3 Daniel then went from the king, and making iron instruments like wool combs, he joined them together back to back, with the points outward, forming a circle of hard and sharp points. This he rolled in all manner of poisonous fat and grease and other fatty substances, and beneath it he placed pitch and brimstone, until the points of the brass and the other piercing metals were concealed. Then, making it in the shape of an oblation, Daniel cast it into the dragon's mouth. The dragon hastily and greedily swallowed it, and seemed to enjoy it. But when it entered its mouth, and passed on to the entrails of its belly, the fat melted from off the iron prongs, so the sharp spikes pierced its entrails, and gave it such agony that it died on the morrow.

4 It came to pass, three days after its death, that the Chaldeans and Babylonians came, as was their daily custom, to propitiate the dragon with an oblation, but it was not visible; only a horrible stench issued from the cave. When they searched the cave they found that their god was slain, swollen up, and decaying. They became very grieved and full of wrath against Daniel, and they said, 'Behold what is this Daniel has done to the two gods! for he has destroyed Bel and smitten the dragon. Now if the king deliver him into our hands, he shall surely be slain; and if not, it must be made known to the king that he also shall surely not live.' When it reached the ears of the king that the people had made a conspiracy against him, a command was issued to smite the leaders and princes, as well as those that rose up against Daniel, with the edge of the sword.

CHRONICLES OF JERAHMEEL CHAPTER 74

1 Daniel having now grown old in years, came one day to the king, and prostrating himself before him, said, 'O my lord the king, behold old age has crept upon me, and I have now no more strength to stand and go to and fro. Behold, the lawless men of thy people have humbled me through their enmity, and have cast me twice into the den of lions, but God, in whom I put my trust, has delivered me. They meditated to take my soul, to deprive me of my life, through their zeal on behalf of their gods, but my God withheld me from their destruction. My three friends also they cast into the fiery furnace to be burnt, and yet after all this we have not forsaken our God. Now, my lord the king, I pray thee allow me to go back to my native city and to my house, to worship the God of my fathers for the remainder of my days, for I am old and have no longer the power to restrain (check) the multitude of thy host.' And the king answered Daniel, saying, 'How can I listen to thy request to send thee away, seeing thou art a man of the God of heaven? If thou leavest me and departest from my side, how can my kingdom remain in its integrity? I am indeed aware that thou art an old man, and that thou hast no longer that strength for active life which the rulers of the kingdom ought to have; therefore, if thou wilt give me from among thy people a man of wisdom and understanding, and withal filled with the spirit of thy God as thou art, to remain with me in thy stead, then will I send thee away in peace to rest in thine own house, although my soul knoweth there is none esteemed thy equal among the sons of thy people.'

2 Daniel then went forth from the presence of the king to the assembly of the exiles, and, finding there Zerubbabel, the son of Shealtiel, the son of Jechoniah, King of Judah, he selected him from among the people, and taking him by the hand, led him to the king, and said, 'Behold before thee the man who is to take my place. He is esteemed my equal, and is descended from Judah and from the chiefs of the royal seed. He is withal a man of valour, filled with the spirit of God, with knowledge and wisdom as myself, falling short of nothing that is in me, and he will be, as I have been, a faithful counsellor to thee. And now, do thou give me permission to depart for my native place for the short time I have to live. The king, being confident of the truth of everything Daniel told him, gave him permission to depart. Daniel then made his obeisance, and the king embraced and kissed him, and having ordered many gifts to be presented to him, he sent him away

3 Thus did Zerubbabel take the place of Daniel, who gave all that the king presented him with to the suffering exiles, and then left for Shushan, his native place, in the land of Elam. There he worshipped the Lord among his brother exiles until the day of his death.

4 Now, Zerubbabel was a man of valour, young and prosperous, understanding and wise, filled with the spirit of wisdom, for Daniel had put his hand upon him. He found favour in the eyes of the king, who loved him and appointed him chief of all the princes, and overseer of the two captains of die host and guardians of the king.

5 One day, according to custom, all the princes assembled before the king, and the king said to them, 'Have ye seen in the whole of this land a man as wise and as full of understanding, in whom is the spirit of Daniel, as this man Zerubbabel?' And they answered, 'The king hath spoken the truth.'

6 Now, about the time of noon, after they had all eaten, the king, as usual, lay upon his bed and slept. The two princes and guardians of the king then arose, as was customary, and Zerubbabel with them, and stood round the king's bedside until he awoke. On this occasion the king slept heavily, for he was drunk with wine; and the three young men, being weary of standing, proposed to test each other's wisdom by means of riddles, each one according to his wit, and they said, 'Let us write them down in a book, and place the book under the head of the king until he awake from his sleep,' when he would see the book, and understand its meaning.

7 'Then it shall be that the man whose words appear wiser than his two colleagues,' and whose riddles are superior to those of his brethren, should be made vicegerent, and should also sit on the royal throne and in the royal chariot; that he should have free access to the presence of the king; that the vessels of his table should be of silver, and the reins of his horse of gold. That the crown of the vicegerent be placed upon his head; that he receive the portion of the vicegerent from the hand of the king; that every request be granted him, and that he be a friend of the king.' To this they all agreed, and, making a covenant in accordance therewith, they established it according to the laws of Media and Persia, which can never be altered.

8 Then, bringing the pen and the scroll, they cast lots as to who should be the first to inscribe. The first wrote, 'On the earth there is no one so powerful as a king.' The second wrote, 'Wine is the strongest thing on earth.' And Zerubbabel, who was the third, wrote, 'There is nothing on the earth so powerful as woman.' When they had finished writing their words of wisdom, they placed the scroll under the king's pillow, but the king was awake, for though his eyes were closed yet he heard their whisperings; and when they placed the scroll under his pillow the king arose as if he had just woke from his sleep, and, rubbing his eyes with his two hands, he looked under his pillow, and saw the scroll which the three young men had written. Then opening it, he read it, and was perplexed about it, until all the princes, pashas, chiefs, governors, and heads of the provinces came to him. Then calling the three young men, he said, 'Bring me each one of you his writing, and let me listen to the interpretation of your riddles; then will I fulfil for the wisest of you three everything that is stated in the scroll to honour and exalt him.'

9 The first one then approached to read what he had written, and said, 'Hearken, O king and princes, to my words. There is nobody on earth so powerful as a king.' The second, drawing near (the king), said, 'There is nothing on earth so powerful as wine.' And the third, viz., Zerubbabel, exclaimed, 'There is nothing on earth so powerful as woman.' At this the king and the princes said, 'We have hearkened to your hidden sayings; now tell us the explanation, and we shall listen.'

CHRONICLES OF JERAHMEEL CHAPTER 75

I And the first answered and said, 'O my lord the king, princes and mighty men, do ye not know the power of the king and the strength of his dominion over all the earth, over the sea, the isles, and over all languages? to slay or to keep alive? If he commands an army to march forth, they march forth armed; they turn not their heads, though they may stand face to face with death. If he command them to overthrow cities, they overthrow them; if to hew down mountains, or to pull down walls, they obey. If he command them to plough for him, they plough; they sow and reap his produce, for they fear the wrath of the king, who is mighty and lord over all, and no one dares frustrate his word; therefore believe ye my words that there is no one on earth so powerful as a king.' All the bystanders were astonished at his speech.

2 The second now replied, saying, 'Though ye know the power of a king and the strength of his might, for he has dominion and rules over the land; yet wine is stronger than a king. It is true he has great power, but as soon as he drinks freely of wine, it overpowers him and inclines his heart to other things, he sings, plays and dances, for his heart is turned by the wine, so that he repulses his kin, approaches strangers, slays his friends, and confers honour upon strangers, and respects neither his father nor mother.

³ Do ye not know that such is the power of wine, when a man is drunk he cannot learn, but is rather prone to singing; he whispers to his neighbour and reveals secrets, and hidden things drop out of his mouth. Men full of sorrow the wine makes glad, and even if mourners and those whose hearts are grieved drink thereof, they rejoice and are merry. The drunken one draws his sword against his neighbour, and he gets fierce, and bashful men it makes bold. But when the wine has disappeared from them, they have forgotten all, and say, "We have not done this thing." Is thus wine not stronger than a king, as it rules over him; it makes man walk crookedly, he cannot see straight, and he continues babbling things which he has not learned. Do ye not think that wine is therefore more powerful than a king, for such it does?" Thereat the men were greatly surprised.

4 After that the king summoned Zerubbabel, and said, 'Tell me, I pray thee, thy riddle and its interpretation, as thy friends have done.' And he answered and said. 'Give ear and hearken unto me, O king and princes, governors and rulers, and all ye who stand here. Indeed, the king is stronger and greater than all; it is true that wine weakens the king through its strength. as my friends have said. Thus the power of both the king and wine cannot be denied: but woman is vet more powerful than either king or wine or any other strong drink. For why should she not be more powerful than the king? Did she not give birth to him, suckle him, sustain him, rear him, clothe him, wash him, and sometimes chastise him? Did she not rule over him as a mother does the child of her womb? When she was angry with him, did he not fear her rebuke? Did she not sometimes beat him and at other times censure him? If she lifted the rod to him, did he not run away from her in fear of her? Moreover, when he grows up to be a young man, he cannot forget his instructress, nor will rebel against her call. He always respects her as a son honours her who conceived him

5 'Then looking about him, he beholds a woman fair to look upon, and desires her beauty to sport with. His heart inclines towards her, and he will not change his love for her for all the riches. It is then that he leaves his father and mother, forsaking them for her love and her beauty, and many are they that have been led astray through the love of woman; many are they that have acted foolishly, and become mad for her sake; and many that have met their death for the sake of woman, and have fallen for her pride down into hell. Wise men also have been caught in her net, and much hatred has the frivolous one caused among brothers. Do ye not know and understand that if a man sees a comely woman, and he carries in his hands goodly things, will not his eyes gaze upon her, for his heart inclines towards her? If she answers him when he speaks to her on account of her beauty, will he not leave everything that he keeps in his hands to speak to her? for his heart is drawn near to her.

'Who is there that will not believe this, and confess the 6 truth of this power of woman? Tell me, for whom do ye steal, for whom do ye rob, and for whom do ye gird yourselves-is it not for woman? Is it not for her that ye buy all the precious ornaments? is not the myrrh and the aloe for her? are not all the spices, perfumed oils, and frankincense for her? If a man break into a house, if he keeps the high roads, goes on the sea. on dry land, on the mountains; if he fight, commit murder, rob, plunder, and shed blood, to whom will he bring his spoil, if not to woman? Have I not seen the concubine of the King Apumasia (###), the daughter of Abyaush (###) of Makeden, take the crown of honour from off the king's head and place it on her own head, while he was seated on the throne beside her, and the king was pleased with her? But when she became angry, did not the king then hasten to appease her, and to reconcile her, and remove her anger?

7 'Who, then, is there that will not believe that woman's power is stronger than everything? She subdued Samson, enticed David and inclined the heart of Solomon towards her Many are her captives, and innumerable are those that are slain through her, and their number increases. And even if there be one man who rules the whole world, and before whose wrath all people tremble and shake, since he would be supreme, and although man is appointed to be the prince, ruler, and king over her, and to her is given the desire of him, vet not even he would be able to conquer her and to rule over her. Even Adam, the father of all mankind, was induced by his wife to transgress the word of God, by which she destined him and his offspring to death. Also, in the days of Noah, the heavenly angels were led astray and took to them women. Who does not believe that this is known from the very beginning of the world, and will last to the end unaltered? This is the truth that I utter.

8 'Now, finally, let it be known to the king and to all my hearers that all is vanity here—the king who rules the earth, the wine that rules the king, and woman with her iniquity, who rules the three; but truth reigns supreme in heaven and on earth; in the seas and in the depths truth prevails before God and man; for where truth dwells there wickedness cannot abide, for the heavens and the earth are founded upon truth, and the Lord our God is true for ever.'

9 After this all the people assembled there before the king exclaimed, 'It is true.' Then said the king to Zerubbabel, 'Come near to me.' When he approached, the king kissed him and embraced him in the presence of all the people, and said, 'Blessed be the Lord God of Zerubbabel, who hath given him the spirit of truth, for there is nothing like God's truth; everything else is vanity.' And the princes also exclaimed, 'Indeed, truth is greater than all things; nor can one stand up against it since it dwells in the heaven and in the earth, and upon it is everything based. True is the God of Zerubbabel, who hath given him the spirit of truth to praise and to glorify truth before God and man.'

CHRONICLES OF JERAHMEEL CHAPTER 76

1 The king then commanded all the honours written in the scroll to be carried out for Zerubbabel, for he had found great favour in the eyes of the king and the two princes, his colleagues. And the king further said to Zerubbabel, 'Ask, in addition to what is written in the scroll, whatever thy soul desires and I will grant it, even to half the kingdom.' And Zerubbabel answered and said, 'Remember, my lord the king, the vow which thou and King Cyrus made to the God of heaven, viz., to build His house, and to restore His holy vessels, and to allow His captive people to worship Him in the temple that is called by His name, that they may pray to the great God of heaven for the welfare of thy reign, for thou must not delay the vow which thou madest to the heavenly God.'

2 The king thereupon commanded the scribes to hasten and write down Zerubbabel's request, to rebuild the ruins of Jerusalem. He then sent a message to Cyrus, King of Persia, to join hands with him in this work, and thus to fulfil their vow by establishing the house of God in Jerusalem. And Cyrus issued a proclamation throughout his kingdom, saying, 'Every one of God's people whose heart prompts him to go up to Jerusalem to lay the foundation of the temple and to build it, let him go, and I shall give everyone the pay of his labour from my treasures until the building is completed.'

3 The king's scribes thereupon wrote down this proclamation on behalf of Darius, King of Media, and Cyrus, King of Persia, to the princes, governors, and rulers on the other side of the river, and to the Arameans, Tyrians, Samaritans, and to Asaph, governor of the garden of Lebanon, 'Be it known to you that it is our pleasure to send back to God's holy city the captives of His people, whom Nebuchadnezzar, King of Babylon, sent into exile; to restore the vessels of the grate and holy temple which is called by the name of the God of heaven; to build His altar, and to sacrifice thereon every day; to build the temple, and the Holy of Holies; to establish the palace according to its old form; and to

4 When this edict reaches you, exert yourselves to assist them by supplying all their wants in silver and gold, brass, wood, and stones for the builders and hewers until the building is finished, and to give them whatever they ask for, wheat, barley, oil, or wine, and whatever they want for the buildings. For re-establishing the sacrifices upon the altar ye shall give them oxen, calves, rams, sheep, he-goats, doves, flour, oil, salt, to enable them to re-establish the altar, and to finish the whole work.'

5 The Edomites were also commanded by these two kings to contribute their share in the service of the house of the Lord, because they had helped the Chaldeans to overthrow it; they were to give a yearly tribute of five talents of gold for strengthening the breach of the house, to rebuild the temple and the holy city. The Sidonians, Tyrians, and Edomites, as well as the servants of the king in the Lebanon, under the command of Asaph, keeper of the garden, were ordered to hew the wood from the Lebanon, and to drag it to the sea from the Lebanon and thence to the Sea of Joppa, to complete the work of the house of God. No man was to hinder them until everything was completed. Having written down all these details as the two kings commanded, the scribes sealed it, and handed it over to Zerubbabel, the son of Shealtiel, and to Nehemiah, the son of Hachaliah.

CHRONICLES OF JERAHMEEL CHAPTER 77

1 About this time Darius, King of Media, was taken very ill, and, being about to die, he called Cyrus, King of Persia, his son-in-law, his daughter's husband, and made him king in his stead, so that the kingdoms of Media and Persia were united into one; and when Darius the Mode was gathered to his people, Cyrus reigned over Media and Persia and the remainder of the country. He then issued a proclamation in all his kingdom, saying, 'Whoever of you among the people of the Lord God of heaven is willing to go up to Jerusalem to the footstool of the great and mighty God, to build His house and His temple which the wicked Nebuchadnezzar, who was more wicked than all his predecessors, overthrew, let him go up and assist in the building, and may His God be with everyone whose heart prompts him to do so. And I, Cyrus, servant of the living God, who set me upon this throne, shall provide from my riches and my treasury all the wants of the house of this mighty God who made me King of Media and Persia, and who assisted me to destroy the kingdom of the Chaldeans.

2 Thus all the elders of the captivity, Ezra the scribe, Nehemiah, the son of Hachaliah, with the other chiefs of the captivity and the priests, went up to Jerusalem and built the temple of God and His altar, and arranged the wood and placed the flesh of sacrifice upon the altar.

3 Then they lifted up their voices and wept, while Ezra and Nehemiah, with the other chiefs of the captivity, prayed to God, and said: 'O Lord of the whole universe, Thou hast put it into the heart of the King of Persia to do honour to Thy house, and to send Thy servants and priests to make sacrifices to Thee and to offer Thy burnt-offerings as Thy servants, our pious forefathers, did before Thee. Behold we, also Thy servants, have come to this place, and have rebuilt Thy altar after the same pattern, and we offer sacrifices to Thee, and arrange the wood beneath the burnt-offering. But how can it be pleasing to Thee, O God, seeing that we offer strange fire, for the holy fire is no more, since it has been hidden by Jeremiah the prophet, Thy servant, and the other chiefs of the captivity whom Nebuchadnezzar sent into exile. What shall we do, O God of heaven? Give us counsel and help, for to Thee belongs dominion, to help us and to strengthen our hands.

4 Now, it happened while they were praying to the Lord in this wise, a very old man about 100 years of age, belonging to those priests who were exiled in the days of Nebuchadnezzar, was heard calling. Being rather deaf through old age, he summoned his six sons before him, and said, 'O my sons, if I have found favour in your eyes, carry me near the altar and place me opposite it that I may inhale the sweet-smelling frankincense of the altar, for I have not been deemed worthy of that pleasure for many years now. Let your kindness be extended to me that ye may hearken to me this once, that I may be enabled to smell it once more before I die. Ye shall be rewarded by the holy God, for I have been a great burden to you.'

5 His sons forthwith carried him into the midst of the assembled priests opposite the altar. When he heard the noise of the multitude and the priests crying to God for the holy fire, the old man said to his sons, 'What ails the people that they replied, 'The priests are seeking the holy fire which is no longer to be found, as it has been hidden from them.' 'Carry me, then, near the priests and the heads of the fathers, and I shall tell them where it is, and where Jeremiah the prophet and the other priests who went into exile had concealed it.'

6 His sons carried him in the midst of the chiefs of the fathers, who asked him about it, and he told them where it was. Then, carrying the old man, and crossing the Brook of Kedron and the Valley of Hinnom, they ascended Mount Olives; and during their descent, when they faced the valley in the plain, the old man showed them a large stone sunk in the

earth. Digging up the dust round about the stone, they rolled the stone away, and removing the lime beneath it, they opened the pit.

7 Then said he to the young priests, 'Descend thither and take the fire, for there it was placed.' He repeated his command, whereupon they descended, and found there at the bottom of the pit something like the lees of oil, and like mud and honey. When they related this to Ezra and the priests, they replied, 'Bring up whatever ye find, and no stranger touch you until ye come to the altar. Then place what ye have carried away upon the altar, upon the burnt-offering, and upon the wood.' They went down and did as they were commanded:

8 And as soon as they did this a great fire suddenly burnt upon the altar, and grew into such huge flames that the priests and the people fled from before it, for they could not endure it. It licked the burnt-offering, and, travelling round the temple, cleansed it, after which it got considerably smaller, so that it remained only on the altar, as usual. From that day thenceforward a continual fire burnt upon the altar, as they placed the wood regularly upon it until the second captivity.

9 But the ark was not there, because Jeremiah took the ark with all the curtains which Moses, the servant of God, made in the wilderness, and he carried them up to Mount Nebo and placed them in a cave. The priests of that time pursued him to find out the place of the ark, and of the tablets, of the curtains of the tabernacle, and of the tent of the congregation. When Jeremiah looked behind him and saw the priests, he became angry with them, and swore to them 'you shall never discover the place you desired to know until I and Elijah appear. Then we shall restore the tabernacle and the tent of the congregation to its original place, as well as the ark of the testimony and the two tables of stone which it contains. Then we shall neter the Holy of Holies.'

10 From that day our ancestors offered their sacrifices and burnt-offerings and continual offerings every day, for the kings of Persia had assisted them with gold and silver, with wheat, oil and wine, with oxen, sheep and rams, everything that they desired, year after year, for the kings of Persia loved the temple of our God, and its sanctuary they greatly honoured.

CHRONICLES OF JERAHMEEL CHAPTER 78

1 And Cyrus reigned over all the kingdoms of the earth, for our God strengthened his right hand so that he subdued many nations. He (God) opened before him the gates of iron and broke the doors of brass, and revealed to him hidden treasures, just as He had told through Isaiah the prophet to his people. the servants of Jacob and Israel whom He had chosen. And the hand of Cyrus was strengthened, and, going to battle, he captured all the land, all the fords of India, as well as those in the south, the whole land of Ethiopia, all the nations dwelling in the lands of the south (Arabia), and in the west as far as Sefarad, and in the north, the land of Mogedon, and all the land of Kaftor and Ararat, the whole of Alan, Alasar, and the mountains of Alaf, i.e., the mountains of darkness, as far as the Snow Mountains, which are impassable. The rest of his mighty deeds and his battles, are they not written in the Book of Chronicles of the kings of Media and Persia, and in the book of Joseph ben Gorion, the anointed priest of battle, who was exiled from Jerusalem in the reign of Vespasianus, and in the Book of Chronicles of the kings of Borne?

2 Cyrus the king ended his days in battle, and died in the land of the Shittim; but this need not cause surprise, for we know that Saul, the anointed of the Lord, also died in battle, as well as King Josiah, the beloved of God.

3 When Cyrus went to the land of Shittim, he smote their king at the edge of the sword, together with his warriors, because they raised their hands against the king (i.e., himself). And when they fell, the Shittites fled with their queen, Tamirah, and her son until they came to their fortresses, and there they shut themselves in. As soon as Cyrus saw that they had shut themselves in their castles and that no one went out or in, he enticed them out by a ruse, for he departed with all his camp as if seeking to find an escape, whereupon the Shittites, with Tamirah's son, came out of their castles to pursue them. When they had come out into the plain, Cyrus suddenly turned upon them, and smote 300,000 of their warriors, and among the slain was found the son of their queen Tamirah. Cyrus then took all the Shittites prisoners, except those who had escaped to the mountains with the warriors. When Tamyris saw that her son had been slain with the other soldiers, she was exceedingly grieved, and went wandering about the mountains and valleys of the Shittites, lying in ambush. When Cyrus left the land of the Shittites, he being confident of his victory, never thought of any possible ambush; therefore his army passed on before him, and, being left behind with a few followers, he encamped between two mountains and lay there down to sleep

4 On the same night he was attacked by the woman, who was like a wild beast, like a lioness bereaved of her cubs, and like a bereaved bear. She smote the whole camp of Cyrus, numbering 200,000 mighty men of Persia, together with their king. Then, strengthening herself, she went to the dead body of Cyrus, and, cutting off his head and placing it in a leather bottle, which she filled with the blood of the slain, she said, 'Drink and satisfy thyself with the blood which thou hast been so fond of shedding these thirty years without tiring.'

5 Cyrus being thus gathered to his people, Cambisa, his son, reigned in his stead. As soon as he was enthroned he went to Shittim and destroyed the remainder of its inhabitants, together with their queen, Tamirah, and all her offspring. After him, Ahasuerus arose and abolished all the work of the temple, for the enemies of the Jews had increased, and had written accusations at the beginning of Ahasuerus' reign. Thus the service of the temple was stopped until the second year of the reign of Darius, King of Persia.

CHRONICLES OF JERAHMEEL CHAPTER 79

I But our ancestors served the kings of Media and Persia with great loyalty, for they neither did them harm nor oppressed them. It was only in the time of Ahasuerus that the memory of Judah was nearly destroyed through the enmity of Haman the Amalekite, because Mordecai, a descendant of Saul, who smote the Amalekites from Havilah to Shur, a distance of several days, would not rise before him. He slew more than 500,000 Amalekites, and put to the sword their men, women, and children, to the number of thousands of thousands. It was for this reason that Haman, who was descended from them, cherished that hatred against the people of Judah, and especially against the tribe of Benjamin.

2 Now, in the days of Ahasuerus, when Mordecai was sitting at the gate of the king he discovered a secret plot of two Persian princes, Bigthan and Teresh, whom he heard whispering and plotting to sever the head of the king while he lay in his bed, in order to carry it to the Macedonian king, for at that time the Macedonian empire was warring against the Persian kingdom. This plot Mordecai revealed to Esther, and she in her turn to the king, who commanded this act of loyalty on the part of Mordecai to be noted down in the Book of Chronicles, as well as the reward due to him. When, however, these two chamberlains were hanged it incurred the wrath of Haman, for they were his counsellors, and he, therefore, sought to blot out the name of Judah from under the heavens. But Mordecai discovered this plan of his and remembered the dream he had in the second year of the reign of Ahasuerus.

3 It was the following: There was a great earthquake, accompanied by a noise and the sound of wailing in the land, so that fear and terror fell upon all the inhabitants, and two immense dragons with terrible noise went against each other in battle, whereupon all the inhabitants ran towards the spot. Living among them was a small nation, and all the nations round about it rose up to destroy their memory from the face of the earth. On that day everywhere it was thick darkness, and the small nation, being much oppressed, cried unto the Lord. The dragons continued to fight furiously and nobody could separate them; when to! Mordecai saw a small brook of water passing between the two dragons, which separated them, for the brook soon grew into an overflowing river, like the overflowing of the Great Sea, so that it flooded the whole earth. The sun then shone upon the earth, and the small nation was raised to exaltation, while the proud ones were humbled, and peace and truth were restored in the world.

4 Mordecai from that day always nursed that dream in his heart, and when Haman oppressed him, he said to Esther, Remember the dream I narrated to thee in the days of thy youth. Now arise, and, beseeching the Lord for mercy, go into the presence of Ahasuerus; stand before him in all thy beauty, and plead the cause of thy people and thy kindred. And Mordecai supplicated to God, saying, 'It is well known and revealed to the throne of Thy glory, O Lord of the universe, that it was not from pride or haughtiness I refused to bow down to this Amalekite, but on account of the reverence I have for Thee I opposed him, refusing to bow down, for I fear Thee alone, O Lord of the universe, and would not, therefore, give Thine honour to flesh and blood; therefore, I would prostrate myself to no being except Thy holy presence. And who am I that would not bow down to Haman? Yet for Israel's salvation I would lick the shoe upon his foot, and the dust upon which he walks.

5 O Lord, deliver them from his hand, that he may fall into the pit which he has dug for us, and be caught in the net which he has spread (hidden) under the feet of Thy pious men, that they may thereby know that Thou hast not forgotten the oath Thou didst swear; for Thou didst not deliver us into captivity because Thou wert not able to save us, but because of our sins and our iniquities, for we have sinned against Thee. But Thou, our God, art mighty in salvation; therefore save us, O Lord, from his hand; in our midst to fight those who rise up against us. Remember, we beseech Thee, that we are Thy portion; for of old, when Thou didst give the nations their inheritance, and when Thou didst separate the sons of men, we were Thy portion; the lot which Thou didst cast fell upon us to be chosen for Thy name.

6 Why, O God, should our enemies say we have no God? why should they open wide their mouth to swallow up Thy portion and praise their idols and vanities? We beseech Thee, O Lord, send salvation unto us; let them be ashamed of their idols and vanities, and let them place their hand upon their mouth and see Thy salvation, O Lord. Have mercy upon Thy people, and upon Thine inheritance. Do not close the mouths of those who praise Thee and proclaim Thy unity evening and morning continually. Turn our sorrow to joy and gladness, that we may live and give Thee thanks for the blessed salvation by which Thou wilt save us.' And all Israel cried unto the Lord for the trouble and sorrow which had come upon them.

CHRONICLES OF JERAHMEEL CHAPTER 80

The Beating Of The Grave.

I And Esther fled to the Lord, for she feared the evil which was growing; and, stripping herself of her royal garments and the ornaments of her majesty, she clothed herself in sackcloth, and dishevelling the hair of her head, she put dust and ashes upon it. Then, afflicting her soul with fasting, she fell upon her face in prayer, saying, 'O Lord God of Israel, who art the King of kings, who art to be feared, who createdst the world, and who rulest over us, help Thine handmaid in her desolation, for she has no saviour except Thee. Behold, I dwell in the king's palace alone, without father or mother. Like an afflicted orphan begging charity from house to house, so do I beg for Thy mercy, from one window to the other in the palace of King Ahasuerus, and have done so from the time I was brought here until this present day.

2 O Lord, if it is pleasing to Thee, take my soul from my own hand; and if not, then deliver. I beseech Thee, the flock of Thy pasture from those lions who have risen up against them; for my father taught me that Thou didst redeem our forefathers from Egypt, and didst slay all the firstborn of the Egyptians. Thou didst bring Thy people forth thence with a strong hand and an outstretched arm, and didst cause them to pass over the sea like a horse on dry land. Thou didst give them food from heaven, water from the cleft of the rock, and meat in plenty. Thou didst smite great and mighty kings before them, and caused them to inherit the goodly land. But when our ancestors sinned against Thy great name, then didst Thou deliver them into captivity; and here we are in exile to this day. My father further told me that, through Moses Thy servant, Thou didst say, "When also they shall be in the land of their enemies, I will never forsake them.

3 'Now, O Lord, Father of the fatherless, stand at the right hand of this orphan, who trusts in Thee, and grant me mercy when I am in the presence of King Ahasuerus, for I fear him as a kid fears the lion. Make lowly all his counsellors, that he may be humbled and subdued before the grace and beauty Thou hast given me. O my God, cause his heart to hate our enemies and to love Thy servants, for the heart of kings is in Thy hand. O Thou mighty, revered, and exalted God, deliver me from the fear and trembling which have taken hold of me, that I may go into his presence in Thy name, and come out in peace.'

4 On the third day Esther accordingly clothed herself in royal garments, and came before the king, who was sitting upon the throne, accompanied by her two handmaidens. Upon one of them she placed her right hand, and leaned upon her, according to the royal custom, while the other maiden followed behind her to hold up her train, that the gold and precious stones should not touch the ground. Before him were seated all the potentates of the kingdom, who said one to the other, 'This woman is sure to be killed, since she has entered here without an appointed time.' One said, 'I will then take her royal garments '; another, 'I shall take the ornaments on her feet'; and another, 'I will take the ornaments on her hands.' When Esther heard these remarks, she kept her face serene, and concealed the grief of her soul.

5 The king, then raising his eyes to her, was much enraged that she had transgressed the law by coming into his presence without being called. When Esther noticed the king's anger and fury, she trembled, and, feeling faint, placed her head upon the maid at her right; but our Lord saw the oppression of His people, and had pity upon Israel and upon the trouble of the orphan who trusted in Hint, and He made her find favour in the eyes of the king, for the Lord added beauty to her beauty and majesty to her majesty, and the king, rising in haste from his throne, ran towards Esther, and embraced and kissed her, and, taking her in his arms, said to her, 'What is this fear, O Queen Esther? for this decree of ours does not apply to thee, since thou art the queen, my friend and companion;' and, taking up the golden sceptre, he placed it into her hand, and added, 'Why dost thou not speak to me?' And Esther replied, 'When I saw thee, O lord, my soul trembled before thine honour, and on account of the greatness of thy glory.'

6 She then leaned her head once more upon her handmaid, for she was faint from fasting and from trouble. The king, however, was now very much alarmed at this, and wept before his wife, while all his ministers entreated her to speak to the king, in order to appease his soul. And the Lord brought about that great salvation through Queen Esther and Mordecai. Haman and his sons were hanged upon the gallows, and all those who devised evil against Israel were slain at the edge of the sword, and Mordecai from that day forth was honoured in the king's palace.

CHRONICLES OF JERAHMEEL CHAPTER 81

[This Is The Letter Which Haman Sent (To The Nations), For The Purpose Of Causing The House Of Jacob To Perish.] 1 'I, Haman, who am great before the king, and second to

him, who am the chief of the potentates, and seventh among the princes, and who am the most favoured in the kingdom-I, Haman, do write with the consent of all the prefects (eparchs), governors, rulers, and of all the kings of the East who lend their aid, and with the consent of all the royal princes. We all with one consent, with one mouth, with one speech, and in one language, write down, with the permission of King Ahasuerus, and seal it with his ring, so that it cannot be retracted, concerning the great eagle, whose wings were spread over the whole world, so that no bird, beast, or animal was able to stand before it, until the great Mede arose and smote it with one great blow, by which its wings were broken, its feathers plucked out, and its legs cut off, thereby giving the whole world rest, peace, and tranquillity, from the time it wandered from its nest until this very day. We now see that it wishes to grow and to increase its feathers and to spread out its wings again to cover us and the whole world, and to rend us in pieces in the same manner as it rent our forefathers who preceded us.

2 'On this account all the great men of Media and Persia have here assembled, and with the permission of the king we all of us with one counsel write to you to spread out nets to catch this eagle, whose strength again increases, and bring her back to her nest, to pluck out her feathers and to break her wings, to give her flesh to the birds of the heaven, to destroy her seed, to crush her young, and to root out her memory from the world. Our counsel is not like Pharaoh's, who decreed only concerning the males, leaving the females; nor as Esau's, who said, "Now that the days of my father's mourning draw nigh, I will kill my brother Jacob, and make his sons my servants"; nor like Amalek's, who pursued Israel, and slew the weak, but let the strong remain; nor like Nebuchadnezzar's, who exiled them, and, giving them rest, promoted some to the throne of the kingdom; nor like Sennacherib's, who brought them to a land like their own:

3 but with a united wish, we have decided to destroy and to blot out all the Jews, young and old, women and children, and all on one day, so that there be no seed left in the world, that their children act not as they did to our ancestors, to our fathers, and our great men, for those who did good to them they rewarded with evil. We would be justified even if we took only revenge for Pharaoh, who did many good deeds for them, for he made Joseph, a servant, king over them and over all Egypt, and when his father and brothers came to him, he gave them the very best part of the land to dwell in, and maintained them during the years of famine, so that his people increased and multiplied in the land, and a prophet arose among them, Moses by name, the son of Amram. He was a wizard, and brought upon Pharaoh, upon his household, and upon his land, great plagues, awful and extraordinary. The people then rose up in the middle of the night like thieves, and, after robbing their neighbours, went out of the land. But Pharaoh, with his army, pursued them for their property, and they entered the sea through the enchantments of the Israelites; but they did not know by what means they had entered, and they were all drowned in the sea, thus returning evil for good.

4 'When they arrived in the wilderness, a certain old man, a descendant of Esau, offered them a feast in honour of their ancestor Jacob, and after they had eaten and drunk and enjoyed his feast-Joshua their wizard did not cease with his enchantments-but they spread their hands and whispered with their lips, until our ancestors became weak through him. as it is said, "And Joshua weakened them"; nor was this alone sufficient for them, but they made a decree that our name should be blotted out, as it is said, "Thou shalt destroy the memory of Amalek." They did likewise to the kings of Midian who dwelt there, for they spoiled and slew the Midianite kings, their prophets and their priest they slew at the edge of the sword, and had no mercy upon them, as it is said, "And Balaam, the son of Beor, they slew with the sword, also Sihon and Og, the two Amorite kings." Also the thirty-one kings and seventy elders. Then arose their king, Saul, who destroyed all the seed of Amalek, and had not our ancestor Agag been preserved, there would not have been one single survivor. They strengthened themselves against our kingdom, and destroyed us, not by means of the spear or the sword, but, having built a large house, they entered therein, and when they came out, they caused the nations to fall down before their words by means of their wiles.'

5 When the nations of the world read this writing, they sent back word to Haman, saying, 'Whatever thou hast written we know, but we fear lest they do the same to us as they did to our forefathers and our ancestors, for we shall perish at their hands. Cease, therefore, from them, for whoever touches the touches the apple of God's eye, for they are called "The people near to Him," as it is said, "And the children of Israel are the people near to Him; they are His beloved, His treasure, and His inheritance." Now, Haman, what wilt thou do? for see what happens to those who pursue them, see how the mighty men of the world have fallen beneath them. We therefore do not wish to lay hand upon them, for their God has called them the stone of foundation, and whenever it is moved He shall replace it.'

6 Haman once more wrote to them, saying that 'their God, whom you fear so much, does not fight their battles, nor does He avenge their wrongs: He only did so in His youth, but now He has become weak, and has no more power to wreak vengeance; for if He had, why did He not deliver them from Nebuchadnezzar, who destroyed His house, burnt His temple, and slew His young men, and before whom He had no power, for the remnant was then exiled to his land (Babylon). And now though they are prisoners in our hands, we wish to intermarry with them, but they do not wish it. They, on the contrary, despise us, and account us as reptiles and creeping things; if a fly happens to fall into one of their cups, he throws it out and drinks the wine, and if one of us happens to touch the cup of one of them, he throws it on the ground and breaks it. If we ask them for anything, although we desire to return them double, in order to unite them to us, they do not wish it. but despise us and our kingdom. It is therefore our desire, with the king's consent, as well as the consent of the princes, rulers, governors, and pashas, to destroy them utterly from the world, both young and old, women and children, in one day, as it is said, "Come, and let us destroy them.""

⁷ As soon as the surrounding nations heard this, with one accord they consented to destroy the Israelites, as it is said, 'Those kings counselled together,' etc. One day when Haman was walking along, with the princes of the kingdom following him, Mordecai, while walking in front of them, met three children just coming from school, and said to them, 'Tell me each of you what lesson you have learnt to-day.' The first one replied, 'Do not be hastily terrified.' The second replied, 'Take counsel together, and it shall be brought to nought;' and the third said, 'Until old age I am He.' On hearing these replies Mordecai rejoiced, and gave thanks to God. When Haman met him, he said, 'What did these children tell thee?' And he replied, 'They told me good tidings.' At this Haman's anger was kindled, and he commanded the children to be captured, saying, 'I will stretch forth my hand first against these children.' [End of the letter.]

CHRONICLES OF JERAHMEEL CHAPTER 82

1 R. Isaak Napha said Haman worked cunningly against Israel, for it is written, 'And when these days were fulfilled, the king made a feast unto all the people.' The people' here referred to is Israel. Haman said to Ahasuerus, 'The God of these people hates lewdness, for it is written in the Torah, "Thou shalt not commit adultery.'' He, therefore, brought together lewd women, and making the banquet for then, decreed that they should comply with any man's wish, so as not to give the accused the excuse of saying that they had been forced to do such a thing by a decree of the king. As soon, however, as Mordecai perceived this, he said to the people, 'Do not go to this banquet, that you may not be led into temptation.' But the Jews disregarded Mordecai's advice, and went.

2 R. Levi said that 18,560 men went to this banquet, and ate and drank until they were intoxicated with the wine. Our sages say that while they were at the table of this wicked man, Satan appeared before God, and accused Israel in these words, 'O Lord of the universe, how long wilt Thou cleave to this nation, who turn their hearts from Thee, who forsake Thee, and separate themselves from Thee? Moreover, they do not turn to Thee in repentance, although the verse has been fulfilled in which it is written, "I shall scatter you among the heathen." Therefore, if it is Thy will, let them perish from the world.' But God asked, 'What will become of My law?' And he replied, 'Let it remain for the higher beings.' Then said the Holy One, blessed be He, 'My mind is satisfied to destroy Israel.'

3 At that moment He wished to blot Israel out of the world, as it is said, 'I shall cease to remember man.' 'What is this nation to Me,' said the Lord, 'for whom My sorrow increases every day?' And God said to Satan, 'Go, and bring Me a scroll, that I may write thereon their destruction.' When Satan went out to fetch the scroll, he came face to face with the Law, which came forth to meet him in widow's garments groaning and weeping, and at the voice of her weeping the ministering angels cried, saying, 'If the Israelites are to be destroyed, what is the use of us?' And they wept aloud, as it is said, 'The Arelim cried abroad, and the angels of peace wept bitterly.' As soon as the sun, moon, stars, and planets heard it they clothed themselves with sackcloth, and lifted up their voice in lamentation, as it is said, 'The heavens and the earth clothed themselves in blackness, and girded themselves with sackcloth:' as it is said. 'I will clothe the heavens with blackness, and make sackcloth their garment.' Then they all exclaimed, 'O Lord of the universe, shall Israel be destroyed, who go from door to door wishing to study the law, observe the Sabbath, circumcision, and the commandments, and for whose sakes we were created? as it is said. "If not for My

covenant, the day and the night and the ordinances of heaven and earth would not have been founded," and now shall they perish from the world?"

4 At that moment Elijah went to beseech the righteous men of yore, the patriarchs, Abraham, Isaac, and Jacob, and said to them, 'O patriarchs, do ye riot know that the heavens and the earth and all the heavenly host weep in the day, and cry in the night, and that the whole world is now like a travailing woman, while ye remain silent?' 'But why is this?' said they. 'Because Israel has been handed over to the slaughterer like sheep, to be blotted out from the face of the earth, and their name is to perish, as it is said, "Come, and let us destroy them.'' Then said Moses to Elijah, 'Is there a righteous man in this generation?' And he replied, 'Yes, there is one, and his name is Mordecai, the son of Jair.' 'Then go, and tell him to supplicate continually for mercy, and I shall do likewise.' 'But,' said Elijah, 'Moses, O faithful shepherd, against thy flock the decree has already been written down, and now they desire to put the seal on it.'

5 'Notice,' then said Moses to Elijah, 'whether it has been sealed with clay, for then our prayers may still be heard; but if it is sealed with blood, then what has been decreed will happen.' After this conversation Elijah, of blessed memory, forthwith went to Mordecai, as it is said, 'And Mordecai knew all that had happened,' and when he heard this, he rent his clothes, as it is said, 'And Mordecai rent his clothes.' Then said Mordecai before God, O Lord of the universe, Thou hast sworn to our forefathers to make their seed as numerous as the stars of the heavens, and now we are accounted for as sheep to be slaughtered. Remember Abraham, Isaac, and Israel, thy servants.'

6 Then, gathering all the children of the school together, he afflicted them by depriving them of bread and water, and, clothing them in sackcloth, he placed them on ashes, so that they cried day and night, while the wicked Haman went to his house rejoicing, as it is written, 'And on that day Haman went home rejoicing, and with a merry heart, and calling his friends, said, "Thus and thus has Queen Esther done." And he told them of his greatness, adding, "But all this is not enough for me." And Zeresh, his wife, said to him to erect gallows for Mordecai, and it pleased him, and he erected a gallows. Cutting down a cedar from his garden, 50 cubits high and 15 cubits wide, he brought it out, and fixed it near his door, all the while singing praises and songs, and thinking in his heart that at the time of the reading of the 'Shema'' he would hang Mordecai thereon. On the same day that he fixed it, it fell upon him; but Gabriel replaced it in its position, saying to him. 'To thee belongs this beautiful tree, and for thee was it established from the creation."

7 Haman then went out to seek Mordecai, and found him sitting at the head of the children, while they sat upon ashes girded with sackcloth, lamenting and crying. Having beaten them with chains of iron, he appointed keepers over them, saying, 'First shall these be slain, and afterwards I will hang Mordecai the Jew.' Their mothers then brought them bread and water, saying to them, 'Eat and drink, my children, before you die'; but they refused, and, swearing by the life of Mordecai, they placed their hands upon their books, and said, 'We shall not eat anything at all, but shall die in our fast.'

8 After rolling up his scroll, each one of them placed it at his heart, and when the hours of the night passed by their lamentation was heard on high, and the supplications of the patriarchs. The Holy One said, 'I hear the voices of kids and goats,' at which Moses replied, 'O Lord God of the universe, Father of the fatherless, and Judge of the widows, these are not kids and goats, but the young of Thy people of the house of Israel, who sit fasting now for three days and three nights, bound in chains of iron; but to-morrow they are to be slaughtered like kids and goats, while the heart of the enemy rejoiceth.' The mercy of God was then moved for them, so that He broke the seals, rent the decree, and frustrated the counsel of Haman and his plans, causing the salvation of Israel and Mordecai to spring forth, thus fulfilling what is written, 'I shall cut off the horns of the wicked; but the horns of the righteous shall be raised on high.'

CHRONICLES OF JERAHMEEL CHAPTER 83

I It is written, On that same night the sleep of the king was disturbed. God at that time said to the patriarchs, 'They have been condemned to destruction;' they replied, 'O Lord of the universe, for what reason?' 'Because in the time of Nebuchadnezzar they did not sanctify My name, and made Me to be one who hath no power to deliver.' Whereupon they replied, 'Now, O Lord, do unto them what seems good to Thee.' But as soon as God saw that they bowed to justice, He arose from His throne of justice, and sat upon the throne of mercy. Then did the heavenly host address God, saying, 'Didst Thou not create the whole world for the sake of the Torah, which Thou gayest to Israel? do not all things exist for their sake? as it is said, "If not for My covenant I would not have created day and night." Threefore, if Thou destroyest this nation, what shall become of us?' But God replied, 'My children have not done well.' 'O Lord of the world,' added they, 'it is revealed and known to Thee that they did this from fear.'

² The Lord was then filled with mercy for Israel, and, calling to the trees of the creation, He said, 'Who of you will be willing to serve as gallows for the wicked?' And the fig-tree replied, 'I am ready to be the gallows to hang that wicked man; for from me the Israelites brought the first ripe fruits into the temple, and not only this, but they were compared to me,' as it is said, 'I saw your fathers as the first ripe fruit on the fig-tree in its bud.' The vine also said, 'I will offer myself, for from me they obtained the drink-offering for the temple; and, moreover, to me they were compared,' as it is said, 'Israel is a budding vine.'

3 Then said the pomegranate, 'I will offer myself, for the Israelites were compared to me,' as it is said, 'Like the heart of a pomegranate is thy temple.' And the walnut said, 'I will offer myself, for the Israelites were compared to me,' as it is said, 'I descended to the garden of nuts.' The citron also exclaimed, 'I will offer myself, for the Israelites praised God through me,' as it is said, 'And ye shall take you the fruit of goodly trees.' The willows of the brook said. 'They were compared to me,' as it is said, 'And they shall spring up among the grass, as willows by the water-courses.' The olive said, 'I will offer myself, for from me they kindled the lights in the temple,' as it is said, 'And they shall take unto me pure oliveoil'; 'they were, moreover, compared to me,' as it is said, 'His majesty is like the olive, and, further, the green olive whose fruit is beautiful to look at.'

4 The apple also said, 'I will offer myself, for the Israelites were compared to me,' as it is said, 'And the sweet smell of thy breath is like apples.' The cedar said, 'I will offer myself, for from me the holy temple was built, besides which the Israelites were compared to me,' as it is said, 'He shall grow like the cedar in Lebanon.' The thorn next said, 'I will serve as gallows, for the wicked were compared to me,' as it is said, 'But the ungodly shall be all as thorns to be thrust away.'

5 As soon as the thorn had offered itself, the Lord silenced all the trees of the creation, saying, 'Since thou offerest thyself, this wicked man, who desires to destroy My children, shall be hanged upon thee.' And at that moment that wicked man, summoning his wise men, said unto them, 'I will erect a tree, to hang Mordecai thereon, 50 cubits high, that all the surrounding countries may see him hanging.' But there is no tree as high as that, except in thine own house. This wicked man then destroyed the hall of his own house in order to obtain the materials required for the gallows, and taking the beam of thorn from his house, he fixed it; but it fell upon him, and thereby took his measurement. Then exclaimed Gabriel, 'This tree has been prepared for the from the creation.'

6 The sages say that Michael came to the bedside of Ahasuerus in the night, and disturbed his sleep, for he knocked him on the ground 366 times. When he arose, in great anger, he saw three companies before him, one of butchers, one of bakers, and the third of butlers, and said to them, 'Ye have given me poison, and you seek to kill me and to blot me out from the world.' But they answered, 'The same bread that Queen Esther and Haman ate thou atest, and the wine they drank thou also drankest. Let us see Esther and Haman, and if they are as thou art, then thou doest rightly; but if not, then why should we be killed?'

7 When they found that Esther and Haman had suffered no harm, the king ordered the Book of Chronicles to be brought before him. On that same night Gabriel appeared in his dream before Ahasuerus, in the likeness of Haman, with a drawn sword in his hand, seeking to kill him. Rising confusedly from his sleep he exclaimed, 'Who is in the court?' And the young chamberlains of the king replied, 'Haman is in the court.' Then he thought, and said, 'The dream I have dreamt is true, and he has come here for no other reason than to slay me.' Then, commanding Haman to come into his presence, he said, 'I know that thou art a man of thought, and whoever follows thy counsel never fails. What shall be done to the man whom the king delights to honour?' Revolving this in his mind, Haman thought, 'Whom can the king desire to honour more than me?'

8 He therefore said to the king: 'Let the man whom the king desires to honour be clothed in the royal garments, and let one of the greatest men of the kingdom walk in front of him and proclaim aloud these words, "Whoever will not bend himself or bow down before him shall be slain," and in addition, let the king's daughter be given him.' Then said the king to Haman, 'Go and do likewise to Mordecai the Jew who sits in the gate of the king.' But there are many Mordecais who sit in the king's gate, and is not a small province sufficient for him?' asked Haman. The king said, 'Let no word fail from all that thou hast said.'

[End of the letter of Haman. This is a Midrash, and is not to be found in the Book of Josippon (Flavius Josephus).]

THE THRONE OF SOLOMON, KING OF ISRAEL. CHRONICLES OF JERAHMEEL CHAPTER 84

1 'In those days, when Ahasuerus sat (upon the throne).'

The word ### can only be understood as meaning 'sitting on a throne,' as it is said, 'When Ahasuerus sat upon the throne of his kingdom;' but with reference to Solomon, it is said, 'And Solomon sat upon the throne of the Lord as king over Israel.' It is related that the assembly of Israel said unto God, 'O Lord of the universe, this wicked man sits in the sane place where Solomon has been sitting; do not make abominable the throne of Thy glory.' In the third year of his reign—for he busied himself with this throne for three years—he sent for workmen to make a throne like unto that of Solomon, but they were unable to do so.

2 And what was the throne of Solomon? The sages say that Solomon mounted his throne by six different ways, each way having steps. On each step there were two lions, one on the right and the other on the left, who did not remain quiet, but were active. And what did they do? When Solomon went up on the first step, the lions on the right stretched out their paws upon which a writing was engraved. He could not place his foot on the second step until he had read what was written on the lions' paws. It was, 'Ye shall not respect persons in judgement.' Turning now to the left, he read what the other lions had written on their paws, 'Thou shalt not accept any bribe.'

3 Thus at every step he had to read some portion of the law of judgement. All the steps were set with precious stones and pearls, red, white and green. Kinds of trees and species of the palm-trees were fixed on both sides of each step, and upon their branches there nestled all kinds of eagles, peacocks and birds. On the highest step were two huge pillars of ivory on the heads of the lions, and two golden hollow vines fragrant with every kind of perfume, which they exhaled whenever Solomon ascended the throne. The throne itself was made of ivory, overlaid with the gold of Ophir, and surrounded with precious stones and pearls. On either side of the throne a golden seat of honour was placed, one for Gad the seer, and the other for Nathan the prophet.

4 And seventy other seats of gold for the seventy judges of the Sanhedrim formed a circle round the central throne. In front of it was a lamp of gold, with its snuffers and censers and other appurtenances; and on one side of this lamp were seen in sculptured work the seven patriarchs of the world, viz., Adam, Noah, Shem, Abraham, Isaac, Jacob and Job, while on the other side were the seven pious men of the world, viz., Kehath, Amran, Moses, Aaron, Eldad, Medad and Hur, and on the top the form of a priest was seen kindling the light.

⁵ On the steps approaching the throne were placed as many unclean animals as clean, all facing each other, on the first step the ox was placed opposite the lion; on the second, the goat opposite the wolf; on the third (third missing); on the fourth, the bear opposite the hart; on the fifth, the eagle opposite the dove; and on the sixth, the hawk opposite the turtledove. The ascent to the throne was made between these animals. As soon as Solomon placed his foot on the first step he turned round, and the lion immediately stretched out its paw on the right and the eagle its talon on the left. Upon these he leaned, and was spared the trouble of ascending himself because the same thing was done by the different animals and birds on each until he arrived at the top.

6 Then all the birds of every species began to chirp and sing, and the peacocks to shriek, and all the trees emitted their fragrant perfumes. A serpent of gold then encircled him, and, having seated him upon his throne, crept down beneath his feet. The eagles, nestling on the vines after wafting breezes of perfume with their wings, placed the crown upon his head, and, this done, all the beasts and birds with one accord exclaimed, 'Long may the kingdom of the house of David be established.'

7 After this a dove of gold opposite the throne brought a scroll of the law and placed it upon his knees. Then, laying it upon a golden reading-desk just by the throne, he read it to fulfil what is written, 'And it shall remain with him, and he shall read therein all the days of his life.' Every step on the throne contained some verse in praise of the law. On the first was written, 'The law of the Lord is perfect, refreshing the soul.' On the second, 'The testimony of the Lord is faithful, making the foolish (simple) wise.' On the third, 'The precepts of the Lord are just, rejoicing the heart.' On the fourth, 'The commandment of the Lord He created as an enlightenment to the eyes.' On the fifth, 'The fear of the Lord is pure, lasting for ever.' On the sixth, 'The judgements of the Lord are true, and are righteous, all of them.'

8 When the people approached Solomon for judgement, the wheels of his throne turned, the oxen lowed, the lions roared, the bears howled, the lambs bleated, the eagles cried, the peacocks shrieked, the cocks crowed, the hawks screamed, and all the birds chirped, to terrify the plaintiffs and the witnesses, so that they did not plead wrong cases, and the witnesses were not testifying falsely. On account of all this, it is said, 'The like of it will never be made in any kingdom.' When Ahasuerus was king, he tried for three years to have a throne made like that of Solomon, but in vain. [End of the throne of Solomon.]

THE GRAND BIBLE

CHRONICLES OF JERAHMEEL CHAPTER 85 *The Book Of The Maccabee.*

1 In the first year of his reign, Cyrus tried to build the temple, but when Ahasuerus arose he prohibited it, and attempted to uproot the vineyard (of the Lord), but God exterminated him and the wicked Haman from the world, and he died. His son succeeded him. These are the kings mentioned. 'Darius,' 'Cyrus,' and 'Artaxerxes.' Then the people believed the prophets and were prosperous. In the second year of his reign he allowed the Jews to return to Jerusalem to erect the holy temple and repair Jerusalem without let or hindrance. This was, indeed, a complete redemption. Then did Ezra, Zerubbabel, and his company for the second time go up to Jerusalem with another generation of the captivity, and they rebuilt Jerusalem and its walls. The towers they erected were very high and strong, and the temple contained more than did the first one, so that the first temple was deemed insignificant in comparison to it. The people on this account served Cyrus loyally for thirty-four years.

2 After the rebuilding of the temple, Zerubbabel returned to Babylon and there died. His son, Meshullam, succeeded him, and in his days, in the fifty-second year of the kingdom of the Medes and Persians, the kingdom was formed. The last prophets, Haggai, Zechariah, and Malachi, died at that time, and from that day prophecy ceased to exist in Israel, and the Echo of the Heavenly Voice (Bath Kol) took its place, and after that they had to consult the sages, until the Messiah will come and show us the right way.

3 Thirty-four years after the rebuilding of the temple, Darius, the son of Ahasuerus, reigned, until Alexander the Macedonian, and first King of Greece, rose up against him in battle, and having killed him, took his kingdom. He reigned over Israel two years and captured every kingdom; he made the whole world subservient to him, for at that time, thirtyfour years after the rebuilding of the temple, Alexander the Great was crowned, the son of Philippus, King of Macedon, for he made the name of the Macedonian nation great, and smote the whole country. When he waged war against Darius he smote the land of Egypt, and slew in Alexandria double as many Jews as went out of Egypt. After conquering Edom, he marched along the sea-shore until he came to Acco, which he conquered, as well as Ashkalon and 'Aza. He then turned to go up to Jerusalem to smite it, because the Jews had made a covenant with Darius. After journeying with all his camp some distance, he arrived at a lodge, where he and his army encamped.

4 On the same night, while he was lying in his bed in his tent, he opened his eyes and beheld a man standing over him, clothed in white linen, and with a drawn sword in his hand. The appearance of the sword was like lightning on a rainy day. When he lifted the sword over the head of the king, he was greatly afraid, and said, 'Why will my lord smite his servant?' And the man replied, 'God hath sent me to conquer kings and many nations before thee, and I will go before thee to render thee assistance but know now that thou shalt surely be slain. because thy heart is bent upon going to Jerusalem in order to injure God's priests and God's people.' 'I beseech thee, O lord,' replied the king, 'pardon the sin of thy servant, and if it is evil in thine eyes, I will return to my home.' 'Do not be afraid,' said the man; 'go thy way to Jerusalem, and when thou comest before the gate of the city and seest a man clothed in white like me, having an appearance and form like mine, do thou immediately make thy obeisance to him and bow thyself to the ground before him; do whatever he bids thee and do not transgress his word, for the very day that thou rebellest against his word thou shalt be slain.'

⁵ The king accordingly arose and went on his way to Jerusalem. When the High Priest heard that the king was coming against Jerusalem in great anger, he was exceedingly afraid, as were all the people, and he with the people went out at the gate of the city, and he stood before them clothed in white linen. As soon as Alexander beheld the priest, quickly dismounting from his chariot, he fell upon his face and bowed down to him. But the generals of Alexander became very angry at this, and said, 'Why dost thou bow down to a man who has no strength for battle?' And the king replied, 'Because the man that goeth in front of me to subdue all the nations before me is in appearance and form like this man. I therefore bow down to him.'

6 Then, going into our holy temple, he said to the priest, 'I will have my statue erected here, and will give much gold to the workmen, that it may be a remembrance of me. And they shall erect it between the Holy of Holies and the temple, so that my image be a remembrance in this great house of God.' But the priest replied, 'Present the gold for the maintenance of God's priests and the poor of His people, and I shall cause thee to be remembered for good, as thou wishest. All the children of the priests that are born this year shall be called by thy name, Alexander, and thou shalt be remembered when they worship in this house; but it is not permitted to place a graven image or any likeness in the house of our God.' The king then gave the gold according to the priest's request.

7 He asked him to inquire of God on his behalf whether he should go to war with Darius, or abandon the plan. And the priest replied, 'He will surely be delivered into thy hand.' Then, bringing the Book of Daniel, he showed him the passage concerning the ram that gores on all sides, and the young of the goats which runs up to him and tramples upon him. 'Thou,' added he, 'art the young of the goats and Darius is the ram. Thou shalt therefore trample upon him and seize his kingdom.' Thereupon Alexander went to battle, and having slain Darius, captured all his kingdom, so that the Persian kingdom ceased to exist. Alexandria in Egypt was made the royal city.

8 He ruled over all the nations just as a shepherd rules over his flock. He soon went over to India, travelling right across the country to its extremity, and extended his dominion, as we learn from the Talmud. R. Jose said, 'For six years he reigned in Elam, and afterwards spread his kingdom over the whole world.' He reigned altogether twelve years, and when he was on his way home to his house he died. Before his death, he divided his kingdom among his four chieftains. He made Ptolemy, the son of Lagi, King of Egypt; Phillipos his brother King of Macedon, and Seleucus and Nicanor Kings of Syria and Babylon respectively; lastly, he made Antiochus, the great enemy of the Jews, King of Asia.' Daniel prophesied this event when he said that the goat would gore the rain and break down his kingdom, which would be given to the four winds of the heaven.

CHRONICLES OF JERAHMEEL CHAPTER 86

1 When Seleucus reigned over Macedonia, a very wicked, rebellious man of our own people, Simeon of the tribe of Benjamin, went to Seleucus, and, slandering the Jews, informed him of the riches contained in the temple at Jerusalem, saying that the treasures were heaped up in the treasury in endless quantities, and an abundance of gold and precious stones, and that it would be preferable to have it all placed in the treasury of Seleucus. The king thereupon sent for Eliodorus, the captain of his host, and bade him go to Jerusalem with his armies. On his arrival, Honiah the priest said to him, 'Why has my lord come to his servants?' 'Because of the vast amount of gold and precious stones which, the king has been informed, is contained in the treasury of your temple.' 'The only gold in the treasury,' said the priest, 'is that which King Seleucus and other kings presented to us, for the maintenance of orphans, widows and the poor. For this, we pray to God to grant long life to the king and his sons."

2 Eliodorus, however, would not listen to the priest, but placed guards round the temple until the following day, when the city was in great uproar through the lamentation and cries of the people. The priests also called upon their God, and the old men and women and princes covered themselves with ashes and afflicted their souls with fasting. They withheld food from even the young, and milk from the sucklings. They cried to God to guard the treasury and the riches deposited therein. Even the young virgins spread out their hands through the windows of their houses, and besought the Lord for protection. And as to Honiah the priest, he afflicted his soul (by fasting), and having stripped himself of his garments of honour, clothed himself in sackcloth and ashes, for he was grief-stricken, and, from his appearance, one could imagine the sorrow that was in his heart.

3 On the next day the enemy came with all his hosts and went into the temple shouting, but the Lord caused a strong and mighty sound of thunder 'to be heard, together with an earthquake, and a tempest that overthrew mountains and shattered rocks. On hearing this, all his troops took to flight, and hid themselves wherever they could, so that he (Eliodorus) remained alone, and, lifting up his eyes, he saw an aweinspiring man clothed in gold, decked with precious stones, and girt with implements of war. He was riding a splendid horse, that was plunging and rearing, trotting and galloping in the temple. Heliodorus immediately ran away, but the horse felled him to the ground, standing over him. The man then commanded his two young servants, clothed in white linen, with staves in their hands, to smite Eliodorus very severely; and the two young men at his bidding stood one on each side of him, and beat him mercilessly until he became insensible and hovered between life and death.

4 Young priests came then, and lifting him on their shoulders, carried him into his tent and placed him in his bed, where he lay motionless and dumb. He could neither speak nor partake of any food. When the elders of Macedon saw him in this state, they came to Honiah the priest, and, crying, entreated him in the following manner, 'O my lord, we beseech thee, pray for thy servant Eliodorus and all his servants who have come with him, that we may live and not die, for we know that there is no other God except yours, since all the gods of the nations are vanity and emptiness, whilst yours is the God that created the world, and in whose hand is the soul of every living being.'

5 The priest, then praying to God, offered up burntofferings and sacrifices, and the two young men that smote Eliodorus by the temple appeared to him and said, 'Arise, go to Honiah the priest, and bow down to his feet, since for his sake the Lord has had mercy upon thee.' Eliodorus accordingly arose, and, going to the priest, prostrated himself,

and blessing the Lord and the priest, gave much gold and silver to the treasury of the house of the Lord. Then hastening to Macedonia, he went to Seleucus the king, who asked, 'What of Jerusalem?' And Eliodorus replied, 'If thou hast any enemies that seek thy life, send them at once to Jerusalem, and let them go into the temple, where they will surely be killed, for the great God reigns in that place, and destroys all the enemies of Jerusalem and Judah.' He then told the king all that he had witnessed. And Seleucus no more sent his army to Jerusalem to do evil, but, on the contrary, every year until his death he sent a present to the temple, and the kings of the land loved to send their offerings to honour the temple at Jerusalem

CHRONICLES OF JERAHMEEL CHAPTER 87

I Now, Ptolemy the Macedonian, who was made King of Egypt, was a wise and clever king, who delighted much in books. He, therefore, commanded his two officers to collect very many of them. The names of these princes were Aristios and Andrios. Having collected together many Median and Persian books, besides others in all kinds of languages, the king said to them, 'How many books have you obtained?' 'Nine hundred and fifty,' they replied. Ptolemy laughed at this, and said, 'Go and add another fifty to make a thousand.'

2 But Aristios and Andrios replied, 'O my lord, it is in vain that we weary ourselves to obtain these books, since they are useless. Now, if it please the king, let him write to the priest at Jerusalem, and he will send thee some wise men of that place, conversant with the Greek language, who will explain to thee their law, which is the holy writing, but the books we have copied are of no use.'

³ Acting upon their advice, the king made such a request of the priest who was in those days, and the high priest sent him seventy priests with Eleazar as their chief, the same Eleazar who was afterwards tried during the reign of Antiochus, and who died a martyr's death for his God.

4 When Eleazar and these seventy priestly interpreters came to Egypt, Ptolemy, having put them in seventy different houses, one distinct from the other, provided each one with a scribe, and the priests interpreted the whole twenty-four books of the law, which these seventy elders then translated from Hebrew into Greek. As soon as it was finished, Eleazar brought the various copies to the king, who, after reading each one of them, found that they were all of one mind, and that the interpretations of all were identical.

5 The king was much rejoiced at this, and, presenting Eleazar and the seventy elders with much money, sent them back to Jerusalem. He further gave 150,000 men of Judah their freedom, besides presenting them each with fifty drachmas of gold, and a table of pure gold weighing 1,000 talents for the temple. Upon it he engraved the land of Egypt, and the course of the river Nile in Egypt, by which the country is watered, and inlaid it with precious stones, so that the like of it had never been seen in all the land. This the King Ptolemy sent as a present to the temple of the great and aweinspiring God of the whole world.

6 A long time after this, Antiochus was made King of Macedonia, while Ptolemy, King of Egypt, was gathered to his people, and another Ptolemy succeeded him. But Antiochus rose up against him, and having slain him, captured the whole land of Egypt, over which he reigned.

7 In those days fierce battles began to be fought against the people of Judah, for after Antiochus had smitten Egypt he became very proud, and issued a proclamation to every people, commanding them to bow down to the image of the king. And all the nations obeyed. But the godless men of our people, Menelaos, Simeon, Alkimos, and others, incited Antiochus to do evil to the Israelites. At this time a great miracle was seen in Jerusalem. There were seen forty men riding between heaven and earth on what seemed like horses of fire. The riders carried in their hands partly golden implements of war, with which they fought one against the other for forty days. At this the wicked men of our people went to King Antiochus, and said, Behold, we have seen a miracle in Jerusalem, and the people say that Antiochus the king is dead, and are rejoicing at the downfall of our lord.'

8 The king was greatly angered at this, and immediately went to Jerusalem and smote them with the edge of the sword, so that there was a great slaughter in the city. A great multitude were sent into exile, and the assembly of the Hassidim scattered. They fled to the forest, and fed upon the grass as animals, and hid themselves in the forest like wild beasts, for Antiochus was not satisfied with slaying many, but he sent many more into captivity, and when he left the land of Judah, he left his officers to afflict the people, and he left Phillipos the Pelusian. They are Phrygians, and so are also the Trojans, of whom the Romans are descended. Phillipos belonged to that race. The king left him there to oppress the Israelites, commanding him thus, 'Whoever is willing to bow down to the image I set up, and to eat of the flesh of the swine, shall live, but all who refuse shall be slain without mercy. Prohibit also this people from observing the Sabbath, and from circumcising their children."

CHRONICLES OF JERAHMEEL CHAPTER 88

1 The king then returned to Macedonia, and, having left Phillipos in the land of Judah, he (Phillip) acted according to the word of the king, and prohibited the people of Judah from studying the Torah and from performing the service of their God. He supported the wicked and the rebellious of our people, and slew many of the congregation of the Hassidim.

2 At that time two women were discovered who had circumcised their children. They hanged them by their breasts, and hurled them with their children from the top of a tower; they burst open and died.

3 After this Eleazar, the chief of the priests, of whom we have spoken as having gone to Egypt in the days of Ptolemy, was captured and brought to Phillip. And Phillip said to him, Eleazar, thou art a wise man and a man of understanding, now, do not transgress the command of the king, but eat of the flesh of his sacrifice.' But Eleazar replied, 'Far be it from me to set aside the command of my God for the performance of the command of the king.' Then did Phillip call him aside and say, 'Thou knowest that I have loved thee now for many years, therefore I have pity for thy soul and for thy old age. Now let a portion of the flesh of your own sacrifices which you are allowed to eat be brought to thee, and eat it before the people so that they will say thou eatest of the flesh of the king's sacrifice. By this means thou canst save thy life and not die.'

4 When Eleazar heard this he thought of the greatness of his honour and of the sanctity of his glory, and said to Phillip, 'I am now ninety years old, and have never yet served my God with deceit, nor is it meet for me now to do so and to deceive man, for then the young men will say, "Since Eleazar, although ninety years of age, has frustrated the law of his God, we can also do so," and they will thus bring destruction upon themselves. Now, far be it from me to defile my holiness, to taint the purity of my old age, and to cause these young men with me to waver, and give them the pretext for saving, "Eleazar, although ninety years of age, has sinned against his God, and has chosen to serve the vanities of the nations; let us do likewise." For even if I escape from your hands to-day, I cannot escape God, for no man can, either living or dead. since His dominion extends over the living to bring death upon them, and over the dead to quicken them to life. I shall therefore die true to my faith, and shall leave my power behind to my people and my young men, so that when they see me give up my life so readily, they will desire to follow my example, and thus keep their Torah precious, and will choose a worthy death.'

5 As soon, however, as Phillipos heard these words, he turned exceedingly cruel, and commanded his men to bind the pious old man and to beat him. They thereupon smote him with all manner of weapons without pity, and he groaned, saying, 'O Lord my God, who hast caused me to reach this old age, Thou knowest that I was able to deliver my soul from such a death, but did not wish to do so on account of my love for Thee. Now they smite so cruelly and fiercely that I would not be able to bear it were it not for my fear of Thee, which renders them as nothing in my eyes, and I suffer them willingly.' While he was still speaking these words his life closed, and he left might to his people and power to his young men.

CHRONICLES OF JERAHMEEL CHAPTER 89

I Seven brothers with their mother were then seized and sent to the king, for the king had not yet departed from Jerusalem, and because the swine's flesh was abhorred by the Jews and stank and was despised by them, therefore the cruelties against them were increased, and he tore their flesh as that of an ox.

2 When the first son was brought before the king, he said, 'Why waste words to teach us, for we have already been taught by our forefathers? We are prepared to suffer death for the Lord and His law.' The king was furious at this, and, ordering a pan of brass to be brought, placed it on the fire. Then, ordering his tongue to be cut out, his hands and legs and the skin of his head to be cut off, he placed them all in the frying-pan in the sight of his brothers: the rest of his body they cast in a large brass pot placed upon the hot coals. When he was near death the king commanded the fire to be removed from under the pot so that he should not die too quickly, so as to terrify his brothers and his mother. But they, on the contrary, encouraged each other and fortified each other when they saw that their brother gave up his life for the Lord and His Torah, and said to each other, 'See what Moses, the servant of the Lord, said in his song, "He shall be comforted in His servants." Even now the Lord is comforted in us for all the evil which He has purposed to do to His people, and He will have compassion upon them.'

3 As soon as the first died, the second brother was brought. They said to him, 'Listen to the command of the king. Why die in great torture as thy brother?' And he replied, 'Make haste with the sword and with the fire, and do not do one whit less to me than ye did to my brother, for I do not fall short of my brother in piety and the fear of God.' Every limb was then commanded to be cut off and placed in the fryingpan on the fire. He then said, 'Hear me, thou cruel king: art thou able to bind up these our souls which thou robbest us of? Behold, they shall walk to God, who has given them to us to the light that is with the Lord. We shall yet live a life that has no limit or end when He awakeneth the dead of His people and the slain of His servants.'

4 Thus died the second brother. When the third was brought, he looked at the king, and, stretching out his right hand towards the king, said, 'What business of thine is it to destroy us, O thou enemy and foe? All this comes from Heaven, and we receive it with love, but thy tortures are despicable in our eyes, as nothing before us, since we expect honour and favour from Heaven. He will grant us the reward of our actions.' The king and all his princes were astonished at the bravery of the youth.

5 After his death the fourth brother was brought. 'What,' said he, 'have I to do with thee, O thou wicked man? We die for the Lord, and He will again bring us back to life, but thou shalt never rise again.'

6 When the fifth was brought, he said, 'Do not imagine that God has forsaken us, for on account of His great love has He brought us to this honour. Thou reviler and blasphemer, the Lord hates thee and stirs thee up to do unto us whatever thou wilt, but a great vengeance will be taken upon thee and thy seed, and His anger will be kindled against thee and all thy household.'

7 After his death the sixth brother was brought before the king, and he said, 'We know our wickedness, for we have sinned against the Lord, and now our souls are given over to death as an atonement for our people; but now because thy heart prompts thee to do this thing to the servants of our God and to fight against God; behold, He shall fight against thee and uproot thee from the face of the earth.'

8 The seventh and last brother was but a young lad, yet the mother, who had seen her seven sons slain on one day, neither feared nor trembled, but, standing upright by the corpses of her sons, she lifted up her voice and cried, saying, 'O my son! O my son! I do not know how you were formed in my womb, nor did I give you the breath and soul which you had, nor bring you out of my womb, nor raise you, nor make you grow, or your flesh which is now offered as a sacrifice; God formed it. He wove the sinews and covered it with skin, and caused hair to grow upon it. He then breathed in your nostrils the breath of life. And since you give up all this for His sake, He will restore them to you, and will renew your body. He will give you the reward of your actions, and happy are ye, my sons, for all this.'

9 At this the king was very much taken aback, in that the woman had subdued him. 'Bring me the seventh one,' said he, 'and perhaps, as he is but a young lad, I may be able to entice him with soft words to do our will, but do not let this woman boast of me, saying, 'I have conquered King Antiochus in exhorting my sons to die for our God.'

10 According to the king's command, the seventh lad was brought, and the king implored him, and took an oath to enrich him with silver and gold, with cattle and many servants, to make him viceregent, and to let him rule over the whole kingdom. But when the lad despised the words of the king, the king summoned the mother to him, and said, 'O good woman, have pity upon this child, and be merciful to the fruit of thy womb; induce him to perform my will and to escape.' And the woman answered, 'Give him to me, and I shall entice him with kind words.' This being done, she led him aside, and having kissed him, and rejoiced at the king's shame and confusion, said, 'O my son, thou whom I carried in my womb for nine months, vand whom I suckled for three years, after which I sustained thee with food until this very day, give up all this proffered honour, and fear the God of whom I taught thee

11 Now, O my son, look toward the heaven, and behold the land, the sea, the waters, and the fire, which by the word of the Lord were created. But man is merely flesh and blood and as nothing before Him. Do not fear this cruel man, but give up thy life for the sake of the Lord. Go the same way as thy brothers. Would that I could now see where thy brothers are, and the greatness of their glory before the Lord. My son, cleave to thy brothers, and thy lot shall be cast in their glory. I shall go there with you, and rejoice with you as on the days of your marriage. I shall be with you in your righteousness.'

12 While she was yet speaking the lad answered, and said, 'Why do you delay me, and will not leave me to go and join my holy brothers? I will not listen to the king, but to the law of our God, which He has given through the hand of Moses to the people of Israel, which this cruel enemy of God has put to shame and reviled. Woe unto thee, woe unto thee! Whither wilt thou go? whither wilt thou flee? whither wilt thou run? and where wilt thou hide thyself from our God, O enemy, foe, and wicked man, for He still keeps us alive, and has glorified and exalted us over all nations? But thou who art insolent enough to stretch forth thy hand against His servants, it were better thou hadst not been born. Thou wicked fool Antiochus, who wast begotten of tainted folly, hast committed evil against thyself, but Thou hast done good unto us, and if we endure and bear these tortures in this world. we shall be taken to the life and light of the world where there is no darkness, but eternal life without death.

13 But thou wilt be the abomination of all creatures, and wilt be abhorred of our God when He takes vengeance upon thee. Thou shalt die an unnatural death, plagued with dreadful plagues. Thou shalt descend to the bottom of hell. Thou shalt be drawn into darkness, where there is no life or light, but darkness and shades; where there is no repose or: rest, but trouble, sorrow, brimstone, and fire. This will be thy portion of the Lord and thy lot from our God, O man of blood and wicked man. But God will have mercy upon His people. Until now His wrath has rested upon us, but He will henceforth be angry no longer with His people, but will repent of what He has done to us at the beginning, although He did so in truth and in righteousness, for we acted wickedly. He will return and have mercy upon us, and will grant us eternal life.' King Antiochus now became exceedingly angry because he would not perform his will, and therefore increased the tortures, and acted much more cruelly to him than he had done to the others. Thus died the seventh.

14 The mother then stood by the corpses of her sons, and, spreading out her hands, she said, 'O exalted and aweinspiring God, O God of the universe, now will I come; now will I die with my sons in the place which Thou hast prepared for them.' While she was yet speaking she finished her days upon earth, falling upon the dead bodies of her sons, her spirit went forth, and she died with them.

CHRONICLES OF JERAHMEEL CHAPTER 90

I The king then went on his way to Macedon, and commanded Phillip and the captains whom he had left in the land of Judah, saying, 'Blot out the very memory of Judah from the face of the earth, and let him who but mentions the name "Jew" be slain; but let all those live who are willing to be assimilated with our people, and be called "Javan."

2 Accordingly Phillip and the captains with him destroyed all whom he discovered observing the Torah, with the exception of those who fled with Mattathiah, the son of Jochanan to Mod'aith. For Mattathiah would not bear the reproach of the uncircumcised, but was zealous for his God, and, weeping, he said, Woe unto me, O my mother, that thou didst give me birth to behold the breach of my people.'

3 Then he sent his son Judah secretly to say to the Jews, Whoever of you are on the side of the Lord, come to me.' There gathered unto him a large assembly of Hassidim, and Mattathiah addressed them in the following words, 'Why multiply words? The only thing that remains for us to do is to pray and to fight. Let us strengthen ourselves and die in battle, but not as sheep led to slaughter.' When they heard these words they all of them took courage (braced themselves up), and said each one to his neighbour, 'To thy tent, O Judah. Rule again over thine own land. It is enough, King Antiochus. Now sharpen thy sword, O people of Judah, and beware of thy life, O nation of Macedon.' From that day the Macedonian yoke was broken asunder from the shoulders of Judah.

4 When Phillip and the chiefs of the king heard these words they went against them with a large army. When they were going against them, they found on the way men, women, and children of Judah in a cave all observing the Sabbath. Coming to the entrance of the cave, they said to them, 'Come out and profane the Sabbath, and perform the command of the king and live, and do not allow yourselves to die.' But they said, 'We shall not come out nor shall we profane the Sabbath day. Let the heavens and the earth be witness that we die in our integrity.' Phillip then commanded fire to be brought and placed at the mouth of the cave. Then, placing some wood upon it, he filled the cave with smoke, so that they were all suffocated.

5 The chiefs of the king then marched upon Mattathiah, to the mount of Mod'aith, and found him, his sons, his brothers, and a few of his people of the assembly of the Hassidim fully armed for war, for they had brought their wives and children to that mountain. The chiefs of the king approached Mattathiah with words of peace, saying, 'O honoured among thy people, perform the command of the king and live and do not die.'

6 But Mattathiah answered very proudly, saying, 'I obey the command of my King; do you obey the command of yours.' At this the chiefs were confused, and, being silent, did not say another word; for they wondered at Mattathiah, and were thinking how they could capture and slay him as they had slain the other pious men.

7 But suddenly one of the renegade Jews among the chiefs of the king said, 'I am astonished at the chiefs of the king and his army. How long will ye hold your peace and not perform the command of the king by rising up against Mattathiah, who was insolent enough to refuse to obey the king's command?' And after he had spoken thus he unsheathed his sword, and, cutting off the head of a swine, he took it in his hand and carried it to the altar which they had built to sacrifice to the king's vanities. Then, placing the head of the swine upon the altar, he offered it with frankincense to the idols of Antiochus.

8 When Mattathiah beheld this he was exceedingly wroth, and his fury burnt within him. Then, drawing his sword, he leaped upon the sacrificing Jew, and, severing his head from his body, he held it up on high before the chief of the king who approached Mattathiah, while the body fell down from the altar upon which he stood. He also killed the king's chief, and put the rest of them to flight, levelling to the ground a number of the crowd. Then, sounding the Shofar, he gave the signal for war.

9 He was the first one to raise his hand against the Macedonian kingdom. He also commanded us to fight on the Sabbath, and he will stand by us to defend us in this matter. It is written in the book of Joseph ben Gorion the priest.

10 Mattathiah with his sons and brothers then marched forth, and with them a large band of the Hassidim. They pursued those who had hidden themselves, and smote and discomfited them, until there did not remain one in the whole land of Judah. They then circumcised their sons. Thus, great salvation was brought about by the Lord through Mattathiah.

CHRONICLES OF JERAHMEEL CHAPTER 91

1 Now, the days of Mattathiah were drawing to a close, so, calling his five sons to his bedside, he encouraged them and exhorted them, saying, 'I know that now fierce battles will be waged in the land of Judah, since we have been stirred up to fight for our people. Now, my sons, be zealous for your God, for His sanctuary, and for His people. Fight, and do not be afraid of death; if you dievin battle, you will be received among your brethren, and their portion shall be shared with you, for to all our ancestors who have been zealous for God, God has given honour and favour. Did not our ancestor Pinehas receive the everlasting covenant, and did not our other ancestors who were zealous for the Lord receive their reward from the Lord?'

2 Then, addressing Simeon his son, he said, 'I know the wisdom that God has put in thy heart; withhold not, then, thy counsel from this people, and be to thy brethren as a father, and they shall hearken to thee and to all thy counsels, since our God has given thee might and wisdom.'

3 Next Mattathiah called his son Judah, who came and stood before him; and he said, 'O my son Judah, who art called Maccabee on account of thy power, I know, my son, that thou art a man of war, and that God has given thee strength and might, and a heart like a lion's that flees from nothing. Now, my son, honour the Lord with all the strength the Lord hath granted thee; fight His battles without stopping; do not be reluctant to travel the four corners of the land—east, west, south and north—to capture the country from the power of the uncircumcised; be to them the captain of their host and the anointed of battle.' Then, bringing out a horn of oil, he poured it upon his head, and thus anointed him for battle, while all the people raised a shout, and, blowing upon their trumpets, exclaimed, 'Long live the anointed!'

4 When he had finished his exhortation to his sons, he died and was gathered to his people, and Judah his son, surnamed Maccabee, arose in his place. He had the assistance of his brothers his father's household and all the assembly of the Hassidim. And Judah was glad to fight the battles of Israel. Having clothed himself in a coat of mail as a warrior, and equipped himself with the implements of war, he looked like one of the sons of Anak. He protected the camp of Israel with his sword, and, pursuing the enemy, he crushed out their life. He burnt the sinners with the fire of his mouth, confounded the wicked with terror, and confused all the evil-doers through fear of him, for he appeared to them just as a roaring lion seeking prey appears to cattle. Jacob rejoiced at his deeds and was glad at his actions, for he confounded great kings, so that his name rang from one end of the world to the other, and people continually spoke of the wars he waged. Blessed be his name among the people of Israel; peace and repose be upon his righteous couch, and blessing on his holy bed, for he has not withheld his soul from death to defend Israel, God's people, and has slain all the wicked of the people of Judah who led the Israelites astray.

CHRONICLES OF JERAHMEEL CHAPTER 92

1 When Apolonius, the captain of the Macedonian host, heard these things, he said, 'Who is it that dared to rebel against our lord the king?' And he gathered unto him a large and strong multitude of Macedonian warriors, and marched forwards to fight against Israel. Judah went out to meet him, and a very fierce battle ensued between the Macedonians and the assembly of the Hassidim. During the battle Judah saw Apolonius standing in the midst of the Macedonian company, and ran towards him in the fury of his anger into the valley, and, smiting right and left and in front of him, he cut down the mighty men of Greece just as the reaper cuts down the sheaves and the corn of his harvest. Then, approaching Apolonius, he smote him with the edge of the sword and felled him to the ground. Then, putting the Greeks and Macedonians to flight, they fled in haste, and Judah and the assembly of the Hassidim pursued them and smote them with a very great slaughter, and, having taken their spoil, Judah seized Apolonius's sword and fought with it all his life.

2 When Seron, the captain of the host of Syria, heard this he said, 'I will go and fight against Judah, and thus make a

name for myself.' Then, summoning all his people, he went to Beth-Horon. Judah, becoming aware of this, said to his men, "There is no time for delay; let us go out to them, although our brethren the Hassidim have gone away from us; for if we wait until they return, our enemies will say we are afraid of them.' Therefore Judah marched all the night long; at daybreak, when the people suddenly beheld in the distance a strong and mighty army, they said to Judah, 'How can we who are so few go to war against this great multitude?' But Judah replied, 'Cry unto heaven, and ye shall be saved, for the battle is in the hands of the Lord to deliver the many into the hands of the few; it is in His power to save either with a multitude or with a few.'

3 Judah then went sideways near the enemy's camp, and suddenly leaping upon them, he struck terror into them, and thereby Seron with all his men were put in confusion. Judah pursued him, and, overtaking him, smote him. On that day as many as 800 corpses of the Syrians were found piled up in heaps on the field. Those that remained fled into the land of the Philistines, and the fear of Judah fell upon all the nations.

4 Now, as soon as Antiochus heard these things, he was very much vexed, and gathering together all his people and all the nations under his rule, mustered a strong and mighty army, and divided it into two portions. With one half he went to (Persia), for the Persians had revolted from the Macedonian rule when they saw that the people of Judah had rebelled. The other half he handed over to Lysias, of his own kin, and of royal Macedonian descent, saying to him, 'Thou knowest all that Judah, the son of Mattathiah, has done to my two chiefs, Apolonius and Seron, and to all their host. Therefore, go now and smite all the inhabitants of Judah, and my son Eopator will go with thee. I myself will go to Persia and uproot the nation that rebelled against me.'

5 Accordingly, Antiochus the king went to Persia, and left Lysias in command to wage war against Judah and look after his son. Lysias chose for himself Tolmios, who is Ptolemy, Nicanor, and Gorgias, men of valour, sending with them 40,000 young warriors on foot and 7,000 horsemen, and the entire armies of both Syria and Philistia joined them in marching against Judah to destroy it. When Judah and all the elders of Israel heard this they proclaimed a fast, and clothed themselves in sackcloth, and placing dust upon their heads, cried unto the Lord.

6 After the fast Judah numbered his people, and appointed over them captains of thousands, captains of hundreds, captains of fifties, and captains of tens. Then marching into the field, he issued an order in the camp, saying, "Whoever has planted a vineyard or built a house, and whoever is betrothed or faint-hearted, let him return home;' and many of them returned. There thus remained 7,000 valiant men, chosen warriors, of whom one would not have run away before a hundred enemies.

7 Judah then marched on to meet Nicanor, who had brought many merchants with him, for he intended to sell to them the young men and the young women whom he would capture and carry into captivity from Judah. He went into the valley to meet Judah. Judah, coming out of the assembly of the Hassidim who were with him, called upon the Lord, saying, 'O exalted God, who hast ruled from the creation until this time, who causeth battles to cease, and in whose hands is power and might to exalt or to humble, subdue and humble this nation before the lowly of Thy people, for Thou wilt subdue nations under us and peoples under our feet.' After his prayer, the priests blew their holy trumpets, and all the people raised a shout. Then did Judah leap into battle, and smote the camp of Nicanor with heavy slaughter, so that they fled before him. Pursuing them with his army, he continued to slay them in their flight. The number of the slain was 9,000. They then returned and took their spoil, and the gold which the merchants had brought with them to purchase the Israelitish youths. This they distributed among the poor, and then rested in that place, for the battle was fought on the sixth day.

CHRONICLES OF JERAHMEEL CHAPTER 93

1 Departing thence, Judah went to Bakires and Timothios, and a severe battle ensued between them, in which he himself killed on that day twenty Macedonian warriors. Bakires and Timothios took to flight, and Judah pursued them, but did not overtake them, for they went to Ashtaroth Karnaim. But he captured Phillipio, the man who had done so much evil in Judah. When Judah approached him he turned from the way he was going into a house in the vicinity. Judah then ordered his men to overthrow the house upon him, and to burn him to death in that place. He thus avenged the death of Eleazar and the blood of those pious men which Phillipio had shed. They then returned to strip the slain and they sent the spoil to Jerusalem.

2 Nicanor fled thence and escaped, for he had stripped himself of his purple coat, and dressed himself in a poor man's coat, so that he could not be recognised. In this way he came to Macedon and related to Lysias all that had happened.

3 At that time King Antiochus returned from Persia, ashamed in that the Persians had made him flee the country of Ecbatana, and when he was informed of all Judah had done to his chiefs, and how he had smitten them, he was filled with wrath and fury. He reviled and blasphemed, and said, 'I will go to Jerusalem, and make it a burial-ground, and will fill it with the carcasses of the slain.' He then summoned together all his people, his charioteers and horsemen, a large and michty multitude.

⁴ But the Lord had a jealous care for His people, for His city, and His temple, and remembering all the evil Antiochus did to His people, He required the blood of those pious men from Antiochus, and therefore plagued him with boils and with an internal disease. Yet he was not humbled through this, but said, 'Press on, ye charioteers; press on, ye horsemen; press on, ye soldiers. I will go to Jerusalem, and will carry out my intention, for who can stand before me? Is not the sea and the dry land mine, to change their being according to my will? Can I not transform the earth into sea and the sea into earth?' When he had finished speaking thus he mounted his chariot, and went with his huge army in the direction of Jerusalem. With him were many elephants, and his camp was enormous.

5 Now, while on the journey, his chariot happened to pass in front of one of the elephants, and it trumpeted. At this the horses took fright, and slipping down, overturned the chariot, and threw Antiochus out of it. As a result of the fall, his bones were broken, for he was a stout and very heavy man. The Lord, however, heaped up plagues upon him, and his flesh stank. The stench of his body was like that of a dead man cast upon the field in the height of the summer. As soon as his servants lifted him upon their shoulders, they had to cast him back again to the ground and run away, for they could not possibly approach him or carry him on account of the dreadful stench of the flesh of that reviler, and blasphemer, and enemy of God.

6 Now, when his army became weary, and he also became sick unto death of the stench arising from his body, he knew then that the hand of the Lord had touched him, and being humbled and made lowly, he exclaimed, 'The Lord is righteous, who humbleth the proud and humiliates the wicked like me, for I have done all this wickedness to His people and to His pious men. It is for this that all these evils have overtaken me.' He then made a vow, saying, 'If the Lord will heal me from this disease, I will go to Jerusalem and fill it with silver and gold; I will spread carpets of purple in all the streets, and will give all my treasury to the temple of the great God. I will circumcise my foreskin, and will go about the whole land exclaiming in a loud voice, 'There is no God in the whole world like the God of Israel.'

7 But the Lord did not hearken to his prayer, nor did He give ear to him, for all the way Antiochus the Cruel was travelling his flesh fell off from his bones, until finally his very bowels fell out upon the ground. Thus his life came to an end. He died in shame and disgrace and in a strange land. Eopator, his son, succeeded him.

CHRONICLES OF JERAHMEEL CHAPTER 94

1 Judah, the son of Mattathias, and with him the assembly of the Hassidim, now went up to Jerusalem, and overthrowing the altars which the uncircumcised had built, they cleansed the temple of the abominations of the nations, and building a new altar, they placed upon it the flesh of the sacrifice, and arranged the wood, but the holy fire they could not find. Then calling in prayer upon the Lord, fire came forth from a stone upon the altar, and they placed the wood upon it. This fire remained with them until the time of the third captivity. On the 25th of Kislev they dedicated the altar, and placing the showbread in its place and kindling the lights, they praised the name of the Lord by reading the 'Hallel Psalms' for eight days.

2 After this dedication, Judah marched to the land of Edom, and Gorgias came to meet him with a huge multitude of men, but Judah smote Gorgias and his camp, and put them all to flight. Pursuing them, Judah's men left upon the field 20,000 of the enemy slain. Gorgias then fled to Arabia to Timotheos. And Timotheos, marching out with 120,000 men of the Macedonian and Arabian armies, went into the land of Gad and Gilead, and slew many of the Jews, so that they sent a letter to Judah, saying, 'Come up and save us, for the sword of Timotheos is consuming us.' Again another letter arrived, saying, 'The sword of Tyre and Sidon is destroying us, and the men of Macedonia who dwell there.'

3 As soon as Judah heard these words, he cried to the Lord in fasting and prayer, and selecting all the valiant men and the Hassidim, he made haste to pass the Jordan. Simeon also took with him 3,000 men of Judah, and hastening to Galilee, engaged in a fierce battle, in which he slew 8,000 men, and thus delivered his brethren in Galilee. Then, taking the spoil of the slain, he returned to Jerusalem.

4 Judah the Anointed one of battle, having passed the Jordan, arrived at Gilead, where they found Timotheos attacking the city on Mount Gilead, and, having girded himself for the fray, a fierce battle ensued. The two armies stood opposite each other, that of Timotheos being mighty and strong, while Judah's army was few in number. And in the midst of the fight Judah cried unto the Lord, when he suddenly beheld five young horsemen, clothed in gold. Two of them stood in front of Judah, and then, placing themselves one on each side of him, protected him with their shields, while the other three fought against the camp of Timotheos. As soon as Judah saw them, he at once knew that they were sent from heaven to assist the pious, and, encouraging his men, he pressed hard upon Timotheos's army and smote 20,500 of his men. Timotheos himself and his army fled thence towards the Jordan, but Judah was after him, making havoc among them all the time until they came to Aza.

5 Here Timotheos recruited his men and prepared again for battle, for the whole army of Philistia had now joined his ranks. When Judah arrived at that place he leaped upon them as a lion upon a flock of sheep. Timotheos took to flight, and his whole army was scattered in confusion. The Hasmoneans pursued them and cut them to pieces until there were none left. Timotheos fled to Aza, and there took refuge within the closed gates of the city, from the high walls of which he still gave battle. For five days Judah and his men besieged it.

6 On the fifth day the men of Timotheos, ascending the high tower, cursed and defied the Anointed one of battle, and taunted them all with words of insolence. At length twenty Hasmoneans, becoming heated through passion on account of the reproaches, took their shields in their left hands and their swords in their right hands, and, running towards the wall, scaled it one after another by means of a ladder. Then, smiting those upon the wall, they made room for their fellows, all of whom likewise scaled the wall. The twenty men then went into the market-place of the city, shouting and killing many of the enemy. Then, going towards the gate, they attacked it within, while the whole army of the Hasmoneans approached it from without, and set fire to it, whereupon the gate fell to the ground. In this manner was the city of Aza captured. Then, seizing the men who defied the Anointed one of battle, they burnt them to death, and put the inhabitants to the edge of the sword. For two whole days they did not cease from their deadly work of slaughter.

7 Timotheos, fleeing, hid himself in one of the pits and could not be found. But they discovered his brothers, Birean and Apollopanis, and brought them to Judah, who ordered their heads to be cut off. The spoil of the city they carried to Jerusalem with songs, praises and thanksgivings, and sang the Psalms of David, King of Israel, to the Lord, whose mercy endureth for ever.

CHRONICLES OF JERAHMEEL CHAPTER 95

I Now, when it came to the ear of Antiochus Eopator, son of Antiochus called Epiphanes, who had wrought such evil in Jerusalem, who slew the pious men, and who ultimately died from the severe plagues inflicted upon him, as we have stated above,

2 this Antiochus Eopator sent Lysias, his cousin, with an army of 80,000 horsemen and eighty elephants, a mighty army. They came to Judah and Jerusalem and gave battle at Bethter; building a ditch round about the city, he began to attack the city with a battering-ram and with stones, while Judah and the whole army of the Hasmoneans dwelt in the forests and on the mountains away from the Greek army. Judah said to his men, 'Come, let us approach the Lord our God in fasting and in supplication, and then let us march against the Greek army of Javan, who are attacking Bethter.'

3 After the fast he blew the Shofar, and then gave the signal for battle, and he and all his men went to assist their brethren in Bethter. When they came to Jerusalem they entered the temple, offered peace-offerings, sacrificed burnt-offerings, and cried to the Lord. Then, departing from Jerusalem to go to Bethter to the Macedonian camp, Judah said to his men, 'Be strong and of good cheer; for the people of the Lord and for our brethren, let us rather perish together in the fight than see any evil fall upon our people.'

4 When he had finished speaking, he lifted up his eyes and beheld between heaven and earth a man, well dressed, riding upon a horse like a flame of fire, and in his hand a spear. His back was turned towards the Hasmoneans and his face to the camp of the Greeks, with his hand stretched out ready to smite it. Judah then exclaimed, 'Blessed be He who has sent His messenger to save His people and smite the camp of His enemies.' Hastening thence, they went to Bethter, and, springing upon the Macedonian camp, they put them into confusion, and slaughtered 11,000 foot and 1,600 horsemen. Lysias and his men fled for their lives in shame and disorder, and Lysias then knowing that God was fighting against the enemies of Israel, made a covenant with Judah.

5 The following is the letter which Lysias sent to the people of Judah: 'Lysias, chief of the king's army and vicegerent of Antiochus, to Judah the Anointed of battle and to all his people be there greeting! Be it known to you that I have received letters you sent through your messengers, Johanan and Absalom, and that I have carried out whatever they told me. I read the letter with good feeling and have fulfilled everything contained therein. I have told the king the message on your behalf, and have given answer to Johanan and Absalom. I have further charged the messengers I sent to you with words of peace.'

6 This is the contents of the letter which the king sent to Lysias, his cousin: 'King Antiochus to Lysias my brother

greeting! Be it known to thee that we have received the letter thou didst send us concerning the Jews, and that we have read it with every good feeling. My father has gone the way of all flesh, he has ceased to be with men and has been taken with angels; but I seek for the welfare of all my kingdom, to stop wars, and to establish peace. I have heard that the Jews refused to listen to my father to violate their law, and that they have therefore conquered by the sword and slain the chief men and the most honoured of my father's kingdom. Now give them thy right hand, and make a covenant with them that they may know it to be my will and my hearty desire that they live in peace and observe their law according to their own wish.'

7 And this is the contents of the letter which the king sent to Judah: 'King Antiochus Eopator to Judah the Anointed one of battle and to the rest of the people greeting! Be it known to you that I have issued a decree throughout all my cities and to all the peoples subjected to my rule, that they should not oppress the Jews, but leave them to keep and to observe your law. Pardon whatever actions my father erringly did, and if we have also erred we send you Menelaos to speak to you words of peace.'

CHRONICLES OF JERAHMEEL CHAPTER 96

1 In those days the Lord began to render the fourth kingdom more powerful than the third, that is the kingdom of Rome, which was stirred up against the kingdom of Greece. The name of the Roman was exalted over all the empires of the world. That was the fourth animal which Daniel, that greatly-beloved man, saw in a vision. Just as that animal devoured, crushed and trampled upon everything, so did this nation of Romans devour and crush all the other nations. It was they who fought with Antiochus, King of Greece, his 120 elephants and a strong and powerful army of infantry and cavalry, whom they conquered in the battle, and compelled to pay the Romans tribute.

² They also humbled the pride of Annibal, King of Africa, who reigned over the city whose name was Carthagene. Annibal entered the field with an army as mighty and as numerous as the sand upon the seashore. With him were all the armies of Ethiopia, Phut and Lud, and other mighty nations. Having crossed the narrow sea between Africa and Sefarad, he humbled the pride of the nation of the Goths. Journeying thence, he arrived in the land of Germania by the sea Oceanus. Thence he came to Italy and engaged in battle with the Romans, who went out to meet him. It was a long and fierce contest, in which the Romans were utterly routed.

3 The Romans, however, continued to fight, and in ten years no less than eighteen battles were fought with Annibal, but they could make no stand before him. At length, they again mustered all their warriors, at the head of whom were two valiant men, Æmilius and Varros. Having arranged their men in line of battle by the river Eopiros, the battle was fought at Canusi, a large city. Here a fierce and desperate battle was fought, in which 90,000 Romans met their death.

4 Among them was Æmilius, one of the Roman commanders. Varros, however, managed to escape to Venosia, a city situated between the mountains and the plain. Of Annibal's men, 40,000 were killed in that battle. Having pursued the Romans up to the gates of the city, he besieged the city for eight days, and building turrets in front of the city, fought against it.

5 Then the Roman counsellors said to each other, 'Let us open the gate and come and make a covenant with Annibal, that we may live and not be put to death.' This they determined to do, when a young man, whose name was Scipios, arose, and said to the 320 counsellors of the city, 'Far be it from us to subject ourselves to Annibal.' 'But what can we do,' answered they, 'since we have not been able to make a stand before Annibal for the last eighteen years?' 'Then,' said Scipio, 'come, let us take counsel. Give me about five legions of men, and I will go to the land of Africa and attack and destroy his land. As soon as Annibal hears this, he will hasten away from Rome to deliver his own land from my hands, and thus will ve obtain rest.'

6 Having consented to his proposal, he took with him 30,000 Romans, and marching to Africa, the country of Annibal, he engaged in battle, in which Astrubal, Annibal's brother, was slain. Scipio cut off his head and brought it to Rome, and, mounting the wall, he cried out to Annibal, 'Why art thou so eager for our land, and dost not go to deliver thy own land from my hands, which I am destroying?' He then sent Annibal his brother's head. When he recognised it he braced himself up, and hardening his heart, swore not to leave the city until he had taken it, and he besieged it for several days more.

⁷ Scipio then returned to Africa and entirely destroyed it. Thence he went to Carthagene and besieged it. And the men of Carthagene sent Annibal a letter to Rome, saying, 'Why dost thou desire a strange land, when thine own land is taken from thee? If thou wilt not hasten here and deliver us from the hand of Scipio, we shall open the gate and give the city of Carthagene with thy palace into his hands.' 8 When he read this letter he wept, and immediately raised the siege, and going to Epirus, where lay his ships, he slew there Romans without number, men, women and children who were taken prisoners. He then went to Africa with all his army.

9 But Scipio went out to meet him, and a fierce war ensued between them, in which Annibal was conquered and about 50,000 of his men slain. He was likewise conquered in three pitched battles with Scipio. After that Annibal fled to Egypt, but Scipio followed him, and Ptolemy the king delivered him into Scipio's hands. He was brought to Africa in great honour, and there he drank poison and died and was buried. Scipio then captured the whole land of Africa, and the place that abounds in gold and silver. Thus Rome was exalted above all the other nations.

CHRONICLES OF JERAHMEEL CHAPTER 97

1 The following is the contents of the letter which the Romans sent to Judah, the son of Mattathiah: 'Qinsius Minios, Scipio and Menelaos, princes of Rome, to Judah the Anointed one of battle, and to the elders of Judah greeting to you! for we have heard of your power and of your battles, and are glad, also of what Antiochus and Lysias have given you, and of what they wrote concerning the Jews. Now we also write to ask you whether you will become our associates and friends, but not the friends of the Greeks, who have afflicted you. We are now going to war against Antiochia, therefore hasten to let us know who are your enemies and who your friends.'

2 The following is the text of the covenant made between the Romans and the Jews: 'Whether on the sea or on land, whenever war is declared against the Romans, the Jews are to assist them with all their power. They are not to supply Rome's enemies with either implements of war, with wheat or any other food, according to the decree of the Consul and the 320 counsellors. And if, on the other hand, war be declared against the Jews, the Romans in their turn are to assist the Jews with all their power, and are not to provide the enemies of the Jews with either implements of war, or wheat or food of any kind. They should themselves not take any food from them unless in trouble. Further, neither party is to add or to diminish what had been decreed by the Consul and the 320 counsellors.' After that the land had rest for about eight months. At that time Judah began to judge his people, and to weed out the wicked from his people.

3 At that time the Jews lived in all the cities on the sea-coast, extending from Aza until Acco; but the Macedonian nation and the people of Joppa and Jabneh brought about great evil, for they induced the Jews living among them to board their ships, together with their wives and children, to go and have sports on the sea. The Jews, trusting them, consented to go with them, but when they arrived in mid-ocean they were thrown into the water and drowned, to the number of 200 souls.

4 When Judah was informed of it he wept and proclaimed a fast. Then, hastening to Joppa, he besieged it, and God delivered it into his hands After separating the Jews, he smote the city with the edge of the sword, man, woman, child and suckling, and burnt the city to the ground. The same he did to Jabneh, besides burning the ships of both cities. The burning and conflagration could be seen as far as Jerusalem, a distance of 240 stadia. He thus avenged the blood of the women and children that were drowned in the sea. Journeying thence, he went to the Arabian desert, and having smitten many Arabs, imposed a tribute upon them.

⁵ He then returned to the land of ... and during the journey had to pass a certain city by name Kaspon. It was very strongly fortified, for nations of all kinds dwelt therein. Relying upon their strongholds, they cursed Judah, and uttered countless slanders about Judah's people. At this Judah exclaimed, 'O Almighty God, at the sound of the trumpet Thou didst deliver the city of Jericho by the hands of Thy servant Joshua; now deliver this city into our hands, that I may avenge the reproach they have cast upon the people of God.'

6 Then, taking his shield in his left hand and unsheathing his sword, he marched bravely onwards, followed by the Hasmoneans, at a very quick pace until they reached the gate of the city. After besmearing it with pitch, and placing bushes and thorns of the desert upon it, they set fire to it and it fell to the ground. God delivered the city into his hands, and he effected a slaughter such as has never yet been known, for the pool of blood which flowed from the city as a pool of water was two stadia in length and two in breadth.

7 Journeying from that place, he travelled a distance of 750 stadia. And Timotheos came out to meet him with 120,000 foot and 1,000 horse. After offering up his supplication to God, Judah marched out against Timotheos with about 10,000 chosen men. A very fierce battle ensued, in which Judah slaughtered 30,000 of Timotheos's army. Timotheos forthwith tried to escape, but Dostios (Dositheus), the captain of Judah's army, and Sosipater, a gallant warrior of Israel, pursued him and brought him back to Judah, who ordered his head to be cut off. But Timotheos wept bitterly, and implored him, saying, 'O my lord Judah, do not kill me,

THE GRAND BIBLE

for there are many Jews dwelling in my land, and I swear that I will do good to them all the days of my life.' And he took an oath. Judah had pity upon him and did not kill him, but allowed him to go his way, and Timotheos did no more evil to the Jews all the days of his life, for he kept the oath he had taken.

8 Journeying thence, Judah marched in the direction of the wilderness, and, meeting the army of the king that had come into Arabia, he smote them, and, pursuing them further, slew 25,000 of their men. He next journeyed to Ephron, a large city, and besieged it, and the Lord delivered it into his hands. He slew 20,000 in the contest.

9 Marching onwards a journey of 600 stadia, he came to a city the name of which was Scitopolis; and the inhabitants of Scitopolis being sorely afraid of them, came out to meet them with entreaties and tears, saying, 'O lord, the Anointed one of battle, do thou, I pray thee, ask the Jews who dwell in our midst whether we have treated them kindly or not. Moreover, in the time of the cruel Antiochus many Jews made their escape to us and we maintained them.' To the truth of this the Jews among them testified. As soon as Judah heard this he blessed them, and desisted from attacking them, and he returned to Jerusalem, arriving there three days before the festival of Pentecost.

CHRONICLES OF JERAHMEEL CHAPTER 98

1 When the festival was at an end he marched out to Gorgios, the captain of the army of Edom, with 3,000 foot and 4,000 horse. A fierce battle took place between their two armies, in which some Hasmoneans were slain, and among them was Dostios, the captain of the host, who was sorely wounded on the shoulders; some of the Hasmonean warriors were nearly thrown back. When Judah realized what had happened, he then prayed to the Lord, and, encouraging his men. leaped forward into the camp of Gorgios and slaughtered many of his men. He then shouted out, 'At thee, Gorgios!' and stretched out his right hand to smite him, but Gorgios stepped back and thus escaped the blow, and throwing down his weapons, fled and made his escape, nor has he ever since been seen or recognised alive or dead. Some hold the opinion that he fled to the desert of Maresha, in the wilderness of Edom, and there died.

2 Judah now returned to Edom, and, after destroying all their cities, took all the inhabitants prisoners. At this time graven images of the nations were discovered under the clothes of those Hasmoneans that were slain in battle. Judah then knew that they had fallen through their iniquity, and said 'Blessed be the Lord' who discovers that which is hidden and who revealed these secrets.' He then exhorted the people to serve the Lord in holiness and purity, and returned to Jerusalem.

3 Now, when Antiochus Eopator heard of all the battles Judah had waged and of the cities he had captured, he broke the covenant he had made with Judah, and marched out against him with an army as numerous as the sand upon the seashore, together with Lysias, his cousin, who also marched out at the head of a huge army. Having arrived in the land of Judah, he laid siege to Bethter.

4 Seeing this, Judah and all the elders of Israel called upon the Lord in fasting, tears, and in supplication. They also sacrificed burnt-offerings and offered peace-offerings. On that night Judah mustered all his chosen men of the Hasmoneans. and, dividing them round the camp of the king, he slew 4,000 men and the largest elephant. In the morning the king arranged his men in line of battle opposite Judah, and a very fierce engagement took place.

5 Judah suddenly noticed an elephant coated with armour of gold, and as it was greater than all the other elephants, he thought the king must be riding it, and shouted out to his men, 'Who of you are with me?' And forthwith Eleazar, one of the young Hasmoneans, sprang forward and faced the elephant, felling to the ground all who came in his way, and, striking out right and left, the slain fell on either side of him; then, rushing in the thick of the fight, and placing himself between the elephant's legs, he pierced its belly with his sword, and it fell upon him, so that he died, having sacrificed his life for the Lord and for his people, and left a name after him, and courage to all who heard it. It was a day of mourning to his people. There fell in battle on that day 800 of the king's nobles, besides the other people that were slain among them.

6 The king then ceased fighting, and returned to his tent. Soon after his return, he was informed that Phillip had revolted against him, and that Demetrius, the son of Seleucus the king, was coming from Rome with a large army, in order to wrest the kingdom from his hands. Being sorely frightened, the king made peace, and made a covenant with Judah, embracing and kissing him, and ratified it by an oath, in which Lysias joined, saying, 'We shall never as long as we live go to war against Jerusalem.' The king then brought out much gold from his treasury, and gave it as a present to the house of God in Jerusalem.

7 He took Menelaus, a Judaean, prisoner, who brought Antiochus to Jerusalem, and caused him to do evil, and also Eopator. The king, being very wrath with him, ordered him to be carried to a lofty tower, fifty cubits in height, and near it there was dust and ashes in immense quantities. Then, commanding him to be bound hand and foot, they cast him into the ashes, and buried him beneath them, so that he died in torment, through his iniquity, for he had committed many abominations before the altar of the Lord with the sacred dust and ashes. Thus this wicked man died, suffocated with the very ashes with which he committed abominations. Just is the Lord, who requites man according to his deeds and the fruit of his actions

CHRONICLES OF JERAHMEEL CHAPTER 99

1 After this the king went his way to Macedon and Judah, judged his people, and did righteousness and justice. At that time Demetrius. the son of Seleucus the king, with a Roman army, engaged in battle with Antiochus Eopator, in which Antiochus and Lysias were slain, and he held the reins of government in Antiochia in Macedon.

2 Now, Alkimos the priest, a worthless man, who ate swine's flesh during the reign of Antiochus, came to Demetrius, and said, 'Long live King Demetrius! How long wilt thou remain inactive on behalf of thy servants in the land of Judah, who have fallen by the sword of Judah, the son of Mattathias, and his people the Jews, who are called Hassidim? He slavs us because we refuse to comply with many precepts of their law.'

3 Demetrius, stirred to anger by this, sent Nicanor, the captain of his army, with a strong army, and chariots, horsemen, elephants, and footmen without number. Arriving at Jerusalem, he sent word professing his friendship, and said, 'Come and let us see each other, and consult in a friendly manner.' Judah, fearing no treachery, went to meet him. When Nicanor met him, he embraced him, and asked after his welfare. Then, placing seats for both of them, they sat down and conversed. Judah, however, had commanded his young Hasmoneans to remain armed ready for battle, lest the enemy suddenly attack them. Accordingly, his men stood near him, ready at any moment for the fray, as Judah had ordered. Judah and Nicanor at length rose from their seats, and went into their respective tents, and they dwelt both in Jerusalem, there being no war between them. On the contrary, Nicanor was very fond of Judah, and said to him, 'Would it not be meet for a man like thee to take a wife and beget children?' Judah married, and begat children.

4 When Alkimos recognised the love Judah and Nicanor bore each other, he again went to the king, and informed him what had taken place. The king thereupon sent a letter to Nicanor, saying, 'If thou wilt not send me Judah, son of Mattathiah, bound in chains, know that thou wilt surely be slain.' Judah soon became aware of this, and, leaving the city by night, he sounded the trumpet-call and gave the battlesignal, and when all the valiant Hassidim and Hasmoneans had mustered in full force, he went to Samaria, and remained there

5 In the meantime Nicanor went to the temple of the Lord and said to the priests, 'Bring ye out the man who fled from me, that I may send him to the king bound in chains.' But the priests swore unto him, saying, 'He has not been here, nor have we seen him since the day before yesterday.' At this reply, Nicanor spoke blasphemously of the temple, and, spitting upon it, stretched out his right hand, and, baring his arm for slaughter, he said, 'I will overthrow this temple, and will not leave one single stone in its place, and I shall dig up and overturn all its foundations.' With this, he departed in anger, and the priests went about crying between the porch and the altar, and said, 'O God, whose dwelling-place has of old been in this temple, now continue to rest here, for here is Thy throne, and here is Thy footstool, and all Thy service. The heart of Nicanor was filled with blasphemy towards Thy house and towards Thy habitation. He acted treacherously against the temple of Thy glory, and has committed abomination, therefore let him die as an abomination.'

6 Nicanor searched all the houses of Jerusalem for Judah, and sent 500 troops to the house of Dagsios, the Elder of Hassidim, who was tested in Antiochus's reign and found perfect, for he had suffered many tortures, and was called 'Father of the Jews and Judge in Jerusalem.'

7 And as Nicanor was trying to show his bitter hatred of the Jews, he sent a messenger to fetch the old man, while his men surrounded the house to catch him; but the old man, unsheathing his sword and piercing his bowels, ran upon the wall, and threw himself upon Nicanor's troops, who made room for him, and he fell to the ground. But he soon rose up again, and went towards the troops. He stood on a large stone, and from the great loss of blood which was rapidly flowing from him, he became distracted, and took part of his entrails and threw it at the troops. Then, calling upon the Lord in prayer, he died, and was gathered to his people.

8 When Judah heard these things, he waxed furious, and sent a message to Nicanor, saying, 'Why dost thou delay? Come into the field, and I will show thee the man thou hast been seeking in the chamber. Behold, he is here waiting for thee in the valley and in the plain.' Nicanor then gathered all his forces, and went to meet the Jews on a Sabbath. The Jews

that were with him said, 'O my lord, we beseech thee, do not act presumptuously; grant Him honour who gave the Sabbath.' 'And who, indeed, gave the Sabbath?' asked Nicanor. 'The God whose dwelling is in heaven,' answered they, 'and whose dominion extends over the whole world.' Nicanor then spoke such words of blasphemy as are not fit to be written down

9 Judah heard of this, and said to his men, 'How long will we be indolent, and refuse to give battle to this reviler and blasphemer? for who is this dead dog and outcast that defies the strength and glory of Israel?'

10 He then marched in great anger and zeal to attack Nicanor, who came to meet him with a huge and powerful army. And Judah cried to the Lord, saying, 'O Lord my God, Thou didst send a messenger into the camp of Sennacherib. whose men stood up outside the city and blasphemed Thee, and Thou didst smite his multitude by slaying 175,000 men; the slain we counted, but the slayer we did not see. Now, how much more deserving of death is this man, who has stood up against Thy temple, and has blasphemed Thy might and Thy glory?

11 On that day a very fierce and bloody battle was fought. When Judah saw Nicanor with drawn sword, he cried out, 'At thee, Nicanor!' and then ran against him in the fury of his anger. And Nicanor turned his back to flee, but Judah laid hold of him, and, cutting him in two, cast him to the ground. There fell on that day 30,000 men of the Macedonian army. The remainder fled, but were pursued by Judah's men, who all the while were sounding the Shofar. All the cities of Judah turned out to meet the enemy, and smote them, cutting them to pieces, so that not one of them remained alive. Then, proceeding to strip the slain, they found abundance of gold, precious stones, and purple garments. They cut off the head of Nicanor and the arm that he had stretched out against God's temple, and hung them up before the gate, which has henceforth until this very day been called 'The gate of Nicanor.' The people then rejoiced exceedingly, and sang the Psalms of David, King of Israel, concluding, 'For He is good, and His mercy endureth for ever.'

12 Ever since that time the Jews celebrate this day as a feast and a holiday, on which wine is drunk-viz., the 13th day of Adar, one day before 'Purim.' And Judah judged all his people, and did justice and righteousness in the land.

CHRONICLES OF JERAHMEEL CHAPTER 100

1 At the end of the year, the days of Judah drew to a close, and the Lord ordained that Judah end his days, and be gathered to his people the Hassidim. At this time Bagidos suddenly came upon Judah with 30,000 men of the Macedonian army, while he was in Laish (Leshem ?). The 3,000 men that were with him fled as one man, and the only ones that remained were himself, his brothers, and 800 chosen men of Israel, who did not stir from their places. All these men were Judah's associates, tried veterans in all the wars that Judah had waged with the nations

2 Bagidos then brought forward 15,000 men, and arranged them in line of battle on the right of Judah, while on his left he placed another army to the number of 15,000. There was a great shouting, both on the right and left of Judah; but when he saw that the battle was very fierce, and that Bagidos stood on his right-for all the warriors of Bagidos remained on the right, and that the right wing was with him—he shouted and leaped forward followed by his brothers, and the few Hasmoneans.

3 He ran in the direction of Baqidos, and a fierce and terrible battle ensued, at the beginning of which heaps of Macedonians were slain. As soon as Judah saw Bagidos standing in the midst of the people, he ran towards him in the strength of his anger, and smote many of his warriors. He struck out right and left at all who came in his way, slaying enemies without number, until he had no 'place to walk except upon the slain. Upon these he made his way.

4 He then came face to face with Baqidos, with sword unsheathed and steeped in blood. As soon as Bagidos beheld Judah's face, it appeared to him like that of a lion robbed of its prev, and fear and trembling seized him. Turning his back, he attempted to flee in the direction of Ashdod, but Judah pursued him, and put all his men, 15,000, to the edge of the sword.

5 Baqidos succeeded in effecting his escape to Ashdod, and his army, which was behind him, finding Judah faint and weary, fell upon him, Bagidos came out from the city, and war was waged on every side, and many more were slain, Judah being among the number, falling upon those he had slain. His brothers Simeon and Jonathan took him and buried him on Mount Moda'ith, and all Israel mourned for him many days. The number of years during which Judah, surnamed Maccabee, ministered unto Israel was six years, and the Lord caused him to prosper all the days of his life

[End of the Book of the Maccabee.]

THE GRAND BIBLE

EVAGRIUS' ECCLESIASTICAL HISTORY

A History of the Church (and the Eastern Roman Empire) from 431 to 594 AD Author: Evagrius Scholasticus Source: copy1524; British Library Egerton MS 2626 Translation: E. Walford. 1846

Estimated Range of Dating: 560-600 A.D.

(Evagrius Scholasticus (c. 536-594 AD) was a Syrian scholar and intellectual living in the 6th century AD. His only surviving work, Ecclesiastical History [History of the Church], comprises a six-volume collection concerning the Church's history from the First Council of Ephesus (431 AD) to the emperor Maurice's reign until Scholasticus' death. However, besides Church matters, this book is foremostly a book on general history.

At the time of his birth, something happened on the other side of the Earth that nobody could understand in his time, such as ". . . the occurrence of excessive rains about Constantinople and Bithynia, which descended like torrents for three or four days: when hills were swept down to the plains, and villages carried away by the deluge: islands also were formed in the lake Boane . . . " and ". . . a drought in Phrygia, Galatia, Cappadocia, and Cilicia: and, from want of ordinary necessaries, the inhabitants had recourse to unwholesome food, which further gave rise to pestilence. The change of food caused disease; excessive inflammation produced a swelling of the body, followed by loss of sight, and attended with a cough, and death took place on the third day. For a time no relief could be devised for the pestilence . . his description of the "great pestilence" [meaning the Black Death] which continued its ravages throughout the empire for more than fifty years. Evagrius himself was infected by the outbreak yet miraculously managed to survive this disaster during his youth, and he mentions that he lost by it his first wife, besides several relatives and members of his household, and among them in particular a daughter with her child (Book 4, chapter 29). A large portion of the havoc at that time can be traced back directly to a massive volcano explosion in Indonesia at about 535 AD.

This havoc that lasted for many decades and possibly contributed to the rise of Islam. Thomas Artsruni, an Armenian historian reported 300 years later what consequences the violent doctrine of Islam then had on the Armenian people who in that account stood as example for the fate of millions of other peoples that encountered Mohammed's ruthless followers.

Evagrius's Ecclesiastical History addresses also the history of the Eastern Roman Empire from the official beginning of the Nestorian controversy at the First Council of Ephesus in 431 to the time in which he was writing, 593. Evagrius Scholasticus, Historia ecclesiastica is preserved as a 1524 copy; British Library Egerton MS 2626. The book's contents focus mainly on religious matters, describing the events surrounding notable bishops and holy men. The editio princeps was published in 1544 under the name of Robertus Stephanus (better known as Robert Estienne). John Christopherson, bishop of Chichester, made a Latin translation of the Ecclesiastical History, which was published after his death in 1570. Translations into English appeared much later: the first was by Edward Walford, which was published at London in 1846; Michael Whitby's translation was published in 2001 by Liverpool University Press as part of their "Texts in Translation Series."

Evagrius was explicitly a Christian in the Chalcedonian tradition, critiquing both Zacharias Rhetor and Zosimus for theological differences, two popular historians during his own time. He respected the former scholar for his contributions to the histories of the 5th and 6th centuries AD but chastised him for his Monophysite position. However, he was especially hostile towards Zosimus, a non-Christian historiographer.

Evagrius is much less critical of the Emperor Justinian and his wife Theodora, in comparison with Procopius, who described the two as physically manifest demons. Because of regional affiliations Evagrius depicts the emperor in a more sympathetic light, praising his moderate approach to justice and his restraint towards excessive persecution, yet still decrying his heresy and displays of wealth.

The Ecclesiastical History is considered an important and relatively authoritative account of the timeline it traces, since Evagrius draws on other scholars' material, explicitly acknowledging his sources. He meticulously organizes information taken from other written historical works in order to validate his account more effectively than other theological scholars of his time, thus diminishing confusion for future historian's interested in studying his work. However, historian's interested in studying his work, However, historian's interested in studying work, which is common for its epoch, namely the problematic chronological sequencing and skimming over of undeniably notable events such as major wars and other secular events.) THE FIRST BOOK. PREFACE.

DESIGN OF THE WORK.

Eusebius Pamphili-an especially able writer, to the extent, in particular, of inducing his readers to embrace our religion, though failing to perfect them in the faith-and Sozomen, Theodoret, and Socrates* have produced a most excellent record of the advent of our compassionate God, and His ascension into heaven, and of all that has been achieved in the endurance of the divine Apostles, as well as of the other martyrs; and, further, of whatever events have occurred among us, whether more or less worthy of mention, down to a certain period of the reign of Theodosius. [* The "Greek Ecclesiastical Historians of the First Six Centuries," newly translated: viz. I. Eusebius's History, to A.D. 324 : II. Eusebius's Life of Constantine, Orations, etc. ; III. Socrates's History, A.D. 305-445; IV. Sozomen's Narrative, A.D. 324—440; V. Theodoret's History, 322—428; VI. Evagrius's History, A.D. 431—594; in six uniform volumes, each 7s. in cloth. London: Samuel Bagster and Sons.] But since events subsequent, and scarcely inferior to these, have not hitherto been made the subject of a continuous narrative. I have resolved, though but ill-qualified for such a task, to undertake the labour which the subject demands, and to embody them in a history; surely trusting in Him who enlightened fishermen, and endued a brute tongue with articulate utterance, for ability to raise up transactions already entombed in oblivion, to reanimate them by language, and immortalise them by memory: my object being, that my readers may learn the nature of each of these events, up to our time; the period, place, and manner of its occurrence, as well as those who were its objects and authors; and that no circumstance worthy of recollection, may be lost under the veil of listless indifference, or, its neighbour, forgetfulness. I shall then begin, led onwards by the divine impulse, from the point where the above-mentioned writers closed the history.

EVAGRIUS HISTORY CHAPTER 1

Artifice By Which The Devil Attempts To Subvert The Purity Of The Faith.

Scarce had the impiety of Julian been flooded over by the blood of the martyrs, and the frenzy of Arius been bound fast in the fetters forged at Nicaea, and, moreover, Eunomius and Macedonius, by the agency of the Holy Spirit, had been swept as by a blast to the Bosphorus, and wrecked against the sacred city of Constantine; scarce had the holy church cast off her recent defilement, and was being restored to her ancient beauty, robed in a vesture inwrought with gold, and in varied array, and becoming meet for the bridegroom, when the demon enemy of good, unable to endure it, commences against us a new mode of warfare, disdaining idolatry, now laid in the dust, nor deigning to employ the servile madness of Arius. He fears to assault the faith in open war, embattled by so many holy fathers, and he had been already shorn of nearly all his power in battling against it: but he pursues his purpose with a robber's stealth, by raising certain questions and answers; his new device being to turn the course of error towards Judaism, little foreseeing the overthrow that hence would befall the miserable designer. For the faith which formerly was alone arrayed against him, this he now affects: and, no longer exulting in the thought of forcing us to abandon the whole, but of succeeding in corrupting a single term, while he wound himself with many a malignant wile, he devised the change of merely a letter, tending indeed to the same sense, but still with the intention of severing the thought and the tongue, that both might no longer with one accord offer the same confession and glorification to God. The manner and result of these transactions I will set forth, each at its proper juncture; giving at the same time a place in my narrative to other matters that may occur to me, which, though not belonging to my immediate subject, are worthy of mention, laying up the record of them wherever it shall please our compassionate God.

EVAGRIUS HISTORY CHAPTER 2

Heresy Of Nestorius Discovered And Condemned.

Since, then, Nestorius, that God-assaulting tongue, that second conclave of Caiaphas, that workshop of blasphemy, in whose case Christ is again made a subject of bargain and sale, by having His natures divided and torn asunder-He of whom not a single bone was broken even on the cross, according to Scripture, and whose seamless vest suffered no rending at the hands of God—slaying men—since, then, he thrust aside and rejected the term, Mother of God, which had been already wrought by the Holy Spirit through the instrumentality of many chosen fathers, and substituted a spurious one of his own coining-Mother of Christ; and further filled the Church with innumerable wars, deluging it with kindred blood. I think that I shall not be at a loss for a well-judged arrangement of my history, nor miss its end, if, with the aid of Christ, who is God over all, I preface it with the impious blasphemy of Nestorius. The war of the churches took its rise from the following circumstances. A certain presbyter named Anastasius, a man of corrupt opinions, and a

warm admirer of Nestorius and his Jewish sentiments, who also accompanied him when setting out from his country to take possession of his bishoprick; at which time Nestorius, having met with Theodore at Mop-suestia, was perverted by his teaching from godly doctrine, as Theodulus writes in an epistle upon this subject-this Anastasius, in discoursing to the Christ-loving people in the church of Constantinople, dared to say, without any reserve, "Let no one style Mary the Mother of God: for Mary was human, and it is impossible for God to be born of a human being." When the Christ-loving people were disgusted, and with reason regarded his discourse as blasphemous, Nestorius, the real teacher of the blasphemy, so far from restraining him and upholding the true doctrine, on the contrary, imparted to the teaching of Anastasius the impulse it acquired, by urging on the question with more than ordinary pugnacity. And further, by mingling with it notions of his own, and thus vomiting forth the venom of his soul, he endeavoured to inculcate opinions still more blasphemous, proceeding so far as thus to avouch, upon his own peril, "I could never be induced to call that God which admitted of being two months old or three months old." These circumstances rest on the distinct authority of Socrates, and the former synod at Ephesus.

EVAGRIUS HISTORY CHAPTER 3

Letter From Cyril To Nestorius.—Council Of Ephesus.

When Cyril, the renowned bishop of the church of the Alexandrians, had communicated to Nestorius his reprobation of these transactions, and he, in rejoinder, paid no regard to what was addressed to him by Cyril, and by Celestine, bishop of the elder Rome, but was irreverently pouring forth his own vomit over the whole church, there was just occasion for the convening of the first synod of Ephesus, at the injunction of the younger Theodosius, sovereign of the Eastern empire, by the issuing of imperial letters to Cyril and the presidents of the holy churches in every quarter, naming, at the same time, as the day of meeting, the sacred Pentecost, on which the life-giving Spirit descended upon us. Nestorius, on account of the short distance of Ephesus from Constantinople, arrives early; and Cyril too, with his company, came before the appointed day; but John, the president of the church of Antioch, with his associate bishops, was behind the appointed time; not intentionally, as his defence has been thought by many to have sufficiently proved, but because he could not muster his associates with sufficient despatch, who were at a distance of what would be a twelve days' journey to an expeditious traveller from the city formerly named from Antiochus, but now the City of God and in some cases more: and Ephesus was then just thirty days' journey from Antioch. He stoutly defended himself on the ground that the observance of what is called the New Lord's Day by his bishops in their respective sees, was an insuperable impediment to his arriving before the stated day.

EVAGRIUS HISTORY CHAPTER 4

Deposition Of Nestorius. [431 AD.]

When fifteen days had elapsed from the prescribed period, the bishops who had assembled for this business, considering that the Orientals would not join them at all, or, at least, after a considerable delay, hold a conclave, under the presidency of the divine Cyril, occupying the post of Celestine, who, as has been before mentioned, was bishop of the elder Rome. They accordingly summon Nestorius, with an exhortation that he would defend himself against the allegations. When, however, notwithstanding a promise given on the preceding day, that he would present himself if there were occasion, he did not appear, though thrice summoned, the assembly proceeded to the investigation of the matter. Memnon, the president of the Ephesian church, recounted the days which had elapsed, fifteen in number: then were read the letters addressed to Nestorius by the divine Cyril, and his rejoinders; there being also inserted the sacred epistle of the illustrious Celestine to Nestorius himself. Theodotus, bishop of Ancyra, and Acacius, of Melitene, also detailed the blasphemous language to which Nestorius had unreservedly given utterance at Ephesus. With these were combined many statements in which holy fathers had purely set forth the true faith, having side by side with them various blasphemies which the frenzy of the impious Nestorius had vented. When all this had been done, the holy synod declared its judgement precisely in the following terms: "Since, in addition to the other matters, the most reverend Nestorius has refused to submit to our summons, or yet to admit the most holy and godly bishops who were sent by us, we have of necessity proceeded to the investigation of his impieties: and having convicted him of entertaining and avowing impious sentiments, on the evidence both of his letters and writings which have been read, and also of words uttered by him lately in this metropolitan city, and established by sufficient testimony, at length, compelled by the canons, and in accordance with the epistle of our most holy father and fellow-minister, Celestine, bishop of the church of Rome, we have, with many tears, proceeded to this sad sentence. The Lord Jesus Christ, who has been blasphemed by him, has,

through the agency of this holy synod, decreed, that the same Nestorius is alien from the episcopal dignity, and from every sacerdotal assembly."

EVAGRIUS HISTORY CHAPTER 5

Deposition Of Cyril And Of John.—Their Reconciliation. After the delivery of this most legitimate and just sentence, John, the bishop of Antioch, arrives with his associate priests. five days after the act of deposition; and having convened all his company, he deposes Cyril and Memnon. On account, however, of libels put forth by Cyril and Memnon to the synod which had been assembled in company with themselves (although Socrates, in ignorance, has given a different account), John is summoned to justify the deposition which he had pronounced; and, on his not appearing after a thrice repeated summons, Cyril and Memnon are released from their sentence, and John and his associate priests are cut off from the holy communion and all sacerdotal authority. When, however, Theodosius, notwithstanding his refusal at first to sanction the deposition of Nestorius, had subsequently, on being fully informed of his blasphemy, addressed pious letters both to Cyril and John, they are reconciled to each other, and ratify the act of deposition.

EVAGRIUS HISTORY CHAPTER 6

Cyril's Eulogy Of A Letter From John Of Antioch

On occasion of the arrival of Paul, bishop of Emesa, at Alexandria, and his delivery before the church of that discourse which is extant on this subject, Cyril also, after highly commending the epistle of John, wrote to him in these words: "Let the heavens rejoice and the earth be glad, for the middle wall of partition is broken down, exasperation is stilled, and all occasion for dissension utterly removed through the bestowal of peace upon his churches by Christ, the Saviour of us all; at the call, too, of our most religious and divinely favoured sovereigns, who, in excellent imitation of ancestral piety, preserve in their own souls a well-founded and unshaken maintenance of the true faith, and a singular care for the holy churches, that they may acquire an everlasting renown, and render their reign most glorious. On them the Lord of Hosts himself bestows blessings with a bountiful hand, and grants them victory over their adversaries. Victory He does bestow: for never can he lie who says, As I live, saith the Lord, those that glorify me, I glorify. On the arrival, then, of my most pious brother and fellow minister, my lord Paul, at Alexandria, I was filled with delight, and with great reason, at the mediation of such a man, and his voluntary engagement in labours beyond his strength. in order that he might subdue the malice of the devil, close our breaches, and, by the removal of the stumbling-blocks that lay between us, might crown both our churches and yours with unanimity and peace." And presently he proceeds thus: "That the dissension of the church has been altogether unnecessary and without sufficient ground, I am fully convinced now that my lord the most pious bishon Paul has brought a paper presenting an unexceptionable confession of the faith, and has assured me that it was drawn up by your holiness and the most pious bishops of your country." And such is the writing thus drawn up, and inserted verbatim in the epistle; which, with reference to the Mother of God, speaks as follows: "When we read these your sacred words, and were conscious that our own sentiments were correspondent-for there is one Lord, one faith, one baptism-we glorified God, the Preserver of all things, with a feeling of mutual joy, that both your churches and ours maintain a faith in agreement with the divinely inspired Scriptures and the tradition of our holy fathers." Of these matters any one may be assured, who is disposed to investigate diligently the transactions of those times

EVAGRIUS HISTORY CHAPTER 7

Death Of Nestorius.

Historians have not detailed either the banishment of Nestorius, his subsequent fortunes, or the manner in which his life was closed, and the retribution with which he was visited for his blasphemy; matters which would have been allowed to slip into oblivion, and have been altogether swallowed up by time, so as not to be current even in hearsay, if I had not met with a book written by himself, which supplied an account of them. Nestorius, then, himself, the father of the blasphemy, who raised his structure not on the foundation already laid. but built upon the sand one which, in accordance with the Lord's parable, quickly fell to ruin, here, in addition to other matters of his choice, puts forth a defence of his own blasphemy, in reply to those who had charged him with unnecessary innovation and an unseemly demand for the convening of the synod at Ephesus. He asserts that he was driven to assume this position by absolute necessity, on account of the division of the church into two parties, one maintaining that Mary ought to be styled Mother of Man; the other, Mother of God; and he devised the title, Mother of Christ, in order, as he says, that error might not be incurred by adopting either extreme, either a term which too closely united immortal essence with humanity, or one which, while

admitting one of the two natures, involved no mention of the other. He also intimates that Theodosius, from feelings of friendship, withheld his ratification of the sentence of deposition; and, afterwards, that, on occasion of the mission of several bishops of both parties from Ephesus to the emperor, and, moreover, at his own request, he was allowed to retire to his own monastery, situated without the gates of the city now called Theopolis. It is not, indeed, expressly named by Nestorius, but is said to be that which is now styled the monastery of Euprepius; which we know to be, in fact, not more than two stadia from that city. Nestorius, then, himself says, that during a residence there of four years, he received every mark of respect and distinction; and that, by a second edict of Theodosius, he is banished to the place called Oasis. But the pith of the matter he has suppressed. For in his retirement he did not cease from his peculiar blasphemy; so that John, the president of the church of Antioch, was led to report the circumstance, and Nestorius was, in consequence, condemned to perpetual banishment. He has addressed also a formal discourse to a certain Egyptian, on the subject of his banishment to Oasis where he treats of these circumstances more fully. But the retribution with which, unable to escape the all-seeing eye, he was visited for his blasphemous imaginations, may be gathered from other writings addressed by him to the governor of the Thebaid: in which one may see how that, since he had not yet reached the full measure of his deserts, the vengeance of God visited him, in pursuance, with the most terrible of all calamities, captivity. Being, then, still deserving of greater penalties, he was liberated by the Blemmyes, into whose hands he had fallen; and, after Theodosius had decreed his return to his place of exile, wandering from place to place on the verge of the Thebaid, and severely injured by a fall, he closed his life in a manner worthy of his deeds: whose fate, like that of Arius, was a judicial declaration, what are the appointed wages of blasphemy against Christ: for both committed similar blasphemy against him; the one by calling him a creature; the other, regarding him as human. When Nestorius impugns the integrity of the acts of the council of Ephesus, and refers them to subtle designs and lawless innovation on the part of Cyril, I should be most ready thus to reply:-How came it to pass. that he was banished even by Theodosius, notwithstanding his friendly feelings towards him, and was condemned by repeated sentences of extermination, and closed this life under those unhappy circumstances? If Cyril and his associate priests were not guided by heaven in their judgment, how came it to pass that, when both parties were no longer numbered with the living, in which case a heathen sage [Thucydides, Book 2. c. 45.] has observed, "A frank and kindly meed is yielded to departed worth," the one is reprobated as a blasphemer and enemy of God, the other is lauded and proclaimed to the world as the sonorous herald and mighty champion of true doctrine? In order that I may not incur a charge of slander, let me bring Nestorius himself into court as an evidence on these points. Read me then, word for word, some passages of thy epistle, addressed to the governor of the Thebaid:-"On account of the matters which have been lately mooted at Ephesus concerning our holy religion, Oasis, further called Ibis, has been appointed as the place of my residence by an imperial decree." And presently he proceeds thus: "Inasmuch as the beforementioned place has fallen into the hands of the barbarians, and been reduced to utter desolation by fire and sword, and I, by a most unexpected act of compassion, have been liberated by them, with a menacing injunction instantly to fly from the spot, since the Mazices were upon the point of succeeding them in their occupation of it; I have, accordingly, reached the Thebaid, together with the captive survivors whom they had joined with me, by an act of pity for which I am unable to account. They, accordingly, have been allowed to disperse themselves to the places whither their individual inclinations led them, and I, proceeding to Panopolis, have shewed myself in public, for fear lest any one, making the circumstance of my seizure an occasion of criminal proceeding, should raise a charge against me, either of escaping from my place of exile, or some other imagined delinquency: for malice never wants occasion for slander. Therefore I entreat your highness to take that just view of my seizure which the laws would enjoin, and not sacrifice a prisoner of war to the malice and evil designs of men: lest there should hence arise this melancholy story with all posterity, that it is better to be made captive by barbarians, than to fly for refuge to the protection of the Roman sovereignty." He then prefers, with solemn adjuration, the following request: "I request you to lay before the emperor the circumstance, that my arrival hither from Oasis arose from my liberation by the barbarians; so that my final disposal, according to God's good pleasure, may now be determined." The second epistle, from the same to the same, contains as follows: "Whether you are disposed to regard this present letter as a friendly communication from me to your highness, or as an admonition from a father to a son, I beseech you bear with its detail, embracing, indeed, many matters, but as briefly as the case would allow. When Ibis had been devastated by a numerous body of Nomades,'

pretext on the part of your highness I know not, I was conducted by barbarous soldiers from Panopolis to Elephantine, a place on the verge of the province of the Thebaid, being dragged thither by the aforesaid military force; and when, sorely shattered, I had accomplished the greater part of the journey, I am encountered by an unwritten order from your valour to return to Panopolis. Thus, miserably worn with the casualties of the road, with a body afflicted by disease and age, and a mangled hand and side. I arrived at Panopolis in extreme exhaustion, and further tormented with cruel pains: whence a second written injunction from your valour, speedily overtaking me, transported me to its adjacent territory. While I was supposing that this treatment would now cease, and was awaiting the determination of our glorious sovereigns respecting me, another merciless order was suddenly issued for a fourth deportation." And presently he proceeds: "But I pray you to rest satisfied with what has been done, and with having inflicted so many banishments on one individual. And I call upon you kindly to leave to our glorious sovereigns the inquisition, for which reports laid before them by your highness, and by myself too, by whom it was proper that information should be given, would furnish materials. If, however, this should excite your indignation, continue to deal with me as before, according to your pleasure; since no words ca,n prevail over your will." Thus does this man, who had not learned moderation even by his sufferings, in his writings strike and trample with fist and heel, even reviling both the supreme and provincial governments. I learn from one who wrote an account of his demise, that, when his tongue had been eaten through with worms, he departed to the greater and everlasting judgment which awaited him.

EVAGRIUS HISTORY CHAPTER 8

Succession Of Bishops At Constantinople.

Next in succession to that malignant spirit Nestorius, Maximianus is invested with the bishopric of the city of the renowned Constantine, in whose time the church of God enjoyed perfect peace: and when he was departed from among men, Proclus holds the helm of the see, who had some time before been ordained bishop of Cyzicus. When he too had gone the way of all mankind, Flavian succeeds to the see.

EVAGRIUS HISTORY CHAPTER 9

Heresy Of Eutyches.

In his time arose the stir about the impious Eutyches, when a partial synod was assembled at Constantinople, and a written charge was preferred by Eusebius, bishop of Dorvlaeum, who, while still practising as a rhetorician, was the first to expose the blasphemy of Nestorius. Since Eutyches, when summoned, did not appear, and afterwards, even on his appearance, was convicted on certain points; for he had said, "I allow that our Lord was produced from two natures before their union, but I confess only one nature after their union;" and he even maintained that our Lord's body was not of the same substance with ourselves-on these grounds he is sentenced to deprivation: but on his presenting a petition to Theodosius, on the plea that the acts, as set forth, had been concocted in the hands of Flavian, the synod of the neighbouring region is assembled at Constantinople, and Flavian is tried by it and some of the magistrates; and when the truth of the acts had been confirmed, the second synod at Ephesus is summoned.

EVAGRIUS HISTORY CHAPTER 10

Proceedings Of The Second Council Of Ephesus. [449 AD.] Of this council, Dioscorus, the successor of Cyril in the see of Alexandria, was appointed president, by an intrigue, in enmity to Flavian, of Chrysaphius, who at that time swaved the imperial court. There hasten to Ephesus Juvenalis, bishop of Jerusalem, who was present at the former council, with a great number of associate priests, and with him also Domnus, the successor of John at Antioch: and besides them, Julius, a bishop, who was the representative of Leo, bishop of the elder Rome. Flavian also was present with his associate bishops, an edict having been addressed by Theodosius to Elpidius, in these precise terms. "Provided that those who had on the former occasion passed judgment on the most religious Archimandrite Eutyches, be present, but take no part in the proceedings, by abstaining from the functions of judges, and awaiting the resolution of all the most holy fathers; inasmuch as their own previous decision is now a subject of inquisition." In this council, the deposition of Eutyches is revoked by Dioscorus and his associates-as is contained in the acts-and that sentence is passed upon Flavian, and Eusebius, president of the church of Dorylaeum. At the same time, Ibas, bishop of Edessa, is excommunicated; and Daniel, bishop of Carrhae, Irenaeus of Tyre, and Aquilinus of Byblus, are deposed. Some measures were also taken on account of Sophronius, bishop of Constantina: and they depose Theodoret, bishop of Cyrus, and even Domnus of Antioch. What afterwards befel the last mentioned, I am not able to discover. After these proceedings the second council of Ephesus was dissolved.

EVAGRIUS HISTORY CHAPTER 11

An Apology For Differences Of Opinion Among Christians. And here let not any one of the deluded worshippers of idols presume to sneer, as if it were the business of succeeding councils to depose their predecessors, and to be ever devising some addition to the faith. For while we are endeavouring to trace the unutterable and unsearchable scheme of God's mercy to man, and to revere and exalt it to the utmost, our opinions are swaved in this or that direction: and with none of those who have been the authors of heresies among Christians, was blasphemy the first intention; nor did they fall from the truth in a desire to dishonour the Deity, but rather from an idea which each entertained, that he should improve upon his predecessors by upholding such and such doctrines. Besides, all parties agree in a confession which embraces the essential points; for a Trinity is the single object of our worship, and unity the complex one of our glorification, and the Word, who is God begotten before the worlds, and became flesh by a second birth in mercy to the creature: and if new opinions have been broached on other points, these also have arisen from the freedom granted to our will by our Saviour God, even on these subjects, in order that the holy catholic and apostolic church might be the more exercised in bringing opposing opinions into captivity to truth and piety, and arrive, at length, at one smooth and straight path. Accordingly the apostle says most distinctly: "There is need of heresies among you, that the approved ones may be manifested." And here also, we have occasion to admire the unutterable wisdom of God, who said to the divine Paul, "My strength is made perfect in weakness." For by the very causes by which the members of the church have been broken off, the true and pure doctrine has been more accurately established, and the catholic and apostolic church of God has attained amplification and exaltation to heaven. But those who have been nurtured in Grecian error, having no desire to extol God or his tender care of men, were continually endeavouring to shake the opinions of their predecessors, and of each other, rather devising gods upon gods, and assigning to them by express titles the tutelage of their own passions, in order that they might find an excuse for their own debaucheries by associating such deities with them. Thus, their supreme Father of Gods and men, under the form of a bird, shamelessly carried off the Phrygian boy; and as a reward of his vile service, bestowed the cup, with leave to pledge him in an amorous draught, that they might with the nectar drink in their common shame. Besides innumerable other villanies, reprobated by the meanest of mankind, and transformations into every form of brutes himself the most brutish of all he becomes bi-sexual, pregnant, if not in his belly yet in his thigh that even this violation of nature might be fulfilled in his person: whence springing, the bi-sexual dithyrambic birth outraged either sex; author of drunkenness, surfeit, and mad debauch, and all their fearful consequences. To this Aegiswearer, this Thunderer, they attach, in spite of these majestic titles, the crime of parricide, universally regarded as the extremity of guilt; inasmuch as he dethroned Saturn who unhappily had begotten him. Why need I also mention their consecration of fornication, over which they made Venus to preside, the shell-born Cyprian, who abhorred chastity as an unhallowed and monstrous thing, but delighted in fornication and all filthiness, and willed to be propitiated by them: in whose company Mars also suffers unseemly exposure. being, by the contrivance of Vulcan, made a spectacle and laughing-stock to the Gods? Justly would one ridicule their phalli and ithyphalli, and phallagogia; their Priapus, and Pan, and the Eleusinian mysteries, which in one respect deserve praise, namely, that the sun was not allowed to see them, but they were condemned to dwell with darkness. Leaving, then, the worshippers and the worshipped in their shame, let us urge our steed to the goal, and set forth, in compendious survey, the remaining transactions of the reign of Theodosius

EVAGRIUS HISTORY CHAPTER 12

Condemnation Op The Nestorian Doctrine By Theodosius. Theodosius, then, issued a most pious constitution, which is included in the first book of what is termed the Code of Justinian, and is the third under the first title; in which, moved by heaven, he condemned, by all the votes, as the saying is, him to whom he had been long attached, as Nestorius himself writes, and placed him under anathema. The precise terms are as follow: "Further we ordain, that those who favour the impious creed of Nestorius, or follow his unlawful doctrine, be ejected from the holy churches, if they be bishops or clerks; and if laics, be anathematised." Other enactments were also promulgated by him relating to our religion, which shew his burning zeal.

EVAGRIUS HISTORY CHAPTER 13

Simeon The Stylite. [440 AD.]

In these times flourished and became illustrious Simeon, of holy and famous memory, who originated the contrivance of stationing himself on the top of a column, thereby occupying a spot of scarce two cubits in circumference. Domnus was then

THE GRAND BIBLE

bishop of Antioch; and he, having visited Simeon, and being struck with the singularity of his position and mode of life, was desirous of more mystic intercourse. They met accordingly, and having consecrated the immaculate body, imparted to each other the life-giving communion. This man, endeavouring to realise in the flesh the existence of the heavenly hosts, lifts himself above the concerns of earth, and, overpowering the downward tendency of man's nature, is intent upon things above: placed between earth and heaven, he holds communion with God, and unites with the angels in praising him; from earth, offering his intercessions on behalf of men, and from heaven, drawing down upon them the divine favour. An account of his miracles has been written by one of those who were eye-witnesses, and an eloquent record by Theodoret, bishop of Cyrus: though they have omitted a circumstance in particular, the memory of which I found to be still retained by the inhabitants of the holy desert, and which I learnt from them as follows. When Simeon, that angel upon earth, that citizen in the flesh of the heavenly Jerusalem, had devised this strange and hitherto unknown walk, the inhabitants of the holy desert send a person to him, charged with an injunction to render a reason of this singular habitude, namely, why, abandoning the beaten path which the saints had trodden, he is pursuing another altogether unknown to mankind; and, further, that he should come down and travel the road of the elect fathers. They, at the same time, gave orders, that, if he should manifest a perfect readiness to come down, liberty should be given him to follow out the course he had chosen, inasmuch as his compliance would be sufficient proof that under God's guidance he persevered in this his endurance: but that he should be dragged down by force, in case he should manifest repugnance, or be swayed by self-will, and refuse to be guided implicitly by the injunction. When the person, thus deputed, came and announced the command of the fathers, and Simeon, in pursuance of the injunction, immediately put one foot forward, then he declared him free to fulfil his own course, saying, 'Be stout, and play the man: the post which thou hast chosen is from God.' This circumstance, which is omitted by those who have written about him, I have thus thought worthy of record. In so great a measure had the power of divine grace taken possession of him, that, when Theodosius had issued a mandate, that the synagogues of which they had been previously deprived by the Christians, should be restored to the Jews of Antioch, he wrote to the emperor with so much freedom and vehement rebuke, as standing in awe of none but his own immediate sovereign, that Theodosius re-called his commands, and in every respect favoured the Christians, even superseding the prefect who had suggested the measure. He further proceeded to prefer a request to this effect, to the holy and aerial martyr, that he would entreat and pray for him, and impart a share of his own peculiar benediction. Simeon prolonged his endurance of this mode of life through fifty-six years, nine of which he spent in the first monastery, where he was instructed in divine knowledge, and forty-seven in the Mandra, as it is termed; namely, ten in a certain nook; on shorter columns, seven; and thirty upon one of forty cubits. After his departure, his holy body was conveyed to Antioch, during the episcopate of Martyrius, and the reign of the emperor Leo, when Ardabyrius was in command of the forces of the East, on which occasion the troops, with a concourse of their followers and others, proceeded to the Mandra, and escorted the venerable body of the blessed Simeon, lest the inhabitants of the neighbouring cities should muster and carry it off. In this manner, it was conveyed to Antioch, and attended during its progress by extraordinary prodigies. The emperor also demanded possession of the body; and the people of Antioch addressed to him a petition in deprecation of his purpose, in these terms: "Forasmuch as our city is without walls, for we have been visited in wrath by their fall, we brought hither the sacred body to be our wall and bulwark." Moved by these considerations, the emperor yielded to their prayer, and left them in possession of the venerable body. It has been preserved nearly entire to my time: and, in company with many priests, I enjoyed the sight of his sacred head, in the episcopate of the famous Gregory, when Philippicus had requested that precious relics of saints might be sent to him for the protection of the Eastern armies. And, strange as is the circumstance, the hair of his head had not perished, but is in the same state of preservation as when he was alive and sojourning with mankind. The skin of his forehead, too, was wrinkled and indurated, but is nevertheless preserved, as well as the greater part of his teeth, except such as had been violently removed by the hands of faithful men, affording by their appearance an indication of the personal appearance and years of the man of God. Beside the head lies the iron collar, to which, as the companion of its endurance, the famous body has imparted a share of its own divinely-bestowed honours; for not even in death has Simeon been deserted by the loving iron. In this manner would I have detailed every particular, thereby benefiting both myself and my readers, had not Theodoret, as I said before, already performed the task more

EVAGRIUS HISTORY CHAPTER 14

Description Of The Appearance Of A Star Near The Column Of Simeon.

Let me, however, add a record of another circumstance which I witnessed. I was desirous of visiting the precinct of this saint, distant nearly thirty stadia from Theopolis, and situated near the very summit of the mountain. The people of the country give it the title of Mandra, a name bequeathed to the spot, as I suppose, by the holy Simeon, in respect of the discipline which he there had practised. The ascent of the mountain is as much as twenty stadia. The temple is constructed in the form of a cross, adorned with colonnades on the four sides. Beside the colonnades are arranged handsome columns of polished stone, sustaining a roof of considerable elevation: while the centre is occupied by an unroofed court of the most excellent workmanship, where stands the pillar, of forty-cubits, on which the incarnate angel upon earth spent his heavenly life. Adjoining the roof of the colonnades is a balustrade, termed by some persons windows, forming a fence towards both the before-mentioned court and the colonnades. At the balustrade, on the left of the pillar. I saw, in company with all the people who were there assembled. while the rustics were performing dances round it, a very large and brilliant star, shooting along the whole balustrade, not merely once, twice, or thrice, but repeatedly; vanishing, moreover, frequently, and again suddenly appearing: and this occurs only at the commemorations of the saint. There are also persons who affirm-and there is no reason to doubt the prodigy, considering the credibility of the vouchers, and the other circumstances which I actually witnessed-that they have seen a resemblance of the saint's face flitting about here and there, with a long beard, and wearing a tiara, as was his habit. Free ingress is allowed to men, who repeatedly compass the pillar with their beasts of burden: but the most scrupulous precaution is taken, for what reason I am unable to say, that no woman should enter the sacred building: but they obtain a view of the prodigy from the threshold without, since one of the doors is opposite to the star's rays.

EVAGRIUS HISTORY CHAPTER 15

Isidore Of Pelusium And Synesius Of Cyrene.

In the same reign Isidore was also conspicuous: "wide whose renown," according to the language of poetry; having become universally celebrated by deed and word. To such a degree did he waste his flesh by severe discipline, and feed his soul by elevating doctrine, as to pursue upon earth the life of angels, and be ever a living monument of monastic life and contemplation of God. Besides his numerous other writings. well stored with various profit, there are some addressed to the renowned Cyril; from which it appears that he flourished contemporary with the divine bishop. And now, while endeavouring to give every attraction to my work, let me also bring upon the scene Synesius of Cyrene, whose memory will add an embellishment to my narrative. This Synesius, while possessed of every other kind of learning, carried the study of philosophy, in particular, to its highest pitch; so as to gain the admiration even of those Christians whose decision upon things which fall under their observation is not guided by favouring or adverse prejudice. They, accordingly, persuade him to resolve on partaking of the saving regeneration, and to take upon himself the yoke of the priesthood, while as yet he did not admit the doctrine of the resurrection, nor was inclined to hold that tenet; anticipating, with well-aimed conjecture, that this belief would be added to his other excellencies, since divine grace is never content to leave its work unfinished. Nor were they disappointed in their expectation: for his epistles, written after his accession to the priesthood, and composed with elegance and learning, as well as his discourse addressed to Theodosius himself, and whatever is extant of his valuable writings, sufficiently show how excellent and great a man he was.

EVAGRIUS HISTORY CHAPTER 16

Translation Of The Remains Of Ignatius.

At the same period also took place the translation of the divine Ignatius, as is recorded, with other matters, by John the rhetorician: who, having found a tomb, as he himself desired, in the bowels of the wild beasts, in the amphitheatre of Rome, had, nevertheless, through the preservation of the more solid bones, which were conveyed to Antioch, long reposed in what is called the cemetery: the good God having moved Theodosius to dignify the bearer of the name Theophorus with increased honours, and to dedicate a temple, long ago devoted to the demons, and called by the inhabitants Tychaeum, to the victorious martyr. Thus, what was formerly the shrine of Fortune, became a sanctuary and holy precinct for Ignatius, by depositing there his sacred remains, which were conveyed on a car through the city, attended by a solemn procession. From this event arose the celebration of a public festival, accompanied with rejoicings of the whole population; which has continued to our times, and received increased magnificence at the hands of the prelate Gregory. Such results were brought about by the conspiring agency of friends and foes, while God was decreeing honour to the holy memories of

fully

the saints. For the impious Julian, that heaven-detested power, when the Daphnaean Apollo, whose prophetic voice proceeded from the Castalian fount, could give no response to the emperor's consultation, since the holy Babylas, from his neighbouring resting-place, restrained his utterance; was goaded on to be an unwilling instrument in honouring that saint by a translation; on which occasion was also erected to him, outside the city, a spacious temple, which has remained entire to the present day: the object of the removal being that the demons might no longer be overawed in the pursuit of their own practices, the performance of which, as is said, they had previously promised to Julian. Thus were events disposed by the providence of God, in his design that both the power of those who were dignified by martyrdom should be clearly manifested, and the sacred relics of the holy martyr should be transferred to sacred ground, and be honoured with a noble precinct.

EVAGRIUS HISTORY CHAPTER 17

Attila King Of The Huns. Earthquakes.

During those times arose the celebrated war of Attila, king of the Scythians: the history of which has been written with great care and distinguished ability by Priscus the rhetorician, who details, in a very elegant narrative, his attacks on the eastern and western parts of the empire, how many and important cities he reduced, and the series of his achievements until he was removed from the world.

It was also in the reign of Theodosius that an extraordinary earthquake occurred, which threw all former ones into the shade, and extended, so to speak, over the whole world. Such was its violence, that many of the towers in different parts of the imperial city were overthrown, and the long wall, as it is termed, of the Chersonese, was laid in ruins; the earth opened and swallowed up many villages; and innumerable other calamities happened both by land and sea. Several fountains became dry, and, on the other hand, large bodies of water were formed on the surface, where none existed before: entire trees were torn up by the roots and hurled aloft, and mountains were suddenly formed by the accumulation of masses thrown up. The sea also cast up dead fish; many islands were submerged; and, again, ships were seen stranded by the retreat of the waters. At the same time Bithynia, the Hellespont, and cither Phrygia, suffered severely. This calamity prevailed for a considerable time, though the violence with which it commenced, did not continue, but abated by degrees until it entirely ceased.

EVAGRIUS HISTORY CHAPTER 18

Antioch Embellished By Different Governors. In the course of the same period, Memnonius, Zoilus, and Callistus, were sent out by Theodosius to the government of Antioch, men who made our religion an object of marked honour. Memnonius also rebuilt from the foundation, in a beautiful and elaborate style, the edifice which we name Psephium, leaving an unroofed court in the centre. Zoilus built the basilica, which is situated on the south side of that of Rufinus, and which has continued to bear his name to our times, although the structure itself has undergone changes from various casualties. Callistus, too, erected a noble and striking edifice, called both in former and present times the Basilica of Callistus, in front of the seats of justice, and opposite the forum where stand the splendid buildings which are the quarters of the military commanders. Subsequently, Anatolius, having been sent out as commander of the forces of the East, erects the basilica which bears his name, and embellishes it with every variety of material. The introduction of these matters, though beside my more immediate purpose, will not offend the taste of the curious reader.

EVAGRIUS HISTORY CHAPTER 19

Wars During The Reign Of Theodosius. In the times of Theodosius, repeated revolts took place in Europe, during the reign of Valentinian at Rome. These were crushed by Theodosius, who sent out for that purpose large land and naval forces. He also so far quelled the insolence of the Persians, whose sovereign at that time was Isdigerdes, the father of Vararanes, or, as Socrates thinks, Vararanes himself, as to reduce them to solicit peace; which was granted, and lasted till the twelfth year of the reign of Anastasius. These transactions have been recorded by other writers, and have also been very elegantly epitomised by Eustathius of Epiphania, the Syrian, who wrote, besides, an account of the capture of Amida. In that age, too, it is said that the poets Claudian and Cyrus flourished; and that Cyrus was elevated to the seat of highest dignity among the prefects, styled by our ancestors the prefect of the palace, and was also invested with the command of the forces of the West, when the Vandals under Genseric had made themselves masters of Carthage.

EVAGRIUS HISTORY CHAPTER 20

The Empress Eudocia.

Theodosius also espoused Eudocia, who had previously participated in the saving baptism; an Athenian by birth, and distinguished by poetic skill and beauty of person; through the offices of his sister, the princess Pulcheria. By her he had a daughter Eudoxia, whom, when she had reached a marriageable age, the emperor Valentinian afterwards espoused; for which purpose he made a voyage from the elder Rome to the city of Constantine. At a subsequent period, when Eudocia was pursuing a journey to the holy city of Christ our God, she also visits this place; and concluded an address to our people with the following verse, 'Tis from your blood I proudly trace my line: [Homilies. 2. 6. 211.] in allusion to the colonies which were sent hither from Greece. Of these, if any one is curious to know the particulars, an elaborate account has been given by Strabo, the geographer, Phlegon, and Diodorus Siculus, as well as by Arrian and Pisander the poet, and, besides, by the distinguished sophists, Ulpian, Libanius, and Julian. On this occasion, the sons of the Antiochenes honoured her with a skilfully executed statue in brass, which has been preserved even to our times. At her suggestion, Theodosius considerably enlarges the bounds of the city, by extending the circuit of the wall as far as the gate which leads to the suburb of Daphne: of which those who are disposed, may assure themselves by visible proof; for the whole wall may still be traced, since the remains afford a sufficient guidance to the eve. Some, however, say that the elder Theodosius extended the wall. He gave, besides, two hundred pounds' weight of gold for the restoration of the baths of Valens, which had been partially burnt.

EVAGRIUS HISTORY CHAPTER 21 Visits Of Eudocia To Jerusalem, Ascetics,

From this city Eudocia proceeds on two occasions to Jerusalem; but on account of what circumstances, or with what object in the first instance, must be gathered through those writers who have treated the subject, although they do not appear to me to give true accounts. At all events, when visiting the holy city of Christ, she did many things for the honour of our Saviour God, even so far as to erect holy monasteries, and what are termed laurae. In these places the mode of life is different, but the discipline of each terminates in the same devout object. For those who live together in companies are still not under the influence of any of those things which weigh down to the earth, since they possess no gold: but why should I say gold? when no article of even dress or food is the sole property of any one among them, but the gown or vest which one is now wearing, another presently puts on, so that the clothing of all appears to belong to one, and that of one to all. A common table also is set before them, not delicately furnished with meats or any other dainties, but supplied with fare of herbs and pulse, and that only in sufficient quantity to sustain life. They maintain common supplications to God throughout the day and night, to such a degree distressing themselves, so galling themselves by their severe service, as to seem, in a manner, tombless corpses. They also frequently practice superadditions, as they are called, namely, by maintaining their fastings for two or three days; and some on the fifth day, or even later, scarcely allow themselves a portion of necessary food. On the other hand, there is a class who pursue a contrary course, and individually seclude themselves in chambers of so limited a height and width, that they can neither stand upright nor lie down at ease, confining their existence to "dens and caves of the earth," as says the apostle. Some, too, take up their dwelling with the wild beasts, and in untracked recesses of the ground; and thus offer their supplications to God. Another mode has also been devised, one which reaches to the utmost extent of resolution and endurance: for transporting themselves to a scorched wilderness, and covering only those parts which nature requires to be concealed, both men and women leave the rest of their persons exposed both to excessive frosts and scorching blasts, regardless alike of heat and cold. They, moreover, cast off the ordinary food of mankind, and feed upon the produce of the ground, whence they are termed Grazers; allowing themselves no more than is barely sufficient to sustain life. In consequence, they at length became assimilated to wild beasts, with their outward form altogether disfigured, and their mind in a state no longer fitted for intercourse with their species, whom they even shun when they see them; and, on being pursued, contrive to escape, favoured either by their swiftness of foot, or by places difficult of access. I will mention still another class, which had almost escaped recollection, though it bears away the preeminence from all others. Its numbers are very small; but still there are persons, who, when by virtue they have attained to a condition exempt from passion, return to the world. In the midst of the stir, by plainly intimating that they are indifferent to those who view them with amazement, they thus trample under foot vainglory, the last garment, according to the wise Plato, which it is the nature of the soul to cast off. By similar means they study the art of apathy in eating, practising it even, if need be, with the petty retailers of victuals. They also constantly frequent the public baths, mostly mingling and bathing with women, since they have attained to such an ascendancy over their passions, as to possess dominion over nature, and neither by sight, touch, or even embracing of the female, to relapse into their natural condition; it being their desire to be men among men, and women among women, and to participate in

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3263

both sexes. In short, by a life thus all excellent and divine, virtue exercises a sovereignty in opposition to nature, establishing her own laws, so as not to allow them to partake to satiety in any necessary. Indeed, their own rule enjoins them to hunger and thirst, and to clothe the body only so far as necessity requires: and their mode of life is balanced by opposite scales, so accurately poised, that they are unconscious of any tendency to motion, though arising from strongly antagonist forces: for opposing principles are, in their case, mingled to such a degree, by the power of divine grace combining and again severing things that are incongruous, that life and death dwell together in them, things opposed to each other in nature and in circumstances: for where passion enters, they must be dead and entombed; where praver to God is required, they must display vigour of body and energy of spirit, though the flower of life be past. Thus with them are the two modes of life combined, so as to be constantly living with a total renunciation of the flesh, and at the same time mingling with the living; both applying remedies to their bodies, and presenting to God the cries of suppliants, and in all other respects fully maintaining a practice in accordance with their former mode of life, except as regards restriction in intercourse and place: on the contrary, they listen to all, and associate with all. They also practise a long and continuous series of kneelings and risings, their earnestness alone serving to reinvigorate their years and self-inflicted weakness; being, as it were, fleshless athletes, bloodless wrestlers, esteeming fasting as a varied and luxurious feast, and the utmost abstinence from food a completely furnished table. On the other hand, whenever a stranger visits them, even at early dawn, they welcome him with generous entertainment, devising another form of fasting in eating against their will. Hence the marvel, how far the pittance on which they subsist falls short of a sufficient allowance of food: foes of their own desires and of nature, but devoted to the wills of those around them, in order that fleshly enjoyment may be constantly expelled, and the soul, diligently selecting and maintaining whatever is most seemly and pleasing to God, may alone bear sway: happy in their mode of existence here, happier in their departure hence, on which they are ever intent, impatient to behold Him whom they desire.

EVAGRIUS HISTORY CHAPTER 22

Buildings Erected By Eudocia. Accession Of Marcian. After having conversed with many persons of this description, and founded, as I have already said, many such seats of contemplation, and, besides, restored the walls of Jerusalem, the consort of Theodosius also erected a very large sanctuary, conspicuous for elevation and beauty, in honour of Stephen, the first of deacons and martyrs, distant less than a stadium from Jerusalem. Here her own remains were deposited, when she had departed to the unfading life.

When Theodosius had subsequently, or, as some think, before Eudocia, departed the sovereignty which he had administered for eight and thirty years, the most excellent Marcian is invested with the empire of the Romans. The sequel of my history shall very clearly set forth the transactions of his reign over the East, while the heavenly impulse bestows its own kindly aid.

THE END OF THE FIRST BOOK.

THE SECOND BOOK.

EVAGRIUS HISTORY CHAPTER 1

Fortunes And Character Of Marcian. [450 AD.]

The transactions of the time of Theodosius have been embraced in the preceding book. Let me now introduce upon the scene Marcian, the renowned emperor of the Romans, and in so doing, first recount who and whence he was, and by what means he won the imperial power: and having done this, let me record the occurrences of his reign in the order of time. Marcian, as has been recorded by many other writers, and in particular by Priscus, the rhetorician, was by birth a Thracian, and the son of a military man. In his desire to follow his father's mode of life, he had set out for Philippopolis, where he could be enrolled in the legions, and on the road sees the body of a person recently slain, lying exposed upon the ground. On going up to it-for, besides the excellence of his other virtues, he was singularly compassionate-he commiserated the occurrence, and suspended his journey for some time, from a desire to discharge the due offices to the dead. Some persons, observing the circumstance, reported it to the authorities at Philippopolis, and they proceeded to apprehend Marcian, and interrogated him respecting the murder: and when, through the prevalence of conjecture and mere probability over truth and asseveration of innocence, he was upon the point of suffering the punishment of guilt, a providential interposition suddenly brings into their hands the real criminal, who, by forfeiting his own head as the penalty of the deed, procures an acquittance of the head of Marcian. After this unexpected escape, he presents himself to one of the military bodies stationed in the place, with the intention of enlistment. Struck with the singularity of his fortunes, and with reason concluding that he would arrive at power and preeminent distinction, they gladly admitted him, and that too without placing him, according to military rule. lowest on the roll; but they assigned to him the grade of a lately deceased soldier, named Augustus, by inscribing in the list, Marcian, called also Augustus. Thus did his name anticipate the style of our sovereigns, who assume the title of Augustus on attaining the purple. It was as if the name refused to abide on him without its appropriate rank, and, on the other hand, the rank was not ambitious of another name for the augmentation of its style: and thus arose an identity of his personal and titular appellations, since his dignity and his name found an expression in the same term. Another circumstance also occurred, which might serve as a prognostic of the imperial power being destined to Marcian. When serving under Aspar against the Vandals, he was one of many who fell into their hands on the total defeat of that general; and, on the demand of. Genseric to see the prisoners, was dragged with the rest along the plain. When the whole body was collected, Genseric sat in an upper chamber, surveying with delight the numbers that had been taken. As the time wore on, they pursued each his own inclination, for the guard had, at the order of Genseric, released them from their bonds; and while they accordingly disposed of themselves each in his several way, Marcian laid himself down upon the ground to sleep in the sun, which was shining with unusual heat for the season of the year. An eagle, however, poising his flight above him, and directly intercepting the sun as with a cloud, thus produced a shade and its consequent refreshment, to the amazement of Genseric, who, rightly presaging the future, sent for Marcian, and liberated him, having previously bound him by solemn oaths, that on attaining the imperial power he would maintain faithfully the rights of treaty towards the Vandals, and not commence hostilities against them; and Procopius records, that Marcian observed these conditions. But let us leave this digression, and return to my subject. Marcian was pious towards God, and just towards those under his rule; regarding as wealth neither treasured stores nor the revenue of imposts, but only the means of providing relief to the needy, and to the wealthy the security of their possessions. He was dreaded, not in the infliction of punishment, but only by its anticipation. On this account he received the sovereignty not as an inheritance, but as the prize of virtue, conferred by the unanimous voice both of the senate and men of all ranks, at the suggestion of Pulcheria, whom he also espoused as his partner in the imperial dignity, though she still remained a virgin to old age. These transactions took place without a previous ratification of the choice by Valentinian, the emperor of Rome, who, however, accorded his approval to the virtues of the person elected. It was further the desire of Marcian, that an undivided service should be offered up by all to God, by uniting in pious concord the tongues which the arts of impiety had confounded, and that the Deity should be honoured by one and the same doxology.

EVAGRIUS HISTORY CHAPTER 2

Council Of Chalcedon Summoned By Marcian.

While entertaining these intentions, the emperor is addressed both by the legates of Leo, bishop of the elder Rome, who alleged that Dioscorus had, during the second council of Ephesus, refused to receive the epistle of Leo, containing a formula of the true doctrine; and also by those who had been contumeliously treated by Dioscorus, intreating that their case might be submitted to the decision of a synod. But Eusebius, who had been president of the church of Dorylaeum, was especially urgent, and affirmed that both himself and Flavian had been deposed by the intrigues of Chrysaphius, the minister of Theodosius, because, in reply to his demand of an offering in gold, Flavian had, in acknowledgment of his own appointment, sent the sacred vessels to shame him; and also that Chrysaphius made a near approach to Eutyches in erroneous doctrine. He also said, that Flavian had even been brought to a miserable end by being thrust and trampled on by Dioscorus himself. These circumstances caused the synod at Chalcedon to be assembled; for which purpose the bearers of missives were despatched, and the prelates in all quarters were summoned by pious letters. The place named was, in the first instance, Nicaea; and, accordingly, Leo, the president of Rome, on writing an epistle respecting Paschasianus, Lucentius, and others, whom he had sent as his representatives, inscribed it to the council assembled at Nicaea. It was, however, subsequently convened at Chalcedon in Bithynia. Zacharias, the rhetorician, influenced by partiality, says that Nestorius was also fetched from his place of exile: but this is disproved by the circumstance, that Nestorius was generally anathematised by the members of the synod. And Eustathius, bishop of Berytus, clearly establishes the point, when writing in the following terms to John, a bishop, and another John, a presbyter, respecting the matters agitated in the assembly. Those who were in quest of the remains of Nestorius, again presenting themselves, clamorously demanded of the synod, why the saints are anathematised: so that the emperor indignantly ordered the guards to drive them far from the

place." How then Nestorius was summoned, when he had departed from the world, I am unable to say.

EVAGRIUS HISTORY CHAPTER 3

Description Of The Church Of St. Euphemia

The place of meeting was the sacred precinct of Euphemia, the martyr, situated in the district of Chalcedon in Bithynia, and distant not more than two stadia from the Bosphorus. The site is a beautiful spot, of so gentle an ascent, that those who are on their way to the temple, are not aware of their immediate approach, but suddenly find themselves within the sanctuary on elevated ground; so that, extending their gaze from a commanding position, they can survey the level surface of the plain spread out beneath them, green with herbage, waving with corn, and beautified with every kind of tree: at the same time including within their range woody mountains, towering gracefully or boldly swelling, as well as parts of the sea under various aspects: here, where the winds do not reach them, the still waters, with their dark blue tint, sweetly playing with gentle ripple on the beach; there wildly surging, and sweeping back the sea-weeds and the lighter shell-fish with the recoil of its waves. Directly opposite is Constantinople: and thus the beauty of the site is enhanced by the view of so vast a city. The holy place consists of three immense buildings. One is open to the sky, including a court of great extent, and embellished on all sides with columns; and next to it another, nearly resembling it in its length, breadth, and columns, and differing from it only in being roofed. On the north side of this, facing the East, is a round building, skilfully terminated in a dome, and surrounded in the interior with columns of uniform materials and size. These support a gallery under the same roof, so contrived, that those who are disposed, may thence both supplicate the martyr and be present at the mysteries. Within the domed building, towards the Eastern part, is a splendid enclosure, where are preserved the sacred remains of the martyr in a long coffin (it is distinguished by some persons by the term "long") of silver, skilfully worked. The wonders which have at certain times been wrought by the holy martyr, are manifest to all Christians. For frequently she has appeared in a dream to the bishops of the city from time to time, and even to certain persons whose lives have been otherwise distinguished, and has bid them visit her and gather a vintage at her sanctuary. When such an occurrence has been ascertained by the sovereigns, the patriarch, and the city, they visit the temple, both those who sway the sceptre, and those who are invested with sacred and civil offices, as well as the whole multitude, desirous to partake in the mysteries. Accordingly, the president of the church of Constantinople, with his attendant priests, enters, in sight of the public, the sanctuary where the already-mentioned sacred body is deposited. There is an aperture in the left side of the coffin, secured with small doors, through which they introduce a sponge attached to an iron rod, so as to reach the sacred relics, and after turning it round, they draw it out covered with stains and clots of blood. On witnessing this, all the people bend in worship, giving glory to God. So great has been the quantity of blood thus extracted, that both the pious sovereigns and the assembled priests, as well as the congregated people, all share in a liberal distribution, and portions are sent to those of the faithful who desire them, in every place under the sun. The clots also are permanent, neither does the appearance of the sacred blood undergo any change. These divine manifestations occur not at the recurrence of any definite period, but according as the life of the prelate or gravity of manners calls for them. Accordingly it is said, that when the governor of the church is a person reverend and remarkable for virtues, the marvel occurs with peculiar frequency; but when such is not his character, such divine operations are rarely displayed. I will, however, mention a circumstance which suffers no interruption depending on lapse of time or seasonable occasion, nor yet is vouchsafed with a distinction between the faithful and infidels, but to all indiscriminately. Whenever any person approaches the spot where is deposited the precious coffin in which are the holy relics, he is filled with an odour surpassing in sweetness every perfume with which mankind are acquainted, for it resembles neither the mingled fragrance of the meadows, nor that which is exhaled from the sweetest substances, nor is it such as any perfumer could prepare: but it is of a peculiar and surpassing kind, of itself sufficiently indicating the virtue of its source.

EVAGRIUS HISTORY CHAPTER 4 Council Of Chalcedon. [451 AD.]

This was, then, the place of meeting of the beforementioned synod; at which the bishops Paschasinus and Lucentius, and the presbyter Boniface, were the representatives of Leo, archpriest of the elder Rome; there being present Anatolius president of Constantinople, Dioscorus, bishop of Alexandria, Maximus of Antioch, and Juvenalis of Jerusalem: on whom attended both their associate priests, and those who held the places of highest rank in the

most excellent senate. To the latter the representatives of Leo

their bishop: as also that they would withdraw from the church, if they should be unable to maintain this point. In reply to the question of the senators, what were the charges against Dioscorus, they stated, that he ought himself to render an account of his own decision, since he had unduly assumed the character of a judge. After this statement had been made, and Dioscorus, according to a resolution of the senate, had taken his seat in the centre. Eusebius demanded, in the following words, that the petition should be read which he had presented to the sovereign power: "I have been wronged by Dioscorus; the faith has been wronged: the bishop Flavian was murdered, and, together with myself, unjustly deposed by him. Give directions that my petition be read." When the matter had been discussed, the petition was allowed to be read: it was couched in the following terms. "To our Christ-loving and most religious and pious sovereigns, Flavius Valentinianus, and Flavius Marcianus, the petition of Eusebius, the very humble bishop of Dorylaeum, who now pleads on behalf of himself and the orthodox faith, and the sainted Flavian, formerly bishop of Constantinople. It is the aim of your majesty to exercise a providential care of all your subjects, and stretch forth a protecting hand to all who are suffering wrong, and to those especially who are invested with the priesthood; for by this means service is rendered to God, from whom you have received the bestowal of supremacy and power over all regions under the sun. Inasmuch, then, as the Christian faith and we have suffered many outrages at the hands of Dioscorus, the most reverent bishop of the great city of the Alexandrians, we address ourselves to your piety in pursuance of our rights. The circumstances of the case are as follow:- At the synod lately held at the metropolitan city of the Ephesians-would that it had never met, nor the world been thereby filled with mischiefs and tumult- the excellent Dioscorus, regarding neither the principle of justice nor the fear of God, sharing also in the opinions and feelings of the visionary and heretical Eutyches, though unsuspected by the multitude of being such as he afterwards shewed himself, took occasion of the charge advanced by me against his fellow in doctrine, Eutyches, and the decision given by the sainted bishop Flavian, and having gathered a disorderly rabble, and procured an overbearing influence by bribes, made havoc, as far as lay in his power, of the pious religion of the orthodox, and established the erroneous doctrine of Eutyches the monk, which had from the first been repudiated by the holy fathers. Since, then, his aggressions against the Christian faith and us are of no trifling magnitude, we beseech and supplicate your majesty to issue your commands to the same most reverent bishop Dioscorus, to defend himself against our allegations: namely, when the record of the acts which Dioscorus procured against us, shall be read before the holy synod; on the ground of which we are able to shew, that he is estranged from the orthodox faith, that he strengthened a heresy utterly impious, that he wrongfully deposed and has cruelly outraged us. And this we will do on the issuing of your divine and revered mandates to the holy and universal synod of the bishops, highly beloved of God, to the effect, that they should give a formal hearing to the matters which concern both us and the before-mentioned Dioscorus, and refer all the transactions to the decision of your piety, as shall seem fit to your immortal supremacy. If we obtain this our request, we shall ever pray for your everlasting rule, most divine sovereigns.

themselves; for such, they said, were their instructions from

In the next place, at the joint request of Dioscorus and Eusebius, the acts of the second council of Ephesus were publicly read, the particulars of which, as being lengthy, and at the same time embraced by the detail of the proceedings at Chalcedon, I have subjoined to the present book of the history, that I might not seem prolix to those who are eager to be brought to the end of the transactions; thereby leaving to such as are desirous of minute acquaintance with every particular, the means of leisurely consultation and an accurate conception of the whole. By way of a cursory statement of the more important points, I mention, that Dioscorus was convicted of having suppressed the epistle of Leo, bishop of the elder Rome; and farther, of having enacted the deposition of Flavian, bishop of new Rome, in the space of a single day, and procured the subscriptions of the assembled prelates to a blank paper, represented as containing the form of the deposition. Upon these grounds, the senators decreed as follows: "Of points relating to the orthodox and catholic faith, we are agreed that a more exact inquiry should take place before a fuller assembly of the council, at its next meeting. But inasmuch as it has been shewn, from examination of the acts and decrees, and from the oral testimony of the presidents of that synod, who admit that themselves were in error, and the deposition was void, that Flavian, of pious memory, and the most reverent bishop Eusebius, were convicted of no error concerning the faith, and were wrongfully deposed, it seems to us, according to God's good pleasure, to be a just proceeding, if approved by our most divine and pious sovereign, that Dioscorus, the most reverent bishop of Alexandria; Juvenalis, the most reverent bishop of Jerusalem; Thalassius, the most reverent bishop of Caesarea, in Cappadocia; Eusebius, the most reverent bishop of Ancyra;

Eustathius, the most reverent bishop of Berytus; and Basilius, the most reverent bishop of Seleucia, in Isauria; who exercised sway and precedency in that synod; should be subjected to the selfsame penalty, by suffering at the hands of the holy synod deprivation of their episcopal dignity, according to the canons; whatever is consequent hereupon, being submitted to the cognizance of the emperor's sacred supremacy."

On the presentation of libels against Dioscorus at the next meeting of the council, containing charges of slander and extortion, and his refusal, for certain alleged reasons, to appear, after a twice and thrice repeated summons, the representatives of Leo, bishop of the elder Rome, made the following declaration:-"The aggressions committed by Dioscorus, lately bishop of the great city Alexandria, in violation of canonical order and the constitution of the church, have been clearly proved by the investigations at the former meeting, and the proceedings of to-day. For, not to mention the mass of his offences, he did, on his own authority, uncanonically admit to communion his partisan Eutyches, after having been canonically deprived by his own bishop, namely, our sainted father and archbishop Flavian; and this before he sat in council with the other bishops at Ephesus. To them, indeed, the holy see granted pardon for the transactions of which they were not the deliberate authors, and they have hitherto continued obedient to the most holy archbishop Leo, and the body of the holy and universal synod; on which account he also admitted them into communion with him, as being his fellows in faith. Whereas Dioscorus has continued to maintain a haughty carriage, on account of those very circumstances over which he ought to have bewailed and humbled himself to the earth. Moreover, he did not even allow the epistle to be read which the blessed pope Leo had addressed to Flavian, of holy memory; and that too, notwithstanding he was repeatedly exhorted thereto by the bearers, and had promised with an oath to that effect. The result of the epistle not being read, has been to fill the most holy churches throughout the world with scandals and mischief. Notwithstanding, however, such presumption, it was our purpose to deal mercifully with him as regards his past impiety, as we had done to the other bishops, although they had not held an equal judicial authority with him. But inasmuch as he has, by his subsequent conduct, overshot his former iniquity, and has presumed to pronounce excommunication against Leo, the most holy and religious archbishop of great Rome; since, moreover, on the presentation of a paper full of grievous charges against him to the holy and great synod, he refused to appear, though once, twice and thrice canonically summoned by the hishops pricked no doubt by his own conscience; and since he has unlawfully given reception to those who had been duly deposed by different synods; he has thus, by variously trampling upon the laws of the church, given his own verdict against himself. Wherefore Leo, the most blessed and holy archbishop of the great and elder Rome, has, by the agency of ourselves and the present synod, in conjunction with the thrice-blessed and all honoured Peter, who is the rock and basis of the Catholic church, and the foundation of the orthodox faith, deprived him of the episcopal dignity, and severed him from every priestly function. Accordingly, this holy and great synod decrees the provisions of the canons on the aforesaid Dioscorus "

After the ratification of these measures by the synod, and the transaction of some other matters, those who had been deposed together with Dioscorus, were reinstated, at the request of the synod and the assent of the imperial government; and, after some further transactions, a definition of faith was enounced in these precise words: "Our Lord Jesus Christ, while confirming the knowledge of the faith in his disciples said, 'My peace I give to you; my peace I leave to you;' to the purpose, that no one should differ from his neighbour in the doctrines of piety, but should accord in publishing the declaration of the truth." After the reading of the holy Nicene creed, and also that of the hundred and fifty holy fathers, they subjoined as follows: "This wise and salutary symbol of divine grace is indeed sufficient for the perfect knowledge and confirmation of godliness; for, concerning the Father, and the Son, and the Holy Spirit, its teaching is plain and complete, and it sufficiently suggests the incarnation of the Lord to those who receive it faithfully. But since the enemies of the truth are endeavouring to subvert its doctrine by heresies of their own, and have given birth to certain empty speeches, some daring to pervert the mystery of the economy which the Lord bore for our sakes, and rejecting the term 'Mother of God,' in the case of the Virgin; others introducing a confusion and commixture of substance, and inconsiderately moulding into one the natures of the flesh and of the Godhead, and by such confusion producing the monstrous notion of passibility in the divine nature of the Only-begotten; for this reason the present great and universal holy synod, from a desire to preclude every device of theirs against the truth, and to maintain the hitherto unshaken declaration of doctrine, has determined primarily that the creed of the three hundred and eighteen holy fathers shall be indefeasible; and, on account of those who impugn the Holy Spirit, it ratifies the doctrine

delivered subsequently concerning the substance of the Spirit by the hundred and fifty fathers, who assembled in the imperial city, and by them promulgated universally, not as though they were supplying some defect on the part of their predecessors, but were more clearly setting forth, by expressly recorded testimony, their notion respecting the Holy Spirit, in opposition to those who endeavoured to annul His prerogative. In respect to those who have dared to corrupt the mystery of the economy, and with shameless wantonness to represent Him who was born of the holy Virgin as a mere man, the, council has adopted the synodic epistles of the blessed Cyril, pastor of the church of the Alexandrians, addressed to Nestorius and the prelates of the East, in refutation of the madness of Nestorius, and for the instruction of those who with pious zeal are desirous of being impressed with a due conception of the saving symbol. To these the council has not without reason appended, in order to the confirmation of the true doctrines, the epistle of the president of the great and elder Rome, which the most blessed and holy archbishop Leo addressed to the sainted archbishop Flavian, for the overthrow of the evil design of Eutyches; as being in agreement with the confession of the mighty Peter, and forming with it a monument of concurrent testimony against the maintainers of pernicious opinions; for it boldly confronts those who endeavour to dissever the mystery of the economy into a duality of sons; it expels from the congregation of the holy rites those who presume to affirm that the Godhead of the Only-begotten is passible; and opposes those who imagine a mixture or confusion in respect of the two natures of Christ. It also ejects such as fondly fancy that the form of a servant which He assumed from our own nature, was of a heavenly or any other substance ; and it anathematises those who fable a resolution into one, at their union, of two previous natures of the Lord. Following, accordingly, the holy fathers, we confess one and the same Son, our Lord Jesus Christ, and we all with one voice declare him to be at the same time perfect in Godhead, and perfect in manhood, very God, and at the same time very man, consisting of a reasonable soul and a body, being consubstantial with the Father as respects his Godhead, and at the same time con substantial with ourselves as respects his manhood; resembling us in all things, independently of sin; begotten, before the ages, of the Father, according to his Godhead, but born, in the last of the days, of Mary, the virgin and mother of God, for our sakes and for our salvation; being one and the same Jesus Christ, Son, Lord, Only-begotten, made known in two natures without confusion, without conversion, without severance, without separation, inasmuch as the difference of the natures is in no way annulled by their union, but the peculiar essence of each nature is rather preserved, and conspires in one person and one subsistence, not as though he were parted or severed into two persons, but is one and the same Son, Only-begotten, Divine Word, Lord Jesus Christ, as the prophets declared concerning Him, and Christ himself has fully instructed us, and the symbol of the fathers has conveyed to us. Since, then, these matters have been defined by us with all accuracy and diligence, the holy and universal synod has determined that no one shall be at liberty to put forth another faith, whether in writing, or by framing, or devising, or teaching it to others. And that those who shall presume to frame, or publish, or teach another faith, or to communicate another symbol to those who are disposed to turn to the knowledge of the truth from heathenism or Judaism, or any other sect-that they, if they be bishops or clerks, shall suffer deprivation, the bishops of their episcopal, the clerks of their clerical office; and if monks or laics, shall be anathematised." After the reading of the formula, the emperor Marcian visited Chalcedon, and attended the synod. and, having delivered an harangue, again took his departure. Juvenalis also and Maximus arranged on mutual terms the matters relating to their own provinces, and Theodoret and Ibas were reinstated. Other matters were also mooted; an account of which, as I have already said, is subjoined to this history. It was also determined that the see of New Rome, while ranking second to that of Old Rome, should take precedence of all others.

