are like those I have mentioned, saying: "You have then these promises, beloved; let us cleanse ourselves from all defilement of flesh and spirit, perfecting holiness in the fear of God." "For I am jealous for you with a divine jealousy, for I betrothed you to one husband to present a pure virgin to Christ." The Church cannot marry another, having obtained a bridegroom; but each of us individually has the right to marry the woman he wishes according to the law; I mean here first marriage. "I am afraid lest, as the serpent in his craftiness deceived Eve, so also your thoughts may be corrupted from the simplicity which is toward Christ," said the apostle as a very careful and conscientious teacher.

So also the admirable Peter says: "Beloved, I exhort you as strangers and pilgrims, to abstain from carnal lusts, which war against the soul, and conduct yourselves well among the heathen; for this is the will of God that by doing good you should put to silence the activity of foolish men, as free and not using your freedom as a covering for evil, but as God's slaves." Likewise also Paul in the Epistle to the Romans writes: "We who are dead to sin, how shall we any longer live in it? Because our old man is crucified with him, that the body of sin might be destroyed," down to the words, "do not present your members as instruments of unrighteousness to sin."

While on this point I think I must not commit mention of the fact that the apostle declares that the same God is the God of the law, the prophets, and the gospel. In the Epistle to the Romans he quotes the gospel saying "Thou shalt not lust" as if it were from the law, knowing that it is the one Father who is preached by the law and the prophets. For he says: "What shall we say? Is the law sin? God forbid. I had not known sin except through the law; and I had not known lust unless the law had said. Thou shalt not lust " Even if the heretics who are opposed to the Creator suppose that in the next sentence Paul was speaking against him when he says, "I know that in me, that is in my flesh, there dwells no good thing," yet let them read what precedes and follows this. For before it he says, "But sin which dwells in me," which explains why it was appropriate for him to say, "in my flesh dwells no good thing.

In what follows he continues, "But if I do that which I do not wish to do, it is no longer I that do it, but sin which dwells in me," which being at war with the law of God and "of my mind," he says, "makes me captive by the law of sin which is in my members. O wretched man that I am, who shall deliver me from this body of death." And again (for he does not be- come in the least weary of being helpful) he does not hesitate to add, "For the law of the Spirit has set me free from the law of sin and death," since by his Son "God condemned sin in the flesh that the righteousness of the law might be fulfilled in us who walk not after the flesh but after the Spirit." In addition to this he makes the point still clearer by saying emphatically, "The body is dead because of sin," indicating that if it is not the temple, it is still the tomb of the soul. For when it is dedicated to God, he adds, "the spirit of him who raised Jesus from the dead dwells in you, who shall also make alive your mortal bodies through his Spirit dwelling in you.'

Again his remarks are directed against libertines when he continues as follows: "The mind of the flesh is death because those who live according to the flesh mind the things of the flesh, and the mind of the flesh is enmity against God. For it is not subject to the law of God. Those who are in the flesh cannot please God," not in the sense in which some teach, but in the sense which we have already explained. Then by contrast to this he says to the Church: "But you are not in the flesh but in the spirit, if the Spirit of God dwells in you. If any man has not Christ's Spirit, he is none of his. But if Christ be in you, the body is dead because of sin, the Spirit is life because of righteousness. So then, brethren, we are under an obligation, not to the flesh to live after the flesh. If you live after the flesh you shall die. But if by the Spirit you mortify the deeds of the body, you shall live. For all who are led by the Spirit of God are sons of God." And against the "nobility of birth" and the "freedom" abominably taught by the heretics who make a boast of their licentiousness, he goes on to say: "You have not received the spirit of bondage that you should again be in fear, but you have received the spirit of sonship by which we cry, Abba, Father." That is, we have received the Spirit for this purpose, that we may know him to whom we pray, the true Father, the only Father of all that is, him who like a father educates us for salvation and destroys fear

CHAPTER 12

If by agreement marriage relations are suspended for a time to give opportunity for prayer, this teaches continence. He adds the words "by agreement" lest anyone should dissolve his marriage, and the words "for a time" lest a married man, brought to continence by force, should then fall into sin; for if he spares his own wife he may fall into desire for another woman. On this principle he said that the man who thinks he is not behaving properly if he brings up his daughter to be unmarried, does right to give her in marriage. Whether a man becomes a celibate or whether he joins himself in marriage with a woman for the sake of having children, his purpose ought to be to re- main unyielding to what is inferior. If he can live a life of intense devotion, he will gain to himself great merit with God, since his continence is both pure and reasonable. But if he goes be- yond the rule he has chosen to gain greater glory, there is a danger that he may lose hope. Both celibacy and marriage have their own different forms of service and ministry to the Lord; I have in mind the caring for one's wife and children. For it seems that the particular characteristic of the married state is that it gives the man who desires a perfect marriage an opportunity to take

responsibility for everything in the home which he shares with his wife. The apostle says that one should appoint bishops who by their oversight over their own house have learned to be in charge of the whole church. Let each man therefore fuli his ministry by the work in which he was called, that he may be free in Christ and receive the proper reward of his ministry.

Again when speaking about the law he makes use of an illustration saying: "The married woman is by law bound to her husband while he is alive" and the following words. And again: "The wife is bound to her husband so long as he is alive, but if he dies, she is free to marry, only in the Lord. But she is happier in my judgment if she remains as she is." Moreover in the former passage he says, "You are dead to the law," not to marriage, "that you may belong to another who was raised from the dead," as Bride and Church. The Church must be chaste, both from inward thoughts contrary to the truth and from outward tempters, that is the adherents of the sects who would persuade her to commit fornication against her one husband, Almighty God, lest as the serpent deceived Eve, who is called Life, we too should be led to transgress the commandments by the lewd craftiness of the sects. The second passage teaches single marriage. One should not suppose, as some have expounded the text, that when Paul says the wife is bound to her husband he means that flesh is involved in corruption. He is attacking the notion of the godless men who attribute the invention of marriage directly to the devil, a notion which dangerously blasphemes the lawgiver.

I believe Tatian the Syrian made bold to teach these doctrines. At any rate he writes these words in his book On Perfection According to the Saviour: "While agreement to be continent makes prayer possible, intercourse of corruption destroys it. By the very disparaging way in which he allows it, he forbids it. For although he allowed them to come together again because of Satan and the temptation to incontinence, he indicated that the man who takes advantage of this permission will be serving two masters. God if there is 'agreement,' but, if there is no such agreement, incontinence, fornication, and the devil." This he says in expounding the apostle. But he falsifies the truth in that by means of what is true he tries to prove what is untrue. We too confess that incontinence and fornication are diabolical passions, but the agreement of a controlled marriage occupies a middle position. If the married couple agree to be .continent, it helps them to pray; if they agree with reverence to have sexual relations it leads them to beget children. In fact the right time to procreate is said in Scripture to be knowledge since it says: " And Adam knew his wife Eve, and she conceived and bore a son, and they called him by the name of Seth. For God has raised up for me other seed instead of Abel." You see who is the object of the blasphemy of those who abuse sober marriage and attribute birth to the devil? The Scripture here does not speak simply of a God, but of the God, indicating the Almighty by the addition of the definite article.

The point of the apostle's addition " And then come together again because of Satan" is to stop the husband from ever turning aside after other women. A temporary agreement, although for the moment intercourse is not approved, does not mean that the natural instincts are completely removed. Because of them he again restores the marriage bond, not so that husband and wife may be incontinent and fornicate and do the devil's work, but to prevent them from falling into incontinence, fornication, and the devil. Tatian also separates the old man and the new, but not as we understand it. We agree with him that the law is the old man and the gospel the new, and say the same ourselves, but not in the sense in which he takes it since he would do away with the law as originating from another God. But it is the same man and Lord who makes the old new, by no longer allowing several marriages (for at that time God required it when men had to increase and multiply), and by teaching single marriage for the sake of begetting children and looking after domestic affairs, for which purpose woman was given as a "helpmeet." And if from sympathy the apostle allows a man a second marriage because he cannot control himself and burns with passion, he also does not commit any sin according to the Old Testament (for it was not forbidden by the Law), but he does not fulfil the heightened perfection of the gospel ethic. But he gains heavenly glory for himself if he remains as he is, and keeps undefiled the marriage yoke broken by death, and willingly accepts God's purpose for him, by which he has become free from distraction for the service of the Lord. But the providence of God as revealed by the Lord does not order now. as it did in ancient times, that after sexual intercourse a man should wash. For there is no need for the Lord to make believers do this after intercourse since by one Baptism he has washed them clean for every such occasion, as also he has comprehended in one Baptism the many washings of Moses.