EVAGRIUS HISTORY CHAPTER 5

Tumult At Alexandria—And At Jerusalem. [451 AD.] In addition to these transactions, Dioscorus is sentenced to reside at Gangra in Paphlagonia, and Proterius is appointed to the see of Alexandria by a general vote of the synod. On his taking possession of his see, a very great and intolerable tumult arose among the people, who were roused into a storm against conflicting opinions; for some, as is likely in such cases, desired the restoration of Dioscorus, while others resolutely upheld Proterius, so as to give rise to many irremediable mischiefs. Thus Priscus, the rhetorician, recounts, that he arrived at Alexandria from the Thebaid, and that he saw the populace advancing in a mass against the magistrates: that when the troops attempted to repress the tumult, they proceeded to assail them with stones, and put them to flight, and on their taking refuge in the old temple of Serapis, carried the place by assault, and committed them alive to the flames: that the emperor, when informed of these events,

despatched two thousand newly levied troops, who made so favourable a passage, as to reach Alexandria on the sixth day: and that thence resulted still more alarming consequences, from the license of the soldiery towards the wives and daughters of the Alexandrians: that, subsequently, the people, being assembled in the hippodrome, entreated Floras, who was the military commandant, as well as the civil governor, with such urgency as to procure terms for themselves, in the distribution of provisions, of which he had deprived them, as well as the privileges of the baths and spectacles, and all others from which, on account of their turbulence, they had been debarred: that, at his suggestion, Floras presented himself to the people, and pledged himself to that effect, and by this means stopped the sedition for a time. Nor did even the wilderness in the neighbourhood of Jerusalem preserve its tranquillity, unvisited by this commotion. For there arrived in Palestine some of the monks who had been present at the council, but were disposed to harbour designs in opposition to it; and by lamenting the betrayal of the faith, exerted themselves to fan into a flame the monastic body. And when Juvenalis, after obtaining restitution to his see, had been compelled to return to the imperial city, by the violence of the party who claimed the right to supersede and anathematise in their own province, those who, as we have already mentioned, were opposed to the acts of the council of Chalcedon, assembled in the church of the Resurrection, and appointed Theodosius, who had especially caused confusion in the council, and been the first to bring a report of its proceedings, and respecting whom, at a subsequent period, the monks of Palestine alleged, in letters to Alcison, that having been convicted of malpractices in relation to his own bishop, he had been expelled from his monastery: and that at Alexandria he had impugned the conduct of Dioscorus, and, after having been severely scourged as a seditious person, had been conveyed round the city on a camel, as is usual with malefactors. To him many of the cities of Palestine made application, with a view to the ordination of bishops. Among these was Peter the Iberian; to whom was committed the episcopal helm of the city called Majumas, in the neighbourhood of Gaza. On being informed of these proceedings, Marcian, in the first place, commands Theodosius to be conveyed near his own person, and sends Juvenalis to rectify the past, with an injunction that all who had been ordained by Theodosius should be ejected. Many sad occurrences followed the arrival of Juvenalis, while either party indulged in whatever proceedings their anger suggested. Such was the device of the envious and God-hating demon in the change of a single letter, that, while in reality the one expression was completely inductive of the notion of the other. still with the generality the discrepancy between them was held to be considerable, and the ideas conveyed by them to be clearly in diametric opposition, and exclusive of each other: whereas he who confesses Christ in two natures, clearly affirms Him to be from two: inasmuch as by confessing Christ at once in Godhead and manhood he asserts His consistence from Godhead and manhood; and, on the other hand, the position of one who affirms His origin from two natures, is completely inclusive of His existence in two, inasmuch as he who affirms Christ to be from Godhead and manhood, confesses His existence in Godhead and manhood, since there is no conversion of the flesh into Godhead, nor a transition of the Godhead into flesh, from which substances arises the ineffable union. So that in this case by the expression, "from two natures," is aptly suggested the thought of the expression, "in two," and conversely; nor can there be a severance of the terms, this being an instance where a representation of the whole is afforded, not merely by its origin from component parts, but, as a further and distinct means, by its existence in them. Yet, nevertheless, persons have so taken up the idea of the marked distinction of the terms, either from a habit of thought respecting the glory of God, or by the inclination forestalling the judgement, as to be reckless of death in any shape, rather than acknowledge the real state of the case; and hence arose the occurrences which I have described. Such then was the state of these matters.

EVAGRIUS HISTORY CHAPTER 6

Drought, Famine, And Pestilence In Asia Minor. About the same time there was also a drought in Phrygia, Galatia, Cappadocia, and Cilicia: and, from want of ordinary necessaries, the inhabitants had recourse to unwholesome food, which further gave rise to pestilence. The change of food caused disease; excessive inflammation produced a swelling of the body, followed by loss of sight, and attended with a cough, and death took place on the third day. For a time no relief could be devised for the pestilence; but all-preserving Providence vouchsafed to the survivors a remedy for the famine, by raining down food in the unproductive year, in the same way as what was termed manna upon the Israelites; and, during the succeeding year, by willing that the fruits of the earth should be matured spontaneously. The spread of these calamities included also Palestine and innumerable other districts, making, as it were, a circuit of the earth.

EVAGRIUS HISTORY CHAPTER 7

Death Of The Emperor Valentinian.-Rome Taken.-Successors Of Valentinian.

During the progress of these events in the East, Aetius meets with a miserable end at Old Rome, and Valentinian, the emperor of the West, is slain, together with Heraclius, by some of the guards of Aetius, at the instigation of Maximus, who afterwards assumed the sovereignty, and who conspired against them because Valentinian had violated his wife. This Maximus forces Eudoxia, the wife of Valentinian, into a marriage with himself; and she, justly regarding the transaction as an outrage and altogether monstrous, determined to set, as the saying is, all upon a cast, on account of the wrong she had suffered both in the person of her husband and the infringement of her liberty: for a woman. jealous of her chastity, is unscrupulous and implacable if she has suffered defilement, especially by one through whose means she has been deprived of her husband. Accordingly, she sends to Genseric, in Africa, and by considerable presents, as well as by holding out confident expectations of the future, induces him to make a sudden descent upon the Roman empire with a promise of betraying every thing into his hands. This was accordingly done, and Rome captured. But Genseric, barbarian-like and fickle, did not maintain his fidelity even to her; but, after firing the city and making an indiscriminate pillage, he retired, taking with him Eudoxia and her two daughters, and returned to Africa. The elder daughter, Eudocia, he espouses to his own son, Huneric; but the younger, Placidia, he subsequently sends, together with her mother Eudoxia, with a royal escort to Constantinople, with the view of pacifying Marcian, who was exasperated both by the burning of Rome and the outrage upon the royal ladies. Placidia, in obedience to Marcian, consents to marry Olybrius, a distinguished member of the senate, who had come to Constantinople on the capture of Rome. After Maximus, Avitus was emperor of the Romans for eight months; and on his decease by starvation, Majorian for more than a year: and after he had been treacherously murdered by Ricimer, master of the Roman armies, Severus for three years.

EVAGRIUS HISTORY CHAPTER 8

Death Of The Emperor Marcian. [457 AD.]- Murder Of Proterius, Bishop Of Alexandria. - Election Of Timothy, Surnamed Aelurus (The Cat).

During the reign of Severus at Rome, Marcian exchanges his earthly sovereignty by a removal to a happier state, having reigned only seven years, but leaving behind him a truly royal monument in the memories of mankind. On learning this event, the people of Alexandria renewed their feud against Proterius with still greater exasperation and excessive heat: for the populace in general are an inflammable material, and allow very trivial pretexts to foment the flame of commotion, and not in the least degree that of Alexandria, which presumes on its numbers, chiefly an obscure and promiscuous rabble, and vaunts forth its impulses with excessive audacity. Accordingly, it is said that every one who is so disposed may, by employing any casual circumstance as a means of excitement, inspire the city with a frenzy of sedition, and hurry the populace in whatever direction and against whomsoever he chooses. Their general humour, however, is even of a sportive kind, as Herodotus records to have been the case with Amasis. Such, then, is the character of this people; who were, however, in all other respects by no means contemptible. The people of Alexandria, accordingly, taking advantage of the prolonged absence of Dionysius, commander of the legions, in Upper .Egypt, decree the elevation to the highest priestly grade, of Timotheus, surnamed Aelurus, who had formerly followed the monastic life, but had subsequently been admitted among the presbyters of the church of Alexandria; and, conducting him to the great church, styled that of Caesar, elect him their bishop, though Proterius was still alive and discharged the functions of his office. There were present at the election, Eusebius, president of the church of Pelusium, and Peter the Iberian, bishop of the town of Majumas, according to the account given of the transaction by the writer of the life of Peter, who also says that Proterius was not killed by the populace, but by one of the soldiers. When Dionysius, on account of the urgency of these disorders, had occupied the city with the utmost dispatch, and was taking prompt measures to quench the towering conflagration of the sedition, some of the Alexandrians, at the instigation of Timotheus, according to the written report made to Leo, despatch Proterius when he appeared, by thrusting a sword through his bowels, after he had fled for refuge to the holy baptistery. Suspending the body by a cord, they displayed it to the public in the quarter called Tetrapylum, jeering and vociferating that the victim was Proterius; and, after dragging it through the whole city, committed it to the flames: not even refraining themselves from tasting his intestines, like beasts of prey, according to the account of the entire transaction contained in the petition addressed by the Egyptian bishops and the whole clergy of Alexandria to Leo, who, as has been said, was invested with the imperial power on the death of Marcian. It was couched in

the following terms:-"To the pious, Christ-loving, and divinely-appointed, the victorious and triumphant Augustus Leo, the petition of all the bishops of your Egyptian diocese, and the clergy of your most dignified and holy church of Alexandria. Having been granted, by divine grace, a boon to mankind, as such you cease not to exercise, next to God, a daily providence of the common weal, Augustus, most sacred of all emperors." After some other matters, the petition proceeds: "And while undisturbed peace was prevailing among the orthodox people of our country and Alexandria, Timotheus, immediately after the holy synod at Chalcedon, being at that time a presbyter, severed himself from the Catholic church and faith, together with only four or five bishops and a few monks, of those who, as well as himself, were infected with the heretical errors of Apollinaris and his followers; on account of which opinions they were then deposed by Proterius, of divine memory, and the general synod of Egypt, and duly experienced the motion of the imperial will, in the sentence of banishment." And afterwards it proceeds: "And having watched the opportunity afforded by the departure from this world to God of the emperor Marcian, of sacred memory, assuming then in blasphemous terms a bold tone of independence, and shamelessly anathematising the holy and general synod at Chalcedon, while he drew after him a mercenary and disorderly multitude, and assailed the divine canons and ecclesiastical order, the commonwealth and the laws, he intruded himself upon the holy church of God, which at that time was possessed of a pastor and teacher in the person of our most holy father and archbishop, Proterius, duly performing the ordinary rites, and offering up to Christ, the Saviour of us all, supplications in behalf of your pious sovereignty and your Christ-loving court." And presently it proceeds: "And after the interval of only one day, while Proterius, beloved of God, was occupying, as usual, the episcopal residence, Timotheus, taking with him the two bishops who had been justly deposed, and the clergy who, as we have said, were condemned to banishment with them, as if he had received rightful ordination at the hands of the two, though not one of the orthodox bishops of the whole Egyptian diocese was present, as is customary on occasion of the ordinations of the bishop of the church of Alexandria-he possesses himself, as he presumed, of the archiepiscopal see, though manifestly guilty of an adulterous outrage on the church, as already having her rightful spouse in one who was performing the divine offices in her, and canonically occupied his proper throne." And further on: "The blessed man could do nothing else than give place to wrath, according to what is written, and take refuge in the venerable baptistery from the assault of those who were pursuing him to death, a place which especially inspires awe even into barbarians and savages, though ignorant of its dignity, and the grace which flows from it. Notwithstanding, however, those who were eager to carry into execution the design which Timotheus had from the first conceived and who could not endure that his life should be protected by those undefiled precincts, neither reverenced the dignity of the place, nor yet the season (for it was the solemnity of the saving paschal feast), nor were awe-struck at the priestly office which mediates between God and man; but put the blameless man to death, cruelly butchering him with six others. They then drew forth his body, covered with wounds, and having dragged it in horrid procession with unfeeling mockery through almost every part of the city, ruthlessly loaded the senseless corpse with indignity, so far as to tear it limb from limb, and not even abstain from tasting, like beasts of prey, the ilesh of him whom but just before they were supposed to have as a mediator between God and man. They then committed what remained of the body to the flames. and scattered the ashes to the winds, exceeding the utmost ferocity of wild beasts. Of all these transactions Timotheus was the guilty cause, and the skilful builder of the scheme of mischief." Zacharias, however, while treating at length of these events, is of opinion that the greater part of the circumstances thus detailed actually occurred, but through the fault of Proterius, by his instigation of serious disturbances in the city, and that these outrages were committed, not by the populace, but by some of the soldiery; grounding his opinion on a letter addressed by Timotheus to Leo. In consequence, however, of these proceedings, Stilas is sent out by the emperor to chastise them

EVAGRIUS HISTORY CHAPTER 9 Letter From The Emperor Leo.

Leo also addresses circular letters of inquiry to the bishops throughout the empire and the most distinguished monastics, relating to the synod at Chalcedon and the ordination of Timotheus, surnamed Aelurus, accompanying them with copies of the petitions which had been presented to him on the part both of Proterius and Timotheus. The circular letters were couched in the following terms:-

A copy of the sacred epistle of the most pious emperor Leo to Anatolius, bishop of Constantinople, to the metropolitans throughout the whole world, and the other bishops.

"The emperor Caesar Leo, pious, victorious, triumphant, supreme, ever-worshipful Augustus, to the bishop Anatolius.

orthodox and most holy churches, and, indeed, the cities throughout the Roman dominion, should enjoy perfect tranquillity, and that nothing should befall them to disturb their settled serenity. The events, however, which have lately happened at Alexandria, we are assured, are known to your holiness: but that you may be more fully informed respecting the entire transaction, and the cause of so much tumult and confusion, we have forwarded to your sanctity copies of the petitions which the most reverent bishops and clergy of the before-mentioned city, and of the Egyptian diocese, presented to our piety against Timotheus, at the imperial city of Constantine; and, in addition, copies of the petitions presented to our serenity, at our sacred court, by persons from Alexandria on behalf of Timotheus: so that your holiness will be able distinctly to learn what have been the proceedings of the before-mentioned Timotheus, whom the people of Alexandria and their dignitaries, senators, and ship-masters request for their bishop, and what relates to the other transactions, as intimated by the tenor of the petitions, as well as regarding the synod at Chalcedon, to which these parties by no means assent, according as the matters are set forth by the petitions appended. Your reverence will accordingly forthwith cause to assemble to you all the orthodox holy bishops who are now resident in the imperial city, as also the most reverent clergy; and, after carefully investigating and testing every circumstance, considering that Alexandria is at present disturbed, and that we are most solicitous for its settlement and tranquillity, declare your opinion respecting the before-mentioned Timotheus and the synod at Chalcedon, without any fear of man, and apart from all favour or dislike; setting before your eyes only the fear of the Almighty, inasmuch as ye know that ye shall give account of this matter to His pure Godhead. This we enjoin, in order that, being perfectly informed by your letters, we may be able to frame the fitting issue on the entire matter." The emperor wrote also in similar terms to the other bishops, and, as I have said, to the most distinguished among those who at that period were practising the endurance of the bare and immaterial mode of life. Among these was Simeon, who first conceived the station on the pillar, and of whom I have made mention in the former part of the history; as well as Baradatus and Jacob, the Syrians.

It has ever been a subject of prayer to my piety, that all the

EVAGRIUS HISTORY CHAPTER 10

Replies Of The Bishops.—And Of Simeon. Accordingly, in the first instance, Leo, bishop of the elder Rome both wrote in defence of the synod at Chalcedon and declared the ordination of Timotheus to be null, as having been irregularly performed. This epistle the emperor Leo dispatches to Timotheus, president of the church of Alexandria; Diomedes, the silentiary, executing the imperial commission: and Timotheus wrote in rejoinder, excepting to the synod at Chalcedon and the epistle of Leo. Of these documents copies are preserved in the collection called the Circulars: but I have omitted them, to avoid encumbering the matter on hand with too great a number. The bishops, too, of the other cities, expressed their adherence to the determinations framed at Chalcedon, and unanimously condemned the ordination of Timotheus. Amphilochius alone, bishop of Side, wrote an epistle, loudly reprobating the ordination of Timotheus, but also rejecting the synod at Chalcedon. Zacharias the rhetorician has also treated of these transactions, and has inserted the epistle itself of Amphilochius in his work. Simeon, too, of holy memory, wrote two epistles on the occasion; namely, to the emperor Leo, and to Basilius, bishop of Antioch. The latter, as being brief, I insert in this my history, as follows: "To my lord, the most religious and holy servant of God, the archbishop Basilius, the sinful and humble Simeon wishes health in the Lord. Well may we now say, my lord: Blessed be God, who has not rejected our prayer, nor withdrawn his mercy from us sinners. For, on the receipt of the letters of your worthiness, I admired the zeal and piety of our sovereign, beloved of God, which he manifested and still manifests towards the holy fathers and their unshaken faith. And this gift is not from ourselves, as says the holy apostle, but from God, who, through your prayers, bestowed on him this readiness of ' And presently he proceeds: "On this account, I also, mind. though mean and worthless, the refuse of the monks, have conveyed to his majesty my judgment respecting the creed of the six hundred and thirty holy fathers assembled at Chalcedon, firmly resolving to abide by the faith then revealed by the Holy Spirit: for if, in the midst of two or three who are gathered in His name, the Saviour is present, how could it be otherwise, than that the Holy Spirit should be throughout in the midst of so many and so distinguished holy fathers?" And afterwards he proceeds: "Wherefore be stout and courageous in the cause of true piety, as was also Joshua the son of Nun, the servant of the Lord, in behalf of the children of Israel. I beg you to salute from me all the reverent clergy who are under your holiness, and the blessed and most faithful laity.'

EVAGRIUS HISTORY CHAPTER 11 Punishment Of Timothy.

On these grounds Timotheus is sentenced to banishment, and Gangra is in his case also named as the place of exile. The Alexandrians then elect another Timotheus, variously surnamed Basilicus and Salofacialus. Anatolius dies, and Gennadius succeeds him in the see of the imperial city. His successor is Acacius, who had been master of the Orphan Hospital in that city.

EVAGRIUS HISTORY CHAPTER 12

Earthquake At Antioch.

During the second year of the reign of Leo, an extraordinary shock and concussion of the earth took place at Antioch, preceded by certain excesses of the populace, which reached the extreme of frenzy, and surpassed the ferocity of beasts, forming, as it were, a prelude to such a calamity. This grievous visitation occurred in the five hundred and sixth year of the free prerogatives of the city, about the fourth hour of the night, on the fourteenth day of the month Gorpiaeus, which the Romans call September, on the eve of the Lord's day, in the eleventh cycle of the indiction; and was the sixth on record after a lapse of three hundred and forty-seven years, since the earthquake under Trajan; for that occurred when the city was in the hundred and fifty-ninth year of its independence; but this, which happened in the time of Leo, in the five hundred and sixth, according to the most diligent authorities. This earthquake threw down nearly all the houses of the New City, which was very populous, and contained not a single vacant or altogether unoccupied spot, but had been highly embellished by the rival liberality of the emperors. Of the structures composing the palace, the first and second were thrown down: the rest, however, remained standing, together with the adjoining baths, which, having been previously useless, were now rendered serviceable to the necessities of the city, arising from the damage of the others. It also levelled the porticoes in front of the palace and the adjacent Tetrapylum, as well as the towers of the Hippodrome, which flanked the entrances, and some of the porticoes adjoining them. In the Old City, the porticoes and dwellings entirely escaped the overthrow; but it shattered a small portion of the baths of Trajan, Severus, and Hadrian, and also laid in ruins some parts of the quarter of houses named Ostracine, together with the porticoes, and levelled what was called the Nymphaeum. All these circumstances have been minutely detailed by John the rhetorician. He says, that a thousand talents of gold were remitted to the city from the tributes by the emperor; and, besides, to individual citizens, the imposts of the houses destroyed: and that he also took measures for the restoration both of them and of the public buildings.

EVAGRIUS HISTORY CHAPTER 13

Conflagration At Constantinople. [462 AD.] A Similar, or even more terrible calamity, befell Constantinople, which took its rise from the quarter of the city bordering on the sea, and named Bosporium. The account is, that about dusk-hour, a demon of destruction in the form of a woman, or in reality a poor woman incited by a demon, for the story is told in both ways, carried a light into the market for the purpose of buying pickled victuals, and then, having set down the light, stole away. Catching some tow, it raised a great flame, and in a moment set the apartment on fire. The conflagration, thus begun, soon consumed every thing within its reach, and afterwards continuing to spread for four days, not only over the more combustible materials, but buildings of stone, notwithstanding every effort to check it, at last destroyed the whole heart of the city from north to south, a space of five stadia in width, and fourteen in length; throughout which it left no building standing, either public or private, nor pillars nor arches of stone; but the hardest substances were as completely consumed as if they had been combustible. The ruin, at its northern extremity, which is where the docks are situated, extended from the Bosporium to the old temple of Apollo; at the southern, from the harbour of Julian as far as the houses near the oratory of the church of Unanimity: and in the centre of the city, from the forum of Constantine to the Forum Tauri, as it is called: a pitiable and loathsome spectacle; for all the most conspicuous ornaments of the city, and whatever had been embellished with unrivalled magnificence, or adapted to public or private utility, had been swept together into huge heaps and impassable mounds, formed of various substances, whose former features were now so blended in one confused mass, that not even those who lived on the spot could recognise the different portions, and the place to which each had belonged.

EVAGRIUS HISTORY CHAPTER 14

Other Public Calamities.

About the same time, when the Scythian war was gathering against the Eastern Romans, an earthquake visited Thrace, the Hellespont, Ionia, and the islands called Cyclades; so severe as to cause a universal overthrow in Cnidus and Cos. Priscus also records the occurrence of excessive rains about Constantinople and Bithynia, which descended like torrents for three or four days; when hills were swept down to the plains, and villages carried away by the deluge: islands also were formed in the lake Boane, not far from Nicomedia, by the masses of rubbish brought down by the waters. This evil, however, was subsequent to the former.

EVAGRIUS HISTORY CHAPTER 15

Marriage Of Zeno And Ariadne.

Leo bestows his daughter Ariadne on Zeno, who from his infancy had been called Aricmesius, but on his marriage assumed the former name, derived from an individual who had attained great distinction among the Isaurians. The origin of the advancement of this Zeno, and the reason why he was preferred by Leo before all others, have been set forth by Eustathius the Svrian.

EVAGRIUS HISTORY CHAPTER 16

Reign Of Anthemius-Of Olybrius-And Other Western Princes.

In compliance with an embassy from the Western Romans, Anthemius is sent out as emperor of Rome; to whom the late emperor Marcian had betrothed his own daughter. Basiliscus, brother to the emperor's wife Verina, is also sent out against Genseric, in command of a body of chosen troops: which transactions have been treated of with great exactness by Priscus the rhetorician; and how Leo, in repayment, as it were, for his own advancement, treacherously procures the death of Aspar, who had been the means of investing him with the sovereignty, and also of his sons, Ardaburius and Patricius; on the latter of whom he had previously bestowed the title of Caesar, in order to conciliate Aspar. After the slaughter of Anthemius, in the fifth year of his reign, Olybrius is declared emperor by Ricimer; and after him appointment is made of Glycerius. Nepos possesses himself of the supreme power for five years, by the expulsion of Glycerius, whom he appoints to the bishopric of Salona, a city of Dalmatia. He is himself driven from power by Orestes, as was subsequently Romulus, surnamed Augustulus, the son of the latter, who was the last emperor of Rome, at an interval of thirteen hundred and three years from the reign of Romulus. Odoacer next sways the affairs of the Romans, declining the imperial title, but assuming that of king.

EVAGRIUS HISTORY CHAPTER 17 Death Of The Emperor Leo. [474 AD.]

About the same time the [child] emperor Leo (Leo II, Flavius Leo lunior Augustus, 467-474 AD), at Constantinople, departs his sovereignty, after having swayed it for seventeen years, and appointed to the empire Leo, the infant son of his daughter Ariadne and Zeno. Zeno then assumes the purple, being aided by the favour of Verina, the wife of Leo, towards her son-in-law. On the death of the child, which shortly followed, Zeno continued in sole possession of the sovereignty. The transactions which originated with him, or were directed against him, and whatever else befell him, the sequel shall detail, with the aid of the Superior Power.

The proceedings of the synod at Chalcedon are here given in a compendious form.

EVAGRIUS HISTORY CHAPTER 18

Epitome Of The Acts Of The Council Of Chalcedon.

Paschasinus and Lucentius, bishops, and Boniface, a presbyter, filled the place of Leo, archpriest of the elder Rome; there being present Anatolius president of the church of Constantinople, Dioscorus bishop of Alexandria, Maximus of Antioch, and Juvenalis of Jerusalem, and with them their associate bishops: on whom attended also those who held the highest rank in the most excellent senate. To the latter the representatives of Leo alleged, that Dioscorus ought not to be seated with themselves, for such were their instructions from Leo; and that if this should be allowed, they would retire from the church. In reply to the question of the senators, what were the charges against Dioscorus, they stated, that he ought himself to render an account of his own decision, since he had unduly assumed the character of a judge, without being authorised by the bishop of Rome. After this statement had been made, and Dioscorus stood in the midst, according to a decision of the senate, Eusebius, bishop of Dorylaeum, demanded, in the following words, that the petition should be read which he had presented to the sovereign power: "I have been wronged by Dioscorus; the faith has been wronged; Flavian the bishop was murdered, and together with myself unjustly deposed by him. Give directions that my petition be read." On its being so ruled, the petition was read, couched in the following terms: "The petition of Eusebius, the very humble bishop of Dorylaeum, in behalf of himself and the sainted Flavian, formerly bishop of Constantinople. It is the aim of your majesty to exercise a providential care of all your subjects, and stretch forth a protecting hand to all who are suffering wrong, and to those especially who are invested with the priesthood; for by this means service is rendered to God, from whom you have re ceived the bestowal of supremacy and power over all regions under the sun. Inasmuch, then, as the Christian faith and we have suffered many outrages at the

hands of Dioscorus, the most reverent bishop of the great city of the Alexandrians, we address ourselves to your piety in pursuance of our rights. The circumstances of the case are as follow:-At the synod lately held at the metropolitan city of the Ephesians- would that it had never met, nor the world been thereby filled with mischiefs and tumult-the excellent Dioscorus, regarding neither the principle of justice nor the fear of God, sharing also in the opinions and feelings of the visionary and heretical Eutyches, though unsuspected by the multitude of being such as he afterwards shewed himself, took occasion of the charge advanced by me against his fellow in doctrine, Eutyches, and the decision given by the sainted bishop Flavian, and having gathered a disorderly rabble, and procured an overbearing influence by bribes, made havoc as far as lay in his power, of the pious religion of the orthodox. and established the erroneous doctrine of Eutyches the monk, which had from the first been repudiated by the holy fathers. Since, then, his aggressions against the Christian faith and us are of no trifling magnitude, we beseech and supplicate your majesty to issue your commands to the same most reverent bishop Dioscorus, to defend himself against our allegations; namely, when the record of the acts which Dioscorus procured against us, shall be read before the holy synod; on the ground of which we are able to shew, that he is estranged from the orthodox faith, that he strengthened a heresy utterly impious, that he wrongfully deposed and has cruelly outraged us. And this we will do on the issuing of your divine and revered mandates to the holy and universal synod of the bishops, highly beloved of God, to the effect, that they should give a formal hearing to the matters which concern both us and the before-mentioned Dioscorus, and refer all the transactions to the decision of your piety, as shall seem fit to your immortal supremacy. If we obtain this our request, we shall ever pray for your everlasting rule, most divine sovereigns.

At the joint request of Dioscorus and Eusebius, the transactions of the second synod of Ephesus were publicly read; from which it appeared that the epistle of Leo had not obtained a reading, and that, too, when mention of the subject had been twice started. Dioscorus, being called upon to state the reason of this, said expressly that he had twice proposed that it should be done; and he then required that Juvenalis, bishop of Jerusalem, and Thalassius, bishop of Caesarea, metropolis of Cappadocia Prima, should explain the circumstances, since they shared the presidency with himself. Juvenalis accordingly said, that the reading of a sacred rescript, having precedency, had, at his decision, been interposed, and that no one had subsequently mentioned the epistle. Thalassius said that he had not opposed the reading, nor had he sufficient authority to enable him singly to signify that it should proceed. The reading of the transactions was then proceeded with; and on some of the bishops excepting to certain passages as forgeries, Stephen, bishop of Ephesus, being asked which of his notaries were copyists in this place, named Julian, afterwards bishop of Lebedus, and Crispinus; but said that the notaries of Dioscorus would not allow them to act, but seized their fingers, so that they were in danger of most grievous treatment. He also affirmed, that on one and the same day he subscribed to the deposition of Flavian. To this statement, Acacius, bishop of Ariarathia, added, that they had all subscribed a blank paper by force and compulsion, being beset with innumerable evils, and surrounded by soldiers with deadly weapons.

Again, on the reading of another expression, Theodore, bishop of Claudiopolis, said that no one had uttered the words. And as the reading was thus proceeding, on the occurrence of a passage to the effect that Eutyches expressed his disapproval of those who affirmed that the flesh of our God and Lord and Saviour Jesus Christ had descended from heaven. the acts testify that Eusebius, upon this, asserted that Eutyches had discarded indeed the term "from heaven," but had not proceeded to say from whence; and that Diogenes, bishop of Cyzicus, then urged him with the demand, "Tell us from whence;" but that further than this they were not allowed to press the question. The acts then shew:--that Basil, bishop of Seleucia, in Isauria, said, "I worship our one Lord Jesus Christ, the Son of God, the only Divine Word, manifested after the incarnation and union in two natures;"-that the Egyptians clamoured against this, "Let no one part the indivisible One; it is not proper to call the one Son two;" and that the Orientals exclaimed, "Anathema to him that parts! anathema to him that divides!"-that Eutyches was asked, whether he affirmed two natures in Christ; to which he replied, that he held Christ to have been from two natures before the union, but that after the union there was only one;-that Basil said, that unless he maintained two natures without severance and without confusion after the union, he maintained a confusion and commixture; but, notwithstanding, if he would add the terms "incarnate," and "invested with humanity," and should understand the incarnation and the assumption of humanity in the same sense as Cyril, he affirmed the same thing as themselves; for the Godhead derived from the Father was one thing, and humanity from His mother was another.

On the parties being asked why they had subscribed the deposition of Flavian, the acts shew that the Orientals exclaimed, "We have all erred; we all intreat pardon." Again, as the reading proceeded, they shew that the bishops were asked why, when Eusebius wished to enter the council, they did not allow him. To this Dioscorus replied, that Elpidius presented a commonitorium, and solemnly affirmed that the emperor Theodosius had given command that Eusebius should not be admitted. The acts shew that Juvenalis also gave the same answer. Thalassius, however, said that authority in the matter did not rest with himself. These replies were disallowed by the magistrates, on the ground that such excuses were insufficient when the faith was at issue: upon which Dioscorus recriminated; "In what respect does the presence of Theodoret at this time accord with the observance of the canons?" The senators rejoined, that Theodoret had been admitted in the character of an accuser; but Dioscorus signified, that he was sitting in the position of a bishop. The senators again said, that Eusebius and Theodoret occupied the position of accusers, as Dioscorus himself that of an accused person

The entire transactions of the second synod at Ephesus having been accordingly read, and, in like manner, the sentence against Flavian and Eusebius, as far as the place where Hilary had declared a protest, the Oriental bishops and their party exclaimed, "Anathema to Dioscorus: Christ has at this moment deposed Dioscorus. Flavian was deposed by Dioscorus. Holy Lord, do thou avenge him! Orthodox sovereign, do thou avenge him! Many be the years of Leo! Many be the years of the patriarch!" When the sequel of the document had been read, shewing that all the assembled bishops had assented to the deposition of Flavian, the most illustrious magistrates ruled as follows: "Concerning the orthodox and catholic faith, we are clearly of opinion that a more accurate investigation should be made in a more complete assemblage of the synod to-morrow. But since it appears that Flavian, of pious memory, and Eusebius, the most reverent bishop of Dorylaeum, were not in error concerning the faith, but were unjustly deposed, both from the examination of the acts and decrees, and from the present confession of those who presided in the synod, that themselves were in error, and the deposition was null: it seems to us, according to the good pleasure of God, to be just, with the approval of our most divine and pious lord, that Dioscorus, the most reverent bishop of Alexandria; Juvenalis, the most reverent bishop of Jerusalem; Thalassius, the most reverent bishop of Caesarea; Eusebius, the most reverent bishop of Ancyra: Eustathius the most reverent hishon of Berytus: and Basil, the most reverent bishop of Seleucia, in Isauria, should be subjected to the same penalty, by being deprived, through this holy synod, in accordance; with the canons, of the episcopal dignity; with a reference of whatever is consequent, to the imperial supremacy." On this the Orientals exclaimed, "This is a just decision;" and the Illyrian bishops, "We were all in error; let us all be deemed deserving of pardon." When the Orientals had again exclaimed, "This is a just verdict: Christ has deposed the murderer: Christ has avenged the martyrs!" the senators ruled to the effect, that each of the assembled bishops should severally put forth his own formulary of faith, under the assurance that the belief of the most divine emperor was in accordance with the exposition of the three hundred fathers at Nicaea, and of the hundred and fifty at Constantinople; and with the epistles of the holy fathers, Gregory, Basil, Hilary, Athanasius, and Ambrose, as well as the two of Cyril, which were made public in the first synod at Ephesus; inasmuch as upon these grounds Leo, the most reverent bishop of the Elder Rome, had deposed Eutyches. In this manner was closed the present meeting of the council.

At the next, composed of the most holy bishops alone, Eusebius presented libels in behalf of himself and Flavian, in which he objected to Dioscorus, that he held the same opinions as Eutyches, and had deprived themselves of the priesthood. He further charged him with inserting in the transactions expressions which were not uttered in the synod, and having procured their subscription to a blank paper. He petitioned that the entire acts of the second synod at Ephesus should be annulled by vote of those who were now assembled; that themselves should retain their priesthood; and that foul tenet be anathematised.

After the reading of this document, he also required that his adversary should be present. When this had been ruled in the affirmative, Aetius, archdeacon and primicerius of the notaries, stated that he had proceeded to Dioscorus, as also to the others; but that he said he was not permitted by the persons on guard to appear. It was then decided that Dioscorus should be sought in front of the place of meeting; and, on his not being found, Anatolius, bishop of Constantinople, ruled that he ought to be summoned, and be present before the synod. This course having been adopted, the delegates, on their return, said that he had replied: "I am under restraint. Let these say whether they leave me free to proceed thither;" and to their intimation that they were deputed to himself, and not to the civil powers, his answer was stated to be: "I am ready to proceed to the holy and universal synod, but I am prevented." To this statement Himerius added. that the Assistant of the Master of the Sacred Offices had met them on their return, in company with whom the bishops had again visited Dioscorus, and that he had taken some notes of what then passed. These were then read, and set forth the precise words of Dioscorus, as follows: "Upon calm reflection, and due consideration of my interest, I thus reply. Whereas, at the former meeting of the synod, the most illustrious magistrates ruled upon many several points, and I am now summoned to a second, having for its object a modification of the preceding matters; I pray that the most illustrious magistrates who attended on the former occasion, and the sacred senate, should do so on the present also, in order that the same points may be again debated." The acts shew that Acacius then replied in the following words: "The great and holy synod, in requiring the presence of your holiness, has not in view a modification of what was transacted in the presence of the most illustrious magistrates and the sacred senate; but it has deputed us merely that you should have a place in the meeting, and that your holiness should not be wanting to it. Dioscorus replied, according to the acts, "You have just told me that Eusebius had presented libels. I pray that the matters touching myself may be again sifted in the presence of the magistrates and the senate.

Then follow other similar matters. Afterwards, persons were again sent with a commission to urge Dioscorus to appear; who, on their return, said that they had taken notes of his words. From these it appears that he said : "I have already signified to your piety, both that I am suffering from sickness, and that I demand that the most illustrious magistrates and the sacred senate should also on the present occasion attend the investigation of the matters at issue. Since, however, my sickness has increased, on this ground I am withholding my attendance." Cecropius, then, as appears from the acts, intimated to Dioscorus, that but a short time before he had made no mention of sickness, and, accordingly, he ought to satisfy the requisitions of the canons. To whom Dioscorus rejoined: "I have said once for all, that the magistrates ought to be present." Then Rufinus, bishop of Samosata, told him that the matters mooted were under canonical regulation, and that on his appearance he would be at liberty to make whatever statements he chose. To the enquiry of Dioscorus, whether Juvenalis, Thalassius, and Eustathius were present, he replied that this was nothing to the purpose. The acts shew that Dioscorus said in answer, that he prayed the Christ-loving emperor to the effect that the magistrates should be present, and also those who had acted as judges in conjunction with himself. To this the deputies rejoined, that Eusebius accused him only, and there was accordingly no occasion that all should be present. Dioscorus replied, that the others who had acted with him ought to be present, for the suit of Eusebius did not affect himself individually, but rested in fact upon a judgment in which they had all united. When the deputies still insisted upon this point, Dioscorus summarily replied: "What I have said, I have said once for all; and I have now nothing further to say.

Upon this report, Eusebius stated that his charge was against Dioscorus only, and against no other person; and he required that he should be summoned a third time. Aetius then, in continuance, informed them that certain persons from Alexandria, professing to be clerks, together with several laymen, had lately presented libels against Dioscorus, and, standing outside, were now invoking the synod. When, accordingly, in the first place Theodoras, a deacon of the holy church at Alexandria, had presented libels, and afterwards Ischyrion, a deacon, Athanasius, a presbyter, and nephew of Cyril, and also Sophronius, in which they charged Dioscorus with blasphemies. offences against the person, and violent seizures of money; a third summons was issued urging him to attend. Those who were accordingly selected for this service, on their return, reported Dioscorus to have said: "I have already sufficiently informed your piety on this point, and cannot add any thing further." Since Dioscorus had persisted in the same reply, while the delegates continued to press him, the bishop Paschasinus said: "At length, after being summoned a third time, Dioscorus has not appeared:" and he then asked what treatment he deserved. To this, when the bishops had replied that he had rendered himself obnoxious to the canons, and Proterius, bishop of Smyrna, had observed, that when Flavian had been murdered, no suitable measures had been taken with respect to him: the representatives of Leo. bishop of the elder Rome, made a declaration as follows:

—"The aggressions committed by Dioscorus, lately bishop of the great city Alexandria, in violation of canonical order and the constitution of the church, have been clearly proved by the investigations at the former meeting, and the proceedings of to-day. For, not to mention the mass of his offences, he did, on his own authority, uncanonically admit to communion his partisan Eutyches, after having been canonically deprived by his own bishop, namely, our sainted father and archbishop Flavian; and this before he sat in council with the other bishops at Ephesus. To them, indeed, the holy see granted pardon for the transactions of which they were not the to the most holy archbishop Leo, and the body of the holy and universal synod: on which account he also admitted them into communion with him, as being his fellows in faith. Whereas Dioscorus has continued to maintain a haughty carriage, on account of those very circumstances over which he ought to have bewailed, and humbled himself to the earth. Moreover, he did not even allow the epistle to be read which the blessed pope Leo had addressed to Flavian, of holv memory; and that too, notwithstanding he was repeatedly exhorted thereto by the bearers, and had promised with an oath to that effect. The result of the epistle not being rend, has been to fill the most holy churches throughout the world with scandals and mischief. Notwithstanding, however, such presumption, it was our purpose to deal mercifully with him as regards his past impiety, as we had done with the other bishops, although they had not held an equal judicial authority with him. But inasmuch as he has, by his subsequent conduct, overshot his former iniquity, and has presumed to pronounce excommunication against Leo, the most holy and religious archbishop of great Rome; since, moreover, on the presentation of a paper full of grievous charges against him to the holy and great synod, he refused to appear, though once, twice, and thrice canonically summoned by the bishops, pricked no doubt by his own conscience; and since he has unlawfully given reception to those who had been duly deposed by different synods; he has thus, by variously trampling upon the laws of the church, given his own verdict against himself. Wherefore Leo, the most blessed and holy archbishop of the great and elder Rome, has, by the agency of ourselves and the present synod, in conjunction with the thrice-blessed and all honoured Peter, who is the rock and basis of the Catholic church, and the foundation of the orthodox faith, deprived him of the episcopal dignity, and severed him from every priestly function. Accordingly, this holy and great synod decrees the provisions of the canons on the aforesaid Dioscorus."

deliberate authors, and they have hitherto continued obedient

After the ratification of this proceeding by Anatolius and Maximus, and by the other bishops, with the exception of those who had been deposed together with Dioscorus by the senate, a relation of the matter was addressed to Marcian by the synod, and the instrument of deposition was transmitted to Dioscorus, to the following effect: "On account of contempt of the sacred canons, and thy contumacy regarding this holy and universal synod, inasmuch as, in addition to the other offences of which thou hast been convicted, thou didst not appear, even when summoned the third time by this great and holv synod, according to the sacred canons, in order to reply to the charges made against thee; know then that thou hast been deposed from thy bishoprick, on the thirteenth day of this present month, October, by the holy and universal synod, and deprived of all ecclesiastical rank." After a letter had been written to the bishops of the most holy church at Alexandria on this subject, and an edict had been framed against Dioscorus, the proceedings of this meeting were closed.

After the business of the preceding meeting had terminated in this manner, the members of the synod, again assembling, replied to the inquiry of the magistrates, who desired to be informed respecting the orthodox doctrine, that there was no need that any further formulary should be framed, now that the matter relating to Eutyches had been brought to a close, and had received a conclusive determination at the hands of the Roman bishop, with the further accordance of all parties. After the bishops had with one voice exclaimed, that they all held the same language, and the magistrates had ruled that each patriarch, selecting one or two persons of his own diocese should come forward into the midst of the council in order to a declaration of their several opinions; Florentius, bishop of Sardis, prayed a respite, so that they might approach the truth with due deliberation : and Cecropius, bishop of Sebastopolis, spoke as follows. "The faith has been well set forth by the three hundred and eighteen holy fathers, and has been confirmed by the holy fathers, Athanasius, Cyril, Celestine, Hilary, Basil, Gregory, and again, on the present occasion, by the most holy Leo. We accordingly require that the words both of the three hundred and eighteen holv fathers and of the most holy Leo be now read." At the conclusion of the reading the whole synod exclaimed, "This is the faith of the orthodox; thus we all believe; thus does the Pope Leo believe; thus did Cyril believe; thus has the Pope expounded."

Another interlocution was then issued, that the form set forth by the hundred and fifty fathers should also be read: which was accordingly done; and the members of the synod exclaimed, "This is the faith of all; this is the faith of the orthodox; thus do we all believe!"

Then Actius, the archdeacon, said that he held in his hand the epistle of the divine Cyril to Nestorius, which all who were assembled at Ephesus had ratified by their individual subscriptions; as also another epistle of the same Cyril addressed to John of Antioch, which had itself also been confirmed. These he earnestly prayed might be read. Agreeably with an interlocution on the point, both were then read; a portion of the former being precisely as follows. "Cyril to our most reverent fellow minister Nestorius. Certain persons, as I am informed, treat my rebuke with levity in the presence of your holiness, and that, too, repeatedly, taking especial occasion for that purpose of the meetings of the authorities; perhaps also with the idea of gratifying your own ears." Afterwards it proceeds. "The declaration, then, of the holy and great synod was this: that the only begotten Son, begotten naturally of God the Father, very God of very God. light of light, by whose agency the Father made all things, descended, was incarnate, assumed humanity, suffered, rose again on the third day, ascended into heaven. This declaration we, too, ought to follow, carefully considering what is signified by the expression, that the Divine Word was incarnate and assumed humanity. For we do not affirm that the nature of the Word by undergoing a change became flesh, nor vet was even converted into a complete human being. consisting of soul and body; but this we rather maintain, that the Word, by uniting personally with himself flesh, animated by a rational soul, became man in an ineffable and incomprehensible manner, and bore the title of the Son of Man, not in respect of mere will or pleasure, nor even, as it were, in an assumption of person merely; and, further, that the natures which conspired to the true unity, were different. but from both is one Christ and Son; not as though the difference of the natures had been done away for the sake of the union, but they had rather consummated for us the one Lord and Christ and Son, from both the Godhead and the manhood, by their ineffable and mysterious coalition for unity." And presently the epistle proceeds. "But since, for our sakes and for our salvation, having personally united humanity with himself, he came forth from a woman; in this respect he is said also to have been born carnally. For he was not born in the first instance an ordinary man of the holy Virgin, and then the Word descended upon him : but the Word, having been united from the very womb, is said to have undergone a carnal nativity, as it were, by an assumption of the nativity of his own flesh. In this manner we say that He

the nativity of his own item. In this manner we say that He suffered and rose again; not as though the Word of God had endured, as regards his own nature, stripes or piercings of nails, or the other wounds, for the Deity is impassible, as being incorporeal. Since, however, his own body underwent these circumstances, Himself is said, on the other hand, to have suffered them on our behalf, inasmuch as the impassible being was in the suffering body."

The greater part of the other epistle has been inserted in the preceding portion of this history. It contains, however, a passage to the following effect, which John, bishop of Antioch wrote, and Cyril entirely approved. "We confess the holy Virgin to be the Mother of God because from her the Divine Word was incarnate and assumed humanity, and from the very conception united with himself the temple which was derived from her. With respect, however, to the evangelical and apostolical language concerning our Lord, we know that the expressions of the divinely inspired men are sometimes comprehensive, as in respect of a single person; sometimes distinctive, as in respect of two natures; and that they deliver such as are of divine import, in reference to the Godhead of Christ, and those which are humble, in reference to His manhood." Cyril then subjoins the following words:---"On reading these your sacred expressions, we find that we ourselves hold the same opinion: for there is one Lord, one faith, one baptism. We accordingly glorify God, the Saviour of all, rejoicing mutually, because both our churches and yours hold a faith which is in accordance with the inspired scriptures, and the tradition of our holy fathers."

After the reading of these epistles, the members of the synod exclaimed in these words: "Thus do we all believe; thus does the Pope Leo believe. Anathema to him that divides and to him that confounds! This is the faith of Leo the archbishop. Thus does Leo believe. Thus do Leo and Anatolius believe. Thus do we all believe. As Cyril believed, so do we. Eternal be the memory of Cyril! Agreeably with the epistles of Cyril do we also think. Thus did we believe; thus do we now believe. Leo the archbishop thus thinks, thus believes, thus has written."

An interlocution having been given to that effect, the epistle of Leo was also read, in a translation, and is inserted in the acts; the bishops at its conclusion exclaiming, "This is the faith of the fathers: this is the faith of the Apostles. Thus do we all believe: thus do the orthodox believe. Anathema to him who does not thus believe! Peter has uttered these words through Leo. Thus have the Apostles taught. Leo has taught truly and piously: thus has Cyril taught. The teaching of Leo and Cyril is the same. Anathema to him who does not thus believe! This is the true faith. Thus do the orthodox think. This is the faith of the fathers. Why was not this read at Ephesus? This did Dioscorus withhold."

It is contained in the acts that, when the bishops of Illyria and Palestine had expressed some hesitation, after the following passage of the epistle had been read: "In order to the discharge of the debt of our natural state, the divine nature was united to the passible, that one and the same person, the man Christ Jesus, being the mediator between God and man, might be enabled from the one part to die, but incapable of decease from the other, such being the process

adapted to our cure;"-that upon this Aetius, archdeacon of the most holy church of Constantinople, produced a passage from Cyril to the following purport: "Since, however, His own body by the grace of God, as says the Apostle Paul, tasted death for every man, Himself is said to have suffered the death on our behalf; not that he experienced death to the extent of his own nature, for it would be madness to say or think this, but because, as I said before, his flesh tasted death." Again, when the bishops of Illyria and Palestine had expressed their hesitation at the following passage of the epistle of Leo:- "For there operates in each form its peculiar property, in union with what belongs to the other; the Word working that which pertains to the Word, and the body discharging that which pertains to the body; and the one shines forth by the miracles, the other was subjected to the insults;" upon this the said Aetius read a passage of Cyril as follows:--"The rest of the expressions are especially appropriate to deity; others, again, are equally suited to manhood; and some hold, as it were, an intermediate place, presenting the Son of God as being God and man at the same time." Afterwards, when the same bishops hesitated at another part of the epistle of Leo, which is as follows:— 'Although in our Lord Jesus Christ there is altogether one person, of God and man, yet the one part from which was derived to the other a community of ignominy, is distinct from that from which proceeded a community of glory; for from us was derived the manhood, which is inferior to the Father, and from the Father the Godhead, which partakes equality with the Father;" Theodoret said, to adjust the point, that the blessed Cyril had also expressed himself thus:-----That He both became man, and at the same time did not lay aside His proper nature; for the latter continued as before, though dwelling in what was different from it; namely, the divine nature in conjunction with humanity." Afterwards, when the illustrious magistrates asked whether any one still hesitated. all replied that they no longer entertained any doubt.

Atticus, bishop of Nicopolis, then begged a respite of a few days, in order that a formulary might be framed of the matters which were approved by God and the holy fathers. He also prayed that they might have the epistle which was addressed by Cyril to Nestorius, in which he exhorts him to assent to his twelve chapters. All expressed their concurrence in these requests; and when the magistrates had ruled that a respite of five days should be allowed, in order to their assembling with Anatolius, president of Constantinople, all the bishops signified their approval, saying, "Thus do we believe, thus do we all believe. Not one of us hesitates. We have all subscribed " Upon this it was ruled as follows:---"There is no necessity that you should all assemble; since, however, it is reasonable that the minds of those who have hesitated should be confirmed, let the most reverent bishop Anatolius select from among the subscribers whomsoever he may deem proper for the information of those who have doubted." Upon this the members of the synod proceeded to exclaim, "We intreat for the fathers. The fathers to the synod. Those who accord with Leo to the synod. Our words to the emperor. Our prayers to the orthodox sovereign. Our prayers to Augusta. We have all erred. Let indulgence be granted to all." Upon this, those who belonged to the church of Constantinople cried out, "But few are exclaiming. The synod is not speaking." Then the Orientals shouted, "The Egyptian to exile!" And the Illyrians, "We entreat compassion upon all;" and again the Orientals, "The Egyptian to exile!" While the Illyrians persisted in their prayer, the Constantinopolitan clergy shouted, "Dioscorus to exile! The Egyptian to exile! The heretic to exile!" and again the Illyrians and their party, 'We have all erred. Grant indulgence to all. Dioscorus to the synod! Dioscorus to the churches!" After further proceedings of the same kind, the business of this meeting was brought to a close

At the next meeting, when the senators had ruled that the forms which had been already enacted should be read, Constantine, the secretary, read from a paper, as follows: 'Concerning the orthodox and catholic faith, we are agreed that a more exact inquiry should take place before a fuller assembly of the council, at its next meeting. But inasmuch as it has been shewn, from examination of the acts and decrees, and from the oral testimony of the presidents of that synod, who admit that themselves were in error, and the deposition was void, that Flavian, of pious memory, and the most reverent bishop Eusebius, were convicted of no error concerning the faith, and were wrongfully deposed, it seems to us, according to God's good pleasure, to be a just proceeding, if approved by our most divine and pious sovereign, that Dioscorus, the most reverent bishop of Alexandria; Juvenalis, the most reverent bishop of Jerusalem; Thalassius, the most reverent bishop of Caesarea, in Cappadocia; Eusebius, the most reverent bishop of Ancvra; Eustathius, the most reverent hishop of Berytus: and Basilius the most reverent hishop of Seleucia, in Isauria; who exercised sway and precedency in that synod; should be subjected to the selfsame penalty, by suffering at the hands of the holy synod deprivation of their episcopal dignity, according to the canons; whatever is

consequent hereupon, being submitted to the cognizance of the emperor's sacred supremacy."

After several other readings, the assembled bishops, being asked whether the letters of Leo accorded with the faith of the three hundred and eighteen holy fathers who met at Nicaea, and that of the hundred and fifty in the imperial city, Anatolius, president of Constantinople, and all who were present, replied, that the epistle of Leo accorded with the before-mentioned fathers; and he further subscribed the epistle. At this stage of the proceedings the members of the synod exclaimed: "We all concur: we all approve: we all believe alike: we all hold the same sentiments: thus do we all believe. The fathers to the synod! the subscribers to the synod ! Many be the years of the emperor! Many be the years of Augusta! The fathers to the synod: those who agree with us in faith, to the synod! Many be the years of the emperor! Those who agree with us in opinion, to the synod! Many be the years of the emperor! We have all subscribed. As Leo thinks, so do we." An interlocution was then pronounced to the following effect. "We have referred these matters to our most sacred and pious lord, and are now waiting the answer of his piety. But your reverence will give account to God concerning Dioscorus. who has been deposed by you without the knowledge of our most sacred sovereign and ourselves, and concerning the five for whom you are now making entreaty, and concerning all the acts of the synod." They then expressed their approval, saying, "God has deposed Dioscorus; Dioscorus has been justly deposed. Christ has deposed Dioscorus." Afterwards, on the presentation of a response from Marcian, leaving the case of those who had been deposed to the decision of the bishops, as the interlocution of the magistrates had set forth; they made entreaty in the following words. "We pray that they may be admitted:---our fellows in doctrine, to the synod: our fellows in opinion, to the synod: the subscribers to the epistle of Leo, to the synod." They were accordingly, by an interlocution to that effect, numbered with the members of the synod.

Then were read the petitions presented from the Egyptian diocese to the emperor Marcian; which, in addition to other matters, contain the following. "We agree in opinion with what the three hundred and eighteen fathers at Nicaea, and the blessed Athanasius, and the sainted Cyril have set forth anathematising every heresy, both those of Arius, of Eunomius, of Manes, of Nestorius, and that of those who say, that the flesh of our Lord was derived from heaven and not from the holy Mother of God and ever-virgin Mary, in like manner with ourselves, with the exception of sin." Upon this, the whole synod exclaimed: "Why have they not anathematised the doctrine of Eutyches? Let them subscribe the epistle of Leo, anathematising Eutyches and his doctrines. Let them concur with the epistle of Leo. They intend to jeer us, and be gone." In reply, the bishops from Egypt stated, that the Egyptian bishops were numerous, and that they themselves could not assume to represent those who were absent: and they praved the synod to await their archbishop. that they might be guided by his judgement, as usage required: for if they should do any thing before the appointment of their head, the whole diocese would assail them. After many intreaties on this subject, which were stoutly resisted by the synod, it was ruled, that a respite should be granted to the bishops from Egypt, until their archbishop should be ordained.

Then petitions were presented from certain monks; the purport of which was, that they should not be compelled to subscribe certain papers, before the synod which the emperor hud summoned should have assembled, and its determinations be made known. After these had been read, Diogenes, bishop of Cyzicus, stated that Barsumas, one of the persons present, had been the murderer of Flavian, for he had exclaimed "Slav him!" and, though not a party to the petition, had improperly obtained admission. Upon this all the bishops exclaimed "Barsumas has desolated all Syria; he has let loose upon us a thousand monks." After an interlocution, to the effect that the assembled monks should await the determination of the synod, they demanded that the libels which they had drawn up, should be read; one requisition therein contained being, that Dioscorus and the bishops of his party should be present in the synod. In reply to which all the bishops exclaimed: "Anathema to Dioscorus. Christ has deposed Dioscorus! Cast out such persons. Away with outrage ; away with violence from the synod! Our words to the emperor! Away with outrage: away with infamy from the synod!" After a repetition of these exclamations, it was ruled that the remainder of the libels should be read: wherein it was affirmed, that the deposition of Dioscorus was improper; that, when a matter of faith was before the council, he ought to share in its deliberations, and that, if this were not granted, they would shake their garments from the communion of the assembled bishops. In reference to these expressions, Aetius, the archdeacon, read a canon against those who separate themselves. Again, when, at the questions of the most holy bishops, the monks manifested disagreement, and afterwards at an interrogation put by Aetius in the name of the synod, some anathematised Nestorius and Eutyches, while others

declined; it was ruled by the magistrates, that the petitions of Faustus and the other monks should be read: which prayed the emperor no longer to sanction the monks who had lately opposed the orthodox doctrines. Whereupon Dorotheus, a monk, termed Eutyches orthodox : in reply to whom various doctrinal points were started by the magistrates.

At the fifth meeting, the magistrates ruled that the determinations relating to the faith should be published; and Asclepiades, a deacon of Constantinople, read a formulary, which it was resolved should not be inserted in the acts. Some dissented from it, but the majority approved it: and on the utterance of counter exclamations, the magistrates said, that Dioscorus affirmed that he had deposed Flavian on his asserting two natures, whereas the formulary contained the expression "from two natures." To this Anatolius replied. that Dioscorus had not been deposed on a point of faith, but because he had excommunicated Leo, and, after having been thrice summoned, did not appear. The magistrates then required that the substance of the epistle of Leo should be inserted in the formulary; but since the bishops objected, and maintained that no other formulary could be framed, inasmuch as a complete one already existed, a relation was made to the emperor; who commanded that six of the Oriental bishops, three from Pontus, three from Asia, three from Thrace, and three from Illyria, should, together with Anatolius and the vicars of Rome, assemble in the sanctuary of the martyr, and rightly frame the rule of faith, or put forth each his several declaration of faith: or be assured that the synod must be held in the West. On this, being required to state whether they followed Dioscorus when affirming that Christ was from two natures ; or Leo, that there were two natures in Christ; they exclaimed that they agreed with Leo, and that those who contradicted, were Eutychians. The magistrates then said, that, in accordance with the language of Leo, a clause should be added, to the effect that there were two natures united in Christ, without change, or severance, or confusion ; and they entered the sanctuary of the holy martyr Euphemia, in company with Anatolius and the vicars of Leo, well as Maximus of Antioch, Juvenalis of Jerusalem, Thalassius of Caesarea in Cappadocia, and others; and on their return, the formulary of faith was read, as follows, "Our Lord and Saviour Jesus Christ," and so forth, as it has been inserted in a previous part of the history. When all had exclaimed, "This is the faith of the fathers: let the metropolitans at once subscribe! This is the faith of the Apostles: by this are we all guided: thus do we all think!" the magistrates ruled, that the formulary, thus framed by the fathers and approved by all, should be referred to the imperial supremacy.

At the sixth meeting Marcian was present, and harangued the bishops on the subject of unanimity. At the command of the emperor, the formulary was read by Aetius, archdeacon of Constantinople, and all subscribed it. The emperor then asked, whether the formulary had been composed with the approbation of all: upon which all declared their confirmation of it by expressions of approval. Again the emperor's suggestion certain canons were enacted, and metropolitan rank was conferred upon Chalcedon. The emperor further commanded the bishops to remain three or four days; that each one should move the synod on whatever matters he might choose, in the presence of the magistrates; and such as were judged proper, should take effect. The meeting was then closed.

Another was held, at which canons were enacted; and at the next, Juvenalis and Maximus came to an agreement that Antioch should have for its province the two Phoenicias and Arabia; and Jerusalem, the three Palestines; which was ratified by an interlocution of the magistrates and bishops.

At the ninth meeting, the case of Theodoret was mooted. He anathematised Nestorius, saying, "Anathema to Nestorius, and to him who does not affirm the holy Virgin Mary to be Mother of God, and to him who divides into two Sons the one Son, the only begotten! I have also subscribed the formulary of faith and the epistle of Leo." Upon this he was restored to his see, by an interlocution of all parties.

At another meeting, the case of Ibas was discussed; and the judgment was read which had been passed upon him by Photius, bishop of Tyre, and Eustathius of Berytus; but the vote was deferred to the next meeting.

At the eleventh meeting, when the majority of the bishops had voted that Ibas should be restored to his episcopal rank, others, in rejoinder, said that his accusers were waiting outside, and required that they should be admitted. The proceedings in his case were then read; but when the magistrates ruled, that the transactions at Ephesus respecting Ibas should also be read, the bishops replied, that all the proceedings in the second synod at Ephesus were null, with the exception of the ordination of Maximus of Antioch. On this point, they further requested the emperor to decree that nothing should be valid which had been transacted at Ephesus subsequently to the first synod, over which the sainted Cyril, president of Alexandria, had presided. It was judged right that Ibas should retain his bishopric. At the next meeting, the case of Bassianus was inquired into, and it was judged fit that he should be removed and Stephen substituted: which measures were formally voted at the following meeting. At the thirteenth, the case was investigated of Eunomius of Nicomedia and Anastasius of Nicaea, who had a dispute about their respective cities. A fourteenth was also held, at which the case of Sabinianus was investigated. Finally, it was decided that the see of Constantinople should rank next after that of Rome.

THE END OF THE SECOND BOOK.

THE THIRD BOOK. EVAGRIUS HISTORY CHAPTER 1

Character Of The Emperor Zeno.

Zeno, on becoming, by the death of his son, sole emperor, as if entertaining an idea that his power was incomplete without an unrestrained pursuit of every pleasure that presented itself, so far abandoned himself from the first to the solicitations of desire, as to hesitate at nothing of ail that is unseemly and illicit: but so thorough was his habitude in such things that he esteemed it grovelling to practise them in concealment and privacy; but to do it openly, and as it were, in a conspicuous spot, truly royal and suited to none but an emperor: a notion base and servile; for the emperor is known, not by the circumstances of ordinary sway over others, but by those wherein he rules and sways himself, in guarding against the admission in his own person of whatever is indecorous: and being thus unconquered by loose indulgence, so as to be a living image of virtue for imitation and the instruction of his subjects. But he who lays himself open to the pleasures of sense, is unwittingly becoming a base slave, an unransomed captive, continually passing, like worthless slaves, from the hands of one master to another; inasmuch as pleasures are an unnumbered train of mistresses, linked in endless succession: while the present enjoyment, so far from being lasting, is only the kindler and prelude to another, until a man either banishes the rabble rule of pleasures, becoming thus a sovereign instead of a victim of tyranny; or, continuing a slave to the last, receives the portion of the infernal world.

EVAGRIUS HISTORY CHAPTER 2 Incursions Of The Barbarians.

In such a manner, then, had Zeno, from the commencement of his reign, depraved his course of life: while, however, his subjects, both in the East and the West, were greatly

subjects, both in the East and the West, were greatly distressed; in the one quarter, by the general devastations of the Scenite [Semite] barbarians; and in Thrace, by the inroads of the Huns, formerly known by the name of Massagetae, who crossed the Ister without opposition: while Zeno himself, in barbarian fashion, was making violent seizure on whatever escaped them.

EVAGRIUS HISTORY CHAPTER 3

Insurrection Of Basiliscus. Flight Of [Emperor Flavius] Zeno. 1. [475 AD.]

But on the insurrection of Basiliscus, the brother of Verina----for the disposition of his nearest connexions was hostile, from the universal disgust at his most disgraceful life----he was utterly wanting in courage : for vice is craven and desponding, sufficiently indicating its unmanly spirit by submission to pleasures. Zeno fled with precipitation, and surrendered so great a sovereignty to Basiliscus without a struggle. He was also blockaded in his native district, Isauria, having with him his wife Ariadne, who had subsequently fled from her mother, and those parties who still continued loyal to him. Basiliscus, having thus acquired the Roman diadem, and bestowed on his son Marcus the title of Caesar, adopted measures opposed to those of Zeno and his predecessors.

EVAGRIUS HISTORY CHAPTER 4

Circular Of Basiliscus.

At the instigation of an embassy of certain Alexandrians, Basiliscus summons Timotheus Aelurus from his exile, in the eighteenth year of his banishment; at which time Acacius held the episcopate of Constantinople. On his arrival at the imperial city, Timotheus persuades Basiliscus to address circular letters to the bishops in every quarter, and to anathematise the transactions at Chalcedon and the tome of Leo. They were to this effect.

The Circular Letter Of Basiliscus.

"The emperor Caesar Basiliscus, pious, victorious, triumphant, supreme, ever-worshipful Augustus, and Marcus, the most illustrious Caesar, to Timotheus, archbishop of the great city of the Alexandrians, most reverent and beloved of God. It has ever been our pleasure, that whatever laws have been decreed in behalf of the true and apostolic faith, by those our pious predecessors who have maintained the true service of the blessed and undecaying and life-giving Trinity, should never be inoperative; but we are rather disposed to enounce them as of our God and Saviour Jesus Christ who created and has made us glorious, before all diligence in human affairs, and being further convinced that unity among the flocks of Christ is the preservation of ourselves and our subjects, the stout foundation and unshaken bulwark of our empire; being by these considerations moved with godly zeal, and offering to our God and Saviour Jesus Christ the unity of the Holy Church as the first fruits of our reign, ordain that the basis and settlement of human felicity, namely, the symbol of the three hundred and eighteen holy fathers who were assembled. in concert with the Holy Spirit, at Nicaea, into which both ourselves and all our believing predecessors were baptised; that this alone should have reception and authority with the orthodox people in all the most holy churches of God, as the only formulary of the right faith, and sufficient for the utter destruction of every heresy, and for the complete unity of the holy churches of God ; without prejudice, notwithstanding, to the force of the acts of the hundred and fifty holy fathers assembled in this imperial city, in confirmation of the sacred symbol itself, and in condemnation of those who blasphemed against the Holy Ghost; as well as of all that were passed in the metropolitan city of the Ephesians against the impious Nestorius and those who subsequently favoured his opinions. But the proceedings which have disturbed the unity and order of the holy churches of God, and the peace of the whole world, that is to say, the so-called tome of Leo, and all things said and done at Chalcedon in innovation upon the beforementioned holy symbol of the three hundred and eighteen holy fathers, whether by way of definition of faith, or setting forth of symbols. or of interpretation, or instruction, or discourse: we ordain that these shall be anathematised both here and every where by the most holy bishops in every church, and shall be committed to the flames whenever they shall be found, inasmuch as it was so enjoined respecting all heretical doctrines by our predecessors, of pious and blessed memory, Constantine, and Theodosius the younger; and that, having thus been rendered null, they shall be utterly expelled from the one and only catholic and apostolic orthodox church, as superseding the everlasting and saving definitions of the three hundred and eighteen fathers, and those of the blessed fathers who, by the Holy Spirit, made their decision at Ephesus; that no one, in short, either of the priesthood or laity, shall be allowed to deviate from that most sacred constitution of the holy symbol; and that, together with all the innovations upon the sacred symbol which were enacted at Chalcedon, there be also anathematised the heresy of those who do not confess, that the only begotten Son of God was truly incarnate, and made man of the Holy Spirit and of the holy and ever-virgin Mary, Mother of God, but, according to their strange conceit, either from heaven, or in mere phantasy and seeming; and, in short, every heresy, and whatever other innovation, in respect either of thought or language, has been devised in violation of the sacred symbol in any manner or at any time or place. And, inasmuch as it is the special task of kingly providence to furnish to their subjects, with forecasting deliberation, abundant means of security, not only for the present but for future time, we ordain that the most holy bishops in every place shall subscribe to this our sacred circular epistle when exhibited to them, as a distinct declaration that they are indeed ruled by the sacred symbol of the three hundred and eighteen holy fathers alone----which the hundred and fifty holy fathers confirmed; as it was also defined by the most holy fathers, who, subsequently, assembled in the metropolitan city of the Ephesians, that the sacred symbol of the three hundred and eighteen holy fathers ought to be the only rule----while they anathematise every stumbling-block enacted at Chalcedon to the faith of the orthodox people, and utterly eject them from the churches, as an impediment to the general happiness and our own. Those, moreover, who, after the issuing of these our sacred letters, which we trust to have been uttered in accordance with the will of God, in an endeavour to accomplish that unity which all desire for the holy churches of God, shall attempt to bring forward or so much as to name the innovation upon the faith which was enacted at Chalcedon, either in discourse or instruction or writing, in whatever manner, place, or time; with respect to those persons, as being the cause of confusion and tumult in the churches of God and among the whole of our subjects, and enemies to God and our safety, we command (in accordance with the laws ordained by our predecessor, Theodosius, of blessed and sacred memory, against such sort of evil designs, which laws are subjoined to this our sacred circular) that, if bishops or clergy, they be deposed; if monks or laics, that they be subjected to banishment and every mode of confiscation, and the severest penalties: for so the holy and homoousian Trinity, the Creator and Vivifier of the universe, which has ever been adored by our piety, receiving at the present time service at our hands in the destruction of the before-mentioned tares and the confirmation of the true and apostolic traditions of the holy symbol, find being thereby rendered favourable and gracious to our souls and to all our subjects, shall ever aid us in the exercise of our sway, and preserve the peace of the world.

EVAGRIUS HISTORY CHAPTER 5 Deception Of The Circular.

According to Zacharias, the rhetorician, Timotheus, who, as I said, was just returned from banishment, agrees to these circular letters; as does also Peter, president of the church of Antioch, surnamed the Fuller, who also attended Timotheus at the imperial city. After these proceedings, they also determined that Paul should occupy the archiepiscopal throne of the church of Ephesus. This author also says, that Anastasius, the successor of Juvenalis as president of Jerusalem, subscribes the circular, and very many others; so that those who repudiated the tome of Leo and the synod of Chalcedon, amounted to about five hundred: and also that a written petition was addressed to Basiliscus by the Asiatic bishops, assembled at Ephesus, a part of which is couched in the following terms: "To our entirely pious and Christ-loving lords, Basiliscus and Marcus, ever victorious emperors. Presently it proceeds: "Whenever the faith has been hated and assailed, you, all pious and Christ-loving sovereigns, have made it manifest throughout that you were equally assailed." And further on: "A certain fearful retribution of judgment and fury of divine fire and the just wrath of your serenity shall suddenly involve the adversaries, those who endeavour with vauntful assault to battle down the mighty God and your sovereignty fortified by the faith; who also in various ways have not spared our humble selves, but have continually slandered and belied us, as having subscribed to your sacred and apostolic circular letters by compulsion and violence. which we, in fact, subscribed with all joy and readiness." And further on: "Let it therefore be your pleasure, that nothing be put forward otherwise than as accords with your sacred circular, being assured that, as we have before said, the whole world will be turned upside down, and the evils which have proceeded from the synod at Chalcedon will be found trifling in comparison, notwithstanding the innumerable slaughters which they have caused, and the blood of the orthodox which they have unjustly and lawlessly shed." And further on: "We conjure your piety, in the presence of our Lord Jesus Christ, to maintain the just and canonical and ecclesiastical condemnation and deposition which has been inflicted on them, and especially on him who has been on many points convicted of having unduly exercised the episcopate of the imperial city." The same Zacharias also writes as follows: "On the issuing of the imperial circulars, those in the capital who were infected with the phantasy of Eutyches, and followed the monastic rule, believing themselves to have chanced on a prize in the person of Timotheus, and hoping by the circulars to catch their own profit, flock to him with all speed, and again retire, as if convinced by Timotheus that the "Word of God is consubstantial with ourselves as to flesh, and consubstantial with the Father as respects the Godhead."

EVAGRIUS HISTORY CHAPTER 6

Proceedings Of Timothy Aelurus.

The same author says, that Timotheus, setting out from the imperial city, visited Ephesus, and there enthroned Paul as archpriest; who had already been ordained, according to the more ancient custom, by the bishops of the province, but had been ejected from his see: and he also restored to Ephesus the dignity of the patriarchate, of which the synod at Chalcedon had deprived it, as I have already mentioned. Proceeding thence, he arrives at Alexandria, and uniformly required all who approached him to anathematise the synod at Chalcedon. Accordingly, there abandon him, as has been recorded by the same Zacharius, many of his party, and among them Theodotus, one of the bishops ordained at Joppa by Theodosius, who had, by means of certain persons, become bishop of Jerusalem, at the time when Juvenalis betook himself to Constantinople.

EVAGRIUS HISTORY CHAPTER 7

Counter Circular Of Basiliscus.

This author also says, that Acacius, president of the church of Constantinople, in consequence of these proceedings, stirred up the monastic body and the populace of the imperial city, on the plea that Basiliscus was a heretic: and that the latter repudiated the circular, and issued a constitution to the effect, that transactions precipitated by overbearing influence were utterly null; and also sent forth a counter circular in recommendation of the synod at Chalcedon. This counter circular, as he terms it, he has, however, omitted, having written the whole work under passionate feelings. It is as follows: ----

The Counter Circular Of Basiliscus.

"We, the emperors, Caesars, Basiliscus and Marcus, thus ordain: that the apostolic and orthodox faith, which has held sway in the catholic churches from the very first, both until the beginning and during the continuance of our reign, and ought to sway in all coming time, into which also we were baptised, and in which we believe; that this alone continue to sway uninjured and unshaken, and ever prevail throughout the catholic and apostolic churches of the orthodox; and that no question tending otherwise be a subject of debate. On this

THE GRAND BIBLE

account we also enjoin, that all acts during our reign, whether circular letters or others, or any thing whatever relating to faith or ecclesiastical constitution, be null; while we at the same time anathematise Nestorius, Eutyches, and every other heresy, with all who hold like sentiments; and that no synod or other debate be held on this subject, but that the provinces, the ordination to which was possessed by the see of this imperial and glorious city, be restored to the most reverent and holy patriarch and archbishop Acacius, the present bishops, highly beloved of God, retaining their respective sees; provided that no prejudice thence arise after their demise to the right of ordination belonging to the illustrious see of this imperial and glorious city. That this our sacred ordinance has the force of a sacred constitution is a matter of doubt to none."

Such was the course of these transactions.

EVAGRIUS HISTORY CHAPTER 8

Restoration Of [Emperor Flavius] Zeno. [477 AD.] But Zeno, having seen in a vision the holy and much tried proto-martyr Thecla encouraging him and promising him restoration to power, after winning over the besiegers by bribes, marches on Constantinople and expels Basiliscus, who had now held the supreme power for two years, and, on his taking refuge in a holy precinct, surrenders him to his enemies. Zeno, in consequence, dedicated to the proto-martyr Thecla a very extensive sanctuary, of singular stateliness and beauty, at Seleucia, which is situated near the borders of Isauria, and embellished it with very many and royal offerings, which have been preserved to our times. Basiliscus is, accordingly, conveyed to Cappadocia, in order to his death, and is slain with his wife and children at the station named Acusus. Zeno enacts a law in abrogation of what Basiliscus the tyrant had constituted by his circulars, and Peter, surnamed the Fuller, is ejected from the church of the Antiochenes, and Paul from that of the Ephesians.

EVAGRIUS HISTORY CHAPTER 9

Epistle Of The Asiatic Bishops To Acacius.

The bishops of Asia, to sooth Acacius, address to him a deprecatory plea, and implore his pardon in a repentant memorial, wherein they alleged, that they had subscribed the circular by compulsion and not voluntarily; and they affirmed with an oath that the case was really thus, and that they had settled their faith, and still maintained it in accordance with the synod at Chalcedon. The purport of the document is as follows.

An epistle or petition sent from the bishops of Asia, to Acacius, bishop of Constantinople. "To Acacius, the most holy and pious patriarch of the church in the imperial city of Constantine, the New Rome." And it afterwards proceeds: "We have been duly visited by the person who will also act as our representative." And shortly after: "By these letters we acquaint you that we subscribed, not designedly but of necessity, having agreed to these matters with letters and words, not with the heart. For, by your acceptable prayers and the will of the higher Power, we hold the faith as we have received it from the three hundred and eighteen lights of the world, and the hundred and fifty holy fathers; and, moreover, we assent to the terms which were piously and rightly framed at Chalcedon by the holy fathers there assembled."

Whether Zacharias has slandered these persons, or they themselves lied in asserting that they were unwilling to subscribe, I am not able to say.

EVAGRIUS HISTORY CHAPTER 10

Succession Of Bishops At Antioch.

Next to Peter, Stephen succeeds to the see of Antioch, whom the sons of the Antiochenes dispatched with reeds sharpened like lances, as is recorded by John the Rhetorician. After Stephen, Calandion is entrusted with the helm of that see, and he wrought upon those who approached him, to anathematise Timotheus, and, at the same time, the circular of Basiliscus.

EVAGRIUS HISTORY CHAPTER 11 Succession Of Bishops At Alexandria.

It was the intention of Zeno to eject Timotheus from the church of Alexandria; but, on being informed by certain persons that he was already aged, and had almost reached the common resting-place of all men, he abandoned his purpose. And, in fact, Timotheus shortly after paid the debt of nature. Upon this the Alexandrian bishops elect, on their own authority, Peter, surnamed Mongus; the announcement of which proceeding exasperated Zeno, who judged him to have incurred the penalty of death, and he recalls Timotheus, the successor of Proterius, while residing, on account of a popular tumult, at Canopus. Thus Timotheus obtained, by the commands of the emperor, possession of his rightful see.

EVAGRIUS HISTORY CHAPTER 12

Ecclesiastical Measures Of Zeno.

By the advice of certain persons, John, a presbyter, who held the office of steward of the venerable temple of the holy forerunner and baptist John, visits the imperial city, in order to negotiate permission for the inhabitants of Alexandria to elect as president of their church a person of their own choice, if it should happen that their bishop should depart out of the world. According to Zacharias, he was detected by the emperor in the endeavour to compass his own appointment to the bishopric, and was allowed to return home, under an oath that he would never aspire to the see of Alexandria. The emperor too issues a precept, to the effect that, after the death of Timotheus, that person should be bishop whom the clergy and people might elect. On the death of Timotheus, which took place shortly after, John, by the employment of money, as the same Zacharias writes, and in disregard of his sworn pledge to the emperor, procures his own nomination as bishop of the Alexandrians. The emperor, on being informed of these circumstances, commands his expulsion, and, at the suggestion of certain persons, addresses an allocution to the Alexandrians, which he named Henoticon, directing, at the same time, that the see of Alexandria should be restored to Peter, with a stipulation, that he should subscribe this document and admit to communion the party of Proterius.

EVAGRIUS HISTORY CHAPTER 13

Publication Of The Henoticon* Of [Flavius] Zeno. [482 AD.] Of this measure of arrangement, framed according to the advice of Acacius, bishop of the imperial city, Pergainius is the bearer, who had been appointed procurator of Egypt. Finding, on his arrival at Alexandria, that John had fled, he addresses himself to Peter, and urges him to receive the allocution of Zeno, and also to admit the separatists. He, accordingly, receives and subscribes the before-mentioned allocution, with a promise also to admit to communion the members of the opposite party. Accordingly, on occasion of a general festival at Alexandria and the universal acceptance of the so-called Henoticon of Zeno, Peter admits the partizans of Proterius; and, on delivering in the church an address to the people, he reads the allocution of Zeno, as follows. [* The Henotikon (Greek for "act of union") was a christological document issued by Eastern Roman emperor Flavius Zeno in 482 AD, in an unsuccessful attempt to reconcile the differences between the supporters of the Council of Chalcedon and the council's opponents, mainly the Nestorian Church and other Eastern Orthodox Churches. It was followed by the Acacian schism. (Flavius Zeno (c. 425-491 AD) was Eastern Roman emperor from 474 to 475 and again from 476 to 491. Domestic revolts and religious dissension plagued his reign but he contributed much to stabilising the Eastern Empire.) Flavius Zeno's successor, Flavius Anastasius I Dicorus (491-518 AD), began by keeping the policy of the Henotikon, though himself a convinced Miaphysite. After Anastasius's death his successor, Justin I (Flavius Iustinus, 450-527 AD), immediately sought to end the schism with Rome, a goal shared by the new Patriarch of Constantinople, John of Cappadocia. A papal legation under Germanus of Capua was sent to Constantinople. The reunion was formalised in 519 AD.1

EVAGRIUS HISTORY CHAPTER 14

The Henoticon (Instrument Of Union).

"The emperor Caesar Zeno, pious, victorious, triumphant, supreme, ever worshipful Augustus, to the most reverent bishops and clergy, and to the monks and laity throughout Alexandria, Egypt, Libya, and Pentapolis. Being assured that the origin and constitution, the might and invincible defence of our sovereignty is the only right and true faith, which, through divine inspiration, the three hundred holy fathers assembled at Nicaea set forth, and the hundred and fifty holy fathers, who in like manner met at Constantinople, confirmed; we night and day employ every means of prayer, of zealous pains and of laws, that the holy Catholic and apostolic church in every place may be multiplied, the uncorruptible and immortal mother of our sceptre; and that the pious laity, continuing in peace and unanimity with respect to God, may, together with the bishops, highly beloved of God, the most pious clergy, the archimandrites and monks, offer up acceptably their supplications in behalf of our sovereignty. So long as our great God and Saviour Jesus Christ, who was incarnate and born of Mary, the Holy Virgin, and Mother of God, approves and readily accepts our concordant glorification and service, the power of our enemies will be crushed and swept away, and peace with its blessings, kindly temperature, abundant produce, and whatever is beneficial to man, will be liberally bestowed. Since, then, the irreprehensible faith is the preserver both of ourselves and the Roman weal, petitions have been offered to us from pious archimandrites and hermits, and other venerable persons, imploring us with tears that unity should be procured for the churches, and the limbs should be knit together, which the enemy of all good has of old time been eagerly bent upon severing, under a consciousness that defeat will befall him

whenever he assails the body while in an entire condition. For since it happens, that of the unnumbered generations which during the lapse of so many years time has withdrawn from life, some have departed, deprived of the laver of regeneration, and others have been borne away on the inevitable journey of man, without having partaken in the divine communion; and innumerable murders have also been perpetrated; and not only the earth, but the very air has been defiled by a multitude of blood-sheddings: that this state of things might be transformed into good, who would not pray? For this reason, we were anxious that you should be informed, that we and the churches in every quarter neither have held, nor do we or shall we hold, nor are we aware of persons who hold, any other symbol or lesson or definition of faith or creed than the before-mentioned holy symbol of the three hundred and eighteen holy fathers, which the aforesaid hundred and fifty holy fathers confirmed; and if any person does hold such, we deem him an alien: for we are confident that this symbol alone is, as we said, the preserver of our sovereignty, and on their reception of this alone are all the people baptised when desirous of the saving illumination: which symbol all the holy fathers assembled at Ephesus also followed; who further passed sentence of deposition on the impious Nestorius and those who subsequently held his sentiments: which Nestorius we also anathematise, together with Eutyches and all who entertain opinions contrary to those above-mentioned, receiving at the same time the twelve chapters of Cyril, of holy memory, formerly archbishop of the holy Catholic church of the Alexandrians. We moreover confess, that the only begotten Son of God, himself God, who truly assumed manhood, namely, our Lord Jesus Christ, who is consubstantial with the Father in respect of the Godhead, and con-substantial with ourselves as respects the manhood; that He, having descended, and become incarnate of the Holy Spirit and Mary, the Virgin and Mother of God, is one and not two; for we affirm that both his miracles, and the sufferings which he voluntarily endured in the flesh, are those of a single person: for we do in no degree admit those who either make a division or a confusion, or introduce a phantom; inasmuch as his truly sinless incarnation from the Mother of God did not produce an addition of a son, because the Trinity continued a Trinity even when one member of the Trinity, the God Word, became incarnate. Knowing, then, that neither the holy orthodox churches of God in all parts, nor the priests, highly beloved of God, who are at their head, nor our own sovereignty, have allowed or do allow any other symbol or definition of faith than the before-mentioned holy lesson, we have united ourselves thereto without hesitation. And these things we write not as setting forth a new form of faith, but for your assurance : and every one who has held or holds any other opinion, either at the present or another time, whether at Chalcedon or in any synod whatever, we anathematise; and specially the before-mentioned Nestorius and Eutyches, and those who maintain their doctrines. Link yourselves, therefore, to the spiritual mother, the church, and in her enjoy the same communion with us, according to the aforesaid one and only definition of the faith, namely, that of the three hundred and eighteen holy fathers. For your all holy mother, the church, waits to embrace you as true children, and longs to hear your loved voice, so long withheld. Speed yourselves, therefore, for by so doing you will both draw towards yourselves the favor of our Master and Saviour and God, Jesus Christ, and be commended by our sovereignty.

When this had been read, all the Alexandrians united themselves to the holy catholic and apostolic church.

EVAGRIUS HISTORY CHAPTER 15

Correspondence Between Simplicius And Zeno. John, however, of whom we have made mention before, having fled from Alexandria, arrives at the ancient Rome, and there causes great stir, by saying that he had been banished from his rightful see for upholding the doctrines of Leo and the council at Chalcedon, and had been superseded by another person, who was their opponent. Upon this Simplicius, bishop of the elder Rome, writes in alarm to Zeno; who in reply charges John with perjury, and alleges that for this reason and no other he had been ejected from his bishopric.

EVAGRIUS HISTORY CHAPTER 16

Deposition Of Calandion And Restoration Of Petee The Fuller.

Calandion, president of Antioch, writing to the emperor Zeno, and to Acacius, president of Constantinople, terms Peter an adulterer, saying that, when he was at Alexandria, he had anathematised the council at Chalcedon. He is afterwards condemned to exile at Oasis, on a supposition of having supported Illus, Leontius, and Pamprepius, in their usurpation against Zeno; and Peter the Fuller, the predecessor of Calandion and Stephen, as I have mentioned, recovered his own see. The latter also subscribed the Henoticon of Zeno, and addressed synodical letters to Peter, bishop of Alexandria. Acacius, president of Constantinople, also entered into communion with him. Martyrius, too, bishop of Jerusalem, addressed synodical letters to Peter. Subsequently, certain persons withdrew from communion with Peter, who, in consequence, thenceforward openly anathematised the synod at Chalcedon. The news of this circumstance greatly troubled Acacius, and induced him to send persons to gain information on the subject; when Peter, to convince them that he had not so acted, drew up memorials, in which certain persons said, from their own knowledge, that Peter had not done any thing of the kind.

EVAGRIUS HISTORY CHAPTER 17

Letter From Peter To Acacius.

This Peter never abided by one opinion, being a double dealer, a waverer, and a time-server, now anathematising the synod at Chalcedon, at another time recanting, and admitting it with entire assent. Accordingly, the same Peter wrote an epistle to Acacius, president of Constantinople, in the following words: "The most high God will repay your holiness for the many labours and toils wherewith, during the lapse of time, you have guarded the form of faith of the holy fathers, which you have confirmed by unceasingly proclaiming it; in which form when we found the symbol of the three hundred and eighteen holy fathers to be embraced, we were disposed to accord with it; that symbol in which we believed at baptism, and still believe ; which also the hundred and fifty holy fathers, who assembled at Constantinople, confirmed. Accordingly, while increasing in your endeavours to guide all aright, you have united the holy church of God, by convincing us by the most powerful proofs that nothing at variance with this was enacted in the holy and general synod held at Chalcedon, but that it accorded with the acts of the holy fathers at Nicaea, and confirmed them. Thus, having discovered no novelty therein, we have of our own free motion accorded our assent and belief. But we are informed that certain monks, envying our brotherly union, have conveyed certain slanders to your holy ears, which have with some difficulty succeeded in embittering the feelings of your holiness. And, in the first place, it is alleged that we have removed to another place the remains of our sainted father, the blessed archbishop Timotheus, a thing abhorrent to religion and law: and they have further shifted their ground to another charge, in itself incoherent and worse than the former; for how could we possibly have anathematised the synod at Chalcedon, which we had previously confirmed by according to it our belief? But the malignant temper and fickleness of our people are notorious, and cannot but be known to your piety, as well as of those monks who are disposed to innovation ; who, in conspiracy with certain illdesigning persons that have broken loose from the church, are endeavouring to draw away the people. Through your prayers we have also devised a discourse of a directly healing tendency, and in no way impugning the synod at Chalcedon, well knowing that its transactions contain no novelty; and, further, for the satisfaction of guileless persons, we have procured those who had united themselves to us, to affirm this point. This mischief, then, by much exertion, I have readily checked: but I make known to your holiness, that even still the monks who are ever sowing the tares, are not at rest, associating also with themselves, as instruments, persons who were never the inmates of monasteries; but they travel about disseminating various rumours to our disadvantage, and, while they do not allow that we act canonically and in a manner suitable to the holv catholic church of God, but are habituating our people to govern rather than obey us, they are bent on doing whatever is unbecoming the service of God. We doubt not, however, that your holiness will inform the most sacred master of the world of all these circumstances, and provide that a formulary shall be put forth by his serenity, embracing the necessary matters relating to such a peace of the church as becomes both God and the emperor; so as to lead all to repose on its provisions.

EVAGRIUS HISTORY CHAPTER 18

Felix Issues A Sentence Of Deposition Against Acacius. John, who had fled to Rome, was urgent on Felix, the successor of Simplicius in that see, respecting the proceedings of Peter, and recommends, according to Zacharias, that an instrument of deposition should be sent to Acacius from Felix, on the ground of his communion with Peter: which, however, as being un-canonical, Acacius did not admit, as the same Zacharias writes, on its presentation by certain members of the monastery of the Acoemets, as they are called. Such is the account given by Zacharias; but he appears to me to have been altogether ignorant of the real transactions, and to have reported merely an imperfect hearsay. I now proceed to give a precise account of the proceedings. On the presentation of libels to Felix by John against Acacius, on the score of irregular communion with Peter, and other uncanonical proceedings, the bishops Vitalis and Misenus are sent by Felix to the emperor Zeno with a requisition that the authority of the synod at Chalcedon should be maintained, that Peter should be ejected as a heretic, and that Acacius should be sent to Felix to answer for himself to the charges brought against him by John, of whom we have made frequent mention

EVAGRIUS HISTORY CHAPTER 19 Interference Of Cyril The Monk.

Before, however, they reached the imperial city, Cyril, the superior of the Acoemets, writes to Felix, blaming his tardiness, when so grievous offences were being committed against the right faith; and Felix writes to Misenus and his associates, that they should take no measures until they had conferred with Cyril, and learnt from him what was best to be done.

EVAGRIUS HISTORY CHAPTER 20

Correspondence Between Felix And Zeno.

Further commonitories were also addressed to them by Felix; as also letters to Zeno, concerning both the synod at Chalcedon, and the persecution which Huneric was carrying on in Africa. He also wrote an epistle to Acacius. Zeno wrote in answer, that the concern with which John had filled him, was groundless; because, having sworn that he would in no way endeavour to insinuate himself into the see of Alexandria, and having subsequently violated these terms and disregarded his oath, he had been guilty of the extreme of sacrilege: that Peter had not been appointed without being tested, but had with his own hand subscribed his reception of the faith of the three hundred and eighteen holy fathers who met at Nicaea, which the holy synod at Chalcedon [The Council of Chalcedon, 451 AD.] also followed. Part of the epistle is in these precise words: "You ought to be assured that our piety, and the before-mentioned most holy Peter, and all the most holy churches, receive and revere the most holy synod at Chalcedon. which agreed with the faith of the Nicene synod.'

In the transactions are also contained epistles from the before-mentioned Cyril, and other archimandrites of the imperial city, and from bishops and clergy of the Egyptian province, addressed to Felix against Peter, as being a heretic, and against those who communicated with him. The members of the monastery of the Acoemets who came to Felix, further averred against Misenus and his party, that before their arrival at Constantinople, the; name of Peter had been read secretly in the sacred diptychs, and since that time without any concealment, and that they had in this way communicated with him. The epistle also of the Egyptians affirmed the same things respecting Peter; and that John, being orthodox, had been rightfully ordained: that Peter was ordained by two bishops only, maintainers of similar errors with himself: that since the flight of John every species of severity had been inflicted on the orthodox: that all these circumstances had been made known to Acacius by persons who had visited the imperial city: and that they were convinced that he was in all things acting in union with Peter.

EVAGRIUS HISTORY CHAPTER 21

Accusation Of The Legates By Simeon The Monk, And Their Consequent Deprivation.

This stir was further increased by Simeon. an Acoemet. who had been dispatched to Rome by Cyril. He expressly charged Misenus and Vitalis with holding communion with the heretics, by distinctly uttering the name of Peter in the reading of the sacred diptychs; and affirmed that many simple persons had, on this ground, been beguiled by the heretics, who said that Peter was admitted to the communion even of the Roman see: and, further, in reply to various interrogatories, Simeon said that Misenus and his party had declined to have communication with any orthodox person, either in person or by letter, or to sift any of the presumptuous attempts upon the right faith. There was also brought forward Silvanus, a presbyter, who had been in company with Misenus and Vitalis at Constantinople, and he confirmed the statement of the monks. There was read, too, a letter from Acacius to Simplicius, to the effect that Peter had been long ago deposed and had become a child of night. On these grounds Misenus and Vitalis were removed from the priesthood and severed from the holy communion, when a unanimous vote was passed by the synod, in the following terms: "The church of the Romans does not admit Peter, the heretic, who has also been long ago condemned by the holy see, excommunicated, and anathematised. To whom, if there were no other objection, this is sufficient, namely, that having been ordained by heretics, he could not have authority over the orthodox." The decree also contains what follows: The mere circumstance shews Acacius, bishop of Constantinople, to have incurred very great responsibility, because, writing to Simplicius and having termed Peter a heretic, he has nevertheless made no such declaration to the emperor: which was his duty, if he were loyal to him. He is, however, more partial to the emperor than to the faith."

Let me now return to the order of events. There is extant an epistle from Acacius to the Egyptian bishops, the clergy, monks, and the people in general, by which he endeavours to heal the existing schism: on which subject he also wrote to Peter, bishop of Alexandria.

EVAGRIUS HISTORY CHAPTER 22

Commotion At Alexandria On Account Of The Council Of Chalcedon.

While the schism at Alexandria was thus at its height, Peter, having again anathematised the tome of Leo, the transactions at Chalcedon, and those who refused to admit the writings of Dioscorus and Timotheus, induced some of the bishops and archimandrites to communicate with him, and failing to prevail upon the others, ejected most of them from their monasteries. On account of these proceedings, Nephalius visited the imperial city, and reported them to Zeno; who, in great vexation, despatches Cosmas, one of his officers, charged to load Peter with menaces, for the enforcement of unity, on the score of his having caused a serious dissension by his harshness. Cosmas returns to the imperial city without accomplishing the object of his mission, having merely restored those who had been ejected, to their monasteries. Subsequently, Arsenius is sent out by the emperor as governor of Egypt and commander of the forces. Arriving at Alexandria in company with Nephalius, he negociated with a view to unity; but failing to induce persons to acquiesce in his measures, he sends some of them to the imperial city, where, accordingly, many discussions took place in the presence of Zeno: but with no practical result, because the emperor altogether declined agreement with the synod at Chalcedon.

EVAGRIUS HISTORY CHAPTER 23

Succession Of Bishops At Constantinople, Alexandria, And Antioch.

At this juncture Acacius departed on the common journey of all men, and is succeeded by Fravitas. On his addressing synodical letters to Peter of Alexandria, the latter replies with a repetition of the former matters respecting the synod at Chalcedon. On the demise of Fravitas, after an episcopate of only four months, Euphemius was ordained as his successor, and is the recipient of the letters of Peter addressed to Fravitas. On discovering the anathema against the transactions at Chalcedon, his feelings were greatly roused, and he broke off from communion with Peter. Both epistles are extant, namely, from Fravitas to Peter, and from Peter to Fravitas; but I pass them over on account of their length. When, in consequence, Euphemius and Peter were upon the point of coming to open hostility, and summoning synods against each other, these proceedings were prevented by the death of the latter. He is succeeded by Athanasius, who attempted to unite the dissidents; but without success, since the parties were ranged under differences of opinion. Subsequently, when dispatching synodical letters to Palladius, the successor of Peter in the bishopric of Antioch, he took a similar course respecting the synod at Chalcedon; as did also John, his successor in the see of Alexandria. On the death of Palladius, and the succession of Flavian to the see of Antioch, Solomon, a presbyter of that church, is sent to Alexandria, as the bearer of synodical letters, with the request of an answer from John to Flavian. John is succeeded in the see of Alexandria by another of the same name. Such was the progress of these events down to a certain period of the reign of Anastasius: who had himself ejected Euphemius. I have been compelled thus to detail them continuously, for the sake of perspicuity and a ready comprehension of the whole.

EVAGRIUS HISTORY CHAPTER 24

Death Of Armatus.

Zeno, at the instigation of Illus, puts to death Armatus, a kinsman of the empress Verina. When Armatus had been sent against him by Basiliscus, Zeno had succeeded, by bribes, in converting him from a foe into an ally, and had bestowed on his son Basiliscus the rank of Caesar at Nicaea: but on his return to Constantinople, he procures the assassination of Armatus, and makes his son a priest instead of Caesar. The latter was afterwards raised to the episcopal dignity.

EVAGRIUS HISTORY CHAPTER 25

Insurrection And Death Of Theodoric.

Theodoric also, a Scythian, raised an insurrection, and having collected his forces in Thrace, marched against Zeno. After ravaging every place in his march as far as the mouth of the Pontus, he was near taking the imperial city, when some of his most intimate companions were secretly induced to enter into a plot against his life. When, however, he had learnt the disaffection of his followers, he commenced a retreat, and was very soon afterwards numbered with the departed, by a kind of death which I will mention, and which happened thus. A spear, with its thong prepared for immediate use, had been suspended before his tent in barbaric fashion. He had ordered a horse to be brought to him for the purpose of exercise, and being in the habit of not having any one to assist him in mounting, vaulted into his seat. The horse, a mettlesome and ungovernable animal, reared before Theodoric was fairly mounted, so that, in the contest, neither daring to rein back the horse, lest it should come down upon him, nor yet having gained a firm seat, he was whirled round in all directions, and dashed against the point of the spear, which thus struck him obliquely, and wounded his side. He

was then conveyed to his couch, and after surviving a few days, died of the wound.

EVAGRIUS HISTORY CHAPTER 26

Insurrection Of Marcian.

Subsequently Marcian had a rupture with Zeno, and attempted to dispute the empire with him. He was the son of Anthemius who had formerly reigned at Rome, and was allied to Leo, the preceding emperor, having married his younger daughter Leontia. After a severe battle around the palace, in which many fell on both sides, Marcian repulsed his opponents, and would have become master of the palace, had he not let slip the critical moment, by putting off the operation to the morrow.

For the critical season is swift of flight: when it is close upon one, it may be secured; but should it once have escaped the grasp, it soars aloft and laughs at its pursuers, not deigning to place itself again within their reach. And hence no doubt it is, that statuaries and painters, while they figure it with a lock hanging down in front, represent the head as closely shaven behind; thus skilfully symbolising, that when it comes up from behind one, it may perhaps be held fast by the flowing forelock, but fairly escapes when it has once got the start, from the absence of any thing by which the pursuer might grasp it.

And this was what befel Marcian, when he had lost the moment favourable to his success, and was unable to find it afterwards. For the next day he was betrayed by his own followers, and being completely deserted, fled to the sacred precinct of the divine Apostles; whence he was dragged away by force, and transported to Caesarea in Cappadocia. Having there joined the society of certain monks, he was afterwards detected in meditating an escape; and being removed by the emperor to Tarsus in Cilicia, he was shorn, and ordained a presbyter: of all which particulars an elegant narrative has been given by Eustathius the Svrian.

EVAGRIUS HISTORY CHAPTER 27

Insurrection Of Illus And Leontius.

The same writer states that Zeno also devised innumerable machinations against his mother-in-law Verina, and afterwards sent her away to Cilicia; and that subsequently, on the assumption of sovereign power by Illus, she removed to what is called the castle of Papirius; where she died.

Eustathius also narrates with great ability the story of Illus: how he escaped Zeno's plots against him, and how Zeno gave up to capital punishment the man who had been commissioned to murder Illus, rewarding him with the loss of his head for his failure in the attempt. He also appointed Illus commander of the forces of the East, thinking thus to conceal his real designs: but he, having gained over as partizans Leontius, Marstis, a man of reputaion, and Pamprepius, proceeded to the east.

The same Eustathius then mentions the proclamation of Leontius as emperor, which took place at Tarsus in Cilicia; and how these persons reaped the fruits of their assumption of power, when Theodoric, a man of Gothic extraction, but illustrious among the Romans, had been sent out against them, with a force composed both of native and foreign troops.

The same author ably depicts the fate of those who were miserably put to death by Zeno in return for their loyalty to him; and how Theodoric, becoming aware of the evil designs of Zeno, withdrew to the elder Rome. Some, however, say that this was done at the suggestion of Zeno. Having there defeated Odoacer, he made himself master of Rome, and assumed the title of king.

EVAGRIUS HISTORY CHAPTER 28

Account Of Mammianus And His Structures.

John the rhetorician writes, that in the time of Zeno, Mammianus from an artizan became a person of note and a member of the senate; and that he built in the suburb of Daphne what is called the Antiphorus, on a site previously planted with vines and suitable for cultivation, directly opposite the public baths; where there is also the brazen statue inscribed, "Mammianus the friend of the city." He also states that he built within the city, two basilicas, singularly beautiful in their design, and embellished with brilliant stonework; and that, as an intervening structure to the two, he raised a Tetrapylum, exquisitely finished both in its columns and its brazen work. The basilicas I have identified, retaining, together with their name, some trace of their former beauty. in the stones from Procomiesus, which form the pavement, but nothing remarkable in their architecture: for, in consequence of the calamities which had befallen them, they had lately been rebuilt, without receiving any thing in the way of ornament. Of the Tetrapylum I was not able to detect the slightest vestige.

EVAGRIUS HISTORY CHAPTER 29

Death Of Zeno.---Succession Of Anastasius. [491 AD.] On the decease of Zeno, by epilepsy, without issue, after a reign of seventeen years, Longinus his brother, having raised himself to considerable power, hoped to secure the

sovereignty, but was, notwithstanding, disappointed of his expectation. For Ariadne bestows the diadem on Anastasius, a person who had not yet attained senatorian rank, but belonged to the corps of the Silentiaries.

Eustathius writes, that two hundred and seven years elapsed from the beginning of the reign of Diocletian to the death of Zeno and the nomination of Anastasius: five hundred and fifty-two years and seven months from the time that Augustus obtained the supreme power; eight hundred and thirty-two years and seven months from the reign of Alexander the Macedonian; one thousand and fifty-two years and seven months from the reign of Romulus; one thousand six hundred and eighty-six years and seven months from the taking of Troy.

This Anastasius, being a native of Epidamnus, now called Dyrrachium, both succeeds to the sovereignty of Zeno and espouses his wife Ariadne. In the first place, he dismisses to his native country Longinus, the brother of Zeno, who held the post of Master of the Offices, formerly termed commander of the household troops; and afterwards, many other Isaurians at their own request.

EVAGRIUS HISTORY CHAPTER 30 Divisions In The Church.

This Anastasius, being of a peaceful disposition, was altogether averse to the introduction of changes, especially in the state of the church, but endeavoured by every means, that the most holy churches should continue undisturbed, and the whole body of his subjects enjoy profound tranquillity, by the removal of all strife and contention from matters both ecclesiastical and civil. During these times, accordingly, the synod of Chalcedon was neither openly proclaimed in the most holy churches, nor yet was repudiated by all: but the bishops acted each according to his individual opinion. Thus, some very resolutely maintained what had been put forth by that synod, and would not yield to the extent of one word of its determinations, nor admit even the change of a single letter, but firmly declined all contact and communion with those who refused to admit the matters there set forth. Others, again, not only did not submit to the synod of Chalcedon and its determinations, but even anathematised both it and the tome of Leo. Others, however, firmly adhered to the Henoticon of Zeno, and that too although mutually at variance on the point of the single and double nature; some being caught by the artful composition of that document; and others influenced by an inclination for peace. Thus the churches in general were divided into distinct factions, and their presidents did not even admit each other to communion.

Numerous divisions, hence arising, existed in the East, in the West, and in Africa; while the eastern bishops had no friendly intercourse with those of the West and Africa, nor the latter with those of the East. The evil too became still more monstrous, for neither did the presidents of the eastern churches allow communion among themselves, nor yet those who held the sees of Europe and Africa, much less with those of remote parts.

In consideration of these circumstances, the Emperor Anastasius removed those bishops who were promoters of change, wherever he detected any one either proclaiming or anathematising the synod of Chaleedon in opposition to the practice of the neighbourhood. Accordingly, he rejected from the see of the imperial city, first, Euphemius, as has been already mentioned, and afterwards Macedonius, who was succeeded by Timotheus; and Flavian from the see of Antioch.

EVAGRIUS HISTORY CHAPTER 31

Letter To Alcison From The Monks Of Palestine.

The monastic body in Palestine, writing to Alcison concerning Macedonius and Flavian, express themselves thus: "On the death of Peter, they were again separated, but Alexandria, Egypt, and Africa remained at unity among themselves; as, on the other hand, did the rest of the East; while the churches of the West refused to communicate with them on any other terms than the anathematising of Nestorius, Eutyches, and Dioscorus, including also Peter, surnamed Mongus, and Acacius. Such, then, being the situation of the churches throughout the world, the genuine followers of Dioscorus and Eutyches were reduced to a very small number; and when they were upon the point of disappearing altogether from the earth, Xenaias, who was truly a stranger to God, with what object we know not, or pursuing what enmity towards Flavian, but under colour of defending the faith, as is generally said, begins to raise a stir against him, and to calumniate him as being a Nestorian. When, however, he had anathematised Nestorius and his notion, Xenaias transferred his attacks from him to Dioscorus and Theodore, Theodoret, Ibas, Cyrus, Eleutherius, and John; and we know not whom, besides and whence he mustered them: some of whom really maintained the opinions of Nestorius, but others, having been suspected, anathematised him, and departed in the communion of the church. 'Unless,' said he, 'thou shalt anathematise all these, as holding the opinions of Nestorius, thou art thyself a Nestorian, though thou shouldest ten thousand times anathematise him and his notion.' He also endeavoured by letters to induce the advocates of Dioscorus and Eutyches to take arms with him against Flavian, not however with a view of exacting from him an anathema upon the synod, but merely on the before-mentioned persons. But when the bishop Flavian had maintained a prolonged resistance to them, and other persons had united with Xenaias against him, namely, Eleusinus, a bishop of Cappadocia Secunda, Nicias, of Laodicea in Syria, and others from other quarters, the motive of whose spite against Flavian it is the province of others, not of ourselves, to detail; at last, in hope of peace, he yielded to their contentious spirit, and having in writing anathematised the before-mentioned persons, he despatched the instrument to the emperor, for they had stirred up him also against Flavian as a maintainer of the opinions of Nestorius. Xenaias, not contented with this, again demands of Flavian that he should anathematise the synod itself, and those who maintained two natures in the person of the Lord, namely, the flesh and the Godhead; and on his refusal, again accused him of being a Nestorian. After much stir upon this subject, and after the patriarch had put forth an exposition of faith, in which he confessed that he admitted the synod as far as regards the deposition of Nestorius and Eutyches, not however as defining and teaching the faith; they again impugn him as secretly holding the opinions of Nestorius, unless he would further anathematise the synod itself, and those who maintained two natures in the person of the Lord, the flesh and the Godhead. They also win over to their side the Isaurians, by various deceitful expressions, and having drawn up a formulary of faith, in which they anathematise the synod together with those who maintained the two natures or persons, they separate themselves from Flavian and Macedonius, but unite with others on their subscribing the formulary. At the same time they also demanded of the bishop of Jerusalem a written statement of faith; which he put forth, and sent to the emperor by the hands of the party of Dioscorus. This they present, containing ari anathema upon those who maintained the two natures. But the bishop of Jerusalem himself, affirming that it had been forged by them, puts forth another without such anathema. And no wonder. For they have often forged discourses of the fathers, and to many writings of Apollinaris they have attached titles assigning them to Athanasius, Gregory Thaumaturgus, and Julius: their principal object in so doing being to draw over the multitude to their own impieties. They also demanded of Macedonius a written statement of faith; who put one forth, affirming that he recognised only the creed of the three hundred and eighteen, and of the one hundred and fifty fathers, anathematising at the same time Nestorius Eutyches and those who held the doctrine of two sons or two Christs, or divided the natures: making, however, no mention of the synod of Ephesus, which deposed Nestorius, nor that of Chalcedon, which deposed Eutyches. Indignant at this, the monastic bodies about Constantinople separate from their bishop Macedonius. In the mean time Xenaias and Dioscorus, associating with them many of the hishops became insufferable from the stir which they raised against those who refused to anathematise; and, by various devices, they endeavoured to procure the banishment of those who persisted in their refusal. In this way, accordingly, they banish both Macedonius, find John, bishop of Paltus, and Flavian." Such are the contents of the letter.

EVAGRIUS HISTORY CHAPTER 32

Ejection Of Macedonius And Flavian From Their Sees.

There were other things which caused secret vexation to Anastasius. For when Ariadne was desirous of investing him with the purple, Euphemius, who held the archiepiscopal see, withheld his approval, until Anastasius had presented to him an agreement, written with his own hand, and secured with fearful oaths, that he would maintain the faith inviolate, and introduce no innovation into the holy church of God, in case he should obtain the sceptre: which document he also deposited with Macedonius, the keeper of the sacred treasures. This measure he adopted, because Anastasius had generally the reputation of holding the Manichaean doctrine. When, however, Macedonius ascended the episcopal throne, Anastasius was desirous that the agreement should be returned to him, affirming it to be an insult to the imperial dignity, if the before-mentioned document, in his own handwriting, should be preserved : and when Macedonius resolutely opposed the demand, and firmly protested that he would not betray the faith, the emperor pursued every insidious device for the purpose of ejecting him from his see. Accordingly, even boys were brought forward as informers, who falsely accused both themselves and Macedonius of infamous practices. But when Macedonius was found to be emasculate, they had recourse to other contrivances; until, by the advice of Celer, commander of the household troops, he secretly retired from his see

With the ejection of Flavian, other circumstances are associated. For we have met with some very aged men who remembered all the events of this time. These say, that the monks of the district called Cynegica, and of the whole of Syria Prima, having been wrought upon by Xenaias, who was bishop of the neighbouring city of Hierapolis, and who was named in Greek Philoxenus, rushed into the city in a body with great noise and tumult, endeavouring to compel Flavian to anathematise the synod of Chalcedon and the tome of Leo. Roused at the indignation manifested by Flavian, and the violent urgency of the monks, the people of the city made a great slaughter of them, so that a very large number found a grave in the Orontes, where the waves performed their only funeral rites. There happened also another circumstance of scarcely less magnitude than the former. For the monks of Caele Syria, now called Syria Secunda, from sympathy with Flavian, since he had led a monastic life in a monastery of the district called Tilmognon, advanced to Antioch, with the intention of defending him. From which circumstance, also, no inconsiderable mischief arose. Accordingly, on the ground either of the former or latter occurrence, or both. Flavian is ejected, and condemned to reside at Petra, on the extreme verge of Palestine.

EVAGRIUS HISTORY CHAPTER 33 Severus Bishop Of Antioch.

Flavian having been thus ejected, Severus ascends the

episcopal throne of Antioch, in the five hundred and sixtyfirst year of the era of that city, in the month Dius, the sixth year of the Indiction; the year in which I am now writing being the six hundred and forty-first of that era. He was a native of Sozopolis, a city of Pisidia, and had applied himself to the profession of a pleader at Berytus; but immediately on his abandoning the practice of the law, having participated in holy baptism in the sacred precinct of the divine martyr Leontius, who is revered at Tripolis, a city of Phoenicia Maritima, he assumed the monastic life in a certain monastery situated between the city of Gaza and the town called Majumas; in which latter place Peter the Iberian, who had been bishop of the same Gaza, and had been banished with Timotheus Aelurus, passed through the same discipline, and left behind him a famous memory. Severus there engages in a discussion with Nephalius, who had formerly sided with him on the question of the single nature, but had subsequently been one of the synod at Chalcedon and among those who held the opinion of two natures in the person of our Lord Jesus Christ; and he is, in consequence, expelled from his own monastery by Nephalius and his party, together with many others who held similar doctrines. Thence he proceeds to the imperial city, to plead the cause of himself and those who had been expelled with him, and thus obtains the notice of the emperor Anastasius, as is narrated by the author of the life of Severus.

Accordingly, Severus, in issuing synodical letters, expressly anathematised the synod at Chalcedon: on which point the letters addressed to Alcison speak as follows. "The synodical letters of Timotheus of Constantinople were admitted here in Palestine, but the deposition of Macedonius and Flavian was not admitted, nor yet the synodical letters of Severus; but the bearers were put to flight, with the ignominy and insult which they deserved, by the people and monks of the city, who rose upon them. Such was the situation of matters in Palestine. But of the bishops subject to Antioch, some were carried away into compliance, among whom was Marinus, bishop of Berytus; others by force and compulsion concurred in the synodical letters of Severus, which included an anathema, both on the synod and all others who affirmed two natures or persons in the Lord, namely, the flesh and the Godhead: and others, after having concurred by compulsion, recalled their assent, and among them the bishops subject to Apamea; others, again, altogether refused concurrence, among whom were Julian, bishop of Bostra, Epiphanius of Tyre, and some others, as is said. But the Isaurian bishops, having returned to their sober senses, are now condemning themselves for the error into which they had been beguiled, and are anathematising Severus and his party. Others of the bishops and clergy subject to Severus have abandoned their churches, and among them Julian of Bostra, and Peter of Damascus, who are now living in these parts, as also Manias. This latter is one of those two who seemed to be the chiefs of the followers of Dioscorus, by whose means also Severus obtained his dignity: but he now condemns the arrogance of that party." And presently the letter proceeds. "The monasteries in these parts and Jerusalem itself are, with the aid of God, unanimous respecting the right faith, and very many cities besides, together with their bishops, for all of whom, and for ourselves, pray thou that we may not enter into temptation, our most holv lord and honoured father.

EVAGRIUS HISTORY CHAPTER 34

Act Of Deposition Against Severus.

Since, then, these letters state, that the priests subject to Apamea had separated from Severus, let me now add a circumstance transmitted to us from our fathers, although it has not hitherto found a place in history. Cosmas, bishop of my native place, Epiphanea, which stands on the Orontes, and Severian, bishop of the neighbouring city of Arethusa, being troubled at the synodical letters of Severus, and having withdrawn from his communion, despatched an instrument of deposition to him, while still bishop of Antioch. They entrust the document to Aurelian, chief of the deacons at Epiphanea, and he, through dread of Severus and the majesty of so great a bishopric, on his arrival at Antioch puts on a female dress, and approaches Severus with delicate carriage and the entire assumption of a woman's appearance. Letting his vail fall down to his breast, with wailing and deep drawn lamentation he presents to Severus, as he advanced, the instruments of deposition in the guise of a petition: he then passes unobserved from among the attendant crowd and purchased safety by flight, before Severus had learned the purport of the document. Severus, having received the document and learned its contents, continued, nevertheless, in his see, until the death of Anastasius.

On being informed of these transactions, for I must record the benevolent measure of Anastasius, he directs Asiaticus, who was commander in Phoenicia Libanensis, to eject Cosmas and Severian from their sees, because they had sent the instrument of deposition to Severus. Finding, on his arrival in the East, that many adhered to the opinions of those bishops, and that their cities resolutely upheld them, he reported to Anastasius that he could not eject them without bloodshed. So great then was the humanity of Anastasius, that he wrote in express terms to Asiaticus, that he did not desire the accomplishment of any object, however important and illustrious, if one drop of blood was to be shed.

Such, then, was the situation of the churches throughout the world down to the reign of Anastasius; whom some, treating him as an enemy to the synod at Chalcedon, erased from the sacred diptychs; and he was also anathematised at Jerusalem even during his life-time.

EVAGRIUS HISTORY CHAPTER 35 Suppression Of The Isaurian Insurrection.

It will not be inconsistent, if, in accordance with the promise which I originally made, I insert in my narrative the other circumstances worthy of mention which occurred in the time of Anastasius.

Longinus, the kinsman of Emperor Zeno, on his arrival at his native country, as has been already detailed, openly commences war against the emperor: and after a numerous army had been raised from different quarters, in which Conon, formerly bishop of Apamea in Syria, was also present, who, as being an Isaurian, aided the Isaurians, an end was put to the war by the utter destruction of the Isaurian troops of Longinus. The heads of Longinus and Theodore were sent to the imperial city by John the Scythian; which the emperor displayed on poles at the place called Sycae, opposite Constantinople, an agreeable spectacle to the Romans, who had been hardly treated by Zeno and the Isaurians. The other Longinus, surnamed of Selinus, the main stay of the insurgent faction, and Indes, are sent alive to Anastasius by John, surnamed Hunchback; a circumstance which especially gladdened the emperor and the Romans, by the display of the prisoners led in triumph along the streets and the hippodrome, with iron chains about their necks and hands. Thenceforward also, the payment called Isaurica accrued to the imperial treasury, being gold previously paid to the Barbarians annually, to the amount of five thousand pounds.

EVAGRIUS HISTORY CHAPTER 36

Invasion Of The Arabs. [500 AD.]

The Scenite* barbarians also insulted the Roman empire; not, however, to their own advantage; by plundering Mesopotamia, either Phoenicia, and Palestine [Judaea and Galilee]. After having been everywhere chastised by the commanders, they subsequently continued quiet, and universally made peace with the Romans. [* meaning Semite; the Arabs and Judaeans, of whom many belonged to the Messianic Movement that was defeated by Vespasian and Titus in the First Roman-Jewish War, 66-73 AD. They had to flee into the Arabian deserts. From places such as Petra or Mada'in Saleh, they constantly fought wars against the Romans and Persians. There were not only 3 Roman-Jewish wars but at least 10 Roman-Jewish how many wars they lauched against the Persians is unknown.]

EVAGRIUS HISTORY CHAPTER 37

Capture Of Amida. Founding Of Daras.

The Persians too, having, in violation of treaties, marched beyond their own territories under their king Cabades, first attacked Armenia, and having captured a town named Theodosiopolis, reached Amida, a strong city of Mesopotamia, which they took by storm; and which the Roman emperor subsequently restored by great exertions.

If any one is inclined to learn the particulars of these transactions, and to trace the whole minutely, a very able narrative, a work of great labour and elegance, has been composed by Eustathius; who, after having brought down his history to this point, was numbered with the departed; closing with the twelfth year of the reign of Anastasius.

After the close of this war, Anastasius founds a city on the spot called Daras, in Mesopotamia, situated near the limits of the Roman dominion, and, as it were, a border-point of the two empires. He surrounds it with strong fortifications, and embellishes it with various stately erections, both of churches and other sacred buildings, basilicas, public baths, and other ornaments of distinguished cities. The place is said by some to have obtained the name of Daras, because there Alexander the Macedonian, the son of Philip, utterly defeated Darius.

EVAGRIUS HISTORY CHAPTER 38

The Long Wall. [507 AD.]

By the same emperor was raised a vast and memorable work called the Long Wall, in a favourable situation in Thrace, distant from Constantinople two hundred and eighty stadia. It reaches from one sea to the other, like a strait, to the extent of four hundred and twenty stadia; making the city an island, in a manner, instead of a peninsula, and affording a very safe transit, to such as choose, from the Pontus to the Euxine Sea. It is a check upon the inroads of the Barbarians from the Euxine, and of the Colchians from the Palus Maeotis, and from beyond the Caucasus, as well as of those who have made irruptions from Europe.

EVAGRIUS HISTORY CHAPTER 39

Abolition Of The Chrysargyrum.

The same emperor completed an extraordinary and divine achievement, namely, the entire abolition of the tax called chrysargyrum: which transaction I must now detail, though the task needs the eloquence of Thucydides, or something still more lofty and graceful. I will, however, myself describe it, not in reliance upon powers of language, but encouraged by the nature of the action.

There was imposed upon the Roman commonwealth, so singular in its magnitude and duration, a tax vile and hateful to God, and unworthy even of Barbarians, much more of the most Christian empire of the Romans: which, having been overlooked, from what cause I am unable to say, until the time of Anastasius, he most royally abolished. It was imposed, both on many other classes of persons who procured their livelihood by an accumulation of petty gains, and also upon women who made a sale of their charms, and surrendered themselves in brothels to promiscuous fornication in the obscure parts of the city; and besides, upon those who were devoted to a prostitution which outraged not only nature but the common weal: so that this mode of revenue proclaimed, as distinctly as a direct enactment, that all who chose, might practise such wickedness in security. The impious and accursed revenue raised from this source, the collectors paid at the end of every five years into the hands of the first and most dignified of the prefects: so that it formed no unimportant part of the functions of that office, and had its separate exchequer, and accountants, men who regarded the business as a military service, suited, like the rest, to persons of some distinction.

Anastasius, being informed of the circumstance, laid the matter before the senate, and justly declaring it to be an abomination and unparallelled defilement, decreed that it should be utterly abolished; and committed to the flames the papers which were vouchers for its collection. With the desire also of making this measure a complete sacrifice to God, and of preventing any of his successors from reviving the ancient shame, he puts on the appearance of vexation, and accuses himself of inconsiderateness and excessive folly, saying, that in the too eager pursuit of novelty he had neglected the interests of the commonwealth, and had rashly and thoughtlessly abolished so important a revenue, which had been established in former times and confirmed by so long a continuance, without duly weighing the impending dangers, or the expenses necessary for the maintenance of the army, that living bulwark of the empire, nor yet for the service of God. Accordingly, without betraying his secret thoughts, he proclaims his desire to restore the before-mentioned revenue: and having summoned those who had been in charge of the levy, he told them that he repented of the step, but knew not what course to take, or how to rectify his error, now that the papers had been burnt which could be vouchers for the particulars of its exaction. And while they, on their part, lamented the abolition of the levy, not in semblance but in reality, on account of the unrighteous gain which had thence accrued to them, and were professing the same perplexity as the emperor, he urged and exhorted them to employ every mode of search, in the endeavour to procure from among documents preserved in various quarters, a statement of the entire levy. Supplying each individual with money, he despatched him to collect materials, enjoining him to bring every paper which threw light upon this matter wherever it might be found; that by means of the utmost circumspection and minute attention, a statement of the business might be again put together. Accordingly, on the return of those who were engaged in the execution of these orders, Anastasius put on a pleased and gladsome appearance, and was in reality rejoiced in having compassed the object on which he was bent. He also made particular enquiries, both how they were discovered and in whose possession, and whether any thing of the same kind was still remaining: and on their affirming that they had expended great pains upon the collection, and swearing by the emperor himself, that no other paper which

could be a voucher was preserved throughout the whole empire, Anastasius again lighted up a great pile with the papers thus produced, and drenched the ashes with water, with the intention of removing every trace of this levy; so that there might appear neither dust, nor ashes, nor any remnant whatever of the business, through imperfect combustion.

In order, however, that, while we are thus extolling the abolition of this impost, we may not seem to be ignorant how much has been written under passionate feelings on the subject by former authors, let me produce these matters, and shew their falsehood, and that more especially from their own statements.

EVAGRIUS HISTORY CHAPTER 40 Falsehoods Of The Historian Zosimus.

Zosimus, a follower of the accursed and foul religion of the

Greeks, in his anger against Constantine, because he was the first emperor that had adopted Christianity, abandoning the abominable superstition of the Greeks, says, that he was the person who devised the tax called Chrysargyrum, and enacted that it should be levied every five years. He has on many other grounds also reviled that pious and magnificent monarch: for he affirms that he contrived many other intolerable proceedings against every class of persons; that he miserably destroyed his son Crispus, and made away with his wife Fausta by inclosing her in an overheated bath; and that, after having in vain endeavoured to to procure purification from murders so detestable at the hands of the priests of his own religion (for they plainly declared its impossibility), he met with an Egyptian who had come from Iberia; and, having been assured by him that the faith of the Christians had the power of blotting out every sin, he embraced what the Egyptian had imparted to him, and thenceforward abandoning the faith of his fathers, he made the commencement of his impiety. The falsehood of these assertions I will forthwith shew, and in the first place treat of the matter of the Chrysargyrum.

EVAGRIUS HISTORY CHAPTER 41 Refutation Of Zosimus.

Thou sayest, O evil and malignant demon, that Constantine, wishing to raise a city equal to Rome, first made a commencement of so vast a place by laying strong foundations and erecting a lofty wall between Troas and Ilium; but when he had discovered in Constantinople a more suitable site, he in such fashion encircled the place with walls, so far extended the former city, and embellished it with buildings so splendid, as hardly to be surpassed by Rome itself, which had received gradual increase through so long a course of years. Thou sayest also that he made a distribution of provisions at the public cost to the people of Constantinople, and bestowed a very large sum of gold upon those who had accompanied him thither, for the erection of private houses. Again, thou writest to the following effect: that on the decease of Constantine, the imperial power came into the hands of Constantius, his only surviving son after the death of his two brothers; and that when Magnentius and Vetranio had assumed the sovereignty, he wrought upon the latter by persuasives: and when both armies had been mustered, Constantius, addressing them first, reminded the soldiers of the generosity of his father, with whom they had served through many wars, and by whom they had been distinguished with the most liberal gifts; and that the soldiers, on hearing this, stripped Vetranio of his imperial robe, and made him descend from the tribunal into a private station; and that he suffered no unkindness at the hands of Constantius : who has shared with his father in so much of thy calumny. How thou canst then maintain that the same person could be so liberal, so munificent, and at the same time so paltry and sordid as to impose so accursed a tax, I am utterly unable to comprehend.

In proof that Constantine did not destroy Fausta or Crispus, nor was on that account initiated by an Egyptian into our mysteries, listen to the history of Eusebius Pamphili, who was contemporary with Constantine and Crispus, and had intercourse with them. For what thou writest, so far from being truth, was not even contemporary hearsay, since thou livedst long after, in the time of Arcadius and Honorius----to which period thou hast brought down thy history----or even after their time. Eusebius, in the eighth book of his ecclesiastical history, has the following words: "After no very long interval, the emperor Constantine, having maintained a disposition remarkable for gentleness in respect to his whole life, kindliness towards his subjects, and favour towards the divine word, closes his life by the common laws of nature, leaving behind him, as emperor and Augustus in his own room, a, legitimate son, Constantius." And farther on he says: "His son Constantius, having at the very commencement of his reign been proclaimed supreme emperor and Augustus by the armies, and long before by God himself, the universal Sovereign, shewed himself an imitator of his father's piety as respects our faith." And at the end of the history he expresses himself in the following terms: "The mighty, victorious Constantine, distinguished by every religious excellence, in conjunction with his son Crispus, a sovereign highly beloved

of God, and resembling his father in all things, obtained his rightful possession of the East." Eusebius, who survived Constantine, would never have praised Crispus in these terms, if he had been destroyed by his father. Theodoret, in his history, says that Constantine partook in the saving baptism at Nicomedia, near the close of his life, and that he had deferred the rite till this period, from a desire that it should be performed in the river Jordan.

Thou sayest, O most detestable and polluted one, that the Roman empire from the time of the appearance of Christianity, fell away and was altogether ruined: either because thou hast not read any of the older writings, or because thou art a traitor to the truth. For, on the contrary, it clearly appears that the Roman power increased together with the spread of our faith. Consider, for instance, how, at the very time of the sojourn of Christ our God among mankind, the greater part of the Macedonians were crushed by the Romans, and Albania, Iberia, the Colchians, and Arabians were subjugated. Caius Caesar also, in the hundred and eighty-first Olympiad, subdued in great battles the Gauls, Germans, and Britons, and thereby added to the Roman empire the inhabitants of five hundred cities: as has been recorded by historians. He also was the first who attained to sole sovereignty since the establishment of consuls, thereby preparing a way for the previous introduction of a reverence for monarchy, after the prevalence of polytheism and popular rule, on account of the monarchy of Christ which was immediately to appear. A further acquisition was also forthwith made of the whole of Judaea and the neighbouring territories: so that it was at this time that the first registration took place; in which Christ also was enrolled, in order that Bethlehem might fulfil the prophecy relating to it; for thus had the prophet Micah spoken respecting that place: "And thou, Bethlehem, territory of Judah, art by no means least among the princes of Judah, for from thee shall come forth a governor who shall feed my people Israel." Also after the nativity of Christ our God, Egypt was added to the Roman dominion; Augustus Caesar, in whose time Christ was born, having completely overthrown Antony and Cleopatra; who also killed themselves. Upon which Cornelius Gallus is appointed by Augustus governor of Egypt, being the first who ruled that country after the Ptolemies: as has been recorded by historians. To what extent the territories of the Persians were curtailed by Ventidius, Corbulo the general of Nero, Severus, Trajan, Carus, Cassius, Odenatus of Palmyra, Apollonius, and others; and how often Seleucia and Ctesiphon were taken, and Nisibis changed sides; and how Armenia and the neighbouring countries were added to the Roman empire: these matters have been narrated by thyself, as well as by others.

I had, however, nearly forgotten to notice what thou thyself writest respecting the achievements of Constantine, how nobly and courageously he swayed the Roman empire, while professing our religion, and what befell Julian, thy hero and the votary of thy orgies, who bequeathed to the commonwealth injuries so serious. Whether, however, he has either already received a foretaste of the things which have been foretold concerning the end of the world, or will even receive their full measure, is a question relating to an economy too high for thy comprehension.

Let us, at all events, consider under what circumstances heathen and Christian emperors have respectively closed their reigns. Did not Caius Julius Caesar, the first sole sovereign. close his life by assassination? In the next place, did not some of his own officers despatch with their swords Caius, the grandson of Tiberius? Was not Nero slain by one of his domestics? Did not Galba, Otho, and Vitellius, who reigned in all only sixteen months, suffer a similar fate? Was not Titus, on his attaining the empire, taken off by poison by his own brother Domitian? Was not Domitian himself miserably despatched by Stephanus? What too dost thou say about Commodus? Was not he killed by Narcissus? Pertinax and Julian, did they not meet with the same treatment? Antoninus, the son of Severus, did he not murder his brother Geta, and was himself murdered by Martial? Macrinus too, was he not dragged about Constantinople, like a captive, and then butchered by his own soldiers? And Aurelius Antoninus, the Emesene, was he not slaughtered together with his mother? And his successor Alexander, was he not, together with his mother, involved in a similar catastrophe? What should I say, too, concerning Maximin, who was slain by his own troops? or Gordian, brought to a similar end by the designs of Philip? Tell me whether Philip and his successor Decius did not perish by the hands of their enemies? And Gallus and Volusian by their own armies? Aemilian, was he not involved in the same fate? And Valerian, was he not made prisoner and carried about as a show by the Persians? After the assassination of Gallienus and the murder of Carinus, the sovereignty came into the hands of Diocletian and those whom he chose as his partners in the empire. Of these, Herculius, Maximian, and Maxentius his son, and Licinius utterly perished. But from the time that the renowned Constantine succeeded to the empire, and had dedicated to Christ the city which bears his name, mark me, whether any of those who have reigned there, except Julian thy hierophant and monarch, have perished by the

hands of either domestic or foreign foes, and whether a rival has overthrown any of them; except that Basiliscus expelled Zeno, by whom, however, he was afterwards overthrown and killed. I also agree with thee in what thou sayest about Valens, who had inflicted so many evils upon the Christians: for of any other case not even thou thyself makest mention.

Let no one think that these matters are foreign to an ecclesiastical history; since they are, in fact, altogether useful, and essential, on account of wilful desertion of the cause of truth on the part of heathen writers. Let me now proceed to the rest of the acts of Anastasius.

EVAGRIUS HISTORY CHAPTER 42

The Gold-Rate.

The before-mentioned measures Anastasius successfully carried out in a truly royal spirit; but he adopted others by no means worthy of them: both by devising what is called the gold-rate, and farming out the supplies for the army on terms most burdensome to the provincials. He also took the levying of imposts out of the hands of the councils of the respective cities, and appointed what are called Vindices, at the suggestion, as is said, of Marinus the Syrian, who held the highest prefecture, termed in former times the Prefect of the Praetorium. The result was that the revenue fell off to a great extent, and the local dignitaries sunk into abeyance: for persons of high families formerly had their names inscribed in the album of each city; which regarded those who were members of its council, as a kind of senate.

EVAGRIUS HISTORY CHAPTER 43

Insurrection Of Vitalian. [514 AD.] Vitalian, a Thracian by birth, disputes the empire with Anastasius, and having devastated Thrace and Mysia as far as Odessus and Anchialus, was advancing rapidly upon the imperial city, at the head of an innumerable force of Huns. The emperor despatched Hypatius to encounter this force; and, after he had been captured through the treachery of his own troops, and liberated at a large ransom, the conduct of the war was entrusted to Cyril.

The battle which followed, was at first indecisive, with several subsequent alternations of success; but, notwithstanding the advantage was on the side of Cyril, the but, enemy rallied, and he was ultimately routed through the wilful desertion of his own soldiers. In consequence, Vitalian captured Cyril in Odessus, and advanced as far as the place called Sycae, laying the whole country waste with fire and sword; meditating nothing less than the capture of the city itself and the seizure of the sovereignty. When he had encamped at Sycae. Marinus the Syrian, whom we have mentioned before, is despatched by the emperor to attack him by sea. The two armaments, accordingly, encountered, the one having Sycae astern, the other Constantinople. For a time the fleets remained inactive: but, after the skirmishings and discharge of missiles had been followed by a fierce conflict in the place called Bytharia. Vitalian withdraws from the line of battle and takes to flight, with the loss of the greater portion of his fleet. The remainder then fly with such precipitation, that the next day not a single enemy was found in the channel or in the neighbourhood of the city. It is said that Vitalian then continued inactive for some time at Anchialus. There was also another inroad of Huns, who had passed the defiles of Cappadocia.

About the same time Rhodes suffered by a violent earthquake at the dead of night: this being the third time it had been visited by that calamity.

EVAGRIUS HISTORY CHAPTER 44 Sedition At Constantinople. [518 AD.]

A Very great sedition occurred at Constantinople, arising from a wish of the emperor to add to the Trisagion the clause, "Who was crucified for our sakes:" which was regarded as subversive of the Christian religion. Its prime mover and chief was Macedonius, aided by his subject clergy, as Severus says in a letter to Sotericus, which he wrote before his elevation to the episcopal throne, while residing at the imperial city, at the time when, with several others, he had been expelled from his monastery, as I have already mentioned. It was on account of this imputation, in addition to the causes before mentioned, that, in my opinion, Macedonius was ejected from his see. Amid the uncontrollable excitement of the populace which followed, persons of rank and station were brought into extreme danger, and many principal parts of the city were set on fire. The populace, having found in the house of Marinus the Syrian, a monk from the country, cut off his head, saying that the clause had been added at his instigation; and having fixed it upon a pole, jeeringly exclaimed: "See the plotter against the Trinity!"

Such was the violence of the tumult, filling every quarter with devastation, and surpassing every means of control, that the emperor was driven to appear at the Hippodrome in pitiable guise, without his crown, and despatched heralds to proclaim to the assembled people, that he was most ready to resign his sovereignty; at the same time reminding them, that it was impossible that all should be elevated to that dignity, which admitted not of a plurality of occupants, and that one individual only could be his successor.

At this the temper of the people was suddenly changed, as by some divine impulse; and they begged Anastasius to resume his crown; with a promise of peaceable conduct in future.

Anastasius survived this event a very short time, and departed to the other world after a reign of twenty-seven years, three months, and three days.

THE END OF THE THIRD BOOK.

THE FOURTH BOOK.

EVAGRIUS HISTORY CHAPTER 1 Accession Of Justin.

After Anastasius had, as I have said, departed for the better lot, Justin, a Thracian by birth, assumes the purple, in the five hundred and sixty-sixth year of the Era of Antioch, on the ninth day of the month Panemus, which the Romans call July. He was proclaimed emperor by the imperial body-guards, of which he was also the commander, having been appointedprefect of the household troops. His elevation was, however, contrary to all expectation, since there were many most distinguished and flourishing members of the family of Anastasius, possessed also of sufficient influence to have secured for themselves the supreme power.

EVAGRIUS HISTORY CHAPTER 2

Designs And Death Of Amantius And Theocritus.

Amantius was the imperial chamberlain, and a man of very great influence; but as it was not lawful for any emasculated person to attain the sovereignty of the Romans, he was desirous that the imperial crown should be given to Theocritus, one of his creatures. He, therefore, sends for Justin, and gives him a large sum of money, with orders to distribute it amongst the persons most fit for this purpose, and able to invest Theocritus with the purple. But with the money he either bought over the people, or purchased the goodwill of what are termed the Excubitores--for both accounts are given--and so attained the empire. Soon afterwards he took off Amantius and Theocritus, with some others.

EVAGRIUS HISTORY CHAPTER 3 Assassination Of Vitalian.

Justin sends for Vitalian, who was living in Thrace and who had entertained designs of dethroning Anastasius, to Constantinople: for he dreaded his power, his military experience, his universal renown, and his great desire to possess the sovereignty: and rightly conjecturing that he should not be able to overcome him otherwise than by pretending to be a friend; by way of concealing his guile under a plausible mask, he appoints him commander of one of the bodies called Praesentes, and, as a more effectual persuasive, with a view to a still greater deception, he raises him to the consulship. He, being consul elect, was assassinated on visiting the palace, at an inner door, and thus met with a punishment for his insolence towards the Roman sovereignty. But these events happened subsequently.

EVAGRIUS HISTORY CHAPTER 4

Deposition Of Severus, Bishop Of Antioch. Succession Of Paul And Euphrasius. [519 AD.] Severus, who had been ordained president of Antioch, as

Severus, who had been ordained president of Antioch, as stated above, ceased not daily to anathematise the Synod at Chalcedon [The Council of Chalcedon, 451 AD.], and chiefly by means of those epistles called Enthronistic, and in the responses which he sent to all the patriarchs, though they were received only at Alexandria, by John, the successor of the former John, and by Dioscorus and Timotheus: which epistles have come down to our time.

Many contentions having thus arisen in the church, whereby the. most faithful people were split into factions, Justin, in the first year of his reign, ordered him to be arrested, and to be punished, as some say, by having his tongue cut out; the execution of which sentence was committed to Irenaeus, who, at Antioch, held the government of the Eastern provinces.

Severus himself confirms the account of Irenaeus being appointed to arrest him, in a letter to some of the Antiochenes, describing the manner of his escape; wherein he casts the strongest invectives on Irenaeus, and states that he is under the strictest surveillance lest he should escape from Antioch. Some say that Vitalian, who still appeared to be in the highest favour with Justin, demanded the tongue of Severus, because he had reproached him in his discourses. Accordingly, he flies from his see, in the month Gorpiaeus, which in the Latin language is called September, in the five hundred and sixtyseventh year of the Era of Antioch. Paul succeeds to the see, with orders to proclaim openly the synod at Chalcedon. Afterwards, retiring voluntarily from Antioch, he went the way of all flesh by a natural death. He is succeeded in his see by Euphrasius from Jerusalem.

EVAGRIUS HISTORY CHAPTER 5

Fires And Earthquakes At Antioch. Death Of Euphrasius. [526 AD.]

About the same period of Justin's reign there happened at Antioch numerous and dreadful fires, as if harbingers of the terrible shocks which afterwards took place, and serving as a prelude for the coming calamities. For, a short time after, in the tenth month of the seventh year of Justin's reign, being Artemisius or May, on the twenty-ninth day of the month, precisely at noon, on the sixth day of the week, the city was visited with the shock of an earthquake, which very nearly destroyed the whole of it. This was followed by a fire, to share, as it were, in the calamity: for what escaped the earthquake, the fire in its spread reduced to ashes. The damage that the city sustained, how many persons according to probable estimate became the victims of the fire and earthquake, what strange occurrences surpassing the power of words took place, been feelingly related by John the Rhetorician, who concludes his history with the relation.

Euphrasius also perished in the ruins, to add another misfortune to the city, by leaving no one to provide for its exigencies.

EVAGRIUS HISTORY CHAPTER 6

Elevation Of Ephraemius, Count Of The East, To The Patriarchate Of Antioch.

But the saving care of God for man, which prepares the remedy before the stroke, and the compassion which, while sharpening the sword of wrath, at the moment of the deepest despair displays its sympathy, raised up Ephraemius, at that time governor of the Eastern provinces, to take upon himself all the care of the city; so that it lacked not any thing that its exigency required. On this account, the sons of the Antiochenes so admired him, that they elected him their priest: and he thus attains the apostolic see as a reward and prize of his singular care for the place. Thirty months after, the city suffered again from an earthquake.

At this time also, what had been hitherto called the city of Antiochus was entitled the City of God, and received additional care at the hands of the emperor.

EVAGRIUS HISTORY CHAPTER 7

Miracles Of Zosimas And John.

Now that I have recorded the above-mentioned calamities, let me also add to the present narrative some other circumstances worthy of record, and which have been transmitted to us from those who have made them a subject of notice.

Zosimas was a native of Sinde, a village of Phoenicia Maritima, distant from Tyre about twenty stadia, and pursued the monastic discipline. He, by means both of abstinence and use of food, having attained to such a union with God as not only to discern forthcoming events, but also to possess the grace of perfect freedom from passion, was in company with a distinguished person from Caesarea, the capital of one of the Palestines. This was Arcesilaus, a man of good family, accomplished, and high in dignities and whatever gives lustre to life. Zosimas, at the very moment of the overthrow of Antioch, suddenly became troubled, uttered lamentations and deep sighs, and then shedding such a profusion of tears as to bedew the ground, called for a censer, and having fumed the whole place where they were standing, throws himself upon the ground, propitiating God with prayers and supplications. Upon Arcesilaus asking the reason of all this trouble, he distinctly replied, that the sound of the overthrow of Antioch was at that instant ringing in his ears. This led Arcesilaus and the rest of the astonished company to note down the hour; and they afterwards found that it was as Zosimas had said.

By his hand many other miracles were performed: but omitting the greater part of them, since they are too numerous to detail, I shall mention a few.

Contemporary with Zosimas, and endued with equal virtues, was a man named John, who had practised the endurance of the solitary and immaterial life in the cloister called Chuzibas. situated at the extremity of the glen at the northern part of the highway leading from Jerusalem to Jericho, and was now bishop of the before-named Caesarea. This John, the Chuzibite, having heard that the wife of Arcesilaus had lost one of her eyes by a stroke of a spindle, runs immediately to her to see the accident; and when he finds that the pupil is gone and the eve altogether lacerated, he commands one of the physicians in attendance to bring a sponge, and, having replaced as well as he could the lacerated parts, to apply and secure the sponge with bandages. Arcesilaus was absent, for he happened to be with Zosimas in his monastery at Sinde, distant from Caesarea full five hundred stadia. Accordingly, messengers proceeded with all haste to Arcesilaus, whom they found sitting in conversation with Zosimas. When informed of the circumstance, he uttered a piercing cry, tore his hair and cast it towards heaven. Upon Zosimas asking him the reason, he told him what had happened, interrupting his account with frequent wailings and tears. Whereupon Zosimas, leaving him alone, goes to his chamber, where he used to make his

THE GRAND BIBLE

addresses to God according to the rule of such persons, and after some interval he approaches Arcesilaus with a solemnly joyous countenance, and gently pressing his hand, said: "Depart with joy, depart. Grace is given to the Chuzibite. Your wife is cured, and is in possession of both her eyes; for the accident has had no power to deprive her of them, since such was the desire of the Chuzibite." This was brought about by the united wonder-working of both the just men.

Again, as the same Zosimas was going to Caesarea, and leading an ass laden with certain necessaries, a lion encountered him and carried off the ass. Zosimas follows into the wood, reaches the place where the lion was, satiated with his meal upon the beast, and smiling says, "Come, my friend; my journey is interrupted, since I am heavy and far advanced in years, and not able to carry on my back the ass's load. You must therefore carry it, though contrary to your nature, if you wish Zosimas to get out of this place and yourself to be a wild beast again." All at once the lion, forgetting his ferocity, fawned on him, and by his gestures plainly manifested obedience. Zosimas then put the ass's load upon him, and led him to the gates of Caesarea, showing the power of God, and how all things are subservient to man if we live to Him and do not pervert the grace given to us. But that I may not render my history prolix by more circumstances of the kind, I will return to the point whence 1 digressed.

EVAGRIUS HISTORY CHAPTER 8 General Calamities [521 AD]

General Calamities. [521 AD.] During the reign of Justin, Dyrrachium, formerly called Epidamnus, suffered from an earthquake; as did also Corinth in Greece, and afterwards, for the fourth time, Anazarbus, the capital of Cilicia Minor. These cities Justin restored at great expence. About the same time Edessa, a large and flourishing city of Osroene, was inundated by the waters of the Skirtus, which runs close by it; so that most of the buildings were swept away, and countless multitudes that were carried down by the stream, perished. Accordingly, the names of Edessa and Anazarbus were changed by Justin, and each of them was called, after himself, Justinopolis.

EVAGRIUS HISTORY CHAPTER 9

Appointment Of Justinian To A Share In The Empire. When Justin had reigned eight years, nine months, and three days, he associated in the government Justinian, his nephew, who was proclaimed on the first of the month Xanthicus, or April, in the five hundred and seventy-fifth year of the era of Antioch. After these transactions, Justin departs his earthly sovereignty, closing his life on the first of the month Lous, or August, having had Justin for his associate in the empire four months, and reigned in all nine years and three days. Now that Justinian was sole sovereign of the Roman empire, and the synod at Chalcedon was being proclaimed in the most holy churches by the commands of Justin, as stated before; the state of the church was disturbed in some of the provinces, but chiefly at Constantinople and Alexandria, Anthimus being bishop of the former, and Theodosius of the latter: for both held the doctrine of the single nature of Christ.

EVAGRIUS HISTORY CHAPTER 10

The Council Of Chalcedon Upheld By Justinian.

Justinian very resolutely upheld the synod at Chalcedon and what was put forth by it; and Theodora, his consort, those who maintained the single nature: either because such were their real sentiments--for when the faith is a matter of dispute, fathers are divided against their children, children against the authors of their birth, a wife against her own husband, and again a husband against his own wife--or by mutual understanding, that he should uphold those who maintained the two natures in Christ our God after the union; and she hose who alleged the single nature. Neither conceded to the other: but he strenuously supported the acts at Chalcedon, and she, ranging with the opposite party, exercised the greatest care towards those who maintained the single nature. Our people she treated with the warmest kindness, and others too with great munificence. She also persuades Justinian to send for Severus.

EVAGRIUS HISTORY CHAPTER 11

Deposition Of Anthimus And Theodosius From Their Sees. There are letters extant from Severus to Justinian and Theodora, from which we may gather that at first he put off his journey to the imperial city on leaving his see of Antioch. Nevertheless he afterwards arrived there; and has written to the effect that when he came thither and had conversed with Anthimus, and found him holding the same sentiments with himself, and the same opinions with respect to the Godhead, he persuaded him to withdraw from his see. He wrote concerning these matters to Theodosius, bishop of Alexandria, and greatly gloried in having persuaded Anthimus, as stated before, to prefer such doctrines to earthly glory and the possession of his see. Letters are also extant on this subject from Anthimus to Theodosius, and from Theodosius to Severus and Anthimus; which I pass over, leaving them to

those who choose to consult them, that I may not include in the present work too great a mass of materials. Nevertheless, both were ejected from their sees, as opposing the imperial mandates and the decrees of Chalcedon. Zoilus succeeded to that of Alexandria, and Epiphanius to that of the imperial city: so that from that time forward the synod at Chalcedon was openly proclaimed in all the churches; and no one dared to anathematise it; while those who dissented, were urged by innumerable methods to assent to it. Accordingly, a constitution was drawn up by Justinian in which he anathematised Severus, Anthimus, and others, and subjected those who held their doctrines, to the highest penalties: the effect of which was, that thenceforward no schism remained in any of the churches, but the patriarchs of the several dioceses agreed with each other, and the bishops of the cities followed their respective primates. Four synods were thus proclaimed throughout the churches; first, that held at Nicaea; secondly, that at Constantinople; thirdly, the former one at Ephesus; and fourthly, that at Chalcedon. A fifth also took place by order of Justinian, concerning which I shall say what is suitable in its proper place, while I weave into my present narrative the several events of the same period which are worthy of notice.

EVAGRIUS HISTORY CHAPTER 12.

Cabades And Chosroes, Kings Of Persia. [531 AD.]

The history of Belisarius has been written by Procopius the Rhetorician. He says that Cabades, king of the Persians, wishing to invest his youngest son Chosroes with the sovereignty, was desirous to have him adopted by the Roman emperor, so that by that means his succession might be secured. But when this was refused, at the suggestion of Proclus, who advised Justinian as his quaestor, they conceived a still greater hatred against the Romans. This same Procopius has, with diligence, elegance, and ability, set forth the events of the war between the Romans and Persians while Belisarius was commander of the forces of the East. The first victory on the side of the Romans which he records, was in the neighbourhood of Daras and Nisibis, under the command of Belisarius and Hemogenes. He subjoins an account of the occurrences in Armenia, and the mischief inflicted on the Romans by Alamundarus, the chieftain of the Scenite barbarians, who captured Timostratus, the brother of Rufinus, together with his troops, and afterwards liberated him for a considerable ransom.

EVAGRIUS HISTORY CHAPTER 13

Incursion Of The Arabs. Sedition At Constantinople.

He also feelingly details the incursion of the before-named Alamundarus and Azarethus into the Roman territory; and how Belisarius, compelled by his own troops, engaged them in their retreat by the Euphrates, on the eve of Easter day; and how the Roman army was destroyed through their repugnance to the measures of Belisarius; and how Rufinus and Hermogenes made with the Persians the peace called the perpetual peace.

He subjoins an account of the insurrection of the people at Constantinople, which derived its name from the watchword of the populace: for they entitled it "Nica", because on their assembling they chose this term as the watchword, to know each other. On this occasion Hypatius and Pompeius were compelled by the people to assume the sovereignty. But on the defeat of the populace, both were beheaded by the soldiers at the command of Justinian, and the insurrection was quelled. Procopius states that thirty thousand persons were killed in this disturbance.

EVAGRIUS HISTORY CHAPTER 14 Persecution By Huneric, [484 AD.]

The same writer, when treating of the affairs of the Vandals, has recorded most important occurrences and worthy of perpetual memory, which I now proceed to mention. Himeric, the successor of Genseric, and a professor of the creed of Arius, entertained most cruel intentions against the African Christians, in the endeavour to convert by force the maintainers of the orthodox doctrines to the opinions of the Arians. Those who refused compliance, he destroyed both by fire and various modes of death, and some he deprived of their tongues. The latter, Procopius says that he himself saw, when they had taken refuge at the imperial city, and that he maintained a conversation with them in the same manner as with unmutilated persons: that their tongues were cut out from the root; nevertheless their speech was articulate, and they conversed distinctly; a new and strange marvel, of which also a constitution of Justinian makes mention. Two of these persons lapsed, as Procopius himself writes. For on their desiring commerce with women, they were deprived of their speech, since the grace of their martyrdom had abandoned them

EVAGRIUS HISTORY CHAPTER 15

Cabaones The Moor. [522 AD.]

He also relates another wonderful occurrence, wrought by our Saviour God in the case of men, aliens indeed to our

states that Cabaones was chieftain of the Moors in the neighbourhood of Tripolis. This Cabaones, he says -- for it is worth while to use his own words during his able narration of this matter also--this Cabaones, as soon as he learned that the Vandals were marching against him, acted in the following manner. First, he commanded all his subjects to refrain from injustice and all luxurious food, but particularly from commerce with women; and having raised two fortified enclosures, he encamped himself with all the men in one, and enclosed the women in the other, threatening death to any man who should approach the women. Afterwards, he sent scouts to Carthage with these instructions: that when the Vandals on their march outraged any temple reverenced by the Christians, they should note what was being done, and when the Vandals left the place, should, immediately on their departure, treat the sanctuary in a manner directly the reverse. It is mentioned that he further said, that he was ignorant of the God worshipped by the Christians, but it was likely, if he were powerful, as was affirmed, that he would chastise those who outraged him, and defend such as rendered him service. The scouts, therefore, coming to Carthage, continued to watch the preparations of the Vandals, and when the army set forward for Tripolis, they followed it, disguised in a sorry dress. The Vandals, encamping at the close of the first day, introduced their horses and other beasts into the temples of the Christians, and abstained from no species of outrage, but gave way to their usual license; and beating and severely scourging the priests whom they happened to seize, bid them wait upon them. But as soon as the Vandals had left the place, the scouts of Cabaones did all that had been enjoined them, and immediately cleansed the sanctuaries, sedulously removing the dung and every other defilement: they lighted all the tapers, paid reverent obeisance to the priests, and saluted them with every kindness; and when they had bestowed money on the beggars who sat round the shrine, they followed the army of the Vandals, who, from this point along the whole line of march, committed the same outrages, while the scouts remedied them. When, however, they were at no great distance, the scouts, proceeding in advance, announced to Cabaones all that had been done by the Vandals and themselves to the temples of the Christians, and that the enemy were now near. On hearing this, he prepared to engage. By far the greater part of the Vandals, as our author states, were destroyed: some were captured by the enemy, and very few returned home. Such was the misfortune that Thrasamund sustained at the hands of the Moors. He died some time after, having ruled the Vandals for seven and twenty years.

religion, who, however, acted with religious reverence. He

EVAGRIUS HISTORY CHAPTER 16

Expedition Of Belisarius Against The Vandals.

The same author writes that Justinian, having, in pity to the Christians in that quarter, professed his intention of undertaking an expedition for their relief, was being diverted from his purpose by the suggestion of John, prefect of the palace, when a dream appeared to him, bidding him not to shrink from the execution of his design; for, by assisting the Christian she would overthrow the power of the Vandals. Being determined by this circumstance, in the seventh year of his reign, he despatches Belisarius, about the summer solstice, to attack Carthage; on which occasion, when the general's ship touched at the shore of the palace, Epiphanius, bishop of the city, offered up appropriate prayers, having previously baptised some of the soldiers and embarked them on board the vessel. He also narrates some circumstances, worthy of record, relating to the martyr Cyprian, in the following words:

"All the Carthaginians especially reverence Cyprian, a holy man, and having erected on the shore, in front of their city, a noble shrine, besides other reverential observances, they celebrate an annual festival, and call it Cypriana; and the sailors are accustomed to call the tempestuous weather which I have before mentioned by the same name as the festival, since it is wont to happen at the time of the year at which the Africans have fixed its perpetual celebration. This temple the Vandals, in the reign of Huneric, took by force from the Christians, and ignominiously expelling the priests, refitted it, as henceforward belonging to the Arians. They say that Cyprian, frequently appearing in a dream to the Africans who were indignant and distressed on this account, told them that there was no occasion for the Christians to be solicitous about him, for in time he would avenge himself: which prediction attained its accomplishment in the time of Belisarius, when Carthage, ninety-five years after its loss, was reduced by him under the Roman power, by the utter overthrow of the Vandals: at which time the doctrine of the Arians was entirely extirpated from Africa, and the Christians recovered their own temples, according to the prediction of the martyr Cyprian.

EVAGRIUS HISTORY CHAPTER 17

Triumph Of Belisarius.

The same author writes as follows. "When Belisarius had subdued the Vandals, he returned to Constantinople, bringing the spoils and prisoners, and among them Gelimer,

THE GRAND BIBLE

king of the Vandals. A triumph was granted him, and he carried in procession through the Hippodrome whatever would be an object of wonder. Among these were considerable treasures obtained by Genseric from the plunder of the palace at Rome, as I have already narrated; when Eudoxia, the wife of Valentinian, emperor of the West, having been both deprived of her husband and subjected to an outrage on her chastity by Maximus, invited Genseric, with a promise of surrendering the city to him: on which occasion, after burning Rome, he conveyed Eudoxia and her daughters to the country of the Vandals. Together with the other treasures, he then carried off all that Titus, the son of Vespasian, had brought to Rome on the capture of Jerusalem; offerings which Solomon had dedicated to God. These Justinian, in honour of Christ our God, sent back to Jerusalem; an act of becoming reverence to the Deity, to whom they had in the first instance been dedicated. On this occasion, Procopius says that Gelimer, prostrating himself on the ground in the hippodrome, before the imperial throne on which Justinian was sitting to witness the proceedings, made application, in his own language, of the divine oracle: "Vanity of vanities: all is vanity."

EVAGRIUS HISTORY CHAPTER 18

Origin Of The Moors. Munificence Of Justinian In Africa. Procopius mentions another circumstance, unnoticed before his time, but one that can scarcely be regarded with sufficient wonder. He states that the Moors of Lybia settled in that country after being dislodged from Palestine, and that they are those whom the divine oracles mention as the Girgashites and Jebusites, and the other nations subdued by Joshua the son of Nun. He concludes the entire truth of the story from an inscription in Phoenician characters, which he says that he himself had read, and that it was near a fountain, where were two pillars of white stone on which were engraved these words: "We are those who fled from the face of Joshua the robber, the son of Nun."

Such was the end of these transactions, in Africa becoming again subject to the Romans, and paying, as before, an annual tribute.

Justinian is said to have restored one hundred and fifty cities in Africa, some of which had been altogether, and others extensively ruined; and this he did with surpassing magnificence, in private and public works and embellishments, in fortifications, and other vast structures by which cities are adorned and the Deity propitiated: also in aqueducts for use and ornament, the supply of water having been in some cases conveyed to the cities for the first time, in others restored to its former state.

EVAGRIUS HISTORY CHAPTER 19

Events Following The Death Of Theodoric.

I Now proceed to relate what occurred in Italy; events which have also been treated very distinctly by Procopius, the Rhetorician, down to his own times.

After Theodoric as I have already detailed had cantured Rome and utterly destroyed its king Odoacer, and had closed his life in possession of the Roman sovereignty, his wife Amalasuntha held the reins of government, as guardian of their common son Athalaric; a woman rather of a masculine temperament, and administering affairs accordingly. She was the first person who led Justinian to entertain a desire for the Gothic war, by sending an embassy to him on the formation of a conspiracy against herself. On the death, however, of Athalaric at a very early age, Theodatus, a kinsman of Theodoric, was invested with the sovereignty of the West, but abdicated when Justinian had despatched Belisarius to that quarter; being a person addicted rather to literature, and altogether wanting in military experience; while Vitiges, an able soldier, was in command of his forces. From the materials which the same Procopius has collected, one may gather that Vitiges abandoned Rome on the arrival of Belisarius in Italy; who at once marched upon the city. The Romans readily opened their gates to him; a result mainly brought about by Silverius, their bishop, who, with this view, had sent to him Fidelis, formerly assessor to Athalaric. They accordingly surrendered their city to him without resistance: and thus Rome, after an interval of sixty years, again fell into Roman hands on the ninth day of the month Apellaeus, called by the Latins December. The same Procopius writes, that, when the Goths were besieging Rome, Belisarius, suspecting Silverius of a design to betray the city, transports him to Greece and appoints Vigilius in his room.

EVAGRIUS HISTORY CHAPTER 20

Conversion Of The Heruli.

About the same time, as Procopius also writes, when the Heruli, who had already crossed the river Danube in the reign of Anastasius, had experienced generous treatment at the hands of Justinian, in large presents of money, the whole nation embraced Christianity and adopted a more civilised mode of life. EVAGRIUS HISTORY CHAPTER 21

Loss And Recovery Of Rome. [537 AD.]

In the next place he records the return of Belisarius to Constantinople, and how he brought thither Vitiges, together with the spoils of Rome; also the seizure of the sovereignty of Rome by Totila, and how the city again fell under the dominion of a Goth; how Belisarius, having twice entered Italy, again recovered the city, and how, on the breaking out of the Median war, he was recalled to Constantinople by the emperor.

EVAGRIUS HISTORY CHAPTER 22

Conversion Of The Abasgi.

Procopius also records, that the Abasgi, having become more civilised, embraced the Christian doctrine about the same time, and that Justinian sent to them one of the eunuchs of the palace, their countryman, by name Euphratas, with an interdict, that henceforward no one in that nation should undergo emasculation in violation of nature; for from among them the imperial chamberlains were principally appointed, whom usage styles eunuchs. At this time, Justinian, having erected among the Abasgi a temple in honour of the Mother of God, appointed priests for them; by which means they were accurately instructed in the Christian doctrine.

EVAGRIUS HISTORY CHAPTER 23

Conversion Of Tile People On The Tanais. Earthquakes. The same author narrates, that the people on the Tanais (the natives give the name of Tanais to the channel extending from the Palus Maeotis to the Euxine Sea) urged Justinian to send a bishop to them; which request he granted, and gladly sent them a priest. The same writer describes, with great ability, the irruptions of the Goths of the Maeotis into the Roman territory in the time of Justinian, and the violent earthquakes which took place in Greece; how Boeotia, Achaia, and the neighbourhood of the Crisssean bay suifered shocks; how innumerable towns and cities were levelled, and chasms were formed, many of which closed again, while others remained open.

EVAGRIUS HISTORY CHAPTER 24 Achievements And Piety Of Narses.

Procopius also describes the expedition of Narses, who was sent by Justinian into Italy; how he overthrew Totila and

sent by Justiman into rary, now ne over mew rotha and afterwards Teia; and how Rome was taken for the fifth time. Those about the person of Narses affirm that he used to propitiate the Deity with prayers and other acts of piety, paying due honour also to the Virgin and mother of God, so that she distinctly announced to him the proper season for action; and that Narses never engaged until he had received the signal from her. He recounts also other distinguished exploits of Narses in the overthrow of Buselinus and Syndualdus, and the acquisition of nearly the whole country as far as the ocean. These transactions have been recounted by Agathias the Rhetorician, but his history has not reached our hands.

EVAGRIUS HISTORY CHAPTER 25

Invasion Of The Persians. Capture Of Antioch. [540 AD.]

The same Procopius has also written the following account. When Chosroes had learned what had occurred in Africa and Italy favourable to the Roman dominion, he was moved to excessive jealousy, and advanced certain charges against the Roman government, that terms had been violated and the existing peace broken. In the first place, Justinian sent ambassadors to Chosroes to induce him not to break the peace which was intended to be perpetual, nor to trespass on the existing conditions; proposing that the points in dispute should be discussed and settled in an amicable manner. But Chosroes, maddened by the ferment of jealousy, would not listen to any proposals, and invaded the Roman territory with a large army, in the thirteenth year of the reign of Justinian. The historian also writes, that Chosroes captured and destroyed Sura, a city on the banks of the Euphrates, after having professed to make terms, but dealing with it in defiance of all justice, by paying no regard to the conditions, and becoming master of it rather by stratagem than by open war. He also narrates the burning of Beraea, and then the advance upon Antioch; at which time Ephraemius was bishop of the city, but had abandoned it on the failure of all his plans. This person is said to have rescued the Church and its precincts, by arraying it with the sacred offerings. in order that they might serve as a ransom for it. The historian also feelingly describes the capture of Antioch by Chosroes, and its promiscuous devastation by fire and sword: his visit to the neighbouring city of Seleucia, and to the suburb Daphne, and his advance towards Apamea, during the episcopate of Thomas, a man most powerful in word and deed. He had the prudence to yield to Chosroes in becoming a spectator of the horse-races in the hippodrome, though an act of irregularity ; employing every means to court and pacify the conqueror. Chosroes also asked him whether he was desirous to see him in his own city: and it is said that he frankly replied that it was no pleasure to see him in his neighbourhood: at which answer

Chosroes was struck with wonder, justly admiring the truthfulness of the man.

EVAGRIUS HISTORY CHAPTER 26

Display Of The Wood Of The Cross At Apamea. [540 AD.] Now that I have arrived at this point of my narrative, I will relate a prodigy, which occurred at Apamea, and is worthy of a place in the present history.

When the sons of the Apameans were informed that Antioch had been burnt, they besought the before-mentioned Thomas to bring forth and display the saving and life-giving wood of the cross, in deviation from established rule; that they might behold and kiss for the last time the sole salvation of man, and obtain a provision for the passage to another life, in having the precious cross as their means of transport to the better lot. In performance of which request, Thomas brings forth the life-giving wood, announcing stated days for its display, that all the neighbouring people might have an opportunity to assemble and enjoy the salvation thence proceeding.

Accordingly, my parents visited it together with the rest, accompanied by myself, at that time a school-boy. When, therefore, we requested permission to adore and kiss the precious cross, Thomas, lifting up both his hands, displayed the wood which blotted out the ancient curse, making an entire circuit of the sanctuary, as was customary on the ordinary days of adoration. As Thomas moved from place to place, there followed him a large body of fire, blazing but not consuming; so that the whole spot where he stood to display the precious cross seemed to be in flames: and this took place not once or twice but often, as the priest was making the circuit of the place, and the assembled people were entreating him that it might be done. This circumstance foreshewed the preservation which was granted to the Apameans. Accordingly, a representation of it was suspended on the roof of the sanctuary, explaining it by its delineation to those who were uninformed: which was preserved until the irruption of Adaarmanes and the Persians, when it was burnt together with the holy church in the conflagration of the entire city. Such were these events. But Chosroes, in his retreat, acted in direct violation of conditions--for even on this occasion terms had been made--in a manner suited to his restless and inconstant disposition, but utterly unbecoming a rational man, much more a king professing a regard for treaties.

EVAGRIUS HISTORY CHAPTER 27

Siege Of Edessa By Chosroes. [540 AD.]

The same Procopius narrates what the ancients had recorded concerning Edessa and Abgarus, and how Christ wrote a letter to him. He then relates how Chosroes made a fresh movement to lay siege to the city, thinking to falsify the assertion prevalent among the faithful, that Edessa would never fall into the power of an enemy: which assertion, however, is not contained in what was written to Abgarus by Christ our God; as the studious may gather from the history of Eusebius Pamphili, who cites the epistle verbatim. Such, however, is the averment and belief of the faithful; which was then realised, faith bringing about the accomplishment of the prediction. For after Chosroes had made many assaults on the city, had raised a mound of sufficient size to overtop the walls of the town, and had devised innumerable expedients beside, he raised the siege and retreated. I will, however, detail the particulars. Chosroes ordered his troops to collect a great quantity of wood for the siege from whatever timber fell in their way; and when this had been done before the order could well be issued, arranging it in a circular form, he threw a mound inside with its face advancing against the city. In this way elevating it gradually with the timber and earth, and pushing it forward towards the town, he raised it to a height sufficient to overtop the wall, so that the besiegers could hurl their missiles from vantage ground against the defenders. When the besiegers saw the mound approaching the walls like a moving mountain, and the enemy in expectation of stepping into the town at day-break, they devised to run a mine under the mound--which the Latins term "aggestus"--and by that means apply fire, so that the combustion of the timber might cause the downfall of the mound. The mine was completed: but they failed in attempting to fire the wood, because the fire, having no exit whence it could obtain a supply of air, was unable to take hold of it. In this state of utter perplexity, they bring the divinely wrought image, which the hands of men did not form, but Christ our God sent to Abgarus on his desiring to see Him. Accordingly, having introduced this holy image into the mine, and washed it over with water, they sprinkled some upon the timber; and the divine power forthwith being present to the faith of those who had so done, the result was accomplished which had previously been impossible: for the timber immediately caught the flame, and being in an instant reduced to cinders, communicated with that above, and the fire spread in all directions. When the besieged saw the smoke rising, they adopted the following contrivance. Having filled small jars with sulphur, tow, and other combustibles, they threw them upon the aggestus ; and these, sending forth srnoke as the fire was increased by the force of their flight, prevented that which was rising from the mound from being

observed ; so that all who were not in the secret, supposed that the smoke proceeded solely from the jars. On the third day the flames were seen issuing from the earth, and then the Persians on the mound became aware of their unfortunate situation. But Chosroes, as if in opposition to the power of heaven, endeavoured to extinguish the pile, by turning all the water-courses which were outside the city upon it. The fire, however, receiving the water as if it had been oil or sulphur, or some other combustible, continually increased, until it had completely levelled the entire mound and reduced the aggestus to ashes. Then Chosroes, in utter despair, impressed by the circumstances with a sense of his disgraceful folly in having entertained an idea of prevailing over the God whom we worship, retreated ingloriously into his own territories.

EVAGRIUS HISTORY CHAPTER 28

Miracle At Sergiopolis. [540 AD.]

What occurred at Sergiopolis through the proceedings of Chosroes shall also be described, as being a notable event and worthy of perpetual remembrance. Chosroes advanced against this city too, eager for its capture; and on his proceeding to assault the walls, negociations took place with a view to spare the city: and it was agreed that the sacred treasures should be a ransom for the place, among which was also a cross presented by Justinian and Theodora. When they had been duly conveyed, Chosroes asked the priest and the Persians who had been sent with him, whether there was not any thing besides. Upon this one of them, being persons unaccustomed to speak the truth, told Chosroes that there were some other treasures concealed by the townsmen, who were but few. In fact, there had been left behind not any treasure of gold or silver, but one of more valuable material, and irrevocably devoted to God, namely, the holy relics of the victorious martyr Sergius, lying in a coffin of the oblong sort, plated over with silver. Chosroes, influenced by these persons, advanced his whole army against the city; when suddenly there appeared along the circuit of the walls, in defence of the place, innumerable shields; on seeing which the persons sent by Chosroes returned, describing, with wonder, the number and fashion of the arms. And when, on further enquiry, he learned that very few persons remained in the city, and these consisted of aged people and children, from the absence of the flower of the population, he perceived that the prodigy proceeded from the martyr, and, influenced by fear and wonder at the faith of the Christians, he withdrew into his own country. They also say that in his latter days he partook in the holy regeneration.

EVAGRIUS HISTORY CHAPTER 29 Pestilence. [542-594 AD.] I Will also describe the circumstances of the pestilence which commenced at that period, and has now prevailed and extended over the whole world for fifty-two years; a circumstance such as has never before been recorded. Two years after the capture of Antioch by the Persians, a pestilence broke out, in some respects similar to that described by Thucydides, in others widely different. It took its rise from Aethiopia, as is now reported, and made a circuit of the whole world in succession, leaving, as I suppose, no part of the human race unvisited by the disease. Some cities were so severely afflicted as to be altogether depopulated, though in other places the visitation was less violent. It neither commenced according to any fixed period, nor was the time of its cessation uniform; but it seized upon some places at the commencement of winter, others in the course of the spring, others during the summer, and in some cases, when the autumn was advanced. In some instances, having infected a part of a city, it left the remainder untouched; and frequently in an uninfected city one might remark a few households excessively wasted; and in several places, while one or two households utterly perished, the rest of the city remained unvisited: but, as we have learned from careful observation, the uninfected households alone suffered the succeeding year. But the most singular circumstance of all was this; that if it happened that any inhabitants of an infected city were living in a place which the calamity had not visited, these alone were seized with the disorder. This visitation also befell cities and other places in many instances according to the periods called Indictions; and the disease occurred, with the almost utter destruction of human beings, in the second year of each indiction. Thus it happened in my own case--for I deem it fitting, in due adaptation of circumstances. to insert also in this history matters relating to myself--that at the commencement of this calamity I was seized with what are termed buboes, while still a school-boy, and lost by its recurrence at different times several of my children, my wife, and many of my kin, as well as of my domestic and country servants; the several indictions making, as it were, a distribution of my misfortunes. Thus, not quite two years before my writing this, being now in the fifty-eighth year of my age, on its fourth visit to Antioch, at the expiration of the fourth indiction from its commencement, I lost a daughter and her son, besides those who had died previously. The plague was a complication of diseases: for, in some cases,

commencing in the head, and rendering the eyes bloody and the face swollen, it descended into the throat, and then destroyed the patient. In others, there was a flux of the bowels: in others buboes were formed, followed by violent fever; and the sufferers died at the end of two or three days, equally in possession, with the healthy, of their mental and bodily powers. Others died in a state of delirium, and some by the breaking out of carbuncles. Cases occurred where persons, who had been attacked once and twice and had recovered, died by a subsequent seizure.

The ways in which the disease; was communicated, were various and unaccountable: for some perished by merely living with the infected, others by only touching them, others by having entered their chamber, others by frequenting public places. Some, having fled from the infected cities, escaped themselves, but imparted the disease to the healthy. Some were altogether free from contagion, though they had associated with many who were afflicted, and had touched many not only in their sickness but also when dead. Some, too, who were desirous of death, on account of the utter loss of their children and friends, and with this view placed themselves as much as possible in contact with the diseased, were nevertheless not infected; as if the pestilence struggled against their purpose. This calamity has prevailed, as I have already said, to the present time, for two and fifty years, exceeding all that have preceded it. For Philostratus expresses wonder that the pestilence which happened in his time, lasted for fifteen years. The sequel is uncertain, since its course will be guided by the good pleasure of God, who knows both the causes of things, and their tendencies. I shall now return to the point from which I digressed, and relate the remainder of Justinian's history.

EVAGRIUS HISTORY CHAPTER 30

Avarice Of Justinian.

Justinian was insatiable in the acquisition of wealth, and so excessively covetous of the property of others, that he sold for money the whole body of his subjects to those who were entrusted with offices or who were collectors of tributes, and to whatever persons were disposed to entrap others by groundless charges. He stripped of their entire property innumerable wealthy persons, under colour of the emptiest pretexts. If even a prostitute, marking out an individual as a victim, raised a charge of criminal intercourse against him, all law was at once rendered vain, and by making Justinian her associate in dishonest gain, she transferred to herself the whole wealth of the accused person. At the same time he was liberal in expenditure: so far as to raise in every quarter many sacred and magnificent temples, and other religious edifices devoted to the care of infants and aged persons of either sex, and of such as were afflicted with various diseases. He also appropriated considerable revenues for carrying out these objects; and performed many such actions as are pious and acceptable to God, provided that those who perform them do so from their own means, and the offering of their deeds be pure.

EVAGRIUS HISTORY CHAPTER 31

Description Of The Church Of St. Sophia At Constantinople (Hagia Sophia).

He also raised at Constantinople many sacred buildings of elaborate beauty, in honour of God and the saints, and erected a vast and incomparable work, such as has never been before recorded, namely the largest edifice of the Church, a noble and surpassing structure, beyond the power of words to describe. Nevertheless I will endeavour to the best of my ability to detail the plan of the sacred precinct. The nave of the sanctuary is a dome, supported by four arches, and raised to so great a height that the sight of persons surveying it from below can scarcely reach the vertex of the hemisphere, and no one from above, however daring, ventures to bend over and look down to the floor. The arches are raised clear from the pavement to the roof: but within those on the right and left are ranged columns of Thessalian stone, which, together with other corresponding pillars, support galleries, so as to allow those who wish, to look down upon the performance of the rites below. From these the empress also, when attending at the festivals, witnesses the ceremony of the sacred mysteries. But the eastern and western arches are left vacant, without any thing to interrupt the imposing aspect of so vast dimensions. There are also colonnades under the beforementioned galleries, forming, with pillars and small arches, a termination to so vast a structure. But in order to convey a more distinct idea of this wonderful fabric, I have thought proper to set down in feet, its length, breadth, and height, as well as the span and height of the arches, as follows:--The length from the door facing the sacred apse where are performed the rites of the bloodless sacrifice, to the apse, is one hundred and ninety feet: the breadth from north to south is one hundred and fifteen feet: the depth from the centre of the hemisphere to the floor is one hundred and eighty feet: the span of each of the arches is feet: the length, however, from east to west is two hundred and sixty feet; and the range of the lights seventy-five feet. There are also to the west two

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3279 other noble colonnades, and on all sides unroofed courts of elaborate beauty. Justinian also erected the church of the holy Apostles, which may dispute the first place with any other. In this the emperors and the bishops are usually interred. I have thought fit thus to take some notice of these and similar matters.

EVAGRIUS HISTORY CHAPTER 32 Partiality Of Justinian For The Blue Faction.

Justinian was possessed by another propensity, of unequalled ferocity; whether attributable to an innate defect of his disposition, or to cowardice and apprehensions, I am not able to say. It took its rise from the existence of the faction among the populace distinguished by the name "Nica." He appeared to favour one party, namely the Blues, to such an excess, that they slaughtered their opponents at mid-day and in the middle of the city, and, so far from dreading punishment, were even rewarded; so that many persons became murderers from this cause. They were allowed to assault houses, to plunder the valuables they contained, and to compel persons to purchase their own lives; and if any of the authorities endeavoured to check them, he was in danger of his very life: and it actually happened that a person holding the government of the East, having chastised some of the rioters with lashes, was himself scourged in the very centre of the city, and carried about in triumph. Callinicus also, the governor of Cilicia, having subjected to legal punishment two Cilician murderers, Paul and Faustinus, who had assaulted and endeavoured to despatch him, suffered impalement, as the penalty for right feeling and maintenance of the laws. The members of the other faction having, in consequence, fled from their homes, and meeting with a welcome nowhere, but being universally scouted as a pollution, betook themselves to waylaying travellers, and committed thefts and murders to such an extent, that every place was filled with untimely deaths, robberies, and every other crime. Sometimes also, siding with the other faction, Justinian put to death in turn their opponents, by surrendering to the vengeance of the laws those whom he had allowed to commit in the cities equal outrages with barbarians. Neither words nor time would suffice for a minute detail of these transactions. Thus much will, however, serve for a conception of the remainder.

EVAGRIUS HISTORY CHAPTER 33 Barsanuphius The Ascetic.

There lived at that season men divinely inspired and workers of distinguished miracles in various parts of the world, but whose glory has shone forth every where. First, Barsanuphius, an Egyptian. He maintained in the flesh the exercise of the fleshless life, in a certain seat of contemplation near the town of Gaza, and succeeded in working wonders too numerous to be recorded. He is also believed to be still alive, enclosed in a chamber, although for fifty years and more from this time he has not been seen by any one, nor has he partaken of any earthly thing. When Eustochius, the president of the church of Jerusalem, in disbelief of this account, had determined to dig into the chamber where the man of God was enclosed, fire burst forth and nearly consumed all those who were on the spot.

EVAGRIUS HISTORY CHAPTER 34 Simeon The Monk.

There lived also at Emesa, Simeon, a man who had so completely unclothed himself of vain-glory as to appear insane to those who did not know him, although filled with all wisdom and divine grace. This Simeon lived principally in solitude, affording to none the means of knowing how and when he propitiated the Deity, nor his time of abstinence or eating. Frequently, too, on the public roads, he seemed to be deprived of self-possession, and to become utterly void of sense and intelligence, and entering at times into a tavern, he would eat, when he happened to be hungry, whatever food was within his reach. But if any one saluted him with an inclination of the head, he would leave the place angrily and hastily, through reluctance that his peculiar virtues should be detected by many persons. Such was the conduct of Simeon in public.

But there were some of his acquaintances, with whom he associated without any assumed appearances. One of his friends had a female domestic, who, having been debauched and become pregnant by some person, when she was urged by her owners to name the individual, said that Simeon had secretly cohabited with her and that she was pregnant by him ; that she was ready to swear to the truth of this statement, and, if necessary, to convict him. On hearing this, Simeon assented, saying that he bore the flesh with its frailties; and when the story was universally spread, and Simeon, as it seemed, was deeply disgraced, he withdrew into retirement, as if from feelings of shame. When the woman's time had arrived and she had been placed in the usual position, her throes, causing great and intolerable sufferings, brought her into imminent peril, but the birth made no progress. When, accordingly, they besought Simeon, who had come thither designedly, to pray for her, he openly declared that the woman would not be

delivered before she had said who was the father of the child: and when she had done this, and named the real father, the delivery was instantaneous, as though by the midwifery of truth.

He once was seen to enter the chamber of a courtezan, and having closed the door, he remained alone with her a considerable time; and when, again opening it, he went away looking round on all sides lest any one should see him, suspicion rose to so high a pitch, that those who witnessed it, brought out the woman, and inquired what was the nature of Simeon's visit to her and continuance with her for so long a time. She swore that, from want of necessaries, she had tasted nothing but water for three days past, and that Simeon had brought her victuals and a vessel of wine; that, having closed the door, he set a table before her and bid her make a meal, and satisfy her hunger, after her sufferings from want of food. She then produced the remains of what had been set before her.

Also at the approach of the earthquake which visited Phoenicia Maritima, and by which Berytus, Byblus, and Tripolis especially suffered, raising a whip in his hand, he struck the greater part of the columns in the forum, exclaiming, "Stand still, if there shall be occasion to dance." Inasmuch as none of his actions were unmeaning, those who were present carefully marked which were the columns he passed by without striking them. These were soon afterwards thrown down by the effects of the earthquake. Many other things he also did which require a separate treatise.

EVAGRIUS HISTORY CHAPTER 35

Thomas The Monk.

At that time lived also Thomas, who pursued the same mode of life in Coele-Syria. On occasion of his visiting Antioch, for the purpose of receiving the yearly stipend for the support of his monastery, which had been assigned from the revenues of the church in that place, Anastasius, the steward of the church, struck him on the head with his hand, because he frequently troubled him. When the bystanders manifested indignation, he said that neither himself should again receive nor Anastasius pay the money. Both which things came to pass, by the death of Anastasius after an interval of one day, and by the departure of Thomas to the unfading life, on his way back, in the sick hospital at the suburb of Daphne. They deposited his body in the tomb appropriated to strangers: but, after the subsequent interment of two others, his body was found above them, an extraordinary wonder, proceeding from God, who bore testimony to him even after his death; for the other bodies were thrown to a considerable distance. They report the circumstance to Ephraemius in admiration of the saint. In consequence, his holy body is transported to Antioch, with a public festival and procession, and is honoured with a place in the cemetery, having, by its translation, stopped the plague which was then visiting the place. The yearly festival in honour of whom the sons of the Antiochenes continue to celebrate to our time with great magnificence. Let me now, however, return to my subject.

EVAGRIUS HISTORY CHAPTER 36

Account Of A Miracle In The Patriarchate Of Menas. When Anthimus, as has been already mentioned, was

removed from the see. of the imperial city, Epiphanius succeeds to the bishopric; and after Epiphanius, Menas, in whose time also occurred a remarkable prodigy. It is an old custom in the imperial city, that, when there remains over a considerable quantity of the holy fragments of the immaculate body of Christ our God, boys of tender age should be fetched from among those who attend the schools, to eat them. On one occasion of this kind, there was included among them the son of a glass-worker, a Jew by faith; who, in reply to the inquiries of his parents respecting the cause of his delay, told them what had taken place, and what he had eaten in company with the other boys. The father, in his indignation and fury, places the boy in the furnace where he used to mould the glass. The mother, unable to find her child, wandered over the city with lamentations and wailings; and on the third day, standing by the door of her husband's workshop, was calling upon the boy by name, tearing herself in her sorrow. He, recognising his mother's voice, answered her from within the furnace, and she, bursting open the doors, saw, on her entrance, the boy standing in the midst of the coals, and untouched by the fire. On being asked how he had continued unhurt, he said that a woman in a purple robe had frequently visited him that: she had offered him water, and with it had quenched that part of the coals which was nearest to him; and that she had supplied him with food as often as he was hungry.

Justinian, on the report of this occurrence, placed the boy and his mother in the orders of the church, after they had been enlightened by the laver of regeneration. But the father, on his refusal to be numbered among the Christians, he ordered to be impaled in the suburb of Sycae, as being the murderer of his child.

Such was the course of these occurrences.

EVAGRIUS HISTORY CHAPTER 37 Succession Of Bishops.

After Menas, Eutychius is elevated to the see.

At Jerusalem, Sallustius succeeds Martyrius, who is himself succeeded by Helias. The next in succession was Peter; and after him came Macarius, without the emperor's confirmation. He was ejected from his see, on the charge of maintaining the opinions of Origen, and was succeeded by Eustochius. After the removal of Theodosius, as has been already mentioned, Zoilus is appointed bishop of Alexandria, and when he had been gathered to his predecessors, Apollinaris obtains the chair. After Ephraemius, Domninus is entrusted with the see of Antioch.

EVAGRIUS HISTORY CHAPTER 38

The Fifth General Council. [552 AD.]

During the time that Vigilius was bishop of the Elder Rome, and first Menas, then Eutychius of New Rome, Apollinaris of Alexandria, Domninus of Antioch, and Eustochius of Jerusalem, Justinian summons the fifth synod, for the following reason:--On account of the increasing influence of those who held the opinions of Origen, especially in what is called the New Laura, Eustochius used every effort for their removal, and, visiting the place itself, he ejected the whole party, driving them to a distance, as general pests. These persons, in their dispersion, associated with themselves many others. They found a champion in Theodore, surnamed Ascidas, bishop of Caesarea, the metropolis of Cappadocia, who was constantly about the person of Justinian, as being trusty and highly serviceable to him. Whereas he was creating much confusion in the imperial court, and declared the proceeding of Eustochius to be utterly impious and lawless, the latter despatches to Constantinople Rufus, superior of the monastery of Theodosius, and Conon, of that of Saba, persons of the first distinction among the solitaries, both on account of their personal worth and the religious houses of which they were the heads; and with them were associated others scarcely their inferiors in dignity. These, in the first instance, mooted the questions relating to Origen, Evagrius, and Didymus. But Theodore of Cappadocia, with a view to divert them from this point, introduces the subject of Theodore of Mopsuestia, Theodoret, and Ibas: the good God providentially disposing the whole proceeding, in order that the profanities of both parties should be ejected.

On the first question being started, namely, whether it were proper to anathematise the dead, Eutychius, a man of consummate skill in the divine Scriptures, being as yet an undistinguished person--for Menas was still living, and he was himself at that time apocrisiarius to the bishop of Amasea-casting a look on the assembly, not merely of commanding intelligence but of contempt, plainly declared that the question needed no debate, since King Josiah in former time not only slew the living priests of the demons, but also broke up the sepulchres of those who had long been dead. This was considered by all to have been spoken to the purpose. Justinian also, having been made acquainted with the circumstance, elevated him to the see of the imperial city on the death of Menas, which happened immediately after. Vigilius gave his assent in writing to the assembling of the synod but declined attendance.

Justinian addressed an inquiry to the synod on its assembling, as to what was their opinion concerning Theodore, and the expressions of Theodoret against Cyril and his twelve chapters, as well as the epistle of Ibas, as it is termed, addressed to Maris, the Persian. After the reading of many passages of Theodore and Theodoret, and proof given that Theodore had been long ago condemned and erased from the sacred diptychs, as also that it was fitting that heretics should be condemned after their death, they unanimously anathematise Theodore, and what had been advanced by Theodoret against the twelve chapters of Cyril and the right faith; as also the epistle of Ibas to Maris, the Persian; in the following words:--

"Our great God and Saviour Jesus Christ, according to the parable in the gospels," and so forth. "In addition to all other heretics, who have been condemned and anathematised by the before-mentioned four holy synods and by the holy catholic and apostolic church, we condemn and anathematise Theodore, styled bishop of Mopsuestia, and his impious writings; also whatever has been impiously written by Theodoret against the right faith, against the twelve chapters of the sainted Cyril, and against the first holy synod at Ephesus, and all that he has written in defence of Theodore and Nestorius. We further anathematise the impious epistle said to have been written by Ibas to Maris the Persian."

After some other matter, they proceed to set forth fourteen chapters concerning the right and unimpeachable faith. In this manner had the transactions proceeded : but on the presentation of libels against the doctrine of Origen, named also Adamantius, and the followers of his impious error, by the monks Eulogius, Conon, Cyriacus, and Pancratius, Justinian addresses a question to the synod concerning these points, appending to it a copy of the libel, as well as the epistle of Vigilius upon the subject: from the whole of which may be gathered the attempts of Origen to fill the simplicity of the apostolic doctrine with philosophic and Manichaean tares. Accordingly, a relation was addressed to Justinian by the synod, after they had uttered exclamations against Origen and the maintainers of similar errors. A portion of it is expressed in the following terms: "O most Christian emperor, gifted with heavenly generosity of soul," and so forth. "We have shunned, accordingly, we have shunned this error: for we knew not the voice of the alien: and having bound such a one. as a thief and a robber, in the cords of our anathema, we have ejected him from the sacred precincts." And presently they proceed: "By perusal you will learn the vigour of our acts. To this they appended a statement of the heads of the matters which the followers of Origen were taught to maintain, shewing their agreements, as well as their disagreements, and their manifold errors. The fifth head contains the blasphemous expressions uttered by private individuals belonging to what is called the New Laura, as follows. Theodore, surnamed Ascidas, the Cappadocian, said "If the Apostles and Martyrs at the present time work miracles, and are already so highly honoured, unless they shall be equal with Christ in the restitution of things, in what respect is there a restitution for them ?" They also reported many other blasphemies of Didymus, Evagrius, and Theodore; having with great diligence extracted whatever bore upon these points. At an interval of some time after the meeting of the synod, Eutychius is ejected, and there is appointed in his place to the see of Constantinople John a native of Seremis, which is a village of the district of Cynegica, belonging to Antioch.

EVAGRIUS HISTORY CHAPTER 39

Departure Of Justinian From Orthodoxy.

At that time Justinian, abandoning the right road of doctrine, and following a path untrodden by the apostles and fathers, became entangled among thorns and briers; with which wishing to fill the Church also, he failed in his purpose, and thereby fulfilled the prediction of prophecy ; the Lord having secured the royal road with an unfailing fence, that murderers might not leap, as it were, upon a tottering wall or a broken hedge. Thus, at the time when John, named also Catelinus, was bishop of the elder Rome, after Vigilius; John from Seremis, of New Rome; Apollinaris, of Alexandria; Anastasius, of Theopolis, after Domninus; and Macarius, of Jerusalem, had been restored to his see; Justinian, after he had anathematized Origen, Didymus, and Evagrius, issued what the Latins call an Edict, after the deposition of Eustochius, in which he termed the body of the Lord incorruptible and incapable of the natural and blameless passions: affirming that the Lord ate before his passion in the same manner as after his resurrection, his holy body having undergone no conversion or change from the time of its actual formation in the womb, not even in respect of the voluntary and natural passions, nor yet after the resurrection. To this, he proceeded to compel the bishops in all quarters to give their assent. However, they all professed to look to Anastasius, the bishop of Antioch, and thus avoided the first attack.

EVAGRIUS HISTORY CHAPTER 40

Anastasius, Patriarch Of Antioch. [561 AD.]