In ancient times the law directed washing after the emission of the generative seed because it was foretelling our regeneration by speaking of fleshly birth, not because it held human birth to be a defilement. For that which after birth appears as a man is effected by the emission of the seed. It is not frequent intercourse of the parents which produces birth, but the reception of the seed in the womb. In the workshop of nature the seed is transformed into an embryo. How then can marriage be a state only intended for ancient times and an invention of the law, and marriage on Christian principles of a different nature, if we hold that the Old and the New Testaments proclaim the same God? "For what God has joined together no man may ever put asunder" for any good reason; if the Father commanded this, so much the more also will the Son keep it. If the author of the law and the gospel is the same, he never contradicts himself. For there is life in the law in that it is spiritual and is to be gnostically understood. But "we are dead to the law by the body of Christ, that we should belong to an- other, to him who was raised from the dead" and was prophesied by the law: "that we might bear fruit unto God."

Therefore "the law is holy and the commandment holy, righteous, and good." We, then, are dead to the law, that is to sin of which the law makes us aware; the law indicates it, it does not give rise to it; by telling us what we ought to do and prohibiting what we ought not to do, the law shows up the sin which lies underneath "that sin may be manifest." But if marriage according to the law is sin, I do not know how anyone can say he knows God when he asserts that the command of God is sin. If the law is holy, marriage is holy. This mystery the apostle refers to Christ and the Church. Just as "that which is born of the flesh is flesh, so that which is born of the spirit is spirit" not only in respect of its birth but also of what is acquired by learning. Thus "the children also are holy," they are well-pleasing to God, in that the Lord's words bring the soul as a bride to God. Fornication and marriage are therefore different things, as far apart as God is from the devil. " And you are dead to the law through the body of Christ so that you might belong to another, to him who was raised from the dead." It is to be understood here that you become closely obedient, since it is also according to the truth of the law that we obey the same Lord whose commands are given to us from a distance.

85. And no doubt of such people it is reasonable when, "the Spirit says expressly that in the last times some shall depart from the faith, giving heed to spirits of error and the teaching inspired by daemons, through hypocritical sophists who are seated in conscience and forbid marriage, and demand abstinence from foods which God created to be eaten with thanksgiving by believers who know the truth. Everything created by God is good, and none is to be rejected but accepted with thanksgiving. For it is sanctified by the Word of God and by prayer." It necessarily follows, then, that it is wrong to forbid marriage and indeed eating meat or drinking wine. For it is written: "It is good to eat no meat and to drink no wine" if it causes offence to do so, and that it is "good to remain as I am." But both he who eats with thanksgiving and has a continent enjoyment, should live in accordance with reason.

In general all the epistles of the apostle teach self-control and continence and contain numerous instructions about marriage, begetting children, and domestic life. But they nowhere rule out self-controlled marriage. Rather they preserve the harmony of the law and the gospel and approve both the man who with thanks to God enters upon marriage with sobriety and the man who in accordance with the Lord's win lives as a celibate, even as each individual is caned, making his choice without blemish and in perfection. "And the land of Jacob was praised above another lands," says the prophet, glorifying the vessel of his Spirit. But a certain man who disparages birth, speaking of it as corrupt and destined for abolition, and does violence to the Scripture, saving that the Lord was referring to procreation in the words that on earth one ought not to "lay up treasure where moth and rust corrupt." And he is not ashamed to add to this the quotation from the prophet: "You all shall wax old like a garment and moth shall eat you." But we do not contradict the Scripture. Our bodies are corruptible and by nature subject to continual change. Perhaps the prophet was foretelling destruction to those whom he was addressing because they were sinners. But the Saviour did not refer to begetting children, but was exhorting those who wished only to possess large wealth and not to help the needy, to share their goods with others.

That is why he says: "Work not for the food which perishes, but for that which abides unto eternal life." Similarly they quote the saying: "The children of the age to come neither marry nor are given in marriage." But if anyone thinks carefully about this question concerning the resurrection of the dead and those who asked it, he will find that the Lord is not rejecting marriage, but ridding their minds of the expectation that in the resurrection there will be carnal desire. The phrase "the children of this age" is not meant to make a contrast with the children of some other age, but is equivalent to saying "those who are born in this age," who are children because of birth; they beget and are begotten since without birth no one will come into this life. But this birth which must expect a corresponding corruption, no longer awaits him who has once departed from this life. "Your father in heaven is one," but he is also father of all men by creation. "Therefore call no man your father on earth," which is as if he said: Do not reckon him who begat you by fleshly generation to be the cause of your being, but as the one who co-operated in causing your birth, or rather as a subordinate helper to that end.

He thus wishes us to turn ourselves again and become as children who have come to know the true Father and are reborn through water by a generation different from birth in the created world. Yes, he says, "the unmarried cares for the things The source of the quotation is unknown; the entire sentence is cited by of the Lord, but he who is married how he can please his wife." What then? Is it not lawful also for those who wish to please their wives according to the will of God to give thanks to God? Is it not allowable for both the married man and his wife to care for things of the Lord together? But just as "the unmarried woman cares for the things of the Lord, that she may be holy both in body and spirit," so also the married woman cares in the Lord for the things of her husband and the things of the Lord, the one as a wife, the other as a virgin. But to put to shame and to discourage those inclined to contract a second marriage the apostle appropriately uses strong language and says at once: "Every other sin is external to the body, but he who commits fornication sins against his own body."

But if anyone dares to call marriage fornication, he again falls into blasphemy against the law and the Lord. For as covetousness is called fornication because it is opposed to contentment with what one possesses, and as idolatry is an abandonment of the one God to embrace many gods, so fornication is apostasy from single marriage to several. For, as we have re- marked, the apostle uses the words fornication and adultery in ; three senses. On this matter the prophet says: "You were sold to your sins." And again: "You were defiled in a foreign land." Here he regards as defilement an association which is bound up with a strange body and not with that which in marriage is bestowed for the purpose of procreation. That is why the apostle ! also says: "I wish then that the younger women marry, bear children, look after their houses, and give the adversary no occasion for abuse; for some have already turned aside after Satan."

And indeed he entirely approves of the man who is husband of one wife, whether he be presbyter, deacon, or layman, if he conducts his marriage unblameably. "For he shall be saved by child-bearing." Again when the Saviour calls the Jews "a wicked and adulterous generation" he teaches that they did not know the law as the law intended; by following the tradition of the elders and the commandments of men, they were committing adultery against the law, as they did not accept "the husband and lord of their virginity." But perhaps he also knew that they were enslaved by alien desires, on account of which they were in continual bondage to their sins and were sold to foreigners, since among the Jews at least no public harlots existed and adultery was forbidden. But he who said, "I have married a wife and therefore I cannot come" to the divine supper was an example to convict those who for pleasure's sake were abandoning the divine command; for if this saying is taken otherwise neither the righteous before the coming of Christ nor those who have married since his coming, even if they be apostles, will be saved. And if they again bring forward the point that the prophet also said, "I have become old among all my enemies," by "enemies" they ought to understand sins. It is not marriage that is a sin but fornication, since otherwise they must say that birth and the creation of birth are sinful.

CHAPTER. 13

Such are the arguments of Julius Casinos, the originator of deceits. At any rate in his book Concerning Continence and Celibacy he says these words: "And let no one say that because we have these parts, that the female body is shaped this way and the male that way, the one to receive, the other to give seed, sexual intercourse is allowed by God. For if this arrangement had been made by God, to whom we seek to attain, he would not have pronounced eunuchs blessed; nor would the prophet have said that they are 'not an unfruitful tree,' using the tree as an illustration of the man who chooses to emasculate himself of any such notion."