Anastasius was a man most accomplished in divine learning, and so strict in his manners and mode of life, as to insist upon very minute matters, and on no occasion to deviate from a staid and settled frame, much less in things of moment and having relation to the Deity himself. So well tempered was his character, that neither, by being accessible and affable, was he exposed to the intrusion of things unsuitable; nor by being austere and unindulgent, did he become difficult of approach for proper purposes. Accordingly, in serious concerns he was ready in ear and fluent in tongue, promptly resolving the questions proposed to him; but in trifling matters, his ears were altogether closed, and a bridle restrained his tongue, so that speech was enthralled by thought, and silence resulted, more valuable than speech. Justinian assaults him, like some impregnable tower, with every kind of device, considering that if he could only succeed in shaking this bulwark, all difficulty would be removed in capturing the city, enslaving the right doctrine, and taking captive the sheep of Christ. In such a manner was Anastasius raised above the assailing force by heavenly greatness of mind, for he stood upon the immoveable rock of faith, that he unreservedly contradicted Justinian by a formal declaration, in which he showed very clearly and forcibly that the body of the Lord was corruptible in respect of the natural and blameless passions, and that the divine apostles and the inspired fathers both held and delivered this opinion. In the same terms he replied to a question of the monastic body of Syria Prima and Secunda, confirming the minds of all, preparing them for the struggle, and daily reading in the Church those words of the "chosen vessel:" [Acts 4.15.] "If any one is preaching to you a gospel different from that which ye have received, even though it be an angel from heaven, let him be accursed." [Galatians 1.9.] To this all, with few exceptions, paid a steady regard and zealous adherence. He also addressed to the Antiochenes a valedictory discourse, on hearing that Justinian intended to

banish him; a discourse deserving admiration for its elegance, its flow of thought, the abundance of sacred texts, and the appropriateness of its historical matters.

EVAGRIUS HISTORY CHAPTER 41

Death Of Justinian.

But this discourse was not published, "God having provided some better thing for us:" [Hebrews 11.40.] for Justinian, while dictating the banishment of Anastasius and his associate priests, departed this life by an invisible stroke, having reigned in all eight and thirty years and eight months. THE END OF THE FOURTH BOOK.

THE FIFTH BOOK.

EVAGRIUS HISTORY CHAPTER 1

Accession Of Justin The Second.

In this manner did Justinian depart to the lowest region of retribution, after having filled every place with confusion and tumults, and having received at the close of his life the reward of his actions. His nephew Justin succeeds to the purple; having previously held the office of guardian of the palace, styled in the Latin language Curopalata. No one, except those who were immediately about his person, was aware of the demise of Justinian or the declaration of Justin, until the latter made his appearance in the hippodrome, by way of formally assuming the stated functions of royalty. Confining himself to this simple proceeding, he then returned to the palace.

His first edict was one dismissing the bishops to their respective sees, wherever they might be assembled, with a provision that they should maintain what was already established in religion, and abstain from novelties in matters of faith. This proceeding was to his honour. In his mode of life, however, he was dissolute, utterly abandoned to luxury and inordinate pleasures: and to such a degree was he inflamed with desire for the property of others, as to convert every thing into a means of unlawful gain; standing in no awe of the Deity even in the case of bishoprics, but making them a matter of public sale to any purchasers that offered. Possessed, as he was, alike by the vices of audacity and cowardice, he in the first place sends for his kinsman Justin, a man universally famous for military skill and his other distinctions, who was at that time stationed upon the Danube, and engaged in preventing the Avars from crossing that river.

These were one of those Scythian tribes who live in wagons, and inhabit the plains beyond the Caucasus. Having been worsted by their neighbours, the Turks, they had migrated in a mass to the Bosphorus; and, having subsequently left the shores of the Euxine---- where were many barbarian tribes, and where also cities, castles, and some harbours had been located by the Romans, being either settlements of veterans, or colonies sent out by the emperors----they were pursuing their march, in continual conflict with the barbarians whom they encountered, until they reached the bank of the Danube; and thence they sent an embassy to Justinian.

From this quarter Justin was summoned, as having a claim to the fulfilment of the terms of the agreement between himself and the emperor. For, since both of them had been possessed of equal dignity, and the succession to the empire was in suspense between both, they had agreed, after much dispute, that whichever of the two should become possessed of the sovereignty, should confer the second place on the other; so that while ranking beneath the emperor, he should still take precedence of all others.

EVAGRIUS HISTORY CHAPTER 2

Murder Of Justin, Kinsman Of The Emperor.

The emperor accordingly received him, in the first instance, with an abundant display of kindness. Afterwards, he proceeded to fix certain charges upon him, and to withdraw the various guards of his person, forbidding him at the same time access to his presence; for he himself lived in the retirement of his palace: and ultimately he ordered his removal to Alexandria. There he is miserably murdered in the dead of night, when he had just retired to rest; such being the reward of his fidelity to the commonwealth and his achievements in war. Nor did the emperor and his consort Sophia abate their rage, nor had they sufficiently indulged their boiling spite, before they had gazed upon his head and sourned it with their feet.

EVAGRIUS HISTORY CHAPTER 3

Execution Of Aetherius And Addaeus.

Not long after, the emperor brought to trial for treason Aetherius and Addaeus, members of the senate, who had occupied the very highest position at the court of Justinian. Aetherius confessed to a design of poisoning the emperor, saying that he had in Addaeus an accomplice in the plot and an abettor throughout. The latter, however, asseverated, with fearful imprecations, that he was utterly ignorant of the transaction. Both were accordingly beheaded, Addaeus affirming, at the instant of execution, that he had been falsely accused on this point, but admitting that he received his due at the hands of all-seeing Justice, for that he had taken off Theodotus, prefect of the palace, by sorcery. How far these statements are true, I am not able to say; but both were men of bad character; Addaeus being addicted to unnatural lust, and Aetherius pursuing to the utmost a system of false accusation, and plundering the property both of the living and the dead, in the name of the imperial household, of which he had been comptroller in the time of Justinian. Such was the termination of these matters.

EVAGRIUS HISTORY CHAPTER 4

Edict Of Justin Concerning The Faith. [566 AD.] Justin issues an edict to the Christians in every quarter, in the following terms.

"In the name of the Lord Jesus Christ, our God, the Emperor Caesar Flavian Justin, faithful in Christ, clement, supreme, beneficent, Alemannicus, Gothicus, Germanicus, Anticus, Francicus, Herulicus, Gepidicus, pious, fortunate, glorious, victorious, triumphant, ever-worshipful Augustus.

"'My peace I give to you,' says the Lord Christ, our very God. 'My peace I leave to you,' he also proclaims to all mankind. Now this is nothing else than that those who believe on him should gather into one and the same church, being unanimous concerning the true belief of Christians, and withdrawing from such as affirm or entertain contrary opinions: for the prime means of salvation for all men is the confession of the right faith. Wherefore we also, following the evangelical precepts and the holy symbol or doctrine of the holy fathers, exhort all persons to unite in one and the same church and sentiment; and this we do, believing in the Father, Son, and Holy Spirit, holding the doctrine of a consubstantial Trinity, one Godhead or nature and substance, both in terms and reality; one power, influence, and operation in three subsistences or persons; into which doctrine we were baptized, in which we believe, and to which we have united ourselves. For we worship a Unity in trinity and a Trinity in unity. peculiar both in its division and in its union, being Unity in respect of substance or Godhead, and Trinity with regard to its proprieties or subsistences or persons; for it is divided indivisibly, so to speak, and is united divisibly: for there is one thing in three, namely, the Godhead; and the three things are one, namely, those in which is the Godhead, or, to speak more accurately, which are the Godhead: and we acknowledge the Father to be God, the Son God, and the Holy Spirit God, whenever each person is regarded by itself----the thought in that case separating the things that are inseparable----and the three when viewed in conjunction to be God by sameness of motion and of nature; inasmuch as it is proper both to confess the one God, and at the same time to proclaim the three subsistences or proprieties. We also confess the only begotten Son of God, the God-Word, who, before the ages and without time, was begotten of the Father, not made, and who, in the last of the days, for our sakes and for our salvation, descended from heaven, and was incarnate of the Holv Spirit and of our Lady, the holy glorious Mother of God and ever virgin Mary. and was born of her; who is our Lord Jesus Christ, one of the Holy Trinity, united in glorification with the Father and the Holy Spirit: for the Holy Trinity did not admit the addition of a fourth person, even when one of the Trinity, the God-Word, had become incarnate; but our Lord Jesus Christ is one and the same, being consubstantial with God the Father, as respects the Godhead, and at the same time consubstantial with ourselves as respects the manhood; passible in the flesh, and at the same time impassible in the Godhead: for we do not admit that the divine Word who wrought the miracles was one, and he who underwent the sufferings was another ; but we confess our Lord Jesus Christ to be one and the same namely, the Word of God become incarnate and made perfectly man, and that both the miracles and the sufferings which he voluntarily underwent for our salvation belong to one and the same; inasmuch as it was not a human being that gave himself on our behalf; but the God-Word himself, becoming man without undergoing change, submitted in the flesh to the voluntary passion and death on our behalf. Accordingly, while confessing him to be God, we do not contravene the circumstance of his being man; and while confessing him to be man, we do not deny the fact of his being God: whence, while confessing our Lord Jesus Christ to be one and the same, composed of both natures, namely, the Godhead and the manhood, we do not superinduce confusion upon the union; for he will not lose the circumstance of being God on becoming man like ourselves; nor yet, in being by nature God, and in that respect incapable of likeness to us, will he also decline the circumstance of being man. But as he continued God in manhood; in like manner, though possessed of divine supremacy, he is no less man; being both in one, God and man at the same time, one Emmanuel. Further, while confessing him to be at the same time perfect in Godhead and perfect in manhood of which two he was also composed we do not attach to his one complex subsistence a division by parts or severance; but we signify that the difference of the natures is not annulled by the union: for neither was the divine nature changed into the human, nor the human nature converted into the divine; but, each being the more distinctly

understood and existent in the limit and relation of its own nature, we say that the union took place according to subsistence. The union according to subsistence signifies, that the God-Word, that is to say one subsistence of the three subsistences of the Godhead, was not united with a previously existing human being, but in the womb of our Lady, the holy glorious Mother of God and ever virgin Mary, formed for himself of her, in his own subsistence, flesh consubstantial with ourselves, having the same passions in all respects except sin, and animated with a reasonable and intelligent soul; for he retained his subsistence in himself, and became man, and is one and the same, our Lord Jesus Christ, united in glorification with the Father and the Holy Spirit. Further, while considering his ineffable union, we rightly confess one nature, that of the Divine Word, to have become incarnate, by flesh animated with a reasonable and intelligent soul; and, on the other hand, while contemplating the difference of the natures, we affirm that they are two, without, however, introducing any division, for either nature is in him; whence we confess one and the same Christ, one Son, one person, one subsistence, both God and man together; and all who have held or do hold opinions at variance with these, we anathematize, judging them to be alien from the Holy and Apostolic Church of God. Accordingly, while the right doctrines which have been delivered to us by the holy fathers are being thus proclaimed, we exhort you all to gather into one and the same Catholic and Apostolic Church, or rather we even entreat you; for though possessed of imperial supremacy, we do not decline the use of such a term, in behalf of the unanimity and union of all Christians, in the universal offering of one doxology to our great God and Saviour Jesus Christ, and in abstinence for the future on the part of all from unnecessary disputes about persons and words----since the words lead to one true belief and understanding----while the usage and form which has hitherto prevailed in the holy Catholic and Apostolic Church of God, remains for ever unshaken and unchanged."

To this edict all assented, saying that it was expressed in orthodox language. None, however, of the severed portions of the Church were entirely reunited, because the edict distinctly declared that what had hitherto been unshaken and unchanged, should continue so in all coming time.

EVAGRIUS HISTORY CHAPTER 5

Deposition Of Anastasius, Patriarch Of Antioch.

Justin also ejected Anastasius from the episcopate of Theopolis, on the charge of a profuse and improper expenditure of the funds of the see, and also for scandalous language against himself; inasmuch as Anastasius, on being asked why he was so lavishly squandering the property of the see, frankly replied, that it was done to prevent its being carried off by that universal pest, Justin. He is also said to have entertained a grudge against Anastasius, because he had refused to pay a sum of money, when demanded of him in consideration of his appointment to the bishopric. Other charges were also brought against him by persons, who, as I suppose, wished to second the emperor's bent.

EVAGRIUS HISTORY CHAPTER 6

Gregory, The Successor Of Anastasius. [571 AD.]

Next in succession, Gregory is elevated to the episcopal see: "wide whose renown," according to the language of poetry; a person who had devoted himself from the earliest period of life to the monastic discipline, and had wrestled therein so manfully and stoutly, that he arrived at the highest elevation when scarcely past his boyhood, and became superior of the monastery of the Romans, in which he had assumed the bare mode of life, and subsequently, by the orders of Justin, of the monastery of Mount Sinai. Here he encountered extreme danger, having sustained a siege by the Scenite Arabs.

Having, nevertheless, secured the complete tranquillity of the spot, he was thence summoned to the archiepiscopal dignity. He was unrivalled in every excellence of intellect and virtue, and most energetic in accomplishing whatever he resolved upon, uninfluenced by fear, and incapable of shrinking before secular power. So noble was his expenditure of money, in a general system of liberality and munificence, that whenever he appeared in public, crowds, besides his ordinary attendants, followed him; and all gathered round him who saw or heard of his approach. The respect shewn to so high a dignity, was but second to the honour bestowed upon the individual, in the generous desire of persons to obtain a near view of him and to hear his words; for he was possessed of singular power to inspire with attachment towards himself all who held converse with him, being a person of most imposing aspect and sweet address, especially quick of perception and prompt in execution, a most able counsellor and judge, both in his own matters and in those of others. On this account it was that he accomplished so much never deferring any thing till to-morrow. By dealing with matters with unfailing promptitude, according as either necessity required or opportunity favoured, he tilled with admiration not only the Roman but the Persian sovereigns, as I shall set forth the particulars in their proper place. His

THE GRAND BIBLE

character was strongly marked by vehemence, and at times by indications of anger; while, on the other hand, his meekness and gentleness were not confined, but were exceedingly abundant; so that to him was admirably fitted the excellent expression of Gregory Theologus, "austerity tempered with modesty," while neither quality was impaired, but each rendered more striking by the other.

EVAGRIUS HISTORY CHAPTER 7

Submission Of The Inhabitants Of Persarmenia (Persian Armenia).

In the first year of the episcopate of Gregory, the inhabitants of what was formerly called the greater Armenia, but afterwards Persarmenia----this country was formerly subject to the Romans, but when Philip, the successor of Gordian, had betrayed it to Sapor, what is called the lesser Armenia alone was possessed by the Romans, but the remainder by the Persians----this people, being Christians and cruelly treated by the Persians, especially on the score of their faith, sent a secret embassy to Justin, imploring to be allowed to place themselves under the dominion of the Romans, in order to a safe and unrestrained observance of their religion. When the emperor had admitted their overtures, and certain written conditions had been settled on his part and guaranteed by the most solemn oaths, the Armenians massacre their governors; and the whole nation, together with their allied neighbours, both of kindred and foreign race, unite themselves to the Roman empire, Vardanes having a precedence among his countrymen by birth, dignity, and military skill. In reply to the complaints of Chosroes on account of these transactions, Justin alleged that the peace had expired, and that it was impossible to reject the advances of Christians, when desirous of uniting themselves with fellow Christians in time of war.

Such was his reply. Notwithstanding, he made no preparation for war, but was involved in his habitual luxury, regarding every thing as secondary to his personal enjoyments.

EVAGRIUS HISTORY CHAPTER 8

Siege Of Nisibis By Marcian. [572 AD.]

The emperor sends out his kinsman Marcian, as commander of the forces of the East, without, however, sufficiently supplying him with troops, or the other material of war. He occupies Mesopotamia, at the imminent risk of utter ruin, followed by very few troops, and these imperfectly armed, and by a few rustic labourers and herdsmen, whom he had pressed into his service from among the provincials. After gaining the advantage in some skirmishes near Nisibis with the Persians, who were themselves not yet completely prepared, he sits down before that city, though the enemy did not think it necessary to close the gates, and insolently jeered the Roman troops. Besides many other prodigies presaging the approaching calamities, I also saw, at the beginning of the war, a newly born calf with two heads.

EVAGRIUS HISTORY CHAPTER 9

Invasion Of The Persians. [574 AD.]

Chosroes, when his preparations for war were completed, having accompanied Adaarmanes for some distance, sent him across the Euphrates from his own bank of the river into the Romans, situated at the limit of the empire, and rendered strong not only by its walls, which are carried to an immense height, but by the rivers Euphrates and Aboras, which, as it were, insulate the place. Chosroes himself, having crossed the Tigris with his own division of the army, advanced upon Nisibis.

Of these operations the Romans were for a long time ignorant, so far that Justin, relying on a rumour to the effect that Chosroes was either dead or approaching his last breath. was indignant at the tardiness of the siege of Nisibis, and sent persons for the purpose of stimulating the efforts of Marcian, and bringing to him the keys of the gates as quickly as possible. Information, however, that the siege was making no progress, but that the commander was bringing great discredit upon himself by attempting impossibilities in the case of so important a city with so contemptible a force, is conveyed in the first instance to Gregory, bishop of Theopolis: for the bishop of Nisibis, being strongly attached to Gregory, as having received munificent presents from him, and especially being indignant at the insolence which the Persians were continually displaying towards the Christians, and desirous that his city should be subject to the Roman power, supplied information to Gregory of all things that were going on in the enemy's territory, at each several juncture. This the latter immediately forwarded to Jus tin, informing him as quickly as possible of the advance of Chosroes: but he, being immersed in his habitual pleasures, paid no regard to the letters of Gregory: nor was he indeed inclined to believe them indulging rather the thoughts suggested by his wishes: for the ordinary mark of dissolute persons is a meanness of spirit combined with confidence with regard to results; as well as incredulity, if any thing occurs which runs counter to their desires. Accordingly he writes to Gregory, altogether

repudiating the information as being utterly false, and, even supposing it were true, saying that the Persians would not come up before the siege was concluded, and that, if they did, they would be beaten off with loss. He further sends Acacius, a wicked and insolent man, to Marcian with orders to supersede him in the command, even supposing he had already set one foot within the town. This command he strictly executed, carrying out the emperor's orders without any regard to the public good: for, on his arrival at the camp, he deprives Marcian of his command while on the enemy's territory, and without informing the army of the transaction. The various officers, on learning at the break of the next clay that their commander was superseded, no longer appeared at the head of their troops, but stole away in various directions, and thus raised that ridiculous siege.

Adaarmanes, on the other hand, in command of a considerable force of Persians and Scenite barbarians, having marched by Circesium, inflicted every possible injury with fire and sword upon the Roman territory, setting no limits to his intentions or actions. He also captures many fortresses and towns, without encountering any resistance; in the first place, because there was no one in command, and secondly, because, since the Roman troops were shut up in Daras by Chosroes, his foragings and incursions were made in perfect security. He also directed an advance upon Theopolis, without proceeding thither in person. These troops were compelled to draw off most unexpectedly; for scarcely any one, or indeed very few persons, remained in the city; and the bishop had fled, taking with him the sacred treasures, because both the greater part of the walls had fallen to ruins, and the populace had made insurrection with the hope of gaining ascendancy by change: a thing of frequent occurrence, and especially at junctures like this. The insurgents themselves also abandoned the city. without any attempt to meet the emergency or take active measures against the enemy.

EVAGRIUS HISTORY CHAPTER 10

Capture Of Apamea And Daras.

Failing thus in this attempt, Adaarmanes, having burnt the city formerly called Heraclea but subsequently Gagalica, made himself master of Apamea: which, having been founded by Seleucus Nicator, was once flourishing and populous, but had fallen to a great extent into ruin through lapse of time. On the capitulation of the city from the inability of the inhabitants to offer any resistance, since the wall had fallen down through age, he fired and pillaged the whole place, in violation of the terms, and drew off, carrying away captive the inhabitants of the town and the adjoining country, and among them the bishop and the governor. He also exercised every kind of atrocity during his march, without meeting with any resistance or indeed attempt at opposition, except a very small force sent out by Justin under the command of Magnus, who had formerly been a banker at Constantinople, and subsequently appointed steward of one of the imperial residences. These troops however fled with precipitation, and narrowly escaped being made prisoners.

After these operations, Adaarmanes joins Chosroes, who had not yet captured the city he was besieging. By the junction, he threw an important weight into the scale, in raising the spirits of his countrymen, while he disheartened their opponents. He found the city cut off by lines, and a huge mound carried forward within a short distance of the walls. with engines mounted, and especially catapults, shooting from vantage ground. By these means, Chosroes took the city by storm. John, the son of Timostratus, was governor, who paid little regard to the defence of the place, or perhaps betraved it; for both accounts are reported. Chosroes had besieged the city for five months or more without any effort being made for its relief. Having brought forth all the inhabitants in immense numbers, some of whom he miserably slaughtered but retained the greater part as captives, he garrisoned the city, on account of its important situation, and then retired into his own territories.

EVAGRIUS HISTORY CHAPTER 11

Insanity Of Justin.

On being informed of these events, Justin, in whose mind no sober and considerate thoughts found place after so much inflation and pride, and who did not bear what had befallen him with resignation suited to a human being, falls into a state of frenzy, and becomes unconscious of all subsequent transactions.

Tiberius assumes the direction of affairs, a Thracian by birth, but holding the first place in the court of Justin. He had previously been sent out against the Avars by the emperor, who had raised a very large army for the purpose; and he would inevitably have been made prisoner, since his troops would not even face the barbarians, had not divine Providence unexpectedly delivered him, and preserved him for succession to the Roman 'sovereignty; which, through the inconsiderate measures of Justin, was in danger of falling to ruin, together with the entire commonwealth, and of passing from such a height of power into the hands of barbarians.

EVAGRIUS HISTORY CHAPTER 12 Embassy Of Traian To Chosroes.

Accordingly, Tiberius adopts a measure opportune and well suited to the state of affairs, which altogether repaired the calamity. He despatches to Chosroes, Trajan, a senator and an accomplished man, universally esteemed for his years and intelligence; not, however, as representative of the sovereign power, nor yet as ambassador for the commonwealth, but merely to treat on behalf of the empress Sophia; who herself also wrote to Chosroes, bewailing the calamities which had befallen her husband, and the loss of its head which the commonwealth sustained, and urging the unseemliness of trampling upon a widowed female, a prostrate monarch, and a desolate empire: at the same time reminding him that, when afflicted with sickness, he had himself not only been treated with similar forbearance, but that the very best physicians had been sent to him by the Roman government, and had cured him of his disease. Chosroes is, accordingly, moved by the appeal, and when upon the very point of attacking the empire, makes a truce for three years, embracing the eastern parts; with a condition that Armenia should be excepted so as to allow of hostilities being maintained there, provided the East were not molested.

During these proceedings in the East, Sirmium is taken by the barbarians, which had some time before fallen into the hands of the Gepidae, and been afterwards restored by them to Justin.

EVAGRIUS HISTORY CHAPTER 13

Proclamation Of Tiberius. His Character. [474 AD.]

About this time Justin, by the advice of Sophia, bestows on Tiberius the rank of Caesar, giving utterance, in the act of declaration, to such expressions as surpass all that has been recorded in ancient or recent history; our compassionate God having vouchsafed to him an opportunity for an avowal of his own errors, and a suggestion of what was for the benefit of the state. For when there were assembled in the open court, where ancient usage enjoins that such proceedings should take place, both the archbishop, John, whom we have already mentioned, and his clergy, as well as the state dignitaries, and the household troops, the emperor, on investing Tiberius with the imperial tunic and robe, gave utterance with a loud voice to the following words: "Let not the grandeur of thy investiture deceive thee, nor the pomp of the present spectacle; beguiled by which, I have unwittingly rendered myself obnoxious to the most severe penalties. Do thou make reparation for my errors, by administering the commonwealth with all gentleness." Then pointing to the magistrates, he recommended him by no means to put confidence in them, adding: "These are the very persons who have brought me into the condition which thou now witnessest:" together with other similar expressions, which filled all with utter amazement, and drew forth an abundance of tears.

Tiberius was very tall, and by far the most noble in person not only of sovereigns but all mankind: so that, in the first place, his beauty was deserving of sovereignty. In disposition, he was mild and compassionate, and gave cordial reception to all persons at their very first approach. He deemed wealth to consist in aiding all with largesses, not merely so far as to meet their wants, but even to superfluity: for he did not consider what the needy ought to receive, but what it became a Roman emperor to bestow. He esteemed that gold to be adulterated which was exacted with tears: on which account he entirely remitted the taxation for one year, and released from their imposts the properties which Adaarmanes had devastated, not merely to the extent of the damage but even far beyond it. The magistrates were also excused from the necessity of making the unlawful presents, by means of which the emperors formerly made a sale of their subjects. On these points he also issued constitutions, as a security for coining

EVAGRIUS HISTORY CHAPTER 14

Successes Of The Roman Commander Justinian Against The Persians.

Tiberius, accordingly, applying to a rightful purpose the wealth which had been amassed by improper means, made the necessary preparations for war. So numerous was the army of brave men, raised among the Transalpine nations, the Massagetae, and other Scythian tribes, by a choice levy in the countries on the Rhine, and on this side of the Alps, as well as in Paeonia, Mysia, Illyria, and Isauria, that he completed squadrons of excellent cavalry, to the amount of nearly one hundred and fifty thousand men, and repulsed Chosroes, who, immediately after the capture of Daras, had advanced in the course of the summer against Armenia, and was thence directing his movements upon Caesarea, which was the seat of government of Cappadocia and the capital of the cities in that quarter. In such contempt did Chosroes hold the Roman power, that, when the Caesar had sent an embassy to him, he did not deign to admit the ambassadors to an audience, but bid them follow him to Caesarea; at which place he said he would take the embassy into his consideration. When, however, he saw the Roman army in the front of him, under

the command of Justinian, the brother of that Justin who had been miserably put to death by the Emperor Justin. in complete equipment, with the trumpets sending forth martial sounds, the standards uplifted for conflict, and the soldiery eager for slaughter, breathing forth fury, and at the same time maintaining perfect order, and, besides, so numerous and noble a body of cavalry as no monarch had ever imagined, he drew a deep groan, with many adjurations, at the unforeseen and unexpected sight, and was reluctant to begin the engagement. But while he is lingering and whiling away the time, and making a mere feint of fighting, Kurs, the Scythian, who was in command of the right wing, advances upon him; and since the Persians were unable to stand his charge, and were in a very signal manner abandoning their ground, he made an extensive slaughter of his opponents. He also attacks the rear, where both Chosroes and the whole army had placed their baggage, and captures all the royal stores and the entire baggage, under the very eyes of Chosroes; who endured the sight, deeming self-imposed constraint more tolerable than the onset of Kurs. The latter, having together with his troops made himself master of a great amount of money and spoil, and carrying off the beasts of burden with their loads, among which was the sacred fire of Chosroes to which divine honours were paid, makes a circuit of the Persian camp, singing songs of victory, and rejoins, about nightfall, his own army, who had already broken up from their position, without a commencement of battle on the part of either Chosroes or themselves, beyond a few slight skirmishes or single combats, such as usually take place.

Chosroes, having lighted many fires, made preparations for a night assault; and since the Romans had formed two camps, he attacks the division which lay northward, at the dead of night. On their giving way under this sudden and unexpected onset, he advances upon the neighbouring town of Melitene, which was undefended and deserted by its inhabitants, and having fired the whole place, prepared to cross the Euphrates. At the approach, however, of the united forces of the Romans, in alarm for his own safety, he mounted an elephant, and crossed alone; while great numbers of his army found a grave in the waters of the river : on learning whose fate he retreated.

Having paid this extreme penalty for his insolence towards the Roman power. Chosroes retires with the survivors to the eastern parts, in which quarter the terms of the truce had provided that no one should attack him. Nevertheless Justinian made an irruption into the Persian territory with his entire force, and passed the whole winter there, without any molestation. He withdrew about the summer solstice, without having sustained any loss whatever, and passed the summer near the border, surrounded by prosperity and glory.

EVAGRIUS HISTORY CHAPTER 15

Death Of Chosroes. Succession Of Hormisdas. [576 AD.] Ciiosroes, lost in frenzy and despair, and submerged in the surgings of sorrow, is brought to a miserable end by overwhelming anguish, after leaving behind him a lasting monument of his flight, in the law which he enacted, that no king of the Persians should henceforward lead an army against the Romans. He is succeeded by his son Hormisdas. These matters I must now pass over, since the events which follow in direct succession are inviting my attention and awaiting the regular progress of my narrative.

EVAGRIUS HISTORY CHAPTER 16 Succession Of Bishops.

On the decease of John, named also Catelinus, Bonosus is intrusted with the helm of the Roman see, and he is succeeded by another John, and he, again, by Pelagius. In the imperial city John is succeeded by Eutychius, who had already held the see before him. Apollinaris is succeeded in the see of Alexandria by John, and he by Eulogius, After Macarius, John is elevated to the bishopric of Jerusalem, who had pursued the monastic discipline in what is called the monastery of the Acoemets. This period passed without any changes being attempted in the state of the Church.

EVAGRIUS HISTORY CHAPTER 17

Earthquake At Antioch. [580 AD.]

In the third year of the administration of the empire by Tiberius, a violent earthquake befell Theopolis and its suburb of Daphne, precisely at noon; on which occasion the whole of that suburb was laid in utter ruin by the shocks, while the public and private buildings in Theopolis, though rent to the ground, were still not entirely levelled. Several other events occurred both in Theopolis, and also in the imperial city, deserving especial notice, which threw both places into confusion, and broke out into excessive disturbances: events which took their rise from zeal for God, and terminated in a manner worthy of divine agency. These I now proceed to notice

EVAGRIUS HISTORY CHAPTER 18

Commotion On Account Of Anatolius.

There was residing at Theopolis a certain Anatolius, who was originally one of the vulgar and an artisan, but had subsequently, by some means or other, obtained admission into public offices and other posts of importance. In this city he was pursuing his engagements, from which resulted an intimacy with Gregory, president of that Church, and frequent visits to him, partly for the purpose of conversing on matters of business, and partly with a view to obtain greater influence on the ground of his intercourse with the prelate. This person was detected in the practice of sacrificial rites, and being called to account was proved to be a miscreant and a sorcerer, and implicated in innumerable enormities. He gains over, however, by bribery, the governor of the East, and would have obtained an acquittal, together with his accomplices, for he was associated with others of a similar stamp who were involved in the detection, had not the people risen, and, by exciting a universal stir, frustrated the design,

They also clamoured against the bishop, saying that he was a party to the scheme; and some turbulent and malignant demon induced persons to believe that he had also taken part with Anatolius in the sacrificial rites. By this means Gregory was brought into extreme danger, from the vehement efforts of the populace against him; and the suspicion was so far prevalent, that even the emperor Tiberius was desirous of learning the truth from the mouth of Anatolius. Accordingly, he orders Anatolius and his associates to be conveyed forthwith to the imperial city. On learning this, Anatolius rushed to a certain image of the Mother of God, which was suspended by a cord in the prison, and folding his hands behind his back, announced himself as a suppliant; but she, in detestation and conviction of the guilty and God-hated man. turned herself quite round, presenting a prodigy awful and worthy of perpetual remembrance; which, having been witnessed by all the prisoners as well as by those who had the charge of Anatolius and his associates, was thus published to the world. She also appeared in a vision to some of the faithful, exhorting them against the wretch, and saving that Anatolius was guilty of insult against her Son.

When he had been conveyed to the imperial city, and, on being subjected to the extreme of torture, was unable to allege anything against the bishop, he and his associates were the cause of still greater disturbances and a general rising of the populace: for, when some of the party had received sentence of banishment instead of death, the populace, inflamed with a sort of divine zeal, caused a general commotion, in their fury and indignation, and having seized the persons condemned to banishment and put them into a skiff, they committed them alive to the flames; such being the people's verdict. They also clamoured against the emperor and their own bishop Eutychius as betravers of the faith: and they would have inevitably despatched Eutychius, and those who had been charged with the investigation, making search for them in every quarter, had not all-preserving Providence rescued them from their pursuers, and gradually lulled the anger of so numerous a population; so that no outrage was perpetrated at their hands. Anatolius himself, after being first exposed to the wild beasts in the amphitheatre and mangled by them, was then impaled, without terminating even then his punishment in this world; for the wolves, tearing down his polluted body, divided it as a feast among themselves; a circumstance never before noticed. There was also one of my fellow-citizens, who, before these events took place, affirmed that he had been informed by a dream, that the judgment upon Anatolius and his associates was in the hands of the populace. A person too of high distinction, being the curator of the palace, who had resolutely protected Anatolius, said that he had seen the Mother of God, demanding of him how long he intended to defend Anatolius, who had so grievously outraged herself and her Son. Such was the termination of this business.

EVAGRIUS HISTORY CHAPTER 19

Character And Achievements Of Maurice.

Tiberius, being by this time in possession of the crown on the death of Justin, supersedes Justinian, since he had not been equally successful against the barbarians, and appoints Maurice to the command of the forces of the East; a person who derived his descent and name from the elder Rome, but, as regards his more immediate origin, was a native of Arabissus in Cappadocia; a man of sense and ability, and of unvarying accuracy and firmness. Being staid and precise in his mode of living and manners, he was temperate in his food, using only such as was necessary and simple, and was superior to all other indulgences of a luxurious life. He was not easily accessible to the solicitations of the vulgar, nor a too easy listener in general; well knowing that the one tends to produce contempt, and the other leads to flattery. Accordingly, he granted audiences sparingly, and those only to persons on serious business, and closed his ears against idle talk, not with wax, as poets say, but rather with reason; so that this latter was an excellent key to them, appropriately both opening and closing them during conversation. So completely had he banished both ignorance, the mother of audacity, and also cowardice, which is at the same time a foreigner and a neighbour to the former, that with him to face danger was an act of prudence, and to decline it was a measure of safety; while both courage and discretion were the

charioteers of opportunity, and guided the reins to whatever quarter necessity directed; so that his efforts were both restrained and put forth, as it were, by measure and rule. Concerning this person I shall speak more fully in the sequel; since the detail of his greatness and excellence I must reserve for the history of his reign ; which displayed the man in a clearer light, as unfolding, through freedom of action, even the more inward parts of his character.

This Maurice, advancing beyond the limits of the empire, captures both cities and fortresses, of the greatest importance to the Persians, and carried off so much plunder, that the captives were sufficiently numerous to occupy at length whole islands, towns, and districts which had been deserted: and thus the land which had been previously untilled, was every where restored to cultivation. Numerous armies also were raised from among them, that fought resolutely and courageously against the other nations. At the same time every household was completely furnished with domestics, on account of the easy rate at which slaves were procured.

EVAGRIUS HISTORY CHAPTER 20

Overthrow Of The Persians.

He also engaged Tamchosroes and Adaarmanes, the principal Persian commanders, who had advanced against him with a considerable force: but the nature, manner, and place of these transactions I leave others to record, or shall perhaps myself make them the subject of a distinct work, since my present one professes to treat of matters of a very different kind. Tamchosroes, however, falls in battle, not by the bravery of the Roman soldiery, but merely through the piety and faith of their commander: and Adaarmanes, being worsted in the fight and having lost many of his men, flies with precipitation, and this too, although Alamundarus, the commander of the Scenite barbarians, played the traitor in declining to cross the Euphrates and support Maurice against the Scenites of the opposite party. For this people are invincible by any other than themselves, on account of the fleetness of their horses : when hemmed in, they cannot be captured; and they outstrip their enemies in retreat. Theodoric too, commander of the Scythian troops, did not so much as venture within range of the missiles, but fled with all his people.

EVAGRIUS HISTORY CHAPTER 21

Prodigies Foreshewing The Elevation Of Maurice To The Empire

Prodigies also occurred, which indicated that the imperial power was destined to Maurice. As he was offering incense, at the dead of night, within the sanctuary of Mary, the holy and immaculate virgin and Mother of God, which is called by the Antiochenes the church of Justinian, the veil which surrounds the holy table became wrapt in flames; so that Maurice was seized with amazement and awe, and was terrified at the sight. Gregory, the archbishop of the city, who was standing by, said that it was a divine manifestation, betokening to him the highest fortune.

Christ our God also appeared to him, when in the East, calling upon him to avenge Him: which circumstance distinctly intimated the possession of sovereign power; for of what other person would He have made the demand than of an emperor, and one who manifested so much piety towards Him?

His parents also detailed to me circumstance's remarkable and worthy of being recorded, when I was making inquiries on this point: for his father said that, about the time of his conception, he had seen in a dream a very large vine growing from his bed, on which hung great numbers of beautiful clusters of grapes : and his mother told me that, at the time of her delivery, the earth sent forth a strange odour of peculiar sweetness; and that Empusa, as she is called, had often carried off the child for the purpose of devouring him, but had been unable to injure him.

Simeon, too, who practised the station upon the pillar in the neighbourhood of Theopolis, a most energetic man, and distinguished by every divine virtue, both said and did many things which betokened his succession to the empire. The sequel of the history will relate respecting him whatever circumstances are suitable.

EVAGRIUS HISTORY CHAPTER 22

Accession Of Maurice. [582 AD.]

Maurice assumes the sovereignty, when Tiberius was at the point of death, and had bestowed upon him his daughter Augusta, and the empire as her dowry. Notwithstanding the shortness of his reign, Tiberius left behind him an immortal memorial in the remembrance of his good deeds; for he bequeathed to the commonwealth, in the appointment of Maurice, an inheritance, not admitting of specification in terms, but most precious. He also distributed his own appellations, giving to Maurice the name of Tiberius, and to Augusta that of Constantina. The transactions of their reign the sequel of the history will set forth, with the aid of the divine impulse.

EVAGRIUS HISTORY CHAPTER 23 Chronological Statement.

In order also to an accurate account of the various periods of time, be it known that Justin the younger, reigned alone twelve years, ten months and a half, and in conjunction with Tiberius, three years and eleven months: so that the whole period is sixteen years, nine months and a half. Tiberius also reigned four years alone : so that the whole time from Romulus to the proclamation of Maurice Tiberius, amounts to ... years, as appears from the previous and present dates.

EVAGRIUS HISTORY CHAPTER 24

Succession Of Writers On Sacred And Profane History. By the aid of God, an account of the affairs of the Church, presenting a fair survey of the whole, has been preserved for us in what has been recorded by Eusebius Pamphili down to the time of Constantine, and thence forward as far as Theodosius the younger, by Theodoret, Sozomen, and Socrates, and in the matters which have been selected for my present work.

Primitive and profane history has been also preserved in a continuous narrative by those who have been zealous at the task; Moses being the first to compose history, as has been clearly shewn by those who have collected whatever bears upon the subject, in writing a true account of events from the beginning of the world, derived from what he learned in converse with God on Mount Sinai. Then follow the accounts which those who after him prepared the way for our religion have stored up in sacred scriptures. Josephus also composed an extensive history, in every way valuable. All the stories, whether fabulous or true, relating to the contests of the Greeks and ancient barbarians, both among themselves and against each other, and whatever else had been achieved since the period at which they record the first existence of mankind, have been written by Charax, Theopompus, Ephorus, and others too numerous to mention. The transactions of the Romans, embracing the history of the whole world and whatever else took place either with respect to their intestine divisions or their proceedings towards other nations, have been treated of by Dionysius of Halicarnassus, who has brought down his account from the times of what are called the Aborigines, to those of Pyrrhus of Epirus. The history is then taken up by Polybius of Megalopolis, who brings it down to the capture of Carthage. All these materials Appian has portioned out by a clear arrangement, separately grouping each series of transactions, though occurring at intervals of time. What events occurred subsequent to the before-mentioned periods, have been treated by Diodorus Siculus, as far as the time of Julius Caesar, and by Dion Cassius, who continued his account as far as Antoninus of Emesa. In a similar work of Herodian, the account extends as far as the death of Maximus; and in that of Nicostratus, the sophist of Trapezus, from Philip, the successor of Gordian, to Odenatus of Palmyra, and the ignominious expedition of Valerian against the Persians. Dexippus has also written at great length on the same subject, commencing with the Scythian wars, and terminating with the reign of Claudius, the successor of Gallierius: and he also included the military transactions of the Carpi and other barbarian tribes, in Greece, Thrace, and Ionia. Eusebius too, commencing from Octavian, Trajan, and Marcus, brought his account down to the death of Carus. The history of the same times has been partially written both by Arrian and Asinius Ouadratus: that of the succeeding period by Zosimus, as far as Honorius and Arcadius: and events subsequent to their reign by Priscus the Rhetorician, and others. The whole of this range of history has been excellently epitomised by Eustathius of Epiphania, in two volumes, one extending to the capture of Troy, the other to the twelfth year of the reign of Anastasius. The occurrences subsequent to that period have been written by Procopius the rhetorician as far as the time of Justinian ; and the account has been thenceforward continued by Agathias the rhetorician, and John, my fellow-citizen and kinsman, as far as the flight of Chosroes the younger to the Romans, and his restoration to his kingdom: on which occasion Maurice was by no means tardy in his operations, but royally entertained the fugitive, and with the utmost speed restored him to his kingdom, at great cost and with numerous forces. These writers, however, have not yet published their history. With respect to these events, I also will detail in the sequel such matters as are suitable, with the favour of the higher power.

THE END OF THE FIFTH BOOK.

THE SIXTH BOOK.

EVAGRIUS HISTORY CHAPTER 1 Nuptials Of Maurice And Augusta.

Maurice, on succeeding to the empire, in the first place made the necessary arrangements for his nuptials, and, in

accordance with the imperial ordinance, marries Augusta, named also Constantina, with magnificent ceremony, and with public banquetings and festivity in every part of the city. In attendance on the nuptials were Religion and Royalty, offering an escort most distinguished and gifts most precious. For the one supplied a father and mother, to hallow the rite

THE GRAND BIBLE

with honoured locks of grey and venerable wrinkles- a circumstance strange in the story of sovereigns-as also brethren noble and blooming, to give dignity to the nuptial procession: the other, a gold embroidered robe, adorned with purple and Indian gems, and crowns most costly, with abundance of gold and the varied emblazonment of jewels; together with the attendance of all who were distinguished in courtly rank or military service, lighting the nuptial flambeaux in splendid costumes and investitures, and hymning the bridal cavalcade: so that no human display was ever more majestic and happy. Damophilus, when writing on the subject of Rome, says that Plutarch the Chaeronean has well remarked, that in order to her greatness alone did Virtue and Fortune unite in friendly truce: but, for myself, I would say, that in respect of Maurice alone did Piety and Good Fortune so conspire; by Piety laying compulsion upon Fortune, and not permitting her to shift at all. It was henceforward the settled aim of the emperor to wear the purple and the diadem not merely on his person but also on his soul: for he alone of recent sovereigns was sovereign of himself; and, with authority most truly centred in himself, he banished from his own soul the mob-rule of the passions, and having established an aristocracy in his own reasonings, he shewed himself a living image of virtue, training his subjects to imitation. Nor have I said this by way of flattery: for how could such be my motive, since he is not acquainted with what is being written? That such was, however, the case with Maurice, will be evidenced by the gifts bestowed upon him by God, and the circumstances of various kinds that must unquestionably be referred to divine favour.

EVAGRIUS HISTORY CHAPTER 2 Alamundarus The Arab And His Son Naamanes.

Besides his other noble purposes, this was an especial object with the emperor, to avoid in every case the shedding of the blood of persons guilty of treason. Accordingly, he did not put to death Alamundarus, chieftain of the Scenite Arabs, who had betrayed both the commonwealth and Maurice himself, as I have already detailed; but sentenced him to deportation to an island with his wife and some of his children, and appointed Sicily as the place of his banishment. Naamanes his son, notwithstanding a unanimous sentence of death, he detained as a prisoner at large, without any further infliction; although he had filled the empire with endless mischiefs, and, by the hands of his followers, had plundered either Phoenicia and Palestine, and enslaved the inhabitants, at the time when Alamundarus was captured. He pursued the same course in innumerable other cases, which shall be severally noticed in their places.

EVAGRIUS HISTORY CHAPTER 3

Military Operations Of John And Philippicus. [589 AD.] Maurice sent out as commander of the forces of the East, first, John, a Scythian, who, after experiencing some reverses, with some alternations of success, achieved nothing worthy of mention; afterwards, Philippicus, who was allied to him by having married one of his two sisters. Having crossed the border and laid waste all before him, he amassed great booty, and killed many of the nobles of Nisibis and the other cities situated within the Tigris. He also gave battle to the Persians, and, after a severe conflict, attended with the loss of many distinguished men on the side of the enemy, he made numerous prisoners, and dismissed unharmed a battalion, which had retreated to an eminence and was fairly in his power, under a promise that they would urge their sovereign to send immediate proposals for peace. He also completed other measures during the continuance of his command, namely, in withdrawing his troops from superfluities and things tending to luxury, and in reducing them to discipline and subordination: the representation of which transactions must be fixed by writers, past or present, according as they may be or have been circumstanced with respect to hearsay or opinion- writers whose narrative, stumbling and limping through ignorance, or rendered affected by partiality, or blinded by antipathy, misses the mark of truth.

EVAGRIUS HISTORY CHAPTER 4 Mutiny Of The Troops Against Priscus.

He is succeeded in the command by Priscus, a person difficult of access, and not readily approached without necessary occasion, who expected the successful accomplishment of all his measures if he should maintain an almost entire seclusion; from a notion, that, through the awe thence resulting, the soldiery also would be more obedient to orders. Accordingly, on his arrival at the camp with stern and haughty look and in imposing costume, he issued certain orders, relating to the hardihood of the soldiery in the field, to strictness in respect of their arms and to their allowances. Having received previous intimation of the proceeding, they then gave unrestrained vent to their rage; and advancing in a body to the general's quarters, they pillage, in barbarian fashion, all his magnificence and the most valuable of his treasures, and would inevitably have despatched Priscus himself, had he not mounted one of the led horses. and escaped to Edessa : to which place they laid siege, demanding his surrender.

EVAGRIUS HISTORY CHAPTER 5

Compulsory Elevation Of Germanus. [587 AD.]

On the refusal of their demands by the citizens, they leave Priscus there, and seizing Germanus, who at that time held the command in Phoenicia Libanensis, they elect him their own general and emperor, while he resisted and they were the more urgent; and a struggle thus arose, on the part of the one to escape compulsion, of the others to enforce their object. After they had menaced him with death unless he would embrace the offered charge, and he, on his part, eagerly embraced the alternative, disclaiming all fear and consternation, they proceeded to certain severities and methods of cruelty, which they thought he would not be able to bear; for they did not suppose that he would manifest greater endurance than the strength of nature and his time of life would warrant. By putting him to the trial at first cautiously and sparingly, they succeed in forcing him to accede to their demands, and solemnly to swear that he would be true to them. Thus they compelled him to be their ruler under rule, their subject sovereign, their master in thraldom. Then chasing from them the officers of every grade, they elect others in their place, openly reviling the imperial government. They treated provincials on the whole less harshly than the barbarians did, but in a manner very unlike allies or servants of the commonwealth: for they levied their provisions not according to stated measures or weight, and were not contented with the quarters assigned to them: but the will of each individual was a rule, and his caprice an established measure

EVAGRIUS HISTORY CHAPTER 6

Mission Of Philippicus.

The emperor despatches Philippicus to settle this ferment: they, however, not only denied him reception, but perilled the lives of all whom they supposed to be connected with him.

EVAGRIUS HISTORY CHAPTER 7

Accusations Against Gregory, Patriarch Of Antioch. While matters were in this situation, Gregory, bishop of Theopolis, returns from the imperial city, after having been victorious in the struggle which I now proceed to detail.

At the time when Asterius held the government of the East, a quarrel had arisen between him and Gregory: the higher ranks of the city sided entirely with the former, and were supported by the populace, and by those who were engaged in trades: for each class declared that they had been injured by Gregory; until at last license was given to the rabble to vent their abuse against him. Thus both the other classes accorded with the populace, and they clamoured forth their insults against the prelate in the streets and the theatre; and even the actors indulged in them. Asterius is removed from his government, and John is invested with it, with orders from the emperor to make inquiry into the stir; a man incompetent to the management of the most trifling matters, much less a business so important. Having, in consequence, filled the city with confusion and uproar, and given public license to any one that chose, to accuse the bishop, he receives a formal charge against him from a certain banker, to the effect that he had had criminal intercourse with his own sister, married to another man. He also receives accusations from other persons of the same stamp against Gregory, as having repeatedly disturbed the peace of the city. On the latter charge he declared his readiness to make his defence: with respect to the others, he appealed to the emperor and a synod. Accordingly, he repaired to the imperial city, to make answer to these charges, accompanied by myself as his adviser, and is victorious after a prolonged struggle during an investigation of the matter before the patriarchs from every quarter, who appeared either in person or by deputy, as well as the sacred senate, and many most religious metropolitans: and the result was that the accuser, after having been scourged and paraded round the city, was sent into exile. Gregory thence returns to his see, at the time when the troops were in a state of mutiny, and Philippicus was remaining in the neighbourhood of Beroea and Chalcis.

EVAGRIUS HISTORY CHAPTER 8

Recurrence Of Earthquakes At Antioch. [589 AD.]

At an interval of four months from the return of Gregory, in the six hundred and thirty-seventh year of the era of Theopolis, sixty-one years after the former earthquake, a crash and concussion shook the entire city, about the third hour of the night, on the last day of the month Hyperbereateus, at the time when I was celebrating my marriage with a young maiden, and the whole city was making rejoicings and holding a festival at the public cost, in honour of the nuptial ceremony. This convulsion levelled by far the greater part of the buildings, their very foundations being cast up by it, and all the portions of the most holy church were thrown to the ground, with the exception of the hemisphere, which, after its injury by the earthquake in the

time of Justin, had been secured by Ephraemius with timbers from Daphne. By the subsequent shocks, it received an inclination in a northerly direction; so that the timbers were thrown by it into a leaning position, and fell, when the hemisphere had returned, by the force of the shock, exactly into its original situation, as if it had been adjusted by a rule. Nearly the entire quarter named Ostracine was ruined, and Psephium. of which I have made previous mention, as well as all the parts called Brysia, and the buildings of the venerable sanctuary of the Mother of God, with the sole exception of the central colonnade, which was singularly preserved. All the towers of the plain were also damaged, though the other buildings in that quarter escaped, with the exception of the battlements, of which some stones were thrown backwards. though they did not fall. Other churches also suffered injury. and one of the public baths, namely, that which had separate divisions according to the seasons. An incalculable number of persons were involved in the destruction, and, according to an estimate which some persons drew from the supply of bread, about sixty thousand perished. The bishop experienced a most unexpected preservation in the midst of the fall of the entire habitation where he then was, and the destruction of every individual except those who were near his person. These took up the bishop in their arms, and lowered him by a cord, after a second shock had rent an opening, and thus they removed him beyond the reach of danger. Another preservation was

also granted to the city, our compassionate God having mitigated the keenness of His threatened vengeance, and corrected our sin with the branch of pity and mercy: for no conflagration followed, though so many fires were spread about the place, in hearths, public and private lamps, kitchens, furnaces, baths, and innumerable other forms. Very many persons of distinction, and among them Asterius himself, became the victims of the calamity. The emperor endeavoured to alleviate this visitation by grants of money.

EVAGRIUS HISTORY CHAPTER 9

Inroad And Destruction Of The Barbarians.

In the army, matters continued in the same state; and, in consequence, the barbarians made an inroad, in the expectation that there would be no one to check them in the exercise of barbarian practices. Germanus, however, encounters them with his forces, and inflicted a defeat so destructive, that not a man was left to convey to the Persians tidings of the misfortune.

EVAGRIUS HISTORY CHAPTER 10

Clemency Of The Emperor Towards The Rebels. Invasion Of The Avars. [590 AD.]

Accordingly, the emperor remunerates the troops with largesses of money; and, withdrawing Germanus and others, brings them to trial. They were all condemned to death: but the emperor would not permit any infliction whatever; on the contrary, he bestowed rewards on them.

During the course of these transactions, the Avars twice made an inroad as far as the Long Wall, and captured Anchialus, Singidunum, and many towns and fortresses throughout the whole of Greece, enslaving the inhabitants, and laying every thing waste with fire and sword; in consequence of the greater part of the forces being engaged in the East. Accordingly, the emperor sends Andrew, the first of the imperial guards, on an attempt to induce the troops to receive their former officers.

EVAGRIUS HISTORY CHAPTER 11

Mission Of The Patriarch Gregory To The Troops. Since, however, the troops would not endure the bare mention of the proposal, the business is transferred to Gregory, not only as being a person competent to the execution of the most important measures, but because he had earned the highest regard from the soldiery; since some of them had received presents from him in money, others in clothing, provisions, and other things, when they were passing his neighbourhood at the time of their enlistment. Accordingly, he assembles, by summons despatched to every quarter, the principal persons of the army at Litarba, a place distant from Theopolis about three hundred stadia; and, though confined to his couch, addressed them in person, in the following words.

EVAGRIUS HISTORY CHAPTER 12 Oration Of Gregory To The Troops. [590 AD.]

"I Have been expecting, O Romans—Romans both in name and deeds—that your visit to me would have been made long ago, for the purpose of communicating to me your present circumstances, and of receiving that friendly counsel of which you have an assurance in my kindliness towards you, so unequivocally evinced by past occurrences, at the time when I relieved, by a supply of necessaries, your tempest-struck and wave-tost plight. Since, however, this course has not hitherto been taken—it may be that Providence has not permitted it, in order that the Persians, having been utterly defeated by men without a leader, might be thereby thoroughly taught

the prowess of the Romans, and that your pure loyalty might be completely proved, in having been tested by the juncture and testified by your deeds; for you shewed that, notwithstanding your quarrel with your officers, you do not regard any thing as more important than the good of the commonwealth-let us accordingly now deliberate what ought to be your conduct. Your sovereign invites you with a promise of an amnesty of all past transactions, receiving the display of your lovalty to the commonwealth and your prowess in the field as emblems of supplication. While bestowing upon you these most certain pledges of pardon the emperor thus speaks: 'Since God has given victory to their loyalty, and, on the abandonment of their errors, a signal display has been granted to their prowess as a clear intimation of forgiveness, how can I do otherwise than follow the judgment of heaven? A king's heart is in the hand of God, and He sways it whithersoever He will.' Yield, therefore, to me at once, O Romans. Let us not wilfully forfeit the present opportunity, nor allow it to elude our grasp: for opportunity, when it has once slipped from us, is most unwilling to be seized, and, as if it were indignant at having been neglected, is ever after intolerant of capture. Shew yourselves the heirs of the obedience of your fathers, as ye are of their courage; in order that ye may appear altogether Romans, and no taunt may touch you or point at you as degenerate. Your fathers, under the command of consuls and emperors, by obedience and courage became masters of the whole world. Manlius Torquatus, though he crowned, yet also put to death his son, who had placed a valiant part but in disobedience of orders. For by skill on the part of the leaders, combined with obedience in those whom they lead, great successes are ordinarily achieved; but either, when bereaved of the other, is lame and unsteady, and is utterly overthrown by the separation of the excellent pair. Be not, therefore, tardy, but at once obey my call, while the priestly office mediates between the emperor and the army; and shew that your proceedings were not the establishment of a rival sovereign, but a transient display of just indignation against commanders who had wronged you: for unless you immediately embrace the offer, I shall at once consider myself as quit of the service laid upon me in this matter by my duty to the commonwealth and my regard for you. Consider too yourselves, what has been the fate of pretenders to the sovereignty. What too will be the termination of your present position? To continue concentrated is impossible: for whence will you derive your provision of ordinary fruits, or those supplies which the sea furnishes to the land, except by war between Christians and the mutual infliction of the most disgraceful treatment? What too will be the final result? You will live in dispersion, and haunted by Justice, who will henceforward disdain to bestow forgiveness. Let us therefore give pledges of amity, and consider what course will be for the benefit of ourselves and the state, at a time too when we shall have the days of the saving Passion and of the most holy Resurrection conspiring with the deed.'

EVAGRIUS HISTORY CHAPTER 13

Submission Of The Troops.

Having thus addressed them, accompanying his speech with many tears, he wrought an instantaneous change in the minds of all, as it had been by some divine impulse. They immediately requested permission to retire from the meeting, and to deliberate among themselves respecting the course to be pursued. After a short interval they returned, and placed themselves at the disposal of the bishop. However, on his naming Philippicus to them, in order that they might themselves request him for a commander, they declared that the whole army had on this point bound themselves with fearful oaths: but the bishop, undeterred by this, without the least delay said, that he was a bishop by divine permission, and had authority to loose and bind both upon earth and in heaven, and at the same time he quoted the sacred oracle. On their yielding upon this point also, he propitiated the Deity with supplication and prayers, at the same time administering to them, the communion of the immaculate body: for it happened to be the second day of the holy passion week. After he had feasted them all, to the number of two thousand, upon couches hastily constructed on the turf, he returned home the following day. It was also agreed that the soldiers should assemble wherever they might choose. Gregory in consequence sends for Philippicus, who at that time was at Tarsus in Cilicia, intending to proceed immediately to the imperial city; and he also reports these proceedings to the government, communicating at the same time the prayer of the soldiery respecting Philippicus. Accordingly, they meet Philippicus at Theopolis, and employing those who had been admitted to partake in the divine regeneration, to entreat for them, they bend in supplication before him, and, on receiving a solemn promise of amnesty, they return to their duty with him. Such was the progress of these events.

EVAGRIUS HISTORY CHAPTER 14

Loss Of Martyropolis. [590 AD.]

A Certain Sittas, one of the petty officers stationed at Martyropolis, considering himself aggrieved by the commanders in that place, betrays the city, by watching the withdrawal of the troops which occupied it, and introducing a Persian battalion under colour of being Romans. He thus obtained possession of a place which was most important to the Romans; and, retaining most of the younger females, expelled all the other inhabitants, except a few domestic slaves.

Philippicus in consequence marched thither, and beleaguered the city, without being provided with things necessary for the siege. Nevertheless, he maintained his operations with such means as he possessed, and, having run several mines, threw down one of the towers. He was unable, however, to make himself master of the place, because the Persians continued their exertions through the night, and secured the breach. When the Romans, repeatedly assaulting, were as often repulsed, for the missiles were hurled upon them from vantage ground with unerring aim, and since they were suffering greater loss than they inflicted, they at last raised the siege, and encamped at a short distance, with the sole object of preventing the Persians from reinforcing the garrison. By the order of Maurice, Gregory visits the camp, and induces them to resume the siege. They were, however, unable to accomplish any thing, from their utter want of engines for sieges. In consequence, the army breaks up for winter quarters, and numerous garrisons are left in the neighbouring forts, to prevent the Persians from secretly introducing succours into the place.

In the succeeding summer, on the re-assembling of the army, and the advance of the Persians, a severely contested battle is fought before Martyropolis. Though the advantage was on the side of Philippicus, and many Persians had fallen, with the loss of one distinguished chieftain, a considerable body of the enemy made their way into the city: which was in fact their main object. Thenceforward the Romans gave up the siege in despair, as being unable to encounter this force, and they erect a rival city at the distance of seven stadia, in a stronger situation on the mountains, in order to the carrying on of counter operations. Such were the proceedings of the army during the summer; it broke up on the approach of winter.

EVAGRIUS HISTORY CHAPTER 15 Capture Of Ocbas.

Comentiolus, a Thracian by birth, is sent out as a successor in the command to Philippicus. He engaged the Persians with great spirit, and would have lost his life by being thrown to the ground together with his horse, had not one of the guards mounted him upon a led horse, and conveyed him out of the battle. In consequence, the enemy fly with precipitation, with the loss of all their commanders, and retire to Nisibis; and, fearing to return to their king, since he had threatened them with death unless they should bring off their commanders in safety, they there enter into the insurrection against Hormisdas, now that Varamus, the Persian general, had already entertained that design with his party on his return from his encounter with the Turks. In the meantime, Comentiolus, having commenced the siege of Martyropolls, leaves there the greater part of his army, and himself makes an excursion with a chosen body of troops to Ocbas, a very strong fortress, situated on a precipice on the bank opposite to Martyropolis, and commanding a view of the whole of that city. Having employed every effort in the siege, and thrown down some portion of the wall by catapults, he takes the place by storming the breach. In consequence, the Persians thenceforward despaired of keeping possession of Martyropolis.

EVAGRIUS HISTORY CHAPTER 16 Murder Of Hormisdas. [591 AD.]

While such was the course of these events, the Persians despatched Hormisdas, the most unjust of all monarchs, in as far as he inflicted upon his subjects not only pecuniary exactions, but also various modes of death.

EVAGRIUS HISTORY CHAPTER 17

Flight Of Chosroes The Younger.

They establish as his successor his son Chosroes, against whom Varamus advanced with his troops. Chosroes encounters him with an inconsiderable force, and takes to flight on seeing his own men deserting him. He arrives at Circesium, having, according to his own account, vowed to the God of the Christians, that he would allow his horse to take its course wherever it should be guided by Him. He was accompanied by his wives and two newly-born children, and certain Persian nobles who voluntarily followed him. Thence he sends an embassy to the emperor Maurice; who, manifesting on this occasion too the soundest judgment, and deriving from the very circumstances an estimate of the instability and mutability of life, and the sudden fluctuations of human affairs, admits his suit, and treats him as a guest instead of an exile, and as a son instead of a fugitive, welcoming him with royal gifts, which were sent not only by the emperor himself, but, in similar style, by the empress to the consorts of Chosroes, and also by their children to the children.

EVAGRIUS HISTORY CHAPTER 18

Mission Of Gregory And Domitian To Meet Chosroes.

The emperor also despatches the whole of his body guards and the entire Roman army with their commander, with orders to attend Chosroes wherever he might choose to proceed: and by way of still greater distinction, he also sends Domitian, bishop of Melitene, his own kinsman, a man of sense and ability, most capable both in word and deed, and most efficient for the despatch of the highest transactions. He sends Gregory too: who on all points filled Chosroes with amazement, by his conversation, by his munificence, and by his suggestion of seasonable measures.

EVAGRIUS HISTORY CHAPTER 19

Restoration Of Chosroes. [591 AD.]

Chosroes, having proceeded as far as Hierapolis, the capital of Euphratensis, immediately returned: and this was done with the consent of Maurice, who favoured the interest of his suppliant more than his own glory. He also presents Chosroes with a large sum of money, a circumstance never before recorded; and having raised a body of Persians, and supplied the cost from his own means, he sends him across the border with a combined force of Romans and Persians, after Martyropolis had been previously surrendered, together with the traitor Sittas; whom the inhabitants stoned and impaled. Daras was also recovered on its evacuation by the Persian garrison, and Chosroes was restored to his kingdom in consequence of the utter overthrow of Varamus, in a single engagement with the Roman troops only, and his inglorious and solitary flight.

EVAGRIUS HISTORY CHAPTER 20

Golanduch The Martyr.

At that time there was living in our country Golanduch, a female martyr, who maintained her testimony through a course of severe sufferings when tortured by the Persian Magi, and was a worker of extraordinary miracles. Her life was written by Stephen, the former bishop of Hierapolis.

EVAGRIUS HISTORY CHAPTER 21

Offerings Of Chosroes.

Chosroes, on his restoration to his kingdom, sends to Gregory a cross, embellished with much gold and precious stones, in honour of the victorious martyr Sergius; which cross Theodora, the wife of Justinian, had dedicated, and Chosroes had carried off, with the other treasures, as I have already related. He also sends another golden cross, on which was engraven the following inscription in Greek:—

'This cross I, Chosroes, king of kings, son of Hormisdas, have sent. After I had been compelled to take refuge in the Roman territory by the slanderous practices and villany of the unhappy Varamus and his cavalry, and when, because the unhappy Zadespram had come to Nisibis with an army, with a view to seduce the cavalry in that quarter to revolt and raise commotion, we also had sent a body of cavalry with a commander to Charchas; at that time, by the fortune of the venerable and renowned saint, Sergius, having heard that he granted the petitions addressed to him, we vowed, in the first year of our reign, on the seventh day of January, that if our cavalry should slay or capture Zadespram, we would send to his sanctuary a golden cross, embellished with jewels for the sake of his venerable name: and on the seventh day of February they brought to us the head of Zadespram. Having, accordingly, obtained our petition, in order that each circumstance should be placed beyond all doubt, we have sent, in honour of his venerable name, this cross, which we have caused to be made, and together with it that which was sent to his sanctuary by Justinian, emperor of the Romans, and which was conveyed hither by our father Chosroes, king of kings. son of Cabades, at the time of the rupture between the two states, and has been found among our treasures.

Gregory, having received these crosses, with the approval of the emperor Maurice, dedicated them with much ceremony in the sanctuary of the martyr. Shortly after, Chosroes sent other offerings for the same temple, with a golden disc, bearing the following inscription:—

"I, Chosroes, king of kings, son of Hormisdas, have placed the inscription upon this disc, not as an object for the gaze of mankind, nor that the greatness of thy venerable name might be made known by words of mine, but on account of the truth of the matters therein recorded, and the many benefits and favours which I have received at thy hands: for, that my name should be inscribed on thy sacred vessels, is a happiness to me. At the time when I was at Beramais, I begged of thee, O holy one, that thou wouldest come to my aid, and that Sira might conceive: and inasmuch as Sira was a Christian and I a heathen, and our law forbids us to have a Christian wife, nevertheless, on account of my favourable feelings towards thee, I disregarded the law as respects her, and among my

wives I have constantly esteemed, and do still esteem her as peculiarly mine. Thus I resolved to request of thy goodness. O Saint, that she might conceive: and I made the request with a vow, that, if Sira should conceive, I would send the cross she wears to thy venerable sanctuary. On this account both I and Sira purposed to retain this cross in memory of thy name, O Saint, and in place of it to send five thousand staters, as its value, which does not really exceed four thousand four hundred staters. From the time that I conceived this request and these intentions, until I reached Rhosochosron, not more than ten days elapsed, when thou, O Saint, not on account of my worthiness but thy kindness, appearedst to me in a vision of the night and didst thrice tell me that Sira should conceive, while, in the same vision, thrice I replied, It is well. From that day forward Sira has not experienced the custom of women. because thou art the granter of requests; though I, had I not believed thy words, and that thou art holy and the granter of requests, should have doubted that she would not thenceforward experience the custom of women. From this circumstance I was convinced of the power of the vision and the truth of thy words, and accordingly forthwith sent the same cross and its value to thy venerable sanctuary, with directions that out of that sum should be made a disc, and a cup for the purposes of the divine mysteries, as also a cross to be fixed upon the holy table, and a censer, all of gold: also a Hunnish veil adorned with gold. Let the surplus of the sum belong to thy sanctuary, in order that by virtue of thy fortune, O saint, thou mayest come to the aid of me and Sira in all matters, and especially with respect to this petition; and that what has been already procured for us by thy intercession, may be consummated according to the compassion of thy goodness, and the desire of me and Sira; so that both of us, and all persons in the world, may trust in thy power and continue to believe in thee."

Such is the language of the offerings sent by Chosroes: an instance altogether resembling the prophecy of Balaam; since our compassionate God has wisely disposed it, that the tongues of heathens should give utterance to saving words.

EVAGRIUS HISTORY CHAPTER 22

Naamanes The Arab.

At the same time Naamanes, chieftain of the Scenites, after having been a detestable and vile heathen, to such an extent as to sacrifice with his own hand human beings to his gods, approached the sacred baptism. At which time he melted down a Venus of solid gold, and divided it among the poor, and also brought over all his followers to the service of God.

Gregory too, after the presentation of the crosses of Chosroes, while making, with the approbation of the government, a visitation of the solitudes on the borders, where the doctrines of Severus extensively prevailed, brought into union with the Church of God many garrisons, villages, monastreise, and entire tribes.

EVAGRIUS HISTORY CHAPTER 23 Simeon The Stylite The Younger.

At this time, when the sainted Simeon was afflicted with a mortal disease, Gregory, on being informed by me of the circumstance, hastens to salute him for the last time, but was nevertheless disappointed. This Simeon far surpassed all his contemporaries in virtue, and endured the discipline of a life on the top of a column from his earliest years, since he even cast his teeth in that situation. The occasion on which he was first elevated on the column, was the following. While still very young, he was roving about, sporting and bounding along the eminences of the mountain, and meeting with a panther, he throws his girdle round its neck, and with this kind of halter led the beast, beguiled of its ferocity, to his monastery. His preceptor, who himself occupied a column, observing the circumstance, enquired what he had got; to which he replied, that it was a cat. Conjecturing from this occurrence how distinguished the child would be for virtue, he took him up upon the column; and on this column, and on another, towering above the summit of the mountain, he spent sixty-eight years; earning thereby the highest gifts of grace, in respect of the ejection of demons, the healing of every disease and malady, and the foresight of future things as if they were present.

He also foretold to Gregory that the latter would not witness his death, but said that he was ignorant of the events which should follow it.

On occasion also of my ponderings on the loss of my children, when I was perplexed with the suggestion, why such things did not befall heathens who had numerous offspring; although I had not disclosed, my thoughts to any one, he wrote advising me to abandon such ideas as being displeasing to God.

In the case of the wife of one of my amanuenses, when the milk would not flow after child-birth, and the child was in extreme danger, laying his hand upon the right hand of her husband, he bid him place it upon the breasts of his wife. When this was done, immediately the milk started, as if from a fountain, so as to saturate her dress. A child having been forgotten at dead of night by its fellowtravellers, a lion took it on its back, and conveyed it to the monastery; when, by orders of Simeon, the servants went out and brought in the child under the protection of the lion.

Many other actions he performed, surpassing every thing that has been recorded; which demand of an historian elegance of language, leisure, and a separate treatise, being renowned by the tongues of mankind; for persons came to visit him from almost every part of the earth, not only Romans but barbarians, and obtained the object of their prayers. In his case, the place of food and drink was supplied by the branches of a shrub which grew upon the mountain.

EVAGRIUS HISTORY CHAPTER 24

Death Of The Patriarch Gregory. [594 AD.]

Shortly after, Gregory also dies, after taking a draught of medicine composed of what is called Hermodactylus, administered by one of the physicians during a fit of gout; a disease with which he was much afflicted. At the time of his death, Gregory, the successor of Pelagius, was bishop of Old Rome, and John of New Rome; Eulogius, one of those whom I have already mentioned, of Alexandria; and Anastasius was restored, after three and twenty years, to the see of Theopolis. John was bishop of Jerusalem; since whose decease, which occurred shortly after, no one has hitherto been entrusted with that see.

Here let me close my history, in the twelfth year of the reign of Maurice Tiberius, leaving the task of selecting and recording succeeding events to those who choose to undertake it. If any matter has been overlooked by me or has been treated without sufficient accuracy, let no one blame me, considering that I have brought together scattered materials in order to the benefit of mankind; for whose sake I have submitted to so much toil.

I have also compiled another volume, containing memorials, epistles, decrees, orations, and disputations, and some other matters. The memorials were principally composed in the name of Gregory, bishop of Theopolis; and by means of them I obtained two dignities, Tiberius Constantine having conferred upon me quaestorian rank, and Maurice Tiberius that of prefecture, in consideration of what I composed at the time when he rid the empire of reproach in becoming the father of Theodosius, an earnest of all prosperity both to himself and the commonwealth. THE END.

SEBEOS' HISTORY

An Armenian History of the 7th-century AD Matenadaran Manuscript 2639, dated 1672 Translation: Robert Bedrosian, 1985 Estimated Range of Dating: 590-630 A.D.

(Sebeos' History is a 7th century document of special importance for the study of Armenia and the Middle East in the sixth-seventh centuries. It was during this period, when the Persian Empire and the Roman Empire were wrestling for control of the Armenian highlands, that Armenian culture became more individual, independent, and distinctively national. While Sebeos focuses his attention primarily on Armenia's lay and clerical naxarars (lords), he also provides extensive and valuable information on events taking place in the neighbouring societies of the Romans, the Persians, and among the Arabs.

This history acount is important for a couple of reasons. It narrates the struggle between the Roman Empire and the Persian Empire of the Sassanid Dynasty, the weakening of these two adversaries, and the subsequential destruction of them by a third power we know as Islam. Significant is this account also because it gives quite a lively report on the Roman emperor Flavius Heraclius who tried to defend the Roman Empire with some success against the Persians and the Mohammedans. In some ways, we can see it as supplement to Evagrius' account, and also to the account narrated by the Armenian historian Thomas Artsruni from a later point of view in which he describes in shocking details how the Armenian nation has been subjugated by Islam like so many other nations.

The history attributed to Sebeos has survived in a single late manuscript, Matenadaran 2639 (dated 1672). It was the last in a series of texts, constituting a virtual canon of historical writing, brought together in this famous manuscript. A second, older manuscript (dated 1568) was known and used for the first edition published in 1851, but it has since been lost.

Sebeos' account is significant for Armenians as Heraclius the Elder was possibly of Armenian origin and presumably bilingual (Armenian and Greek) at an early age. As most Persian documents have been destroyed by the Muslim invaders, Sebeos' documents are also of the utmost importance in the history of Iran, and casts light on several facets of its institutions and political culture.

Who Sebeos was is not clear He has left only a few clues to his identity. His writing is infused with biblical language and allusions. His inclusion of the full text of the defense of the Armenian church's Monophysite doctrinal stance (agreed at the Council of Dvin in 649) points to a strong interest in theology. He seems to have had access to the archives of the catholicosate at Dvin, since he includes the text of a fundraising letter sent from Jerusalem by Modestus. It is hard to escape the conclusion that a piece of autobiography, discreetly put in the third person, has been slipped into the history.

One name is outstanding in the accout of Sebeos [as well in those by Evagrius and Thomas Artsruni]: Flavius Heraclius the Roman emperor who destroyed the Sassanid Persian Empire and gave Islam by this deed the chance to rise.

Heraclius (c. 575–641 AD) was the Roman emperor from 610 to 641. His rise to power began in 608, when he and his father, Heraclius the Elder, the exarch of Africa, led a revolt against the unpopular usurper Phocas.

Heraclius's reign was marked by several military campaigns. The year Heraclius came to power, the empire was threatened on multiple frontiers. Heraclius immediately took charge of the Byzantine–Sasanian War of 602–628. The first battles of the campaign ended in defeat for the Romans; the Persian army fought their way to the Bosphorus but Constantinople was protected by impenetrable walls and a strong navy, and Heraclius was able to avoid total defeat. Soon after, he initiated reforms to rebuild and strengthen the military. Heraclius drove the Persians out of Asia Minor and pushed deep into their territory, defeating them decisively in 627 at the Battle of Nineveh. The Persian king Khosrow II was overthrown and executed by his son Kavad II, who soon sued for a peace treaty, agreeing to withdraw from all occupied territory. This way peaceful relations were restored to the two deeply strained empires.

Heraclius lost many of his newly regained lands to the Muslim conquests. Emerging from the Arabian Peninsula, the Muslims quickly conquered the Sassanid Empire. In 634 AD the Muslims marched into Roman Syria, defeating Heraclius's brother Theodore. Within a short period of time, the Arabs conquered Mesopotamia, Armenia and Egypt. Heraclius entered diplomatic relations with the Croats and Serbs in the Balkans. He tried to repair the schism in the Christian church in regard to the Monophysites, by promoting a compromise doctrine called Monothelitism. The Church of the East (commonly called Nestorian) was also involved in the process. Eventually this project of unity was rejected by all sides of the dispute.

The father of Eastern Roman emperor Heraclius (r. 610– 641 AD) was Heraclius the Elder (died 610 AD), a Roman general. As a (subordinate) brigadier general, Heraclius the Elder distinguished hinself in the war against the Sassanid Persians in the 580s. In circa 600, he was appointed as the Exarch of Africa and in 608, Heraclius the Elder rebelled with his son against the usurper Phocas (r. 602–610). Using North Africa as a base, the younger Heraclius managed to overthrow Phocas, beginning the Heraclian dynasty, which would rule the Roman Empire for a century. Heraclius the Elder died soon after receiving news of his son's accession to the Roman throne in Constaninople.

Not much is known of the specific ancestry of Heraclius the Elder but his Armenian origin is deduced by a passage of Theophylact Simocatta, which considers him a native of Roman Armenia. The passage is from Book 3 of Theophylact Simocatta's history: "And so Philippicus had learned during his journey that Priscus had been accredited as general by the emperor (Maurice); on reaching Tarsus he composed messages to Heraclius the Elder which indicated that, after leaving the army, he should return to his own city when he came to Armenia, and surrender the army to Narses, the commander of the city of Constantina (modern Viranshehir, a Turkish market town near the eastern half of the Turkish-Syrian border."

Heraclius the Elder is mentioned as the father of Emperor Flavius Heraclius in several sources, including Theophylaet, John of Nikiû, Nikephoros I, Theophanes, Agapius the historian, the Suda, Georgios Kedrenos, Joannes Zonaras, Michael the Syrian, the Chronicle of 1234 and Nikephoros Kallistos Xanthopoulos. Heraclius the Elder's own city is not specifically mentioned. He was at the time probably the "magister militum per Armeniam." If so, "his city" was Theodosiopolis (modern Erzurum), the headquarters of the Roman forces in Armenia.

The best attested sibling of Heraclius the Younger was arguably Theodore. In late 613, Theodore accompanied his brother in a campaign against the Sasanid Persians near Antioch. Theodore reappears in 626, when he was sent with part of Heraclius' army against the forces of the Persian general Shahin which Theodore had defeated decisively in northeastern Anatolia.

Historians will find factual and anecdotal information on the reigns of emperors Maurice (582-602), Theodosius (coemperor, 590-602), Phocas (602-610), Heraclius I (610-41) and his successors to Constans II (641-68), including their wars against Persia in the east and the Goths in the west. They will find information on officials such as the hamaharz, pustipan, marzpan, ostikan, Asparapet, patgospan, and hamarakar; and a wealth of information on the reigns of shahs Peroz (459-84), Valas (484-88), Kawad I (488-96; 498-531), Xosrov I Anushirvan (531-79), Hormizd IV (579-90), Xosrov II Aparvez (590; 591-628), Kawad II Sheroe (628), Artashir (628-29), queen Boran (630-31), and Yazdigerd III (632-51).

Sebeos' account of the rebellion of Vahram Choben and his description of the last days of the Sassanid dynasty have the authenticity of a contemporary. Sebeos [short form for Eusebios] mentions the Khazars of the north Caucasus, and the Kushans on Persia's northeastern border.

In addition, Sebeos provides unusual information on Jewish nationalism as the translator says. It appears to be unusual because most historians are not aware of the contents of the Dead Sea Scrolls from Qumran and that the ancient Jewish Messianic Movement [that wrote many of the scrolls] consequently has fought at least 10 major wars against the Romans up to the 7th century AD. That movement was laworiented, xenophobic and extremely nationalistic. Therefore they fought war against anybody who occupied the Holy Land, and they were also ready to carry their messianic war into the homeland of the "Sons of Darkness" in order to wipe out their civilisation. If that sounds familiar, then yes, this is also the doctrine of Islam which is particularly directed against any non-Muslims. The rise of Islam is also mentioned by Sebeos and it most likely originates from those messianic Jews who could withdraw after the wars into the Arabian deserts and cities such as Petra ("Maka in Paran" as that place was called by Thomas Artsruni) and Mada'in Saleh.

Regrettably, aside from canonical and hagiographical literature and a few inscriptions, there are no other Armenian historical sources for the period of the sixth-seventh centuries. As such, Sebeos' information on Armenia and the Armenians has particular importance. His account begins where the fifth century Ghazar P'arpets'i's History left off-with the rebellion of Vahan Mamikonean in the 480s. Unfortunately, the account then skips the early and middle parts of the sixth century, picking up again with the rebellion of Vardan II Mamikonean (572 AD) against Iran. Sebeos describes the separatist activities of the district of Siwnik' in eastern historical Armenia: Vahram Choben's efforts to enlist the aid of Mushegh Mamikonean, and Mushegh's role in Vahram's defeat; the alleged plan of the emperor Maurice and shah Xosrov to depopulate Armenia, and the rebellions this engendered. He especially concentrates on the reign of Maurice (582-602 AD), who was perhaps of Armenian descent and had a peculiar antipathy toward the Armenians. The late sixth and early seventh centuries were a period when the Armenian naxarars were strong and independent and prone to switching allegiance from Roman to Iran, or vice versa. Sebeos describes the careers of several such prominent lords as Smbat Bagratuni, his son Varaztirots', T'eodos Xorxoruni and others, some of whom became important officials in the two rival empires As a cleric Sebeos was particularly interested in religious matters. He describes the activity of Armenian kat' oghikoi; Roman attempts to force Chalcedonianism on the Armenians; Persian attempts to force Zoroastrianism on the Armenians; Christianity in Persia; and the spread of Islam.

The transliteration used here is a modification of the new Library of Congress [LOC] system for Armenian, substituting x for the LOC's kh, for the thirteenth character of the Armenian alphabet (μ). Otherwise we follow the LOC transliteration, which eliminates diacritical marks above or below a character, and substitutes single or double quotation marks to the character's right. In the LOC romanization, the seventh character of the alphabet (t) appears as e', the eighth (η) as e'', the twenty-eighth (n) as r', and the thirty-eighth (o), as o'.

The present translation by Robert Bedrosian, which was completed in 1979, was made from the classical Armenian edition of K. Patkanean [Patmut'iwn Sebeosi episkoposi i Herakln (St. Petersburg, 1879)]. Patkanean based his text on the earlier edition of T. Mihrdatian (Constantinople, 1851) and a manuscript at the Imperial Academy in St. Petersburg. Mihrdatian in turn had based his edition on an anonymous manuscript found in the library of Ejmiatsin in 1842 by bishop Yovhannes Shahxat'unian.)

Text: Prologue

At the time of the waning of the rule of the Arsacids in the land of Armenia [when] the rule of king Vramshapuh was done away with, there ruled over Armenia the people of the Kark'edovmayets'i principality. The latter, with the unity of the venemous, grandee mages and all the principal naxarars (lords) of the ruler's kingdom adopted an awesome and frightful plan: to eliminate the fruits of piety (Christianity) in the land of Armenia. But nothing availed the Persian king in his plan, rather, he was damaged. And Christian piety more than ever blossomed and sparkled.

Now others have written about all of the following events, as that very same History points out: regarding the days of

wicked [king] Yazkert's reign, how he wanted to destroy the divine orders (the clergy); how the brave naxaras of Armenia and the zealot of God, the nahapet Vardan called "Karmir" ("the Red") of the Mamikonean House with a brigade of armed comrades, their friends and troops organised and armed for war. They took in hand the shield of Faith and zeal for the divine Word clothed them like armor of security and truly before their very eyes you might say that they saw their halos descend to them. Thus did they scorn death, considering it better to die on the Divine Path. The History alluded to above also tells how the Persian troops came against them with severe violence and how, when they clashed the Vardaneank' received martyrdom and how the blessed wintesses of Christ who had been captured by the pagans underwent martyrdom at Apr Shahr, close to the city of Niwshapuh, at a place called Teark'uni.

But I wished to concisely write down and narrate to you [information] about all the following events: all the evil which transpired in Peroz' time; Vardan's rebellion against Xosrov; the rebellion of the Persian troops from Ormizd; Ormizd's death and the enthronement of Xosrov: Maurice's death and the reign of Phocas; the taking of Egypt; the destruction of Alexandria; the appeal of Heraclius to the king of the T'eatalats'ik' in the Northern parts and the sending of countless multitudes of peoples in response to Heraclius' appeal; the Romans' raiding in Atrpatakan, the loot and booty; the return via P'aytakaran; the coming of Persian troops from the east to strike at him: the war which occurred in the land of Caucasian Aghbania: the emperor's turn to the city of Naxchewan and the fight at Archish; the emperor's departure thence to his own borders; the other attack on Xosrov; the warfare which occurred at Ninue; the raid upon the city of Ctesiphon (Tisbon); the return to Atrpatakan; Xosrov's death; the enthronement of Kawad; the reconciliation which occurred between the two kingdoms [Rome and Sassanid Persia]; then the ceding of borders to the Romans; the return of the divine Cross to the Holy City. Then I shall describe the arousal of fathomless [divine] anger and the final disasters brought on by the marauders from the Southern parts [the Muslim Arabs]; how the armies of the Ishmaelites unexpectedly moved forth and, in a moment's time, overthrowing the might of both kings, seized territories extending from Egypt to this side of the great Euphrates river and to the border of the Armenians [ts' sahman Hayastaneayts'], from the shores of the great sea in the West [the Atlantic Ocean] to the gate / court of the Persian [Sassanid] kingdom, taking all the cities of Mesopotamia of the Syrians, and Ctesiphon, Veh Artashir, Marand, Hamatan as far as the city of Gandzak, and the great Hrat which is located in the district of Atrpatakan.

SEBEOS HISTORY CHAPTER 1

[Vahan's rebellion from Peroz, the seizure of authority and triumph in battle. Peroz' death, the enthronement of Kawad, and the honouring of Vahan with the marzpanate. Kawad's death and the enthronement of Xosrov called Anush Eruan (Anushirvan). The rebellion of Vardan and service to the Romans. The war and defeat of Xosrov.]

During the years of Peroz, king of Iran [459-484 AD], the suppression [bardzumn] of all principalities, and orders and laws of Christianity and such danger of persecutions and contempt were visited upon the princes that they threw off the yoke of service. Vahan Mamikonean rebelled, persecuted the Persians, and seized authority by force.

Then king Peroz released upon him many Hun troops, commanding that the rebels be killed with great severity and that all males be put to the sword. Sparapet Vahan hastened against this army with 30,000 select armed men. They massed in order, brigade against brigade, front against front, and with all possible speed they attacked each other, to the sound of trumpets, in the plain of Geran.

The Word of God came to aid the Armenians, stirring up the wind and pouring upon the Persian troops a dust storm which in midday enveloped them like a dark eclipse. There was enormous destruction on both sides and it was impossible to distinguish Persian from Armenian among the corpses. However, eventually the army of the Armenians drove back the army of Persians, making fugitives of the remainder and pursuing them. They turned back from this with great triumph.

Valan both collected the taxes of the land of Armenia and also rebuilt the very great churches which the Persians had ruined in the city of Vagharshapat, in Dwin, in Mzur [i Mzrays], and in many places in the land of Armenia. Building the country up, he again renewed it.

Now despite the fact that the Persian king Peroz wanted to mass troops against Armenia again, he had no opportunity since news of the coming of enemies forced him to go to the Kushan area because it was from that very border that the king of the Kushans [in today's Afghanistan and Pakistan] himself was coming against Emperor Peroz with a large army.

Assembling his troops, Peroz went against the Kushan king with great haste, saying: "First I shall expel him, then, having nothing further to do, I shall go to Armenia once more and shall spare neither man nor woman from my sword."

When Peroz arrived, he quickly went to face the enemy in the East. An intense battle took place and the Kushans struck at and destroyed the multitude of Persian troops, so much so that none was left alive to flee. King [emperor] Peroz and seven of his sons died in the battle.

Then Peroz' son Kawad ruled the land of Iran [488-496, 498-531]. Because the strength of the multitude of his troops had been shattered, he did not want to make war with anyone; rather, he made peace on all sides including reconciliation with the Armenians. He summoned Vahan to court and exalted him with great honour. He gave him the marzpanate of the land of Armenia and the lordship of the Mamikonean House. He promised much in service and benevolently sent Vahan back to his country.

After Vahan, authority was wielded by his brother Vard Patrik [who ruled] for a short time [505-509, or 510-514], and died. After him came Persian marzpans. The Armenians were unable to rebel, and remained in obedience until the time of the marzpan Suren and Vardan. lord of the Mamikoneans.

In the 41st year of the reign of Kawad's son Xosrov, Vardan rebelled with all Armenia united behind him and stopped serving the Persian king. They killed the marzpan Suren unexpectedly in the city of Dwin, took much loot, and went in service to the Romans.

Prior to this rebellion the prince of the land of Siwnik', named Vahan, broke away from the Armenians. He requested of the Persian king Xosrov [Emperor Khosrov] that they take the diwan of the land of Siwnik' from Dwin to the city of P'aytakaran, and that the city be ranked in the Atrpatakan Shahrmar, so that the name "Armenia/Armenian" no longer be applied to them. Xosrov so ordered.

Now the emperor of the Romans made an oath with the Armenians, confirming the same oath which had existed between those two venerable kings, Trdat and Constantine, and he gave them imperial troops in aid. Taking the troops, the Armenian rebels turned upon the city of Dwin, besieged and destroyed it and pursued the Persian force which was there.

But suddenly great agitation came upon them, for it was learned that the Persians had set fire to and burned down the church of saint Gregory which had been built near the city, and which the Persians had turned into a granary.

Then Mihrewandak the Mihran came against them with 20,000 troops and numerous elephants. There was a big battle in the Xaghamaxik' plain. The Armenians struck unbelievable blows at the Persian forces, dulling their swords, and they captured all the elephants. The Mihran escaped with a few men, and they went to their country.

This is that very Vardan against whom the Persian king himself, called Xosrov Anushirvan, came with a multitude of armed men and many elephants. Travelling through the district of Artaz, Xosrov went through Bagrewand, passing the city of Karin, took the road to a certain spot and encamped opposite Vardan.

Early next morning, with great haste they ranged themselves brigade opposite brigade, front opposite front, and then clashed in battle. And the war was fought with increasing intensity and they fought very hard. And the Lord visited defeat upon the king of the Persians and all his troops. They were crushed before the swords of their enemies and fled from them in frantic panic. Not knowing their path of flight, [the Persians] went and took refuge in the great river called Euphrates. But the water rose and swept away that multitude of fugitives as though they were a host of locusts; and many were unable to save themselves on that day. The king, however, was able to escape by a hairsbreadth, together with a few men thanks to the elephants and horses. He fled through Aghdznik' and on to his abode.

The Armenians took the entire camp, together with the royal treasures. They captured the Bambish ("queen") and the camp and they seized the Mashaperchan, the entire palankeen of very heavy gold which was worked with precious stones and pearls, which they called the palankeen of glory [despak p'arats']. They also took the Fire which the king always used to take around with him to bring him aid, and which was regarded as greater than all the fires and which they called the At'ash [fire]. A multitude of the senior grandees had drowned in the river, as had the Movpetan Movpet. Blessed is God, always.

SEBEOS HISTORY CHAPTER 2

[Anushirvan's belief in Christ and his baptism by the bishop, and his death; the enthronement of Ormizd; Vahram's striking the troops of the T'etalats'ik', the war with the king of the Mazkut's and his death there; the rebellion and flight of the Vahramakan troops from Xosrov; the coming of Vahram; how Xosrov sought aid from the Roman emperor Maurice.]

Prior to the rebellion [c. 572 AD], this Xosrov, who was called Anushirvan, during his reign [531-579 AD] had made the country strong, for he was a peace-lover and a builder of the land. But when the rebellion occurred Xosrov thereafter was roused to anger, regarding himself innocent and asying:

"I was the father, not the lord, of the land and I nourished all like sons and dear ones. And now," he said, "may God seek this blood from them." This Xosrov during his reign closed the Gate of Chor and of Aghbania / Aghuania. He seized and handcuffed the Egerats'ik' king. Through warfare he took Pisidian Antioch and he settled the captives by the royal abode.

He built a city and named it Veh Anjatok' Xosrov, which is called Shahastanin Oknoy. And he took Dara and Callinicos through raiding, enslaving the Cilician parts.

Xorrov ruled the kingdom for 48 years. Now as he was dying, the radiant light of the divine Word was born in him, for he believed in Christ, saying: "I believe in one God Who made Heaven and Earth Whom Christians worship, confessing Father and Son and Holy Spirit, for He alone is God; and there is no other than He Whom the Christians revere."

He ordered his attendants to send the mogpet far from court to a place of work, that others be ejected from the royal abodes, and he summoned the head bishop (Episkoposapet), who is called the Eran kat'oghikos. Xosrov was baptised by the latter and commanded that divine services be held in the chamber. He read the message in the Lord's Gospel, and he communed in the envivifying Body and Blood of the Lord. Bidding farewell to the kat'oghikos and the Lord's Gospel, Xosrov sent him to his place.

After a few days he departed this life in good old age. Christians took his body and placed it in the tomb of kings [i shirims t'agaworats'n]. Ormizd, Xosrov's son, ruled after him [Hormizd IV, c. 579-590 AD].

Now here is a list of the generals of the Persian king who came one after the other to the country of Armenia from the time of the rebellion of Vardan, lord of the Mamikoneans, the son of Vasak, up to the present. Some of them died in battle, some battled, some triumphed and then departed. When they killed Suren the marzpan, that same year a certain Vardan Vshnasp came, accomplished nothing, remained for a year and then departed. After him came Goghon Mihran with 20,000 armed troops and many elephants, and many to help him from among the countless peoples who inhabit the Caucasus mountains, the Hun people. He also had an order from the king to eliminate all men in the land of Armenia, to seize, dig up, to raze to the ground, to mercilessly destroy the country.

Thus did Mihran come. Some people were able to save themselves by going into impregnable fortresses; others fled to a more distant land. Nonetheless, many were unable to save themselves because whomever they chanced upon they put to the sword. Mihran battled once in Iberia [Georgia], but was defeated. He came to Armenia and took Ankgh by a false oath.

P'ilippos, lord of Siwnik', fought a battle between the city and Xaghamaxik', as well as a battle at Ut'mus village in Vanand, but was defeated in both. He remained seven years, and then departed.

Then came Ormazd, son of Anushirvan Xosrov, the king himself. He had bound Vndo and left him in Gruangakan, though Vstam had escaped and gone as a fugitive and not a few were the wars he stirred up in those days.

In this period there lived a certain Vahram Merhewandak, prince of the eastern parts of the land of Iran, who in his bravery had beaten the troops of the Tetalats'ik' and held through force Bahl and the entire country of the Kushans from the far side of the great river called Vehrot as far as the place called Kazbion. Indeed, on the far side of the river he had left behind the spear of the brave Spandiat about whom the barbarians say "Having reached this far in battle, he cast his spear into the river."

It was then that this Vahram made war on the king of the Mazk'ut' who was in those parts on the far side of the great river. Vahram struck at the multitude of his troops, killed the king in battle, and ravished all of the treasures of that kingdom.

Then [Vahram] sent to the Persian king by means of his messengers documents announcing the glad tidings but only an insignificant part of the loot from the very great treasures—the insignia of the fallen kingdom among the honoured goods—while he dispensed all the rest of the treasure among his troops according to each one's merit.

Now when king Ormazd saw the envoys who had come with the good news, when he read the letter of greeting from the troops and received from the worthy royal treasures the gifts of war-portion while outwardly he humored the men, inwardly he was blazing with wrath and saying: "I recognize the insignia of honour, and that the meal was more than great, but from the treasures amassed it is not proper that such a small amount should be forwarded to the court."

So, in return for the message of good news, he ordered written a hrovartak filled with rage, and he sent troops from the brigade of hamazars and royal p'ushtipans to go to Vahram's troops and take all the loot from them. The troops went and began demanding the loot.

At that point the entire force became excited and killed the king's men. They left the king's service, seated Vahram as their king, swore an oath according to their custom, united and left the East. They headed for Asorestan, to kill their king, Ormazd, do away with the House of Sasan, and establish Vahram on the throne of the kingdom.

H] quickly assembled and took along the multitude of brave and warlike peoples of the East. While there was such chaos occurring in the land of Iran, in Armenia Yovhan Patrik and Roman troops were holding the city of Dwin under siege. They were fighting using siege machinery and were close to destroying the wall.

When news of this [i.e., events in Sassanid Persia] reached them, they left off the siege and departed for Atrpatakan. They ravaged the entire country, putting all men and women to the sword. Taking all the loot, captives, and booty, they returned to their country.

Now when the clamorous news of this [event] reached Ormazd, the king of Iran, at the court of the Sasanians, he felt no few pangs of alarm. Summoning the naxarars who were at the royal court, the brigades of hamaharzes and the p'ushtipans, he planned to take the treasury of the kingdom and the entire court host, pass across the great Tigris river by bridge to Vehkawat [or, via Zom to Vehkawat], cut the bridges down and find asylum in the multitudinous hosts of the king of the Tachiks.

However, this did not come to pass. For the king's men, and hamaharzes and pushtipans resolved to kill Ormazd and to enthrone his son Xosrov. They decided to free [Vndo, Vstam's brother] to make him their leader and chief of the operation. They went to Gruandakan fortress and released him and all the captives with him. Vndo sent a trustworthy messenger with very swift horses to his brother. They went to Gruandakan fortress and released him and all the captives with him. Vndo sent a trustworthy messenger with very swift horses to his brother Vstam with the written message: "Come as fast as you can, and participate". And Vstam arrived quickly.

Then all the naxarars and commanders of troops, and soldiers assembled in the hall of the court at an hour when they met there. Entering the royal chamber, they seized, quickly blinded and then killed king Ormazd.

They enthroned Ormazd's son, [Xosrov II Aparvez, first reign 590] as king of the land of Persia, then began to prepare to flee to the other side of the great Tigris river. Not many days later Vahram arrived with speed, like a pouncing eagle.

Because Xosrov was a small boy when enthroned, his uncles [k'erhink'n, "mother's brothers"] Vndo and Vstam took him across the great Tigris river by bridge, destroying the bridges after them. Meanwhile, Vahram came and took all the tun, treasury, and women of the court and sat upon the throne of the kingdom. He ordered wooden rafts tied together and crossed the river to seize Xosrov. But the latter, out of dread, was in no way able to halt for rest. As soon as his party crossed, they fled, wondering on the road whether it would be better to go to the king of the Tachiks [Muslims] or to the king of the Romans.

Finally they decided it best to seek refuge with the king of the Romans. "For", they said, "despite the hostility existing between us, nonetheless the Romans are Christian and merciful, and they are unable to break a sworn oath". Going west by a direct route, they entered the city of Xaghab where they stopped.

As for Vahram, although he crossed the river he was unable to catch up. He returned to Ctesiphon. [The text styles Xosrov ark'ay and Maurice t'agawor, though elsewhere both are called t'agawor. Hereafter we shall translate t'agawor as "emperor" when it refers to the Roman ruler, and as "king" for the shah.]

Then king Xosrov sent men bearing costly gifts to emperor Maurice, and he wrote him the following: "Give me the throne and place of rule which belonged to my fathers and the ancestors: dispatch an army to assist me defeat my enemy; establish my reign and I shall be your son. I shall give you the areas of the Syrians, Aruastan in its entirety as far as the city of Nisibis and from the country of the Armenians, the land of Tanuterakan rule extending as far as Ararat, and to the city of Dwin, and as far as the shore of the Sea of Bznunik' [Lake Van] and to Arhestawan I shall also give a large part of the land of Iberia/Georgia, as far as the city of Tiflis. Let there be an oath of peace between the two of us, lasting until our deaths, and between our sons who rule after us".

The emperor assembled the entire senate to ask their advice. He said to them: "The Persians have killed their king Ormazd and then enthroned his son. However, the troops of the realm seated yet another man as king in the East, and he Vahram came with a large army and seized the kingdom for himself. Ormazd's young son has come to us as a fugitive seeking an auxiliary army from us, and in return has promised to do thus and so. Now what shall we do, accept him? Is he worthy of acceptance or not?" The senators replied: "It is not worth accepting him, for the Persians are an impious people, and thoroughly false. For, in times of their own difficulties they make promises, but when the turmoil ends, they break those promises. We have suffered much wickedness from them. Let them wipe out each other, and we will have peace."

King Xosrov was in great danger then and could see death before his eyes because, having escaped from the lion's mouth,

THE GRAND BIBLE

he had fallen into the mouths of enemies from which there was no escape.

However, the emperor rejected the senate's counsel, and instead sent his own son-in-law, Phillipicus, entrusted with a reply of acceptance for Xosrov. He received Xosrov's oath and gave him an imperial auxiliary army including Yovhan Patrik from Armenia, the stratelat Nerses from Syria plus their troops. They mustered 3,000 cavalry massed in hundreds and in thousands, in brigades, under their own banners.

The mother of [the Persian commander] Shapuh was the daughter of the Asparapet (who was from the naxarar House of the Part'ews which had died out) [The text seems corrupt: dustr Asparapetin aynorik, or er naxarar tann Part'ewas', ork' merheal ein...] and the sister of Vndo and Vstam. Vndo himself was a wise and sagacious man, and very brave-hearted, as I have said. He fought a great battle at Melitene, but was defeated and left. Then came Tam Xosrov who fought two battles: one in Basen district at Bolorapahak where the Murts' and Arax [rivers] mingle; and one in Bagrewand district at Ket'n. He was very successful in both battles. After remaining for two years, he departed.

Then came Varaz Vzur who fought one battle at Ut'mus village in Vanand. At first he was driven off, but he later triumphed. He remained for one year, and then departed.

Then came marzpan Hrahat who went to Mrtsuni having his kinfolk for support in battle. They were defeated there, but later triumphed. Turning thence he fought and won a battle at Tsaghkajur in Bznunik'. He departed after four months.

[23] Next came marzpan Hrarti Datan. Thereafter, however, the Persians were unable to resist the Roman troops. It was during this period that Ormazd was killed and his son Xosrov was enthroned. [Hrarti Datan] departed after two years.

After this Persian border-guards came and this continued until the expiration of the peace which had existed between the Persians and the Greeks, between the two kings, Maurice and Xosrov.

Then came Vendatakan, then Xorakan. The latter was killed by Persian troops at Garni who then rebelled and went to Geghums. Then came Merakbut, then Yazden, then Butmah, then Hoviman.

This is the Book of the Times the History of Kings an Persian romance [regarding] the universal defeat of that Sasanian brigand, Xosrov Apruez [Matean zhamanakean patmut'iwn t'agaworakan Vep ariakan vanumn tiezerakan, hen Sasanakan yApruezn Xosrovean.] who put everything to flame, agitated the sea and land, and brought ruin upon every country.

I shall narrate what happened to the country, how it was ruined, making use of legends [charhets'its' ... arhaspels vipasanelov]. I shall tell] about Wrath from On High, how anger blazed forth below; about the fire and the bloodshed, the pillaging expeditions, the raids which brought death accompanied by the screams of dews (demons) and the roar of dragons. I shall speak of] the race of Mages [zazants' k'awdeats'], about men descended from giants, armed braves, cavalrymen from East to West, from North to South; about the Southerners the Muslim Arabs who arose with great turbulence and attacked Persia and Constantinople and executed the command of the Lord's anger over every country. The Muslim Arabs spun like a whirlwind, became a storm, and corrupted everything below them, devastating mountains and hills, tearing apart plains in various places, and crushing rocks and stones under the trampling hooves of their horses. Now I shall begin the romance about that destructive corrupter, Xosrov, God's accursed.

SEBEOS HISTORY CHAPTER 3

Vahram's attack on Xosrov, and the two letters to Mushegh; Mushegh's loyalty to Xosrov; the great battle; the defeat of the rebels; Xosrov's lack of gratitude toward Mushegh which resulted in Mushegh's plans to kill him; the writing of an accusation to the emperor by means of the Roman princes; the emperor's dissatisfaction with that and the letter to [the princes] and to Xosrov; the dispatch of Roman troops; the summoning of Mushegh to the palace by the emperor.

After the death of Kawad's son, Xosrov, his son, Ormazd, ruled over the land of Iran [579-590 AD]. Ormazd's mother, Xosrov's wife named Kayen, was the daughter of the great Khaqan/Qaqan (Xak'an), king of the T'etalats'ik'. Thus Ormazd inherited a bad nature from his father's line, but an even more bestial nature from his mother's line.

He did away with all the naxarars and the earlier, more indigenous Houses of the land of Iran. He killed the great Asparapet of the Part'ew and the Pahlaw who was descended from the son of Anak (whom the Armenians put to death) whom that bandit king Xosrov of Armenia took as a dayek, whom they spirited away to the court of their king in Iran [The text seems corrupt: Span sa zAsparapetn mets zpart'ewn ew zpahlawn or er i zawake Anakay mahaparti. zor arhareal dayekats' i hine anti Xosrovay ark'ayi Hayots' p'axuts'in i durhn ark'uni iwreants' i koghmans parsits']. The king fulfilled [on the son] the rewards promised to his father Anak once the son had fled there, namely, the bun [native habitat] of Part'ewakan Palhaw itself. He tied a crown on his head and exalted him, making him second in the kingdom.

The Asparapet had two sons, one named Vndo, the other Vstam. They accepted troops from the land of Armenia and assembled whomever they found at hand then. When they mustered they were some 15,000 men, each brigade of naxarars arranged in hundreds and in thousands in brigades and under their banners. All were armed, all were choice warriors, burning with bravery, like fire. They neither panicked nor turned back. Their faces were like eagles'. Their light-footedness was like the lightness of wild goats running upon the plains. With dilligence and full loyalty they took the road.

The Mithraist rebel took his troops [The translation is uncertain: arheal apstambin mihrats'eloyn zzawrs iwr...], elephants, and all the royal treasures and reached Atrpatakan. They encamped, at a little distance from each other, in the district of Vararat. Then Vahram wrote a hrovartak to Mushegh and to other naxarars of Armenia. It went as follows:

"I had thought that as soon as I started battling with your enemies, you would come from those parts and help me; and that I and you, united, would do away with that universal pestilence, the House of Sasan. But you, massed and coming against me in battle, are helping them. I am not afraid of the army of Roman elders who have come against me. But you Armenians show the love of your master at an inopportune time. Truly, did not the House of Sasan abolish your country and lordship? Why was it that your fathers always rebelled and went to serve those [the Romans] who to this day are fighting over your land? Should you come against me you will destroy so much of your merit, for [28] should Xosrov triumph, the two of them united [i.e., Xosrov and the emperor Maurice] will remove you from their midst. If, however, it is agreeable to you, break with them, unite with and aid me. Should I triumph, I swear by the great god Aramazd, by the lord Sun, by the Moon, by Fire and by Water, by Mihr and by all the gods, that I shall give you the Armenian kingdom. Make whomever you want the king. And shall leave you the entire country of Armenia as far as Kapkoh and the Gate of [Caucasian] Aghbania / Aghuania; from the Syrian area: Aruastan and Nor Shirakan as far as the boundaries of the Tachiks, for this [territory] was yours from your ancestors; I shall give territories extending westward to Caesarea in Cappadocia. I shall not rule beyond the Arasp river. Let the treasury of the Aryan kingdom be considered sufficient for me and you. That should be plenty for you before your kingdom is established"

Then, in accordance with their Persian custom, Vahram wrapped up salt, and sealed it with the hrovartak.

The partisans of Mushegh] received and read the hrovartak, but they neither replied nor did they reveal its contents to many [naxarars] because they feared their disunity.

But Vahram wrote a second letter:

"I wrote to you to break with them, considering all the lands and treasures of this kingdom sufficient for you and me. You, however, chose not to listen, and you did not respond. I feel sorry for you, because tomorrow at dawn I will show you splendid elephants mounted by troops of armed braves who will rain down upon you arrows of iron, shafts of tempered steel dispatched by hard-hiting archers, powerful young men, well-armed, and swift Tachik horses, axes and swords of tempered steel, and blows enough for Xosrov and for you." Mushegh replied to him [as follows:

"God's compassion goes to whomever He grants it to. You should feel sorry for yourself, not for us. I have come to regard you as a boastful man, someone who takes comfort not in God, but in bravery and the strength of elephants. And now I say to you that if God so wills it, tomorrow you will be embroiled in a battle with braves who will explode upon you and your multitude of elephants like the most violent clouds in the sky. An enormous explosion will be heard from on High, and a flash of lightning, and armed men on white horses with unerring spears will attack you and pass through your hosts the way lightning does through an evergreen forest, burning the branches as the bolts rain down from Heaven to earth, burning the brush of the fields. For, should God will it, a whirlwind will carry off your might like dust, and the treasury of the court will return to the court."

Among the Persians were Vndo and Vstam, about whom I spoke earlier. The Persians had about 8,000 cavalrymen. At early dawn the next morning, just as the sun was rising the troops drew themselves up, front facing front, and clashed in battle. The massing and the melee were violent and in the agitation the destruction was enormous. After fighting from dawn to dusk, both sides became fatigued with warfare.

The killing was so great that a torrent of blood flowed in streams and watered the entire country. Unable to resist, the army of rebels fled before the Roman troops. The latter pursued them, covering the plains and roads with corpses, until it was dark night. The Romans put many to their swords; many others they arrested, binding their hands to their necks, and leading them before the king.

A multitude of elephants was coming at a violent speed. Behind them were the armed azatagund. From below the

Romans pierced the armor of the cavalrymen who were mounted on elephants. Fighting fearlessly and courageously, the Romans killed many elephants, cavalrymen, and elephantkeepers and were able to forcibly lead off a multitude of the elephants, which they brought before the king.

Thence they turned upon the campsite of Vahram's army. In one tent they found the court treasury and all the priceless, countless, inestimable treasures of the kingdom. This was all taken as booty. With their swords they dismembered many gorgeous thrones of diverse sorts. Going to the area in phalanxes, they loaded the goods onto a multitude of camels and mules. Everyone filled up with much great loot.

The Persian troops then were able to gather a not insignificant part of the treasures and take them to their court. King Xosrov on that day grew more powerful as a result of this victory, more so than any of his enemies, and his kingdom was established.

[Xosrov] ordered that the multitude of arrested horsemen and elephant-riders be stripped, that their hands be tied upon their shoulders, and that they be trampled under the elephants' hooves. But they could find no trace of Vahram. For he had fled and gone as a fugitive, and landed in Bahl Shahastan where, upon Xosrov's word, they themselves killed him.

Some days after this great battle, king Xosrov sat in his tent. Before the king were all of his grandee naxarars. The Roman army was encamped at a day's distance from the Persians, densely massed, brim full of their booty.

The king began speaking as follows: "In truth has there ever been any one of the world's kings who, being able to seize another king—his own enemy, the destroyer of his kingdom—did not have him killed, and did not exterminate all the males with him from his land? What king, instead of doing these things would adopt such a royal fugitive, crown him, and exalt him by adorning him with purple, defeat his enemies, establish him on the throne of his kingdom, give him courtly treasure out of his own treasures, and benevolently free him to go his way? My father, emperor Maurice, bestowed such benefits on me which no man could bestow upon his own beloved son." Some of those [naxaras] responded to Xosrov as follows: "King, live forever! We do not know whether or not gratitude is fitting, for every kingdom is made stable by treasure, yet the Romans have looted all the kingdom's treasures."

The king replied: "I shall directly retrieve the treasures of my kingdom from them, together with other treasures they have amassed, for all of that belongs to me. But the one thing that disconcerts me is the fact that that Vahram, who hates his master, lived and departed. He is a brave man and will again assemble troops from among the braves of the peoples of the East."

[The naxarars] answered him: "They helped that ingrate to flee. With our own eyes we saw how that Mushegh Mamikonean took Vahram, gave him horse and weapon and released him. They said this because they wished Mushegh ill, since, viewing his grandfather evilly, their hearts hardened against him. Yet the king never wondered about the matter, since he was a small boy, and inexperienced. Nor did he recollect the agitation of such Armenian soldiers. Rather, he fixed his mind on those falsehoods, saying: "Let that Mushegh be summoned here and be bound hand and foot, until I inform the emperor about him."

The king immediately ordered a note [yetkar] to be written to Mushegh. He dispatched one of the envoys to Mushegh with the message: "Come quickly. An extremely important matter has come up." Xosrov gave this command to his p'ushtipans: "Be ready. When Mushegh arrives, and when I signal you with my hand, pull his arms back and tie him up. But be prepared, for he is a brave man. And see to it that he neither dies, nor kills me. Should he die, I will be answerable for him to the emperor." He similarly commanded his ushers [barapanats'n], saying: "Take care that when Mushegh comes to the entrance of my tent you remove his belt and sword. Tell him, 'it is not legal to go before the king with a weapon.'"

Now while Mushegh conducted a review of his troops, ascertaining the number living and the number which had died in battle, Xosrov's messenger came before him. The messenger greeted him and gave him the letter. Taking the letter, Mushegh asked him: "Is this a greeting, and does it mean peace?" The messenger replied: "It is indeed a greeting and signifies peace. I do not know what else it says, only that I was commanded to summon you quickly." Mushegh immediately began preparing himself as though he were going to war, for it had entered his mind that perhaps some military matter had come up, or that he would be rewarded with gifts for his labors. He took along 2,000 armed men, azats and non-azats, whom he found worthy of honour, and he felt confidence in his cavalry.

He wrote to Yovhan patrik to release him. The latter so commanded that Mushegh travel with such preparation as he had planned, and he ordered all of Mushegh's men to see to their own armaments. They armed, and departed.

Mushegh's forces entered the Persian army and were close to the court Mashkaperchan ("tent", "pavilion") when an order reached him not to approach with such a multitude, but rather to have them encamp at a distance, and to appear before the king with only a few men.

[Mushegh], however, did not consent to this. Instead, he went with his troops close to the entrance of the court tent. Persian soldiers, well-armed, were standing around the tent. Dismounting from his horse, [Mushegh] went to the entrance of the tent with 50 men. The men remained as they were, each one armed, and with a horse. The king was horrified as were all the soldiers with him, and began to conceal their treachery. As soon as Mushegh reached the entrance of the tent, ushers at the door approached him and said: "Remove the belt and sword from your waist, and remove your armor, because it is not lawful to go before the king armed." Doubt stirred in Mushegh's heart and he began to condition and prepare himself for attack. He responded to the ushers as follows: "From my childhood I have been the table-companion of kings deriving from the time of my ancestors and grandfather. And now I have reached the door of the court, the place of review. Am I to remove my armor, my girdle and belt now, when I never do so even in my own House, even when rejoicing? Or indeed, am I worthy of the wickedness of you Persians?" Then he ordered someone to go to the soldiers to have the auxiliary army move forward. He himself turned to go

The king was informed that Mushegh refused to enter so unarmed, and instead had turned and left. So the king started to conceal his wickedness, saying: "Let him overlook it, let him come as he pleases." For Xosrov himself was a lad, and his troops were few and far between. They called [Mushegh] back, saying: "The king ordered that you may enter as you wish." Mushegh turned and said: "Let me see what boon the king of kings plans to give me."

[Mushegh] entered the tent, going before the king accompanied by seven men. He prostrated himself in reverence to the king, and then stood up. But the king did not extend his hand as hitherto had been done in a gesture of receiving and greeting him. Rather, he remained there frozen, and they stubbornly faced each other that way.

The king grew frightened and dismayed, and was unable to give the order he had planned, or to say anything, great or small, because of his dread. Once again Mushegh quickly left the tent. They brought him his horse; he mounted and departed. As soon as the king saw that, he became extremely frightened. But wanting to conceal his injury, he arose from the throne and strode to the entrance of the tent, went outside and dispatched a certain principal naxarar after Mushegh. He had salt sent, to swear an oath, and to call him back "so that you depart with honour and exaltation and do not consider that something else was intended."

Mushegh, however, did not want it. Instead, he took to the road. Now he planned to deal with them as follows: he planned to attack his tent at the second hour, and to kill him. He so ordered the armed troops who stood around the tent of Xosrov. But because his troops were informed there was agitation, and they abandoned that plan and departed.

As they travelled, a certain one of the king's p'ushtipans strayed across their path. The Mushegheans seized him and took him to their own people. And Mushegh threatened him with an oath, saying that if he did not tell him what had transpired concerning Mushegh himself, he would die.

Then [the p'ushtipan] made Mushegh swear an oath that he would not turn him over to the Persian king. He told everything. The next day at dawn Mushegh went to the door / court of Yovhannes patrik, saw him, and told him all the wicked tales. He had with him the ostikan p'ushtipan who also came and described all that had happened. The princes and all the soldiers became agitated, but when reminded of the emperor's oath and his disturbed state, did nothing about it. They told Mushegh to write to the emperor, to familiarize him with all the wicked events. But Mushegh said in front of all of them: "If that man is not killed, every country under the lordship of the Romans will be taken by his hand."

Then the Mushegheans selected great gifts as their king's share of the booty: crowns and a diadem made of emeralds and pearls; a very great quantity of gold and silver, matchless precious gems, as well as the most outstanding garments which, in their ornamentation, were made for the kings of the Persians; horses from the court, including the very court trappings for them.

They sent the above gifts and with them a written hrovartak announcing the good news, as well as an indictment of king Xosrov. The Mushegheans massed four hundred cavalrymen to accompany the gifts. Now Xosrov became informed that they were about to deliver to their emperor as a share of the loot some of his treasures, and he learned that they had written a complaint about himself. Filled with bitterness, Xosrov sent an army after them, to reach them on the road, to destroy Mushegh suddenly and secretly, to take the treasure of the court and to bring it back to him at once. The Roman princes also knew about matters. They sent after them a very forceful army; when they had passed by, not a single one of the enemy lived, and no word rose about it. [The text seems corrupt.] The troops took the treasures and brought them to the palace with great rejoicing. The king received the gifts and sent a hrovartak expressing

The king received the gifts and sent a hrowartak expressing great thanks by means of his messenger. And he wrote [the Mushegheans] to abandon the plan in which they condemned the king. "If you do not restrain Mushegh I shall demand him from you" the emperor wrote. He also wrote to the king gratefully releasing everyone.

Then king Xosrov gave presents to each according to importance, and dismissed them. He himself left Atrpatakan and went to Asorestan, to his native royal abode. And he was established on the throne of his kingdom. He gave to the emperor the promised gifts: all Aruastan as far as Nisibis: the country of the Armenians which had been under his sway the Tanuterakan House as far as the Hurazdan river the district of Kote as far as the awan of Garhni and to the shore of the Sea of Bznunik' [Lake Van], Arhestawan and to the district of Gogovit as far as Hats'iwn and Maku. The area of the Vaspurakan brigade was in service to the Persian king. Many of the naxarars of Armenia were in the Roman part, few were in the Persian part. Xosrov also gave to Emperor Maurice a great part of the land of Iberia [Georgia], up to the city of Tiflis. The king summoned Mushegh to the palace, and he never areain saw the country of Armenia.

SEBEOS HISTORY CHAPTER 4.

The piety of queen Shirin, who was king Xosrov's Christian wife; Xosrov's hrovartak.

[Xosrov], in accordance with their Magian religion, had numerous wives. He also took Christian wives, and had an extremely beautiful Christian wife from the land of Xuzhastan named Shirin, the Bambish, queen of queens [tiknats' tikin]. She constructed a monastery and a church close to the royal abode, and settled priests and deacons there allotting from the court stipends and money for clothing. She lavished gold and silver [on the monastery]. Bravely, with her head held high she preached the gospel of the Kingdom, at court, and none of the grandee mages dared open his mouth to say anything—large or small—about Christians. When, however, days passed and her end approached, many of the mages who had converted to Christianity, were martyred in various places.

[Xosrov] commanded: "Let no infidel dare convert to Christianity and let none of the Christians convert to impiety. Rather, let each individual remain true to his paternal religion [hayreni yawrens]. Whoever does not hold his paternal faith [zhayreni den] but rebels from the religion of his fathers, will be put to death." But on the great feast of Psalm Sunday, Christians from the monastery of Shirin, and other Christians went to the entrance of the king's chamber, and worshipfully read the Gospel. They received presents from the king, and departed. And no one dared to say anything to them.

SEBEOS HISTORY CHAPTER 5.

[Roman Emperor Maurice requests the body of Daniel from Persian Emperor Xosrov.]

It happened in those days that the emperor of the Romans requested from the king of the Persians the body of that deceased man which was in Shawsh, in a copper basin in the king's treasury. The Persians called him Kaw Xosrov, while the Christians called him Daniel the prophet. King Xosrov ordered that Maurice's request be granted. But queen Shirin was extremely agitated over this affair. When she was unable to change the king's mind, she ordered all the Christians of the land to request of Christ with fasting and prayers that the blessing of Kaw Xosrov's presence not leave their land.

The entire country assembled in that spot and beseeched Christ to prevent the move with fervent pleas and with tears. Mules were brought, as was the court palankeen; they took Daniel's remains and departed. But as soon as they passed through the city gate, suddenly those streams which flowed through the city and outside, dried up. The entire country followed after Daniel's remains with cries and alarm.

As soon as they were at a distance of three asparez from the city, suddenly those mules bearing the palankeen halted and no one could make them budge. Suddenly they violently wielded their swords causing the mob and the brigade to scatter and they rushed back to the city. And as soon as they entered the city gate the waters of the river flowed and water gushed forth in abundance, as had been the case before.

They quickly informed the emperor about this. He had a mass performed [for Daniel] and ordered his troops to do as the relics willed. They left [the relics of Daniel] and departed.

SEBEOS HISTORY CHAPTER 6.

[Maurice writes Xosrov a letter of condemnation about the princes and troops of Armenia, suggesting that he send those [princes and troops] in his section to Thrace while Xosrov send those in the Persian section to the East; the flight of princes in the Roman section to Iran; Xosrov dispatched the Hazarakar with much treasure to the Roman section to attract many princes to his side; the princes ravish the treasure; preparation for war; the message; disunity of the princes, ome of whom went to the Romans, others to the Persians.]

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3290 In that period the Roman emperor ordered a letter written to the Persian king. It was a complaint about the princes of all Armenia, and their troops which read as follows:

"There is a crooked and disobedient people which dwells between us and causes trouble. Come now, I shall assemble mine and send them to Thrace. Assemble yours and have them taken East. Should they die, our enemies will be the ones dying; should they kill others it will be our enemies who perish, and we shall live in peace. But should they remain in their own country, we shall have no rest".

Then the two rulers united. The emperor started ordering the Armenians to assemble to go to Thrace, and he was implementing the order with extreme violence. The Armenian princes and their troops began to flee from the Roman sector and to go in service to the Persian king—especially those whose country lay under the emperor's jurisdiction. Now Xosrov received all the fugitives with more exaltation and much greater gifts than the emperor had ever bestowed on them. This occurred even more when he saw them fleeing from the emperor, he wanted to win them to his side with even greater affection.

Now when the Persian king observed the flight of people from the emperor, he sent to Armenia the Vaspurakan hamarakar with much treasure, and very great honours to subdue the princes with it and to draw them into his service. The hamarakar went to Armenia with treasure loaded onto numerous camels.

Samuel Vahewuni with other comrades went against him, encountering him at the borders of the land of Atrpatakan. They took the treasure [but] granted the hamarakar his life. The princes were: Atat Xorhxorhuni, Samuel Vahewuni, Mamak Mamikonean, Step'annos Siwni, Kotit, lord of the Amatunik', T'eodos Trpatuni, and about 2,000 cavalrymen. They were thinking as follows: "With that treasure we shall make Armenia our own. With their aid we shall wage war with both kings and forcibly return our country to ourselves." But once they reached the city of Naxchawan, their plan of unity came apart. They did not believe one another, they divided the treasure, and then encamped in the swamp called Chahuk. Meanwhile that hamarakar went to court and informed the king of all that had transpired. And the emperor's words were vindicated.

King Xosrov ordered that a hrovartak be written to the emperor, requesting an auxiliary force. He also dispatched the vaspurakan hamarakar to Armenia. Then the emperor ordered the general Heraclius who was located in the country of Armenia to take his troops and go against the rebels in battle. The troops of the two kings united in the city of Naxchawan. As these troops started to mass, they began sending messages to the rebels] saying: "Let there not be warfare and bloodshed among Christians. Rather, abandon your stuborness and resign yourselves to serving the king." By oaths they confirmed that "you have nothing to fear from the king." The hamarakar also said: "The king of kings sent me to you; indeed, I brought the treasure for you. You have nothing to fear from the king of kings." He gave an oath, in accordance with their custom.

The Armenian rebels began to separate and divide from each other. Mamak Mamigonean, Kotit, lord of the Amatunik', Step'annos and others withdrew, displaying themselves as innocent to the hamarakar, subduing their troops into serving the Persian king. Meanwhile Atat Xorhxorhuni and Samuel Vahewuni and their troops fled. Going via the town called Sawdk', they reached the land of [Caucasian] Aghbania / Aghuania, heading for the Huns [of Attila's successors] and, after crossing the river called Kur, they encamped on the riverbank.

The Huns also reached the river and encamped on the opposite side. And as soon as the rebels realised that they could not trust the Huns' camp, they requested an oath from the Roman emperor and went into his service. Some went to the hamarakar and then returned to their own country. The hamarakar assembled all the princes and troops of the Persian sector of Armenia encouraging them all through persuasion and sweet words. He united them and formed them into brigades. Leaving few in the land, he departed, saying: "until I find out about you, and a command comes to remain there." For it had entered his mind that others would come to the rebels and that they would multiply.

The emperor summoned Atat Xorhxorhuni and his troops to quickly come to the palace. He exalted Atat with splendour and honour, gave him numerous goods, and sent him to Thrace.

SEBEOS HISTORY CHAPTER 7.

The Armenian princes in the Roman sector rebel; the war; the deaths of some in battle and the decapitation of two [rebels].

Once again the Vahewunik' sepuhs in the Roman sector— Samuel whom I mentioned above, and Sargis and Varaz Nerseh and Nerses and Vstam and T'eodoros Trpatuni rebelled. They planned to kill the Roman curator while he was seated in the hot springs close to the city of Karin, to cure an illness. But the latter was informed somehow and fled to the city. Thus, when they invaded the bath, they did not encounter him. Then the rebels looted whatever they found, taking a great deal of booty, and departed to the secure Korduats' country. They wanted to have the stronghold there.

Now the Roman forces with general Heraclius and Hamazasp Mamikonean pursued them. The rebels approached the stronghold, crossing by bridge the river called Jermay (which is styled Daniel's bridge). They cut down the bridge and fortified themselves in a pass where they held the site of the bridge. The Romans were on the opposite riverbank wondering what to do. Because they were unable to find a ford, they wanted to depart. But unexpectedly, a traveling priest strayed into their midst. They seized him and said: "If you do not show us the river's ford, we will kill you." The traveller took the forces and showed them the ford at a place below where they were. All the troops crossed the river. Some of them held watch over the stronghold, others the bridgehead. Some held the mouth of the valley, others entered the stronghold and battled with them. The devastation was enormous, and the rebels were worn out.

Killed in the battle were Nerses, Vstam, and Samuel, who killed quite a few [warriors] around them in fight. But Sargis and Varaz Nerseh were arrested along with some others. They were taken to the city of Karin and later beheaded. When they were about to be beheaded, Varaz Nerseh said to Sargis: "Let's cast lots to see whom they kill first." But Sargis replied: "I am an old, blame-worthy man. I beg you, grant me this little respite, that I not see your death." So they beheaded him first. Now Teodoros Trpatuni fled to the court of the Persian king, for refuge. But the king ordered him bound and delivered into the hands of his enemies to be put to death. And the king visited severe misfortunes upon him.

The enemies who were in the Thrace area, having looted the kingdom by means of quick engagements conducted by a countless multitude of troops, [now] wanted to destroy the kingdom and people of the lordship of the Romans, and to actually rule over the royal city itself.

SEBEOS HISTORY CHAPTER 8.

[The emperor's order to assemble his Eastern forces and those of Armenia to cross the sea and mass in Thrace, against the enemy. The selection of Mushegh as their commander. The victory, vanquishment, seizure, and killing of Mushegh.]

The Roman emperor gave a command to assemble all of his forces which were in the Eastern area, for it was peacetime and he had no difficulties with Syria, from the Persian lordship. He ordered that all the troops be taken across the sea and assembled against the enemy in the Thracian area. He also commanded the entire cavalry of Armenia, and the princes of the naxarars who were skilled and able to resist and fight in a spear-throwing battle. Again Maurice ordered that very many troops be raised from the land of Armenia a second time, all of choice age and determination, that they be organized into decorated brigades, [kazmel gunds zards] armed, and transported to the land of Thrace against the enemy. Mushegh Mamikonean was their commander.

Now they went against the peoples who hold the area west of the great Danube river. A fierce battle took place in that country. The enemies' strength was shattered before the Roman forces, and they fled to the other side of the river. With great victory they quickly dispatched to the emperor a messenger with the glad tidings.

Then they went to an area below where they were, raiding. They crossed a narrow place, laying waste the entire country. Coming opposite to the Roman army, the enemy waged a great battle, striking at the Romans, destroying them with great slaughter and driving them in front of themselves, as fugitives. But the enemy had seized a narrow pass before them and so put the Romans to the sword. The Romans were barely able to save their lives in the strongholds of the land of Thrace. The enemy had arrested Mushegh Mamikonean, bound him to a tall tree in the forest, and killed him. On that day a multitude of the naxarrs and troops of Armenia were killed. Yet another time did the emperor order other troops called

up, telling them only "Look out for yourselves."

SEBEOS HISTORY CHAPTER 9.

[Emperor Maurice's order to preach the acceptance of the Council of Chalcedon (that took place from 8th October to 1st November, 451 AD.) in Armenia; the division of the patriarchal throne.]

Once again the emperor issued an order, this time to preach acceptance of] the Council of Chalcedon in all churches of the country of Armenia, and to celebrate communion with his troops. Now the clergy of the churches of Armenia they disregarded the order and remained where they were, not budging. Many of the faithful, however, out of the love of ambition, united with the Romans in communion. Then the kat'oghikosal Throne was divided into two parts. One of the kat'oghikoil was named Movses; the other, Yovhan. Movses was in the Persian sector; Yovhan was in the Roman sector.

Yovhan communed with the Romans but Movses was in no way close to them. The vessels of the entire Church which had been at the church of saint Gregory in Dwin, were taken and placed in a repository in the city of Karin. But Yovhan himself was later taken into captivity to Ahmatan shahastan in the country of the Persians.

SEBEOS HISTORY CHAPTER 10.

Again the emperor's command to assemble the Armenian cavalry. The troops of Sahak Mamikonean and Smbat Bagratuni are taken. Smbat returns to Armenia. The Armenian naxarars' plan. Smbat goes to the emperor with seven men. Smbat falls into arena [combat]. Smbat's bravery there. His liberation, and exile to Africa.

In that period, once again a command issued from the emperor to seek and demand 2,000 select armed cavalrymen from the land of Armenia, to entrust them to two faithful commanders and to dispatch them with all possible haste.

So 2,000 armed men were selected and entrusted to two faithful men: 1,000 to Sahak Mamikonean, and 1,000 to Manuel's son, Smbat Bagratuni. But they did not go by the same road. Rather, they sent Sahak Mamikonean with 1,000 men by way of Sebastia; and Smbat Bagratuni with the other 1,000 soldiers via the Xaghteats' area. Sahak took his troops to the palace, to the king's presence.

Smbat, however, upon reaching Xaghtik', became his own man. For enroute the force became frightened and did not want to go to Thrace [the region of today's Bulgaria] in compliance with the emperor's request. The emperor was informed about the events. By means of hrovartaks and trustworthy emissaries [the emperor] promised Smbat with an oath that he would send him back to his own country with great honour, and quickly. He promised the troops very great honours and goods, and thus did he coax them to a reconciliation. Smbat's army went united before the emperor. The emperor armed the troops, decorated them, and sent them to the borders of Thrace. He sent Smbat back to their country with great honour and many goods.

Once again the remaining naxarars of Armenia started to unite, seeking to stop serving the Roman emperor. They also wanted to enthrone their own king so that they too not go to Thrace to die, but rather they planned to stay where they were and die upon their own soil. But there was disunity in their councils regarding what they established. And some of them went as informers taking the story to the emperor's ears. Then the rebels dispersed here and there eluding the Roman forces.

In that period imperial ambassadors arrived with edicts. They seized Smbat and seven other men and took them before the emperor. Investigating them in front of the multitudinous public, the verdict was passed that Smbat be stripped and thrown into the arena. Smbat possessed a gigantic size; he was handsome, tall of stature, broad-shouldered with a body as hard as a fist, or the ground. He then was mighty and martial and had displayed his bravery and force in numerous wars. Such was his strength that once when riding on a large and powerful horse, passing through a dense forest of pines and other strong tress, Smbat seized a branch of the tree, energetically wrapped his torso and legs around the horse's middle and lifted the horse bodily from the ground. When all the troops saw this they were awestruck with wonder.

So they stripped Smbat, dressed him in trousers and threw him into the arena to be eaten by the beasts. They released a bear on him. As soon as the bear was opposite him, Smbat shouted in a great voice, attacked the bear, punched its forehead with his fist and killed it on the spot. Second, they released a bull on him. Smbat seized the bull by the horns, shouted powerfully and, when the bull wearied of the fight, Smbat wrenched its neck and crushed both horns on the bull's head. The bull weakened, and drawing back, took to flight. But Smbat ran after the bull and seized it by its tail and worked on the hoof of one of its legs. The hoof came off in his hand, and the bull fled from him, lacking a hoof on one leg. The third time, they released a lion on him. When the lion was attacking him, Smbat was aided by the Lord, for he seized the lion by the ear and jumped astride it. Seizing the throat, he choked and killed the lion. Then the clamour of the vast mob filled the place, and they sought the emperor's mercy on Smbat.

Tired from the combat, Smbat sat on the dead lion to rest a little. The emperor's wife threw herself at the emperor's feet, requesting mercy for him. For previously the man had been dear to the emperor and to his wife and the emperor had styled him his adopted son. The emperor was astounded by the man's strength and endurance; and when he heard the entreaties of his wife and all the palace, he ordered that Smbat be pardoned.

Then they took him to the bath for washing. They washed and clothed him, invited him to dine at court, and revived him with food. After a short time, not because of any evil will of the emperor, but from the slander of envious people, the emperor ordered Smbat's men placed on a boat and exiled to a distant island. And he ordered that Smbat be taken to Africa with them and made tribune of the troops there.

SEBEOS HISTORY CHAPTER 11.

[The summoning by king Xosrov to Asorestan of those naxarars whom the Hamarakar had left. The stationing of their troops at Spahan.]

As I mentioned above, in the Persian sector were naxarars and troops which the Hamarakar had left there and departed, pending an order from Court.

At that time, peshaspik' arrived with edicts, summoning them to court all together. The following are the naxarars and troops which went united to the court of Xosrov, king of Iran, each [naxara] with his brigades and banner, in the sixth year of Xosrov's reign: (1st) Gagik Mamikonean, Manuel's son, (2nd) Pap Bagratuni, son of aspet Ashot, (3rd) Xosrov, lord of the Vahewunik', (4th) Vardan Artsruni, (5th) Mamak Mamikonean, (6th) Step'annos Siwni, (7th) Kotit, lord of the Amatunik and others of the naxarars among them. They reached Asorestan where the royal house was, and went before the king. The latter received them with delight, exalting them with noteworthy, lavish honours. He ordered the grandee princes to be kept at court, that court stipends be arranged for them, a dwelling place for each, and that they be summoned daily to dine at court. Xosrov ordered that their troops be stationed in the Spahan land, and he sustained them with affection and all spontaneity.

SEBEOS HISTORY CHAPTER 12.

[Xosrov judges his uncle Vndo. The killing of Vndo. Vstam flees to war with Xosrov, and he rules in the Parthian areas.]

In this period king Xosrov took it into his head to seek vengeance from those naxarars who had slain his father. First he wanted to judge his mother's brothers. He gave the order to arrest that Vndo, about whom I spoke earlier, to bind and kill him. However, Vndo's brother Vstam was not at court then. Although Xosrov summoned him with entreaties and many persuasive words, so that Vstam would not find out about his brother's death, nonetheless, he learned about it somehow. Thus he did not fall into Xosro's deception; rather, he went to the secure Gegham country as a rebel, and subdued all of their troops to his command.

Vstam went raiding in the area of Rey, looting all the many lands of the kingdom of Iran. Then king Xosrov took his troops and troops from the emperor, and went against him. The battle between them occurred in the land of Rey, and no small feats of bravery were worked by the Armenian troops [hayakoyt zawrats'n]. When the king saw this, he was even more amazed.

And when the rebel was unable to resist, he secured himself in the mountains. Thus each side returned to its place, neither having triumphed. The rebel Vstam went to the secure Gegham country whence he went to the Parthian area, to his own native country of rule, so that the troops there submit to him, then he planned to return.

The king went to Asorestan reaching his own court residence. The naxarars of Armenia were with him.

SEBEOS HISTORY CHAPTER 13.

[Death of the Armenian princes, rebellion of their troops at Spahan; the destruction of the country, seizure of the treasure and going to Vstam.]

At that time death came to the princes of Armenia. Gagik Mamikonean and Xosrov, lord of the Vahewunik', died at court. Mamik Mamikonean, who had been released to Armenia for troops died a few days after reaching the city of Dwin. Meanwhile, Step'annos Siwnik' was fighting for the tanuterut'iwn with his father's brother, Sahak. Sahak wrote a document calling for Step'annos' death which he sealed with [his] ring and of the House of the bishop, and with the rings of yet other princes of Siwnik', to remind the king about the danger of their rebellion. Then the king gave the order to bind Step'annos and to put him in prison. They beheaded him on Easter day itself, in Easter week. The king sent Kotit to Nisibis as an emissary, but commanded cavalrymen to lie in ambush in the field, and, like bandits, to attack and kill him on the road. Now when their troops (which were stationed in the Spahan land) heard about these events, they rebelled and devastated the country. They took the court treasury, which was in the house of the hamarakar and which was amassed from the taxes of that land. Taking the road, they went to the secure Gegham country. The perozakan troops caught up with them. Some of them were killed by the rebels' swords, some fell upon their own swords to avoid being captured. Some, escaping by a hairbreadth, got away to the secure Gegham country. But since the rebels did not encounter Vstam, they left for the country of the Parthians, and presented themselves before him.

SEBEOS HISTORY CHAPTER 14.

[Xosrov gives Smbat Bagratuni the marzpanate of Vrkan [Hyrcania] and greatly exalted him. Smbat improves the land of Hyrcania through spiritual and political education.]

In that period Smbat Bagratuni became pleasing to king Xosrov's eyes. Xosrov gave him the marzpanate of the country of Hyrcania; made him prince over all of those areas besides; exalted him vet more with honours and authority; loaded him with gold and silver; adorned him in gorgeous robes of honour; gave him the belt and sword which had belonged to his father, Ormazd; assembled under his authority the Persian and Armenian troops and ordered him to go to the country of his appointment.

At that time there were some countries which had rebelled from the king of Iran, namely, Amagh, Rhoyean, Jrechan and Taparastan. Smbat defeated them in battle, striking with the sword, and putting them in the service of the Persian king. He built up the entire country of his marzpanate, for it was in ruins. In that land were a people who had been captured from the country of Armenia and settled at the edge of the great desert which is in the area of Turk'astan and Delhastan. They had forgotten their own language, learning had weakened and the order of the priesthood had become reduced. There were also Kodreats' people there, who had been captured along with our own men. And there were not a few there from lands subject to Roman authority and from the Syrian area.

The Kodreats' people were not believers but a great light dawned on the Christians. They became confirmed in the faith, studied learning and language, and established in the order of priesthood of that land a certain elder from among them named Abel.

SEBEOS HISTORY CHAPTER 15.

[Vstam comes to Asorestan to kill Xosrov and take the kingdom. His death from the treachery of Pariovk, king of the Kushans. The small battle in the land of Hyrcania.]

In that period Vstam subjected to himself two kings of the Kushans, Shawg and Pariovk. He gathered all the troops in the East and went to Asorestan with a large and very powerful army, to kill Xosrov and take his kingdom for himself. Vstam's troops were at a distance from him, on the right and left, while the Kushan king Pariovk was to provide assistance from behind him. But then the deceitful king of the Kushans got the idea of going before Vstam with a few men, where he dismounted the horse and bowed to the ground seven times. Motioning him forward, Vstam ordered him to mount again. [But Pariovk] had placed an ambush for him on the road. Pariovk said: "Order the multitude to leave you, for I would have secret words with the king." However, not sensing Pariovk's treachery, Vstam ordered the people to depart. As the two of them were going along the way, talking, suddenly the ambushers sprung out of their place of concealment, and attacked and killed Vstam. Pariovk had stipulated the time with his troops, and he now quickly notified them. The troops came up and captured Vstam's wife, all his bags and baggage, and then turned quickly and departed.

After some days had passed, all of the troops were informed, and they split away from each other, being as it were, abandoned, each one going to his own place. The troops of Geghum which were with [Vstam], similarly, departed and quickly reached the strongholds of their own land. And those Armenian men who had rebelled from Smbat [or: had rebelled in Ispahan] and gone over to Vstam, were among them. They went to the country called Komsh which is on the other side of the mountain which separates it from Hyrcania, and reached the village named Xekewand.

Shahr Vahrich and Smbat, marzpan of Gurgan, went against them with many troops. The Geghumk' troops were not more than 2,000 men. There was a battle in that country. They struck at the Persian troops, put them to flight, killed many, arrested many, then turned back, encamping near the battlefield. Those men from Armenia were with them. Many of the Persian troops and the Armenians who were with marzpan Smbat died.

SEBEOS HISTORY CHAPTER 16.

[Discovery of a fragment of the Cross.]

Three months prior to this battle, a vision appeared to a certain man named Yovsep'. He said: "A man with a wondrous appearance came and said to me, 'A battle will occurr in three months in which many people will die. Go to the site of the battle, and let this be a sign for you. For you will see a man lying on the ground whose body glitters among all the corpses. Take whatever you find on him, and take care not to forget, for he / it is a miraculous thing." " Yovsep arose and departed. When he reached the place, he found things as they had been related to him in the vision for [the man] and all the corpses had been stripped, and the man had a chestnutcolored fur [or: a leather bag (shagoyr mashkeghen)] around his shoulders; his body was among the corpses. Yovsep took the fur and discovered that it contained a silver box with a cross in it fashioned from a large fragment of the Lord's Cross. He made the sign of the Cross over himself with this, took it and went after his comrades.

All the troops left that place and went to the strongholds of their land. Then the king requested that Vahrich go home, and he sent great thanks to Smbat for he fought sincerely and was beaten and did not leave the place. He fled only after everyone else had fled.

SEBEOS HISTORY CHAPTER 17.

[Smbat fights with the enemy and triumphs. He is more honoured with estimable gifts and honours than all the other marzpans. Smbat's son, named Varaztirots', is appointed to the office of the king's cupbearer. Construction of the church of saint Gregory. Enthronement of the kat'oghikos.]

The next year, all the brigades of the enemy assembled and went to the district of Taparastan. Smbat too massed all his troops and went against them in war. And the lord God betrayed the troops of the enemies into Smbat's hands and killed them all with the sword. Those who survived went as fugitives to their own place. Now those who were with them requested an oath and conditions and came before Smbat. That Yovsep' was among them, and related the vision and the many signs which God had worked among the barbarians. Yovsep' had his find with him. Then Smbat arose and kneeled before him, took the fragment of the Cross, made the sign of the Cross, and then gave it to a certain prominent man named Mihru from the Dimak'sean House whom [Smbat] had put in charge of his House as a loyal man and executor of his orders. He gave it to the church which priests kept at his court.

Then the king sent a hrovartak expressing great satisfaction [with Smbat], and exalting him with honour, above all of the other marzpans in his lordship. He sent him cups of gold, royal clothing, and golden diadems set with precious stones and pearls. Smbat's son, whose name was Varaztirots', had been raised by Xosrov as though he were one of his own sons, elevated over all at court, and appointed to the office of cupbearer, serving wine to the king.

Smbat held the marzpanate of that land for eight years. Then a command came to summon him with great exaltation to the royal court, and [the king] ordered him to go and see his own country in the 18th year of Xosrov's reign.

Now [Smbat] requested a command from the king [permitting him] to build the church of saint Gregory, which was in the city of Dwin. Because the blessed kat'oghikos Movses had died, and no vardapet was there, Smbat hurried even more to request the king's order. When the order reached his country, [Smbat] concerned himself with the great [kat'oghikosal] throne so that they set up an overseer, a caretaker of the church, and a director of its salvation. They seated Abraham, bishop of the Rshtunik' on the patriarchal throne. Then they commenced laying the foundation of the church. Smbat assembled architects skilled in working stone, appointed trustworthy officials over them, and ordered that the work be brought to a speedy conclusion. The overseer of the fortress and [Armenia's] marzpan wrote a complaint to the king, saying: "The church is too close to the fortress and will be damaged by enemies.'

The king's reply arrived, saying: "Pull down the fortress and build the church in that same spot." Amen.

SEBEOS HISTORY CHAPTER 18.

[Smbat is summoned to the Persian court and receives the honour of the lordship (tanuterut'iwn) [and of being] called Xosrov Shum. He persecutes the Kushans (who reigned the areas east of Persia). The killing of Datoyean. Once more Smbat and the Armenian naxarars go against the Kushans and Hepthalites. A certain wrestling match. Smbat triumphs and goes to the court with great glory.]

When winter had passed and spring arrived, messengers came to Smbat with hrovartaks summoning him to the royal court with great pomp. [Smbat] went before the king at the dastakert called "the great dastakert." Leaving the hall, he resided [nsti] in Bob and in Bahghak.

Then the king gave him the tanuterut'iwn known as Xosrov Shum. He adorned him with gorgeous clothing, in a hat and muslin robes embellished with gold; he exalted him with unbelievable honours, a bejewelled camp, troops, and silver thrones, and gave him charge of the lesser diwan of the land. He gave him four-toned trumpets and guards for his court selected from the soldiers at court. He assembled under [Smbat] an enormous force in the eastern country of the Kushans; and he ordered Smbat to make whomever he wanted the marzpan.

Now Smbat departed and reached the nearby country of his first rule, Komsh. He summoned the troops of his own countrymen from Hyrcania, and then went directly to the East.

Here are the names of the princes of the Armenian naxarars who were with Smbat, each with brigade and banner: Varazshapuh Artsruni Sargis Tayets'i Artawazd, Vstam, and Imayeak pahuni Manuel, lord of the Apahunik' Vrham, lord of Goght'n [Vrham Goght'neats' ter] Sargis Dimak'sean Sargis Trpatuni and other naxarars. And he had some 2,000 cavalrymen from the land of Armenia. Smbat saw that the Kushans' forces had spread across the entire country, raiding. But as soon as they heard about his reputation, they assembled and departed. [Smbat] went after them and quickly caught up. Now as soon as they observed that he was upon them, they turned and fought, clashing with each other in battle. The forces of the Kushans took to flight and were routed by the forces of Xosrov Shum. Many of them died, while many fled. Then Smbat again camped at Apr Shahr and

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3292 in the district of Tos. He himself with 300 men stayed in the town called Xrhoxt.

Then the kings of the Kushans requested aid from the great Khaqan / Qaqan (Xak'an), king of the northern parts. A mob of 300,000 came to their aid. This force crossed the Vehrhot river which arises from the Ewighat country, T'urk'astan crossing Dionos ep'esteays [Abgaryan, p. 102, has emended this to yerkre Ewighatay, zGimnosp'esteays..."the Gymnosophists"] Shamn and Bramn and flows to India. The force settled on the banks of the river, and spread out, raiding, to the west. Unexpectedly, they reached and besieged the town, for the village had a bulwark of fortification around it.

Smbat gave an order to the 300 men to fall upon the fortress which was in the town. He himself mounted, taking along the following three men: Sargis Dimak'sean, Sargis Trpatuni, and a certain arms-bearing mounted villager named Smbatik. Suddenly coming upon its entrance, they crushed the might of the mob and departed. The 300 men who were about the fortress in the town went against his troops. And the commander of his troops was a certain Persian prince named Datoyean, by the king's order.

Now despite the fact that Smbat (who is Xosrov Shumn) sent to him, telling him to evade them, Datoyean did not want to listen; rather, he went against them in battle. They struck at the Persian troops, putting Datoyean to flight, and then spread out, raiding as far as the borders of Rey and the district of Aspahan. After devastating the entire country, they turned back to their army; and a command came from the great Khaqan / Qaqan (Xak'an) to Chembux to recross the river and to return home. Now a certain principal naxarar named Shahrapan Bandakan arrived from the court to investigate Smbat and Datoyean. All the surviving troops vindicated Smbat; but Datoyean was taken in shackles to the court and was killed by the king. Then Smbat assembled troops and again armed [them] and called up many other troops [g66] to aid him, after which he went against the Kushan people and the king of the Hepthalites. The latter with great preparation arose and went against him. They reached the place of battle and massed against each other. The king of the Kushans sent a message to Smbat, saying: "What good is it going into battle with such a tumultuous mob, exhausting our forces. How shall our bravery be fathomed? But come, let you and I fight alone and compete, and today my bravery will be revealed to you." And he thumped himself with his hand and said: "Behold I am ready to die." With great speed the two prepared to attack, and approached each other. In the midst of the two armies they battled each other. But they were unable to defeat each other quickly for both were failing in strength, and heavily armed. But then aid came from On High. Smbat's spear pierced the vertewamut bahlik [?] and the security of the Kushan king's armor, and because Smbat struck him forcefully, he fell to the ground, dead. As soon as [the Kushan king's] forces saw what had happened to their king, they were horrified and turned to flight. Smbat's troops pursued them, raiding as far as Bahl shahastan of the Kushans, looting the entire country: Harew, Vaghages, all Toxorostayn and Taghakan. They also took numerous fortresses which they pulled down, and then returned in great triumph, with much booty. They went and encamped in Marg and in the district of Margrhot.

Messengers bearing the glad tidings quickly reached king Xosrov relating in full the bravery displayed by Smbat. King Nosrov rejoiced with exceeding delight. He ordered that a huge elephant be adorned and brought to the chamber. He commanded that [Smbat's son] Varaztirots' (who was called Javitean Xosrov by the king), be seated atop the elephant. And he ordered treasures scattered on the crowd. He wrote to Smbat a hrovartak expressing great satisfaction and summoned him to court with great honour and pomp.

SEBEOS HISTORY CHAPTER 19.

[Smbat dies peacefully. The Armenian naxarars rebel from the Persians and go to serve the king of the north, the Khaqan / Qaqan (Xak'an).]

When Smbat) was about one day's journey from the royal court, the king commanded all the naxarars and his forces to go before him. He ordered his aides to take before Smbat a steed from the court stable decked out in royal trappings. Smbat went into the king's presence with great splendor and glory.

Now when the king saw him, he received him with joy, extending his hand which Smbat kissed, prostrating himself. Then the king said to him: "You served loyally, and we are even more satisfied with you. From now on, do not tire yourself by going to battle. Rather, stay close by. Take, eat, and drink, and partake of our joy." Smbat was the third naxarar in the palace of king Xosrov. But after a short while Smbat died in the 28th year of Xosrov's reign [618-619 AD]. His body was taken to the country of Armenia, to his native place of rest, and they placed it in a tomb in the village of Dariwnk' which is in the district of Gogovit.

Then [the naxarars] rebelled and went into the service of the king of the northern regions, the great Khaqan/Qaqan, by means of Chepetx of the House of Chen [The text may be

defective here, and the translation of this sentence is tentative. The sentence lacks a subject.]. Then they went from east to west via the northern regions to join with the forces of that Chepetx, by order of their king the Khaqan / Qaqan. Going through the Choray gate with a multitude of troops they went to give aid to the Roman emperor.

SEBEOS HISTORY CHAPTER 20.

[The rebellion of the great patrician Atat Xotxorhuni, and his death. The Persian and Roman borderlords.]

Now what shall I say about another rebellion, that of Atat Xorhxorhuni? He was a great patrician, as a result of which the emperor ordered him summoned to the palace. He went to him accompanied by 17 men. The emperor exalted and glorified him and those with him by a fitting and attractive reception, and gave him gold and silver vessels and an extremely large amount of treasure.

The emperor ordered him to go to his forces in Thrace. Taking leave of the emperor Atat departed. While traveling along the road he had the idea of rebelling and going over to the Persian king. Departing from the road he went to the seashore where he encountered a boat. He said to the boatsmen: "Take me across to the other side, for I have been sent on important work by the emperor." After cajoling the boatsmen, they took him across. In a great hurry he quickly reached the country of Armenia. No one knew of his route until he was quite a distance from the shore. But then somehow they learned of his departure. Troops from city to city went against him but were unable to resist. Enroute Atat battled eighteen times and was the victor in every instance. Nonetheless, his forces were depleted. He went in haste and reached Naxchawan. The Persians received him and he secured himself into the fortress

King Xosrov was informed about what had happened and sent against the Romans Parsayenpet with troops. As soon as the force approached, the Romans left the city and departed. Atat quickly went to the Persian king who received him affectionately, exalting him with honours, giving him treasures, and commanding that he be given a stipend from the court treasury. One year later Maurice died and Phocas ruled [602-610

One year later Maurice died and Phocas ruled [602-610 AD]. Atat planned to rebell and go to the Roman emperor. He began to prepare horses and to ready armaments and attract rascals to himself. News of this reached the king's ears. He ordered Atat to be bound hand and foot and beaten to death with clubs.

These are the names of the borderlords in the country of Armenia and the city of Dwin in that sector of the country under the lordship of Iran in the years of that peace: Vndatakan Nixawrakan. The Persian troops killed him at Dwin and themselves went as rebels to Geghum. Merkut, Yazden, Butmah, Yeman. Now in the Roman sector the borderlords were: Yovhan the Patrician, Heraclius' general Suren until thirteen years of peace had elapsed.

Then the emperor issued an order which said: "Thirty thousand cavalrymen are my levy for the land of Armenia. Let thirty thousand families be assembled for me there and settled in the land of Thrace." He dispatched Priskos to Armenia to see to this matter. But when he arrived, news of a great disturbance reached him, and Priskos arose and departed with incredible haste.

SEBEOS HISTORY CHAPTER 21.

[The killing of emperor Maurice and the reign of Phocas. The rebellion of general Erakghes (Heraclius) of Alexandria and general Nerses of Syrian Mesopotamia. Urha (Edessa) is besieged by the Romans and the city of Dara is besieged by Xosrov. Troops are mustered from the Persian sector of Armenia and prince Juan Veh is made their commander. He comes to Edessa and takes Teodos. The destruction of Dara. The Romans take Edessa; general Nerses is killed.]

In the 14th year of king Xosrov and in the 20th year of Maurice's reign, the Roman army which was in Thrace rebelled from the emperor and enthroned as their king a certain man named Phocas. Going together to Constantinople, they killed the emperor Maurice and his son and seated Phocas on the throne of the kingdom. Then they themselves went to the Thracian area to oppose the enemy. Now the empeor Maurice had a son named Theodosius, and a rumour spread throughout the entire country that [the Roman emperor] Theodosius had escaped and gone to the Persian king. Thus there was no small agitation in the lordship of the Romans, in the capital city, in the city of Alexandria in Egypt, in Jerusalem and Antioch and in all parts of the country, people took up the sword and killed one another.

Emperor Phocas ordered all the rebels who wavered [in their loyalty] to his rule to be killed. Many were slain there in the capital. He dispatched a certain prince Bonos with troops against Antioch, Jerusalem, and all parts of the land. He went and struck Antioch and Jerusalem and indeed the entire multitude of cities in that country were consumed by the sword.

Then the general Heraclius who was in the Alexandria area rebelled from Phocas along with his own troops. He forcibly

detached the country of Egypt from Roman control. In Syrian Mesopotamia general Nerses also rebelled. Together with his troops he entered and took the city of Edessa. But a Roman force came against him and besieged the city and Nerses' troops.

When king Xosrov heard about this, he assembled the entire multitude of his troops, went to the West, reached the city of Dara which he invested and besieged and started battling with. In the regions of Armenia, troops were assembled, a certain great prince, Juan Veh, being their commander. Then king Xosrov divided his forces into two parts: one part he left around the city; with the other he himself went against those forces which were besieging Edessa. He came upon them at dawn, unexpectedly. Some were slain by the sword; some took to flight; some (who had gone into the Euphrates river for security) died there; some were pursued. King Xosrov approached the city gate, so that they would open it and so that he might enter. Now Nerses dressed a youth in royal garb, placed a crown on his head and sent him to Xosrov, saying: "This is Theodosius, emperor Maurice's son. Have mercy upon him, just as his father had mercy on you."

King Xosrov received him with great delight, departed, and went to the city of Dara. He kept Theodosius with him in royal honour. Xosrov besieged Dara for one and a half years. He dug beneath the city walls, demolished the wall, and took the city, putting everyone to the sword. He looted the city, then went to Ctesiphon, since his troops were worn and wasted from battle. But another force from 'Constantinople came upon Edessa, fought with and took the city. They seized and killed Nerses, and shed blood there.

SEBEOS HISTORY CHAPTER 22.

[The Persians and Romans battle in the plain of Shirak, and the Romans are defeated. Another battle takes place in Tsaghkotn. The Romans are defeated, T'eodos Xorxorhuni surrenders, giving the fortress to the Persians. T'eodos Xorxorhuni's death.]

Now Juan Veh, who had been dispatched to the Armenian area with his troops, reached the city of Dwin in Ayrarat district in wintertime. He stopped there, resting his forces until spring came.

Meanwhile the Roman troops were assembled in the town of Eghevard. The Persian troops came against them and a battle took place in the plain of Eghevard in which the Romans struck at the Persians and severely defeated them. The general Juan Veh was slain in the fight while the survivors fled, pursued. The Romans looted the Persian army and then returned to their camp on the riverbank called Horhomots' Romans' meadow.

The next year [in 602/603], while king Xosrov battled with the city of Dara, another Persian force was assembled in Armenia under the command of Datoyean. The Roman army assembled in the plain of Shirak, in the village named Shirakawan. They located there and staved some days embroiled in internecine strife, terrified of an attack by the foreign enemy. The Persian troops came upon them, roaring like lions. Now the Romans abandoned their campsite and crossed the river to the plain called Akank', pursued by the Persian troops which caught up with them. The battle took place in the village named Getik. As the two sides were approaching each other to fight, the inhabitants of the district had gathered in Ergina fortress. A multitude of youths streamed out of there armed with scythes and swords, and fell on the army's rear causing great slaughter, leaving wounded men, and taking loot and booty, returned to their fortress

When the two armies met in battle, the Persians put the Roman forces to flight before them. Pursuing them, they killed many men, filling the plains and roads with corpses. Very few survivors managed to flee. The Persians took the loot and returned to their army. When they observed the evil that had been wrought, they attacked the fortress in a mob and took it. Many they killed with the sword, many out of fright hurled themselves from the precipice; some fled through the gate which faced the river, while all the rest were taken into slavery. On that day 33 villages around the fortress were similarly enslaved. When the Persians had gathered up all the loot of the district, the troops turned and went to Atrpatakan.

Then Senitam Xosrov arrived. The Roman army was settled in Tsaghkotn close to the village called Angegh which the Aratsani river flows through, and on the other side they had pulled apart the village and drawn its fortification around themselves. Their commander was T'eodos Xorhxorhuni. The Persian troops came and encamped near them, to their rear. At first, terrified, the Romans spoke of peace with them, recommending that they not fight and instead they would leave them the fortress and depart peacefully. But as they were united, the matter went no further. Rather, confident of their fortification, they thought they might accomplish something. The next morning the Persian troops went against them. None of the Romans had armed himself or saddled his horse. If anyone did so, the retainers/children of the princes [mankunk' ishxanats'n] ran over and disarmed the men, tormenting them severely and slashing the horses' saddles with their swords.

The Persian troops came and faced them from the plain area. They released a multitude of bowmen who emptied their quivers shooting at them and piercing all the men and horses with their arrows. The horses, which were tied to mangers at the entrances to the tents, became frightened and trampled on all the tents and army. The enemy broke through the fortification and fell upon the army causing incredible destruction. The Romans broke through at one spot, some on foot, others mounted on the kicking horses, and fled. T'eodos Xorhxorhuni fortified himself in the fortress, while that evening the Persians settled into the Romans' campsite. The next morning the Persians dispatched a messenger telling them to quit the fortress and depart with all their baggage and equipment. They agreed to do so. On the third day [the Romans] opened the city gates and all departed as had been agreed. But the Persian commander summoned T'eodos Xorhxorhuni and told him: "I do not have the authority to release you without a royal command. Rather I must have you taken to court. I shall write to the king all the good things about you, how you labored so sincerely and lovally to betray the Roman troops into our hands; how you came into Persian service willingly." And he did write such things and had him taken to court. King Xosrov received T'eodos affectionately, arranging a stipend and money for clothing for him from the treasury. Subsequently, however, as there was a suspicion of treachery about him, he ordered him killed. Now the fortresskeeper residing at Angegh fortress assembled his troops and went in person deeper into the countryside which he subjugated.

After this there was another battle in the Basen area. The Persian commander struck at and chased the Romans who fled back to their own country. He took the cities of Angegh, Gaylatus, Ergina, and the city of Tsxmkert in Dara. Receiving a command from the king, he departed.

SEBEOS HISTORY CHAPTER 23.

[Xosrov sends a large force to Asorestan under the command of Erhazman Xorheam, and [another army] to Armenia under Ashtat Yeztayar accompanied by the emperor Theodosius. Erhazman Xorheam subdues all of Mesopotamia. Ashtat wars with the Romans and subjugates the district of Karin. Shahen battles with the Romans and is victorious. The inhabitants of Karin are deported to Ahmatan Shahastan. Death(s) of the Kat'oghikoi. Shahen takes Caesarea, and Vasak Artsruni is killed.]

King Xosrov left Dara and again released his troops. Once more he called up another multitude of soldiers, dispatching a large and extremely powerful army to the Asorestan area commanded by Xorheam, called Erhazman. Xosrov commanded them as follows: "Whomever comes into [my] service, receive with affection and keep in peace and prosperity; but kill with the sword whomever resists and makes war." He sent Ashtat Yeztayar with a large army (including emperor Theodosius, called Maurice's son) to Armenia. Xorheam took a multitude of soldiers and went to Asorestan, reaching Syrian Mesopotamia where he besieged and battled with the city of Edessa. Because of the multitude of the troops and the success of the Persian battles, and because the besieged had no hope of salvation from any quarter, the Edessans spoke of peace requesting an oath so that the Persians would not ruin the city. They opened the city gates and submitted. Similarly Amida, T'ela, Resaina (Rhashayenay) and all the cities of Syrian Mesopotamia voluntarily submitted and were kept in peace and prosperity. The Persian troops then went to the city of Antioch which also submitted voluntarily together with all the surrounding] cities and their inhabitants, escaping from the sword of Phocas

Now Ashtat Yeztayar came to the borders of Armenia in the 18th year of the reign. The Roman army was assembled in the district of Basen and again frightfully attacked him. A great battle took place in Du and Ordru. The Roman army struck and was defeated with great destruction. Many men died in the battle, and there was no counting the number of corpses on the plain. Ashtat pursued them as far as the city of Satala and then he himself encamped around the city of Karin with which he began to fight. The inhabitants resisted somewhat from within causing no small casualties to those outside. But then the emperor Theodosius came forward and said to the inhabitants: "I am your king," whereupon they consented and opened the gates. The principal men of the city emerged and were presented to him, then returned to the city and convinced them that he was indeed Maurice's son, Theodosius. After this the inhabitants opened the gates and submitted. Ashtat set up guards there and then went and captured the city of Hashteank'. Dzit'arhich, and Satala, Arhistia and Nicopolis, and then departed. Then Shahen the Patgosapan arrived, passed by the city of Karin, and Shahrayeanapet came to Dwin, ostan of the marzpanate. Now Shahen went and encountered the Roman troops in the district of Karin. Engaging in battle, he struck them with the sword, putting them to flight and chasing them from the land.

Now in the 21st year of his reign [611 AD] king Xosrov ordered Shahen to move the inhabitants of the city of Karin and settle them in Ahmatean shahastan. The venerable aged kat'oghikos was among those led into captivity, together with all the Church vessels. He died there. His body was brought back to Armenia to the village of Awan and the church which he himself had built. That same year the venerable kat'oghikos Abraham died. He was succeeded on the patriarchal throne by Kumitas, bishop of Taron who was from the village of Aghts' awan. During his tenure the construction of the church of saint Gregory was completed.

In the 20th year of king Xosrov [610 AD], Shahen raided through the western areas, going to Cappadocian Caesarea [today's Kayseri]. Now while the Christian inhabitants of the city arose and departed, the Jews went before Shahen and submitted. He remained in that city for one year. The Persians seized Vasak Artsruni, son of Sahak nahapet of the Artsrunids, and crucified him opposite the city gate. Despite the fact that he had wrought much carnage among the Persian troops, nonetheless, all the Persian troops mourned him because of his bravery and manliness and because he was a powerful and tall youth. They mourned, especially because he had been nourished and trained among them. That is what became of him.

SEBEOS HISTORY CHAPTER 24.

[Emperor Flavius Heraclius goes to Asorestan to fight against the Persians. The great battle near the city of Antioch in which the Romans were defeated. The country of Palestine submits to the Persians. An Persian ostikan takes up residence in Jerusalem. His murder. The great destruction of Jerusalem by the Persians by sword and fire. The holy Cross is captured.]

In that period, in the 22nd year of the reign of Xosrov [612 AD], Heraclius gathered the troops in the area of Egypt, went by sea to Constantinople, killed the emperor Phocas and seated his son Heraclius on the throne of the kingdom, and pacified the entire country.

Now as soon as Heraclius ruled [Heraclius I, 610-641 AD], he dispatched messengers with great treasures and edicts to king Xosrov, requesting peace with great entreaties. King Xosrov, however, did not want to listen. He said: "That kingdom belongs to me, and I shall enthrone Maurice's son, Theodosius, as emperor. As for Heraclius, he went and took the rule without our order and now offers us our own treasure as gifts. But I shall not stop until I have him in my hands." Taking the treasure, Xosrov commanded that his envoys be killed and he did not respond to his message.

Then Heraclius gathered his troops and encamped around the city of Caesareal, obstructing their expeditions. After assembling troops under the direction of a certain Curator, Heraclius ordered them to be watchful, and then returned to his own place.

They besieged the city of Caesarea for one year and the Persian troops were placed into straits regarding victuals, nor was there hay for the multitude of horses. When warm summer days arrived and the area became filled with green plants, the Persians set fire to the city and forcibly departed, striking at the Romans and pursuing them from behind. The Persian troops then went to the land of Armenia, where they wintered.

The Persian king quickly summoned Shahen to court and ordered him to return to the west in haste. Taking his troops in summertime, Shahen reached the city of Karin. He went against Melitene, took and subdued it. Then he went and united with the army of Xorheam which was in the Pisidia area and at the Ostan of Dwin.

Parseanpet Parshenazdat came and replaced Shahrayenapet; he was succeeded by Namgar Shonazp [or: Namdar Vshnasp], then by Shahrapghan. This latter fought a battle in Pars and was victorious. Then came Chrhoch Vehan [Abgaryan emends this name to Erhoch Vehan.] He followed emperor Heraclius through Armenia as far as the borders of Asorestan. The battle occurred at Nineveh, in which he and all of his troops fell.

Now emperor Heraclius summoned a certain priest P'ilipikos to military service. This P'ilipikos was the son-inlaw of emperor Maurice and had been in the military for a long time, triumphing in battle. But then, during Maurice's reign, he took it into his head to cut his hair and to wear priestly garb, becoming a soldier in the covenant of the Church. Heraclius forcibly made him a general and dispatched him to the East with a large army. Going by way of Cappadocian Caesarea [Kayseri], he reached the Ayrarat district in the country of Armenia and encamped in the plain of the city of Vagharshapat. An urgent order from the Persian king, entrusted to swift, fleet-footed messengers arrived at the camp of the Persian general in the vicinity. With great peril the general forced his troops to pursue them and wipe them out without a trace. With great urgency the Persian troops reached the district of Ayrarat and encamped on the bank of the River Arax wanting to engage in battle the next day. However, that very night P'ilippos went against them in the Nig district, surrounding them from the rear of mount

Aragats. Then he crossed through Shirak and Vanand close to the city of Karin, and arrived at his own borders.

Now because the Persian troops were tired from such a long and dangerous journey during which many of the men and horses had died along the way, and since, therefore, [many] were on foot, they were unable to quickly pursue the Romans. Rather, they stopped for a few days and then proceeded at a relaxed pace passing into Asorestan. They encamped there in the same place they had been previously, expanding both to their right and left. And they ravaged [lastet'an] and seized the entire country.

In that period Heraclius enthroned his son Kostandin [Constantine III, 613-641 AD, as co-emperor], entrusting him to the Roman Senate [in Constanople] and to all the grandees of the palace. He confirmed him on the throne of his kingdom. Together with his brother Theodosius, he assumed the military command, assembled a multitude of troops, and crossed into Asorestan by way of Antioch. A great battle took place in the area of Asia, and the blood of the generals coursed violently to the city of Antioch. The groupings and clashings were severe and the slaughter was great in the agitation. Both sides were worn and wearied in the fight. However, the Persians grew stronger and pursued the fleeing Romans, receiving the victory, in addition to [the renown of] bravery. Yet another battle took place close to the defile leading to Cilicia. The Romans struck the Persians in a front of 8,000 armed men. And they turned and fled. The Persians grew stronger, went and took the city of Tarsus [Tarsos] and all the inhabitants in the district of Cilicia.

Then the entire country of Palestine willingly submitted to the king of kings. The remnants of the Hebrew people especially rebelled from the Christians and taking in hand their native zeal [The translation is uncertain: ew arheal i dzerhn znaxandz hayreni, perhaps "manifesting desire for a or their homeland"] wrought very damaging slaughters among the multitude of believers. Going to the Persians, the Jews united with them. At that time, the army of the king of Iran was stationed at Caesarea [Maritima, the Roman capital] in Palestine [Judaea]. Their general was named Rhazmiozan (that is, Xorheam). He spoke with the inhabitants of Jerusalem so that they submit voluntarilly and be kept in peace and prosperity.

Now first the Jerusalemites voluntarily submitted, offering the general and the princes very great gifts, and requesting that loyal ostikans be stationed with them to preserve the city. However, several months later the entire mob of the city's young braves united [miabaneal amenayn rhamik kacharhats'n`mankunk' k'aghak'in...] and killed the Persian king's ostikans. Then they rebelled from his service. After this a battle took place among the inhabitants of the city of Jerusalem, Jew and Christian. The multitude of the Christians grew stronger, struck at and killed many of the Jews [The pejorative satakets'in is used]. The remainder of the Jews jumped from the walls, and went to the Persian army. Then Xorheam (who is Erhamikozan) assembled his troops and went and encamped around Jerusalem and invested it, warring against it for 19 days. Digging beneath the foundations of the city, they destroyed the wall. On the 19th day [of the siege] which was the 27th day of the month of Marg [The 11th month of the Armenian calandar, corresponding to June] in the 25th year of the reign of Xosrov Apruez [615 AD], ten days after Easter, the Persian forces took Jerusalem and putting their swords to work for three days they destroyed [almost] all the people in the city. Stationing themselves inside the city, they burned the place down. The troops were then ordered to count the corpses. The figure reached 57,000. Thirty-five thousand people were taken alive, among whom was a certain patriarch named Zak'aria who was also custodian of the Cross. The Persians sought for the life-bringing Cross and began to torment the clerics, executing many clerics at that time. Finally the clerics pointed out the place where it was hidden. The Persians took it into captivity and also melted all the city's silver and gold, which they took to the court of the king. Now regarding those who had been arrested, an order was issued by the king to have mercy on them, to build a city and to settle them there. establishing each person in his former rank / profession [karg]. He commanded that the Jews be driven from the city, and the king's order was quickly implemented, with great urgency. They placed a certain archpriest named Modestos over the city. He wrote a letter with the following import to the country of Armenia [The main portion of chapter 25, which we omit, contains Modestos' letter to the Armenian kat'oghikos Kumitas, and the latter's response. These letters concern doctrinal matters. The translation resumes with the latter portion of chapter 25.]

The Construction of the Church of Hrhip'sime

Now in the 28th year of the reign of Xosrov Apruez [618 AD], kat'oghikos Kumitas pulled down the chapel of saint Hrhip'sime in the city of Vagharshapat since it was a very base and gloomy construction, having been built by saint Sahak the patriarch and kat'oghikos of Armenia, son of saint Nerses. It happened that while they were demolishing the chapel

wall, unexpectedly a radiant and matchless pearl was

uncovered, namely the virgin body of the blessed lady Hrhip'sime. She had been martyred by being torn limb from limb. Now since the venerable saint Gregory had sealed the reliquary with his ring, as had the venerable Sahak, kat'oghikos of Armenia, Kumitas did not dare to open it. He too sealed it with his own ring, and indeed he was worthy of sealing such a pearl with his ring, it being the ring of the third of the three true believers.

Which is the pearl that comes not from the sea, but the pearl born from a royal line, nourished in the embrace of holiness and dedicated to God? The righteous long to behold you, and the venerable Kumitas is tenderly in love with you.

The venerable one had a height of nine palms and four fingers. The entire northern area was motivated to come to worship. Many afflicted people received healing for all kinds of pains. Kumitas built the church, and left the venerable [Hrhip'sime's reliquary] outdoors until the moisture of the lime in the wall had dried. Then he placed it in its abode.

Kumitas also raised the wooden roof of the blessed cathedral, repaired the crumbling wall and built a stone roof. This occurred in the years of Yovhank, priest of the monastery of the blessed cathedral.

SEBEOS HISTORY CHAPTER 26.

[Xorheam comes to Chalcedon with a large army to take Constantinople. The emperor's exhortation and gift. The Persians consent to turn back. The Persians again return to 'Constantinople (i Biwzandia). The great naval battle and the Persian defeat. Xosrov's hrovartak to Heraclius. Heraclius goes against the Persians. The battle near Tigranakert and Heraclius' arrival at Cappadocian Caesarea in triumph and with booty. He goes against Xosrov again and battles in the plain of Nineveh where the Persians are defeated.]

In that period it happened that Xorheam went to Chalcedon with his troops and encamped opposite Constantinople. He wanted to cross the straits and capture the capital city.

Now as soon as emperor Heraclius saw the brigand who had come to destroy his kingdom, against his will he exalted the Persians as meritorious and beloved guests, and became friendly. He went before Xorheam with presents and gave gifts to the general and to the very great princes. Heraclius gave the troops salaries, and lunch and dinner for seven days. Then he boarded a boat which was in the sea, and spoke the following words to the Persian troops: "What did you expect to accomplish by coming to this place? Could it be that you regard the sea as the land and would war with it? God, should He so will, could dry up the sea before you. But take care that vou not displease God, and that He not take vengeance on you with the bottomless sea. For God did not give the victory to you because of your piety, but because of our impiety. Our sins did it, not your bravery. What is it that your king seeks from me that he will not make reconciliation? If he wants to destroy my kingdom let him not attempt it. For it was God who established it, and no one is capable of destroying it except (should God for some reason want to) to fulfill God's will. Furthermore [Xosrov] has said that he will enthrone our emperor. Well, let him enthrone whomever he wants, and we will accept him. Now if he is seeking to avenge the blood of Maurice, God took revenge on Phocas by means of my father, Heraclius. But Xosrov is still thirsting for blood. When will he be satiated? The Romans could have slain him, could they not, and done away with the lordship of the Persians, when God delivered him into our hands. On the contrary, he was shown mercy. And now I seek the same from himreconciliation and love. I request three things besides, so hear me out. Quit subjecting the land to fire, the sword, and captivity. Rejoice in your priests [The translation is uncertain: yerets'unts'd awgut gtanek'. Perhaps, "take comfort in your seniority"], for you are not oppressed by famine nor are royal taxes being lost. Behold, I am sending a hrovartak with offerings to your king to request reconciliation from him, and that he make peace with me." Taking Heraclius' gifts, the Persians were persuaded to do as he requested. Now the Persian king received the offerings brought from the emperor, but did not dispatch the emissaries. He ordered his troops to go to 'Constantinople by boat. Organising ships, he started preparing to wage naval warfare with 'Constantinople. A force of sailors from 'Constantinople arose before him, and there was a naval battle from which the Persian forces returned humiliated. Four thousand men were lost on the ships, and the Persians thereafter did not attempt such a project.

In the 34th year of his reign [624 AD] king Xosrov wrote the following hrovartak to Heraclius:

"From Xosrov, the honoured of the gods, lord of every country and king, born of the great Aramazd, to Heraclius, our stupid and useless servant.

"You did not want to give yourself into our service, but rather, you call yourself lord and king, and those treasures of mine which are with you, you spend, and you deceive my servants. Furthermore, having assembled troops composed of brigands, you give me no rest. Did I not, truly, exhaust the Romans? You claim confidence in your God, yet how was it that your troops did not save Caesarea, Jerusalem and great Antioch from my hands? And could it be that even now you do not know that land and sea has been made obedient to me. Now it is only Constantinople which I have been unable to dig up. Yet, I will forgive all your faults. Bring your wife and children and come here, and I shall give you fields, vineyards and olive-trees by which you may live; and we shall look upon you affectionately. Do not deceive yourself with your vain hopes, for how can that Christ who was unable to save himself from the Jews (but was crucified instead) save you from me? For even if you descend to the bottom of the sea, I shall stretch forth my hands and seize you. And then you will see me under circumstances which you would rather not."

Emperor Heraclius took the hrovartak and commanded that it be read in the presence of the patriarch and the grandees. Entering the House of God, they placed the hrovartak on the altar, and prostrated themselves before the Lord, weeping bitterly, so that He see the insults with which His enemies dishonoured Him.

It pleased Heraclius and all the senators to seat Heraclius' small son, Kostandos [Constantine III, 613-641 AD], on the throne of the kingdom. Heraclius prepared himself to take his wife and go East. At that point Kostandin was even more confirmed into the royal dignity.

Then Heraclius prepared with his wife, eunuchs, and princes of the court, and celebrated Easter in Constantinople. On Easter morning he sailed to Chalcedon, commanding his [103] troops to assemble at Cappadocian Caesarea. Then he himself left Chalcedon [which is just on the opposite side of the Bosporus in Asia] came to Caesarea [Kayseri], pitched his tent in the midst of the army and ordered all the troops to be summoned. He read the hrovartak before them and related why he had come there. Now although the troops were agitated by the words, nonetheless they were exceedingly happy that Heraclius had come among them. They wished him victory and said: "We shall live and die with you, wherever you go. May all of your enemies become dirt beneath your feet, and may we wipe them off the face of the earth of our Lord God and exterminate those people who insult Him." With 120,000 men Heraclius departed for the court of the Persian king, travelling via the north, passing opposite the city of Karin. He reached Avraratean Dwin, and Naxchawan, both of which he burned.

Then he went against the village of Gandzak, which he took, destroying as well the altars of the great Fire which they called Vshnasp. King Xosrov urged those of his troops in the Roman district to hasten and come to his aid. Yet although they organised his horses and entrusted them to 104 Shahen the Patgosapan, the army was fatigued and could not resist. Xosrov stored up his treasures at Ctesiphon and prepared to flee. Now the Persian troops hurriedly reached Nisibis. Emperor Heraclius was informed that Xorheam had come to Nisibis. He took his troops and captives and turned through the secure land of Media, reaching P'aytakaran. Xosrov was informed that Heraclius had turned and reached P'avtakaran and wanted to cross into Iberia [Georgia], via [Caucasian] Aghbania / Aghuania. He ordered his general, Shahr Varaz, to get ahead of Heraclius. He quickly reached Ayrarat, crossed to Gardman across from him and encamped facing Heraclius at the other Tigranakert. And Shahen with 30,000 troops arrived and encamped at Heraclius' rear in the awan of Tigranakert. Thus one [army] was encamped in one place, the other, at the other place, while Heraclius' army was between them.

As soon as Heraclius saw that they had trapped him in the middle, he turned upon the troops at his rear, with resolute strength struck at the Persian general, routed him, and went through Tsghuk. He disentangled himself by going into the plain of Naxchawan through the mountains, in wintertime.

Shahr Varaz and his troops, and Shahen, together with those of his men who had escaped, pursued Heraclius. Now the latter forded the Arax river going to the Vrnjunik' awan, and encamped in the fields there. The Persian army caught up, but they were unable to ford the river that day. Heraclius reached Bagrewand and crossed to Apahunik', encamping in the village called Hrchmunk'. Shahr Varaz spread his troops out to Aghiovid and he himself with 6,000 select armed braves went and located in an ambuscade in the district of Archesh, so that he might pounce upon Heraclius' army in the middle of the night.

Heraclius was informed by the spies he had dispatched that Xorheam had arrived and was planning to attack him from the ambuscade. Heraclius, similarly, took select cavalrymen and horsemen and dispatched 20,000 of them on him. Reaching Aghi, he found 500 of the Persian advance-guard and destroyed them. Now one of those Persian cavalrymen escaped, reached Archesh and delivered to Xorheam the bad news that the enemy had come upon him and decimated the peshopa [advance-guard] troops at Aghi. Xorheam became furious with the man and ordered him bound, hand and foot, saying: "Up to the present, Heraclius has fled from me. Now that I have arrived with such an army, should he not flee from me?" But while these very words were in his mouth, the Romans forcefully came upon them, surrounded the city on three sides and set it afire, burning to death multitudes of troops. If anyone was able to flee from it, the Romans seized and killed him. No one survived as all were consumed by the awful fire. Shahr Varaz, however, did escape seated on a horse which swam. Thus did he escape to those troops of his which he had assembled in the district of Aghiovit.

Now Heraclius took the loot and booty of their army and returned in great triumph reaching the area of Caesarea. Shahr Varaz hurried after him. But because the army was fatigued, he thought to go by way of a number of districts to rest and organize the troops. They went into the area of Asia where they spread out and stopped.

Then Heraclius took his forces and returned to the country of Armenia, crossing through Shirak, reaching the ford of the Arax river, crossing it to the awan of Vardanakert, and entering the district of Gogovit. Rhoch Vehan and the Persian troops thought that they had fled. Now he travelled to Her and the district of Zarewand heading straight toward Ctesiphon against Xosrov. Once he had entered the borders of the district of Atrpatakan, news finally reached Rhoch Vehan who took his troops and pursued him to the city of Naxchawan. Thus he went hurriedly, day and night until he approached him. Heraclius went to the far side of Zarasp mountain in the country of Asorestan while the Persians pursued him. The Romans turned west, and went to Nineveh. Other troops came to the aid of Rhoch Vehan from the king's court, the most select men of the entire kingdom. The soldiers ioined together and pursued Heraclius. Heraclius drew them along as far as the plain of Nineveh and then suddenly turned back upon them with intense might. Now there was a fog over the plain, and so the Persians were unaware that Heraclius had turned upon them until the two armies merged.

On that day the Lord so increased his compassion on Heraclius that the Romans struck them as though the whole army was but one man, and they killed the general in battle. The Romans surrounded the survivors and wanted to kill all of them. But the Persians raised a clamour, saying: "Pious and benevolent lord, have mercy on us". Then Heraclius commanded that they be set free. And now it was Heraclius who ordered that the country be raided.

SEBEOS HISTORY CHAPTER 27.

[The flight of Xosrov. Heraclius takes and burns Ctesiphon and returns to Atrpatakan. The killing of Xosrov and his forty sons. Kawad rules and makes peace with 'Constantinople and leaves the Roman borders.]

Now the king of Persia, [Emperor] Xosrov, fled crossing the River Tigris to Vehkawat, severing the ties of the pontoon bridges behind him. Heraclius came and encamped close to the gates of the city of Ctesiphon and burned down all the royal mansions surrounding the city. Then he went to Atrpatakan with all his multitude and equipage, for Heraclius was terrified of Xorheam. Now Xorheam did not go to the aid of king Xosrov but instead went to where he was in the west. Then Xosrov turned to go home and commanded that a pontoon bridge be built. However, the king's women and children, the treasury, and stable of royal horses were at Vehkawat.

Xosrov began to assemble the remaining naxarars speaking to them with extreme criticism, saying: "Why did you not die at the site of the battle, instead of coming to me? Did you, perhaps, think that Xosrov was dead?" Then the Persian naxarars [dukes] decided on a plan of unified action, saying: "Although we survived the enemy, there is no way for us to escape from Xosrov. Come, let us plan something." They then vowed loyalty to one another. They went by night over a draw-bridge to Vehkawat, which they seized. They appointed guards over it, then enthroned Kawad, Xosrov's son. They also had secretly removed the horse by which Xosrov had come to Ctesiphon. Thus, when the outcry of what had taken place reached Xosrov, and when he became filled with dread and horror, and asked for his horse, they did not find the horse in the stable. King Kawad then arrived with all of his troops. And king Xosrov, in a disguise, entered the royal garden and hid himself under some dense hedges. King Kawad ordered a search made and, going into the garden, they found him. They seized Xosrov, sent him to the executioner, king Kawad gave the order, and they put him to death. Regarding Xosrov's children, the naxarars said: "It is not worth letting them live, for they will cause trouble." Then king Kawad gave the order, and all the sons, some forty people, were killed in the same hour. Kawad requested for himself the women. treasury, and royal stable.

Then king Kawad began to consult with the naxarars of his realm, saying: "We must make peace with the emperor, leave all of his borders, and make reconciliation on all sides." They unanimously agreed to do this. King Kawad ordered that a hrovartak [decree] of greeting be written to Heraclius, and that all of his borders be left alone. With this he sent an oath and salt to seal it. He dispatched a certain prince Rhash with very great gifts to confirm the hrovartak based on their unity.

Now when this Rhash arrived, gave the glad tidings, presented the hrovartak and went before them with gifts, emperor Heraclius and all his troops greatly thanked God. Then emperor Heraclius commanded that the multitude of Persian captives and all the troops be set free. He wrote a testament of praise, established peace with an oath, and sent to Kawad a certain one of his principal naxarars [dukes] named Yusdat' together with very great gifts. He also exalted the Persian emissary Rhash, loading him with precious treasures, and dispatched him. He went peacefully back to his own place. And Yusdat' went to king Kawad and presented the hrovartak [decree] and gifts. Once again the terms of peace were confirmed by him, the boundaries were fixed by means of hrovartaks which were sworn to and salt was sealed by Yusdat' in the manner of the first copy, and after the custom of the first kings. In Yusdat's presence Kawad ordered that Shahr Varaz be written to, to assemble the army and return to Persian territory, quitting the Roman borders, though the latter did not want to obey that order. They released Yusdat' laden with treasures, and he departed.

SEBEOS HISTORY CHAPTER 28.

[Smbat's son Varaztirots' becomes a marzpan. The selection and deposition of kat'oghikos K'ristap'or and his succession by Ezr. The death of Kawad and the enthronement of his son Artashir. Heraclius writes to Xorheam requesting the holy Cross from him. The killing of Artashir and the reign of Xorheam. The killing of Xorheam, and the reign of Bbor, Xosrov's daughter. She was succeeded by a certain Xosrov, who was followed by Xosrov's daughter, Azarmiduxt. She was followed by Ormizd. Finally, the reign of Yazkert.]

King Kawad summoned Varaztirots' (son of Smbat Bagratuni, who was called Xosrov Shum) and bestowed upon him the authority of the tanuterut'iwn. He made him marzpan and sent him back to Armenia with all of his father's belongings so that he would keep the land in a flourishing state. When he arrived in Armenia the entire land received him with delight. However, because the venerable kat'oghikos Kumitas had died and the position was vacant, Varaztirots' consulted with everyone to find someone worthy of filling it. Then, at the proposal of T'eodoros, lord of Rshtunik', they selected a certain hermit from the House of Abraham, named K'ristap'or, and seated him as kat'oghikos. He proved to be an arrogant and impious man whose tongue was as sharp as a sword. He stirred up much agitation and intruded the sword between Aspet and his brother, by slander. He occupied the patriarchal throne for two years. During the third year they made accusations against him. With all the bishops and princes assembled, they held an investigation. Two men from K'ristap'or's family came to the trial and testified against him in front of the entire multitude. So they took from him the veil of the dignity of the priesthood, removed him from the order and pursued him with indignities. They swiftly enthroned Ezr, from the district of Nig, as kat'oghikos. The venerable Kumitas had appointed him doorkeeper / warden of the church of saint Gregory. He was a humble and mild man who did not want to anger anyone, nor did unseemly words issue from his mouth

Though king Kawad was planning to make the land flourish and wanted to make peace everywhere, he died after only six months [as king]. They enthroned Artashir who was his son, but a small boy [ca. 628/629]. Then Heraclius wrote the following to Xorheam:

"Your king Kawad has died. The throne of that kingdom belongs to you. I shall give it to you, and to your son after you. Should you need troops I shall send as many as are required, and let there be a yow between you and me in addition to a sworn and sealed document."

Xorheam easily accepted and quit Alexandria. He assembled all his troops at one location and left them there. Then he went to the appointment where Heraclius had told him to be, with but a few men. When Heraclius and Xorheam saw each other they were very joyful. And it was then that Heraclius swore to him that he would give the kingdom to him and to his sons after him, and that he would provide as many troops as necessary. The first thing that [Heraclius] requested of him was the life-giving Cross which he had captured at Jerusalem. Then Xorheam swore to him, saying: "As soon as I reach the royal court I shall make inquiry about the Cross, and have it brought to you. Furthermore, I shall place the border wherever you wish, and confirm it in writing, with seal and salt."

[Xorheam] requested a small force from him, and they parted. Now Xorheam took his multitude of troops and went to Ctesiphon. He ordered some people to kill Artashir the boy-king, and he himself went and sat on the throne of the kingdom. He ordered all those principal men at the court and in the army whom he could not trust to be killed by the sword, while others he had sent to Heraclius in shackles.

Then the venerable Heraclius dispatched loyal men to Xorheam concerning the lordly Cross. The latter sought for it with great urgency and barely gave it to the men who had come. They took it and departed hurriedly. Xorheam also gave them no small amount of goods and dispatched them with great joy.

Now one day Xorheam donned royal garments, mounted a horse, and circulated among the troops, displaying himself. Suddenly, from the rear, they attacked, struck, and killed him. Then they enthroned Xosroy's daughter. Bbor, who was Xorheam's wife. They appointed Xorhox Ormazd, a prince of Atrpatakan, as the commander at court. Now Xorhox sent a message to Bbor, the Bambish [Persian, "queen of queens"], saying: "Be my wife." She accepted, replying: "Come to me at midnight accompanied by but one man, and I shall fulfill your wishes." Arising at midnight, Xorhox took one man and went. As soon as he entered the royal chamber, the court guards fell upon him, attacked and killed him. Bbor, the Bambish, ruled for two years and then died. After her was a certain Xosrov, from the line of Sasan. After Xosrov was Azarmiduxt, daughter of Xosrov. After her was Ormazd, grandson of Xosrov whom the troops of Xorheam strangled. Finally there came to rule Yazkert [ca, 631-652], son of Kawad, grandson of Xosrov, who ruled in fear, since the troops of the land of Iran had split into three parts. The first army was the one in the Persian and Eastern region; the second army was Xorheam's which was in Asorestan; and the third army was in Atrpatakan. However, the centre of the kingdom was at Ctesiphon, and all the Persians universally respected it.