And striving still further to support his godless opinion he adds: "Could not one rightly find fault with the Saviour if he was responsible for our formation and then delivered us from error and from this use of the generative organs?" In this respect his teaching is the same as Titian's. But he departed from the school of Valentine. On this account he says: "When Salome ' asked when she would know the answer to her questions, the Lord said, When you trample on the robe of shame, and when the two shall be one, and the male with the female, and there is neither male nor female."

In the first place we have not got the saying in the four Gospels that have been handed down to us, but in the Gospel according to the Egyptians. Secondly Cassia seems to me not to know that it refers to wrath in speaking of and to desire in speaking of the female. When these operate, there follow repentance and shame. But when a man gives in neither to wrath nor to desire, both of which increase in consequence of evil habit and upbringing so as to cloud and obscure rational thought, but puts off from him the darkness they cause with penitence and shame, uniting spirit and soul in obedience to the Word, then, as Paul also says, "there is among you neither male nor female." For the soul leaves this physical form in which male and female are distinguished, and being neither the one nor the other changes to unity. But this worthy fellow thinks in Platonic fashion that the soul is of divine origin and, having become female by desire, has come down here from above to birth and corruption.

CHAPTER 14

He then does violence to Paul, making him hold that birth originated from deceit because he says: "I am afraid lest, as the serpent deceived Eve, your thoughts should be corrupted from the simplicity which is towards Christ," But the Lord, as all agree, came to that which was astray, but it had not strayed from above into earthly birth (for birth is created and the creation of the Almighty who would never bring the soul down from what is good to what is bad). The Saviour came to men who were astray in their thoughts, to us whose minds were corrupted as a result of our disobeying the commandments because we were lovers of pleasure, and perhaps also because the first man of our race did not bide his time, desired the favor of marriage before the proper hour, and fell into sin by not waiting for the time of God's will; "for everyone who looks upon a woman to lust after her has already committed adultery with her.'

It was the same Lord who at that time also condemned the desire which preceded marriage. When, therefore, the apostle says. "Put on the new man which is created after God." he speaks to us who were formed as we are by the will of the Almighty. In speaking of the old man and the new he is not referring to birth and rebirth respectively, but to manner of life, the one being disobedient, the other obedient. The "coats of skins" in Cassia's view are bodies. That both he and those who teach the same as he does are wrong here we will show :r when we undertake an explanation of the birth of man :r the necessary preliminary discussion. He further says: The subjects of earthly kings both beget and are born, 'but our citizenship is in heaven, from whence also we look for the Savior. That this remark also is right we recognize, since ought to behave as strangers and pilgrims, if married as though we were not married, if possessing wealth as though we not possess it, if procreating children as giving birth to mortals, as those who are ready to abandon their property, as men) would even live without a wife if need be, as people who not passionately attached to the created world, but use it with all gratitude and with a sense of exaltation beyond it.

CHAPTER 15

And again when the apostle says, "It is good for a man not to touch a woman; but because of the risk of immorality let man have his own wife," he explains it, as it were, by the further words "lest Satan tempt you." In the phrase "because of continence" he speaks not to those who chastely use marriage for procreation alone, but to those who were desiring to beyond procreation, lest the adversary should raise a stormy and arouse desire for alien pleasures. But perhaps because Satan is zealously hostile to those who live rightly and contends against them, and wishes to bring them over to his own side, he aims to give them occasions for falling by making it difficult for to be continent.

Accordingly the apostle rightly says, "It is better to marry :than to burn," that the husband may give to the wife her due he wife to the husband, and that they should not deprive another of help given by divine providence for the purpose of generation. "But whosoever shall not hate father or mother or wife or children," they quote, "cannot be my disciple." This a command to hate one's family. For he says: "Honour thy father and thy mother that it may be well with thee." Is But what he means is this: Do not let yourself be led astray by irrational impulses and have nothing to do with the city customs. For a household consists of a family, and cities of households, as Paul also says of those who are absorbed in marriage that they aim to "please the world." Again the Lord says, "Let not the married person seek a divorce, nor the unmarried person marriage," that is, he who has confessed his intention of being celibate, let him remain unmarried.

To both the same Lord gives the corresponding promises by the prophet Isaiah in the following words: "Let not the eunuch say, I am dry wood. To eunuchs the Lord says this, If you keep my sabbaths and do all that I command you, I will give you a place better than sons and daughters." For a eunuch is not justified merely because he is a eunuch, and certainly not because he observes the sabbath, if he does not keep the commandments. And for the married he goes on to say, "My elect shall not labour in vain nor bear children to be accursed; for they are a seed blessed by the Lord." For him who begets children and brings them up and educates them in the Lord, just as for him who begets children by means of the true teaching, a reward is laid up, as also for the elect seed. But others hold that procreation is a curse and do not understand that the Scripture speaks against them. Those who are in truth the Lord's elect neither teach doctrines nor beget children to be accursed, as the sects do.

A eunuch, then, does not mean a man who has been castrated, nor even an unmarried man, but a man who is unproductive of truth. Formerly he was "dry wood," but if he obeys the word and observes the sabbaths by abstaining from sins and keeps the commandments, he will be in higher honour that those who are educated in word alone and fail to do what is right. "Little children," says our teacher, "a little while longer I am with you." That is why Paul also instructs the Galatians in these words: "My little children, with whom I travail in birth again until Christ be formed in you." And again he writes to the Corinthians: "For though you may have ten thousand instructors in Christ, yet you have not many fathers. For in Christ I have begotten you through the gospel." On this account a eunuch shall not enter into God's assembly," that is, the man who is unproductive and unfruitful both in conduct and in word; but blessed are those who have made themselves eunuchs, free from all sin, for the sake of the kingdom of heaven by their abstinence from the world.

CHAPTER 16

When Jeremiah says, Cursed be the day in which I was born, and let it not be longed for," he is not saying simply that birth is accursed, but is in despair at the sins and disobedience of the people. In fact he goes on, "Why was I born to see labour and pain and my days accomplished in shame?" All those who preach the truth are persecuted and in danger because of the disobedience of their hearers. "Why did not my mother's womb become my tomb, that I might not see the distress of Jacob and the toil of the nation of Israel?" says Esdras the prophet. "No one is pure from defilement," says Louras the even if his life last but one day." Let them tell us how the newly born child could commit fornication, or how that which has done nothing has fallen under the curse of Adam. The only consistent answer for them, it seems, is to say that birth is an evil, not only for the body, but also for the soul for the sake of which the body itself exists. And when David says: "In sin I was born and in unrighteousness my mother conceived me," he says in prophetic manner that Eve is his mother. For Eve became the mother of the living." But if he was conceived in sin, yet he was not himself in sin, nor is he himself sin.

But on the question whether everyone who turns from I sin to faith turns from sinful habits to life as though born of a mother, I may call as witness one of the twelve prophets who said:, "Am I to give my firstborn for my impiety, the fruit of my womb for the sin of my soul?" This is not an attack on him who said: "Increase and multiply." Rather he calls the first impulses resulting from birth, by which we do not know God, "impiety." If on this basis anyone maintains that birth is evil, let him also on the same ground hold that it is good, since in it we recognise the truth. "Be sober as is right, .and sin not; for some have not the knowledge of God," that is, those who sin. "For we wrestle not against flesh and blood, but against spiritual powers." But "the rulers of darkness" have power to tempt us. That is why concessions are made. Therefore also Paul says: "I buffet my body and bring it into subjection." "For everyone who wishes to take part in a contest is continent in all things" (the words "he is continent in all things" really mean that, though he does not abstain from everything, yet he is self-controlled on such things as he thinks fit). "They do it to obtain a corruptible crown, but we an incorruptible," as if we conquer in the struggle, though there is no crown for us if we do not put up any fight at all. There are also some now who rank the widow higher than the virgin in the matter of continence, on the ground that she scorns pleasure of which she has had experience.

CHAPTER 17

If birth is something evil, let the blasphemers say that the Lord who shared in birth was born in evil, and that the virgin gave birth to him in evil. Woe to these wicked fellows! They blaspheme against the will of God and the mystery of creation in speaking evil of birth. This is the ground upon which Docetism is held by Cassian and by Marcion also, and on which even Valentine indeed teaches that Christ's body was "psychic." They say: Man became like the beasts when he came to practice sexual intercourse. But it is when a man in his passion really wants to go to bed with a strange woman that in truth such a man has become a wild beast. "Wild horses were they become, each man whinnied after his neighbour's wife." And if the serpent took the use of intercourse from the irrational animals and persuaded Adam to agree to have sexual union with Eve, as though the couple first created did not have such union by nature, as some think, this again is blasphemy against the creation. For it makes human nature weaker than that of the brute beasts if in this matter those who were first created by God copied them.

But if nature led them, like the irrational animals, to procreation, yet they were impelled to do it more quickly than. was proper because they were still young and had been led away by deceit. Thus God's judgment against them was just, because they did not wait for his will. But birth is holy. By it were made the world, the existences, the natures, the angels, powers, souls, the commandments, the law, the gospel, the knowledge of God. And "all flesh is grass, and all the glory of man as the flower of grass. The grass withers, the flower falls; but the word of the Lord abides" which anoints the soul and unites it with the spirit. Without the body how could the divine plan for us in the Church achieve its end? Surely the Lord himself, the head of the Church, came in the flesh, though without form and beauty, to teach us to look upon the formless and incorporeal nature of the divine Cause. "For a tree of life" says the prophet, "grows by a good desire," teaching that desires which are in the living Lord are good and pure.

Furthermore they wish to maintain that the intercourse of man and wife in marriage, which is called knowledge, is a sin; this sin is referred to as eating of the tree of good and evil, and the phrase "he knew" signifies transgression of the commandment. But if this is so, even knowledge of the truth is eating of the tree of life. It is possible for a sober-minded marriage to partake of that tree. We have already observed that marriage may be used rightly or wrongly; and this is the tree of knowledge, if we do not transgress in marriage. What then? Does not the Saviour who heals the soul also heal the body of its passions? But if the flesh were hostile to the soul, he would not have raised an obstacle to the soul by strengthening with good health the hostile flesh. "This I say, brethren, that flesh and blood cannot inherit the kingdom of God nor corruption incorruption." For sin being corruption cannot have fellowship with incorruption which is righteousness. " Are you so foolish?" he says; "having begun in the Spirit are you now to be made perfect by the flesh.

CHAPTER 18

Some, then, as we have shown, have tried to go beyond what is right and the concord that marks salvation which is holy

and established. They have blasphemously accepted the ideal of continence for reasons entirely godless. Celibacy may lawfully be chosen according to the sound rule. with godly reasons, provided that the person gives thanks for the grace God has granted, and does not hate the creation' or reckon married people to be of no account. For the world is created: celibacy is also created. Let both give thanks for their appointed state, if they know to what state they are appointed. But others have kicked over the traces and waxed wanton, having become indeed "wild horses who whinny after their neighbour's wives." They have abandoned themselves to lust without restraint and persuade their neighbours to live licentiously; as wretches they follow the Scripture: "Cast your lot in with us; let us all have a common purse and let our moneybag be one."

On account of them the same prophet gives us advice saying: "Go not in the way with them, withdraw thy foot from their steps. For not unjustly are nets spread out to catch birds; for they are guilty of bloodshed and treasure up evil for themselves" -that is, they seek for immorality and teach their neighbours to do the same. According to the prophet they are "fighters struck with their own tails" (ourai), to which the Greeks give the name kerkoi. Those to whom the prophecy refers might well be lustful, incontinent, men who fight with their tails, children of darkness and wrath, bloodstained suicides and murderers of their neighbours. "Purify out the old leaven, that you may be a new lump," cries the apostle to us. And again in anger at such people he directs that we should "have no fellowship with anyone called a brother if he is a fornicator or covetous man or idolater or reviler or drunkard or robber; with such a man one ought not even to "For I through the law am dead to the law," he says, eat " 'that I may live unto God. I am crucified with Christ; it is no longer I that live," meaning that I used to live according to my lusts, "but Christ lives in me," and I am pure and blessed by obeying the commandments; so that whereas at one time I lived in the flesh carnally, "the life which I now live in the flesh I live by faith in the Son of God."

"Go into no way of the heathen and enter no city of the Samaritans," says the Lord, to keep us away from society contrary to his will. "For the end of the lawless man is evil. And these are the ways of all those who do lawless deeds.' "Woe to that man," the Lord says, "it were well for him if he had never been born, than that he should cause one of my little ones to stumble. It were better for him that a millstone were hung about him and he cast into the sea than that he should pervert one of my elect." "For the name of God is blasphemed because of them." Therefore the apostle nobly says, "1 wrote to you in my letter to have no company with fornicators," as far as the words "but the body is not for fornication but for the Lord, and the Lord for the body." And to show that he does not regard marriage as fornication he goes on: "Do you not know that he Who is joined to a harlot is one body with her?" Or who will assert that before she is married a virgin is a harlot? " And do not deprive one another." he says, "except by agreement for a time," indicating by the word "deprive" the obligation of marriage, procreation, which he has set forth in the preceding pas- sage

where he says: "Let the husband give the wife her due and likewise also the wife to the husband."

In fulfilling this obligation she is a helpmeet in the house and in Christian faith. And the apostle expresses the same point even more clearly as follows: "To the married I direct, yet not I but the Lord, that the wife be not separated from her husband (and if she is separated, let her remain unmarried or be reconciled to her husband) and that the husband should not leave his wife. But to the rest I say, not the Lord: If any brother. ..," 'down to the words "but now are they holy." What have they to say to these words, these people who disparage the law and speak as if marriage were only conceded by the law and is not in accord with the New Testament? What reply to these directions have those who recoil from intercourse and birth? For he also lavs down that the bishop who is to rule the Church must be a man who governs his own household well. A household pleasing to the Lord consists of a marriage with one wife .. "To the pure," he says, "all things are pure: but to the defiled and unbelieving nothing is pure, but their mind and conscience are polluted." With reference to illicit indulgence he says: "Make no mistake: neither fornicators nor idolaters nor adulterers nor effeminate men nor homosexuals nor covetous men nor robbers nor drunkards nor revilers nor thieves shall inherit the kingdom of God. And we," who used to indulge in such practices, "have washed ourselves." 'But they have a purification, with a view to committing this immorality; their baptism means passing from self-control to fornication. They maintain that one should gratify the lusts and passions, teaching that one must turn from sobriety to be incontinent. They set their hope on their private parts. Thus they shut themselves out of God's kingdom and deprive themselves of enrolment as disciples, and under the name of knowledge, falsely so called, they have taken the road to outer darkness. "For the rest, brethren, whatever is true, whatever is holy, whatever is righteous, whatever is pure, whatever is attractive, whatever is well spoken of, whatever is virtuous, and whatever is praiseworthy, think on these things. And whatever you have learnt and received and heard and seen in me, this do. And the God of peace shall be with you.

And Peter in his epistle says the same: "So that your faith and hope may be in God, because you have purified your souls in obedience to the truth," "as obedient children, not behaving after the fashion of the lusts in which in your ignorance you formerly indulged; but as he who has called you is holy, so also must you be holy in all your conduct; as it is written, Be ye holy for I am holy."

But our polemic, though necessary against those who masquerade under the false name of knowledge, has carried us beyond the limit and made our discussion lengthy. Accordingly this is the end of our third miscellany of gnostic notes in accordance with the true philosophy.

THE STROMATA, BOOK 4

CHAPTER 1 -- ORDER OF CONTENTS.