SEBEOS HISTORY CHAPTER 29.

[The return of the Cross to holy Jerusalem. The determination of the boundary between the two kings. Forced by Mzhezh Gnuni, Ezr accepts the Council of Chalcedon. The plot of Mezhezh with Rhatovm against aspet Varaztirots' and the latter's flight. The king swears to him and he goes to the palace and is exalted. The evil plot of At'alarikos with the princes against his father. The exposure of the plot and the plotters' deaths. The exile of Varaztirots'. The bravery of Dawit' Saharhuni, who becomes Curopalate. The deeds of T'eodoros, lord of Rshtunik'.]

Now when the holy Cross of the Lord had fallen to the venerable, pious, and blessed king Heraclius, he enthusiastically and joyfully assembled his troops. Then, taking all the royal attendants and revering the blessed, miraculous and divine discovery, they took the Cross back to the holy city of Jerusalem. They also took there all the vessels of the church which had been saved from the enemy, in the city of 'Constantinople. And there was no small amount of joy on the day they entered Jerusalem, with the sound of sobbing and moaning, an outpouring of tears from their excited and moved hearts, and there was a tightening feeling in the king, the princes, all the troops and the inhabitants in the city. No one was capable of singing the sacred songs due to the tremendous and deep emotion [felt by the] king and the entire multitude Heraclius took the Cross and reestablished it in its place: he put each of the vessels of the churches back in its place; and he gave wealth and incense to all the churches and inhabitants of the city.

Heraclius himself then took to the road heading directly for Syrian Mesopotamia in order to personally see to establishing the cities of the borders. The boundary which was confirmed was the same as had been established under Xosrov and Maurice. The Cross of the Lord remained in the heaven-built city until the taking of Jerusalem by the sons of Ishmael At that time it was taken in exile to the capital city [of Constantinople] with all the church vessels.

A general of the Romans named Mzhezh Gnuni, from the country of Armenia, arrived next and personally took control of all the country of the borders. He told the kat'oghikos Ezr to come to him in the country of the borders and to take the sacrament of communion with the emperor. "Otherwise," he said, "we shall get ourselves another kat'oghikos and you will hold sway in the Persian sector." The kat'oghikos, since he was unable to leave the country of his jurisdiction, requested a statement of faith from the emperor. A volume written by the emperor himself was quickly sent to him in which [the emperor] cursed Nestorius and all heretics, but he did not curse the Council of Chalcedon. The kat'oghikos went to the country of Asorestan, saw the emperor and communed after his fashion. As a gift, Ezr requested from the emperor the salt mine at Koghb, which he received. Then he returned to his home in great pomp. Subsequently, he resided with the Roman army, doing as the general wished. He arranged the orders of soldiers and the distribution of granaries for the entire country.

Now aspet Varaztirots' (son of the great Xosrov Shum, styled Jawitean Xosrov [Forever Loyal to Xosrov] by the kings) completely built up the entire land of Armenia. But he did not submit to the great prince named Xorhox Ormazd of the Atrpatakan land, nor to his son and successor, Rostom, who also was a prince in the Atrpatakan area. There was great agitation between the two. Then the Roman general Mzhezh started to slander the aspet to prince Rostom, who was in Atrpatakan: "Let him not stay in Armenia, otherwise, there will be great agitation between the two kings." And he sent his brother Garik'pet to go and winter in Dwin: and then they would arrest the aspet and depart. However, because all the Persian troops liked the aspet, one of the great princes there informed him, saying: "Look out for yourself, for they are going to arrest you, tomorrow." So aspet took his wife and children and fled at night to Taron. When he got there, he assembled his troops. Varaztirots' requested an oath from emperor Heraclius, that he not be alienated from his own land. Accepting [the emperor's] oath as genuine, he went to him in Asorestan. Then emperor Heraclius swore to him: "Stay with me for a brief time, then I shall dispatch you to your country with great honour." And [Heraclius] exalted him more than all the patricians in his realm. When [Varaztirots'] went to the palace, he gave him a royal mansion, a silver throne, and an extremely large amount of treasure. Furthermore, Varaztirots' son, Smbat, was the beloved chamberlain of Heraclius.

Here is an account of the evil accomplished by the son of emperor Heraclius named At'alarik [Heracleonas, 638-641 AD]. This concerns the great crime which deeply wounded his father's heart, broke a marvellous individual, made the beauty of his face fade and became the cause of the ruin of himself and of many others. Now At'alarik, T'eodoros called Magistros, brother of emperor Heraclius' son, many of the grandees of the city, and Vahan Xorhxoruni all had united to kill Heraclius, and to enthrone his son, At'alarik. Included in the deliberation similarly was Varaztirots', son of Smbat Xosroy Shum: however, he did not consent to the slaving of the emperor and his sons. He said, rather: "You say that they are the locum tenens [place holder, deputy] of God, therefore there is no need to do that killing, nor do I unite with you in that plan." Now a certain curator who had been included in the deliberations, fully related the plot to the emperor. When the emperor had confirmed the truth of the matter, he ordered that his son, nephew, and all those with them, be arrested in the morning. The noses and right hands of all of them were cut off. [Heraclius] sent a message to the aspet, saying: "Since you did as you did with regard to me and did not want to dip your hand into my blood and the blood of my sons, I shall not reach for you and your sons. Go where I order you, and I will have mercy upon you." Although the sides protested, saying: "Kill him," nonetheless, Heraclius did not want to listen to them. Rather he ordered Varaztirots' wife and children taken to the island and city of tribulation named Ak'sor ["Exile"].

Also included in the plot was Dawit' Saharhuni, who was sent to the palace bound, by Mzhezh Gnuni. Bursting his bonds enroute to the palace, Dawit' killed the men who were taking him. He then returned and united the troops of Armenia with himself, suddenly attacking and killing Mzhezh Gnuni the Roman general, and Varaz Gnel Gnuni. [Dawit'] himself took over the military ccmmand with the support and affection of all the troops.

Now at the request of the princes, the emperor made him prince of all the lands and bestowed on him the dignity of curopalate. [Heraclius] confirmed Dawit' in his service. He held authority for three years in the greatest luxury. Then, however, he was dishonoured by the troops and persecuted; and all the azats, being disunited, were the undoing of the country of Armenia.

It was, however, only the pious prince T'eodoros of the Rshtunik' district who continually was organizing the troops of his area, and was on the alert day and night, as his deep wisdom dictated. He wrought not a few slaughters of the enemy, and he built up the island of Aght'amar, [acts which] envivified many districts.

SEBEOS HISTORY CHAPTER 30.

[The elimination of the Sassanid [dynasty] which held sway for 542 years. The birth of Muhammad and the entrance of the sons of Ishmael into the land of Armenia. The death of Heraclius and the reign of Constantine (the Great).]

I shall discuss the line of the son of Abraham: not the one born of a free woman, but the one born of a serving maid, about whom the quotation from Scripture was fully and truthfully fulfilled, "His hands will be at everyone, and everyone will have their hands at him [Genesis 16. 11,12]."

Twelve peoples [nations] representing all the tribes of the Jews assembled at the city of Edessa. When they saw that the Persian troops had departed and left the city in peace, they closed the gates and fortified themselves. They refused entry to troops of the Roman lordship. Thus Heraclius, emperor of the Romans, gave the order to besiege it. When the Jews realised that they could not militarily resist him, they promised to make peace. Opening the city gates, they went before him, and Heraclius ordered that they should go and stay in their own place. So they departed, taking the road through the desert to Tachkastan to the sons of Ishmael [Arabs]. The Jews called the Arabs to their aid and familiarised them with the relationship they had through the books of the Old Testament. Although the Arabs were convinced of their close relationship, they were unable to get a consensus from their multitude, for they were divided from each other by religion [meaning the dispute they had with Mohammed about Islamic laws and in particular his claimed prophethood. They called him an imposter just the same as they called Saul of Tarsos a liar some 500 years before.]. In that period a certain one of them, a man of the sons of Ishmael named Mohammed, a merchant, became prominent. A sermon about the Way of Truth, supposedly at God's command, was revealed to them, and Mohammed taught them to recognise the God of Abraham, especially

since he was informed and knowledgeable about Mosaic history. Because the command had come from On High, he ordered them all to assemble together and to unite in faith. Abandoning the reverence of vain things, they turned toward the living God, who had appeared to their father, Abraham. Mohammed legislated that they were not to eat carrion, not to drink wine, not to speak falsehoods, and not to commit adultery. He said: "God promised that country to Abraham and to his son after him, for eternity. And what had been promised was fulfilled during that time when God loved Israel. Now, however, you are the sons of Abraham, and God shall fulfill the promise made to Abraham and his son on you. Only love the God of Abraham, and go and take the country which God gave to your father, Abraham. No one can successfully resist you in war, since God is with you."

Then all of them assembled together, from Havilah to Shur, which is opposite Egypt [The text is corrupt here. The citation is from Genesis 25.18], and they set out from the P'arhan desert being twelve tribes moving in the order of precedence of the Houses of the patriarchs of their tribe. They were divided into 12,000 men, of which the sons of Israel were in their own tribes, 1,000 to a tribe, to lead them to the country of Israel. They travelled army by army in the order [of precedence] of each patriarchy: Nebaioth, Kedar, Adbeel, Mibsam, Mishma, Dumah, Massa, Hadad, Tema, Jetur, Naphish and Kedemah [Genesis 25. 13-16]. These are the peoples of Ishmael. They reached Moabite Rabbath, at the borders of Ruben's land [on the eastern shore of the Dead Sea (modern Jordan), east of Judah (Judaea) and north of Moabl. The Roman army was encamped in Arabia. The Arabs fell upon them suddenly, struck them with the sword and put to flight emperor Heraclius' brother, Theodosius. Then they turned and encamped in Arabia.

All the remnants of the sons of Israel then assembled and united, becoming a large force. After this they dispatched a message to the Roman emperor, saying: "God gave that country as the inherited property [i kaluats zharhangut'ean] of Abraham and of his sons after him. We are the sons of Abraham. It is too much that you hold our country. Leave in peace, and we shall demand from you what you have seized, plus interest. The emperor rejected this. He did not provide a fitting response to the message but rather said: "The country is mine. Your inheritance is the desert. So go in peace to your country." And Heraclius started organising brigades, as many as 70,000 troops giving them as a general, a certain one of his faithful eunuchs. He ordered that they were to go to Arabia, stipulating that they were not to engage them in war, but rather to keep on the alert until he could assemble his other troops and send them to help. Now the Romans reached the River Jordan and crossed into Arabia. Leaving their campsite on the riverbank, the Romans went on foot to attack the Arabs' camp. The Arabs, however, had placed part of their army in ambuscades here and there, lodging the multitude in dwellings around the camp. Then they drove in herds of camels which they penned around the camp and the tents, tying them at the foot with rope. Such was the fortification of their camp. The beasts were fatigued from the journey, and so the Romans were able to cut through the camp fortification, and started to kill the Arabs. But suddenly the men in the ambuscades sprung from their places and fell upon them. Awe of the Lord came over the Roman troops, and they turned in flight before them. But they were unable to flee because of the quicksand which buried them to the legs. There was great anxiety caused by the heat of the sun and the enemy's sword was upon them. All the generals fell and perished. More than 2,000 men were slain. A few survivors fled to the place of refuge

The Arabs crossed the Jordan and encamped at Jericho. Then dread of them came over the inhabitants of the country, and all of them submitted. That night the Jerusalemites took the Cross of the Lord and all the vessels of the churches of God, and fled with them by boat to the palace at Constantinople. The Jerusalemites requested an oath from the Arabs and then submitted.

The emperor of the Romans was no longer able to assemble his troops against them. The Arabs divided their army into three parts. One part went to Egypt, taking territory as far as Alexandria. The second part went north to war against the Roman empire. In the twinkling of an eye they had seized territory stretching from the sea to the shores of the great Euphrates river, as well as Edessa and all the cities of Mesopotamia, on the other side of the River Euphrates. The third part of the Arab army was sent to the east, against the kingdom of [Sassanid] Persia.

In that period the kingdom of Persia grew weaker, and their army was divided into three parts. Then the Ishmaelite troops who were gathered in the east, went and besieged Ctesiphon, since the king of Iran resided there. Troops from the land of Media [Marats], some 80,000 armed men under their general Rostom assembled and went against the Arabs in battle. Then the Arabs left the city and crossed to the other side of the River Tigris. The Persians also crossed the river, pursuing them. And they did not stop until they reached their borders, at the village called Hert'ichan. The Arabs continued

to pursue them, [eventually] going and encamping in the plain. Present were Mushegh Mamikonean, son of Dawit', the general of Armenia with 3,000 armed men, and also prince Grigor, lord of Siwnik', with 1,000 men. The Persian and Arab armies attacked each other, and the Persian forces fled before them. But the Arabs pursued them, putting them to the sword. All the principal naxarars [dukes] died, as did general Rostom. They killed Mushegh and two of his sister's sons, as well as Grigor, the lord of Siwnik', along with one son. Some of the Persian troops escaped and fled back to their own land. The remnants of the Persian forces assembled in Atrpatakan at one spot and made Xorhoxazat their general. Then they hurried to Ctesiphon and took the treasury of the kingdom, the inhabitants of the cities, and their king, and then hurried to get back to Atrpatakan. But as soon as they had departed and gone some distance, the Ishmaelite army unexpectedly came upon them. Horrified, the Persians abandoned the treasury and the inhabitants of the city, and fled. Their king also fled, winding up with the southern troops. Now the Arabs took the entire treasury and returned to Ctesiphon, taking the inhabitants of the cities along too. And they pillaged the entire country.

The venerable Heraclius ended his life in ripe old age. He reigned for 30 years [610-640/641]. Heraclius made his son Constantine swear to have clemency upon all those transgressors whom he had ordered exiled. He made him vow to send each back to his place, and to bring back the aspet, his wife and son, and to establish him in his former rank. "Should he want to go to his land, as I have sworn—and may my oath not be false—release him, and let him go in peace."

Heraclius died and his son Constantine ruled. But no one was chosen as general of the land of Armenia, since the princes were disunited and quit each other's presence.

The polluting army of the Arabs arose from Asorestan and came through the valley route to the land of Taron. They took Taron, Bznunik' and Aghiovit and then, going to the Berkri valley via Ordspoy and Gogovit, poured into Ayrarat. None of the Armenian troops was able to carry the bad news to the awan of Dwin. There were, however, three of the princes who went and gathered the dispersed troops: T'eodoros Vahewuni, Xach'ean Arhaweghean, and Shapuh Amatuni. They fled to Dwin, reached the Metsamor bridge, crossed it, destroyed it, and then they went to take the bad news to the awan. All the people of the land had assembled in the fortress, and they had come in harvest time for the vinevards.

T'eodoros went to the city of Naxchawan. The enemy Busha reached Metsamawr bridge but was unable to cross over. However, the Arabs had as a guide Vardik, prince of Mokk', who was called Aknik ["Little Eyes"]. Crossing the Metsamawr bridge, they raided the entire country. They accumulated a very great amount of loot and captives, then came and encamped by the edge of the Xosrakert forest.

On the fifth day of the Arabs' sojourn, on a Friday, the 30th of the month of Tre [Tre: the fourth month in the Armenian calendar, November], they came against the city of Dwin and it was betrayed into their hands. For they set fires here and there, and drove away the guards on the wall by smoke and by shooting arrows. They then erected ladders, scaled the wall and, once inside, opened the city gates. The army of the enemy poured inside and put most of the city to the sword. Then, taking the loot and booty of the city, they departed and encamped at their same campsite. After passing some days there, they arose and departed by the same route they had come. They had a multitude of captives with them, some 35,000 souls. Now the prince of Armenia, the lord of Rshtunik', who had been concealed in an ambuscade in the district of Gogovit, went against the Arabs with few troops. But he was unable to resist, and so fled before them. The Arabs pursued Rshtunik's troops killing many of them. Then they went to Asorestan. This occurred in the days of kat'oghikos Ezr.

As a result of that battle, an order came from the emperor granting the military command and the dignity of patrician to T'eodoros, lord of Rshtunik'.

All this took place as a result of kat'oghikos Nerses who succeeded Ezr on the kat'oghikosal throne.

When the sons of Ishmael had arisen and issued from the desert of Sinai, their king Amrh [caliph Umar] did not accompany them. But when the Arabs had militarily routed both kingdoms, seizing from Egypt to the great Taurus mountain, from the Western Sea the Atlantic Ocean to Media and Xuzhastan, they then emerged with the royal army [and went] to the natural borders of the holdings of Ishmael. Then the Arab king gave an order to assemble boats and many sailors and to navigate southwardly, going east to Pars, to Sagastan, to Sind, to Srman, to the land of Turan and to Makuran as far as the borders of India. The troops swiftly prepared and implemented the command. They burned every country, taking loot and booty. They then turned and made expeditions on the waves of the sea, and reached their own places. We heard this account from men who had returned from captivity in Xuzhastan Tachkastan, who themselves had been eye-witnesses to the events described and narrated them to us.

SEBEOS HISTORY CHAPTER 31.

[Regarding the Jews and their wicked plans. (In parts his history text was designed as anti-Jewish propaganda pamphlet. The auther did not grasp that the Jews were fighting for their freedom and their Jewish homeland Judaea and Israel that had been unrightfully taken away from them by Greeks and Romans. They fought at least ten major wars against Rome, several wars against Persian oppression and against Mohammeds Muslims hordes.).]

Now I shall speak about the plot of the Jewish rebels, who, finding support from the Hagarenes for a short time, planned to [re]build the temple of Solomon. Locating the place called the holy of holies, they constructed the temple with a pedestal, to serve as their place of prayer. But the Ishmaelites envied the Jews, expelled them from the place, and named the same building their own place of prayer. The Jews built a temple for their worship, elsewhere. It was then that they came up with an evil plan: they wanted to fill Jerusalem with blood from end to end, and to exterminate all the Christians of Jerusalem. Now it happened that there was a certain grandee Ishmaelite who went to worship in their private place of prayer. He encountered three of the principal Jewish men, who had just slaughtered two pigs and taken and put them in the Muslim place of prayer. Blood was running down the walls and on the floor of the building. As soon as the man saw them, he stopped and said something or other to them. They replied and departed. The man at once went inside to pray. He saw the wicked sight, and quickly turned to catch the men. When he was unable to find them, he was silent and went to his place. Then many Muslims entered the place and saw the evil, and they spread a lament throughout the city. The Jews told the prince that the Christians had desecrated their place of prayer. The prince issued an order and all the Christians were gathered together. Just as they wanted to put them to the sword, the man came and addressed them: "Why shed so much blood in vain? Order all the Jews to assemble and I shall point out the guilty ones." As soon as they were all assembled and the man walked among them, he recognized the three men whom he had previously encountered. Seizing them, the Arabs tried them with great severity until they disclosed the plot. And because their prince was among the Jews present, the Arab prince ordered that six of the principals involved in the plot be killed. He permitted the other Jews to return to their places

SEBEOS HISTORY CHAPTER 32.

Constantine dies as a result of his mother's plot, and Heraclius (son of Heraclius by his second wife) is enthroned. General Vaghentin (Valentinian) comes to Constantinople and enthrones Constantine's son, Kostas [Constantine III]. The Persians war with the Ishmaelites and are defeated. Aspet Varaztirots' returns from court, and dies. The Ishmaelites [Mohammedans] come to Atrpatakan, and divide into three wings They take Artsap'u fortress, campaigning against the sep'hakan gund.]

When Heraclius died, his son Constantine ruled. The latter appointed Vaghentianos, called an Arsacid, as the general of his troops. He ordered his troops to go to the East.

Constantine ruled only a few days before dying in the plot of his mother Martina, Heraclius' wife. Heraclius' son, Heracleonas, born of the Augusta Martina, was then enthroned [638-641 AD]. Constantine had been Heraclius' son by his first wife. Taking the initiative, Vaghentin went against him at Constantinople with his troops. He captured Martina, cut off her tongue, and then killed her with her two sons. They enthroned Constantine's son, Constans [II, 641-668 AD], calling him after his father's name. Constans personally assembled the troops and went to the East.

During the first year of the reign of the Roman emperor Constans, and in the tenth year of the Persian king Yazkert [641/642], the Persians assembled 60,000 armed men to war with the Ishmaelites [Mohammedans]. The Ishmaelites fought them with 40,000 swordsmen, clashing in the district of Mark'. The battle lasted for three days until the foot soldiers on both sides were reduced. Suddenly the Persian troops were informed that an auxiliary force had come to help the Ishmaelites. The Persians fled from camp all though the night. The remnants of the Ishmaelite troops went against them in the morning, but found no one in the camp. so they raided across the face of the entire country, putting man and beast to the sword. They captured 22 fortresses and killed everything alive in them.

But who can relate the incredible disasters inflicted by the brigand Ishmael who whipped up sea and land? The prophet Daniel long ago prophesied that such difficulties would come upon the earth. He spoke of the four beasts which represent the four kingdoms which arose on the earth. The first was the Western kingdom, which is 'Constantinople, represented by a humanlike beast. "Its wings were plucked off, and it was lifted up from the ground." He said that this was diabolical idolatry.

"And it stood erect, as a man, and it was given a human heart." Behold, the second beast resembles a bear. It is in the East and is called the Sasanian kingdom. "And the bear had three ribs in its mouth"- the kingdom of Persians, Medes and Parthians—and they said to it: "Arise and devour much flesh." Everyone knows how it ate. "Now the third beast was like a leopard with four wings of a bird, and possessing four heads." The winged leopard represents the Northern kingdom, Gog and Magog and their two comrades to whom had been given authority to fly in force to the north. "Now the fourth beast was awesome and dreadful with teeth of iron, and claws of copper. It would eat and devour then stomped the residue with its feet." This fourth emerged from the South and represents the Ishmaelite kingdom As the chief of the angels said: "The fourth beast will come to possess a kingdom greater than any kingdom, and will devour the entire world." And from the ten horns, ten kings will arise but after them yet another shall arise who in wickedness will surpass all the previous ones" [Daniel 7].

In the second year of the venerable Heraclius' grandson Constans' reign, Vaghentin [Valentinian] planned to deceive the Senate through rhetoric and to personally acquire the throne, such that by crowning him, he would do what he wanted with his military command. He made the yoke of service weigh heavy on the inhabitants of the city, having as his support the 3,000 armed troops which he had brought with him and numerous other troops which had joined him. It was then that the men of the city gathered together before the patriarch, in the holy church of God, and told him that they wanted to eliminate the weight of their service. They sent to Vaghentin telling him to abolish their service, but he did not want to hear it. Now there was a certain one of the princes present, named Antoninos, who said to Vaghentin: "What is their alliance, what is their plot? Besides, how could they dare to send you such a message? But if you command, I shall go and destroy their alliance and plot, and shall chase each one back to his place, that your will be done." Vaghentin responded: "Go and do as you said" Antoninos arose and departed with a thousand men. As soon as he entered the church he began severely beating the principals. At this, the patriarch rose to his feet and said: "It is too much, and unjust to do what you are doing here." Anton attacked him and slapped him on the jaw, saying: "Go to your place." Then the mob became agitated and attacked Antoninos, seizing him and dragging him through the city by his feet. After this they set him on fire. Vaghentin was informed and he was seized with trembling. Just then the mob poured in upon him, dragged him beyond the houses, beheaded him, and then took the corpse to the same place where they had burned Antoninos. and burned that too. Then they confirmed Constans on the throne of the empire. They made T'eodoros, a certain one of the loyal princes of Armenia, the general over those in the Roman sector.

As soon as T'eodoros took the military command, he beseeched the emperor as a favour to have clemency on those people who had been exiled to Africa, especially on Aspet, son of Smbat called Xosrov Shum. God made the emperor's heart mild, and he ordered that the exiles be brought to the capital. He received them as though they were beloved personages of the realm. He made Aspet's son Smbat the first spatharios among all the spatharioi, and a candidate. Thus, in the fifth year of his reign, he returned to the previous order. The emperor also had clemency on Vahan Xorhxorhuni and others besides. [Constans] dispatched a certain prince named T'uma to Armenia. He arrived, and did not want to destroy the oath existing between the emperor and the prince of Mark'. He united all the princes and took them with him to the prince of Mark'. He spoke with him about peace. And he received many goods from him and promised with an oath that he would have T'eodoros sent to the palace bound, since he was the prince of the land of Armenia. He then returned to the Armenian troops. As soon as T'uma reached the Kotayk' country, his men suddenly fell upon Teodoros, seized, bound, and had him sent before the emperor. Now when emperor Constans heard of this, he was exceedingly wroth, for he had not ordered that T'eodoros be bound. He commanded that he be released from bonds, and that the document accusing him be read. When Constans learned what the treachery really was he ordered that T'eodoros be summoned to his presence. Constans received him with affection and with the honour due to his authority He arranged a stipend and funds for upkeep from the treasury. He then commanded that T'uma be summoned, but he did not order him to enter the court. Rather, the examination was conducted outside the chamber. Lord Teodoros Rshtuni was vindicated in his testimony and justice was done to him, T'uma was discredited and dropped from honour. It was at this time that Aspet [Bagratuni] and T'eodoros, lord of Rshtunik', saw each other again and shed tears upon each other's necks. For they had been nourished together at the court of Xosrov, king of Iran. But Aspet could not be reconciled with Roman rule, instead he plotted treachery. He requested an order from emperor Constans so that Aspet could dispatch four men of his family to Armenia to bring him some things. The emperor commanded that the

order be issued to him. Now Aspet disguised himself, took along three other men, reached the shore and showed the imperial order. He boarded a ship and quickly crossed the sea, resembling a bird, and soon reached Tayk' where he fortified himself. The people of Tayk' received him with delight.

In this period there was no small amount of turbulence in the land of Armenia, for a royal command arrived for the general of Armenia to hold all the passes of the roads and to search the land's fortresses. Then it became known that Aspet had returned and was fortified in Tayk', Armenia.

Then the Roman general, T'eodoros, together with the princes of the army and the naxarars of Armenia ordered that kat'oghikos Nerses should be sent to Aspet and vow to him their loyalty in requesting that the authority of the land be given to him, and that his wife and children be sent back to him.

The kat'oghikos went and made an oath with [Aspet] so that he would not depart. Then the kat'oghikos returned. They wrote to emperor Constans to treat Aspet according to the oath he had promised. For Aspet had written to the emperor, saying: "I am your servant and shall not leave your service. However, because some people told me 'You will return to the service of the country whence you came,' I became frightened and fled. But now, if I am considered worthy, I shall serve you loyally and give my life for your piety." Emperor Constans ordered that Aspet be made Curopalate, that he be given a crown of honour and the authority of the land. He further ordered that Aspet's wife and children be sent back with great splendour. He had Aspet given silver thrones and other very great gifts.

Yet, before the hrovartak arrived, before he was honoured with the dignity of Curopalate, Aspet became ill and died. They took his body and buried it near his father's, at Dariwnk'. The emperor established Aspet's eldest son, who was named Smbat, in his father's dignity, giving him the authority of the aspetut'iwn of his native tanuterdom. The emperor made Smbat drungarius [drungar] of his troops, and gave him a wife from the Arshakuni House, one of his relatives, and dispatched him to the army, to his troops. After this, the emperor sent T'eodoros, lord of Rshtunik' back to Armenia with great honour, giving him the same authority of military command as he held before—whether or not the princes of Armenia wanted it. He came and was established in the same authority.

The next year, the Ishmaelite army came to Atrpatakan where it divided into three parts. One division went to Ayrarat; another, to the Sep'hakan Gund area; and the third to Aghbania/Aghuania. Those who went to the Sep'hakan Gund area spread out raiding, putting all of those parts to the sword, and taking booty and captives. They came and assembled at Erewan [The Abgaryan edition has Herewan. See Abgaryan, p.314 n. 512, where he speculates that the original text read Her ew and, and referred to the district of Her]. They battled with the fortress, but were unable to take it. They went to Ordspoy and were unable to take it. So they departed, encamping across from the fortress of Artsap', near the water. The Arabs began warring with the fortress, and suffered no small amount of injury from those inside. Now there was a secret way out of the fortress from the rear leading in the direction of Asoren. This was called Kaxanaktuts'. Now some men thus descended from the fortress, to go to request an auxiliary force from Darawn fortress. And Smbat Bagratuni gave them his son, Varaz Sahak, with forty men.

Going at nighttime, they ascended to the fortress, not taking care to conceal the place. The Ishmaelites found the place and entered the fortress by the very same path. Before dawn they had seized the place. They came across ten guards asleen, whom they killed.

SEBEOS HISTORY CHAPTER 33.

[The Lord frees the captives and destroys the Ishmaelites [Mohammedans]. Those Arabs who had spread out raiding at Ayrarat strike Tayk', Iberia [Georgia], and Aghbania / Aghuania. The naval battle between the Ishmaelites [Mohammedans] and the Romans. Procopius [Prhokop] goes to Mu'awiya [caliph Muawiya], prince of the Ishmaelites, and the peace between the Arabs and Romans. The deeds of kat'oghikos Nerses. The dispute over faith with the Armenians. The Armenians' reply to emperor Constans.]

In the second year of Constans' reign, on a Sunday, the 23rd of the month of Horhi [Horhi: the second month of the moveable calandar]. Ishmaelites Armenian the [Mohammedans] shrieked before and behind the fortress and put the inhabitants to the sword. Many were thrown from the height and were killed. After lowering the women and children from the fortress, they wanted to kill them. There was no counting the captives, and there were an extremely great number of cattle which they seized. But at dawn the next day the general of Armenia came upon them and visited inconceivable destruction on them. Now they were 3,000 select armed men, drawn from all the Ishmaelite forces, but virtually none of them escaped. A few, however, fled on foot, and secured themselves in Shamp ["Swamp"]. On that day, the Lord spared the multitude of captives from the Ishmaelites,

and greatly destroyed Ishmael. Two Ishmaelite princes, Uthman [Awt'man] and Ogomay [Abgaryan: Ogbay, p. 317 n. 523], died. Great was the tiumph of the general of Armenia, and the latter sent to Constans gifts from the booty, one hundred of the most select horses. The emperor and the entire palace were pleased, and Constans sent great thanks to T'eodoros.

Now that Arab army which was in the Ayraratean region put to the sword areas as far as Tayk', Iberia [Georgia], and Aghbania / Aghuania. They took booty and captives and passed on to Naxchawan where the other division was battling to take the fortress of Naxchawan. However, they were unable to take it. They took the fortress of Xram, killing the men and taking the women and children captive [as slaves].

Now the Arab general who was in the Palestine area. ordered that a large naval fleet be organized. He boarded a ship and began warring with Constantinople. But his naval battle did not succeed, for a multitude of Roman troops in boats came up before him, and sent [the Arabs] to the deep, driving off many others with fire, and pursuing those who fled. Nonetheless, emperor Constans was horrified by the attack and considered it wise to pay a tax / tribute [sak], and to make peace by means of messengers. The Ishmaelites hurried the Romans to complete a peace agreement. Now Constans, the Roman emperor, because he was a lad, did not dare to do so without the approval of the army. So he wrote to Procopius for him to go with him to Damascus, to see Mu'awiya, prince of the Ishmaelite army, in order to make the terms of the agreement in accordance with the desires of the troops. As soon as Procopius saw the imperial order and learned about matters from the troops, he went with them to Damascus to [caliph] Mu'awiya, prince of the Ishmaelite [Mohammedan] army. He revealed the amount of the tribute, stated the limit. made peace, and departed.

At that time Nerses, kat'oghikos of Armenia, decided to build a dwelling for himself close by the holy churches in the city of Vagharshapat, by the road where it is said king Trdat went before saint Gregory. Nerses also built a church there named after the divine Zvart'nots' ["Joyous Ones"] the multitude of heavenly soldiers who appeared in the vision of saint Gregory. He built a lofty structure of stunning beauty worthy of the divine honour to which it was dedicated. Nerses led the course of a river near to the church, he had all the stony areas worked on, and then planted vineyards and trees. To the glory of God, he ordered that a lofty wall be constructed, which by its beautiful design blended with nature.

But that rebellious dragon did not cease and instead out of its cunning, wanted to war with God. It strove to bring persecution upon the churches of the land of the Armenians. For in the time of Heraclius' grandson, emperor Constans, it started working the guile of its wickedness taking as satellites those troops stationed on Roman Armenian land. Now the Armenians never accepted the Roman communion of the Body and Blood of the Lord. The soldiers wrote a letter of complaint to the Roman emperor Constans and to the patriarch, saving: "We are regarded as infidels in this land. For [the people here] are disrespectful toward Christ God's Council of Chalcedon and the Tome of Leo, and they anathematise them." Then the emperor and the patriarch ordered that an edict be written to the Armenians telling them to unite with the faith of the Romans and not to despise the Council or the Tome. Now there was in Constantinople a man named Dawit' from the village of Bagrawan who had studied the art of philosophy. Constans ordered that he be dispatched to Armenia to eliminate the opposition. All the bishops and naxarars of Armenia assembled in Dwin by the Christ-loving kat'oghikos, Nerses, and the pious general of Armenia, Teodoros, lord of Rshtunik'. They saw the emperor's order, and listened to the philosopher who taught the division of the Trinity according to the Tome of Leo. Having heard this, they did not agree to replace the correct doctrine of saint Gregory with the Tome of Leo. All were inclined to give a written reply.

The following is a copy of the reply to the letter sent to Armenia by Constans, emperor of Rome, written by the bishops of Armenia, kat'oghikos Nerses, the naxarars and general T'eodoros, lord of Rshtunik'.

A true and orthodox Nicean letter. I beseech those of you who hold the God-loving Christian faith to read this.

We have the command of the caring prophets and apostles of Christ to make beseeching prayers for your God-loving realm, for all the princes, troops, and pious palace officials, wherein the love of God reposes and the signs of divine favor are apparent.

For behold, you possess a kingdom greater and stronger than all others, which was crowned not by human hands but by the right hand of God, which nothing except Christ's kingdom can equal. By the grace of God the same is true of your patriarchate.

The naxarars and Christ-loving troops—and we glory in the light of your God-loving kingdom—were unmoved by the wicked and impious Persian kings. For when they abolished the kingdom, and destroyed all the troops of the land of Armenia taking men and women into captivity, brandishing swords at the survivors and trying to convert [us] to fanaticism, they were unable to do so. Indeed, "the infidels were yet more embarassed in their folly [Psalms 24]." So matters continued until king Kawad and his son Xosrov ordered that "each individual should adhere to his own faith and no one should dare harrass the Armenians. All are physically our servants, but as for spiritual matters, He Who judges souls knows about them." Then there was Ormazd's son Xosrov who, after capturing Jerusalem, ordered all the bishops of the East and of Asorestan to assemble at Court. He said to them: "I hear that both sides are Christians yet that one group anathematizes the other. What do they regard as just? Now let them come together at the royal court so that what is correct will be confirmed and what is false will be rejected." So all the bishops and priests and believers in those parts assembled, and the king established as their ostikan Smbat Bagratuni (who was called Xosrov Shnum), and the chief physician of the Court. Present were the patriarch Zak'aria of Jerusalem who was in captivity and many other philosophers who were captured from the city of Alexandria. King Xosrov ordered them to proceed with justice and to acquaint him with the truth.

Åll of them assembled in the royal hall, and there was a commotion. For some were of the orthodox faith, possessing documents with the seals of ancient kings. Others were Nestorians, while many others were the rabble. The patriarch even came forward and said: "Let that man not be called God," and the king was informed.

The king responded: "By whose command has he come here? Let him be beaten and have him depart." He also ordered that the multitude of sectarians be removed from the atean. He ordered that only the [beliefs of the] Niceans, Constantinopolitans, Ephesians, and Chalcedonians should be examined. Now there were two bishops from the land of Armenia present, trustworthy men who had been dispatched to Persia because of the violence in the land of Armenia. They were Kumitas, bishop of the Mamikoneans, and Matt'eos, bishop of the Amatunik', and had arrived to inform the king. They had ready with them the document of saint Gregory. The king ordered that it be asked: "During the reigns of which kings did those councils take place?" And they replied: "The Nicean Council took place under Constantine; the Council of Constantinople, under Theodosius the Great; Ephesus, under Theodosius the Less; and Chalcedon, under Marcian." The king replied: "The orders of three kings seem more just than that of one king." Then the king started asking about Nestorius, wanting to know who he was, where he was from, at which council had he been present, and what he had said. Then he ordered that the Nestorians be removed from the atean. Similarly he inquired about the Council of Chalcedon, wanting to know who were its principals. They told him everything, saying "[the heads of the councils of] Nicea and Constantinople were emperors Constantine and Theodosius the Great themselves. The Council of Ephesus was presided over by Cyril, bishop of Alexandria and Chalcedon, by bishop T'eodoretos who was inclined toward Nestorius."

Present at this assembly were the cleric called the Eran kat'oghikos, and other bishops from Asorestan, Aruastan, Xuzhastan, and other lands. King Xosrov ordered that if they did not turn from their heresies and walk the roval path, he would have all of their churches demolished, and have them put to the sword. He ordered that a tax be levied for the Chalcedonians, Iberians [Georgians], and the kat'oghikos of Aghbania / Aghuania and many other bishops from the Roman area, and the princes who had come into the service of the Persian king [? isk ork' zk'aghkedonin ew zVrats'. .ew ishxank' ` ork' ekeal ein i tsarhayut'iwn parsits' t'agaworin, orov ew ch'ep'ayk'arn isk hramayeats' tal]. However, he sought a contract from the two sides. He started to examine the Council of Nicea (which was convened by Constantine): of Constantinople (under Theodosius the Great) of Ephesus (under Theodosius the Less) and of Chalcedon (under Marcian). When he was familiarised with everything justly and truthfully, he inquired: "Why is it that those three do not mention the division of [Christ's] nature into two parts, as the others do? It is clear that even we must be divided in two, that even the king has two, rather than one, nature. For I, too, am of two natures, one from the father and one from the mother, one spiritual, one physical. However, the Divinity which is not everywhere despite what it wants, cannot be everything or do everything. What is Divinity?" Then Xosrov ordered that Zak'aria the patriarch of Jerusalem and the philosopher from the city of Alexandria be ordered to tell the truth under oath. They replied: "We did not approach God wickedly nor did he visit his anger upon us wickedly. Now, fearing God we shall speak the truth before you. The true faith is the one pronounced at Nicea before the venerable Constantine. The councils of Constantinople and Ephesus were in accord with this as is the correct faith of the Armenians. The pronouncements of Chalcedon were not in accord with them, as your benevolence has learned." The king ordered that the treasury be examined and they found in the treasury a copy of the true Nicean creed and the confession of faith of the land of Armenia which was sealed with the ring of king Kawad and of his son Xosrov. And this king Xosrov ordered that 'all Christians under my authority should hold the faith of the Armenians.' Those uniting with the Armenians' faith were the metropolitan Kamyishov from Asorestan and ten other bishops, the God-loving queen Shirin, brave Smbat, and the great Chief Physician. King Xosrov ordered that a copy of the correct confession of faith be sealed with his ring and placed in the royal treasury.

"Now because God removed us from serving the authority of darkness and made us worthy of your divine kingdom how much more ought we to beseech Christ God that your pious and God-loving kingdom remain unshaken for eternity, that days on earth be as days in Heaven filled with much triumph, ruling the entire world, land and sea. For although physically you are of the human race, nonetheless you sit on a divine throne and your God-loving kingdom is filled with the light of glory which shines down upon all, you who are crowned from On High, the pride of all Christians, with the strength of the divine Cross. You resemble the God-loving, pious, Godfavored, brave, triumphant, salvation-working, blessed Heraclius, your father, who saved all countries from the bitter executioner. May Christ God grant you the same because of your piety."

[There follows a lengthy discussion of doctrinal matters, which we omit. The translation resumes with chapter 34 grabar p. 135.]

SEBEOS HISTORY CHAPTER 34.

[The attack of the Hagarenes (Mohammedans / Arabs), and events in Rome.]

Once again I shall speak about the evil which befell us in our time, regarding how the veil of ancient faith was torn, and how that death-bringing dry heat breathed upon us and scorched the tall, beautiful, leafy trees of our tender orchards. And this is the truth, for we sinned against the Lord and angered the saint of Israel. "Should it please you to heed me," he said, "you shall take the land's goodness. But should you wish not to listen, the sword shall devour you, for this was uttered by the mouth of the Lord." This same whirlwind was seen above Babylon and then reached every country. For Babylon is the mother of all nations and its realm, the kingdom of the North.

Now further south of them, namely, the Indians and the peoples dwelling in the great desert were the disowned sons of Abraham, born of Hagar and K'etura: Ishmael, Amram, Mogan, Madian, Yek'san, Yesbok, and Melisawe. And the sons of Lot were Amon and Moyab: and those of Esau were Edom, and there were others yet, who dwelled to the north of the southen Indians in the enormous and vast desert, being disowned by Moses and the children of Israel. The prophet said about them: "They are as a storm which comes moving from the south, from the terrible desert." That is the large and terrible desert I mentioned, from which came that whirlwind of peoples, arising as a storm, and seizing and trampling every country. And the saying was fulfilled, that "the fourth beast will create a fourth kingdom upon the earth, more wicked than all other kingdoms, which will make a desert of every country".

Now what shall I say about the agitation and calamitous disasters taking place within the empire of the Romans, the empire which never ceased its internecine warfare? The principal men and advisors of the realm were drowned in blood, since it is said, they were plotting the emperor's death. As a result, all the principal men and the princes of the empire were destroyed and the inhabitants of the land were reduced, until there was no advisor to be found. Among those killed were Georg Magistros and that virtuous man, Manuel, who was the father-in-law of aspet Smbat (son of Smbat the great, called Xosrov Shum). Some say that they observed a glowing light at the place where he was killed. Smbat was exiled. For the troops accused him of trying to rebel afterwards. They told the emperor that Smbat had said "The Magistros' blood must be avenged." He was a prince of the army there, and liked by all the troops. Smbat was prince of the Thracian princes' troops, while Manuel was a Magistros working in Constantinople. Now the emperor did not summon the Magistros with bold authority, since he feared a rebellion of the troops. Rather, he summoned the aspet Smbat and made him swear by the Lord's Cross, which he possessed, that he would divulge nothing. Then the emperor sent Smbat back to his troops to speak to the Magistros in peace, but to deceive him and bring him into captivity. Now Smbat went but was unable to deceive him, especially since he did not conceal the emperor's words. Then he spoke with all the princes of the army and gave the Magistros the imperial order. Since they and all the troops were unable to resist the imperial order, they gave him into their hands. They seized and bound him and took him into the emperor's presence As a result, the troops of the Thracian princes plotted Smbat's death and said that he was planning to rebel, so that he would be put to death. However, the emperor rejected them and spared Smbat

SEBEOS HISTORY CHAPTER 35.

[The Ishmaelites' (Mohammedans') war with the Persians and destroy their lordship. The death of Yazkert. The Medes and the Armenians enter the service of the Hagarenes. Constans comes to Armenia. The Ishmaelites prepare to fight with the Romans. Regarding Nerses, kat'oghikos of Armenia.]

In the twentieth year of king Yazkert of Iran [652 AD], in the eleventh year of emperor Constans (who was called Constantine after his father), in the nineteenth year of the lordship of the Ishmaelites [Mohammedans], the Ishmaelite army which was in the country of Persia and Xuzhastan [Khuzestan, ancient Elam] went eastward to the area known as the Palhaw country (which is the land of the Parthians) against Yazkert, king of Iran. Yazkert fled from them, but was unable to escape, because the Arabs caught up with him close to the Kushans' borders, and destroyed all of his troops. Yazkert fled to the army of the T'etals who had come from different areas to help him. Then there was the Marats' prince, about whom I spoke earlier. He had gone to the east to their king, rebelled, fortifying himself in one place, requested an oath from the Ishmaelites and went to the desert to serve the Ishmaelites. Now the T'etal troops seized Yazkert and killed him. He had reigned for twenty years. And so ended the lordship of the Persians and the House of Sasan, which had ruled for 642 years.

When the king of the Ishmaelites saw the success of these victories, and that he had done away with the kingdom of Persia, he became confident, and when three years of the peace provision had passed, the Arab caliph no longer wanted to continue the peace with the Roman emperor. So he ordered his troops to commence warfare on land and sea, to do away with this kingdom as well, in the twelveth year of the reign of Constans.

In the same year the Armenians rebelled, withdrawing from the Roman empire, and entering the service of the Ishmaelite king. T'eodoros, lord of Rshtunik' and all the princes of Armenia made an oath until death, and an agreement lasting until the grave to break the divine harmony between Armenia and 'Constantinople. The Ishmaelite prince spoke with them as follows: "Let this be an oath of peace between myself and you [lasting] as many years as you wish. I shall not take tribute [sak] from you for three years after which, by oath, you may pay what you wish. You may keep 15,000 cavalry in your land. Provide sustenance from your land and I shall include it in the royal tax. I shall not demand that the Armenian cavalry be sent to Syria though let it be ready to go and fight wherever else I order it. I shall send no emirs to [your] fortresses nor even a single Arab officer or cavalryman Let no enemy enter Armenia, but should the Romans come against you, I shall dispatch as large an auxiliary force as you want. And I swear by God the Great that I shall not break this vow." Thus did the satellite of the anti-Christ pull the Armenians away from the Romans [This section, unlike the major portion of the book uses hrhomots' (Romans) instead of yunats' (Greeks) for the Byzantlne empire.]. For although the emperor wrote them many requests and entreaties and summoned them, they did not want to listen to him. Then the emperor said: "I shall come to the city of Karin and you should come to me. For I want to give you stipends in aid and plan together with you what we should do." Despite this the Armenians did not want to heed him.

All the Roman troops complained and grumbled about the lord of Rshtunik' and about the Armenians before their emperor about the blows [inflicted] at Mardots'ek'. They said: "The Armenians have allied with the Ishmaelites. They made us trust them, encouraged the troops to go raiding to Atrpatakan, then had the Arabs attack us unexpectedly and defeat us. We left everything there. Now let us go to Armenia and get our things."

Then emperor Constans agreed to do the will of the troops. He took 100,000 of his troops and went to Armenia. As soon as he reached Derchan, Ishmaelites came before him and gave him a letter from their prince which said: "Armenia is mine, so do not go there. But should you go, I will deal with you in such a way that you will be unable to flee." Now emperor Constans said: "That land belongs to me, and I shall go there. Should you come against me, God will be the judge of what is just." And he went to the city of Karin in the twelveth year of his reign and in the twentieth year of the lordship of the Ishmaelites.

The emperor Constans spent several days in the city of Karin / Erzerum. The princes and troops from so-called Fourth Armenia came before him, as did all the troops and princes from that area who had separated from the followers of] Rshtunik'. Among them were the Sperats'ik', the Bagratid princes, the Managhayk', the Daranaghayk', those from the district of Ekegheats', all the troops from those places, and the Karnats'ik', Tayets'ik' and Basenats'ik'. Also coming into Constans' presence there were the princes of Vanand with their troops, the Shirakats'ik', Xorxorhuni, men from the House of Dimak'sen; Mushegh Mamikonean with his people, certain other princes, troops from the Ayrarat area, the Arhawegheank', Arhaneank' Varazhnunik', Gnt'unik', Spandunik' and others. Kat'oghikos Nerses had come from Tayk' and visited the emperor. All the princes told the emperor about the plan and desire of rebellion of the lord of Rshtunik' and about the quick traffic of Ishmaelite emissaries going to see him. Then the emperor and all of his troops anathematized the lord of Rhshtunik', removed him from the dignity of authority and dispatched another man in his place accompanied by forty men. When they reached [T'eodoros] he had them seized and bound, sending some to the fortress of Baghesh and others to the islands in Lake Bznunik' [Lake Van]. Then he himself went to the island of Aght'amar commanding the troops of those areas to go and secure themselves in their own districts. United with him were the Iberians / Georgians, Aghbanians / Aghuanians and Siwnets'ik' who, in accordance with his order, went to their own lands and fortified themselves there. Now T'eodoros, lord of Vahewunik', seized Arp'a fortress. His son, Grigor, was the son-in-law of the lord of Rshtunik'. Varaz Nerseh Dashtkari secured himself out in the open and seized the treasury, since all the treasures of the land, the Church, the princes, and merchants were there.

Now as soon as emperor Constans heard about this, he wanted to loot the multitude of the troops and to go and winter in Armenia, in order to destroy the country. But then the kat'oghikos Mushegh and all the princes prostrated themselves and with great and tearful entreaties asked for clemency so that Constans not become totally enraged because of their offenses and destroy the country. The emperor heeded their requests and released the multitude of troops. Then he himself went to Avrarat with 20,000 troops and to Dwin where he resided in the home of the kat'oghikos. The emperor made Mushegh lord of the Mamikoneans, prince of the Armenian cavalry and dispatched him with 3,000 men to the area of the sep'hakan gund. Likewise, he sent some of his troops to Iberia, Aghbania, and Siwnik' to destroy their alliance. Other troops invested the area around the emperor, in the mountains and plains. While for some time they did not want to submit, later on they did go into imperial service. However, those in Aghbania, Siwnik', and the sep'hakan gund [area] did not submit. Imperial troops looted their country, taking whatever they found, and then returning to the king.

Regarding the Armenian kat'oghikos Nerses.

Now I shall relate a few things about Armenia's kat'oghikos Nerses. He was originally from the village of Ishxan in Tayk'. From childhood he was raised on Roman land, had learned the language of the Romans, and circulated about the land as a member of the military. He had accepted the Council of Chalcedon and the Tome of Leo. He did not reveal his plans of impiety to anyone until he reached the office of the episcopacy of the land. Subsequently he was called to the kat'oghikosal throne. He was a man of virtuous behaviour, of fasts and prayers. But within his heart was concealed the poison of bitterness: he planned to make the Armenians accept the Council of Chalcedon, but did not dare to do anything about it until emperor Constans came and staved at the home of the kat'oghikos and on Sunday preached the Council of Chalcedon in the church of saint Gregory. The mass was offered in Latin by a Roman priest, and the emperor, the kat'oghikos, and all the bishops took communion-those who wanted to and those who did not. Thus did the kat'oghikos shake the true faith of saint Gregory which all [previous] kat'oghikoi had held firmly in the holv Church. from the time of saint Gregory to this day. And Nerses fouled the limpid, clear waters of the fountains a plan which he had in mind for a long time, but which he dared not to reveal until that day. But when the time was right, he worked his will, betraying the bishops one by one, and disheartening them with terror. He threatened them to the point that all of them carried out the command to commune under fear of death. They communed even more so because their mentors, the venerable and most fundamental bishops had died. But a certain bishop silenced and countered the emperor in his presence. Earlier all the bishops had subscribed with him and he had cursed the Council of Chalcedon and the Tome of Leo and rejected communion with 'Constantinople. This was sealed with the ring of the kat'oghikos, and the rings of all the bishops and grandee princes. They gave it to him to keep in the church. Now when mass was offered and all the bishops communed, the bishop whom I mentioned earlier, did not commune. Rather he descended from the bema and was hidden in the crowd

As soon as the ceremony of communion was finished, and the emperor entered [his] room, the kat'oghikos and the Roman priest betrayed [the bishop] and made a complaint about him, saying: "He did not sit on his throne and did not commune with us, regarding us and you unworthy. He left the bema and concealed himself in the crowd." The emperor became angry and ordered two men to go seize him and bring him to him in the room. When this was done the emperor asked: "Are you a priest?" The bishop replied: "If God and your glory so will it." The emperor said: "And who are you that you regard neither me, your king, nor your kat'oghikos and our father as worthy of communing with you?" The bishop replied: "I am a sinful, worthless man, and unworthy of communing with you; however, should God make me worthy of communing with you I would consider that I enjoyed communion with Christ at His Table and from His Hands." The emperor retorted: "Enough of that. Now tell me, is that the kat'oghikos of Armenia, or not?" The bishop answered: "Indeed, just as saint Gregory was." The emperor asked: "Do you have that respect for the kat'oghikos?" "Yes ' he said. "Will you take communion with him?" The bishop answered: "Just as with saint Gregory." The emperor asked: "Then why is it that you did not commune today?" The bishop replied: "Benevolent king, when we had but seen your image painted on the wall we were seized with trembling. Behold how much more frightening it is now, to see you face to face and to speak with you directly. We are ignorant benighted people who know neither your language nor your literature. But if we study first, we shall then master it. May your benevolent command rule by healing. He the kat'oghikos has gone beyond all the religious commands of this land. Four years ago he convened an assembly and all the bishops assembled here. He had a document regarding the faith made. Then he. I, and all the princes sealed this with our rings. That document is now with him. Order that it be sought and examined." And he was silent. The emperor realised his treachery and reprimanded him a great deal in his own language. The emperor then ordered the bishop to go and commune with the kat'oghikos. As soon as the bishop fulfilled the emperor's order, he said: "May God bless your benevolent and pious rule forever, and may you rule over all the seas and lands with much triumph". The emperor likewise blessed the bishop, saying: "May God bless you. You did what befits your wisdom, and I am thankful."

The emperor hastened to Constantinople with great urgency, to reach it quickly. He departed in haste. He made a certain Morianos the prince of Armenia and gave him an Armenian force which was from the area.

Now when emperor Constans left Dwin, the kat'oghikos went with him. The kat'oghikos went and stopped in Tayk' and did not return to his place, for the prince of Rshtunik' and the other princes with him directed incredible rage at him. Now T'eodoros, lord of Rshtunik', and his son-in-law, Hamazasp, lord of the Mamikoneans, were lying in ambush at the island of Aght'amar. He requested troops from the Ishmaelites and 7,000 men came to his aid. He stationed them at Aghiovit and Bznunik', then he came and remained with them.

When winter had passed and it was close to great Easter, the Romans fled and went to Tayk', but were expelled. They were unable to station themselves anywhere, but rather fled to the shores of the Black Sea, destroying the entire country. They captured the city of Trapizon amassing a great deal of loot, booty, and captives.

After this, T'eodoros, lord of Rshtunik', went to the Ishmaelite prince Mu'awiya in Damascus and saw him with very great gifts. And the Ishmaelite [Muslim] prince gave him clothing made with gold and silver threads and a veil [or: banner], after their fashion. Mu'awiya gave Teodoros authority over Armenia, Iberia [Georgia], Aghbania / Aghuania, Siwnik', as far as Kapkoh and the Chora Gate, and released him with honour. Mu'awiya stipulated that he should bring that country into service. The breaking of the peace which had existed between Constans and Mu'awiya the Ishmaelite prince, took place in the eleventh year of Constans' reign. The king of the Ishmaelites ordered that all his troops should assemble in the West and make war on the Roman Empire, to take Constantinople and to eliminate yet another kingdom.

SEBEOS HISTORY CHAPTER 36.

[The letter of the Ishmaelite king to the Roman emperor Constans. The Ishmaelite prince Mu'awiya comes to Chalcedon and is vanquished by the Lord.]

"If you want to spend your life in peace," he wrote, "abandon that foolish faith which you learned from childhood. Deny that Jesus and turn to the great God whom I worship, the God of our father Abraham.

"Send the multitude of your troops away from you, back to their own places. I shall make you a great prince in that region. I shall send ostikans to your city, examine all the treasures, and order them divided into four parts. Three parts will go to me, one part to you. I will give you as many troops as you need, and take as tribute as much as you are able to give. Otherwise, how can that Jesus whom you call Christ who was unable to save himself from the Jews—possibly save you from me?"

All the troops in the east, in Iran, and Xuzhastan, in the Indian area, from Aruastan and Egypt assembled by Mu'awiya, prince of the army, who resided in Damascus. They readied military vessels at Alexandria and all the coastal cities and filled the boats with soldiers and [war] machinery. They had three hundred very large vessels with 1,000 very select cavalrymen in each boat. Mu'awiya also ordered that 5,000 light boats be made. Because of their light weight, he placed few men in them, 100 men per ship, so that they swiftly glide over the waves of the sea surrounding the very large boats. Then Mu'awiya dispatched them across the sea. He took the troops which were with him and went to Chalcedon [near Constantinople]. As he approached, all the inhabitants of every land submitted to him, the shore-dwellers, mountaindwellers, and plains-dwellers. Now the multitude of the Roman troops went and entered Constantinople to guard the city. Meanwhile the corrupter [caliph Mu'awiya] entered Chalcedon in the 13th year of Constans. At the shore he had organized many light ships so that when the heavier boats reached Chalcedon he would quickly go to their aid. The Arabs had a letter from their king taken to Constans in the city.

The emperor took the letter and entered the House of God. He prostrated himself and said:

"See, Lord, how these Hagarenes insult You. Have mercy upon us, Lord, as we place our hopes in You. Shower them with contempt and avenge Your Name, Lord. Let them be kept in embarrassed confusion forever and be destroyed in shame. Let them learn that Your Name is Lord and You alone are high above every country." Constans removed his crown and his purple robes and

Constans removed his crown and his purple robes and donned a hair shirt. He sat upon ashes and ordered that a fast be proclaimed in Constantinople after the fashion of Nineveh.

Then behold, the large ships arrived at Chalcedon from the Alexandria area together with all the small ships and all their equipment. For they had equipped the boats with engines of war, shooting machines, rock-hurling machines, archers and slingers. They were designed so that when they reached the city wall they would easily be able to go over the wall into the city, from the summits of the towers. When the Arabs were about two asparez distant from land, the dreadful power of the Lord was revealed. For the Lord made a sign and caused a violent wind to blow from Heaven. The wind arose, turned into a great storm, stirred the sea from the depths and rose to the surface creating waves as tall as the crests of lofty mountains. The wind which howled at them crashed and thundered like a storm cloud. The abyss gurgled and the towers fell, the machinery was destroyed, the ships were demolished, and the multitude of troops sank into the depths of the sea. The survivors were dispersed on planks, and, tossed about by the rising and falling of the waves, were killed. For the sea opened its mouth and swallowed them, and not a single one survived. That day, God with His arm raised, spared the city because of the prayers of the pious emperor Constantine. The violence of the wind and the churning of the sea did not end for six days.

When the Ishmaelites saw the dreadful power of the Lord, their hearts broke. Quitting Chalcedon at night, they returned to their own place. The other army which was stationed in the Cappadocia area made war on the Roman troops. The Romans struck them and they fled to Aruastan, subjecting Fourth Armenia to looting. When fall had passed and winter was near, the Ishmaelite army came and encamped at Dwin. It planned to go and put Iberia [Georgia] to the sword. The Ishmaelite [Muslim] commander communicated with Iberia by means of a threatening message which said: "Either you enter our service, or you leave the country and depart." But the Iberians [Georgians] did not accept this. Rather, they prepared to resist them in war. The Ishmaelites went against them to make war and to extirpate them completely.

Now when they were on the road, cold and the snow of winter fell on them. As a result, they hastily departed for Asorestan, and did not work injustice in Armenia.

Then the princes of Armenia who were in the Roman and the Arab sections, Hamazasp and Mushegh and all the others, came together in one place and united, making peace with each other so that the sword and bloodshed not appear in their midst, so that they pass the winter in peace, and spare the shinakans [peasants]. For the lord of Rshtunik' had fallen ill and had gone to the island of Aght'amar, and was unable to go out or to think of anything. The princes divided the country on the basis of the number of cavalrymen each prince had, and established taxes in gold and silver.

One could observe there the misfortunes of doubt similar to the reactions of a sick person when the pain grows severe and he cannot speak. Such things occurred. For there was nowhere for a man to flee to and hide, nor was he protected from within. Rather, he resembled someone who had fallen into the sea and was unable to find a way out.

Now when the lord of Rshtunik' saw this, he requested troops from the Ishmaelites to strike and persecute Armenia and to put Iberia to the sword.

SEBEOS HISTORY CHAPTER 37.

[The Medes rebell from the Ishmaelites (Mohammedans).] In that year the Medes rebelled from Ishmaelite service and killed the Ishmaelite king's prince in charge of taxation. They took refuge in the strongholds of the land of Medes, the deep forests, the chasms, rocky places, the troublesome deep valleys which are by the Gaz river and Marats' mountain; and they took refuge in the might of the vigorous and brave peoples dwelling in them, Deln and Delumn [Abgaryan, p. 360 n.653

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3300 emends this to Geghn and Delamn and takes it as a reference to the peoples of Gilan and Daylam, by the southern shores of the Caspian Sea.].

For they were unable to bear the bitter and harsh service and the weight of the tax which had been imposed on them. Each year 365 sacks of money were taken from them. From those who could not pay they took a man for each dram and eliminated the cavalry and the principality of the land. For such reasons they placed their lives in the balance and one out of two thought it better either to die, or to be freed from that wicked service. They started to assemble the remaining people into an army and to organise by brigades so that perhaps they might escape the dragon's teeth and the bitter breath of the beast.

Now the multitude of the Ishmaelite troops saw that their work was not succeeding in the region of the secure Marats' mountains. For they had not even been able to subjugate the Ket'rus and Skiwt'eay with all the multitude staying in secure places. Many Arabs lost their lives at the strongholds, falling headlong into the deep valleys. Many were pierced by arrows in the rough thorn patches, arrows shot by brave, manly warriors. The Arabs fled the place heading north toward the people who dwell by the Caspian Gates. They reached the Chora pass, crossed it, and destroyed all parts of the land by the foot of the mountain. A small force resisted them at a place called the Gate of the Huns and struck at them, for they were the defenders of the place.

Another army arrived from the Tetal area and the two armies clashed with great violence. The Ishmaelite army was defeated by the Tetal army which struck at them and put them to the sword. Now the survivors were not able to flee through the pass since another Tetal army had come to assist the first army. So the Arabs headed for the great and rugged mount Caucasus. Barely going over a side of the mountain, a few escaped by a hairbreadth, naked, barefoot, on foot, and wounded. Thus did they go to the Ctesiphon area, to the country of their habitation.

SEBEOS HISTORY CHAPTER 38.

[Mushegh rebells from the Romans and enters the Ishmaelites' service. The battle of the Ishmaelites with the Romans at Naxchawan, the destruction of the Romans and the destruction of Armenia. Once more the Armenians quit Ishmaelite [Islamic) service and submit to the Romans. Hamazasp, lord of the Mamikonean, becomes Curopalate, as a result of which the Ishmaelites kill the hostages. Discord breaks out among the Ishmaelite [Muslim] army and they separate from each other. Their prince Mu'awiya conquers all of them, becomes king, and makes peace among them.]

Now Mushegh, lord of the Mamikoneans, rebelled in the Roman area and entered Ishmaelite service. And in that same year the Ishmaelite army which was in the land of Armenia seized the entire country from end to end. T'eodoros, lord of Rshtunik', and all the princes of the land united and entered Arab service, hastening to do their bidding in every way, for fear of a terrible death hung over them.

In that year the venerable and pious man Artawazd Dimaksean was betrayed by a jealous brother and delivered up to the merciless executioner named general Habib, who resided at Ashnak, Aruch. He put Artawazd to a very cruel death.

Now it was extremely cold winter and the Romans were harassing them. But because of the cold, the Arabs were unable to engage them in war. Instead, they arose unexpectedly, crossed the river, and went and fortified themselves at Zarehawan. When the Romans saw this, they did not concern themselves about them, but rather destroyed the fortress of Dwin, went to Naxchawan and fought with the fortress so that they might destroy it too. The general of the Roman army was a certain Mawrianos who was said to be a trustworthy man.

When spring arrived, the army was organized and readied to war with the Ishmaelite army. But Mawrianos, becoming stubborn, thought that he himself would accomplish the work. The Arabs campaigned against the Romans who were fighting with the fortress of Naxchawan. They struck and put them to the sword and put the survivors to flight. Mawrianos fled to Iberia [Georgia]. The Ishmaelite [Muslim] army turned back and besieged the city of Karin, battling with it. Since the inhabitants were unable to resist them in war, they opened the city gates and submitted. The Arabs entered the city, gathered up the gold, silver and entire multitude of the city's goods, robbed the entire country of Armenia, Aghbania / Aghuania, and Siwnik', and denuded all the churches. As hostages they took the chief princes of the land, their women, and many sons and daughters.

T'eodoros, lord of the Rshtunik', and his relatives went along with them and took them to Asorestan. T'eodoros, lord of Rshtunik', died there. His body was brought to his own district, and he was buried in the tomb of his fathers.

Hamazasp, lord of the Mamikoneans, son of Dawit', held authority in the land of Armenia. He was a man regarded as virtuous by everyone. But he was delicate, a reader and a scholar, not—like his patrimonial family—skilled and adept at military exercises. He did not enter battle and did not see the enemy's face. But he began to strive for the bravery native to his ancestral House, fervently striving to accomplish an act of bravery as was the wont of his ancestors. He entreated Heaven to give leadership and triumph to him and to make him brave.

As I said earlier, Nerses, the kat'oghikos of Armenia, departed with the emperor and went with him to Constantinople. He was received there with honour. They gave him goods and released him to his place. He went and remained in Tayk' until the lord of Rshtunik' died and the Arab raids stopped. After six years of persecution, he returned to his place and was established on the throne of the kat'oghikosate. He hastened to complete the construction of the church which he had built on the avenue of the city of Vagharshapat.

I have futilely strung together words into a history, following the uninspired counsel of my own mind, and not the worthy blessing of knowledge. But I did examine the order of scholars and confirmed my account with the words of the prophets uttered at the command of the Lord. For although the former is quickly fulfilled, the latter is fulfilled for eternity as the Lord said: "Heaven and earth may pass, but My words will not pass" [Matthew 24. 35]. "For from My anger fire will be roused, will burn, and descend to the depths of hell' [Jeremiah 15. 14]. What [the Lord] said about these people is clear: "They will be burned with fire, and the bases of their mountains will be disturbed"; speaking about the tyranny of the grandee princes: "I shall pour out all types of evil upon them, and exhaust them with my arrows." For just as arrows fly from the well-curved bow of a strong man toward the target, so do the Arabs who come from the Sinai desert to destroy the entire world with hunger, the sword, and great terror. The fact that the fire blazed out in the desert area was clearly indicated by the Lord when He said: "I shall set incurable snares upon them, the beasts of the desert who will drag their prey here and there across the earth." As the prophet Daniel thundered: "The fourth beast is frightful and awesome and very strong. Its teeth are iron, its claws are copper; it eats then spits out and stomps on the food" [Daniel 7. 7] and so forth. The final words are: "The day of their destruction is at hand, and the Lord has come upon them in His preparation" [Jeremiah 46. 21]. This too will be fulfilled in its own time.

That same year the Armenians stopped serving the Ishmaelites [Muslims] and submitted to the Romans. Emperor Constans made Hamazasp, lord of the Mamikoneans, Curopalate, giving him a silver throne and authority over the land of Armenia. He gave honours to the other princes and treasures to the troops.

When the king of the Ishmaelites saw that the Armenians had withdrawn from him, he had all of the hostages who had been taken from the country—some 1775 souls—put to the sword. Some twenty two hostages who were not in the place were the sole survivors.

Now Mushegh, lord of the Mamikoneans, was unable to quit Ishmaelite service because four of his sons were hostages kept by them. The three sons of Hamazasp and one brother were hostages. However, they sought him and other princes together with their women, to bring them to Syria. For this reason the princes preferred death to life, withdrew from Arab service and, using speedy travel, submitted to the Roman emperor. United with them were the princes and troops of Aghbania / Aghuania and the princes of Siwnik' together with their land. Previously they had been attached to the geographical unit of Atrpatakan [yashxaragirn Atrpatakani "to the census of Atrpatakan"] until the Persian kingdom was ended. When the Ishmaelites ruled, they were conquered and united with Armenia. The Arabs arrested Mushegh and the other princes who were with him.

The Arab king ordered that the other princes who had been arrested should be set free; however, he demanded that Mushegh remain with him.

Then God sent discord into the army of the sons of Ishmael. Their unity dissolved, they clashed with each other and divided into four parts. One part was in the Indian area. Another was that army which held Asorestan and the northern areas. Another was the one in Egypt and in the T'etal region. Another was in the Tachik area and at the place called Askarawn. They began fighting with each other and destroyed each other with endless killings. Now the troops who were in Egypt united with those in the Tachik area and they killed their king and took the multitude of treasures as loot. They enthroned another king and returned to their places.

Now when their prince Mu'awiya, who was in Asorestan and was second to their king, saw what had happened, he united his troops and he too went to the desert. He killed the king whom they enthroned, battling with and severely destroying the troops in the Tachik area. He then returned to Asorestan in triumph. Now the army which was in Egypt united with the Roman emperor, made peace and was incorporated. The multitude of the troops, some 15,000 people, believed in Christ and were baptised. But the bloodshed of countless multitudes increased and intensified among the Ishmaelite armies. They engaged in frantic battles and killed each other. Nor were they able to stop even somewhat from wielding swords, taking captives and intense battles on land and sea, until Mu'awiya grew strong and conquered all of them. He subdued them, ruled as king over the property of the sons of Ishmael and made peace with everyone. Amen

HISTORY OF THE HOUSE OF THE ARTSRUNIK Author: Thomas Artsruni (Tovma Ardsruni) Original language and script: Armenian

Original language and script: Armenian Translation: Robert W. Thomson, 1985 Estimated Range of Dating: 875-905 A.D.

(Artsruni, one of the most important princely families of Armenia, an offshoot of the Orontids, Achaemenian satraps and subsequently kings of Armenia, but claiming descent from Sennacherib of Assvria. Mithrobarzanes, or more correctly Mithrobuzanes, Tigranes the Great of Armenia's viceroy of Sophene in 69 BC. (Plutarch, Lucullus 25; Appian, Mithradatic War 12.84), may well be the first historically known member of this family. In the Arsacid monarchy, from the first to the fifth century, the Artsrunis reigned in the princely states of Greater and Lesser Ałbak. southeast of Lake Van. and gradually expanded over the entire surrounding territory, known after the sixth century as Vaspurakan. The political weight of this house can be seen in the fact that the feudal aid which it had to render to its suzerain, the king, consisted of 1,000 horses. The Iranian abolition of the Armenian monarchy in 428 AD left the Artsrunis. like the rest of the princes, who had always reigned in various subdivisions of the country under the suzerainty of the king and who had brought about that abolition, quite independent, save for a distant control exercised now by the Great King of Iran. When, in the ninth century, the Bagratid dynasty reestablished the monarchy, the Artsrunis were among its most powerful vassals and rivals. This new unity proved ephemeral, however, and a century later was succeeded by a number of subkingdoms, each in control of lesser princes. One of these succession-kingdoms was Vaspurakan: its prince, Khatch ik (Xač 'ik)-Gagik II Artsruni received the royal crown from the caliph in 908 AD. It lasted till Roman annexation and Saljuq [Seljuk, meaning Turkish] conquest destroyed it after the abdication of the last king, Sennacherib-John in 1021. A branch of the family then moved to Cilicia, where it held Tarsus for the Roman emperor: another, known by the name of Mankaberdeli, played a considerable role in Georgia, in the twelfth to fourteenth centuries.

In the perennial struggle of Iran and Rome over Armenia, the Artsrunis tended, partly out of princely opposition to the crown which was on the whole pro-Roman, but also because of the geographical position of their state, occasionally to espouse a pro-Iranian policy—as later they tended to follow a pro-Arab policy—and this in the circumstances meant also Mazdaizing in religion. Thus, in about 363 AD, Meruzhan (Mithrobuzanes) I Artsruni passed to the side of Iran, exchanged Christianity for Mazdaism [Zoroastrianism], and was one of the leaders of the Iranian invasion of Armenia. On the other hand, Nershapuh I took an active part in the anti-Iranian insurrection of 451 and Vasak I was crucified by the Iranians, during the Roman war of Khosrow II, in 610/611. The cultural aspect of the Artsrunid rule is evidenced in the splendid tenth-century monuments of architecture and of fresco and miniature painting, especially in the palace and the church of Alta Amar, the island residence on Lake Van.

Toyma Artsruni (also transliterated as Toyma or Toymay Ardzruni, known as Thomas Artsruni in English) was a ninthcentury to tenth-century Armenian historian and author of the History of the House of Artsrunik. Contrary to the given title, the four-volume work not only relates the history of Artsruni royal family, of which he was a member of, and its origins near Lake Van but also comprehensively covers the history of Armenia. Toyma began writing History sometime in the 870s. Much like other histories composed by Armenian historians, the first volume starts at the beginning of the Armenian nation and ends in the middle of the fifth century. However, Tovma's most valuable contributions are found in the second and third volumes which accurately detail Armenian life under the rule of the Arab Caliphates and in particular the 851 Arab military expedition led by the Turkic general Bugha al-Kabir, its subsequent consequences, and the establishment of the independent Bagratid state north of Lake Van. Tovma was a relative of the king of Vaspurakan Gagik I, and wrote a detailed account in History about the famous palace and church Gagik constructed on Akhtamar Island. The precise date that Toyma completed his work is unknown although some historians have determined that it was composed sometime after 905. Tovma's work ends with an incomplete 29th chapter yet several unknown authors (referred to as "Anonymous") took it upon themselves to continue History down to the 1370s and added an appendix

and colophon. Tovma's History was first published in 1852 in Constantinople in Armenian and was subsequently translated into French by Marie-Félicité Brosset in 1862.

Armenian Titles in the text:

[1. Catholicos, plural Catholicoi [Greek: Katholikos, Katholikoi], is a title used for "Patriarch" or "Bishop" (the head of an autonomous Church) of some Eastern Christian Churches. Like our word "Catholic", it comes from ancient Greek derived from kath'olou, "generally" from kata, "down" and holos, "whole", meaning "concerning the whole, universal, general"; it originally designated a financial or civil office in the "Roman Imperial Cult", the predecessor of the Roman Catholic Church. The leader of both organisations has been the Pontifes Maximus.

2. Illuminator, plural Illuminatori [Roman / Latin for "enlightener" meaning 'religious teacher or instructor' who also may have a leading function like an "elder".

3. Mahmet is the Armenian version of Mohammed or Muhammad [or Mahomet]; it is still used in the Turkish language as Mahmut, Mohammed, c. 570–632 AD, was an Arab political, religious, and social leader and the founder of Islam. According to Islamic doctrine, he was a prophet, sent to preach and confirm the monotheistic teachings of Adam, Abraham, Moses, Jesus, and other prophets. He was not the only person who claimed at his time to be a prophet, he was fighting against a handful others. Striking is that he used only Jewish contents and characters to create Islam and his Koran. A large part of the Koran reflects the violent and xenophobic attitude of the Messianic Movement that was crushed by Vespasian five centuries before; that attitude was recorded in the Dead Sea Scrolls from Qumran. These similarities suggest that lots of Messianist had survived Vespasians onslaught in the Arabian deserts and cities. That Mohammed fell out with the Jewish decendents of the Messianists had no religious reasons but political ones: the Jews did not want to accept his claims for total suppremacy. Mohammed might well have been one of them. With Christians, on the other hand, he had religious problems because their trinity doctrine violates the first three of the Ten Commandments.]

General Contents: All sources, including the anonymous continuator(s) [who probably, refer to the author of the History of the House of the Artsrunik' as Thomas (Tovmay). However, he only mentions himself once by name: "I Thomas ... zealously undertook this great work, though devoid of wisdom, sense, and intelligence." Thomas gives no details whatsoever of his own life, but he does refer on occasion to events he witnessed or about which he was informed by living persons. The first edition was published at Ortakoy, a suburb of Constantinople. From this edition Brosset made his French translation, published in 1874. The edition of the Armenian by Patkanean (St. Petersburg 1887) is based on a re-reading of the original manuscript. His edition, without the notes and suggested emendations, was reprinted at Tiflis in 1917 as no. 15 of the Lukasean Matenadaran.

Thomas the vardapet is an unknown figure, but the patrons of his History are well-known members of the Artsruni clan. In his Introduction Thomas sets out in careful detail his objectives in writing this work, and explains that it was composed at the command of "you, Grigor, lord [ter] of the Artsrunik' and prince [ishkhan] of Vaspurakan." This was Grigor Derenik, born in 847, who became prince of Vaspurakan on the death of his father Ashot in 874, and was killed in 887. But elsewhere Thomas refers to his patron as Gagik, the second son of Grigor Derenik: "At your command, Oh Gagik general of Armenia and Prince Ishkhan of Vaspurakan, we have undertaken an abbreviation of the stories of the past." Thomas, therefore, has not described the date or specific occasion when he undertook his History; and since the ending is missing, we do not know when he finished it. From the references to surviving witnesses noted above, one must assume that Thomas wrote before Gagik was raised to royal status in 908 AD.

Thomas Artsruni made great effort to be as precisely as possible: "Great labour have I expended in the search for what is reliable, perusing the written works of antiquarians and many historical accounts; and I have written down whatever I was able to discover." Thomas adds: "But because none of us was then present at the blessed one's responses, we did not consider it right to set them down in writing. . . . Whether this was false or true is not clear to us; and I reekoned it better not to write down what is not certain." This material is presented solely for non-commercial educational purposes. Most of Thomson's scientific footnotes have been removed.)

THE AUTHOR'S PREFACE TO THE HISTORY OF THE HOUSE OF THE ARTSRUNIK

In the resemblance of his image God honoured man with autonomous free will and named the being made from dust lord of the circular creation—as said the first of the prophets Moses. Like words spoke the royally born and prophetically graced David: "With glory and honour you crowned him and set him over your handicraft; and you made everything

THE GRAND BIBLE

subject under his feet ." He gave to serve him those luminaries established above, those eminent beings which circle around for the affairs and subsistence and needs of men, measuring the division of his works into day and night. As said the psalmist: "At the rising of the sun man goes forth to his work and the labour of his hands until evening ." And the Saviour said: "It is necessary to work while the day lasts: the night will come when no one can work ."

I shall explain in brief: all things have been arranged for the advantage of men at the movement of the two hour-marking luminaries, to indicate the turning rotation of their timekeeping circular course with the stately progression through the air of the heavenly stars-to distinguish the length of days and months and the completion of years; for the measure of the discrete races of mankind, for wise men to make distinctions, for the differentiation of numbers and the fulfillment of periods. Thereby the limits of the entire world are defined, according to the four diverse natures, as the opposing movements fuse in fours and threes from the rapid differing flowing currents of the air. From their threefold constitution the seasons are divided three ways into 365 days. With these various sciences civilised men who care for political sagacity have been occupied in order to provide for man's livelihood: honourable men, grand and of high rank, honoured by kings, famous and rich, who have been in structed in these matters and diligently occupied themselves therein. Distinguishing the period of each event in numbers, they have established its measure, making the sum total of all time seven ages of a thousand years.

So the great Moses of the Hebrews, describer and prophet of the creation of the world, who was learned and versed in Egyptian learning, in works of laborious study, said that the circling luminaries were arranged by the Creator "for signs and seasons and days and years." And through them he encompassed the times of earthly life of men, beginning from our ancestor. Adam, he said, lived 230 years and begat Seth; and having lived 930 years he died. And the beings that succeeded him he likewise wrote about; and in the same fashion set down in order the various aspects of human activity. Similar to him were a certain Berossus and Abydenus philosophers of the Chaldaeans [Babylonians], who, not very distant from Moses, set down in orderly fashion in the books of Chaldaean histories the discovery of hours and times and the behaviour of human races. All these documents, with much labour, others have written, coming down to our time, which kings held empires, for how many years and what periods they lived and ruled, which exceeded the other in care for the world. They described the order of wars and peace, the series of victories and defeats, the examples of virtuous and intemperate men, the solidarity and weakness of the valiant and the cowards, the firmness and the slackness of the noble and the ignoble, the inequality of the wise and the foolish, the separateness of the intelligent and the weak-witted, the delight in each one's habits of those who bring prosperity to the land and the negligent; how they ruled, pursued the lusts of the flesh or gave pre-eminence to things of the spirit; how they governed with a care for heavenly life or dragged themselves along the ground. Also they described their succession from each other, the existence of various dynasties, the ruling over different countries, those who acquired honour in the same according to circumstances, and others who, gorged in tyranny and the piling up of wealth, won for themselves worldly glory. Some were raised to high status by the Lord, like David and Joshua and others who lived down to our own time. Each one's name and period, the "how" and "why" they have established by reckoning in numbers and have inscribed in their books of history. Accord ing to the different nations and various tongues they have included these in writing for the fulfilment of the church in various wavs. so that those who succeed them in the same study and search for wisdom may easily without labour pursue their quest, made more knowledgeable and wise by these men.

So I, who received the request to compose this work from you, Grigor [Gregor], lord of the Artsrunik and prince of Vaspurakan, have accepted your command which your fond desires imposed on you. In the narrative of this book I shall indicate the genealogy and nature of your ancestors; I shall set out in order the dates according to the birth of each one of them, bringing the account down in full to our own time. Concerning events in Armenia wrought by the rule of the Muslims*, with diligent obedience following your command I shall set to work. [* In Armenian called "Tachik". Originally, the term Tajik refered to an indo-European speaking ethnicity that lives in ancient Sogdiana. At the time of Thomas Artsruni however it just refered to Islam and Muslim.] To the best of my ability I shall set out in this history in summary form the most important events and what are the appropriate ones. I shall indicate in this history the least and smallest remnants of records relative to events and places from the earlier and previous historians of our native lords of the Artsruni family, so that their valour and virtue may be clearly revealed by name, place, and time. And I shall seek out the most important ideas as inspiration for this account: who they were, and when, descended from whom, where, how, how

many, what sort they were, the manner of their reigns, and the ways in which they distinguished themselves; also concerning their wars and victories, whether they were victorious or were defeated, and how some of them for various reasons provided help and advantage to themselves or their comrades. Whatever descriptive information under these topics is included in previous accounts we shall abbreviate in this book, using to the best of our ability the writings of the ancient prophetic histories and the newer teachers of Christ's church, and the secular tales of industrious and ingenious men, who provided like nurses to us their followers the wholesome and unadulterated food of sweet and valuable nourishment, bringing us to mature and perfect knowledge in love of science and fear of God—intelligent and wise, zealous for his excellent and enduring riches and those here in this world.

Thomas is the only Armenian historian to devote a book specifically to the Artsrunik'; but histories of regions or families are common. Earlier writers have many references to the Artsrunik 1; for Thomas's elaborations on such passing allusions see the Introduction to this book. It is noteworthy that Thomas often refers to Moses (Khorenats'i) but never mentions by name P'awstos, Lazar, or especially Sebeos, despite his debt to them.

In this history I shall expound for you, most valiant of literary men, those who for Christ's sake fought the good fight and in victory rose from earth to heaven. By their prayers may the

Lord enable me to write a straightforward and true account in this book, led by the Holy Spirit with the counsel of Christ, for your pleasure and that of your like. Greetings in the Lord Christ. Amen.

BOOK ONE

ARTSRUNI HISTORY CHAPTER 1

It is only with great effort that one can discover the genealogy of the house of the Artsrunik because of the far-off times and the disappearance of archives in Armenia. But the pressing command of your lordship obliges us to pursue rapidly this search and to set down in proper style and to register in this book your desire in eloquent words. Great labour have I expended in the search for what is reliable, perusing the written works of antiquarians and many historical accounts; and I have written down to our own time.

Since the order of the ten nations is accurately written in all accounts, the next task for us is to set down in order the divisions of the nations following Noah, arranging them according to tribe and the dividing up of the world. So I shall discuss, according to the manifold languages after the building of the tower, from which tribe the Artsruni family arose. And since the equality of the three nations, that is, of the sons of Noah, has been set down in order in all books, there is no need for us to repeat that at length.

Now, following the multifarious researches of Eusebius and the faithful account of Africanus and Moses Kertol, first I shall expound how the divisions of the nations came about. Then I shall set down the more unlikely and doubtful suggestions from other critical works for comparison, so that by your intelligent and wise erudition you may be able to cast aside the erroneous aberrations of these opinions. The story runs like this.

Noah begat three sons: Zrvan, Titan, and Yapitost'e, who are Sem, Ham, and Japheth. Sem begat Elam and Asur and Arp'aksat' and Aram and Lud. Asur built the city of Ninos which is Nineveh, called the capital of Assyria.

Now Nebrot', descended from Ham, built Babylon, the first city, and was the first to rule on the earth. But because Babylon had fallen to Sem's lot, Nebrot' seized it for himself by force and established there the kingdom of the Ethiopians. Whereas Asur, son of Sem, built Nineveh, as the capital city of the kingdom of Assyria.

But why do they say that it was a long time later that Ninos built Nineveh? He was the husband of Semiramis, and begat Ninuas, whose lineage extends as far as King Senek'erim in the time of Hezekiah, leader of the Hebrews, and our Haramay. It seems to me that it is not appropriate cursorily to pass over the reason for this enquiry. Rather we should expound it in toto and write down the truth. Was indeed Asur, who built Nineveh, the grandfather of Ninos from the offspring of Sem, from whom Nebrot' was descended; or is indeed the race of the Artsruni descended from Sem or from Ham by Nebrof? For, as has been written. Asur, descendant of Sem, built Nineveh, and Senek'erim ruled over Nineveh by succession and was called king of Assyria. This is confirmed for us by Eusebius of Caesarea and Julian of Halicarnassos*, who aver that the kings of Assyria descended from the offspring of Sem, as is known from the established account. [* Eusebius, Chronicle, Aucher I p. 110 Julian of Halicarnassos must be a mistake for Julius Africanus, Cf. p. 9, where the reference to the "fourth book" of Julian of Halicarnassos is a reference to the lost book of Julius Africanus.] For the story runs like this. Titan dominated Zrvan, captured Babylon, and built his royal capital there. Zrvan was the fifth generation from Ksisutra

Now Asur, third from Sem, was the first to build Nineveh. Ninos was the tenth from Sem and from Ham. But Nineveh was really the lot of Sem, while Ninos is assured to be from the offspring of Ham according to Ariston the Chaldaean 3 and Eusebius of Caesarea and Moses Khorenats'i and Julian of Halicarnassos. Because Kronos took as his wife Rhea from the family of Zrvan and seized for himself the kingdom, he did not allow any descendant of Zrvan to rule and made a sworn pact that whatever male was born from his wife Rhea of Zrvan's descent was to be slain at birth. But one child only, Dios by name, was secretly saved by his mother, like Moses in Egypt much later. Thus no descendant of Zrvan was able to reign save only a woman named Dionysia—very opulent, licentious, and sensual.

She called herself Semiramis, after her grandfather Semwhich in the Armenian language is pronounced Shamiram. Captivated by her, Ninos of Bel's line took her to wife, for Shamiram was ensconsed in their native city Nineveh. So Ninos entered the roster of kings of Assyria through his wife Shamiram, since it was not the custom for the female line to be included in the genealogy of kings and legislators, save only according to the requirement of chronology-like Gofolia in Israel, 6 and Cleopatra daughter of Ptolemy Dionysius in Egypt. As a better-known example I can quote you our Saviour the Lord Jesus Christ. Explaining his genealogy in the flesh, the evangelist Matthew counts the generations one after the other beginning from Abraham and coming down as far as Joseph, yet is silent about the genealogy of Mary. Although Joseph had no share in the birth of Christ, he is included in the genealogy instead of his wife Mary, as I mentioned above. For it was not the custom to mention in the genealogy the list of the female line. Likewise you will find the genealogy of Luke set out from beginning to end; he says "as was supposed" Jesus descended from Joseph, from Jacob, from Heli, and so successively.

So also the woman Shamiram, from the progeny of Sem, ruled through her husband Ninos over Assyria legitimately, having rebelled against Ninos on the grounds that he had come as a foreigner to enter the kingdom of Shamiram descendant of Sem. Add to that what is written, that she palpitated with lasciviousness. But as has been explained. Shamiram of the progeny of Asur from Sem reigned in her own right over Assyria, their native empire; and her descendants ruled legitimately one after the other down to Tonos Konkoleros. Eighty-eight years later Senek'erim succeeded to the throne of his ancestral kingdom with great power. He captured Babylon and built Tarsus on the model of Babylon, a river running through the middle, as I shall describe in detail below. Then after the murder of Senek'erim by his sons, Adramelek and Sanasar came with a strong force to the mountain Sim, which mountain had been so named after their grandfather Sem-just as in Persian they call Zaruand after Zrvan. They stayed on Mount Sim until the time of Tigran Haykazn. But because Nebrot had destroyed Ninevely when he overthrew the descendants of Sem and built Babylon in its place, when Ninos became king he captured Babylon and re-built Nineveh and moved there the capital of the Assyrian kingdom. Furthermore, because Mestrim at the division of the nations and the world built Egypt and the descendants of Ham there flourished as rulers, the Assyrians ruled separately. You will find in the canon table of Eusebius Ninos and Shamiram and Abraham and the sixteenth dynasty of Egypt, and also in the fourth book of Julian of Halicarnassos, as in the fourth book of Moses.

So Ninos and Shamiram ruled over Asians and Egyptians and subjected them to tribute, but without removing those nations' legitimacy. I have set down this brief account merely to make known the nations.

Now since the order of my narrative has brought us to this question, we must first realize by what manner the Chaldaean books reckon the number of patriarchs as ten in accordance with Divine Scripture, yet differ from Scripture by calling them different names. Likewise they stretch out the periods of time to infinite myriads of years, which is not a convincing demonstration following one mode of reckoning-neither by the movement of the sun for identical periods of months and days according to the four seasons as they change through the year, nor again according to the waxing and waning of the moon. For although their writings are unreliable, yet they have alluded to many things rightly. They were the first inventors of writing, even if the Greeks presume to boast of Ptolemy for having at some time collected all the books of every nation and having them translated into Greek. But these zealous concerns were merely with a view to information from what others had said previously, and not a personal effort to invent writing-although before him, except as concerns the Babylonians, not only the Greeks but other nations also do not appear to have preceded him. For the Greek script was invented later by Cadmus, a Phoenician. Since we were anxious to comprehend these matters critically and not skim over them, we must here make a little pause in our narrative so that we may compare the tales of those outside the church with Divine Scripture. Then we shall set our sights on later events.

"God planted paradise," says Scripture, "in Eden to the east"-that is, in a country in the East about which there is nothing more to say than that in the East men inhabited it, rather than speaking of a western paradise or of it somewhere in between. Its unlimited size is indicated by the enormity of the abundant source, which having irrigated paradise sinks into the earth and re-emerges into the visible world from its invisible bed as four mighty and powerful rivers. Its surpassing beauty what human mouth could describe, or the delightful sight of its divinely planted trees? With inconceivable grace, glory, and honour he God crowned man with sovereign authority over it and gave him paradise to enjoy, also endowing him with a term of life whose many years were as but a day. It had no need of a foreign source of light whereby it might become dark on the arrival of evening: there was no delay of the sun to dispel the darkness of the night of the luminous creation, which after the rank and station of the first was moved to second place. There was no flowing nourishment to fill any deficiencies of the incorruptible; it was but a very little below the angels. As for Scripture saying: "to till it and keep it," this was not as if to complete the perfection of paradise or to guard it from harm, but rather it means to work righteousness and keep the commandment, so that by this modest service made like an offering he might thereby be raised to an even higher station according to the saying: "being faithful in this small matter," and not merely have dominion over the planted garden but also attain the bliss of heavenly life.

But he gave way to the seduction of the rebellious serpent, who in his deceitful wickedness liberally poured his bitter advice into the ear of the foolish woman. Thereby he trampled on the kindly benefits of the Creator and at the same time the command, and fell into the camp of the murderer. So it is now appropriate to call him deceitful and stupid. He was not content, for himself and his offspring, in his enchantment to abstain from the fruit, but even desired divine glory—to seize for himself in his effrontery even the honour of the Creator; in which attempt his deceiver the devil came to grief. As did also his wife, the first to taste in her desire to precede her husband in divine honour.

Alas for this most false plan and foolish decision, whereby he forgot his composition of dust and intended to turn his back on his awesome God and Creator. He who sees all at a glance descended to seek out the lost one. With soft footsteps he in dicated to him his approach, calling out in a friendly voice: "Where are you, Adam?" and tenderly bewailed his fall that per chance with His help he might be cared for.

But he, unreasonably refusing the direct recognition of his sin, ascribed the cause to God, saying: "The wife whom you gave to be with me, she gave me from the tree and I ate." And if Adam accused his ilk and helpmate of such things, how could his wife not be blamed for accusing the serpent, who was the very worst of animals? Hence, according to the order of the sin, first on the snake and then on the woman fell the painful consequences of the curses. But if the worker of sin and the firstborn of all evils who nestled in the snake was not cursed, this indicates the guilt of the snake in finding a source of blame for the penalty, which was wrought not only by himself but also by the inventor of evil. To which we respond that in every way he is incurable by good; not a single honourable aspect does he have-if one were to speak without using curses. Likewise the vital aspect in him is not in clined to the good but will be eternally tormented, being indivisible from evil. Philo of Alexandria teaches this about the snake wonderfully: before the occasion of this transgression he had the most wisdom of all breathing creatures; but man was able to see the thoughts of each of them even more distinctly than any other creature. Later, through the curse the two good and evil became understood. Notably by the spirit of prophecy this knowledge became helpful counsel for man to incite elimination of his error through repentance, and thus to provide some little caution to the other living creatures through their senses, even if these were useless

The Lord God dismissed him from the delightful garden to till the earth from which he had been taken. So what shall we do with regard to these matters save burst into sighs in our lament that the divinely blessed one left the land of Eden and exchanged it for this laborious and painful lot by an irremedial and pitiful exchange. Made in the image of God, he was rendered shadowy; set on high, he was brought low; sharer in immortal life, through the curse he was made dust; established in lordship, he was laid low with multifarious evils. He became the servant of woes, leaving to himself and his posterity as inheritance for his sons a life of labour with death and childbearing in grief. Here with many laments and groaning we must quote the prophet's saying: "Man was in honour and did not understand; he became equal to the irrational animals and was rendered like unto them."

After this Adam approached his wife Eve, and she conceived and bore Cain. He called him "acquired" and "through God"; but he was not a worthy heir. She bore again his brother Abel

By the prescient spirit of God he said he was his son, for he would see with his own eyes his father's threatened punishment of death and himself mirrored in his son killed by Cain. Now as for the saying: "Any one who kills Cain will suffer sevenfold vengeance," is there really a sevenfold debt of sin? If God's saying is to be understood according to the overplus of rebuke, suitable for righteous judgment, then likewise it will be accompanied by mercy. Let us see if this seems good to anyone.

For did by a series of seven evils this fierce saying evolve into harm, or will it seem of a single kind?

First of all, because after some days as tardy but not most honoured or important, and faulty but not irreproachable, Cain appears from the saying: "If you offer a sacrifice but do not divide it aright, you have sinned." Conversely, Abel took from the firstborn and succulent.

Secondly, his state of vicious and fearless envy, why his offeing was not regarded in the same fashion by God.

Thirdly, his barbarous deceit, that he in despair led him aside from his parents and slew him wrongfully.

Fourthly, because it was a brother and not some stranger. Neither fear of God nor natural compassion softened or weak ened the hands of the bloodthirsty heast

Fifthly, because he filled his parents with incomprehensible bitterness and new mourning.

Sixthly, because he masked his soul in the darkness of evil, even supposing God to be unaware, and answered with brazen face, when he asked him: "Where is your brother Abel?" say ing: "I do not know; am I my brother's keeper?"

Seventhly, when he heard the sentence of his retribution from the Lord, he did not turn in terror with tears to efface his sin, but he sealed the judgment of his punishment with his own mouth. Departing from the face of the Lord, with pointless effort he built a city, not considered among the generations of the penitent and righteous patriarchs.

When Adam was 230 years old he begat Seth, which in the original language is translated as "drinking." This Philo of Alexandria, the philosopher and teacher of old, renders as "drinker of water." Perhaps his father indicated presciently the cause of begetting and the multiplication of humanity. For Adam had many other sons and daughters, but they were not worthy to be heirs of the legitimate father of the world. For only of him does Scripture add that: "He begat according to his form and according to his image"; and again: "God raised up for me another son in place of Abel whom Cain slew."

When Seth was 205 years old he begat Enos. The latter had hope to call on the name of God. By what example was he emboldened to this? For he learned from his father to call the offspring of Seth "sons of God." He was given a command not to mingle with the cursed descendants of Cain. Thereby he came to know the honour of God's care, and had hope even more ardently to summon God to visit him.

When Enos was 190 years old he begat Cainan. When Cainan was 170 years old he begat Malaliel. And in the latter's 135th year the first father Adam died, having lived for 930 years. So God gave the patriarchs long lives, having settled them opposite paradise, to teach them to regain that same life through repentance.

And he taught them to be a model of righteousness and patience, not for themselves alone, but also for all mankind; sincerely to acknowledge the fear of God; to establish also natural laws for men, that like themselves others too might learn to avoid lewdness—which was the cause of the original fall, in that by foolish supposition Adam had wished to become divine. And that I might repeat the words of the saints: how all the saints received as it were a paternal inheritance, like fathers to hand on to their sons what they had received for safekeeping; whence this heritage has been preserved for us in successive descent. There are very many other things to say about the patriarchs who filled the world.

But let us now follow the thread of our story.

Malaliel was 165 years old when he begat Jared. Jared was 162 years old when he begat Enoch—who received the ultimate gift of God's grace: he was inscribed in the ranks of the immortals while still alive. But before his transfer he made known the exterminating anger of God in destroying the race and sons of disobedience, who did not decide to obey the commandment of the holy patriarchs. To this bears witness one of the saints, that Enoch, eighth from Adam, prophesied, saying: "Behold the Lord has come with myriads of angels to make judgment on all and to reprove all the impious for their works of impiety."

Here too he mentions their blasphemous habits and all the arrogant words that the sinners and impious spoke about him. And that the number of the seventh he said to be eight by addition, seems to me to be because he reckoned the just Abel in the same list. But why he is not counted in the genealogy is be cause Abel did not have offspring. Now Enoch was 165 years old when he begat Mathusala,

Now Enoch was 165 years old when he begat Mathusala, and he lived in the latter's lifetime another 200 years before being transferred to immortality in the thirty-third year of Lamech.

Mathusala was 165 years old when he begat Lamech. Lamech was 188 years old when he begat Noah, and he lived in the latter's lifetime another 565 years until the construction of the ark. Noah was 500 years old when he received the command to make the ark with his sons.

Here the divine Moses, inspired by the mouth of God, describes very well the extensive accusation of the impious, indicating each one's fault. When the sons of God, he says, saw the daughters of men to be beautiful, they took to wife any that they chose. But they had been given a command to keep away from them, whereby he reveals their ruinous corruption. He God was cast into despair by the fact that whereas he had shown in them his honourable love by calling them his sons, they had overthrown the natural order by insolently opposing God's command. At the same time they disfigured the earth by the multifarious crimes they worked on it. For scripture says: "The crimes of men increased on the earth, and everyone as siduously plotted evil in his heart."

Furthermore the Lord God saw that the earth was corrupted; for all flesh had corrupted its path on earth, no longer thinking thoughts of rational creatures, but wandering like wild herds in disorder and all kinds of dissoluteness, taking refuge in their strength of limb and unbridled in boasting of the strength of their arm. They had no concern at all for anything proper but only for the most vicious.

So God repented that he had created man.

He reflected in his heart, he who knows and sees all things perfectly clearly before they come about; and with human voice he indicated his disowning of them to their complete destruction. So he commanded the just one to construct the ark as an indication of the obliteration of the impious.

Listen and wonder here even more, how the mercy of the benevolent one overcame his righteous anger. He temporarily postponed the threatened punishment for a hundred years in his mercy. And there were visions even more striking and novel: the saints say that the sound of axes and the chopping of groups of workmen in hewing the wood rang like the thundering of clouds in the ears of everyone near and far for the terror and admonition of the heedless nation, that perchance they might turn and be saved. Not that God was unaware of what would befall them; but being naturally good, he remained in his unchanging nature and delayed the right compensation for the lover[s] of evil. As Scripture says elsewhere: "I am the Living Lord; I do not wish the death of a sinner but that he may turn from his wicked path and be saved."

Now some say that the ark was built at Laodicaea in Phrygia, which of the three areas of the world is called the region of Asia. But these reports are quite unreliable, because of the ten holy patriarchs not a single one seems ever to have been said to have dwelled in Asia Minor. But at God's command they dwelt opposite the garden, fasting and mourning in penitence, lamenting the fault of the first life, completely divorced from bodily interests, abstaining from meat and wine in a life of spiritual prophecy. After the flood it was commanded: eat meat, like vegetables and herbs. After the flood Noah drank wine: and because he was inexperienced in the matter he became drunk. And those not similar to these heard from the Lord: "Let my spirit not remain on these men for ever because they are flesh"-that is, lovers of the body and not of the spirit. The just patriarchs remained in the same place, and there died. There the ark had been built and terrible evils abounded on earth. When the just one complained after a hundred years, he was commanded by the only and awesome God: "Enter your ark with your sons and the wives of your sons. For behold in seven more days I shall bring a flood of waters over the earth to destroy everything in which there is living breath"-indicating his further mercy for the number seven. Oh the inexhaustible benevolence of God. Oh his incessant love for man, which is still said to pardon the senseless. On that day Noah entered the ark with his sons, his wife, and the wives of his sons.

But some historians say that a daughter of Noah and the ship's architect with his wife and sons and intimate friends also entered the ark. This seems to me plausible. For after the flood the patriarch does not seems to have had any more sons. while the land of upper India is said to be his daughter's. And Eusebius of Caesarea says that by custom up until today a woman reigns over the land of India. [This is not in the Chronicle or the Ecclesiastical History of Eusebius, the only works of his translated into Armenian. The later Mkhit'ar Ayrivanets'i, History, p. 266, notes that Noah's daughter settled in Arabia Felix. See also Vardan, p. 10.] But as for those who joined in building the ark, if it is most appropriate to say that those who trusted the just one and took refuge with him believed in his words and obeyed with fear his commands-why should it seem unbelievable that they too enjoyed salvation with him, just as God saved the harlot Rahab with her relatives from the wrath at Jericho because of his timely benevolence, or the Gabaonites from the slaughter of the Canaanites? They were so worthy of care that vengeance for their blood was taken from the house of Saul. And when Scripture says "about eight persons," that is an expression of incertitude. Of these we say that if this command was given them only, yet through them others too were saved. Likewise,

of the eight who entered the ark not all were elect, but through the just one the lesser too were saved.

Now Philo says that out of respect for his affection, Sem took the bones of Adam, as the father of all, and placed them in the ark-which I shall repeat a little later when treating of him. [That Noah took Adam's bones into the ark is asserted in the apocryphal Death of Adam; see Stone, Apocrypha, p. 30. But Philo does not report this. Cf. also the Armenian version of Michael's Chronicle, p. 11, and Vardan, History, pp. 9-11.] "And the Lord shut up the ark from the outside," says Scripture. Oh command of frightful anger for his last moment. Oh fear some sounds and trembling of the foundation of heaven and earth. For if the course of a single thunderbolt and the crack of the clouds are sufficient to terrify even intelligent persons and cause them to faint, what did the souls of the survivors on earth then endure from the raging torrents that broke their banks and burst from the depths before the destruction of the flooding waters! Thereby all springs of the earth were rent open; the confines of heaven were opened to fuse heaven and earth in one uninterrupted sea. The spreading water exterminated every breathing and living creature; for a whole year the earth remained in complete devastation. After the fulfilment of the divine command, the billowing waters brought the ark from the East to the middle of the earth; it came to rest on the mountains of Korduk, and the patriarch offered holocausts of thanks giving to God. He who received the offerings promised no more to inflict that same punishment on men and established an eternal covenant: "I shall place my arc in the clouds," which is the rainbow. Some say that it is fire emerging from cloud, and those who worship the elements (say it is) the belt of Aramazd. But if Bel is the one who gives orders to Aramazd, how is it that Aramazd [Ahura Mazda] is deprived of his belt-at Bel's command? But we shall linger here no further on their fables. It is not fire emerging from cloud, otherwise it would have to be visible also at night. But in reality it is rays of the sun, hidden by clear air above the dense and compact moist clouds. Since it did not occur in the beginning, it is said to have come about in the time of Noah.

After this the sons of men increased and divided the world into three parts, according to the account of Herodotus, and as the great Epiphanius expounds in order. But we said we would repeat the account of Philo, that noble man and very learned philosopher; a follower of the holy apostles, he provided the church with many teachings from the ancient Jews as fine examples, as the book of Eusebius of Caesarea teaches us. [See Eusebius, Eccl. Hist., 2, 4.1, for Philo as a philosopher, and II 17.2 for Philo's relationship to the apostles.] In the Explanation of the Hebrew Names Philo says that Sem took the bones of Adam on a beast of burden and brought them to the land of his inheritance. When he reached a rocky overhang he stopped the beast. There by certain events the place came to be called "place of the stable," which was somewhat distorted in the Hebrew language, seeming to be pronounced Awawrshelim-that is, Jerusalem-which being translated means "my stable was completed.

Now the tomb in which the first father's bones were placed, a place of death and execution, the same is "summit" and "Golgotha" in Hebrew, with a double name. [Cf. Stone, Onomastica, p. 128: Golgotha is "a place of execution where the heads of the dead are buried." Thomas may here see a parallel between gagatn (summit) and Golgotay.] Ham seized it from the sons of Sem, and it was built up as a city of the same name.

Therefore the divine command in the time of Moses ordered him to take as vengeance on the Canaanites the border fixed by the patriarch. This David celebrates: "He remembered his eternal covenant and the word which he commanded for a thousand years." A little later he says: "I shall give you the land of Canaan, the lot of your inheritance." For to Ham were given by his father Egypt and Libya and the territory as far as the Southwest. Japheth was given all of Europe from the mountain of Amman [in Jordan] as far as the Northwest. And to Sem was given Asorestan with all its extent as far as the regions of the East.

Noah lived after the flood during his sons' lifetimes for 350 years down to the eighty-third year of Eber, demonstrating God's will and the natural law to the nations that came after him. We have now recalled the genealogy of all mankind from the first patriarchs in brief, because our especial concern was to know the lineage of the men who ruled over our land and the kings of Assyria before them, son from father in succession down to King Senek'erim, who in the time of Hezekiah, king of Jerusalem, became the founder of this Artsruni house. These add up to the following thus far: Adam, Seth, Enos, Cainan, Malaliel, Jared, Enoch, Mathusala, Lamech, Noah, Ham, Kush, Nebrof, who is also Bel. Of these enough has now been said.

ARTSRUNI HISTORY CHAPTER 2

[Concerning Bel And The Babylonians And Their Fables] Although the testimony of later writers concerning Bel and the Chaldaeans' [Babylonians'] heroic follies does not serve our present enquiry, yet I shall pass over their ravings without blame, not regarding their ridiculous acts as valour, as they suppose. For they say that the first of the gods was some ancient Belos, father of Dios, called in Armenian Aramazd, who lived 215 myriad years or more ago. Likewise there are other fables, that a book was written by him and guarded very carefully in Babylon—which book we know was written after the flood.

Others say that a certain Chronos was father of Aramazd [the Zoroastrian god Ahura Mazda], closer in time, who warned Ksisutra about the events of the flood. He wrote an account of his earlier deeds and placed it in a bronze vessel fastened with lead for safekeeping in the city of the Siparats'ik'. And others haver in many various ramblings about times and events-which inconsistencies we do not think appropriate to put in writing in order to explain the fables. Now Nebrot, son of Kush a descendant of Ham, was much more powerful not only than the early fantastic giants but even than the later Hercules, the raving tyrant who for his warlike deeds at Troy and his valiant and powerful victories was named god by them. [Hercules was associated with the time of the Trojan war; see Eusebius, Canon, year 826 of Abraham.] And he was even more powerful than the world conqueror Alexander of Macedon; for the latter through the deceit of some magus and magician said he was a son of Ammon and Aramazd, although he did not deny he was mortal. Whereas the former Nebrot said he was the timeless Bel of the ancients, not merely the father of the god but the commander of Aramazd. He was the powerful bestower of time on others. As to the men who lived before the flood he gave forty or more myriads of years and successive eras of different sorts and barbarous-called shar and ner and sosso also he allegorised the names of the patriarchs as doubtful. He was arrogant and confident in the strength of his arm and his massive stature; for they say that his height was sixty cubits. The seeds of his folly were honoured by the Babylonians and preserved down to the time of Alexander of Macedon; and a king of the Babylonians erected to him a golden statue, a monument as a record of his valour. Although he escaped the punishment of the true God, the evil became habitual and was unfailingly preserved. After a long time the expense of his needs was declared to be provided by the king, in accordance with his uncontrollable force and the size of his stomach, namely Bel's food. Just as the Greeks once reported that the god Heracles deflowered fifty virgins in one night, calling valour things that are infamous and shameful, so also the Babylonians claimed marvels for Bel: that in one night he ate twelve measures of flour and forty sheep. For that reason the king said to Daniel with joyful heart as a boast: Why do you not worship Bel? Do you not see how much he eats and drinks?"

Oh blind Babylonian with brains addled by mice and moles, unless you have anything else in mind good to say, why is the insatiable filling of Bel's stomach such splendour to you? Oh folly of the ancients, what madness and devilish inventions penetrated into the world in former times: rebellion against God and grief for the holy angels, the cause of perilous death for the servants of God in days to come. So it is now the appropriate time to make worthy excuse for the people of that time and many blameless: if so many piled barns of food were stored up for Bel's furnace, would not then his excretions be profitable for the glory of the Babylonians according to their reckoning?

The divine judgment warns through Jeremiah: "On that day I shall seek vengeance from Bel in Babylon, and I shall take from his mouth what he has swallowed." For certain phantoms andshadows of the ancients, according to each one's suppositions, were devoid of the inspired patriarchs' knowledge of God.

Nebrot' of his own initiative declared himself a god and reigned in Babylon with mighty power. He worked apparent miracles by magic to the astonishment of all. He ruled over all nations under heaven. He commanded in a fearsome fashion every one everywhere to set up his image, to worship it as god and offer it sacrifices. This was the origin of idolatry. Not something imaginary as the ancients said of Bel, or other shadowy appearances, dreamlike and deceitful demons—but he showed for worship a statue made by mortal hands. This custom one could attribute to P'aleg, son of Eber, or Aran, son of Taray; for these are said to have died before their fathers, and in their merciful compassion their fathers fashioned images of their sons, according to Solomon's saying: "A father, afflicted by untimely grief, made an image of his son who had died prematurely."

But this custom was altered by the evil one into setting up images in honour of giants and heroes and barbarian kings. And in his time they became addicted to the cult of demons. It is appropriate to liken them to the example of Bel. In his raging pride he gave orders for a senseless cooperation on a vain task—to erect a tower from earth whose top would reach heaven. But by pre-emptive scattering from above God divided the single language of mankind into various forms. Only one person retained his own tongue, the patriarch of the hebrews Eber, son of Salay, who had not agreed to join the senseless project of building the tower. Hence we know that the original language was Hebrew. But the timeless Bel was exterminated in time by Hayk, son of Torgom of the family of Japheth, who rebelled against him. He disclaimed the hunter descended from Ham and spurned him, saying: "Not only are you not a god but you are a dog, and a pack of dogs runs at your heels."

Appropriate here are the prophetic blessings of the great patriarch and father of the world Noah, in his saying: "God will increase Japheth and cause him to dwell in the house of Sem." For eastern Asia was the lot of Sem; and when Hayk fled and removed himself from Bel and Babylon, he came to eastern Asia. Nebrot with his haughty host pursued him; he was killed with his army by Hayk, struck by an arrow. Some historians say that he fled back to Assyria. But these are vain words: for the great orator Moses expatiates at length on this: the mode of his death, and how his embalmed corpse was taken to the province of Hark', in the sight of many. The period of his tyranny was sixty-two years. Some historians say his father was Mestrim, called Metsrayim-that is, Egyptbecause of his in heritance of the borders of Egypt. For Kush son of Ham is called Ethiopian, whom the Book of Genesis calls the father of Nebrot'; and Ethiopia is part of Egypt and of greater Libya.

Now according to historians the order of genealogy goes like this: Ham begat Kush; Kush begat Mestrim. But the Book of Genesis says Nebrot, while according to other historians Mestrim begat Nebrot'. Nebrot begat Bab; Bab begat Anabis; Anabis begat Arbel; Arbel begat Kay el; Kay el begat the other Arbel; Arbel begat Ninos, husband of Semiramis. And the fact that they say Ninos reigned after Bel and were unconcerned about those in between is because in the books of the ancients they had orders from the kings to write only about the notable exploits of valiant men and not about those of ignoble men. They were to portray the character and images of valiant men as virile and splendid; while the feeble and effeminate characters of the ignoble and lower sort were to be indicated only by name.

ARTSRUNI HISTORY CHAPTER 3

[Concerning The Kingdom Of The Assyrians; How Zradasht And Manitop Became Leaders Of The Region Of The East; And Their Erroneous Teachings (This kind of Christian arrogance is commonplace. The following passages by Thomas Artsruni on Zoroastrianis are based of hearsay rather than facts. In reality, Zoroastrianism has been a monotheistic religion long before Judaism and Christianity. Zoroastrianism influenced Judaism due to close relationship, at least during Jews' Assyrian and Babylonian captivity when not already due to earlier trade contacts.)]

As an exposition of those times that we mentioned abovefrom the days of Bel down to Ninos-nothing important or significant is found in the books of the ancients, perhaps because of many obstacles. First because the confusion of languages caused a lack of common concern, or because the base deeds of heroes were not written down by the Chaldaean historians. Furthermore, even if there were accounts, only the valiant deeds of Ninos were recorded. After the model of Bel he became even more arrogant, haughty, and egoistic; he said he was the original hero and first king. For, gathering the books of the ancients together with strict diligence, he ordered them to be burned so that no trace or record of others' names might remain save of him alone. Fie is said to have reigned over all Asia and Libya except only for India. He also restored to the honour of his own name the city of Nineveh, the first palace built by Asur which Nebrot' had destroyed. And having subdued Zradasht [Zarathustra] the magus [priest, scholar], king of Bactria and Media, he pursued him as far as the borders of the Hephthalites, then reigned powerfully over all Khuzhastan and the eastern regions and Persia, even beyond Balkh and Depuhan, over Govmayid and Guzban, Sher-i-bamamakan and Khochihrastan, and altogether as far as the Indian Sea he ruled with great valour and bravery for fifty-two years. On his death, since his sons were very young, he gave his empire to his wife Semiramis, who ruled even more valiantly than Ninos. She also fortified Babylon with walls and put down the rebellion of Zradasht, whom she brought into submission to herself [The following tale, with slight variations, is found in both Eznik, §145, and Elishe, pp. 24-25. Thomas here follows Elishe. For his borrowings from Elishe elsewhere see the Introduction to this book.]. And since in her lascivious wicked life she paid no attention to her sons, thinking only of her lovers and showering them with expensive treasures and liberal honours, she appointed Zradasht as governor of Babylon and Khuzhastan and all eastern Persia. She herself went from Assyria to Armenia in lustful desire at the report of a certain Haykazn. In what fashion she arrived, the war caused by her actions the noble constructions of her workmen which are indeed worthy of wonder, and also the revolt of Zradasht [Zarathustra], the death of Semiramis and the saying about her talisman-all this has been expounded by others. She reigned for forty-two years. Then her son Zameay held sway, who was called Ninuas after his father. He reigned over Assyria, and for a while also over Armenia. He had no interest

in expanding his empire but lived in peace, being of pleasureloving and unwarlike character.

As Zradasht held so many regions of eastern Persia, from then on he no more imposed tribute on Assyria. Similarly, condemning the stories about Bel and the other heroes as being very ancient and obscure, he composed a new fable about him self in order once and for all to separate the Persians and Medes from the Babylonians and that in doctrine and repute he might no more be said to have any connection with the Assyrians. He was perverse enough to say that Sem, Noah's son, was a new Zruan, the first of the gods. The latter, he said, desired to become father of Ormizd and said: "May I have a son Ormizd by name, who will create heaven and earth." So Zruan conceived twins. Now the knavish one of them made haste to present himself first. Zruan asked him: "Who are you?" And he replied: "I am your son Ormizd [Ahura Mazda]." He said: "My son Ormizd is luminous and sweet-smelling, but you are dark and evil-loving." But since he greatly importuned him, he gave him power for a thousand years

After a thousand years Ormizd was born, and he said to his brother: "For a thousand years I have been obedient to you; now do you obey me." Realising his defeat Arhmn rebelled and revolted against Ormizd, becoming an opposing deity. Ormizd created light, Arhmn made darkness; the former created life, the latter made death; the former created fire, the latter made water; the former created good, the latter made evil. And not to repeat every detail, in sum everything that is good is Ormizd's and noble, while evil things and demons are Haraman's. Now as for whoever might think Zradasht's teachings most ridiculous and say that he was a foolish king, tell him that your unpaid god Ormizd does not labour in vain; perhaps your opponent deity, being close by, at some time may get angry and destroy you.

Furthermore the same foolish Zradasht [Zarathustra, Zoroaster the initiator of the monotheistic religion of Zoroastrianism] says that there happened to be a war between Ormizd and Haraman. Being greatly famished, Ormizd wandered over the land seeking food. Seeing a bull, he stole it and led it aside. He sacrificed it, piling up stones over it, and waited for evening in order to remove secretly his plunder and satisfy his hunger. When evening came, he was joyfully intending to gorge himself with food but found it bad and spoiled; for lizards and spotted lizards and newts and beetles had come up and eaten his prey. So thenceforth wood louse and every kind of insect captured in villagers' pots will come to the royal court to slaughter, because they became harmful for the deity. Much other raving nonsense he also legis lated. And it was not for frivolous reasons that we resolved to write these things but because through this devilish doctrine much oppression and death have ravaged and destroyed Armeniaas the history of the saints Vardan and his Companions indicates to you, which the blessed priest Elishe wrote. Even now the "Sons of the Fire"* worshippers still say the same things. [* A rare reference in Armenian to Zoroastrians of Islamic times.]

Manit'op, king of the Hephthalites*, in a further elaboration affirms this: they do not say that fire is a creature of Ormizd, but the nature of Ormizd [That is the name of the Zoaoastrian god Ahura Mazda.) identified with the hot see Zaehner, Twilight, p. 202.]. And Hephaistos and Prometheus, who are the sun and moon, stole the fire from Ormizd and gave a part of it to mankind. And earth is host to the god Spandaramet; it was not created by anyone, but as it now appears, so it always was and remains; and man is selfbegotten. [* The Hephthalites (Bactrian: Ebodalo), sometimes called the White Huns, were a people who lived in Central Asia during the 5th to 8th centuries. The Imperial Hephthalites were based in Bactria and expanded east to the Tarim Basin, west to Sogdia and south through Afghanistan. To the Armenians, the Hephthalites were Hephthal, Hep't'al & Tetal and sometimes identified with the Kushans who succeded the Bactrians.]

Of this I have also been informed by many of those who are called Shakhrik'. I had occasion to meet some of them coming from the land of Aplastan, who called themselves hamakden-that is, "fully knowledgeable in the Faith of Fire." [Hamakden: "fully versed in Zoroastrian religion."] These same things they affirmed with other abominable wickednesses. Our ancestor Adam they said was not the first man, but the son of someone else, Shurel, a camelherder. Persecuted in an unknown land and being found there untrustworthy, he was expelled; with his wife he came to the middle of the world, and leaving there became our patriarch. Following up his sayings I enquired: "Where do you say that unknown land was?" And they said: "There is an exceedingly high mountain beyond which no humans dwell." I know from the geographies of Ptolemy that the mountain of Emawon in the East, which is truly the highest spot of the whole earth. has not been trodden by the feet of men. Even with attentive eyes only with difficulty can anyone descry the summit of the mountain, as it is close to the heavens.

The people under discussion told me: "Many of us reached a part of that mountain and saw that the regions of the East

were a very extensive plain, stretching for a great distance, level, not enclosed by any boundary, impossible for the eves to take in, adorned with a strong light at night giving a diverse appearance; and in the daytime it is covered with a very dense cloud like soft felt, in the form of a very bright white mist. Of this they said that it was the foreign unknown land." After comparing this with other accounts I rejected them and was strongly inclined to believe this last account-that perhaps this was the land inhabited by the first man. For in truth paradise was physical and tangible, and not spiritual or between two worlds, as they report about Origen's view. Nor is it distant, as some suppose who do not know the Lord's saying to the robber: "To day you will be with me in paradise." Appropriate here are also the reports of Alexander of Macedon to Olympias; perhaps he reached a place outside the borders of paradise. And the circumstances of the wonderful unknown tree, which in one day grows with incredible rapidity and then suddenly shrinks; the drops of dew on it had an incomparable sweetness. And there are not only strange and incomprehensible forms and types of plants but also invisible guards of incomparable vigilance who torment those who approach with invisible power-which I do not believe is even said of the demons. "And we heard the lashing of the tormentors," he says, "and saw the blows falling on the backs of the punished, but we did not see the tormen tors. But there was a voice [a warning] not to gather and not to cut, otherwise that person would die and the group would be destroyed with a baneful disease. In frightened terror we left there.

Similarly you can learn other marvels like these from the same book. After a little he says: "Frequently my friends begged me to return, but I did not wish to do so because I wanted to see the end of the earth. From there we set out across the desert by the side of the sea. From then on we saw no more fowl or beast, save heaven and earth. We no longer saw the sun, but marched through gloomy weather for ten days. Then we arrived at a spot by the sea. Placing the tents and all the camp equipment on board, we embarked and sailed to an island in the sea, not far from land, whence we heard the voices of men speaking Greek; but we did not see the speakers. Some soldiers, risking death, swam out from the ship to the island, but a crab came out and dragged fifty-four soldiers into the water. We moved on from there in fright and in two days arrived at the place where the sun does not rise. As I wished to instruct servants to try and see where the place of the blessed was, Callisthenes my friend advised me to penetrate there with forty friends, one hundred young men and twelve hundred soldiers only. Outside, after the journey, we came across a female ass which had a foal. We immediately at tached her foal to the army. When we had entered fifteen miles, two birds met us which had human faces and were larger than birds at home. They loudly cried out in Greek: 'Why do you tread on this spot to see the house of God, Alexander? Turn back, miserable one, because you cannot set foot on the islands of the blessed zones. Why do you invade heaven?

"When I heard this, trembling and terror gripped me from fear and dread. I was forced to obey the wonderful divine voice which had spoken through the birds." It is most appropriate in this regard to call them angels. For rational beings are seen under these three guises: angels, men, and demons, but not as birds or other creatures. "Now the borders of the area were awesome and tangible, altogether outside the realm of the senses. They were guarded by diligent and alert, yet invisible, guards like a very secure fence that would have naturally growing roots needing little care, that might stand outside a fortified royal garden. Such seemed to me these places—to others as they please."

We shall take up other tales from these fables and similar motiveless stories according to their merits in order to refute them, which the benighted Easterners hand down to their believers in Zradasht and Manit'op. They say that Hephaistos stole fire from god, granted part of it to mankind, and kept most of it for himself. And they say Hephaistos was lame in both feet, and has glowing embers in his hand and tongs and hammers, and sits forging men. Now if this lame one stole Ormizd's half with out his knowing, how could the divided half stolen by the lame one be god? Furthermore, since he worships fire and not the sun, which is Hephaistos, saying it is part of a god, how is it that the thief and weak one is worshipped like a god? But how are they not ashamed to say that fire is part of a god? For sparks of it are produced by striking stone and iron, or also by rubbing sticks against each other-as happens with a wheel, when from the rapid motion of the carts the wooden poles catch fire. Like wise, if water is thrown into a clean clear glass and placed in the heat of the sun, with the substance of fire beside it, from the burning ray of the sun the latter will ignite. Now since these things are so, such must also be understood with regard to the worshippers of ashes, "whose judgement will never be rendered void," according to Scripture, "and whose destruction will never abate." Perhaps someone might propose the reason for this ignorance. But the divine Paul truthfully explains these things, saying: "They knew God, but did not glorify or praise him as

God. But they became infatuated with their own thoughts, and their hearts were darkened in their folly. They foolishly held themselves to be wise and transformed the glory of the uncreated God into the likeness of corruptible creatures."

The protest is against the frequency of their rebellion, that first they dishonoured the laws of nature and then turned away from the face of God. Hence it was necessary first that they should at least know themselves, and then from things visible comprehend their architect. "For invisible, divine things," he says, "are known and seen from created thingsthat is, his eternity and power and divinity-so that they may not be able to answer at all." How is this known? The most sagacious of those outside the church say that every moving body is naturally moved by something else. For a body is not self-moving but only the spirit is self-moving. Now we see that the heavenly body has a regular, unceasing movement-that is, the sun and moon and stars and other such bodies. And it is clear that they are moved by another; and if by another, then it is someone who moves the heavenly body. And because the movement of heaven is one and the same, it is clear that it is moved by a single someone and not by many. For if it was moved by many, its movement would be varied and confused, not regular. And because the heaven is eternally moving, it is clear that he who moves it has limitless power. For if he had limited power he would not be able to move the heavenly body ceaselessly. Whence it is clear that he is bodiless, because a body has limited power and is not able to move heaven continuously and regularly. From this it is clear that he is uncreated. For the created is from matter and form: what is made from matter is not bodiless and does not have limitless power. Now he is uncreated and unlimited and not brought into being by someone. And that which is uncreated, the same is incorruptible; and what is incorruptible, the same is also eternal. Now the eternal has no beginning and no end. So then it is clear according to this argument that he who moves the heavenly body is one, has unlimited power, is bodiless and uncreated and incorruptible, is himself not created by anyone, but all others exist through him. Now these definitions apply to no one of the created beings but only to one, God; and he is Creator. These are wise conclusions. But we, following Divine Scripture, have not established the truth from foreign sources. Away with that! But in accordance with the Lord's saving through Moses in order to reprove those outside the church: "to use the grease of a corpse for some exterior purpose, but not for food.

ARTSRUNI HISTORY CHAPTER 4

[How The Kingdom Of The Assyrians Reached In Succession As Far As Cyrus The Persian]

We continue our text with the order of the genealogy of the kingdom of the Assyrians that we carefully set out above. Its founder was Zamesos, also called Ninuas, son of Ninos and Semiramis, in the fifty-third year of the life of the patriarch Abraham: he ruled over all Asia and Armenia. After the death of Zradasht he then exercised sole rule over all east ern Persia and subjected it to tax, ruling with peaceful life for thirtyeight years. After him Arias his son, the fourth from Ninos, ruled for thirty years. All the kings of Assyria held power in succession from father to son; but none of them did anything worthy of record, and none of them held power for less than twenty years. [See the list of reigns in Eusebius, Chronicle, Aucher I pp. 98-100; Aucher notes that there are conflicting figures for the lengths of some reigns.] For their unwarlike and peace-loving character kept them in security. Since they sat inside the palace, no one saw them except concubines and eunuchs. Now the kings of Assyria in succession are the following. I shall indicate in resume their names and times and a little of what happened in their reigns.

• Ninos, son of Arbel, of the tribe of Ham reigned fifty-two years. He restored the kingdom of Nebrot and called himself Bel. Semiramis his wife reigned forty-two years. Coming to Armenia in war she subjected it; and on her return she exercised sole rule over Persia. In her third year Isaac was born, son of the promise to Abraham. In her last year Esau and Jacob were born, called two patriarchs. ... in his last year the Shepherds ruled over Egypt. ...

 In his twenty-fifth year the first Belochos became king of the Thessalians* and ruled for thirty-five years. In his thirtyfifth year the flood of Ogeges is reported. [* Thessalians: sic.' read "Assyrians." But this mistake must have already been in Thomas's copy of Eusebius.]

• Baleos reigned for fifty-two years. In his forty-third year died Jacob, who predicted the calling of the Gentiles.

• Aztadas reigned for thirty-two years. In his time appeared Prometheus, a wise man.

• Mamizos reigned for thirty years. In his fourteenth year Joseph died.

• Mak'alis reigned for thirty years. In his time appeared Atlas, an astronomer.

• Zpheros reigned for twenty years. In his eighteenth year the prophet Moses was born.

• Another Mamizos reigned for thirty years. In his time there was another king in Thessaly.

• Sparet'os reigned for forty years. In his tenth year Moses went from Egypt and laboured virtuously in the desert.

• Askatades reigned for forty years. In his eighth year Moses became the leader and legislator of the Jews.

 Amines reigned for forty-five years. In his eighth year the prophet Moses died. There were from Adam until this year 3,730 years according to the translation of the Septuagint.

• Belok'os reigned for twenty-five years. In his time there were many kings in various places. [This was the second king of that name; cf. above, p. 33 n. 7. The Canon now introduces numerous reigns of Greek and other kings.]

• Balepares reigned for thirty years. In his time there reigned a king of the Argives.

• Lamprites reigned for thirty-two years. In his time Pegasus flourished, who is reported to have been a winged horse. [The Canon, year 32 of Lambrides (— 669 of Abraham) says that Pegasus was either a fast horse or Bellerophon's ship. The Armenian version has no reference to "winged," though that appears in the Latin version.]

• Zovsares reigned for twenty years. In his time occurred the expedition of Dionysius against India.

• Lamperes reigned for thirty years. In his time there were many kings in various places.

Panias reigned for forty-five years. In his time the city of Tyre was built.

 Sovarmos* reigned for fifteen years. In his eighth year took place the labours of Hercules. [* He reigned for nineteen years.]

• MitTeos reigned for twenty-seven years.

• Mawtanes* reigned for thirty-one years. In his twentyfifth year the city of Ilium was captured by the Athenians; and in his time the exploits of Samson were performed. [* A corruption of Tawtames. The Canon places the capture of Troy in his twenty-fifth year, and the beginning of Samson's reign in his thirtieth year (= 840 of Abraham).]

Tewtesay reigned for forty years.

Ot'ineus [Greek: ho Thineus] reigned for thirty years.
Derkiwlos reigned for . . . years. At that time David reigned in Jerusalem [The manuscript has a lacuna. Derkiwlos reigned for forty years; in his twenty-ninth year (= 940 of Abraham) David became king.], and the kingdom of the Assyrians declined. Some of them remained as tyrants in the regions of Damascus. [There are no corresponding references to the decline of the Assyrian kingdom or to Damascus at this point in either the Chronicle or the Canon.]

- LawosPenes [reigned] for forty-five years.
- Peritiades [reigned] for thirty years.
- Ap'rat'es reigned for forty years.
- ApTatanes reigned for fifty years.
- · Akrapafes reigned for forty-two years.

 Tovnos Konkoleros, called in Greek Sardanapalos, reigned for forty years. In his debauchery he was dissolute and corrupt in the affairs of his kingdom. Therefore many of his troops became wearied of him and caused him to be defeated in battle by Varbakes and Belos, the general of the Medes; as a result he immolated himself on a fire.

The duration of the kingdom of the Assyrians from Bel and Ninos had been 1,300 years. 20 Varbakes the Mede destroyed the empire of the Assyrians; he exempted Paroyr Haykazn from paying taxes, honoured him with the authority of king, gave him many troops in support, and re-established the kingdom of Armenia; he also appointed Belesios ruler of Babylon. Then he himself transferred the palace to Media. It lasted for 259 years; but according to some who include other earlier kings, the period extends to 298 years.

In the time of those kings some Assyrians and Chaldaeans descended from the earlier kings found it appropriate, as a period of anarchy, to emigrate and assemble a numerous army in the regions of Damascus and Nineveh. After twenty-eight years of anarchy in Asorestan, under King P'uay they again ruled over Babylon and lower Assyria, called Khuzhastan; they restored the former palace abandoned by Bel, which is the house of Astorov. Unable to oppose the Medes and Persians, they debouched in war into the regions of Palestine and besieged Samaria. And because the kingdom of the Hebrews was divided into two opposing factions, P'uay, having subjected Assyria, imposed on king Manasses tribute of a thousand silver talents. From then on Israel was endangered by the Assyrians. After him there reigned over the Assyrians T'aglat'p'alasar. The latter came out against Judaea and took captive to Assyria the majority of the people....

Salmana he took captive ten . . . showing in the mountain of Media. And he destroyed the kingdom . . . which had lasted 250 years. After him the brother of Senek'erim reigned . . . was killed by Marut'ak' Baldan; when ... he had six months, he also was killed by some one who was called Nerelibd and who was a king. In the third year of his reign, Senek'erim gathered a numerous army against him, captured him with his allies, and established his own son Asordanis in Babylon. He himself went to Mesopotamia and valiantly subjected Emat' and Arbat' and all the regions of Damascus and Cilicia and many other places. After that he attacked the land of Palestine and Jerusalem in order to blockade it. By God's command his army was destroyed and he returned to Nineveh. His two other sons Adramelek' and Sanasar plotted against him out of envy for Asordani being king; they killed him with the sword. He had reigned for eighteen years. Then they themselves went to the Northeast, as was said above. Now the kings of the Assyrians from the other branch are these.

- Twenty-eight years of anarchy.
- P'uay, reigned twelve years.
- · T'aglat'p'alasar, reigned twenty-seven years.
- Salmanasar, reigned fifteen years.
- Nerelibos, reigned four years.
- Senek'erim, reigned eighteen years.His son, reigned eight years.
- Samoges, reigned twenty-one years.
- His brother, reigned twenty-one years.
- Nabupaisaros, reigned twenty vears.
- Nabugodonosor, reigned forty-three years.
- · Amilmarudak'os, reigned two years.
- Neriglisaros, reigned four years.

• Nabunedos, reigned fifteen years. In his sixth year he was deposed by Cyrus. After falling from power he lived on until the kingdom of the Assyrians and Medes was completely destroyed by Cyrus, who ruled...

ARTSRUNI HISTORY CHAPTER 5

Ashdahak, king of the Medes, provoked a war against the great Tigran Haykazn, as the early historians indicate to us. He gathered cavalry to attack Armenia and carry out his evil projects. When Tigran the Great was informed of Ashdahak's steadfast preparations, he assembled the elite soldiers of many nations, brave warriors from Cappadocia, Georgia, Albania, the ferocious and gigantic troops of Ayrarat, and all the numerous companions of soldiers and the sons of Senek'erim, in full readiness and immense numbers, to hasten without delay to encounter Ashdahak, lest the Mede be considered more brave-hearted than the descendant of Hayk. They marched rapidly to the region of Makan, and camped in the plain of Media.

Then no little danger befell Ashdahak from the arrival of Tigran to attack him with a massive army. Furthermore, the very astute Cyrus the Persian marched up with his own mounted warriors to aid Tigran. For Cyrus and Tigran had become mutal allies and were similar in every respect; they were like-minded, very intelligent, and endowed with many noble qualities. But before Tigran and Cyrus had joined forces, Ashdahak sent gifts to Cyrus and promised to give him control of a fourth part of the lands of the descendants of Senek'erim: the regions of Nineveh and Tmorik' with its fortress. That he did not just once but often, sending ambassadors with messages and presents. Xerxes was informed of these deliberations by Adramelek and Sanasar, the sons of Senek'erim; they then came to Tigran, king of Armenia, and informed him of Ashdahak's plans. For the sons of Senek'erim were greatly angered and irreconcilable towards Ashdahak on account of his being descended from Varbakes the Mede, who had seized the kingdom from Sardanapalos and the ancestors of the family of Senek'erim.

Then, after receiving a message from Tigran, Sanasar and his colleagues went with gifts to Cyrus. Taking him they returned to Tigran. With urgent speed they pressed the combat, heroes opposing heroes. Xerxes hurried up from the rear and seized the bronze-hammered muzzle of Ashdahak's horse, knocking him back onto its croup. Tigran with swift hand struck him in the heart with his lance, pulling out his lungs. Cyrus, pursuing the army, wrought no little slaughter, putting all Ashdahak's forces to the sword. Then he reigned over the Medes and Persians.

Two of Ashdahak's offspring were captured by Tigran; he brought them to Armenia and reduced them to the rank of slaves. Since they demonstrated obedient devotion, he appointed them to serve as bearers of eagles and falcons. Promoting them to the position of cupbearers at feasts, he eventually raised them to noble status and settled them in the province of Albag, later settling them in Jolakhel, in Vranjunik', and in Hakhram. He waited some time, because he had previously given them in service to his sister Tigranuhi, wife of Ashdahak, before settling them in the places just mentioned.

When Croesus, king of the Lydians, heard of these events, in great speed and anxiety he assembled a host of numerous troops in order to offer battle to Cyrus. When Cyrus heard of his gathering of troops, he wrote to Tigran [asking him] to send him an army in support. In rapid haste Tigran entrusted the armies of the South and North to Xerxes and Arshez, the latter's son, with orders to reach there quickly. They marched off and met him at Dmbuind in Persia. Advancing to Cyrus's vanguard, they engaged battle. They came to grips, attacking the main force of the Lydian army by shooting arrows at each other; after the battle had lasted for a long time. King Cyrus and Xerxes arrived.

Arshez surrounded the Lydian king with his shield-bearing soldiers, and great tumult ensued. For the Lydian king had covered his horse all over with bronze armour from foot to head without a chink, so that he was impregnable in his armour. Likewise on his own person he wore a plated cuirass, backpiece, shin guards, leg greaves, and helmet, so that he seemed almost entirely covered in bronze; and when disposed in his massive army you would think him unapproachable. The troops, attacking like champions, made the battle rage. Then Xerxes and Arshez, full of cunning, shouted out—as if they were from the Lydian army—"Cyrus's army is defeated and the king has fled." Rejoicing at the report, the Lydians abandoned their fortified positions and rushed after Cyrus, jostling each other, while the king of the Lydians marched proudly behind his army.

Then Xerxes and Arshez rapidly advanced to encounter the Lydians. They captured Croesus, stripped him of his armour and his horse's armour, and brought him before Cyrus. Cyrus brought him back to Khorasan, and from there he returned to Babylon, taking the Lydian with him. He ordered his treasuries to be pillaged. When tortured cruelly, Croesus gave him even his secret treasure; he was put to death on Cyrus's orders, bring ing to an end the Lydian kingdom.

When this venture had been successfully concluded, Xerxes and his colleagues returned, receiving as a gift Tmorik' with its fortress and the river banks of Nineveh. Now when Cyrus had become sole ruler of the Persian kingdom, he captured Babylon and released the Jewish captives.

The house of Gag, the nation of the Galatians, raised an army of 120,000 men to oppose him. Then Cyrus wrote to Tigran asking him to provide him with help: "For a wild barbarian race has attacked to wage war and to wrest from me the Jewish captives." In order to preserve intact his bonds of friendship with him, he sent this same Xerxes and Arshez his son with 40,000 men. They went to meet him at the summit of the Taurus mountain. They protracted their march as far as Arzn in Aldznik', where the prophet Ezra, King Salat'iel, died and is buried in Marbakatina in a hilly spot. There they gave battle for not a few days, about a month, during which time the Armenian troops performed many acts of valiant heroism, astonishing the whole Persian army and the barbarians too. The army of the Galatians was destroyed, from the greatest to the least, and not a single one of them survived. Xerxes and Arshez brought the sons of Israel to their own country, leading them as far as the holy city of Jerusalem. They entrusted the leadership of the Jews to Zorababel, son of SalaPiel, of the tribe of Juda. Then they returned in great strength and notable victory. These are the Gog and Magog mentioned in the books of the prophets Amos and Ezekiel.

ARTSRUNI HISTORY CHAPTER 6

[After Cyrus Ruled Kambyses, Shmerges The Magus, Dareh Vshtasp . 5 In The Twentieth Year Of Dareh Died Tigran Havkazn]

Now after these events had taken place, on the collapse of the Haykaznean kingdom people lived diversely, in confusion and anarchy, holding various lands, submitting to various leaders as circumstances of the moment might dictate. We shall not attempt to consider writing about those of whom no actions or valiant deeds are known; but we considered it sufficient merely to set down their names in order, following the format of the other earlier historians. So I set out in order their names in this book: Tigran, Adramelek', Ners, Nersekh, Marod, Arsham, Arshavir, Asud. The Kings of the Persians: Xerxes, Artashes longimanus, Dareh [Darius], Artashes [Artaxerxes], Olokos, Zarses, Dareh [Darius III]. Then Alexander the Macedonian, son of Philipp, became ruler of the world.

At that time reigned Alexander the Macedonian, ruling over the whole world. He rapidly attacked Dareh and killed him, exterminating the kingdom of the Persians. Then after Dareh, Asud son of Arshavir waged war against Alexander's generals.

Attacking them with Herculean valour, like a hero he warded off the powerful generals of Alexander for a long time, amazing their armies, who let him retreat—until Alexander appeared before his haughty opponent. Looking into Alexander's face as that of heroic gods, he lowered his eyes and gazed at the ground. Then rapidly descending from his armoured horse before Alexander, reckoning as naught his impetuous deeds, he made haste to greet the king and say: "When valiant men meet

valiant men*, audacious deeds need no excuse, lest cowardice be more renowned than valour-which is more appropriate for the effeminate-even if they turn their soldiers' lives into torrents of blood." [* Armenian troops did support the Persians against Alexander, see Flavius Arrianus, Anabasis, 3, 11.7.] Astonished at his stoutheartedness and his wise argument, Alexander's generals Ptolemy and Seleucus requested Asud as a gift from the king. For although Alexander was full of wisdom and exceedingly intelligent, yet he was furious at the banditti who opposed him. So Ptolemy received Asud, had him brought to Egypt-the land he had been given by Alexander-and had a liberal stipend arranged for him until he himself should have a convenient opportunity to arrive. As for Vahagn Haykazean, who was Asud's companion in arms, he was established at the royal court and progressed through his great prowess in martial skill, being ready either to die on the sword of the enemy or to win the

victory through his courage. After ruling twelve years Alexander died in Babylon, having lived for thirty-three years and reigning for twelve. He controlled the whole world for seven years. On his death bed Alexander, who had ruled his kingdom alone strictly and fear lessly, appointed four generals for the four regions of the world: Ptolemy for Egypt and India; Seleucus for Asia and all the North; Antipater for Persia and all the East. [There are three names for the fourfold division because Eusebius's Canon has three columns. However, Thomas has confused Antipater (who ruled in Macedonia) with Antigonus.]

Now by deceit and force Ptolemy held Jerusalem and Judaea for twelve years; many of the Jews he brought down from there and settled in Egypt. Then Seleucus Nicanor, called the Victorious, held the kingdom of Assyria and Babylon and the upper regions. After Ptolemy had gained control of his inheritance he appointed Asud in his place, giving over to him all dominion over Egypt and India; then he removed himself to Babylon, following Alexander. From there he went to Jerusalem and there worshipped God. But although Asud was favoured with such splendour and the wealth of Egypt and India, yet remembering his original native kingdom of Assyria he was not happy to live enthroned in Egypt. His desire increased, so he went to meet Ptolemy. But although Ptolemy would have willingly agreed to this because of the man's noble valour, yet he did not dare reveal it to Alexander. For Alexander had never allowed anyone to suppose that somebody else could govern the world save Alexander. So after living many years he Asud died in Egypt and his body remains there.

After the death of Alexander his generals held the Macedonian empire; but this survived only in the Ptolemaic dynasty down to the reign of an Egyptian woman, Cleopatra, much later in the time of Augustus Caesar. Now sixty years after the death of Alexander and the anarchy in Armenia and Persia, Arshak the Valiant ruled over the Medes and Persians and Egyptians and Elamites, in the city of Balkh. His brother Valarshak came to Armenia and imposed disciplined order on that troubled and confused country. He organised the noble families, introducing titles, positions, and ranks.

As for the descendants of Asud, of the family of Sanasar, they lived as need and circumstance dictated, now thus now so: Shavarsh, Gogean, Shavasp, Peroz, Shahak, Cyrus.

This Shahak called his son Cyrus in remembrance of that man's nobility and his friendship to his ancestor Xerxes. Stripped of the authority which Tigran and Cyrus had given them, they lived ignoble lives, as it were illegitimately, down to Cyrus son of Shahak.

When Arshak waged war against the Macedonians, Cyrus multiplied his martial deeds of bravery and valour. He almost surpassed the courage of Arshak the Parthian against the heroes of the Kushans, Medes, and Elamites. He gained a reputation for victory and even more so for wise intelligence, progressing in station, rank, and favour. For he was asked: "Who are you, from which ancestors, from which father, when, and in whose time?" When Valarshak had ascertained his family, province, land, the reason for his migrating, his settling, the why, the how, the mode, the circumstance, the occasion, and everything else, he requested him from Arshak, brought him with him to Armenia, and named him Artsruni, as being the first in the plain called Artsuik'. Furthermore, by chance he had the distinguishing feature of possessing an aquiline nose. But I do not know whether he named them Artsrunik' from the name of the country or for their physique. Secondly they were called Arzrunik' from the settlement of

his ancestors Adramelek 1 and Sanasar in Arzn. Thirdly, they likened them to eagles because of their noble courage and their eagle-like audacity and boldness in battle.

But although both reasons for their naming may be considered appropriate as seems fit to the philosophically minded, nonethe less, for me it is more pleasing to place confidence in the first.

The Ptolemies brought the period of kingdoms to a close, extending down to Cleopatra, daughter of Ptolemy Dionysius; she reigned over Egypt and Alexandria. Opening the depository of archival books, she found the lineage of Senek'erim, the acts of each one of them mentioned individually by name with his deeds of prowess; and likewise all the other acts according to family and place: the deeds of the cowardly and insignificant indicated in accordance with their ignobility. She had the archives^{*}, which were written in Greek on parchment, taken with gifts to Tigran king of Armenia, who was the fourth king after Valarshak the Parthian. [* For these "archives" cf. the "archive" in Moses Khorenats'i, I 9, also composed at Alexander's initiative, which was kept in Nineveh and which contained details of the Bagratids' glorious past.]

Up to here Alexander of Macedon had this written: from Senek'erim down to Ptolemy the Egyptian, after whom they named the Ptolemies. All this Ptolemy the lover of literature wrote down and arranged with accuracy. Then they placed it carefully in the archival treasure house until the time of Queen Cleopatra, as we explained above. Now these tales have come down to us through the chronicles of the earlier historians, from Mambre Vertsanol and his brother called Moses, and another Theodore K'ert'ol; they had all studied under Levond the priest who was martyred in Persia with the other holy bishops and priests. At the command of Vahan Artsruni they were entrusted with the urgent task of critically investigating and arranging in abbreviated fashion the genealogies of past families, and diligently reviewing these histories in no longwinded fashion.

We too, at your command, Oh Gagik general of Armenia and prince of Vaspurakan, have undertaken an abbreviation of the stories of the past. So I shall press forward my narrative; in my rapid course I shall traverse the works of past historians; I shall note in order but merely succinctly the genealogy of the Artsrunik until I reach the wide-spreading and extensive arena of written histories. One by one I shall expound these matters systematically and shall arrange them for your pleasure.

This Vahan whom we mentioned is the same Vahan whom the Armenian nobles made king in the days of Saint Vardan—concerning which I shall write in its own chronological place. For now let us continue the order: Cyrus, Vargen, Vahan, ShambiT, Jaj, Jajur.

When Arjam was king of Armenia he greatly maltreated the Bagratuni family for releasing the priest Hyrcanus from imprisonment. Arresting Enanos, the leading prince of the Bagratunis and sparapet of Armenia, with his family and all his relatives, he inflicted many torments on them; some he put to the sword, wishing to exterminate the Bagratid family at a single stroke.

But Jajur Artsruni set his hand to the affair. Approaching the king, he requested Enanos, for he was hanging on the gibbet. Obtaining his request, he brought down Enanos from the gibbet and saved his family from the murderous sword. Then he appointed Enanos Bagratuni to the same dignity in the kingdom. But Ariam could not agree to have Enanos in his company with any confidence, so he sent him to Armenia. Jajur received him with respect and ready provisions, and settled him in the region of Aragats, in the village called Palin. He was the first from the Bagratuni house to come and live in that part of the province of Ayrarat. Jajur married Enanos's daughter called Smbatuhi to his son Sahak. This was the first marriage alliance between the Bagratunik' and the Artsrunik. It took place in the eighteenth year of the king of Persia. After living for twenty years Arjam died and his son Abgar* became king. [* Cf. Moses Khorenats'i, 1126: Arjam (Arsham) died in the twentieth year of Arshavir, king of Persia. The story of Abgar or Abgarus underwent a series of elaborations in Armenian: the Syriac Doctrine of Addai was rendered in a tendentious fashion by "Labubna"; to that version Moses Khorenats'i (who also used the brief account in the Armenian version of Eusebius's Ecclesiastical History) added further changes; and Thomas expands even more in order to enhance the glory of his patrons' ancestors. (* Abgar V is claimed to be one of the first Christian kings in history, having been converted to the faith by Thaddeus of Edessa. one of the seventy disciples. The Letter of Abgar to Jesus is famous in connexion with Jesus. The church historian Eusebius records that the Edessan archives contained a copy of a correspondence exchanged between Abgar of Edessa and Jesus. The correspondence consisted of Abgar's letter and the answer dictated by Jesus. It is part of the Doctrine of Addai. Abgar was described as "king of the Arabs" by Tacitus, a nearcontemporary source. According to Movses Khorenatsi, Abgar was an Armenian. Yet both Robert W.Thomson and Richard G. Hovannisian state Abgar's Armenian ethnicity was invented by Khorenatsi. Modern scholarly consensus agree that the Abgarids were in fact an Arab dynasty. Abgar V came to power in 4 BC. He became a Roman client, lost his throne in 7 AD and regained it five years later. Armenian historian Movses Khorenatsi, or Moses of Chorene (ca. 410-490s AD), reported that the chief wife of King Abgar V was Queen Helena of Adiabene, the wife of King Monobaz I of Adiabene, and thus the kingdoms of Edessa and Adiabene were linked in some manner. The Biblical scholar Robert Eisenman suggests Queen Helena as one of the wives of King Abgar V, who allotted her the lands of Adiabene. Professor Eisenman derived this association from Movses Khorenatsi mentioning the same famine relief to Judaea as does Titus Flavius Josephus: "As to the first of Abgar's wives, named Helena... She went away to Jerusalem in the time of Claudius, during the famine which Agabus had predicted; with all her treasures she bought in Egypt an immense quantity of corn, which she distributed amongst the poor, a fact to which Josephus testifies. Helena's tomb, a truly remarkable one, is still to be seen before the gate of Jerusalem." Professor Eisenman goes on to equate King Abgarus V with the Agabus in Acts of the Apostles (Acts 11:27-30), because Agabus was identified with the same famine relief as Oueen Helena. By necessity Eisenman then equates the biblical Antioch Orontes with Antioch Edessa, indicating that Paul the Apostle and Barnabas went to Edessa. Abgar V is claimed to be one of the first Christian kings in history, having been converted to the faith by Thaddeus of Edessa, one of the seventy disciples. According to Eastern Christian tradition, Thaddeus of Edessa

(Syriac Aramaic: Mar Addai or Mor Aday, sometimes Latinised Addeus; "Mar" refers to "Lord" or "Saint" such as in Mar Papa used by the Saint Thomas Christians of India for the Pope of Rome) was one of the seventy disciples of Jesus. He is possibly identical with Thaddaeus, one of the Twelve Apostles, and therefore with Didymos Judas Thomas. From an early date his hagiography is filled with legends and fabrications.)]

Here we come to the history of Abgar, king of Armenia, in whose days occurred the appearance in the flesh on earth of our Saviour the Lord Jesus Christ, our God, the beginning of the renewal of creation and the illumination of all men who are to come into the world. So it is a great pleasure for me, and especially for everyone—or rather, for all believers in Christ—to expatiate at length on these great events; a plea sure for you to hear and for me to write.

For he was the first of the heathen kings to believe in Christ, as the records of the reliable historians demonstrateespecially the evangelist and apostle John, son of thunder, who made the thunder of the good news of Christ's gospel resound in the world for those who were to believe in Him For he says: "There were there some of the Gentiles who had come up to Jerusalem for the feast in order to worship. These approached Philipp, who was from Bethsaida, and said: 'We wish to see Jesus'." They were presented to the Saviour with They were presented to the Saviour with Abgar's letters; and they heard his symbolic response concerning the saving crucifixion on behalf of the world, which he called his glory. He also wrote a reply to the letter through the apostle Thomas, promising to send Thaddaeus to fulfil his Abgar's desired request. And Christ, the source of life, satisfied Abgar's longing by imprinting his desirable visage on a napkin in a glorious and ineffable manner.

Here a new rejoicing suffuses this history concerning the honourable, co-regnant, 9 and magnificent princedom of the Artsrunik', that great stock descended from Senek'erim, which as its noble families increased and multiplied had reached this period of Abgar's rule and belief in Christ. With him there was also the great prince of the Artsrunik', Khuran, the chief general of the army and commander of the kingdom of Greater Armenia. This prince Khuran became the first Armenian believer in Christ and was baptised at the hands of the apostle Thaddaeus [who is also variously called Jude (the brother) of James, Jude Thaddaeus, Judas Thaddaeus or Lebbaeus. He is sometimes identified with Jude, the brother of Jesus, and that means Didymos Judas Thomas, the twin brother of either Jesus or one of his other brothers, better known as Thomas the Apostle. His evangelising mission led him to Syria, Armenia, Mesopotamia, Persia, and India where he died probably between 60 and 70 AD.]. After his conversion to Christ he demonstrated a most upright and pious way of life worthy of his faith, pushing the practice of his religion almost to the extreme of virtue, as the precepts of evangelical doctrine exhort. We think this is sufficient indication for now of the nobility of the blessed man Khuran Artsruni, of his comprehensive intelligence and deep wisdom. So let us carry forward the order of our history, in detail yet briefly, for it is not the occasion for us to linger with praises and thereby neglect the thread of our historical narrative.

Herod the foreigner, son of Antipater of Ascalon [Antipater of Ashkelon also called Antipater I the Idumaean (meaning 'the Arab', born 113 or 114 BC, died 43 BC) was the founder of the Herodian Dynasty and father of Herod the Great. According to Titus Flavius Josephus, he was the son of Antipas and had formerly held that name.] and whose mother was Eupatra, an Arab, was king of the Jews in the days of the birth of our Lord Jesus Christ-as Josephus tells us, and also about what he did to the children. He had five sons, among them Herod and Philipp, whose wife Herod had taken, abandoning his own first wife, daughter of Aretas king of Petra. Angered at this, Aretas planned to take revenge for his daughter's dishonour, yet was unable to do so openly because of the emperor Augustus Tiberius Caesar. So he made an alliance with Abgar, king of Armenia, and with the great general Khuran Artsruni. Sending him gifts, he received in support Khuran Artsruni, a wise and valiant man, mighty with the bow and a well-armed cavalry man. When Khuran attacked, Herod's army was defeated, while Herod himself escaped by flight with his squire Urelian. He took refuge with his uncle, son of Hyrcanus the priest, in the city of Ascalon. Now although the alliance of Aretas with Abgar and Khuran provided a reason, yet Abgar and Khuran in their love for Christ and for the fame of the Holy Saviour were resent ful against Herod for what he had done-just as later they sought vengeance against Pilate for the murder of the Baptist and the torments of Christ. And it was the sixteenth year of Tiberius Caesar.

After the ascension of our Saviour and the death of the pious Abgar, Abgar's son Ananun became king. He had not inherited his father's faith in Christ, but abandoning the holy covenant he pursued the worship of idols that Abgar had scorned and rejected. He also trapped the great general Khuran Artsruni in the snare of his deceit into repeating his error, for which the latter was mocked and despised. Then Khuran took the greater part of the army and went to

THE GRAND BIBLE

Sanatruk at Shavarshan. Sanatruk took him along in his attack on Abgar's son to deprive him of the kingdom he held. But before the war had come to a conclusion, a tower that Abgar's son was building collapsed on him and killed him exacting vengeance for the death of Saint Adde.

However, Khuran did not remain with Sanatruk but went to Greek territory, to the Caesar Tiberius, while the latter was waging war against the Spaniards because of the gold mines. There Khuran performed many heroic exploits and victories with the soldiers that had accompanied him from Armenia. Being very pleased with him, Tiberius honoured him with purple robes and a baton in the stadium. Tiberius died after reigning for twenty-three years; and in place of Tiberius, Gaius the Less reigned for three and one half years.

Then Khuran heard that Queen Helena of Armenia, Abgar's wife, had been unwilling to remain in Mesopotamia because of the impious Sanatruk and had gone to the holy city of Jerusalem, where she lived in piety. So he too came to join her in Jerusalem. Taking the queen's and his own gold, he went to Egypt to buy corn in the days of the famine that occurred in the reign of Claudius, in order to distribute it to orphans and widows as well as all the impoverished believers in Christ for whom the corn was sufficient. There Khuran lived and there he died at a good old age; in the world to come he will be crowned by Christ, with the queen Helena among all the saints of Christ our God. Amen.

ARTSRUNI HISTORY CHAPTER 7

[Calumny By Nerseh's Nobles Against Vach'e (Nephew) Of Arshavir]

When Khuran went to Tiberius Caesar he left his son VaclTe and his brother Arshavir at Harran with Queen Helena. Then, when the queen went to Jerusalem, VaclTe and Arshavir, being afraid to go to Sanatruk, went to Nerseh king of Syria, taking with them the written treaty of peace between Abgar and Nerseh and Khuran Artsruni. Nerseh appointed them to the oversight of the government: VaclTe he established at the royal court, so that via him everyone would have to enter or leave the palace and through him conduct whatever business they needed-from the greatest to the least; and Arshavir he appointed as commander of the army for war. But Nerseh's nobles took offence at them and induced one of Nerseh's relatives, Dareh by name, to approach Nerseh and say: "Why were you pleased to act thus, to appoint these men to run your country? Behold, they are descended from the family of Senek'erim in Nineveh; they now command your army along with their own. They may perhaps inflict harm on you and snatch the kingdom of Nineveh for themselves. For Khuran, the father of VaclTe and brother of Arshavir, had become friendly with Artashes the king of Persia when Abgar went to Persia and they made a mutual treaty. Perhaps, when they accomplish the evil deeds that they have plotted against you, as we have heard from their confidants, with the help of Artashes they may depose your family and descendants from the throne of Syria. Either make their evil plots redound on their own heads, or let them go away whither they may desire." Nerseh was attentive to Dareh, but he was unable to prove his allegations. However, because of these slanderers Vach'e and Arshavir went to Artashes king of Persia and remained there until the return of Artashes, son of Sanatruk. who came here and reigned as king after killing Eruand.

Now Sahak, Vach'e's son, had gone in flight by the regions of Media to Atrpatakan, and was residing with a certain general and magus called Peroz-Vram. Smbat, taking Artashes, was residing at Zaravand in Atrpatakan [Smbat was the tutor of Artashes.]; he wrote to Sahak asking him to return to Eruand so that perhaps there might be a way to make some plan concerning Eruand. He obediently went without delay, and explaining to Eruand the reasons for his flight said: "We brought up the sons of Sanatruk as foster parents; and you swore by Artemis and Aramazd that when you were king we should have no grounds for fear." But Eruand continued his search for Artashes. So Smbat took Artashes and went to settle on the high mountain of Varag. while Eruand in pursuit encamped at the foot of the mountain at the head of the province of Tosp, and called the spot Eruandakank. Sahak sent word to Smbat that he should not remain on the mountain but make haste to return to Her and Zarevand. "For," he said, "Eruand will not advance with his army across the border of Media." And he had the child's needs taken to him day by day.

When Eruand became aware of this he had Sahak taken in bonds to Armavir. There he remained in prison until he died. Then Ashot, Vach'e's brother, since he was very young in years, was taken by his tutor and brought before Eruand. He had been unable to escape and go whither he might wish, he said, lest perchance on his way he be siezed and condemned to death. But Eruand kept the oath to his father and allowed him to go and settle and live wherever he might please. So his tutor brought him to the mountain Sim, to the place where his ances tor had dwelt in the land of Taron.

At the same time Smbat took Artashes and came down from the mountain. Among the rocks he made a refuge in a most unsuspected spot, a hiding place in a small cavern in a rocky hollow, opposite the southern side of the fortress of Van. near the place where a spring gushes out at the foot of a small hill. It was near the edge of the lake from which temperate breezes blow, freshening the parching heat of the summer caused by the sun's heat. There they stopped for many days in safety from distrust and fear of Eruand. For he was unable to discover the fugitive Artashes. Since the latter was preserved in this way by God's providence, Eruand returned by the borders of Atrpatakan to the valley of Andzahk'. Now the valley of Andzahk is so called for the reason that it contains many treasures in its jagged heights, its narrow defiles, in the safe fastnesses of the valley, in the chaos of the land that is uninhabited by men and free from the attacks of Eruand's brigands. So he came and stopped in the town of Nakhchavan, the capital of the land of Vaspurakan. Thenceforth Eruand was thrown into doubt; sleep did not calm him at night, nor food delight his palate. Then Smbat took Artashes in the guise of a wretch who goes around begging his daily sustenance, and came in his woe to the court of Dareh king of the Medes. When Eruand eventually heard of this, he wrote to Smbat in the hope that he might deliver up the young Artashes. When Artashes attained maturity he went to the Persian king Artashes; and demonstrating there many deeds of valour in heroic combats, he was honoured by Artashes the Persian king to the extent that he supported him with the aid of an army and made him king over Armenia in succession to his father Sanatruk in the royal capital of the valiant Arsacids.

Vach'e and Arshavir then returned with Artashes, who had taken Eruand's kingdom in the thirty-first year of Artashes, king of kings, and in the . . . year of the Greek emperor. . . , He returned to them the land which Tigran Haykazn had given in inheritance to their family, but which Sanatruk had confiscated to the court: the mountain of Sim and Aldznik 4 as far as the borders of Asorestan.

ARTSRUNI HISTORY CHAPTER 8

[The Rule Of Artashes Over Armenia]

When the rule of Artashes was flourishing in its systematic orderliness and prosperous administration, as the books of the historians explain, and he had married Satfinik as queen of Armenia, he recalled his exile in the cavern that we mentioned above. So he returned to that spot for amusement. As it pleased him, he built a palace of rough rock as a royal autumn residence, a splendid building, beautifully walled, looking out across the delightful lake to the north. The sun's rays played upon the strollers; the fish seemed to be sporting on the waves as they jumped in and out; it looked across to the great mountain called Masik' with its lofty summit covered in snow of a glorious white-like a splendid king with honourable white hairs diverting himself among his proud nobility and seeing before him the shimmering bluish purple of the wide-spreading lake. Around the shores he built vast estates, with bushy trees, wine-stocks, and various fruits; round the wall he established thickly planted gardens, blooming and smelling sweetly from the variety of flowers. Not merely did they dazzle the eye and their smell delight the nose but they also provided medicinal remedies of ingenious science following the teaching of Asclepius. Around the fortress-like palace he encircled the hill with a wall of roughly hewn rocks, fortifying the valley into a populous city. Above the gushing spring he also walled in the steep rock with very strong constructions in order to protect the source of water; and he strengthened the wall around the rock so that it was secure and inaccessible to attackers. He set it out with delightful precision, bringing the wall down to the depths of the lake. In the middle of the three-forked small hollow valley which runs down from the three hills he built a high tower with hollow centre; on top of it he set the image of Astlik, and nearby the treasure house of the cult of the idols. In the city he arranged bustling streets suitable for commerce. On the highest hill to the southern side he discovered a lesser fountain, whose water he brought along an aqueduct through the valley. And for the improvement of the view, on the west of the plain and along the shore of the lake he arranged walls and had the enclosure filled with thickly planted vineyards in order to delight the eve.

When he had completed the construction of the city and made ready the inaccessible and secure fortress, he called the fortress Zard, that is, "splendour," for the splendid construction. He used to bring Queen Sat'inik for diversion in the autumn season to the fortified and beautifully built palace that adorned the castle. He named the city Artamat, which when translated really means "the handiwork of Artashes," or "the coming of Artashes," because in Persian mat means "coming." For when Artashes left this spot he no longer allowed Eruand to trouble him; but after going from here to the Medes and Persians, he returned in great force and with royal magnificence to reign over Greater Armenia. Following the barbarian rites of divination he honoured this spot as where he began his change from the lowest to the highest station.

Now the holy men of Sukavet mountain, since they were fellow countrymen and confidants of Sat'inik's and had followed her, sent one of their ascetics to the queen to reproach her vain and useless cult of the idols, as Saint K'rysi sent to Artashes.

Sat'inik was attentive to the advice of the holy men, but did not reject the image of the idol called Astlik because she distrusted the king and his sons, especially as she expected the king to turn first from idols to the worship of Christ the true God. But how the matter ended is not clear to us.

Sahak, son of Vach'e, was established at Artashes' court in splendid and prominent authority. Artashes entrusted to him the province of Albag, for some descendants of Ashdahak the Mede dwelt there-valiant men, well armed and good archers. But since their clan had diminished, they had no one powerful enough to wage war and serve the king, especially as the land had been devastated by a Persian raid about the time of Eruand's death and Artashes' accession to the throne. But a certain woman of the race of Ashdahak dwelt in the castles of Jlmay and Sring, in the province of Lesser Albag. The woman's name was Jaylamar, after which she had named the castle, and she had many treasures and a daughter called Anush. Sahak married the latter at the command of Artashes, who confirmed and sealed the land for Sahak as his own inheritance. The king took care of the woman for the reason that she had not gone over to Eruand nor served him in any fashion. After receiving his land as a gift, Sahak let his son Ashot establish himself in the mountainous regions of their first principality, to cultivate and inhabit it, and pass on the land in inheritance to their own family, descendants of the house of the Artsrunik'.

Ashot, by an unwise decision, entered the mountain where some brigands from the regions of Hashteank were strongly established. 1 They came across each other, and through lack of caution he was killed there in this unforeseen encounter. He had been unable to cultivate the land, when shortly, in the eighth year of Artashes, the king took over the land and ordered a temple built there to Heracles and Dionysius. For that reason he was able to keep the land prosperous, with a large population. But when the Artsruni clan declined, no one remained save a single young man named Hamam, son of the aged Arshavir, brother of Khuran who was at the royal court. In consideration of his ancestors' efforts and services the king promoted Hamam to the rank and station of his forefathers. and gave him in inheritance the land of Albag. Just as he did for Sahak, so he did for Hamam. But Hamam was haughty and arrogant, cowardly and lazy in war, and only served the king with adulation.

When the king heard of his weak and languid way of life, he appointed him overseer of the officials of the royal court, so that he might imbue the king's employees with the same subservience, since Hamam was also familiar with the books of the archives. For in the past there was no interest in or care for either the protection of the country's prosperity or preparations for war, but at the royal court one could only enter and leave the archives and treasuries through the king's confidants. How ever, Artashes sent Hamam as ambassador to the emperor Hadrian in the matter of the brigand Barkochba and his war in Syria. He went, and on his return found King Artashes dead in Marand. He himself died with the other latterers in the land of Media at the town of Bakurakert.

After Artashes there reigned Artavazd; then Tiran, son of Artashes; then Tiran; then the last Tigran; then Valarshak. In the time of their reigns the generations of the Artsrunik' were: Hamazasp, Shavarsh, Asod, Babgean.

Valarshak became king in succession to his father Tigran. Waging war against the Khazars of the North, he was killed by those mighty archers. Then his squires, Babgean and the great aspet Ashot, together escaped from the great battle; returning in haste to Armenia they gave the sad news of the king's death and made king in succession to Valarsh his son Khosrov with the cooperation of the Persian king Artavan. Having thus brought peace to the land they lived in tranquil ease as they pleased all the time of Khosrov's life. He reigned for forty-eight years.

ARTSRUNI HISTORY CHAPTER 9

[The Abolition Of The Pahlavik Kingdom And The Rule Of The Stahrian]

While the land of Armenia was thus enjoying a tranquil and undisturbed existence menaced by no danger from any where, but rather inflicting troubles on others as we read, unexpectedly there arrived the news of Artavan's death and the domination of Persia by Artashir the Sasanian from Stahr. Our king Khosrov was struck with dismay and attempted to revenge the death of his blood relative, King Artavan. This indeed he was doing until his treacherous murder by Anak his relative. Then the country fell apart and everyone scattered, hastily fleeing wherever he could. They applied to the emperor Valerian to see if he could revenge the blood of Khosrov and bring an end to the tyranny of the Stahrian. But although the emperor Valerian gave help to the Armenians with the army of Phrygia, nonetheless the land was not pacified. No one was able to live in security, or keep possession of his patrimony; peace did not return until the emperor Probus, who made peace with Artashir. Here I have no indication as to what happened to the Artsruni family, or how, where, or why. But

we considered it merely sufficient to present the generations of the family as we have laboured to discover them, down to the reign of Trdat and the beginning of he illumination of Armenia through the great Gregory the Illuminator. These are the generations of the Artsrunik from Babgean: Mushel, Vahan, Nerseh, another Babgen, Tirots'.

ARTSRUNI HISTORY CHAPTER 10

[Trdat's Return From Greek Territory And Establishment On The Throne Of The Kingdom Of Greater Armenia With The Help Of The Greek King; And Concerning His Belief In Christ]

The details of Trdat the Great's rule over the land of his fathers and of his deeds are known in writing: his belief in one God the Father, and in His only Son the Word of God, Jesus Christ, and in the one Holy Spirit, co-equal in nature and glory with the Father and the Son, in one perfect Divinity; and his baptism with a holy and pure confession in the Father and Son and Holy Spirit at the hand of Gregory the Great, with all the nobility of Greater Armenia.

From the house of the Artsrunik among the magnates of Armenia there was baptised Tirots son of Babgen II. He was a mild man, intelligent, thoughtful, modest in speech and modest in look, who tried to make himself recognised by a single person-that is, Christ-rather than by the multitude. For at the time when Gregory the Great was being taken to the city of Caesarea to be ordained into the priesthood for the illuminating instruction of Armenia, Tirots' accompanied the nobles. And as we said above, be cause of his modest and humble character he willingly undertook this and did not push himself forward to higher rank in order to act the grandee with the famous and the infamous. But being a studious reader of the Holy Gospel which bids us not to sit in the first rank, he never claimed honourable and superior rank among the great nobles of Armenia. For who is grander than the descendants of Senek'erim, the great glory of whose stock the outspoken Isaiah proclaimed to the Israelites, or whose splendid pre-eminence Alexander of Macedon inscribed with no mean eulogies in the books that contain archival traditions?

Now as we said above concerning our important investigations in the chronicles, we have confined ourselves to an exposition of the Artsruni families alone and have not pursued the multifarious stories which previous historians set down in books, describing their deeds of valour performed at various times that are worthy of many and the greatest praises. But we have merely indicated the most famous events: the good fight of the saintly king and brave champion Trdat against both incorporeal and corporeal warriors; his translation from earthly toils to heavenly rest and embalming in great honour with royal pomp and fame, as we read in the eloquent composition of Moses the world-famous teacher and orator, the most accurate author of our illumination, as he relates at the end of his second book.

Khosrov, son of Trdat, succeeded his father as king at the command of Constantius. A lover of peace, he established good order in the country with the princes; nor did anyone have any worry of attacks from anywhere. They submitted themselves to the authority of the Greek emperor alone, abstaining from paying tribute to Shapuh king of kings. Khosrov entrusted the army to Vahan Amatuni to take responsibility for warfare—if indeed there should be occasion for it anywhere. He governed according to Christian principles following the worthy commandments of the Lord, and in everything had recourse to the advice of Vrt'anes the Great; he reigned for nineteen years.

He paid the tribute to the emperor at the royal court through the chief scribe. 5 But we have been unable to discover for certain anything else about the Artsruni clan or what sort of deeds they accomplished, save only that they lived peaceably with regard to the king and the nobles. Mushef, Vahan [and so on] held each his own property given to them in hereditary possession by the former kings. What we could not discover for certain we did not reckon worth putting in writing, save only that they were very highly regarded and honoured by the kings.

After Khosrov the Less his son Tiran became king. At that time the office of hazarapet of Armenia was held by a man of baneful and evil character who was called hayrmardpet. Approaching King Tiran, he began to calumniate in secret the houses of the Artsrunik' and Rshtunik', for they were distinguished and famous families, valiant and renowned, and respected by all. He said: "Unless you exterminate these two noble families, their intentions are inimical to your rule; for heir hand is with Shapuh king of kings." The mardpet said this, supposing that: "If I am able to carry out this perverse plan perhaps I shall also be able to hound the house of the Mamikonean nobles to destruction." Tiran heeded him and ordered the proposition of that impious enemy of God to be carried out.

When this cruel undertaking was made known to the Mamikonean generals, armed and with drawn swords Artavazd and Vasak Mamikonean wholeheartedly rushed into the crowd, struck down many with their swords, snatched away Shavasp, son of Vach'e Artsruni, and Mehedak Rshtuni, for they were very young in age, and took them to their fortresses in Tayk'.

When the boys reached maturity they gave them their daughters in marriage. From them stem the descendants of the two Artsruni and Rshtuni families; but these did not participate in Armenian affairs for many years. As for Tiran, wallowing in his foul turpitude, he was betrayed to Shapuh. Having been blinded, he died a death worthy of his deeds; as he had treated the saints Vrt'anes and Yusik and the great priest Daniel, so was it meted out to him. He had reigned for sixteen years.

Arshak became king in succession to Tiran his father at the command of Shapuh king of kings. Gathering around himself the Armenian nobility, he learned about the Artsruni and Rshtuni families and those of the Mamikonean nobility who had one off and fortified themselves in the fortresses of Tayk'. On being accurately informed about the causes of this, he wrote via a certain Vahan of the Amatuni family directing them to return and live without fear and be promoted in rank and honour. The three noble families heard the wise Vahan Amatuni and followed him back in trusting confidence. For they knew that they themselves had done no harm, neither great nor small. Received by King Arshak as he had written via Vahan, they were installed without fear.

But the evil-minded hayr mardpet never desisted from his typical evil plotting. About that time Arshak travelled to the West accompanied by Nerses the Great, Catholicos of Armenia, and arrived at Ashtishat in Taron, at the martyrium of Saint John the Baptist and the martyr Athanagines, which had been built by our Holy Illuminator Gregory on his return from being consecrated to the priesthood. After entering the holy place and performing their prayers, they came out to walk around and enjoy themselves elsewhere. The malicious havrmardpet, the son of Satan, was not satisfied with working evil among men, but even had presumptions against God and his saints. Having opened his filthy mouth against heaven, like an insolent and shameless dog he drew his tongue over the earth. Approaching King Arshak he said: "The former kings were not sensible, since they did not keep this place as a royal retreat for luxury and enjoyable entertainment. So may my suggestion please you. The saints do not take delight in grand places, other wise they would not have lived narrow and circumscribed lives equivalent to death." But I do not know whether the king really gave way to his enticement or not. And I did not consider it important to write down what we have not verified.

When Saint Nerses heard of this evil and immoral proposition he heaped strong and violent curses on the mardpet. And the saint's words were fulfilled by deeds. At that very moment Shavasp Artsruni approached the mardpet and said: "Some white bears with fine hair are lurking in thickets in these deep forests. If it pleases you, let us go and hunt them." So they entered the forest with him. Drawing back his wide-arced bow to its fullest extent. Shavasp Artsruni shot an arrow in his back through his spine with an energetic motion of his powerful fingers. It pierced the malicious one's heart, and falling backwards he breathed out his soul into the hands of his counsellor Satan. The words of Saint Nerses mingled with the living word of God, the more easily to bring retribution on those who despise his blessings and curses, accomplishing the task without delay. He received his just reward according to the merit of his intentions.

In those times the emperor Valens ruled over the Greeks, and Shapuh king of kings over the Persians. Arshak supported both kings, sometimes the Persians, sometimes the Greeks, or rebelled against both.

But the Armenian nobles, at Valens's instigation, were incited to war against Arshak. They were advancing to battle when Saint Nerses interposed; he calmed and pacified the quarrel. Then the king begged Saint Nerses to negotiate a reconciliation between Valens and Arshak—which he did indeed bring about.

But Mehuzhan Artsruni did not heed Saint Nerses, nor did he submit himself to the king; but he offered foul enticements to Vahan Mamikonean, who was Mehuzhan's father-in-law, and they passed over to Shapuh. Abandoning the Christian religion, they submitted to the false doctrine of the ashworship of Ormizd. Shapuh, greatly delighted at this, promised to marry Mehuzhan to his own sister Ormzduhi.

There was a great war between Shapuh and Arshak during Arshak's lifetime. At many times and in many places the Armenian and Persian armies battled against each other. But I consider it superfluous to repeat the accounts of previous historians.

But after many battles, with deceitful trickery Shapuh summoned Arshak to him, apparently for peace and friendship and making no reference to the evils that had been done between them. He went, following the summons and full of innocence. But Shapuh bound him in iron bonds and had him taken to the fortress called Anush in the region of Ctesiphon. There he lived until his death at his own hand, according to the prediction made about him by that man of God Saint Nerses. and Vahan took the Persian army, entered Armenia, spread raiding parties across the whole face of the Armenian land, ravaged hamlets and towns and farms, plundered possessions and all patrimonies, and put to the sword all those they captured. They entered the province of Rshtunik and sacked the house of Garegin, lord of Rshtunik'. Escaping by the skin of his teeth. Garegin fled to the emperor of the Greeks. They captured the princess of Rshtunik', the wife of Garegin and sister of Vardan Mamikonean. Bringing her to Van Tosp, the city of Shamiram, they put her to torture and very cruel torments, trying to force her to abandon the Christian religion and to accept the religion of the Mazdaean cult of ashes. When the saintly princess Hamazaspuhi refused, they took her up to a high place in the castle, stripped off her clothes-that she might be clothed in the glory of Christtied ropes to her legs, and suspended her from the northern tower. With thankful endurance 6 she received the sentence of martyrdom. Her nurse, remaining below the gibbet, gathered the holy treasure in her bosom and brought it to rest in the martyrium built by Saint Nerses. Then they transferred it to the place which is now called Dzoroy Vank', to the martyrium of the Holy Hrip'simeank', which Saint Gregory had built and where are preserved in perpetual memory of the illumination of Armeia by our father his holy altar, pastoral staff, engraved ring, and the girdle of his diligent waist.

But here I shall expound in order the audacious acts which the impious Mehuzhan inflicted on the Armenians, Mehuzhan

Mehuzhan and Vahan attacked another time, took Van Tosp, razed and destroyed the beautifully constructed fortresses, and led into captivity the inhabitants of the city five thousand Jews and eighteen thousand Christians—and the Jews that Barzap'ran had brought captive at Tigran's orders; they marched them to Isfahan. Then they took Valarshapat and Artashat, and led nto captivity the Jews who since the days of Saint Gregory had believed in Christ, causing them more harm than the other Jews because of their faith in Christ.

The blessed Zuit'ay, a priest from Artashat, followed them lest his flock wander astray without a shepherd in deserts and dangerous abysses and fall headlong among wolves. But Mehuzhan came before Shapuh and began to calumniate the priest Zuifay, saying: "This priest has followed the Christian prisoners to oppose the commands of your majesty and the religion of the Mazdaeans and Aryans. Everywhere he is the cause of the Armenians' rebelling against the king of kings; and he dishonours fire and holds the sun in no esteem. So let his life be terminated—the command of your majesty will easily bring that about." Immediately the saint was led before Shapuh. The holy one's responses to the questions were full of the perfect wisdom through the Holy Spirit that the saint possessed inseparably within himself. Having there fought the good fight, like a brave shepherd he gave himself for his flock, received the sentence of martyrdom, and was perfected in the glory of the Holy Trinity [P'awstos says he was beheaded.]. The holy Zuifiay travelled the good road of many martyrs in this land of Armenia, to the East and the West. After ruling for thirty-six years, Arshak died in the anner described above.

During his reign Shapuh king of kings inflicted many insufferable afflictions on Armenia and Syria and Palestine. He led into captivity four million Jews, sacked Judaea and the holy city of Jerusalem, and poured out on the Christians all the mortal poison of vipers and asps. By him many saints were martyred for Christ; as is said, more than forty thousand holy men were martyred for Christ's sake [P'awstos, IV 57, mentions tens of thousands of victims, and also the tortures of nobles and their wives-but this was in Armenia. No earlier Armenian historian refers to Shapuh in Syria, Palestine, and Jerusalem.], many bishops, priests, and the other ecclesiastical ranks, and very many of the noblemen of the country and their wives, with terrible and cruel tortures at which I shudder. My mind is greatly amazed and astonished at their fortitude in enduring such refined instruments of torture as we read of in the book of the history of the martyrs which has the title Araveleay [East] and was composed by the blessed confessor of Christ Abraham from the village of Arats [Thomas is referring to the book of Syrian martyrdoms known in Armenian as Vkayk' Arawelits" (Martyrs of the East), originally composed by Marutha.]. He was the pupil and follower of the holy Levondians, and wrote in that memoir the names of some rather than of all of them: Shahdosd, which means "lover of the king"; Gohsht'asd, which means "dyer of purple for royal clothing"; Bishop Shmavon, a rock of Christ's church; and in addition to him [the names of] another hundred bishops and priests, who were martyred at the same time by the sword, in one day, on the great Friday of Easter.

However, Mehuzhan was not content with carrying out the evils that he inflicted on the Christians, and especially on the land of Armenia; but taking the Persian army he came to rule over Armenia at the command of King Shapuh. In the company of Vahan Mamikonean he entered Armenia with fearless presumption, planning what he was unable to accomplish. For Samuel, Vahan's son, went to meet his father. Vahan expected to bring his son to an irreversible downfall.

THE GRAND BIBLE

But Samuel took his father aside, as if they were to discuss the business for which they had come; and when they had gone some distance away from the Persian army, Samuel raised his one-edged sword and inflicted such severe wounds on him that he killed him instantly. Furthermore, he also slew his mother Tachatuhi, for they had both forsworn Christ. Then he himself fled from Persia to the regions of Khaltik.

But Mehuzhan did not abandon his plans to rule over Armenia. He amassed around him a vast multitude of battalions, flags, and ensigns without number. On reaching the village of Dzirav in the province of Bagrevand, he wished to pass on to the royal lands of Armenia. But Smbat the sparapet of Armenia, son of Bagarat Bagratuni, opposed him with an army that included numerous Greek troops armed with shields and unfurled flags. The imperial trumpets sounded, and troop after troop of armed battalions surrounded Mehuzhan's force, preventing his rapid escape. Then the valiant Smbat came to grips with Mehuzhan. He hamstrung his armed horse, cast a rope around his neck, and said: "Good for you, king of Armenia. Come here that I the sparapet may crown you." Heating a circular spit [-iron] until it was red-hot, he set it on the head of the impious one. And thus the miserable wretch departed this world. In this regard the poetic fable seems opportune to me, which runs: "Often the foxes planned to reign, but the dogs did not agree.'

ARTSRUNI HISTORY CHAPTER 11

[The Reign Of Theodosius Over The Greeks (Romans)] On the death of the emperor Valens, Theodosius the Great ruled over the Greeks. Then Saint Nerses took Pap, son of Arshak, and with a Greek army installed Pap as king over Armenia in the site of his native Arsacid monarchy. As king of Armenia Pap did not follow the advice of Saint Nerses but travelled a perverse and contrary path, devoting himself to impurity and all forms of vice which it is not pleasing to repeat in this book. On being rebuked by Saint Nerses, he surreptitiously gave him a mortal poison to drink. So Armenia was deprived of the spiritual teacher and valiant shepherd Saint Nerses. They removed the saint's body with a large retinue of Armenian soldiers, appointing Mershapuh Artsruni, general of Armenia, and Vahan Amatuni and Mehuzhan's brother as escorts to precede the cortege, and laid it to rest in the place of his ancestral martyrium at Tordan. 1 But when Pap rebelled against the emperor Theodosius, the Greek general Terentius captured him and marched him in bonds to the emperor. There they killed him at the emperor's command, after he had reigned for six years. Following the death of Saint Nerses, as archbishops of Armenia there were some descendants of Albianos bishop of Bznunik', an honourable man: Shahak, Zaven, and Aspurakes, who do not deserve a good memory.

In place of Pap the emperor Theodosius made king a certain Varazdat from the Arsacid line, a valiant and warlike man who struck fear into both great and small. He rebelled against the emperor and sent word to Shapuh, king of kings, that he would submit to him. As ambassador he sent to Shapuh the brother of Mehuzhan Artsruni in order to confirm that intention. When he came to Shapuh, he reminded him about his own blood relative Mehuzhan: how he had been sincerely loyal to the king, the battles and raids and pillaging of Armenia performed by Mehuzhan, and his death at the hand of the valiant Smbat Mamikonean. Thus he incited the king to carry out the proposals of Varazdat, king of Armenia. While they were plotting this, the news reached the emperor through the general Terentius. And before a reply had come back from the king Shapuh, an order from the emperor was delivered to Varazdat that he should present himself without delay. The emperor had him sent to the islands of the Ocean where he died, having reigned for four years. When Mehuzhan realised what would happen to him from the emperor and the Armenian nobles, he returned no more to Armenia, but lived and died there in Persia, evincing no deed worthy of record. And Zaven had been appointed archbishop of Armenia, as said above, after the fourth year of Shahak.

After Varazdat, Theodosius the Great made king over Armenia Arshak and Valarshak, sons of Pap the Armenian king. Two years later Valarshak died, having reigned with his brother over all Armenia. Soon the emperor Theodosius also died and his sons Honorius and Arcadius succeeded to the throne. Then the Armenian kingdom was divided into two, between Greece and Persia. Arshak went to the region of Mesopotamia, thinking it better to submit to a Christian king than to submit to the Persian empire. And many of the Armenian nobles followed Arshak to Arcadius, including Samuel Mamikonean, who had killed his father Vahan and his mother Tachatuhi because of their acceptance of the Persian Magian religion, and Vasak Artrsuni. Others of the senior nobility with all their strongly armed followers went to Persia to submit to the heathen and harbarian Sasanian race. Their submission was a cause of ruin to the land of Armenia. And they made the Persian king suppose that they accepted their religion.

When King Shapuh learned what Arshak had done, he made a certain Khosrov from the Arsacid line king over

Armenia. And Shapuh wrote a letter to the nobles, nullifying the reason for their emigration. For he said: "I have appointed a king for you from your own line and religion. Let it not seem hard for you to return here and occupy each his own inheritance. Do not stubbornly follow Arshak and completely abandon your ances tral homeland, to live as exiles, each finding by his sword position and noble rank. But return here and hold your lands without trouble." They heeded him and returned each man to his own dwelling; and taking Arshak's treasures they brought them to Khosrov. Following a great battle between Arshak and Khosrov on the shore of Lake Gelam at the Marsh, Arshak fled to the province of Ekeleats' and there died, having reigned for seven years. Then in Arshak's sector the Greeks installed consuls and generals and counts, thenceforth appointing no more kings. But Vasak Artsruni went to Khosrov and took possession of his inheritance and his rank. He divided his attention between the two sides, remaining deceitfully inconstant and craftily uncommitted: with the Christians he pretended to be a Christian, and with the Persians one of theirs.

A few days later Khosrov rebelled against Shapuh. Putting his trust in the Greeks, he promised to submit the whole of Armenia to imperial rule. For after the death of Aspurakes he had elevated Saint Sahak, son of Saint Nerses, to the patriarchal see of Armenia, and had appointed the nobles who returned from Arshak to their proper ranks. Shapuh, angered at his having done this without his permission, sent his own son Artashir to Armenia. Removing Khosrov from the throne, he appointed in his stead Valarsh, Khosrov's brother.

Then Vasak Artsruni fled to Artashir the Persian, thinking that it was inspired by the great sparapet Sahak that Khosrov had promulgated his independence, and at the same time plan ning to take revenge on the Mamikonean family for the murder of Mehuzhan his grandfather. The most excellent Alan Artsruni, Vasak's son, was much offended at his father's senseless and irrational character in behaving so sympathetically towards his kinsman the impious Mehuzhan, who should have been hated and inflicted with as many evils as possible. So Alan went to Saint Sahak; throwing down his armour in front of him, he stripped himself of his military garb and mourned for Armenia-the decline of the power of the Armenian monarchy and the despotism of the Persians. Even more did he lament and bewail unconsolably over his own Artsruni family which, quickly forgetting the benefits of Christ, only ran after worldly glory and pursued the ash-cult of magism. Alan continued his lament, shedding torrents of hot tears before Saint Sahak, the great sparapet Sahak, and the other nobles until they too inclined to his thoughts about the future prepared for Armenia, like some prophetic vision. While they were all weeping and bitterly lamenting with inconsolable grief, Alan fell on his face before Saint Sahak and the sparapet Sahak asking to receive the habit of the monastic state so he could adopt the life of a hermit. For a while Saint Sahak did not agree, saying: "Be silent for now. At another time I shall take care of what you desire. We

At another time I shall take care of what you desire. We must beware lest some deceitful and malicious flatterers approach Artashir with some falsehood about us, and your father Vasak make some suggestion to the king and stir up confusion and trouble, so that they suppose we are plotting rebellion. But God will accomplish what you desire and long for, as may be pleasing before the Lord." Accepting his advice, the blessed Alan waited for a suitable day.

After reigning for twenty-three years the emperor Arcadius died, severely punished for his offences against John Chrysostom. He was succeeded by his son, Theodosius the Less, who gave much help and many kinds of support to Armenia, building the city of Theodosiopolis in the province of Karin and providing a garrison of troops to guard it and resist Persian attacks. For Vram and Yazkert, having brought over half the country to themselves, had pretensions to rule over the whole of it. Now on the death of Khosrov king of Armenia, who held power for four years, Yazkert decided not to make king of Armenia anyone from the Arsacid family. But in order that he might henceforth better be able to attract to himself the Armenian army with the nobles, he made king over them his own son Shapuh. When he arrived he did not care for the regular administration of the country but occupied himself exclusively with the pleasures of hunting and games. On seeing this, the Armenian nobles regarded him with derision and scorn. For example, Atom, prince of Mokk', while hunting called him a hero, so that puffed up by this he might be audacious enough to rush at the fire. Again in their exchange he called him effeminate. Then Atom went off in the direction of Media. Even more stoutheartedly, Shavasp Artsruni, while they were playing polo, spurring after him took the ball away many times, saying: "Girl, leave the stadium; effeminate man, know yourself." Shapuh then wielded his mallet in the direction of Shavasp, but scorning him Shavasp ostentatiously galloped off; boldly and openly he went at measured pace over to the general Anatolius. At the command of the emperor, Theodosius Caesar, he appointed him hazarapet of the Greek (Roman) sector of Armenia and entrusted to him Mesopotamia as far as the passage over the

river Euphrates. Shavasp remained with the emperor for four years.

When Shapuh heard of his father's illness, he hastened to Persia. His father died, and on the same day he too was put to the sword by his own people. And because Hamazasp Mamikonean had died, who at the time had held the positions of marzpan and general of Armenia, at the request of Saint Sahak to both the Greek and Persian kings thenceforth no one governed Armenia. But people were dispersed and scattered in whatever direction anyone was pleased to run, for many brigands occupied the land.

When Vram, son of Yazkert, became king he summoned Saint Sahak, Catholicos of Armenia, to court. Taking his grandsons Hmayeak and Hamazaspean, he went to the king in Ctesiphon. Now Vardan with the holy teacher Mashtots' had gone to the emperor Theodosius and to the archbishop Atticus with letters from Saint Sahak, taking with them also the script and examples of Armenian writing. The holy patriarch and pious emperor Theodosius received them with the five letters and five replies, and appointed the holy teacher among the pre-eminent and chief doctors of the chair of instruction of Saint John Chrysostom.

On arriving at court with the nobles, Saint Sahak calmed and appeased Vram's anger and vengeful resentment against the Armenians for their insults to Shapuh and making a firm peace with the Greeks. At the request of the nobles and Saint Sahak, Vram II made king over Armenia Artashes, also called Artashir.

When Artashir became king, for a while the country had a respite from the disorders of the Persian army and the royal registers of taxes were re-established, since for the last five years taxes and troops had been withheld from the Persian court. But Artashir, haughtily and without shame, pursued a course of shameful lasciviousness, of homosexuality and lust for women—not only at night but also during the daytime in the light of the sun without distinction he worked his desires, even extending to bestiality.

Exasperated by him, the Armenian nobles were nauseated at his impure conduct and decided that Artashir would no longer reign over Armenia. They approached Saint Sahak to inform him of their plan to turn to the Persian king. This indeed they carried out. They went to Vram and not to Theodosius, the pious and like-minded Christian emperor; impiously and thoughtlessly they committed that foolish crime. Vram, most delighted, heeded them and was happy to abolish the Armenian monarchy. Quickly he summoned back to court Artashir and Saint Sahak with a host of Armenian nobles. He questioned them as to why they had lodged a complaint against Artashir, but Saint Sahak refused to write anything concerning the accusations against Artashir.

But the nobles opposed Saint Sahak as being unwilling to accomplish their wishes. Approaching Vram with Surmakcertain fanatical and vainglorious monk from Artskhe-they began to calumniate Saint Sahak with all sorts of scandalmongering to the effect that he did not wish the Persians to rule over the Armenians and impose tribute and military service on them, but he preferred to see the rule of the Greeks. As corroboration they adduced the letters of Saint Sahak to the emperor and the patriarch; they cited the journey of Mesrop and Vardan to Greek territory, the coming of Anatolius, and the building of the city in the province of Karin. Although in discord, they toppled Saint Sahak from the archiepiscopal throne and Artashir from his royal status. In opposition to Saint Sahak they set up the raving Surmak, then the Syrian Brkisho, then Samuel-none of whom lived in accordance with the rule of canon law. They joined the marzpan Mshkan in administering the affairs of the country. This Mshkan held the country in place of Artashir our king at

the command of Vram king of kings. But when the Armenian nobles saw the disorderly and unnecessary hardship inflicted on our country from both sides, they repented of the past course of events which they had willingly sought to bring about. Turning to Vram, they requested Saint Sahak as their Catholicos. But Vram, being undecided, could not fulfil their request. In his suspicion he vacillated, wondering "lest perchance if I do not do what they ask, the nobles may abandon me and go over to the emperor, to pay him tribute and military service."

But Vach'e, lord of the Artsrunik', and Hmayeak, lord of Ashots'k', and others who had been won over to them approved Vram's wishes and allowed the king to appoint whom ever it might please him. So he appointed that Samuel to the archiepiscopate. After five years he died, having lived a life outside the law.

On the other hand, the general Anatolius appointed a certain Havuk Kukrchatsfi as bishop of the Greek sector. In this fashion Armenia was plunged into confusion and turbulence; it remained disunited and full of disorder, following the inclination of Vach'e Artsruni.

It happened that on Saint Sahak's return from Persia Alan Artsruni went to him again. Receiving from him a monk's habit, he went to dwell alone in the province of Golt'n, the place where Saint Mesrop had taught; he lived an ascetic and angelic life, blessed by men and feared by demons. Then, when those bishops appointed by the Persians had all died—who, without the permission of the bishop of Caesarea, had been consecrated by the blessed bishop Saint Sahak—the nobles of Armenia came in a body to him. Falling at his feet with great lamentations, they begged him not to remember their past behaviour against the saint, but to restore the throne of the patriarchate, and they promised to follow his command. But he would not listen to them. Then he told them the details of the vision revealed to him by the Holy Spirit indicating what would be done in the future: the removal of the archiepiscopate and the monarchy from the Arsacid house, the rule of unworthy persons, the election of saints, the restoration of the patriarchate and monarchy from the same Arsacid line, the coming of Antichrist, Christ's coming, the future judgement, and the retribution to each according to his deeds—which he had seen on Holy Thursday.

After all this had so occurred, having lived for 120 years Saint Sahak was removed from this world to the ranks of the angels. They laid the saint's relics to rest in Ashtishat of Taron, at the site of the martyrium of John the Baptist and the martyr Athenogines. That same year, six months later, the holy patriarch Mashtots' also died. Accompanied by a light in the form of a cross, a crowd of nobles led by Vahan Amatuni, who was at that time sparapet of Armenia, formed the cortege and laid his body to rest in the village of Awshakan in the province called Aragats-otn.

In the second year of Yazkert, son of Vram II, the monarchy was taken away from the house of Armenia. It had lasted 415 years before being abolished.

After the abolition of the monarchy from the Arsacid house and of the patriarchate from the house of Saint Gregory, a certain Levond, a pupil of Saint Mashtots, became locumtenens for Saint Sahak, and then Bishop Yovsep and Moses and Meles. At the command of Yazkert the Persian general Mshkan occupied the position of the Armenian monarch.

But Vardan Mamikonean, son of Hamazasp Mamikonean, grandson of saint Sahak, fled to the regions of Mokk', to the ravines of the Taurus mountain and the torrents of Jermadzor.

He lived in a fortress which is now called popularly Zrlayl because of its fantastic solidity. After the death of the great Sahak Bagratuni, sparapet, aspet, and general of Armenia, the emperor Theodosius had entrusted the office of sparapet of Armenia to Hamazasp Mamikonean and his son Vardan. Therefore Vardan was frightened that the marzpan Mshkan would disturb his tranquil existence, and so came to the inaccessible area of Mokk' and remained until by the providence of God he could control Armenia. He summoned to himself the bishop of Mokk', Yohan; the bishop of Rshtunik, Sahak; and the bishop of Andzevats'ik', Shmavon. And he established groups of ministers to perform the Lord's service day and night with indefatigable energy and liberal care for the poor, that they might obtain mercy from Christ.

This was the Sahak at whose command the great scholar Moses, the world-renowned orator, wrote his book on the History of Greater Armenia, a wonderful composition which begins with Adam and goes down to the emperor Zeno. He lived a full 120 years and died at a ripe old age, as has been handed down to us in the fourth book of the promised History of Moses Khorenats'i, the section which refers back to them both. This the blessed Koriun, fellow student of Moses and pupil of Saint Mesrop, confirms for us in this own accurate History. Drawing on these, to the best of our ability we have composed this abbreviated narrative which we have presented to you, most valiant of literary men, Gagik of Vaspurakan and great general of Armenia. It is reliably confirmed by the eloquent compositions, full of wisdom and most impressive, of these teachers.

So I Thomas, who did not shamefully occupy the last rank but advanced to this position in their place, zealously undertook this great work, though devoid of wisdom, sense, and intelligence. But the command of your eminence forced me to this great undertaking, in which I shall outdistance the charlatan tongues of vainglorious persons.

End of the first book of the history of Armenia, tracing the genealogy of the Artsruni clan.

BOOK TWO

ARTSRUNI HISTORY CHAPTER 1

After the extinction of the Armenian monarchy from the house of the Arsacids, then Persian marzpans ruled the country. The princes of Greater Armenia fortified themselves in strong stone-built castles in every area and region, while the Persian tyranny waxed stronger and bands of tax gatherers made forays with terrible cruelties.

At that same time Shavasp Artsruni, brother of Vasak the father of Alan Atrsruni, conceived the idea of ruling over Armenia. Pursuing this foolish plan he went to the Persian king Peroz, accepted by self-induced error the mad ashworshipping Mazdean religion/ and asked the king for the principality of Armenia. Peroz fulfilled the request of his stupid vainglorious desire. Then he returned to Armenia, bringing with him as marzpan Vndoy, a chief magus of the Persians. When they entered the country they threw the covenant of Christianity into turmoil.

Zealously they set their hands to ravaging and razing churches, destroying houses of prayer, overthrowing altars of the sacrament that works salvation, completely demolishing the font of the glorious illumination of the Holy Spirit, bitterly and cruelly torturing the priests, ministers of the New Covenants, casting men and women into prison and torments in their onerous demands for taxes. Their purpose in this was to be able all the more easily to persuade the Armenians to renounce and abandon the holy faith of the pure Christian religion. Many more were those martyred with heroic endurance than those who wavered, regarding as naught the seizure of their goods and possessions and cruel death. After the impious Shavasp Artsruni had reached Artashat with the marzpan, they built in Dvin a temple to Ormizd and lit therein the fire of their erring worship. So the country was in great and dangerous distress.

This bitter news reached Vardan Mamikonean the Great, who had fortified himself in Zrayl in the Taurus. Unable to endure such perilous oppression as had been inflicted on Armenia, and roaring in his soul with ferocious anger over the destruction of the holy faith and the ruin of Armenia, he hastily sent a letter of complaint to Tachat, lord of the Rshtunik, and Vakhrich, lord of the Andzavats'ik', to inform them of what had happened. Immediately, without delay, they joined the great Vardan with their forces, bringing with them the troops from the mountains, no more than twelve hundred men; and with unexpected rapidity they suddenly attacked Shavasp and the marzpan Vndoy. As they were encamped at the junction of the Araxes and Metsamawr, Shavasp Artsruni advanced against them. But on him fell the valiant Vardan, roaring like a lion or lion cub; drawing his one-edged sword with force and rapidity he sliced Shavasp in two.

But Tachat and Vakhrich, having surrounded the marzpan and his son Shiroy, captured them and brought them to Dvin. In the temple of Ormizd they had the marzpan consumed by his god in he blazing fire of the pyraeum; above the pyraeum they hung Shiroy on a gibbet. The garrison they drowned in the river or put to the sword, while the fugitives they pursued beyond the city of Nakhchavan; then they returned victoriously. They demolished the temple and, razing the site to the ground, built with the same stones the great church of Saint Gregory at the place Blur.

There they transferred the Catholicos of Armenia, Giut. The Armenian nobles each built royal palaces for themselves and splendid estates; the city they defended with an encircling wall, and they brought peace to the land. The royal residence of Trdat the Great they entrusted to Vahan Artsruni, for him to build a mansion fit for kings—acts in reparation, since they planned to make him king over Armenia as he was a spirited and powerful man, shrewd and wise, humble, liberal, and quick-witted. But after the Armenian nobles became disunited, they abandoned their plans for making Vahan king and went over to Vardan the Great. Following the nobles, Vahan too went at the very beginning to Vardan, who gave him the supervision of Armenia. And they obeyed him all the days of Vardan.

But the Persian king went away to wage war against the Kushans [in the East at the Pamir Mountains] at the Chor Pass, so the land of Armenia was free from Persian raids. The king was killed there by the Kushans, and Yazkert ruled in his stead. He began to assail the nobles of Greater Armenia defiantly, as the records of previous historians indicate: the ravaging of Armenia, the multiplication of oppression, the numberless multitude of martyrs who died heroically for Christ, the brave valour of the holy priests, the good fight they fought there in the great desert of Apar, and all the rest. I consider it superfluous to repeat what has already been described.

When the great battle took place between Saint Vardan and Mshkan and the Persian army on the plain of Avarayr in the province of Artaz, emboldened by God the Armenian troops, like holy and divine warriors, were martyred in Christ. There Vahan Artsruni, with splendid and outstanding bravery, fought side by side with Saint Vardan, pressing into the midst of the valiant Persians like a fire through reeds.

When the two sides had joined battle and the left wing of the Armenians began to be overcome, Saint Vardan, spurring his horse, turned the Persian champions to flight and strengthened the troops of his own division. Then Vahan Artsruni intervened: he turned the Persian force opposing Vardan. Rapidly a large number of Persian soldiers were struck down one by one, about 140 men. Raising his eyes, Saint Vardan saw the impious Vasak, lord of Siunik'. Rushing after him they attacked the strongly armed batallion standing among the elephants. The valiant Vahan Artsruni supported Vardan, and together they died-the valiant and elect noble warriors Vardan and Vahan. Gaining the name of martyrs, 696 men of the holy Armenian army were perfected in Christ [Elishe and Lazar number 1,036 Armenians who died at Avarayr.]. And this is narrated in the abbreviated account of Abraham the Confessor. But why the story of Vahan's martyrdom is not related in the book of the historian shall

indicate to your erudite intelligence accurately and without hesitation.

ARTSRUNI HISTORY CHAPTER 2

[An Historical Report Concerning The Murderous Bartsuma (Bar Sauma). Vardanyan Indicates That The Fragments Preserved In Matenadaran 1890 And 2559 Have A Shorter Title To This Chapter: "Concerning The Murderous Barsauma" (refering to Babowai's death). Barsauma (Bar Sauma, Syriac Aramaic), nicknamed Bar Sula, "son of the shoe" in Syriac, was Metropolitan of Nisibis in the 5th century, and a major figure in the history of the Church of the East. Under his leadership the church moved away from Roman loyalties and became increasingly aligned with the Nestorian movement. Barsauma was excommunicated with Ibas and other churchmen for their support of Nestorian teachings, which had been declared heretical at the First Council of Ephesus in 431. Barsauma and other of Ibas' followers relocated to Sassanid Persia, where the persecuted local church had declared itself independent of the Church of Antioch. Barsauma became metropolitan of Nisibis, one of the five great archdioceses of the Church of the East. He quickly became a favourite of King Peroz I (Persian King [emperor] of the Sassanid Dynasty from 459 to 484. A son of Yazdegerd II.), who preferred his compliant stance to that of Babowai, Catholicos of Seleucia-Ctesiphon and head of the Persian Church, whom he regarded as a pro-Roman traitor. Over time Barsauma and Babowai's relationship grew openly antagonistic and came into conflict over the issue of the marriage of bishops, which provoked outrage in the Church of the East. Barsauma was instrumental in Babowai's downfall, ultimately leading to the latter's execution by Peroz in 484 AD. Following Babowai's death, although he was never elevated to the position of Catholicos, or Patriarch, Barsauma became the most powerful figure in the Persian Church.).]

In the time of Peroz, king of kings, there was a certain Bartsuma of the sect of Nestorius who had the title of bishop and most forcefully pursued the Nestorian heresy. Slandering the Armenian nobles to Peroz, he worked many bloody crimes.

At that time the chair of Saint Gregory was proudly and splendidly held by Lord Christopher, Catholicos of Armenia. He wrote to the regions of Asorestan warning them not to associate with the Nestorians, and wrote in similar terms also to the congregation of the orthodox in Khuzhastan. Furthermore he wrote to the district of Derjan, and the inhabitants, sovereign lords, and bishops of the valley of Khaltik Bartsuma seized these letters by deceitful means and had them taken to King Peroz, saying: "All that the Catholicos of Armenia writes proposes revolt against you and encourages the Armenian princes to submit to the Greek emperor. So you must look to this matter." Vindicating himself, Bartsuma came to Arznarziwn and the land of Mokk in order to sow there the seeds of the Nestorian heresy. Our holy teacher Elishe at that time was dwelling in the land of Mokk'; Bartsuma came to him asking for the book of Armenian history which he had written on the command of Saint Vardan, and he fulfilled his request. Then the great prince of the Artsrunik, Mershapuh, who was at that time fortified in the castle of Tmorik', hearing about Bartsuma sent word that he was to leave the territory. He did not lay hands on him because of the Persian king, but merely sent messages with a warning threat. Angered at the ultimatum, Bartsuma took vengeance in his resentful rage. He expunged from the history book all details concerning the deeds of the house of the Artsrunik and everything describing the martyrdom of Vahan Artsruni

Now the teacher Elishe was at that time dwelling in the province of Rshtunik by the shore of the lake; at that spot the holy man of God Elishe fell asleep in Christ. So when the book was returned to the land of Mokk, no one paid any heed to the matter, assuming that the teacher had composed it in that fashion. Elsewhere I shall indicate what action the Persian king took against the house of the Artsrunik at the instigation of the impious Bartsuma.

The emperor Marcian* ruled the Greeks (Romans) after Theodosius II; he summoned the council of 636 bishops at Chalcedon, and in his reign Saint Vardan and Vahan Artsruni were martyred. [Marcian, Flavius Marcianus that is; Greek: Flavios Markianos; c. 392-457 AD) was Roman emperor of the East from 450 to 457 AD. The Armenian king Vardan II Mamikonian, who was leading a revolt against the Sassanian Empire, sent an embassy to Theodosius in 450 AD, composed of his brother Hmayeak Mamikonian, along with Atom Gnuni, Vardan Amatuni, and Meruzhan Artsruni, to ask for assistance. Theodosius received it favourably. Any plans were cut short by his death and the accession of Marcian. Marcian was counseled by the diplomat Anatolius and patricius Florentius not to make war with the Sassanians as it would engulf a large amount of the Eastern Roman military resources (which were weakened already due the conflict with Atilla's Huns), and thus Marcian could not agree to help them. Marcian convened the Council of Chalcedon in 451 AD,

which declared that Jesus had two "natures": divine and human.]

Now, Vasak Artsruni, father of the saintly Alan, taking Tachat and his brother Goter went to the emperor to avoid the troubles of the Persian disturbances and the ruin of the country. The emperor Marcian received them in a friendly and peaceful fashion and promoted them to rank and honour with splendid dignities, since like brave champions for Christ's churches and the holy orthodox faith they had heroically shed their blood and gained in addition the renown of confessors. But the emperor begged these honourable men Vasak [But above, Thomas describes Vasak's deceitful character.], Tachat, and Goter, who were of the great nobility of the Artsruni house, to accept that council with the other three holy councils. [I.e. the ecumenical councils of Nicaea (325 AD at which the Armenian prelate Aristakes had been present), Constantinople (381 AD), and Ephesus (431 AD). No Armenian representatives had attended the second or third council, nor were any present at Chalcedon in 451 AD.] They replied: "Since we were continuously preoccupied with Persian raids we had to abandon the study of the Holy Scriptures with a view to choosing an authoritative confession of faith. But while we were in our own country, our prelates did not allow us to accept those formulations in the definition of faith. Now we cannot agree zealously to flatter and please your majesty as your imperial dignity demands. But please let us write to Armenia, to ask the Armenian prelates and to receive replies."

This reproof they also submitted to the emperor: "When you convoked the council, why did you not think it necessary to summon anyone from Armenia with a view to the unity of faith?"

Marcian responded: "Because the Armenian prelates were en dangered by the Persian troubles." Then our Artsruni mag nates received permission to write to Abraham, bishop of the Mamikonean, who was a disciple of Saint Sahak, and they in formed him of the emperor's request. In response he told them not to yield to the emperor's demand, and if any danger befell them to endure it just as they had endured past dangers. [The only attested Abraham (of Taron), bishop of the Mamikonean, lived in the sixth century; see Sargisean, "Abraham Mamikonean."] They took the letter and laid it before the emperor. Then he, realising that their minds were firm and inflexible, did not trouble them but left them to their own wishes, to live as might please them. Staying there until the time of the emperor Leo I, Vasak and Tachat died there and were splendidly laid to rest in the cemetery of the Greek magnates.

But the blessed Alan Artsruni, son of Vasak, returned to Armenia from the land of the Greeks. Having lived in the same religious austerity and angelic virtue, he left this world for the ranks of the saints. His bones were laid to rest with those of the other saints in the monastery of Hadamakert.

The dangerous affliction of Armenia continued, as many his torians show, until the time of Jamasp and Kavat, until King Khosrov. And the Armenian nobles endured grievous oppression from arms and battles.

But in the days of Valarsh, the young Vahan Mamikonean forcefully opposed the Persians. The Armenian nobles gathered around him and made a covenant and divine pact, through the mediation of the holy gospel, to demonstrate obedient service with true and sincere loyalty, and to revenge even with blood and violent martyrdom the Persian raids, the destruction of the churches of Armenia, the oppression and ravaging and cruel bloodshedding endured by the Christians and the monasteries of the holy church.

It happened in those times that Hazaravukht the Persian general attacked Armenia with a massive army, to give battle to the Armenian forces, to ruin, take captive, and ravage the country. This just when the church of Christ, following the great war of Saint Vardan, was reviving again from the destructive invasion. Scattering raiders in every direction, Hazaravukht himself took the elite of the cavalry and the strongest warriors from among the armed Persian host, and marched through the regions of Hashteank' and Tsop to attack Vahan.

The valiant Vahan was warned that Hazaravukht with a large number of elite Persian troops was bearing down on him. Trust ing in God, Vahan immediately hastened to encourage the Armenian nobles, saying: "Up, valiant comrades, arm yourselves and your mounts; fight valiantly, do not fear the multitude of their forces. God it is who crushes warriors; battle is the Lord's. The Lord weakens opponents; the Lord is our hope."

Straightway they armed themselves and made preparations; mounting each his own horse they went out to oppose them. But when they saw the multitude of the Persian army the Armenian force was disheartened. They abandoned each other and retreated until there remained only thirty men with the brave Vahan: Mershapuh and Yashkur Artsruni, Nerseh Kamsarakan, and some of the house of the Amatuni of whose names I am ignorant. Banding together, these three tens in number called on the Holy Trinity to their support, giving up the help of men. Forming a solid mass like a hill of bronze, as one man and repeating together as if from one mouth: "All nations surrounded me, but through the name of the Lord I defeated them," in unison they fell on the Persian army. The latter thought it all a joke. Now the Armenians encountered the Persians at the village called Eriz. And as dust is whirled around by a tempest or fire runs through reeds, so the Armenians struck with the sword and routed most of them; the fleeing survivors they pursued beyond the borders of Armenia. Victoriously returning they offered sacrifices to God and filled the needs of the impoverished widows and orphans. The mouths of all, filled with joy, gave glory to God. [This encounter was not the climax of the struggle between Vahan Mamikonean and the Persians. But Thomas now jumps a century, from the 480s to the reign of Maurice (582-602 AD).]

ARTSRUNI HISTORY CHAPTER 3

[How The Evil Persian Kingdom Of The Sasanian Dynasty Came To An End]

In the eighth year of the Greek emperor Maurice, the Persian king Ormizd of the house of Sasan was murdered by his own trusted nobles, and his son Khosrov, still very young in age, succeeded to the throne. A certain Vahram Mehrevandak, who was a prince of the eastern regions, a man of great strength, valiantly smote the forces of the T'etalians and by force took control of Balkh and all the land of the Kushans even beyond the great river called Vahrot; he also seized for himself the kingdom of Persia. Ormizd's son Khosrov fled to the Greek (Roman) emperor Maurice; his uncles Vndoy and Vstam took him and fled to the imperial court. They sent to the emperor Maurice noble men with splendid gifts and presents and a letter written at Khosrov's dictation as follows: "Great king, prince of sea and land, give me an army in support and establish me on the throne of my fathers. For if I am able to defeat my enemy and reinstate my kingdom, I shall be a subject son to you and shall give you the regions of Syria and all Arevastan as far as the city of Nisibis; and also part of Armenia, the area of Tanuterakan authority as far as Ayrarat including the city of Dvin and the shore of the lake of Bznunik' and up to the district of Arest: and the greater part of the land of Georgia as far as the city of Tiflis. And we shall keep a peace treaty between us and our sons who succeed us as kings.

Coming to terms with him, the emperor Maurice sent him his nephew Philipikos; he had him take a letter of welcome, and received from him an oath. Then he gave him an imperial army in support, including John the Patrician from the Armenian sector, Nerses the stratelat from Syria, Mushel a valiant warrior and man of great strength, and all the troops of Greece, Armenia, Georgia, and Albania. This numberless force came to the regions of Atrpatakan in the province of Vararat.

Then Vahram wrote to Mushel and the other generals in this fashion: "I was of the opinion that when I fought against your enemies you would help me from your side, and acting in unison we would exterminate that universal scourge, the house of Sasan. But now you are coming to wage war against me! However, I shall not fear the assembled Roman priests who have gathered to attack me.

"But as for you Armenians, you have shown your loyalty to be untimely. Did not the house of Sasan destroy your land and principality, yet you come to oppose me? But now let it please you to abandon these Romans and unite with me. For if I am victorious, I swear by the great god Ormizd and the sun and the moon and fire and water and Mithra and all the gods that you will be given the kingdom of Armenia. And whomever you wish you will make your king. And you will control in Syrian territory Asorestan and Nisibis and Nushirakan as far as the borders of the Tachiks. And I shall not have the authority to cross the Zarasp.

And I shall deliver so much treasure of the Aryan kingdom that it will be too much for you to count, and a multitude of troops—as many as you may need until your kingdom is reestablished." So he swore according to the fashion of their religion, and he had salt wrapped in the declaration and taken to them. But having received and read it, they did not respond to his proposals.

Then he wrote a second letter, saying: "I wrote to you to abandon that side. So if you do not wish to pay heed I am sorry for you. For tomorrow morning you will see armed elephants and on them strong fully armed warriors who will rain down on you iron arrows and steel javelins with tempered shafts. They are mighty archers and their blows will be as many as Khosrov and you may need."

Mushet wrote a reply in the following terms: "Having heard your proposal, I say that royalty comes from God and he gives it to whomever he wishes. But you should be sorry for yourself more than us. For I see that you are a boasful man since you rely on yourself and not on God, on the multitude of your forces and the strength of elephants. But I tell you: if the Lord wishes he will tomorrow envelop you in battle with brave warriors; they will crash down on you like the clouds of heaven. With their mighty lances they will pass through your host like flashes of lightning. For if God wills, the violent wind will blow away your power like dust."

wind will blow away your power like dust." Vndoy, Vstam, and the Persian troops there amounted to about eight thousand cavalry, apart from the Greek and Armenian troops. The next morning, while the sun was still rising, a fierce battle was joined, line facing line in a violent melee and terrible clash. They fought each other valiantly from dawn to evening until both sides were wearied in the great battle. So ferocious was the slaughter that great streams of blood poured out, irrigating the entire ground. Unable to resist, Vahram's army fled before the Greek troops, who pursued them until night was dark, covering the ground with corpses. Many they captured and brought before Khosrov. On that day Khosrov's victory was ensured, while Vahram fled to Bahl Shahastan and was later killed at Khosrov's command.

So Khosrov was established on his royal throne, and he carried out his promises to the emperor. He gave over to him all Arevastan as far as Nisibis; Armenia as far as the river Hrazdan; the province of Kotayk' as far as the town of Garni, as far as the lake of Bznunik' and up to the region of Arest; and the province of Kogovit as far as Hats'iwn and Maku. And a great treaty of friendship was made between the two kings of the Persians and the Greeks (Romans).

It happened in the fourteenth year of King Khosrov and the twentieth year of the rule of Maurice that the Greek troops stationed in Thrace rebelled against the emperor and proclaimed as their king a certain man named Phocas. Marching in unison on Constantinople, they killed the emperor Maurice and installed Phocas on the royal throne.

When King Khosrov heard news of this he was stirred to great anger [and decided] to avenge Maurice's blood. Gathering the host of his army, he wrought enormous and terrible damage in the Greek sector. After eight years Phocas was killed by Heraclius, who plotted against him and seized his throne. [See Sebeos, pp. 112-113. Phocas was killed in 610, eight years after Maurice: but Sebeos places the accession of Heraclius in the twenty-second year of Khosrov, i.e. in 612.] He sent messengers with lavish treasures and letters to King Khosrov to request peace from him in a most solicitous manner, saying: "I have taken vengeance for the blood of Maurice from his enemy, so may it please you to make peace with me and remove your sword from my land." But Khosrov did not wish to heed him, saying: "That is my kingdom, and I shall install as emperor Maurice's son. Heraclius came and ruled without our permission; he offers us as a present our own treasures, unaware that I shall seek reckoning for this treasure and shall not desist until I seize him." Taking the treasures, he ordered the present bearers to be put to death. He did not respond to Heraclius's proposals but caused terrible damage in many regions, inflicting ravage, captivity, and the sword.

The Persian army in Palestine and its general named Razmayuzan, also called Khoream, discussed peace with Jerusalem. For its inhabitants had previously been subject to the Greek (Roman) Empire, and having killed the Persian governor who was over them, were preparing themselves for war against the Persians. Then Khoream Razmayuzan gathered his troops, camped around Jerusalem and besieged it. For nineteen days he attacked Jerusalem, then destroyed the wall by digging under its foundation. It was on the nineteenth day of the siege in the month of Margats', the twenty-eighth day of the month, in the twenty-fifth year of the reign of Khosrov called Parviz, ten days after Easter, that they captured the city. For three days they put it to the sword, killing every person in the city. They stayed inside the city for twenty-one days; then they went out and camped outside the city-which they set on fire. They ordered a count to be made of the fallen corpses: the number of the dead was found to be fifty-seven thousand people. They also captured the patriarch Zak'aria. Seeking the divine holy cross, they began to torture people; not until they had executed many of the clerics did they show them the place where it had been hidden. They took it off into captivity and also brought an immense amount of gold and silver to the king's court. As for the survivors in the city and its environs, a command was issued from the court to have mercy on them, to restore the city and re-establish everyone in his own position. The royal command was carried out immediately; they appointed a certain Modestos as archpriest over the city. Then Khoream gathered many troops, marched to Chalcedon, and encamped opposite Constantinople, intending to cross over and destroy the royal capital.

When the emperor Heraclius saw all the misfortunes that had befallen him, he unwillingly decided to offer friendship. Going out to meet them, to honour them as meritorious guests, he received them with splendid presents, gave the general and all the nobles grand gifts, distributed donations of money to all the troops, and for seven days organised banquets and joyous feasts for the whole army. Then boarding a ship, he went to the middle of the sea to converse with the Persian general: "What do you intend to do," he said, "and why have you come to this place? Surely you did not reckon the sea as dry land, to fight with us thereon? God is able, if he should wish, to turn this sea into dry land before us. But beware lest perchance God should not be pleased and seek from you vengeance for the blood of the destruction of this land. For God did not bring this about because of your piety or benevolence or holiness, but because of our impiety against the Lord. Our sins have wrought this and not your valour. But what would your king seek from me by not making peace? Does he wish to destroy this empire? Let him not try, because it has been established by God and it is impossible to destroy it. But if it so pleases God, God's will be done.

And if he says: I shall install another king, let him make king whom he wishes; let him send him and we shall receive him. Behold, here is the seat of empire. And if he seeks vengeance for the blood of Maurice, God already has sought vengeance for Maurice's blood from Phocas through my father Heraclius.

And if he seeks land, here is the land before you. Whether we so wish or not, God has taken it from us and delivered it into your hands. If he seeks cities, here are great walled cities. If other treasures, let him say and I shall give as many as his hand may grasp. Yet he did not wish to listen 2 but was still thirsting for blood. How long will he remain unsated with blood? Were not the Romans able to kill him and destroy the Persian king dom at the time when God gave him into our hands? Yet they were merciful to him. So I shall say the same kind words and seek from him a treaty and firendship. And from you I shall seek three things, so hear me: spare the land sword and fire and captivity, and you will gain profit from these three. For you will not be overcome by famine, nor will royal taxes destroy you.

Behold, I shall send to your king gifts and messengers with letters to seek from him peace for the land and a treaty with me." They accepted his requests and agreed to act according to his desires until they should see what response might come from their king and what he might command the army to do. Then the army left and wintered in Syria.

Now when the Persian king received the gifts brought from the emperor, he did not let the ambassadors depart nor did he respond to the messages, but commanded the army to prepare ships and cross over to Constantinople. Then there took place a violent naval battle at sea. On that day four thousand armed cavalry of the Persian army perished with their ships. On seeing such a loss, they had no more enthusiasm for that undertaking, but spread out and occupied the whole land.

But King Khosrov continued to be aroused in his heart; for the Lord hardened his heart since he was about to destroy his kingdom. He wrote an insulting letter to the emperor, which ran like this: "Honoured by the gods and all kings, lord of earth and sea, offspring of the great Aramazd, King Khosrov to the senseless Heraclius and to our abject slave. You did not wish of your own accord to put yourself in subjection to us, but call yourself lord and king. You spend the royal treasure which I sent to you, unaware that soon you will have to give account.

You deceive my servants, and gathering an army of brigands you do not allow me any rest but continually wage war on me and say: I have confidence in my God. But where is that God whom you invoke? Why did he not save Caesarea and Antioch and Tarsus and Amasya and Jerusalem and Alexandria and the Thebaid, and the other lands? Do you not now realise

that I have subjected to myself the whole earth, sea, and dry land? So shall I be unable to take only Constantinople? But I forgive you all your sins and the harm you have done. Arise, take your wife and children and come here, and I shall give you farms, vineyards, olive groves, and seeds for you to sow and harvest; and we shall look benignly upon you. Otherwise, do not deceive yourself with vain hope. For that Christ who could not save himself from the Jews—but they captured him and killed him on the cross—so how will he be able to save you from my hands? For i fyou descend to the depths of the sea, I shall cast out my nets and seize you. So you will see me in a way you will not wish."

When Heraclius received the letter he ordered it to be read before the patriarch and all the magnates. Then they entered the house of God and spread the letter before the holy altar. They fell on their faces to the ground before the Lord weeping bit terly, that the Lord might take cognisance of the insults which the enemy had inflicted on him.

Heraclius and all the senators decided to set on the royal throne Heraclius's son who was a young child, while Heraclius himself would sail to Chalcedon and prepare to march to the East. The army of the Persian king that was in the land remained ignorant of this. Heraclius gathered all the troops of the East, about 120,000, and attacked Khosrov. Making his way along the northern route he made straight for the city of Karin and passed on to Shirak. Reaching Dvin he sacked it, and also Nakhchavan and Ormi. Attacking Gandzak in Attpatakan, he destroyed it; he plundered Hamadan and May, overthrew the great fire altar called Vshnasp, and filled the lake opposite the pyraeum with corpses. Humans and animals, men, women, and children, they indiscriminately put to the sword. In terror King Khosrov prepared for flight, since Heraclius's victory was assured, and everywhere he came across the Persian army he would slaughter absolutely everyone, leaving no survivors.

This the ancient historian had previously realised, clearly fore telling their destruction. What he said runs like this: Woe to you, alas for you, land of Persia. When the massed forces of the Greeks assail you, they will penetrate and strike you with the sword and trample you with their hooves. Woe to you, alas for you, valiant man, renowned king, when the Most High will tretch out his hand to destroy you and break the rod of your haughtiness. Then the sun will strip you of its light and clothe you in darkness. Then heaven with terrible thundering will cast its lightning upon you; a rumbling echo and shaking will be heard from the depths; the thundering sound of the hooves of numerous hosts of horses and the tumult of many armed warriors will assail you. Then with shame-filled eyes you will see the gloriously shining standards of raised flags. Then impenetrable darkness will fall; fog and misty gloom will cover your mountains and plains. Then the sword will consume your warriors.

Many woodcutters will come and cut down your great forests and newly planted tall trees. Then fire will come forth from you and consume you and the multitude of your sons and daughters, intending its flames for vengeance. For whereby you became high and mighty, thereby you will be humbled and fall. The magnificence of your palaces will be destroyed and ruined, demeaned everywhere. What you begat and cherished, you your self will summon to death." All this was brought upon the Persians by the Greek sword.

But Khosrov decided to rally his troops and those of the royal court called hamharz and p'ushtipan; all the elite of the royal house gathered strength again to wage war against Heraclius. He opposed them with a mighty force. And there was fog and thick darkness over the face of the whole land. The Persian army did not realise that Heraclius was bearing down upon them until he arrived and the two sides joined together in the clash of battle. The Lord so multiplied his mercy towards Heraclius on that day that all were delivered into his hands. They were slaughtered by the sword unmercifully; their general was also killed in the battle. Surrounding the few survivors, the Greeks wished to slaughter them all, but they raised a piteous cry for mercy to Heraclius: "Pious and benevolent lord, have mercy on us, although we are not worthy of mercy." Then Heraclius ordered them to be spared. So there were left about four thou sand men, wounded, barefoot, unarmed, and on foot. In the morning Heraclius ordered raids to be spread over all the land and that the whole country should be put to the sword.

King Khosrov fled. Crossing the Tigris at Vehkavat [14 km. north of Ctesiphon.] he or dered the rope of the bridge to be cut. When Heraclius came up he encamped at the gate of the city of Ctesiphon. He destroyed and ravaged all the palaces of the king, burned them with fire, and seized the many stored treasures, an incalculable booty of gold, silver, and clothing, very many animals, and a multitude of prisoners as numberless as the sand of the sea. Now the wives, concubines, and all the children of the king and the royal horses were there in Vehkavat. Then Khosrov began to gather the surviving nobles and troops of his army who had escaped from the battle. He upbraided them with severe and terrible criticism and threats: "Why did you too not die in the battle rather than run away to me in flight, giving encouragement to my slave and causing so much harm? Did you indeed think that Khosrov was dead?" Then they all took counsel together and said: "Although we escaped from the enemy, yet we cannot elude his grasp. So come, let us think of some plan.'

Then, taking oaths together, at night they crossed the ford at Vehkavat and captured all the king's wives, concubines, and children, and the royal horses on which King Khosrov had come to Ctesiphon. They seized them secretly at night without King Khosrov knowing anything about it. Then they made his son Kavat king, and he marched against King Khosrov. Someone ran to give the sad news at once to Khosrov: "All the land of the Aryans has revolted against you, and they have made your son Kavat king. Behold, he is coming to attack you." Dismayed, fearful, and greatly terrified. Khosrov sought for himself a place of refuge. He cried out, saying: "A horse, a horse." But on entering the stable they came across no horse. Then King Khosrov disguised himself. Entering the royal garden, he went into the dense groves and stayed hidden under a thick flower bush-a myrtle. King Kavat ordered a search to be made. Entering the garden, they found him hidden in the bush, seized him, and brought him to the hall. King Kavat ordered him to be cast into one of the kiosks of the royal palace. Some nobles would come to him, condemn, insult, and debase him, and leave. This went on for some days. Then King Kavat also found fault with him and decreed a sentence of death on him. He ordered some men to enter and kill him. They came in, hacked at him with axes and killed him in the room. Kayat also ordered his own brothers to be killed; in one hour forty men were put to death, all of whom had reached maturity.

So King Kavat was confirmed on the throne of the kingdom and made general peace both with the emperor and over the whole land of his dominion. To the emperor he gave every thing he wanted. And while King Kavat was planning the restoration and peace of his country, the end of his life overtook him and he died, having reigned for six months. [Kawat reigned from February to September 628 AD.]

After his death they made king his own son Artashir, who was a very young boy. Then Heraclius wrote to Khoream, saying: "Your king Kavat has died and his son is a young boy. So now the kingdom has devolved on you and I shall agreed and gave over Heraclius, emperor of the Greeks, Jerusalem, Caesarea in Palestine, all the regions of Antioch, of yours and I shall come to Asorestan; let us make a sworn pact between the two of us to rule in peace." Khoream agreed and gave over to Heraclius, emperor of the Greeks, Jerusalem, Caesarea in Palestine, all the regions of Antioch, and all the cities of those provinces, and Tarsus in Cilicia, and the greater part of Armenia, and every thing that Heraclius had ever desired. So he greatly rejoiced.

Then Heraclius granted him the kingdom and promised as many troops as might be necessary. He also made requests of him: "First," he said, "I most earnestly entreat you to return the holv cross that received God which you took captive from Jerusalem." Then Khoream swore to him: "Please send trustworthy men, and when I reach the royal court I shall that very hour seek the cross; when I find it I shall have it brought to you." He gave him surety in writing, sealing an oath with salt according to their custom. And he requested from him a small force of distinguished men in whom he himself trusted. When Khoream had received the troops and had entered the capital, he commanded some others to kill the young Artashir. Then Heraclius sent the trustworthy men to Khoream for the holy cross that received God. He searched for it with great diligence until they were able to find it in its original wrapping, and he gave it to the men who had come for that purpose. On receiving it they immediately departed. Heraclius gave the bearers many gifts and dismissed them with great honours. Then Heraclius gathered all his troops, and with eager and joyful heart went out to meet the holy cross with the host of his army to honour the wondrous and heavenly treasure, and brought it to the holy city of Jerusalem. Then on that day there was no little sound of weeping; from the excited fervour of their hearts, and their affected emotions, the emperor, princes, all the troops, and the inhabitants of the city shed copious tears. No one was able to sing or hear the blessing of the psalms from the piteous tears of the crowd and their overflowing joy. Heraclius set the holy cross back in its place on holy Golgotha. Distributing to all the churches and the poor of the city blessing and money for incense, he himself went to Syrian Mesopotamia to occupy and secure for himself the cities and all the borders which had been established in the time of Khosrov and Maurice. And the holy cross of the Lord remained in the divine city until the recapture of Jerusalem by the sons of Ismael.

So Khoream received the kingdom. One day he was robed in royal garments, riding on a royal horse, and circulating among all his troops to show himself and encourage the army, when suddenly from behind some men fell upon him, struck him down and killed him.

Then they put on the throne Bor, Khosrov's daughter, who was his wife, called Bambishn queen. They appointed as vizier at court Khorokh Ormizd, who was killed by the queen called Bor. Then Bor ruled for two years and died. After her they introduced a certain Khosroy, a young boy, and made him their king. He soon died. Then some of them made king Azarmik, a daughter of Khosroy; while the army of Khoream made king a certain Ormizd in the city of Nisibis. From then on the Persian kingdom was weakened and split. After all this Yazkert reigned [632 to 651 AD.] in Ctesiphon; he held the throne in fear, more concerned with self-preservation than issuing commands. With him the Persian kingdom came to an end, as we shall describe a little later. Here the prophecy of Daniel is relevant, his vision of the grotesque statue of various materials standing on feet of clay and iron.

ARTSRUNI HISTORY CHAPTER 4

[How The Evil Kingdom Of The Persians Came To An End And Was Succeeded By The Even More Evil Kingdom (Caliphate) Of The Ismaelites (Arabs, Mohammedans)]

In the time of the Roman emperor Flavius Heraclius the Persian kingdom reached its end. And at that time there came and gathered in the city of Edessa twelve thousand men from all the tribes of Israel, for they had seen that the Persian army had left and abandoned the city. They entered, closed the gates, fortified themselves therein, and began to rebel against Roman rule.

But the emperor Flavius Heraclius commanded them to be besieged. The king's brother Theodore and the host of the army wished to slaughter them, but the king commanded them to leave his territory. They took the desert road and went to Arabia to the sons of Ismael, to the city called Madiam, which Israel had destroyed on leaving Egypt in its war with Balak, king of Moab. And because the Persian power had become very weak, they fearlessly restored the City of Madiam* and dwelt in it. [* To the city . . . in it: not in Sebeos. Thomas identifies the biblical Madiam (Greek for Midian, as in Numbers 31) with Medina of Mohammed's Hegira; see below. Midian (Aramaic Hebrew: Mideyan; Arabic: Madyan; Greek: Madiam) is a geographical place mentioned in the Torah and Quran. The Biblical tribe of the Midianites lived in a region on the east shore of the Gulf of Aqaba on the Red Sea". Midian was in the "northwest Arabian Peninsula, and the name Madiam or Midian clearly suggests that Mada'ın Salih in the North of Saudi Arabia is meant, a city carved in rock like the City of Petra in the Arabah Valley. "Mada'ın" just like "Madinah" or "Medina" is Arabic for "city".]

They sent messengers to the sons of Ismael [the Arabs], indicating their close relationship: "We are the sons of Abraham—we and you, brothers. You must come to our help, and we shall take the land of our inheritance." But although the latter were persuaded, yet there was great opposition between them, because they were divided by the worship of idols according to each one's desire.

At that time there were some despotic brothers in the regions of Arabia Petraea in the place called Paran*, which is now called Maka* (Mecca)—warlike chieftains, worshippers of the temple of the image of the Ammonite temple called Samam and K'abar [Zamzam and the Kaaba.].

[* The Desert of Paran or Wilderness of Paran (also sometimes spelt Pharan or Faran; Aramaic Hebrew: Midbar Paran), is a location mentioned in the Hebrew Bible Genesis 21:19-22; Numbers 10:12; and Deuteronomy 1:1: "These be the words which Moses spake unto all Israel on this side Jordan in the wilderness, in the plain over against the Red sea. between Paran, and Tophel, and Laban, and Hazeroth, and Dizahab." That is, in the Arabah (Aramaic Hebrew: HaAravah, lit. "desolate and dry area", a place name from which the Arabs got their name.), opposite Suph. It is one of the places where the Israelites spent part of their 40 years of wandering after the Exodus, and was also a home to Ishmael. and a place of refuge for David. The extraordinary thing in this passage is the name "Maka" which clearly refers to "Mecca" or "Makka" the alleged hometown of Mohammed. The given geograhical position does not match the location of the modern City of Mecca in Hejaz, Saudi Arabia, but a place that is today known as "Petra". The Canadian archaeology investigator Dan Gibson came to the very same results in the early 2000s, while he was exploring historical buildings in the Near East where he has lived for several decades. He discovered that the giblas of the oldest existing mosques were not directed towards Mecca / Makka in Saudi Arabia and he intensified his research. Muslims appear to be certain that all early mosques faced Jerusalem because the Hadith collector Muhammad al-Bukhari (810-870 AD) from Bukhara (the capital of the Bukhara Region of what is now in Uzbekistan) told them so. He was collecting the Hadiths 200 years after the death of Mohammed. Gibson was checking the qibla directions by using a GPS Unit directly at the site of the oldest mosques. And there he found something surprising. The following mosques were neither directed towards Mecca nor to Jerusalem: 1. The Masjid al-Qiblatain Mosque in Medina 623 AD; 2. The Canton Guangzhou Mosque, China, 627 AD; 3. The Fustat near Cairo, Egypt 641 AD; 4. The Umayyad Palace, Jordan, 700 AD; 5. The Mosque of Baalbek, Lebanon, 701 AD; 6. The Amman Umayyad Citadel Praying rooms and the also the Great Mosque, Jordan, 701 AD; 7. The Grand Mosque of Sanaa, Yemen, 705 AD; 8. The Khirbet al-Minya Palace Mosque, Israel, 706 AD; 9. The Wasit ("between") Mosque (the word 'between' most likely seem to refer to the qibla direction which lies between Petra and Mecca), Iraq, 706 AD; 10. The Old Mosque south of the Al Aqsa Mosque, Jerusalem, 706 AD; 11. The Khirbat al Mafjar near Jericho, Jordan Valley, West Bank, 724 AD; 12. The Anjar Mosque, 58 km from Beirut, Lebanon, 724 AD. All these mosques faced a spot located in southern Jordan rather than Mecca: they faced the ancient City of Petra. The few surviving Islamic texts about Mecca too seem to describe Petra: it had green spots with vegetation, agriculture, city walls, colonnaded streets, temples and caves for praying in the rocks that faced the city. Modern Mecca did not have any of those things. It seem to have no archaeological past at all. Mohammed's Hashim tribe of the Qureish also came from Petra; even the modern rulers of Jordan are Hashim.]

It happened that one of them, called Abdla (Abdulla), died leaving a son of tender age called Mohammed. His uncle Abutalp (Abu Talib) took and raised him until he reached puberty. On attaining a sufficient age he dwelt with a certain wealthy man from among their kin. He served him faithfully, pastured camels, and was the steward of his house. When some time had passed, the master of the house died. His wife, seeing that Mohammed was a faithful man and very sagacious in all wordly affairs, married him and turned over to him all the supervision of the house and property. So he became a merchant by trade and skilled in commerce. He undertook distant journeys on mercantile business, to Egypt and the regions of Palestine. And while he was engaged in this business he happened to meet in the regions of Egypt a monk called Sargis Bhira*, who had been a disciple of the mania of the Arians [Bahira was a Nestorian or possibly Gnostic

Nazorean monk who, according to Islamic tradition, foretold to the adolescent Mohammed his future as a prophet. His name derives from the Syriac bhira, meaning "tested by God and approved". The Arians were the people of ancient Iran and India. Mania could suggest where that monk originally came from: the Northeast of India, the home of Mahavira and Buddha, Now, the word "mania" can mean two different things: Mania is a village in Kamsaar located in Zamania Tehsil of Ghazipur district in the Indian state of Uttar Pradesh. Mania also could come from Maniae (Maniai, pl.), Greek mysterious divinities, who had a sanctuary in the neighbourhood of Megalopolis, in Arcadia (Central Peloponnese.), and whom Pausanias (8.34. §1) considered to be the same as the Eumenides.]. Becoming acquainted with him and in the course of time becoming friendly, he taught Mohammed many things, especially concerning the old testaments and that God has by nature no Son. He tried to persuade him to follow the earlier faith of the Israelites: "For if you accept this, I predict that you will become a great general and the leader of all your race." He reminded him of God's promise to Abraham and of the rites of circumcision and sacrifices and all the other things which it is not necessary to mention here in detail. On these the Ismaelites [Arabs, Muslims.] mediate ad infinitum.

It happened one day when he was departing from him that a strange voice, an influence fearsome and demonic, fell on him and drove him out of his senses, as is now appropriate to indicate according to the following example. For they say of the woman from whom Antichrist will be born, that journeying from Egypt to the land of Palestine (Judaea) and desiring to see the column of Lot's wife, she went and lingered there to rest. And as she dozed, a strange spirit cried out from the mouth of the woman turned into stone: "You will bear a son who will conquer the world." And, indeed, a daughter of the tribe of Dan conceived from fornication. Such things also occurred in Mohammed's time. For when his travelling companions asked why he had lost his wits, he said: "Some fearsome angel's voice fell on me, and ordered me to go as a messenger to my nation, to show them God the Creator of heaven and earth, to take upon myself the title of leadership and to refute and destroy the false faith in idols." Coming to Paran he repeated these same words to his uncle called Apljehr. He said: "What is this new faith which is now being revealed by you? If you repeat it again you will be condemning your own self." Grieved, he went to his own house, for he was continuously oppressed by the demon; perhaps God allowed him to suppose that his loss of reason was caused by an angel. And many of them believed him when he said he was a messenger of God.

One day when he was depressed from his uncle's threats, Ali son of Aputalp (Abu Talib) came in and said to him: "For what reason do you sit depressed?" He said: "I preach God the Creator of heaven and earth, but they reject me with threats." Now Ali was a valiant man. He said to him: "Arise, let us go out, for there are many men with us. Perhaps there may be some good solution to this matter."

When they had gone outside Mohammed began to speak the same words publicly. There was a great outcry among them and such a dispute that many of them drew their swords. Mohammed's side was defeated; many of both sides were wounded: and Mohammed and Ali fled with about forty men. They came to the city of Madiam which we mentioned above. 1 On hearing the cause of their flight, the Jews, like zealots for God and as sons of Abraham and mutual brothers, were emboldened to unity and to proclaim that his words were true. They joined him and made a pact, gave him a wife from their nation, and made ready to support him in whatever way his wishes might dictate. So one could say that it was by a command of God that this undertaking began. The Jews joined with the Ismaelites, forming a large army. Attacking Paran*, they inflicted a great defeat on their opponents, killed Apljehr and many of the Ammonite and Moabite troops, destroyed the images of Samam on the altar, and dared say that the temple was the house of Abraham. They subjected all the inhabitants of the neighbouring regions and wiped out by the sword all resistance.

When Mohammed saw the success of this venture and the concord of the Jews, he proclaimed himself head and leader of them all. He appointed as his officers and generals Ali and Apubak'r (Abu Bakr) and Amr and Ut'man (Uthman). He sent a message to Theodore, the brother of Heraclius, that the Jews had co-operated: "God promised this land to Abraham and his seed, and it was in their possession for a long time. And if God was disgusted with their wicked deeds and gave it into your hands, let the period you have held it suffice for you. Now we are the sons of Abraham, and you know the promise made to Ismael our father. Give to us our land peacefully, otherwise we shall take it by war-and not only that land but also many others." Theodore wished to show it to the king, but Heraclius died in those same days. 5 His son Constans [Constans: Kostandin, Heraclius's son Constantine III died the same year (641). Constans II, who reigned 641-668, was the nephew of Heraclius. The names Constants, Constantine, and Constantius are often confused in Armenian and other

languages as well.] did not agree to respond as Theodore had wished, but simply ordered caution and not to wage war against them until he saw the outcome of events. But the army of Ismael (A synonym for Mohammedans refering to the legendary origin of the Arabs, meaning here: the Mohammedan army.) was vigorously straining for war. So wishing to defend the country the Romans went out against them.

Leaving their horses, they opposed them on foot. The Muslims, having been at rest, attacked them. Exhausted by the weight of their arms, the heat of the blazing sun, the density of the sand which gave no support to the feet, and their tramping on foot, and distressed in every way, the Romans fell into the hands of the enemy, who slew them with their swords. Reaching the site of their camp, the Muslims seized a great amount of booty and began fearlessly to spread over the land because they had no worries of any battle.

Then the inhabitants of Jerusalem, seeing the perilous situation with no hope of help, took the divine holy cross of the Lord with other church ornaments and brought them in flight to the imperial capital to Constans (Constantinople). And Ismael ruled over all Judaea.

Now the Arian monk whom we mentioned above, Mohammed's teacher, on seeing his success rose up and went to Mohammed to show him his kind favour, as if he had attained such things on being instructed by his teacher. But since Mohammed was proclaiming that his mission was from an angel and not from a man, he was very vexed at this and killed him secretly.

At this very time there was another hermit in the regions of Persia who had a pupil called Salman. At the hour of his death the hermit gave him these instructions: "My son, on my death do not remain in this land lest you lose your faith among the infidels. But go to the regions of Egypt to dwell in the numerous company of brethren, so that you may gain your soul." When the hermit died, Salman intended to carry out his instructions.

On his journey he happened to come to the city of Madiam; he had knowledge of the Scriptures, though not a perfect one. When Mohammed saw him, he summoned him and attached him to him, and ordered him to write a book of laws for his nation at the hand of Abut'uraba the Ismaelite; for he himself did not know writing or reading. Salman agreed to write for him and set down a composite book, some of it from accurate memory, other parts being imaginary sayings. But Mohammed himself, moved by a raving spirit, had him write perverse things, of which we shall give brief extracts.

He said that he was the Consoler whom the Lord Christ had promised to send to his disciples; he said he was equal to the Saviour, his travelling companion—in the words of Isaiah: "riding one on a donkey, and the other on a camel." All this he applied to himself. Instead of holy baptism he prescribed continual ablutions with water, and reckoned this was sufficient for purification. The heavenly gifts which the Lord has promised for the future, the ineffable and angelic renewal, he said were vast quantities of food and drink; should one wish to eat insatiably one would find them ready. And there would be continual and insatiable intercourse with women who remained virgins. It is too long to repeat all his impure sayings, for they are very many and opposed to God. And all this he affirmed and set down for his nation, calling it the Quran.

Now come and I shall tell you with what laments the ancient writer bewails them, saying: "Woe to you, alas for you, nation of Arabs, men and women of all the cities by the sea, for the impiety of your tongue and filthiness of habits, whereby opening your mouth you spoke impious things. You have come before the mighty God. Amd now with new and amazing wounds he will judge you more than the whole world for the filthiness of your tongue, which you sharpened against the mighty King. He will slay you with heavy blows. The whole world will see you smoking, and fire will never leave you for ever. Like a potter's furnace will you burn, and you will have no rest."

All these evils he accomplished, and even more laws than these he established for his nation in his multifarious wickedness. Having lived for 20 years in this fashion he died, and himself appointed Apubak'r to the leadership of the Muslims. The latter lived for 2 years and died. Then the leadership of the Muslims fell to Amr, son of Hatap, for 20 years and 6 months. He drove out the Greeks, and gathering a great army attacked the enfeebled kingdom of the Persians in the land of the Parthians and their king called Yazkert. Yazkert fled before them but was unable to escape. For they caught up with him near the borders of the Kushans and slaughtered all his troops. In his flight he came on the army of the Tetals who had come to assist him. But they killed him on Ismael's order; he had reigned for 20 years. Thenceforth the kingdom of the Persians and of the race of Sasan was ended: it had lasted for 542 years. Armenian sources give differing totals for the length of the Sasanian kingdom. Thomas follows Sebeos, p. 164 for 542, whereas Ps.-Sebeos, p. 64, gives 532. Levond, p. 7, gives 481; Asolik, 386; the Armenian Michael, 418. Later authors follow one or other of these

numbers; see the discussion in Abgaryan, Sebeos, note 609 (p. 343).]

Now the reigns of the Persian kingdom begin with Cyrus and go down to Dareh [Darius III, c. 380-330 BC], who was killed by Alexander (the Great) of Macedon, and the years of -which some historians count as 60 and others as 70 anarchy [For the 60 years of anarchy see Moses Khorenats'i, II 2. whom Thomas follows, p. 43 above. The figure 70 could be derived from Eusebius's Canon, which indicates that the Parthians under Arshak rebelled against the Macedonians in the year 1176 of Abraham, 74 years after the death of Alexander. Ps.-Sebeos, p. 52, gives 61 years, reckoning from the reign of Seleucus Nicanor; see Canon, year 1705 of Abraham.]

That was followed by the reigns of the Pahlavik kings, called Parthians, down to Artevan, son of Valarsh, who was killed by Artashir, son of Sasan, from Stahr. He took over the kingdom of the Parthians, and [his line] lasted down to the time of Yazkert, the last king of the Persians, who was killed by the Muslims. And the years of these reigns, from Cyrus down to the rule of the Muslims, add up to 1,160 years. [According to the Canon, Cyrus's rule began in the year 1457 of Abraham, 558 years before Christ. If to 1160 we add the 60 years of anarchy (when there was no Persian kingdom), 1220 years after 558 BC brings us to a.d. 662, the end of the first year of the caliphate of Muawiya (Mawi).]

• Mawi, 20 years and 3 months and a few days. There was a fierce war between Ali, son of Aputalp, and Mawi for 5 years and 3 months. For Ali claimed that the leadership of the Muslims was rightly his. [Thomas omits the caliphate of 'Uthman, 646-656. Ali was caliph 656-661 AD; Muawiya, 661-680 AD.]

· Yezid, son of Mawi, for 3 years and 3 months. [Yezid I, 680-683; two years and five months in Levond, p. 14.

• Abdlmelik', son of Mruan, 21 years. And there was a great opposition and war between him and Abdula, son of Zubayr, for 2 years and 3 months. In those same days there was severe affliction for Armenia from his malicious will. [Thomas omits Muawiya II and Marwan I. 'Abd al-Malik was caliph 685-705 AD; cf. Levond, p. 15, for the war.]

 Vild, son of Abdlmelik', for 10 years, ILe, Walid I, 705-715 AD.] He planned even more evil. By a deceitful trick he trapped the princes of Armenia and burned them all in the city of Nakhchavan and in the town of Khram which is below the monastery of Astapat on the bank of the Araxes. [A reference to the burning of the Armenian nobles in the church at Nakhchavan. This is dated to 704/705 AD by Asolik and Vardan, see Muvldermans, Domination, p. 98, Levond, p. 33, describes the episode in some detail: he says it took place in Walid's first year.]

Suliman ("Solomon"), son of Abdlmelik', for 3 years. [Sulaiman, 715-717 AD; 2 years and 8 months in Levond, p. 40.]

· Umar*. son of Abdlaziz, for 3 years. He was the most noble of them all. He wrote a letter on the faith to Leo. emperor of the Greeks; and receiving a response from him expunged many of the most fabulous things from their Quran, for he recognised the true power of Leo's argument. Although he did not dare to remove them all, yet being very confounded and ashamed he abandoned the falsehood that was refuted by the emperor's letter, and thereby showed great benevolence to the Christian peoples. Everywhere he showed himself obliging: he returned prisoners, forgave everyone their crimes, gave free pardon. And to his own race he demon strated more friendliness than all his predecessors. Opening the stores of treasures he distributed them liberally to all his soldiers. Umar II, 717-720 AD. The letters of 'Umar and Leo are given in Levond, pp. 42-98; see Jeffery, "Ghevond's Text." However, the existing text is a later interpolation, having been written by an Armenian. See the discussion about its authenticity in Gero, Iconoclasm during the Reign of Leo III, pp. 153-171. For Umar's benevolence see Levond, p. 42, and for the effect of Leo's letter on him, ibid., p. 99: it increased his benevolence to the Christians, he returned prisoners, forgave everyone their crimes, distributed treasures to his soldiers. But Levond does not say that Umar expunged things from the Koran!]

• Yezit, for 6 years. [Yezid II, 720-724. Thomas bases his account on Levond, pp. 99-100, where his anti-Christian behaviour is described.] He was a pestilential man. Moved by a rabid spirit he inflicted many evils on the Christian race. He commanded the images portraying the true incarnation of the Saviour and his disciples to be ground to dust and broken in pieces. He also broke up the sign of the Lord's cross wherever it was set up. For the raving spirit strongly coerced him. He also commanded pigs to be killed and exterminated from the land the multitude of pasturing swine. Reaching the culmination of all evils, he himself was strangled by a demon and perished

• Sham, who is Heshm, for 19 years. [Hisham, 724-743 AD. Identical wording in Levond, p. 100.]

• Vlit', for 2 years. [Walid II, 743-744. Thomas omits Yezid III (744), called Soliman by Levond.]

• Mruan, for 6 years. [Marwan II, 744-750 AD. Thomas passes over the civil war that led to the establishment of the Abbasid dynasty in Baghdad.]

• Abdla, for 3 years. [Abdulla as-Saffah, 750-754 AD. Levond, p. 126, describes the defeat of Merwan.]

• Another Abdla, for 22 years. [Abdulla al-Mansur, 754-775 AD; 22 years also in Levond.]
• Mahadi, for 10 years. [Mahdi, 775-785 AD.]

• Mohammed, son of Mahadi, for 8 years. [Levond, p. 154, calls Mahdi "Mohammed-Mahadi." Thomas has misunderstood this and invented another caliph before Muse.] • Muse, for 1 year. [Muse, as Levond, p. 161, is al-Hadi,

785-786 AD.] • Aharon ("Aaron") for 5 years. [Harun ar-Rashid, 786-

809. Levond's History ends at the beginning of his reign.] · Mohammed, son of Aharon, and his wife Zupet, for 4

years. [This Mohammed is Al-Amin, 809-813 AD.] • Maymawn, his brother, for 21 years. [Al-Ma'mun, 813-833 AD.

• Sahak, son of Mohammed, for 9 years. [Al-Mu'tasim, 833-842 AD.1

· Aharon, son of Mohammed, for 5 years and 6 months. [Al-Wathiq, 842-847 AD.]

· Jap'r, son of Mohammed, for 17 years. [Djafar al-Mutawakkil, 847-861 AD.]

The details of these reigns have been written down previously by others, so we considered it superfluous to repeat them. ILevond described in detail these reigns down to Harun ar-Rashid. No surviving Armenian historical text composed before Thomas's History gives the list of caliphs from Harun to Djafar. Thomas probably has in mind the lost History of Shapuh Bagratuni, but whom Thomas does not name, since he wrote for the rivals of the Artsrunik'.] Furthermore, their names and the lengths of reign have been given us in various forms, perhaps because of the troubled and contentious race that dwelt in the region of Damascus. Some there called themselves king, while others living in Asorestan called themselves king (caliph), down to the time of Abdla, who reigned alone over everyone and built a city and royal palace for the secure oversight of royal business, Baghdad. In the Hagarene language Abdla (Abdulla) means "servant of God." I.e. Abd-Allah. Hagarene is Arabic. It is noteworthy that Thomas rarely describes the descent of the Arabs from Hagar (based on Genesis 16.15); but others do.] But this was the Abdla whom his own nation called Abdlande, that is, "servant of money," and not of God, because of his tremendous covetousness and insatiable avarice. [Servant of money: abdal-dange, dang being a small coin.]

But we now have to speak about Jap'r and his evil deeds. not described by others, which he inflicted on Armenia over a long period of time; and we shall describe the unbearable oppression that occurred in our days, which was the date 300 the Armenian era. [Jubilees are periods of fifty years; olympiads are periods of four years; indictions are periods of fifteen years. Thomas begins his calculations from the date when the Armenian calendar was reckoned to begin, 11 July, 551 AD. So "before the completion of the sixth jubilee" means before 851 AD; "after the nineteenth indiction" means after 836 AD. But this does not tally with "before the seventieth olympiad" which would be before 831 AD. However, Thomas does not use "olympiads" or "indictions" in any strict sense; see below. The 222 years refer to the Muslim calendar; 222 AH began on 14 December, 836 AD (the end of the nineteenth indiction). But Djafar al-Mutawakkil became caliph in 847 AD (232 AH).]

ARTSRUNI HISTORY CHAPTER 5

[Concerning The Caliph Jap'r, What He Planned Against Armenia, [How] He Effected His Evil Desires; What Happened In His Time Before The Completion Of The Sixth Jubilee And The Seventieth Olympiad, After The Nineteenth Indiction, When 222 Years Of The Tyranny Of The Muslims Were Completed, According To The Reckoning Of The Armenian Calendar; A Certain T'ok'l Called Jap'r Reigned Over The Muslim]

A certain man, Jap'r, insolent and arrogant, began to lift his horns in impiety, to roar and butt at the four corners of the earth, to oppress and torment those who wished a peaceful life; for confusion and the shedding of blood were very dear to him. He was in continuous irresolution and agitation: on whom or on which regions to pour out the bitterness of his mortal poison, or where to loose and shoot out the multitude of arrows in the quiver of his evil and crafty mind. In his great folly, smitten by passion and with cancerous mien, raging like a wild beast, he began to attack Armenia. And in accordance with the subtle treachery of their wily race, with an amiable countenance he tried to carry out his evil desires gradually.

In his time the ruler of the land of Vaspurakan was Ashot of the Artsruni house a most renowned man and very highly distinguished. [This is the first reference to Ashot (died 874 AD), father of Grigor Derenik and grandfather of Gagik, to both of whom Thomas had dedicated his History.] Through him many notable deeds of valour were performed in battles and in single combat in view of drawn-up ranks. He was more

glorious and famous than those before him who had been princes of all Armenia, those in the East and the North. and especially those in the land of Vaspurakan who had been princes in positions of authority.

At that same time the caliph [Caliph: arkay, lit., "ruler," a term of general application, more commonly used of the Sasanian shahs than of the Roman emperors by earlier writers. The title "caliph" was not rendered in Armenian by a caique on its meaning of "successor."] sent one of his senior nobles as overseer of Armenia with responsibility for the royal taxes; he was called Apuset in the Tachik language and was also familiar with Hebrew literature. He set out and approached the borders of Armenia with a numerous army, coming close to the borders of Taron, called First Armenia [First Armenia: so-called after 536 AD.]. Then Bagarat, prince of Taron, who was of the Bagratuni family, since he then held the highest rank of the Armenian princes [For Bagarat, prince of princes 826-851 AD.], sent some of his magnates to meet him with presents of gold, silver, and honourable garments, urging that he not enter Armenia. But the Muslims had decided that perchance by some deceitful trickery [See: al Taqiyya, the Mohammedan doctrine of deception.] they might be able to dispossess them of each of their principalities. However, when Apuset realised the indissoluble unity of the mutual pact between Ashot and Bagarat, he in no way revealed the wicked plans that they were plotting against the Armenans, but merely indicated that the reason for his coming concerned taxes and other administrative matters. So they had the royal taxes and dues given to him and sent him back whence he had come. He returned to Samarra and informed the caliph what he had done and how the Armenian princes were in mutual solidarity. Angered at the frustration of his plans, he Apuset' greatly calumniated Ashot with letters of Muslims within Armenia. They informed about his deeds with more falsehood than truth, to the effect that: "He is continuously saying things opposed to Your Majesty." Likewise the governors of Persia alarmed the king with charges that Ashot had insulted the rule of the Muslims.

Now while the great vizier was returning to court, he entrusted the oversight of Armenia and the royal taxes to a certain Muse, son of a Hagarite Zorahay, who then ruled Arzn and the lower part of Aldznik, near the borders of Taron.

ARTSRUNI HISTORY CHAPTER 6

[Concerning The War Between Bagarat, Prince Of Armenia, And Muse; And His Victory Through Ashot, Prince Of Vaspurakan, Who Came To Bagarat's Aid]

At that time there was a great disturbance between Bagarat and Muse. On the pretext [Pretext: patchar, which could mean "reason"; but the taxes had already been paid.] of the royal tribute Muse had gathered troops and come to the land of Taron to wage war against Bagarat. Bringing up the host of his army near to the city which was the Armenian prince's winter quarters, he camped with all his troops. Forming ranks he drew out his line and closed off the whole of the flat valley. They were armed and fully prepared to face the Armenian army.

When the Armenian prince saw the Muslim army drawn up and compared it with the paucity of his own troops, he hastily sent a begging letter to the valiant warrior prince Ashot, asking him if possible to come to his aid promptly and rapidly in person and with an army and arms. After the messengers had appeared before the great prince Ashot and he had read the begging letter and codicil of the nobles which mentioned their close relationship and the bond of the pact which they had confirmed between each other with oaths on the holy gospel and the Lord's cross, then he raised the entire forces of the whole land with all the nobles of the principality of Vaspurakan.

Immediately there reported in haste, each with his own troops: Prince Ashot and his brothers Gurgen and Grigor with their forces; from the Artsruni family, Vahan and Vasak and Mushel and Apupelch and Gurgen and Vasak and Apujap'r and Mushel and Apumayeay and Vasak and Vahan and Hamazasp and Vasak, son of Grigor, and Apumkdem and Mehuzhan and Grigor-these all amounted to sixteen men from the house of the ArtsrunikLwith their troops; from the house of the Bagratunik', the son of Tornik with his troops; from the family of the Amatunik', Shapuh with eight relatives and their troops; from the family of the Gnunik', Grigor son of Hazir with six more relatives and their troops; from the family of the Entrunik. Artavazd with seven relatives and their troops. And there were others from among the nobility of the princes of Vaspurakan: Smbat Apahuni, Grigor K'ajberuni, Vahan Havnnni, the lesser noble Davit, Gzrik Apuharaz, T'odoros Varazkh, Khosrov Vahevuni, Khosrov Akeats'i, Vardan Gabayelen, Smbat Marats ean, a lesser noble Sahak, the patrik Andzewats, Gorg Harmats'i, Davit Gundsalar. And many others of knightly rank gathered, each with their troops. Marching together, they reached the battlefield while the two forces were being drawn up in line facing each other; the trumpets were sounding, the flags were waving and the standards were flashing, shield bearers and lancers were shouting, the cavalry was galloping hither and thither, the champions were making forays to attack, and the archers were flexing their bows.

While the battle was being fomented in this manner, suddenly our valiant Ashot arrived. In a dauntless assault they fell on the Muslims* and set on each other, one champion striking the other to the ground. [* Muslims: aylazgi, lit., "foreigner, of a different nation." In the Old Testament it is the standard term for enemies of Israel. In Armenian usage it refers more to the Muslims being of a different religion than to their ethnic origin. Elishe uses it once, p. 108, where the Sasanians are likened to the Philistines defeated by David and by implication, the Armenian warriors are compared to the Jewish heroes.] When Prince Ashot raised his eyes he saw one of his troops being struck. Roaring like a lion, he rushed on the elite cavalry and broke its right wing, turning it round on the left. The Armenians made them all fodder for the sword; they attacked like brave heroes, roaring like eagles or lion cubs falling on their prey. From the violence of the attack there were many more whom thby trampled down as corpses to the ground with their horses than whom they slew with the sword. No one could be found on the enemies' side who could resist them, not a single person. Those who survived the sword fled into the dense forests. Some even reached the capital Bitlis [Shahastan, a provincial capital.], having abandoned their own camp. But the princes pursued those who had fled into the fortified places and closely besieged the city and fortress, until its mistress came out on foot, full of lamentation, asking them to reckon as sufficient the deeds of valour which God had granted them through Ashot. She persuaded them to let the fugitives go their way-for she was Bagarat's sister. So the Armenian troops put an end to the warfare, returning in great victory. They plundered the encampment and stripped the corpses; collecting much booty, they piled up masses of silver and gold, arms with decorated scabbards, the ornaments and weapons of brave men, select horses and their decorations. [The plundering, stripping of the corpses, amassing of gold and silver and of armour and decorations from soldiers and horses following a victory are often described by Armenian historians.] So they returned to each one's place in great joy and merry jubilation.

Then, when the impious general Muse saw that his wicked plan and inclination had not been fulfilled and that his army had suffered severe reverses, he made haste to send the bad news to court, informing the caliph of what Ashot, prince of Vaspurakan, had accomplished.

Now we must return to earlier events: the details of actions brought about by the army of the Muslims before the battle of Aldznik', and how Prince Ashot opposed them and defeated them with the sword. The description surpasses our ability, yet it is not appropriate to disregard in silence and forgetfulness such a great victory won by the troops of the nobility of Vaspurakan.

When Apuset' returned to Syria and entrusted the oversight of the royal taxes to Muse, 1 he met coming from the court a certain vizier [in charge] of taxes, Tsovap'i by name, called Emir Ali. Apuset' sent him to the land of Vaspurakan, to remain there with many troops until all the taxes and royal tribute were brought to him from every region of Armenia and each individual territory. When he came to the province of Albag, he spread raids throughout all parts of the land of Vaspurakan; he ravaged, plundered, and pillaged, sacking and despoiling goods and possessions. The Muslims seized men, women, and their inheritance. Ali also made a raid in the direction of the principality of Andzevats'ik', and there too they plundered on the excuse of needing provisions for the cavalry.

The prince sent him a message as follows: "You have come to Armenia at royal command to receive the royal taxes. Do you also have a command from court to capture, ravage, and ruin our country? Now we have never contravened the king's order nor held back the royal taxes likte rebels, disobedient and insubordinate to the authority of lords; so when you enter any Armenian city as governors have the right, we shall give you the due amount of taxes and satisfy you. But do not mercilessly ravage and destroy my land."

But he disdained the message, deeming it unworthy of a response, and in the same fashion began to move around the whole territory of Vaspurakan. Reaching the village of Archuchk d he stopped there and posted observers on the highest hills.

The prince was much angered at the insult, and in his great wrath took the host of his knightly forces, each with his troops according to their various families, and attacked him, supported by the elite cavalry on their fully armed mounts. The scouts having warned the Muslim army, they too armed for battle against the Armenians. As they faced each other, the latter were divided into three divisions: the first division was entrusted to Gurgen and Vahan Havnuni, who was his companion-in-arms; the second division to Gurgen Apupelch, whose companion-in-arms was Vahan Artsruni; the third division to the prince, who was the commander-in-chief for the battle. Bravely attacking with a valiant shout, he rushed on the enemy. The combat began at dawn, and all day victory was on his side. He turned the host of Ali's troops to flight; in the struggle Ali's brother was killed, and frightful torrents of blood flowed. Gurgen, the prince's brother, and Vahan Havnuni fought bravely, gaining a notable victory and putting the enemy's side to the sword. The whole valley was filled with the corpses of the slain, and the streams of water that flowed down from the vales turned to blood from the multitude of those killed. Ali himself, escaping with a few men, fled in the direction of Berkri. But of the Armenian troops only a few insignificant men were killed, and Lord Gurgen was wounded.

Then the Armenian troops stripped the trappings and arms from the corpses of the valiant men and noble horses, collecting much booty, and went to each one's place victoriously. But because of these events a violent war was fomented by Vasak Artsruni through treachery and malevolence, and more especially through fear. For he had hidden much treasure in a barrel in the ground below his house, under the door of his dwelling, and he was fearfully anxious that the Muslims might penetrate and by discovering his store of treasure would reduce his power to nothing. He came to the caliph bearing letters full of charges against the nobles living in Armenia and piling blame for much damage to affairs of state on Prince Ashot. By their capricious terms these stirred up the caliph in hostile fashion against the prince. Likewise, the inhabitants of Aldznik', unable to endure their sufferings, joined in these calumnies. The wives of the slain, together with the common rabble, with unveiled faces. bareheaded, and having discarded the natural apparel of women, as is their custom especially for the nations of Muslims [This seems to imply that at times of distress the women bared their heads and their breasts.], came on foot to the royal palace. They complained, tearing their collars 4 and pulling out their hair, scratching their faces and uttering loud shrieks in lamentation and tearful sighing, moaning and imploring: "It is Ashot who has wrought this harm, the stopping of the royal taxes and the slaughter of your army. He is the cause of all the rebellion of the Armenians against your kingdom, Oh valiant ruler equal to the gods in power, who has general authority over life and death." So was fulfilled the has general authority over life and death. saying of the prophet Zephaniah: "On that day there will be a voice from the gate of discord, and lamentation from the second gate, and crashing on the hills. Mourn, inhabitants of the places of those massacred; for all peoples have resembled the Canaanites; and all those who boasted in silver have been slaughtered."

When the caliph heard this tumult of lamentation at the royal gate, he roared like a lion or like a disturbed bear. He flamed like a fiery furnace, and foamed like the piled-up waves of the sea tinged with purple blood. He uttered a great cry like infernal rumbling from the abyss, like torrents of hail from the crash of the clouds. His blood boiled around his heart in a fiery glow. Carried away by choler, his mind stupified, he was plunged into great anxiety as he sought a solution to the events that had brought this grievous news to him. He assembled groups of counsellors and all the wise men of Svria and Babylonia to examine this matter.

At that time the patriarchal throne was occupied by Lord Yovhannes, Catholicos of Armenia. In most wonderful fashion he embellished the institutions of the holy church of orthodox, apostolic faith in the Lord Jesus Christ. He made covenants with the princes of the land of Armenia that they would walk worthy of Christ's faith, and that their deeds would bear witness to the repute of Christianity. But although they agreed and diligently heard him, yet they did not abandon the foul impurity of their execrable sodomistic vices; they followed the sins of the Arsacid house of our former kings. Gradually, step by step, they began to act in a filthy fashion until they brought mild-tempered God to anger-for the destruction of themselves, the devastation of the country, and the ruin of the patrimonial houses of their ancestral dwellings. For it is written: "A just king sets his country aright; the ruin of a country is an impious king." Continuously he urged them to renounce and abandon the wicked and harmful deeds they were working; he attacked them with biting words, having as his witness the saying of the prophet Isaiah: "Hear, princes of Sodom; consider the laws of God, people of Gomorrah." This he said not because they were from Sodom but because they were committing the same impure and perverse sins as the Sodomites he called them Sodomites. As the prophet Ezekiel says: "Your father was a Canaanite and your mother a Hittite." [Ezekiel 16.3; but there "Canaanite" refers to the land of birth: the father was an 'Amorite."] He returned to the same charge, and mindful of the oversight of a different land he repeated the prophet's reproaches with threats: "Your rebellious princes, he said. 'are accomplices of thieves; they love bribes and are worthy of punishment. They do not provide justice to orphans, and they disregard the rights of widows." Again he says: "Let the king rule justly, and the prince govern by law." And again: "Let them make just judgments and work mercy and justice, because my words are directed to you, Oh tyrants," says Solomon. For God sends powerful justice to the powerful, while the common people deserve mercy. Such and even more was the advice and teaching of the holy patriarch and valiant

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3316 shepherd Lord John, Catholicos of Armenia. But they paid no heed to the laws of the Lord and had ears only for the cruel viper and incurable asp. They were drunk with the wine of folly; they had eyes with which they would not see, and ears with which they would not hear. So eventually there fell upon us these terrible evils and irreversible downfall which, continuing my account, I shall indicate in its place [Thomas probably has in mind the campaign of Bugha, which begins in Book 3.]. And the saying of the prophet Isaiah was fulfilled: "You shall hear and not understand; you shall see and not realise. For the heart of this people has hardened until cities will be abandoned by their inhabitants and houses emptied of men. And my people will again be delivered into captivity because they did not know the Lord. And many were their corpses through famine of bread and thirst for water."

At the beginning of the next year—which was the sixth jubilee and seventy-second olympiad and twentieth in diction, and the year 300 according to the Armenian reckoning [The sixth jubilee is 300 years; the seventy-second olympiad 288 years; the twentieth indiction 300 years. The year 300 began on 28 April, a.d. 851.]—the caliph with his counsellors and all the Babylonian magnates irrevocably decided to remove the princes of Armenia from each one's principality, so that their inheritance would become "ours." First he would lay hands on Asho tand his house and on Bagarat and his house; for if they were to remove them "no one will be able to resist and oppose us."

Immediately gathering an army and forming a force of elite cavalry, with soldiers and generals, he entrusted it to a certain Yovsey', son of Apuset. And he made the country over to him in the stead of his father Apuset; for the latter had died on the journey, in the regions of Syria, when marching against Armenia to wreak harm on them as they had planned. He said: "If you carry out successfully the plan which we have resolved on against the Armenians and their princes, and matters turn out as we ardently desire, and you are able to bring to us in chains the Armenian princes—especially the prince of Vaspurakan, Ashot—then I shall give that land in inheritance to you and your descendants. So hasten, be firm, pursue them. Have no hesitation in these matters; be not lax nor delay in this affair."

Then the general left him, filled with the plans of his wicked cunning. He entered the province of Albag in the land of Vaspurakan through Atrpatakan and camped at Hadamakert, the Artsruni capital. From there he began to scatter raiders, to plunder and pile up for himself a vast amount of booty. He summoned the prince, apparently in friendship and peace, for the matter of the royal taxes. But the prince was warned by the same group of Muslims not to visit him, as they informed him of his plans against him.

So the prince armed himself and made all preparations, with the troops of his noble entourage as well. With all the lords of his principality he withdrew, going round through the regions of Mardastan and Dzor-Haskoy, and sent messengers to the general. He wrote a letter in these terms: "It is the duty of kings who govern the world to watch over and care for the prosperity of the country, to lighten the tyrannous yoke of heavy burdens and soften the severity of painful demands for taxes, lest the productive capacity of the country be completely destroyed. They should remove repressive measures of governors, complaisant but faithless citizens, the burden of taxes and the military, so that the land may be prosperous and peaceful and the royal taxes come in regularly. Such is our concern and it is for you to desire the same. So when we see your benevolent solicitude for the land and your friendly kindness towards us, we shall be most eager to serve you loyally and to fulfill your commands with great despatch." Many other agreeable and acceptable expressions in similar terms he included in his letter. Furthermore, the mother of Prince Ashot, sister of Sahak and Bagarat, prince of Taron, who was a woman wise in words and deeds, very intelligent and also pious, went with many gifts to meet Yovsep', requesting him to establish a treaty and peace with her sons and the whole land of Vaspurakan. He accepted the gifts and carried out her request. Taking as hostages renowned and honourable men, he sent back Ashot's mother with great respect. He himself passed peacefully through the land of Vaspurakan with a minimum of damage, taking the hostages with him. Crossing the province of Bznunik ' he reached Khlat'. For he intended to await the most suitable occasion to ensnare the Armenians by deceit and trickery.

When the emir reached Khlat', he entered the city and encamped in its fortress. Then he sent messengers to Bagarat with written invitations to come to him without excuses or fear. He wrote in the letter that he entrusted to him this land of Armenia so that he himself might go to court, using the severity of the winter season that had arrived and the fierceness of the freezing north wind*, which he was afraid he could not endure, as his excuse. [* There are frequent references in Armenian sources to the severity of the winters and the freezing north winds. Classical authors, notably Plutarch and Tacitus, also refer to the snow and ice encountered by Roman armies invading Armenia.]

So Prince Bagarat, having no suspicion of faithlessness on the part of the king (caliph) and his army, went with innocent frankness and loyal intentions to fulfil his military duty, in accordance with the divine command and the royal order. He followed the messengers, quite unaware of the treacherous trickery whereby he had deceived him, and took with him the holy covenants of the divinely inspired Scriptures with a host of ministers of the priestly ranks. But the emir seized him and all his relatives from the Bagratuni house, bound them in iron bonds, and sent them to Samarra. He himself went to winter in the city of Mush, in Taron, keeping with him the hostages from Vaspurakan, both those of the Artsruni nobility and those of their knights. The inhabitants of the land he took into captivity, to sell them in the regions of Syria and all the area of the empire of the Muslims. But half of the captives they kept with them in the city to be their drawers of water and hewers of wood, causing them cruel torments in these tasks from the bitter winter cold. Those who escaped fled to various regions of the country. The whole country was devastated except for the mountain people who remained in their fortresses on the mountain called Khovt'

ARTSRUNI HISTORY CHAPTER 7

[Concerning The Murder Of Yovsep ' By The Mountain People Of Khoyt And Their History]

In midwinter the weather became especially severe with fog and tempests. The thick snow, levelling the plain, piled up around the foot of the mountain where the city of Taron was built. There the general of the Muslims was encamped, like a hibernating bear who has gone to ground in his den midway between life and death, surviving the days of winter on roots.

But when the south wind blows, heating the ground with its warming strength and awakening to fertility the buried roots and plants that had been numbed by the icy blasts of the north wind, then the slumbering beasts and birds, when they feel the warmth of the air as day and night become equal, come out from each one's lair and nest in the season of spring. But many there are too who perish then: some are easy prey to hunters, while those who escape inflict much harm wherever they go, both on men and on other animals. In such fashion did that man Yovsep', the general of the Muslims, spend the winter in order to attack Armenia with sword, captivity, and terrible afflictions, to take the magnates of the land into captivity, to set governors over the land who would run the country's affairs by their own orders and would install themselves with their families in the fortresses of Armenia.

Then, when the inhabitants of the mountain saw that their prince had been taken into captivity, they prepared themselves to endure the same anguish as had the lowlanders. The lightarmed men of Khoyt' gathered together as a crowd to consider their strategems for their protection that winter. Bearing the pikes they always carry in readiness against the beasts that lurk in the forest or the enemies that may attack them, they marched against the city and besieged it. They slaughtered the emir's troops with the sword, released from prison the hostages from Vaspurakan, freed the captives, and divided their booty among themselves.

But the self-imagined marzpan fled for refuge to a very tall church which had been built by Prince Bagarat in the name of our Saviour at the expense of great treasure—about three hundred thousand coins [Thomas does not name the denomination of coin.]. He hid himself between the inner and outer dome, quaking in most terrible fright. The armed men surrounded the church, and some of them reached him through the gap between the domes [Le. between the inner and outer domes.]. One of them struck him in the middle of his back with his lance, penetrating under his armpits to his lungs. He breathed his last and was buried like a donkey. And I myself with my own eyes saw that man who struck him, and from him I learned the truth about it.

Then the sad news was immediately brought in haste to the caliph: "Your general has been killed, and the land of Armenia has rebelled against your rule."

Here I shall expound in brief the nature of the inhabitants of the mountain: what sort and manner of people they are, how they manage to live and supply their needs at great labour and enormous trouble. They dwell in deep gorges, in clefts in the mountains, in deep forests, and on mountaintops. They live separately by families, so distant from each other that if one of their strong men were to shout from a very high place he would hardly be able to make his voice carry anywhere; you would think it a mere echo from the rocks. Half of them lose their native tongue from living so far apart and never greeting each other, and their mutual speech is a patchwork of borrowed words. They are so profoundly ignorant of each other that they even need interpreters. For food they use certain seeds, especially that known as millet, which some call bread at time of famine. This they sow in the middle of the forests and irrigate by means of their feet or with double-pronged hoes. They hide their nakedness with clothes of wool. For footwear they use a form of boot made from goatskin. And one food and one garment suffice them both winter and summer. As weapons they have pikes, which

they carry with them continuously in readiness against the beasts that live on the mountain.

But when enemies reach their land, the mountain peoples unite to aid their princes, for they are loyal. Now as for the snow of unstable solidity which flows down from the clouds, they have invented for themselves wooden shoes* wound around their feet with ring-like thongs, so they easily run over the snow as if over dry land. [* Cf. the snowshoes used in Armenia that are described by Strabo and Xenophon; see Dowsett, "Ancient Armenian Roller-skates."] They are savage in their habits, drinkers of blood, who regard as naught the killing of their own brothers and even of themselves. They are called light-armed and couriers, and dwell in the mountain that divides Aldznik and Taron. Because of their obscure and inscrutable speech and way of life they are called Khut', from which name the mountain is also called Khoyt'. They know the psalms in the old translation of the Armenian teachers, which they have continually in their mouths [Thomas seem to have known that the old translation was from Syriac, meaning Aramaic. Koriun, pp. 31-32, notes that the first translation of the Bible was later revised from texts brought from Constantinople.]. They are the peasants of Syria who followed to Armenia Adramelek and Sanasar, sons of Senek'erim king of Assyria and Nineveh, from whose name they call themselves Sanasnayk. They are hospitable and respectful to strangers.

BOOK THREE

ARTSRUNI HISTORY CHAPTER 1

[Concerning What Became Of Armenia In General; And Division Among The Princes, Being Mutually Hostile And Rebellious; And What Happened Under Them]

Up to this point we have not hesitated to relate the dangers and tribulations which befell us from the enemies of the truth. For although we were oppressed and tormented with various afflictions by the domination of the armies of the Muslim Tachik nations/ yet these were few in number and for short periods of time; and many more were they whom we smote than we who were smitten. For the Armenian princes with their hosts of knights and troops were still living in unison and harmony and concord, though in secret they had suspicions of treachery. But when discord began to insinuate itself within that unity, the grace of the divine power departed and withdrew. Concerted plans were disregarded in combat and in other matters affecting the administration of the country. And just as someone might cut into pieces all the limbs of a body until the form of the living man, that is the nature of his composition, has disappeared-whereas, if one of the limbs is lost, it is an accidental deprivation but the whole living person is not destroyed-in such manner was the unity of this country gradually destroyed, as each individual plotted evil against his neighbour and his brother. They sent letters and messengers to the caliph secretly from each other. Among themselves they scattered words of slander so that not even two remained in accord, causing great joy to their enemies at the dissolution of their mutual unity. Many were the things they wrote that Armenians had not done; and all the damage and results of the revolt they attributed to Ashot. To them applies the saying of the Saviour: "Every kingdom divided against itself perishes, and every city or house divided against itself will not stand." Equally appropriate is the old fable of the philosopher Olympian concerning the characters of the lion and the bulls, of which erudite people are knowledgeable.

Then the caliph once more took counsel with the magnates of his kingdom to plan sure and infallible destruction for the land of Armenia. From among many good suggestions, the counsellors chose this plan as the only certain one. They said to the caliph: "Gather an army, assemble a force, march into the land of Armenia. From all the nations that are under your control, gather to yourself the elite of the cavalry and cross over the river. On reaching Armenia, first bring Ashot here in exile; then all the others will easily submit to you and you will indubitably set them all under the yoke of obedience to you. Do not merely endeavour to exact vengeance for their holding back taxes or troops or other service or for harming the state, but force them, once taken captive, to renounce the Christian faith and to serve the religion of our prophet and legislator. Then all our plans will easily be carried out. By inflicting them with the bastinado [flogging of the soles of the feet.] and prison and various tortures, and by threats and persuasion and the deceitful promise of wealth, you will subject them to your royal will and extirpate the name of Christianity from among them." This counsel seemed pleasing to the caliph, and he greatly rejoiced.

Here there is weeping, lamentation, and mourning not for a single clan or a single area but for all the clans and lands of Armenia. I shall carry my account forward in order—though not with joyful enthusiasm but unwillingly and by compulsion shall I describe the opening of the gate of divine wrath upon us. This vengeful chastisement was inflicted because of the impieties that we had all committed, from the least to the greatest, as is written in the prophecy of Jeremiah: "The Lord opened his treasures and took out the vessels of anger," which he had gathered and preserved there under seal for the day of retribution, to compensate us for our deeds and to strike our feet against a rock/ The day of destruction has arrived close to our doors, for "behold the Lord has come in readiness against us," as Moses wrote. But the most terrible thing about the opening of the gate is that it is opened invisibly—the gate of destruction of souls rather than of bodies, that is erring from the pure, orthodox, apostolic faith in the Father, Son, and Holy Spirit. Human power cannot prevent the opening of the gate to destruction; only for God, powerful and solicitous in all things, is the power easy, as it is written: "He will shut and there will be no one to open; he will open and there will be no one to close."

Then the caliph composed edicts and sent numerous messengers through all the regions of his empire, to the distant parts of Syria and Babylonia, Turkastan and Khuzhastan, Media and Elam, Egypt and as far as inner Tachkastan near the borders of Sakastan—to the troops and generals, governors of provinces and cities, to viziers, prefects, and the magnates of those lands. He set the time when they were rapidly to present themselves to him in their royal capital [Samarra.]. So everyone, in accordance with the caliph's command, gathered cavalry from his own region, and in the company of other fully armed detachments without delay quickly came to the appointed summons.

When the generals had entered his presence, the caliph began to speak, saying: "From the beginning of the rule of our ancestors, when God gave the thrones of many kings into their hands, and down to our time no one has been able to resist us, neither from distant lands nor from near ones. Nor has anyone inflicted such embarrassing reverses on us, our nation and army and our generals, as has Ashot prince of Vaspurakan. So take courage, be men; attack Armenia with famine, sword, and captivity.

Bring hastily to us in bonds the princes, lords, governors, and prefects of that country, the nobility and their sons. And you yourselves will hold that land for your own habitation, and it will be your land as an inheritance for you and your children. But first bring Ashot and his family here, and do not worry about anyone else before capturing him."

He offered to each of the generals who had come to him gifts nd crowns, also giving under seal villages and towns. He asked for the register of the number of troops; they searched and found it. He was furthermore informed about each battalion, about the valiant and powerful warriors by name; also, how many were fully armed, how many were shieldbearing infantry, how many lancers, what were the numbers of archers, how many company commanders there were in the army, how many officers were experts at single combat, how many champions, how many staff officers, how many commanders of couriers. He also sought information about how many flags there were, how many standards, into how many divisions the army was divided, how many trumpets would sound, and how many drums would beat.

After he had accurately enquired into all this, he discovered that the largest number of all were the archers and stalwart bowmen of the Elamites [Persians; sometimes used to paraphrase Turks as Armenians did not make a difference.] and Arabians-adroit with both hands, who did not miss the target, like those powerful men in Israel of yore, the troops of the house of Ephrem and Benjamin. As general he appointed over them a man called Bugha, a Turk by race, and he publicly commanded the multitude to heed his advice and obey his orders. He was the commanding chief of all the realm of the Muslims, and no one was able to contravene his wishes, from the greatest to the least; even the caliph himself obeyed his command. This man, whose devilish intelligence was wicked and full of wiles, undertook these malicious plans; greatly puffed up and haughty, he roared like a dragon, striking terror into those far and near.

This man Bugha, in whom Satan with his power had made his lair, immediately left the caliph's presence. His delight and pleasure were the flesh and blood of innocent men," and his horribly ferocious rage could not be sated.

To him, it seems to me, applies the saying of the prophet Habbakuk: "See, contemptuous ones, and be amazed and undone. For I shall work a deed in your days, a deed you would not believe if someone were to relate it to you. For behold I shall stir up against you the cruel and swift nation which will come across the width of the land to inherit tents which are not their own. They are fearsome and splendid; their judgment shall take place of itself and their sentence proceed of itself. Their horses shall gallop faster than the leopard; they will be swifter than the wolves of Arabia. Their horses shall rush; they shall dart like eagles on their food. The fate of the impious shall befall those who oppose them. They will amass captives like sand. The king himself shall become weak, tyrants will be their laughing-stock, and at all fortresses they will laugh and joke."

ARTSRUNI HISTORY CHAPTER 2

[Concerning Smbat Bagratuni, Prince Of Mokk]

At that time Bugha entered the city of Khlat, having marched through Apahunik. He had divided his army into two divisions and had commanded them to enter the land of Vaspurakan, to spread ruin over the country, to take prisoners, to ravage, exterminate, and put to the sword; to depopulate the populous villages and towns and to lead the survivors into captivity including women with their children: to have Prince Ashot taken in bonds to the caliph so that he might suffer vengeance for the deeds he had wrought and his rebellion from the rule of the Muslims. Then he entrusted a part of his army to a general named Zhirak and sent him through Rshtunik. Taking the rest of his host with him he crossed Apahunik, like hunters of lions or such-like surrounding the lair, to entrap the most mighty and valiant of men, Prince Ashot. He took care lest "perchance he elude our clutches, or unexpectedly attack us by night and cause a great disaster." Now because the pass of Holts was open, Zhirak quickly reached the province of Rshtunik, rushing his troops into the valley of Aruank on the border of Mokk. There they came across the inhabitants of Rshtunik, who were scattered these merciless, murderous, carrion-eating dogs. Slaughtering them with the sword, they filled the land with blood. Taking some captive, they led them off with them. Setting fire to villages, towns, and farms they made it a desert devoid of men and animals. They brought the common people of the town of Noragiwl in Rshtunik to the marketplace of the capital of Rshtunik [The capital (Ostan) of Rshtunik" was the present Vostan on the southern shore of Lake Van.], marching them at the point of the sword with ropes round their necks. From there they went to the valley of Atsan in search of those who had fled. On catching up with them, many they put to the sword or took captive.

But two of the commanders of the couriers, brothers, on reaching the defile of the valley, with shields on their backs, lance in hand, and armed with bows and arrows, attacked the enemy. With help from God they defeated the Muslims, inflicting many wounds, and freed the mass of capitves so they could go to the fortresses of the land. These two were named, the one ... by the sword and was killed . . . "brother aided by brother like a secure and strong city," or according to Isaiah: "At a single voice thousands will perish, and at the sound of five many will flee." A priest called Shapuh and one of the peasants of the valley swelled the number of the force. Supported also by a shepherd, they hurled stones with slings. In the battle they exhibited as much strength and heroic valour as if they had been more numerous. Their memory will be a source of courage and bravery to many, of strength to the cowardly and encouragement to the most valiant champions.

At that point one of the Armenian nobility of the Vahevuni family, a certain Apusahak, brother of Sahak the bishop of the capital city of Nakhchavan and of Mardpetakan, was captured. He was white-haired and his outer body was aged: but his inner being was rejuvenated and beautiful in the image of the Creator. Learned and familiar with Divine Scripture, wise and knowledgeable, he sat digging the narrow road of the path that leads to the supernal metropolis of Sion, to the camp of the heavenly army in Christ's royal kingdom. He was brought before the general Zhirak', who was pleased to see his tall handsome stature and the analogous beauty of his face, his gleaming appearance like the morning star set in the shining white hairs of his venerable head. So he began to discharge his fetid, intoxicating, and bilious poison in the hope that he might be able to subject the blessed man to the foul enticements of his deathly infection. Hiding the arrows of his quiver with a sponge, he directed his destructive power against the saint, hoping to shake him from the refuge of the secure rock and to be able secretly to lead astray the holy one's soul, though he was armed with the protection of the Holy Spirit and had as sword the Lord's saying: "When they deliver you up, do not worry how or what you will say; for I shall give you a mouth and wisdom to which all your opponents will be unable to resist or respond."

The tyrant began to speak fawning words; he ordered great gifts and honours to be proferred and promised to make him splendid and distinguished among the common multitudes at the royal court, that he would be in the caliph's presence with the foremost princes and share the rank of the caliph's magnates at the principal bench 10 when the royal tribunal assembled. "Only abandon," he said, "the faith of Christ, submit to the great king*, and accept the religion and faith that are worthy of life and praise from the great king through obedience to our ruling and commanding king." [* Great king: Vardanyan assumes that Mohammed is intended. But this is a standard expression in Elishe for the shah. Zhirak* means: "submit to the caliph and Islam," just as Denshapuh attempted to persuade the Armenian martyrs to submit to Yazkert and worship the sun; e.g. Elishe, pp. 162, 165. The word "Islam" means "submission", total surender under "Allah and his messenger Mohammed".]

But the holy one, armed with the Holy Spirit, remembered what the Saviour had said: "Do not fear those who kill the body but are unable to kill the spirit" [Matthew 10.28.]; and:

THE GRAND BIBLE

"Do not let a seven-branch candlestick hide the shining of its light under a bushel, but let it be placed on the high candlestick" [The "seven-branch" candlestick of the Jewish Temple of Jerusalem.] of the apostolic church, "so that they may see it and glorify the Heavenly Father." So, opening his mouth with the word of God, he then set forth in beautiful but brief and unadorned form one by one the proofs of faith in Christ, the various gifts preserved by him for the one who abides in the true faith, and the torments of the apostates and the backsliders; he also cast much calumny on their tyrannical and erring legislator Mohammed [In Armenian called "Mahumat". The word "legislator" refers to the fact that Mohammed made the Islamic Law (called "Sharia"). Thomas Artsruni was well aware that the Koran was a book of law because he most likely read it.]. But because none of us was then present at the blessed one's responses, we did not consider it right to set them in writing. [But Thomas does indicate in the next paragraph that his account derives from an eyewitness.]

However, when the tyrant saw his inflexible intention, his unhesitating faith, his fearless and haughty responses, and the great indignity with which he treated him and their legislator, he became exceedingly angry and ordered him to be put to death immediately.

So the holy one went out with the executioners to the arena where his earthly contest 5 would come to an end. Kneeling down, he prayed that he might be able with unfaltering faith to overcome the wiles of the devil who assails in secret and in open warfare. He said: "Creator of justice and righteousness and what follows." 6 Raising his hands to heaven, he placed his neck before the executioners. One of them took a sword, struck the blessed one, and cut off his head [Since sharp steel swords from India became available to Arabs, they became obsessed with carrying out beheadings. This "tradition" has been continued by all Mohammedans ever since.]. In this fashion was martyred the blessed Apusahak. He was the first fruit of the martyrs in the great tribulation which befell all Armenia. This was told to us by the great priest Samuel of the town of Artamet; he had heard of it from a certain Persian from the valley of Shatuan, who had been among the executioners and had been present at the spot from the beginning of the martyrdom until the saint's death, and had taken to heart the psalm that the blessed one had spoken. The inhabitants of the province of Rshtunik' also know this, for many of them are still alive.

Following this Zhirak left there, entered Vantosp, and himself set fire to the great church in the town of Artamet. But Bugha marched in pursuit of the prince, accompanied by the Muslims of Armenia who dwelt in various regions of the land and guided Bugha on his way in and out of the country.

Prince Ashot, on the other hand, gradually surrounded himself with his relatives, including some of their nobility: Mushel Vahevuni who held the rank of tanuter; the junior prince Vahram, the prince's bodyguard; Vahram Truni and Hasan and other retainers from among the lesser nobility. They entered the citadel of the fortress of Nkan in the province of T'ornavan, wanting to see how they might be able to find a way out of the danger that had befallen them.

When the Muslim troops discovered that the prince had entered the castle, they pursued him in large numbers and besieged the castle, making it an inescapable cage. They established their headquarters in the town of Lokoruat, keeping with them the mass of captives all crushed together. But Vahan of the province of Amatunik' had fled to the valley near the fortress where their lord was besieged.

Then, after a few days, Bugha armed his troops for battle with the defenders of the castle in order to capture it. Their commander-in-chief, Bugha himself, mounted on his horse, armed himself for battle with the prince, and led out to the front the powerful archers of the Elamites [Persians from the area of Susa.] and their elite cavalry.

The others bore arms of various kinds: sabres and hatchets, swords and spears, axes and slings, catapults and projectile machines, shields and lances. They also carried for warfare fire and sulphur with naphtha; the fluid materials were placed in glass containers. They mixed finely ground sulphur with it and put this in the throwing arm of the machines with fire beside it, ready to be thrown at the fortress. Those near the ramparts equipped the battle line and provoked battle. They put on garments made from woollen fleeces, pressed and glued together by powerful arms to strengthen the backs; they called the fine hairs "felt." Placed in water, it soaks it up like a sponge. Putting this on themselves as armour, the Muslims render combat more intense since they are not frightened by the heat of the fire [Cf. the felt (tal, as here) worn as armour by the warrior from the Caucasus.]. Their horses and riders they cover with armour: front-lets for the horses and shields for the croups, and leg coverings on the four sides; they also extend armour over the chest, and breastplates of haughty aspect, and collars that ring bells when they trample with their feet. They bind crescent-shaped ornaments to the forehead; the backs of the horses they reinforce with iron; each side of the horse's stomach they protect with plates

affixed according to the size of the abdomen in the form of a shield, indicating the artistry of their armour.

They themselves wear a cuirass and on their heads a helmet; on their hands they put gauntlets and bind leg coverings on their thighs. They fashion their shoes like slippers, put a shield on their backs, gird themselves with a sword, take a lance in their hand, and keep their bows and arrows ready at their backs. Their ornaments and belts are embroidered with gold and silver. The flapping of their fringed banners makes the mountain echo. They set up flags, the trumpets and lyres sound, the drums beat. The sun shining on the armed array and glinting on the naked swords sends flashing rays around the mountain. The warriors attacked bravely, the generals shouted, the champions called out; they put the battle line in ready order. This Isaiah described in a phrase: "The Elamites took up their quivers and mounted their steeds." The detachments of their line came near to our valiant Ashot, the elite general of the Armenians and greatest of the nobles. In such-and even greater than this-an array of armed preparedness, in horrible fright and great fear they trembled in awe of our heroic prince and victorious warrior Ashot, and of those battalions of nobles in his company with their troops according to families from among the native lords of the principality of Vaspurakan.

But the prince mounted the wall in lordly and ostentatious fashion, striding like a lion cub, quite unconcerned and regarding as naught the marauders who had attacked and surrounded him. For he counted on his fellow warriors to be loyal and united, on the troops and commanders, the battalions of nobles who had entered the fortress of Nkan with him. But they the Muslims pressed ever more strongly for battle.

Then the prince took counsel with his relatives, Vahan and Mushel Artsruni and the groups of nobles in his company, whether they might perhaps be able to appease the enemy general to abandon the plans he had formed, disengage the warfare, and soothe the turbulence: he could do whatever he wished according to his desire, and they would hand over to him in sealed agreements villages and farms, and would pay royal taxes and give hostages for peace.

While they were considering and planning together in this fashion, all at once those enclosed in the castle broke away from the unity of the covenant. Those of noble family there at counsel decided on an evil plan; feigning friendship as on the previous day and the day before that, they decided to go to the [Muslim] enemy general and seek peace. Despatching from their company one named Vahram, they had him take a letter to the general, full of the diabolical poison of their plans. Hidden from the eyes of the prince in lamb's clothing and sheep's raiment, on the inside they bore the insolence of ravenous wolves, "like dumb dogs who cannot bark," as the prophet Isaiah says, aiming at the Lord the frenzy and murderous force of their mortal poison, to destroy their lord and ruin their land as intriguing adversaries. They loved turbulence more than peace, destroying the unity of harmonious concord between brothers, relatives, and friends wherever they found it to exist.

So they went out like the traitor of the Incarnate Saviour, carrying with them the letter written in this fashion: "From the court you have received the superintendence of this land of Armenia, and in accordance with the command of the imperial king you hold subjected in obedience to your rule the princes and lords, the prefects and governors, the rulers of cities and of borderlands of all Armenia. You have authority to punish by bastinado [beating up, in particular the soles of the feet.], prison, and various tortures rebels and opponents in a manner worthy of their villainy, and to remove from the country discord and from a peaceful land turmoil, as is right for peace-loving kings and royal princes and doers of God's will and his faithful, loyal servants.

"So we, the chief nobles of the prince of Vaspurakan: Mushel from the family of the Vahevunik. Vahram from the family of the Trunik', another Vahram the bodyguard of our prince, and other groups of nobles and military leaders, having in our hands the oversight of this land, have written to you, Bugha, commander-in-chief of the Muslims and colleague of the great king (caliph). If only you will graciously allow us and our clan, the native inhabitants of our land, to remain in each one's dwelling and be at peace, we shall deliver Ashot into your hands-without arms or battles or warfare, and you will have to make no effort at all in this. Now you will not reckon us as rebels against His Imperial Majesty and your honour if you examine the matter properly. But do not be ignorant of this too, that Gurgen, brother of our prince, the other members of the Artsruni family, and a great number of nobles and their sons with their valiant troops of the principality of Vaspurakan have all gone with him to the region of Atrpatakan. There have gathered all the troops and common people of the land, men strong and warlike, who do not flinch from the sword. If this state of affairs continues and the question of battle does not quickly come to a head, perhaps under cover of night he will come upon you and inflict a terrible disaster on you and your royal army. For he is a valiant man and a warrior, and the troops with him are united; they will give themselves to death for the sake of their own homes and lands and families and clans. In their hands are many secure fortresses, Ilmar and Sring, and the castle of Chakhuk. And if they divide into three, four, or more groups and turn these strongholds to their advantage, they will cause you great trouble, frustrate all your plans, and inflict on you a shameful and humiliating defeat—as on the vizier who came from court before. For he was unable to resist them, not even a hundred men against ten Armenian soldiers."

When the great general had read the secret message of the nobles he cast his response also in the form of a letter. Confirming it with an oath, he said: "Whatever you wish and eagerly desire will certainly be done for you without doubt. Only let Ashot and his relatives not escape my clutches."

Then the prince realised their treachery and hypocritical deceit and that they were not taking measures to prepare the stronghold in accordance with his orders. So he told them: "Arise, go to the general, see for sure, and we shall understand and know how we may be able to placate him towards peace."

Then the mask of deceit was stripped from their obscene faces. They replied: "Arise and go yourself and hear in person from him what his pleasure is; and let their charge of your being a rebel against the caliph be lifted from you."

When the prince realised that their wickedness had been revealed in their eyes, that they were speaking equivocally, were secretly grumbling, and were disobeying and neglecting his orders, he responded: "What is this that you are doing in secret, and why are you hatching clandestine plots among yourselves? If I seem at all evil in your eyes and have wronged you and have dealt with you falsely, give now a response before my face and indicate expressly one by one each harmful act I have done. Let all the soldiers hear, and do not be ashamed to speak the truth. But if I have cared for you tenderly like a father, or as a hen gathering her chicks under her wings for protection, and you were everywhere kept in watchful security as in a fortified

city, living without worries under my care—is this the compensation you pay me! Do you not know what David said? 'They repaid evil for good, hatred for my love,' and what he says later as compensation for that: 'Set a sinner over them; let Satan stand on his right hand,' and what follows in that psalm. Have you not heard what Solomon said? Who returns evil for good, from his house evil will not be lacking.' Did you not reflect on even a single one of the benefits you have received from me?

That according to each one's age I honoured every one of you with appropriate care and love. That the extensive goods among my treasures I gave up year by year to plunder. With joyful heart I reckoned as mine the rapine of my house by you and for you—the like of which no one has ever heard that any earlier prince did. Of my despoiling I paid no heed, only wishing that you be filled thereby. On seeing your sons and children, in affectionate compassion I would clasp them to my bosom with great tenderness as my own offspring. So is this now the reward, that with treacherous plotting you are aiming at my imprisonment, at facilitating for my pursuers the capture of myself and my children, to throw me with all my family into the dragon's mouth, I while you become the cause of carnage and captivity for the whole land?"

But since they kept with firm resolve unity in the traitorous plot with regard to the tyrant of the Muslims, they responded: "We are not able to oppose the irresistible force and might of the caliph. The fortresses are not as prepared for defence as we thought, nor are the stores in them sufficient even for the garrisons of some common people who will guard the forts, omitting mention of any one else. Because of all this you must go, so that the suspicion of your rebelliousness is removed and that the wretches who have trustingly come in vain flight may be sent back each to his own place, and that the country may see an end to the ravages of the enemy who have come to ruin and destroy. If you go of your own will, perhaps it will be of advantage for many including yourself. But by going unwillingly, if the oppressor has trouble in restraining you, he may multiply the harm for you too, and so no one will be able to gain any advantage.

On hearing this he Ashot realised their confirmed treachery. Raising his eyes to God he prayed; he ate a little bread and wine, gave thanks, and turned sorrowfully to his family. Then he left the castle and went to present himself before the brutal foe, greeting him according to their custom. He asked: "Are you Ashot?" The latter said: "Yes, I am." When Bugha had heard the same response two and then three times, he heaped many words of censure on him. On hearing observant and wise replies from him, he ordered him to sit down.

Then Smbat Bagratuni, whom we mentioned above, the prince of Mokk', since he had been greatly loved by the general and had received the greatest gifts and honours, was unable to endure what had happened. In deep distress, he groaned and sighed in his soul. Going outside the camp, he wept copious tears over the fall of Prince Ashot and the other nobles. But he was quite unable to help them because of the cruel command of the impious caliph. He burned and seethed secretly in his heart at the ruin of the country and the merciless torments of those taken captive by the enemy. Then he boldly entered the tyrant's hall, and fearlessly standing before the general without flinching, he said: "Since I have found favour with you, and you have honoured my person and have shown me greater respect and consideration than all the other Armenian princes and royal magnates—and they have all heard of your treatment of me—let not your regard for me be vain and hollow, so that those who greatly hate us and are our enemies may see and be ashamed, while our friends and those who love us may greatly rejoice."

Then the general promised with an oath to give him whatever he might request, as far as to appoint him his colleague and equal in honour in his domain.

But he Smbat paid no heed to earthly greatness, for it is transitory; rather he sought to be the cause of gifts that are eternal and undying, that cannot wither, waste away, or be seized by thieves. "Give me," he said, "as many of those captives as your desire may permit." Immediately and with unhesitant rapidity he ordered that no one could prevent Smbat from taking whomever he pleased. And he gave him messengers, lightly armed men, axemen, and men with maces. so that he might take the captives of Vaspurakan from the camp as he wished. So he removed them and brought them each to his native region, himself accompanying them, like Cyrus king of the Persians brought the people returning from captivity in Babylon to their own land. Thus the saying of the prophet Isaiah was fulfilled in Smbat: "He shall send to them a man who will save them and by judgment will deliver them. And again: "He will bring back the captivity of his people, not by bribes and not by offerings, says the Lord." So Bugha dismissed him to his own home in great joy and cheerful rejoicing, making an appointment for him to return to him in his winter quarters at the city of Dvin.

ARTSRUNI HISTORY CHAPTER 3

[The Captivity And Banishment From Our Country Of The Prince And The Nobles And Their Families]

In those days, while the prince and the nobles with their families were in bonds, Bugha formed a detachment of soldiers and elite cavalry, fully armed and equipped, and sent away to Samarra the prince Ashot and his son Grigor, Vahan Artsruni and his son Gagik who was also called Apumruan, Mushel the brother of Vahan and the princess Hranush, and others of the nobility, bound and set on camels under tent-like canopies. He sent them to Persia, travelling via Atrpatakan, fearful lest perhaps Gurgen or some other member of the Artsruni family and their nobles, the mighty horsemen of Vaspurakan, "might catch up with them, snatch them away from the troops, and deliver him from my hands."

When the prince reached the court, the caliph had his feet bound with double chains and had him put in prison. He ordered armed soldiers to guard him until he might sit in tribunal and bring them to a judicial interrogation and examination of the charges concerning his conduct which had been heaped up against the prince.

His vizier [The vizier = hazarapet, as above. But Thomas has hitherto called Bugha "general" or (Muslim) "commander-in-chief".] had written and informed the monarch of whatever he had done up to that time.

ARTSRUNI HISTORY CHAPTER 4

[For What Cause Some Of Them Attained Holy Martyrdom] S ome heroes 1 among the prisoners at that time had emerged from prison, were still girt with their swords, and had their shields on their backs. Raising their eyes, they saw their wives and children had been brought among the lay captives. Unable to endure such oppressive affliction, they valiantly gained the pass of the valley and drawing their swords, rushed on the captors, whom the Lord delivered into their hands. Attacking them with the sword, many they killed and even more they wounded, while all the captives and their families they rescued from them and brought through the pass of the valley to the secure regions of the mountain. But the Muslim troops gathered to attack them; surrounding and capturing them, they brought them to the general and told him what deeds of valour they had accomplished. When they led them before him, he urged them to abandon the worship of Christ, saying they were worthy to receive honour and gifts from him rather than to be put to death with cruel torments. But reaching a noble decision, they preferred a valiant death to life with remorse. He spoke to them with cajoling words, but they would not listen to him. He had gifts brought, but even so they would not agree. He spoke with them in a severe fashion, but of that too they were not afraid. He tormented them with the bastinado, but they were even more confirmed in their faith, in the hope of blessings and in the love of Christ. Then he commanded their heads to be cut off by the sword. and they greatly rejoiced that they had become worthy to die for the name of the Lord. So they received the sentence of martyrdom and died as martyrs for the glory of the Holy Trinity. Their names are: of the first, Georg from the Akets'i family; and of the other, Khosrov from the Gabelean family.

Now a thrice-blessed young man, himself a Muslim and a Persian by race who pursued the love of Christ's faith, came and attached himself to the patrik Andzevats'i, asking to receive the Lord's seal in order to become perfect in working the Lord's commandments. But he the patrik had deferred and hindered his eager desire for piety. The Muslim had entered the fortress with the prisoners; and at the time when it was taken, they had urged the captives to abandon Christ and not be put to death. Many had been swayed and turned to Satan, while some suffered the rigor of death. But he rushed to the right-hand side of the martyrs, to offer himself to the sword as a living sacrifice to the Son of God.

When Vahram saw him about to be slaughtered as the executioner was holding the sword above him, he cried out loudly: "Oh Muslim, why are you dying in vain and to no purpose?" But he shouted: "I am a Christian." But Vahram persisted and said: "Do not die, you are a Muslim." But he even more readily cried out, weeping tears: "I am a Christian, and I die for Christ. I am baptised in the name of the Father and the Son and the Holy Spirit, not by water but by my own blood. Did you not see me coming and entering the holy church with all the believers, while you tried to turn me away from faith in Christ?

But I heard, when they were reading the gospel, that Christ said: 'Who will confess me before men, him shall I too acknowledge before my Father who is in heaven.' So go away, man, I am dying for Christ." And he ran through the camp, shouting, crying out, and waving his hands, saying: "I am a Christian.1 am a Christian," until the executioners, enraged.

fell on him pell-mell in the great square. Striking the blessed one with the sword, they cut off his head and went to inform the general. Then behold a bright light descended from heaven and shone over his holy body, surrounding the place wherever his blood had spattered. And the whole host of the army saw it.

To this, it seemed to me, refers the saying of the prophet: "Let the foreigner who will come to rely on the Lord not say that the Lord separates me from his people." A little later he says: "As for the foreigners who will come and rely on the Lord, to love his name and be servants and handmaidens to him, and all those who will keep my sabbaths and not profane them, and who will keep my commandments and remain in my covenant-I shall lead them to my holy hill and shall make them rejoice in the house of my prayers. Their holocausts and their offerings will be acceptable on my altar; for my house shall be called a house of prayer for all the heathen, said the Lord omnipotent." Furthermore, the Saviour said likewise: "They are my sheep who are not from this fold; and them too must I lead hither. And they will hear my voice and become one flock and one shepherd. And I shall give them eternal life.'

So the holy martyr was killed gloriously for the Father and the Son and the Holy Spirit. His name is written in the book of life. But to us he is known for his saying: "I am a Christian" according to the Scripture: "A new name shall be given to my servant, who will be blessed on earth." This was written as a memorial for the saint.

After this Bugha despatched soldiers of all nations, from among all magnates and all governors, Persians, Elamites, Babylonians, and Arabs, who had come with him to wage war at the command of the caliph and the great general, more than fifteen thousand men. He sent them in pursuit of Gurgen, that wherever he might be they were to bring him to him, be it by deceitful trickery and cunning fraud and falsity, or by war and strength of arms, with all vigilance and by royal power however they might be able they were to bring him to him.

But he Gurgen crossed to the province of Orsirank accompanied by a host of nobles and magnates from the Artsruni principalities and all their troops. They encamped on the mountain above the village of T'uay, in its valley called Lake of Blood. For there is a great lake there near the place which was the site of the battlefield where our valiant princes of Vaspurakan were martyred. There gathered all the multitude of the numerous crowd of refugees from the provinces of Albag, Zarehvan, and Ake, and from the mountainous regions of Alz and Arnoy-otn, one side of the mountain of Jol and the other. They were an immense multitude swarming around the mountain like locusts or the numberless sand of the sea. As in a great and impregnable fortress they had taken refuge in the valiant general Gurgen and the Armenian troops with him. He had sent his mother, the princess of Vaspurakan, to the general Bugha so that henceforth he and his land might have peace: 4 he would deliver into his hands the principality of Vaspurakan in exchange for his brother, while he and all his would render submission to the caliph, paying the traditional amount of royal tribute.

When the princess had entered the camp and come before the general, she spoke with him politely in appropriate terms about the matter on which they had come. The general responded to her peaceably, saying: "Remain here until I dismiss you and fulfill the desire of your requests for which you have come." He ordered her to be left at liberty and arranged for her a daily allowance worthy of the great lady Hrip'sime.

The troops who had pursued Gurgen reached the borders of he land where Gurgen and his army were, and camped on the bank of the river called Zav. The generals of those troops were the following: Muk'adam, Yusp' from the city of Tiflis, Yusp' son of Raham, and Abuheshm, lord of El; with them was the army of Hamdoy, emir of Persia. They sent messengers to Gurgen asking him to come to them without hesitation or fear and without any suspicion; that they should merely meet each other in peaceable friendliness; he would be honoured by them with gifts at the general's orders, and he would rule in his brother's stead over his entire territory. But he sent as messenger to them a certain Abdlay who was known to the general, to see if they were making trustworthy proposals through the messengers or whether they were trying to destroy him by deceitful trickery. However, they did not reveal their wicked plot and sent him back to say that he Gurgen should come to them without any hesitation. Two, three, and even more times they confirmed the same thing with oaths, that he should come to them fearlessly and boldly. They themselves sent all their troops off and came up to the Armenian force saying: "Behold, we have sent away from us our troops and there are but few with us. Do you likewise come with only a few men, more or less, and let us see each other." Then he entrusted his forces to

Mushel son of Apupelch, brother of Gurgen [This Gurgen is not Ashot's brother, but the son of Apupelch. Gurgen Apupelch was mentioned above in detail.], and went himself to follow the messengers who had brought the invitation. When the greatest nobles restrained him he would heed no one, so they all burst into tears and wept. Before he reached the enemy generals but was still at a distance of about two miles from them, they had decided that if he were to follow the messengers "we shall seize him, his troops will be discouraged, and we shall easily defeat them."

When it was about the third hour of the day, on a Sunday, behold, detachments of cavalry advanced in the direction of the ruin called Smbat's castle, for it had been destroyed in previous times by the Persian army. The flags of each group glittered in the sun; the mountain was filled with a multitude of soldiers: and the army of the fugitives saw the gleaming of armour, the sparkle of swords, and here and there men fleeing in terror like sheep from wolves. The troops were informed of the action, and they obeyed, for the voices of the army commanders were very loud. The earth resounded as the whole host raised a shout, as if the mountain would collapse from its foundations. There was an awesome thundering shocks, and echoes. From the bright shining of the arms and glittering of the swords, from the glinting of the fully armed horses, the mountain seemed to be burning with fire. Or it was as if some thunderbolt, loosed from the clouds, was casting down flames as at the time of hail and rain. Such was the impression from the neighing of the horses and their rapid attack

The Armenian army still remained unconcerned. The service of the day came to an end, the priests read the holy gospel in every part of the camp, and when they had finished their prayers and said blessings, they gave glory to God and said "Amen."

Then they sat down to eat bread. Only Lord Apumkdem and his entourage kept watch by night and observed the intention of the [enemy] army. He was still on horseback when they rushed on the camp. He commanded everyohe to arm and equip themselves with swords and to prepare the armour of their elite horses. He himself anxiously made haste to marshal the Armenian forces, to form line, and prepare for battle. His groom brought him his best horse; mounting, he rushed off after Gurgen. On coming near he uncovered his sword, helmet, and cuirass which he had put on, and shouted at him so that perhaps at the sound of his voice, the shining of his armour, the gleaming of his sword, the neighing of his valiant steed, and his rapid gallop, he might be warned, turn at the noise, and be saved from the destructive course on which he was bent that would cast him into the teeth of those bloodthirsty beasts. It happened that he Gurgen raised his eyes, saw the rider bearing down on him, and realised that it was a messenger of grievous news; "for he has a naked sword in his hand and pursues us all by himself." He turned his horse's bridle towards Apumkdem, and after encountering each other they returned to their camp. The troops, taking courage, ran each to his arms; mounting their elite horses, they came forward and stood gathered in one spot, forming a solid compact mass, a single man as it were, or a high rock. They stood firm and solid, having the impenetrable strength of iron. Like a wall of adamant, so they set themselves as protection for the vast number of fugitives, ready to die like a brave shepherd for his sheep. Before they had yet reached the Armenian force, the general Gurgen made haste to send messengers to Apuheshm and the commanders with him to beg for peace until a response from the general-in-chief should reach him. But they did not heed his request. Although he promised to give them treasures, villages, and farms, sealed in writing and confirmed

by witnesses, yet despite this they did not command their army not to go out to battle.

When the Armenian commander realised that he was unable by any means to appease them but that they had given a general order to go out to battle, then Gurgen ordered his own force to prepare, to form ranks and a line against the Muslims. He himself raised his hands to heaven, and praying with copious tears repeated the Thirty-fourth and Sixtysecond Psalms. At that moment the Muslims attacked and joined battle, their captains rushing after the army. The Armenian force marched out to oppose them like an indestructible rock, in order of their various families:

From the house of the Artsrunik: • Gurgen and Vasak and Pelch and Mushel and Sahak and

Apumkdem and Ashot. • Gnunik': Vahan and Shapuh and Apuset and the patrik

- and Apuselm and Vardan.
- Gazrikk: Apuselm and Vasak and Vahan.
- Amatunik: Mushel and Asit and Sahak.
- Varazhnunik: Mleah and Rstom and Varazshapuh.
 Entrunik: Georg and Yise and Sahkawn.
- Akeats'ik: Vasak.
- Vahevunik: K'abarak and Khrakhat.

• Andzevats'ik: the patrik and Georg, Davit and Hasan and the general Davit.

These set out and arranged the battle line. The commander Gurgen himself stood on the left wing of the line in support of the force of infantry; the right wing he had entrusted to Apdlmkdem [Usually spelled Apumkdem.]. The others took their places in order along the line and addressed petitions to the Lord in prayer. The deacons offered benedictions, while the priests raised up the holy gospel and their banner—the holy cross. The ministers completed the Lord's service and the choir sang the song of victory over Pharaoh: "The Lord crushes battles; the Lord is his name." [Cf. the preparations before the battle of Avarayr as described by Elishe.]

Others sang the benediction of the dew born in the furnace to summon the angel of God to their aid [A reference to Daniel 3.50 ff. (in the Armenian and Greek, but not in the English Bible).]. As for the mass of the common people, some set their hands to battle with stones.

With a resolute assault they joined battle. They crashed into the Muslims' force, broke their ranks, and turned them. Roaring like dragons, they struck like lions and smote like wild boars; they delivered the enemy to massacre and defeat, each striking his opponent to the ground and rushing after another. From the tremendous shock of mingled lances, from the shining of the armour and glinting of the swords and whistling of the bowstrings it seemed as if fire was shooting out like lightning from clouds, and the mountain appeared to be aflame. The battle continued until the tenth hour of the day. They inflicted terrible losses on the Muslims; the number of the killed was eighteen hundred, not including the many wounded, those disarmed, and the prisoners. Even the priests among the multitude of fugitives took part in the battle, for it was a spiritual battle and not a physical one; they were fighting for the holy churches and the people of God. They struck the enemy troops, turned them, and put them to flight. Some of the Armenians pursued the fugitives until the night had become quite dark. They expelled them from Armenian territory, some in the direction of El and others in the direction of Atroatakan and Persia. A certain Ashkhe who had come with the royal army from Gard in Persia 2 did not join in the battle with them to be captured but remained aside with about two thousand men. When the army was defeated, they spurred their horses and were the first to flee. Then they the Armenians returned to plunder the dead.

But not only the valiant Armenian heroes fought in that great battle; there were also incorporeal, heavenly hosts fighting with the Armenian army. For when battle was joined and the lines faced each other, suddenly a man in the likeness of light came and stood in the ranks. He wore around himself a garment of blazing light, shining like the morning star. In his right hand he had a sword and in his left a censer full of incense. He was mounted on a white horse and fanned the smoke towards the enemy. There was a sweet smell as he wafted the smoke around their faces. As the smoke grew thicker the Armenians took strength, and when it lessened they had a little respite from the enemy.

ARTSRUNI HISTORY CHAPTER 5

[Second Part Of The Same; Gurgen Heeds The Summons Of Bugha, And What Occurred; And The Letter Supposedly From The Caliph Himself]

Then the generals became undecided in their plans because of the losses inflicted on their army by the Armenian troops. They were unable to write and inform the commander-in-chief, yet they could not hide it and keep it concealed. [Cf. the indecision of Mushkan after Avarayr.] They could not appease their commander by silence and excuses, yet they would not agree to indicate the number of the killed clearly and openly: that a mere nine hundred men had mightily vanquished fifteen thousand [Of the 15,000 total, 1,800 had been killed.], since they had discovered for certain that each Armenian had struck down two of theirs, let alone the wounded and the disarmed and the prisoners. Unwillingly they had to set forth the course of events in all its details. In their terrified awe of the commander they made reference to the event of the vision, when the angel of God had appeared from heaven. Thereby they somewhat calmed the mountainous waves and quieted the tumultuous billows, and appeared the tyrant's fury. A command was sent throughout the whole country that each man was to return to his own land and re-posses his inheritance, to dwell in peace and be independent, and that no one was to be expelled from his own dwelling to a foreign land to live in exile. This command they put out to support their own deceitful trickery, whereby they hunted down and misled the Armenians.

Then once more he despatched Hamdoy the Persian emir and Het'm of the royal army, a Turk by race, accompanied by ten thousand cavalry fully armed and in a greater state of readiness than the former army, with a letter written and sealed but full of deceit and treacherous falsity in accordance with the cunning of the sons of Ismael. Coming to the place where the Armenian army was encamped, they had the letter brought, full of the poison of devilish intent, like quivers full of arrows secretly poisoned to let fly from one's bosom at the target.

When he had read the letter and the oaths made on the privy parts of their women and their erring legislator Mohammed agreeing to surrender to him the authority of his native principality, Gurgen followed the desire of ambitious glory—of which he was frustrated.

As he approached the camp the various battalions of the army deployed before him. When he entered the general's presence, the latter paid no heed to the damage and losses of troops, nor did he charge him with being a rebel. Rather he had the standards and flags unfurled, placed a princely crown on his head and royal garments on his person, girded him with a sword, and set him on a finely adorned mule. With an escort in front and behind in uniform and fully armed, to the sound of trumpets and the beating of drums and other musical instruments echoing around them, with a host of armed soldiers on every side, sergeants and axe bearers to push aside the pressing throng, a herald cried out: "The principality of the land of Vaspurakan has been placed in the hands of Gurgen, to rule over them in the place of his brother Ashot."

After three days had passed they had a letter taken to Gurgen; it had been written by Bugha and was full of gall. It was sealed with the caliph's ring as if it had come from the caliph personally and from court. This is the text of the letter which they forged and gave him: "To Bugha, commander-inchief of the whole empire of the Muslims, from Jap'r ruler of sea and land, the equal of our legislator Muhammad and faithful mediator between God and man, king over all the nations of the southern realm, in whose hands are entrusted death and life. I have sent you to attack all living things in the land of Armenia.

And I have given into your control my army with my outstanding generals from all the races whose kingdoms have been subjected to me, so that you might rapidly deliver to us Ashot and his brothers. But now that you have reached Armenia, you have gone over to my enemies' side and joined those rebels, since you have delayed in carrying out my orders. So when this letter arrives, send quickly to us in bonds Gurgen and his family and those nobles of Vaspurakan. Otherwise, Ishall see about you."

When they had given Gurgen this letter which supposedly came from the caliph personally, Bugha said: "Read this; do not put any blame on me or think that I have come to you treacherously to treat you faithlessly and be false to our oaths. See for yourself and know that I have no guilt in this matter or authority to release you."

Then they put his feet into iron fetters, and likewise Lord Grigor Artsruni who rendered a fine confession in Christ before the caliph. Setting them on camels, they marched them to Samarra and shut them in the royal prison where Prince Ashot and other nobles from the Artsruni house already were.

At the same time, when the princess saw that her sons had been carried off into captivity, she herself followed them, tearing her hair, rending her garments, moaning, and sighing, as the prophet Amos said: "Shave and cut your hair over your delicate children; extend your rending like that of the eagle. For they have been taken from you to captivity."

Then all the Armenian nobles began to scatter and separate. Each went to occupy his fortified place, and they made haste to enter the castles and fortresses in Vaspurakan. Their troops scattered and dispersed over the whole face of the land. This occurred so that the saying might be fulfilled: "Raise a sword against the shepherd and against his companion. I shall strike the shepherd and the sheep will be scattered." And again the aforementioned [prophet Mohammed] says what the Lord said by the mouth of the prophet.

Then the general realised that he had succeeded in everything as he had wished and in accordance with the impious caliph's order: the evil plan that they had formulated against the principality of Vaspurakan had been carried to conclusion; he had removed all the powerful men; henceforth

there remained no one in a position to resist him. From then on all the races of Muslims [Thomas has especially in mind Arab settlements.] began with fearless audacity to scatter and spread over the face of our land; they had followed Bugha with their families, and had set to dividing the land among themselves. They cast lots, drew boundary lines, and dwelt unafraid in the castles of the land. For the man of whom they had been somewhat nervous-on that score they had been rendered even more secure. So there was great suffering throughout the entire land such as there had not been from the beginning of the world nor will ever again occur. Villages, farms, and towns were turned into ruins and stripped of their charm and grace; the different plants and trees in their varieties on the face of the earth withered. As the prophet Joel lamented over the misery which had befallen, saving: "The land was first like a delightful garden, but later became a plain of destruction. And as fire runs through reeds, so it happened to us. Just like the locust, the caterpillar, and the grub with the grasshopper" set upon the fruit-bearing trees and the sensitive pasture, in such fashion they destroyed and consumed the resources of the human race and their property. just as this is described in the book of the prophet Joel's vision.

Having then given the order to sell the host of captives among various nations to whomever they pleased, he himself went to the city of Dvin which he had prepared as his winter quarters until the springtime. He kept with him many prisoners, having ruined our land both on coming and going.

ARTSRUNI HISTORY CHAPTER 6

[Concerning The Evil Undertaking Of The Artsruni Nobles; And The Confession In Christ Of Lord Grigor Artsruni And Lord Yovhannes, Bishop Of Artsrunik And The Priest Grigor; And Their History]

And Their History] Our annals [lit., "memorials,"] at this point of the narrative are grievous, sad, and full of bitterness, concerning the undertaking of our great princes and nobles. My story is full of tears, and I am incapable of telling the details of their ruinous error in being false to the orthodox and pure apostolic confession of faith of the Catholic church in the Father and Son and Holy Spirit. I am reluctant to put in writing the perdition of our lords and the misfortunes they brought on their souls rather than their bodies.

Nonetheless, though unwilling yet I am forced to set it out in order, briefly and in short. I shall summarise in a few words the history of these events, for it is impossible to pass over in silence or to hide the immense and terrible misfortunes which befell us.

So I shall abbreviate what was done openly, so that you will believe without doubt the various details of the events accom plished in their time and later, and trust me as a truthful and honest historian.

It happened one day of leisure, while the prince [I.e. Ashot Bagratuni.] and his entourage with their families and others not related were still in prison that suddenly the trumpets sounded with a strident blast to inform the city that the king (caliph) had taken his seat in the tribunal. Heralds proclaimed that all the magnates of the city and the nobles and princes from the royal line were to gather there in order to subject the prisoners to an investigative enquiry. All the magnates with a mass of common people rushed to the scene, not only to obey the king's (caliph's) command at the call of the trumpet and the royal heralds, but anxious to see who and what sort of people these were, the fame of whose valour had reached the ends of the world. Despite all his powerful might the king (caliph) had even been forced to assemble an army from among all the nations in his entire empire, the kings and roval princes subjected to his authority; he (the caliph) had exerted himself with great effort and over a long time, incessantly by day and night; he had been weighed down by great uncertainty and suspense; sleep at night had not seemed sweet to him, and the delights of the daytime he had regarded as naught. He had found scarcely any way to draw the Armenians into a deceitful trap through the astute dissembling and treachery of the generals of his empire. So everyone ran 1 to see them and to discover what the outcome of the tribunal would be.

The king (caliph) came out, sat in the tribunal on a high dais in the midst of the vast multitude of common people, and ordered the prisoners to be brought so he could interrogate them and hear their response. He (the caliph) sat with eyebrows frowning; he was puffed up and full of insolence, acting in an arrogant and haughty fashion. He boiled up and vomited out the bitterness of the fetid bile of his poisonous and evil disposition. Excited to an uncontrollable passion and hot-blooded, tempestuous furor, he began to pour out his mortal venom on the captives like the venom of a snake, indiscriminately scattering and spreading it out to the ruin and destruction of many.

When they were standing before the king (caliph), he questioned them disdainfully, in jeering terms full of presumption. With deceitful fraud he disguised his meaning, saying: "Who are you, and from what country, and what are your names? Have you perchance really rebelled against me?" They responded saying: "Why, Oh pious king, do you speak with us as if we were obstinate subordinates, insignificant, wild, and ferocious? Before subjecting us to punishment with cruel tortures, by striking us with your words as if with stones you have plunged our souls into consternation. You know who we are, whence we come, and from whom we are descended. What our names are is perfectly clear to you. We are not rebels against your imperial rule. But our troubles have been multiplied. Since we have sinned before the Lord our God and have disregarded the rules of his commandments, God has delivered us into your hands. So behold we have come and stand before you, Imperial Majesty, ruler over life and death [A title applied to the caliph]; as the Lord may command. let it be."

The king (caliph) began to speak, saying: "From long since, from our royal ancestors down to our present time, we have held many races and kings in subjection to our empire, but we have not paid such care and consideration to any of them as much as we have to you and your country. Yet you have been perpetually meditating resistance to me and refusing to accept the governors and over seers of our land, the roval administrators whom we sent you. You would gather troops, form cavalry, provoke battles and wars, draw up battle lines, and destroy our armies with the sword. Our kinsmen [the Arab governors] you used to beset with grave troubles, you ruined the land and held back the taxes* due. [* The Jizya or jizyah is a per capita yearly taxation in the form of financial charge on non-Muslim (Kafir) subjects (Dhimmi) of a state governed by Islamic law. Muslim jurists required adult, free, sane males among the dhimma community to pay the jizya, while exempting women, children, elders, handicapped, the ill, the insane, monks, hermits, slaves, and musta'mins-non-Muslim foreigners who only temporarily reside in Muslim lands. This tax makes sure that the Kafir communities are in a constant decline which is wanted by the Muslims. See: Sharia law.] But behold, we paid no attention to all that, in order that the affection and mercy which we claim to have for you might be manifest. However, since we now see you, personable and handsome, with noble countenance, decorous and elegant, we realise that you are true sons of kings of that country, worthy of compassion. You are men of valour, and from your appearance it is obvious that there is much strength in you. For you have done so much harm to me, yet here you stand in the tribunal before me with cheerful and joyful faces, like innocent and benevolent men, full of our kindness, with unrepenting audacity. But I, sparing you, will not execute you as your wicked deeds and the damage you have caused me deserve. Without suffering tortures and cruel torments, submit to us and our legislator Mahumaf: receive his faith and divinely bestowed religion, which is far removed from falsehood and full of whatever is opposed to falsehood. Abandon your vain and erring cult [Roman Christianity with its Trinity cult which is considered herecy in Judaism and Islam.], which in your great folly you have built up concerning Christ. Then we shall disregard your harmful acts against us of which you are guilty; your lives will be spared, and you will live and rule over your land and your homesvou and your sons. You will not leave your habitation through death by torture and take up your abode in hell.'

The holy patriarch [Thomas is referring to the bishop of Artsrunik, not the Catholicos John V.J Yovhannes made answer with the great princes of Armenia: "In the religion of your royal empire and of your leader it is written that the witness of a single person is not veracious or reliable, but most trustworthy and acceptable is the witness of many concerning matters great and small, and concerning life and death. You disdain and reject the argument of one person unsupported and uncontrolled, as is your so-called prophet Mohammed; for there is hardly a single person who bears witness to the truth with him as teacher, let alone many. Now there are one hundred and eleven prophets 4 who produced true and accurate testimony of Christ's divinity in each one's time, as if from a single mouth, apart from the gospel and his apostles. We have received and believe in the truth; we cannot exchange the truth for your vain, fabulous, fabricated, fictitious, bedesined, erroneous teaching. In whatever fashion your desire commands, let punishment be inflicted on us. We are ready for bonds, prison, beating, fire, sword, water, for torments and every contrivance of torture." These and more similar, elaborate and well contrived arguments they put forward for faith in Christ. But since nobody at the time set them down in writing, as is the custom for kings, 1 we did not reckon it appropriate to repeat them.

Then the king was filled with anger; the colour of his face turned livid; he became insolent, and roaring like a bloodthirsty wild beast, ordered them to be taken out from the tribunal. He sent word that: "It is not the custom for our majesty to allow anyone to enter into debate or to give such long speeches as we have done for you. We shall do it no more. Now, because I spoke to you in flattering terms, perhaps you were led astray by that, were deceived and confirmed in your folly. But I shall spare you, if* you, without delay and without troubling me further, abandon the worship of Christ, save your souls and live. Then I shall forgive you the crime of your rebellion, and you will be on good terms with me and rule over your land." [* The caliph is here acting according to his Mohammedan Sharia law in which he is required to to persuade the Kafirs (non-Muslims) to become Muslims. This is a procedure offered only to the so-called "People of the Book" (Bible) meaning: Jews, Christians, Gnostics, Zoroastrians, etc. Other non-Muslims such as Indians or Chinese would be slaughtered without any more consideration.]

Although they had not intended to turn in the slightest from the worship of the Son of God since the faith of the holy apostles was implanted in their hearts, yet because it had no roots it was immediately dried up by the heat of the devil. For at his bellowing sparks were struck, and "through his nostrils came forth the smoke of a fiery furnace," as it is written in Job. And because of their feebleness and their unstable and fickle minds, they loved the glory of men more than the glory of God. For: "This people serves me with their lips, but their hearts are far removed from me." They turned aside from love of the Deity; terror of death fell on them; and especially since they did not wish to abandon the vain life of this transitory world, they said: "We accept the royal commands," with the intention that outwardly they would appease the king, but inwardly they would preserve their confession in Christ. But it is impossible for the two to dwell together; nor can anyone serve two masters, as the Saviour said and which in its place I shall be obliged to show.

Then they were quickly circumcised as Muslims on the spot, following the example of Bagarat Bagratuni, who had been seized by another general in the city of Khlat. He had been prince of Taron, was taken to Samarra, and became an apostate. He opened the wide and spacious road, the path of destruction which leads to irredeemable perdition—like Jereboam, son of Nabat, who sinned and made Israel transgress, as is written in the Book of Kings of Israel. The memory of his going astray, whereby he seduced and destroyed many nations, remains from generation to generation for ever.

But that Vasak whom we mentioned above among the great nobles, since they were related to the Artsruni family, had gone to Samarra of his own will before their arrest and had apostatised. In him Satan had taken root with all his hosts: through all his snares he had cunningly bound with an indissoluble belt his thrice-wretched soul. Satan had formed him into a tool useful for every art of deceitful knowledge, as a convenient snare with poisonous arrows to be loosed in the darkness at benighted souls. So did this man act, putting on himself as an indissoluble and inseparable sheath the power of the devil. But lest I expatiate too long on his shameful error-wicked, selfish, unrepentant, and without scruplelet us eject him from the annals of the princes, since he did not hate the lawless one like the shameless one. For even worse than to sin is not to consider oneself among the transgres sors, since for those of right mind that is shame worse than all cruel torments. So let his memory not be with those who, although they erred and perished, yet repented and stood upright again after their return from the great camp of captivity and from the teeth of the tyrant. But he, both in his going and his returning, kept to the same mind and the same error, wretchedly brazen. As they tell of him, he turned away from God and averted his face from the true confession of faith and from worship of the Son of God, as [Scripture] said: "They turned their backs to me and not their faces." And in accordance with his perverse depravity he inherited the consequences of his perversity. Without an opponent he was defeated; without arms he was wounded; without a storm he was shipwrecked; in his self-willed obsession he went astray and followed the love of power, losing his soul to irredeemable perdition. His life was without faith and his death without hope.

On the other hand, the thrice-blessed saints Lord Yovhannes, bishop of Artsrunik', the blessed priest Grigor, and Lord Grigor Artsruni, taking courage in God, stood up in the tribunal—the great arena of spiritual warfare—with fearless audacity. In brief but eloquent terms they expounded before the tyrant coherent arguments from the divinely inspired Scriptures concerning faith in Christ. They rebuked their erring legislator and trampled under foot their promised gifts, saying: "It is better to die for Christ than to enjoy life for a while in sin."

Then the tyrant ordered them to be bound in iron bonds and placed in prison. It was appropriate for Bishop Yovhannes to take on the yoke of his homonym John the Baptist, who had been arrested by Herod and imprisoned. It was proper for Lord Grigor Artsruni not to disregard his homonym Saint Gregory and to endure being plunged into darkness in the deep, gloomy pit in bonds. It was very befitting for the blessed priest Grigor to be united with them and complete the number three, that Christ might not be separated from them, as Christ said: "Where two or three are gathered in my name, there am I too among them." And together they sang the psalm: "For your sake we die continuously. We have been considered as sheep for slaughter."

THE GRAND BIBLE

Then the tyrant realised that he had been worsted by these holy men, especially by the valiant Grigor. For he thought that it would be easy to ensnare them like those who had turned away from the faith. However, since his expectation was not realised but rebounded upon himself like a missile [lit. "catapult". But here a missile fired from a catapult must be intended.] from a wall as strong as adamant whose head is Christ, he grew stubborn and ordered his servants to bind them with double chains and to cast them into an underground dungeon.

When the saints realised that battle with the evil one was not something transient, they too armed themselves for a lasting confrontation. With ceaseless psalm singing they perpetually sent their sweet-odoured prayers on high, looking for victory in the great battle from the all-victorious Christ. So they armed themselves for warfare, putting on the breastplate of righteousness and girding themselves with truth, shoeing their feet with the readiness of the gospel of peace, girding themselves with the word of Christ as a sword, which is sharper than all two-edged swords; putting on their backs with all their heart unsullied faith as a shield. They raised their hands to heaven like a strong bow: the force of their prayers they shot forth like an arrow at the target from a wide-arced bow; decapitating Satan they struck him as a corpse to the ground. For their victory they offered thanks to Christ, saying: "Blessed is the Lord our God, who instructed our hands for war and our fingers for combat," and what follows. In that combat not only the blessed bishop and the ascetic priest fought beside Lord Grigor but also the fiery hosts; for "armies of the Lord's angels surround those who fear him and preserve them."

The saints remained imprisoned for three years in the under ground dungeon. They besought the most merciful God that they might fill out this temporal time in secure and firm faith; full of tears and sighings they recalled the heavenly Sion. the holy metropolis-like the people of God sitting beside the rivers and weeping as they recalled their Sion; or like those three young men, bound and thrown into the terrible furnace, they repeated all night their same blessings and begged the giver of all, Christ, for the same dew of blessing. They were greatly consoled by the sweet saying of Christ's, which is an indestructible maxim for Christian souls: "Come to me all who labour and are laden, and I shall give you rest," and: "Who denies himself for my sake will find himself." For these three years the saints were sustained by the work of their own hands, as Paul himself, adorned with the grace of God, said: "These hands served the needs of myself and of those with me.

But in the fourth year that evil man set up instruments of torture even more refined than before, to cast Grigor into the crucible of affliction. For shining pure and refined gold attests in itself the image of the Son of God. As Saint Gregory, the Illuminator of Armenia, said: "My habitation was among snakes, and they twined themselves around my limbs." On the other hand, Lord Grigor dwelt among beasts in human form, in the company of ferocious barbarians who are crueler to us than poisonous beasts. But he had good consolation from the saying of the prophet: "A young child shall plunge his hands into a hole of serpents, yet they will not harm him." He begged Christ that he might leave the body and enter God's presence. Christ did not disregard his pleas, but permitted him to complete the holy Lent, being crucified with Christ, up to the duty of Easter. And the champions rejoiced in the days of Pentecost; they sat at table with Christ like young men of the wedding chamber. But fifteen days after the Ascension of Christ Grigor attained the call of Christ, as Christ said: "I, when I ascend to the Father, shall draw everyone to me." So he raised his hands to heaven, saying: "Remember me, Lord, when you come with your kingdom. He blessed them all, entrusted those far and near to God's grace, commended himself to the blessed bishop and the ascetic priest, and with a good confession, in the month of Hori, on the fifth day of the month, a Friday, fell asleep in Christ Jesus our Lord-to whom be glory for ever. Amen.

When the believers saw that the holy lord Gregory had fallen asleep with a good confession, they offered thanks to the omnipotent Christ who had strengthened the holy martyr and put Satan to shame. The Christian nobles came before the king and asked for the saint's body. Taking it away, they wrapped it and buried it in the tomb. All Asorestan celebrated the day of the saint's death with great rejoicing in Christ Jesus our Lord—to whom be glory for ever. Amen.

ARTSRUNI HISTORY CHAPTER 7

[Concerning The Heresy Of Bagarat Bagratuni, Which Was Added To His Apostasy From Christ For The Destruction Of Many; Refutation In Brief]

At the time of his apostasy Bagarat said that apostasy because of danger of suffering does no harm if one secretly keeps in one's heart the confession of faith. This the Elke-sites also [claimed]. But it seems to me that the heresy of the Elkesites was long ago quenched and suppressed by the valiant holy teachers whom God placed in the church. It did indeed appear as a bitter root, and many were contaminated thereby. So come, let us set forth a brief refutation of them from the Holy Scriptures, so that the impiety of that sect may be extirpated from the churches of orthodox believers. Let us turn to the Elkesites, who were those who at the time of persecutions fell into the error of idolatry. And Elkesai had the thought that if anyone in danger of suffering turned to the worship of idols it was of no account, provided that his heart kept true the faith of Christ. At that time a priest Novatian in Rome despatched people to refute the Elkesites; and when the persecution ended he would not receive any of those who repented of sacrificing to idols. He prevented many from idolatry, although he also led astray by despair those who turned to repentence.

He ruined the whole world by observing trifles, although later he did receive penitents. But both sides were at fault, although they went astray in the cause of piety. So lest we too fall into the same error, let us learn from the divinely inspired Scriptures and travel the level road; let us not be diverted to the right or the left. Let us purify our lips by uttering a pure confession and keep our minds unsullied in the true faith. For if the two do not act with a single piety, then there is no profit for either. For if the sail of a ship is not deployed on both sides, a straight course cannot be steered, and it may be shipwrecked by the force of the furious wind piling up the waves. If a bird does not fly with both wings, it cannot rise to the heights. Likewise, unless the faith of the heart and the confession of the lips are preserved intact, one cannot follow the true confession in Father and Son and Holy Spirit. "For with the heart we believe in righteousness, and with the mouth we confess salvation," as the apostle said, like those who honour with the lips and disdain in their hearts. For "this people," says [Scripture], "honour with their lips, and their hearts have gone far away from me." For it is quite impossible that he who believes with the mouth could deny with the lips, since: "A good tree cannot produce bad fruit, nor can a bad tree produce good fruit," as the Saviour said. And else where: "Surely they do not pluck grapes from thorns, or figs from thistles?" Or: "Who denies me before men, him shall I too deny before my Father who is in heaven. And who will confess me before men, him shall I too confess before my Father who is in heaven." Thus both by threats and by promises he demands the fruit of our lips that confess his name. Again similarly Paul says, describing the pledge of the law: The word is near in your mouth and in your heart, that is, the word of faith which we preach." And to Timothy he wrote that the power of the faith is trustworthy: "If we deny [him], he will deny us, even if we do not believe, he remains faithful." See also what the blessed Isaiah says: "I am a man and I have impure lips: dwell amidst a people with impure lips." He does not accuse himself of this as regards any denial or because of the congregations, but because they had not reproached the king who had acted impiously outside the law. But if the prophet accused himself so much for a small matter, how much more worthy of laments and tears are those who are impious with their lips towards the Son of God. As Paul lamenting, says as a threat: "Think what severe punishment the man deserves who trampled under foot the Son of God, profaned the blood of the new covenant, and insulted the Spirit of Grace." See, beloved, that to insult is the utterance of the tongue. And the Creator of the tongue does not permit it to utter denial. For it is no one else who created the tongue. and there is no one else who made the heart. So away with it.

See also another saying similar to this one from the book of the Acts of the Apostles. Simon the Samaritan approached Philipp concerning the Spirit of the gifts of tongues, and for the duplicity of his heart how was he punished? What did Anania and Saphira in the matter of the estate and the falsity of the same? Understand and consider. For unless honesty of heart and truth of the mouth are equally matched with confession of the faith, they are worthless, to be rejected, and alien to the holy, apostolic church. Since it is unbefitting that good and evil be set together, or light with darkness, or health with sickness, likewise it is not possible for the heart of the believer to be soiled by his lips. For it is written: the word is spoken from the abundance of the heart, since thought is a conception of the mind and speech is the offspring of intelligence. But as is the root, so are likewise the branch and the fruit. If the origin is pure, then is the root; what is the branch, the same is the species. Let these few words of mine suffice with regard to those heretical errors.

Following the divinely inspired Scriptures, let us keep unsullied the faith of our hearts, and the confession of our lips pure, according to the example of Saint Paul mentioned above: "The word is near in your mouth and in your heart, that is, the word of faith which we preach." And David says: "In what I believed, the same I spoke." And Paul: "We believe what we say." And again Paul: "If you confess with your mouth the Lord Jesus, and believe in your heart that God arose you will live, since with the heart we believe in righteousness and with the mouth we confess salvation."

Since so many testimonies have been brought together, let us not follow the tellers of fables or walk the untrodden path. But when we are brought before kings and judges for testimony concerning me, let us keep a good confession of faith and bear witness like the Saviour before Pontius Pilate. As Paul said to Timothy: "Do not consider shameful the witness of our Lord." and David: "I spoke your testimonies before kings, and I was not ashamed." And the Saviour: "If anyone think my words shameful." Here let us halt this discussion and hasten on, lest by stretching out this refutation we fall behind in the composition that lies before us—the matter of the history.

ARTSRUNI HISTORY CHAPTER 8

[What Bugha Did After This In The City Of Dvin; And A Memorial Of The Martyrs]

Just as a little above we described the sea dragon and its natural habits, so also now I shall again recall it for the sake of the plan of our history. When the creatures that live in the fathomless depths feel the arrival of the warmth deep down where they have sheltered from the blowing of the icy north wind, they stir; and when they feel the warmth they greatly rejoice, happily exulting and elated to reach the warmer places. They attempt to reach the ponds by the edge of the sea, and on the seashore they settle and spend the time of summer. But because of the gigantic and obese mass of their heavy bodies it is with difficulty that they make their upward movement. And it happens that collapsing in narrow and shallow places in the water one may remain stuck there immobilised, and easily fall into the hands of hunters. But when it moves, all the fish and beasts of the sea are terrified. because these same fishes and serpents with other creatures are its food [Thomas seems to have in mind the life cycle of seals and walruses. Basil, Hexaemeron 69 A (a work well known in Armenian), refers to the monsters of the deep, but not in terms close to this passage.]

Again, when the strength of the warm south wind fades, the sun declines in its course, and the winter season stands at the door: when the northern wind blows, intensifying the cold, strips from the tops of lofty trees their leaves, and benumbs the strength of the roots; then the dragon is afflicted with distress and anguish by the power of this mighty force. Hastening to descend to the deep and warm places of the unfathomed depths, there he winters. And the creatures there he treats as those above-through them he provides for the need of his hunger until the spring. Thus he hibernates just like the other birds and beasts who naturally divide the year into two or three summer and winter abodes in order to surivive. They live during the spring on the high summits of mountains or in the clefts of rocks or on tall trees. When the north wintery wind begins to blow continuously, they hastily repair to lower ground, take cover in warmer places by themselves, and dwell alone according to their kind,

In such fashion too, the general Bugha, when the summer warmth arrived, thrusting himself up as it were from the bottom less depths, departed from the caliph's presence with a numerous and mighty army and came up onto earth in the northern region at the entrance to Armenia. As he moved, fear gripped the whole country and its rulers; attacking them, he devoured like a dragon those he was able to strike. Just as, because of its tremendous strength, we have drawn the example of a dragon rising from the sea-that is, from the land [of Iraq] and the unfathomable depths, from the royal capital-in similar fashion one must understand the other less powerful whales* and the smaller fish [* Ket, as in Gen. 1.21. Here Thomas implies that Bugha emerged from Dvin like a sea monster from the depths, but that the caliph was also a dragon stirring in Samarra. By comparison with him, his subordinates such as Bugha were like a ket.]. For no one was able to resist him. And our account is not without witnesses, as we described above in our tale of him with the evidence of the prophets' words. Indeed from the outcome of events they know well who in these times survive and were then present there

So the impious general, when he had carried out all his cruel intentions against the land called Vaspurakan, entered the warmer place, the city of Dvin, to winter there. He dismissed the troops with their various generals who had come to him from every clan in Armenia so they could winter each in his own home, having commanded them all that when the spring season approached they should hasten without delay to join him fully prepared. On entering the city he had with him numerous prisoners and captives without number whom he sold to foreign races to be led into slavery and depart far from the patrimony of their ancestral homes.

At the same time, when he had fulfilled all his wicked desires against the holy church and had destroyed many of the band of Christians, turning sons of light* into sons of darkness*, and heirs of God into the portion of Satan, and fellow heirs of Christ into companions of demons, and inhabitants of the kingdom into inhabitants of eternal fire—then he planned to remove all the ministers of Christ from loyal worship of the true God, our Lord Jesus Christ. [* Terms in the Dead Sea Scrolls, "sons of light" being righteous Jews, "sons of darkness" being non-Jewish invaders.] Thus he became haughty in the false presumption of his mind. He ordered to be brought before him some of the blessed men of noble rank, and others of the cavalry, by clans and families. But they did not agree to join the ranks of the apostates. Then he thought that through tortures he would easily ensnare them among those lost and gone astray from the faith of Christ. However, not even in the slightest were they deflected to his arguments; nor did they agree to be deceived by wealth; nor did they pay heed and obeisance to the glory of wordly desires. For they knew and realised that the life of this world is vanity and falsehood, an easily forgotten dream and quickly fleeting shadow: whereas the life and gifts which God has prepared for those who love him and who endure in the true faith are eternal and perpetual and unending. Similarly, the torments for the impure apostates from the holy and pure Christian faith are eternal and everlasting. As precept we have to hand the Lord's saying: "Who denies me before men, him shall I too deny before my Father." And: "Whoever wishes to save his soul will lose it"; and: "Who lost his life for my sake will find it." And: "What will it profit a man if he gain the whole world and lose his soul?" Or: "What ransom will a man give for his soul? For the Son of Man came to seek and save the lost." Meditating on other such sayings that are written in the holy gospel, they laughed at, jeered, and mocked the tyrant, despising him as a worthless child or crazy old man in his dotage who cannot say what he wishes.

When the tyrant realised that his plans against the saints had not succeeded-as it is written: "The man who plans and is contemptuous is presumptuous and will accomplish nothing" - then in his great presumption and fierce wrath and immense irritation and unquenchable [Correcting arants: The martyrdom of Atom follows that of Georg in the Jerusalem manuscript.] fury his mind became foolish like a drunkard insensible from drink. He gave way not one whit nor did he give them an opportunity to respond, but ordered the executioners to carry out on them the sentence of death, to execute them immediately with the sword [Since the time when Arabs got sharp steel swords from India, they had been obsessed with chopping off heads and limbs and in all Islamic writings this habit became eternalised.]. They left the tribunal in great joy, very happy that they would rapidly leave this body to enter God's presence. Rejoicing with delight and exultation, with joyous and cheerful hearts and unsullied enthusiasm, they headed for the place of execution, like a young groom to the wedding and as happy as a husband joining the bride. They stripped in the midst of the crowd which had rushed to see the saints' martyrdom, throwing off the garments that hid the corruption of the sins of the old man. Instead of the wedding robe they revealed the robe of baptism which they had put on by water and the Holy Spirit. Instead of a robe decorated with flowers and colours of many hues, they covered their saintly bodies with their holy, rosecoloured, red blood. Instead of the ornament of royal crowns laced with gold, they put on the worship of Christ, making the sign of the saving cross on their heads. And instead of necklaces they were to receive the shining sword on their necks

When they reached the place of execution and the arena of their martyrdom, they knelt to pray that they might receive the sentence of martyrdom with firm faith that had no hesitation or doubt, with much endurance and thankful blessing. Drawing swords the executioners rushed on them like bloodthirsty wild beasts; they smote them with the sword like someone cutting wood in the deep forest with a hatchet, mercilessly dismembering them limb by limb.

So the blessed ones thanked for ineffable gifts Christ who had rendered them worthy to die for his name; in unison they raised the cry: "God, look to help us; and Lord, hasten to succour us," and what follows. "Since we die for you daily, we have been considered as sheep for the slaughter." Thus they were killed as martyrs for the glory of God; they inherited the title of martyr for Christ and the honour of the All-Holy Trinity. Their names are the following: Atom Andzevats'i, Mleah Varazhnuni, Georg Bolkats'i, Vasak, and many others whose names are written in heaven. But the blessed Georg, while he faced the sword and the executioner was beating him like a senseless thing-and not the slightest sword cut was he able to make on the saint's body-turned to the executioner to ask and see why he was not wielding the sword. Taking the sword from his hand he looked this way and that, saying: "Oh, most feeble and cowardly of men, effeminate and wretched soldier, worthless dog to its master." Then the executioner smote his neck and cut off his head. Astonishment gripped the whole multitude at the steadiness of heart, great fortitude, and valiant heroism which the blessed Georg displayed. The large number of Christians present there together praised the glory of God who had strengthened the saints and shamed Satan with his associates

Then the general ordered the bodies of the saints to be dragged outside the city as food for dogs and birds of the sky. For many days they remained unburied, yet the saints' bodies were not at all contaminated, nor was there any foul smell on them. Later Christians took their precious bodies and covered them with an honourable burial to celebrate year by year the festival of their death. They were seven in number, and the holy martyrs were killed in the year 302 [of the Armenian calendar.].

ARTSRUNI HISTORY CHAPTER 9

What Occurred In The Second Year Of Bugha's Arrival, Which Was The Olympiad [...]; Concerning The War Against Sahak The Ismaelite Who Was Known As The Son Of Ismael; And Concerning The Siege Of The City (Tiflis)]

When the winter drew to a close and the season of spring approached, the air cleared of fog and mist and the warm south wind blew over the low-lying plain of Dvin. Roots took hold and plants began to gather strength, the birds and beasts recognised the time of their coming, the toiling labourers prepared for their work on the land, the hunters got ready their equipment and the merchants prepared plans for their distant journeys, shepherds gathered their sheep to drive them to the flowering meadows, and everyone in his own way made haste to go out one by one to the object of his labours.

But the general Bugha was forming his own destructive and ruinous plans. Intending also that lands and governors should not have respite or pause, he foamed in his plots like the sea which does not cease from churning up its waves. He remembered what he had done to Ashot and his land; he recalled his valiant courage; and since he had been unable to resist him, he spread fear, threatening to afflict the Armenians with even worse torments and to trample them as he neighed like a spirited charger.

Now he writhed like a snake, now he roared like a lion; he grunted like a wild pig, foaming, and grinding his teeth. To those nearby he feigned friendship, but on those distant he heaped evil threats. He commanded everyone to report ready at the plain of the city; he reassembled the forces they had previously had in each clan with their troops. But all the other princes of the East fled from his presence; they retired and occupied the strongholds, castles, cities, and mountains, gathering around them the soldiers and inhabitants of their lands in full readiness.

But when Smbat Abulabas, Sparapet [General] of Armenia, realised that it was no use disregarding Bugha's orders, he hastened to come to him. Welcomed by him, Smbat and his people with their possessions lived without worry-especially as he had previously taken the precaution of ensuring by letters and gifts to the caliph and the general that he would follow their orders and make no plans or do anything contrary to their desire. He had previously sent Ashot his son to meet Bugha as soon as he had departed from the caliph; and the sparapet had acted as his guide in the warfare and on his departure from and entrance into the various provinces. He had indicated the strength of each province, the strongholds, the military capacity of the various clans. Then gathering a vast army much greater than before. Bugha marched against the land of the East and ordered an attack on the city called Tiflis-which was previously named P'aytakaran. Their city had been built of pinewood: the walls, ramparts, palaces, all the houses of the city's inhabitants, and all the effects and furniture

I think it superfluous to expound in writing the individual iniquities of that city which, filled with evildoing, surpassed Sodom and Jericho. Bugha reached the great river Kura and crossed when the rapid spring currents allowed his army to advance and besiege the city. No one was killed in the crossing except a single person called Ashkhet, a distinguished man, renowned in the valiant army, who had under him a host of commanders as numerous as the sea. Ashkhet himself wore armour, as did his horse; so some supposed that horse and rider were an iron statue as it were, only the eyes not being covered. When he approached the river bank, someone hiding in ambush drew a longbow and struck him with an arrow through the opening. His hand that held the bridle slackened. Then a second person hurled a spear at the same eye, and they caused Ashkhet to drown in the river. To those who found his corpse a few days later Bugha gave ten thousand pieces of silver, for the man was so respected by him

Immediately he surrounded the city with a wall of fire, the flames roaring up from the piles of easily burning wood of cedar and juniper trees. The commander of the city, Sahak, came out through the gate which leads to the castle of Shamshvilde, dressed in sable and bearing a rod in his hand. Becoming deranged he lost his means of escape, though he was able to go wherever he wished. He sent a message to the general Zhirak': "Hasten to meet me." But the latter did not trust the envoys until they had been sent two and three times. Then Zhirak went and seized him and brought him before Bugha, who was more astonished at his reckless coming to him than at his rebelling against him. When Sahak's wife heard that he had been captured, since she was a beautiful woman she hastened to appear before Bugha in the chance of being able to save her husband through her beauty and liberal treasures. But she became the cause of his death rather than of his salvation. Bugha ordered the executioners to cut off his head. His wife raised a shriek, saying: "My lamentation will reach the caliph." She went around the camp unveiled, which was not customary for the women of the Muslim people. But it was to no avail. Bugha had his head cut off and taken to court, and took the wife in marriage. The woman again shrieked: "For my sake you killed my lord. I am not content

to be your wife but the great caliph's wife." But Bugha kept her as his wife. Later he sent her to the caliph to be his wife.

When the woman arrived, she told the caliph what had happened, of the complaint that she had raised and the evidence of witnesses that "I am not content to be your wife, but the caliph's," and of what occurred. This was the cause of Bugha's destruction, which I shall briefly demonstrate in its own place.

ARTSRUNI HISTORY CHAPTER 10

[Concerning What Took Place Among The Tsanars] Since no one anywhere was able to resist him in any of the acts that it was his inclination to perform, he began to subject in order all the lands of the East. With fearless audacity and arrogance he made forays throughout all the regions of their control. Indeed he attacked the regions of the North, the land called Tsanak. These people dwell in mountain fastnesses and live in peace undisturbed by outside enemies. The royal taxes and tribute remain in their own hands. They merely appoint someone to rule over them at their own will. They live in unity and concord among themselves, dwelling separately according to their tribes. Near to them is the mountain of the Caucasus, in which dwell tribes, each different in language, to the number of seventy-two. They live without a leader, and each has his own customs as he pleases, even marrying their mothers and sisters.

To these went the priest Grigoris, son of Vrt'anes, to preach to them the word of life. Many among them joined him and believed in Christ, like the Tsanars and the Apkhaz. The rest, paying no heed, went to their destruction up to the present day—which we do not have time to describe. By the hands of these barbarians Saint Grigoris received a martyr's death in the plain of Vatnean.

Now when Bugha with his numerous army arrived close to their borders, he wrote messages, apparently peaceful in intent, that they should turn in friendship and unanimity to obedience to the caliph and receive honours, and through him accept the title of noble princes. But since they had take refuge in impregnable fortresses and trusted in the number of their troops and the valour of their warriors, they did not submit in the least degree to his proposals or condescend to respond. They sent back his messengers in disgrace, having given them a severe beating. Then they descended the mountains and occupied the foothills, making preparations for war. And they closed the fortified passes and defiles of the valleys which led to the approach of their fortresses.

Then the general Bugha ordered his troops to attack them in battle. Approaching them, they arranged their line and gave battle to the army of the Tsanars. They surrounded the foot hills like an encircling sea whose waves swell up by the force of the winds. Indeed, the whole earth roared like the billowing waves of the sea. The battle waxed fierce from dawn until the very end of the day, raging to the twelfth hour. The royal army was defeated and returned to their camp, and the mountaineers returned to their camp. After the interval of a day they again joined battle, and the royal army was defeated. After a few days had passed, once more battle was joined, and the royal army was defeated even more decisively. So they were placed in a great dilemma: they were unwilling to withdraw, for Bugha considered the action a severe disgrace, but neither were they able to continue their resistance, for many of their troops had fallen. So they decided to return to the attack. They set up fortifications, built quarters [here: forts or strongholds], and made dwellings. For nine days they remained there and attacked more than nineteen times. But the royal troops were severely defeated and were decimated by the army of the Tsanars. So they returned humiliated, covered with shame and ignominy, ridiculed and despondent.

Near the end of the second year since he arrived, he marched to the regions of the Atuank. At that time there ruled over the extensive territory of the Aluank' a certain Apumuse, who was noted as a reader and was known as "son of a priest." When he heard that Bugha had brought troops and was already coming to attack him, he ordered his whole country to occupy the mountainous areas, intending to resist with force and courageous heart—especially as he had seen that Bugha had been defeated and beaten by the Tsanars.

"Let us not be more cowardly than the Tsanars," he said, "for we have stronger and higher fortresses than they, and it is easier to secure the entrances to the defiles. Only let us with united hearts take refuge in God's help. If it happens that anyone is killed, it will be considered a glorious thing for himself and his clan, and he will receive a martyr's crown from Christ. For it will not be a death of a common sort, but one on behalf of the holy church and God's people." Such and more similar exhortations did the pious prince of Albania set before his troops.

Then Bugha, taking the mass of his army, descended to the plain of Gagarats'ik' and entered the great city of Partaw. He began to rage and plotted to spew out his evil poison on the prince of the Aluank. He sent a summons, calling him to subjection. But the latter paid no heed to his words because he was well aware of his deceitful habits. He gathered together the inhabitants of the land—all the men and women from the land of the Aluank' including a host of common peasants and a few legions of soldiers from the secure mountain called K't'ish, as well as stores of provisions. When Bugha discovered what sort of preparations the prince of the Aluank was making, he became hesitant. For although he had frequently waged war with them in previous battles, he had been unable to reduce their impregnable fortresses or the brave men in them. So in cajoling terms he summoned Apumuse to obedience.

But the latter sent back a response in this fashion: "It is customary for governors to come to a land with royal solicitude to their obedient subjects, to remove tribulations and relieve distress like guardians, but not to ruin [the land] like brigands or ravage it with sword and captivity. If you had come from court as a governor with peaceful intentions you would have brought benefits and prosperity to these people, not ruin and turmoil.

So let it be clear that as long as my strength endures and I live, I shall oppose you with the power and force of the Lord God. I shall not meet you in peaceful friendship, but I shall meet you with arms and a bow and a sword, with valiant men and select horses. If it pleases you to save yourself and your army, remove yourself from here and leave our territory. Otherwise you will soon lose your life through your mad passions, and scatter your bones in the desert, and become food for the beasts of the earth and the birds of the air. Let your will be done. I am innocent of your blood, especially because I regard it as an act of great piety to slay the enemies of God, as Moses did Amalek, or Joshua the Canaanites, or Samuel Agag, or David Goliath. And as the Israelites slew all the foreigners [Muslims] and God was pleased with them, so too shall I deal with you and your army.

This is enough of verbosity towards you on my part. In your hands lies peace or turmoil. If, as I said, you leave me there will be peace; but if not, there will be war and struggle and battle. You are the target, and mine the bow that pierces; you are the adversary, and mine the victorious warriors; you are the enemy, and mine the troops that condemn. Yours is the war, ours the victory; yours the body, and mine the lance; yours the neck, and mine the sword. Yours is the property, but we are the heirs; yours the booty, but we are the plunderers; you are the brigand, we the thieves; you the reed, we the consuming fire; you the straw, we the boisterous winds; you the flower, we the withering simoon; you the flowering field, we the destructive hail; you the building without foundation, I the flood that over turns the foundation, you the carrion, my army the beast that tears; you the toy, we the children who, grasping your power, play with you and all your haughty pride; you the wild animal, we the hunters; you the bird, and we descend from the heights and take you in the net; you the sea serpent, and we the hook, dragging you up by your palate from unfathomable depths; you are like the stag without horns, and we the eagles swooping down on you, blinding your eyes, to throw you as carrion to my young and the foxes who live in dens. So again I say, this is none of your business. And lest you are pained by what I told your messengers, even more than the damage you suffered in attempting to entrap us, such perils will you run."

When the tyrant heard these responses that were full of vigour and terrible indignity, he was thrown into great perturbation and stood seized with astonishment. All his plans had been destroyed and scattered. He did not know what to do. After conferring with much deliberation, as a consequence of their best perceptions the Muslims decided to write and inform the caliph about that man. So they sent messengers to the caliph, while they themselves invested the mountain until some order should be brought them in haste from court.

However, Apumuse, armed and accoutred in full array. descended to attack them. He inflicted great damage, took much booty, and returned to his position and encampment. Thence forth Bugha dared not abandon his own camp without trepidation. Part of his army he put under the command of a certain general and stationed him to the north. He himself with the majority of his troops encamped to the east. They built strongholds, carefully surrounded them with walls, set up fortifications, piled up stones, erected catapults, and made preparations. After a few days Bugha commanded them to go out to battle. They formed ranks and filled the line with the various companies of select troops according to tribes. Encircling the mountain, they set up their tall and longflapping flags and standards. They formed in their groups companies of five hundred men to each ensign. Why should one enumerate individually the vast number of arms and armoured formations of horses and their riders? There are valiant men knowledgeable in this; those who are occupied with warfare can number all the arms and treasures in the caliph's treasury, which they brought with them loaded on camels. They went out to battle and fought, and the encounter grew ardent. Mingling ranks, they fell on each other. The royal army suffered severe losses, fled back to their camp, and entered the strongholds they had built. The mountaineer troops of Apumuse pursued the fugitives; they descended the mountain and turned to plunder the corpses. They returned to their encampment with a great victory, rejoicing with unsullied joy. Then they settled down to keep guard over themselves and the whole mass of inhabitants of their principality.

After this, which was the second defeat for the Muslims, Bugha again commanded them to go out to war. When they approached the Aluank, suddenly about one thousand men from their elite clashed with them; they turned the Muslims in flight back to their camp and themselves returned safe and sound, without a single one being wounded. So they returned to their general with a great victory and much booty.

For the general Bugha this was a terrible disaster. Plunged into anxiety, he was greatly disturbed in his mind and driven frantic in his search for a solution. He shut himself up in his tent and took no respite or rest. Sleep fled from his eyes. For ten days no one came in to him or went out, for he had entered his chamber with shame-filled visage. However, not a little fear gripped him, so many companies with drawn swords kept watch around him. But when the ten days had come to a close, his commander requested permission to enter his presence; taking him by the hand, he began to converse with him: "Why do you slacken your hand, mingle cowardice with their valour. and allow all these countries to prevail over you? Why do you yourself lose your reputation for bravery whereby you made every land tremble and shake, so no one was able to oppose you? Why do you weaken your mighty arms and hands? Surely you are not the very first to be defeated, or your army the first to fall, or yours the first booty to be divided? Have you not considered, that from the beginnings to the present time, everywhere that an army has been gathered and a war fought and swords and a battle waged, sometimes they are victorious, and sometimes defeated? Which of those who ruled the world was never put to the sword? Among the princes of the nations, in one place they grow powerful, elsewhere they grow weak." By continuing to speak with the general, the commander removed the veil of gloom from his heart. Then leaving the chamber, they sat down to be merry.

At that very moment there arrived from court an order not to grow weary or discouraged, and not to give up waging war with Apumuse until, willingly or unwillingly, he submitted to the caliph.

Then he commanded all the troops to go out to battle. As the host of soldiers put on their armour and swords and-made preparations, there was such a great noise of trumpets, lyres, and harps that the mountain almost collapsed from its foundations. He brought the army near to the summit of the mountain, with them many standards one for each thousand elite men with noble mounts. Scarcely anywhere had there been before such an awesome sight of a fully arrayed army of any of the kings who had held sway over the ends of the world—such a loud and fearsome thunder and crashing and flashing of arms as were then exhibited by the army of the Muslims. They marched out company by company rapidly and eagerly one after the other; and everyone who saw them was stricken with great fear. Lord

Mushel, son of the general [Smbat Abulabas, General of Armenia; Mushel was his second son, brother of the future king Ashot.], was stationed in the open on a ill, and stood there watching in fearful and tremendous amazement. He raised his mind to the future coming of Christ and the awesome thunderings and crashings that will then occur: the bolts of fire and fearsome consternation on earth, and how the bands of angels will press forward one after the other, and how the Lord's cross will shine forth with awesome rays, and whatever accompanies these at the future coming of Christ on the last day. Then, putting aside all preoccupation with wordly illusions, he passed beyond the visible. And since he was versed in the divinely inspired Scriptures and was familiar with and knowledgeable of eloquent precepts, at that moment he set down his spiritual vision as a hymn that begins: "My soul looks with the undisturbed eve of the heart at the second coming." Five strophes from the eighth syllable.

Now when all the host of the army had been assembled in one place to the number of more than two hundred thousand, and they had formed ranks and drawn up their lines. and champions had called their opponents out to battle, then Apumuse, called son of a priest, marched out to battle and confronted them. He was like a great iron hill or rock of adamant; his troops formed a solid mass-as it were a single man. The army of the Muslims completely surrounded the force of the Aluank' and fearlessly rushed upon them, but they held their ground. without anyone stepping in front of his comrade. While the former thought that the Aluank had been delivered into their hands, the latter turned to prayer and invoked God to their aid. They attacked in four divisions, like the Lord's cross; they crushed the enemy line, broke their ranks, turned them back, and pushed them off the mountain, inflicting tremendous losses.

As straw is blown by the wind, or smoke dissipated by a storm, so did they disappear from before the army of the Aluank'. These turned back and amassed an incalculable booty. But why should I describe each detail of the battles one by one? I shall speak concisely and abbreviate my account. The war between them continued for nearly a full year. And not in a single confrontation did Apumuse turn away from Bugha. As is reported, the number of their battles was twenty-eight, and the royal army was defeated in that many encounters and actions.

When both sides realised that there was no solution or way to forge peace, then they agreed to write to the caliph, for the general of the Aluank said: "Lest anyone suppose me to be a rebel against the caliph and for this reason to be attacking the army of Asorestan." But he piled up on Bugha responsibility for the rebellion and the losses to the army—of which indeed he informed the caliph in writing: "Now if there comes to me a letter from the court sealed with the caliph's ring, in which a command is written that I should go to you or to the court, I shall not disobey his command. But if that does not happen, as I said you will see even more sword and battle than you have seen up to now."

Then the two of them sent messages to the caliph through reliable men, according to Isaiah's saying: "They shall send messengers who will weep bitterly." They wrote and informed the caliph of what they had done and how the royal army had been defeated. Both sides settled down to guard their positions with great care and agreed with each other not to give battle until the messengers whom they had sent should return from the caliph. Now that great victory was granted through the general Apumuse so that the Lord's saying through the lances of Damascus," which is now called Dmishk, whence they had set out following Bugha.

While they were waiting to receive an order from court, the messengers returned rapidly bringing a letter from the caliph to Apumuse bidding him submit to them and go to Bugha. In it was written a pardon for the damage and losses to the army and the mass of booty, also an oath to confirm the spoken message and gifts of honourable and expensive garments with a decorated^ helmet and sword. Only he was to heed the caliph's summons and not disobey his wishes. The latter had written to Bugha not to plot or inflict any evil on that man but to have him taken to the caliph with great honour and consideration.

When the general of the Aluank had read the caliph's letter, he hastened down from the mountain and presented himself to Bugha. Before he reached the general, there came to meet him companies equipped with arms and select horses. He had brought before Apumuse richly adorned and noble horses as well as singers and rhapsodists with many musical instruments in front and behind while he was still outside their camp. Bugha treated him not at all unkindly, neither recalling what he had done, nor causing him any gloom; but he received him in a friendly and peaceful fashion with splendid honour and gifts in accordance with the caliph's orders. After a few days had passed, he had him taken to the caliph accompanied by companies of armed soldiers and elite cavalry. So the valiant champion 1 Apumuse went on his way with fearless courage, strengthened in his mind and determination in accordance with his steadfast valour

ARTSRUNI HISTORY CHAPTER 11

[In What Fashion Makati From The Province Of Vanand Was Martyred]

It happened that there passed that way a certain Mukat' of the nobility of Vanand to inform himself according to custom of each person's station and eminence of rank, whether this was due to birth or place or province or family or valour or chance. It is usual in books to indicate both the event and the place involved, either to make them known or to render them famous. The Muslim soldiers arrested him and brought him to the general. They imputed to him much harm to state affairs. and falsely rather than rightly condemned him. Eventually a great and fearsome tumult was stirred up against him. and his calumniators cried with one voice before the tyrant, tearing their collars: "He is worthy of death; it is not right for him to live or have an opportunity to respond." By such a violent uproar of false testimony they excited the tyrant's full anger against the man, such anger as the general Bugha had never vented on anyone else for all that time. He commanded him to be brought into the tribunal where the group of generals were all assembled. He interrogated him cruelly and with the authority of his position: "Abandon the faith of Christ," he said," and I shall forgive you the great harm you have wrought; you will live and enjoy royal honours and gifts. Do not add to the great crimes you have committed, as I hear them described by your accusers, that of obstinate persistence in the faith of Christ whom you worship, so that you are deprived of life through cruel tortures. For I have nothing more to say to you.

The blessed Mukat' responded, full of faith and with a true confession in the Father, Son, and Holy Spirit: "Who allowed me to be martyred for the truth and die for Christ's name, to shed my blood in return for Christ's blood, to offer my body to death in return for his body, to mingle my torments with his torments, that I should be glorified with him? He is the Lord of Lords, King of Kings, Prince of life and death, God for eter nity, Jesus Christ. But your threats and tortures, which you say you will inflict on me, seem in my eyes as a joke of children or madmen, and your words like those of a senseless man or a crazy and raving dotard."

Immediately the angry tyrant ordered that first the saint's tongue be cut out 3 so that he could not further insult the caliph, their legislator [Mohammed], and himself. Then he ordered his two hands and his two feet to be cut off. Limb by limb they dismembered him; he offered himself as a living sacrifice to the Son of God. With great fortitude and thanksgiving he endured the tortures inflicted on him for the love of Christ. While he was still alive, Bugha had a massive and very tall gibbet erected; he was put on the top of it and suspended in a very high place. Then bringing him down from the gibbet, they cut off his head with a sword and set it back up again in the spot of his martyrdom, in Goroz near the mountain K'shit [the correct name is K't'ish.] where the camp of the Muslims was situated. So the holy, all-victorious champion of Christ Mukat'l was martyred gloriously for the Father, Son, and Holy Spirit-to whom be glory for ever Amen.

In similar fashion, or even more wonderfully, the thriceblessed Solomon, known as Sevordi, and Kakhay of the upper land did not incline to the tyrant's proposals or heed his words that reeked of gall and putridity like the stench that emanates from an opened tomb—whereby he had seduced many away from the divine religion and the worship of the Son of God. But they battled valiantly and responded to the tyrant with great audacity, hoping in the one sole King of Kings and in the Lord of Lords, in Christ the Son of God. They said to the tyrant: "It is better for us to die for Christ's name than to enjoy life with you. By whatever death you wish, we are ready to submit to every form of torture that the master of evil, your father Satan, has taught you. We shall not abandon the love of Christ, nor shall we be deprived of eternal life or inherit eternal torments."

Then the tyrant raged like a furious wild beast attacking lambs to devour them. He ordered them to be fastened to stakes with their feet and hands bound. He had iron rods brought, and they tortured them with the rods for a long time until they seemed to have died. But they endured with great fortitude, thanking Christ the liberal bestower of unbounded gifts, who had made them worthy to die for Christ's name and to receive the crown of martyrdom.

While they were still alive and thanking Christ for the unconquerable power with which he had strengthened the saints for the great arena in the spiritual battle, the tyrant became even more enraged, flaming like a fiery furnace. He had wood brought, and they placed the blessed Solomon on the wood. Near to the wood they set the holy Kakhay, so that perhaps the one, frightened by the other's torments, might obey the tyrant's order. But even more than previously they endured the tortures in order to be crucified with Christ. They denied themselves, took up Christ's cross, and followed the summons.

They lost themselves, that is the life of the world, in order to gain eternal life. They died with Christ in order to reign with him.

Then there came an order from court to kill Saint Solomon on that pile of wood by shooting him with arrows. At the tyrant's command, the executioners in a circle shot arrows at him; so the blessed martyr of Christ gave up the ghost for the glory of God.

Saint Kakhay he ordered to be slain with the sword. The executioner took his sword, struck the blessed one, and cut off his head. Immediately he surrendered his soul into God's hands. Thus the blessed ones were martyred to the eternal glory of the Holy Trinity.

With the captives from the mountain of Khoyt' was a man called Yovnan. He it was who during Bugha's attack, from the beginning of his invasion into Armenia, had opposed him with the inhabitants of the mountain and had inflicted severe losses on the royal army. But when the Muslim troops attacked the people of the mountain and defeated them, they arrested the blessed Yovnan and had him taken in bonds to the royal prison.

One day the caliph ordered him to be brought before him He questioned him about the death of Yovsep' in revenge for* his second heroic exploit when Yovnan had resisted the general and reminded him about the revolt and his involvement in harm to royal affairs. [* It is unclear whether this means "when Yovsep' was seeking to punish [Yovnan]," or "[the caliph questioned him] in order to take revenge ."] At the same time he tried to intimidate him even for more, that perchance thereby he might really be able to turn him away from the true faith in the Father, Son, and Holy Spirit. When he put before him the question of the harm, whereby he expected he would cast him into a snare of destruction, he said to the blessed one: "If you wish to live with me and enjoy the life of this world, to receive gifts and honours from me, submit to my command, abandon the Christian faith that you observe, and serve the true religion and faith that we have learned from the prophet Mahumaf. Otherwise, you will receive the opposite of this, torments and death, and be deprived of life by a cruel death.'

But the saint, inspired with a noble resolution, said to the tyrant: "Why do you suppose me to be a young child that you cast before me vain and fanciful deceit, promising me a deceitful and false hope in order to draw me away from the true hope, the truth of which I have comprehended since my youth?" Said the caliph: "Do not despise my royal words and lose your life, to become like one of those condemned to death who have deprived themselves of life by a cruel death—such as has been prepared for you if you persist in the same stubborn faith in Jesus, son of Mariam a Jewish woman."

The blessed one said: "I see you speak as one of those mad fools. long since despised you and had not the slightest fear in my heart for you. In my disdain for you I put your general and his troops to the sword, his booty I distributed, and on the second occasion I planned no little slaughter for your army. So shall I mingle cowardice with my valour and capitulate through fear of death? For the things of this world I have fought much, as you know and as you now hear from me. Shall I not then die for Christ and for eternal life, or shall I really be afraid of you? Far from it! Here stand I; do not hesitate to carry out whatever you wish to do."