It will follow, I think, that I should treat of martyrdom, and of who the perfect man is. With these points shall be included what follows in accordance with the demands of the points to be spoken about, and how both bond and free must equally philosophize, whether male or female in sex. And in the sequel, after finishing what is to be said on faith and inquiry, we shall set forth the department of symbols; so that, on cursorily concluding the discourse on ethics, we shall exhibit the advantage which has accrued to the Greeks from the barbarian philosophy. After which sketch, the brief explanation of the Scriptures both against the Greeks and against the Jews will be presented, and whatever points we were unable to embrace in the previous Miscellanies (through having respect necessarily to the multitude of matters), in accordance with the commencement of the poem, purposing to finish them in one commentary. In addition to these points, afterwards on completing the sketch, as far as we can in accordance with what we propose, we must give an account of the physical doctrines of the Greeks and of the barbarians, respecting elementary principles, as far as their opinions have reached us, and argue against the principal views excogitated by the philosophers.

It will naturally fall after these, after a cursory view of theology, to discuss the opinions handed down respecting prophecy; so that, having demonstrated that the Scriptures which we believe are valid from their omnipotent authority, we shall be able to go over them consecutively, and to show thence to all the heresies one God and Omnipotent Lord to be truly preached by the law and the prophets, and besides by the blessed Gospel. Many contradictions against the heterodox await us while we attempt, in writing, to do away with the force of the allegations made by them, and to persuade them gainst their will, proving by the Scriptures themselves.

On completing, then, the whole of what we propose in the commentaries, on which, if the Spirit will, we ministering to the urgent need, (for it is exceedingly necessary, before coming to the truth, to embrace what ought to be said by way of preface), shall address ourselves to the true gnostic science of nature, receiving initiation into the minor mysteries before the greater; so that nothing may be in the way of the truly divine declaration of sacred things, the subjects requiring preliminary detail and statement being cleared away, and sketched beforehand. The science of nature, then, or rather observation, as contained in the gnostic tradition according to the rule of the truth, depends on the discussion concerning cosmogony, ascending thence to the department of theology. Whence, then, we shall begin our account of what is handed down, with the creation as related by the prophets, introducing also the tenets of the heterodox, and endeavouring as far as we can to confute them. But it shall be written if God will, and as He inspires; and now we must proceed to what we proposed, and complete the discourse on ethics.

CHAPTER 2 -- THE MEANING OF THE NAME STROMATA OR MISCELLANIES.

Let these notes of ours, as we have often said for the sake of those that consult them carelessly and unskilfully, be of varied character -- and as the name itself indicates, patched together -- passing constantly from one thing to another, and in the series of discussions hinting at one thing and demonstrating another. "For those who seek for gold," says Heraclitus, "dig much earth and find little gold." But those who are of the truly golden race, in mining for what is allied to them, will find the much in little. For the word will find one to understand it. The Miscellanies of notes contribute, then, to the recollection and expression of truth in the case of him who is able to investigate with reason.

And you must prosecute, in addition to these, other labours and researches; since, in the case of people who are setting out on a road with which they are unacquainted, it is sufficient merely to point out the direction. After this they must walk and find out the rest for themselves. As, they say, when a certain slave once asked at the oracle what he should do to please his master, the Pythian priestess replied, "You will find if you seek." It is truly a difficult matter, then, as turns out, to find out latent good; since "Before virtue is placed exertion, And long and steep is the way to it, And rough at first; but when the summit is reached, Then is it easy, though difficult [before]."

"For narrow," in truth, "and strait is the way" of the Lord. And it is to the "violent that the kingdom of God belongs."

Whence, "Seek, and ye shall find," holding on by the truly royal road, and not deviating. As we might expect, then, the generative power of the seeds of the doctrines comprehended in this treatise is great in small space, as the "universal herbage of the field," as Scripture saith. Thus the Miscellanies of notes have their proper title, wonderfully like that ancient oblation culled from all sorts of things of which Sophocles writes: "For there was a sheep's fleece, and there was a vine, And a libation, and grapes well stored; And there was mixed with it fruit of all kinds, And the fat of the olive, and the most curious Wax-formed work of the yellow bee."

Just so our Stromata, according to the husbandman of the comic poet Timocles, produce "figs, olives, dried figs, honey, as from an all-fruitful field;" on account of which exuberance he adds: "Thou speakest of a harvest-wreath not of husbandry."

For the Athenians were wont to cry: "The harvest-wreath bears figs and fat loaves, And honey in a cup, and olive oil to anoint you."

We must then often, as in winnowing sieves, shake and toss up this the great mixture of seeds, in order to separate the wheat.

CHAPTER 3 -- THE TRUE EXCELLENCE OF MAN.

The most of men have a disposition unstable and heedless, like the nature of storms. "Want of faith has done many good things, and faith evil things." And Epicharmus says, "Ďon't forget to exercise incredulity; for it is the sinews of the soul.' Now, to disbelieve truth brings death, as to believe, life; and again, to believe the lie and to disbelieve the truth hutries to destruction. The same is the case with self-restraint and licentiousness. To restrain one's self from doing good is the work of vice; but to keep from wrong is the beginning of salvation. So the Sabbath, by abstinence from evils, seems to indicate self-restraint. And what, I ask, is it in which man differs from beasts, and the angels of God, on the other hand, are wiser than he? "Thou madest him a little lower than the angels." For some do not interpret this Scripture of the Lord. although He also bore flesh, but of the perfect man and the gnostic, inferior in comparison with the angels in time, and by reason of the vesture [of the body]. I call then wisdom nothing but science, since life differs not from life. For to live is common to the mortal nature, that is to man, with that to which has been vouchsafed immortality; as also the faculty of contemplation and of self-restraint one of the two being more excellent. On this ground Pythagoras seems to me to have said that God alone is wise, since also the apostle writes in the Epistle to the Romans, "For the obedience of the faith among all nations, being made known to the only wise God through Jesus Christ;" and that he himself was a philosopher, on

account of his friendship with God. Accordingly it is said, "God talked with Moses as a friend with a friend." s That, then, which is true being clear to God, forthwith generates truth. And the gnostic loves the truth. "Go," it is said, "to the ant, thou sluggard, and be the disciple of the bee;" thus speaks Solomon. For if there is one function belonging to the peculiar nature of each creature, alike of the ox, and horse, and dog, what shall we say is the peculiar function of man? He is like, it appears to me, the Centaur, a Thessalian figment, compounded of a rational and irrational part, of soul and body. Well, the body tills the ground, and hastes to it; but the soul is raised to God: trained in the true philosophy, it speeds to its kindred above, turning away from the lusts of the body, and besides these, from toil and fear, although we have shown that patience and fear belong to the good man.

For if "by the law is the knowledge of sin," as those allege who disparage the law, and "till the law sin was in the world;" yet "without the law sin was dead," we oppose them. For when you take away the cause of fear, sin, you have taken away fear; and much more, punishment, when you have taken away that which gives rise to lust. "For the law is not made for the just man," says the Scripture. Well, then, says Heraclitus, "They would not have known the name of Justice if these things had not been." And Socrates says, "that the law was not made for the sake of the good." But the cavillers did not know even this, as the apostle says, "that he who loveth his brother worketh not evil;" for this, "Thou shalt not kill, thou shalt not commit adultery, thou shalt not steal; and if there be any other commandment, it is comprehended in the word, Thou shall love thy neighbour as thyself." So also is it said, "Thou shall love the Lord thy God with all thy heart, and thou shalt love thy neighbour as thyself." And "if he that loveth his neighbour worketh no evil," and if "every commandment is comprehended in this, the loving our neighbour," the commandments, by menacing with fear, work love, not hatred. Wherefore the law is productive of the emotion of fear. "So that the law is holy," and in truth "spiritual," according to the apostle. We must, then, as is fit, in investigating the nature of the body and the essence of the soul, apprehend the end of each, and not regard death as an evil. "For when ye were the servants of sin," says the apostle. "ve were free from righteousness. What fruit had ve then in those things in which ye are now ashamed? For the end of those things is death. But now, being made free from sin, and become servants to God, ye have your fruit unto holiness, and the end everlasting life. For the wages of sin is death: but the gift of God is eternal life, through Jesus Christ our Lord." The assertion then may be hazarded that it has been shown that death is the fellowship of the soul in a state of sin with the body; and life the separation from sin. And many are the stakes and ditches of lust which impede us, and the pits of wrath and anger which must be overleaped, and all the machinations we must avoid of those who plot against us, -who would no longer see the knowledge of God "through a glass.'