When he the caliph heard such replies and more of the same tenor delivered in a resolute and fearless manner with great audacity, then he ordered him to be put to death immediately by beheading with the sword. The executioners took the blessed one to the place of execution. He raised his hands to heaven in prayer that he might be able to overcome heroically, then offered his neck to the executioner who cut off his head. So the blessed Yovnan gave up the ghost with a true confession in the Father, Son, and Holy Spirit, to whom be glory for ever.

When Bugha had carried out his plans against Armenia the removal of the Armenian magnates from the country—he also brought it about that no one at all remained in security, and notably that no one continued to resist his control. He wrote individually to those who remained in their lands in strongholds to the effect that they should rapidly come to him from each one's territory without suspicion or fear; that they would receive their principalities and enjoy royal gifts and honours, and be subject to the caliph. Each left his territory, outstripping one another in response to Bugha's summons. Gathering in one spot, they came before the general of the Muslims. For a short while he forgave them with an appearance of peaceful friendship, until his affair with Apumuse had been carried through.

But after the latter had been arrested and the general knew that from then on not a single Armenian prince remained who had not joined him, he then stripped off the mask of deceit which Satan had planted in his heart. He formed companies of armed soldiers, accourted and prepared, according to the various families and the number of Armenian lords. At dawn one morning, while each was sleeping in his own tent, his troops surrounded them with swords, shields, lances, and lit torches. Entering at their general's command, they put the Armenians' feet into iron bonds, put them on camels, and brought them to Samarra.

These were their names: Lord Smbat, sparapet of Armenia; Grigor son of K'urdik, lord of the Mamikonean; Atrnerseh, prince of Albania; Grigor, lord of Siunik'; Sahl son of Smbat, lord of Shak'e, who had captured Baban; the princes Vasak, lord of Vayots'-dzor, and Pfilippe, prince of Siunik', and Nerseh, prince of Garit'avank': and then Esavi Apumuse, who had waged many wars. There remained only Ashot, son of the sparapet, and Mushel and Smbat, brothers of Ashot, whom Bugha allowed to govern their land because of the earlier loyalty of their father to the caliph and the general. For he had followed their wishes with all his strength and devotion. In the principality of Vaspurakan there remained Gurgen in the general's place and the other Artsruni families. So he removed all the powerful men from Armenia, then went himself to Partaw, to winter there and to see how he might complete the final destruction of Armenia. He despatched a certain Abraham and sent him as governor of Armenia and overseer of the royal taxes, to rule in the place of its princes.

ARTSRUNI HISTORY CHAPTER 12

[What Took Place After The Removal Of The Princes, And Concerning The Wars]

After the principality had been abolished from the land of Vaspurakan, there remained various families of the Artsruni clan: the valiant Gurgen, Mushel his brother, and Apujap'r, Apumk'dem, Vasak, and another Vasak, and Mushel, and Ashot, and Sahak, and others from the house of the Artsrunik', and their knights. But they began to multiply further woes on woes. For they fought and quarrelled with each other in their desire for the principality. Estranged from each other, they formed armies from among those who had escaped the sword and captivity of Bugha. Some of them proposed Gurgen for the title of the principality, others Apujap'r, and some Vasak. In this regard the saying of the prophet Isaiah is apposite: "In that day a man shall strike his brother or his relative; and they shall say: Be our prince, and our nourishment shall be with turmoil. Wherever they went they laid waste by raiding,

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3325 plundering, and rapine. No man had mercy on his brother, in accordance with another saying of Isaiah: "Man shall fall on man," he says, "and man on his fellow. The youth shall smite he old man, and the unworthy the honourable." For in the example of the Israelites, as in the days of their anarchy there were confusions and each man did as was pleasing to his eyes [Thomas is referring to the time of the Judges; see 17.6 and 21.25: "in those days there was no king in Israel; every man did that which was right in his own eyes."], so likewise now the same occurred. For the humble and weak through poverty wandered about in distress, while the more powerful and strong became ferocious like beasts, disturbing the whole country by their shameless and unimpeded brigandage.

ARTSRUNI HISTORY CHAPTER 13

[How Gurgen Remained Alone, And The Many Wars In The Country]

With especial pleasure I am happy to undertake the story of he noble, glorious, and victorious champion, I mean Gurgen, member of a family that is most splendid, distinguished, grand, eminent, and prestigious. He descended from two roval lines, being a scion of Senek'erim and of the Mamikoneans from Chen. From both sides he inherited royal blood and station: from his father that of Senek'erim, and from his mother that of the Mamikoneans, from whom he traced his genealogy down to the time we are considering. Gurgen deserves the most expansive praises; I should richly eulogise him and deploy my rhetoric to the fullest extent. But since this is the occasion to write history and not engage in panegyrics, I shall avoid all reproach, especially since with my meagre erudition I am inadequate to expound the full measure of his praise. That I leave to other more competent and intelligent men, freeing myself from overwhelming censure. But I myself have no hesitation, reserve, or objection in considering him the equal of the martyrs and in praising as sacrificial his relentless struggles against the Arab raiders. He expended torrents of blood for his native land, and soul and body for the saints of Christ's church and the believers in the Father, Son, and Holy Spirit, in order to preserve them safe and unsullied. As a good shepherd gives himself to death for his sheep, he modelled himself on the Son of God, as it pleased Paul to say: "Those whom he previously knew he previously summoned to share the image of his Son." Let this suffice for those who are logically minded and understanding. We shall carry forward in abbreviated fashion our historical task.

But do not blame me, Oh lover of learning , for not including in this history all his deeds in detail. For the deeds accomplished by others are one or two or so, whereas his surpass in number the activity of many men. Therefore, for the moment we have abbreviated them into few words, as Paul was pleased to write in the Epistle to the Hebrews: "Time does not suffice for describing the judges of Israel and the holy prophets"; in this account he includes only "those who by faith defeated the king dom." In similar fashion John writes about the saving dispensation at the end of his gospel.

Gurgen, son of Apupelch, prince of Vaspurakan, in the troubled time of Bugha and when the patriarch Yovhannes was Catholicos of Armenia, acted wisely in not opposing the evil one. But when Bugha entered the land of Vaspurakan, Gurgen went to K'urdik, lord of the Mamikonean, in the province of Bagrevand and stayed there, for K'urdik was Gurgen's uncle.

When Bugha had completed his passage through the land of Vaspurakan and had marched to the East, Gurgen went to the province of Sper. At that time the prince called Grigor of the Bagratuni clan had surreptitiously seized from the Greeks the castle called Aramaneak; Gurgen was received by him with splendid honour. The general of the East came to wage war with the prince in order to recover the fortress, and there Gurgen demonstrated much valour in opposing the Greek army—not once but many times. With forty men he attacked a thousand, killed many of the elite Greeks, and completely despoiled them, so that in his astonishment at his valour the general wrote to the Greek emperor Michael informing him about him.

Then the emperor wrote to his general in the hope that he would be able to persuade Gurgen to come to the capital to the emperor, from whom he would receive gifts and honour and promotion in rank. Gurgen did not consent to go to the Greeks, but he did persuade Grigor to give the castle to the general and appease the emperor. Some Muslim soldiers from Bugha's army had come to attack the Greek forces in the castles. Gurgen opposed them numerous times, inflicting no small losses on the Muslim army. Then he himself went to the prince in the fortress called Ashkharhaberd; after there exhibiting most courageous resistance, he returned to the sparapet Smbat.

The latter informed Bugha about him, saying: "This man Gurgen from the clan of the Artsrunik', a valiant warrior, from fear of you crossed over to the territory of the Greeks. Yet he frequently attacked the Greek forces that were waging war with your army, and caused no little shedding of blood to the Greek troops vicariously for your army. Now behold, he

has arrived and awaits your orders. May you be pleased, valiant general, with his brave deeds against the Greek army." And Bugha sent word to the sparapet that Gurgen should remain with the sparapet without fear and accept his profound thanks.

In those same days, when the survivors of the Artsruni house heard of the defeat of the royal army by the Tsanars, they gathered their forces in one spot with the foot soldiers and mass of common people, being four thousand in number. As their leader they appointed Apujap'r Artsruni, and with him Sahak Apumk'dem, Apujap Vs uncle, a brave warrior. Raiding the provinces of Chuash and T'ornawan, they took plunder. But because Bugha had entrusted these provinces to the sparapet Smbat, he wrote to the emir of Nakhchavan whose name was Abraham, informing him about the troops of Vaspurakan. Abraham rapidly marched to the city of Berkri, and in unison with the citizens went out to meet the army and commanders of Vaspurakan at a village called Khozalberk'. For the Muslims had retreated and fled before Apumk'dem. In a single raid Apumk'dem had slain eight men and stripped them of their horses, arms, and accoutrements. He had inflicted great losses on the Muslims and had again made incursions in pursuit of them. While he was riding along deep in thought, his wounded horse caught its foot in a small bush, as they say, and fell head long, breaking its back and throwing its rider, the valiant general Apumk'dem. His enemies fell upon him, striking him with their swords. One of them stripped off his shoes, but he kicked the coward in the chest and killed him. Then they rushed on him, cut off his head, and brought it to their general Abraham. Taking courage, they turned on the Armenian force, in flicting grave losses. But Lord Apujap'r and those with him fought bravely against the Muslims and carried the day.

When the Armenians realised that their general had been killed and that their right arm had been crushed, 1 they turned in flight. Breaking ranks and destroying their line, they separated and abandoned the battle, every man fleeing where he could escape. There remained only the infantry, discouraged without a leader. The enemy fell on these and slaughtered them, filling the wide valley with the corpses of the slain. The springs there and the other muddy rivulets of water in the valleys below turned to blood. Abraham crossed over to the capital of Rshtunik^{*} [the city of Ostan, the modern Vostan (Gevash).] and stayed there; later he returned to his own residence in Nakhchavan. Apujap'r went to the region of Albag. Troops gathered around him from every quarter; then they entered the capital of Rshtunik and appointed as their prince Vasak Kovaker, brother of Vahan.

When news of the defeat of the troops of Vaspurakan by the Muslims and of Vasak's becoming prince reached the valiant Gurgen, he rapidly marched to the land of Vaspurakan with the approval of the sparapet. As soon as he reached there, he quickly attacked the fortresses called Jlmar and Sring, seized them, and captured Vasak, appropriating for himself the command of the entire principality of Vaspurakan. He began to make an orderly tour of the whole land, in which dwelt the Muslims who had remained there at Bugha's orders. He inflicted great losses on the Muslims, slaughtering them with the sword and bow, and removed all the tribes of Muslims who were living in the principality of Vaspurakan.

At that time a certain Butel from the royal army came at Bugha's command to attack Gurgen. With him were the citizens of Berkri called Ut'manik and those of the nobility of Vaspurakan who had joined the royal army, about two thousand men. They encountered each other at the village of Ordok' at the head of Hayots'dzor which leads into the province of Aruant'uni. Gurgen was encamped there with four hundred men, unworried and unsuspecting. Suddenly at dawn the force of Muslims attacked. Gurgen hastily mounted his horse. They formed line and filled out the ranks; the shield bearers covered the front of the battle line, posted in support of the warriors of the infantry. Valiantly distinguishing themselves, the Armenian troops battled the Muslims for many drawn-out hours, inflicting great losses on their army. But the Muslim force recovered a little and stood firm. Then Lord Gurgen, in his impatience, spurred the brave horse on which he was mounted and attacked the left wing of the Muslim army. Breaking their ranks he turned them back, and one wing of the Muslims fled before Gurgen. He pursued them and slaughtered them with such vigour that there were more who perished by Gurgen's sword than who survived. The troops pursuing the survivors expelled them from their land. But the right wing of the Muslims pushed back the force of Armenians, pursued them in flight as far as their borders, and then returned thinking they had completely destroyed the Armenian army. But it was the Muslim troops who were defeated by the valiant Gurgen, and their power that was broken. From then on the Muslim army no longer dared to enter the land of Vaspurakan, for great fear had fallen upon them.

Now in addition to the many brigands who attacked Gurgen, and the hard battles that he fought with victorious heroism, not only were there enemies from the outside who surrounded him, there were also many troubles stirred up on the inside by numerous members of his own family, faithless relatives false to their pacts and oaths. But Gurgen and his party, keeping their hope in Christ unbroken, acquired a glorious repute superior to all, raising the standard of victory. And the Lord omnipotent was with him wherever he wished.

When news of Gurgen's valour and strategic skill in mounting attacks reached the general, Bugha's heart turned towards him in peaceful friendship. He had brought to him, as the due of a general, a princely sword to gird him and a noble belt to encircle his waist, rods as batons, and a spirited horse that stamped its foot imperiously, ideal for riding to war. He appointed him prince to be trusted in his own stead, and thus promoted .him to the highest eminence. Neither inner nor outer attacks were able to prevail against the victorious power of this man strengthened by Christ. But I must express my profound astonishment at how he could endure the insufferable multiplication of labour, the bodily effort of ceaseless perseverance in battle, not to mention his enthusiasm in combat. However, as earlier, I have decided to put myself beyond reproach for not setting down methodically and in order my description of the man. For it is impossible to gather in one spot the superabundance [of his deed], or to indicate all the details, especially because some others have written about them before us and have set down a comprehensive account.

After four years had passed, during which time Lord Zak'aria held the patriarchal throne of the Catholicosate of Armenia, Grigor the brother of Ashot prince of Vaspurakan returned from the land of the Apkhaz [Grigor was Ashot's youngest brother; Ashot was still in prison in the Islamic city of Samarra, Iraq.]. With their support and that of elite Georgian troops he entered the land of Vaspurakan to wage war against Gurgen. But when the troops who accompanied him realised the latter's unshakeable valour, they returned to their own territories on various pretexts. So Grigor, unable to carry through his opposition, treated with Gurgen on terms of peace and friendship for the division of the land into two; they mutually agreed to peace. However, the disturbers and enemies of peace did not cease scheming against the good or increasing the evil-especially Vasak [the apostate.], who attributed to himself the supposed title of prince. But although Gurgen recognised those deceiving him, he did not requite for the evil done; but every time he seized him he let Vasak go in peace, treating it as a jest.

At the same time Vahan, son of Ashot and nephew of Sahak, returned from captivity. Intending to seize the land he raised a force to oppose Gurgen, but sustained a defeat rather than victory Gurgen was residing in the secure fortress of the capital of Rshtunik' when Vahan suddenly attacked him with the intention of acquiring some of Gurgen's land. The latter made a sortie with a few men, rushing down like a torrent of water, and expelled Vahan and his troops. Descending to the plain, they mustered together, drew up line, and joined battle. Many they slaughtered, and Shapuh the prince of the Amatuni family was among the wounded who fell. Gurgen encountered the large force of Vahan in a murky ditch; not a few swords struck at him, and a certain Juansher unexpectedly smote Gurgen from behind, wounding him. But with rapid hand he drew his sword, hit Juansher in the face, putting out his eyes, and returned after this great victory to his fortified position.

After a few days Vahan went back to Samarra to inform Ashot what had transpired. But Grigor lived for one year after his return, and died. They took him and buried him in the monastery of the Holy Cross in the province of Albag [Monastery of the Holy Cross. Many Artsruni princes and princesses were buried here in the family vault.].

But Gurgen pursued his course of heroic encounters in battle.

Ceaselessly, day and night, he and the noble troops who had joined him did not merely demonstrate their prowess and victorious courage in certain places but everywhere rushed to the assault like champions. Like a single person, in armour and bearing a sword for battle, they attacked fortresses and beat down their garrisons with sword and bow, to the flashing of sword and lance, and even in combats by night. Just as the valiant general of Israel, Joshua, or Gideon, or even the very patriarch Abraham, attacking the Canaanites [The Bible mentions no particular victory of Gideon over the Canaanites, but cf. Judges, chapter 6. God promised the land of Canaan to Abraham, Genesis 17.8.], waged a continuously victorious struggle and returned in great triumph; such or even more gloriously victorious battles did the great general Gurgen win over the race of Ismael, setting up the standard of victory everywhere and in all places.

Like the brave shepherd praised by the Saviour, he gave his life for his sheep opposing the ravenous wolves, mercilessly rushing to the assault, as he delivered all the violent oppressors of our country to blood and destruction, to slaughter and death by the sword. He was blessed and eulogised by those far and near, by the natives and foreigners in the land. The tribes of Muslims were altogether atremble at the sight of him and distraught with great fear, for they saw their demise confirmed without a doubt. He cleansed the land from the impurity and deceit of its oppressors, like Judas Maccabee purifying the impiety of Antiochus from Israel, 6 and made peace for all his subjects.

ARTSRUNI HISTORY CHAPTER 14

[The Return Of Derenik To Armenia, And The Beginning Of The Lord's Restoration Of The Princes Of All Armenia From Captivity]

The sixth year of the captivity of Armenia was completed, which was the 306th year of the Armenian calendar equivalent to six jubilees and olympiads and indictions—and the third year of the patriarchate of Lord Zak'aria, Catholicos of Armenia. [The year 306 of the Armenian era ended on April 25, 858 AD. But it is not clear how Thomas makes this six jubilees (300) and six (?) olympiads (24?) and six (?) indictions (90?). As above, p. 106 at n. 5, Thomas does not use these terms in any strict sense. Zak'aria became Catholicos in 855 AD.] It was the beginning of the seventh year that the princes had been at court, in accordance with the septennial measure of time, just as God had allotted for the people of Israel in captivity in Babylon, as it is written in the prophecy of Israih: "You will know the seventy-seventh and you will understand how to respond, from the issuance of the saying up to the Anointed will be seven weeks and sixty-two weeks." In like fashion Daniel makes the same declaration.

So much do they say. As for us, we shall abbreviate the whole revolution into single numbers, reckoning the total of years according to tens of weeks, which is the most perfect of numbers-seven. To that period of time did God abbreviate his decree against this new Israel, that is among the heathen. [Although Armenian historians often looked to Old Testament heroes, and especially to the Maccabees, as models, they do not often refer to Armenia as "the new Israel." The "heathen" are the Muslims, just as Elishe applied the term to the Sasanians.] Then abundantly he poured out the mercy of his creative care for his creatures, humanely pitying them at the intercession of the saints who had shed their blood for the true and unsullied confession in Christ, and for the exertions of the blessed Grigor Artsruni, the valiant champion and victorious martyr and confessor of Christ, and through the chief shepherd, Saint Yovhannes the bishop, and the heroic priest Grigor. These continuously addressed pleas for mercy on high on behalf of the Lord's people, just as the angel of the Lord implored God, saying: "For how long will you not have mercy on Jerusalem and the cities of Juda? This is the seventieth year." And he inclined them to the direction he wished.

The Lord heard their prayers and turned from the anger of his wrath in pity and mercy, as the blessed prophets wrote.

After those days, when the caliph had delighted the Armenian princes in his banqueting hall and had promised to restore to each one his lands in inheritance, he then commanded Ashot and his son Grigor to be brought before him. He clothed them with garments, set in their hands a princely banner, girded them with a sword and belt adorned with precious stones, gave them a select and richly ornamented horse, then despatched them from the chamber in glorious splendor and notable honour to the sound of singing and the blowing of trumpets. Heralds proclaimed with voices loud and clear that the principality of the land of Vaspurakan had been given to Ashot and his son Grigor, holding in their hands the royal decree that the caliph had sent Grigor, son of Ashot, to his own country to rule over his land in the place of his father.

Then Prince Grigor departed from the caliph in great joy and indescribable happiness, and entered his own land, the principality called Vaspurakan. He ruled his country with princely authority. When he sat on the throne of his father's dominions he was about ten years old.

In the eighth year of the captivity Gurgen, Ashot's brother, returned to exercise sole control over his principality and domains, and to restore order to the land that had been troubled and ruined. For although the other Gurgen had opposed with great energy the attacks of those who were striving for the princely title, or the violent and bellicose assaults of the Muslims rom outside, nonetheless, the land was not secure. But raids by brigands, the constraints of famine, the afflictions of captors, the attacks of wild beasts, disturbances within and without openly gripped the land.

When the second Gurgen arrived, he hastily moved to attack the first Gurgen, for the latter had seized and was occupying the castles of Sring and Jtmar. But when he reached there, he abandoned armed opposition for peace talks, citing the royal command of the leader of the Muslims that the whole principality of Vaspurakan was to be entrusted to Ashot. To this he was not unresponsive, and with wise courage abandoned the castles. The second Gurgen sent him messengers to the effect that: "If you confirm a permanent alliance with me in a peace agreement, I too shall revolt against Ashot. Together we shall divide the land and live in security."

But Gurgen did not agree to this, for two reasons. First "lest I appear to be in rebellion against the caliph of the Muslims," who had heard of his prowess in many other wars and of the defeats he had inflicted on the Muslim army, and was suspicious of what he had done with Ashot. And second, because he did not trust Gurgen, fully remembering what they had negotiated under oath and aware of what his own father had suffered from the other's father. Therefore he set out to travel around the regions of Greek territory, entrusting his cares to the grace of God; for his heart was consecrated to the Lord God omnipotent.

When he arrived at the city of Theodosius in the province of Karin, news of him reached the emperor Michael [Michael III, emperor 842-867.], king of the Greeks [Eastern Roman emperor.], who was prompt to arrange that he proceed to him without delay, in order that he might elevate him to the great honour of the consulate and decorate him with the insignia of the cross. 6 While this plan was under consideration, two emirs, one called Bshir and the other Zk'ri, fell on [Gurgen], captured him, and brought him to Ashot son of the sparapet.

Although the latter was irritated at what had occurred, nonetheless he hesitated to let him go, fearful of the troublesome race of Ismael which still exercised tyrannical control, and because the captives and his father the sparapet were at court. So he informed the governor of the city of Tiflis The latter demanded that [Gurgen] come to him, insisting and in timidating witji threats that he abandon the Christian religion; then he would not be troubled. But he mocked him, choosing bonds and imprisonment, even death with valour for the name of Christ over life with remorse. They bound Gurgen with triple bonds and also put chains on his neck, sent him through Persian Atrpatakan, and brought him to the prison with the captives. They frequenty addressed him with various threats and persuasive words that he might abandon the Christian religion and join the other apostates from Christ. But not in the least was he perverted by the tyrant's words, because of his love for Christ.

He also clad Solomon Bagratuni with the weapons of Satan and frequently sent him to him with the same intention. But Gurgen rejected him with smarting words as a servant of the devil [Solomon Bagratuni, presumably an apostate, is not attested elsewhere.].

Then there appeared to him in the prison a handsome person in the form of a grey-haired man, shining with light, who said to Gurgen: "Take heed, strive valiantly, arm yourself bravely, be a warrior of Christ. Do not incline to the false religion of those who have turned away from the truth, the race of Ismael, like those Armenian captives who were deluded." So he was even more confirmed and strengthened in the faith, in the love and hope of Christ. Cast into the farthest recesses of the prison, he endured everything with praise for the name of Christ—hunger and thirst, with great fortitude.

But the other Gurgen lived one more year and then departed this world, having turned from the impiety of the apostates. They brought him and laid him to rest in their sepulchre in the monastery of the Holy Cross. [Le. Gurgen, brother of Ashot, uncle of Grigor Derenik, who died in 860 AD. "In their sepulchre" (tomb) refers to the family vault(s) of the Artsrunik' at the monastery of the Holy Cross; see above.]

Derenik*, strengthened by the power of Christ, became glorious and renowned throughout the whole land of Armenia; and the country had respite from the confusions that had befallen it. [* This is the first time that Thomas calls Grigor, son of Ashot, Derenik (he is called Deranik in the Anonymous).]

The country began to experience a renewal, the churches to shine with ornamentation and splendid rituals; those scattered rushed back to their own places to build, plant, and forget the pains and afflictions they had endured.

In those times, while Jap'rmot'ok' was greatly puffed up and waxing haughty against the Christians—like Senek'erim our an cestor against Jerusalem and the people of Israel suddenly his own son Mot'ein attacked and slew him. He reigned in his father's place, and died after six months. After him the son of his uncle Muht'is reigned, and having lived for three months died. [Mutawakkil was assassinated on 10 December, 861 AD. Thomas's Mot'ein is Mutanasir, caliph 861-862 AD. Muht'is is Mustain (son of Mutanasir's uncle), who was caliph 862-866 AD. Therefore Vardanyan corrects "three months" (amiss g) to "four years" (ams d).]

The Armenian princes remained in danger, seeking a way out of their troubles from Christ, from whom they had fallen away. But after the passage of many troubled days, Gurgen was released by Christ's providence, saved from prison, and returned to his land. When the news reached Derenik, he moved to attack him, but was turned back and fled. Taking courage again, he returned to oppose Gurgen, whose horse, galloping along and neighing haughtily, threw him from pain For Gurgen was still recovering from illness and from his sufferings and afflictions in prison. Derenik's men came upon him, seized him, and brought him to prison in irons in the city of Hadamakert [The capital of Vaspurakan.]. A servant of Derenik's who was the jailer loosed him from his bonds and brought him into the room where Derenik was sleeping. The servant had the evil intention of killing Derenik and handing the principality of the land to Gurgen, for this was a convenient opportunity. But Gurgen preferred the love of Christ to the love of this transitory world. He did not seek vengeance for the blood of his father murdered by the other's grandfather; but addressing Derenik tearfully and holding in his hand a drawn sword, a sabre and axe, he said: "My son Derenik, greetings to you, greetings to you, I have gone off to the territory of the Greeks." The other, stricken by fear, said: "My father, have mercy on me," and was unable to utter anything else.

Then Gurgen hastily went out to conceal himself until he should succeed at Christ's will wherever he might go. He reached a village called Eragani [The site of Eragani is unknown; it was clearly in, or not far from, Vaspurakan.], and came to a monk who was priest in the monastery. As a fearer of God he trusted himself to him and begged him to protect him. The latter enclosed him in a tiny, narrow space, then made haste to put out the sad news that [Gurgen] had died; he was a mad monk full of folly, who did what he had not been ordered to do: of his own will he carried out a crime against himself, for which he will pay retribution on the day of his judgement.

But Derenik captured him and kept him carefully, doing him no harm save for the bonds in which he had fettered him, as compensation for his goodness [I.e. in not murdering him.]. But he rendered him a ready hand and was blessed by Saint Zak'aria [The Catholicos]. For when the blessed Zak'aria heard that Gurgen had been seized, he made haste to come with the bishops of the land, accompanied also by Ashot, prince of princes [Ashot Bagratuni.], and begged the prince Derenik to release him from bonds. The prince paid him heed and carried out his request. And the two made a mutual pact not to be mistrustful of each other. Derenik restored to Gurgen the province of Mardastan [Northeast of Lake Van.], his own allotment. But Gurgen suspected that Ashot might report him as a rebel to the leader of the Muslims. so he went out to live in the guise of a vagabond with brave courage, loved throughout all lands.

Now since the oversight of Armenia had been entrusted to Ashot, who was the prince of princes, he undertook the subjection of the princes of Armenia, Georgia, and Albania which indeed he brought about. Gathering a force he entered Vantosp; Derenik opposed him, but Ashot captured him and put him in bonds like some disobedient subject and passed into the capital of Rshtunik.

When Gurgen received news of Derenik and how he had been seized, he marched rapidly with all speed from the regions of Taron. They encamped four hundred men strong, armed with armour for men and horses, in Noragiwl of Rshtunik. He wrote to the prince of princes bidding him renounce any useless plans he might have. "Otherwise, he said, I shall see you with arms and armoured cavalry drawn up in battle array." He was planning to attack Ashot unexpectedly by night. But the prince of princes, wisely inspired, hastened to fulfill Gurgen's request. And because Derenik's wife had just died, Gurgen wrote to Ashot, saying: "Does it not seem a fine idea to you most noble and eminent of all men, that there would be a trust ing alliance between you and Derenik if you gave your daughter in marriage to Derenik as princess of Vaspurakan?" Without delay the plan was carried out. He took with him Derenik and went to his own house in Bagaran. They made a great festival for Derenik's marriage, in the 311th year of the Armenian era. [The year 311 began on 25 April, 862 AD. In 858 Grigor Derenik was "about ten years old" (see above), so he was a young widower; his first wife is not mentioned elsewhere. Ashot's daughter was named Sop'i. Derenik married Hranush, daughter of Ashot Bagratuni.]

ARTSRUNI HISTORY CHAPTER 15

[Return Of The Princes From Captivity]

In those same times benevolent God allowed the Armenian princes to return each to their native principalities; they lived safely in peace, subject to the authority of the prince of princes.

Among them the blessed bishop Yovhannes and the ascetic priest Grigor, bearing the full title of confessor for their testimony as martyrs, were freed from the prison where they had been thrown. They reached our land, bringing the good news of the release of the captives—like Khoren and Abraham, confessors of Christ, who were freed from the cruel sufferings of their tortures in Persia and brought the happy news of the liberation of the Armenian nobles and the Lord's restoration of his captive people.

Now the blessed bishop Yovhannes chose for himself a separate eremitic spot, devoting himself entirely to prayer and leaving his episcopal rank. In his place they appointed a certain Yohan, a gentle and pious man, full of fear of the Lord, fit for the oversight of Christ's church.

But the sparapet Smbat and the princes of Vaspurakan remained there in Persia and were added to the rolls of martyrs. For the leader of the Muslims interrogated and did violence to them both; but by the providence of God they were left to live openly without danger in the faith of Christ as they pleased.

They died there and were buried gloriously according to Christian rite by the Community of the Jacobites*, who are the believing congregations there. Gaining the name of confessors, they were rendered glorious on earth and will be crowned by Christ with all the saints. Amen, I* Ukht Yakobkats'. Ukht could mean "clergy." Yakobik for Syrian monophysites is not common in Armenian, but see the Book of Letters, above: Yovhannes Imastaser (Awdznets'i) (Monophysi[ti]sm is a Christological term derived from monos, "solitary" and physis, a word that has in this context means "nature". It is defined as "a doctrine that in the person of the incarnated Word (that is, in Jesus Christ) there was only one nature-the divine". In other words: the other words: It is about the nature of Christ i.e. if Christ was a human or a god. The Churches have been struggling about this issue for hundreds of years. The mainsteam Churches postulate that Christ is both. The Gnostics believe he is only divine. The Ebionites or Nazoraeans, which is the Jewish-Christian Church represented by James the Just, the brother of Jesus, believe that Christ is only human; he could not be god as this would violate the first three articles of the Ten Commandments.) On the Councils in Armenia, "six bishops from the Jacobite party" (Yakobik tane) attended the Council at Manazkert in the year 175 of the Armenian era 726 AD. Ibid. Letter of the Catholicos Khach'ik to the Metropolitan of Melitene, "those who oppose Chalcedon include Armenians, Aluank' . . . those inhabitants of Asorestan who are Jacobite (A so res tan eayk * ork' en Yakobik), all Egypt . . . " The Council of Manzikert (or Manazkert) met in 726 to reconcile the Armenian Apostolic and Syriac Orthodox churches. It was launched by the Armenian catholicos John of Odzun and attended by many Armenian bishops and six bishops of the Syriac church sent by Patriarch Athanasius III. It took place in Manzikert (Manazkert). Both the Armenian church and the Syriac were miaphysite in their theology and rejected the Council of Chalcedon (451 AD). In the canons of the council, the Armenians anathematized both the aphthartodocetists (who believed that Jesus' body was incorruptible) and the followers of Severus of Antioch (who held a contrary doctrine) in favour of the moderate formulation of Cyril of Alexandria. The council formally withdrew the Armenian church from communion with the Greek Orthodox church. It affirmed that Christ was true God. only-begotten Son, a single hypostasis and a single nature of the incarnate Word. While his human body was capable of pain and suffering, "of his divine nature he was above suffering". This formulation was arguably consistent with Chalcedon. The council also addressed the rise of the Paulicians.

The Syriac church, which disagreed with many distinctive Armenian customs, was not entirely pleased with the outcome at Manzikert, but accepted communion with the Armenians nonetheless. The canons of Manzikert are often credited with confirming the Armenian church in its distinctive non-Chalcedonian theology and setting it apart from other churches. After the council, Armenian Chalcedonism was suppressed. The Council of Chalcedon (Latin: Concilium Chalcedonense: Greek: Synodos tes Chalkedonos) was a church council held in 451 AD, at Chalcedon, (modern Kadıköy in Istanbul, Turkey) a town of Bithynia in Asia Minor. The Council was called by Emperor Marcian to set aside the 449 Second Council of Ephesus. Its principal purpose was to assert the orthodox catholic doctrine against the heresy of Monophysitism and Eutyches, although ecclesiastical discipline and jurisdiction also occupied the council's attention. The council is numbered as the 4th ecumenical council by the Catholic Church, the Eastern Orthodox Church, and most Protestants. Oriental Orthodox Churches do not agree with the conduct and the proceedings of the Council, commonly calling it "Chalcedon, the Ominous". This disagreement led the Oriental Orthodox Churches to separate from the rest of Christianity after the Council of Chalcedon. The Confession of Chalcedon provides a clear statement on the two natures of Christ, human and divine. The full text of the definition which reaffirms the decisions of the Council of Ephesus, the pre-eminence of the Creed of Nicaea (325 AD). The most comprehensive confession of the Person of Christ was made at the Council of Chalcedon in 451 AD and follows the teachings of Saul of Tarsos, Paul the Apostle: "Following the holy Fathers, we unanimously teach and confess one and the same Son, our Lord Jesus Christ: the same perfect in divinity and perfect in humanity, the same truly God and truly man, composed of rational soul and body: consubstantial with the Father as to his divinity and consubstantial with us as to his humanity; "like us in all things but sin." He was begotten from the Father before all ages as to his divinity and in these last days, for us and for our salvation, was born as to his humanity of the virgin Mary, the Mother of God. We confess that one and the same Christ, Lord, and only-begotten Son, is to be acknowledged in two natures without confusion, change, division or separation. The distinction between natures was never abolished by their union, but rather the character proper to each of the two natures was preserved as they came together in one person and one hypostasis." After this lengthy explanation, we can figure out who the Community of the Jacobites were. Jacob (Yakob) is the original name of "James"

the Just, the brother of Jesus. And the Jacobites seem to have been an Ebionite / Nazoraean community that has survived in Armenia. It was still fighting for the real Jesus, the human.]

Gurgen, however, daily increased in strength in numerous places—in Taron, Andzavats'ik', Arzn, and everywhere—as the records which were kept before us indicate, and which it seems to me superfluous to repeat. 6 So after many turmoils and battles he succeeded in bringing the principality of Andzavats'ik' under his control in the following fashion.

Mushel, lord of Andzavats'ik', was ill and at death's door. He had a son who was an infant, so Derenik planned to control the land. Mushel set in writing that he would entrust him with the castle of Noraberd and the surrounding territories, and that he would bequeath the other lands to his own son. When the lord of AndzavatS'ik' died, his wife Helen wrote to Gurgen: "If it pleases you to marry [me] and you wish to rule over AndzavatS'ik', do not hold back, delay, be slow, or fail to make haste." The plan of the lady Helen did please Gurgen. He came to the castle of Kanguar, carried out his aims, and ruled with great authority over Andzavats'ik'.

But Derenik exercised great ingenuity and caused himself much anguish in endeavouring to find some means whereby he might wrest the castles from Gurgen and control the country.

He wore himself out from his many troubles and endeavours, from gathering troops and preparing for battle, from fitting out for armed combat and setting up the powerful machine for hurling stones. Making this vain effort, but remaining unable to gain the fortress, he returned to his own principality. However, Derenik did subject to himself half of Andzavats'ik' with the fortress of Noraberd which he held by officials, and he gave to Gurgen the province of Mardastan as his personal portion, while he left his own agents there. But since Derenik had been false to Gurgen, he expelled the officials. And in like fashion Gurgen found a way to seize the castle, expel his officials, and rule alone over the principality of Andzavats'ik'. He pacified the land and made it safe and secure from bandits; he built churches and carried out the ceremonies of dedication in peace.

This was the sixth year of the captivity of the Armenians, and the 306th of their era. In the 307th year of the Armenian era Ashot, prince of Vaspurakan, returned from captivity. [This paragraph does not tally with other information in Thomas. On p. 202 above we are told that Ashot's son Grigor returned in the year 307 (a.d. 858/9), but not Ashot himself. Below, Thomas says that Ashot died six years after returning from captivity, and that he died in 323 (874/75 AD). Vardanyan corrects 307 to 317 (868/69 AD), which fits the dates. But since Thomas next turns to Bugha's death (in 862/63 AD), one may suspect that this paragraph is a later, incorrect, interpolation.]

I promised above to write concerning Bugha, in particular the exaction of vengeance, but not the whole story.

When Bugha returned to the court, he acted in a supercilious manner, was swollen and bloated full of arrogance: he would boast about the tremendous deeds he had accomplished, and suppose that by his own power he had presided over the destruction of Armenia-forgetful of the retribution for our sins inflicted by the Lord, as on Israel in times of old during the reign of Sedekia at the time of Nebuchadnezzar. We have indicated the details of the story of the wife of Sahak, a son of Ismael, the death of Sahak and his wife's public lamentation of the reason for her husband's murder, and her declaration to the leader of the Muslims, Jap'r. The latter, with his habitual licentious and foul insatiableness, waxed haughty and raged in an excess of ferocious poison. He flamed and burned like a furnace to spew out mortal poison on Bugha. But he did not enjoy an open execution of his desires-first, because of Bugha's victorious and renowned accomplishment he thought it would bring opprobrium on himself; second, because of the battalions of the army. So he sent him to Khorasan, entrusting to him the government of that land. Jap'r himself strove to remove the army from him gradually, ostensibly in order to send raids into various lands. At the same time a command was secretly give to some people to deprive him of his life; on receiving the order, they directly carried it out.

ARTSRUNI HISTORY CHAPTER 16

Concerning the return of Prince Ashot from captivity, and Vahan Artsruni

A t that time the citizens of [the town] called Kzuin had revolted against the rule of the Muslims. So the leader of the Muslims gathered a force of cavalry from among the elite warriors of Asorestan and Arabia; among them was in cluded our valiant Ashot with his heroic strength who joined the royal army. [The role of Armenians in Sasanian armies is noted by Efishe, Lazar, and Sebeos. That the tradition was continued in Muslim times is clear from the agreement between Muawiya and Theodore Rshtuni, quoted by Sebeos, p. 164 (the "pact with death and treaty with hell"). Thomas makes it clear that the overlords of Armenia obtained military service from their vassals.] Muse, son of Bugha, was appointed general. He had promised to bring about Ashot's return to his native principality, fixing the time at the completion of the campaign on which they had set out.

When they reached their destination, the armies of both sides faced each other in immense numbers. Line prepared for battle opposing line; the most valiant and splendid outdid each other in boasts of prowess. There our brave Ashot, feigning illness, reclined in his tent while they were seeing to preparations for the battle. Although the general Muse himself kept urging him to hurry and arm for battle, even more did he exaggerate the severity of his feigned illness and the grievousness of his pains. But while he feigned illness on his couch, the champions surged around. There was a fearsome thunder and frightful echoings and repercussions from the crush of the assault, like the crashing of hail and lightning from clouds. The army of the citizens of Oazvin had the upper hand over Muse, pushing him back around his own camp where our Ashot seemed to be ill. Vahan entered his tent, begging and urging him not to linger until his repute for valour was thought by some to be tainted with cowardice, though he thought such suspicion unfounded. Immediately his groom made haste to mount him on his horse. Putting on his armour, taking his lance in his hand, and shouting encourage ment to his band of noble warriors, he cried: "On, valiant Armenians; let them now recognise us and our prowess. With an impetuous attack surpassing all admiration, in the twinkling of an eye they routed the enemy cavalry, broke the ranks of their army, and struck down as corpses the champions in the front ranks as if they had been hit by lightning. As the wind blows the summer dust, that rapidly did they bring the battle to an end. All Muse's plans against the enemy were accomplished. Yet Muse did not carry through without fail his promise concerning Ashot-that he would restore him to his principality. He reckoned it inappropriate to establish such an intrepid warrior in a place far from the royal court. However, Ashot escaped and with Vahan openly returned in peace to his own land, his heart full of joy. On his account they multiplied their thanks to God.

ARTSRUNI HISTORY CHAPTER 17

[Concerning Ashot's Struggles For Andzavats'ik' And The Return To Peace]

A fter this, when he heard of Gurgen's ruling over Andzavats'ik', Ashot entered the land of Andzavats'ik' with a large force and encamped in the village of Blrakan. He despatched to Gurgen Vahan Artsruni and the priest Teodoros, abbot of Hogeats' Vank', with this message: "I have come in peace at an order from court and not, like you, to engage in rebellion. So give over half of Andzavats'ik' to my son Derenik, and do not continue to act in opposition. Unless you do this willingly, he will bring constraint to bear, and by force will make you abandon what you do hold."

Gurgen modestly and without pride answered him: "You have deprived me of my ancestral inheritance and expelled me from my fraternal portion. Are you attempting to seize by force this heritage also which God bequeathed to me? Are you to be the only inhabitant on earth? The Lord will see, will judge and give me my rights, as a righteous judge 1 is wont to do."

He provided Grigor his nephew and some elite soldiers with arms and horse armour, two hundred men. When informed about this, Ashot despised as insignificant the report and uttered haughty words. But suddenly, in the middle of the night, Grigor made a heroic attack; they surrounded Ashot's camp, dealing mortal wounds with sword and bow so that very many of his army fell. Ashot himself escaped alone on horseback, and fled as far as the capital of Rshtunik, abandoning his camp. The others were scattered wherever they could escape. In the morning at dawn they plundered the camp with its baggage and the stores of treasure, which they took for themselves.

However, Prince Derenik, unaware of what had happened, on that same day came with a numerous force and encamped on the southern side of the castle. When he was informed of what had occurred, he turned back and went his own way.

Then he gathered eight thousand mounted men including Sahak Bagratuni, son of the prince of princes, and Smbat, Shapuh, and Mushel the ruler of Mokk', and the troops of Arzn. They approached the castle of Kanguar; but although they waged war for two months, they were unable to accomplish what they wanted.

Then Sahak and Smbat with the others were appeased and with drew from the conflict; friendly love was established between the two parties, and they went each to his own land. Gurgen and Ashot met each other, exchanged greetings, and made a peace treaty which has lasted up to the present day.

ARTSRUNI HISTORY CHAPTER 18

[Concerning The Strife Of Prince Ashot With The Utmaniks And His Freeing Of The Places Which Had Been Seized By Them]

A shot went to wage war with the people who live on the lakeshore called Ut'manik [The Arab tribe of Ufmanik or Uthmanid], and who were secure in the impregnable rock of Amiuk. For according to the demarcation of Ptolemy and Alexander, or of our Artashes son of Sanatruk, that province was reckoned among the provinces of Vaspurakan; and one hundred years previously it had been forcibly removed from the jurisdiction of Vaspurakan by the Muslims.

In those days the Ut'maniks, who lived in the fortresses of that province had killed Rstom Varazhnuni, who at that time held the rank of tanuter of the land of Vaspurakan. So Ashot and his son Derenik gathered a force to attack them in the castle.

But because the castle was unassailable unless supplies ran out, the prince took Varag from the control of the Muslims. For they had seized it and subjected to taxation the monks of the Holy Cross, and had even captured the abbot of the monastery who was called Grigor, and put him in a deep and gloomy dungeon. Ashot sought to free him from his dangerous imprisonment. Then he turned against another stronghold, a free standing rock to the east of the mountain of Varag above the village of Kokhpanik', opposite the church of Saint Hrip'sime which Saint Gregory had built above the village of Ahevakank' at the completion of the conversion of Armenia. For in that spot had formerly been the site of temples of Vaheavahan. [Satinik had worshipped the image of Astlik in that area. Vaheavahan (if the spelling in the text is correct) must be a variant of Vahevanean, the name of a pagan temple at Ashtishat destroyed by Saint Gregory. But it is not clear whether this derives from the deity Vahagn, or from Vahe.]

But when he had approached the stronghold to besiege it, Yise of Amida, son of Sheh, who held the position of commander-in-chief of Armenia, hurried at the instigation of the chief of Manazav and the Ut'maniks, and arrived in haste to attack Ashot with seventeen thousand armed cavalry. Abandoning the assault on the fortress, he turned with fearless courage to oppose him with the support of Gurgen's troops. He took up his position on the other side of Vantosp in a rocky, stony hollow between two hills that overlooked the plain of Erivarats'arkman above the village of Lezu, where the fable is told that Ara the handsome, killed by the troops of Semiranis, was cured. The emir Yise with his numerous army advanced towards the hill called the summit of Ak'alav.

But Ashot spurred on his horse, which was covered in armour, and prepared for battle. He led the attack, seemingly mocking the enemy forces and reckoning his own small numbers in the thousands; for he did not have more than two thousand cavalry.

At that point Vahan, father of Gagik Apumruan, and Gagik himself attempted to reconcile the parties [Vahan was mentioned in passing, as the brother of Vasak.]. Since Ashot did not agree, Vahan secretly struck the heel from behind and lamed the horse of the armed rider called Sem, a confidant of Yise's. He was advancing to meet the prince, and was in agreement with Vahan to aim at peace, calm the dispute that had arisen, and quench the conflict that had flared up. To these proposals Ashot was not heedless; he retreated and encamped in the town of Artashes, while Yise encamped in the city of Van. At the same time Derenik and Gagik came before Yise, made peace proposals, gave hostages as an undertaking to pay taxes to the caliph, and made him return by the same road that he had come, not allowing him to pass through the land of Vaspurakan. Yise returned to Partaw in the land of the Gargarats'ik'. [Partaw was the residence of the Muslim governors of Arminiya. 'Isa was governor and also emir of Diyar Bakr (Diyabakir, in the southeast of modern Turkey.] So our princes acquired glorious and splendid fame in Armenia. Thenceforth he never dared to enter the land of Vaspurakan

Now Ashot was aged nineteen years when he became prince; he exercised the dignity of prince for sixteen years before the captivity of the Armenians, was five years in captivity, and lived for six years after returning from captivity. [Thomas's chronology is not clear. On the next page he says that Ashot died in 323 (874 / 875); the captivity was in 852. So either five must be changed to fifteen or six to sixteen. Since Ashot did not return in 858 but later, it is likely that he returned in 867 and was ruler of Vaspurakan for six years before his death, aged fifty-seven.] On entering his land, he resolutely practiced the Christian religion, repenting for his denial of Christ.

But what should I say here? For although they openly came back to the worship of Christ our God, yet they did not carry out the due canonical regulations—not only Ashot but also all the Armenian princes who had returned from captivity. They put aside the cowardice of their apostasy but remained outside the canonical statutes, leading scandalous Christian lives in debauchery and drunkenness, in adultery and lewdness, engaging in revolting and horrible homosexual acts which exceeded the foul bestialities of Jericho and Sodom, man shamelessly lusting for man and piling up infinite flames from heaven that surpass the devastating destruction of the flood. For they were mad for women, copulating with the daughters of Cain, and were destroyed by water; while the men who worked infamous deeds with men were consumed by fire mixed with sulphur, enduring in themselves the token of the eternal fire. At the second coming they will again undergo eternal torments, where the worm does not die and the fire is not extinguished. So as the Sodom ites who paid the penalty with fire will be tortured again, for those who will act in every evil fashion, what an expectation of torments will surpass theirs! See, sin over sin and torments over torments.

When the time for Ashot's departure from his world arrived, he was plunged into unfathomable remorse and regret; with flowing tears he made the confession of faith, hoping in the mercy of Christ and repeating the last words of the tax gatherer and the thief. With faith he looked to the saving Body and Blood of the Son of God for the forgiveness of sins, hoping in God's kindness. I do not despise or mock his remorse and repentence, for "who will utter the name of the Lord will live."

But it is unclear whether they were effective, for with difficulty are scars cleaned away by the exercise of words. However, in the house of Christ's Father there are many mansions. Perhaps they will remain free of torments, although they will not enjoy the wedding with the bridegroom. He Ashot departed not in despair, looking to the kindness of God.

When Ashot had completed his life, he died in the province of Vantosp, in 323 of the Armenian era, in the month of Hori, the sixth day of the month, on a Thursday. They laid him to rest with his brothers in the monastery of the Holy Cross in the province of Albag.

ARTSRUNI HISTORY CHAPTER 19

[Concerning the offspring of Derenik]

N ow Derenik daily increased and improved the prosperity and peace of the country, building, maintaining, administering. In his days there was a respite from brigands and marauders across the land; the rites of the holy church of Christ were splendidly and properly performed; there was no fear or suspicion anywhere. He begat three sons: Sargis, also known as Ashot, in 326 of the Armenian era; Khachik, also known as Gagik, in 328; and Gurgen—lively children, charm ing, fortunate, and loved by all. He also begat two daughters.

In those times Lord Zak'aria fell asleep in Christ, having occupied the patriarchate for eighteen years. He was succeeded by Lord Georg. [John Catholicos describes the change of Catholicos and notes that Zak'aria had held that office for 22 years. Georg, from Garni, was Catholicos until 897; see p. 243 below for his death.]

Now when the son of Sheh entered Partaw, he left there as governor of the city one of his trusted men, a certain Yamanik [Muhammad al-Yamani]. But he withdrew from obedience to his chief with the leaders of the city. So Yise waged war against the city for a year in concert with all the princes of Armenia. But being unsuccessful, he returned to Syria. This happened twice. Then Yamanik planned to march against Armenia, intending to rule over it. When the Armenian princes came to know his sinister schemes, with one accord they wrote to the court and asked for Ahmet' son of Halit' as governor [Ahmed b. Khalid]. For Yamanik was sending letters and messengers one after the other to the princes of the country, putting himself forward as governor of Armenia, veiling his treacherous deceit, but planning to remove all the princes of Armenia, especially the one in the highest rank, Ashot prince of princes.

However, the leader of the Muslims carried out the Armenians' request, and sent to Armenia the above-mentioned Ahmat son of Halit. When he entered the town of Datuan [Modern Tatvan on the southwest shore of Lake Van], which they regarded as their own private inheritance, the Armenian princes went out to meet him from their own individual places: Derenik, Lord Gagik, and Lord Grigor, and another Lord Grigor prince of Vaspurakan, Ashot curopalates, prince of Armenia [The prince of Taron, not the "prince of princes" just mentioned. The title "prince of Armenia" belonged to the prince of Taron.], Mushel prince of Mokk', Shapuh brother of the prince of princes, Aplbar Kaysik ruler of Apahunik, and various others. All were fully armed and accoutred, generously loaded with gifts, and went to escort him into the city of Dvin. But Yamanik and Ahmat and Aplbar, in concert with some more of the Muslims, came plotting the same wicked intentions. They [The text of the letter indicates that it was written in the name of the governor Ahmad.] wrote a letter to Yamanik, saying: "When I enter the city of Dvin and take control of the royal taxes, let the Armenian princes have no suspicion and come to me. Do you, on the pretext of war against me, gather an army and come out to do battle with me. Then together we shall lay hands on them and remove them from rule over Armenia."

However, with his superior wisdom Ashot did not remain unsolicitous or unconcerned, but he ordered the bridgeheads to be guarded and the desert places and passes of the valleys. He was informed by various persons about the writing of secret messages to the effect that: "Some people on horseback are riding to such and such a place, and have enclosed in the panniers in a package a letter, which they are taking in the direction of Apahunik. So guard your road." The affair turned out accord ing to the warning. They arrested the messengers, took the let ters, and kept the men under guard, letting no one know what had happened.

ARTSRUNI HISTORY CHAPTER 20

[Concerning Derenik's Capture Of The Curopalates, The Prince Of Tar On, And His Making David Prince, Who Was Called King.]

While the princes were in accord without any thought of disloyalty, the governor, the son of Halit [I.e. Ahmad, here called hazarapet, "governor."], came from the court. Although they had been firmly and indissolubly united with bonds of mutual love, some calumniators adduced foul but alluring slander and divided the one from the other—as if they were indicating the evil deeds that were being plotted against the governor and putting the blame on each other with secret insinuations. Others, who were close to Derenik, claimed that Ashot the curopalates was in revolt, full of envy, and was slandering him to the governor, and that he was attempting to eject him from his principality. But the certainty of his crimes was revealed and confirmed as regards the Kavsik Aplbar.

As the sun was getting warm, while they were paying a morning call 1 on the emir, mounted on elite horses as if to go hunting, with their near relatives and nobles from among the elite of Vaspurakan, he went off about two stadia. The mounted troops of the Kaysik followed him, realising the reason for his departure from the camp. Unsuccessful, they returned in shame and downcast, thinking that what they had done had not been noticed.

At the same time the curopalates followed Derenik with the same purpose of estranging him from the governor, as he knew what he was plotting with regard to the Armenian princes who had gone to him. They were distant from the army five furlongs, when he [Derenik] recalled the slander they had reported about Ashot the curopalates with regard to Derenik-whether falsely or truly is not clear to us. So Derenik ordered Grigor his relative from the same Artsruni house to seize him and put him in the castle of Sevan; and he ordered Hasanik his nephew to keep him unfettered. [Grigor, Hasanik: Grigor was presumably the son of Vasak, i.e. Grigor Apuhamza, praised on the following page. For the Vasak who was Derenik's brother-in-law and father of Hasan is always called "Vasak the Apostate" (or "Impious"). Hasan (Hasanik) was the son of Derenik's sister and Vasak. His castle was in Vaspurakan (not near modern Lake Sevan).]

Now there was a further reason for holding him, namely: Derenik had married David the brother of the curopalates to his sister Mariam. Because of that, they say, he held him; for he was pleased to make David prince of Taron, who is called prince of Armenia; which indeed took place. Derenik ordered the troops of his own army to follow the ruler [David] in order to gain control of the whole country with its castles. And Derenik wrote to the son of Halit' asking him to confirm him as prince by his own authority. So he* [David] was prince over Taron for seven years before being gathered to his fathers; he left a child named Ashot. [* Thomas mentions David's death below as does John Catholicos, p. 174; the latter calls him David Bagratuni, great prince of Taron. He was ruler of Taron from 887 to 894.] But then Yise, son of Sheh, seized the land by force, secured it for himself, and set his own governors over it.

When the Armenian princes left the emir, there remained with him only Mushel, ruler of Mokk', a renowned and highranking man; he was accompanied by Grigor, son of Vasak. He likewise was a lively man embued with wisdom, splendid and famous among the Armenians, endearing to those who heard him and charming to those who saw him. In his great solicitude for wisdom and study and in everything else he surpassed his fathers and grandfathers. But they were suspicious of the governor in the camp, for Ahmat's intentions concerning them were apparent. Finding a suitable occasion they left the camp, freed like deer from the snares of hunters, and went peacefully to their own regions, leaving him dejected and full of shame.

After this Ahmat' advanced with his Kaysik troops and entered the city of Dvin, in the hope that he might be able to bring his wicked plans to completion. The prince of princes who was the highest ranking and most judicious person in all Armenia and all under heaven—came out to him with the most splendid ceremony, bearing no few gifts and honours. But he persisted in the same obstinate and malicious intention. He wished to destroy the rampart of bronze, to break the rod of iron, to bring the shepherd to ruin and the flocks to destruction.

However, the prince of princes Ashot could not endure that he accomplish his evil plans. So one day while the governor was preening and wallowing in such magnificent homage, the prince ordered his brother Abas, a mighty man and sparapet of Armenia, to put on solid armour, look to the arms and equipment of his troops, as was usual for brave heroes, and prepare horses, in order to thwart his evil plans. At the hour when the morning callers were intending to enter his presence and he was expecting the great prince to come to him, then the great sparapet surrounded his tent with his armed troops bearing shields and lances, making a solid wall. He brought in the letter which Ahmat' had treacherously written to Yamanik in the city of Partaw. Looking down at the ground and unable to lift up his gaze, he remained abashed; he lost his strength and assumed that his last hour had come. The sparapet took his hand and led him out, encouraging him to have no fear. He mounted a mule which they were holding ready by the door of the tent, and they brought him outside the wall of the camp to make him return by the same way as he had come. They sent off his army separately through the region of Apahunik', stripped of arms and horse armour so they could plunder no more, but they travelled with their luggage and horses. Ahmat' was escorted on his passage through the land of Vaspurakan by Shapuh, son of Ashot, until he reached the beginning of the road to Asorestan.

But the curopalates of Taron remained in the fortress of Sevan in the hands of Hasan, son of the impious Vasak [his apostasy]. He found no means of escape from his dangerous prison in any quarter, although many were concerned for that honourable man, especially the great Catholicos of Armenia, Georg, who entreated Derenik to free him. Frequently he implored him by means of letters, but he would not agree. He even took the trouble to come personally with great solicitude to free him from the misery of his prison. But even thus he was unable to obtain for him deliverance from his peril. Consequently, he left him to the care of the Creator, entrusting him to the grace of God. For the prince of Taron had great reverence for the office of the patriarch, and the latter exercised great solicitude for him, although he could not help in this particular matter. Then the curopalates began to make false insinuations between Derenik and Hasan, who was the son of Derenik's sister, to the effect that Derenik was not treating him honestly but was aiming at taking the fortress from him and gaining control of the land. "Often," he said. "I have verified this from his trusted counsellors. So do not remain unconcerned and unworried about this, but promptly look for a way to render his plans void." Now the fortress was quite impregnable, and no little treasure had been accumulated in it over many years, while Hasan himself was very young in years, being at the time of his independence aged fifteen years; for "youth and folly are vanity," as Solomon says. So he fell for the guileful bait at that man's suggestion, hoping for the fortress and the treasures and casting his eyes on the desire for ambition-the gathering of troops, the forming of cavalry, the giving of gifts to magnates and lords of the land, the summoning of everyone to support and aid -so that as his advice proposed, so indeed would he do. But he was unable to act openly, for it would have been unbecoming to form an army and prepare for battle. So he plotted with deceit ful cunning to carry out the fickle intentions of his plan. He entered the fortress and feigned an illness that was nearly mortal.

He sent word to the prince that without the slightest delay he should hurry there. He followed the messengers with compassion for a relative, in the supposition that he had succumbed to a severe illness and was near death, as the messengers averred. When the evening drew on, the darkness thickened, and everyone began to enter his own room for sleep, suddenly there was a glinting of swords and of lighted candles; the band of conspirators [arrived], and Hasan with them. They beat down the outer door where the prince had withdrawn; they seized him and brough thim to the highest part of the castle and imprisoned him in the innermost room. Hasan freed the curopalates, for him to go wherever fortune might bring him.

Straightway the bearer of this grievous news rapidly reached the glorious prince of princes and informed him of what had occurred. He was then besieging the city of Manazkert in the land of Apahunik, which was in the hands of Aplbar [The emir of Manazkert], and the blockade was nearly complete; but when the messengers arrived, he abandoned the siege, sending them proposals for peace. Gurgen, Mushel Bagratuni, and he hastened with the Catholicos and camped near the fortress where Derenik was imprisoned. By wise and judicious counsel, with sweet and gentle words, they persuaded the young Hasan, offering him the reverence due his white hairs and the dignity of his princely station and such-like. The patriarch mediated a sworn peace treaty, that they would abandon to eternal oblivion the harm of the evil done. At the begging entreaties of the prince and great patriarch the proposals were carried out, and they extricated him from his captivity, leaving as hostages Gagik, son of Derenik, and the son of Grigor Artsruni [Gagik, son of Grigor: Gagik was Thomas's patron].

At the same time some people approached Derenik insinuating supposedly true charges against Gagik Apumruan, that he was plotting with the curopalates to do what Hasan had fruit lessly done. But whether this was false or true is not clear to us; and I reckoned it better not to write down what is not certain. However, Derenik himself was false to the oath of the peace treaty between himself and Hasan. He seized him and imprisoned him in the castle of Nkan and took his fortress from him, appointing his own trusted retainers to guard it. He also took from him his home and lands, putting his own officials in charge of the land.

But when Yamanik heard how Ashot had sent back Ahmat' in disgrace and had frustrated the plan they had schemed against Armenia, he thought he was seeing his last hour upon him. He began to threaten and menace Ashot, openly and not in secret. By means of circular letters he set his hand to weaning away and estranging from him those subject to him—Derenik, prince of Vaspurakan, Aplbar Kaysik, ruler of Apahunik', and likewise those others whom he was able to seduce. Yamanik himself wrote to Ashot about Derenik [to the effect that] he was maliciously plotting against Ashot. So he managed to split and break apart the unity of the Armenians.

But Derenik proposed peace with Hasan, promising to return the fortress of Sevan and his land. "Only," he said, "send to me Gagik Apumruan by some strategem," because Gagik had gone and fortified himself in the castle of Chakhuk, being suspicious of Derenik on being informed as to what Hasan had done to Derenik. So at this proposal Hasan left Derenik, went to Gagik in the castle, and affirmed before him the complaints about Derenik. Gagik seemed very easily persuaded to believe him; so just as he Hasan had feigned a mock illness to Derenik, the same he now did to Gagik. While Gagik was sleeping without worry or suspicion, Hasan came on him at night armed with drawn sword and accompanied by a small band, candles lit, and he bound him with iron bonds Derenik hastened to come to him, took Gagik for himself, and sent him under armed guard to Vantosp, to the princess of Vaspurakan [Derenik's wife was Sop'i, a Bagratid], to be securely imprisoned. After a few days Derenik went to the province of Chuash, to winter in the town of Marakan.

Here it does not seem pleasant to me to continue my historical narrative. My mind becomes stupified on considering the misfortunes that I planned to describe in these records. The course of my hands fails for strength to write. Pains as of child birth overwhelm me as I set down these woeful tales. I grieve for the blow whereby I am crushed by the reproachful. Fast bubbling tears as from a boiling kettle flow out in torrents. Despairing doubts surround me at these events. Even more than the foaming waves stirred up from the depths by fierce winds, piled up like mountains and thundering like dragons, with even more fearful turbulence than the tempest for persons caught in their thrice violent course, by the whirlings of the mind is a noble heart forcibly constrained within [Such imagery of the sea is reminiscent of the first paragraphs in Agathangelos, where the comparison between sailing a ship and writing a history is elaborated. For other Armenian parallels see Thomson, Agathangelos, notes to §§1-10.]. I need some, even all, wise men gathered together in order to express the wealth of my laments. For have not the strength to sing the funeral dirge of so many calamities that have befallen. Therefore I have withdrawn from running a race that demands such great eloquence.

When men of mighty intellect are lacking, my poor historical talent is unfit to carry out the course required. Only with assistants would I perhaps dare to engage in tragic elegies.

When Derenik went to the winter quarters of the princes of Vaspurakan, he journeyed through the valley of Entsayik which opens into the province of the city of Her. He did not heed the noble troops who tried to prevent him. For they had heard through the circular letter that Ashot prince of princes had laid an ambush for him. They said: "Let us see the outcome of this report." Undaunted in his refusal [to heed them], he passed on and lodged in the village of P'erotak opposite the city of Her.

But the emir of the city, called Aplbers, with the help of the Persian army had been waiting for many days to inflict harm on him; gathering troops, he went out to meet him Derenik.

Early in the morning the messengers hurried out, saying: "Come, let us meet in friendly peace." And when the nobles tried to stop him, he would not heed a single one. Since the two districts are close to each other and contiguous, and the city is in a valley-shaped plain, it favoured the murderous beast to be courageous. He sent messengers to take him a response about their meeting. The emir's spies hastened to report: "Behold, he has left his army in order to go hunting, and is coming in this direction without concern or caution. So hurry to meet him, for God has delivered him into your hands." The armed cavalry galloped rapidly in a disordered attack. Derenik was riding grandly along and came face to face with the line of armed troops; he was alone in a watercourse. The enemy troops split to either side and forced him to come into the centre of their force. Their host immediately surrounded him and enclosed him as in a secure cave, casting a mortal net around him for the destruction of the valiant hero. The emir had given a signal, like that of Judas on kissing the Lord, saying: "When I give the sign by approaching to kiss him, do you wound him with your lances as strongly as you can.

Immediately with drawn swords and lances they rushed on him like bloodthirsty, manoevouring beasts. By his murder they brought darkness to the land of Vaspurakan where he lived. When the prince died he was forty years old [Derenik was killed in 887. When he returned from captivity in 858 / 859 he was "about ten"]. Then everyone turned piteous eyes on his valiant companions, to see whether there would be any who might bring him some aid. But since the Lord had delivered him into their hands, as David said, the fear of the Lord was on them all. Each man escaped by the skin of his teeth, and they fled to their own lands. Only Apusakr, prince of Amatunik', did they capture and bring to the city; and the corpse of the slain Derenik they took with them in triumph.

Here one should recall the words of Solomon that were fulfilled: "The fearless falls into traps and pits, and into places where there will be no visitation for ever. And with regard to the valour of the cowardly he says: "Fear will save the cowardly." But if for the cowardly fear is to be reckoned valour, how much more for the brave does valour acquired through fear sustain them! As David says: "I was prepared and I did not tremble." And another of the wise men of the world said: "Do not travel with a fearless [man]." But particularly true are the words of Solomon, who said: "Woe to one alone. When he falls, who will raise him?" And: "Two are better than one: for if one falls, he will rise up."

Merchants requested his corpse and delivered it to the bishop David of the same province; they placed it in a coffin in the church there. After a day had passed, Ashot, Derenik's son, came, took his corpse, and laid it to rest with his fathers in the province of Albag in the monastery of the Holy Cross. The land of Vaspurakan gathered, and for ten months they made deep mourning for him.

After that, Shapuh, son of the king Ashot, came and conferred the principality on Ashot, son of Derenik, in the place of his father. As for Gagik, also called Apumruan, he appointed him prefect over the land to rule as regent, for Derenik's sons were very young. Ashot was nine years old when Derenik died; Gagik was seven, Gurgen five. Although Gagik [Apumruan] cared for and nutured the land, yet the mass of the nobility was not happy with him and was restive. But since Gagik was greatly endowed with wisdom, he deferred to all the provincial leaders and commanders of the country; he dealt with them wisely and with profound skill; and by honouring each with the respect due his rank he honoured and appeased them.

After this Ashot the king of Armenia came to console his daughter and grandchildren, increasing still further the stability of Ashot's principality and the prefecture of Apumruan.

But the princess Sop'i, living one year and eight months after Derenik's death, was gathered to her fathers. They brought her and laid her to rest in the same monastery of the Holy Cross.

After this, her sons Gagik and Ashot and Gurgen fixed the day of their parents' commemoration on the feast of the Holy Cross. They gave to the holy church four estates: the monastery of P'shots' and the estate of Ahavank', opposite the church that was on the island, and the rock of Manakert, which faces it on the southern side, and Berkri; and many other places, which after the death of their father and mother the king's sons gave over for the needs of the Holy Cross of Affamar. Their commands are as firm as the rock: if anyone tries to change them, by God's commandment he will not inherit his throne and kingdom. And if anyone wishes to affirm them, he will be unshakeable in this world. Amen.

BOOK THREE

ARTSRUNI HISTORY CHAPTER 21

[Smbat Rules In Place Of Ashot]

In those times Ashot king of Armenia departed this world at a good old age, having enjoyed an abundant and happy life. "His hand was on all, and the hand of all on him." [Genesis 16.12.] He splendidly carried through the period of his reign: five years in the dignity of prince, twenty-five years of leadership as prince of princes, four years in royal splendour. He died in the year 339* of the Armenian era, in the fifteenth year of the patriarchate of the Catholicos of Armenia Georg [The year 339 began on 18 April, 890 AD. born in 819, Ashot became "princes" in 862, and king in 885. Georg became Catholicos in 876.]. In his stead ruled Smbat, son of Ashot, an illustrious and very intelligent man, very energetic in all matters; as concerns things under heaven it is suitable and necessary to abbreviate the totality: "pleasing to God and elite among men." [Romans 14.18.; Smbat Bagratuni ruled 890-914.]

ARTSRUNI HISTORY CHAPTER 22

[The Destruction Of The City Of Dvin By A Severe Earthquake]

In the third year of his reign over Armenia [I.e. in 892.], by divine anger the innermost depths clashed together with tremblings and shakings in the abyss like agitated torrents. The lowest part of the earth collapsed and was firmly locked in the region of Sandaramet [The divinity of the underground.]; fierce winds blew over the darkened waters, trampling down the deep, solid foundations of the earth and causing its thick, dense and immeasurable infinity to heave,

until it burst onto the surface of the earth opposite the city of Artashat, which is called Blur, where is the capital city Dvin. This populous city, surrounded by fortified ramparts and swarming and teeming with commerce and all kinds of impurity, was overthrown from its foundations. Hell opened its mouth wide and swallowed into its depths very many people. For some their houses became their tombs, just as it swallowed up the houses of the army of the Korahites. He who earlier spared the repentant Ninevites, now had no pity for the stony heart of the citizens of Dvin. Even the holy places and houses of prayer suffered the earthquake, their walls cracking and collapsing, as then on the death of King Ozias in the days of the prophet Isaiah, when at the voice of the seraphim the temple of the Lord was shaken and its doorposts destroyed. Likewise in the time of Zechariah the prophet there was an earthquake as far as the Mount of Olives. It is said that the number of people killed by the quake was more than seventy thousand. This earthquake was more severe than the one in the years of Zak'aria Catholicos of Armenia, after the seventh year of the captivity of the Armenians. [Zak'aria was Catholicos 855-876; see above. "After the seventh year of captivity" would be in 859/860, or later. John Catholicos describes this earthquake; but Thomas had not mentioned it.]

There happened to be there also the blessed bishop Grigor, the prelate of Rshtunik. He was unable to escape with his companions, since they were then at prayer on the mountain. So some of them were buried in that spot by the same earthquake. [Bishop Grigor is not mentioned by other historians. The text of Thomas implies that Grigor did escape, but not with all of his companions.]

But the blessed patriarch Lord Georg, more grievously afflicted than by the worldwide destruction in the time of Noah, with the bishop Grigor offered to benevolent God the supplication of Abraham of old on the destruction of Sodom. Abandoning his residence in Dvin, he went to reside in Nor K'alak' in the great church which the blessed lord Nerses II, Catholicos of Armenia, had built in the name of Saint Gregory. [Nerses II (548-557) is an error for the more famous Nerses III (641-661), named shinol, "the builder." The same mistake is repeated on p. 255 below. Nor K'alak' is Valarshapat (Ejmiatsin); see Agathangelos, §150, and Hubschmann, AON, p. 469. For the church built there dedicated to Saint Gregory the Illuminator, and the improvements carried out by Nerses III, see Khatchatrian, L'architecture, ch. 2. Sebeos, p. 147, notes that Nerses built a church dedicated to Saint Gregory at Zuart'nots', which was "near" Valarshapat; cf. Levond, p. 14.]

In the second year after this [After this: after the earthquake of 892, i.e. in 894/5.] the Greek army besieged the city of Karin, but turned back of their own will and abandoned it. In the same year the ruling prince of Taron died, and Ahmat', son of Yise son of Sheh, seized the land to subject it [Yise: the son of Sheh. But Thomas had said above that Yise himself seized Taron when David died.]. Gurgen the prince, son of the curopalates, was deceitfully killed by Ahmat's commanders; he was a brave and famous man, renowned among the Armenians [John Catholicos says that Ahmat slew Gurgen in battle. On these events see Adontz, "Taronites,"]. But the sons of Derenik, Ashot and Gagik and Gurgen, as

they grew in body increased in vigour and stature; they were also endowed with no little intelligence in the concomitant growth of their minds. With lively and joyous enthusiasm they had faith in the Lord's providential care for the prosperity of the land, and they turned the mourning and grief which afflicted the country because of Derenik's death into happiness and joy. Demonstrating the extent of their fraternal deference, with incomparable courtesy each regarded the other two as superior to himself, reckoning the dignity of their princely rank to be equally shared. Merely for his precedence did they agree to give the dignity of prince to Ashot. In this unopposed harmony they divided the land into three parts, giving to Ashot, as we said above, the rank of the ancestral principality with most of the other parts of the country as far as the castle of Nakhchavan. On the other hand, Gagik had the area of Rshtunik' with the neighbouring provinces and as much as he could obtain by force of the land of Mokk. While Gurgen had the eastern regions, from the end of Albag and all Parskahayk' around it as far as the beginning of Korduk', and wherever in this area he could control. And in such fashion they divided the land.

But Apumruan, by reason of being prefect, and alleging the youthful age of these princes, gradually began to gain control of the fortresses, loosening the briele of his ambition for power: the fortress of Nkan in the province of Tornawan, the castle of Kotor in the valley of Entsayik', the castle of Sevan in the gully of Lmbay. To the other nobility residing in fortified places he daily distributed gifts and honours, and happily spent time with them in order to win them over. When the nobles of Vaspurakan learned the details of Gagik's intentions, they had no desire to continue supporting him, and tried to find a solution without disturbing the peace. Some proposed this, some suggested that. But the alternative intentions of a majority were carried through for a while. The son of Apusech, Awshin [Muhammad Afshin b. Abu'l-Sadj, ostikan of Azerbaijan. See Ter-Ghevondyan, p. 60, for his relations with ArmeniaT and in general El, s.v. Sadjids, no. 2.], who had brought his Persian dynasty [The Sadjid Dynasty is meant rather than Persian domination in general.] to a high point by notable victories, attempted to lay hands on Armenia in order to spread farther his oppressive extortions. He frequently sent letters to each of the princes, especially to Prince Ashot and his brothers. Being acquainted with his tyrannical control over the Persian chiefs and what they had suffered, and reckoning that because of his neighbouring proximity to this country he might well inflict the Persian fate on us and our land, they agreed to submit to him and remain subject.

Ashot followed Awshin's messengers and went off fearlessly and courageously. But the Armenian king Smbat regarded Ashot's going to Awshin as inappropriate, lest other princes be induced to follow the same path. When he tried to restrain Ashot, the latter paid no heed. Immediately, moved by violent anger, King Smbat wrote to Gurgen, lord of Andzavats'ik', and to Gagik Apumruan, saying: "By natural right the land of Vaspurakan was your inheritance, but Ashot's ancestors have set you aside. So advance on your land with a powerful army, and let the territory be yours to inherit." [For the marriage of Gurgen Apupelch to the widow of the lord of Andzavats'ik', and his expulsion from Vaspurakan by Derenik, see above. Thomas has alluded several times to Gagik Apumruan's ambitions over Vaspurakan.] They quickly carried out his command in their ambitious desires. Marching on the land, they divided it into two portions.

They came to attack the castle of the city of Van. When Ashot had gone to Awshin he had left there the princess of Vaspurakan, Seday [Ashot's wife was the daughter of Gagik Apumruan. Thomas had not mentioned this marriage when describing Gagik's sway over the three brothers.], and had entrusted the defence of the fortress to Yise, brother of T'adeos, who were called sons of Sherep [He is only attested as the father of T'adeos; the latter is mentioned often below, but Yise does not reappear.], from the Akeats'i family—valiant men, versed in military affairs. They waged battle there for thirty days and were unable to gain an advantage, but suffered defeat at the hands of Yise rather than winning a victory. Eventually the castle's supplies ran out, water especially being short. So unwillingly they abandoned the battle, ceased hostilities, and surrendered the castle to Gagik.

While peace was thus shattered in the land, news reached Awshin and Prince Ashot to the effect that: "The land is troubled and those who hold your fortresses are wavering. So hurry immediately to destroy the unity they have imposed by force." Brooking no delay, he came with troops of Awshin to attack them. They retreated into their fortresses, and the troops of Vaspurakan turned to support Ashot.

Now Gurgen was planning to seize for himself a part of the country, especially the capital of Rshtunik which was the site of his father's murder, regarding it as the blood price. However, Apumruan made excuses to Ashot, saving: "I have come to this land to prevent Gurgen taking control of the castles of the country by force and winning over your troops by coercion. So talk peace with me, and remove the veil of deceit between the two of us." The gentle prince Ashot, mild and overflowing with all virtues, acquiesced in the proposal. They met at the valley of Kulan, where Gurgen had encamped on the spot called Karkineank' with a numerous army. Gurgen spoke openly to Ashot of his plans, and since the prince did not agree they immediately prepared for battle. Although Ashot had a smaller force with him, he did not withdraw or shy from war. But Apumruan came between them, and calmed the lines prepared for battle. Gurgen returned to his own castle of Kanguar, and a few days later his life came to an end. A mettlesome horse threw and killed that most valiant of lords, the brave commander and general of Greater Armenia.

But Apumruan continued to foster ambitions of ruling over the country. Since the three sons of Derenik, Ashot, Gagik, and Gurgen, were indissolubly linked to each other with mutual confidence and trust like a strong city or rampart of bronze, he was unable to carry out his plan. But as his ambition welled up inside him like raging waves, he persisted in his ambitions. They, having no suspicions with regard to Apumruan, came to him without mistrust; while he found a suitable occasion to seize them together and have them imprisoned in iron bonds in the castles of the country. Ashot was taken to the impregnable Nkan, Gagik to the fortress of Sevan, and Gurgen to the fort of Kotor. And he gave back the fortress of Sevan to Hasan, son of the impious Vasak.

On seeing this the nobles of Vaspurakan were unable to endure what Apumruan had succeeded in doing. They came to Atom, son of the great Gurgen, in the castle of Kanguar in order to find a solution: Yise lord of Trunik, the son of Honawar; Varazshapuh lord of Abeleank; Tadeos Akeats'i, son of Sherep; and others with them. With their baggage and families they all abandoned their homes and ancestral domains in their sincere devotion to the sons of Derenik. They reckoned it better to live in foreign exile than to see the sons of their prince, the ruler[s] of the land, imprisoned and held in bonds. From their youth they had loyally paid due service in accordance with the fitting custom of subjects to masters, as even the teacher of the heathen* enjoins. [* Teacher of the heathen (pagans, here: Muslims): Mohammed.]

At that point Shapuh, the king's brother, arrived and appointed Gagik lord of the principality of Vaspurakan, notably because Shapuh had married his daughter to Gagik. Atom procrastinated because of his fear of the king. The nobles of Vaspurakan in opposition went off to the city of Amida to Ahmat, son of Yise son of Sheh, who with great delight won them to himself as honourable men and powerful warriors, especially because they had often acquired a victorious reputation.

Indeed he had previously known of them by reports, and was very well disposed to receive them. Having seized the region of Taron for himself, he was aiming at becoming the effective ruler of all Armenia. For they earlier called Taron the "province" of Armenia. So Ahmat' received them and put them to forwarding his own purpose, so that he might win over the Armenian princes by respect and friendship, and thereby be secure from the suspicious messages which Smbat the Armenian king was continuously sending to him.

ARTSRUNI HISTORY CHAPTER 23

[Concerning the campaign of Smbat, king of Armenia, with the princes of Georgia, Albania, and all Armenia, against Ahmat of Amida; the defeat of Smbat by Ahmaf in the district of Aldznik on the river T'ukh, which flows into the lake of Bznunik]

As we briefly mentioned above concerning Ahmat, he had seized the land of Taron for himself and withdrawn it from Armenian control. Smbat frequently wrote to Ahmat asking him to abandon that land and give it to over to Ashot, son of prince David, promising him the position of governor of Armenia by royal decree with the homage of the Armenians. But Ahmat did not deign to heed his messages and scorned the proposals.

Then the king sent messengers to all regions of his Armenian kingdom, to the Georgians and Albanians, to the citizens, governors and prefects, and those who in friendly submission paid him tribute. Atrnerseh, prince of Georgia, came to him. And they say that the number of his forces was about 120,000. He marched along the edge of the lake of Bznunik' through the area of Apahunik, and camped on the bank of the river that descends from the ravines of Atdznik. When news of his arrival reached Ahmat', he too assembled the forces of his province and those of Mesopotamia and the Get'ats'ik', and came out to meet him. Straightway, in the twinkling of an eye, the thickly massed cavalry, armed and prepared, formed ranks in martial opposition and incited a clash. The valiant warriors of Vaspurakan, whose names we recorded above, attacked like heroes. They surrounded the camp, turned back the commanders, and as the wind shakes thickets of reeds, so did they mow down the host of the enemy army

When the king learned that the armies had joined combat, he hoped still to be able to bring the battle to an end. But threatened by his corps of warriors, he was unable to calm the raging fury and surging carnage. So he immediately turned his horse's bridle to advance to the fray. He demonstrated there many brave acts of heroism, but they were of no avail. Abandoning the battle, he turned in flight by way of Holts. Ahmat surrounded the Armenian army and inflicted merciless losses, especially on the rabble of foot soldiers with them. They say that the number of killed was more than 5,000, and for one year the bodies of the dead were left intact by beasts and birds. In that battle fell Ashot Haykazn, prince of Gelark'unik', called the son of Sup'an. The wife of the sparapet 1 came from Taron, and finding his body by its insignia, took it to her town of Porp and buried it.

ARTSRUNI HISTORY CHAPTER 24

[Concerning The Death Of Apumruan]

A pumruan kept Gagik, son of Derenik, unfettered, having extricated him from bonds and prison. But the latter plotted even more assiduously to murder him courageously. Members of the house of the Amatunik, Shapuh and Vahan and Saray, who were brothers, Apusakr Vahuni, and others conspired together with Gagik to murder Apumruan, whereby they might be able to release Prince Ashot and Gurgen from bonds and win back their principality. So when Apumruan arrived at Vantosp with the fugitives after the king, they resolutely carried out Gagik's plan.

When the king had gone away a distance of two days' journey, Apumruan went out to go riding. The nobles struck him from behind with their swords and slew him; cutting off his head, they sent it to the garrison. They freed Ashot and Gurgen from imprisonment, and ruled over their native principality with great vigour, living thenceforth without worry or suspicion. Princess Seday, Ashot's wife, took the body and placed it in a tomb in the place called Dzoroy-vank', above the village of Ahavakank. When news of what had been done reached the king, he made no other response save to say: "That deed was done worthily."

When the king arrived in his own lands, he had gifts and honours taken to Ashot in accordance with princely custom, raising Gagik to the dignity of general of Greater Armenia, to carry before him according to the custom of the Eastern Roman emperors banners inscribed with the cross. He endowed Gurgen his brother with the position of governor in accordance with the highest rank of the Armenian kings, especially of the great king Trdat.

ARTSRUNI HISTORY CHAPTER 25

[How With Deceitful* Friendship Awshin Plotted Evil Against Armenia And Its Princes (* In Islam, al Taqiyya or Taqiya [Arabic for "prudence, fear"] is officially a precautionary dissimulation or denial of religious belief and practice in the face of persecution. In reality, an "action of covering, dissimulation by silence, omission or blatend lies is in Islamic Jihad a common practice in order to overwhelm, subjugate and kill Kafirs ["the vile Islam rejectors", that means: any non-Muslim!]. The Koran clearly states [2:193]: "Fight them [Kafirs] until there is no more discord and the religion of Allah reign absolute, but if they submit, then only fight those who do wrong [opposing Islam and its main tool Sharia]." It is this tool that implements little things like halal food first, Islamic dress code next; then come bigger demands. Islamic authorities pay you even money to follow their Koranic demands]; over time, before anyone realises that it is to late for any resistance, the Sharia rules everything and everyone! The Koran clearly divides humanity into two humanities: Muslim and Kafir. A dozen verses say that a Muslim is never the true friend of a Kafir; the Koran states [3:28]: "Believers [Muslims] should not take Kafirs as friends in preference to other believers. Those who do this will have none of Allah's protection and will only have themselves as guards [meaning: they can be killed by Muslims without legal consequences.]. Allah warns you to fear Him for all will return to Him." This is one of the Koranic commandments that prevents Muslims to assimilate into non-Muslim societies but encourages them to subjugate the non-Muslim host to which they have migrated before. The Hadith Abu Dawud 2789 says more: "whosoever collegiates or aggregates with Kafirs and lives with them, he is one of them." [This verse explains the dendency of Muslims to form their own close communities, in which, after a while, they rule supreme.]. This set of doctrines have come over the Armenians and hundreds of other nations, and they have been going on for 1400 years, now also in Western countries themselves. Almost two thirds of the Koran are devoted to Kafirs and how to deal with them. Deception and telling lies are an important part of Islamic strategy, it even has a name: al-Taqiyya. The following description is no exaggeration, it rather shows us the usual process of Islamic conquest up to this very day.).].

Now since Awshin, son of Apusech, was a man who loved turmoil and hated peace, and was insatiable in his thirst for human blood [Turmoil ... blood: This description is parallel to that of Jap'r above.]—which characteristics he regarded as great personal renown—he valued the ruin of a country more highly than its prosperity. Ceaselessly he moved around, contending with all lands, never resting. In his deceitful friendship for the land of Vaspurakan and its leaders he gave the impression that his affection was complete. One after the other he constrained them to hasten individually to his presence in order to render vassal service [Vassal service: tsarayakan spasaworutiwn. The Anonymous below, uses the term tsarayut'iwn of obedience paid to Gagik by rebellious subjects. In Ehshe it refers to the loyal service paid by the Armenians to the Sasanian shahs, p. 45. See further Toumanoff, Studies, p. 117.]—which indeed Ashot and Gagik and Gurgen did. Willingly or unwillingly, they carried out his orders, going and returning one by one.

However, one day Gurgen went to meet him in the city of Partaw, and stayed there for about a whole year. Awshin, that hater of good and lover of evil [cf. Micah 3.2.], continually plotted to effect great harm on Gurgen, to cast him into prison and inflict deadly tortures on him, to seize his castles for himself, to put the land into the hands of his own officials 6 and to treat its inhabitants in Persian fashion. Gurgen learned what Awshin was plotting against him from some people-or rather the providential and protective right hand of Christ sheltered him and saved him from destruction by fire and hail [Cf. Exodus 9.23.]. Help came from God, making him courageous, and snatched him away from the teeth of the wild beast [Cf. Deut. 32.24.]. He escaped under cover of darkness, accompanied by Shapuh from the Amatuni family, who had been an accomplice of Gagik's in the murder of Apumruan that we described above. So they returned to their own land, and filled the country with great joy as if they were to see someone returned from the dead.

But Awshin, thwarted in his plans, redoubled his efforts to accomplish his wicked desires in this fashion. With haughty mien he suddenly entered the city of Semiramis, Vantosp, growling and uttering cruel threats. However, Prince Ashot and his brothers retreated through the regions of Lesser Albag, near to the fortresses of Jlmar and Sring, Awshin entrusted the country to a certain minion Sap'i, a eunuch from among the Greek captives; he had abandoned the Christian faith and accepted the Muslim [Muslim: molimanak] religion, induced by its bloodthirsty teaching. They spread their agents throughout the land, save only that they were unable to gain the fortresses. In this fashion they acted without concern or fear, exacting tribute through officials [Officials: gortsakal. In the previous sentence "agent" renders gortsavar; see above.]. A strong force remained in the town of Hamboyrazan in the province of Mardastan, to which the episcopal see of Mardpetakan had then been transferred from the city of Nakhchavan [For the province of Mardpetakan and the episcopal see of Nakhchavan see above: the transfer had taken place after 852 AD. Hamboyrazan is unattested elsewhere.]. Here our three valiant brothers arrived with a small band of nobles in winter time. In the pale light of dawn they galloped upon the enemy and struck down more than a few with the sword. But since their horses were weary from their long journey and their energy was enfeebled by the drifts of thick snow, the enemy, being rested, returned to the attack with bows and lances. Some they captured, others they condemned to death, and cutting off their heads raised these up on poles over the gateposts of the wall. The captives they sent to Awshin in Partaw; they were imprisoned, condemned to death, and slaughtered by being cut in half. In this fashion they inflicted a cruel death on all the prisoners by cutting them in half, terrifying all who saw their dreadful end. Only a certain Arshak from the family of the Varazhnunik' survived at the request of the daughter of Shapuh Bagratuni, whom Awshin at that time had impiously married [John Catholicos describes the circumstances of the marriage between Awshin and the daughter of Shapuh, the king's younger brother. Arshak Varazhnuni is not attested elsewhere.]. The princes of Vaspurakan Seday, wife of Ashot and daughter of Apumruan, begged for him also, and they saved him from Awshin's sword.

ARTSRUNI HISTORY CHAPTER 26

[How Awshin And All His Army Perished Through Divine Anger]

What person or land did Awshin not destroy by various oppressive means-brigandage, rapine, murder by sword, and famine? For the famine became so severe that people not only ate animals regarded as unclean by the rules of purity [The Penitential of David of Gandzak has many examples of such rules of purity with regard to food.] but even revolting and horrible things which wild animals pass over. They ate the corpses of the dead without remorse, dragging them from the graves after they had been buried for one or two years. And what was the reason for this if not what Paul had said: "Because they did not choose to abide by the knowledge of God, he delivered them to dishonourable intentions to work unworthy deeds." [Romans 1:18.] This the prophet at the time of the Babylonian captivity also expressed: "Fathers will eat sons, and sons fathers," [Ezekiel 5.10.] as happened in the time of Vespasian [Titus Flavius Vespasianus: Roman emperor 69-79 AD. Thomas is referring to the destruction of Jerusalem in 70 AD by General Titus Flavius. Eusebius, Eccl. Hist., III 6.24 ff., (following Titus Flavius Josephus) describes instances of cannibalism during the siege.]. But since the misfortune came from heaven and the wrath was sent by God. no one was able to oppose him in war. However, he who struck, the same also healed [Cf. Deuteronomy 32.39.]. For while the land was in such distress, they expected God's mercy to be multiplied, as God is accustomed to remember his compassion in his anger.

A man named Yovsep of Greek origin had entered Awshin's service; a eunuch, he abandoned the Christian religion, accepting the erring faith of Mohammed. He was a ferocious man, savage, unsparing in the drinking of human blood, but of mighty prowess in deeds of war, who cast fear into other nations; into his hands Awshin had entrusted power and force. But God, who in his providence alters the hearts of princes, separated and estranged Yovsep' from Awshin. Leaving the city of Partaw, he took his troops and marched rapidly to the land of Asorestan.

When Awshin learned of this, he was deeply stricken and made haste to write to Sap'i, who was residing at Vantosp and exercising the role of lord in Vaspurakan. Without delay and observing utmost speed, he went to Awshin in the city of Marakay. In just vengeance did the sword of the Lord, filled with wrath, fall on Awshin and his entire camp. The angel of God dealt them incurable blows in the fashion of Herod's disease: the body of that beastly man became bloated with pus and horrible swelling, and was filled with bloody corruption. First of all Sap'i, his dear friend, drank the strong poison. His bones and flesh were infected with incurable ulcers, and in the presence of Awshin he ended his life. In similar fashion all the soldiers and captains with the entire army perished; and also the herds of horses and donkeys and camels died from the same ulcerous infection.

Awshin himself suffered dreadful torments; having tasted a cup more bitter than viper's gall, he went on the journey to

perdition. And hell below turned bitter on meeting him, who brought with him an infinity of evils.

So our country took breath, and everyone lived in peace according to his rank, from the greatest to the least, thanking the mercies of God. In amazement they considered him wondering who he was, what sort of man, and how he had perished, and saying: "How did the exactor cease and the tormentor pause; [Cf. Isaiah 14.4.] how did his glory go down to hell?" [Cf. Isaiah 14.11.] This happened in 347 of the Armenian era, in which year

Lord Georg, Catholicos of Armenia, also died. [The year 347 began on 16 April, a.d. 898. John Catholicos, pp. 181-182, describes the death of Georg and the election of Mashtots*, but gives no date. Ter-Ghevondyan, places Awshin's death in 901 AD.1 He was succeeded on the throne of Saint Gregory by the blessed Mashtots', who came from the island in the lake of Gelark'uni [I.e. the island in Lake Sevan. For the monastery see Mecerian, Histoire et institutions, pp. 293-294.]. He exemplified the way of life of John the Baptist; and if you will not mock at my words, it seems not inappropriate or reprehensible to call him by the same name. For the Baptist was commanded to drink neither wine nor strong liquor. But he not only did not get drunk on wine, but did not quench his thirst with water save by the merest damping; and he satisfied his hunger with austere herbs. But in scholarly learning he was deeply versed, dead to the love for possessions but lively in his generosity. He occupied the patriarchal throne for eight or nine months, then passed on to the throne of apostolic honour promised by our Saviour.

In his stead the blessed lord Yohannes inherited the patriarchal throne. He had been educated and had studied at the feet of Saint Mashtots. Bedewed with the latter's learned instruction and scholarly discipline, he was a man of sweet temperament and modest disposition. He considered himself one with the common people, was foreign to haughty arrogance, and kept to the place of the mild praised by our Lord Jesus Christ.

ARTSRUNI HISTORY CHAPTER 27

[Concerning The Miracle Which Was Revealed In Ostan Of Rshtunik' In The Years Of Gagik's Generalship]

I have undertaken to give a true account of the marvellous manifestation of wonders that appeared during the time Gagik was general. But not a few regrets have fallen on me, which I shall now briefly expound, dutifully continuing my narrative.

The four-armed cross of Christ had been fashioned in wood by a certain skilled craftsman and a silversmith had enclosed the wood with pure and unalloved silver seven times refined in the furnace-like the altar of propitiation and other vessels prescribed by Moses for the tabernacle [and fashioned] by the craftsmen Eliab and Beseliel. A new Nabuzardan or Zamri from the heresy of Nestorius appeared, a thrice-miserable and wicked wretch, afflicted with the scourge of avarice. Penetrating in the darkness of night, he made his way into the secure walled hill and entered the holy shrine. While sweetly desired sleep overwhelmed those keeping the night watch, he raised his impure hand to the holy of holies and seized the holy cross of Christ. He got out through the window and hid himself to the west on the shore of the lake in a cave in the rock. But when he stripped the silver from the wood, straightway the evil demon afflicted him, causing him to roll down the mountain in a long fall as far as the level ground where the vineyards are. When what had happened became known, people rushed to search in the city and on the roadways in whichever direction anyone might have hurried, until they came upon the man afflicted by an evil spirit, still lying half dead. Picking up the cross that had been broken and crushed into pieces, they brought it to the general and washed off the impure blood that had adhered to the cross from the tumble of the demon-possessed man. He ordered a goldsmith to be brought, and had the invincible wood of the cross of Christ restored again. He rejoined the fragments in each one's position, and covered it with pure silver more splendidly than before, to the glory of the Christians and to the shame and ignominy of the enemies of Christ's cross. Then the wretch suffered the sentence of death, to pay in the world to come the penalty of the crucifiers.

But do not blame me for comparing the things of the law to those of the gospel; I am not ignorant of the greater and the less, of the example [Nabuzardan burned the temple; IV Kings 25.8. For the wickedness of Zamri see III Kings 16.9-20.] and the truth. As Paul teaches: "Whoever despised the laws of Moses, died from the testimony of two or three witnesses. Of how much greater a punishment will we think that man worthy who trampled the Son of God," and so on.

ARTSRUNI HISTORY CHAPTER 28

[Concerning The Rebellion Of The Muslims Called Kaysikk* A And Of The Prince Of Siunik' Against The Rule Of Smbat, And The Subjection Again Of Them Both (* Kaysikk The Kaysites were a tribe of north Arab origin; see Ter-Ghevondyan, pp. 51-53, and the table on p. 184; also Canard/Laurent, pp. 386-389, The emirs of Manazkert were Kaysites.).]

At that time the Armenian king Smbat assembled an army to attack the land of Apahunikt For the sons of Abdrahman [Abu'l-Ward (see above, p. 218) had two sons, 'Abd al-Hamid and 'Abd al-Rahman. It was the sons of the former who refused to pay tribute to King Smbat; see Ter-Ghevondyan, p. 65. The following events are more briefly described in the Anonymous, p. 276. He defines the tribute (harks) as "head tax" (harks . . . i glkhots ').], who are called the Kaysikk, had revolted against the king's authority [refusing] to give tribute and military service as was due. Almost all the princes of Armenia, Georgia, and Albania came with the Armenian army to attack the land of Apahunik'. With the princes were also the great prince of Vaspurakan. Ashot son of Derenik. accompanied by Grigor prince of Mokk'! and the troops of Andzavats'ik'; for the princes of Mokk' and of Andzavats'ik' had submitted to the principality of Vaspurakan. The Armenian army crossed over and encamped on the plain of Awshakan in the province of Manazav.

But the Kaysik who governed the land of Apahunik' gathered his own forces, including the neighbouring citizens and the Persian brigands who used to make raids against the Greeks. The Kaysik wrote to the king to seek peace and offering that whatever he wished should be done. So it was openly, but the secret later became clear. The king agreed to peace. But the Kaysiks and their allies and the Persian troops were secretly provoking battle and rapidly marched on the Armenian army. The latter were encamped without concern thinking themselves in safety, when the former drew up their line and armed for battle. The king and his army, taken by surprise, quickly fled from the camp by forced marches.

But Prince Ashot, the prince of Mokk', and the troops of Andzavats'ik very bravely stood their ground. In full armour and on armed horses they attacked as one man. In a resolute charge they fell on the right wing of the enemy, where the bravest of the Muslims were drawn up. They broke their ranks, defeated their warriors, and in the twinkling of an eye routed their army. Pursuing the fugitives, they put their swords to good use, piling up the corpses. The survivors fled for refuge to the city of Manazav. The bearer of the news caught up with the king, and they turned back to besiege the city. But those immured in the city sent prayers and supplications to the great prince Ashot that he might effect peace between them. Not being indifferent, but rather overflowing with benevolence, Ashot made peace proposals to the king. The latter was not unheedful and accepted the proposal, taking tribute and hostages including the fortress of Erikaw of Halats'ovit, which the lord of Manazav had taken from the lord of Berkri. [Berkri: This fortress on Lake Van had been in the hands of the Muslim Utmaniks; see above. Erikaw and Halats'ovit are not attested elsewhere.] These had taken it from the Ginuni [Ginuni: so the text of Patkanean. It is either a misprint for Gnuni, or a form based on traditional etymology from gini, "wine"; cf. Moses Khorenats'i, II 7.] family descended from Mezhezh Gnuni, [Between them: i.e. between the Kaysite of Manazkert and King Smbat.] although Berkri had been part of Vaspurakan. So he restored it to the people of Berkri. They returned in great triumph and unlimited joy. This took place in the year 351 of the Armenian era, in the fourth year of the patriarchate of Yovhannes, Catholicos of the Armenians, [The year 351 began on 15 April, a.d. 902. John became Catholicos in the year 898/9.]

When the next year came round, Smbat prince of Siunik' rebelled against the king of Armenia, prevented the payment of tribute to the king, and endeavoured to direct the tribute and taxes to the tyrant of Persia. He himself gathered his own forces, ten thousand soldiers, and occupied the fortresses of Vayots'dzor. Then the king rapidly sent messengers one after the other to Prince Ashot asking him to come quickly to him without delay. In one letter, recalling what Ashot had done against the army of Apahunik—his victorious war and winning of glorious repute---he wrote as follows: "This further task will be accomplished by peace or war, if only you put aside distracting delays," and he promised to give him cities, provinces, villages, and estates. For he had already given him possession of the city of Nakhchavan for his victory over the Kaysik of Manazav. The king himself gathered a large army of more than twenty-five thousand, and crossed over the river Araxes; they camped at that spot.

The prince of Vasyurakan arrived posthaste at the rendezvous. At this the king greatly rejoiced, being freed from the fear that he had of the prince of Siunik. At daybreak he crossed over the river. Araxes to the plain of Sharur and camped beside the river. Then prince Ashot wrote to Prince Smbat, persuading him of the uselessness of his rebellion. He reconciled the two and made peace between them; so Sahak, brother of the prince of Siunik, came bringing with him the tribute. Then he returned with many gifts and unparalleled joy.

ARTSRUNI HISTORY CHAPTER 29

[Concerning The Death Of Ashot, Prince Of Vaspurakan, In The City Of Nakhchavan]

At this point not with ready willingness do I continue my narrative, for grief rather than joy overtakes me. Infinite sadness springs up in the place of rejoicing; torrents of tears pour in streams from my eyes in the place of peals of laughter; I sink down rather than stand up straight; within me reigns broken heart rather than firm valour; my being is full of pain instead of health that opposes inevitable death. For what reason or cause? Because I am deprived of my valiant and great prince, of my hero and glorious chief. I speak of Ashot the honourable, noble, and grandly eminent, absolutely the most prominent among all the Armenians.

For when he went to lend his support to the king of Armenia, as soon as he left his house in the city of Van he was gripped by the pains of sickness, harbingers of death, which the aid of skillful physicians could not assuage. The nobility of Vaspurakan implored him not to go on that journey, adducing his illness; but he chose death for his uncle over life that would render his loyalty suspect. When the pains of his abdominal sickness intensified he entered the city of Nakhchavan. There he remained for forty days before departing this world, respected by all, especially because he was dear and beloved to everyone-high and low, poor and rich, grand and small. He had lived from 325 of the Armenian era, and was twenty-nine when he departed this world in the month of Areg, the fourth day of the month, on a Monday at the ninth hour of the day. [Thomas indicated that the rebellion of Smbat of Sionik* occurred in the year after 351. Therefore Ashot's death was in 352, which began on 15 April, a.d. 903. The fourth of Areg in 903 coincided with 14 November, a Monday as Thomas indicates. But Ashot could not have been aged twenty-nine if he was born in the year 325 of the Armenian era, or in 326 as Thomas said above.1 The princess Seday took his body and buried it in Albag in the village of Awsi, in the monastery of the Holy Cross. [The theme of choosing death over life with ignominy is common in Thomas (and other Armenian writers); see above, p. 140 n. 3.]

It would be appropriate to extend further rhetorical laments over him. But since the energy of my feeble mind is inadequate to compose a proper lament, let that now be left to another stronger person or to another time. To counter this affliction I have consoled myself with consummate and incomparable joy, by running after spiritual delights in place of physical pleasure. For although Ashot ended the measure of his life prematurely, he acquired a surplus by exchanging the certain and unfailing dissolution of this existence for spiritual eternal, and undving life, repenting and regretting his youthful inclination to easy and quickly accomplished evil deeds. For when the mortal pains gripped him, he no longer fretted over his youthful and premature departure from this world, his leaving the country with its numerous provinces and impregnable fortresses, his abandoning his splendid and delightful high-ranking brothers, and leaving the varied magnificence of nobility and what other sweet delights there are under heaven on earth: the glorious beauty of the sun and moon, with the splendour of the stars in their mutations through the firmament of heaven, of the sea and dry lands, of the pleasure of the magnificant rolling of the waves, and all the other congruous features of providence that reveal the image of the archetype. These and even more displays of material things he plunged into oblivion in his flight to the heavenly beings and the king of heaven. In his concern for the future life he was meek to the clergy of the church. He summoned the elders of the new testament, the bishops and priests, before whom he delivered a full confession of faith: the illumination of baptism, repentance for past deeds, hope after death, the benevolence of Christ. He cited the pledges by enumerating the greatest examples in a short time: the adulteress, the tax gatherer, the brigand, and such-like. He poured forth sighing, tears, confession, piteous intercessions, sadness unto death, looking to the medicine of life-the Body and Blood of the Son of God-for the forgiveness of sins. raising moanings and groanings with unbecoming sighs and great laments to Christ. He beat his face with stones, shed torrents of tears from welling eyes, tore out with his nails his newly blooming beard resplendent with gold and adorned with flowers and insatiably performed further acts of penitence. Even the holy angels appeared in visible form; in terror at their sight his mind was dazed. As they surrounded him, he questioned: "Is there forgiveness for my wicked deeds? Will God forgive my frequent trespasses? Tell me, answer me." This he said, his face buried in his couch, mingling his laments with repeated moans and groans. I indeed was beside him and knew precisely his firmness in the hope of salvation. Having tasted the Living Bread and the source of the Living and Life-giving Blood of the Son of God, he gave up his soul into the hands of the holy angels and fearlessly passed through the powers and principalities, through the guardians of this dark region who have control over the souls of unbelievers, rather than those of believers and those who have repented. and deliver them to their perdition.

After the death of Ashot and the completion of the period of mourning for him, his brother Gagik took control of the principality of Vaspurakan. The brothers Gagik and Gurgen, born of the same father and mother, descended from the noble and high-ranking stocks of Senek'erim and David, came together in mutual harmony inspired by affable love for each other with no thoughts of evil. They combined noble intention and generous inspiration, putting aside all thoughts of hostile intent and folly, and embraced each other in their desire for the good and advantageous prosperity and peace of their native land, to which they devoted their diligent care. By their reforms they restored to order what had been disturbed, brought back those who had been deprived of or removed from their ancestral lands and homes, settled the confused and turbulent state of the country into a course of calm and peace, and permitted each and every inhabitant of the country to live in security, undisturbed by marauders within or without.

The whole area of their principality they divided into two parts. The eastern and western regions that face to the north Prince Gagik received as his portion: the provinces of Chuash and T'ornavan, Artaz, Mardastan, Garni, Arberani, Alandrot, Barilovit, Palunik' and of Metsnunik', of Tosp, Rshtunik' [Tosp, kshtunik': The two words are spelled as one in the text, and Vardanyan takes it as a name for one province. But Tosp is the town of Van and the surrounding province; while Rshtunik' is on the southern shore of Lake Van. For Arberani, Barilovit, Palunik, and Gugan see Huebschmann, AON, pp. 341, 345. For Alandrot, Metsnunik, and Bogunik Fe Eremyan, Hayastan, pp. 32, 70, 45.], Bogunik', Gugan the province of Artashes. These were famous provinces, which in earlier times the father of treachery called mardpet had made his own-the story of which we recorded above -_ and especially the city of Shamiram, the most famous and glorious of all regions of Vaspurakan.

On the other hand, Gurgen marzpan of Armenia received as his portion the eastern part that goes down to the south: the valley of Andzahik', Krchunik, Khulanovit, the original province of Mardastan, Archishakovit, Arnoy-otn, Greater and Lesser Albag, Ake, Tamber, Tagrean, Ernay, Zarehavan.

But Tamber, Ernay, and Zarehavan had been detached from Parskahayk', while the city of Nakhchavan and the province of Golt'n had been detached from Vaspurakan a long time before, 211 years in fact, in the year when the church of Saint Gregory was burned and the Armenian troops suffered a horrible death. [It was in 705 (?) that the Armenians were burned in the church at Nakhchavan; see above, p. 105 n. 1. Since Thomas seems here to be referring to the period soon after Ashot's death in 904, the figure of 211 does not tally. The reference to Golt'n in this sentence is superfluous, since Thomas discusses that in the next sentence.]

The province of Golt'n had been detached at the time of the martyrdom of Saint Vahan, in the year 186 of the Armenian era when Saint Vahan, who was the son of Khosrov lord of Golt'n, was martyred. [Vahan's martyrdom is variously dated in the Armenian sources; see Muyldermans, Domination, p. 98. Thomas implies that it was in 737 AD; cf. Kirakos, p. 66: in the reign of Hisham (724-743). John Catholicos, p. 99, places it in the reign of 'Umar II (717-720). The disagreement is also apparent in the hagiographical texts; see BHO, pp. 67-268.]

So they began to create prosperity and peace for the land through equitable justice, care for orphans and widows, vigilance in charity for the poor and embellishment of the church. Gagik fortified with walls the hill at Ostan in Rshtunik that had lain in ruins for many years; he rebuilt the church there dedicated to the Holy Mother of God. Mary, and embellished it with very valuable vessels. In it he also placed the cross which we mentioned above, through which miraculous powers had been revealed. He built a church in the rocky cave of Amrakan, at the summit of the rock, dedicated to the valiant soldier Saint George. He adorned it with similar embellishment, with a silver censer, worked in choice silver and emblazoned with the sign of Christ's cross. Right beneath Amrakan, in a hollow spot diagonally to the north, he built a church, constructed in wonderful fashion from stones cut in the city of Manazav and brought to Vantosp, dedicated to the holy Sion in the holy city of Jerusalem. To the right of the altar he built on the same foundation (a chapel) dedicated to the crucifixion of the Lord at Golgotha. Above it he constructed a church dedicated to the upper room of the mystical celebration of the transmission of the new covenant. On the left side of the altar he built a church in commemoration of the Resurrection of Christ on the third day from the tomb, having pillaged hell. Above that he built a church dedicated to the Ascension to heaven and the sharing of the Father's throne, and in commemoration of the Second Coming, when he will come in the Father's glory with the angels to the apostles, bringing them the consoling and encouraging gospel. He also built on the rock of Amrakan on the eastern and western sides banqueting halls decorated in gold, with verandahs, improving what had earlier been constructed by his father Derenik. On the southern side he provided a staircase cut in the rock to the cistern, rising from

below up to the summit of the rock with easy access and egress, cemented with sand and lime. In his seemly wisdom he prepared a water tunnel underground, cutting channels for the passage of water out of the rock, so it could run from the summit of Mount Varag obliquely from south to north into calm wide hollows in the plain, and debouch at the summit of the rock of Amrakan. Thereby he provided for the various needs and requirements of his royal palace, his own construction that was built like a city, improving on the construction of his father.

Futhermore, looking to the east in the direction of Chuashrot and the city of Getk, he constructed a splendid place of pleasure, surrounding with palatial buildings a hill from which one could look down onto the plain to the banks of the river Araxes.

There herds of deer gambolled; there were lairs of boars and lions and herds of onagers, all ready for the pleasures of the chase—facing the mountains of Ayrarat, noble Masis, where Artavazd, son of Artashes, fell headlong on the rough slopes.

Descending to the town of Marakan on the river called Karmir which runs into the river Araxes, he built a stronghold impregnable to mounted raiders. There too in similar fashion he placed inside dwellings, streets, and buildings divided into rooms, sufficient for his needs, a little below the place called Dzork'. He found there a strong rocky place secure from military attacks, which he enclosed with ramparts. He established there a splendid palace, beautifully adorned for festivities. [In this sentence Thomas has combined the themes of the Second Coming and Pentecost. The combination is also attested in one of the frescoes in Gagik's later church on Att'amar. See Thierry, "Survivance." In a wider context cf. the long note 55 in Kitzinger, "Mosaics."] In this manner he was unstintingly mindful of all necessities, and accomplished everything that might serve the prosperity and peace of the land, involving himself in every useful activityas is appropriate for kings and princes to care and provide for the prosperity of the country over whose direction they have been appointed by God. For not only was he concerned with its prosperity but he was also ready to shed his blood and virtuously lay down his life for his sheep like a good shepherd, raising a lofty and grand memorial, an indelible covenant for ages to come. With rapid step he made his upward course to attain the mountain of the Lord and the house of our God, following the prophet's exhortation, soaring upwards from below to Mount Varag. There he worshipped the wood of Christ's cross that was crowned by Christ, a pedestal for God's feet, in which the ranks of kings who believe in Christ glory and by which they are crowned. He covered the holy cross of salvation with gold studded with precious stones, and set the wondrous rood with pearls; he fitted it into sweet-smelling wood, leaving a part open from the golden covering, and on its front fitted a square cross-shaped wooden casket. This is the cross which we mentioned above when we described its appearance 259 years previously in the time of Nerses II Catholicos of Armenia and Vard the patrician of Rshtunik' in the year when the Muslims occupied Armenia. [Thomas had not mentioned the apparition of a cross "when the Muslims occupied Armenia." Again there is confusion between Nerses III and Nerses II; see above, p. 231 n. 6. Thomas does not indicate when the Muslim occupation occurred; the attacks began n 640, but Vard (the text erroneously reads Vardan here) succeeded to his father T'eodore's position in 654. Ps.-Shapuh, p. 107, says that the cross appeared in the time of Vard. Nor is it clear from what date the "259 years previously" should be reckoned; for Thomas goes on to describe constructions begun by Gagik prior to Ashot's death in 903. For the cross of Varag see below, p. 306 (in the Anonymous). Thomas has awkwardly moved from Karmir to Varag; for the monastery at Karmir see Thierry, "Monasteres" I.] After splendidly adorning the cross Gagik descended the mountain to its base, where dwelt monks who wore the habit constructions. He built a high embankment at the village of Mahrast on the eastern bank of the river facing Ostan of Rshtunik', where there had previously been the walled palace of the Patrician Vard Rshtuni, descendant of Hayk. He appointed as abbot a certain priest named Yovhannes from the province of Boguni and the village of Anstan. Here he organised a settlement of monks and entrusted their direction to the above-mentioned priest, who was a gentle man, humble and honourable in his way of life, most appropriate for the position to which he had been called. The general set aside for the monastery sufficient villages for the reception of pilgrims and the care of the poor.

There he built a splendid and glorious church dedicated to Saint Peter the apostle, the invincible custodian of hell, and to the right and left of the altar another two churches. At first Gagik, not rightly inclined to the faith, intended to name the church after the Saving Name. For this opinion is of the Nestorians and Chalcedonians, with the other dyophysites, who in their error said that the Word took flesh from the Virgin as a house and tabernacle, and that the flesh was not in unity by nature with the Word. But the holy apostles are the house of Christ, as also are called the groups of other saints, as Paul said: "You are the temple of the living God"; and

Scripture again says through the prophet: "I shall live among them and shall go among them." But Christ is not called his own house or tabernacle, but the one Lord Jesus Christ, perfect from God and man. Otherwise churches which are called Saviour would be adored and worshipped with divine worship—which is most ridiculous. And it is plainly clear without doubt that if the church were called God and flesh of the Word, it would be even more ridiculous. The stones would be eaten and the wooden and other metal utensils, just as the Body and Blood of the Son of God; and again that is most ridiculous. Let this be enough said for now for intelligent and learned people, and let us leave aside the opinions of the foolish.

Furthermore, the general Gagik constructed buildings at the head of the valley of Awdz, which is so named because of the severity and strength of the bitter and mortal winds that blow there. He transferred villages there and built up the hillock that formed the fortified encampment of the house of the Artsrunik'. He named the site after his own name Gagkakert, and brought there the boundaries of the villages he had transferred.

Equally for his part the marzpan of Armenia, Gurgen, built in splendid fashion the church in the city of Hadamakert in Greater Albag, in the native princely domain of the noble family of the Artsrunik. The stones were hewn at a good distance-about three stadia away-and transported for the construction of the church by means of carts gathered from far and near. He made a vociferous proclamation, as though he meant a verbal warning, and had a clear announcement broadcast to inform people to prepare material for the completion of the holy church. In such fashion did the sound of hewing wood in the time of Noah announce by the carpenters' tools the flood that poured down from heaven and covered the abyss, in which the faithful man who trusted in God journeyed to safety by the efforts of his family. As the events of his time clearly had reference to the mystery of the ark, and salvation prevailed for us over the insolence of the Phrygians, with valiant faith did they press on with the house of God. Prince Gagik had formed a navigable route over the waves which went up and down like hills and valleys, when he brought hewn stones for the fabric of the church from the province of Manazav across the lake of Bznunik in little wooden ships; these ran in majestic path across the azure blue in their course over mountain and plain.

Thus he completed the splendid tower of the holy Sion with the other holy buildings dedicated to the sites of the dispensation of the Word of God made man. In like fashion Gurgen completed on an eminence on the promontory with graceful elegance his construction of two further churches to right and left of the altar. These he splendidly adorned with very valuable vessels worked in gold, signed with the cross, and set with pearls and precious stones.

But perhaps you here doubt that I can demonstrate Gurgen's enthusiasm for physical provess and warfare. So I appropriately add for you an account of his valiant heroism, his endurance in combat, his intelligence, experience and diligence in military affairs, his willing and meritorious exercise of the office of marzpan. In such fashion had the glorious Trdat taken proper care to provide for military taxes against the raids of brigands. This regulation we find among the holy angels established by the providence of the Creator for the benefit of the world. You can read in the books of the prophets these details, as in the sixth vision of Daniel and the discourse of Zechariah; and as Paul took care to explain the seven ranks handed down to the holy church by the Holy Spirit.

It happened, after the great battle which took place before the events I have been describing, that the Muslims came to the chiefs of the province of Manazav and the plain of Yush, combined forces with the turbulent occupants of the cities, and vainly raided the land. There they received their punishment from the sword of the warriors of Vaspurakan, as we described. As soon as the sad news of those fallen in battle reached the Persian city and the borders of Atrpatakan, in the perverse custom of their religion, being bloodthirsty and without benevolence, and especially as they were filled with Satanic mischief, they raised a cry to all cities, and created a tumult in their wild raving. They launched an attack from their lairs like bees swarming out from their hives at the season of their procreation led by their queen bee, who in their rage against the human race plan to destroy it, but rather bring extermination upon themselves. In such manner the Persian throng attacked the land of Vaspurakan in their various tribes and cities from Media and Persia, from Elam and Khuzhastan, from Krman and Mukan, from Turkastan and Khorasan. Suddenly they fell on the province of Chuash to bum, plunder, and destroy from the very foundations the holy churches, the houses of prayer of the Christians, to slaughter the priests of the new covenant with their swords, to kill old men and women with the sword, to march young men and maidens away to captivity, to destroy and loot ossessions and belongings. So the land was in great anguish, filled with terror at these calamities.

At that time T'adeos of the Akeats'i family, known as the son of Sherep, whom we mentioned above elsewhere in the great battle on the confines of Aldznik, fortified himself in the castle of Shamiram. He was lying in wait like a lion cub in its den. He wrote to the holy bishop Grigor of the house of the Amatunik, who was residing at the tomb of Saint Thaddaeus the apostle in the province of Ardoz, asking him to find some reason for the attack which had befallen them. He returned a response full of encouraging advice and exhortation to the hope of a martyr's crown: if in that battle it should happen that he be killed, then for the victory he would inherit the title of confessor, and he should strengthen himself in the power of the cross of Christ our God. With steadfast faith he rapidly advanced to the decisive battle. He left his fortified position with a small force, the garrison of the fortress of Shamiram; swooping like an eagle on its prey, they encountered the numberless host of the enemy at the village of P'aytakshtan. There, from a slightly higher position, they rushed down like a torrent to attack them, taking courage in Christ. In the twinkling of an eye they filled the surface of the plain with bodies of killed and wounded. Of the survivors. some fled before them wherever they could escape, while others raised loud and piteous cries, seeking deliverance from the sword of the valiant champion T'adeos son of Sherep. So the land of Vaspurakan gained peace, and they lived in safety and security. No more did bands of Persian raiders attack the country.

Since Lesser Albag and the land of Korcheik and Parskahayk' bordered on each other directly, and they were continually finding excuses for mutual quarrels—that is, the marzpan and those who governed Korcheik—the marzpan marched against them, and took control of Tamber and the province of Ernay and the castle called Apujap'r; and in the city of Vhri in Korcheik he installed his own officers to guard the fortress.

But the inhabitants of Parskahayk, marching in a confused rabble, secretly passed by untrodden paths to reach the city of Vitahot in the province of Mardastan. Attacking with the sword, they took captives and seized booty, then returned to Chuash and the province of Tornavan, passing through the province of Krchunik. They took captives and booty from Lek, Alzi, Krerik', and from the province of Chakhuk. When news of this reached Shapuh, brother of Tadeos son of Sherep', he marched out to attack the rabble from Parskahayk. There he exhibited many acts of prowess: he freed all the captives, and seized back the booty. But he was wounded by a sword, and died a martyr's death in the village of Giwlik in the province of Chuash, giving himself to death for the sake of Christ's sheep. Then the Muslims turned back and entered the provinces of Trab and Shnawh.

When the marzpan of Armenia Gurgen heard the sad news, he pursued them with one thousand men, fully armed cavalry, and reached the province of Ayli. Informed of his arrival, the Muslims fled to a distance and occupied the strongholds, scattering over the mountains in secret hiding places.

When the next year came round, while they were still unconcerned and safe from fear of the marzpan, the latter took about seven hundred cavalry, armed and equipped, and marched by a circuitous route in order to attack the Persian supply camp.

Leaving the city of Hadamakert at the ninth hour on a Friday, he passed by the lake of Embeay and by Varaz and Zrevhavan; at dawn the next day he reached the village of Erenay Yamats, and by evening had arrived at the river called the Taron. The next morning with weary horses they attacked the camp, whose entrance was unguarded. Straightway two men fell, Vlit and Marachay. The marzpan's horse was too weak to gallop, but with seemly defiance they boldly attacked the enemy, captured and plundered the camp, put more than a few to the sword, and reached a hollow at the village of Mlunik. But, as has been said, the horses were tired out from the long march, and the riders overcome by lack of sleep, the blazing sun, and burning heat, and horses and riders alike were suffering extreme thirst. While they were resting and unprepared, suddenly they were attacked by a band of raging infidels (Mohammedans] including women, their children and kinsmen. In fearsome strength they fell on the Armenians with flailing swords and mercilessly butchered them. The Armenian force suffered a terrible disaster, only a few from the large number being able to escape with difficulty. On that day, in the unnecessary battle, there fell about five hundred famous men, whose place of burial has never been revealed to this day. They were the most illustrious men from the house of the Artsrunik and other noble families-on whom may God have mercy.

Thenceforth the infidels gained confidence, and began to gather bands of common people, an innumerable multitude like locusts, from those who were called Shekhetik'. There were also others from various distant countries: Persia, Zhangan, Jurjan, the province of Vararat. They formed an enormous army in the province of Zarevan, and intended in their cruel spite to attack our land in order to destroy it completely. But the best and oldest among them temporised over this, especially those who are known as the most faithful in their religion, called Kurayk, their leader Hamis, and someone else from the regions of Zhangan. These said that it was not right to do this, according to their prophet. Furthermore, Prince Gurgen continually wrote entreaties to their elders and nobles, presenting what had happened as a misfortune and accident, and begging them not to wreak their vengeance on their vassals and subjects. So peace was arranged after these great tribulations by command from on birb I = 21

high. [...?] [END OF THE HISTORY BY T'OVMAY (THOMAS ARTSRUNI) HIMSELF. It Might Be Quite Likely That He Died At This Time As He Could Not Finish This Work.]

BOOK FOUR

[BEGINNING OF THE ADDITIONS BY OTHER AUTHORS, THE SO-CALLED "CONTINUATORS."]

He was given by the Lord another son, whom he named Gurgen after his uncle. He also demonstrated many acts of valour with the assistance of God, who fulfilled for him the inspired prophecy of the songs of David: "Everything that he shall do will succeed for him."

He also recovered for himself and his successors the region of Slig of Tosp province at the foot of Mount Varag, which the wicked race of Ismaelites had seized a long time before. His ancestors had striven for it, but without success. Now the renowned and warlike prince, protector of his fathers' claims, by his supremely wise resourcefulness, and especially encouraged by the assistance of God, with great bravery took the fortress by night and ruled over the province. He also plucked by force out of the hands of the Muslims the province of Ernay, which the Muslims had seized so long before that no one was able to recall mention of it, or what had happened to it over many centuries.

Likewise he recovered many other towns of Atrpatakan, over which he ruled with great magnificence. Through so many and such remarkable victories did he become famous and well known in Armenia.

But the cunning devil Satan-as once of old through the influence of the woman he tricked the gullible ancestor to taste the fruit, and rendered mortal the immortal nature that we had in paradise—likewise here too he stirred up the fire of envy against the valiant and renowned prince. He cast resentment and jealousy into the hearts of some Armenians so they might become accomplices; he inflamed the enemies of the cross of Christ, who like blood-thirsty beasts gnashed their teeth against him. Descending to depths of wickedness, they revealed their plots and incited each other to find means. planning by secret treachery and feigned friendship to accomplish their ends. But they never dared reveal any of this: "Perchance he may hear," they said, "and swoop down on us like an eagle on flocks of birds, and make us fodder for the sword." While all these secret conspiracies lay hidden fermenting, the prince, unsuspecting, enjoyed profound peace in accordance with the grace given him from above.

At this time he raised to high rank one of his kinsmen called Gagik, giving him the castle of Agarak and the province of Chakhuk, and making him commander on the Persian frontier. But his eyes were covered with grease, like the blinded Israel; he was ungrateful to his benefactor, and turned his back on the prince, overcome by the vice of rebellion. When the all-wise and mighty prince saw this, he undertook a sublime plan. In order to get rid of him he sent to him his nephew Hasan. Since Gagik had married Hasan's sister, he therefore received him in the castle in a friendly and peaceful manner. Finding a suitable opportunity, Hasan seized the fortress and wrote to the prince, describing how the affair had turned out. Immediately the prince arrived, put Gagik in chains, sent him to the town of Van, and imprisoned him in its fortress.

But as we said above, some traitors from Atrpatakan, and likewise those who were Armenian and whose accomplice this rebel Gagik had been, were continually plotting to carry out their murky plan. Since they were unable to harm the valiant prince in any way openly, they turned to a man who was very dear to the prince, the son of Apumsar from the city of Kher. Shedding tears and sighs before him, they recalled to him their patriotic zeal, the pillaging of cities and possessions, the seizure of houses and destruction of castles, the slaughter of troops and the shedding of much blood by the sword of the mighty prince, and they set before him the false ordinances of the religion of Mohammed's. Some other Armenians promised him riches and gifts. Just as fire thrives on a large supply of wood, so did this man delight in promises and pacts. Thus they seduced him, and through him craftily set the mortal trap

Matters were in this situation when winter arrived in accordance with the changing of the seasons, by which human lives are measured through the sun's motion. Then the illustrious prince, as was his former habit, set off through the valley of Andzah and arrived in the plain of Kher, intending to reach as rapidly as possible the royal winter quarters in the province of Chuash at the town of Marakan. At that time he had been preceded by the impious man, his deceifful and treacherous friend, pregnant with impiety, begetter of destruction, wicked suckling mother of mortal plots, nurse of darkness, accomplice of blood, advised by Satan, spumed by the virtuous, servant of the Evil One, key of hell, furnace of sin, ignited with the fire of envy by his own companions, mire of gloom, who engulfed in his abyss of perdition the shining pearl of the sea. Through evil messengers he begged the renowned prince of Vaspurakan to spend the night with him in accordance with his customary friendliness. The prince did not accept because he was hurrying to his own province. But the former, alleging that this was a violation of his pact of friendship, put pressure on the prince at least to let him see his glorious face. Taking a deadly present, he came to meet the might prince.

When they met they were unable to embrace each other. For the prince had gone out hunting unaccompanied by his soldiers and without wearing armour, and the tracks through the vineyards were difficult to pass, and the two men were separated by a noisy rushing stream that was very deep. Neither the Muslim nor any of our soldiers dared cross it, admitting their faintheartedness and the hesitation of their horses, especially as the prince did not let anyone follow him. Then the valiant and mighty prince, spurring his horse's flank, rapidly crossed that difficult torrent.

Now that foul Muslim, since he was unwilling to confront the mighty prince in person, having been previously advised by his accomplices, had taken with him some strong and athletic men secretly armed. He approached the prince, and throwing his arms around his neck gave him the kiss of Judas. The troops nearby forcibly seized his bridle, and laid hands on his sharp steel sword so that the valiant prince was unable to gallop away. Then, striking him with the lance, they took the brave man's life. Since his offspring were young children, Ashot, Gagik, and Gurgen, who had not yet reached maturity, therefore there was no one to avenge his blood so unworthily shed.

We cannot leave the memory of the loss of this all-blessed warrior without considerable and worthy lament. Therefore I call on the bitter grape of the wine pourer, the prophet Jeremiah, saying: "Who made my head a reservoir of water, and my eyes rapid flowing streams?" so I may ceaselessly weep for the day of the destruction of the new Israel. I do not hesitate to summon the similar woeful laments of the great prophet, the wonderful Zechariah, and with him go up to a high watchtower to cry out to all nations and say: "Weep, weep, east to west, north to south, nations to nations, peoples to peoples. For the helper has left, the defender has become silent, the great leader with his princely splendour has today been taken away from our head. Heaven above and earth below mourned the loss of their fellow servant. Who would not lament that day, whose entrails would not be contorted, among us who have deserved to see and endure such cruel and terrible misfortunes?

For the noble troops, deprived of their lord and scattered over mountains and plains, bitterly filled the land with sighs, laments, and flowing tears; from the anguished burning of their entrails they were struck to the ground like corpses, benumbed by the bitter taste of the mortal cup. The young men of his bodyguard, whom the prince had raised and on whom he personally relied, put nooses round their necks and were anxious to shed their own blood, preferring death to life. Even the dogs who loved their master, grovelling at the spot of his murder and raging in nocturnal vigil, scattered the beasts of the desert by their baying and howling to heaven, until the streams of noble blood that fell to the ground had dried in the heat of the sun.

The news of this mighty loss spread over Armenia like a heavy thundercloud filled with wrath, especially over his own pre-eminent province of Vaspurakan. There women and maidservants, putting aside the decorum of their female sex, heads bare, dragged themselves along the streets and roads. In their deep and bitter grief they forgot to suckle their infant children with their accustomed milk, having time only for voicing their mutual lamentations. The palace of the great princess Sop'i, beautiful as the sun, resounded with the beating of breasts and foreheads and with shrill wailings. In their lamentations they cried: "Woe, the renowned prince is lost, and the land of Armenia remains without a lord."

The princess, who had trusted in the invincible power of the mighty prince, said: "Why, Oh men, and for what reason did you have the arrogance to do this? There are no enenies anywhere; no war has engulfed us from anywhere. Who dared to do this? Who could seize my golden-feathered champion and noble cock, or trap him in a snare, without himself being torn apart and killed? Who was able to bring low the highflying eagle with his resounding and fearsome cry? Who could approach and bridle the unconquered dragon, and survive?" Such words as these. and even more. did the princess address

to the mourners.

When the event had been confirmed and the news of his death verified, then she threw herself on her face to the ground, strewing ashes on her head and spreading gloom through the palace. She cast off her noble veil adorned with pearls, dressed herself in black, and prepared a dark-coloured covering for her head.

Summoning her daughters, she prescribed rites of mourning and arranged in groups Jewish singers, and had them chant the laments of the kings of Israel Jewish: ebrayets'i. The grammar of the printed text makes this adjective qualify "singers," but Vardanyan takes it with "laments." References to contemporary Jews are rare in Armenian literature.].

On that day the holy churches and ranks of ministers were arrayed in mourning. The golden-laced, arc-shaped coloured hangings were removed from the doors of the rooms, to be replaced by black ones, very rough and sombre. Messengers were despatched hither and yon from among the mourners to shut the windows of the splendid palace, at the order of the princess. "Lest," she said, "the sun in the unattainable height of heaven, as it moves through its vault casting its rays down below, illuminate my darkness. Or the moon, reaching its full measure, with the morning star and all the ornament of the stars, dissipate my mist. Until God gives me among my sons one as courageous as his father, who in my lifetime or thereafter will blood of his father on the heads of those who plunged me into this darkness."

We were informed by those who had witnessed the events and who carried the prince's children in their bosoms that when the princess said this she stretched out her hand onto the shoulder of the splendid young Gagik. But I do not know if this was for the occasion, or whether the great lady Sop'i, blessed among women, did this prophetically. In those days of grievous mourning the hands of labourers and artisans forsook their tasks to be placed on knees and cheeks as they bitterly wept. Lords and nobles gathered together and broke their hearts with cruel laments: "Where," they said, "have we lost the honourable pearl, the boast of Armenia, the invincible warrior, who waged great battles without an effort and gained a glorious name for himself and us? Where is the pleasant smile of his lips which always gave joy to the numerous guests on golden decorated cushions and delighted us with the cup of hospitality?

Where are the liberal gifts of his generous hand that continuously embellished us with splendid adornment? Woe and alas for our life. Why did that day not befall us in a great battle among the jostling spears of an army, when we might have lost our lives?" But then the ranks of patriarchs and hermits bestirred the minds of the princess and the other mourners to the fear of God, and gradually drove away the misery of their bitter distress.

Here it would please me to describe in majestic style the lamentations. But to prevent the listeners' minds from being distressed, I shall refrain from saying anything about them, and we shall hasten on with the course of this history. Perhaps God will grant us success in bringing to a final conclusion the extensive story of the valiant men of the house of the Artsrunik'.

The end of the genealogy of the three sons of the renowned and valiant prince Grigor, in which are described his triumphant deeds, his death through the treachery of certain Armenians and Persians, and laments over him.

ARTSRUNI HISTORY CHAPTER 1

[The Accession Of Ashot His Eldest Son; And The Death Of The Blessed And Pious Lady Soph']

After the death of the blessed prince, his eldest son Ashot was confirmed on his father's throne at the age of about twelve years. The renowned lady Sop'i oversaw the remarkable progress of her children, especially that of the young Gagik; for even from that young age he shone out with wonderful eclat among his brothers. On seeing this, the principality like a man with the help of her father Ashot, king of Armenia.

Since Apumruan was the son of Lady Soph's sister, she therefore released him from imprisonment at the command of her father. Now Sop'i herself, incomparable among women like the turtledove devoted to its mate, separated herself from all delights of this earthly existence; being so attached to her husband, her heart was unable to endure the pain, and after seven months she peacefully departed this world to sleep with her ancestors, leaving her children young and tender in age.

Then several of their relatives murmured, plotting disloyalty to the youths; but they were unable to do anything from fear of the great Ashot, king of Armenia. Following this, King Ashot lived for a year and a half before leaving the world, gloriously buried for eternal glory. Their relatives found this a suitable occasion to begin seizing various places from the control of the young princes. Then Apumruan came forward with a plan, for he wished to rule over the principality of Vaspurakan.

He won over to himself the minds of the lords and nobles of the country by the following argument: "I shall rule the country as a substitute in the name of Ashot, and he will persuade the inhabitants of the land to acquiesce." When Ashot reached his majority he remained according to his custom respectfully submissive to Apumruan, for he had become his son-in-law.

Then, when there were a few days of leisure, he (Apumruan) summoned Ashot with his brothers to the castle of Kotor on pretext of congratulations. There one night he seized and bound them. He sent Ashot and Gurgen to the castle called Nkan, and had them imprisoned and guarded with great circumspection.

But Gagik he marched off to the province of Chuash, to the castle of Shamiram. For he had tricked Ashot like a young child by giving him the castle of Agarak with the province called Chakhuk, in return for taking for himself the castle of Nkan and the provinces of T'ofnavan and Chuash, where he fortified for his own account the castle of Shamiram.

Furthermore he put abroad among the people another type of fraud by saying: "I am a man without heirs, save only for my daughter whom Ashot has married. I am afraid that perchance Ashot may become puffed up against me." By this he persuaded and convinced his audience. But being himself suspicious and overcome by irresolution, now he would release the younger Gurgen and take him around with him, then again he would have him imprisoned once more. So he released Gurgen, but was perplexed with regard to him, not knowing what to do. For his heart was torn for thinking about the youth, and he was waiting for an occasion to kill him secretly. But God did not permit him to dip his hand in innocent blood.

ARTSRUNI HISTORY CHAPTER 2

[The Glorious Effulgence And Appearance Of God's Grace Over The Young Gagik; And The Killing Of Apumruan At His Hands Most Valiantly; And Praises Concerning Him]

In his foreknowledge Christ the king of all had previously designated the blessed youth Gagik as a chosen vessel worthy of his grace. Knowing that he would become such a person, he bestowed on him the spirit of power and wisdom, fulfilling in him what had been said by the prophet: "A just king reestablishes the land." Through him he did indeed save Armenia from very grievous afflictions that unremittingly had followed on each other, and from frequent wars that occurred in his generation.

Even from a youthful age he was a budding source of virtue. Hence the youth is a great source of amazement to me: although he had neither gifts nor possessions to grant anyone, nor with princely authority could he impose taxes on anyone, yet the lords and nobles of the land always treated him in a friendly way. For wisdom flowed from his lips purer than gold, and he grace of sweet modesty coupled with brave valour shone out over him, filling the hearts of all with hope.

His valour was already exhibited before he was yet fifteen years of age, when he made the decision of a true warrior to kill Apumruan. When the moment was favourable, he took his conspirators with him, attacked Apumruan, and put him to death by the sword in a park of the town of Van. Throwing him at his horse's feet, he cut off his head—which he brought to the fortress of Ashinot where Gurgen was, and likewise to the castle of Kotor in the valley of Andzakh were Ashot was. Both of them had despaired of deliverance. Liberating them, he gave the ring into Ashot's hands, and made him master of his own inheritance with the dignity of prince.

It was God, as I suppose, who permitted him to take vengeance for his father's blood from Apumruan, since he was one of the accomplices of the Evil One, as we mentioned above. So I do not hesitate to extol his virtues assiduously. Truly I am very eager to compose descriptions and praises of him and his deeds.

Because for a nation that was in darkness he placed a shining torch on the highest point of a castle that was fortified around with the power of God. It was preserved unextinguished from the hostile winds that blew ficreely from four directions. Not only was he himself not obscured, but through his firm faith he made the enemies of his father's house totter, and he utterly consumed them.

He was a tall tower built with strong stones bonded in lead, like a wall of bronze, firmly nailed, unbreachable by the enemy: likewise, similar to an iron pillar on secure bases set up with inconceivable strength and hope in God over the sublime principality of Armenia; a place of refuge to which one could flee from the face of the enemy. He was a rational sword, blazing with the power of the heavenly [angels], glittering and casting rays over the heads of the enemy; casting terror into them, he brought to a halt those who waxed insolent against the church and the institutions of the church. From a youthful and inexperienced age he rose up like a lion cub delightful in his proud stride, raising his arms over the backs of the enemy, plunging those lying in ambush from the paths of their feet. With fearsome summoning voice, through messengers and decrees he wrested for himself many treasures and stores from foreign nations, controlling more of their castles and provinces than his fathers.

Now the prince Ashot was supported by the grace and high arm of the valiant and brave youth Gagik, according to the saying of the wise man: "A brother helped by a brother will become like a strong city." He began to render himself daily ever more illustrious on his father's throne with victorious glory.

Seeing this, Smbat the king of Armenia sent his brother David to beg Prince Ashot not to become detached from him, nor to preserve rancour for his captivity by Gagik son of Vahan.

Smbat asked this favour of Ashot his nephew because he was fearful that perhaps Ashot might once again follow the summons of Ap'shin, like the first time which we described above. For Ap'shin was sending to Ashot many promises of gifts and treaty engagements. These Ashot did not accept, but he returned them since he had disregarded him during his days in prison. And he came to Smbat in friendship and peace, saying: "Many trials have befallen us" because the prince did not go to the emir Ap'shin.

Ap'shin came to Armenia with a numberless armed force and attacked Smbat, who escaped by the skin of his teeth and fled to Georgia. He then turned to besiege the castle of Kars, and opening up the stores of amassed treasures he took much booty.

Then Ashot, prince of Vaspurakan, travelling through the province of Bagrevand, rapidly returned to his own land. But Smbat, the king of Armenia, sent a messenger to ask Ap'shin for peace, giving as hostage his eldest son. Taking the latter, he turned to attack Ashot with many threats, resentful of his despising his summons. He reached the province of T'ornavan in the wintertime.

Ashot took counsel with his brothers and all the nobles of his army. They said: "These are hard days and time of war. Who knows whose will be the victory?" In order to spare the holy churches and the faithful, he went to Ap'shin, risking death. With protestations of friendship they engaged in negotiations, falsifying to each other their true wishes. He sent back Prince Ashot in great honour and with many fine gifts. But since suspicion had not departed from both their hearts, Ap'shin asked for hostages. So he gave his brother Gagik; seven months later he sent his youngest brother Gurgen, and Ap'shin returned Gagik.

On the arrival of spring Gurgen escaped from Ap'shin and reached his brothers, breaking the pact of friendship with Ap'shin. The latter pursued him to the city of Tiflis, causing Smbat no little loss, and taking much tribute. From there he advanced as far as the city of Van in the land of Vaspurakan with a numberless host. But Prince Ashot with his brothers and all his troops retreated and fortified themselves in the valley of Orsirank.

Then Hasan, son of Vasak the apostate, whom we mentioned above, gave support to the emir Ap'shin. That impious, baneful, and insolent man, father of brigands, mother of murderers, begetter of all impiety, was overcome by the raging wickedness of his father, scarcely preserving his faith intact. He inflicted much damage and destruction on the believers and on the holy churches; the traitor opened the gate to misfortunes, and set mortal traps, being familiar with the wiles of Satan.

However, leaving two eunuchs, the first of whom was called Sap'i, as governors with many cavalry in the great city of Van and the town of Ostan, the emir himself went to the province of Albag and stopped at the town of Hadamakert. He sent a eunuch named Yiwsr with a large army to wage battle with the prince. But because they were secure in the village of Kakenk, which was difficult of access, the eunuch returned in great shame, having been unable to harm them because of the strength of the site and the valour of their soldiers.

After the emir [Islamic leader or duke.] crossed into Atrpatakan with great haste, leaving the two enuchs in the two towns, as we described above.

When spring arrived, a eunuch whom he had appointed to govern the city of Partaw gathered an army, rebelled against Ap'shin, and went as far as the land of Sham. When the emir heard of this, willy-nilly he summoned to his presence the men whom he had left as deputies in the land of Vaspurakan, while he himself hastened to the city of Partaw. There he met with vengeance for the evils he had inflicted on Armenia. God did not spare him, but smote him with a painful ulcer through a holy angel—as once he smote the emperor Valens through the valiant martyrs of Christ by the vision of Saint Thecla, as the historian Biwzand has accurately expounded to us. Here two of his sons and many of his troops suffered painful deaths before his eyes; and after them he too received his end with cruel suffering. After this the land of Armenia was at peace from raiders of the malicious race of Ismael.

Then Prince Ashot remembered the wicked service that Hasan, son of Vasak the apostate, had rendered the emir Ap'shin. So he despatched a force to besiege the castle of Sevan, which Gagik, son of Vahan, had seized and then given over to Hasan while Ashot was still in prison. Since it was wintertime, when there was no possibility of waging battle with cavalry, Hasan gathered troops and came out on foot to oppose the army of the prince, which was in the village of Pluank' in the province called Lmbay P'orak. Attacking them in the middle of the night, he expected to gain the victory, not understanding the saying of the sage: "A man will not succeed by injustice." The power of divine providence came to help the prince's troops; although they were fewer in number, they severely smote and defeated the nocturnal attack of the undisciplined bandit Hasan. The roof of a house weakened and collapsed, and the ceiling fell in, making an inescapable trap for him and covering him over; so he was delivered into the hands of the brave warriors, that the saying of the prophet might be fulfilled: "He who dug the pit will fall into the abyss which he made himself."

Then he was captured, and dragged in double bonds to the gate of the castle of Sevan, where Prince Ashot with his brothers hastily preceded him, having been informed by messengers. They besieged it for a few days, then put out Hasan's eyes and took the fortress.

Gagik, the prince's brother, had intervened and made many efforts to save Hasan from the punishment of blinding; but he was not successful. Hasan was deprived of the light of this world, but the eyes of his soul were opened. Straightway he became a monk, and lived a holy life until the day of his death.

But the years of Ashot's principality did not run peacefully as he wished, sometimes because of his brothers, sometimes because of many other people.

About that time Smbat, the king of Armenia, arrived in the province of Apahunik' to demand poll taxes from the tribe called Kaysik. But they resisted, and raised the flag of war.

Then King Smbat summoned to his aid Prince Ashot, who, remembering the sympathetic bond of related blood, came in great haste. When battle was joined, Smbat with his army fled from the face of the infidels. Then Ashot, prince of Vaspurakan, intervened with a few troops, and with much help from on high, inflicted a great defeat on the enemy. He returned to the city of Nakhchavan which he had put under his own control. But falling prey to a mortal illness, he departed this world aged about twenty-nine.

ARTSRUNI HISTORY CHAPTER 3

[The Beginning Of The Principality Of Gagik After His Brother Ashot, And His Valiant Deeds]

A fter this Gagik, Ashot's brother, succeeded to the throne of the principality. Like two fountains near each other, when one of them abated, the other would shoot forth its stream all the more. Or like two dragons or lion cubs: one hidden, the other would be even more domineering. Or to speak more majestically, like the Queen of the Night, which circles through the thick clouds for fifteen days hidden from men, all its splendour lost, then returning to the same cycle of brightness, in the twinkling of an eye robes itself in powerful light, and at the command of the supernal regent clears away the gloom in the air, and pours the rays of its pure light onto the earth. In his pleasure at this, one of the saints said: "Sweet is the sun after clouds, as rest is sweet after labour."

In such manner with prudent intelligence did Gagik, prince of Vaspurakan, fulfill in himself these parallels that we mentioned above in accordance with our descriptive style, in the fashion of historians. He calmed the land of Vaspurakan which was disturbed and troubled by many disorders of neighbouring and bordering foreign nations, and at the same time by [disorders] of inhabitants of the land, of the clan ..., who were rebels, thieves' accomplices, ravagers of called the land and contemptuous of authority. One of these was Shapuh, son of Maymanik, who by a deceitful ruse had seized the castle of Agarak and the province of Chakhuk, and was occupying the castle for himself with haughty insolence, supposing himself to be a great personage. In those same days Grigor, son of Vasak, known as Apuhamza, had rebelled in similar fashion and was holed up in his lair at the castle called Archuchk'

When the valiant and wise Gagik, prince of Vaspurakan, saw the simultaneous activity of these two plotters, he attacked Shapuh, and laid such strict siege to his castle that no one could escape. On seeing the great vigour of this most wise hero and the daily shining of God's grace upon him, Shapuh realised the dire straits in which he and his accomplices were placed. Suddenly, like a fruit that falls of its own accord from high branches into the bosom of the gatherer, in such fashion did he descend from the impregnable heights of the fortress and fall at the feet of the blessed prince Gagik, begging for his own life and those of his clan, promising gifts and tribute for ever and that he would remain true at the royal palace. The prince accepted the gifts and spared them; then the whole clan came to do homage at the hero's feet. However, their hearts were not straight, neither with regard to the prince nor to the Lord Christ.

When news reached the ears of Gagik, prince of Vaspurakan, that Apuhamza was audaciously going around with his sons causing devastation in his province, he despatched an army against them. Having captured him, they brought him with his sons before him. And they raised a cry, pouring forth tears and laments, and saying: "Do not completely deprive us of our inheritance."

The valiant hero, as mild as he was powerful, heeded their entreaties, especially because in the great invincible power of his brave heart he never dreamed of being afraid of them. Just as a lion sated from the hunt pays no attention to harmless deer, likewise the mighty warrior had pity on them: first because he was merciful and very benevolent towards friends and enemies, and second because he had taken the daughter of Apuhamza to wife. So he spared them, and having destroyed the structure of the castle to its foundations, he confirmed for them their hereditary right to the province so they could dwell without fear of the mighty hero. In all this he succeeded by the grace of God, and then marched to the land of Vaspurakan.

After the land had been pacified, with compassionate and joyful heart the renowned prince Gagik summoned his brother Gurgen, and gave him as his lot Arniotn and the land from the valley of Endzahk' as far as the two fortresses of Sring and Jlmar. For he loved him with a very affectionate and joyous heart, was as kind to him in his thoughtful oversight as a father to a son, and openly aided him in raiding and recovering what had been captured by the race of Hagar. So he seized the province of Eli, routed its inhabitants, and completely obliterated their memory from the land. For he was a harsh man, brave and very obedient to his brother Gagik, prince of Vaspurakan. In addition to being truly affectionate towards each other, they contributed to the prosperity of the land by a mutual exchange of provinces and castles. Gagik, prince of Vaspurakan, gave the castle of Agarak and the province of Chakhuk, and received the castle of Zrel and the province called Jermadzor, which is part of the land of Mokk', so that the former's holding might be closer to the latter's, and the latter's contiguous with the former's.

So the fortunes of Gagik, prince of Vaspurakan, continued to prosper and increase, and the Lord Almighty was with him. By God's power he subjected to his authority and made vassal to his principality all his neighbours and those who lived around his territory. When the lords of Mokk' saw that Gagik's hand was raised against everyone, they took refuge in their fortresses, and refrained from paying tribute, terrified by the threats of the great prince Gagik. Immediately, the renowned prince gathered troops and raided the land of Mokk' in the wintertime.

Here amazement grips me at the valour of the most blessed and renowned prince in easily overcoming two difficult obstacles and winning a brave victory. In the first place the land of Mokk contains very high mountains, caves, and dense forests; secondly, the whole land was completely frozen over with a covering of snow. But he advanced over the high summits of the mountains as if marching on a flat road. The lords and nobles of the land with all the inhabitants fled, escaping by the skin of their teeth to their castles, unable to resist the powerful Gagik. Having plundered the land, he returned to the province called Eriwark. There he captured the fortresses of Pat and P'arhuk. Proceeding to the valley of Aruank', he seized that fortress too and took control of its provinces.

Now a long time past the Muslims had seized the province on the shore of the lake where the wonderful and impregnable fortress of Amiuk is situated. In numberless hattles they had attacked our pious former princes; and still up to that time it was swarming with men of the tribe called Ut'manik, who had fortified themselves there. The house of the Artsrunik had struggled against them with mighty efforts, but had been unable to prevail over them at all. Especially the valiant, victorious, and renowned prince Grigor, called Deranik, which translated means "sought by vows from the Lord," had made many efforts; but he was sadly killed without attaining his goal. So the castle of Amiuk with its province remained a great unhealed wound in the hearts of the princes of Vaspurakan, on which no poultices of former princes had made an impression. This state of affairs had lasted about one hundred years, up to the time of the brave Gagik.

Therefore patriotic zeal burned in him to oppose them in war; afflicted by them, he in turn afflicted them. So conceiving a grand plan, he stole on the castle by night; putting the inhabitants of the castle to the sword, he exterminated them from the earth. Their troublesome chieftains he cast headlong into the depths of the lake, there to have their hidden tombs until the warning sound of the last trumpet, when they will be judged for their vyorks. As for the mazing castle of Amiuk, which I might describe as looking to heaven and neck-tiring to observe, at much expense and with numerous artisans he embellished the eastern side. He completely fortified it with impregnably strong walls from the topmost summit down to the surface of the lake.

When the mischievous races of Ismaelites, Medes, Persians, and all the warriors of Atrpatakan heard of this, they in concert marched to wage war against the great prince, the valiant Gagik. Roaring like bloodthirsty beasts, they came as far as the city of Salamas. They made sworn oaths with each other to take vengeance by ravaging and razing the land of Vaspurakan until they retook Amiuk and reverged the blood of the Ut'manik tribe. But the brave and thrice-blessed prince Gagik, assembling many troops, marched to the province of Mardastan and sent his brother Gurgen to the city of Hadamakert. They armed themselves to offer resistance and guard the passes of the roads, in the hope that through them God would prosper the battle with victory.

The wise and foresighted prince Gagik had also appointed a general to command the province of Chuash and the castle called Shamiram: someone from the house of the Akeats'ik', a loyal and brave-hearted man called T'adeos, who had demonstrated many acts of valour in war, and shone out as a glorious and famous soldier in the Armenian army. He was full of good works in giving to the poor with liberal heart; he was magnanimous and zealous in the decoration and building of churches: he received orphans and widows, gave repose to all the weary, and placed his hopes not only in his own armour but in the power of God. Scouts came to him, saying: "Behold, a force of Muslims crossed into our land tonight in infinite numbers." He set off in pursuit with a few troops, and came upon them in the plain of Gerat at the very moment when the Muslims were about to put to the sword many of the people of God. Then the valiant T'adeos, raising his eyes to heaven, called on the Lord Christ for help. And in accordance with Scripture: "God is found ready for those who request him," the power of God immediately came to the support of the Armenian army, although they were very few. Raising their swords, they fell to the slaughter and filled the surface of the plain with fallen bodies densely packed together. Taking many prisoners, they victoriously brought them before the prince. Then the renowned prince Gagik decorated and honoured the victorious T'adeos with many outstanding gifts.

When the Muslims saw what had happened, they said: "Since we have suffered this at the hands of a few, how shall we be able to resist the numerous troops of the prince, especially where the prince himself will be organising the battle?" Struck with fear, they beat a retreat, and their evil plans were frustrated.

On seeing these events, Smbat, king of Armenia, developed a grudge and tried to arouse the Muslims a second time against the prince. But since he had no success in this, then by treacherous words and promises he deceived the man whom Gagik had put in charge of the fortress of Amiuk; he was called Apusakr and was from the house of the Vahunik. Like Judas he accepted the price, as did he who sold God, and gave the fortress into the hands of Smbat, king of Armenia.

After Smbat had gained control of the fortress, he then sold it again to Prince Gagik, receiving from him many treasures. From that day suspicion of evil intentions fell into both their minds, and therefore they did not support each other in friendship and peace as they had done previously.

At that time the oppression of the Muslims against the Christians waxed more severe. By royal command a certain great ostikan gained the ascendancy over Persia and Armenia; he was named Yusup, son of Apusach, a proud and notable man, more fearsome than the many who had preceded him. He was moved to great wrath against Smbat because of his holding back the royal tribute. Not a few envoys with messages passed between them, but no peaceful solution was agreeable to them. Since the emir Yusup had heard of the repute and the valiant deeds and also of the wise intelligence of the prudent and renowned prince Gagik, he had desired for a long time to see him. So he then suddenly sent messengers with letters arid many promises to summon the prince with many entreaties to meet him. He heeded the summons promptly in peaceable friendship. And when they encountered each other, he honoured the prince with great eclat.

When the tyrant beheld his glorious youthful figure and the wondrous beauty of his lovely face, he was amazed. On questioning him in profound and inscrutable terms, he received replies of vast erudition that were at the same time profound and enigmatic, whereby he liberally and freely explained his obscure questions, and opened before him gates that were locked and inexplicable to mankind, becoming for him a mother of understanding and a nurse of wisdom. Since the Persian ruler Yusup' was a man of powerful mind, but the most disagreeable among all the sons of men, he therefore submitted the splendid and blessed prince to an arduous investigation. Raising his eyes, he observed him and measured his deportment on sitting and rising. In every aspect of royalty he found him refined and endowed with charming modesty like gold tested in many furnaces. He opened before him roval edicts, revealed to him uncertain plans and deeds, asking him for a solution; and he was assisted by him in gaining the wisdom that flowed copiously from him. He showed him in royal fashion precious stones and beautiful luminous pearls derived from land and sea. He related to him the tales of ancient kings from century to century, and the wars that had occurred in their times. He questioned him on the dynasties and thrones of kings and pre-eminent families, and the borders of each one's lands, beginning with the Medes and Persians, Judaea and Jerusalem, the Assyrians and Egyptians, the Greeks and Indians, all Armenia as far as the Gates of the Alans and the Caspians-which information is very pertinent for kings. He found him versed in everything and exceedingly learned. He interrogated the undefeated champion and splendid prince on the battles he had fought, and surrounded him with warriors to observe him. He found him like a high mountain, immovable by the blasts and shouts of war. In all this and even more did the Persian ruler Yusup

observe the grace of God manifested in the valiant and divine prince Gagik, and he greatly rejoiced at his visit to him.

But when the news reached the ears of Smbat that Gagik, prince of Vaspurakan, had made an alliance with the Persian ruler Yusup, in his jealousy he raged against him with profoundly evil intent. Smbat himself did not seek the pursuit of peace or the giving of royal tribute, as the Lord commanded through Peter to pay the tax of the firstborn to those who demanded the didram, saying: "Give what is Caesar's to Caesar, and what is God's to God." He thus worthily indicated that one should pay royal taxes. He even sent Peter to the sea to pluck the safer from the teeth of the fish cast up from the deep, thus satisfying those who had asked him. This he gave for the chief of creation and the head apostle Peter. But Smbat, disregarding the Lord's people.

Therefore Yusup' was greatly angered, and attacked Armenia with an enormous armed host. He inflicted on us many calamities, which another great orator, forceful and intelligent, has written down before us and entrusted to royal archives. When Smbat saw that he had no means of resisting the Persian ruler, he fled and fortified himself in the castle of Kapoyt. But the tyrant surrounded and besieged the castle, and after a few days captured him like a weak child.

Seeing that there was no one who could rule and control Armenia save only Gagik, whose qualities he had tested and knew, he did not leave him to his own independent wishes, but made him king over all Armenia. On his head he placed a crown of pure gold, artfully made and set with pearls and valuable precious stones, which I am unable to describe. He clothed him in a robe embroidered with gold, a girdle and sword shining with golden ornament, which surpasses the understanding and ability of historians to describe. He set him on a horse splendidly caparisoned with a golden harness, shining like the sun among stars. To right and left were hosts of troops in full armour.

There was the rolling of drums, the glittering of swords, the cry of trumpets and blowing of horns, the sound of flutes and sweet lyres and harps; standards before and behind; and to this awesome noise the camp of the royal army shook. In such splendour did he entrust into his hands the whole land of Armenia with its grand cities and all its embellishments. I do not hesitate to say that his anointing was invisibly performed by the Holy Spirit according to the apostle's saying: "There is no authority save from God; and what is, has been established by God."

Then the emir Yusup went to Persia in rebellion against the court. Flouting their orders, he captured many cities and put the royal army to flight, making them stay inside their gates.

When the chief of the Muslims, known as Jap'r in their books and also called by the name of Mokt'gir, knew that Gagik was reigning over Armenia, he sent him a crown and wonderfully decorated robes, and entrusted to him the collection of the royal taxes.

For me this is prodigious to relate, this for me is amazing to hear; it far surpasses my own history and those of others; no one has ever heard tell of it or seen it, to be able to reveal that anyone was honoured by the caliph's court with the dignity of wearing a crown, especially a Christian and orthodox believer and son of a king, the hereditary and legitimate ruler of Armenia. I do not reckon it too audacious to repeat a second time that the tyrant was forced to do this by the will and command of the All-Highest and the Lord of all.

Now when the emir Yusup went to Persia, King Gagik went to the province of Kogovit. Laying siege to the impregnable castle Dariunk, he took it by stealth at night, being granted success from above. He also captured the castle of Maku. Advancing from there, he took the castle of Ule, and imposed his control over those provinces, from Kogovit as far as the middle of Ule and Maseats'otn.

About that time noble messengers were sent from court accompanied by numerous troops with orders to cross into Atrpatakan. They brought for the second time a crown and splendid garments from court, and honoured King Gagik with a second glory even greater than the one we described above. They requested the king in the name of the caliph and with letters filled with friendship to lend them his assistance in their passage through the land of Armenia. The monarch escorted them according to the royal request. So they went to make war in the region of the East. Putting to flight the troops of the emir Yusup, they captured him and took him to the royal court. He was imprisoned for eight years, and then released at the caliph's orders. The latter delivered to him the whole land of Persia and all Armenia, as well as the great cities which he had seized by force in the days of his rebellion, including Ray and the great city of Basra. With the award of such a large number of cities and lands that had been given to him, he had no time to visit trpatakan, but he sent faithful prefects to whom he entrusted that land. He also sent a crown and splendid garments to the king of Armenia Gagik to confirm the land of Armenia in his possession.

At that time Gurgen, the king's brother, departed this world, peacefully falling asleep and joining his fathers. The day of his death was occasion for great mourning for all the

land of Armenia. The monarch wept for him with great lament for forty days, and then revived his mind to the fear of God, understanding the saying of the wise man: mourning of a wise man lasts seven days, but that of a fool all his life." He reflected on the vicissitudes of this ephemeral and perishable life that soon comes to an end; he raised the eyes of his mind to the lasting state of the eternal and incorruptible life; he lifted himself up with brave fortitude and perfect knowledge; he granted prosperity to the land and brought about renewal of the holy churches and of the monasteries, 6 whereby he perpetually glorified the souls of those who had departed this world. He offered masses and sacrifices with myriad treasures to provide for the crowds of poor, of orphans and widows, of the indigent and afflicted, who thronged to him. So by the liberal benedictions of his pravers and entreaties, according to my knowledge, and especially in accordance with the preaching of the saints-or, it would be better for me to say, the word of the Lord-this offering of his was equivalent to that of the past three just men: Abel, Noah, and Abraham. Through the immortal offering of the essential Word of the Father, sacrificed in the flesh for our sake, a pleasing gift was offered to the Father in a sweet odour.

Not only did he multiply so many offerings, but daily he remembered compassion for this life as well as love for death. Taking piles of treasures and splendid garments, horses and mules, herds of cattle and flocks of sheep, in the four corners of the land he gave these to monasteries of holy and ascetic monks; he established days of festivity and forty-day periods of fasting to be observed continually and with unfailing commemoration for his brother, who had gone to eternal glory and rebirth in that everlasting age without end. He reckoned that perchance he might, on that last fearsome day of the Coming, have the opportunity to embrace his brother among those standing in vigilant glory on the right hand side, and hear him say: "Greetings to you, my brother, who saved my soul from the gates of hell. By your good services to me while you remained behind, you have raised your soul to life with mine."

So the king himself, armed and adorned with incomparable valour, ruled as monarch over all the land of Armenia; over the countryside he poured out peace in flowing torrents like a river or sea, which our speech is really insufficient to describe. On no occasion before him did our land encounter such bounty, and it is impossible to imagine that in the future it will see his like after him.

ARTSRUNI HISTORY CHAPTER 4

[About The End Of The Great Mourning; The King's Pacification Of The Land; And Events Concerning Yusup ' Son Of Apusach]

Now after the end of the great mourning, the king pacified the land from the wars stirred up by the Persians and the Sevordik' of Hagar, who inhabited the mountainous regions. At that time Yusup', son of Apusach, was still ruling tyranically over the Persians and Armenians. Unable to resist the valour and wisdom of the king, he abandoned his ferocious evil deeds and turned to peace and real friendship. He entrusted to the king the lands of Armenia and Georgia, and having made with him a peace treaty, he went to Persia. While he was planning to enjoy a peaceful existence, suddenly royal messengers arrived with orders that he should go to wage war against the army of the South, which had marched to attack Babylon and its territory.

He set off with a numberless host of troops, leaving as prefect of Persia one of his favourites named P'etk [Petk': Abu'l-Musafir Fath, son of Afshin and nephew of Yusuf, who was given his uncle's governorship; see El s.v. Sadjids, no. 4.]. On reaching the royal palace, he took many more troops as reinforcement. They came across each other in the land of Osit; when the armies joined battle, Yusup''s troops were completely defeated and he himself captured. A little later he was killed, but I do not know what sort of death befell him.

ARTSRUNI HISTORY CHAPTER 5

[Concerning The Anarchy In Persia]

Then, after these events, the land of Persia fell into anarchy. But although the house of Apusach, the sons of maidservants and slaves, had advanced and consolidated their position, supposing themselves to be significant, they suddenly began to slaughter each other, completing for themselves the saying of the wise man: "Alas and woe to you, Oh city, you whose king is the son of a maidservant." Again elsewhere he says: "A land is shaken by three things, but it cannot resist the fourth. If a slave rules, he shakes the land; and if the fool is sated with bread, he will act likewise." In truth the land was shaken as these slaves thought to rule. But because none of them did any deed worthy of record, we did not set out their names and weave them into the narrative of this history.

ARTSRUNI HISTORY CHAPTER 6

[Concerning The Prosperity Of The Land Engendered By The Great King Gagik, The Restoration Of Many Sites, And The Wonderful Construction Of The Town Of Ostan]

But now it is very pleasasnt for me here to undertake a most splendid task, leaving it as a memorial to those who will come later, and especially for the glory of the house of the Artsrunik, as I record the wise and intelligent acts of Gagik, the great king of Armenia. In his valour and love for peace and prosperity, he cared for this land of Armenia as a father and guardian. In his benevolent mercy he took care of the poor, returned captives, protected the deprived, rendered justice to orphans, and gave their rights to widows-making this the summit and apex of all his virtuous works, and becoming worthy of the greatest praise. And these matters, my dear friend and foremost of brave men, who requested from me this History, I offer and present to you not from reports of others as fables elaborated from fictitious accounts: but having seen with my eyes, heard with my ears, and touched with my hands, I recount for you faithfully the marvels which took place.

These sayings are familiar to all who love reading: "An avaricious man considers it preferable to be decapitated than to pay one penny of his silver as a fine." And if he sees the sun casting its rays for the sustenance of the world at the command of God the provider, he addresses it. "Why instead of your light do you not shower gold on me?" And if he sees a spring of crystal-pure water, he says: "I am not thirsty, and I shall never drink water from you. Offer me silver." But the character of a king who is not avaricious remains free and unsullied by such a fearful affliction; he cares not only for his personal amusement, but for the whole land of Armenia. He gives piles of treasure into the hands of workers and artisans in order to fortify with walls the summits of hills and impregnable fortresses in the provinces and centre of the land, to serve as refuges for those fleeing from brigands and from the convulsions of foreign nations.

Of the many castles fortified in his name, Gagik was especially pleased with two places and watched over them personally. One was at the edge of the lake; its name was Ostan in the province of Rshtunik. The climate was very temperate, as the winds blew there from the four corners of the earth. It flourished with fruit-bearing trees, and was graced with many vineyards. Sweet springs flowed around the city, providing for the many needs of men. Nearby on the southern side of the fortress was the very high mountain Art os, 5which in the spring conserves and preserves the verdure of plants and flowers and the stores of snow piled up for the needs of kings and everyone who might wish to take some. From the summit of the mountain descend rivers in murmuring torrents, by which the whole land is irrigated. Flowing into the lake they furnish small fish for the luxury of the inhabitants of the land, and provide many items for the treasures of kings, which the ruler takes and offers for the alleviation of the poor.

The summit of the fortress looks out over the lake and is exceedingly charming. If the lake is stirred up by winds, the waves ripple like flowers and appear quite delightful. If the air is clear, the extensive views attract the eves to admire them

Therefore the king undertook to build there a palace and pavilions and splendid picturesque streets, and all sorts of ornament which I am inadequate to describe. He walled the side by the lake with massive stones, placing the foundation at a fearful depth. And on top of the wall, facing the sea, he built a pavilion for gatherings which was decorated with gold and various colours, so that it glittered like the rays of the sun to give delight to the eyes and joy to the heart of himself and his guests. The gates he designed in the form of vaults to provide air and refreshing shade; and he provided windows to let in the glittering rays, which at dawn and dusk shine over the lake, illuminating the interior of the palace. As they move round, they light up the multicoloured images, pictures, and various decorations, astonishing the mind of the beholders, and exceeding the ability of the historian to describe. Such in brief is what we have to say about the city of Ostan.

ARTSRUNI HISTORY CHAPTER 7

[Concerning The Building Of Alt Amar; And Those Who Constructed There A Few Buildings Unworthy Of Mention Before The Undertaking Of The King]

Now although we have happily undertaken these pleasing histories, we passed over many stories, especially those that would be full of interminable prolixity-profitless for us to relate and useless for the audience to hear. So setting these outside our plans, we shall proceed to review the profitable stories. From the beginning of the settlement of Armenia many buildings and constructions were raised in our land by Hayk the Archer and his descendants, and by the amorous and lascivious Semiramis, queen of Assvria, which have been described by others with unerring indications. These we have visited in person and seen with our own eyes, travelling to distant parts: as far as Klarik' and the Shushetats'ik' and the foot of the Caucasus mountain, and to Ahiz as far as the entrance to Gal, across Tayastan and all the northern regions and the East. Travelling on foot, we have seen the works of valiant men and our ancestors. But our mind and sight were struck most of all by the splendid, marvellous, and wonderful Alt'amar

Before this Alfamar is said to have been built up by Dawit' Sakhruni and Rasham Rshtuni and Bazap'ran. This last led into captivity the land of Palestine with the high priest Hyrcanus, and settled them in our land. But all these lived as in tents or fruiterers' huts on that famous island Alt'amar up to the time of Gagik, the great king of Armenia. In his excellent wisdom, seeing the pleasantness of the spot and recognising that it was a refuge from enemy raids, he undertook to build on it in a fearsome and amazing fashion. He commanded many artisans and innumerable men to cast heavy, massive hewn rocks into the depths of the terribly deep lake. After continuing his effort in this way for a time, the great king astonishingly succeeded in forming a stone embankment raised five cubits above the surface of the lake: to the mind's eve this row of solid rocks extended as if on dry land. On top of this he drew a line and raised a fortified wall around the island, as it were five stadia. The wall was amazingly constructed, fearsome and adorned with very high and broad-based towers and raised bastions, which had in them deep niches with pleasure seats, where the king often took his ease with his sons and noble courtiers.

The end of the wall he led into a narrow cavern difficult of access, and brought the sides close together. At the junction of the deep constructions in the sea he set gates, fearful to behold, solidly fixed, and strengthened with nails. In this way he cut off part of the sea on the island side, making a wonderfully calm and secure harbour for many ships—a construction superior to the city of Alexander of Macedon. And in my opinion it surpassed in wonder the excavated chambers of Semiramis in the rock of Van and the aqueduct at the foot of Mount Varag. For the latter at least is on dry land, whereas this, built in the depths of the lake, transcends all the concepts and accomplishments of wise men previously achieved.

Then there gathered at the king's court the princes and lords, nobles and common people, bishops and monks, so that they might all straightway confirm plans for the buildings and constructions, and that he might order that the place should become a refuge from all the raids of the enemy. The king in his mercy did not refuse these requests. And five years after they had begun to build, the constructions of the city had been raised in unprecedented magnificence.

Then the king in his wise understanding, with many artisans took up the architect's line to measure and sketch and indicate at the foot of the mountain—which is the highest point of the island—splendid places for enjoyment that were sites worthy of the king's recreation. He extended walls, laid out streets and terraced gardens and residences for the princes, according to their rank, and gardens and parks, distinguishing the areas for parks and flower gardens. All this he quickly brought to completion. And he planted many trees, which were watered from a sweet and never-failing spring, which by the foresight of provident God flowed in the middle of the city.

There were many artisans assembled at the royal court honourable men gathered from all nations of the earth who could unerringly carry out the king's plans. So according to his orders the work was quickly completed. Then the king ordered one of these men, a wise and skillful architect, to construct a square palace, forty cubits wide and deep and equally high. The thickness of the wall was three large strides deep, a mass of pure mortar and stone, as it were a fusion of lead and bronze mixed together. The construction of the palace, from its foundations to its summit, took the form of a bird in flight, without the support of any pillar. It was truly worthy of admiration surpassing understanding. It had vaulted domes and niches and beautifully decorated surroundings, innumerable and incomprehensible to the mind and eye. It also had domes like heaven, ornamented with gold and shining with light. If anyone wished to look at them, as if honouring a king first he must remove his head covering, and then twisting his neck he will scarcely be able to distinguish the various beautiful representations.

The structure of the palace is extraordinary and astonishing, and so surpassing and incomprehensible to the imagination that if an intelligent man were to examine only one section of one dome for many hours, on coming out he would be unable to tell anyone anything of what he had seen. For the pictures include gilt thrones, seated on which appears the king in splendid majesty surrounded by shining young men, the servants of his festivities, and also lines of minstrels and girls dancing in an admirable manner. There are bands of men with drawn swords and wrestling matches. There are also troops of lions and other wild beasts, and flocks of birds adorned with various plumage. If anyone wished to enumerate all the works wild beasts, and flocks of birds adorned with various plumage. If anyone wished to enumerate all the works of art in the palace, it would be a great labour for himself and his audience.

The splendour of the palace is extraordinary and wonderful. Doors have been fitted that are inlaid with detailed ornament and amazing decoration. They have two leaves, which on opening admit refreshing breezes. But when they are closed, they appear as a single piece.

A trustworthy official, one of the superintendents of the city, told us that two hundred thousand litra of iron went into the

construction of the palace. And he has certainly modified his account rather than exaggerating it. Indeed, the glorious site of the palace appeared from all sides of the province as a great hill in the middle of the city, no less high than the rocky summit of the island.

He Gagik also walled with unassailable strength the summit of the castle, and constructed there enormous storehouses and magazines, and also depositories for treasures and measureless numbers of arms and armour. But if anyone wished to praise in suitable detail all the ornament of the construction, the golden streets, the domed halls, and various throne rooms which outshine each other in diversity, I think that he would fall into incomprehension and hesitation. But we have offered this suitable and convenient account, so far as we could, in order to fulfil your noble interests, Oh great benefactor and ancestor of a heroic and distinguished house.

ARTSRUNI HISTORY CHAPTER 8

[Concerning The Most Splendid And Glorious Church In The City Of Altamar, For Which Material And Stones Were Brought From Distant Lands. We Shall Give A Faithful Picture Of It And Its Site]

At the time of the construction of the splendid, famous, and stupendous city of Alt'amar, our Saviour Jesus exalted the arms of his anointed Gagik in order to vex the savage race of Ismael. These he bound by his own hand, through his wellgrounded plans and warlike force and bravery. Restraining their cheeks in a bridle, as it were, he broke their force, beginning from the Medes and Persians, all of Atrpatakan as far as Khuzhastan. Whom he wished he spared, and those from whom he wished nothing he exterminated. He threw some onto others, and slaughtered with his wise sword thousands and myriads of them. Advancing on others in war, he put them to the sword and mercilessly slew them, sometimes in person and sometimes by means of his troops.

While the king was making these expeditions, he increased his attacks on Asorestan and captured and destroyed many provinces with their castles. And seeing near the gates of Asorestan a fortress in the principality of Aldznik' in a village called Kotom, which was the hereditary possession of the tribe called Zurarek, he completely destroyed and exterminated that tribe.

Demolishing the construction of the fortress to its foundations, he removed its stones over the waves of the lake to use as material in the building of the holy church, forming with them a temple of glory in place of the impure houses of idolatry. Thus was accomplished the saying of the prophet: "Who removes the honourable from the unworthy will become as my mouth." There the Holy Spirit always rests, enrolling men into the shadeless light.

Because the architect was Manuel, whom we mentioned above, a man full of wisdom and proficient at his work, he skillfully built the church as a marvellous and wonderful construction. To the monk whom we mentioned above he entrusted the decoration of the sculptural relief depicting in a true likeness the figures beginning with Abraham and David down to our Lord Jesus Christ. He arranged the ranks of prophets and apostles in each one's place, wonderful to see. He created and brought together on the walls of the church herds of deer and flocks of birds, and also groups of wild beasts, boars and lions, bulls and bears, facing each other, drawing attention to their struggle for existence, which is very pleasing to wise men. He extended around the back and sides of the church a splendid frieze arranged in detailed sections, depicting grape vines interlaced with vintagers, and wild beasts and serpents, whose forms reproduced their kinds with the various differences according to each one's species.

On the four sides at the summit of the exedrae he accurately depicted the images of the four evangelists, who are worthily the crown of joy of the holy church and superior to all other saints.

He represented on the vault of the west apse the crossnimbed image of our Saviour, who for our sake put on flesh and appeared as a man. 6 In a true likeness he arranged opposite the Saviour the glorious image of King Gagik, who with proud faith raises the church on his arms like a gold vessel full of manna, or a golden box filled with perfume; he stands in front of the Lord, depicted as if begging forgiveness for his sins. Although there may be words of blame in our history, yet the king will not miss the gifts he seeks, hoping in the future compensation.

Furthermore, on the south side of the apse 8 above the door of the church is set a gallery with a vaulted staircase going down from top to bottom, to act as a place of prayer for the king, restricted and closed to the public, where he may converse with God privately 1 and undisturbed.

In the interior he fashioned the wonderful holy of holies with elegant paintings and with silver doors; it is filled with gilt ornaments, with images encased in gold and precious stones and pearl ornaments, and with various notable and splendid vessels, which wonderfully show us the second Jerusalem and also the gate of Sion on high [Jerusalem, Sion: Cf. the emphasis on the holy places in the naming of Gagik's and Gurgen's churches as described by Thomas, pp. 253, 257. For the "second Jerusalem" cf. Thomson, "Architectural Symbolism."].

Here are fulfilled the prophetic canticles: "Rejoice, thirsty desert," and again: "The earth will rejoice and many islands shall be glad." Truly this was once a thirsty desert, but is now the city of the great God, watered by two ever-flowing springs—from the holy font and the incorruptible blood of the Son of God, which give drink to the thirsty in spirit.

Embellishing the day of dedication with groups of bishops and princes, he celebrated a great and joyous festival with grandiose splendour to be remembered from generation to generation. So we have said what concerns the holy church.

ARTSRUNI HISTORY CHAPTER 9

[Concerning The Great War With The Arab At The Gates Of The Metropolis Of Dvin; And The Various Valiant Deeds Of The Great King Of The Armenians, Gagik, And His Victorious Accomplishments]

We described above the anarchy in Persia, according to Scripture: "Israel had no judge, and everyone acted as he pleased." 6 At that time a certain man, Arab by race [He is not named by the author. Vardanyan identifies him with Al-Lashkari, emir of Gilan. Ter-Ghevondyan, pp. 78-79, discusses this passage and notes that he must have been one of the emirs of Azerbaijan, Muflih, Lashkari, or Daysam. See also the discussion in the El s.v. Dwin, col. 680. The date of these events is not given, but was probably in the 930s.], versed in warfare and military deeds, with haughty arrogance puffed himself up and reckoned he would become independent So gathering an army, he unexpectedly and rapidly passed by Golt'nastan and the city of Nakhchavan, forcibly occupying the province called Sharur, and reached as far as the great metropolis of Dvin. He rapidly despatched tax collectors and prefects to the province of Ayrarat and as far as Aragats-otn, the holding of Abas, son of Smbat, which he subjected to his own authority. Since Abas was unable to oppose the tyrant who had risen up against him, he appealed to the king [King: i.e. Gagik, whose mother was the daughter of Ashot Bagratuni, grandfatherof Abas.] through messengers and letters to come and save him from the violent brigands who were demanding tribute. The king, mindful of the tender bonds of related blood, came with a numerous force to seek vengeance for his relative.

Then Abas, son of Smbat, in his pride came down to the plain of the city of Valarshapat, wishing to precede the arrival of the great king of Armenia, Gagik, in order to gain glory for himself. But the Muslim, since he knew that he (Abas) was not versed in warfare, fell upon him with a few troops and put him to flight. Putting some four hundred of his men to the sword, he plundered the army and the inhabitants of the land. Then setting the torch to the whole land, he returned to the city victoriously with much booty. Abas escaped in flight by the skin of his teeth, and took refuge in Georgia.

When the king heard the sad news of this disaster, he immediately marched to the gate of Dvin, to the bank of the river Araxes opposite the holy pit from which the great saint Gregory emerged to illuminate the land of Armenia [Dvin is not on the Araxes; Artashat is opposite Khor Virap. Perhaps "gate," durn, here means "approach to. "]. Now the Muslim saw the great king's camp spread out by the mountain called the hill of Gen [Hill of Gen: west of Artashat.]-and truly the hill was prophetically named, for as if with pure wine it intoxicated and made the king happy in its appointed place; though it was from on High that he received the grace of victory through the intercession of the Holy Illuminator, whose festival is celebrated on the tenth day of the month Sahmi. But the hill too is blessed and is not without praise in this History. Then the impious man gathered an army of some thirteen thousand men and attacked the king, supposing him to be like other people. While the sun was casting its glow over the vault of heaven at the third hour, and he (the king) was still reading the holy gospel, one of his couriers came and said: "Why does my lord the king extend and prolong his prayers? Behold the front line of the Muslims has approached the holy camp of the Lord." Then the king with calm heart and tranquil courage did not raise his eyes or his voice to the messenger, but finished his customary prayers, comprehending the saying of the wise man: "Battle is the Lord's," and: "The Lord opposes the haughty, and gives grace to the humble."

Then the king, donning his armour and putting on a valiant mien, took the troops of his Christian army and calmly advanced, disposing the ranks of his battle line in suitable fashion. The armies, with drawn swords, straightway came to blows. Crashings and thunderings resounded, and flashings as of lightning were seen shooting downwards from the clouds. The day began to wax fearful. The king and his troops were strengthened by help from on High, especially because the holy patriarch of Armenia, Elishe the Great, going to the summit of the hill of Gen with groups of priests, held aloft his hands like Saint Nerses until the second Amalek was defeated. Passing through the ranks of the Armenian army, the king reached the middle of the Muslim force, where there were about four thousand champion armed foot soldiers.

Striking those impious ones like a spark among reeds, he routed the Muslim ranks. Then the vast number of corpses of those who had fallen to the ground lay thickly over the surface of the plain, like sheaves in a full field in the days of harvest. So about eight thousand men fell to the sword or were drowned in the river. And taking many of them prisoner, he sent some in chains to the impregnable castle of Dariunk". He spared the lives of about two hundred men, more or less, and ordered them to be freed so that they might go to the city and relate what they had seen.

The king himself rapidly crossed the river Araxes, wishing to burn the city from end to end with the surrounding countryside. But the elders of the city fell at his feet, begging for peace and offering tribute and hostages. Taking these, the king returned in peace to the fortress of Dariunk', having stripped the men and horses of the Muslim army of their arms and armour in immeasurable amounts. The king did not fine any of the many of his own troops who had seized plunder, but let them take openly whatever they had gained.

ARTSRUNI HISTORY CHAPTER 10

[The Attack Of The Delmikk' On The City Of Hadamakert And The Province Of Albag; And The Victory Of The Armenian Army By The Grace Of God]

In those days a group of Delmik [the Daylamites; see Ter-Ghevondyan, also called Daylam, refering to their expansion in this direction.] troops advanced, intending to cross to the land of Asorestan. Reaching the city of Hadamakert and the province of Albag, they pillaged property and took women and children captive to the extent they could manage. When the king heard of this, he ordered the valiant cavalry of his army to pursue them. On receiving the royal command, they rushed off immediately, and came upon them when they least expected it in the land of Andzevats'ik'. They attacked the Delmik troops, who were brave warriors armed with lances, and trampled them down like stubble of the plain under the feet of the Armenian horses. Setting on them with the sword, they slaughtered about two thousand men. Having plundered their camp and released the captives, they returned to their own abodes after a great victory.

ARTSRUNI HISTORY CHAPTER 11

[Descriptive Portrait Of The Person And Glory Of The Great King Of Armenia, Gagik]

Since in his foreknowledge and providence God knew that he would become such a man from his mother's womb he had filled him with the spirit of wisdom. Therefore he also bestowed on him a luminous visage and glorious stature, unparalleled among the entire rational race of mankind. He was elegant and upright, noble and splendid of face. The hair of his head was dark, long, and curly, carefully arranged above a dazzling white forehead in very thick and dense waves. He had two black arched eyebrows, pupils, and eyelids that shaded the eyes like a lily flowering in valleys, spreading in wonderful fashion. His nose was wide and elegant; his ears, quick to hear and believe good news, shone with a luminous colour. His lips were like a red line; his teeth were close to each other and free from stain. His fresh beard flowered like violets on beautiful cheeks, giving him the appearance to onlookers of angelic form. Truly such gifts of grace and glory were given him from on High.

For he reigned like Josiah over a new Israel, but in a way superior to him perfected the institutions of the holy church. Thus it is very pleasing to me at this point to take examples from the land of India and the city of Topaz (in Ethiopia); especially the golden topaz from the commerce of the gem cutters and the Alebasarats'ik (perhaps marble workers) and Thebans, and lace it into his crown on the days of royal pleasure; notably when on the Lord's saving feast of Easter, he arose like a groom from the wedding chamber similar to the morning star. Likewise rays of light shone out from the decoration of coloured gems interwoven with pearls on the head, breast, and croup of his mettlesome steed; and at the outpouring of the fiery brilliance before him, the booming of drums and sounding of trumpets, myriads of people were stirred. Every eye desired to see him, every soul cried out:

"Lord, save the king and hear us." In truth God's anointed, superior to all kings of the earth, merited such and even greater praise.

• For he was the cause of peace and prosperity.

• He was a firebrand [Amos 4.11.] to brigands and repelled them.

He weighed laws and judgements justly. [Jeremiah 20.12.]
He clipped the wings of the high-flying mighty.

· He brought down many holed up in high castles.

• He was an inescapable trap for rebels.

• He foresaw the secret deceits of enemies, ensnared and destroyed them.

On his friends and supporters he bestowed gifts unfailing.
He was also a sweet-smelling garden, filled with resplendent flowers.

• For his own house he was a verdant plant with golden leaves, full of divinely inspired love, joyous news.

• To his sons he was a school of virtue and an ever-flowing source of wisdom.

• To all artisans his door was open, and he was an unerring model.

 Against the stormy threats of tyrants and their fearsome winds he was a high mountain and unshakeable rock.

• He was a consuming fire for the knavish and deceptive letters and messages sent him by the Muslims.

• In the hearts of the Babylonian, Mede, Persian, Greek, and barbarian tyrants he was a burning, perpetually turning nail.

• He questioned wise men about the depths of the sea or the heights of heaven which are inaccessible.

• He sat at banquets on his golden throne, grand in his majesty like a powerful lion, and heightened in the Lord's glory by his faith.

• He retired for sweet sleep at night to gilded chambers like a dragon.

 The awe of his might spread over the whole of Armenia; like an impregnable wall of bronze he preserved Armenia from fear and from the secretly fired arrows of her enemies.

• Over his neighbours and his subjects he was a shade of secure defense, and swift . . .

[This section is incomplete.]

ARTSRUNI HISTORY CHAPTER 12

[Concerning The Course Of Events In Armenia; And Concerning The Pious Prince Abdlmseh And His Sons]

After the death of King Gagik Artsruni, son of Deranik, and the suppression of the independence of Armenia, the saying of the prophet Jeremiah was fulfilled for the land of Armenia, and even more so for the province of Vaspurakan: "My peoples will wander without a lord." The race of Hagar ruled over us; making perpetual raids for booty and plunder, they oppressed all the Christians, inflicting the greatest and the least with famine, sword, and captivity. Nowhere was there any hope or expectation; only a few remained of the Armenian princes, who had fallen into decline; and with difficulty did they control the strongholds and fastnesses. So our sins and those of our fathers reigned over us, and the Lord delivered us and the surviving Armenians into the hands of the impious, money-minded, perversely wicked, criminal race of the Elim-that is, the nations of the Turks. They ruled over the world from the eastern sea to the western sea; and there remained not even a cave which God did not deliver into their hands. They had the nature of blood thirsty beasts: for they were people of awful appearance, and the sight of their faces terrified and dismayed onlookers [Cf. the description of the first Turks to invade Armenia in Matthew of Edessa, pp.57 ff., and the horror they caused.]. Their dwelling was in mountains and plains and the wilderness, like that of wild animals, and they ate carrion like beasts. They did not honour the mighty; they did not spare the white hairs or the exigencies of the aged; they did not pity the youth or child, or spare any young person. They are a nation wicked and cruel, a nation that has not directed its heart aright or set its soul towards God. This nation God and our sins gave as ruler of the land of Armenia, according to the words of the holy prophets, companions of Anania: "You delivered us into the hands of the most impious and wicked king in the whole world

At that time there lived a certain renowned man, related to the great king Senek'erim, of whom the prophet Isaiah speaks. He had the same name as his ancestor Senek'erim, and his brother was the great prince Deranik. These, through God's help and the providential care of the Holy Spirit, ruled over their own ancestral provinces of Vaspurakan. Resisting the Muslims, they did not permit them to ravage the land. For they held the impregnable fortress built by Shamiram, the town of Van, and the impregnable fortress of Amiuk, that looks up to heaven and hurts the neck to see. So they despised the continual attacks of the Muslims, which God's assistance always repulsed.

In their time appeared the treasures of the divine cross on which the Only-Begotten Son of God had shed his blood. It had been brought to the mountain of Varag, to its rocky summit, by the holy lamb and royal virgin Hrip'sime and revealed by God. As in the days of the emperor Constantius and the patriarch Cyril, so likewise in the province of Vaspurakan on the mountain of Varag the sign of the Lord's cross shone out. At the third hour it soared from the rocky summit and settled in a hollow on the same mountain, where there are sweet springs.

The holy king Senek'erim built on that spot churches at great expense; and at the foot of the mountain he constructed the splendid and famous metropolis of the monastery of Varag. In it he established faithful men, and he adorned it with many monks and heavenly ranks of holy priests. He arranged allowances for them, and they lived in peace in the province of Vaspurakan, which became a place of security for refugees and captives from all lands.

Now because of our sins the race of Elimats'ik' attacked us, as we said above, and continually vexed the nation of Christians and put them to the sword. Then King Senek'erim thought of the Lord's command: "If they expel you from one city, flee to the next." There was no assistance anywhere else save from the Lord, and the Lord's help supported the emperor of the Greeks. At that time the imperial authority and the divinely protected city of Constantinople were held by a God-loving and pious man named Basil. The emperor of the Greeks had no control over the land of the Armenians, but these all freely ruled over their provinces, although they could not endure the onslaught of the Muslims. Then the survivors of the house of T'orgom turned to the emperor of the Greeks as a son to his father. The Greeks, filled with divine love, had compassion for the appeal of their children, and summoned them from their various provinces. They gave them gifts, appointed them at the royal court, gave them great cities in exchange for their cities and in return for their castles, impregnable fortresses and provinces, villages, estates, and holy hermitages. So the Artsrunik', descendants of Hayk and Senek'erim, exchanged their ancestral homes in the year 470 of the Armenian era, and moved into Greek territory with fourteen thousand men, not including women and children, passing under the yoke of servitude to the Romans. Likewise the Bagratid Gagik, son of King Yovhannes, also exchanged his ancestral lands in the year 490 of the same era, and went to Roman territory. They ruled over the eastern part of Armenia, the great city of Van, the province of Vaspurakan, the royal city of Ani, and the land of Armenia.

When news of the kings' departure from Armenia and the Roman control of that country reached the camp of the impious, bloodthirsty, ferocious race of Elim, then the ruler of the Elimites, who was called Sultan Tullup, launched a cavalry attack like an eagle swooping on flocks of birds. Reaching the metropolis of Ani, he besieged it; having captured it, he put the inhabitants to the sword. From the flowing of blood the land was irrigated as at the time of flooding. Many of the witnesses said that the blood from the fallen corpses of children reached the river which flowed by the city gate. In similar fashion, a certain eunuch, baneful and licentious, devoted to the service of Satan, bloodthirsty and an eater of carrion. Srahang by name, came to the province of Vaspurakan and plundered it. He reached as far as the city of Van, besieged it and inflicted terrible disasters. Its populace he put to the sword, and the habitations he burned with fire. The same he did to the city of Archesh in the province of Gnunik'. There remained no place of refuge for the Christians save only the impregnable for tress of Amiuk and the island of Alt'amar, where God dwells. These enjoyed a beautiful position, defended by the waves and the proud height of their walls. For them was accomplished the saying of the inspired psalmist David: "The islands shall be happy and all the inhabitants therein"; they rejoiced in delight according to Solomon's exhortation. Like a cock strutting among forests. or a goat in front of flocks, or a king in his army, so were they renowned and glorious in the land.