"The half of virtue the far-seeing Zeus takes From man, when he reduces him to a state of slavery."

As slaves the Scripture views those "under sin" and "sold to sin," the lovers of pleasure and of the body; and beasts rather than men, "those who have become like to cattle, horses, neighing after their neighbours' wives." The licentious is "the lustful ass.," the covetous is the "savage wolf," and the deceiver is "a serpent." The severance, therefore, of the soul from the body, made a life-long study, produces in the philosopher gnostic alacrity, so that he is easily able to bear natural death, which is the dissolution of the chains which bind the soul to the body. "For the world is crucified to me, and I to the world," the [apostle] says; "and now I live, though in the flesh, as having my conversation in heaven."

CHAPTER 4 -- THE PRAISES OF MARTYRDOM.

Whence, as is reasonable, the gnostic, when Galled, obeys easily, and gives up his body to him who asks; and, previously divesting himself of the affections of this carcase, not insulting the tempter, but rather, in my opinion, training him and convincing him,- "From what honour and what extent of wealth fallen," as says Empedocles, here for the future he walks with mortals. He, in truth, bears witness to himself that he is faithful and loyal towards God; and to the tempter, that he in vain envied him who is faithful through love; and to the Lord, of the inspired persuasion in reference to His doctrine, from which he will not depart through fear of death; further, he confirms also the truth of preaching by his deed, showing that God to whom he hastes is powerful. You will wonder at his love, which he conspicuously shows with thankfulness, in being united to what is allied to him, and besides by his precious blood, shaming the unbelievers. He then avoids denying Christ through fear by reason of the command; nor does he sell his faith in the hope of the gifts prepared, but in love to the Lord he will most gladly depart from this life; perhaps giving thanks both to him who afforded the cause of his departure hence, and to him who laid the plot against him, for receiving an honourable reason which he himself furnished not, for showing what he is, to him by his patience, and to the Lord in love, by which even before his birth he was manifested

to the Lord, who knew the martyr's choice. With good courage, then, he goes to the Lord, his friend, for whom he voluntarily gave his body, and, as his judges hoped, his soul, hearing from our Saviour the words of poetry, "Dear brother," by reason of the similarity of his life. We call martyrdom perfection, not because the man comes to the end of his life as others, but because he has exhibited the perfect work of love. And the ancients laud the death of those among the Greeks who died in war, not that they advised people to die a violent death, but because he who ends his life in war is released without the dread of dying, severed from the body without experiencing previous suffering or being enfeebled in his soul, as the people that suffer in diseases. For they de part in a state of effeminacy and desiring to live; and therefore they do not vield up the soul pure, but bearing with it their lusts like weights of lead; all but those who have been conspicuous in virtue. Some die in battle with their lusts, these being in no respect different from what they would have been if they had wasted away by disease.

If the confession to God is martyrdom, each soul which has lived purely in the knowledge of God, which has obeyed the commandments, is a witness both by life and word, in whatever way it may be released from the body, -- shedding faith as blood along its whole life till its departure. For instance, the Lord says in the Gospel, "Whosoever shall leave father, or mother, or brethren," and so forth, "for the sake of the Gospel and my name," he is blessed; not indicating simple martyrdom, but the gnostic martyrdom, as of the man who has conducted himself according to the rule of the Gospel, in love to the Lord (for the knowledge of the Name and the understanding of the Gospel point out the gnosis, but not the bare appellation), so as to leave his worldly kindred, and wealth, and every possession, in order to lead a life free from passion.

"Mother" figuratively means Country and sustenance; "fathers" are the laws of civil polity: which must be contemmed thankfully by the high-souled just man; for the sake of being the friend of God, and of obtaining the right hand in the holy place, as the Apostles have done.

Then Heraclitus says, "Gods and men honour those slain in battle;" and Plato in the fifth book of the Republic writes, 'Of those who die in military service, whoever dies after winning renown, shall we not say that he is chief of the golden race? Most assuredly." But the golden race is with the gods, who are in heaven, in the fixed sphere, who chiefly hold command in the providence exercised towards men. Now some of the heretics who have misunderstood the Lord, have at once an impious and cowardly love of life; saving that the true martyrdom is the knowledge of the only true God (which we also admit), and that the man is a self-murderer and a suicide who makes confession by death; and adducing other similar sophisms of cowardice. To these we shall reply at the proper time; for they differ with us in regard to first principles. Now we, too, say that those who have rushed on death (for there are some, not belonging to us, but sharing the name merely, who are in haste to give themselves up, the poor wretches dying through hatred to the Creator) -- these, we say, banish themselves without being martyrs, even though they are punished publicly. For they do not preserve the characteristic mark of believing martyrdom, inasmuch as they have not known the only true God, but give themselves up to a vain death, as the Gymnosophists of the Indians to useless fire.

But since these falsely named calumniate the body, let them learn that the harmonious mechanism of the body contributes to the understanding which leads to goodness of nature. Wherefore in the third book of the Republic, Plato, whom they appeal to loudly as an authority that disparages generation, says, "that for the sake of harmony of soul, care must be taken for the body," by which, he who announces the proclamation of the truth, finds it possible to live, and to live well. For it is by the path of life and health that we learn gnosis. But is he who cannot advance to the height without being occupied with necessary things, and through them doing what tends to knowledge, not to choose to live well? In living, then, living well is secured. And he who in the body has devoted himself to a good life, is being sent on to the state of immortality.

CHAPTER 5 -- ON CONTEMPT FOR PAIN, POVERTY, AND OTHER EXTERNAL THINGS.

Fit objects for admiration are the Stoics, who say that the soul is not affected by the body, either to vice by disease, or to virtue by health; but both these things, they say, are indifferent. And indeed Job, through exceeding continence, and excellence of faith, when from rich he became poor, from being held in honour dishonoured, from being comely unsightly, and sick from being healthy, is depicted as a good example, putting the Tempter to shame, blessing his Creator; bearing what came second, as the first, and most clearly teaching that it is possible for the gnostic to make an excellent use of all circumstances, And that ancient achievements are proposed as images for our correction, the apostle shows, when he says, "So that my bonds in Christ are become manifest in all the palace, and to all the rest; and several of the

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3123 brethren in the Lord, waxing confident by my bonds, are much more bold to speak the word of God without fear." since martyrs' testimonies are examples 'of conversion gloriously sanctified. "For what things the Scripture speaks were written for our instruction, that we, through patience and the consolation of the Scriptures, might have the hope of consolation." When pain is present, the soul appears to decline from it, and to deem release from present pain a precious thing. At that moment it slackens from studies, when the other virtues also are neglected. And yet we do not say that it is virtue itself which suffers, for virtue is not affected by disease. But he who is partaker of both, of virtue and the disease, is afflicted by the pressure of the latter; and if he who has not yet attained the habit of self-command be not a highsouled man, he is distraught; and the inability to endure it is found equivalent to fleeing from it.

The same holds good also in the case of poverty. For it compels the soul to desist from necessary things, I mean contemplation and from pure sinlessness, forcing him, who has not wholly dedicated himself to God in love, to occupy himself about provisions; as, again, health and abundance of necessaries keep the soul free and unimpeded, and capable of making a good use of what is at hand. "For," says the apostle, "such shall have trouble in the flesh. But I spare you. For I would have you without anxiety, in order to decorum and assiduity for the Lord, without distraction."

These things, then, are to be abstained from, not for their own sakes, but for the sake of the body; and care for the body is exercised for the sake of the Soul, to which it has reference. For on this account it is necessary for the man who lives as a gnostic to know what is suitable. Since the fact that pleasure is not a good thing is admitted from the fact that certain pleasures are evil, by this reason good appears evil, and evil good. And then, if we choose some pleasures and shun others, it is not every pleasure that is a good thing.

Similarly, also, the same rule holds with pains, some of which we endure, and others we shun. But choice and avoidance are exercised according to knowledge; so that it is not pleasure that is the good thing, but knowledge by which we shall choose a pleasure at a certain time, and of a certain kind. Now the martyr chooses the pleasure that exists in prospect through the present pain. If pain is conceived as existing in thirst, and pleasure in drinking, the pain that has preceded becomes the efficient cause of pleasure. But evil cannot be the efficient cause of good. Neither, then, is the one thing nor the other evil. Simonides accordingly (as also Aristotle) writes, "that to be in good health is the best thing, and the second best thing is to be handsome, and the third best thing is to be rich without cheating." And Theognis of Megara says: "You must, to escape

And Theognis of Megara says: "You must, to escape poverty, throw Yourself, O Cyrnus down from The steep rocks into the deep sea."

On the other hand, Antiphanes, the comic poet, says, "Plutus (Wealth), when it has taken hold of those who see better than others, makes them blind." Now by the poets he is proclaimed as blind from his birth: "And brought him forth blind who saw not the sun."

Says the Chalcidian Euphorion: "Riches, then, and extravagant luxuries, Were for men the worst training for manliness."

Wrote Euripides in Alexander: "And it is said, Penury has attained wisdom through misfortune; But much wealth will capture not Sparta alone, but every city."

"It is not then the only coin that mortals have, that which is white silver or golden, but virtue too," as Sophocles says.

CHAPTER 6 -- SOME POINTS IN THE BEATITUDES.

Our holy Saviour applied poverty and riches, and the like, both to spiritual things and objects of sense. For when He said, 'Blessed are they that are persecuted for righteousness' sake, He clearly taught us in every circumstance to seek for the martyr who, if poor for righteousness' sake, witnesses that the righteousness which he loves is a good thing; and if he "hunger and thirst for righteousness' sake," testifies that righteousness is the best thing. Likewise he, that weeps and mourns for righteousness' sake, testifies to the best law that it is beautiful. As, then, "those that are persecuted," so also "those that hunger and thirst" for righteousness' sake, are called "blessed" by Him who approves of the true desire, which not even famine can put a stop to. And if "they hunger after righteousness itself," they are blessed. "And blessed are the poor," whether "in spirit" or in circumstances -- that is, if for righteousness' sake. It is not the poor simply, but those that have wished to become poor for righteousness' sake, that He pronounces blessed -- those who have despised the honours of this world in order to attain "the good;" likewise also those who, through chastity, have become comely in person and character, and those who are of noble birth, and honourable, having through righteousness attained to adoption, and therefore "have received power to become the sons of God," and "to tread on serpents and scorpions," and to rule over demons and "the host of the adversary." And, in fine, the Lord's disciplines draws the soul away gladly from the body, even if it wrench itself away in its removal. "For he that loveth his life shall lose it, and he that loseth his life shall find it," if we only join that which is mortal of us with the immortality of God. It is the will of God [that we should attain] the knowledge of God, which is the communication of immortality. He therefore, who, in accordance with the word of repentance, knows his life to be sinful will lose it -- losing it from sin, from which it is wrenched; but losing it, will find it, according to the obedience which lives again to faith, but dies to sin. This, then, is what it is "to find one's life," "to know one's self."

The conversion, however, which leads to divine things, the Stoics say, is affected by a change, the soul being changed to wisdom. And Plato: "On the soul taking a turn to what is better, and a change from a kind of nocturnal day." Now the philosophers also allow the good man an exit from life in accordance with reason, in the case of one depriving him of active exertion, so that the hope of action is no longer left him. And the judge who compels us to deny Him whom we love, I regard as showing who is and who is not the friend of God. In that case there is not left ground for even examining what one prefers -- the menaces of man or the love of God. And abstinence from vicious acts is found, somehow, [to result in] the diminution and extinction of vicious propensities, their energy being destroyed by inaction. And this is the import of what thou hast, and give to the poor, and come, follow "Sell Me" -- that is, follow what is said by the Lord. Some say that by what "thou hast" He designated the things in the soul, of a nature not akin to it, though how these are bestowed on the poor they are not able to say. For God dispenses to all according to desert, His distribution being righteous. Despising, therefore, the possessions which God apportions to thee in thy magnificence, comply with what is spoken by me; haste to the ascent of the Spirit, being not only justified by abstinence from what is evil, but in addition also perfected, by Christlike beneficence. In this instance He convicted the man who boasted that he had fulfilled the injunctions of the law, of not loving his neighbour; and it is by beneficence that the love which, according to the gnostic ascending scale, is Lord of the Sabbath, proclaims itself. We must then, according to my view, have recourse to the word of salvation neither from fear of punishment nor promise of a gift, but on account of the good itself. Such, as do so, stand on the right hand of the sanctuary; but those who think that by the gift of what is perishable they shall receive in exchange what belongs to immortality are in the parable of the two brothers called "hirelings." And is there not some light thrown here on the expression "in the likeness and image," in the fact that some live according to the likeness of Christ. while those who stand on the left hand live according to their image? There are then two things proceeding from the truth, one root lying beneath both, -- the choice being, however, not equal, or rather the difference that is in the choice not being equal. To choose by way of imitation differs, as appears to me, from the choice of him who chooses according to knowledge, as that which is set on fire differs from that which is illuminated. Israel, then, is the light of the likeness which is according to the Scripture. But the image is another thing. What means the parable of Lazarus, by showing the image of the rich and poor? And what the saying, "No man can serve two masters, God and Mammon?" -- the Lord so terming the love of money. For instance, the covetous, who were invited, responded not to the invitation to the supper, not because of their possessing property, but of their inordinate affection to what they possessed. "The foxes," then, have holes. He called those evil and earthly men who are occupied about the wealth which is mined and dug from the ground, foxes. Thus also, in reference to Herod: "Go, tell that fox, Behold, I cast out devils, and perform cures to-day and to-morrow, and the third day I shall be perfected." For He applied the name "fowls of the air" to those who were distinct from the other birds -- those really pure, those that have the power of flying to the knowledge of the heavenly Word. For not riches only, but also honour, and marriage, and poverty, have ten thousand cares for him who is unfit for them. And those cares He indicated in the parable of the fourfold seed, when He said that "the seed of the word which fell unto the thorns" and hedges was choked by them, and could not bring forth fruit. It is therefore necessary to learn how to make use of every occurrence, so as by a good life. according to knowledge, to be trained for the state of eternal life. For it said, "I saw the wicked exalted and towering as the cedars of Lebanon; and I passed," says the Scripture, "and, lo, he was not: and I sought him, and his place was not found. Keep innocence, and look on uprightness: for there is a remnant to the man of peace." Such will he be who believes unfeignedly with his whole heart, and is tranquil in his whole soul. "For the different people honour me with their lips, but their heart is far from the Lord." "They bless with their mouth, but they curse in their heart." "They loved Him with their mouth, and lied to Him with their tongue; but their heart was not right with Him, and they were not faithful to His covenant." Wherefore "let the false lips become speechless, and let the Lord destroy the boastful tongue: those who say, We shall magnify our tongue, and our lips are our own; who is Lord over us? For the affliction of the poor and the