The Lord had chosen as overseer and guardian of these divinely protected and impregnable fortresses a man related to King Senek'erim, from the province of Amiuk and the family of the Artsrunik', named Abdlmseh. He had survived like a spark from thunderbolts of fire, protected by the omnipotent right hand of God from shipwreck in the dangerous storm-tossed deep. Just as God chose Noah, from whom all races sprang and multiplied; and as God chose Abraham and blessed him and the offspring of his loins; and as the Lord blessed the great David, blessed the fruit of his loins and granted him invincible power-so too did God choose this all-wise protocuropalates Abdlmseh, son of the great prince and holy martyr T'ornik. The latter, on the day of the great feast of the Lord's birth and baptism, had become worthy to receive the crown of martyrdom with many elect men in the province of Mokk' at the village of Atichank. His son too was strengthened by the gracious gifts of God, and was filled with wisdom and the Holy Spirit. Over him the Lord had poured his sevenfold grace, the spirit of knowledge and of piety, the spirit of power and wisdom, the spirit of counsel and intelligence, and had filled him with the fear of God. He was superior to all nations in being modest, humble, liberal, merciful; a lover of prayer and of the saints; he looked after widows and cared for orphans; he never made a false oath to his fellow, nor was falsehood found on his lips; he continuously handsome of person, distinguished and of tall stature, with curly hair and fine appearance, softly spoken and sweet-voiced like a turtledove. He had married the daughter of Grigor, dux [duke, leader.] of the East and grandson of the splendid and powerful prince of princes Aluz, who was lord and master of the provinces of Tsalkotn and Kogovit and of the great town of Angeltun.

Now the holy lamb of Christ, Mariam by name, most noble of ladies by birth, had been raised in holiness and piety and fear of the Lord. In accordance with her name she was devoted to the love of God, and was superior to all saints in being compassionate to everyone, merciful, firm in faith, prudent and chaste, in no way inferior to holy queens; a lover of prayer and of the poor, she continually served the holy clergy who were in the holy cathedral, in the divinely adorned and beautifully decorated, glorious holy church dedicated to the Holy Cross. For God had chosen it and was pleased to dwell therein. She placed for safekeeping there the divine treasures: the throne of our Holy Illuminator Gregory the Parthian, the sanctifying altar of the divine mystery, the girdle of the holy waist, the staff of the all-powerful right hand which tended the Lord's people and was superior to the two staffs of the great prophets Moses and Aaron, the slippers of the labouring feet of the holy virgin Hrip'sime, the scarf tinged with the holy blood, the arm of the holy martyr, the young Abdlmseh, who was related to the protocuropalates and bore the same name, and many other relics of the martyrs; also the sign of the Lord's cross, on which there was a drop of life-giving blood, mounted with gold and pearls, which the Lord had given through the holy and blessed patriarch, the archbishop Lord Dawit, and which is still called the holy cross of Aparank. For the lord Dawit was related to the protocuropalates, and they were both holy and elected by the Lord

Previously the Holy Spirit had chosen to be overseer and guardian of the house of Vaspurakan the great prince named Khedenek, a kinsman of King Senek'erim and of the royal branch of the Artsrunik. He begat Prince Tornik, a powerful man and a warrior valiant in deeds of bravery, and his brothers the holy, most praiseworthy and blessed valiant shepherds, Lord Dawit and Lord Step'anos, the great crowns of the church, and also Lord Grigor of the same name as our Illuminator. These shone out in the universe like the sun among stars. From T'ornik was born the great prince T'adeos, a man excellent in warfare. By the help of God and their own bravery they did not permit their provinces to be undermined by the incessant raiding of the enemy. From T'ornik, son of T'adeos, was born the saintly and pious Abdlmseh, who in his divine wisdom exceeded all his ancestors. They were brave and valiant in warfare, but he lived out his life in peace, filled with wisdom and understanding. For in his days was accomplished the Lord's saying: "Nation shall rise against nation, and kingdom against kingdom; and in many places there will be famines and plagues and earthquakes; and in heaven a sign in the sun and the moon and the stars, and on earth agitation of the heathen." In his time the brave nation of the Franks came out and freed the holy city of Jerusalem from the hands of the Muslims, and many other lands in the [Armenian] year 546.

The land of the East was being oppressed at the hands of the impious; by continuous attacks of Muslims, who spread their raids over the surface of the earth like flowing torrents, or like thick clouds blown in confusion by thundering winds and fiery lightning in the dark hours of the night. Our flight took place in winter and on the sabbath day, according to the Lord's warning; and there was no hope or expectation for the Christians save only in the pious and elect royal monarch, the protocuropalates, related to the great and valiant martyr Vardan Mamikonean. For through the prayers and supplications of the holy fathers and his relatives, the Lord had strengthened his anointed. For he lived his life peaceably, and strove for peace with everyone. He gave his property and possessions for the payment of taxes, and did not criticise the taking of any of his own for the requirements of tax exactors. He did not govern by menaces, nor by terror or threats or usury; but he cared for all, consoled them, and was compassionate to them as a father for his children. Long since he had learned the saying: "Be compassionate, even as your heavenly father is compassionate." He begat seven sons and five daughters; and from his offspring the Lord chose one, named Dawit'-as with Jesse of Bethlehem, of whose sons the Lord chose David. And he blessed him with unsurpassable blessing for ever and ever.

He resembled the great David and was even superior to him, for the Lord wished to raise up the horn of his church. He was brought up in the Lord's house under the shadow of the divine treasures that we mentioned above, which were kept in safekeeping on the island of AlFamar, the residence of God. He resembled the prophet Samuel, raised in the temple of the Lord and successor to the high priest Heli. But he was superior to him, having from his youth taken the yoke of humility by fasting and prayer and strict asceticism, warring with brave and valiant endurance against the devil; armed with weapons and armour, by hunger and thirst and vigils he overcame the artful enemy, in accordance with the apostolic saving of Paul, the citizen of heaven: "We do not have combat with flesh and with blood, but with principalities and powers and with the governors of this dark region and with evil spirits under heaven.'

Now he carried to fulfilment the exercise of mortification and chastity, since those who live their lives in chastity are superior to the angels. He reckoned as naught this world and its glory and the delight of this present existence, for he had continually heard from the prophets the likeness of man to grass and a flower that is shaken, its similarity to a passing frivolity, a daily hireling, and vanity. He spent his life in all deeds of virtue according to the Lord's saying, when he enjoined his saints: "It is not you who chose me, but I chose you."

He resembled Melchisedek, previously chosen by the Spirit to indicate the coming of the Saviour and the distribution of his Body and Blood, running to meet the patriarch Abraham while he was coming from battle. He resembled Joshua, son of Nav; for he was a virgin holy and brave, who with his lance protected the Lord's people in the Promised Land. He resembled Aaron with his robe and ephod decorated with twelve pearls, in accordance with the number of the holy apostles and a type of the twelve nations that believed in Christ. He resembled Elias the prophet who saw God, who from the womb of his mother was nourished by angels with fire, and who through his chastity closed up heaven for three vears and six months; and no dew fell on the earth, until by the word of his mouth it rained. He resembled the great prophet John, son of Zacharias, who heard from the archangel the good news concerning the birth of John, who laid hands on God the Word in the Jordan.

He resembled John the son of Zebedee, who through his chastity was named son of thunder, who from the heights thundered forth the word of God, who reclined on the Lord's breast and was purified like gold in fire. He imitated these in purity and chastity, being granted grace from the most liberal giver of gifts, God. He received the honour of the priesthood and episcopate and archbishopric and Catholicosate. The Lord sat him on the throne of our Holy Illuminator Saint Gregory, and joined him to the ranks of the previous holy fathers, Saints Aristakes, Vrt'anes, Yusik, Grigoris, Nerses and Sahak. For the Holy Spirit had previously indicated by a vision to Saint Sahak the calamities that would befall Armenia, the collapse of her independence, and servitude to foreign nobles; her becoming opposed to the truth, like Surmak and Samuel, who were in opposition to the divine grace; and then in the second part of the vision the parchment which indicated in letters of gold and red ink the elevation of the saints, and the line and a half in black ink, and the erasure indicating those opposed to the truth; then the repeat of the other line, which expressed the model of our holy patriarch, the divinely honoured Lord Dawit [David], the elect and anointed of the Lord, who sat on the throne of our Holy Illuminator. For the former saints were like their fathers, and he even more so resembled his fathers the holy patriarchs and martyrs; since by their prayers and supplications and by the shedding of the blood of the holy martyrs Vardan and his companions, and of T'ornik and his companions, relatives of the holy patriarch Dawit', the Lord strengthened him more and more

Now another of his offspring, the youngest of the brothers, was named Step'anos according to his father's side; and on his mother's side his godly mother, most illustrious of ladies, named him by her grandfather's name, Aluz. In his advancement he received honour from the holy kings and great renown. He made up for any failure in his paternal and maternal ancestors, and became the most illustrious in his whole family. Just as Isaac blessed Jacob, and the Lord heard him and the Lord blessed Jacob by the mouth of his father because the blessings of fathers sustain sons-so also was the great prince Aluz blessed by God and by his father Abdlmseh. For he was a God-loving and pious man and obedient to his parents, since he had learned from God's commandments: "Honour your father and mother," and he had heard elsewhere that: "A disobedient son shall go to destruction"; so he was obedient without any temptation. The Lord established him on the throne of his father as he had established Solomon on the throne of his father David; and just as in his days the Lord had made peace for his kingdom, so also did he in the reign of Aluz. The great and most wise Abdimseh the curopalates divided his patrimony, and gave over into the control of his son Aluz the heaven-like and impregnable fortress of Amiuk, for he was able to resist the impious races of the Ismaelites. And he exceeded in wisdom all his fathers.

Now the very renowned and God-loving curopalates Abdlmseh lived his life in peace. He saw his sons glorious and well praised: one, endowed with spiritual and wordly riches, succeeded to the throne of the patriarchate, and was dedicated to the observance of the divine commandments and nailed to fear of the Lord; the other he saw a lord and prince, splendid in glory, fortunate and successful in all his deeds; and his other sons and daughters he saw endowed with glory and honours. He also saw the sons of his sons, and was blessed by the Lord. He himself at a good old age fell asleep with his father, and was buried in that same island of Alt'amar, inhabited by God, at the monastery of the Holy Cross, having been rendered worthy to receive daily from the Lord the new freedom of adoption through the holy and immortal liturgy, which his relative Lord Dawit', Catholicos of Armenia, offered incesssantly in intercession for his pious parents. It was in the year 570 of the Armenian era that the ruler Abdimseh died. His godly wife lived for two years after the death of her husband, then she too quietly passed to Christ and was joined to her fathers; she was buried in the same tomb, having entrusted her sons to God's grace.

After their departure from this world the wind from the north began to blow ever more strongly with bitterly cold air, and green plants began to disappear from the land. The saving of the Lord's parable was fulfilled: "Rains fell, rivers rose, winds blew." But they were unable to shake the great rock of faith, the gloriously splendid prince Aluz. For he remained on his own in Armenia like a ship in the midst of storm-tossed waves of the sea, having no help from anyone-neither from kings nor princes, neither from magnates nor his fathers, deprived of his possessions and robbed of all his goods. But the walls and buildings that were destroyed he renewed again with much effort. For cruel days had fallen upon the land since the Lord's saying was fulfilled: "Those will be days of oppression such as have never occurred." But to his support came grace and wisdom from supernal help, as to King Hezekiah. Just as the latter turned back the evening hour to noon and was saved by God's help, so also Aluz was saved by God's grace and filled with wisdom. By various means he survived and made peace with his implacable enemies, the race of Elimites. From them he received gifts and honour, and was rendered glorious and renowned in the eves of the unbelievers by his judicious knowledge. Not sparing his goods or possessions, but with eager heart he gave his sweat for the salvation of the Christians, both paying tribute to the Muslims and also organising cavalry and providing them with stipends. Thus he made peace with everyone, according to the saying: "Seek peace and follow it." Aluz resembled the great patriarch Noah, and his castle the ark. For the latter had with him chosen deer and other animals, while the former had with him nobles, free men and the sons of nobles, magnates and princes from every province. He was resplendent in the universe for his noble cavalry, like the full moon in the vault of the sky, or like the sun in the days of summer. God had granted him a brilliant son, a beam of light, named after his ancestor Khedenik; he was pleasing and beloved in the eyes of all for his' splendid beauty, since his father, the great prince Aluz, was fair of visage and tall of stature and powerful.

The Only-Begotten Son of God revealed him to be a glorious boast for us, having given him grace like his ancestors the Artsrunik'. He strengthened him with invincible power, like the impregnable fortress Amiuk granted him by God. By his wise knowledge he strove for peace with everyone, that perchance life might be peaceful for himself and his own people, undisturbed by the tumult of agitated and surging waves.

In his peaceable time all the land was troubled; and especially the province of Vaspurakan saw no calm, but was particularly oppressed by dangers. Yet God's right hand protected him and his fortress. Just as Joseph fed all the land during the famine of Egypt, so likewise he became a cause of prosperity for the house of Vaspurakan. He was bread for the famished, refuge for the fleeing; he restored captives, and wiped all tears from every face. He was desired by all who saw him, and longed for by those who saw him not. His name was famous from one end of the earth to the other and he was praised by all tongues. He was the support of the faith, the glorious crown of the holy church, the mother of all piety. He exceeded himself in prayers and supplications, imploring the salvation of the country; he was undistracted in the midst of his people like one of the humble. He repulsed thieves and brigands, and pursued all impiety. He contented himself with the sweat of his face and the labour of his hands.

He acquired this book of T'ovmay the historian, and had it renovated as a memorial to himself and his good parents and the divinely bestowed fruit of his loins Khedenik; for from the fruit of righteousness grows a tree of blessings. By his luminous flower and fruit he was desirous to all. For in his splendid beauty he resembled the morning star, rising at dawn, or the sweet-smelling rose with its multicoloured beauty that reveals its hues in the springtime. May his memory be blessed, and the prayers of the saints rise on his behalf. Amen.

Glory to the Holy Trinity and single Divinity, threefold yet equal, triune yet one in essence, who in his boundless love for men and liberal bounty gave strength to this weak, pitiable and miserable sinner to reach the end of this book. Praise and ceaseless glorification with worship, now and always and for ever and ever. Amen.

By the grace of the omnipotent God, Father and Only-Begotten Jesus Christ, and the true Holy Spirit, here is terminated and finished this beautifully composed History, which the invincible and knowledgeable vardapet T'ovmay wrote with accuracy, beginning from Adam down to Noah; and then he progressed in descending order detail by detail with much labour in his true account down to the clan of the Artsrunik; one by one he set down the people and events and their causes. How they endured many efforts and labours with wars against the Muslims, and removed their wicked presence from many places so far as they were able. Most especially the divinely crowned, pious and most wise king of Armenia, Gagik, who by his wisdom and orthodox life and by God's will reigned over many lands-as is recorded in this bookand protected them in peace all the days of his life from enemy brigands. He was responsible for the building of churches, in particular this most famous and wonderfully constructed holy church of the Holy Cross of Alfiamar, in whose shade was copied this History in the year 752 of the Armenian era, and in the imperial reign of Lazan, at the order and expense of the venerable, blissful and thrice blessed, wise patriarch of Armenia, Lord Zak'aria, who is truly good and liberally minded, and a lover of the poor and endowed with divine gifts. It was copied at the request of the divinely wise and worthy vardapet, Lord Step'anos, dignified with the archi episcopal rank, who is the gem of the East and the holder of the throne of the great house of Siunik'. If you wish to investigate his ancestry, none of the princes or of those who hold sway in eastern parts is superior to him, for his family and ancestors are the most renowned for valour. And he is as glorious and resplendent among them as is the sun among the stars. Because of his divine love he requested this History from Lord Zak'aria, the godly and pious holder of the throne of our Holy Illuminator. At great effort he had this copied to satisfy his request. Even more eager for this task was the most wise and high-minded, modest and humble brother of Lord Zak'aria, Amir-Gurgen. May the Lord God grant them many days and preserve them safe in soul and hody from the snares of enemies visible and invisible all the days of their lives. Amen

I, the most sinful and unworthy and inconsequential among the ranks of scribes and monks, Daniel by name, in my weakness undertook to copy this at the monastery of the great and splendid Holy Cross of Alt'amar, which we mentioned above. Furthermore, falling on my face, I beg the kind readers and request their pardon for the faults of this book, whatever may be found extra or missing therein, be it a full stop, a line, a comma, or any other expression or changing from kh or h? For the learned know well that in the ancient writings no attention was paid to such matters. Since I am ignorant of these things, what I heard of these expressions from the ecclesiastical books, that I wrote down; and what is beyond them I do not know how it was. So I beg you that according to your pious pleasure, you should merely grant me and my parents a "Lord have mercy" so that you too may find mercy from God on the eternal day of his coming. And may he be blessed, praised and lauded by all creatures, spiritual and tangible, now and always, for ever and ever. Amen.

I also beg that you recall sincerely to the Lord my teacher, the honourable priest Simeon, who taught me a few books from his many skills, and his parents. To Christ and our God glory for ever. Amen.

After all this had so taken place, as is written, we must inform you, Oh dear sons and faithful true brothers, that there was a certain man, renowned and adorned with divine glory, noble and of noble parents, raised in purity and righteousness, who had attained the wisdom of the divine holy testaments, orthodox in faith and in Christian confession. His name was Baron Sefedin Ark'ayun. As by God's summons he came to this impregnable island of Alt'amar, the abode of God, which is the throne of Saint Gregory the Illuminator of Armenia and the residence of the most glorious and renowned holy cross. Khedenik loved Ark'avun as if he were his own son: he gave him his own daughter as wife in legal marriage, and as her dowry the half of Alt'amar. After a short time when Khedenik grew old, he sold to Baron Sefedin in his poverty the other half, receiving as its price much gold for his bodily needs. After a few days the Lord God provided fruit for his loins, a thriving and fine son, the lord Step'anos. When he had acquired instruction and attained maturity, he had him ordained to the patriarchal throne of Saint Gregory. But aged about forty, he departed this world after a prematurely short life and few days, leaving inconsolable grief to his father Baron Sefedin.

But since God is merciful and compassionate to everyone, he looked down on the fervent woes and tears of his heart and granted him sons, blessed by God and pleasing to God: the natural brothers, the modest and sober Amir-Gurgen and the young, wise Zak'aria.

When the hour came for Baron Sefedin to travel the road of his fathers and depart from this world, he did not have the time to confirm with his own hands Zak'aria on the throne of his brother Lord Step'anos. So he was given over to instruction in the divine Holy Scriptures, and became versed in the Old and New Testaments. He had no one as support and helper, save only his brother Amir-Gurgen as father and head of the family, and Baron Kurchbek and Baron Nuredin, his father's brothers.

These, by God's will, gathered together and summoned holy bishops, vardapets, and many monks. Having prayed together, they blessed and ordained Lord Zak'aria to the patriarchal throne of his brother Lord Step'anos. There was great joy and rejoicing for our see of the Holy Cross of Alt'amar, residence of God. Like an unshakeable rock, like an iron rampart, and like a gate of bronze, he resisted the wicked Muslim warriors. He was a lover of building and responsible for many constructions. Filled with God's Spirit, he built in the land of Vaspurakan on the island called Lim the beautiful, luminous, and domed church of Saint George the General, which he adorned with many furnishings. He also built a house of prayer and living quarters and palaces; he established many monks at the monastery of the church of Saint George the General, and by their prayers may Christ God have mercy on us. Amen.

Furthermore, at his patriarchal see on the island of Alt'amar at the monastery of the Holy Cross he built on a beautiful and spacious site behind the Holy Cross the great oratory for the days of winter. On the western side for the summer days he built the spacious vaulted chapel, finely worked and bound with mortar, bringing its stones from the land of Khlat' with much labour over the deep lake. He had copied in memory of his soul the book called Tonakan for it includes the feasts of the Lord, of the holy apostles and prophets, patriarchs and vardapets, generals and virgins. By their prayers and intercession may the Lord God Jesus Christ have mercy on Lord Zak'aria and his natural brother Baron Gurgen and his son Sahmadin, prematurely dead, and all his relatives. Amen.

Also he built many beautiful and charming summer lodgings as an upper story on top of the palace that Baron Sefedin had constructed for his son Lord Step'anos; and many other inhabited and deserted places he re-established in faith and hope. Reflecting through his superior solicitude and foresight, out of love he decided on a good plan: "After my death and departure from his world, who shall occupy our patriarchal throne if not one of my kinsmen and descendants?" Then he proposed his spiritual son, the wonderful and wise youth Lord Dawit', son of his full brother Baron Gurgen. Numerous bishops, monks, and priests with large congregations, by prayer and rituals blessed and ordained Lord Dawit' as heir and co-heir of his see. There was no little happiness and rejoicing to his parents and his entire family.

Now Lord Zak'aria arose like the sun at dawn, melting the freezing ice of winter frosts and of the Muslim enemies of Christ's cross. He resisted the hurricane of evils, Ali Pasha and others of his ilk, who waxed haughty against the holy churches and the faith of the Christians. He prevented the payment of numerous taxes and haraj from monasteries and monks; he endured many tribulations and efforts, suffered great wounds, and bore many scars on his soul and body. For his nephew Lord Step'anos had his relative, the daughter of his sister, delivered to the Muslims, mixing milk with their blood. Many monasteries and churches were beset with great distress and misery, because they the Muslims seized total control of the beautiful and impregnable island of Alfamar, and many other places and palaces, lands and estates, legally or illegally. After this had so come about, then in the year 775 of the Armenian era occurred the death and departure from this world of the holy patriarch Lord Zak'aria. With a good confession and orthodox profession of faith he gave up his soul and went from this transitory world to the world of the living, to the supernal Jerusalem and the residence of the just. By their prayers and those of all the saints may the compassionate and merciful God make Lord Zak'aria a companion and sharer of the holy fathers and patriarchs past and recent

After a little time the death of Step'anos and of Shamish-Khat'un took place; they departed this world and went there where are the true accusers and examiners and exactors of words, deeds and thoughts. After this had happened we had no king or prince or judge or overseer or leader or saviour and rescuer who could free us from foreigners and wicked enemies. For they imposed many exactions of treasure, of gold and silver; so whoever had claim to the throne of that patriarchate had to give many riches. Otherwise, the Muslims would seize convents and churches, monks and priests, virgins and abbesses, common people and all Christ's flocks. These disasters and great misfortunes were seen by Lord Dawit', bishop of Armenia, who had been ordained by his brother Lord Zak'aria. Since at that time his father the great Baron Amir Gurgen and his elder brother Amir Sahmadin had departed this world, there was no one to help or support him. Then Lord Dawit' rose like a shining star, like the sun at noon, like a cloud gleaming with lightning, or like rays of light appearing at night in sublime and beauteous fashion, valiant of body and charming of person. With his two handsome full brothers, called Amir Kurchbek and Amir Sefefiin, who were wise, intelligent, eloquent, and fluent, he held council. They addressed each other like the brave and valiant Saint Vardan, or like the holy Atom and his companions. They plunged into this great battle and contest, saying to each other: "It is not right to abandon our holy places, our home and ancestral inheritance, lest foreign Muslims enter therein, or some other wicked men or heretics or adversaries." With much affliction and pain, with ceaseless comings and goings, much labour and endurance of vexations and opprobrium, partly justified partly not, some they implored, others they entreated, some they praised, others they punished according to their merits, striving to resist this great oppression and struggle, and to be freed from the exaction of many possessions and incalculable treasure. Again they said to each other: "Dear brothers, let us be bravely united through the bond of the Holy Spirit, lest our ancestral inheritance fall into the hands of foreign Muslims." May the Lord and merciful God, who is liberal with good gifts and brings peace to the whole world, grant them strength, wisdom and knowledge, patience and endurance in their resistance to Muslim enemies of Christ's cross, and may he free them in soul and body from calamities and the deceit of Satan. Amen.

Also we request, beg, entreat and supplicate you, the merciful Father, and the compassionate God Jesus Christ, and the Holy Spirit, the true God—we the unworthy monks and priests and all believers in the Holy Trinity. In faith and hope we request from your liberal benevolence that you again strengthen the throne of our patriarchate as before, and free it from debt and illegal exactors; and that you make our patriarch Lord Dawit' shine out like the sun over the land, like the moon among the stars, to an advanced old age with many years of life, together with his brothers and their sons and posterity. Amen.

And to Christ our God, glory, praise, and worship for ever and ever. Amen.

> THE BOOK OF THE BEE The Biblical History of Solomon of Akhlat Translation: Earnest A. Wallis Budge, 1886 Estimated range of dating: 1210-1230 AD.

(The Book of the Bee is a theological compilation of Biblical history and legends. It was written by Solomon of Akhlat, a Syrian Nestorian Bishop of Bassora (Basrah) around 1222. It is written in Syriac. The book consists of 60 chapters discussing various topics including the creation, heaven and earth, the angels, darkness, and paradise. This book is remarkable as it shows lists of the Old Testament prophets or teachers, the New Testament disciples, apostles and teachers, lists of kings and emperors. And it also mentiones details such as that the apostle Thomas went to Persia and India. It discusses also the disputed status of Mary Magdalene.

Of the author of 'the Book of the Bee,' the bishop Shelemon or Solomon, but very little is known. He was a native of Khilat or Akhlat (in Armenia, at the western end of lake Van), and by religious profession a Nestorian. He became metropolitan bishop of al-Basra (in al-Irak, on the right bank of the united streams of the Tigris and Euphrates) about A.D. 1222, in which year he was present at the consecration of the catholicus or Nestorian patriarch Sabr-isho (Hope-in-Jesus; Note: The proper names of the Nestorians strongly resemble those of our Puritans: Jesus-is-risen; Our-Lord-hathconverted; Jesus-hath-answered-me; Blessed-be-His-will; etc.). The text of 'the Bee' is contained in this volume is edited

from four Manuscripts, indicated respectively by the letters A, B, C and D.

The Manuscript A2 belongs to the Library of the Royal Asiatic Society of Great Britain and Ireland. It is dated A.Gr. 1880 = A.D. 1569, and p. iv consists of 188 paper leaves, measuring about 8 in. by 5%. Each page is occupied by one column of writing, generally containing 25 lines. This Manuscript is so stained and damaged by water in parts that some of the writing is illegible. The quires are twenty-one in number and, excepting the last two, are signed with letters. Leaves are wanting after folios 6, 21,49, 125, 166 and 172; and in several pages there are lacunae of one, two and more lines. The volume is written in a good Nestorian hand, with numerous vowel-points. Originally it was the property of the priest Warda, son of the deacon Moses, who was prior of the convent of Mar Ezekiel. Later on, it belonged to one Mar John of Enzelli (near Resht, on the south shore of the Caspian Sea). In the year A.Gr. 1916 = A.D. 1605 it was bound by a person whose name has been erased. The Book of the Bee occupies foll. 26 a to 92 b, and the colophon runs: 'By the help of our Lord and our God, this Book of the Bee was completed on the 16th day of the month of Tammuz, on the Saturday that ushers in the Sunday which is called Nusardel1, in the year 1880 of the blessed Greeks, by the hands of the sinful servant the faulty Elias. Amen.' The Manuscript B is on paper, and is numbered Add. 25,875 in the British Museum. See Wright's Catal., p. 1064, no. 922, ff. 81 b-158 a. It is written with numerous vowel-points, etc., and is dated A. Gr. 2020 = A.D. 1709.)

BOOK OF THE BEE PART 1

The Book Of The Bee

Trusting in the power of our Lord Jesus Christ, we begin to write this book of gleanings called 'The Bee,' which was composed by the saint of God, Mar Solomon, metropolitan of Perath-Maishan, that is Bassorah (al-Basrah), one of His companions. O Lord, in Thy mercy help me. Amen.

First, The Apology.

'The children ought not to lay up treasures for the parents, but the parents for the spiritual children,' saith the blessed Paul; therefore we are bound to repay thee the debt of love, O beloved brother and staff of our old age, saint of God, Mar Narses, bishop of Khoni-Shabor Beth-Wazik. We remember thy solicitude for us, and thy zeal for our service, which thou didst fulfil with fervent love and Christ-like humility. And when we had loving meetings with each other from time to time, thou wert wont to ask questions and to make enquiries about the various things which God hath wrought in His dispensation in this material world, and also as to the things that He is about to do in the world of light. But since we were afflicted with the Mosaic defect of hesitancy of speech, we were unable to inform thee fully concerning the profitable matters about which, as was right, thou didst enquire; and for this reason we were prevented from profitable discourse upon the holy Books. Since, then, God has willed and ruled our separation from each other, and the sign of old age, which is the messenger of death, hath appeared in us, and we have grown old and come into years, it has seemed good to us, with the reed for a tongue and with ink for lips, to inform thee briefly concerning God's dispensation in the two worlds. And, behold, we have gleaned and collected and gathered together chapters and sections relating to this whole universe from the garden of the divine Books and from the crumbs of the Fathers and the Doctors, having laid down as the foundation of our building the beginning of the creation of this world, and concluding with the consummation of the world to come. We have called this book the 'Book of the Bee,' because we have gathered of the blossoms of the two Testaments and of the flowers of the holy Books, and have placed them therein for thy benefit. As the common bee with gauzy wings flies about, and flutters over and lights upon flowers of various colours, and upon blossoms of divers odours, selecting and gathering from all of them the materials which are useful for the construction of her handiwork; and having first of all collected the materials from the flowers, carries them upon her thighs, and bringing them to her dwelling, lays a foundation for her building with a base of wax; then gathering in her mouth some of the heavenly dew which is upon the blossoms of spring, brings it and blows it into these cells: and weaves the comb and honey for the use of men and her own nourishment: in like manner have we, the infirm, hewn the stones of corporeal words from the rocks of the Scriptures which are in the Old Testament, and have laid them down as a foundation for the edifice of the spiritual law. And as the bee carries the waxen substance upon her thighs because of its insipidity and tastelessness, and brings the honey in her mouth because of its sweetness and value; so also have we laid down the corporeal law by way of substratum and foundation, and the spiritual law for a roof and ceiling to the edifice of the spiritual tower. And as the expert gardener and orchardkeeper goes round among the gardens, and seeking out the finest sorts of fruits takes from them slips and shoots and plants them in his own field: so also have we gone into the garden of the divine Books, and have culled therefrom branches and shoots, and have planted them in the ground of this book for thy consolation and benefit. When thou, O brother, art recreating thyself among these plants, those which appear and which thou dost consider to be insipid and tasteless, leave for thy companions, for they may be more suitable to others (than to thee); but, upon those which are sweet, and which sweeten the palate of thy understanding, do thou feed and satisfy thy hunger. If, however, owing to their fewness, they do not fill thee, seek in succession for their roots, and from thence shall thy want be satisfied. Know also, O brother, that where there is true love, there is no fear; and where there is freedom of speech, there is no dread; and we should not dare to be so rash as to enter upon these subjects, which are beyond the capacity of our simple understanding, unless we relied upon thy immaculate love; because, in the words of one of the inspired, 'When thou findest honey, eat (only) so much as is sufficient for thee, lest, when thou art sated, thou vomit it'; that is to say, do not enquire (too closely) into the divine words.

BOOK OF THE BEE CHAPTER 1

Of God's Eternal Intention In Respect Of The Creation Of The Universe.

It is well for us to take the materials for our discourse from the divine Scriptures, that we may not stray from the straight paths of the way of truth. The blessed David saith, 'Lord, thou hast been our dwelling-place in all generations, before the mountains were conceived.' David, the harpist of the Spirit, makes known thereby, that although there was a beginning of the framing of Adam and the other creatures when they were made, yet in the mind of God it had no beginning: that it might not be thought that God has a new thought in respect of anything that is renewed day by day, or that the construction of Creation was newly planned in the mind of God: but everything that He has created and is about to create, even the marvellous construction of the world to come, has been planned from everlasting in the immutable mind of God. As the natural child in the womb of his mother knows not her who hears him nor is conscious of his father who, after God, is the cause of his formation; so also Adam, being in the mind of the Creator, knew Him not. And when he was created, and recognised himself as being created, he remained with this knowledge six hours only, and there came over him a change, from knowledge to ignorance and from

good to evil. Hence, when Divine Providence wished to create the world, the framing of Adam was first designed and conceived in the mind of God, and then that of the (other) creatures; as David saith, 'Before the mountains were conceived.' Consequently, Adam is older than the (other) creatures in respect of his conception, and the (other) creatures are older than Adam in respect of their birth and their being made. And whereas God created all creatures in silence and by a word. He brought forth Adam out of His thoughts, and formed him with His holy hands, and breathed the breath of life into him from His Spirit, and Adam became a living soul, and God gave him the knowledge of the difference between good and evil. When he perceived his Creator, then was God formed and conceived within the mind of man; and man became a temple to God his maker, as it is written, 'Know ye not that ye are the temple of God, and that the Spirit of God dwelleth in you?' And again, 'I will dwell in them, and walk in them."

BOOK OF THE BEE CHAPTER 2

Of The Creation Of The Seven Natures (Substances) In Silence.

When God in His mercy wished to make known all His power and His wisdom, in the beginning, on the evening of the first day, which is Sunday, He created seven natures (substances) in silence, without voice. And because there was as yet none to hear a sound, He did well to create them in silence, that He might not make anything uselessly; but He willed, and heaven, earth, water, air, fire, and the angels and darkness, came into being from nothing.

BOOK OF THE BEE CHAPTER 3

Of Earth, Water, Air, And Fire.

The earth was toh we-boh, that is to say, it was unarranged and unadorned, but plunged in the midst of the waters. The waters were above it, and above the waters was air, and above the air was fire. The earth is by nature cold and dry. Dry land appeared on the third day, when the trees and plants were created; and the waters were separated therefrom on the second day, when the firmament was made from them. Water is by nature cold and moist. As touching the 'Spirit which was brooding upon the face of the waters,' some men have ignorantly imagined it to have been the Holy Spirit, while others have more correctly thought it to have been this air (of ours). Air is by nature hot and moist. Fire was operating in the upper ether, above the atmosphere; it possessed heat only, and was without luminosity until the fourth day, when the luminaries were created: we shall mention it in the chapter on the luminaries (chap. x). Fire is by nature hot and dry.

BOOK OF THE BEE CHAPTER 4

Of Heaven. Heaven is like a

Heaven is like a roof to the material world, and will serve as the floor of the new world. It is by nature shining and glorious, and is the dwelling-place of the invisible hosts. When God spread out this firmament, He brought up above it a third part of the waters, and above these is the heaven of light and of the luminaries. Hence people say 'the heaven, and the heaven of heavens'; for we call both the firmament and the waters which are above it 'heaven.' Some consider that the verse 'Let the waters which are above the heavens praise the name of the Lord' refers to the holy angels and to our Lord's humanity; but neither the Church nor the orthodox teachers accept this.

BOOK OF THE BEE CHAPTER 5

Of The Angels.

The Angels consist of nine classes and three orders. upper. middle and lower. The upper order is composed of Cherubim, Seraphim, and Thrones: these are called 'priests' (kumre), and 'chief priests,' and 'bearers of God's throne.' The middle order is composed of Lords, Powers and Rulers: these are called 'priests' (kahne), because they receive revelations from those above them. The lower order consists of Principalities, Archangels and Angels: and these are the ministers who wait upon created things. The Cherubim are an intellectual motion which bears the throne of the holy Trinity, and is the chief of all motions; they are ever watchful of the classes of themselves and those beneath them. As concerning the epithet 'full of eyes,' which is applied to them, the eyes indicate the mystery of the revelations of the Trinity. Their head, and the foremost and highest among them, is Gabriel, who is the mediator between God and His creation. The Seraphim are a fiery motion, which warms those below it with the fire of the divine love. The six wings which each of them is said to possess indicate the revelations which they receive from the Creator and transmit to mankind. The Thrones are a fixed motion, which is not shaken by the trials which come upon it. The Lords are a motion which is entrusted with the government of the motions beneath it; and it is that which prevents the demons from injuring created things. The Powers are a mighty motion, the minister of the will of the Lord; and it is that which gives victory to some rulers in battle and defeat to others. The Rulers are a motion which has power over the

BOOK OF THE BEE CHAPTER 8 Of The Firmament.

On the evening of the second day of the week, God willed to divide the heavens from the earth, that there might be luminaries and stars beneath the heavens to give light to this world, and that the heavens might be a dwelling-place for the righteous and the angels after the resurrection. God said, 'Let there be a firmament which shall divide the waters from the waters'; and straightway the waters were divided into three parts. One part remained upon the earth for the use of men, cattle, winged fowl--the rivers and the seas; of another part God made the firmament; and the third part He took up above the firmament. But on the day of resurrection the waters will return to their former nature.

CHAPTER 9

Of The Creation Of Trees And Plants, And The Making Of Seas And Rivers.

On the third day God commanded that the waters should be gathered together into the pits and depths of the earth, and that the dry land should appear. When the waters were gathered together into the depths of the earth, and the mountains and hills had appeared, God placed the sand as a limit for the waters of the seas, that they might not pass over and cover the earth. And God commanded the earth to put forth herbage and grass and every green thing; and the earth brought forth trees and herbs and plants of all kinds, complete and perfect in respect of flowers and fruit and seed, each according to its kind. Some say that before the transgression of the command, the earth brought forth neither thorns nor briars, and that even the rose had no thorns as it has now; but that after the transgression of the command, the earth put forth thorns and briars by reason of the curse which it had received. The reason why God created the trees and plants before the creation of the luminaries was that the philosophers, who discourse on natural phenomena. might not imagine that the earth brought forth herbs and trees through the power of the heat of the sun. Concerning the making of Paradise, it is not mentioned in the Pentateuch on what day it was created; but according to the opinion of those who may be relied upon, it was made on the same day in which the trees were made: and if the Lord will, we will speak about it in its proper place.

BOOK OF THE BEE CHAPTER 10 Of The Making Of The Luminaries.

On the fourth day God made the luminaries--sun, moon, and stars--of three substances, air, light, and fire. He took aerial material and prepared vessels like lamps, and mixed fire with light, and filled them. And because in the nature of fire there was no light, nor heat in that of light, the fire imparted heat to the light, and the light gave luminosity to the fire; and from these two were the luminaries--sun, moon, and stars-fabricated. Some say that the luminaries were made in the morning, that the sun was placed in the east, and the moon in the west; while others say that they were made in the evening, and that the sun was placed in the west, and the moon in the east; and therefore the Jews celebrate the fourteenth in the evening. Others say that all the luminaries when they were created were placed in the east; the sun completed his course by day, while the moon waited until eventide, and then began her course. The path of the luminaries is beneath the firmament, and they are not fixed as men have foolishly stated, but the angels guide them. Mar Isaac says, 'The sun performs his course from the east to the west, and goes behind the lofty northern mountains the whole night until he rises in the east. And the philosophers say that during the night the luminaries perform their course under the earth.

BOOK OF THE BEE CHAPTER 11

Of The Creation Of Sea-Monsters, Fish, Winged Fowl, And The Reptiles That Are In The Seas.

On the fifth day of the week God made from the waters mighty sea-monsters, fish, winged fowl, swimming beasts, and the reptiles that are in the seas. He created the winged fowl that are in the waters from the waters; for, like fish, they lay eggs and swim. Now, fish swim in the waters, and winged fowl in the air; but some of the latter in the waters also. Although they say that swimming creatures were made from the waters, or that the other wild beasts and cattle were made from the earth; still they consist of parts of all the other elements. Those, however, that are of the waters, have the greater part of their composition made of water; while the greater part of those whose origin is earth, consists of earth: but none of them lack the four elements.

BOOK OF THE BEE CHAPTER 12 Of The Creation Of Beasts And Animals

On Friday eve God created them, and therefore animals can see at night as well as in the day time. Others say that they were all created in the morning, and that God created Adam after them on the sixth day, which is Friday.

BOOK OF THE BEE CHAPTER 13 Of The Formation Of Adam.

On the Friday, after the making of all created things, God said, 'Come, let us make man in our image and in our likeness.' The Jews have interpreted the expression 'Come, let us make,' as referring to the angels; though God (adored be His glory!) needs not help from His creatures: but the expositors of the Church indicate the Persons of the adorable Trinity. Some say that when God said 'Come, let us make man in our image and in our likeness,' the angels by the eye of the Spirit saw the right hand (of God) spread out over the whole world, and there were in it parts of all the creatures both spiritual and corporeal. And God took from an these parts, and fashioned Adam with His holy hands, and breathed into him the breath of life, and man became a living soul. Others say that God took earth from the four quarters of the world, and formed Adam outside paradise; while others say that God fashioned him in the middle of the earth, on the spot where our Lord was crucified, and that there also was Adam's skull laid. After God had formed Adam outside Paradise, He brought him in as a king, and made him king over all the creatures, and commanded him to give a name to each of them. God did not gather together unto Adam all cattle, nor (all) that swim in the sea, nor (all) the birds of the air, that he might give them names; but he received dominion and power over them to make use of them as he pleased, and to give them names, as a master to his slaves. And when God had brought him into Paradise. He commanded him to till it and to guard it. Why did God say 'to till it and to guard it'?--for Paradise needed no guarding, and was adorned with fruit of all kinds, and there was none to injure it--unless it were to exhort him to keep His commandments, and to till it that he might not become a lover of idleness. Because Adam had not seen his own formation, and was not acquainted with the power of his Maker, it was necessary that, when Eye was taken from him in his own likeness, he should perceive his Maker, and should acknowledge that He who made Eve also made him, and that they two were bound to be obedient to Him.

BOOK OF THE BEE CHAPTER 14

Of The Making Of Eve.

God said, 'Let us make a helper for Adam.' And He threw upon Adam a sleep and stupor, and took one of his ribs from his left side, and put flesh in its place, and of it He formed Eve. He did not make her of earth, that she might not be considered something alien to him in nature; and He did not take her from Adam's fore-parts, that she might not uplift herself against him: nor from his hind-parts that she might not be accounted despicable: nor from his right side, that she might not have pre-eminence over him; nor from his head, that she might not seek authority over him; nor from his feet, that she might not be trodden down and scorned in the eyes of her husband: but (He took her) from his left side, for the side is the place which unites and joins both front and back .--Concerning the sleep which God cast upon Adam. He made him to be half asleep and half awake, that he might not feel pain when the rib was taken from him, and look upon the woman as a hateful thing; and yet not without pain, that he might not think that she was not meet for him in matters of nature. When Adam came to himself, he prophesied and said, 'This is bone of my bones, and flesh of my flesh; this shall be called woman': and they were both clothed in light, and saw not each other's nakedness.

BOOK OF THE BEE CHAPTER 15

Of Paradise.

In the eastern part of the earth, on the mountain of Eden, beyond the ocean, God planted Paradise, and adorned it with fruit-bearing trees of all kinds, that it might be a dwellingplace for Adam and his progeny, if they should keep His commandments. He made to spring forth from it a great river, which was parted into four heads, to water Paradise and the whole earth. The first river is Pishon, which compasseth the land of Havila, where there is gold and beryls and fair and precious stones. The second river is Gihon, that is, the Nile of Egypt. The third river is Deklath (the Tigris), which travels through the land of Assyria and Beth-Zabdai. The fourth river is Perath (the Euphrates), which flows through the middle of the earth. Some teachers say that Paradise surrounds the whole earth like a wall and a hedge beyond the ocean. Others say that it was placed upon the mount of Eden, higher than every other mountain in the world by fifteen cubits. Others say that it was placed between heaven and earth, below the firmament and above this earth, and that God placed it there as a boundary for Adam between heaven and earth, so that, if he kept His commands, He might lift him up to heaven, but if he transgressed them, He might cast him down to this earth. And as the land of heaven is better and more excellent than the land of Paradise, so was the land of Paradise better and more glorious and more excellent (than our earth); its trees were more beautiful, its flowers more odoriferous, and its atmosphere more pure than ours, through superiority of species and not by nature. God made Paradise large enough to be the dwelling-place of Adam and

according to the will of the Creator. This class of angels governs the luminaries, the sun, moon, and stars. The Principalities are a defined motion which possesses the direction of the upper ether, of rain, clouds, lightning, thunder, whirlwinds, tempests, winds, and other ethereal disturbances. The Archangels are a swift operative motion, into whose hands is entrusted the government of the wild beasts, cattle, winged fowl, reptiles, and everything that hath life, from the gnat to the elephant, except man. The Angels are a motion which has spiritual knowledge of everything that is on earth and in heaven. With each and every one of us is an angel of this group--called the guardian angel--who directs man from his conception until the general resurrection. The number of each one of these classes of angels is equal to the number of all mankind from Adam to the resurrection. Hence it is handed down that the number of people who are going to enter the world is equal to the number of all the heavenly hosts; but some say that the number is equal to that of one of the classes only, that they may fill the place of those of them who have fallen through transgressing the law; because the demons fell from three classes (of angels), from each class a third part. If then it is an acknowledged fact that there are three orders of angels, and in each order there are three classes, and in every class a number equivalent to that of all mankind, what is the total number of the angels? Some say that when the angels were created, and were arranged in six divisions--Cherubim, Seraphim, Thrones, Principalities, Archangels, and Angels--the three lower divisions reflected (saying), 'What is the reason that these are set above, and we below? for they have not previously done anything more than we, neither do we fall short of them.' On account of this reflection as a cause, according to the custom of the (divine) government, Justice took from both sides, and established three other middle classes of angels--Lords, Powers, and Rulers--that the upper might not be (unduly) exalted, nor the lower think themselves wronged. As for the dwelling-place of the angels, some say that above the firmament there are waters, and above them another heaven in the form of infinite light, and that this is the home of the angels. Here too is God without limit, and the angels, invisible to bodily eyes, surround the throne of His majesty, where they minister to 'the tabernacle not made with hands.' Others say that, from the beginning, when God created the angels, until the second day, in which the firmament was made, all the classes of angels dwelt in the upper heavens; but when the firmament was made, they all came down below it, with the exception of three classes--the Cherubim, Seraphim, and Thrones--who remained above it. These surrounded and supported the Shechinah of God from the beginning of the world until our Lord ascended unto heaven; and after the Ascension, behold, they surround and support the throne of the Christ God, who is over all, until the end of the world. The Expositor and his companions say: 'The tabernacle which Moses made is a type of the whole world.' The outer tabernacle is the likeness of this world, but the inner tabernacle is the similitude of the place that is above the firmament. And as the priests ministered in the outer tabernacle daily, while the high priest alone entered into the inner tabernacle once a year; so of all rational beings, angels and men, no one has entered (the place) above the firmament, save the High Priest of our confession, Jesus Christ, The fathers, when they have been deemed worthy at any time to see our Lord in a revelation, have seen Him in heaven, surrounded by the Cherubim and Seraphim. Hence some say that there are angels above the heavens. All these celestial hosts have revelations both of sight and of hearing; but the Cherubim have revelations by sight only, because there is no mediator between them and God. The angels have an intellect superior to that of the rest of rational beings; man has stronger desire, and the demons a greater degree of anger.

spiritual treasures, to distribute them to its companions

BOOK OF THE BEE CHAPTER 6

Of Darkness.

Darkness is a self-existent nature; and if it had not had a nature, it would not have been reckoned among the seven natures which were created in the beginning in silence. Others say that darkness is not a self-existent nature, but that it is the shadow of bodies.

BOOK OF THE BEE CHAPTER 7 Of Effused (Circumambient) Light.

When the holy angels were created on the evening of the first day, without voice, they understood not their creation, but thought within themselves that they were self-existent beings and not made. On the morning of the first day God said in an audible and commanding voice, 'Let there be light,' and immediately the effused light was created. When the angels saw the creation of light, they knew of a certainty that He who had made light had created them. And they shouted with a loud voice, and praised Him, and marvelled at His creation of light, as the blessed teacher saith, 'When the Creator made that light, the angels marvelled thereat,' etc.; and as it is said in Job, 'When I created the morning star, all my angels praised me.' Now by nature light has no warmth. of his posterity, provided that they kept the divine commandments. Now it is the dwelling-place of the souls of the righteous, and its keepers are Enoch and Elijah; Elijah the unwedded, and Enoch the married man: that the unwedded may not exalt themselves above the married, as if, forsooth, Paradise were suitable for the unwedded only. The souls of sinners are without Paradise, in a deep place called Eden. After the resurrection, the souls of the righteous and the sinners will put on their bodies. The righteous will enter into heaven, which will become the land of the righteous; while the sinners will remain upon earth. The tree of good and evil that was in Paradise did not by nature possess these properties of good and evil like rational beings, but only through the deed which was wrought by its means; like the 'well of contention,' and the 'heap of witness.' which did not possess these properties naturally, but only through the deeds which were wrought by their means. Adam and Eve were not stripped of the glory with which they were clothed, nor did they die the death of sin, because they desired and ate of the fruit of the fig-tree--for the fruit of the fig-tree was not better than the fruit of any other tree--but because of the transgression of the law, in that they were presumptuous and wished to become gods. On account of this foolish and wicked and blasphemous intention, chastisement and penalty overtook them .--Concerning the tree of life which was planted in the middle of Paradise, some have said that Paradise is the mind, that the tree of good and evil is the knowledge of material things, and that the tree of life is the knowledge of divine things, which were not profitable to the simple understanding of Adam. Others have said that the tree of life is the kingdom of heaven and the joy of the world to come; and others that the tree of life was a tree in very truth, which was set in the middle of Paradise, but no man has ever found out what its fruit or its flowers or its nature was like.

BOOK OF THE BEE CHAPTER 16 Of The Sin Of Adam.

When God in His goodness had made Adam, He laid down a law for him, and commanded him not to eat of the tree of good and evil, which is the fig-tree. After Eve was created, Adam told her the story of the tree; and Satan heard it, and by his envy it became the occasion and cause of their being made to sin, and being expelled from Paradise, for it was by reason of him that Adam fell from the height of his glory. Some say that Satan heard when God commanded Adam not to eat of that tree. Others say that God commanded Adam in his mind, mentally (and not by sense); others again say, by sense and openly. And Satan saw that the serpent was more subtle than all four-footed beasts; and he played in him, as it were with pipes, in the hearing of Eve, like an instrument, and said to 'Ye shall not die, as God hath said to you, but ye shall be gods like God, knowers of good and evil.' Then Eve saw that the appearance of the fig-tree was beautiful, and that its smell was delightful; and she desired to eat of it and to become a goddess. So she stretched out her hand, and plucked, and ate, and gave also to her husband, and he likewise did eat. And they were stripped of the fair glory and glorious light of purity wherewith they were clothed, when they saw not each other's nakedness. And their eyes were opened, and they saw their nakedness; and they took leaves of the fig-tree, and covered their nakedness for shame, and hid themselves beneath thick trees. Then God called Adam and said to him. 'Where art thou, Adam?' -- not that He did not know where he was, but in a chiding manner--and Adam said, 'Lord, I heard Thy voice, and I hid myself because I am naked.' God said, 'Whence knowest thou that thou art naked? peradventure hast thou transgressed the law and command which I laid down for thee. and hast eaten of the tree of which I commanded thee not to eat?' Adam said, 'The woman whom thou gavest to be with me, she gave to me, and I did eat.' And God questioned Eve in like manner; and Eve said, 'The serpent beguiled me, and I did eat.' And God cursed the serpent, saying, 'Cursed art thou above all beasts upon the earth.' With the cursing of the serpent, who was the tool of Satan, Satan, who had instigated the serpent, was himself cursed; and immediately his legs were destroyed, and he crawled upon his belly, and instead of being an animal became a hissing reptile. And God set enmity between the serpent and man, saying, 'He shall smite the heel of man, but man shall crush his head, and the food of the serpent shall be dust.' God said to Eve, 'In pain shalt thou bring forth children;' and to Adam He said, 'Cursed is the ground for thy sake, and in toil and the sweat of thy face shalt thou eat thy bread; for dust thou art, and unto dust shalt thou return.' And the earth, by reason of the curse which it had received, straightway brought forth thorns and thistles. And God drove them out from Paradise at the ninth hour of the same day in which they were created.

BOOK OF THE BEE CHAPTER 17

Of The Expulsion Of Adam And Eve From Paradise. After God had expelled them from Paradise, like wicked servants driven forth from the inheritance of their master, and had cast them into exile, over the gate at the eastern side of Paradise He set a cherub with a sword and spear to frighten Adam from approaching Paradise. Some say that the cherub was one of the heavenly hosts, of the class of the Cherubim; and others say that he did not belong to the spiritual powers, but was a terrible form endowed with a body. So also the spear point and the sword were made of fire extended like a sharp sword, which went and came round about Paradise to terrify Adam and his wife. And God made for them garments of skin to cover their shame. Some say that they clothed themselves with the skins of animals, which they stripped off: but this is not credible, for all the beasts were created in couples, and Adam and Eve had as yet no knives to kill and flay them; hence it is clear that he means the bark of trees. Only the blessed Moses called the bark of trees 'skins,' because it fills the place of skins to trees. In the land of India there are trees whose bark is used for the clothing of kings and nobles and the wealthy, on account of its beauty. After God had expelled Adam and his wife from Paradise, He withheld from them the fruits of trees, and the use of bread and flesh and wine, and the anointing with oil; but they cooked grain and vegetables and the herbs of the earth, and did eat sparingly. Moreover, the four-footed beasts and fowl and reptiles rebelled against them, and some of them became enemies and adversaries unto them. They remained thus until Noah went forth from the ark, and then God allowed them to eat bread and to drink wine and to eat flesh, after they had slain the animal and poured out its blood. They say that when Adam and Eve were driven out of Paradise, Adam cut off a branch for a staff from the tree of good and evil; and it remained with him, and was handed down from generation to generation unto Moses and even to the Crucifixion of our Lord; and if the Lord will, we will relate its history in its proper place.

BOOK OF THE BEE CHAPTER 18 Of Adam's Knowing Eve.

When Adam and Eve went forth from Paradise, they were both virgins. After thirty years Adam knew Eve his wife, and she conceived and brought forth Cain together with his sister Kelemath at one birth. And after thirty years Eve conceived and brought forth Abel and Leboda his sister at one birth. And when they arrived at the age for marriage, Adam wished and intended to give Abel's sister to Cain and Cain's sister to Abel: but Cain desired his own sister more than Abel's. Both (i.e. Kelemath and Leboda) were his sisters, but because of their birth at one time I have called them thus. Now Cain's sister was exceedingly beautiful. The two brothers made an offering to God because of this matter. Abel, because he was a shepherd, offered up of the fat firstlings of his flock in great love, with a pure heart and a sincere mind. Cain, because he was a husbandman, made an offering of some of the refuse of the fruits of his husbandry with reluctance. He made an offering of ears of wheat that were smitten by blight; but some say of straw only. And the divine fire came down from heaven and consumed the offering of Abel, and it was accepted; while the offering of Cain was rejected. And Cain was angry with God, and envied his brother: and he persuaded his brother to come out into the plain, and slew him. Some say that he smashed his head with stones, and killed him; and others say that Satan appeared to him in the form of wild beasts that fight with one another and slay each other. At any rate, he killed him, whether this way or that way. Then God said to Cain, 'Where is Abel thy brother?' Cain said, 'Am I forsooth my brother's keeper?' God said, 'Behold, the sound of the cry of thy brother Abel's blood has come unto me;' and God cursed Cain, and made him a wanderer and a fugitive all the days of his life. From the day in which the blood of Abel was shed upon the ground, it did not again receive the blood of any animal until Noah came forth from the ark. Adam and Eve mourned for Abel one hundred years. In the two hundred and thirtieth year, Seth, the beautiful, was born in the likeness of Adam; and Adam and Eve were consoled by him, Cain and his descendants went down and dwelt in the plain, while Adam and his children, that is the sons of Seth, dwelt upon the top of the Mount of Eden, And the sons of Seth went down and saw the beauty of the daughters of Cain, and lay with them; and the earth was corrupted and polluted with lasciviousness: and Adam and Eve heard of it and mourned. Now Adam lived nine hundred and thirty years. Some say that in the days of Seth the knowledge of books went forth in the earth; but the Church does not accept this. When Seth was two hundred and fifty years old, he begat Enos; and Seth lived nine hundred and thirteen years, and he died. Enos was two hundred and ninety years old when he begat Cainan: and Enos first called upon the name of the Lord. Some say that he first composed books upon the course of the stars and the signs of the Zodiac. Enos lived nine hundred and five years. Cainan was a hundred and forty years old when he begat Mahalaleel; and he lived nine hundred and ten years. Mahalaleel was one hundred and sixty-five years old when he begat Jared; and he lived eight hundred and ninety-five years. Jared was one hundred and sixty-two years old when he begat Enoch; and he lived nine hundred and sixty-two years. Enoch was one hundred and sixty-five years old when he begat Methuselah; and when he was three hundred and sixty-five years old, God removed him to the generation of life, that is to Paradise.

Copyright © 2018 by Lord Henfield, Guildford Scientific Press **PAGE 3344**

Methuselah was one hundred and eighty-seven years old when he begat Lamech: and he lived nine hundred and sixty-nine years. Lamech was a hundred and eighty-two years old when he begat Noah; and he lived seven hundred and seventy-seven vears

BOOK OF THE BEE CHAPTER 19

Of The Invention Of The Instruments For Working In Iron. SOME say that Cainan and Tubal-cain, who were of the family of Cain, were the first who invented the three tools of the art of working in iron, the anvil, hammer and tongs. The art of working in iron is the mother and begetter of all arts; as the head is to the body, so is it to all other crafts. And as all the limbs of the body cease to perform their functions if the head is taken away from it, so also all other arts would cease if the art of working in iron were to come to an end. In the days of Tubal and Tubal-cain, the sons of Lamech the blind, Satan entered and dwelt in them, and they constructed all kinds of musical instruments, harps and pipes. Some say that spirits used to go into the reeds and disturb them, and that the sound from them was like the sound of singing and pipes; and men constructed all kinds of musical instruments. Now this blind Lamech was a hunter, and could shoot straight with a bow; his son used to take him by the hand, and guide him to places where there was game, and when he heard the movement of an animal, he shot an arrow at it, and brought it down. One day, when shooting an arrow at an animal, he smote Cain the murderer, the son of Adam, and slew him.

BOOK OF THE BEE CHAPTER 20

Of Noah And The Flood. When Noah was five hundred years old, he took a wife from the daughters of Seth; and there were born to him three sons, Shem, Ham and Japhet. And God saw Noah's uprightness and integrity, while all men were corrupted and polluted by lasciviousness: and He determined to remove the human race from this broad earth, and made this known to the blessed Noah, and commanded him to make an ark for the saving of himself, his sons, and the rest of the animals. Noah constructed this ark during the space of one hundred years, and he made it in three stories, all with boards and projecting ledges. Each board was a cubit long and a span broad. The length of the ark was three hundred cubits, its width fifty cubits, and its height thirty cubits. Noah made it of box wood, though some say of teak wood; and he pitched it within and without. At the end of the six hundredth year, God commanded Noah, with his wife, his sons and his daughtersin-law--eight souls--to go into the ark, and to take in with him seven couples of every clean animal and fowl, and one couple of every unclean animal, a male and a female. And he took bread and water in with him according to his need: not an abundant supply, lest they might be annoyed by the smell of the faeces, but they got food just sufficient to preserve their lives. God forewarned the blessed Noah of what he was about to do seven days beforehand, in case the people might remember their sins and offer the sacrifice of repentance. But those rebels mocked at him scoffingly, and thrust out their unclean lips at the sound of the saw and the adze. After seven days God commanded Noah to shut the door of the ark, and to plaster it over with bitumen. And the fountains of the deeps were broken up from beneath, and a torrent of rain (fell) from above, for forty days and forty nights, without cessation, until the waters rose fifteen cubits above the highest mountains in the world. And the waters bore up the ark, which travelled over them from east to west and from north to south, and so inscribed the figure of the cross upon the world; and it passed over the ocean, and came to this broad earth. So the rain was stayed, and the winds blew, and the waters remained upon the earth without diminishing one hundred and fifty days, besides those forty days; which, from the time that Noah entered the ark and the flood began until the waters began to diminish, make in all one hundred and ninety days, which are six months and ten days--even until the twentieth day of the latter Teshri. The waters began to diminish from the latter Teshri to the tenth month, on the first day of which the tops of the mountains appeared, but until the time when the earth was dry, and the dove found rest for the sole of her foot, was one hundred days. The ark rested upon the top of mount Kardo. In the tenth month, which is Shebat, Noah opened the door of the ark, and sent a raven to bring him news of the earth. And it went and found dead bodies, and it alighted upon them and returned not. For this reason people have made a proverb about Noah's raven. Again he sent forth a dove, but it found not a place whereon to alight, and returned to the ark. After seven days he sent forth another dove, and it returned to him in the evening carrying an olive leaf in its bill; and Noah knew that the waters had subsided. Noah remained in the ark a full year. and he came forth from it and offered up an offering of clean animals; and God accepted his offering and promised him that He would never again bring a flood upon the face of the earth, nor again destroy beasts and men by a flood; and He gave him (as) a token the bow in the clouds, and from that day the bow has appeared in the clouds; and He commanded him to slay

and eat the flesh of beasts and birds after he had poured out their blood. The number of people who came forth from the ark was eight souls, and they built the town of Themanon after the name of the eight souls, and it is to-day the seat of a bishopric in the province of Suba. Noah planted a vineyard, and drank of its wine; and one day when he slumbered, and was sunk in the deep sleep of drunkenness, his nakedness was uncovered within his tent. When Ham his son saw him, he laughed at him and despised him, and told his brethren Shem and Japhet. But Shem and Japhet took a cloak upon their shoulders, and walked backwards with their faces turned away, and threw the cloak over their father and covered him, and then they looked upon him. When Noah awoke and knew what had been done to him by the two sets of his sons, he cursed Canaan the son of Ham and said. 'Thou shalt be a servant to thy brethren;' but he blessed Shem and Japhet. The reason why he cursed Canaan, who was not as yet born nor had sinned, was because Ham had been saved with him in the ark from the waters of the flood, and had with his father received the divine blessing; and also because the arts of sin--I mean music and dancing and all other hateful things--were about to be revived by his posterity, for the art of music proceeded from the seed of Canaan. After the flood a son was born to Noah, and he called his name Jonaton; and he provided him with gifts and sent him to the fire of the sun, to the east. Noah lived after the flood three hundred and fifty years; the sum of his years was nine hundred and fifty years; and he saw eighteen generations and families before and after it. He died on the fourth day of the week, on the second of Nisan, at the second hour of the day; his son Shem embalmed him, and his sons buried him, and mourned over him forty days

BOOK OF THE BEE CHAPTER 21 Of Melchisedek.

Of Melchisedek.

Neither the father nor mother of this Melchisedek* were written down in the genealogies; not that he had no natural parents, but that they were not written down. The greater number of the doctors say that he was of the seed of Canaan, whom Noah cursed. In the book of Chronography, however, (the author) affirms and says that he was of the seed of Shem the son of Noah. Shem begat Arphaxar, Arphaxar begat Cainan, and Cainan begat Shalah and Malah, Shalah was written down in the genealogies; but Malah was not, because his affairs were not sufficiently important to be written down in the genealogies. When Noah died, he commanded Shem concerning the bones of Adam, for they were with them in the ark and were removed from the land of Eden to this earth Then Shem entered the ark, and sealed it with his father's seal. and said to his brethren, 'My father commanded me to go and see the sources of the rivers and the seas and the structure of the earth, and to return.' And he said to Malah the father of Melchisedek, and to Yozadak his mother, 'Give me your son that he may be with me, and behold, my wife and my children are with you.' Melchisedek's parents said to him. 'My lord, take thy servant; and may the angel of peace be with thee, and protect thee from wild beasts and desolation of the earth." Shem went by night into the ark, and took Adam's coffin; and he sealed up the ark, saying to his brethren, 'My father commanded me that no one should go into it.' And he journeyed by night with the angel before him, and Melchisedek with him, until they came and stood upon the spot where our Lord was crucified. When they had laid the coffin down there, the earth was rent in the form of a cross, and swallowed up the coffin, and was again sealed up and returned to its former condition. Shem laid his hand upon Melchisedek's head, and blessed him, and delivered to him the priesthood, and commanded him to dwell there until the end of his life. And he said to him, 'Thou shalt not drink wine nor any intoxicating liquor, neither shall a razor pass over thy head; thou shalt not offer up to God an offering of beasts, but only fine flour and olive oil and wine; thou shalt not build a house for thyself; and may the God of thy fathers be with thee.' And Shem returned to his brethren, and Melchisedek's parents said to him, 'Where is our son?' Shem said, 'He died while he was with me on the way, and I buried him;' and they mourned for him a month of days; but Melchisedek dwelt in that place until he died. When he was old, the kings of the earth heard his fame, and eleven of them gathered together and came to see him; and they entreated him to go with them, but he would not be persuaded. And when he did not conform to their wishes, they built a city for him there, and he called it Jerusalem; and the kings said to one another, 'This is the king of all the earth, and the father of nations.' When Abraham came back from the battle of the kings and the nations, he passed by the mount of Jerusalem; and Melchisedek came forth to meet him, and Abraham made obeisance to Melchisedek, and gave him tithes of all that he had with him. And Melchisedek embraced him and blessed him, and gave him bread and wine from that which he was wont to offer up as an offering.

('Footnote: 'And Melchisedek was honoured by them all, and was called "Father of Kings." Because of that which the Apostle spake, "His days had no beginning, and his life no end," simple folk have imagined that he was not a man at all, and in their error have said of him that he was God. Far from it, that his days had no beginning and his life no end. For when Shem the son of Noah took him away from his parents, not a word was said how old he was when he went up from the east, nor in how many years his departure from this world took place; because he was the son of Malakh, the son of Arphaxar, the son of Shem, and not the son of one of the patriarchs: for the Apostle has said that no one of his father's family ministered at the altar, and the name of his father is not written down in the genealogies, because Matthew and Luke the Evangelists wrote down the names of the patriarchs only, and hence neither the name of his father nor that of his mother are known. The Apostle then did not say that he had no parents, but only that they were not written down by Matthew and Luke in the genealogies.' Bezold, Die Schatzhöhle, p. 36; Brit. Mus. Add. 25,875, fol. 26 b, col. 1, line 22 to fol. 27 a, col. 1, line 5. In A, on fol. 39 a, a marginal note says: 'Know, O my brother readers, that in the manuscript belonging to the priest Makbal I have seen that Melchisedek's father was called Harkleim, and his mother Shelatheil (Salathiel).')

BOOK OF THE BEE CHAPTER 22 Of The Generations Of Noah.

The children of Shem. The people of Shem are twenty and seven families. Elam, from whom sprang the Elamites; Asshur, from whom sprang the Assyrians (Athoraye); Arphaxar. from whom sprang the Persians: and Lud (Lod) and Aram, from whom sprang the Arameans, the Damascenes, and the Harranites. Now the father of all the children of Eber was Arphaxar. Shalah begat Eber (Abar), and to Eber were born two sons; the name of the one of whom was Peleg (Palag), because in his days the earth was divided. From this it is known that the Syriac language remained with Eber, because, when the languages were confounded and the earth was divided, he was born, and was called Peleg by the Syriac word which existed in his time. After Peleg, Joktan (Yaktan) was born, from whom sprang the thirteen nations who dwelt beside one another and kept the Syriac language. And their dwelling was from Menashshe (or Mansha) of mount Sepharvaïm, by the side of the land of Canaan, and towards the east, beginning at Aram and Damascus, and coming to Baishan [Maishan ?] and Elam, and their border (was) Assyria, and the east, and Persia to the south, and the Great Sea. Now the Hebrew has Maishan instead of Menashshe (or Mansha), in the verse, 'The children of Joktan dwelt from Maishan to Sepharvaïm

The children of Ham. The people of Ham are thirty and six families, besides the Philistines and Cappadocians. Cush, from whom sprang the Cushites; Misraim, from whom sprang the Misraye (or Egyptians); Phut (or Pot), from whom sprang the Potaye; Canaan, from whom sprang the Canaanites; the seven kings whom Joshua the son of Nun destroyed; the children of Obar. Sheba and Havila, from whom sprang the Indians, the Amorites, the Samraye, the Metraye, and all the dwellers of the south. And of Cush was born Nimrod, who was the first king after the flood. The beginning of his kingdom was Babel (Babylon), which he built, and in which he reigned; and then, after the division of tongues, he built the following cities: Arach (Erech), which is Orhai (Edessa), Achar (Accad), which is Nisibis, and Calva (Calneh), which is Ctesiphon. The land of Babel he called the land of Shinar, because in it were the languages confounded, for 'Shinar' in the Hebrew language is interpreted 'division.' From that land the Assyrian went forth and built Nineveh and the town of Rehoboth, which is the town of Arbel (Irbil). It is said that Belus, the son of Nimrod, was the first to depart from Babel and to come to Assyria; and after Belus, his son Ninus built Nineveh, and called it after his name, and Arbel and Calah, which is Hetre (Hatra), and Resen, which is Resh-aina (Rasain). Misraim begat Ludim, from whom sprang the Lodaye; Labim, from whom sprang the Lubaye; Lahbim, from whom sprang the Tebtaye; Yaphtuhim, Pathrusim, and Casluhim, from whom went forth the Philistines, the Gedrave (Gadarenes), and the people of Sodom. Canaan begat Sidon his firstborn, from whom sprang the Soraye (Tyrians) and Sidonians, ten nations who dwelt by the side of Israel, from the sea (i.e. the Mediterranean) to the Euphrates; the Kishaye, the Kenraye (or Kiraye), and the Akdemonaye (or Kadmonaye), who were between the children of Esau and Amna of Ireth. The children of Lot are children of Ham.

The children of Japhet. The people of Japhet are fifteen families. Gomer, from whom sprang the Geothaye (Gothaye, Goths ?); Magog, from whom sprang the Galatians; Madai, from whom sprang the Medes; Javan, from whom sprang the Yaunaye (Greeks); Tubil (Tubal), from whom sprang the Baithonaye (Bithynians); Meshech, from whom sprang the Musaye (Mysians); Tiras, from whom sprang the Tharnekaye (or Threkaye, Thracians), the Anshklaye (or Asklaye), and the Achshklaye. The children of Gomer: Ashkenaz, from whom sprang the Armenians; Danphar, from whom sprang the Asaye (Asians) and the Isauraye (Isaurians). The sons of Javan: Elisha, that is Halles (Hellas); Tarshish, Cilicia, Cyprus, Kathim (Kittim), Doranim, and the Macedonians; and from these they were divided among the islands of the nations. These are the families of the children of Noah, and from them were the nations divided on the earth after the flood; they are seventy and two families, and according to the families, so are the languages.

BOOK OF THE BEE CHAPTER 23

Of The Succession Of Generations From The Flood Until Now.

Shem was a hundred years old, and begat Arphaxar two years after the flood; the sum of his years was six hundred. Arphaxar was a hundred and thirty-five years old, and begat Kainan. Kainan was a hundred and thirty-nine years old, and begat Shalah: the sum of his years was four hundred and thirty-eight. Shalah was a hundred and thirty years old, and begat Eber; the sum of his years was four hundred and thirtythree. Eber was a hundred and thirty-four years old, and begat Peleg; the sum of his years was four hundred and sixtyfour. Peleg was a hundred and thirty years old, and begat Reu; the sum of his years was a hundred and thirty-nine. In the days of Reu the languages were divided into seventy and two; up to this time there was only one language*, which was the parent of them all, namely, Aramean, that is Syriac. Reu was a hundred and thirty-two years old, and begat Serug; the sum of his years was a hundred and thirty-nine. Serug was a hundred and thirty years old, and begat Nahor; the sum of his years was a hundred and thirty years. In the days of Serug men worshipped idols and graven images. Nahor was seventy and nine years old, and begat Terah; the sum of his years was one hundred and forty-eight. In the days of Nahor magic began in the world. And God opened the storehouse of the winds and whirlwinds, and they uprooted the idols and graven images, and they collected them together and buried them under the earth, and they reared over them these mounds that are in the world. This was called 'the Wind Flood.' Terah was seventy years old, and begat Abraham; the sum of his years was one hundred and five years. So it is two thousand two hundred and forty-two years from Adam to the flood; and one thousand and eighty-one years from the flood to the birth of Abraham: and from Adam to Abraham it is three thousand three hundred and thirteen years. And know, my brother readers, that there is a great difference between the computation of Ptolemy and that of the Hebrews and the Samaritans; for the Jews take away one hundred years from the beginning of the years of each (patriarch), and they add them to the end of the years of each of them, that they may disturb the reckoning and lead men astray and falsify the coming of Christ, and may say, 'The Messiah is to come at the end of the world, and in the last times;' and behold, according to their account, He came in the fourth millenium, for so it comes out by their reckoning.

(*Footnote: 'From Adam until that time they all spoke this language, that is to say Syriac, which is Aramean; for this language is the king of all languages. The early writers have erred, in that they say that Hebrew was the primitive language; and here have they mingled ignorant error with their writings. For all the tongues that are in the world are taken from Syriac, and all the languages in books are mixed with it.' Bezold, Die Schatzhöhle, p. 21; Brit. Mus. Add. 25,875, fol. 22 a, col. 1.)

BOOK OF THE BEE CHAPTER 24

Of The Building Of The Tower And The Division Of Tongues.

When Reu was born in the days of Peleg, the sons of Noah, Shem, Ham, and Japhet, together with Arphaxar and their children, were gathered together in Shinar. And they took counsel together, saying, 'Come, let us build for ourselves a high tower, the top of which shall be in the heavens, lest a flood come again upon us, and destroy us from off the face of the earth.' And they began to make bricks and to build, until (the tower) was reared a great height from the ground. Then they determined to build seventy-two other towers around it, and to set up a chief over each tower to govern those who were under his authority. God saw the weariness of their oppression and the hardness of their toil, and in His mercy had compassion upon them; for the higher they went, the more severe became their labour, and their pain went on increasing, by reason of the violence of the winds and storms and the heat of the luminaries and the necessity of carrying up everything they needed. And God said, 'Come, let us go down and divide the tongues there.' The expression 'Come, let us,' resembles 'Come, let us make man in our image and in our likeness,' and refers to the persons of the adorable Trinity. While they were tormenting themselves with that vain labour, their language was suddenly confounded so as to become seventy-two languages, and they understood not each other's speech, and were scattered throughout the whole world, and built cities, every man with his fellow who spoke the same language. From Adam to the building of the tower, there was only one language, and that was Syriac. Some have said that it was Hebrew: but the Hebrews were not called by this name until after Abraham had crossed the river Euphrates and dwelt in Harran; and from his crossing they were called Hebrews. It was grievous to Peleg that the tongues were confounded (or, that God had confounded the tongues of mankind) in his days, and he died; and his sons Serug and Nahor buried him in the town of Palgin, which he built after his name.

BOOK OF THE BEE CHAPTER 25 Of Abraham.

Terah the father of Abraham took two wives; the one called Yona, by whom he begat Abraham; the other called Shelmath, by whom he begat Sarah. Mar Theodore says that Sarah was the daughter of Abraham's uncle, and puts the uncle in the place of the father. When Abraham was seventy-five years old. God commanded him to cross the river Euphrates and to dwell in Harran. And he took Sarah his wife and Lot his nephew, and crossed the river Euphrates and dwelt in Harran. In his eighty-sixth year his son Ishmael was born to him of Hagar the Egyptian woman, the handmaid of Sarah, whom Pharaoh the king gave to her when he restored her to Abraham; and God was revealed to him under the oak of Mamre. Abraham was a hundred years old when Isaac, the son of promise, was born to him; and on the eighth day he circumcised himself, his son, and every one born in his house. When God commanded Abraham to offer up Isaac upon the altar, He sent him for sacrifice to the special place where, according to the tradition of those worthy of belief, our Lord was crucified. After the death of Sarah. Abraham took to wife Kentorah (Keturah), the daughter of Yaktan, the king of the Turks. When Isaac was forty years old, Eliezer the Damascene, the servant of Abraham, went down to the town of Arach (Erech), and betrothed Raphka (Rebecca), the daughter of Bethuel the Aramean, to Isaac his lord's son. And Abraham died at the age of one hundred and seventy-five years, and was laid by the side of Sarah his wife in the 'double cave,' which he bought from Ephron the Hittite; When Isaac was sixty years old, there were born unto him twin sons, Jacob and Esau: At that time Arbel was built; some say that the king who built it was called Arbol. In Isaac's sixty-sixth year Jericho was built. Esau begat Reuel; Reuel begat Zerah; Zerah begat Jobab, that is Job.

BOOK OF THE BEE CHAPTER 26 Of The Temptation Of Job.

There was a man in the land of Uz whose name was Job. And he was a perfect, righteous and God-fearing man; and there were born unto him seven sons and three daughters. The number of his possessions was seven thousand sheep, three thousand camels, five hundred yoke of oxen, five hundred sheasses, and a very large train of servants. This man was the greatest of all the children of the east. His children used to go and make a feast; and the day came that his sons and his daughters were eating and drinking in the house of their eldest brother. There came a messenger to Job and said to him, 'The oxen were drawing the ploughs, and the she-asses were feeding by their side, when robbers fell upon them and carried them off, and the young men were slain by the sword; and I alone have escaped to tell thee.' While he was yet speaking, there came another and said to him, 'The fire of God fell from heaven and consumed the sheep and the shepherds, and burnt them up; and I alone have escaped to tell thee.' While he was yet speaking, there came another and said to him, 'The Chaldeans divided themselves into three bands and fell upon the camels and carried them off, and slew the young men; and I alone have escaped to tell thee.' While he was yet speaking, there came another and said to him, 'Thy sons and thy daughters were eating and drinking in the house of their eldest brother, when there came a mighty wind and beat upon the corners of the house, and it fell upon the young people and they are dead; and I alone have escaped to tell thee.' Then Job stood up and rent his garment, and shaved his head; and he fell upon the ground and prostrated himself, saying, 'Naked came I out of my mother's womb, and naked shall I return; the Lord gave, and the Lord hath taken away; blessed be the name of the Lord.' In all this did Job sin not, neither did he blaspheme God. And Satan smote Job with a grievous sore from the sole of his foot to his head (lit. brain); and Job took a potsherd to scrape himself with, and sat upon ashes. His wife says to him, 'Dost thou still hold fast by thy integrity? curse God and die.' Job says to her, 'Thou speakest as one of the foolish women speaketh: we have received the good things of God; shall we not receive His evil things?' In all this did Job sin not, neither did he blaspheme God with his lips. Job's three friends heard of this evil which had come upon him, and they came to him, every man from his own land, to comfort him; and their names were these: Eliphaz the Temanite, Bildad the Shuhite, and Zophar the Naamathite. When they were come, they lifted up their eyes from afar off, and they did not know him. And they lifted up their voice and wept, and each man rent his garment, and they strewed dust upon their heads towards heaven; and they sat with him upon the ground seven days and seven nights, and none spake a word, for they saw that his blow was very sore. And when he held fast by his

God, He blessed him, and gave him seven sons and three daughters; and there were not found in the whole land women more beautiful than Job's daughters, and their names were Jemima, Keren-happuch, and Kezia. And God gave him fourteen thousand sheep, six thousand camels and a thousand yoke of oxen; and Job lived one hundred and forty years after his temptation, and died in peace.

BOOK OF THE BEE CHAPTER 27

Of The Blessings Of Isaac.

Jacob was seventy-seven years old when his father Isaac blessed him; and he stole the blessings and birthright from his brother Esau, and fled from before his brother to Harran. On the first night Jacob saw a ladder reaching from earth to heaven, with angels ascending and descending, and the Power of God upon the top thereof. And he woke and said, 'This is the house of the Lord.' He took the stone that was under his head, and set it up for an altar; and he vowed a vow to God. Now the ladder was a type of Christ's crucifixion; the angels that were ascending and descending were a type of the angels who announced the glad tidings to the shepherds on the day of our Saviour's birth. The Power of God which was upon the top of the ladder was (a type of) the manifestation of God the Word in pure flesh of the formation of Adam. The place in which the vision appeared was a type of the church; the stone under his head, which he set up for an altar, was a type of the altar; and the oil which he poured out upon it was like the holv oil wherewith they anoint the altar.

And Jacob went to Laban the Aramean, his mother's brother, and served before him as a shepherd for fourteen years. And he took his two daughters to wife; Leah with her handmaid Zilpah, and Rachel with her handmaid Bilhah. Now he loved Rachel more than Leah, because she was the younger and was fair in aspect, while Leah had watery eyes. There were born to Jacob by Leah six sons: Rubil (Reuben), which is interpreted 'Great is God' (now Jacob was eightyfour years old at that time); Simeon, which is interpreted 'the Obedient;' Levi, that is 'the Perfect;' Judah, that is 'Praise;' Issachar, that is 'Hope is near;' and Zebulun, that is 'Gift' or 'Dwelling-place.' Two sons were born to him by Rachel: Joseph, that is 'Addition;' and Benjamin, that is 'Consolation.' By Zilpah two sons were born to him: Gad, that is 'Luck;' and Asher, that is 'Praise.' By Bilhah two sons were born to him: Dan, that is 'Judgement;' and Naphtali, that is 'Heartener;' and one daughter, whose name was Dinah. After twenty years Jacob returned to Isaac; and Isaac lived one hundred and eighty years. Twenty-three years after Jacob went up to his father, Joseph was sold by his brethren to the Midianites for twenty dinars. When Isaac died, Jacob was one hundred and twenty years old.

BOOK OF THE BEE CHAPTER 28 Of Joseph.

After Jacob's sons had been born to him by Leah, then Joseph and Benjamin were born to him (by Rachel); and he loved Joseph more than all his children, because he was the child of (his) old age, and because of his beauty and purity, and his being left motherless. He made him a garment with long sleeves, and his brethren envied him. And he dreamed dreams twice, and their hatred increased, and they kept anger in their hearts against him. They sold him to the Midianites, who carried him to Egypt, and sold him to Potiphar, the chief of the guards; and Potiphar delivered his house and servants into his hands; but because of the wantonness of Potiphar's wife, he was bound and kept in prison for two years. When the chief cup-bearer and the chief baker dreamed dreams in one night, and Joseph interpreted them, his words actually came to pass. After Joseph had remained in bondage two years, Pharaoh the king of Egypt saw two dreams in one night; and he was troubled and disturbed, and the sorcerers and enchanters and wise men were unable to interpret his dreams. Then one of those who had been imprisoned with Joseph remembered (him), and they told Pharaoh; and Joseph interpreted his dreams, and Pharaoh made him king over Egypt. And Joseph gathered together and collected the corn of the seven prosperous years, and saved it for the seven years of famine. When the household of Jacob lacked bread, Jacob sent his sons to Egypt to buy corn, and they met Joseph, and he recognised them, but they did not know him. After he had tortured them twice by his harsh words, he at last revealed himself to them, and shewed himself to his brethren. And he sent and brought his father Jacob and all his family--seventyfive souls in number, and they came down and dwelt in the land of Egypt two hundred and thirty years. Concerning that which God spake to Abraham, 'Thy seed shall be a sojourner in a strange land four hundred and thirty years;' they were under subjection in their thoughts from the time that God spake to Abraham until they went forth from Egypt. Jacob died in Egypt and he commanded that he should be buried with his fathers; and they carried him and buried him by the side of his fathers in the land of Palestine. After Joseph died, another king arose, who knew not Joseph, and he oppressed the children of Israel with heavy labour in clay; at that time Moses was born in Egypt. Since many have written the history

of the blessed Joseph at great length, and the blessed Mar Ephraim has written his history in twelve discourses, concerning everything which happened to him from his childhood to his death, as well as another discourse upon the carrying up of his bones (to Palestine), we refrain from writing a long account of him, that we may not depart from the plan which we laid down in making this collection.

BOOK OF THE BEE CHAPTER 29

Of Moses And The Children Of Israel.

After Joseph was dead, and another king had arisen who knew not the Israelitish people, the people increased and became strong in Egypt. And Pharaoh was afraid of them, and laid a burden upon them, and oppressed them with hard work in clay, and demanded a tale of bricks from them without giving them straw. At that time Moses the son of Amram, the son of Kohath, the son of Levi, was born. Levi was forty-six years old when he begat Kohath; Kohath was sixty-three years old when he begat Amram; and Amram was seventy years old when he begat Moses. When Moses was born, Pharaoh the king commanded to throw the new-born children of the Israelites into the river. Moses was beautiful in appearance, and he was called Pantil and Amlakya; and the Egyptians used to call him the Shakwitha of the daughter of Pharaoh. The name of Moses' mother was Yokabar (Jochebed). When the command of the king went forth for the drowning of the infants, she made a little ark covered with pitch, and laid the child in it; and she carried it and placed it in a shallow part of the waters of the river Nile (that is Gihon): and she sat down opposite (that is, at a distance), to see what would be the end of the child. And Shipor, the daughter of Pharaoh, came to bathe in the river--some say that she was called Tharmesis--and she saw the ark and commanded it to be fetched. When she opened it, and saw that the appearance of the child was beautiful and his complexion comely, she said, Verily this child is one of the Hebrews' children;' and she took him, and reared him up as her son. She sought a Hebrew nurse, and the mother of the child Moses came, and became a nurse to him; and he was reared in the house of Pharaoh until he was forty years old. One day he saw Pethkom* the Egyptian, one of the servants of Pharaoh, quarrelling with an Israelite and reviling him. Moses looked this way and that way, and saw no man; and zeal entered into him, and he slew the Egyptian and buried him in the sand. Two days after, he saw two Hebrews quarrelling with one another. And he said to them, 'Ye are brethren; why quarrel ye with one another?' And one of them thrust him away from him, saying, 'Dost thou peradventure seek to kill me as thou didst the Egyptian vesterday?' Then Moses feared lest Pharaoh should perceive (this) and slay him; and he fled to Midian, and sat by the well there. Now Reuel the Midianite had seven daughters, who used to come to that well and water their father's flocks; and the shepherds came and drove them away; and Moses arose and delivered them, and watered their flocks. When they went to their father, he said to them, 'Ye have come quickly to-day,' They said to him, 'An Egyptian rescued us from the hands of the shepherds, and watered the flocks also.' He said to them, 'Why did ye not bring him? Go quickly and call him hither to eat bread with us.' When Moses came to the house of Reuel and dwelt with him, Reuel loved him and gave him his daughter Zipporah the Cushite to wife. And he said to him. 'Go into the house, and take a shepherd's crook, and go feed thy flocks.' When Moses went into the house to take the rod, it drew near to him by divine agency; and he took it and went forth to feed his father-in-law's flocks.

(*Footnote: 'And he was in the house of Pharaoh forty years, and then he slew Pethkom the Egyptian, the chief baker of Pharaoh. When this was heard in the house of Pharaoh, after Makri the daughter of Pharaoh--who was called the "Trumpet of Egypt," and who reared up Moses--was dead, he feared, 'etc. See Bezold, Die Schatzhöhle, p, 42; Brit. Mus. Add. 25,875, fol. 30 a, col. 2.)

BOOK OF THE BEE CHAPTER 30

The History Of Moses' Rod.

When Adam and Eve went forth from Paradise, Adam, as if knowing that he was never to return to his place, cut off a branch from the tree of good and evil--which is the fig-tree-and took it with him and went forth; and it served him as a staff all the days of his life. After the death of Adam, his son Seth took it, for there were no weapons as yet at that time. This rod was passed on from hand to hand unto Noah. and from Noah to Shem; and it was handed down from Shem to Abraham as a blessed thing from the Paradise of God. With this rod Abraham broke the images and graven idols which his father made, and therefore God said to him, 'Get thee out of thy father's house,' etc. It was in his hand in every country as far as Egypt, and from Egypt to Palestine. Afterwards Isaac took it and (it was handed down) from Isaac to Jacob: with it he fed the flocks of Laban the Aramean in Paddan Aram. After Jacob Judah his fourth son took it; and this is the rod which Judah gave to Tamar his daughter-in-law, with his signet ring and his napkin, as the hire for what he had done. From him (it came) to Pharez. At that time there were wars

everywhere, and an angel took the rod, and laid it in the Cave of Treasures in the mount of Moab, until Midian was built. There was in Midian a man, upright and righteous before God, whose name was Yathro (Jethro). When he was feeding his flock on the mountain, he found the cave and took the rod by divine agency; and with it he fed his sheep until his old age. When he gave his daughter to Moses, he said to him, 'Go in, my son, take the rod, and go forth to thy flock.' When Moses had set his foot upon the threshold of the door, an angel moved the rod, and it came out of its own free will towards Moses. And Moses took the rod, and it was with him until God spake with him on mount Sinai. When God said to him, 'Cast the rod upon the ground,' he did so, and it became a great serpent; and the Lord said, 'Take it,' and he did so, and it became a rod as at first. This is the rod which God gave him for a help and a deliverance; that it might be a wonder, and that with it he might deliver Israel from the oppression of the Egyptians. By the will of the living God this rod became a serpent in Egypt. By it God spake to Moses; and it swallowed up the rod of Posdi the sorceress of the Egyptians. With it Moses smote the sea of Soph in its length and breadth, and the depths congealed in the heart of the sea. It was in Moses' hands in the wilderness of Ashimon, and with it he smote the stony rock, and the waters flowed forth. Then God gave serpents power over the children of Israel to destroy them, because they had angered Him at the waters of strife. And Moses prayed before the Lord, and God said to him, 'Make thee a brazen serpent, and lift it up with the rod, and let the children of Israel look upon it and be healed.' Moses did as the Lord had commanded him, and he placed the brazen serpent in the sight of all the children of Israel in the wilderness; and they looked upon it and were healed. After all the children of Israel were dead, save Joshua the son of Nun and Caleb the son of Yophanna (Jephunneh), they went into the promised land, and took the rod with them, on account of the wars with the Philistines and Amalekites. And Phineas hid the rod in the desert, in the dust at the gate of Jerusalem, where it remained until our Lord Christ was born. And He, by the will of His divinity, shewed the rod to Joseph the husband of Mary, and it was in his hand when he fled to Egypt with our Lord and Mary, until he returned to Nazareth. From Joseph his son Jacob, who was surnamed the brother of our Lord, took it; and from Jacob Judas Iscariot, who was a thief, stole it. When the Jews crucified our Lord, they lacked wood for the arms of our Lord; and Judas in his wickedness gave them the rod, which became a judgement and a fall unto them, but an uprising unto many. There were born to Moses two sons; the one called Gershom, which is interpreted 'sojourner:' and the other Eliezer, which is interpreted 'God hath helped me. Fifty-two years after the birth of Moses, Joshua the son of Nun was born in Egypt. When Moses was eighty years old, God spake with him upon mount Sinai. And the cry of the children of Israel went up to God by reason of the severity of the oppression of the Egyptians; and God heard their groaning, and remembered His covenants with the fathers. Abraham, Isaac and Jacob, to whom He promised that in their seed should all nations be blessed. One day when Moses was feeding the flock of Jethro his father-in-law, the priest of Midian, he and the sheep went from the wilderness to mount Horeb, the mount of God; and the angel of the Lord appeared to him in a flame of fire in a bush, but the bush was not burnt. Moses said. 'I will turn aside and see this wonderful thing. how it is that the fire blazes in the bush, but the bush is not burnt.' God saw that he turned aside to look, and He called to him from within the bush, and said, 'Moses, Moses.' Moses said, 'Here am I, Lord.' God said to him, 'Approach not hither, for the place upon which thou standest is holy.' And God said to him, 'I am the God of Abraham, the God of Isaac, the God of Jacob;' and Moses covered his face, for he was afraid to look at Him. Some say that when God spake with Moses, Moses stammered through fear. And the Lord said to him, 'I have seen the oppression of My people in Egypt, and have heard the voice of their cry, and I am come down to deliver them from the Egyptians, and to carry them up from that land to the land flowing with milk and honey; come, I will send thee to Egypt.' Moses said, 'Who am I, Lord, that I should go to Pharaoh, and bring out those of the house of Israel from Egypt?' God said to him, 'I will be with thee.' Moses said to the Lord, 'If they shall say unto me, What is the Lord's name? what shall I say unto them?' God said (in Hebrew): AeHøYeH AaSheR AeHøYeH, that is, the Being who is the God of your fathers hath sent me to you. This is My name for ever, and this is My memorial to all generations. God said to Moses, 'Go, tell Pharaoh everything I say to thee. Moses said to the Lord, 'My tongue is heavy and stammers; how will Pharaoh accept my word?' God said to Moses, 'Behold, I have made thee a god to Pharaoh, and thy brother Aaron a phophet before thee; speak thou with Aaron, and Aaron shall speak with Pharaoh, and he shall send away the children of Israel that they may serve Me. And I will harden the heart of Pharaoh, and I will work My wonders in the land of Egypt, and will bring up My people the children of Israel from thence, and the Egyptians shall know that I am God."

And Moses and Aaron did everything that God had

commanded them. Moses was eighty-three years old when God sent him to Egypt. And God said to him. 'If Pharaoh shall seek a sign from thee, cast thy rod upon the ground, and it shall become a serpent.' Moses and Aaron came to Pharaoh, and threw down Moses' rod, and it became a serpent. The sorcerers of Egypt did the same, but Moses' rod swallowed up those of the sorcerers; and the heart of Pharaoh was hardened. and he did not send away the people. And God wrought ten signs by the hands of Moses: first, turning the waters into blood; second, bringing up frogs upon them; third, domination of the gnats; fourth, noisome creatures of all kinds; fifth, the pestilence among the cattle; sixth, the plague of boils; seventh, the coming of hail-stones; eighth, the creation of locusts; ninth, the descent of darkness; tenth, the death of the firstborn. When God wished to slav the first-born of Egypt, He said to Moses, 'This day shall be to you the first of months, that is to say, Nisan and the new year. On the tenth of this month, let every man take a lamb for his house, and a lamb for the house of his father; and if they be too few in number (for a whole lamb), let him and his neighbour who is near him share it. Let the lamb be kept until the fourteenth day of this month, and let all the children of Israel slav it at sunset, and let them sprinkle its blood upon the thresholds of their houses with the sign of the cross. This blood shall be to you a sign of deliverance, and I will see (it) and rejoice in you, and Death the destroyer shall no more have dominion over vou:' and Moses and Aaron told the children of Israel all these things. And the Lord commanded them not to go out from their houses until morning: 'for the Lord will pass over the Egyptians to smite their firstborn, and will see the blood upon the thresholds, and will not allow the destroyer to enter their houses.' When it was midnight, the Lord slew the firstborn of the Egyptians, from the firstborn of Pharaoh sitting upon his throne down to the last. And Pharaoh sent to Moses and Aaron, saying, 'Depart from among my people, and go, serve the Lord, as ve have said; and take your goods and chattels with you.' The Egyptians also urged the children of Israel to go forth from among them, through fear of death; and the children of Israel asked chains of gold and silver and costly clothing of the Egyptians, and spoiled them; and the Lord gave them favour in the sight of the Egyptians. The children of Israel set out from Raamses to Succoth, six hundred thousand men; and when they entered Egypt in the days of Joseph, they were seventy-five souls in number. They remained in bodily and spiritual subjection four hundred and thirty years; from the day that God said to Abraham, 'Thy seed shall be a sojourner in the land of Egypt,' from that hour they were oppressed in their minds. When the people had gone out of Egypt on the condition that they should return, and did not return, Pharaoh pursued after them to bring them back to his slavery. And they said to Moses, 'Why hast thou brought us out from Egypt? It was better for us to serve the Egyptians as slaves, and not to die here.' Moses said, 'Fear not, but see the deliverance which God will work for you to-day. And the Lord said to Moses, 'Lift up thy rod and smite the sea, that the children of Israel may pass over as upon dry land. And Moses smote the sea, and it was divided on this side and on that; and the children of Israel passed through the depth of the sea as upon dry land. When Pharaoh and his hosts came in after them, Moses brought his rod back over the sea, and the waters returned to their place; and all the Egyptians were drowned. And Moses bade the children of Israel to sing praises with the song 'Then sang Moses and the children of İsrael' (Exod. xv.).

The children of Israel marched through the wilderness three days, and came to the place called Murrath (Marah) from the bitterness of its waters; and the people were unable to drink that water. And they lifted up their voice and murmured against Moses, saying, 'What shall we drink?' Moses prayed before God, and took absinth-wood, which is bitter in its nature, and threw it into the water, and it was made sweet. There did the Lord teach them laws and judgements. And they set out from thence, and on the fifteenth of the second month, which is Iyar, came to a place in which there were twelve wells and seventy palm-trees. Dad-Isho says in his exposition of Paradise that the sorcerers Jannes and Jambres, who once opposed Moses, lived there. There was a well in that place, and over it was a bucket and brass chain; and devils dwelt there, because that place resembled Paradise. The blessed Makaris (Macarius) visited that spot, but was unable to live there because of the wickedness of those demons; but that they might not boast over the human race, as if forsooth no one was able to live there, God commanded two anchorites, whose names no man knoweth, and they dwelt there until they died. When the children of Israel saw that wilderness, they murmured against Moses, saying, 'It were better for us to have died in Egypt, being satisfied with bread, than to come forth into this arid desert for this people to perish by hunger.' And God said to Moses, 'Behold, I will bring manna down from heaven for you; a cloud shall shade you by day from the heat of the sun, and a pillar of fire shall give light before you by night.' God said to Moses, 'Go up into this mountain, thou, and Aaron thy brother, and Nadab, and seventy chosen elders of the children of Israel, and let them worship from afar; and

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3347

let Moses come near to Me by himself.' And they did as the Lord commanded them, and Moses drew near by himself, and the rest of the elders remained below at the foot of the mountain; and God gave him commandments. And Moses made known to the people the words of the Lord; and all the people answered with one voice and said, 'Everything that the Lord commands us we will do.' Moses took blood with a hyssop, and sprinkled it upon the people, saying to them, This is the blood of the covenant,' and so forth. And God said to Moses, 'Say unto the children of Israel that they set apart for Me gold and silver and brass and purple,' and the rest of the things which are mentioned in the Torah, 'and let them make a tabernacle for Me.' God also shewed the construction thereof to Moses, saying, 'Let Aaron and his sons be priests to Me, and let them serve My altar and sanctuary.' God wrote ten commandments on two tables of stone, and these are they. Thou shalt not make to thyself an image or a likeness; thou shalt not falsify thy oaths; keep the day of the Sabbath; honour thy father and thy mother; thou shalt not do murder; thou shalt not commit adultery; thou shalt not steal; thou shalt not bear false witness; thou shalt not covet thy neighbour's or brother's house; thou shalt not covet the wife of thy kinsman or neighbour, nor his servants, nor his handmaidens. When the children of Israel saw that Moses tarried on the mountain, they gathered together to Aaron and said to him, 'Arise, make us a god to go before us, for we know not what has become of thy brother Moses.' Aaron said to them, 'Bring me the earrings that are in the ears of your wives and children.' When they had brought them to him, he cast a calf from them, and said to the people, 'This is thy god, O Israel, who brought thee out of Egypt;' and they built an altar, and the children of Israel offered up sacrifice upon it. God said to Moses, 'Get thee down to the people, for they have become corrupt.' And Moses returned to the people, and in his hands were the two tablets of stone, upon which the ten commandments were written by the finger of God. When Moses saw that the people had erred, he was angry and smote the tablets upon the side of the mountain and brake them. And Moses brought the calf, and filed it with a file, and threw it into the fire, and cast its ashes into water; and he commanded the children of Israel to drink of that water. And Moses reproached Aaron for his deeds, but Aaron said, 'Thou knowest that the people is stiffnecked.' Then Moses said to the children of Levi, 'The Lord commands you that each man should slay his brother and his neighbour of those who have wrought iniquity;' and there were slain on that day three thousand men. And Moses went up to the mountain a second time and there were with him two tables of stone instead of those which he brake. He remained on the mountain and fasted another forty days, praying and supplicating God to pardon the iniquity of the people. When he came down from the mountain with the other two tablets upon which the commandments were written, the skin of his face shone, and the children of Israel were unable to look upon his countenance by reason of the radiance and light with which it was suffused; and they were afraid of him. When he came to the people, he covered his face with a napkin; and when he spake with God, he uncovered his face. And Moses said to Hur, the son of his father-in-law Reuel the Midianite, 'We will go to the land which God promised to give us; come with us, and we will do thee good;' but he would not, and returned to Midian. So the children of Israel went along the road to prepare a dwelling-place for themselves; and they lifted up their voice with a cry; and God heard and was angry, and fire went round about them and burnt up the parts round about their camps. They said to Moses, 'Our soul languishes in this wilderness, and we remember the meats of Egypt; the fishes and the cucumbers and the melons and the onions and the leeks and the garlic; and now we have nought save this manna which is before us.' Now the appearance of manna was like that of coriander seed, and they ground it, and made flat cakes of it; and its taste was like bread with oil in it. And the Lord heard the voice of the people weeping each one at the door of his tent, and it was grievous to Him. Moses prayed before the Lord and said, 'Why have I not found favour before Thee? and why hast Thou cast the weight of this people upon me? Did I beget them? Either slay me or let me find favour in Thy sight.' God said to Moses, 'Choose from the elders of the children of Israel seventy men, and gather them together to the tabernacle, and I will come down and speak with thee. And I will take of the spirit and power which is with thee and will lay it upon them, and they shall bear the burden of the people with thee, and thou shalt not bear it by thyself alone;' and Moses told them. Moses gathered together seventy elders from the children of Israel, and the Lord came down in a cloud, and spake with them; and he took of the spirit and power which was with Moses and laid it upon them, and they prophesied. But two elders of the seventy whose names were written down remained in the camp and did not come; the name of the one was Eldad, and that of the other Medad; and they also prophesied in the tabernacle. A young man came and told Moses, and Joshua the son of Nun, the disciple of Moses, said to him, 'My lord, restrain them.' Moses said, 'Be not

jealous; would that all the children of Israel were prophets; for the Spirit of God hath come upon them.'

And Moses said to the children of Israel, 'Because ye have wept and have asked for flesh, behold the Lord will give you flesh to eat; not one day, nor two, nor five, nor ten, but a month of days shall ye eat, until it goeth out of your nostrils, and becometh nauseous to you.' Moses said (to the Lord), 'This people among whom I am is six hundred thousand men and hast Thou promised to feed them with flesh for a month of days? If we slay sheep and oxen, it would not suffice for them; and if we collect for them (all) the fish that are in the sea, they would not satisfy them.' And the Lord said to Moses, 'The hand of the Lord shall bring (this) to pass, and behold, thou shalt see whether this happens or not.' By the command of God a wind blew and brought out quails from the sea, and they were gathered around the camp of the children of Israel about a day's journey on all sides; and they were piled upon one another to the depth of two cubits. Each of the children of Israel gathered about ten cors; and they spread them out before the doors of their tents. And the Lord was angry with them, and smote them with death, and many died; and that place was called 'the graves of lust.'

They departed from thence to the place called Haseroth. And Aaron and Miriam lifted up themselves against Moses because of the Cushite woman whom he had married, and they said, 'Has God spoken with Moses only? Behold, He hath spoken with us also.' Now Moses was meeker than all men. And God heard the words of Miriam and Aaron, and came down in a pillar of cloud, and stood at the door of the tabernacle, and called them, and they came forth to Him. The Lord said to them, 'Hear what I will say to you. I have revealed Myself to you in secret, and ye have prophesied in a dream. Not so with My servant Moses, who is trusted in everything, for with him I speak mouth to mouth.' And the Lord was angry with them, and the cloud was taken up from the tabernacle: and Miriam was a leper, and was white as snow. Aaron saw that she was a leper, and said to Moses, 'I entreat thee not to look upon our sins which we have sinned against thee.' Moses made supplication before God, saying, 'Heal her, O Lord, I entreat Thee.' God said to Moses, 'If her father had spat in her face, it would have been right for her to pass the night alone outside the camp for seven days, and then to come in.' So Miriam stayed outside the camp for seven days, and then she was purified.

And God said to Moses, 'Send forth spies, from every tribe a man, and let them go and search out the land of promise. Moses chose twelve men, among whom were Joshua the son of Nun and Caleb the son of Jephunneh: and they went and searched out the land. And they returned, carrying with them of the fruit of the land grapes and figs and pomegranates. The spies came and said, 'We have not strength to stand against them, for they are mighty men, while we are like miserable locusts in their sight.' And the children of Israel were gathered together to Moses and Aaron, and they lifted up their voice and wept with a great weeping, saying, 'Why did we not die under the hand of the Lord in the wilderness and in Egypt, and not come to this land to die with our wives and children, and to become a laughing-stock and a scorn to the nations?' Joshua the son of Nun and Caleb the son of Jephunneh said to them, 'Fear not; we will go up against them, and the Lord will deliver them into our hands, and we shall inherit the land, as the Lord said to us.' The children of Israel said to one another, 'Come, let us make us a chief and return to Egypt;' and Moses and Aaron fell upon their faces before the people. And Joshua the son of Nun and Caleb the son of Jephunneh rent their clothes and said to the children of Israel, 'The land which we have searched out is a thriving one. flowing with milk and honey, and it is in the power of God to give it to us; do not provoke God.' And the children of Israel gathered together to stone them with stones. And God was revealed in a cloud over the tabernacle openly in the sight of the children of Israel; and He said to Moses, 'How long will these (people) provoke Me? and how long will they not believe in Me for all the wonders which I have wrought among them? Let Me smite them, and I will make thee the chief of a people stronger than they.' Moses said to the Lord, 'O Lord God Almighty, the Egyptians will hear and will say that Thou hast brought out Thy people from among them by Thy power: but when Thou smitest them, they will say, "He slew them in the desert, because He was unable to make them inherit the land which He promised them." And Thou, O Lord, who hast dwelt among this people, and they have seen Thee eye to eve. and Thy light is ever abiding with them, and Thou goest (before them) by night in a pillar of light, and dost shade them with a cloud by day, pardon now in Thy mercy the sins of Thy people, as Thou hast pardoned their sins from Egypt unto here.' God said to Moses, 'Say unto the children of Israel, O wicked nation. I have heard all the words which ve have spoken, and I will do unto you even as ye wish for yourselves. In this desert shall your dead bodies fall, and your families and your children, every one that knows good from evil, from twenty years old and downwards. Their children shall enter the land of promise; but ye shall not enter it, save Caleb the son of Jephunneh and Joshua the son of Nun. Your children

shall remain in this wilderness forty years, until your dead bodies decay, according to the number of the days in which ye searched out the land; for each day ye shall be requited with a year because of your sins.' And the spies who had spied out the land with Joshua the son of Nun and Caleb the son of Jephunneh died at once, save Joshua the son of Nun and Caleb the son of Jephunneh. This was very grievous to the people, and the children of Israel said to Moses, 'Behold, we are going up to the land which God promised us.' He said to them, 'God hath turned His face from you; go ye not away from your place.' And they hearkened not to Moses, but went up to the top of the mountain without Moses and the tabernacle; and the Amalekites and Canaanites who dwelt there came out against them and put them to flight. God said to Moses, 'When the children of Israel enter the land of promise, let them offer as offerings fine flour and oil and wine.' Then Korah the son of Zahar (Izhar), and Dathan and Abiram the sons of Eliab, together with their families, and two hundred and fifty men, separated from the children of Israel; and they came to Moses, and made him hear them, and troubled him. And Moses fell upon his face before the Lord and said, 'Tomorrow shall every one know whom God chooses. Is that which I have done for you not sufficient for you, that ye serve before the Lord, but ye must seek the priesthood also?' And Moses said unto God, 'O God, receive not their offerings.' And Moses said to them, 'Let every one of you take his censer in his hand, and place fire and incense therein;' and there stood before the Lord on that day two hundred and fifty men holding their censers. The Lord said to Moses, 'Stand aloof from the people, and I will destroy them in a moment.' And Moses and Aaron fell upon their faces, and said to the Lord, 'Wilt Thou destroy all these for the sake of one man who hath sinned?' God said to Moses, 'Tell the children of Israel to go away from around the tents of Korah and his fellows;' and Moses said to the people everything that God had said to him; and the people kept away from the tent of Korah. Then Korah and his family with their wives and children came forth and stood at the doors of their tents. And Moses said to them, 'If God hath sent me, let the earth open her mouth and swallow them up; but if I am come of my own desire, let them die a natural death like every man.' While the word was yet in his mouth, the earth opened, and swallowed them up, and the people that were with them, from man even unto beast; and fear fell upon their companions. The fire went forth from their censers, and burnt up the two hundred and fifty men. Moses said to Eleazar, 'Take their censers and make a casting of them, that they may be a memorial--for they have been sanctified by the fire which fell into them--that no man who is not of the family of Aaron should dare to take a censer in his hand.

The children of Israel gathered together unto Moses and Aaron and said to them, 'Ye have destroyed the people of the Lord.' And God said to Moses and Aaron in the tabernacle, 'Stand aloof from them, and I will destroy them in a moment.' Moses said to Aaron, 'Take a censer and put fire and incense therein, and go to the people, that God may forgive their sins, for anger has gone forth against them from before the Lord.' And Aaron put incense in a censer, and went to the people in haste, and he saw death destroying the people unsparingly; but with his censer he separated the living from the dead, and the plague was stayed from them. The number of men whom the plague destroyed at that time of the children of Israel was fourteen thousand and seven hundred, besides those who died with the children of Korah; and Aaron returned to Moses. And God said to Moses, 'Let the children of Israel collect from every tribe a rod, and let them write the name of the tribe upon its rod, and the name of Aaron upon (that of) the tribe of Levi, and the rod of the man whom the Lord chooseth shall blossom.' And they did as God had commanded them, and took the rods and placed them in the tabernacle that day. On the morrow Moses went into the tabernacle, and saw the rod of the house of Levi budding and bearing almonds. And Moses brought out all the rods to the children of Israel, and the sons of Levi were set apart for the service of the priesthood before the Lord.

When the children of Israel came to the wilderness of Sin. Miriam the sister of Moses and Aaron died, and they buried her. And there was no water for them to drink; and the children of Israel murmured against Moses and said, 'Would that we had all died with those who are dead already, and that we had not come hither to die with our beasts and our possessions! Why did the Lord bring us out from Egypt to this desert land, in which there are neither pomegranates nor grapes?' Moses and Aaron went to the tabernacle, and fell upon their faces before the Lord, and the Lord said to them, 'Gather together the children of Israel, and let Moses smite the rock with the rod, and water shall come forth and all the people shall drink:' and Moses called that water 'the water of strife.' The children of Israel gathered themselves together unto Moses and Aaron, and they murmured against them saying, 'Why have ye brought us out to this desert to die of thirst and hunger?' And the Lord was angry with them, and sent serpents upon them, and many of the people died by reason of the serpents. And they gathered themselves together

unto Moses and Aaron and said to them, 'We have sinned before God and before you.' God said to Moses, 'Make a serpent of brass, and hang it upon the top of thy rod, and set it up among the people; and let every one whom a serpent shall bite look upon the brazen serpent, and he shall live and not die.' This serpent which Moses set up is a type of the crucifixion of our Lord, as the doctor saith, 'Like the serpent which Moses set up, He set Him up also, that He might heal men of the bites of cruel demons.'

And the children of Israel came to mount Hor, and Aaron died there; and they wept for him a month of days; and Moses put his garments upon Eleazar his son. The children of Israel began to commit fornication with the daughters of Moab, and to bow down to their idols, and to eat of their sacrifices. The Lord was angry with them, and He commanded Moses to gather together the children of Israel, and to order every man to slay his fellow, and every one who should bow down to Baal Peor, the idol of the Moabites. When they were all assembled at the door of the tabernacle, Zimri the son of Salo came and took Cosbi the daughter of Zur, and committed fornication with her in the sight of Moses and all the people; and God smote the people with a pestilence. Then Phinehas the son of Eleazar the priest, the son of Aaron, arose, and thrust them through with a spear, and lifted them up upon the top of it; and the plague was stayed from that hour. This zeal was accounted unto Phinehas as a prayer; as the blessed David says, 'Phinehas arose and prayed, and the pestilence was stayed; and it was accounted unto him for merit from generation unto generation, even for ever.' The number of those who died at that time was twenty-four thousand men. God commanded Moses to number the people, and their number amounted to six hundred and one thousand seven hundred and eighty souls. And God commanded Moses to bless Joshua the son of Nun, and to lay his hand upon him, and to set him up before Eleazar the priest and before all the children of Israel: and God gave him wisdom and knowledge and prophecy and courage, and made him ruler of the children of Israel. God commanded the children of Israel to destroy the Midianites. And (Moses) chose from each tribe a thousand men, and they went up against the Midianites and took them captive and spoiled them. And Moses told them to slav every man who had committed fornication with a Midianitish woman, and every Midianitish woman who had committed fornication with a son of Israel, except the virgins whom man had not known. God commanded Moses to set apart one-fiftieth part of the spoil for the sons of Levi, the ministers of the altar and the house of the Lord. The number of the flocks that were gathered together with the children of Israel was six hundred and seventy thousand, and seventy-two thousand oxen, and thirty-two thousand virgins. And the Lord commanded them that when they should pass over the Jordan and come to the land of promise, they should set apart three villages for a place of flight and refuge, that whosoever committed a murder involuntarily might flee thither and dwell in them until the high priest of that time died, when he might return to his family and the house of his fathers. God laid down for them laws and commandments, and these are they. A man shall not clothe himself in a woman's garments, neither shall a woman clothe herself in those of a man. If one sees a bird's nest, he shall drive away the mother, and then take the young ones. A man shall make a fence and an enclosure to his roof, lest any one fall therefrom, and his blood be required of him. Let him that hath a rebellious son, bring him out before the elders, and let them reprimand him; if he turn from his (evil) habit, (goad and well); but if not, let him be stoned. One that is crucified shall not pass the night upon his cross. He that blasphemes God shall be slain. The man that lies with a betrothed woman shall be slain. If she is not betrothed, he shall give her father five hundred dinars. and take her to wife. And the other commandments.

And Moses gathered together the children of Israel and said to them, 'Behold, I am a hundred and twenty years old, no more strength abideth in me; and God hath said to me, Thou shalt not pass over this river Jordan.' And he called Joshua the son of Nun and said to him in the sight of all the people, 'Be strong and of good courage, for thou shalt bring this people into the land of promise. Fear not the nations that are in it, for God will deliver them into thy hands, and thou shalt inherit their cities and villages, and shalt destroy them.'

And Moses wrote down laws and judgements and orders, and gave them into the hands of the priests, the children of Levi. He commanded them that, when they crossed over to the land of promise, they should make a feast of tabernacles and should read aloud these commandments before all the people, men and women; that they might hear and fear the Lord their God. And God said to Moses, 'Behold thou art going the way of thy fathers; call Joshua the son of Nun, thy disciple, and make him stand in the tabernacle, and command him to be diligent for the government of this people; for I know that after thy death they will turn aside from the way of truth, and will worship idols, and I will turn away My face from them.' And God said to Moses, 'Get thee up into this mountain of the Amorites which is called Nebo, and see the land of Canaan, and be gathered to thy fathers, even as Aaron thy brother died on mount Hor.' So Moses died there and was buried, and no man knoweth his grave; for God hid him, that the children of Israel might not go astray and worship him as God. He died at the age of one hundred and twenty years; his sight had not diminished, neither was the complexion of his face changed. And the children of Israel wept for him a month of days in Arboth Moab.

From Adam then until the death of Moses was three thousand eight hundred and sixty-eight years.

When the number of the children of Israel was reckoned up, it amounted to eight hundred thousand, and that of the house of Judah to five hundred thousand. In the Book of Chronicles it is written, 'The children of Israel were a thousand thousand, one hundred thousand and one hundred men; and the house of Judah was four hundred thousand and seven hundred men that drew sword.' Now when they came out of Egypt, they were six hundred thousand; and when they entered Egypt, they were seventy and five souls.

BOOK OF THE BEE CHAPTER 31

Of Joshua The Son Of Nun, And Brief Notices Of The Years Of The Judges And The Kings Of The Children Of Israel.

After Moses was dead, God said to Joshua the son of Nun, 'Moses My servant is dead; now therefore arise, go over this Jordan, thou and all this people, unto the land which I have sworn to their fathers to give them, Every place upon which ye tread shall be yours.' So Joshua the son of Nun gathered the people together, and passed over Jordan. Jordan was divided on this side and on that, and the children of Israel passed over as upon dry ground, even as their fathers passed through the sea of Soph, when they went forth from Egypt. And they took twelve stones from the midst of Jordan, as a memorial for those after them. And they took Jericho, and destroyed it; and Joshua the son of Nun slew thirty-one kings of the foreign nations, and divided the land among them, and he brake their idols and images. These are the names of the kings whom Joshua the son of Nun destroyed. The king of Jericho, the king of Ai, the king of Jerusalem, the king of Hebron, the king of Jarmuth, the king of Lachish, the king of Eglon, the king of Gezer, the king of Debir, the king of Hormah, the king of Geder, the king of Arad, the king of Libnah, the king of Adullam, the king of Makkedah, the king of Bethel, the king of Tappuah, the king of Hepher, the king of Aphek, the king of Lashsharon; the king of Madon, the king of Hazor, the king of Shimron-meron, the king of Achshaph, the king of Taanach, the king of Megiddo, the king of Rekam (Kadesh), the king of Jokneam, the king of Dor and Naphath-Dor, the king of Goiim, the king of Tirzah,

And as we do not intend to write a complete history of the kings and judges, but only to collect a few matters which may serve for the consolation of the feeble in a time of despondency, behold we pass over them with brief notices. If however any one seeks to know these (things), let him read in the Torah and in the Beth-Mautebhe, whence he will understand clearly. Moses ruled the people in the desert forty years. Joshua ruled the people twenty-five years. Judah was ruler of the people forty-eight years. Eglon king of Moab oppressed the people eighteen years. Ahor (Ehud) was ruler of the people eighty years. Nabin (Jabin) oppressed Israel twenty years. Deborah and Barak were rulers of the people forty years. The Midianites oppressed Israel seven years. Gideon was ruler of the people forty years. He had seventy sons, who rode with him upon seventy ass colts. Abimelech the son of Gideon was ruler of the people sixty years. Tola the son of Puah was ruler of the people twenty-three years. Jair was ruler of the people twenty-two years. The Philistines and Ammonites oppressed the people eighteen years. Naphthah (Jephthah) was ruler of the people six years. He vowed a vow to the Lord and said, 'Whatsoever cometh forth to meet me from my house, I will offer up as an offering to the Lord.' And his only daughter came forth, and he offered her up as an offering to the Lord Abizan (Ibzan) was ruler of the people seven years. He had thirty sons and thirty daughters; he sent out the thirty daughters and brought in thirty daughters-in-law. Elon was a ruler of the people ten years. Acron (Abdon) was ruler of the people eight years. The Philistines oppressed Israel forty years. Samson was ruler of the people twenty years. He slew a thousand men with the jawbone of a dead ass. Eli was ruler of the people forty years. From Eli, the ark was in the house of Abinadab twenty years. Samuel was ruler of the people thirty years. Saul was ruler of the people forty years. These years of the Judges (lit, rulers) amount to six hundred and fifty-five. King David reigned forty years. Solomon reigned forty years. Rehoboam reigned seventeen years. Abijah reigned three years. Asa reigned forty-one years. Jehoshaphat reigned twenty-five years. Joram reigned eight years. Ahaziah reigned one year. Athaliah reigned six years. Joash reigned forty years. Amaziah reigned twenty-three years. Uzziah reigned fifty-two years. Jotham reigned sixteen years. Hezekiah reigned twenty-nine years. He prayed before God, and fifteen years were added to his life; and he held back the sun and the moon in their course. Manasseh reigned fifty-five years. He sawed Isaiah with a wooden saw and killed him. Amon reigned two years. Josiah reigned thirty-one years. Jehoahaz reigned three months.

Jehoiakim reigned eleven years. Jehoiachin reigned one hundred days. Zedekiah reigned seven years. These years of the kings amount to four hundred and fifty-five years, six months, and ten days*.

(*Footnote: Bar Hebraeus says that the elders of the people ruled after Joshua, but no number of years is given; his list of the Judges is much fuller, but their years do not agree with those given in this chapter. In Brit. Mus. Add. 21,580, fol. 69 a, after Joshua, there follows Chushan the wicked, eight years; Othniel, forty years; the Moabites, eighteen years; and Ahor or Ehud comes next.)

BOOK OF THE BEE CHAPTER 32

Of The Death Of The Prophets; How They Dled, And (Where) Each One Of Them Was Buried.

Manasseh the son of Hezekiah slew Isaiah with a wooden saw; he was buried before the outfall of the waters which Hezekiah concealed by the side of Siloah.

Hosea the son of Beeri, of the tribe of Issachar, (was) from the town of Beelmath. He prophesied mystically about our Lord Jesus Christ who was to come; saying that when He should be born, the oak in Shiloh should be divided into twelve parts; and that He should take twelve disciples of Israel. He died in peace, and was buried in his own land.

Joel the son of Bethuel (Pethuel), of the tribe of Reuben, died in peace in his own land. Others say that Ahaziah the son of Amaziah smote him with a staff upon his head; and while his life was yet in him, they brought him to his own land, and after two days he died.

Amos (was) from the land of Tekoa. The priest of Bethel tortured him and afterwards slew him. Others say that it was he whom Ahaziah the son of Amaziah killed with a staff, and he died.

Obadiah from the country of Shechem was the captain of fifty of Ahab's soldiers. He became a disciple of Elijah, and endured many evil things from Ahab, because he forsook him and went after Elijah. However he died in peace. After he followed Elijah, he was deemed worthy of prophecy.

Elijah the fiery, of the family of Aaron, (was) from Tashbi, a town of the Levites. When this (prophet) was born, his father saw in a dream that one was born, and that they wrapped him in fire instead of swaddling bands, and gave him some of that fire to eat. He came to Jerusalem, and told the priests the vision that he had seen. The learned among the people said to him, 'Fear not, thy son is about to be a fire, and his word shall be like fire, and shall not fall to the ground; he will burn like fire with jealousy of sinners, and his zeal will be accepted before God.' He was taken up in a chariot towards heaven. Some say that his father was called Shobakh.

Elisha his pupil, from Abel-Meholah, (was) of the tribe of Reuben. On the day of his birth a great wonder took place in Israel; for the bull which they worshipped in Gilgal lowed, and his voice was heard in Jerusalem. The chief priests in Jerusalem said, 'A mighty prophet is born to-day in Israel at this time, and he will break the images and idols to pieces.' He died in peace, and was buried in Samaria.

Jonah the son of Amittai (was) from Gath-hepher, from Kuryath-Adamos, which is near to Ascalon and Gaza and the sea coast. After this (prophet) had prophesied to the Ninevites in the time of Sardana the king, he did not remain in his own land because the Jews were jealous of him; but he took his mother, and went and dwelt in Assyria. He feared the reproach of the Jews, because he had prophesied, and his prophecy did not come to pass. He also rebuked Ahab the king, and called a famine upon the land and the people. He came to the widow of Elijah, and blessed her, because she received him, and he returned to Judaea. His mother died on the way, and he buried her by the side of Deborah's grave. He lived in the land of Serida, and died two years after the people had returned from Babylon, and was buried in the cave of Kainan. This (prophet) prophesied that when the Messiah should come, the cities of the Jews would be overturned.

Micah the Morashthite (was) of the tribe of Ephraim, and was slain by Joram the son of Ahab. This (prophet) prophesied concerning the destruction of the temple of the Jews, and the abrogation of the Passover on the death of the Messiah. He died in peace, and was buried in Anikam.

Nahum, from the city of Elkosh, (was) of the tribe of Simeon. After the death of Jonah this (prophet) prophesied concerning the Ninevites, saying, 'Nineveh shall perish by perpetually advancing waters, and ascending fire;' and this actually took place. He prophesied also concerning the Babylonians, that they would come against the Israelitish people; and therefore they sought to kill him. He prophesied that when the Messiah should be slain, the vail of the temple should be rent in twain, and that the Holy Spirit should depart from it. He died in peace, and was buried in his own country.

Habakkuk (was) of the tribe of Simeon, and from the land of Suar (Zoar). This (prophet) prophesied concerning the Messiah, that He should come, and abrogate the laws of the Jews. He brought food to Daniel at Babylon by the divine (or, angelic) agency. The Jews stoned him in Jerusalem. Zephaniah (was) of the tribe of Simeon. He prophesied concerning the Messiah, that He should suffer, and that the sun should become dark, and the moon be hidden. He died in peace in his own land.

Haggai returned from Babylon to Jerusalem when he was young. He prophesied that the people would return, and concerning the Messiah, that He would abrogate the sacrifices of the Jews. He died in peace.

Zechariah the son of Jehoiada returned from Babylon in his old age, and wrought wonders among the people. He died at a great age, and was buried by the side of the grave of Haggai.

Malachi was born after the return of the people, and because of his beauty he was surnamed 'Angel.' He died in peace in his own land.

The Jews stoned Jeremiah the son of Hilkiah in Egypt, because he rebuked them for worshipping idols; and the Egyptians buried him by the side of Pharaoh's palace. The Egyptians loved him much, because he prayed and the beasts died which used to come up from the river Nile and devour men. These beasts were called 'crocodiles.' When Alexander the son of Philip, the Macedonian, came (to Egypt), he made enquiries about his grave, and took and brought him to Alexandria. This (prophet) during his life said to the Egyptians, 'a child shall be born--that is the Messiah--of a virgin, and He shall be laid in a crib, and He will shake and cast down the idols.' From that time, and until Christ was born, the Egyptians used to set a virgin and a baby in a crib, and to worship him, because of what Jeremiah said to them, that He should be born in a crib.

Ezekiel the son of Buzi was of the priestly tribe, and from the land of Serida. The chief of the Jews who was in the land of the Chaldeans slew him, because he rebuked him for worshipping idols. He was buried in the grave of Arphaxar, the son of Shem, the son of Noah.

Daniel (was) of the tribe of Judah, and was born in Upper Beth-Horon. He was a man who kept himself from women, and hence the Jews thought that he was an eunuch, for his face was different (from that of other men), and he had no children. He prayed for the Babylonians, and died in Elam, in the city of the Hozaye, and was buried in Shoshan the fortress. He prophesied concerning the return of the people.

Ahijah (was) from Shilo. A lion slew this prophet, and he was buried by the oak at Shilo in Samaria.

Ezra the scribe was from the country of Sabtha, and of the tribe of Judah. This (prophet) brought back the people, and died in peace in his own land.

Zechariah the son of Berachiah, the priest, was from Jerusalem. Joash the king slew this (prophet) between the steps and the altar, and sprinkled his blood upon the horns of the altar, and the priests buried him. From that day God forsook the temple, and angels were never again seen in it.

Simon the son of Sira (Sirach) died in peace in his own town Nathan died in peace.

Here ends the first part of the book of gleanings called 'the Bee'

To God be the glory, and may His mercy and compassion be upon us. Amen.

BOOK OF THE BEE PART 2

Again, by the Divine power, we write the second part of the book of gleanings called 'the Bee,' regarding the Divine dispensation which was wrought in the new (covenant).

BOOK OF THE BEE CHAPTER 33

Of The Messianic Generations.

God created Adam. Adam begat Seth. Seth begat Enos. Enos begat Kainan. Kainan begat Mahalaleel. Mahalaleel begat Jared. Jared begat Enoch. Enoch begat Methuselah. Methuselah begat Lamech. Lamech begat Noah. Noah begat Shem. Shem begat Arphaxar. Arphaxar begat Kainan. Kainan begat Shalach. Shalach begat Eber. Eber begat Peleg. Peleg begat Reu. Reu begat Serug. Serug begat Nahor. Nahor begat Terah. Terah begat Abraham. Abraham begat Isaac. Isaac begat Jacob. Jacob begat Judah. Judah took a Canaanitish wife, whose name was Shuah. And it was very grievous to Jacob, and he said to Judah, 'The God of my fathers will not allow the seed of Canaan to be mingled with our seed, nor his family with our family.' There were born to Judah by the Canaanitish woman three sons, Er, Onan, and Shelah. Er took Tamar, the daughter of Merari the son of Levi, to wife, and he lay with her in the Sodomite way and died without children. After him his brother Onan took her, to raise up seed to his brother; he also, when he lay with her, scattered his seed outside of her on the ground, and he too died without children. Because Shelah was a child, Judah kept his daughter-in-law in widowhood, that he might give her to Shelah to raise up seed by her. But Tamar went into her father-in-law by crafty devices, and lay with him, and conceived, and gave birth to twins, Pharez and Zarah. Pharez begat Hezron. Hezron begat Aram. Aram begat Amminadab. Amminadab begat Nahshon. Eleazar the son of Aaron, the priest, took the sister of Nahshon to wife, and by her begat Phinehas; and the seed of the priesthood was mingled with the

royal line. Nahshon begat Salmon. Salmon begat Boaz by Rahab. Boaz begat Obed by Ruth the Moabitess. Obed begat Jesse. Jesse begat David the king by Nahash.

Now two genealogies are handed down from David to Christ; the one from Solomon to Jacob, and the other from Nathan to Heli. David begat Solomon. Solomon begat Rehoboam. Rehoboam begat Abijah. Abijah begat Asa. Asa begat Jehoshaphat. Jehoshaphat begat Joram. Joram begat Uzziah, Uzziah begat Jotham, Jotham begat Ahaz, Ahaz begat Hezekiah. Hezekiah begat Manasseh. Manasseh begat Amon. Amon begat Josiah. Josiah begat Jeconiah. Jeconiah begat Salathiel. Salathiel begat Zerubbabel. Zerubbabel begat Abiud. Abiud begat Eliakim. Eliakim begat Azor. Azor begat Zadok. Zadok begat Achin. Achin begat Eliud. Eliud begat Eleazar. Eleazar begat Matthan. Matthan begat Jacob. Jacob begat Joseph. Or again: David begat Nathan. Nathan begat Mattatha. Mattatha begat Mani. Mani begat Melea. Melea begat Eliakim. Eliakim begat Jonam. Jonam begat Levi. Levi begat Mattitha. Mattitha begat Jorim. Jorim begat Eliezer. Eliezer begat Jose. Jose begat Er. Er begat Elmodad. Elmodad begat Cosam. Cosam begat Addi. Addi begat Melchi. Melchi begat Neri. Neri begat Salathiel. Salathiel begat Zorobabel. Zorobabel begat Rhesa. Rhesa begat Johannan. Johannan begat Juda. Juda begat Joseph. Joseph begat Semei. Semei begat Mattatha. Mattatha begat Maath. Maath begat Nagge. Nagge begat Esli. Esli begat Nahum. Nahum begat Amos. Amos begat Mattitha. Mattitha begat Joseph. Joseph begat Janni Janni begat Melchi. Melchi begat Levi. Levi begat Matthat. Matthat begat Heli. Heli begat Joseph.

Know too, O my brother, that Mattan the son of Eliezer -whose descent was from the family of Solomon--took a wife whose name was Astha (or Essetha) and by her begat Jacob naturally. Mattan died, and Melchi--whose family descended from Nathan the son of David--took her to wife, and begat by her Eli (or Heli): hence Jacob and Heli are brothers. (the sons) of (one) mother. Eli took a wife and died without children. Then Jacob took her to wife, to raise up seed to his brother, according to the command of the law; and he begat by her Joseph, who was the son of Jacob according to nature, but the son of Heli according to the law; so whichever ye choose, whether according to nature, or according to the law, Christ is found to be the son of David. It is moreover right to know that Eliezer begat two sons, Mattan and Jotham. Mattan begat Jacob, and Jacob begat Joseph; Jotham begat Zadok, and Zadok begat Mary. From this it is clear that Joseph's father and Mary's father were cousins.

BOOK OF THE BEE CHAPTER 34

Of The Annunciation Of The Angel To Yonakir (Joachim) In Respect Of Mary.

This Zadok, who was called Yonakir, and Dinah his wife were righteous before God, and were rich in earthly riches and in goods and chattels; but they had neither fruit nor offspring like other people. They were reproached by the people for their barrenness, and they did not allow them to offer up the offering except after every one else, because they had no children among the people of Israel. And Yonakir went out into the desert, and pitched his tent outside the encampment, and he prayed before God with mournful tears, and put on garments of mourning; so also did Dinah his wife. And God heard their prayers and accepted the sacrifices of their tears. The angel of God came to them, and announced to them the conception of Mary, saying, 'Your prayer has been heard before God, and behold, He will give you blessed fruit, a daughter who shall be a sign and a wonder among all the generations of the world; and all families shall be blessed through her.' Then they two praised God, and Zadok returned to his habitation. And Dinah his wife conceived, and brought forth Mary: and from that day she was called Hannah (Anna) instead of Dinah, for the Lord had had compassion upon her. Now the name 'Mary' (Maryam or Miriam) is interpreted 'lifted up,' 'exalted;' and they rejoiced in her exceedingly. And after six months her parents said to one another, 'We will not allow her to walk upon the ground; and they carried her with sacrifices and offerings, and brought her to the temple of the Lord. And they sacrificed oxen and sheep to the Lord, and offered Mary to the high priest. He laid his hand upon her head, and blessed her, saying, 'Blessed shalt thou be among women.' Two years after she was weaned, they brought her to the temple of the Lord, even as they had vowed to the Lord, and delivered her to the high priest. He laid his hand upon her head, and blessed her, and said to her that she should give herself over to the aged women who were there. And she was brought up with the virgins in the temple of the Lord, and performed the service of the temple with joyful heart and godly fervour until she was twelve years old. Because she was beautiful in appearance, the priests and the high priest took counsel and prayed before God that He would reveal to them what they should do with her. And the angel of God appeared unto the high priest and said to him, 'Gather together the staves of the men who have been left widowers by their first wives, and are well known for piety, uprightness, and righteousness, and what God sheweth thee, do.' And they brought many staves and laid them down in the

temple; and they prayed before God that day and its night. The chief priest went into the temple and gave to each of them his staff, and when Joseph took his staff in his hand, there went forth from it a white dove, and hovered over the top of the rod, and sat upon it. The chief priest drew near to Joseph and kissed him on his head, and said to him, 'The blessed maiden has fallen to thy lot from the Lord; take her to thee until she arrives at the age for marriage, and (then) make a marriage feast after the manner and custom of men; for it is meet for thee (to do so) more than others, because ye are cousins.' Joseph said to the chief priest, 'I am an old and feeble man, and this is a girl, and unfit for my aged condition; it is better to give her to one of her own age, because I cannot rely upon myself to watch her and guard her.' The chief priest said to him, 'Take heed that thou dost not transgress the command of God, and bring a punishment upon thee.' So Joseph took Mary, and went to his dwelling-place.

Some days after the priests distributed various coloured silken threads to weave for the veil of the sanctuary; and it fell to Mary's lot to weave purple. And while she was in the temple in prayer, having placed incense before the Lord, suddenly the archangel Gabriel appeared to her in the form of a middle-aged man, and a sweet odour was diffused from him; and Mary was terrified at the sight of the angel.

BOOK OF THE BEE CHAPTER 35

Of The Annunciation By Gabriel To Mary Of The Conception Of Our Lord.

At the ninth hour of the first day of the week, on the twenty-fifth of the month of Adar,--though some say on the first day of the month of Nisan, which is correct, -- in the three hundred and seventh year of Alexander the son of Philip, or of Nectanebus, the Macedonian, six months after Elizabeth's conception of John, the archangel Gabriel appeared to Mary and said to her, 'Peace be to thee, O full of grace! our Lord is with thee, O blessed among women!' As for her, when she saw (him), she was terrified at his words, and was thinking what this salutation was. The angel said to her, 'Fear not Mary, for thou hast found grace with God. And behold, thou shalt conceive and bear a son, and thou shalt call his name Emmanuel, which is interpreted, "our God is with us." This (child) shall be great, and shall be called the Son of the Highest.' Mary said to the angel, 'Behold, I am the handmaid of the Lord; let it be to me according to thy word.' And the angel went away from her. In those days Mary arose, and went to Elizabeth het cousin, and she went in and saluted Elizabeth. And it came to pass that when Elizabeth heard Mary's salutation the babe leaped in her womb and John in Elizabeth's womb bowed down to our Lord in Marv's womb. as a servant to his master. Mary remained with Elizabeth about three months, and then returned to her house. After the lapse of six months, Joseph saw that Mary had conceived, and he was troubled in his mind, and said, 'What answer shall I give to the high priest in respect of this trial which has befallen me?' And because he relied upon the purity of his spouse, he fell into perplexity and doubt, and said to her, Whence hast thou this? and who has beguiled thee, O perfect dove? Wast thou not brought up with the pure virgins and venerable matrons in the temple of the Lord?' And she wept, saying, 'As the Lord God liveth, I have never known man nor had connexion with any one;' but she did not speak to him of the angel and the cause of her conception. Then Joseph meditated within himself and said, 'If I reveal this matter before men, I fear lest it may be from God; and if I keep it back and hide it, I fear the rebuke and penalty of the law.' For the Jews did not approach their wives until they made a feast to the high priest, and then they took them. And Joseph thought that he would put her away secretly; and while he was pondering these things in his heart, the angel of the Lord appeared to him in a dream, and said, 'Joseph, son of David, fear not to take Mary thy wife; for that which is born in her is of the Holy Spirit.' He spake well when he said 'in her,' and not 'of her.

And the priests heard of Mary's conception, and they made an accusation against Joseph, as if deceit had been found in him. Joseph said, 'As the Lord liveth, I know not the cause of her conception;' and Mary likewise swore this. There was a custom among the Jews that, when any one of them was accused with an accusation, they made him drink 'the water of trial;' if he were innocent, he was not hurt, but if he were guilty, his belly swelled, and his body became swollen, and the mark of chastisement appeared in him. When they had made Mary and Joseph drink of the water of trial, and they were not hurt, the high priest commanded Joseph to guard her diligently until they saw the end of this matter.

BOOK OF THE BEE CHAPTER 36

Of The Birth Of Our Lord In The Flesh.

One year before the annunciation of our Lord, the emperor of the Romans sent to the land of Palestine Cyrinus the governor, to write down every one for the poll-tax, for the Jews were subject to the empire of the Romans; and every man was written down in his city. And Joseph the carpenter also went up that he might be written down in his city; and by

reason of his exceeding great watchfulness for the blessed (Mary), he took her with him upon an ass. When they had gone about three miles, Joseph looked at her and saw that her hand was laid upon her belly, and that her face was contracted with pain; and he thought that she was troubled by the beast, and asked her about her trouble and pain. She said to him, 'Hasten and prepare a place for me to alight, for the pains of childbirth have taken hold upon me.' When he had lifted her down from the animal, he went to fetch a midwife, and found a Hebrew woman whose name was Salome. The heretics say that she was called Hadyok, but they err from the truth. When Joseph came to the cave, he found it full of brilliant light, and the child wrapped in swaddling clothes and rags, and laid in a crib. And there were shepherds there keeping watch over their flocks, and behold the angel of God came to them, and the glory of the Lord shone upon them; and they feared with an exceeding great fear. The angel said to them, 'Fear not, for behold, I announce to you a great joy which shall be to all the world; for there is born to you this day a Redeemer, who is the Lord Jesus, in the city of David: and this shall be the sign unto you; ye shall find the babe wrapped in swaddling clothes, and laid in a crib.' And suddenly with the angel there appeared many hosts of heaven, praising God and saying, 'Glory to God in the heights, and on earth peace and tranquillity and good hope to men.' And the shepherds went and entered the cave, and they saw as the angel had said to them. The names of the shepherds were these: Asher, Zebulon, Justus, Nicodemus, Joseph, Barshabba, and Jose; seven in number

BOOK OF THE BEE CHAPTER 37

The Prophecy Of Zaradosht Concerning Our Lord.

This Zaradosht* (Zarathustra or Zoroaster) is Baruch the scribe. When he was sitting by the fountain of water called Glosha of Horin, where the royal bath had been erected, he said to his disciples, the king Gushnasaph and Sasan and Mahimad, 'Hear, my beloved children, for I will reveal to you a mystery concerning the great King who is about to rise upon the world. At the end of time, and at the final dissolution, a child shall be conceived in the womb of a virgin, and shall be formed in her members, without any man approaching her. And he shall be like a tree with beautiful foliage and laden with fruit, standing in a parched land; and the inhabitants of that land shall be gathered together to uproot it from the earth, but shall not be able. Then they will take him and crucify him upon a tree, and heaven and earth shall sit in mourning for his sake; and all the families of the nations shall be in grief for him. He will begin to go down to the depths of the earth, and from the depth he will be exalted to the height; then he will come with the armies of light, and be borne aloft upon white clouds; for he is a child conceived by the Word which establishes natures.' Gushnasaph says to him, 'Whence has this one, of whom thou sayest these things, his power? Is he greater than thou, or art thou greater than he?' Zaradosht says to him, 'He shall descend from my family: I am he, and he is I; he is in me, and I am in him. When the beginning of his coming appears, mighty signs will be seen in heaven, and his light shall surpass that of the sun. But ye, sons of the seed of life, who have come forth from the treasuries of life and light and spirit, and have been sown in the land of fire and water, for you it is meet to watch and take heed to these things which I have spoken to you, that ye await his coming; for you will be the first to perceive the coming of that great king, whom the prisoners await to be set free. Now, my sons, guard this secret which I have revealed to you, and let it be kept in the treasure-houses of your souls. And when that star rises of which I have spoken, let ambassadors bearing offerings be sent by you, and let them offer worship to him. Watch. and take heed, and despise him not, that he destroy you not with the sword; for he is the king of kings, and all kings receive their crowns from him. He and I are one.' These are the things which were spoken by this second Balaam, and God, according to His custom, compelled him to interpret these things; or he sprang from a people who were acquainted with the prophecies concerning our Lord Jesus Christ, and declared them aforetime.

(*Footnote: Zarathustra, also known as Zoroaster or Zarathushtra Spitama or Ashu Zarathushtra, was an ancient Iranian-speaking spiritual leader and ethical philosopher who taught a spiritual philosophy of self-realisation and realisation of the Divine. His teachings challenged the existing traditions of the Indo-Iranian religion and later developed into the religion of Mazdayasna or Zoroastrianism. He inaugurated a movement that eventually became the dominant religion in Ancient Persia. He was a native speaker of Old Avestan and lived in the eastern part of the Iranian Plateau, but his exact birthplace is uncertain.)

BOOK OF THE BEE CHAPTER 38

Of The Star Which Appeared In The East On The Day Of The Birth Of Our Lord.

Some say that that star appeared to the Magi simultaneously with the birth of our Lord. As for Herod's commanding that all children from two years old and

downwards should be slain, it is not as if they required all that length of time for their journey, but they had some accidental delay either in their own country or on the road. Again, Herod did not command that the children should be slain immediately after his having met the Magi, but much time passed in the interval, because he was waiting to hear from them.

The holy Mar John Chrysostom, in his exposition of Matthew, says, 'The star appeared a long time before, for their journey was accomplished with great delay that they might come to the end of it on the day of our Lord's birth. It was meet that He should be worshipped in swaddling bands, that the greatness of the wonder might be recognised; therefore the star appeared to them a long time before. For if the star had appeared to them in the east when He was born in Palestine, they would not have been able to see Him in swaddling bands. Marvel not, if Herod slew the children from two years and downwards, for wrath and fear urged him to increased watchfulness; therefore he added more time than was needful, that no one should be able to escape.'

As touching the nature of that star, whether it was a star in its nature, or in appearance only, it is right to know that it was not of the other stars, but a secret power which appeared like a star; for all the other stars that are in the firmament, and the sun and moon, perform their course from east to west. This one, however, made its course from north to south, for Palestine lies thus, over against Persia. This star was not seen by them at night only, but also during the day, and at noon; and it was seen at the time when the sun is particularly strong. because it was not one of the stars. Now the moon is stronger in its light than all the stars, but it is immediately quenched and its light dissipated by one small ray of the sun. But this star overcame even the beams of the sun by the intensity of its light. Sometimes it appeared, and sometimes it was hidden entirely. It guided the Magi as far as Palestine. When they drew near to Jerusalem, it was hidden; and when they went forth from Herod, and began to journey along the road, it appeared and shewed itself. This was not an ordinary movement of the stars, but a rational power. Moreover, it had no fixed path, but when the Magi travelled, it travelled on also, and when they halted, it also halted; like the pillar of cloud which stopped and went forward when it was convenient for the camp of Israel. The star did not remain always up in the height of heaven, but sometimes it came down and sometimes it mounted up; and it also stood over the head of the Child, as the Evangelist tells us.

BOOK OF THE BEE CHAPTER 39

Of The Coming Of The Magi From Persia. When Jesus was born in Bethlehem of Judah, and the star appeared to the Magi in the east, twelve Persian kings took offerings--gold and myrrh and frankincense--and came to worship Him. Their names are these: Zarwandad the son of Artaban, and Hormizdad the son of Sitaruk (Santarok), Gushnasaph (Gushnasp) the son of Gundaphar, and Arshakh the son of Miharok; these four brought gold. Zarwandad the son of Warzwad, Iryaho the son of Kesro (Khosrau), Artahshisht the son of Holiti, Ashtonabodan the son of Shishron; these four brought myrrh. Meharok the son of Huham, Ahshiresh the son of Hasban, Sardalah the son of Baladan, Merodach the son of Beldaran: these four brought frankincense. Some say that the offerings which the Magi brought and offered to our Lord had been laid in the Cave of Treasures by Adam; and Adam commanded Seth to hand them down from one to another until our Lord rose, and they brought (them), and offered (them) to Him. But this is not received by the Church. When the Magi came to Jerusalem, the whole city was moved; and Herod the king heard it and was moved. And he gathered together the chief priests and the scribes of the people, and enquired about the place in which Christ should be born; and they told him, in Bethlehem of Judah, for so it is written in the prophet. Then Herod called the Magi, and flattered them, and commanded them to seek out the Child diligently, and when they had found Him to tell Herod, that he also might go and worship Him. When the Magi went forth from Herod, and journeyed along the road, the star rose again suddenly, and guided them until it came and stood over (the place) where the Child was. And when they entered the cave, and saw the Child with Mary His mother, they straightway fell down and worshipped Him, and opened their treasures, and offered unto Him offerings, gold and myrrh and frankincense. Gold for His kingship, and myrrh for His burial, and frankincense for His Godhead. And it was revealed to them in a dream that they should not return to Herod, and they went to their land by another way. Some say that the Magi took some of our Lord's swaddling bands with them as a blessed thing.

Then Longinus the sage wrote to Augustus Caesar and said to him, 'Magians, kings of Persia, have come and entered thy kingdom, and have offered offerings to a child who is born in Judah; but who he is, and whose son he is, is not known to us.' Augustus Caesar wrote to Longinus, saying, 'Thou hast acted wisely in that thou hast made known to us (these things) and hast not hidden (them) from us.' He wrote also to Herod, and

asked him to let him know the story of the Child. When Herod had made enquiries about the Child, and saw that he had been mocked by the Magi, he was wroth, and sent and slew all the children in Bethlehem and its borders, from two years old and downwards, according to the time which he had enquired of the Magi. The number of the children whom he slew was two thousand, but some say one thousand eight hundred. When John the son of Zechariah was sought for, his father took him and brought him before the altar: and he laid his hand upon him, and bestowed on him the priesthood, and then brought him out into the wilderness. When they could not find John, they slew Zechariah his father between the steps and the altar. They say that from the day when Zechariah was slain his blood bubbled up until Titus the son of Vespasian came and slew three hundred myriads of Jerusalem, and then the flow of blood ceased. The father of the child Nathaniel also took him, and wrapped him round, and laid him under a fig-tree; and he was saved from slaughter. Hence our Lord said to Nathaniel, 'Before Philip called thee, I saw thee, when thou wast under the fig-tree.'

BOOK OF THE BEE CHAPTER 40 Of Our Lord Is Going Down Into Egypt.

When the Magi had returned to their country, the angel of the Lord appeared to Joseph in a dream, and said to him, 'Arise, take the Child and His mother, and flee to Egypt; and stay there until I tell thee.' So Joseph arose and took the Child and His mother by night, and fled to Egypt, and was there until the death of Herod. When they were journeying along the road to Egypt, two robbers met them; the name of the one was Titus, that of the other Dumachos (?). Dumachos wished to harm them and to treat them evilly, but Titus would not let him, and delivered them from the hands of his companion. When they reached the gate of the city called Hermopolis, there were by the two buttresses of the gate two figures of brass, that had been made by the sages and philosophers; and they spoke like men. When our Lord and His mother and Joseph entered Egypt, that is to say that city, these two figures cried out with a loud voice, saying, 'A great king has come into Egypt.' When the king of Egypt heard this, he was troubled and moved; for he feared lest his kingdom should be taken away from him. And he commanded the heralds to proclaim throughout the whole city, 'If any man knoweth (who He is), let him point (Him) out to us without delay. When they had made much search and did not find Him, the king commanded all the inhabitants of the city to go outside and come in one by one. When our Lord entered, these two figures cried out, 'This is the king.' And when our Lord was revealed, Pharaoh sought to slay Him. Now Lazarus--whom Christ raised from the dead--was there, and was one of the king's officials, and held in much esteem by the lord of Egypt. He drew near to Joseph and asked them, 'Whence are ye?' They said to him, 'From the land of Palestine.' When he heard that they were from the land of Palestine, he was sorry for them, and came to the king and pledged himself for the Child. And he said to the king, 'O king, live for ever! If deceit be found in this Child, behold, I am before thee, do unto me according to thy will.' This is the (cause) of the love between Lazarus and Christ. One day when Mary was washing the swaddling bands of our Lord, she poured out the water used in washing in a certain place, and there grew up there apursam (that is to say balsam) trees, a species of tree not found anywhere else save in this spot in Egypt. Its oil has (divers) properties; if a man dips iron into it, and brings (the iron) near a fire, it shines like wax; if some of it is thrown upon water, it sinks to the bottom; and if a drop of it is dropped upon the hollow of a man's hand, it goes through to the other side. Our Lord remained two years in Egypt, until Herod had died an evil death. He died in this manner. First of all he slew his wife and his daughter, and he killed one man of every family, saying, 'At the time of my death there shall be mourning and weeping and lamentation in the whole city. His bowels and his legs were swollen with running sores, and matter flowed from them, and he was consumed by worms. He had nine wives and thirteen children. And he commanded his sister Salome and her husband, saving, 'I know that the Jews will hold a great festival on the day of my death; when they are gathered together with the weepers and mourners, slay them, and let them not live after my death.' There was a knife in his hand, and he was eating an apple; and by reason of the severity of his pain, he drew the knife across his throat, and cut it with his own hand; and his belly burst open, and he died and went to perdition. After the death of Herod who slew the children, his son Herod Archelaus reigned, who cut off the head of John. And the angel of the Lord appeared to Joseph in Egypt and said to him, 'Arise, take the Child and His mother, and go to the land of Israel, for those who sought the life of the Child are dead.' So Joseph took the Child and His mother. and came to Galilee; and they dwelt in the city of Nazareth, that what was said in the prophecy might be fulfilled, 'He shall be called a Nazarene.' In the tenth year of the reign of Archelaus the kingdom of the Jews was divided into four parts. To Philip (were assigned) two parts, Ituraea and Trachonitis; to Lysanias one part, which was Abilene; and to Herod the

younger the fourth part. And Herod loved Herodias, the wife of his brother Philip.

BOOK OF THE BEE CHAPTER 41 Of John The Baptist, And Of The Baptism Of Our Lord.

John the Baptist lived thirty yeats in the desert with the wild beasts; and after thirty years he came from the wilderness to the habitations of men. From the day when his father made him flee to the desert, when he was a child, until he came (again), he covered himself with the same clothes both summer and winter, without changing his ascetic mode of life. And he preached in the wilderness of Judaea, saying, 'Repent, the kingdom of God draweth nigh;' and he baptised them with the baptism of repentance for the remission of their sins. He said to them, 'Behold, there cometh after me a man who is stronger than I, the latchets of whose shoes I am not worthy to unloose. I baptise you with water for repentance, but He who cometh after me is stronger than I; He will baptise you with the Holy Spirit and with fire:' thereby referring to that which was about to be wrought on the apostles, who received the Holy Spirit by tongues of fire, and this took the place of baptism to them, and by this grace they were about to receive all those who were baptised in Christ. Jesus came to John at the river Jordan to be baptised by him; but John restrained Him, saying, 'I need to be baptised by Thee, and art Thou come to me?' Jesus said to him, 'It is meet thus to fulfil the words of prophecy.' When Jesus had been baptised, as soon as He had gone up from the water, He saw that the heavens were rent, and the Spirit like a dove descended upon Him, and a voice from heaven said, 'This is My beloved Son, in whom I am well pleased.' On this day the Trinity was revealed to men; by the Father who cried out, and by the Son who was baptised, and by the Holy Spirit which came down upon Him in the corporeal form of a dove. Touching the voice which was heard from heaven, saying, 'This is My beloved Son, in whom I am well pleased, hear ye Him,' every one heard the voice; but John only was worthy to see the vision of the Spirit by the mind. The day of our Lord's birth was the fourth day of the week, but the day of His baptism was the fifth. When John rebuked Herod, saying that it was not lawful for him to take his brother Philip's wife, he seized John, and cast him into the prison called Machaerus. And it came to pass on a certain day. when Herod on his birthday made a feast for his nobles, that Boziya, the daughter of Herodias, came in and danced before the guests; and she was pleasing in the sight of Herod and his nobles. And he said to her, 'Ask of me whatsoever thou desirest and I will give it to thee;' and he sware to her saying that whatever she asked he would give it to her unto the half of his kingdom. She then went in to Herodias her mother and said to her, 'What shall I ask of him?' She said to her, 'The head of John the Baptist;' for the wretched woman thought that when John should be slain, she and her daughter would be free from the reprover, and would have an opportunity to indulge their lust: for Herod committed adultery with the mother and with her daughter. Then she went in to the king's presence and said to him, 'Give me now the head of John the Baptist on a charger.' And the king shewed sorrow, as if, forsooth, he was not delighted at the murder of the saint; but by reason of the force and compulsion of the oath he was obliged to cut off John's head. If, O wretched Herod, she had demanded of thee the half of thy kingdom, that she might sit upon the throne beside thee and divide (it) with thee, wouldst thou have acceded to her, and not have falsified thy oath, O crafty one? And the king commanded an executioner, and he cut off the head of the blessed man, and he put it in a charger and brought and gave it to the damsel, and the damsel gave it to her mother. Then she went out to dance upon the ice, and it opened under her, and she sank into the water up to her neck; and no one was able to deliver her. And they brought the sword with which John's head had been cut off, and cut off hers and carried it to Herodias her mother. When she saw her daughter's head and that of the holy man, she became blind, and her right hand, with which she had taken up John's head, dried up; and her tongue dried up, because she had reviled him, and Satan entered into her, and she was bound with fetters. Some say that the daughter of Herodias was called Boziya, but others say that she also was called by her mother's name Herodias. When John was slain, his disciples came and took his body and laid him in a grave; and they came and told Jesus. The two disciples whom John sent to our Lord, saying, 'Art thou He that should come, or do we look for another,' were Stephen the martyr and deacon, and Hananyah (Ananias) who baptised Paul. Some say that the wild honey and locusts, which he fed upon in the wilderness, was manna, -- which was the food of the children of Israel, and of which Enoch and Elijah eat in Paradise, -- for its taste is like that of honey. Moses compares it to coriander seed, and the anchorites in the mountains feed upon it. Others say that it was a root like unto a carrot: it is called Kamus, and its taste is sweet like honeycomb. Others say that the locusts were in reality some of those which exist in the world, and that the honey-comb was that which is woven by the little bees, and is found in small white cakes in desert places

BOOK OF THE BEE CHAPTER 42

Of Our Lord Is Fast; Of The Strife Which He Waged With The Devil; And Of The Mighty Deeds That He Wrought.

Two days after His baptism, He chose eight of the twelve disciples; and on the third day He changed the water into wine in the city of Cana. After He went forth from the wilderness, He completed the number of the twelve, according to the number of the tribes of the children of Israel and according to the number of the months. After the twelve disciples, He chose seventy and two, according to the number of the seventy-two elders. When He went out to the desert after He had changed the water into wine, He fasted forty days and forty nights. Some say that our Lord and the devil were waging war with one another for forty days; others say that the three contests took place in one day. After He had conquered the devil by the power of His Godhead, and had given us power to conquer him, He began to teach the nations. He wrought miracles, healed the sick, cleansed the lepers, cast out devils, opened the eyes of the blind, made the lame walk, made cripples stand, gave hearing to the deaf, and speech of tongue to the dumb. He satisfied five thousand with five loaves, and there remained twelve basketfuls; and with seven loaves and two fishes He satisfied four thousand (men), besides women and children, and there remained seven basketfuls. And some writers say that our Lord satisfied forty thousand men and women and children with five loaves. He walked upon the water and the sea as upon dry land. He rebuked the sea when it was disturbed, and it ceased from its disturbance. He raised up four dead; the daughter of Jairus, the widow's son, the servant of the centurion, and His friend Lazarus after (he had been dead) four days. He subjected Himself to the ancient law of Moses, that it might not be thought He was opposed to the divine commandments; and when the time came for Him to suffer, and to draw nigh to death that He might make us live by His death, and to slay sin in His flesh, and to fulfil the prophecies concerning Him, first of all He kept the Passover of the law; He dissolved the old covenant, and then He laid the foundation for the new law by His own Passover.

BOOK OF THE BEE CHAPTER 43

Of The Passover Of Our Lord.

When the time of the Passover came, He sent two of His disciples to a man with whom they were not acquainted, saying, 'When ye enter the city, behold, there will meet you a man carrying a pitcher of water; follow him, and wheresoever he entereth, say ye to the master of the house, "Our Master saith, Where is the guest-chamber, where I may eat the Passover with My disciples?" and behold, he will shew a large upper chamber made ready and prepared; there make ye ready for us.' And because at that time crowds of people were flocking thickly into Jerusalem to keep the feast of the Passover, so that all the houses of the inhabitants of Jerusalem were filled with people by reason of the great crowd which was resorting thither, our Lord, by the power of His Godhead worked upon the master of the house to make ready a large upper chamber without his being aware for whom he was preparing it, but he thought that perhaps some great man among the nobles and grandees of the Jews was about to come to him, and that it was right to keep a room for him furnished with all things (needful); because all those who came from other places to Jerusalem were received into their houses by the people of the city, and whatsoever they required for the use of the feast of the Passover they supplied. Hence the master of the house made ready that upper chamber with all things (needful), and permitted no man to enter therein, being restrained by the power of our Lord. Because a mystical thing was about to be done in it, it was not meet for Him to perform the hidden mystery when others were near. Mar Basil says: 'On the eve of the Passion, after the disciples had received the body and blood of our Lord, He poured water into a basin and began to wash the feet of His disciples; this was baptism to the apostles. They were not all made perfect, because they were not all pure, for Judas, the son of perdition, was not sanctified; and because that basin of washing was in truth baptism, as our Lord said to Simon Peter, "If I wash thee not, thou hast no part with Me," that is to say, "If I baptise thee not, thou art not able to enter into the kingdom of heaven." Therefore, every one who is not baptised by the priests, and receives not the body and blood of Christ our Lord, enters not into the kingdom of heaven.' Mar Dad-isho says in his commentary on Abba Isaiah: 'When our Lord at the Passover had washed the feet of His disciples, He kissed the knees of Judas, and wiped the soles of his feet with the napkin which was girt round His loins, like a common slave; for everything which our Lord did, He did for our teaching.' Mar Basil in his 'Questions' advises Christians to eat oil, drink wine, and break their fast on this evening: for in it was the old covenant finished, and the new one inaugurated; and in it was the (chosen) people stripped of holiness, and the nations were sanctified and pardoned. Although this saint permits (this), yet the other fathers do not give leave (to do) this, neither do we, nor those of our confession

BOOK OF THE BEE CHAPTER 44 Of The Passion Of Our Lord.

Three years and three months after His baptism, Judas Iscariot the son of Simon betrayed his Lord to death. He was called Iscariot (Sekhariota) from the name of his town (Sekhariot), and he had the sixth place among the disciples before he betraved our Lord. Our Lord was crucified at the third hour of Friday, the ninth of Nisan. Caiaphas, who condemned our Lord, is Josephus. The name of Bar-Abba was Jesus. The name of the soldier who pierced our Lord with the spear, and spat in His face, and smote Him on His cheek, was Longinus; it was he who lay upon a sick bed for thirty-eight years, and our Lord healed him, and said to him, 'Behold, thou art healed; sin no more, lest something worse than the first befall thee. The watchers at the grave were five, and these are their names: Issachar, Gad, Matthias, Barnabas and Simon; but others say they were fifteen, three centurions and their Roman and Jewish soldiers. Some men have a tradition that the stone which was laid upon the grave of our Lord was the stone which poured out water for the children of Israel in the wilderness. The grave in which our Redeemer was laid was prepared for Joshua the son of Nun, and was carefully guarded by the Divine will for the burial of our Lord. The purple which they put on our Lord mockingly, was given in a present to the Maccabees by the emperors of the Greeks; and they handed it over to the priests for dressing the temple. The priests took it and brought it to Pilate, testifying and saying, 'See the purple which He prepared when He thought to become king.' The garment which the soldiers divided into four parts indicates the passibility of His body, The robe without seam at the upper end which was not rent, is the mystery of the Godhead which cannot admit suffering. As touching the blood and water which came forth from His side, John the son of Zebedee was deemed worthy to see that vivifying flow from the life-giving fountain. Mar John Chrysostom says: 'When His side was rent by the soldiers with the spear, there came forth immediately water and blood. The water is a type of baptism, and the blood is the mystery of His precious blood, for baptism was given first, and then the cup of redemption. But in the gospel it is written, "There went forth blood and water," As to the tree upon which our Redeemer was crucified, some have said that He was crucified upon those bars with which they carried the ark of the covenant; and others that it was upon the wood of the tree on which Abraham offered up the ram as an offering instead of Isaac. His hands were nailed upon the wood of the fig-tree of which Adam ate, and behold, we have mentioned its history with that of Moses' rod. The thirty pieces of silver (zuze) which Judas received, and for which he sold his Lord, were thirty pieces according to the weight of the sanctuary, and were equal to six hundred pieces according to the weight of our country. Terah made these pieces for Abraham his son; Abraham gave them to Isaac; Isaac bought a village with them; the owner of the village carried them to Pharaoh; Pharaoh sent them to Solomon the son of David for the building of his temple; and Solomon took them and placed them round about the door of the altar. When Nebuchadnezzar came and took captive the children of Israel, and went into Solomon's temple and saw that these pieces were beautiful, he took them, and brought them to Babylon with the captives of the children of Israel. There were some Persian youths there as hostages, and when Nebuchadnezzar came from Jerusalem, they sent to him everything that was meet for kings and rulers. And since gifts and presents had been sent by the Persians, he released their sons and gave them gifts and presents, among which were those pieces of silver about which we have spoken; and they carried them to their parents. When Christ was born and they saw the star, they arose and took those pieces of silver and gold and myrrh and frankincense, and set out on the journey; and they came to the neighbourhood of Edessa, and these kings fell asleep by the roadside. And they arose and left the pieces behind them, and did not remember them, but forgot that anything of theirs remained behind. And certain merchants came and found them, and took these pieces, and came to the neighbourhood of Edessa, and sat down by a well of water. On that very day an angel came to the shepherds. and gave them the garment without seam at the upper end, woven throughout. And he said to them, 'Take this garment, in which is the life of mankind.' And the shepherds took the garment, and came to the well of water by the side of which were those merchants. They said to them, 'We have a garment without seam at the upper end: will ve buy it?' The merchants said to them, 'Bring it here.' When they saw the garment, they marvelled and said to the shepherds: 'We have thirty pieces of silver which are meet for kings; take them and give us this garment.' When the merchants had taken the garment, and had gone into the city of Edessa, Abgar the king sent to them and said, 'Have ye anything meet for kings, that I may buy it from you?' The merchants said to him, 'We have a garment without seam at the upper end.' When the king saw the garment, he said to them, 'Whence have ye this garment?' They said to him, 'We came to a well by the gate of thy city, and we saw it in the hands of some shepherds, and we bought it from them for thirty pieces of stamped silver, which were

also meet for kings like thyself.' The king sent for the shepherds, and took the pieces from them, and sent them together with the garment to Christ for the good that He had done him in healing his sickness. When Christ saw the garment and the pieces, He kept the garment by Him, but He sent the pieces to the Jewish treasury. When Judas Iscariot came to the chief priests and said to them, 'What will ye give me that I may deliver Him to you?' the priests arose and brought those pieces, and gave them to Judas Iscariot; and when he repented, he returned them to the Jews, and went and hanged himself. And the priests took them and bought with them a field for a burial-place for strangers.

Of Joseph the senator (Greek: Bouleuths), and why he was thus called. The senators were a class very much honoured in the land of the Romans; and if it happened that no one could be found of the royal lineage, they made a king from among this class. If one of them committed an offence, they used to beat his horse with white woollen gloves instead of him. This Joseph was not a senator by birth, but he purchased the dignity, and enrolled himself among the Roman senate, and was called Senator.

As for the committal of Mary* to John the son of Zebedee by our Lord, He said to her, 'Woman, behold thy son,' and to John He said, 'Behold thy mother,' and from that hour he took her into his house and ministered unto her. Mary lived twelve years after our Lord's Ascension: the sum of the years which she lived in the world was fifty-eight years, but others say sixty-one years. She was not buried on earth, but the angels carried her to Paradise, and angels bore her bier. On the day of her death all the apostles were gathered together, and they prayed over her and were blessed by her. Thomas was in India, and an angel took him up and brought him, and he found the angels carrying her bier through the air; and they brought it nigh to Thomas, and he also prayed and was blessed by her.

As regards the name of arubhta (i.e. the eve of the Jewish Sabbath), it was not known until this time, but that day was called the sixth day. And when the sun became dark, and the Divine Care also set and abandoned the Israelitish people, then that day was called arubhta.

Touching the writing which was written in Greek, Hebrew and Latin, and set over Christ's head, there was no Aramean written upon the tablet, for the Arameans or Syrians had no part in (the shedding of) Christ's blood, but only the Greeks and Hebrews and Romans; Herod the Greek and Caiaphas the Hebrew and Pilate the Roman. Hence when Abgar the Aramean king of Mesopotamia heard (of it), he was wroth against the Hebrews and sought to destroy them.

(*Footnote: In the History of the Virgin, fol, 156 a, we read as follows: 'And Mary remained in Jerusalem, and grieved because of her separation from our Lord Jesus Christ, and the absence of the apostles from her. And she prayed and cast frankincense into the fire, and lifted up her eyes and spread out her hands to heaven, and said, "O Christ, the Son of the living God, hearken unto the voice of Thy handmaiden, and send unto me Thy friend John the young with his fellowapostles, that I may see them and be comforted by the sight of them before the day of my death; and I will praise and adore Thy goodness." And straightway it was revealed by the Holy Spirit to each one of the apostles, in whatever country he was in, that the blessed Mary was about to depart from this world into the never-ending life. And the Spirit summoned them, along with those of them who were dead, to be gathered together at daybreak to the blessed Mary for her to see them: and each one of them came to her from his own land at dawn by the agency of the Holy Spirit, and they saluted Mary and each other, and adored her.' See Wright, Contributions to the Apoc. Lit. of the New Test.)

BOOK OF THE BEE CHAPTER 45

Of The Resurrection Of Our Lord.

Since the history of our Lord's Passion and Resurrection is recorded in the Gospel, there is no need to repeat it (here). After our Lord rose from the dead, He appeared ten times. First, to Mary Magdalene, as John the Evangelist records. Secondly, to the women at the grave, as Matthew mentions. Thirdly, to Cleopas and his companion, as Luke says. The companion of Cleopas, when they were going to Emmaus, was Luke the Evangelist. Fourthly, to Simon Peter, as Luke says. Fifthly, to all the disciples, except Thomas, on the evening of the first day of the week, when he went in through the closed doors, as Luke and John say. Sixthly, eight days after, to the disciples, and to Thomas with them, as John says. Seventhly, on the mount, as Matthew says. Eighthly, upon the sea of Tiberias, as John says. The reason that Simon Peter did not recognise Him was because he had denied Him, and was ashamed to look upon Him; but John, because of his frank intimacy with our Lord, immediately that he saw Him, knew Him. Ninthly, when He was taken up to heaven from the Mount of Olives, as Mark and Luke say. Tenthly, to the five hundred at once, who had risen from the dead, as Paul says. After His Ascension, He appeared to Paul on the way to Damascus, when He blinded his eyes; and also to Stephen, the martyr and deacon, when he was stoned.

BOOK OF THE BEE CHAPTER 46

Of The Ascension Of Our Lord To Heaven.

After our Redeemer had risen from the grave, and had gone about in the world forty days, He appeared to His disciples ten times, and ate and drank with them by the side of the Sea of Tiberias. At this point the heathen say to us, that if our Lord really ate and drank after His resurrection, there will certainly be eating and drinking after (our) resurrection; but if He did not really eat and drink, then all the actions of Christ are mere phantasms. To these we make answer, that this world is a world of need for food; therefore He ate and drank, that it might not be thought He was a phantom; and because many who have risen from the dead have eaten and drunk in (this) world until they departed and died, as, for example, the dead (child) whom Elisha raised, and the dead whom our Lord raised. Our Lord did not eat after His resurrection because He needed food, but only to make certain His humanity: for, behold. He once remained in the desert forty days without food, and was not injured by hunger. Some say that after His resurrection our Lord ate food like unto that which the angels ate in the house of Abraham, and that the food was dissipated and consumed by the Divine Power. just as fire licks up oil without any of it entering into its substance. Our Lord remained upon the earth forty days, even as He had fasted forty days, and as Elijah fasted forty days, and as Moses fasted forty days at two several times, and as the rain continued for forty days during the flood, and as God admonished the Ninevites for forty days, and as the spies remained (absent) for forty days, and as the children of Israel wandered about in the wilderness for forty years, and like the child whose fashioning in the womb is completed in forty days. After forty days, our Lord took up His disciples to the Mount of Olives, and laid His hand upon them, and blessed them, and commanded them concerning the preaching and teaching of the nations. And it came to pass that while He was blessing them. He was separated from them, and went up to heaven: and they worshipped Him. And there appeared to them angels, encouraging them and saying, 'This Jesus, who has been taken up from you to heaven, is about to come again even as ye have seen Him go up to heaven.' Then they returned to that upper chamber where they were, and stayed there ten days, until they received the Holy Spirit in the form of tongues of fire. Simon Peter said to his fellow-disciples, 'It is right for us to put some one in the place of Judas to complete the number of twelve;' and they cast lots, and the lot fell upon Matthias, and he was numbered with the eleven apostles.

As concerning the manner in which our Lord entered heaven without cleaving it, some say that He went in as He did through the closed doors; and as He came forth from the virgin womb, and Mary's virginity returned to its former state; and like the sweat from the body; and as water is taken up by the roots of the olive and other trees, and reaches in the twinkling of an eye the leaves, flowers and fruits, as if through certain ducts, without holes or channels being pierced in them. Thus by an infinite and ineffable miracle our Lord entered into heaven without cleaving it. And if the bodies of us who are accustomed to drink water and wine pour out sweat without our flesh being rent or our skin pierced, how very much easier is it for the Divine Power to go in through closed doors and within the firmament of heaven without rending or cleaving it?

As regards the upper chamber in which our Lord held His Passover, some say that it belonged to Lazarus, and others to Simon the Cyrenian, and others to Joseph the senator; but Joshua the son of Nun, the Catholicus, says that it belonged to Nicodemus. The apostles remained in the upper chamber ten days after the Ascension, being constant in fasting and prayer, and expecting the Spirit, the Comforter, which our Lord Jesus Christ promised them.

BOOK OF THE BEE CHAPTER 47

Of The Descent Of The Holy Spirit Upon The Apostles In The Upper Chamber.

Ten days after our Lord's Ascension, when the holy apostles were assembled in the upper chamber waiting for the promise of our Lord, of a sudden, at the third hour of the holv Sunday of Pentecost, a mighty sound was heard, so that all men were terrified and marvelled at the mightiness of the sound; and the chamber was filled with an ineffably strong light. And there appeared over the head of each one of them (something) in the form of tongues of fire, and there breathed forth from thence a sweet odour which surpassed all aromas in this world. The eyes of their hearts were opened, and they began interpreting new things and uttering wonderful things in the languages of all nations. When the Jews saw them, they thought within themselves that they had been drinking new wine and were drunk, and that their minds were depraved. On that day they participated in the mystery of the body and blood of our Lord. and sanctified the leavened bread of the sign of the cross (the eucharistic wafers) and the oil of baptism.

Some men have a tradition that when our Lord broke His body for His disciples in the upper chamber, John the son of Zebedee hid a part of his portion until our Lord rose from the dead. And when our Lord appeared to His disciples and to

THE GRAND BIBLE

Thomas with them, He said to Thomas, 'Hither with thy finger and lay it on My side, and be not unbelieving, but believing.' Thomas put his finger near to our Lord's side, and it rested upon the mark of the spear, and the disciples saw the blood from the marks of the spear and nails. And John took that piece of consecrated bread, and wiped up that blood with it; and the Easterns, Mar Addai and Mar Mari, took that piece, and with it they sanctified this unleavened bread which has been handed down among us. The other disciples did not take any of it, because they said, 'We will consecrate for ourselves whenever we wish.' As for the oil or baptism, some say that it was part of the oil with which they anointed the kings; others say that it was part of the unguent wherewith they embalmed our Lord; and many agree with this (statement). Others again say that when John took that piece of consecrated bread of the Passover in his hand, it burst into flame and burnt in the palm of his hand, and the palm of his hand sweated, and he took that sweat and hid it for the sign of the cross of baptism. This account we have heard by ear from the mouth of a recluse and visitor (Greek: periodeuths), and we have not received it from Scripture. The word Pentecost is interpreted 'the completion of fifty days.

BOOK OF THE BEE CHAPTER 48

Of The Teaching Of The Apostles, And Of The Places Of Each One Of Them, And Of Their Deaths.

Next we write the excellent discourse composed by Mar Eusebius of Caesarea upon the places and families of the holy apostles.

Know then that the apostles were twelve and seventy. When the apostles had received the gift of the Holy Spirit, on the day following they fasted this feast of the apostles (which we keep); but the Malkaye (Melchites) say that the apostles fasted eight days after. Their names are as follows.

Simon, the chief of the apostles, was from Bethsaida, of the tribe of Naphtali. He first preached in Antioch, and built there the first of all churches, which was in the house of Cassianus, whose son he restored to life. He remained there one year, and there the disciples were called Christians. From thence he went to Rome, where he remained for twenty-seven years; and in the three hundred and seventy-sixth year of the Greeks, the wicked Nero crucified him head downwards.

Andrew his brother preached in Scythia and Nicomedia and Achaia. He built a church in Byzantium, and there he died and was buried.

John the son of Zebedee (Zabhdai) was also from Bethsaida, of the tribe of Zebulun. He first preached in Asia (Ephesus), and was afterwards cast into exile in the island of Patmos by Tiberius Caesar. He then went to Ephesus, and built in it a church. Three of his disciples went with him: Ignatius, who was afterwards bishop of Antioch, and who was thrown to the beasts in Rome; Polycarp, who was afterwards bishop of Smyrna, and was crowned by fire; and John, to whom he committed the priesthood and the bishopric after him. When John had lived a long time, he died and was buried at Ephesus; and John, the disciple of the Evangelist, who became bishop of Ephesus, buried him; for he commanded them that no one should know the place of his burial. The graves of both of them are in Ephesus; the hidden one of the Evangelist, and the other of his disciple John, the author of the Revelation; he said that everything he had written down, he had heard from John the Evangelist.

James, the brother of John, preached in his city Bethsaida, and built a church there. Herod Agrippas slew him with the sword one year after the Ascension of our Lord. He was laid in Akar, a city of Marmarika.

Philip also was from Bethsaida, of the tribe of Asher. He preached in Phrygia, Pamphylia and Pisidia; he built a church in Pisidia, and died and was buried there. He lived twenty-seven years as an apostle.

Thomas was from Jerusalem, of the tribe of Judah. He taught the Parthians, Medes and Indians; and because he baptised the daughter of the king of the Indians, he stabbed him with a spear and he died. Habban the merchant brought his body, and laid it in Edessa, the blessed city of Christ our Lord. Others say that he was buried in Mahluph, a city in the land of the Indians.

Matthew the Evangelist was from Nazareth, of the tribe of Issachar. He preached in Palestine, Tyre and Sidon, and went as far as Gabbula. He died and was buried in Antioch, a city of Pisidia.

Bartholomew was from Endor, of the tribe of Issachar. He preached in inner Armenia, Ardeshir, Ketarbol, Radbin, and Pruharman. After he had lived thirty years as an apostle, Hursti the king of the Armenians crucified him, and he was buried in the church which he built in Armenia.

Jude, the son of James, who was surnamed Thaddaeus (Taddai), who is also Lebbaeus (Lebbai), was from Jerusalem, of the tribe of Judah. He preached in Laodicea and in Antaradus and Arwad. He was stoned in Arwad, and died and was buried there.

Simon Zelotes was from Galilee, of the tribe of Ephraim. He preached in Shemeshat (Samosata), Parin (Perrhe), Zeugma, Halab (Aleppo), Mabbog (Manbig), and Kenneshrin (Kinnesrin). He built a church in Kyrrhos, and died and was buried there.

James, the son of Alphaeus (Halphai), was from the Jordan, of the tribe of Manasseh. He preached in Tadmor (Palmyra), Kirkesion (Kirkisiya), and Callinicos (ar-Rakkah), and came to Batnan of Serug (Sarug), where he built a church, and died and was buried there.

Judas Iscariot, the betrayer, was from the town of Sekharyut of the tribe of Gad, though some say that he was of the tribe of Dan. He was like unto the serpent that acts deceitfully towards its master, because like a serpent, he dealt craftily with his Lord. Matthias, of the tribe of Reuben, came in in his stead. He preached in Hellas, and in Sicily, where he built a church, and died and was buried in it.

While James the brother of our Lord was teaching the Jews in Jerusalem, they cast him down from a pinnacle of the temple; and while his life was yet in him, a fuller of cloth smote him upon the head with a club and beat it in; and afterwards they stoned him with stones.

John the Baptist was of the tribe of Levi. Herod the tetrarch slew him, and his body was laid in Sebastia.

Ananias (Hananya) the disciple of the Baptist taught in Damascus and Arbel. He was slain by Pol, the general of the army of Aretas, and was laid in the church which he built at Arbel (Irbil).

Paul of Tarsus was a Pharisee by sect, of the tribe of Ephraim. When he had been baptised by Ananias, he wrought many miracles, and taught great cities, and bore and suffered dangers not a few for the name of Christ. Afterwards he went to Peter at Rome. When they divided the world between them, and the heathen fell to Paul's lot, and the Jewish nation to Peter, and they had turned many to the truth of Christ, Nero commanded that they should both die a cruel death. Then Simon asked to be crucified head downwards, that he might kiss that part of the cross where the heels of his Master had been. As they were going forth to be slain, they gave the laying on of hands of the priesthood to their disciples, Peter to Mark, and Paul to Luke. When Peter had been crucified, and Paul slain, together with many of those who had become their disciples, Mark and Luke went forth by night, and brought their bodies into the city. Now Paul's head was lost among the slain, and could not be found. Some time after, when a shepherd was passing by the spot where the slain were buried, he found Paul's head, and took it upon the top of his staff, and laid it by his sheep-fold. At night he saw a fire blazing over it, and he went in (to the city) and informed the holy bishop Xystus (Sixtus) and the clergy of the church; and they all recognised that it was Paul's head. Xystus said to them, 'Let us watch and pray the whole night, and let us bring out the body and lay the head at its feet; and if it joins again to its neck, it will be certain that it is Paul's.' And when they had done so, the whole body was restored, and the head was joined to its neck as if the vertebrae had never been severed; and those who saw it were amazed and glorified God. From his call to the end of his life was thirty-five years; he went about in every place for thirty-one years; for two years he was in prison at Caesarea, and for two years at Rome. He was martyred in the thirty-sixth year after the Passion of our Lord, and was laid with great honour in the magnificent royal catacombs in Rome. They celebrate every year the day of his commemoration on the twenty-ninth of the month of Tammuz.

Luke the physician and Evangelist was first of all a disciple of Lazarus, the brother of Mary and Martha, and was afterwards baptised by Philip in the city of Beroea. He was crowned with the sword by Horos, the judge (or governor) of the emperor Tiberius, while he was preaching in Alexandria, and was buried there.

Mark the Evangelist preached in Rome, and died and was buried there. Some say that he was the son of Simon Peter's wife, others that he was the Son of Simon; and Rhoda was his sister. He was first called John, but the Apostles changed his name and called him Mark, that there might not be two Evangelists of one name.

Addai was from Paneas, and he preached in Edessa and in Mesopotamia in the days of Abgar the king; and he built a church in Edessa. After Abgar died, Herod Abgar's son slew him in the fortress of Aggel. His body was afterwards taken and carried to Rome; but some say that he was laid in Edessa.

Aggai his disciple was first of all a maker of silks for Abgar, and became a disciple. After Abgar's death, his son reigned, and he required of Aggai to weave silks for him; and when he consented not, saying, 'I cannot forsake teaching and preaching to return to weaving,' he smote him with a club upon his legs and brake them, and he died.

Thaddaeus (Taddai) came after him at Edessa, and Herod, the son of Abgar, slew him also; he was buried at Edessa.

Zacchaeus (Zaccai) the publican and the young man whom our Lord brought to life were both slain together while they were preaching in Mount Horon.

The Jews smote Simon the leper while he was teaching in Ramah, and he died (there).

Joseph the Senator taught in Galilee and Decapolis; he was buried in his town of Ramah. Nicodemus the Pharisee, the friend of our Lord, received and honoured the Apostles in Jerusalem; and he died and was buried there.

Nathaniel was stoned while he was teaching in Mount Horon, and died.

Simon the Cyrenian was slain while he was teaching in the island of Chios.

Simon the son of Cleopas became bishop of Jerusalem. When he was an old man, one hundred years of age, Irenaeus the chiliarch crucified him.

Stephen the martyr was stoned with stones at Jerusalem, and his body was laid in the village of Kephar Gamla.

Mark, who was surnamed John, taught at Nyssa and Nazianzus. He built a church at Nazianzus, and died and was buried there. Some say that he is the Evangelist, as we have mentioned.

Cephas, whom Paul mentions, taught in Baalbec, Hims (Emesa) and Nathron (Batharun). He died and was buried in Shiraz.

Barnabas taught in Italy and in Kura; he died and was buried in Samos.

Titus taught in Crete, and there he died and was buried. Sosthenes taught in the country of Pontus and Asia. He was

thrown into the sea by the command of Nonnus the prefect. Criscus (Crescens) taught in Dalmatia; he was imprisoned in

Alexandria, where he died of hunger and was buried. Justus taught in Tiberias and in Caesarea, where he died

and was buried. Andronicus taught in Illyricum, where he died and was buried.

The people of Zeugma slew Rufus while he was teaching in Zeugma.

Patrobas taught in Chalcedon, and he died and was buried there.

Hermas the shepherd taught in Antioch, and he died and was buried there.

Narcissus taught in Hellas, and he died and was buried there.

Asyncritus went to Beth-Huzaye (Khuzistan), and there he died and was buried.

Aristobulus taught in Isauria, and there he died and was buried.

Onesimus was the slave of Philemon, and he fled from him and went to Paul, while he was in prison; because of this Paul calls him 'the son whom I have begotten in my bonds.' His legs

were broken in Rome. Apollos the elect was burnt with fire by Sparacleus, the governor of Gangra.

Olympas, Stachys and Stephen were imprisoned in Tarsus, and there they died in prison.

Junias was captured in Samos, and there he was slain and died.

Theocritus died while teaching in Ilios, and was buried there.

Martalus was slain while teaching the barbarians.

Niger taught in Antioch, and died and was buried there. They dragged Lucius behind a horse, and thus he ended his life.

While Alexander was teaching in Heracleopolis, they threw him into a pit and he died.

Milus, while he was teaching in Rhodes, was thrown into the sea and drowned.

Silvanus and Herodion (Rhodion) were slain while they were preaching in the city of Acco.

Silas taught in Sarapolis (Hierapolis?), and died and was buried there.

Timothy taught in Ephesus, and died and was buried there. Manael was burnt with fire while teaching in Acco, and died.

The Eunuch whom Philip baptised, the officer of Candace the queen of the Ethiopians, went to Ethiopia and preached there. Afterwards, while he was preaching in the island of Parparchia, they strangled him with a cord.

Jason and Sosipatrus were thrown to the wild beasts while they were teaching in Olmius.

Demas taught in Thessalonica, and there he died and was buried.

Omius (Hymenaeus) taught in Melitene, and there he died and was buried.

They threw Thraseus into a fiery furnace, while he was teaching at Laodicea.

Bistorius (Aristarchus?) taught in the island of Ko, and there he died and was buried.

Abrios and Motos went to the country of the Ethiopians, and there they died and were buried.

Levi was slain by Charmus, while he was teaching in Paneas. Nicetianus (Nicetas) was sawn in two while teaching in Tiberias

While John and Theodorus were preaching in the theatre of Baalbec, they threw them to the beasts.

The prefect Methalius slew Euchestion and Simon in Byzantium.

Ephraim (Aphrem) taught in Baishan, and he died and was buried there.

James taught and preached in Nicomedia, and he died and was buried there.

BOOK OF THE BEE CHAPTER 49

Justus was slain at Corinth.

The Names Of The Apostles In Order.

The names of The Twelve. Simon Peter; Andrew his brother; James the son of Zebedee; John his brother; Philip; Bartholomew; Thomas; Matthew the publican; James the son of Alphaeus; Labbaeus, who was surnamed Thaddaeus; Simon the Cananite; Judas Iscariot, in whose stead came in Matthias.

The names of The Seventy. James, the son of Joseph; Simon the son of Cleopas; Cleopas his father; Joses; Simon; Judah; Barnabas; Manaeus; Ananias, who baptised Paul; Cephas, who preached at Antioch: Joseph the senator: Nicodemus the archon; Nathaniel the chief scribe; Justus, that is Joseph, who is called Barshabba; Silas; Judah; John, surnamed Mark; Mnason, who received Paul; Manaël, the foster-brother of Herod; Simon called Niger; Jason, who is (mentioned) in the Acts (of the Apostles); Rufus; Alexander; Simon the Cyrenian, their father; Lucius the Cyrenian; another Judah, who is mentioned in the Acts (of the Apostles); Judah, who is called Simon; Eurion (Orion) the splay-footed; Thorus; Thorisus; Zabdon; Zakron. These are the seven who were chosen with Stephen: Philip the Evangelist, who had three daughters that used to prophesy; Stephen; Prochorus; Nicanor; Timon; Parmenas; Nicolaus, the Antiochian proselyte; Andronicus the Greek; Titus; Timothy.

These are the five who were with Peter in Rome: Hermas; Pligta; Patrobas; Asyncritus; Hermas.

These are the six who came with Peter to Cornelius: Criscus (Crescens); Milichus; Kiriton (Crito); Simon; Gaius, who received Paul; Abrazon; Apollos.

These are the twelve who were rejected from among the seventy, as Judas Iscariot was from among the twelve, because they absolutely denied our Lord's divinity at the instigation of Cerinthus. Of these Luke said, 'They went out from us, but they were not of us;' and Paul called them 'false apostles and deceitful workers.' Simon; Levi; Bar-Kubba; Cleon; Hymenaeus; Candarus; Clithon; Demas; Narcissus; Slikispus; Thaddaeus; Marutha. In their stead there came in these: Luke the physician; Apollos the elect; Ampelius; Urbanus; Stachys; Popillius (or Publius); Aristobulus; Stephen (not the Corinthian); Herodion the son of Narcissus; Olympas; Mark the Evangelist; Addai; Aggai; Mar Mari.

It is said that each one of the twelve and of the seventy wrote a Gospel; but in order that there might be no contention and that the number of 'Acts' might not be multiplied, the apostles adopted a plan and chose two of the seventy, Luke and Mark, and two of the twelve, Matthew and John.

BOOK OF THE BEE CHAPTER 50

Of Some Minor Matters.

These are they who were married among the apostles: Peter, the chief of the apostles; Philip the Evangelist; Paul; Nathaniel, who is Bartholomew; Labbaeus, who is Thaddaeus, who is Judah the son of Jacob; Simon the Cananite, who is Zelotes, who is Judah the son of Simon.

The child whom our Lord called and set (in the midst), and said, 'Except ye be converted, and become as children, ye shall not enter into the kingdom of heaven,' was Ignatius, who became patriarch of Antioch. He saw in a vision the angels ministering in two bands, and he ordained that (men) should minister in the church in like manner. After some time this order was broken through; and when Diodorus went with his father on an embassy to the land of Persia, and saw that they ministered in two bands, he came to Antioch his country, and re-established the custom of their ministering in two bands.

The children whom they brought near to our Lord, that He might lay His hand upon them and pray, were Timothy and Titus, and they were deemed worthy of the office of bishop.