set him in safety: I will speak out in his case." For it is to the humble that Christ belongs, who do not exalt themselves against His flock. "Lay not up for yourselves, therefore, treasures on the earth, where moth and rust destroy, and thieves break through and steal," says the Lord, in reproach perchance of the covetous, and perchance also of those who are simply anxious and full of cares, and those too who indulge their bodies. For amours, and diseases, and evil thoughts "break through" the mind and the whole man. But our true "treasure" is where what is allied to our mind is, since it bestows the communicative power of righteousness showing that we must assign to the habit of our old conversation what we have acquired by it, and have recourse to God, beseeching mercy. He is, in truth, "the bag that waxeth not old," the provisions of eternal life, "the treasure that faileth not in heaven." "For I will have mercy on whom I will have mercy," saith the Lord. And they say those things to those who wish to be poor for righteousness' sake. For they have heard in the commandment that "the broad and wide way leadeth to destruction, and many there are who go in by it." It is not of anything else that the assertion is made, but of profligacy, and love of women, and love of glory, and ambition, and similar passions. For so He says, "Fool, this night shall thy soul be required of thee; and whose shall those things be which thou hast prepared?" And the commandment is expressed in these very words, "Take heed, therefore, of covetousness. For a man's life does not consist in the abundance of those things which he possesses. For what shall it profit a man, if he shall gain the whole world, and lose his own soul? or what shall a man give in exchange for his soul?" "Wherefore I say, Take no thought for your life, what ye shall eat; neither for your body, what ye shall put on. For your life is more than meat, and your body than raiment." And again, 'For your Father knoweth that ye have need of all these things." "But seek first the kingdom of heaven, and its righteousness," for these are the great things, and the things which are small and appertain to this life "shall be added to you." Does He not plainly then exhort us to follow the gnostic life, and enjoin us to seek the truth in word and deed? Therefore Christ, who trains the soul, reckons one rich, not by his gifts, but by his choice. It is said, therefore, that Zaccheus, or, according to some, Matthew, the chief of the publicans, on hearing that the Lord had deigned to come to him, said, "Lord, and if I have taken anything by false accusation, I restore him fourfold;" on which the Saviour said, "The Son of man, on coming to-day, has found that which was lost." Again, on seeing the rich cast into the treasury according to their wealth, and the widow two mites. He said "that the widow had cast in more than they all," for "they had contributed of their abundance, but she of her destitution.' And because He brought all things to bear on the discipline of the soul, He said, "Blessed are the meek: for they shall inherit the earth." And the meek are those who have quelled the battle of unbelief in the soul, the battle of wrath, and lust, and the other forms that are subject to them. And He praises those meek by choice, not by necessity. For there are with the Lord both rewards and" many mansions," corresponding to men's lives. "Whosoever shall receive," says He, "a prophet in the name of a prophet, shall receive a prophet's reward; and whosoever shall receive a righteous man in the name of a righteous man, shall receive a righteous man's reward; and whoso shall receive one of the least of these my disciples, shall not lose his reward." And again, the differences of virtue according to merit, and the noble rewards, He indicated by the hours unequal in number; and in addition, by the equal reward given to each of the labourers -- that is, salvation, which is meant by the penny -- He indicated the equality of justice: and the difference of those called He intimated, by those who worked for unequal portions of time. They shall work, therefore, in accordance with the appropriate mansions of which they have been deemed worthy as rewards, being fellow-workers in the ineffable administration and service. 'Those, then," says Plato, "who seem called to a holy life, are those who, freed and released from those earthly localities as from prisons, have reached the pure dwelling-place on high. In clearer terms again he expresses the same thing: "Those who by philosophy have been sufficiently purged from those things, live without bodies entirely for all time. Although they are enveloped in certain shapes; in the case of some, of air, and others, of fire." He adds further: "And they reach abodes fairer than those, which it is not easy, nor is there sufficient time now to describe." Whence with reason, "blessed are they that mourn: for they shall be comforted;" for they who have repented of their former evil life shall attain to "the calling' (klhsin), for this is the meaning of being comforted (paraklhqhnai). And there are two styles of penitents. That which is more common is fear on account of what is done: but the other which is more special, the shame which the spirit feels in itself arising from conscience. Whether then, here or elsewhere (for no place is devoid of the beneficence of God), He again says, "Blessed are the merciful: for they shall obtain mercy." And mercy is not, as some of the philosophers have imagined, pain on account of others' calamities, but rather

something good, as the prophets say. For it is said, "I will have mercy, and not sacrifice." And He means by the merciful, not only those who do acts of mercy, but those who wish to do them, though they be not able; who do as far as purpose is concerned. For sometimes we wish by the gift of money or by personal effort to do mercy, as to assist one in want, or help one who is sick, or stand by one who is in any emergency; and are not able either from poverty, or disease, or old age (for this also is natural disease), to carry out our purpose, in reference to the things to which we are impelled, being unable to conduct them to the end we wished. Those, who have entertained the wish whose purpose is equal, share in the same honour with those who have the ability, although others have the advantage in point of resources. And since there are two paths of reaching the perfection of salvation, works and knowledge, He called the "pure in heart blessed, for they shall see God." And if we really look to the truth of the matter, knowledge is the purification of the leading faculty of the soul, and is a good activity. Some things accordingly are good in themselves, and others by participation in what is good, as we say good actions are good. But without things intermediate which hold the place of material, neither good nor bad actions are constituted, such I mean as life, and health, and other necessary things or circumstantials. Pure then as respects corporeal lusts, and pure in respect of holy thoughts, he means those are, who attain to the knowledge of God, when the chief faculty of the soul has nothing spurious to stand in the way of its power. When, therefore, he who partakes gnostically of this holy quality devotes himself to contemplation, communing in purity with the divine, he enters more nearly into the state of impassible identity, so as no longer to have science and possess knowledge, but to be science and knowledge.

"Blessed, then, are the peacemakers," who have subdued and tamed the law which wars against the disposition of the mind, the menaces of anger, and the baits of lust, and the other passions which war against the reason; who, having lived in the knowledge both of good works and true reason, shall be reinstated in adoption, Which is dearer. It follows that the perfect peacemaking is that which keeps unchanged in all circumstances what is peaceful: calls Providence holy and good; and has its being in the knowledge of divine and human affairs, by which it deems the opposites that are in the world to be the fairest harmony of creation. They also are peacemakers, who teach those who war against the stratagems of sin to have recourse to faith and peace. And it is the sum of all virtue, in my opinion, when the Lord teaches us that for love to God we must gnostically despise death. "Blessed are they," says He, "who are persecuted for righteousness' sake, for they shall be called the sons of God;" or, as some of those who transpose the Gospels say, "Blessed are they who are persecuted by righteousness, for they shall be perfect." And, 'Blessed are they who are persecuted for my sake; for they shall have a place where they shall not be persecuted." And, "Blessed are ye when men shall hate you, when they shall separate you, when they shall cast out your name as evil, for the Son of man's sake;" if we do not detest our persecutors, and undergo punishments at their hands, not hating them under the idea that we have been put to trial more tardily than we looked for; but knowing this also, that every instance of trial is an occasion for testifying.

CHAPTER 7 -- THE BLESSEDNESS OF THE MARTYR. Then he who has lied and shown himself unfaithful, and revolted to the devil's army, in what evil do we think him to be? He belies, therefore, the Lord, or rather he is cheated of his own hope who believes not God; and he believes not who does not what He has commanded.

And what? Does not he, who denies the Lord, deny himself? For does he not rob his Master of His authority, who deprives himself of his relation to Him? He, then, who denies the Saviour, denies life; for "the light was life." He does not term those men of little faith, but faithless and hypocrites, who have the name inscribed on them, but deny that they are really believers. But the faithful is called both servant and friend. So that if one loves himself, he loves the Lord, and confesses to salvation that he may save his soul. Though you die for your neighbour out of love, and regard the Saviour as our neighbour (for God who saves is said to be nigh in respect to what is saved); you do so, choosing death on account of life, and suffering for your own sake rather than his. And is it not for this that he is called brother? he who, suffering out of love to God, suffered for his own salvation; while he, on the other hand, who dies for his own salvation, endures for love to the Lord. For he being life, in what he suffered wished to suffer

that we might live by his suffering. "Why call ye me Lord, Lord," He says, "and do not the things which I say?" For "the people that loveth with their lips, but have their heart far away from the Lord," is another people, and trust in another, and have willingly sold themselves to another; but those who perform the commandments of the Lord, in every action "testify," by doing what He wishes, and consistently naming the Lord's name; and "testifying" by deed to Him in whom they trust, that they are those "who have crucified the flesh, with the affections and lusts." "If we live in the Spirit, let us also walk in the Spirit." s "He that soweth to his flesh, shall of the flesh reap corruption; but he that soweth to the Spirit, shall of the Spirit reap life everlasting."