The names of the Maries who are mentioned in the Gospels. Mary the Virgin, the mother of our Lord; Mary the wife of Joseph; Mary the mother of Cleopas and Joseph; Mary the wife of Peter, the mother of Mark the Evangelist; and Mary the sister of Lazarus. Some say that Mary the sinner is Mary of Magdala; but others do not agree with this, and say that she was other than the Magdalene. Those who say that she was the Magdalene tell us that she built herself a tower with the wages of fornication; and those who say that she was other than the Magdalene, say that Mary Magdalene was called after the name of her town Magdala, and that she was a pure and holy woman.

BOOK OF THE BEE CHAPTER 51

The Names Of The Eastern Catholics, The Successors Of The Apostles Addai And Mari.

Addai was buried in Edessa.

Mari (was buried) in the convent of Koni.

Abris, called in Greek A[m]brosius; the place of his grave is unknown; he was of the laying on of hands of Antioch.

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3354 Abraham was of the laying on of hands of Antioch; he was descended from the family of Jacob the son of Joseph; his grave is in Ctesiphon.

James, of the laying on of hands of Antioch, was also of the family of Joseph the husband of Mary; his grave is in Ctesiphon.

Aha-dabu[hi] was of the laying on of hands of Antioch; his grave is in Ctesiphon.

Shahlupha was of the laying on of hands of Ctesiphon, and he was buried there.

Papa; his grave is at Ctesiphon.

Simon bar Sabbae was martyred at Shoshan.

Shah-dost was buried in Ctesiphon.

Bar-Beesh-shemin was martyred and buried in Elam (Khuzistan).

Tumarsa was buried in Ctesiphon.

Kayoma was buried in Ctesiphon; he abdicated the patriarchate, and another was put in his place, and was before him until he died.

Isaac was buried in Ctesiphon.

Aha was buried in Ctesiphon. Yab-alaha was of the school of Mar Abda; he was buried in Ctesiphon.

Mana dwelt in Persia and was buried there.

Dad-isho was buried in Herta. In his days the strife between Nestorius and Cyril (of Alexandria) took place.

Baboi was martyred and buried in Herta.

Akak (Acacius) was of the family of Baboi the Catholicus; he was buried in al-Madaïn.

Babai took a wife, and was buried at Ctesiphon,

Shila took a wife, and was buried in his convent beside Awana.

Paul was buried in Ctesiphon.

BOOK OF THE BEE CHAPTER 52

The Names Of The Kings Who Have Reigned In The World From The Flood Until Now.

The World From The Frode Chill For. The Median Kings Who Reigned In Babylon. Darius the son of Vashtasp (Hystaspes) reigned 24 years. Ahshiresh (Xerxes) his son, 20 years. Artahshisht the long-hand (Artaxerxes Longimanus), 41

years.

Daryawash (Darius) the son of the concubine, 20 years. Artahshisht (Artaxerxes) the ruler, 30 years.

Arses the son of Ochus, 4 years.

Daryawash (Darius) the son of Arsham (Arsanes), 6 years.

The Years Of The Egyptian Kings.

Alexander the son of Philip, 12 years. Ptolemy the son of Lagos, 40 years. Ptolemy Philadelphus, 38 years. In his third year3 the fifth millennium ended. This (king) asked the captive Jews who were in Egypt, and seventy old men translated the Scriptures for him, from Hebrew into Greek, in the island of Pharos. In return for this he set them free, and gave back to them also the vessels of their temple. Their names are these. Josephus, Hezekiah, Zechariah, John, Ezekiel, Elisha: these were of the tribe of Reuben, Judah, Simon, Samuel, Addai, Mattathias, Shalmi; these were of the tribe of Simeon, Nehemiah, Joseph, Theodosius, Basa, Adonijah, Daki5; these were of the tribe p. 121 of Levi. Jothan1, Abdi, Elisha, Ananias, Zechariah, Hilkiah; these were of the tribe of Judah. Isaac, Jacob, Jesus, Sambat (Sabbateus), Simon, Levi; these were of the tribe of Issachar. Judah, Joseph, Simon Zechariah, Samuel, Shamli2; these were of the tribe of Zebulon. Sambat (Sabbateus), Zedekiah, Jacob, Isaac, Jesse, Matthias; these were of the tribe of Gad. Theodosius, Jason, Joshua, John, Theodotus, Jothan3; these were of the tribe of Asher. Abraham, Theophilus, Arsam, Jason, Jeremiah, Daniel; these were of the tribe of Dan. Jeremiah, Eliezer, Zechariah, Benaiah, Elisha, Dathi; these were of the tribe of Naphtali. Samuel, Josephus, Judah, Jonathan, Dositheus, Caleb; these were of the tribe of Joseph. Isalus, John, Theodosius, Arsam, Abijah4, Ezekiel; these were of the tribe of Benjamin.

After Ptolemy Philadelphus arose Ptolemy Euergetes; (he reigned) 26 years5.

Ptolemy Philopator, 17 years.

Ptolemy Epiphanes, 24 years.

Ptolemy Philometor, 35 years. The time of the Maccabees extended to this (reign), and in it the old Covenant came to an end.

Ptolemy Soter, 17 years.

Ptolemy Alexander, 18 years. Ptolemy Dionysius, 30 years.

The Years Of The Roman Emperors.

Gaius Julius (Caesar), 4 years.

(Octavianus Caesar) Augustus, 57 years. In the forty-third year of his reign our Lord Christ was born. Tiberius, 23 years. In the fifteenth year of his reign our

Lord was baptised; and in the seventeenth year He suffered, died. rose again, and ascended to heaven].

Gaius (Caligula), 4 years.

Claudius, 14 years.

Nero, 14 years.

(Flavius) Vespasianus, 10 years. Immediately after he came to the throne, he sent his son Titus against Jerusalem, and he besieged it for two years, until he uprooted it and destroyed it. (Flavius) Titus, 2 years.

(Flavius) Domitianus, 15 years.

Trajan, 20 years. John, the son of Zebedee, lived until the

seventh year of his reign.

Hadrian, 20 years.

(Marcus Aurelius) Antoninus, 20 years.

Verus, 20 years.

Commodus, 14 years.

Severus, 20 years.

The house of Antoninus.

Alexander the son of Mammaea, 13 years. Maximinius and Gordianus, 9 years.

Philip and Gallus, 10 years.

Valerianus and Gallius (Gallienus), 15 years.

Claudius and Tacitus, 16 years.

Diocletian and those that were with him, 20 years.

(Flavius) Constantinus, 33 years.

The Kings Of The Persians From Shabor (Sapor) The Son Of Hormizd1.

In the fourth year of Constantinus Caesar the Victorious, Shabor reigned in Persia 70 years. Ardashir his brother, 20 years.

Vahran (Bahram) and Shabor, the sons of Ardashir, 20 years.

Yazdagerd, the son of Shabor, 20 years.

Vahran (Bahram), the son of Yazdagerd, 20 years. Peroz, the son of Yazdagerd, 27 years. Balash, the son of Peroz, 4 years. Kawad, the son of Peroz, 41 years. Chosrau, the son of Chosrau, 12 years. Hormizd, the son of Chosrau, 12 years.

From Shabor to this fifteenth year of Chosrau the son of Hormizd, in which he destroyed Dara, is three hundred and six years. The sum of all the years from Adam to this fifteenth year of Chosrau the conqueror, which is the nine hundred and sixteenth year of the Greeks3, is 5861 years. From Adam to the Crucifixion is 5280 years. The whole of the Jewish economy therefore, from the time they went out of Egypt until Jerusalem was destroyed by Titus, was 1601 years. From Abraham to this year is 2031 years.

Of The Years That Have Passed Away From The World.

From Adam to the Flood was 2262 years. From the Flood to Abraham was 1015 years. From Abraham to the Exodus of the people from Egypt was 430 years. From the Exodus of the people by the hand of Moses to Solomon and the building of the Temple was 400 years. From Solomon to the first Captivity, which Nebuchadnezzar led away captive, was 495 years. From the first Captivity to the prophesying of Daniel was 180 years. From the group of Daniel to the Birth p. 124 of our Lord was 433 years. All these years make 5345 years. From Alexander to our Lord was 303 years. From our Lord to Constantine was 341 years. In the year 438 of Alexander the Macedonian, the kingdom of the Persians had its beginning 2. Know, O my brother readers, that from the beginning of the creation of Adam to Alexander was 5180 years.

BOOK OF THE BEE CHAPTER 53

Of The End Of Times And The Change Of Kingdoms; From The Book Of Methodius, Bishop Of Rome.

In this seventh and last millennium will the kingdom of the Persians be destroyed. In it will the children of Ishmael go forth from the wilderness of Yathrib (al-Medinah), and they will all come and be gathered together in Gibeah of Ramah, and there shall the fat ones of the kingdom of the Greeks, who destroyed the kingdoms of the Hebrews and the Persians, be destroyed by Ishmael, the wild ass of the desert; for in wrath shall he be sent against the whole earth, against man and beast and trees, and it shall be a merciless chastisement. It is not because God loves them that He has allowed them to enter into the kingdoms of the Christians, but by reason of the iniquity and sin which is wrought by the Christians, the like of which has never been wrought in any one of the former generations. They are mad with drunkenness and anger and shameless lasciviousness; they have intercourse with one another wickedly, a man and his son committing fornication with one woman, the brother with his brother's wife, male with male, and female with female, contrary to the law of nature and of Scripture, as the blessed Paul has said, 'Male with male did work shame, and likewise also the women did work lewdness, and, contrary to nature, had intercourse with one another.' Therefore they have brought upon themselves the recompense of punishment which is meet for their error, women as well as men, and hence God will deliver them over to the impurity of the barbarians, that their wives may be polluted by the sons of pollution, and men may be subjected to the yoke of tribute; then shall men sell everything that they have and give it to them, but shall not be able to pay the debt of the tribute, until they give also their children to them into slavery. And the tyrant shall exalt himself until he demands tribute and poll-tax from the dead that lie in the dust, first oppressing the orphans and defrauding the widows. They will have no pity upon the poor, nor will they spare the miserable; they will not relieve the afflicted; they will smite the grey hairs of the aged, despise the wise, and honour fools; they will mock at those who frame laws, and the little shall be esteemed as the great, and the despised as the honourable; their words shall cut like swords, and there is none who shall be able to change the persuasive force of their words. The path of their chastisement shall be from sea to sea, and from east to west, and from north to south, and to the wilderness of Yathrib. In their latter days there shall be great tribulation, old men and old women hungering and thirsting, and tortured in bonds until they account the dead happy. They will rip up the pregnant woman, and tear infants away from their mothers' bosoms and sell them like beasts, and those that are of no use to them will they dash against the stones. They will slay the priests and deacons in the sanctuary, and they will lie with their wives in the houses of God. They will make clothes for themselves and their wives out of the holy vestments, and they will spread them upon their horses, and work impurity upon them in their beds. They will bring their cattle into the churches and altars, and they will tie up their dogs by the shrines of the saints. In those days the spirit of the righteous and of them that are well versed in signs will be grieved. The feeble will deny the true faith, the holy Cross, and the lifegiving mysteries; and without compulsion many will deny

denying the faith. With this chastisement shall the Christians be tried. For at that time the righteous, the humble, the peaceful and the gentle will not be sought after, but liars and slanderers and accusers and disturbers and the obscene and those who are destitute of mercy, and those who scoff at their parents and blaspheme the life-giving mysteries. And the true believers shall come into troubles and persecutions until they despair of their lives. Honour shall be taken away from the priests, and the pastors shall become as the people. When the measure of their (i.e. the Ishmaelites') victory is full, tribulation will increase, and chastisement will be doubled upon man and beast. And there shall be a great famine, and the dead bodies of men shall lie in the streets and squares without any one to bury them, and (just) reckoning shall vanish and disappear from the earth, And men shall sell their brass and their iron and their clothes, and shall give their sons and their daughters willingly to the heathen. A man shall lie down in the evening and rise in the morning, and shall find at his do or two or three exactors and officers to carry off by force: and two or three women shall throw themselves upon one man and say, 'We will eat our own bread, and wear our own apparel, only let us take refuge beneath thy skirts.' When men are oppressed and beaten, and hunger and thirst, and are tormented by that bitter chastisement; while the tyrants shall live luxuriously and enjoy themselves, and eat and drink, and boast in the victory they have won, having destroyed nations and peoples, and shall adorn themselves like brides, saying, 'The Christians have neither a God nor a deliverer;' then all of a sudden there shall be raised up against them pains like those of a woman in childbirth; and the king of the Greeks shall go forth against them in great wrath, and he shall rouse himself like a man who has shaken off his wine. He shall go forth against them from the sea of the Cushites, and shall cast the sword and destruction into the wilderness of Yathrib and into the dwelling-place of their fathers. They shall carry off captive their wives and sons and daughters into the service of slavery, and fear of all those round about them shall fall upon them, and they shall all be delivered into the hand of the king of the Greeks, and shall be given over to the sword and to captivity and to slaughter, and their latter subjection shall be one hundred times more severe than their (former) voke. They shall be in sore tribulation from hunger and thirst and anxiety; they shall be slaves unto those who served them, and bitter shall their slavery be. Then shall the earth which has become desolate of its inhabitants find peace, and the remnant that is left shall return every man to his own land and to the inheritance of his fathers; and men shall increase like locusts upon the earth which was laid waste. Egypt shall be ravaged. Arabia shall be burnt with fire, the land of Hebron shall be laid waste, and the tongue of the sea shall be at peace. All the wrath and anger of the king of the Greeks shall have full course upon those who have denied Christ. And there shall be great peace on earth, the like of which has not been from the creation of the world until its end; for it is the last peace. And there shall be great joy on earth, and men shall dwell in peace and quiet; convents and churches shall be restored, cities shall be built, the priests shall be freed from taxes, and men shall rest from labour and anxiety of heart. They shall eat and drink; there shall be neither pain nor care; and they shall marry wives and beget children during that true peace. Then shall the gates of the north be opened, and the nations shall go forth that were imprisoned there by Alexander the king.

Christ, and become rebels and slanderers and boasters,

BOOK OF THE BEE CHAPTER 54

Of Gog And Magog, Who Are Imprisoned In The North. When Alexander was king and had subdued countries and cities, and had arrived in the East, he saw on the confines of the East those men who are of the children of Japhet. They were more wicked and unclean than all (other) dwellers in the world; filthy peoples of hideous appearance, who ate mice and the creeping things of the earth and snakes and scorpions. They never buried the bodies of their dead, and they ate as dainties the children which women aborted and the afterbirth. People ignorant of God, and unacquainted with the power of reason, but who lived in this world without understanding like ravening beasts. When Alexander saw their wickedness, he called God to his aid, and he gathered together and brought them and their wives and children, and made them go in, and shut them up within the confines of the North. This is the gate of the world on the north, and there is no other entrance or exit from the confines of the world from the east to the north. And Alexander prayed to God with tears, and God heard his prayer and commanded those two lofty mountains which are called 'the children of the north, and they drew nigh to one another until there remained between them about twelve cubits. Then he built in front of them a strong building, and be made for it a door of brass, and anointed it within and without with oil of Thesnaktis, so that if they should bring iron (implements) near it to force it open, they would be unable to move it; and if they wished to melt it with fire, it would quench it; and it feared neither the operations of devils nor of sorcerers, and was not to be overcome (by them). Now there were twenty-two kingdoms

BOOK OF THE BEE CHAPTER 56

imprisoned within the northern gate, and their names are these: Gog, Magog, Nawal, Eshkenaz, Denaphar, Paktaye, Welotaye, Humnaye, Parzaye, Daklaye, Thaubelaye, Darmetaye, Kawkebaye, Dog-men (Cynocephali), Emderatha, Garmido, Cannibals, Therkaye, Alanaye, Pisilon, Denkaye, Saltraye. At the end of the world and at the final consummation, when men are eating and drinking and marrying wives, and women are given to husbands; when they are planting vinevards and building buildings, and there is neither wicked man nor adversary, on account of the assured tranquillity and certain peace; suddenly the gates of the north shall be opened and the hosts of the nations that are imprisoned there shall go forth. The whole earth shall tremble before them, and men shall flee and take refuge in the mountains and in caves and in burial places and in clefts of the earth; and they shall die of hunger; and there will be none to bury them, by reason of the multitude of afflictions which they will make men suffer. They will eat the flesh of men and drink the blood of animals; they will devour the creeping things of the earth, and hunt for serpents and scorpions and reptiles that shoot out venom, and eat them. They will eat dead dogs and cats, and the abortions of women with the after-birth; they will give mothers the bodies of their children to cook, and they will eat them before them without shame. They will destroy the earth, and there will be none able to stand before them. After one week of that sore affliction, they will all be destroyed in the plain of Joppa, for thither will all those (people) be gathered together, with their wives and their sons and their daughters; and by the command of God one of the hosts of the angels will descend and will destroy them in one moment.

BOOK OF THE BEE CHAPTER 55

Of The Coming Of The Antichrist, The Son Of Perdition. In a week and half a week after the destruction of these wretches shall the son of destruction appear. He shall be conceived in Chorazin, born in Bethsaida, and reared in Capernaum. Chorazin shall exult because he was conceived in her, Bethsaida because he was born in her, and Capernaum because he was brought up in her; for this reason our Lord proclaimed Woe to these three (cities) in the Gospel. As soon as the son of perdition is revealed, the king of the Greeks will go up and stand upon Golgotha, where our Lord was crucified; and he will set the royal crown upon the top of the holy Cross, upon which our Lord was crucified; and he will stretch out his two hands to heaven; and will deliver over the kingdom to God the Father. The holy Cross will be taken up to heaven, and the royal crown with it; and the king will die immediately. The king who shall deliver over the kingdom to God will be descended from the seed of Kushath the daughter of Pil, the king of the Ethiopians; for Armelaus (Romulus) the king of the Greeks took Kushath to wife, and the seed of the Ethiopians was mingled with that of the Greeks. From this seed shall a king arise who shall deliver the kingdom over to God as the blessed David has said 'Cush will deliver the power to God.' When the Cross is raised up to heaven, straightway shall every head and every ruler and all powers be brought to nought, and God will withdraw His providential care from the earth. The heavens will be prevented from letting fall rain, and the earth from producing germs and plants; and the earth shall remain like iron through drought, and the heavens like brass. Then will the son of perdition appear, of the seed and of the tribe of Dan; and he will shew deluding phantasms, and lead astray the world, for the simple will see the lepers cleansed, the blind with their eyes opened, the paralytic walking, the devils cast out, the sun when he looks upon it becoming black, the moon when he commands it becoming changed, the trees putting forth fruit from their branches, and the earth making roots to grow. He will shew deluding phantasms (of this kind), but he will not be able to raise the dead. He will go into Jerusalem and will sit upon a throne in the temple saying, 'I am the Christ;' and he will be borne aloft by legions of devils like a king and a lawgiver, naming himself God, and saying, 'I am the fulfilment of the types and the parables.' He will put an end to prayers and offerings, as if at his appearance pravers are to be abolished and men will not need sacrifices and offerings along with him. He becomes a man incarnate by a married woman of the tribe of Dan. When this son of destruction becomes a man, he will be made a dwelling-place for devils, and all Satanic workings will be perfected in him. There will be gathered together with him all the devils and all the hosts of the Indians: and before all the Indians and before all men will the mad Jewish nation believe in him, saying, 'This is the Christ, the expectation of the world.' The time of the error of the Antichrist will last two years and a half, but others say three years and six months And when every one is standing in despair, then will Elijah (Elias) come from Paradise, and convict the deceiver, and turn the heart of the fathers to the children and the heart of the children to the fathers; and he will encourage and strengthen the hearts of the believers.

Of Death And The Departure Of The Soul From The Body. The foundation of all good and precious things, of all the greatness of God's gifts, of His true love, and of our arriving in His presence, is Death. Men die in five ways. Naturally; as David said, 'Unless his day come and he die,' alluding to Saul. Voluntarily: as when Saul killed himself in the battle with the Philistines. By accident; such as a fall from a roof, and other fatal accidents. By violence, from devils and men and wild beasts and venomous reptiles. By (divine) chastisement; as the flood in the days of Noah, and the fire which fell upon the Sodomites, and other such like things. But (side by side) with all these kinds of fatalities runs the providence of God's government, which cannot be comprehended by the creatures, restraining (them) where it is meet (to restrain), and letting (them) loose where it is fitting (to let loose). This government is not comprehended in this world, neither by angels nor by men; but in the world which is to come all rational beings will know it. When the soul goes forth from the body, as Abba Isaiah says, the angels go with it: then the hosts of darkness go forth to meet it, seeking to seize it and examine it, if there be anything of theirs in it. Then the angels do not fight with them, but those deeds which the soul has wrought protect it and guard it, that they come not near it. If its deeds be victorious, then the angels sing praises before it until it meets God with joy. In that hour the soul forgets every deed of this world. Consequently, no one who does not obtain remission (of sins) in this world can be free from the penalty of examination in that day. Not that there is torture or pleasure or recompense before the resurrection; but the soul knows everything that it has done whether of good or evil.

As to where the souls abide from the time they leave their bodies until the resurrection, some say that they are taken up to heaven, that is, to the region of spirit, where the celestial hosts dwell. Others say that they go to Paradise, that is, to the place which is abundantly supplied with the good things of the mystery of the revelations of God; and that the souls of sinners lie in darkness in the abyss of Eden outside Paradise. Others say that they are buried with their bodies; that is to say, as the two were buried in God at baptism, so also will they now dwell in Him until the day of the resurrection. Others say that they stand at the mouth of the graves and await their Redeemer; that is to say, they possess the knowledge of the resurrection of their bodies. Others say that they are as it were in a slumber, because of the shortness of the time; for they point out in regard to them that what seems to us a very long time is to them as a momentary nod (or wink) in its shortness And just as he that is sunk in slumber departs from the life of this world, and yet does not arrive at absolute mortality, so also are they in an intermediate knowledge which is higher than that of this world, and yet attain not to that which is after the resurrection. Those who say that they are like an infant which has no knowledge, shew that they call even the knowledge of the truth ignorance in comparison with that knowledge of the truth which shall be bestowed upon them after the resurrection.

That the souls of the righteous pray, and that their prayers assist those who take refuge with them, may be learned from many, especially from Mar Theodore in his account of the blessed Thecla. Therefore it is right for those who have a holy man for a friend, to rejoice when he goes to our Lord in Paradise, because their friend has the power to help them by his prayers. Like the blind disciple of one of the saints mentioned in the Book of the Paradise, who, when his master was dying, wept bitterly and said, 'To whose care dost thou leave the poor blind man?' And his master encouraged him, and said to him. 'I believe in God that, if I find mercy in His sight, at the end of a week thou wilt see;' and after some days he did see. The souls of the righteous also hold spiritual conversation with each other, according to the Divine permission and command which moves them to this by necessary causes. Neither those who have departed this life in the flesh are hindered from this (intercourse), nor those who are still clad in their fleshly garments, if they live their life in them holily.

BOOK OF THE BEE CHAPTER 57

Of The Quickening And The General Resurrection, The Consummation Of The Material World And The Beginning Of The New World.

After Elijah comes and conquers the son of destruction, and encourages the believers, for a space and a time which is known to God alone, there will appear the living sign of our Lord's Cross, honoured and borne aloft in the hands of the Archangel Gabriel. Its light will overpower the light of the sun, to the reproach and putting to shame of the infidels and the crucifying Jews. As soon as the life-giving Cross appears before our Lord, as the Doctor saith, 'His victory comes before Him,' etc., then a powerful light will fill the whole vaulted space between the heavens and the earth, the radiance and light whereof will be above all (other) lights; and suddenly will the mighty sound of the first trumpet of the Archangel be heard, concerning which our Lord said, 'At midnight there will be a cry, "Behold the Bridegroom cometh,

go ye forth to meet Him." At this trumpet the sun shall become dark, the moon shall not display its light, the stars shall drop from the heavens like leaves, and the powers of the heavens shall be moved. The earth shall totter and tremble, the mountains and hills shall melt, the sea shall be disturbed and shall cause terrible sounds to be heard. The rivers shall submerge the earth, the trees shall be uprooted, buildings shall fall, towns and villages shall be overturned, and high walls and strong towers shall be thrown down. The wild beasts and cattle and fowl and fish shall come to an end and perish; and everything shall be destroyed, except a few human beings who shall remain alive, and whom the resurrection shall overtake, of whom Paul has said, 'We who are left shall not overtake them that sleep,' meaning to say that those who are found alive at the time of the resurrection will not sleep the sleep of death; as the apostle says again, 'Behold I tell you a mystery; we shall not all sleep, but we shall all be changed.' As touching the heavens, some say that they will be rent, and that the waters which are above the firmament will descend, for it is not possible for the substance of water to pass through the substance of the firmament. Others say that as water passes through a tree or a piece of pottery, and sweat through the skin, so also will men enter into heaven and not be prevented, and (in like manner too) will the waters descend from above. Others say that the firmament will be rolled up like the curtain of a tent.

The second trumpet is that at the sound of which the firmament will be opened, and our Lord will appear from heaven in splendour and great glory. He will come down with the glory of His divinity as far as two-thirds of the distance between the firmament and the earth, whither Paul ascended in the spirit of revelation. He will then make an end of the son of perdition, and destroy him body and soul, and He will hurl Satan and the devils into Gehenna.

The third trumpet is the last, at which the dead will rise. and the living be changed, as the blessed Paul says, 'Swiftly, as in the twinkling of an eye, at the last trumpet when it sounds; and the dead shall rise without corruption, and we shall be changed.' So swiftly and speedily will the resurrection of all men be wrought, according to the spiritual nature of the new world. For the swiftness of the resurrection will surpass the swiftness of understanding, and the spiritual hosts alone see and know in what manner it will take place, every man being suddenly found standing in his spirituality. Some men therefore have a tradition that the resurrection of the righteous and the just and the believers will precede that of other men, who are remote from the true faith; but according to the opinion of the truthful and of people generally, the resurrection of the whole human race will take place quicker than lightning and than the twinkling of an eye; from the generation of Adam to the latest generation they shall rise at the last trumpet. And though, according to the opinion of the Expositor, many sounds will be heard on that night, each one of which is a sign of what will happen, yet, according to the consent of the greater part of the expositors and of Scripture. three distinct trumpets will sound by which the whole work of the resurrection will be completed and finished. Michael the expositor and exegete, however, says otherwise in the book of Questions, speaking as follows: 'The world will not pass away and be dissolved before the vivification of the dead, but the coming of our Lord will be seen first of all, who will come with the spiritual hosts; and immediately our Lord's power will compel the earth to give up the parts of the bodies of men who have been slain and have become dust and ashes within it; and there will be a making ready and preparation of the souls to receive their bodies all together. If, before the vivification of the dead, the world and all that is therein were to pass away, from whence pray would the dead rise? Those who say that the world will pass away before the vivification of the dead are fools and simpletons; for Christ will not make the world pass away before the vivification of the dead, but He will first of all raise the dead, and men will see with their eyes the passing away of the world, the uprooting of the elements, and the destruction of the heavens and the earth and the sun and the moon and the stars; and from here sorrow will begin to reign in the mind of the wicked, and endless joy in the mind of the righteous.

BOOK OF THE BEE CHAPTER 58

Of The Manner And State In Which Men Will Rise In The Day Of The Resurrection.

All classes and conditions of men will rise from the dead in the state of the perfect form of Christ, about thirty-three years of age, even as our Redeemer rose from the grave. We shall rise with all our limbs perfect, and with the same constitutions, without addition or diminution. Some say that the hair and nails and prepuce will rise, and some say they will not; as if they were superfluous for the completion of the nature of man. Some say concerning the resurrection that a likeness only will rise, without parts and without the composition of the limbs of man; a mere similitude of hands and feet and hardness of bones. Others say that the whole man will be cast into one crystalline substance, and that all his parts will be mingled together; and they do not grant him an

ordered arrangement of composition. Others say that the vessels which are inside the belly, such as the bowels, liver, etc., will not rise; but they err and stray from the truth, and do not understand that if one of the parts of the body perish, it is not perfect. For Paul shewed plainly and laid down an example of the resurrection in the grain of wheat: just as that grows up entire with its glory, without any portion of it having perished, even so we; for the whole man shall rise with all his limbs and parts, and ordered in his composition as now, only having acquired purification from the humours. And this is not surprising, that if an earthen vessel acquires firmness and lightness when it goes into the fiery furnace, without any change taking place in its shape or form, but is lightened of its heaviness and density, whilst it preserves its shape uninjured; so also should the Holy Spirit burn us in the furnace of the resurrection and drive forth from us all the foul material of the present (life), and clothe us with incorruptibility. 'It is sown an animal body; it rises a spiritual body.' We shall neither see nor hear with all our bodily members, although some men have thought that the whole man will be sight and hearing; but we shall carry out action with these same usual limbs, if it happen to be necessary: although we shall not there need speech and conversation with one another, because each other's secrets will be revealed to us.

The things which certain stupid men invent, who indulge their fancy, and give bodily form to the punishment of sinners and the reward of the just and righteous, and say that there is at the resurrection a reckoning and a pair of scales, the Church does not receive: but each one of us carries his light and his fire within him, and his heaviness and his lightness is round in his own pature. Just as stone and iron naturally possess the property of falling to the earth, and as the air naturally ascends upward on account of its rarity and its lightness; so also in the resurrection, he that is heavy and lying in sins, his sins will bring him down; and he that is free from the rust of sin, his purity will make him rise in the scale. And our Lord will ascend to heaven, and the angels (will go) before Him like ambassadors, and the just and the righteous will be upon His right hand and His left, and the children behind Him in the form of the life-giving Cross.

BOOK OF THE BEE CHAPTER 59

Of The Happiness Of The Righteous And The Torment Of Sinners, And In What State They Are There.

It is right for us to know and explain how those suffer, who suffer in Gehenna. If they do suffer, how can we say that they are impassible? and if they do not suffer, then there is no torture for sinners and if there he no torture for sinners in proportion to their sins, neither can there be happiness for the righteous as a reward for their labours. The suffering wherewith the Fathers say that sinners will suffer in Gehenna is not one that will pain the limbs, such as the blows of sticks, the mutilation of the flesh, and the breaking of the bones, but one that will afflict the soul, such as grief for the transgression of what is right, repentance for shameful deeds, and banishment from one to whom he is bound in love and for whom his affection is strong. For in the resurrection we shall not be without perception, like the sun which perceives not his splendour, nor the moon her brilliancy, nor the pearl its beauty; but by the power of reason we shall feel perfectly the delight of our happiness or the keen pain of our torture. So then by that which enables the righteous to perceive the pleasure of their happiness, by that selfsame thing will the wicked also perceive the suffering of their torment; (that is) by the power capable of receiving pleasure, which is the intelligence. Hence it is right for us to be certain that intelligence will not be taken away from us, but it will receive the utmost purification and refinement. The glorious and good things of the world which is to come are not to be compared with those of this world; for if all the glorious and good things and delights of this world were given to us in the world which is to come, we should look upon them as hateful and abominable, and they would not be able to give us pleasure or to gladden us; and our nature by the blessedness of its immortality would be exalted above all their glory and desirability. And if all the torments and afflictions and troubles of this world were brought near to us in the world which is to come, the pain of them would make no impression upon our immortal and immutable nature. Hence the pleasure of that world is something beyond all comparison more glorious and excellent and exalted than those of this world; and the torment of vonder is likewise something beyond all comparison more severe and more bitter than any that is here.

It is also right for us to explain the quality of the light of the righteous. The light of the righteous is not of a natural origin like this elemental light (of ours), but some of the light of our Lord--whose splendour surpasses ten thousand suns--is diffused and shed upon them. Each saint shines in proportion to his purity, and holiness and refinement and sincerity, as the blessed Paul has said, 'One star surpasseth another in glory, so also is the resurrection of the dead.' And although all the saints will be happy in one kingdom, yet he who is near to the King or the Bridegroom will be separated from him whose place is at the end of the guest-chamber, even though his place be in the same chamber. So also with the sinners in Gehenna; their sentence will not be alike, for in proportion to the sin of each will be his torment. And as the light of the sun is not to be compared with the light of the moon, nor is the light of the moon like that of the stars, so also will the happiness of the righteous be, although the name and honour of righteousness be laid upon and spread over all of them. And as the light of our Lord's humanity will pass over all our limbs without distinction, and take the place of dress and ornament for us, so also with all our members shall we perceive the suffering and torment of Gehenna. The festal garments which our Lord has prepared for His saints, the children of light, are impassibility; and the filthy garments which hinder us from entering into the spiritual bridal-chamber are the passions. In the new world there will be no distinctive names for ranks and conditions of human beings; and as every name and surname attributed to God and the angels had its origin from this world, and names for human beings were assigned and distributed by the government of this world, in the world of spiritual and intellectual natures there will be neither names nor surnames among them, nor male nor female, nor slave nor free, nor child nor old man, nor Ethiopian nor Roman (Greek); but they will all rise in the one perfect form of a man thirty-three years of age, as our Lord rose from the dead. In the world to come there will be no companies or bands but two; the one of the angels and the righteous, who will mingle and form one Church, and the other of the devils and sinners in Gehenna.

BOOK OF THE BEE CHAPTER 60

Whether Mercy Will Be Shewn To Sinners And The Devils In Gehenna, After They Have Been Tormented And Suffered And Been Punished, Or Not? And If Mercy Is To Be Shewn To Them, When Will It Be?

Some of the Fathers terrify us beyond our strength and throw us into despair; and their opinion is well adapted to the simple-minded and trangressors of the law. Others of them encourage us and bid us rely upon Divine mercy; and their opinions are suitable and adapted to the perfect and those of settled minds and the pious. In the 'Book of Memorials' it is thus written: 'This world is the world of repentance, but the world which is to come is the world of retribution. As in this world repentance saves until the last breath, so in the world to come justice exacts to the uttermost farthing. And as it is impossible to see here strict justice unmingled with mercy, so it is impossible to find there strict justice mingled with mercy." Mar Isaac says thus: 'Those who are to be scourged in Gehenna will be tortured with stripes of love; they who feel that they have sinned against love will suffer harder and more severe pangs from love than the pain that springs from fear." Again he says: 'The recompense of sinners will be this: the resurrection itself will be their recompense instead of the recompense of justice; and at the last He will clothe those bodies which have trodden down His laws with the glory of perfection. This act of grace to us after we have sinned is greater than that which, when we were not, brought our nature into being.' Again he says: 'In the world which is to come grace will be the judge and not justice.' Mar Theodore the Expositor says: 'Those who have here chosen fair things will receive in the world to come the pleasure of good things with praises; but the wicked who have turned aside to evil things all their life, when they are become ordered in their minds by penalties and the fear that springs from them, and choose good things, and learn how much they have sinned by having persevered in evil things and not in good things, and by means of these things receive the knowledge of the highest doctrine of the fear of God, and become instructed to lav hold of it with a good will, will be deemed worthy of the happiness of the Divine liberality. For He would never have said, "Until thou payest the uttermost farthing," unless it had been possible for us to be freed from our sins through having atoned for them by paying the penalty; neither would He have said, "he shall be beaten with many stripes," or "he shall be beaten with few stripes," unless it were that the penalties, being meted out according to the sins, should finally come to an end.' These things the Expositor has handed down in his books clearly and distinctly.

So also the blessed Diodorus, who says in the 'Book of the Dispensation:' 'A lasting reward, which is worthy of the justice of the Giver, is laid up for the good, in return for their labours; and torment for sinners, but not everlasting, that the immortality which is prepared for them may not be worthless. They must however be tormented for a short time, as they deserve, in proportion to the measure of their iniquity and wickedness, according to the amount of the wickedness of their deeds. This they will have to bear, that they suffer for a short time; but immortal and unending happiness is prepared for them. If it be then that the rewards of good deeds are as great (in proportion to them) as the times of the immortality which are prepared for them are longer than the times of the limited contests which take place in this world, the torments for many and great sins must be very much less than the greatness of mercy. So then it is not for the good only that the grace of the resurrection from the dead is intended, but also

for the wicked; for the grace of God greatly honours the good, but chastises the wicked sparingly.'

Again he says: 'God pours out the wages of reward beyond the measure of the labours (wrought), and in the abundance of His goodness He lessens and diminishes the penalty of those who are to be tormented, and in His mercy He shortens and reduces the length of the time. But even thus He does not punish the whole time according to (the length of) the time of folly, seeing that He requites them far less than they deserve, just as He does the good beyond the measure and period (of their deserts); for the reward is everlasting. It has not been revealed whether the goodness of God wishes to punish without ceasing the blameworthy who have been found guilty of evil deeds (or not), as we have already said before.

But if punishment is to be weighed out according to sin, not even so would punishment be endless. For as regards that which is said in the Gospel, 'These shall go away into everlasting punishment, but the righteous into life eternal;' this word 'eternal' (le-alam) is not definite: for if it be not so, how did Peter say to our Lord, 'Thou shalt never wash my feet,' and vet He washed him? And of Babylon He said, 'No man shall dwell therein for ever and ever,' and behold many generations dwell therein. In the 'Book of Memorials' he says: I hold what the most celebrated of the holy Fathers say, that He cuts off a little from much. The penalty of Gehenna is a man's mind; for the punishment there is of two kinds, that of the body and that of the mind. That of the body is perhaps in proportion to the degree of sin, and He lessens and diminishes its duration: but that of the mind is for ever, and the judgement is for ever.' But in the New Testament le-alam is not without end. To Him be glory and dominion and praise and exaltation and honour for ever and ever. Amen and Amen.

THE PRINCE

Analysis on Political Power and Realpolitik Italian: Il Principe (The Ruler) By Nicolo Machiavelli, 1513 Translation: William Kenaz Marriott, 1908

(One may ask why a book such as this one can be found among all those illustrious scriptures. Although this book is written by Machiavelli, it is not about him but about the evil events that he witnessed.

The described principles and strategies to gain power and to stay in power are revolting from an ethic point of view, still, they are in use up to this very day. Whenever we hear anything in the news that seem not be very straight foreward, we can assume that plots, such as those ones described here, are behind it. Religion, politics, business, economics, media, doctrines, and ideologies of any movement what so ever, are entangled with one another in the ways that are described by Machiavelli. Have you never asked yourself why conflicts such as those ones in Machiavelli's Italy, or the Thirty Years War, or the Crusades, or the Wars of Islam, or the World Wars, or the Middle East conflicts, appear to be so confusing?

Therefore, The Prince, Machiavelli's Art of War, as well as General Sun Wu's (Sunzi's) Art of War [written 2,000 years before Machiavelli] are an important part of the schedules in academic institutions that deal with military, politics, doctrines, religion, ideologies, media, financial matters and economics. Be aware of this significant fact!

Niccolò di Bernardo dei Machiavelli was born at Florence in 1469 and died in 1527. He was the second son of Bernardo di Nicolo Machiavelli, a lawyer of some repute, and of Bartolommea di Stefano Nelli, his wife. Both parents were members of the old Florentine nobility. He was an Italian official of his city state of Florence [Firenze], at the time when Italy did not exist as a unified state but the Medicis and Borgias, two families that were ruthlessly fighting for suppremacy.

Machiavelli was taught grammar, rhetoric, and Latin. From his texts we know that he must have been extensively studying political history and military strategy. He has often been called the father of modern political philosophy or political science. Machiavelli is known today as the author of The Prince and The Art of War. These books have influenced politics up to this very day. Even more, they show how politicains, religious leaders, and political-religious movements act, and it also explains why.

Machiavelli was born in a tumultuous era in which popes waged acquisitive wars against Italian city-states, and people and cities often fell from power as France, Spain, and the Holy Roman Empire battled for regional influence and control. Political-military alliances continually changed, featuring mercenary leaders, who changed sides without warning, and the rise and fall of many short-lived governments. He became a diplomat, political philosopher, playwright, and a civil servant of the Florentine Republic. He also wrote comedies, carnival songs, poetry, and some of the best-known personal correspondence in the Italian language.

Machiavelli carried out several diplomatic missions and Florence sent him to Pistoia to pacify the leaders of two opposing factions which had broken into riots in 1501 and 1502. When this failed, the leaders were banished from the city. From 1502 to 1503, he witnessed the brutal reality of the state-building methods of Cesare Borgia (1475–1507) and his father, Pope Alexander VI (Rodrigo de Borja or Borgia), who were then engaged in the process of trying to bring a large part of Central Italy under their control. The pretext of defending Church interests was used as a partial justification by the Borgias. Machiavelli conceived of a militia for Florence, and he then began recruiting and creating it. He distrusted mercenaries (a distrust that he explained in his official reports and then later in his theoretical works for their unpatriotic and uninvested nature in the war that makes their allegiance fickle and often unreliable when most needed), and instead staffed his army with citizens, a policy that was to be repeatedly successful.

By February of 1506 he was able to have marching on parade four hundred farmers, suited (including iron breastplates), and armed with lances and small fire arms. Under his command, Florentine citizen-soldiers defeated Pisa in 1509. Machiavelli's success did not last due to lack of funding and time. In August 1512 the Medici, backed by Pope Julius II, used Spanish troops to defeat the Florentines at Prato.

The Florentine city-state and the republic were dissolved, and Machiavelli was deprived of office and banished from the city for a year. In 1513, the Medici accused him of conspiracy against them and had him imprisoned and tortured over several weeks. Therefore, we should not be too surprised that he despised the corrupt Church and spineless politicians. He retired for his own safety and began to write about the events that heavily influenced The Prince and The Art of War.

In his best known book, The Prince, published in 1513, he describes the way that a Prince (by which Machiavelli means a ruler) can control the people he rules. He looks especially at what he calls the "new prince", saying that a prince from a royal family has an easier job because the people are used to his family and the way of life. All that such a hereditary prince needs to do is carefully stick to the traditional ways of working that the people are used to. A new prince has a much more difficult job because he must get people used to his new power and build up new ways of working that people can get used to. This job means that the new prince has to act in a way people would not quickly criticise, but Machiavelli says this may mean doing bad but necessary things which people do not see or remember. Otherwise a new prince will find it difficult to get anything important done, or even to keep ruling. Machiavelli also gives equivalent examples from ancient Roman history to support his analysis.

Machiavelli went far beyond other authors in his time, who in his opinion left things to fortune, and therefore to bad rulers, because of their Christian beliefs. He was undoubtedly a man of great observation, acuteness, and industry; noting with appreciative eye whatever passed before him, and with his supreme literary gift turning it to account in his enforced retirement from affairs. He does not present himself, nor is he depicted by his contemporaries, as a type of that rare combination, the successful statesman and author, for he appears to have been only moderately prosperous in his several embassies and political employments.

Although the light of five centuries has been focused on "The Prince," is problems are still debatable and interesting, because they are the eternal problems between the ruled and their rulers. Such as they are, its ethics are those of Machiavelli's contemporaries; yet they cannot be said to be out of date so long as the governments of Europe rely on material rather than on moral forces. Its historical incidents and personages become interesting by reason of the uses which Machiavelli makes of them to illustrate his theories of government and conduct.

Machiavelli was well aware that he lived in an immoral time, with corruption, brutality, and rotting corpses everywhere. He exposes the sinister methods of power people, and with his razor-blade-sharp mind he analyses how they gain power, stay in power, and use pawns as scapegoat to steer away from their guilt that caused so much misery. Ethics in politics have degenerated up to an empty Lippenbekenntnis (pay lip service) in order to make the way of politicians free to take total power and the citizens' money.

He was being straight foreward and honest with his analysis and what he really thought. This was one of the things that made the power people of the elite furious, and that ethics and politics were two distinct things for them made his works scandalous in their viewpoint. As shown by his letter of dedication, Machiavelli describes the contents of The Prince as being an un-embellished summary of his knowledge about the nature of princes and "the actions of great men", based not only on reading but also, unusually, on real experience. Today we would call it an analysis on rulers, their motivations, and their politics.

At this time, Italy was not a unified state, but Italy was for decades drowning in the quagmire that was created by a bunch unable rulers and irresponsible politicians. Several dozen regions and city states that were fighting wars and civil wars dragged the population into the hell of destruction, famine, plague and the injust inquisition of the Roman Catholic Church. So surprise that Machiavelli called for radical measurements to get rid of this everlasting misery.

Machiavelli emphasised the need for looking at the "effectual truth", as opposed to relying on "imagined republics and principalities".

He states the difference between honorable behaviour and criminal behaviour by using the metaphor of animals, saying that "there are two ways of contending, one in accordance with the laws, the other by force; the first of which is proper to men, the second to beast". In The Prince Machiavelli does not explain what he thinks the best ethical or political goals are, except the control of one's own fortune, as opposed to waiting to see what chance brings. Machiavelli took it for granted that would-be leaders naturally aim at glory or honour. He associated these goals with a need for "virtue" and "prudence" in a leader, and saw such virtues as essential to good politics.

The Prince consists of a Dedication as introduction, 26 chapters and two appendices called "Description Of The Methods Adopted By The Duke Valentino..." and "The Life Of Castruccio Castracani Of Lucca".)

DEDICATION

To the Magnificent Lorenzo Di Piero De' Medici:

Those who strive to obtain the good graces of a prince are accustomed to come before him with such things as they hold most precious, or in which they see him take most delight; whence one often sees horses, arms, cloth of gold, precious stones, and similar ornaments presented to princes, worthy of their greatness.

Desiring therefore to present myself to your Magnificence with some testimony of my devotion towards you, I have not found among my possessions anything which I hold more dear than, or value so much as, the knowledge of the actions of great men, acquired by long experience in contemporary affairs, and a continual study of antiquity; which, having reflected upon it with great and prolonged diligence, I now send, digested into a little volume, to your Magnificence.

And although I may consider this work unworthy of your countenance, nevertheless I trust much to your benignity that it may be acceptable, seeing that it is not possible for me to make a better gift than to offer you the opportunity of understanding in the shortest time all that I have learnt in so many years, and with so many troubles and dangers; which work I have not embellished with swelling or magnificent words, nor stuffed with rounded periods, nor with any extrinsic allurements or adornments whatever, with which so many are accustomed to embellish their works; for I have wished either that no honour should be given it, or else that the truth of the matter and the weightiness of the theme shall make it acceptable.

Nor do I hold with those who regard it as a presumption if a man of low and humble condition dare to discuss and settle the concerns of princes; because, just as those who draw landscapes place themselves below in the plain to contemplate the nature of the mountains and of lofty places, and in order to contemplate the plains place themselves upon high mountains, even so to understand the nature of the people it needs to be a prince, and to understand that of princes it needs to be of the people.

Take then, your Magnificence, this little gift in the spirit in which I send it; wherein, if it be diligently read and considered by you, you will learn my extreme desire that you should attain that greatness which fortune and your other attributes promise.

And if your Magnificence from the summit of your greatness will sometimes turn your eyes to these lower regions, you will see how unmeritedly I suffer a great and continued malignity of fortune.

MACHIAVELLI THE PRINCE CHAPTER 1

[How Many Kinds Of Principalities There Are, And By What Means They Are Acquired]

All states, all powers, that have held and hold rule over men have been and are either republics or principalities. Principalities are either hereditary, in which the family has

been long established; or they are new.

The new are either entirely new, as was Milan to Francesco Sforza, or they are, as it were, members annexed to the hereditary state of the prince who has acquired them, as was the kingdom of Naples to that of the King of Spain.

Such dominions thus acquired are either accustomed to live under a prince, or to live in freedom; and are acquired either by the arms of the prince himself, or of others, or else by fortune or by ability.

MACHIAVELLI THE PRINCE CHAPTER 2 *[Concerning Hereditary Principalities]*

I will leave out all discussion on republics, inasmuch as in another place I have written of them at length, and will address myself only to principalities. In doing so I will keep to the order indicated above, and discuss how such principalities are to be ruled and preserved. I say at once there are fewer difficulties in holding hereditary states, and those long accustomed to the family of their prince, than new ones; for it is sufficient only not to transgress the customs of his ancestors, and to deal prudently with circumstances as they arise, for a prince of average powers to maintain himself in his state, unless he be deprived of it by some extraordinary and excessive force; and if he should be so deprived of it, whenever anything sinister happens to the usurper, he will regain it.

We have in Italy, for example, the Duke of Ferrara, who could not have withstood the attacks of the Venetians in '84, nor those of Pope Julius in '10, unless he had been long established in his dominions. For the hereditary prince has less cause and less necessity to offend; hence it happens that he will be more loved; and unless extraordinary vices cause him to be hated, it is reasonable to expect that his subjects will be naturally well disposed towards him; and in the antiquity and duration of his rule the memories and motives that make for change are lost, for one change always leaves the toothing for another.

MACHIAVELLI THE PRINCE CHAPTER 3 [Concerning Mixed Principalities]

But the difficulties occur in a new principality. And firstly, if it be not entirely new, but is, as it were, a member of a state which, taken collectively, may be called composite, the changes arise chiefly from an inherent difficulty which there is in all new principalities; for men change their rulers willingly, hoping to better themselves, and this hope induces them to take up arms against him who rules: wherein they are deceived, because they afterwards find by experience they have gone from bad to worse. This follows also on another natural and common necessity, which always causes a new prince to burden those who have submitted to him with his soldiery and with infinite other hardships which he must put upon his new acquisition.

In this way you have enemies in all those whom you have injured in seizing that principality, and you are not able to keep those friends who put you there because of your not being able to satisfy them in the way they expected, and you cannot take strong measures against them, feeling bound to them. For, although one may be very strong in armed forces, yet in entering a province one has always need of the goodwill of the natives.

For these reasons Louis the Twelfth, King of France, quickly occupied Milan, and as quickly lost it; and to turn him out the first time it only needed Lodovico's own forces; because those who had opened the gates to him, finding themselves deceived in their hopes of future benefit, would not endure the ill-treatment of the new prince. It is very true that, after acquiring rebellious provinces a second time, they are not so lightly lost afterwards, because the prince, with little reluctance, takes the opportunity of the rebellion to punish the delinquents, to clear out the suspects, and to strengthen himself in the weakest places. Thus to cause France to lose Milan the first time it was enough for the Duke Lodovico* to raise insurrections on the borders; but to cause him to lose it a second time it was necessary to bring the whole world against him, and that his armies should be defeated and driven out of Italy; which followed from the causes above mentioned. (* Duke Lodovico was Lodovico Moro, a son of Francesco Sforza, who married Beatrice d'Este. He ruled over Milan from 1494 to 1500, and died in 1510.)

Nevertheless Milan was taken from France both the first and the second time. The general reasons for the first have been discussed; it remains to name those for the second, and to see what resources he had, and what any one in his situation would have had for maintaining himself more securely in his acquisition than did the King of France.

Now I say that those dominions which, when acquired, are added to an ancient state by him who acquires them, are either of the same country and language, or they are not. When they are, it is easier to hold them, especially when they have not been accustomed to self-government; and to hold them securely it is enough to have destroyed the family of the prince who was ruling them; because the two peoples, preserving in other things the old conditions, and not being unlike in customs, will live quietly together, as one has seen in Brittany, Burgundy, Gascony, and Normandy, which have been bound to France for so long a time: and, although there may be some difference in language, nevertheless the customs are alike, and the people will easily be able to get on amongst themselves. He who has annexed them, if he wishes to hold them, has only to bear in mind two considerations: the one, that the family of their former lord is extinguished; the other, that neither their laws nor their taxes are altered, so that in a very short time they will become entirely one body with the old principality.

But when states are acquired in a country differing in language, customs, or laws, there are difficulties, and good fortune and great energy are needed to hold them, and one of the greatest and most real helps would be that he who has acquired them should go and reside there. This would make his position more secure and durable, as it has made that of the Turk in Greece, who, notwithstanding all the other measures taken by him for holding that state, if he had not settled there, would not have been able to keep it. Because, if one is on the spot, disorders are seen as they spring up, and one can quickly remedy them; but if one is not at hand, they are heard of only when they are great, and then one can no longer remedy them. Besides this, the country is not pillaged by your officials; the subjects are satisfied by prompt recourse to the prince; thus, wishing to be good, they have more cause to love him, and wishing to be otherwise, to fear him. He who would attack that state from the outside must have the utmost caution; as long as the prince resides there it can only be wrested from him with the greatest difficulty.

The other and better course is to send colonies to one or two places, which may be as keys to that state, for it is necessary either to do this or else to keep there a great number of cavalry and infantry. A prince does not spend much on colonies, for with little or no expense he can send them out and keep them there, and he offends a minority only of the citizens from whom he takes lands and houses to give them to the new inhabitants; and those whom he offends, remaining poor and scattered, are never able to injure him; whilst the rest being uniniured are easily kept quiet, and at the same time are anxious not to err for fear it should happen to them as it has to those who have been despoiled. In conclusion, I say that these colonies are not costly, they are more faithful, they injure less, and the injured, as has been said, being poor and scattered, cannot hurt. Upon this, one has to remark that men ought either to be well treated or crushed, because they can avenge themselves of lighter injuries, of more serious ones they cannot; therefore the injury that is to be done to a man ought to be of such a kind that one does not stand in fear of revenge.

But in maintaining armed men there in place of colonies one spends much more, having to consume on the garrison all the income from the state, so that the acquisition turns into a loss, and many more are exasperated, because the whole state is injured; through the shifting of the garrison up and down all become acquainted with hardship, and all become hostile, and they are enemies who, whilst beaten on their own ground, are yet able to do hurt. For every reason, therefore, such guards are as useless as a colonv is useful.

Again, the prince who holds a country differing in the above respects ought to make himself the head and defender of his less powerful neighbours, and to weaken the more powerful amongst them, taking care that no foreigner as powerful as himself shall, by any accident, get a footing there; for it will always happen that such a one will be introduced by those who are discontented either through excess of ambition or through fear, as one has seen already. The Romans were brought into Greece by the Aetolians; and in every other country where they obtained a footing they were brought in by the inhabitants. And the usual course of affairs is that, as soon as a powerful foreigner enters a country, all the subject states are drawn to him, moved by the hatred which they feel against the ruling power. So that in respect to those subject states he has not to take any trouble to gain them over to himself, for the whole of them quickly rally to the state which he has acquired there. He has only to take care that they do not get hold of too much power and too much authority, and then with his own forces, and with their goodwill, he can easily keep down the more powerful of them, so as to remain entirely master in the country. And he who does not properly manage this business will soon lose what he has acquired, and whilst he does hold it he will have endless difficulties and troubles.

The Romans, in the countries which they annexed, observed closely these measures; they sent colonies and maintained friendly relations with* the minor powers, without increasing their strength; they kept down the greater, and did not allow any strong foreign powers to gain authority. Greece appears to me sufficient for an example. (* See remark in the introduction on the word "intrattenere.") The Achaeans and Aetolians were kept friendly by them, the kingdom of Macedonia was humbled, Antiochus was driven out; yet the merits of the Achaeans and Aetolians never secured for them permission to increase their power, nor did the persuasions of Philip ever induce the Romans to be his friends without first humbling him, nor did the influence of Antiochus make them agree that he should retain any lordship over the country. Because the Romans did in these instances what all prudent princes ought to do, who have to regard not only present troubles, but also future ones, for which they must prepare with every energy, because, when foreseen, it is easy to remedy them; but if you wait until they approach, the medicine is no longer in time because the malady has become incurable; for it happens in this, as the physicians say it happens in hectic fever, that in the beginning of the malady it is easy to cure but difficult to detect, but in the course of time, not having been either detected or treated in the beginning, it becomes easy to detect but difficult to cure. Thus it happens in affairs of state, for when the evils that arise have been foreseen (which it is only given to a wise man to see), they can be quickly redressed, but when, through not having been foreseen, they have been permitted to grow in a way that every one can see them, there

is no longer a remedy. Therefore, the Romans, foreseeing troubles, dealt with them at once, and, even to avoid a war, would not let them come to a head, for they knew that war is not to be avoided, but is only to be put off to the advantage of others; moreover they wished to fight with Philip and Antiochus in Greece so as not to have to do it in Italy; they could have avoided both, but this they did not wish; nor did that ever please them which is forever in the mouths of the wise ones of our time:—Let us enjoy the benefits of the time—but rather the benefits of their own valour and prudence, for time drives everything before it, and is able to bring with it good as well as evil, and evil as well as good.

But let us turn to France and inquire whether she has done any of the things mentioned. I will speak of Louis* (and not of Charles**) as the one whose conduct is the better to be observed, he having held possession of Italy for the longest period; and you will see that he has done the opposite to those things which ought to be done to retain a state composed of divers elements. (* Louis XII, King of France, "The Father of the People," born 1462, died 1515.); (** Charles VIII, King of France, born 1470, died 1498.

King Louis was brought into Italy by the ambition of the Venetians, who desired to obtain half the state of Lombardy by his intervention. I will not blame the course taken by the king, because, wishing to get a foothold in Italy, and having no friends there-seeing rather that every door was shut to him owing to the conduct of Charles-he was forced to accept those friendships which he could get, and he would have succeeded very quickly in his design if in other matters he had not made some mistakes. The king, however, having acquired Lombardy, regained at once the authority which Charles had lost: Genoa yielded; the Florentines became his friends; the Marquess of Mantua, the Duke of Ferrara, the Bentivogli, my lady of Forli, the Lords of Faenza, of Pesaro, of Rimini, of Camerino, of Piombino, the Lucchese, the Pisans, the Sienese—everybody made advances to him to become his friend. Then could the Venetians realize the rashness of the course taken by them, which, in order that they might secure two towns in Lombardy, had made the king master of twothirds of Italy.

Let any one now consider with what little difficulty the king could have maintained his position in Italy had he observed the rules above laid down, and kept all his friends secure and protected; for although they were numerous they were both weak and timid, some afraid of the Church, some of the Venetians, and thus they would always have been forced to stand in with him, and by their means he could easily have made himself secure against those who remained powerful. But he was no sooner in Milan than he did the contrary by assisting Pope Alexander to occupy the Romagna. It never occurred to him that by this action he was weakening himself, depriving himself of friends and of those who had thrown themselves into his lap, whilst he aggrandized the Church by adding much temporal power to the spiritual, thus giving it greater authority. And having committed this prime error, he was obliged to follow it up, so much so that, to put an end to the ambition of Alexander, and to prevent his becoming the master of Tuscany, he was himself forced to come into Italy.

And as if it were not enough to have aggrandized the Church, and deprived himself of friends, he, wishing to have the kingdom of Naples, divided it with the King of Spain, and where he was the prime arbiter in Italy he takes an associate, so that the ambitious of that country and the malcontents of his own should have somewhere to shelter; and whereas he could have left in the kingdom his own pensioner as king, he drove him out, to put one there who was able to drive him, Louis, out in turn.

The wish to acquire is in truth very natural and common, and men always do so when they can, and for this they will be praised not blamed; but when they cannot do so, yet wish to do so by any means, then there is folly and blame. Therefore, if France could have attacked Naples with her own forces she ought to have done so; if she could not, then she ought not to have divided it. And if the partition which she made with the Venetians in Lombardy was justified by the excuse that by it she got a foothold in Italy, this other partition merited blame, for it had not the excuse of that necessity.

Therefore Louis made these five errors: he destroyed the minor powers, he increased the strength of one of the greater powers in Italy, he brought in a foreign power, he did not settle in the country, he did not send colonies. Which errors, had he lived, were not enough to injure him had he not made a sixth by taking away their dominions from the Venetians; because, had he not aggrandized the Church, nor brought Spain into Italy, it would have been very reasonable and necessary to humble them; but having first taken these steps, he ought never to have consented to their ruin, for they, being nowerful, would always have kept off others from designs on Lombardy, to which the Venetians would never have consented except to become masters themselves there; also because the others would not wish to take Lombardy from France in order to give it to the Venetians, and to run counter to both they would not have had the courage.

Thus King Louis lost Lombardy by not having followed any of the conditions observed by those who have taken possession of countries and wished to retain them. Nor is there any miracle in this, but much that is reasonable and quite natural. And on these matters I spoke at Nantes with Rouen, when Valentino, as Cesare Borgia, the son of Pope Alexander, was usually called, occupied the Romagna, and on Cardinal Rouen observing to me that the Italians did not understand war, I replied to him that the French did not understand statecraft, meaning that otherwise they would not have allowed the Church to reach such greatness. And in fact it has been seen that the greatness of the Church and of Spain in Italy has been caused by France, and her ruin may be attributed to them. From this a general rule is drawn which never or rarely fails: that he who is the cause of another becoming powerful is ruined; because that predominancy has been brought about either by astuteness or else by force, and both are distrusted by him who has been raised to power.

MACHIAVELLI THE PRINCE CHAPTER 4

[Why The Kingdom Of Darius, Conquered By Alexander, Did Not Rebel Against The Successors Of Alexander At His Death]

Considering the difficulties which men have had to hold to a newly acquired state, some might wonder how, seeing that Alexander the Great became the master of Asia in a few years, and died whilst it was scarcely settled (whence it might appear reasonable that the whole empire would have rebelled), nevertheless his successors maintained themselves, and had to meet no other difficulty than that which arose among themselves from their own ambitions.

I answer that the principalities of which one has record are found to be governed in two different ways; either by a prince, with a body of servants, who assist him to govern the kingdom as ministers by his favour and permission; or by a prince and barons, who hold that dignity by antiquity of blood and not by the grace of the prince. Such barons have states and their own subjects, who recognise them as lords and hold them in natural affection. Those states that are governed by a prince and his servants hold their prince in more consideration, because in all the country there is no one who is recognised as superior to him, and if they yield obedience to another they do it as to a minister and official, and they do not bear him any particular affection.

The examples of these two governments in our time are the Turk and the King of France. The entire monarchy of the Turk is governed by one lord, the others are his servants; and, dividing his kingdom into sanjaks, he sends there different administrators, and shifts and changes them as he chooses. But the King of France is placed in the midst of an ancient body of lords, acknowledged by their own subjects, and beloved by them; they have their own prerogatives, nor can the king take these away except at his peril. Therefore, he who considers both of these states will recognise great difficulties in seizing the state of the Turk, but, once it is conquered, great ease in holding it. The causes of the difficulties in seizing the kingdom of the Turk are that the usurper cannot be called in by the princes of the kingdom, nor can he hope to be assisted in his designs by the revolt of those whom the lord has around him. This arises from the reasons given above; for his ministers, being all slaves and bondmen, can only be corrupted with great difficulty, and one can expect little advantage from them when they have been corrupted, as they cannot carry the people with them, for the reasons assigned Hence, he who attacks the Turk must bear in mind that he will find him united, and he will have to rely more on his own strength than on the revolt of others; but, if once the Turk has been conquered, and routed in the field in such a way that he cannot replace his armies, there is nothing to fear but the family of this prince, and, this being exterminated, there remains no one to fear, the others having no credit with the people; and as the conqueror did not rely on them before his victory, so he ought not to fear them after it.

The contrary happens in kingdoms governed like that of France, because one can easily enter there by gaining over some baron of the kingdom, for one always finds malcontents and such as desire a change. Such men, for the reasons given, can open the way into the state and render the victory easy; but if you wish to hold it afterwards, you meet with infinite difficulties, both from those who have assisted you and from those you have crushed. Nor is it enough for you to have exterminated the family of the prince, because the lords that remain make themselves the heads of fresh movements against you, and as you are unable either to satisfy or exterminate them, that state is lost whenever time brings the opportunity.

Now if you will consider what was the nature of the government of Darius, you will find it similar to the kingdom of the Turk, and therefore it was only necessary for Alexander, first to overthrow him in the field, and then to take the country from him. After which victory, Darius being killed, the state remained secure to Alexander, for the above reasons. And if his successors had been united they would have enjoyed it securely and at their ease, for there were no tumults raised in the kingdom except those they provoked themselves.

But it is impossible to hold with such tranquillity states constituted like that of France. Hence arose those frequent rebellions against the Romans in Spain, France, and Greece, owing to the many principalities there were in these states, of which, as long as the memory of them endured, the Romans always held an insecure possession; but with the power and long continuance of the empire the memory of them passed away, and the Romans then became secure possessors. And when fighting afterwards amongst themselves, each one was able to attach to himself his own parts of the country, according to the authority he had assumed there; and the family of the former lord being exterminated, none other than the Romans were acknowledged.

When these things are remembered no one will marvel at the ease with which Alexander held the Empire of Asia, or at the difficulties which others have had to keep an acquisition, such as Pyrrhus and many more; this is not occasioned by the little or abundance of ability in the conqueror, but by the want of uniformity in the subject state.

MACHIAVELLI THE PRINCE CHAPTER 5

[Concerning The Way To Govern Cities Or Principalities Which Lived Under Their Own Laws Before They Were Annexed]

Whenever those states which have been acquired as stated have been accustomed to live under their own laws and in freedom, there are three courses for those who wish to hold them: the first is to ruin them, the next is to reside there in person, the third is to permit them to live under their own laws, drawing a tribute, and establishing within it an oligarchy which will keep it friendly to you. Because such a government, being created by the prince, knows that it cannot stand without his friendship and interest, and does its utmost to support him; and therefore he who would keep a city accustomed to freedom will hold it more easily by the means of its own citizens than in any other way.

There are, for example, the Spartans and the Romans. The Spartans held Athens and Thebes, establishing there an oligarchy: nevertheless they lost them. The Romans, in order to hold Capua, Carthage, and Numantia, dismantled them, and did not lose them. They wished to hold Greece as the Spartans held it, making it free and permitting its laws, and did not succeed. So to hold it they were compelled to dismantle many cities in the country, for in truth there is no safe way to retain them otherwise than by ruining them. And he who becomes master of a city accustomed to freedom and does not destroy it, may expect to be destroyed by it. for in rebellion it has always the watchword of liberty and its ancient privileges as a rallying point, which neither time nor benefits will ever cause it to forget. And whatever you may do or provide against, they never forget that name or their privileges unless they are disunited or dispersed, but at every chance they immediately rally to them, as Pisa after the hundred years she had been held in bondage by the Florentines.

But when cities or countries are accustomed to live under a prince, and his family is exterminated, they, being on the one hand accustomed to obey and on the other hand not having the old prince, cannot agree in making one from amongst themselves, and they do not know how to govern themselves. For this reason they are very slow to take up arms, and a prince can gain them to himself and secure them much more easily. But in republics there is more vitality, greater hatred, and more desire for vengeance, which will never permit them to allow the memory of their former liberty to rest; so that the safest way is to destroy them or to reside there.

MACHIAVELLI THE PRINCE CHAPTER 6

[Concerning New Principalities Which Are Acquired By One's Own Arms And Ability]

Let no one be surprised if, in speaking of entirely new principalities as I shall do, I adduce the highest examples both of prince and of state; because men, walking almost always in paths beaten by others, and following by imitation their deeds, are yet unable to keep entirely to the ways of others or attain to the power of those they imitate. A wise man ought always to follow the paths beaten by great men, and to imitate those who have been supreme, so that if his ability does not equal theirs, at least it will savour of it. Let him act like the clever archers who, designing to hit the mark which yet appears too far distant, and knowing the limits to which the strength of their bow attains, take aim much higher than the mark, not to reach by their strength or arrow to so great a height, but to be able with the aid of so high an aim to hit the mark they wish to reach.

I say, therefore, that in entirely new principalities, where there is a new prince, more or less difficulty is found in keeping them, accordingly as there is more or less ability in him who has acquired the state. Now, as the fact of becoming a prince from a private station presupposes either ability or fortune, it is clear that one or other of these things will mitigate in some degree many difficulties. Nevertheless, he who has relied least on fortune is established the strongest. Further, it facilitates matters when the prince, having no other state, is compelled to reside there in person.

But to come to those who, by their own ability and not through fortune, have risen to be princes, I say that Moses, Cyrus, Romulus, Theseus, and such like are the most excellent examples. And although one may not discuss Moses, he having been a mere executor of the will of God, yet he ought to be admired, if only for that favour which made him worthy to speak with God. But in considering Cyrus and others who have acquired or founded kingdoms, all will be found admirable; and if their particular deeds and conduct shall be considered, they will not be found inferior to those of Moses, although he had so great a preceptor. And in examining their actions and lives one cannot see that they owed anything to fortune beyond opportunity, which brought them the material to mould into the form which seemed best to them. Without that opportunity their powers of mind would have been extinguished, and without those powers the opportunity would have come in vain.

It was necessary, therefore, to Moses that he should find the people of Israel in Egypt enslaved and oppressed by the Egyptians, in order that they should be disposed to follow him so as to be delivered out of bondage. It was necessary that Romulus should not remain in Alba, and that he should be abandoned at his birth, in order that he should become King of Rome and founder of the fatherland. It was necessary that Cyrus should find the Persians discontented with the government of the Medes, and the Medes soft and effeminate through their long peace. Theseus could not have shown his ability had he not found the Athenians dispersed. These opportunities, therefore, made those men fortunate, and their high ability enabled them to recognise the opportunity whereby their country was ennobled and made famous.

Those who by valorous ways become princes, like these men. acquire a principality with difficulty, but they keep it with ease. The difficulties they have in acquiring it rise in part from the new rules and methods which they are forced to introduce to establish their government and its security. And it ought to be remembered that there is nothing more difficult to take in hand, more perilous to conduct, or more uncertain in its success than to take the lead in the introduction of a new order of things, because the innovator has for enemies all those who have done well under the old conditions, and lukewarm defenders in those who may do well under the new. This coolness arises partly from fear of the opponents, who have the laws on their side, and partly from the incredulity of men, who do not readily believe in new things until they have had a long experience of them. Thus it happens that whenever those who are hostile have the opportunity to attack they do it like partisans, whilst the others defend lukewarmly, in such wise that the prince is endangered along with them.

It is necessary, therefore, if we desire to discuss this matter thoroughly, to inquire whether these innovators can rely on themselves or have to depend on others: that is to say, whether, to consummate their enterprise, have they to use prayers or can they use force? In the first instance they always succeed badly, and never compass anything; but when they can rely on themselves and use force, then they are rarely endangered. Hence it is that all armed prophets have conquered, and the unarmed ones have been destroyed. Besides the reasons mentioned, the nature of the people is variable, and whilst it is easy to persuade them, it is difficult to fix them in that persuasion. And thus it is necessary to take such measures that, when they believe no longer, it may be possible to make them believe by force.

If Moses, Cyrus, Theseus, and Romulus had been unarmed they could not have enforced their constitutions for long—as happened in our time to Fra Girolamo Savonarola, who was ruined with his new order of things immediately the multitude believed in him no longer, and he had no means of keeping steadfast those who believed or of making the unbelievers to believe. Therefore such as these have great difficulties in consummating their enterprise, for all their dangers are in the ascent, yet with ability they will overcome them; but when these are overcome, and those who envied them their success are exterminated, they will begin to be respected, and they will continue afterwards powerful, secure, honoured, and happy.

To these great examples I wish to add a lesser one; still it bears some resemblance to them, and I wish it to suffice me for all of a like kind: it is Hiero the Syracusan* (* Hiero II, born about 307 B.C., died 216 B.C.). This man rose from a private station to be Prince of Syracuse, nor did he, either, owe anything to fortune but opportunity; for the Syracusans, being oppressed, chose him for their captain, afterwards he was rewarded by being made their prince. He was of so great ability, even as a private citizen, that one who writes of him says he wanted nothing but a kingdom to be a king. This man abolished the old soldiery, organised the new, gave up old alliances, made new ones; and as he had his own soldiers and allies, on such foundations he was able to build any edifice: thus, whilst he had endured much trouble in acquiring, he had but little in keeping.

MACHIAVELLI THE PRINCE CHAPTER 7 [Concerning New Principalities Which Are Acquired Either By The Arms Of Others Or By Good Fortune]

Those who solely by good fortune become princes from being private citizens have little trouble in rising, but much in keeping atop; they have not any difficulties on the way up, because they fly, but they have many when they reach the summit. Such are those to whom some state is given either for money or by the favour of him who bestows it; as happened to many in Greece, in the cities of Ionia and of the Hellespont, where princes were made by Darius, in order that they might hold the cities both for his security and his glory; as also were those emperors who, by the corruption of the soldiers, from being citizens came to empire. Such stand simply elevated upon the goodwill and the fortune of him who has elevated them-two most inconstant and unstable things. Neither have they the knowledge requisite for the position; because, unless they are men of great worth and ability, it is not reasonable to expect that they should know how to command, having always lived in a private condition; besides, they cannot hold it because they have not forces which they can keep friendly and faithful.

States that rise unexpectedly, then, like all other things in nature which are born and grow rapidly, cannot leave their foundations and correspondencies* fixed in such a way that the first storm will not overthrow them; unless, as is said, those who unexpectedly become princes are men of so much ability that they know they have to be prepared at once to hold that which fortune has thrown into their laps, and that those foundations, which others have laid BEFORE they became princes, they must lay AFTERWARDS. (* "Le radici e corrispondenze," their roots (i.e. foundations) and correspondencies or relations with other states—a common meaning of "correspondence" and "correspondency" in the sixteenth and seventeenth centuries.)

Concerning these two methods of rising to be a prince by ability or fortune, I wish to adduce two examples within our own recollection, and these are Francesco Sforza* and Cesare Borgia. Francesco, by proper means and with great ability, from being a private person rose to be Duke of Milan, and that which he had acquired with a thousand anxieties he kept with little trouble. On the other hand, Cesare Borgia, called by the people Duke Valentino, acquired his state during the ascendancy of his father, and on its decline he lost it, notwithstanding that he had taken every measure and done all that ought to be done by a wise and able man to fix firmly his roots in the states which the arms and fortunes of others had bestowed on him. (* Francesco Sforza, born 1401, died 1466. He married Bianca Maria Visconti, a natural daughter of Filippo Visconti, the Duke of Milan, on whose death he procured his own elevation to the duchy. Machiavelli was the accredited agent of the Florentine Republic to Cesare Borgia (1478-1507) during the transactions which led up to the assassinations of the Orsini and Vitelli at Sinigalia, and along with his letters to his chiefs in Florence he has left an account. written ten years before "The Prince," of the proceedings of the duke in his "Descritione del modo tenuto dal duca Valentino nello ammazzare Vitellozzo Vitelli," etc., a translation of which is appended to the present work.)

Because, as is stated above, he who has not first laid his foundations may be able with great ability to lay them afterwards, but they will be laid with trouble to the architect and danger to the building. If, therefore, all the steps taken by the duke be considered, it will be seen that he laid solid foundations for his future power, and I do not consider it superfluous to discuss them, because I do not know what better precepts to give a new prince than the example of his actions; and if his dispositions were of no avail, that was not his fault, but the extraordinary and extreme malignity of fortune.

Alexander the Sixth, in wishing to aggrandize the duke, his son, had many immediate and prospective difficulties. Firstly, he did not see his way to make him master of any state that was not a state of the Church; and if he was willing to rob the Church he knew that the Duke of Milan and the Venetians would not consent, because Faenza and Rimini were already under the protection of the Venetians. Besides this, he saw the arms of Italy, especially those by which he might have been assisted, in hands that would fear the aggrandizement of the Pope, namely, the Orsini and the Colonnesi and their following. It behoved him, therefore, to upset this state of affairs and embroil the powers, so as to make himself securely master of part of their states. This was easy for him to do, because he found the Venetians, moved by other reasons, inclined to bring back the French into Italy; he would not only not oppose this, but he would render it more easy by dissolving the former marriage of King Louis. Therefore the king came into Italy with the assistance of the Venetians and the consent of Alexander. He was no sooner in Milan than the Pope had soldiers from him for the attempt on the Romagna, which yielded to him on the reputation of the king. The duke, therefore, having acquired the Romagna and beaten the Colonnesi, while wishing to hold that and to advance further, was hindered by two things: the one, his forces did not appear loval to him, the other, the goodwill of France: that is to say, he feared that the forces of the Orsini, which he was using, would not stand to him, that not only might they hinder him from winning more, but might themselves seize what he had won, and that the king might also do the same. Of the Orsini he had a warning when, after taking Faenza and attacking Bologna, he saw them go very unwillingly to that attack. And as to the king, he learned his mind when he himself, after taking the Duchy of Urbino, attacked Tuscany, and the king made him desist from that undertaking; hence the duke decided to depend no more upon the arms and the luck of others.

For the first thing he weakened the Orsini and Colonnesi parties in Rome, by gaining to himself all their adherents who were gentlemen, making them his gentlemen, giving them good pay, and, according to their rank, honouring them with office and command in such a way that in a few months all attachment to the factions was destroyed and turned entirely to the duke. After this he awaited an opportunity to crush the Orsini, having scattered the adherents of the Colonna house. This came to him soon and he used it well: for the Orsini, perceiving at length that the aggrandizement of the duke and the Church was ruin to them, called a meeting of the Magione in Perugia. From this sprung the rebellion at Urbino and the tumults in the Romagna, with endless dangers to the duke, all of which he overcame with the help of the French. Having restored his authority, not to leave it at risk by trusting either to the French or other outside forces, he had recourse to his wiles, and he knew so well how to conceal his mind that, by the mediation of Signor Pagolo-whom the duke did not fail to secure with all kinds of attention, giving him money, apparel, and horses-the Orsini were reconciled, so that their simplicity brought them into his power at Sinigalia* (* Sinigalia, 31st December 1502.). Having exterminated the leaders, and turned their partisans into his friends, the duke laid sufficiently good foundations to his power, having all the Romagna and the Duchy of Urbino; and the people now beginning to appreciate their prosperity, he gained them all over to himself. And as this point is worthy of notice, and to be imitated by others, I am not willing to leave it out.

When the duke occupied the Romagna he found it under the rule of weak masters, who rather plundered their subjects than ruled them, and gave them more cause for disunion than for union, so that the country was full of robbery, quarrels, and every kind of violence; and so, wishing to bring back peace and obedience to authority, he considered it necessary to give it a good governor. Thereupon he promoted Messer Ramiro d'Orco^{*}, a swift and cruel man, to whom he gave the fullest power (* Ramiro d'Orco. Ramiro de Lorqua.). This man in a short time restored peace and unity with the greatest success. Afterwards the duke considered that it was not advisable to confer such excessive authority, for he had no doubt but that he would become odious, so he set up a court of judgement in the country, under a most excellent president, wherein all cities had their advocates. And because he knew that the past severity had caused some hatred against himself, so, to clear himself in the minds of the people, and gain them entirely to himself, he desired to show that, if any cruelty had been practised, it had not originated with him, but in the natural sternness of the minister. Under this pretence he took Ramiro, and one morning caused him to be executed and left on the piazza at Cesena with the block and a bloody knife at his side. The barbarity of this spectacle caused the people to be at once satisfied and dismayed.

But let us return whence we started. I say that the duke, finding himself now sufficiently powerful and partly secured from immediate dangers by having armed himself in his own way, and having in a great measure crushed those forces in his vicinity that could injure him if he wished to proceed with his conquest, had next to consider France, for he knew that the king, who too late was aware of his mistake, would not support him. And from this time he began to seek new alliances and to temporize with France in the expedition which she was making towards the kingdom of Naples against the Spaniards who were besieging Gaeta. It was his intention to secure himself against them, and this he would have quickly accomplished had Alexander lived.

Such was his line of action as to present affairs. But as to the future he had to fear, in the first place, that a new successor to the Church might not be friendly to him and might seek to take from him that which Alexander had given him, so he decided to act in four ways. Firstly, by exterminating the families of those lords whom he had despoiled, so as to take away that pretext from the Pope. Secondly, by winning to himself all the gentlemen of Rome, so as to be able to curb the Pope with their aid, as has been observed. Thirdly, by converting the college more to himself. Fourthly, by acquiring so much power before the Pope should die that he could by his own measures resist the first shock. Of these four things, at the death of Alexander, he had accomplished three. For he had killed as many of the dispossessed lords as he could lay hands on, and few had escaped; he had won over the Roman gentlemen, and he had the most numerous party in the college. And as to any fresh acquisition, he intended to become master of Tuscany, for he already possessed Perugia and Piombino, and Pisa was under his protection. And as he had no longer to study France (for the French were already driven out of the kingdom of Naples by the Spaniards, and in this way both were compelled to buy his goodwill), he pounced down upon Pisa. After this, Lucca and Siena yielded at once, partly through hatred and partly through fear of the Florentines: and the Florentines would have had no remedy had he continued to prosper, as he was prospering the year that Alexander died, for he had acquired so much power and reputation that he would have stood by himself, and no longer have depended on the luck and the forces of others, but

solely on his own power and ability. But Alexander died five years after he had first drawn the sword. He left the duke with the state of Romagna alone consolidated, with the rest in the air, between two most powerful hostile armies, and sick unto death. Yet there were in the duke such boldness and ability, and he knew so well how men are to be won or lost, and so firm were the foundations which in so short a time he had laid, that if he had not had those armies on his back, or if he had been in good health, he would have overcome all difficulties. And it is seen that his foundations were good, for the Romagna awaited him for more than a month. In Rome, although but half alive, he remained secure; and whilst the Baglioni, the Vitelli, and the Orsini might come to Rome, they could not effect anything against him. If he could not have made Pope him whom he wished, at least the one whom he did not wish would not have been elected. But if he had been in sound health at the death of Alexander*, everything would have been different to him (* Alexander VI died of fever, 18th August 1503.). On the day that Julius the Second* was elected, he told me that he had thought of everything that might occur at the death of his father, and had provided a remedy for all. except that he had never anticipated that, when the death did happen, he himself would be on the point to die (* Julius II was Giuliano della Rovere, Cardinal of San Pietro ad Vincula, born 1443, died 1513.).

When all the actions of the duke are recalled, I do not know how to blame him, but rather it appears to be, as I have said, that I ought to offer him for imitation to all those who, by the fortune or the arms of others, are raised to government. Because he, having a lofty spirit and far-reaching aims, could not have regulated his conduct otherwise, and only the shortness of the life of Alexander and his own sickness frustrated his designs. Therefore, he who considers it necessary to secure himself in his new principality, to win friends, to overcome either by force or fraud, to make himself beloved and feared by the people, to be followed and revered by the soldiers, to exterminate those who have power or reason to hurt him, to change the old order of things for new, to be severe and gracious, magnanimous and liberal, to destroy a disloyal soldiery and to create new, to maintain friendship with kings and princes in such a way that they must help him with zeal and offend with caution, cannot find a more lively example than the actions of this man.

Only can he be blamed for the election of Julius the Second, in whom he made a bad choice, because, as is said, not being able to elect a Pope to his own mind, he could have hindered any other from being elected Pope; and he ought never to have consented to the election of any cardinal whom he had injured or who had cause to fear him if they became pontiffs. For men injure either from fear or hatred. Those whom he had injured, amongst others, were San Pietro ad Vincula, Colonna, San Giorgio, and Ascanio* (* San Giorgio is Raffaello Riario. Ascanio is Ascanio Sforza.). The rest, in becoming Pope, had to fear him, Rouen and the Spaniards excepted: the latter from their relationship and obligations. the former from his influence, the kingdom of France having relations with him. Therefore, above everything, the duke ought to have created a Spaniard Pope, and, failing him, he ought to have consented to Rouen and not San Pietro ad Vincula. He who believes that new benefits will cause great personages to forget old injuries is deceived. Therefore, the duke erred in his choice and it was the cause of his ultimate ruin.

MACHIAVELLI THE PRINCE CHAPTER 8 [Concerning Those Who Have Obtained A Principality By Wickedness]

Although a prince may rise from a private station in two ways, neither of which can be entirely attributed to fortune or genius, yet it is manifest to me that I must not be silent on them, although one could be more copiously treated when I discuss republics. These methods are when, either by some wicked or nefarious ways, one ascends to the principality, or when by the favour of his fellow-citizens a private person becomes the prince of his country. And speaking of the first method, it will be illustrated by two examples—one ancient, the other modern—and without entering further into the subject, I consider these two examples will suffice those who may be compelled to follow them.

Ágathocles, the Sicilian*, became King of Syracuse not only from a private but from a low and abject position. This man, the son of a potter, through all the changes in his fortunes always led an infamous life. (* Agathocles the Sicilian, born 361 B.C., died 289 B.C.)

Nevertheless he accompanied his infamies with so much ability of mind and body that, having devoted himself to the military profession, he rose through its ranks to be Praetor of Syracuse. Being established in that position, and having deliberately resolved to make himself prince and to seize by violence, without obligation to others, that which had been conceded to him by assent, he came to an understanding for this purpose with Amilcar, the Carthaginian, who, with his army, was fighting in Sicily. One morning he assembled the people and the senate of Syracuse, as if he had to discuss with them things relating to the Republic, and at a given signal the soldiers killed all the senators and the richest of the people; these dead, he seized and held the princedom of that city without any civil commotion. And although he was twice routed by the Carthaginians, and ultimately besieged, yet not only was he able to defend his city, but leaving part of his men for its defence, with the others he attacked Africa, and in a short time raised the siege of Syracuse. The Carthaginians, reduced to extreme necessity, were compelled to come to terms with Agathocles, and, leaving Sicily to him, had to be content with the possession of Africa.

Therefore, he who considers the actions and the genius of this man will see nothing, or little, which can be attributed to fortune, inasmuch as he attained pre-eminence, as is shown above, not by the favour of any one, but step by step in the military profession, which steps were gained with a thousand troubles and perils, and were afterwards boldly held by him with many hazardous dangers. Yet it cannot be called talent to slav fellow-citizens, to deceive friends, to be without faith, without mercy, without religion; such methods may gain empire, but not glory. Still, if the courage of Agathocles in entering into and extricating himself from dangers be considered, together with his greatness of mind in enduring and overcoming hardships, it cannot be seen why he should be esteemed less than the most notable captain. Nevertheless, his barbarous cruelty and inhumanity with infinite wickedness do not permit him to be celebrated among the most excellent men. What he achieved cannot be attributed either to fortune or genius.

In our times, during the rule of Alexander the Sixth, Oliverotto da Fermo, having been left an orphan many years before, was brought up by his maternal uncle. Giovanni Fogliani, and in the early days of his youth sent to fight under Pagolo Vitelli, that, being trained under his discipline, he might attain some high position in the military profession. After Pagolo died, he fought under his brother Vitellozzo, and in a very short time, being endowed with wit and a vigorous body and mind, he became the first man in his profession. But it appearing a paltry thing to serve under others, he resolved, with the aid of some citizens of Fermo, to whom the slavery of their country was dearer than its liberty, and with the help of the Vitelleschi, to seize Fermo. So he wrote to Giovanni Fogliani that, having been away from home for many years, he wished to visit him and his city, and in some measure to look upon his patrimony; and although he had not laboured to acquire anything except honour, yet, in order that the citizens should see he had not spent his time in vain, he desired to come honourably, so would be accompanied by one hundred horsemen, his friends and retainers; and he entreated Giovanni to arrange that he should be received honourably by the Fermians, all of which would be not only to his honour, but also to that of Giovanni himself, who had brought him up.

Giovanni, therefore, did not fail in any attentions due to his nephew, and he caused him to be honourably received by the Fermians, and he lodged him in his own house, where, having passed some days, and having arranged what was necessary for his wicked designs, Oliverotto gave a solemn banquet to which he invited Giovanni Fogliani and the chiefs of Fermo. When the viands and all the other entertainments that are usual in such banquets were finished, Oliverotto artfully began certain grave discourses, speaking of the greatness of Pope Alexander and his son Cesare, and of their enterprises, to which discourse Giovanni and others answered; but he rose

THE GRAND BIBLE

at once, saying that such matters ought to be discussed in a more private place, and he betook himself to a chamber, whither Giovanni and the rest of the citizens went in after him. No sooner were they seated than soldiers issued from secret places and slaughtered Giovanni and the rest. After these murders Oliverotto, mounted on horseback, rode up and down the town and besieged the chief magistrate in the palace. so that in fear the people were forced to obey him, and to form a government, of which he made himself the prince. He killed all the malcontents who were able to injure him, and strengthened himself with new civil and military ordinances, in such a way that, in the year during which he held the principality, not only was he secure in the city of Fermo, but he had become formidable to all his neighbours. And his destruction would have been as difficult as that of Agathocles if he had not allowed himself to be overreached by Cesare Borgia, who took him with the Orsini and Vitelli at Sinigalia, as was stated above. Thus one year after he had committed this parricide, he was strangled, together with Vitellozzo, whom he had made his leader in valour and wickedness

Some may wonder how it can happen that Agathocles, and his like, after infinite treacheries and cruelties, should live for long secure in his country, and defend himself from external enemies, and never be conspired against by his own citizens; seeing that many others, by means of cruelty, have never been able even in peaceful times to hold the state, still less in the doubtful times of war. I believe that this follows from severities* being badly or properly used (* Mr Burd suggests that this word probably comes near the modern equivalent of Machiavelli's thought when he speaks of "crudelta" than the more obvious "cruelties."). Those may be called properly used if of evil it is possible to speak well, that are applied at one blow and are necessary to one's security, and that are not persisted in afterwards unless they can be turned to the advantage of the subjects. The badly employed are those which, notwithstanding they may be few in the commencement, multiply with time rather than decrease. Those who practise the first system are able, by aid of God or man, to mitigate in some degree their rule, as Agathocles did. It is impossible for those who follow the other to maintain themselves.

Hence it is to be remarked that, in seizing a state, the usurper ought to examine closely into all those injuries which it is necessary for him to inflict, and to do them all at one stroke so as not to have to repeat them daily; and thus by not unsettling men he will be able to reassure them, and win them to himself by benefits. He who does otherwise, either from timidity or evil advice, is always compelled to keep the knife in his hand; neither can he rely on his subjects, nor can they attach themselves to him, owing to their continued and repeated wrongs. For injuries ought to be done all at one time, so that, being tasted less, they offend less; benefits ought to be given little by little, so that the flavour of them may last longer.

And above all things, a prince ought to live amongst his people in such a way that no unexpected circumstances, whether of good or evil, shall make him change; because if the necessity for this comes in troubled times, you are too late for harsh measures; and mild ones will not help you, for they will be considered as forced from you, and no one will be under any obligation to you for them.

MACHIAVELLI THE PRINCE CHAPTER 9 [Concerning A Civil Principality]

But coming to the other point—where a leading citizen becomes the prince of his country, not by wickedness or any intolerable violence, but by the favour of his fellow citizens this may be called a civil principality: nor is genius or fortune altogether necessary to attain to it, but rather a happy shrewdness. I say then that such a principality is obtained either by the favour of the people or by the favour of the nobles. Because in all cities these two distinct parties are found, and from this it arises that the people do not wish to be ruled nor oppressed by the nobles, and the nobles wish to rule and oppress the people; and from these two opposite desires there arises in cities one of three results, either a principality, self-government, or anarchy.

A principality is created either by the people or by the nobles, accordingly as one or other of them has the opportunity; for the nobles, seeing they cannot withstand the people, begin to cry up the reputation of one of themselves, and they make him a prince, so that under his shadow they can give vent to their ambitions. The people, finding they cannot resist the nobles, also cry up the reputation of one of themselves, and make him a prince so as to be defended by his authority. He who obtains sovereignty by the assistance of the nobles maintains himself with more difficulty than he who comes to it by the aid of the people, because the former finds himself with many around him who consider themselves his equals, and because of this he can neither rule nor manage them to his liking. But he who reaches sovereignty by popular favour finds himself alone, and has none around him, or few, who are not prepared to obey him.

Besides this, one cannot by fair dealing, and without injury to others, satisfy the nobles, but you can satisfy the people, for their object is more righteous than that of the nobles, the latter wishing to oppress, while the former only desire not to be oppressed. It is to be added also that a prince can never secure himself against a hostile people, because of there being too many, whilst from the nobles he can secure himself, as they are few in number. The worst that a prince may expect from a hostile people is to be abandoned by them; but from hostile nobles he has not only to fear abandonment, but also that they will rise against him; for they, being in these affairs more far-seeing and astute, always come forward in time to save themselves, and to obtain favours from him whom they expect to prevail. Further, the prince is compelled to live always with the same people, but he can do well without the same nobles. being able to make and unmake them daily, and to give or take away authority when it pleases him.

Therefore, to make this point clearer, I say that the nobles ought to be looked at mainly in two ways: that is to say, they either shape their course in such a way as binds them entirely to your fortune, or they do not. Those who so bind themselves, and are not rapacious, ought to be honoured and loved; those who do not bind themselves may be dealt with in two ways; they may fail to do this through pusillanimity and a natural want of courage, in which case you ought to make use of them, especially of those who are of good counsel; and thus, whist in prosperity you honour them, in adversity you do not have to fear them. But when for their own ambitious ends they shun binding themselves, it is a token that they are giving more thought to themselves than to you, and a prince ought to guard against such, and to fear them as if they were open enemies, because in adversity they always help to ruin him.

Therefore, one who becomes a prince through the favour of the people ought to keep them friendly, and this he can easily do seeing they only ask not to be oppressed by him. But one who, in opposition to the people, becomes a prince by the favour of the nobles, ought, above everything, to seek to win the people over to himself, and this he may easily do if he takes them under his protection. Because men, when they receive good from him of whom they were expecting evil, are bound more closely to their benefactor; thus the people quickly become more devoted to him than if he had been raised to the principality by their favours; and the prince can win their affections in many ways, but as these vary according to the circumstances one cannot give fixed rules, so I omit them; but, I repeat, it is necessary for a prince to have the people friendly, otherwise he has no security in adversity.

Nabis*, Prince of the Spartans, sustained the attack of all Greece, and of a victorious Roman army, and against them he defended his country and his government; and for the overcoming of this peril it was only necessary for him to make himself secure against a few, but this would not have been sufficient had the people been hostile (* Nabis, tyrant of Sparta, conquered by the Romans under Flamininus in 195 B.C.; killed 192 B.C.). And do not let any one impugn this statement with the trite proverb that "He who builds on the people, builds on the mud," for this is true when a private citizen makes a foundation there, and persuades himself that the people will free him when he is oppressed by his enemies or by the magistrates; wherein he would find himself very often deceived, as happened to the Gracchi in Rome and to Messer Giorgio Scali* in Florence. (* Messer Giorgio Scali. This Machiavelli's "Florentine History," event is to be found in Book III.)

But granted a prince who has established himself as above, who can command, and is a man of courage, undismayed in adversity, who does not fail in other qualifications, and who, by his resolution and energy, keeps the whole people encouraged—such a one will never find himself deceived in them, and it will be shown that he has laid his foundations well.

These principalities are liable to danger when they are passing from the civil to the absolute order of government, for such princes either rule personally or through magistrates. In the latter case their government is weaker and more insecure, because it rests entirely on the goodwill of those citizens who are raised to the magistracy, and who, especially in troubled times, can destroy the government with great ease, either by intrigue or open defiance; and the prince has not the chance amid tumults to exercise absolute authority, because the citizens and subjects, accustomed to receive orders from magistrates, are not of a mind to obey him amid these confusions, and there will always be in doubtful times a scarcity of men whom he can trust. For such a prince cannot rely upon what he observes in quiet times, when citizens have need of the state, because then every one agrees with him; they all promise, and when death is far distant they all wish to die for him; but in troubled times, when the state has need of its citizens then he finds but few. And so much the more is this experiment dangerous, inasmuch as it can only be tried once. Therefore a wise prince ought to adopt such a course that his citizens will always in every sort and kind of circumstance have need of the state and of him, and then he will always find them faithful

MACHIAVELLI THE PRINCE CHAPTER 10

[Concerning The Way In Which The Strength Of All Principalities Ought To Be Measured]

It is necessary to consider another point in examining the character of these principalities: that is, whether a prince has such power that, in case of need, he can support himself with his own resources, or whether he has always need of the assistance of others. And to make this quite clear I say that I consider those who are able to support themselves by their own resources who can, either by abundance of men or money, raise a sufficient army to join battle against any one who comes to attack them; and I consider those always to have need of others who cannot show themselves against the enemy in the field, but are forced to defend themselves by sheltering behind walls. The first case has been discussed, but we will speak of it again should it recur. In the second case one can say nothing except to encourage such princes to provision and fortify their towns, and not on any account to defend the country. And whoever shall fortify his town well, and shall have managed the other concerns of his subjects in the way stated above, and to be often repeated, will never be attacked without great caution, for men are always adverse to enterprises where difficulties can be seen, and it will be seen not to be an easy thing to attack one who has his town well fortified, and is not hated by his people.

The cities of Germany are absolutely free, they own but little country around them, and they yield obedience to the emperor when it suits them, nor do they fear this or any other power they may have near them, because they are fortified in such a way that every one thinks the taking of them by assault would be tedious and difficult, seeing they have proper ditches and walls, they have sufficient artillery, and they always keep in public depots enough for one year's eating, drinking, and firing. And beyond this, to keep the people quiet and without loss to the state, they always have the means of giving work to the community in those labours that are the life and strength of the city, and on the pursuit of which the people are supported; they also hold military exercises in repute, and moreover have many ordinances to uphold them.

Therefore, a prince who has a strong city, and had not made himself odious, will not be attacked, or if any one should attack he will only be driven off with disgrace; again, because that the affairs of this world are so changeable, it is almost impossible to keep an army a whole year in the field without being interfered with. And whoever should reply: If the people have property outside the city, and see it burnt, they will not remain patient, and the long siege and self-interest will make them forget their prince; to this I answer that a powerful and courageous prince will overcome all such difficulties by giving at one time hope to his subjects that the evil will not be for long, at another time fear of the cruelty of the enemy, then preserving himself adroitly from those subjects who seem to him to be too bold.

Further, the enemy would naturally on his arrival at once burn and ruin the country at the time when the spirits of the people are still hot and ready for the defence; and, therefore, so much the less ought the prince to hesitate; because after a time, when spirits have cooled, the damage is already done, the ills are incurred, and there is no longer any remedy; and therefore they are so much the more ready to unite with their prince, he appearing to be under obligations to them now that their houses have been burnt and their possessions ruined in his defence. For it is the nature of men to be bound by the benefits they confer as much as by those they receive. Therefore, if everything is well considered, it will not be difficult for a wise prince to keep the minds of his citizens steadfast from first to last, when he does not fail to support and defend them.

MACHIAVELLI THE PRINCE CHAPTER 11 [Concerning Ecclesiastical Principalities]

It only remains now to speak of ecclesiastical principalities, touching which all difficulties are prior to getting possession, because they are acquired either by capacity or good fortune, and they can be held without either; for they are sustained by the ancient ordinances of religion, which are so all-powerful, and of such a character that the principalities may be held no matter how their princes behave and live. These princes alone have states and do not defend them; and they have subjects and do not rule them; and the states, although unguarded, are not taken from them, and the subjects, although not ruled, do not care, and they have neither the desire nor the ability to alienate themselves. Such principalities only are secure and happy. But being upheld by powers, to which the human mind cannot reach, I shall speak no more of them, because, being exalted and maintained by God, it would be the act of a presumptuous and rash man to discuss them.

Nevertheless, if any one should ask of me how comes it that the Church has attained such greatness in temporal power, seeing that from Alexander backwards the Italian potentates (not only those who have been called potentates, but every baron and lord, though the smallest) have valued the temporal power very slightly—yet now a king of France trembles before it, and it has been able to drive him from Italy, and to ruin the Venetians—although this may be very manifest, it does not appear to me superfluous to recall it in some measure to memory.

Before Charles, King of France, passed into Italy (Charles VIII invaded Italy in 1494.), this country was under the dominion of the Pope, the Venetians, the King of Naples, the Duke of Milan, and the Florentines. These potentates had two principal anxieties: the one, that no foreigner should enter Italy under arms: the other, that none of themselves should seize more territory. Those about whom there was the most anxiety were the Pope and the Venetians. To restrain the Venetians the union of all the others was necessary, as it was for the defence of Ferrara; and to keep down the Pope they made use of the barons of Rome, who, being divided into two factions. Orsini and Colonnesi, had always a pretext for disorder, and, standing with arms in their hands under the eyes of the Pontiff, kept the pontificate weak and powerless. And although there might arise sometimes a courageous pope, such as Sixtus, yet neither fortune nor wisdom could rid him of these annoyances. And the short life of a pope is also a cause of weakness; for in the ten years, which is the average life of a pope, he can with difficulty lower one of the factions; and if, so to speak, one people should almost destroy the Colonnesi, another would arise hostile to the Orsini, who would support their opponents, and yet would not have time to ruin the Orsini. This was the reason why the temporal powers of the pope were little esteemed in Italy.

Alexander the Sixth arose afterwards, who of all the pontiffs that have ever been showed how a pope with both money and arms was able to prevail; and through the instrumentality of the Duke Valentino, and by reason of the entry of the French, he brought about all those things which I have discussed above in the actions of the duke. And although his intention was not to aggrandize the Church, but the duke, nevertheless, what he did contributed to the greatness of the Church, which, after his death and the ruin of the duke, became the heir to all his labours.

Pope Julius came afterwards and found the Church strong possessing all the Romagna, the barons of Rome reduced to impotence, and, through the chastisements of Alexander, the factions wiped out: he also found the way open to accumulate money in a manner such as had never been practised before Alexander's time. Such things Julius not only followed, but improved upon, and he intended to gain Bologna, to ruin the Venetians, and to drive the French out of Italy. All of these enterprises prospered with him, and so much the more to his credit, inasmuch as he did everything to strengthen the Church and not any private person. He kept also the Orsini and Colonnesi factions within the bounds in which he found them; and although there was among them some mind to make disturbance, nevertheless he held two things firm: the one, the greatness of the Church, with which he terrified them; and the other, not allowing them to have their own cardinals, who caused the disorders among them. For whenever these factions have their cardinals they do not remain quiet for long, because cardinals foster the factions in Rome and out of it, and the barons are compelled to support them, and thus from the ambitions of prelates arise disorders and tumults among the barons. For these reasons his Holiness Pope Leo found the pontificate most powerful (as he was the Cardinal de' Medici.), and it is to be hoped that, if others made it great in arms, he will make it still greater and more venerated by his goodness and infinite other virtues.

MACHIAVELLI THE PRINCE CHAPTER 12 [How Many Kinds Of Soldiery There Are, And Concerning Mercenaries]

Having discoursed particularly on the characteristics of such principalities as in the beginning I proposed to discuss, and having considered in some degree the causes of there being good or bad, and having shown the methods by which many have sought to acquire them and to hold them, it now remains for me to discuss generally the means of offence and defence which belong to each of them.

We have seen above how necessary it is for a prince to have his foundations well laid, otherwise it follows of necessity he will go to ruin. The chief foundations of all states, new as well as old or composite, are good laws and good arms; and as there cannot be good laws where the state is not well armed, it follows that where they are well armed they have good laws. I shall leave the laws out of the discussion and shall speak of the arms.

I say, therefore, that the arms with which a prince defends his state are either his own, or they are mercenaries, auxiliaries, or mixed. Mercenaries and auxiliaries are useless and dangerous; and if one holds his state based on these arms, he will stand neither firm nor safe; for they are disunited, ambitious, and without discipline, unfaithful, valiant before friends, cowardly before enemies; they have neither the fear of God nor fidelity to men, and destruction is deferred only so long as the attack is; for in peace one is robbed by them, and in war by the enemy. The fact is, they have no other attraction or reason for keeping the field than a trifle of stipend, which is not sufficient to make them willing to die for you. They are ready enough to be your soldiers whilst you do not make war, but if war comes they take themselves off or run from the foe; which I should have little trouble to prove, for the ruin of Italy has been caused by nothing else than by resting all her hopes for many years on mercenaries, and although they formerly made some display and appeared valiant amongst themselves, yet when the foreigners came they showed what they were. Thus it was that Charles, King of France, was allowed to seize Italy with chalk in hand*; and he who told us that our sins were the cause of it told the truth, but they were not the sins he imagined, but those which I have related. And as they were the sins of princes, it is the princes who have also suffered the penalty. (* "With chalk in hand," refers to the ease with which Charles VIII seized Italy, implying that it was only necessary for him to send his quartermasters to chalk up the billets for his soldiers to conquer the country.)

I wish to demonstrate further the infelicity of these arms. The mercenary captains are either capable men or they are not; if they are, you cannot trust them, because they always aspire to their own greatness, either by oppressing you, who are their master, or others contrary to your intentions; but if the captain is not skilful, you are ruined in the usual way.

And if it be urged that whoever is armed will act in the same way, whether mercenary or not, I reply that when arms have to be resorted to, either by a prince or a republic, then the prince ought to go in person and perform the duty of a captain; the republic has to send its citizens, and when one is sent who does not turn out satisfactorily, it ought to recall him, and when one is worthy, to hold him by the laws so that he does not leave the command. And experience has shown princes and republics, single-handed, making the greatest progress, and mercenaries doing nothing except damage; and it is more difficult to bring a republic, armed with its own arms, under the sway of one of its citizens than it is to bring one armed with foreign arms. Rome and Sparta stood for many ages armed and free. The Switzers are completely armed and quite free.

Of ancient mercenaries, for example, there are the Carthaginians, who were oppressed by their mercenary soldiers after the first war with the Romans, although the Carthaginians had their own citizens for captains. After the death of Epaminondas, Philip of Macedon was made captain of their soldiers by the Thebans, and after victory he took away their liberty.

Duke Filippo being dead, the Milanese enlisted Francesco Sforza against the Venetians, and he, having overcome the enemy at (the Battle of) Caravaggio (15th September 1448), allied himself with them to crush the Milanese his masters. His father. Sforza, having been engaged by Oueen Johanna* of Naples, left her unprotected, so that she was forced to throw herself into the arms of the King of Aragon, in order to save her kingdom. (* Johanna II of Naples, the widow of Ladislao, King of Naples.) And if the Venetians and Florentines formerly extended their dominions by these arms, and yet their captains did not make themselves princes, but have defended them, I reply that the Florentines in this case have been favoured by chance, for of the able captains, of whom they might have stood in fear, some have not conquered, some have been opposed, and others have turned their ambitions elsewhere. One who did not conquer was Giovanni Acuto*, and since he did not conquer his fidelity cannot be proved; but every one will acknowledge that, had he conquered, the Florentines would have stood at his discretion. (* Giovanni Acuto. An English knight whose name was Sir John Hawkwood. He fought in the English wars in France, and was knighted by Edward III; afterwards he collected a body of troops and went into Italy. These became the famous "White Company." He took part in many wars, and died in Florence in 1394. He was born about 1320 at Sible Hedingham, a village in Essex. He married Domnia, a daughter of Bernabo Visconti.) Sforza had the Bracceschi always against him, so they watched each other. Francesco turned his ambition to Lombardy; Braccio against the Church and the kingdom of Naples. But let us come to that which happened a short while ago. The Florentines appointed as their captain Pagolo Vitelli, a most prudent man, who from a private position had risen to the greatest renown. If this man had taken Pisa, nobody can deny that it would have been proper for the Florentines to keep in with him, for if he became the soldier of their enemies they had no means of resisting, and if they held to him they must obey him. The Venetians, if their achievements are considered, will be seen to have acted safely and gloriously so long as they sent to war their own men, when with armed gentlemen and plebians they did valiantly. This was before they turned to enterprises on land, but when they began to fight on land they forsook this virtue and followed the custom of Italy. And in the beginning of their expansion on land, through not having much territory, and because of their great reputation, they had not much to fear from their captains; but when they expanded, as under Carmignuola*, they had a taste of this mistake; for, having found him a most valiant man (they beat the Duke of Milan under his leadership), and, on the other hand, knowing how lukewarm he was in the war, they feared they would no longer

conquer under him, and for this reason they were not willing, nor were they able, to let him go; and so, not to lose again that which they had acquired, they were compelled, in order to secure themselves, to murder him. (* Carmignuola. Francesco Bussone, born at Carmagnola about 1390, executed at Venice, 5th May 1432.) They had afterwards for their captains Bartolomeo da Bergamo, Roberto da San Severino, the count of Pitigliano*, and the like, under whom they had to dread loss and not gain, as happened afterwards at Vaila**, where in one battle they lost that which in eight hundred years they had acquired with so much trouble. Because from such arms conquests come but slowly, long delayed and inconsiderable, but the losses sudden and portentous. (* Bartolomeo Colleoni of Bergamo; died 1457. Roberto of San Severino; died fighting for Venice against Sigismund, Duke of Austria, in 1487. "Primo capitano in Italia."-Machiavelli. Count of Pitigliano; Nicolo Orsini, born 1442, died 1510.); (** Battle of Vaila in 1509.)

And as with these examples I have reached Italy, which has been ruled for many years by mercenaries, I wish to discuss them more seriously, in order that, having seen their rise and progress, one may be better prepared to counteract them. You must understand that the empire has recently come to be repudiated in Italy, that the Pope has acquired more temporal power, and that Italy has been divided up into more states, for the reason that many of the great cities took up arms against their nobles, who, formerly favoured by the emperor, were oppressing them, whilst the Church was favouring them so as to gain authority in temporal power: in many others their citizens became princes. From this it came to pass that Italy fell partly into the hands of the Church and of republics, and, the Church consisting of priests and the republic of citizens

The first who gave renown to this soldiery was Alberigo da Conio*, the Romagnian (* Alberigo da Conio, Alberico da Barbiano, Count of Cunio in Romagna. He was the leader of the famous "Company of St George," composed entirely of Italian soldiers. He died in 1409.). From the school of this man sprang, among others, Braccio and Sforza, who in their time were the arbiters of Italy. After these came all the other captains who till now have directed the arms of Italy: and the end of all their valour has been, that she has been overrun by Charles, robbed by Louis, ravaged by Ferdinand, and insulted by the Switzers. The principle that has guided them has been, first, to lower the credit of infantry so that they might increase their own. They did this because, subsisting on their pay and without territory, they were unable to support many soldiers, and a few infantry did not give them any authority; so they were led to employ cavalry, with a moderate force of which they were maintained and honoured; and affairs were brought to such a pass that, in an army of twenty thousand soldiers, there were not to be found two thousand foot soldiers. They had, besides this, used every art to lessen fatigue and danger to themselves and their soldiers, not killing in the fray, but taking prisoners and liberating without ransom. They did not attack towns at night, nor did the garrisons of the towns attack encampments at night; they did not surround the camp either with stockade or ditch, nor did they campaign in the winter. All these things were permitted by their military rules, and devised by them to avoid, as I have said, both fatigue and dangers; thus they have brought Italy to slavery and contempt.

MACHIAVELLI THE PRINCE CHAPTER 13

[Concerning Auxiliaries, Mixed Soldiery, And One's Own] Auxiliaries, which are the other useless arm, are employed when a prince is called in with his forces to aid and defend, as was done by Pope Julius in the most recent times; for he, having, in the enterprise against Ferrara, had poor proof of his mercenaries, turned to auxiliaries, and stipulated with Ferdinand, King of Spain*, for his assistance with men and arms. These arms may be useful and good in themselves, but for him who calls them in they are always disadvantageous; for losing, one is undone, and winning, one is their captive. (* Ferdinand V [F. II of Aragon and Sicily, F. III of Naples], surnamed "The Catholic," born 1452, died 1516.)

And although ancient histories may be full of examples, I do not wish to leave this recent one of Pope Julius the Second, the peril of which cannot fail to be perceived; for he, wishing to get Ferrara, threw himself entirely into the hands of the foreigner. But his good fortune brought about a third event, so that he did not reap the fruit of his rash choice; because, having his auxiliaries routed at Ravenna, and the Switzers having risen and driven out the conquerors (against all expectation, both his and others), it so came to pass that he did not become prisoner to his enemies, they having fled, nor to his auxiliaries, he having conquered by other arms than theirs.

The Florentines, being entirely without arms, sent ten thousand Frenchmen to take Pisa, whereby they ran more danger than at any other time of their troubles.

The Emperor of Constantinople (Joannes Cantacuzenus, born 1300, died 1383.) to oppose his neighbours, sent ten thousand Turks into Greece, who, on the war being finished, were not willing to quit; this was the beginning of the servitude of Greece to the infidels.

Therefore, let him who has no desire to conquer make use of these arms, for they are much more hazardous than mercenaries, because with them the ruin is ready made; they are all united, all yield obedience to others; but with mercenaries, when they have conquered, more time and better opportunities are needed to injure you; they are not all of one community, they are found and paid by you, and a third party, which you have made their head, is not able all at once to assume enough authority to injure you. In conclusion, in mercenaries dastardy is most dangerous; in auxiliaries, valour. The wise prince, therefore, has always avoided these arms and turned to his own; and has been willing rather to lose with them than to conquer with the others, not deeming that a real victory which is gained with the arms of others.

I shall never hesitate to cite Cesare Borgia and his actions. This duke entered the Romagna with auxiliaries, taking there only French soldiers, and with them he captured Imola and Forli; but afterwards, such forces not appearing to him reliable, he turned to mercenaries, discerning less danger in them, and enlisted the Orsini and Vitelli; whom presently, on handling and finding them doubtful, unfaithful, and dangerous, he destroyed and turned to his own men. And the difference between one and the other of these forces can easily be seen when one considers the difference there was in the reputation of the duke, when he had the French, when he had the Orsini and Vitelli, and when he relied on his own soldiers, on whose fidelity he could always count and found it ever increasing; he was never esteemed more highly than when every one saw that he was complete master of his own forces.

I was not intending to go beyond Italian and recent examples, but I am unwilling to leave out Hiero, the Syracusan, he being one of those I have named above. This man, as I have said, made head of the army by the Syracusans, soon found out that a mercenary soldiery, constituted like our Italian condottieri, was of no use; and it appearing to him that he could neither keep them not let them go, he had them all cut to pieces, and afterwards made war with his own forces and not with aliens.

I wish also to recall to memory an instance from the Old Testament applicable to this subject. David offered himself to Saul to fight with Goliath, the Philistine champion, and, to give him courage, Saul armed him with his own weapons; which David rejected as soon as he had them on his back, saying he could make no use of them, and that he wished to meet the enemy with his sling and his knife. In conclusion, the arms of others either fall from your back, or they weigh you down, or they bind you fast.

Charles the Seventh*, the father of King Louis the Eleventh**, having by good fortune and valour liberated France from the English, recognised the necessity of being armed with forces of his own, and he established in his kingdom ordinances concerning men-at-arms and infantry. (* Charles VII of France, surnamed "The Victorious," born 1403, died 1461.); (** Louis XI, son of the above, born 1423, died 1483.) Afterwards his son, King Louis, abolished the infantry and began to enlist the Switzers, which mistake, followed by others, is, as is now seen, a source of peril to that kingdom; because, having raised the reputation of the Switzers, he has entirely diminished the value of his own arms, for he has destroyed the infantry altogether; and his men-atarms he has subordinated to others, for, being as they are so accustomed to fight along with Switzers, it does not appear that they can now conquer without them. Hence it arises that the French cannot stand against the Switzers, and without the Switzers they do not come off well against others. The armies of the French have thus become mixed, partly mercenary and partly national, both of which arms together are much better than mercenaries alone or auxiliaries alone, but much inferior to one's own forces. And this example proves it, for the kingdom of France would be unconquerable if the ordinance of Charles had been enlarged or maintained. But the scanty wisdom of man, on entering into an affair which looks well at first, cannot discern the poison that is hidden in it, as I have said above of hectic fevers. Therefore, if he who rules a principality cannot recognise evils until they are upon him, he is not truly wise; and this insight is given to few. And if the first disaster to the Roman Empire* should be examined, it will be found to have commenced only with the enlisting of the Goths; because from that time the vigour of the Roman Empire began to decline, and all that valour which had raised it passed away to others. [* This refers to the pitiful state to with the empire was brought by its spoiled, inept, and despisably irresponsible people who were, by their low and wrong education and Christianity's failure to support a strong well-educated state, animated only to follow their egoistic every-day whims instead of taking personal responsibilities for the entire community that only a politically strong state can represent. Keeping the defences of that state in order, as it was once the foundation of all citizens' welfare, was neglected and this was the first disaster. The Romans at that time have given up on any sort of political enterprise that involved armament and recruiting

soldiers from its own populace. Instead, everyone, including immigrants, in the Empire was given Roman citizenship (by Emperor Caracalla, r. 198–217 AD) eliminating the main motor of that society: striving to become a citizen! Foreigners had to do the "uncomfortable jobs" of cleaning, serving, and being soldiers. The state was rotting from within, with all the bitter ramifications a possible foreign rule will inflict. Rome's downfall into the Middle Ages made people suffer for a thousand years to an unimaginable scale and Machiavelli was well aware it.]

I conclude, therefore, that no principality is secure without having its own forces; on the contrary, it is entirely dependent on good fortune, not having the valour which in adversity would defend it. And it has always been the opinion and judgement of wise men that nothing can be so uncertain or unstable as fame or power not founded on its own strength. And one's own forces are those which are composed either of subjects, citizens, or dependents; all others are mercenaries or auxiliaries. And the way to make ready one's own forces will be easily found if the rules suggested by me shall be reflected upon, and if one will consider how Philip, the father of Alexander the Great, and many republics and princes have armed and organised themselves, to which rules I entirely commit myself.

MACHIAVELLI THE PRINCE CHAPTER 14 [That Which Concerns A Prince On The Subject Of The Art Of War]

A prince ought to have no other aim or thought, nor select anything else for his study, than war and its rules and discipline; for this is the sole art that belongs to him who rules, and it is of such force that it not only upholds those who are born princes, but it often enables men to rise from a private station to that rank. And, on the contrary, it is seen that when princes have thought more of ease than of arms they have lost their states. And the first cause of your losing it is to neglect this art; and what enables you to acquire a state is to be master of the art. Francesco Sforza, through being martial, from a private person became Duke of Milan; and the sons, through avoiding the hardships and troubles of arms, from dukes became private persons. For among other evils which being unarmed brings you, it causes you to be despised, and this is one of those ignominies against which a prince ought to guard himself, as is shown later on. Because there is nothing proportionate between the armed and the unarmed; and it is not reasonable that he who is armed should yield obedience willingly to him who is unarmed, or that the unarmed man should be secure among armed servants. Because, there being in the one disdain and in the other suspicion, it is not possible for them to work well together. And therefore a prince who does not understand the art of war, over and above the other misfortunes already mentioned, cannot be respected by his soldiers, nor can he rely on them. He ought never, therefore, to have out of his thoughts this subject of war, and in peace he should addict himself more to its exercise than in war: this he can do in two ways, the one by action, the other by study.

As regards action, he ought above all things to keep his men well organised and drilled, to follow incessantly the chase, by which he accustoms his body to hardships, and learns something of the nature of localities, and gets to find out how the mountains rise, how the valleys open out, how the plains lie, and to understand the nature of rivers and marshes, and in all this to take the greatest care. Which knowledge is useful in two ways. Firstly, he learns to know his country, and is better able to undertake its defence; afterwards, by means of the knowledge and observation of that locality, he understands with ease any other which it may be necessary for him to study hereafter; because the hills, valleys, and plains, and rivers and marshes that are, for instance, in Tuscany, have a certain resemblance to those of other countries, so that with a knowledge of the aspect of one country one can easily arrive at a knowledge of others. And the prince that lacks this skill lacks the essential which it is desirable that a captain should possess, for it teaches him to surprise his enemy, to select quarters, to lead armies, to array the battle, to besiege towns to advantage.

Philopoemen*, Prince of the Achaeans, among other praises which writers have bestowed on him, is commended because in time of peace he never had anything in his mind but the rules of war; and when he was in the country with friends, he often stopped and reasoned with them: "If the enemy should be upon that hill, and we should find ourselves here with our army, with whom would be the advantage? How should one best advance to meet him, keeping the ranks? If we should wish to retreat, how ought we to pursue?" And he would set forth to them, as he went, all the chances that could befall an army; he would listen to their opinion and state his, confirming it with reasons, so that by these continual discussions there could never arise, in time of war, any unexpected circumstances that he could not deal with. (* Philopoemen, "the last of the Greeks," born 252 B.C., died 183 B.C.)

But to exercise the intellect the prince should read histories, and study there the actions of illustrious men, to see how they have borne themselves in war, to examine the causes of their victories and defeat, so as to avoid the latter and imitate the former; and above all do as an illustrious man did, who took as an exemplar one who had been praised and famous before him, and whose achievements and deeds he always kept in his mind, as it is said Alexander the Great imitated Achilles, Caesar Alexander, Scipio Cyrus. And whoever reads the life of Cyrus, written by Xenophon, will recognise afterwards in the life of Scipio how that imitation was his glory, and how in chastity, affability, humanity, and liberality Scipio conformed to those things which have been written of Cyrus by Xenophon. A wise prince ought to observe some such rules, and never in peaceful times stand idle, but increase his resources with industry in such a way that they may be available to him in adversity, so that if fortune chances it may find him prepared to resist her blows.

MACHIAVELLI THE PRINCE CHAPTER 15

[Concerning Things For Which Men, And Especially Princes, Are Praised Or Blamed]

It remains now to see what ought to be the rules of conduct for a prince towards subject and friends. And as I know that many have written on this point, I expect I shall be considered presumptuous in mentioning it again, especially as in discussing it I shall depart from the methods of other people. But, it being my intention to write a thing which shall be useful to him who apprehends it, it appears to me more appropriate to follow up the real truth of the matter than the imagination of it; for many have pictured republics and principalities which in fact have never been known or seen, because how one lives is so far distant from how one ought to live, that he who neglects what is done for what ought to be done, sooner effects his ruin than his professions of virtue soon meets with what destroys him among so much that is evil.

Hence it is necessary for a prince wishing to hold his own to know how to do wrong, and to make use of it or not according to necessity. Therefore, putting on one side imaginary things concerning a prince, and discussing those which are real, I say that all men when they are spoken of, and chiefly princes for being more highly placed, are remarkable for some of those qualities which bring them either blame or praise; and thus it is that one is reputed liberal, another miserly, using a Tuscan term (because an avaricious person in our language is still he who desires to possess by robbery, whilst we call one miserly who deprives himself too much of the use of his own); one is reputed generous, one rapacious; one cruel, one compassionate; one faithless, another faithful; one effeminate and cowardly, another bold and brave; one affable, another haughty; one lascivious, another chaste; one sincere, another cunning; one hard, another easy; one grave, another frivolous; one religious, another unbelieving, and the like. And I know that every one will confess that it would be most praiseworthy in a prince to exhibit all the above qualities that are considered good; but because they can neither be entirely possessed nor observed, for human conditions do not permit it, it is necessary for him to be sufficiently prudent that he may know how to avoid the reproach of those vices which would lose him his state; and also to keep himself, if it be possible, from those which would not lose him it; but this not being possible, he may with less hesitation abandon himself to them. And again, he need not make himself uneasy at incurring a reproach for those vices without which the state can only be saved with difficulty, for if everything is considered carefully, it will be found that something which looks like virtue, if followed, would be his ruin; whilst something else, which looks like vice, yet followed brings him security and prosperity.

MACHIAVELLI THE PRINCE CHAPTER 16 [Concerning Liberality And Meanness]

Commencing then with the first of the above-named characteristics, I say that it would be well to be reputed liberal. Nevertheless, liberality exercised in a way that does not bring you the reputation for it, injures you; for if one exercises it honestly and as it should be exercised, it may not become known, and you will not avoid the reproach of its opposite. Therefore, any one wishing to maintain among men the name of liberal is obliged to avoid no attribute of magnificence; so that a prince thus inclined will consume in such acts all his property, and will be compelled in the end, if he wish to maintain the name of liberal, to unduly weigh down his people, and tax them, and do everything he can to get money. This will soon make him odious to his subjects, and becoming poor he will be little valued by any one; thus, with his liberality, having offended many and rewarded few, he is affected by the very first trouble and imperilled by whatever may be the first danger; recognising this himself, and wishing to draw back from it he runs at once into the reproach of being miserly.

Therefore, a prince, not being able to exercise this virtue of liberality in such a way that it is recognised, except to his cost, if he is wise he ought not to fear the reputation of being mean, for in time he will come to be more considered than if liberal, seeing that with his economy his revenues are enough, that he can defend himself against all attacks, and is able to engage in enterprises without burdening his people; thus it comes to pass that he exercises liberality towards all from whom he does not take, who are numberless, and meanness towards those to whom he does not give, who are few.

We have not seen great things done in our time except by those who have been considered mean; the rest have failed. Pope Julius the Second was assisted in reaching the papacy by a reputation for liberality, yet he did not strive afterwards to keep it up, when he made war on the King of France; and he made many wars without imposing any extraordinary tax on his subjects, for he supplied his additional expenses out of his long thriftiness. The present King of Spain would not have undertaken or conquered in so many enterprises if he had been reputed liberal. A prince, therefore, provided that he has not to rob his subjects, that he can defend himself, that he does not become poor and abject, that he is not forced to become rapacious, ought to hold of little account a reputation for being mean, for it is one of those vices which will enable him to govern.

And if any one should say: Caesar obtained empire by liberality, and many others have reached the highest positions by having been liberal, and by being considered so, I answer: Either you are a prince in fact, or in a way to become one. In the first case this liberality is dangerous, in the second it is very necessary to be considered liberal; and Caesar was one of those who wished to become pre-eminent in Rome; but if he had survived after becoming so, and had not moderated his expenses, he would have destroyed his government. And if any one should reply: Many have been princes, and have done great things with armies, who have been considered very liberal, I reply: Either a prince spends that which is his own or his subjects' or else that of others. In the first case he ought to be sparing, in the second he ought not to neglect any opportunity for liberality. And to the prince who goes forth with his army, supporting it by pillage, sack, and extortion, handling that which belongs to others, this liberality is necessary, otherwise he would not be followed by soldiers. And of that which is neither yours nor your subjects' you can be a ready giver, as were Cyrus, Caesar, and Alexander; because it does not take away your reputation if you squander that of others, but adds to it; it is only squandering your own that injures you.

And there is nothing wastes so rapidly as liberality, for even whilst you exercise it you lose the power to do so, and so become either poor or despised, or else, in avoiding poverty, rapacious and hated. And a prince should guard himself, above all things, against being despised and hated; and liberality leads you to both. Therefore it is wiser to have a reputation for meanness which brings reproach without hatred, than to be compelled through seeking a reputation for liberality to incur a name for rapacity which begets reproach with hatred.

MACHIAVELLI THE PRINCE CHAPTER 17 [Concerning Cruelty And Clemency, And Whether It Is Better To Be Loved Than Feared]

Coming now to the other qualities mentioned above, I say that every prince ought to desire to be considered clement and not cruel. Nevertheless he ought to take care not to misuse this clemency. Cesare Borgia was considered cruel; notwithstanding, his cruelty reconciled the Romagna, unified it, and restored it to peace and loyalty. And if this be rightly considered, he will be seen to have been much more merciful than the Florentine people, who, to avoid a reputation for cruelty, permitted Pistoia to be destroyed* (* During the rioting between the Cancellieri and Panciatichi factions in 1502 and 1503.). Therefore a prince, so long as he keeps his subjects united and loyal, ought not to mind the reproach of cruelty; because with a few examples he will be more merciful than those who, through too much mercy, allow disorders to arise, from which follow murders or robberies; for these are wont to injure the whole people, whilst those executions which originate with a prince offend the individual only.

And of all princes, it is impossible for the new prince to avoid the imputation of cruelty, owing to new states being full of dangers. Hence Virgil, through the mouth of Dido, excuses the inhumanity of her reign owing to its being new, saying: "Res dura, et regni novitas me talia cogunt Moliri, et late fines custode tueri." (. . . against my will, my fate A throne unsettled, and an infant state, Bid me defend my shores. Christopher Pitt.) Nevertheless he ought to be slow to believe and to act, nor should he himself show fear, but proceed in a temperate manner with prudence and humanity, so that too much confidence may not make him incautious and too much distrust render him intolerable.

Upon this a question arises: whether it be better to be loved than feared or feared than loved? It may be answered that one should wish to be both, but, because it is difficult to unite them in one person, it is much safer to be feared than loved, when, of the two, either must be dispensed with. Because this is to be asserted in general of men, that they are ungrateful, fickle, false, cowardly, covetous, and as long as you succeed they are yours entirely; they will offer you their blood, property, life, and children, as is said above, when the need is far distant; but when it approaches they turn against you. And that prince who, relying entirely on their promises, has neglected other precautions, is ruined; because friendships that are obtained by payments, and not by greatness or nobility of mind, may indeed be earned, but they are not secured, and in time of need cannot be relied upon; and men have less scruple in offending one who is beloved than one who is feared, for love is preserved by the link of obligation which, owing to the baseness of men, is broken at every opportunity for their advantage; but fear preserves you by a dread of punishment which never fails.

Nevertheless a prince ought to inspire fear in such a way that, if he does not win love, he avoids hatred; because he can endure very well being feared whilst he is not hated, which will always be as long as he abstains from the property of his citizens and subjects and from their women. But when it is necessary for him to proceed against the life of someone, he must do it on proper justification and for manifest cause, but above all things he must keep his hands off the property of others, because men more quickly forget the death of their father than the loss of their patrimony. Besides, pretexts for taking away the property are never wanting; for he who has once begun to live by robbery will always find pretexts for seizing what belongs to others; but reasons for taking life, on the contrary, are more difficult to find and sooner lapse. But when a prince is with his army, and has under control a multitude of soldiers, then it is quite necessary for him to disregard the reputation of cruelty, for without it he would never hold his army united or disposed to its duties.

Among the wonderful deeds of Hannibal this one is enumerated: that having led an enormous army, composed of many various races of men, to fight in foreign lands, no dissensions arose either among them or against the prince, whether in his bad or in his good fortune. This arose from nothing else than his inhuman cruelty, which, with his boundless valour, made him revered and terrible in the sight of his soldiers, but without that cruelty, his other virtues were not sufficient to produce this effect. And short-sighted writers admire his deeds from one point of view and from another condemn the principal cause of them. That it is true his other virtues would not have been sufficient for him may be proved by the case of Scipio, that most excellent man, not only of his own times but within the memory of man, against whom, nevertheless, his army rebelled in Spain; this arose from nothing but his too great forbearance, which gave his soldiers more license than is consistent with military discipline. For this he was upbraided in the Senate by Fabius Maximus, and called the corrupter of the Roman soldiery. The Locrians were laid waste by a legate of Scipio, yet they were not avenged by him, nor was the insolence of the legate punished, owing entirely to his easy nature. Insomuch that someone in the Senate, wishing to excuse him, said there were many men who knew much better how not to err than to correct the errors of others. This disposition, if he had been continued in the command, would have destroyed in time the fame and glory of Scipio; but, he being under the control of the Senate, this injurious characteristic not only concealed itself, but contributed to his glory.

Returning to the question of being feared or loved, I come to the conclusion that, men loving according to their own will and fearing according to that of the prince, a wise prince should establish himself on that which is in his own control and not in that of others; he must endeavour only to avoid hatred, as is noted.

MACHIAVELLI THE PRINCE CHAPTER 18*

[Concerning The Way In Which Princes Should Keep Faith]

(* "The present chapter has given greater offence than any other portion of Machiavelli's writings." Burd, "Il Principe," p. 297.)

Every one admits how praiseworthy it is in a prince to keep faith, and to live with integrity and not with craft, Nevertheless our experience has been that those princes who have done great things have held good faith of little account, and have known how to circumvent the intellect of men by craft, and in the end have overcome those who have relied on their word. You must know there are two ways of contesting* (i.e. "striving for mastery.), the one by the law, the other by force; the first method is proper to men, the second to beasts; but because the first is frequently not sufficient, it is necessary to have recourse to the second. Therefore it is necessary for a prince to understand how to avail himself of the beast and the man. This has been figuratively taught to princes by ancient writers, who describe how Achilles and many other princes of old were given to the Centaur Chiron to nurse, who brought them up in his discipline; which means solely that, as they had for a teacher one who was half beast and half man, so it is necessary for a prince to know how to make use of both natures, and that one without the other is not durable. A prince, therefore, being compelled knowingly to adopt the

defend himself against wolves. Therefore, it is necessary to be a fox to discover the snares and a lion to terrify the wolves. Those who rely simply on the lion do not understand what they are about. Therefore a wise lord cannot, nor ought he to, keep faith when such observance may be turned against him, and when the reasons that caused him to pledge it exist no longer. If men were entirely good this precept would not hold, but because they are bad, and will not keep faith with you, you too are not bound to observe it with them. Nor will there ever be wanting to a prince legitimate reasons to excuse this non-observance. Of this endless modern examples could be given, showing how many treaties and engagements have been made void and of no effect through the faithlessness of princes; can inch who has known best how to employ the fox has succeeded best.

beast, ought to choose the fox and the lion; because the lion

cannot defend himself against snares and the fox cannot

But it is necessary to know well how to disguise this characteristic, and to be a great pretender and dissembler; and men are so simple, and so subject to present necessities, that he who seeks to deceive will always find someone who will allow himself to be deceived. One recent example I cannot pass over in silence. Alexander the Sixth did nothing else but deceive men, nor ever thought of doing otherwise, and he always found victims; for there never was a man who had greater power in asserting, or who with greater oaths would affirm a thing, yet would observe it less; nevertheless his deceits always succeeded according to his wishes, because he well understood this side of mankind.

Therefore it is unnecessary for a prince to have all the good qualities I have enumerated, but it is very necessary to appear to have them. And I shall dare to say this also, that to have them and always to observe them is injurious, and that to appear to have them is useful; to appear merciful, faithful, humane, religious, upright, and to be so, but with a mind so framed that should you require not to be so, you may be able and know how to change to the opposite.

And you have to understand this, that a prince, especially a new one, cannot observe all those things for which men are esteemed, being often forced, in order to maintain the state, to act contrary to fidelity*, friendship, humanity, and religion. Therefore it is necessary for him to have a mind ready to turn itself accordingly as the winds and variations of fortune force it, yet, as I have said above, not to diverge from the good if he can avoid doing so, but, if compelled, then to know how to set about it. (* "Contrary to fidelity" or "faith", "contro alla fede," and "tutto fede," "altogether faithful", in the next paragraph. It is noteworthy that these two phrases, "contro alla fede" and "tutto fede," were omitted in the Testina edition, which was published with the sanction of the papal authorities. It may be that the meaning attached to the word "fede" was "the faith", i.e. the Catholic creed, and not as rendered here "fidelity" and "faithful". Observe that the word "religione" was suffered to stand in the text of the Testina, being used to signify indifferently every shade of belief, as witness "the religion", a phrase inevitably employed to designate the Huguenot heresy. South in his Sermon IX, p. 69, ed. 1843, comments on this passage as follows: "That great patron and Coryphaeus of this tribe, Nicolo Machiavel, laid down this for a master rule in his political scheme: 'That the show of religion was helpful to the politician, but the reality of it hurtful and pernicious'.")

For this reason a prince ought to take care that he never lets anything slip from his lips that is not replete with the abovenamed five qualities, that he may appear to him who sees and hears him altogether merciful, faithful, humane, upright, and religious. There is nothing more necessary to appear to have than this last quality, inasmuch as men judge generally more by the eye than by the hand, because it belongs to everybody to see you, to few to come in touch with you. Every one sees what you appear to be, few really know what you are, and those few dare not oppose themselves to the opinion of the many, who have the majesty of the state to defend them; and in the actions of all men, and especially of princes, which it is not prudent to challenge, one judges by the result.

For that reason, let a prince have the credit of conquering and holding his state, the means will always be considered honest, and he will be praised by everybody; because the vulgar are always taken by what a thing seems to be and by what comes of it; and in the world there are only the vulgar, for the few find a place there only when the many have no ground to rest on.

One prince* of the present time, whom it is not well to name, never preaches anything else but peace and good faith, and to both he is most hostile, and either, if he had kept it, would have deprived him of reputation and kingdom many a time. (* Ferdinand of Aragon. "When Machiavelli was writing 'The Prince' it would have been clearly impossible to mention Ferdinand's name here without giving offence." Burd's "II Principe," p. 308.)

MACHIAVELLI THE PRINCE CHAPTER 19 *[That One Should Avoid Being Desnised And Hated]*

Now, concerning the characteristics of which mention is made above, I have spoken of the more important ones, the others I wish to discuss briefly under this generality, that the prince must consider, as has been in part said before, how to avoid those things which will make him hated or contemptible; and as often as he shall have succeeded he will have fulfilled his part, and he need not fear any danger in other reproaches.

It makes him hated above all things, as I have said, to be rapacious, and to be a violator of the property and women of his subjects, from both of which he must abstain. And when neither their property nor their honour is touched, the majority of men live content, and he has only to contend with the ambition of a few, whom he can curb with ease in many ways.

It makes him contemptible to be considered fickle, frivolous, effeminate, mean-spirited, irresolute, from all of which a prince should guard himself as from a rock; and he should endeavour to show in his actions greatness, courage, gravity, and fortitude; and in his private dealings with his subjects let him show that his judgements are irrevocable, and maintain himself in such reputation that no one can hope either to deceive him or to get round him.

That prince is highly esteemed who conveys this impression of himself, and he who is highly esteemed is not easily conspired against; for, provided it is well known that he is an excellent man and revered by his people, he can only be attacked with difficulty. For this reason a prince ought to have two fears, one from within, on account of his subjects, the other from without, on account of external powers. From the latter he is defended by being well armed and having good allies, and if he is well armed he will have good friends, and affairs will always remain quiet within when they are quiet without, unless they should have been already disturbed by conspiracy; and even should affairs outside be disturbed, if he has carried out his preparations and has lived as I have said, as long as he does not despair, he will resist every attack, as I said Nabis the Spartan did.

But concerning his subjects, when affairs outside are disturbed he has only to fear that they will conspire secretly, from which a prince can easily secure himself by avoiding being hated and despised, and by keeping the people satisfied with him, which it is most necessary for him to accomplish, as I said above at length. And one of the most efficacious remedies that a prince can have against conspiracies is not to be hated and despised by the people, for he who conspires against a prince always expects to please them by his removal: but when the conspirator can only look forward to offending them, he will not have the courage to take such a course, for the difficulties that confront a conspirator are infinite. And as experience shows, many have been the conspiracies, but few have been successful; because he who conspires cannot act alone, nor can he take a companion except from those whom he believes to be malcontents, and as soon as you have opened your mind to a malcontent you have given him the material with which to content himself, for by denouncing you he can look for every advantage; so that, seeing the gain from this course to be assured, and seeing the other to be doubtful and full of dangers, he must be a very rare friend, or a thoroughly obstinate enemy of the prince, to keep faith with you.

And, to reduce the matter into a small compass, I say that, on the side of the conspirator, there is nothing but fear, jealousy, prospect of punishment to terrify him; but on the side of the prince there is the majesty of the principality, the laws, the protection of friends and the state to defend him; so that, adding to all these things the popular goodwill, it is impossible that any one should be so rash as to conspire. For whereas in general the conspirator has to fear before the execution of his plot, in this case he has also to fear the sequel to the crime; because on account of it he has the people for an enemy, and thus cannot hope for any escape.

Endless examples could be given on this subject, but I will be content with one, brought to pass within the memory of our fathers. Messer Annibale Bentivogli, who was prince in Bologna (grandfather of the present Annibale), having been murdered by the Canneschi, who had conspired against him, not one of his family survived but Messer Giovanni*, who was in childhood: immediately after his assassination the people rose and murdered all the Canneschi. (* Giovanni Bentivogli, born in Bologna 1438, died at Milan 1508. He ruled Bologna from 1462 to 1506. Machiavelli's strong condemnation of conspiracies may get its edge from his own very recent experience (February 1513), when he had been arrested and tortured for his alleged complicity in the Boscoli conspiracy.) This sprung from the popular goodwill which the house of Bentivogli enjoyed in those days in Bologna; which was so great that, although none remained there after the death of Annibale who was able to rule the state, the Bolognese, having information that there was one of the Bentivogli family in Florence, who up to that time had been considered the son of a blacksmith, sent to Florence for him and gave him the government of their city, and it was ruled by him until Messer Giovanni came in due course to the government.

For this reason I consider that a prince ought to reckon conspiracies of little account when his people hold him in esteem; but when it is hostile to him, and bears hatred towards him, he ought to fear everything and everybody. And well-ordered states and wise princes have taken every care not to drive the nobles to desperation, and to keep the people satisfied and contented, for this is one of the most important objects a prince can have.

Among the best ordered and governed kingdoms of our times is France, and in it are found many good institutions on which depend the liberty and security of the king; of these the first is the parliament and its authority, because he who founded the kingdom, knowing the ambition of the nobility and their boldness, considered that a bit to their mouths would be necessary to hold them in: and, on the other side, knowing the hatred of the people, founded in fear, against the nobles, he wished to protect them, yet he was not anxious for this to be the particular care of the king; therefore, to take away the reproach which he would be liable to from the nobles for favouring the people, and from the people for favouring the nobles, he set up an arbiter, who should be one who could beat down the great and favour the lesser without reproach to the king. Neither could you have a better or a more prudent arrangement, or a greater source of security to the king and kingdom. From this one can draw another important conclusion, that princes ought to leave affairs of reproach to the management of others, and keep those of grace in their own hands. And further, I consider that a prince ought to cherish the nobles, but not so as to make himself hated by the people.

It may appear, perhaps, to some who have examined the lives and deaths of the Roman emperors that many of them would be an example contrary to my opinion, seeing that some of them lived nobly and showed great qualities of soul, nevertheless they have lost their empire or have been killed by subjects who have conspired against them. Wishing, therefore, to answer these objections, I will recall the characters of some of the emperors, and will show that the causes of their ruin were not different to those alleged by me; at the same time I will only submit for consideration those things that are noteworthy to him who studies the affairs of those times.

It seems to me sufficient to take all those emperors who succeeded to the empire from Marcus the philosopher down to Maximinus; they were Marcus and his son Commodus, Pertinax, Julian, Severus [Lucius Septimius Severus Augustus, 145–211 AD] and his son Antoninus Caracalla [Marcus Aurelius Severus Antoninus, 188–217 AD], Macrinus [Marcus Opellius Severus Macrinus Augustus, 165–218 AD], Heliogabalus [Elagabalus, Marcus Aurelius Antoninus Augustus, 204–222 AD], Alexander [Marcus Aurelius Severus Alexander Augustus, 208–235 AD], and Maximinus [Maximinus Thrax (the Thracian); Gaius Julius Verus Maximinus Augustus; 173–238 AD].

There is first to note that, whereas in other principalities the ambition of the nobles and the insolence of the people only have to be contended with, the Roman emperors had a third difficulty in having to put up with the cruelty and avarice of their soldiers, a matter so beset with difficulties that it was the ruin of many; for it was a hard thing to give satisfaction both to soldiers and people; because the people loved peace, and for this reason they loved the unaspiring prince, whilst the soldiers loved the warlike prince who was bold, cruel, and rapacious, which qualities they were quite willing he should exercise upon the people, so that they could get double pay and give vent to their own greed and cruelty. Hence it arose that those emperors were always overthrown who, either by birth or training, had no great authority, and most of them, especially those who came new to the principality, recognising the difficulty of these two opposing humours, were inclined to give satisfaction to the soldiers, caring little about injuring the people. Which course was necessary, because, as princes cannot help being hated by someone, they ought, in the first place, to avoid being hated by every one, and when they cannot compass this, they ought to endeavour with the utmost diligence to avoid the hatred of the most powerful. Therefore, those emperors who through inexperience had need of special favour adhered more readily to the soldiers than to the people; a course which turned out advantageous to them or not, accordingly as the prince knew how to maintain authority over them.

From these causes it arose that Marcus [Marcus Aurelius Antoninus Augustus; 121–180 AD], Pertinax [Publius Helvius Pertinax Augustus; 126–193 AD], and Alexander, being all men of modest life, lovers of justice, enemies to cruelty, humane, and benignant, came to a sad end except Marcus; he alone lived and died honoured, because he had succeeded to the throne by hereditary title, and owed nothing either to the soldiers or the people; and afterwards, being possessed of many virtues which made him respected, he always kept both orders in their places whilst he lived, and was neither hated nor despised.

But Pertinax was created emperor against the wishes of the soldiers, who, being accustomed to live licentiously under Commodus, could not endure the honest life to which Pertinax wished to reduce them; thus, having given cause for hatred, to which hatred there was added contempt for his old age, he was overthrown at the very beginning of his administration. And here it should be noted that hatred is acquired as much by good works as by bad ones, therefore, as I said before, a prince wishing to keep his state is very often forced to do evil; for when that body is corrupt whom you think you have need of to maintain yourself—it may be either the people or the soldiers or the nobles—you have to submit to its humours and to gratify them, and then good works will do you harm.

But let us come to Alexander, who was a man of such great goodness, that among the other praises which are accorded him is this, that in the fourteen years he held the empire no one was ever put to death by him unjudged; nevertheless, being considered effeminate and a man who allowed himself to be governed by his mother, he became despised, the army conspired against him, and murdered him.

Turning now to the opposite characters of Commodus [Lucius Aelius Aurelius Commodus; 161–192, son of Marcus Aurelius], Severus, Antoninus Caracalla, and Maximinus, you will find them all cruel and rapacious-men who, to satisfy their soldiers, did not hesitate to commit every kind of iniquity against the people; and all, except Severus, came to a bad end; but in Severus there was so much valour that, keeping the soldiers friendly, although the people were oppressed by him, he reigned successfully; for his valour made him so much admired in the sight of the soldiers and people that the latter were kept in a way astonished and awed and the former respectful and satisfied. And because the actions of this man, as a new prince, were great, I wish to show birelfy that he knew well how to counterfeit the fox and the lion, which natures, as I said above, it is necessary for a prince to imitate.

Knowing the sloth of the Emperor Julian*, he persuaded the army in Sclavonia, of which he was captain, that it would be right to go to Rome and avenge the death of Pertinax, who had been killed by the praetorian soldiers; and under this pretext, without appearing to aspire to the throne, he moved the army on Rome, and reached Italy before it was known that he had started. [* Didius Julianus (Caesar Marcus Didius Severus Julianus Augustus; 133 / 137-193 AD) was Roman emperor for nine weeks from March to June 193, during the Year of the Five Emperors.] On his arrival at Rome, the Senate, through fear, elected him emperor and killed Julian. After this there remained for Severus, who wished to make himself master of the whole empire, two difficulties; one in Asia, where Niger, head of the Asiatic army, had caused himself to be proclaimed emperor: the other in the west where Albinus was, who also aspired to the throne. And as he considered it dangerous to declare himself hostile to both, he decided to attack Niger and to deceive Albinus. To the latter he wrote that, being elected emperor by the Senate, he was willing to share that dignity with him and sent him the title of Caesar; and, moreover, that the Senate had made Albinus his colleague; which things were accepted by Albinus as true. But after Severus had conquered and killed Niger, and settled oriental affairs, he returned to Rome and complained to the Senate that Albinus, little recognising the benefits that he had received from him, had by treachery sought to murder him, and for this ingratitude he was compelled to punish him. Afterwards he sought him out in France, and took from him his government and life. He who will, therefore, carefully examine the actions of this man will find him a most valiant lion and a most cunning fox; he will find him feared and respected by every one, and not hated by the army; and it need not be wondered at that he, a new man, was able to hold the empire so well, because his supreme renown always protected him from that hatred which the people might have conceived against him for his violence.

But his son Antoninus was a most eminent man, and had very excellent qualities, which made him admirable in the sight of the people and acceptable to the soldiers, for he was a warlike man, most enduring of fatigue, a despiser of all delicate food and other luxuries, which caused him to be beloved by the armies. Nevertheless, his ferocity and cruelties were so great and so unheard of that, after endless single murders, he killed a large number of the people of Rome and all those of Alexandria. He became hated by the whole world, and also feared by those he had around him, to such an extent that he was murdered in the midst of his army by a centurion. And here it must be noted that such-like deaths, which are deliberately inflicted with a resolved and desperate courage. cannot be avoided by princes, because any one who does not fear to die can inflict them; but a prince may fear them the less because they are very rare; he has only to be careful not to do any grave injury to those whom he employs or has around him in the service of the state. Antoninus had not taken this care, but had contumeliously killed a brother of that centurion, whom also he daily threatened, yet retained in his bodyguard; which, as it turned out, was a rash thing to do, and proved the emperor's ruin.

But let us come to Commodus, to whom it should have been very easy to hold the empire, for, being the son of Marcus, he had inherited it, and he had only to follow in the footsteps of his father to please his people and soldiers; but, being by nature cruel and brutal, he gave himself up to amusing the soldiers and corrupting them, so that he might indulge his rapacity upon the people; on the other hand, not maintaining his dignity, often descending to the theatre to compete with gladiators, and doing other vile things, little worthy of the imperial majesty, he fell into contempt with the soldiers, and being hated by one party and despised by the other, he was conspired against and was killed.

It remains to discuss the character of Maximinus. He was a very warlike man, and the armies, being disgusted with the effeminacy of Alexander, of whom I have already spoken, killed him and elected Maximinus to the throne. This he did not possess for long, for two things made him hated and despised; the one, his having kept sheep in Thrace, which brought him into contempt (it being well known to all, and considered a great indignity by every one), and the other, his having at the accession to his dominions deferred going to Rome and taking possession of the imperial seat; he had also gained a reputation for the utmost ferocity by having, through his prefects in Rome and elsewhere in the empire. practised many cruelties, so that the whole world was moved to anger at the meanness of his birth and to fear at his barbarity. First Africa rebelled, then the Senate with all the people of Rome, and all Italy conspired against him, to which may be added his own army; this latter, besieging Aquileia and meeting with difficulties in taking it, were disgusted with his cruelties, and fearing him less when they found so many against him, murdered him.

I do not wish to discuss Heliogabalus, Macrinus, or Julian, who, being thoroughly contemptible, were quickly wiped out; but I will bring this discourse to a conclusion by saying that princes in our times have this difficulty of giving inordinate satisfaction to their soldiers in a far less degree, because, notwithstanding one has to give them some indulgence, that is soon done; none of these princes have armies that are veterans in the governance and administration of provinces, as were the armies of the Roman Empire; and whereas it was then more necessary to give satisfaction to the soldiers than to the people, it is now more necessary to all princes, except the Turk and the Soldan, to satisfy the people rather the soldiers, because the people are the more powerful.

From the above I have excepted the Turk, who always keeps round him twelve thousand infantry and fifteen thousand cavalry on which depend the security and strength of the kingdom, and it is necessary that, putting aside every consideration for the people, he should keep them his friends. The kingdom of the Soldan is similar; being entirely in the hands of soldiers, it follows again that, without regard to the people, he must keep them his friends. But you must note that the state of the Soldan is unlike all other principalities, for the reason that it is like the Christian pontificate, which cannot be called either an hereditary or a newly formed principality; because the sons of the old prince are not the heirs, but he who is elected to that position by those who have authority, and the sons remain only noblemen. And this being an ancient custom, it cannot be called a new principality, because there are none of those difficulties in it that are met with in new ones; for although the prince is new, the constitution of the state is old, and it is framed so as to receive him as if he were its hereditary lord.

But returning to the subject of our discourse, I say that whoever will consider it will acknowledge that either hatred or contempt has been fatal to the above-named emperors, and it will be recognised also how it happened that, a number of them acting in one way and a number in another, only one in each way came to a happy end and the rest to unhappy ones. Because it would have been useless and dangerous for Pertinax and Alexander, being new princes, to imitate Marcus, who was heir to the principality; and likewise it would have been utterly destructive to Caracalla, Commodus, and Maximinus to have imitated Severus, they not having sufficient valour to enable them to tread in his footsteps. Therefore a prince, new to the principality, cannot imitate the actions of Marcus, nor, again, is it necessary to follow those of Severus, but he ought to take from Severus those parts which are necessary to found his state, and from Marcus those which are proper and glorious to keep a state that may already be stable and firm.

MACHIAVELLI THE PRINCE CHAPTER 20 [Are Fortresses, And Many Other Things To Which Princes Often Resort, Advantageous Or Hurtful?]

1. Some princes, so as to hold securely the state, have disarmed their subjects; others have kept their subject towns distracted by factions; others have fostered enmittes against themselves; others have laid themselves out to gain over those whom they distrusted in the beginning of their governments; some have built fortresses; some have overthrown and destroyed them. And although one cannot give a final judgement on all of these things unless one possesses the particulars of those states in which a decision has to be made, nevertheless I will speak as comprehensively as the matter of itself will admit.

2. There never was a new prince who has disarmed his subjects: rather when he has found them disarmed he has always armed them, because, by arming them, those arms become yours, those men who were distrusted become faithful, and those who were faithful are kept so, and your subjects become your adherents. And whereas all subjects cannot be armed, yet when those whom you do arm are benefited, the others can be handled more freely, and this difference in their treatment, which they guite understand, makes the former your dependents, and the latter, considering it to be necessary that those who have the most danger and service should have the most reward, excuse you. But when you disarm them, you at once offend them by showing that you distrust them, either for cowardice or for want of loyalty, and either of these opinions breeds hatred against you. And because you cannot remain unarmed, it follows that you turn to mercenaries, which are of the character already shown; even if they should be good they would not be sufficient to defend you against powerful enemies and distrusted subjects. Therefore, as I have said, a new prince in a new principality has always distributed arms. Histories are full of examples. But when a prince acquires a new state, which he adds as a province to his old one, then it is necessary to disarm the men of that state, except those who have been his adherents in acquiring it; and these again, with time and opportunity, should be rendered soft and effeminate; and matters should be managed in such a way that all the armed men in the state shall be your own soldiers who in your old state were living near you.

3. Our forefathers, and those who were reckoned wise, were accustomed to say that it was necessary to hold Pistoia by factions and Pisa by fortresses; and with this idea they fostered quarrels in some of their tributary towns so as to keep possession of them the more easily. This may have been well enough in those times when Italy was in a way balanced, but I do not believe that it can be accepted as a precept for today, because I do not believe that factions can ever be of use; rather it is certain that when the enemy comes upon you in divided cities you are quickly lost, because the weakest party will always assist the outside forces and the other will not be able to resist. The Venetians, moved, as I believe, by the above reasons, fostered the Guelph and Ghibelline factions in their tributary cities: and although they never allowed them to come to bloodshed, yet they nursed these disputes amongst them, so that the citizens, distracted by their differences, should not unite against them. Which, as we saw, did not afterwards turn out as expected, because, after the rout at Vaila, one party at once took courage and seized the state. Such methods argue, therefore, weakness in the prince, because these factions will never be permitted in a vigourous principality; such methods for enabling one the more easily to manage subjects are only useful in times of peace, but if war comes this policy proves fallacious.

4. Without doubt princes become great when they overcome the difficulties and obstacles by which they are confronted, and therefore fortune, especially when she desires to make a new prince great, who has a greater necessity to earn renown than an hereditary one, causes enemies to arise and form designs against him, in order that he may have the opportunity of overcoming them, and by them to mount higher, as by a ladder which his enemies have raised. For this reason many consider that a wise prince, when he has the opportunity, ought with craft to foster some animosity against himself, so that, having crushed it, his renown may rise hieher.

5. Princes, especially new ones, have found more fidelity and assistance in those men who in the beginning of their rule were distrusted than among those who in the beginning were trusted. Pandolfo Petrucci, Prince of Siena, ruled his state more by those who had been distrusted than by others. But on this question one cannot speak generally, for it varies so much with the individual; I will only say this, that those men who at the commencement of a princedom have been hostile, if they are of a description to need assistance to support themselves can always be gained over with the greatest ease, and they will be tightly held to serve the prince with fidelity, inasmuch as they know it to be very necessary for them to cancel by deeds the bad impression which he had formed of them; and thus the prince always extracts more profit from them than from those who, serving him in too much security, may neglect his affairs. And since the matter demands it, I must not fail to warn a prince, who by means of secret favours has acquired a new state, that he must well consider the reasons which induced those to favour him who did so; and if it be not a natural affection towards him, but only discontent with their government, then he will only keep them friendly with great trouble and difficulty, for it will be impossible to satisfy them. And weighing well the reasons for this in those examples which can be taken from ancient and modern affairs, we shall find that it is easier for the prince to make friends of those men who were contented under the former government, and are therefore his enemies, than of those who, being discontented with it, were favourable to him and encouraged him to seize it.

that he might keep that state; Guido Ubaldo, Duke of Urbino. on returning to his dominion, whence he had been driven by Cesare Borgia, razed to the foundations all the fortresses in that province, and considered that without them it would be more difficult to lose it; the Bentivogli returning to Bologna came to a similar decision. Fortresses, therefore, are useful or not according to circumstances; if they do you good in one way they injure you in another. And this question can be reasoned thus: the prince who has more to fear from the people than from foreigners ought to build fortresses, but he who has more to fear from foreigners than from the people ought to leave them alone. The castle of Milan, built by Francesco Sforza, has made, and will make, more trouble for the house of Sforza than any other disorder in the state. For this reason the best possible fortress is—not to be hated by the people, because, although you may hold the fortresses, yet they will not save you if the people hate you, for there will never be wanting foreigners to assist a people who have taken arms against you. It has not been seen in our times that such fortresses have been of use to any prince, unless to the Countess of Forli*, when the Count Girolamo, her consort, was killed; for by that means she was able to withstand the popular attack and wait for assistance from Milan, and thus recover her state; and the posture of affairs was such at that time that the foreigners could not assist the people. (* Catherine Sforza, a daughter of Galeazzo Sforza and Lucrezia Landriani, born 1463, died 1509. It was to the Countess of Forli that Machiavelli was sent as envoy on 1499. A letter from Fortunati to the countess announces the appointment: "I have been with the signori," wrote Fortunati, "to learn whom they would send and when. They tell me that Nicolo Machiavelli, a learned young Florentine noble, secretary to my Lords of the Ten, is to leave with me at once." Cf. "Catherine Sforza," by Count Pasolini, translated by P. Sylvester, 1898.) But fortresses were of little value to her afterwards when Cesare Borgia attacked her, and when the people, her enemy, were allied with foreigners. Therefore, it would have been safer for her, both then and before, not to have been hated by the people than to have had the fortresses. All these things considered then, I shall praise him who builds

6. It has been a custom with princes, in order to hold their

states more securely, to build fortresses that may serve as a

bridle and bit to those who might design to work against

them, and as a place of refuge from a first attack. I praise this

system because it has been made use of formerly.

Notwithstanding that, Messer Nicolo Vitelli in our times has

been seen to demolish two fortresses in Citta di Castello so

MACHIAVELLI THE PRINCE CHAPTER 21 [How A Prince Should Conduct Himself So As To Gain Renown]

fortresses as well as him who does not and I shall blame

whoever, trusting in them, cares little about being hated by

the people.

Nothing makes a prince so much esteemed as great enterprises and setting a fine example. We have in our time Ferdinand of Aragon, the present King of Spain. He can almost be called a new prince, because he has risen, by fame and glory, from being an insignificant king to be the foremost king in Christendom; and if you will consider his deeds you will find them all great and some of them extraordinary. In the beginning of his reign he attacked Granada. and this enterprise was the foundation of his dominions. He did this quietly at first and without any fear of hindrance, for he held the minds of the barons of Castile occupied in thinking of the war and not anticipating any innovations; thus they did not perceive that by these means he was acquiring power and authority over them. He was able with the money of the Church and of the people to sustain his armies, and by that long war to lay the foundation for the military skill which has since distinguished him. Further, always using religion as a plea, so as to undertake greater schemes, he devoted himself with pious cruelty to driving out and clearing his kingdom of the Moors; nor could there be a more admirable example, nor one more rare. Under this same cloak he assailed Africa, he came down on Italy, he has finally attacked France; and thus his achievements and designs have always been great, and have kept the minds of his people in suspense and admiration and occupied with the issue of them. And his actions have arisen in such a way, one out of the other, that men have never been given time to work steadily against him.

Again, it much assists a prince to set unusual examples in internal affairs, similar to those which are related of Messer Bernabo da Milano, who, when he had the opportunity, by any one in civil life doing some extraordinary thing, either good or bad, would take some method of rewarding or punishing him, which would be much spoken about. And a prince ought, above all things, always endeavour in every action to gain for himself the reputation of being a great and remarkable man.

A prince is also respected when he is either a true friend or a downright enemy, that is to say, when, without any reservation, he declares himself in favour of one party against the other; which course will always be more advantageous than standing neutral; because if two of your powerful neighbours come to blows, they are of such a character that, if one of them conquers, you have either to fear him or not. In either case it will always be more advantageous for you to declare yourself and to make war strenuously; because, in the first case, if you do not declare yourself, you will invariably fall a prey to the conqueror, to the pleasure and satisfaction of him who has been conquered, and you will have no reasons to offer, nor anything to protect or to shelter you. Because he who conquers does not want doubtful friends who will not aid him in the time of trial; and he who loses will not harbour you because you did not willingly, sword in hand, court his fate.

Antiochus went into Greece, being sent for by the Aetolians to drive out the Romans. He sent envoys to the Achaeans, who were friends of the Romans, exhorting them to remain neutral; and on the other hand the Romans urged them to take up arms. This question came to be discussed in the council of the Achaeans, where the legate of Antiochus urged them to stand neutral. To this the Roman legate answered: "As for that which has been said, that it is better and more advantageous for your state not to interfere in our war, nothing can be more erroneous: because by not interfering you will be left, without favour or consideration, the guerdon of the conqueror." Thus it will always happen that he who is not your friend will demand your neutrality, whilst he who is your friend will entreat you to declare yourself with arms. And irresolute princes, to avoid present dangers, generally follow the neutral path, and are generally ruined. But when a prince declares himself gallantly in favour of one side, if the party with whom he allies himself conquers, although the victor may be powerful and may have him at his mercy, yet he is indebted to him, and there is established a bond of amity; and men are never so shameless as to become a monument of ingratitude by oppressing you. Victories after all are never so complete that the victor must not show some regard, especially to justice. But if he with whom you ally yourself loses, you may be sheltered by him, and whilst he is able he may aid you, and you become companions on a fortune that may rise again.

In the second case, when those who fight are of such a character that you have no anxiety as to who may conquer, so much the more is it greater prudence to be allied, because you assist at the destruction of one by the aid of another who, if he had been wise, would have saved him; and conquering, as it is impossible that he should not do with your assistance, he remains at your discretion. And here it is to be noted that a prince ought to take care never to make an alliance with one more powerful than himself for the purposes of attacking others, unless necessity compels him, as is said above; because if he conquers you are at his discretion, and princes ought to avoid as much as possible being at the discretion of any one. The Venetians joined with France against the Duke of Milan, and this alliance, which caused their ruin, could have been avoided. But when it cannot be avoided, as happened to the Florentines when the Pope and Spain sent armies to attack Lombardy, then in such a case, for the above reasons, the prince ought to favour one of the parties.

Never let any Government imagine that it can choose perfectly safe courses; rather let it expect to have to take very doubtful ones, because it is found in ordinary affairs that one never seeks to avoid one trouble without running into another; but prudence consists in knowing how to distinguish the character of troubles, and for choice to take the lesser evil.

A prince ought also to show himself a patron of ability, and to honour the proficient in every art. At the same time he should encourage his citizens to practise their callings peaceably, both in commerce and agriculture, and in every other following, so that the one should not be deterred from improving his possessions for fear lest they be taken away from him or another from opening up trade for fear of taxes; but the prince ought to offer rewards to whoever wishes to do these things and designs in any way to honour his city or state.

Further, he ought to entertain the people with festivals and spectacles at convenient seasons of the year; and as every city is divided into guilds or into societies*, he ought to hold such bodies in esteem, and associate with them sometimes, and show himself an example of courtesy and liberality; nevertheless, always maintaining the majesty of his rank, for this he must never consent to abate in anything. (* Guilds or societies, were craft or trade guilds.)

MACHIAVELLI THE PRINCE CHAPTER 22 [Concerning The Secretaries Of Princes]

The choice of servants is of no little importance to a prince, and they are good or not according to the discrimination of the prince. And the first opinion which one forms of a prince, and of his understanding, is by observing the men he has around him; and when they are capable and faithful he may always be considered wise, because he has known how to recognise the capable and to keep them faithful. But when they are otherwise one cannot form a good opinion of him, for the prime error which he made was in choosing them.

There were none who knew Messer Antonio da Venafro as the servant of Pandolfo Petrucci, Prince of Siena, who would not consider Pandolfo to be a very clever man in having Venafro for his servant. Because there are three classes of intellects: one which comprehends by itself; another which appreciates what others comprehended; and a third which neither comprehends by itself nor by the showing of others; the first is the most excellent, the second is good, the third is useless. Therefore, it follows necessarily that, if Pandolfo was not in the first rank, he was in the second, for whenever one has judgement to know good and bad when it is said and done, although he himself may not have the initiative, yet he can recognise the good and the bad in his servant, and the one he can praise and the other correct; thus the servant cannot hope to deceive him, and is kept honest.

But to enable a prince to form an opinion of his servant there is one test which never fails; when you see the servant thinking more of his own interests than of yours, and seeking inwardly his own profit in everything, such a man will never make a good servant, nor will you ever be able to trust him; because he who has the state of another in his hands ought never to think of himself, but always of his prince, and never pay any attention to matters in which the prince is not concerned.

On the other hand, to keep his servant honest the prince ought to study him, honouring him, enriching him, doing him kindnesses, sharing with him the honours and cares; and at the same time let him see that he cannot stand alone, so that many honours may not make him desire more, many riches make him wish for more, and that many cares may make him dread chances. When, therefore, servants, and princes towards servants, are thus disposed, they can trust each other, but when it is otherwise, the end will always be disastrous for either one or the other.

MACHIAVELLI THE PRINCE CHAPTER 23 [How Flatterers Should Be Avoided]

I do not wish to leave out an important branch of this subject, for it is a danger from which princes are with difficulty preserved, unless they are very careful and discriminating. It is that of flatterers, of whom courts are full, because men are so self-complacent in their own affairs, and in a way so deceived in them, that they are preserved with difficulty from this pest, and if they wish to defend themselves they run the danger of falling into contempt. Because there is no other way of guarding oneself from flatterers except letting men understand that to tell you the truth does not offend you; but when every one may tell you the truth, respect for you abates.

Therefore a wise prince ought to hold a third course by choosing the wise men in his state, and giving to them only the liberty of speaking the truth to him, and then only of those things of which he inquires, and of none others; but he ought to question them upon everything, and listen to their opinions, and afterwards form his own conclusions. With these councillors, separately and collectively, he ought to carry himself in such a way that each of them should know that, the more freely he shall speak, the more he shall be preferred; outside of these, he should listen to no one, pursue the thing resolved on, and be steadfast in his resolutions. He who does otherwise is either overthrown by flatterers, or is so often changed by varying opinions that he falls into contempt.

I wish on this subject to adduce a modern example. Fra Luca, the man of affairs to Maximilian*, the present emperor, speaking of his majesty, said: He consulted with no one, yet never got his own way in anything. (* Maximilian I, born in 1459, died 1519, Emperor of the Holy Roman Empire. He married, first, Mary, daughter of Charles the Bold; after her death, Bianca Sforza; and thus became involved in Italian politics.) This arose because of his following a practice the opposite to the above; for the emperor is a secretive man-he does not communicate his designs to any one, nor does he receive opinions on them. But as in carrying them into effect they become revealed and known, they are at once obstructed by those men whom he has around him, and he, being pliant, is diverted from them. Hence it follows that those things he does one day he undoes the next, and no one ever understands what he wishes or intends to do, and no one can rely on his resolutions.

A prince, therefore, ought always to take counsel, but only when he wishes and not when others wish; he ought rather to discourage every one from offering advice unless he asks it; but, however, he ought to be a constant inquirer, and afterwards a patient listener concerning the things of which he inquired; also, on learning that any one, on any consideration, has not told him the truth, he should let his anger be felt.

And if there are some who think that a prince who conveys an impression of his wisdom is not so through his own ability, but through the good advisers that he has around him, beyond doubt they are deceived, because this is an axiom which never fails: that a prince who is not wise himself will never take good advice, unless by chance he has yielded his affairs entirely to one person who happens to be a very prudent man. In this case indeed he may be well governed, but it would not be for long, because such a governor would in a short time take away his state from him. But if a prince who is not inexperienced should take counsel from more than one he will never get united counsels, nor will he know how to unite them. Each of the counsellors will think of his own interests, and the prince will not know how to control them or to see through them. And they are not to be found otherwise, because men will always prove untrue to you unless they are kept honest by constraint. Therefore it must be inferred that good counsels, whencesoever they come, are born of the wisdom of the prince, and not the wisdom of the prince from good counsels.

MACHIAVELLI THE PRINCE CHAPTER 24 [Why The Princes Of Italy Have Lost Their States]

The previous suggestions, carefully observed, will enable a new prince to appear well established, and render him at once more secure and fixed in the state than if he had been long seated there. For the actions of a new prince are more narrowly observed than those of an hereditary one, and when they are seen to be able they gain more men and bind far tighter than ancient blood; because men are attracted more by the present than by the past, and when they find the present utmost defence of a prince if he fails them not in other things. Thus it will be a double glory for him to have established a new principality, and adorned and strengthened it with good laws, good arms, good allies, and with a good example; so will it be a double disgrace to him who, born a prince, shall lose his state by want of wisdom.

And if those seigniors are considered who have lost their states in Italy in our times, such as the King of Naples, the Duke of Milan, and others, there will be found in them, firstly, one common defect in regard to arms from the causes which have been discussed at length; in the next place, some one of them will be seen, either to have had the people hostile, or if he has had the people friendly, he has not known how to secure the nobles. In the absence of these defects states that have power enough to keep an army in the field cannot be lost.

Philip of Macedon, not the father of Alexander the Great, but he who was conquered by Titus Quintius, had not much territory compared to the greatness of the Romans and of Greece who attacked him, yet being a warlike man who knew how to attract the people and secure the nobles, he sustained the war against his enemies for many years, and if in the end he lost the dominion of some cities, nevertheless he retained the kingdom.

Therefore, do not let our princes accuse fortune for the loss of their principalities after so many years' possession, but rather their own sloth, because in quiet times they never thought there could be a change (it is a common defect in man not to make any provision in the calm against the tempest), and when afterwards the bad times came they thought of flight and not of defending themselves, and they hoped that the people, disgusted with the insolence of the conquerors, would recall them. This course, when others fail, may be good, but it is very bad to have neglected all other expedients for that, since you would never wish to fall because you trusted to be able to find someone later on to restore you. This again either does not happen, or, if it does, it will not be for your security, because that deliverance is of no avail which does not depend upon yourself; those only are reliable, certain, and durable that depend on yourself and your valour.

MACHIAVELLI THE PRINCE CHAPTER 25

[What Fortune Can Effect In Human Affairs And How To Withstand Her]

It is not unknown to me how many men have had, and still have, the opinion that the affairs of the world are in such wise governed by fortune and by God that men with their wisdom cannot direct them and that no one can even help them: and because of this they would have us believe that it is not necessary to labour much in affairs, but to let chance govern them. This opinion has been more credited in our times because of the great changes in affairs which have been seen, and may still be seen, every day, beyond all human conjecture. Sometimes pondering over this, I am in some degree inclined to their opinion. Nevertheless, not to extinguish our free will, I hold it to be true that Fortune is the arbiter of one-half of our actions*, but that she still leaves us to direct the other half, or perhaps a little less. (* Frederick the Great was accustomed to say: "The older one gets the more convinced one becomes that his Majesty King Chance does three-quarters of the business of this miserable universe." Sorel's "Eastern Ouestion.")

I compare her to one of those raging rivers, which when in flood overflows the plains, sweeping away trees and buildings, bearing away the soil from place to place; everything flies before it, all yield to its violence, without being able in any way to withstand it; and yet, though its nature be such, it does not follow therefore that men, when the weather becomes fair, shall not make provision, both with defences and barriers, in such a manner that, rising again, the waters may pass away by canal, and their force be neither so unrestrained nor so dangerous. So it happens with fortune, who shows her power where valour has not prepared to resist her, and thither she turns her forces where she knows that barriers and defences have not been raised to constrain her.

And if you will consider Italy, which is the seat of these changes, and which has given to them their impulse, you will see it to be an open country without barriers and without any defence. For if it had been defended by proper valour, as are Germany, Spain, and France, either this invasion would not have made the great changes it has made or it would not have come at all. And this I consider enough to say concerning resistance to fortune in general.

But confining myself more to the particular, I say that a prince may be seen happy to-day and ruined to-morrow without having shown any change of disposition or character. This, I believe, arises firstly from causes that have already been discussed at length, namely, that the prince who relies entirely on fortune is lost when it changes. I believe also that he will be successful who directs his actions according to the spirit of the times, and that he whose actions do not accord with the times will not be successful. Because men are seen, in affairs that lead to the end which every man has before him, namely, glory and riches, to get there by various methods; one with caution, another with haste; one by force, another by skill; one by patience, another by its opposite; and each one succeeds in reaching the goal by a different method. One can also see of two cautious men the one attain his end, the other fail; and similarly, two men by different observances are equally successful, the one being cautious, the other impetuous; all this arises from nothing else than whether or not they conform in their methods to the spirit of the times. This follows from what I have said, that two men working differently bring about the same effect, and of two working similarly, one attains his object and the other does not.

Changes in estate also issue from this, for if, to one who governs himself with caution and patience, times and affairs converge in such a way that his administration is successful, his fortune is made; but if times and affairs change, he is ruined if he does not change his course of action. But a man is not often found sufficiently circumspect to know how to accommodate himself to the change, both because he cannot deviate from what nature inclines him to do, and also because, having always prospered by acting in one way, he cannot be persuaded that it is well to leave it; and, therefore, the cautious man, when it is time to turn adventurous, does not know how to do it, hence he is ruined; but had he changed his conduct with the times fortune would not have changed.

Pope Julius the Second went to work impetuously in all his affairs, and found the times and circumstances conform so well to that line of action that he always met with success. Consider his first enterprise against Bologna, Messer Giovanni Bentivogli being still alive. The Venetians were not agreeable to it, nor was the King of Spain, and he had the enterprise still under discussion with the King of France: nevertheless he personally entered upon the expedition with his accustomed boldness and energy, a move which made Spain and the Venetians stand irresolute and passive, the latter from fear, the former from desire to recover the kingdom of Naples; on the other hand, he drew after him the King of France, because that king, having observed the movement, and desiring to make the Pope his friend so as to humble the Venetians, found it impossible to refuse him. Therefore Julius with his impetuous action accomplished what no other pontiff with simple human wisdom could have done: for if he had waited in Rome until he could get away, with his plans arranged and everything fixed, as any other pontiff would have done, he would never have succeeded. Because the King of France would have made a thousand excuses, and the others would have raised a thousand fears.

I will leave his other actions alone, as they were all alike, and they all succeeded, for the shortness of his life did not let him experience the contrary; but if circumstances had arisen which required him to go cautiously, his ruin would have followed, because he would never have deviated from those ways to which nature inclined him.

I conclude, therefore that, fortune being changeful and mankind steadfast in their ways, so long as the two are in agreement men are successful, but unsuccessful when they fall out. For my part I consider that it is better to be adventurous than cautious, because fortune is a woman, and if you wish to keep her under it is necessary to beat and ill-use her; and it is seen that she allows herself to be mastered by the adventurous rather than by those who go to work more coldly. She is, therefore, always, woman-like, a lover of young men, because they are less cautious, more violent, and with more audacity command her.

MACHIAVELLI THE PRINCE CHAPTER 26

[An Exhortation To Liberate Italy From The Barbarians] Having carefully considered the subject of the above discourses, and wondering within myself whether the present times were propitious to a new prince, and whether there were elements that would give an opportunity to a wise and virtuous one to introduce a new order of things which would do honour to him and good to the people of this country, it appears to me that so many things concur to favour a new prince that I never knew a time more fit than the present.

And if, as I said, it was necessary that the people of Israel should be captive so as to make manifest the ability of Moses; that the Persians should be oppressed by the Medes so as to discover the greatness of the soul of Cyrus; and that the Athenians should be dispersed to illustrate the capabilities of Theseus: then at the present time, in order to discover the virtue of an Italian spirit, it was necessary that Italy should be reduced to the extremity that she is now in, that she should be more enslaved than the Hebrews, more oppressed than the Persians, more scattered than the Athenians; without head, without order, beaten, despoiled, torn, overrun; and to have endured every kind of desolation.

Although lately some spark may have been shown by one, which made us think he was ordained by God for our redemption, nevertheless it was afterwards seen, in the height of his career, that fortune rejected him; so that Italy, left as without life, waits for him who shall yet heal her wounds and put an end to the ravaging and plundering of Lombardy, to the swindling and taxing of the kingdom and of Tuscany, and cleanse those sores that for long have festered. It is seen how she entreats God to send someone who shall deliver her from these wrongs and barbarous insolencies. It is seen also that she is ready and willing to follow a banner if only someone will raise it.

Nor is there to be seen at present one in whom she can place more hope than in your illustrious house^{*}, with its valour and fortune, favoured by God and by the Church of which it is now the chief, and which could be made the head of this redemption. (* Giuliano de Medici. He had just been created a cardinal by Leo X. In 1523 Giuliano was elected Pope, and took the title of Clement VII.) This will not be difficult if you will recall to yourself the actions and lives of the men I have named. And although they were great and wonderful men, yet they were men, and each one of them had no more opportunity than the present offers, for their enterprises were neither more just nor easier than this, nor was God more their friend than He is yours.

With us there is great justice, because that war is just which is necessary, and arms are hallowed when there is no other hope but in them. Here there is the greatest willingness, and where the willingness is great the difficulties cannot be great if you will only follow those men to whom I have directed your attention. Further than this, how extraordinarily the ways of God have been manifested beyond example: the sea is divided, a cloud has led the way, the rock has poured forth water, it has rained manna, everything has contributed to your greatness; you ought to do the rest. God is not willing to do everything, and thus take away our free will and that share of glory which belongs to us.

And it is not to be wondered at if none of the above-named Italians have been able to accomplish all that is expected from your illustrious house; and if in so many revolutions in Italy, and in so many campaigns, it has always appeared as if military virtue were exhausted, this has happened because the old order of things was not good, and none of us have known how to find a new one. And nothing honours a man more than to establish new laws and new ordinances when he himself was newly risen. Such things when they are well founded and dignified will make him revered and admired, and in Italy there are not wanting opportunities to bring such into use in every form.

Here there is great valour in the limbs whilst it fails in the head. Look attentively at the duels and the hand-to-hand combats, how superior the Italians are in strength, dexterity, and subtlety. But when it comes to armies they do not bear comparison, and this springs entirely from the insufficiency of the leaders, since those who are capable are not obedient, and each one seems to himself to know, there having never been any one so distinguished above the rest, either by valour or fortune, that others would yield to him. Hence it is that for so long a time, and during so much fighting in the past twenty years, whenever there has been an army wholly Italian, it has always given a poor account of itself; the first witness to this is Il Taro, afterwards Allesandria, Capua, Genoa, Vaila, Bologna, Mestri* (* The battles of Il Taro, 1495; Alessandria, 1499; Capua, 1501; Genoa, 1507; Vaila, 1509; Bologna, 1511; Mestri, 1513.).

If, therefore, your illustrious house wishes to follow these remarkable men who have redeemed their country, it is necessary before all things, as a true foundation for every enterprise, to be provided with your own forces, because there can be no more faithful, truer, or better soldiers. And although singly they are good, altogether they will be much better when they find themselves commanded by their prince, honoured by him, and maintained at his expense. Therefore it is necessary to be prepared with such arms, so that you can be defended against foreigners by Italian valour.

And although Swiss and Spanish infantry may be considered very formidable, nevertheless there is a defect in both, by reason of which a third order would not only be able to oppose them, but might be relied upon to overthrow them. For the Spaniards cannot resist cavalry, and the Switzers are afraid of infantry whenever they encounter them in close combat. Owing to this, as has been and may again be seen, the Spaniards are unable to resist French cavalry, and the Switzers are overthrown by Spanish infantry. And although a complete proof of this latter cannot be shown, nevertheless there was some evidence of it at the battle of Ravenna, when the Spanish infantry were confronted by German battalions, who follow the same tactics as the Swiss; when the Spaniards, by agility of body and with the aid of their shields, got in under the pikes of the Germans and stood out of danger, able to attack, while the Germans stood helpless, and, if the cavalry had not dashed up, all would have been over with them. It is possible, therefore, knowing the defects of both these infantries, to invent a new one, which will resist cavalry and not be afraid of infantry; this need not create a new order of arms, but a variation upon the old. And these are the kind of improvements which confer reputation and power upon a new prince.

This opportunity, therefore, ought not to be allowed to pass for letting Italy at last see her liberator appear. Nor can one express the love with which he would be received in all those provinces which have suffered so much from these foreign scourings, with what thirst for revenge, with what stubborn faith, with what devotion, with what tears. What door would be closed to him? Who would refuse obedience to him? What envy would hinder him? What Italian would refuse him homage? To all of us this barbarous dominion stinks. Let, therefore, your illustrious house take up this charge with that courage and hope with which all just enterprises are undertaken, so that under its standard our native country may be ennobled, and under its auspices may be verified that saying of Petrarch:

Virtu contro al Furore

Prendera l'arme, e fia il combatter corto: Che l'antico valore

Negli italici cuor non e ancor morto.

Virtue against fury shall advance the fight,

And it i' th' combat soon shall put to flight:

For the old Roman valour is not dead,

Nor in th' Italians' brests extinguished.

[Edward Dacre, 1640.]

DESCRIPTION OF THE METHODS [Adopted By The Duke Valentino When Murdering Vitellozzo Vitelli, Oliverotto Da Fermo, The Signor Pagolo, And The Duke Di Gravina Orsini] — By Nicolo Machiavelli

The Duke Valentino had returned from Lombardy, where he had been to clear himself with the King of France from the calumnies which had been raised against him by the Florentines concerning the rebellion of Arezzo and other towns in the Val di Chiana, and had arrived at Imola, whence he intended with his army to enter upon the campaign against Giovanni Bentivogli, the tyrant of Bologna: for he intended to bring that city under his domination, and to make it the head of his Romagnian duchy.

These matters coming to the knowledge of the Vitelli and Orsini and their following, it appeared to them that the duke would become too powerful, and it was feared that, having seized Bologna, he would seek to destroy them in order that he might become supreme in Italy. Upon this a meeting was called at Magione in the district of Perugia, to which came the cardinal, Pagolo, and the Duke di Gravina Orsini, Vitellozzo Vitelli, Oliverotto da Fermo, Gianpagolo Baglioni, the tyrant of Perugia, and Messer Antonio da Venafro, sent by Pandolfo Petrucci, the Prince of Siena. Here were discussed the power and courage of the duke and the necessity of curbing his ambitions, which might otherwise bring danger to the rest of being ruined. And they decided not to abandon the Bentivogli, but to strive to win over the Florentines; and they sent their men to one place and another, promising to one party assistance and to another encouragement to unite with them against the common enemy. This meeting was at once reported throughout all Italy, and those who were discontented under the duke, among whom were the people of Urbino, took hope of effecting a revolution.

Thus it arose that, men's minds being thus unsettled, it was decided by certain men of Urbino to seize the fortress of San Leo, which was held for the duke, and which they captured by the following means. The castellan was fortifying the rock and causing timber to be taken there; so the conspirators watched, and when certain beams which were being carried to the rock were upon the bridge, so that it was prevented from being drawn up by those inside, they took the opportunity of leaping upon the bridge and thence into the fortress. Upon this capture being effected, the whole state rebelled and recalled the old duke, being encouraged in this, not so much by the capture of the fort, as by the Diet at Magione, from whom they expected to get assistance.

Those who heard of the rebellion at Urbino thought they would not lose the opportunity, and at once assembled their men so as to take any town, should any remain in the hands of the duke in that state; and they sent again to Florence to beg that republic to join with them in destroying the common firebrand, showing that the risk was lessened and that they ought not to wait for another opportunity.

But the Florentines, from harred, for sundry reasons, of the Vitelli and Orsini, not only would not ally themselves, but sent Nicolo Machiavelli, their secretary, to offer shelter and assistance to the duke against his enemies. The duke was found full of fear at Imola, because, against everybody's expectation, his soldiers had at once gone over to the enemy and he found himself disarmed and war at his door. But recovering courage from the offers of the Florentines, he decided to temporize before fighting with the few soldiers that remained to him, and to negotiate for a reconciliation, and also to get assistance. This latter he obtained in two ways, by sending to the King of France for men and by enlisting men-at-arms and others whom he turned into cavalry of a sort: to all he gave money.

Notwithstanding this, his enemies drew near to him, and approached Fossombrone, where they encountered some men of the duke and, with the aid of the Orsini and Vitelli, routed them. When this happened, the duke resolved at once to see if he could not close the trouble with offers of reconciliation, and being a most perfect dissembler he did not fail in any practices to make the insurgents understand that he wished every man who had acquired anything to keep it, as it was enough for him to have the title of prince, whilst others might have the principality.

And the duke succeeded so well in this that they sent Signor Pagolo to him to negotiate for a reconciliation, and they brought their army to a standstill. But the duke did not stop his preparations, and took every care to provide himself with cavalry and infantry, and that such preparations might not be apparent to the others, he sent his troops in separate parties to every part of the Romagna. In the meanwhile there came also to him five hundred French lancers, and although he found himself sufficiently strong to take vengeance on his enemies in open war, he considered that it would be safer and more advantageous to outwit them, and for this reason he did not stop the work of reconciliation.

And that this might be effected the duke concluded a peace with them in which he confirmed their former covenants; he gave them four thousand ducats at once; he promised not to injure the Bentivogli; and he formed an alliance with Giovanni; and moreover he would not force them to come personally into his presence unless it pleased them to do so. On the other hand, they promised to restore to him the duchy of Urbino and other places seized by them, to serve him in all his expeditions, and not to make war against or ally themselves with any one without his permission.

This reconciliation being completed, Guido Ubaldo, the Duke of Urbino, again fled to Venice, having first destroyed all the fortresses in his state; because, trusting in the people, he did not wish that the fortresses, which he did not think he could defend, should be held by the enemy, since by these means a check would be kept upon his friends. But the Duke Valentino, having completed this convention, and dispersed his men throughout the Romagna, set out for Imola at the end of November together with his French men-at-arms: thence he went to Cesena, where he stayed some time to negotiate with the envoys of the Vitelli and Orsini, who had assembled with their men in the duchy of Urbino, as to the enterprise in which they should now take part; but nothing being concluded, Oliverotto da Fermo was sent to propose that if the duke wished to undertake an expedition against Tuscany they were ready; if he did not wish it, then they would besiege Sinigalia. To this the duke replied that he did not wish to enter into war with Tuscany, and thus become hostile to the Florentines, but that he was very willing to proceed against Sinigalia.

It happened that not long afterwards the town surrendered, but the fortress would not yield to them because the castellan would not give it up to any one but the duke in person: therefore they exhorted him to come there. This appeared a good opportunity to the duke, as, being invited by them, and not going of his own will, he would awaken no suspicions. And the more to reassure them, he allowed all the French men-at-arms who were with him in Lombardy to depart, except the hundred lancers under Mons. di Candales, his brother-in-law. He left Cesena about the middle of December, and went to Fano, and with the utmost cunning and cleverness he persuaded the Vitelli and Orsini to wait for him at Sinigalia, pointing out to them that any lack of compliance would cast a doubt upon the sincerity and permanency of the reconciliation, and that he was a man who wished to make use of the arms and councils of his friends. But Vitellozzo remained very stubborn, for the death of his brother warned him that he should not offend a prince and afterwards trust him; nevertheless, persuaded by Pagolo Orsini, whom the duke had corrupted with gifts and promises, he agreed to wait.

Upon this the duke, before his departure from Fano, which was to be on 30th December 1502, communicated his designs to eight of his most trusted followers, among whom were Don Michele and the Monsignor d'Euna, who was afterwards cardinal; and he ordered that, as soon as Vitellozzo, Pagolo Orsini, the Duke di Gravina, and Oliverotto should arrive, his followers in pairs should take them one by one, entrusting certain men to certain pairs, who should entertain them until they reached Sinigalia; nor should they be permitted to leave until they came to the duke's quarters, where they should be seized.

The duke afterwards ordered all his horsemen and infantry, of which there were more than two thousand cavalry and ten thousand footmen, to assemble by daybreak at the Metauro, a river five miles distant from Fano, and await him there. He found himself, therefore, on the last day of December at the Metauro with his men, and having sent a cavalcade of about two hundred horsemen before him, he then moved forward the infantry, whom he accompanied with the rest of the menat-arms.

Fano and Sinigalia are two cities of La Marca situated on the shore of the Adriatic Sea, fifteen miles distant from each other, so that he who goes towards Sinigalia has the mountains on his right hand, the bases of which are touched by the sea in some places. The city of Sinigalia is distant from the foot of the mountains a little more than a bow-shot and from the shore about a mile. On the side opposite to the city runs a little river which bathes that part of the walls looking towards Fano, facing the high road. Thus he who draws near to Sinigalia comes for a good space by road along the mountains, and reaches the river which passes by Sinigalia. If he turns to his left hand along the bank of it, and goes for the distance of a bow-shot, he arrives at a bridge which crosses the river; he is then almost abreast of the gate that leads into Sinigalia, not by a straight line, but transversely. Before this gate there stands a collection of houses with a square to which the bank of the river forms one side.

The Vitelli and Orsini having received orders to wait for the duke, and to honour him in person, sent away their men to several castles distant from Sinigalia about six miles, so that room could be made for the men of the duke; and they left in Sinigalia only Oliverotto and his band, which consisted of one thousand infantry and one hundred and fifty horsemen, who were quartered in the suburb mentioned above. Matters having been thus arranged, the Duke Valentino left for Sinigalia, and when the leaders of the cavalry reached the bridge they did not pass over, but having opened it, one portion wheeled towards the river and the other towards the country, and a way was left in the middle through which the infantry passed, without stopping, into the town.

Vitellozzo, Pagolo, and the Duke di Gravina on mules, accompanied by a few horsemen, went towards the duke; Vitellozo, unarmed and wearing a cape lined with green, appeared very dejected, as if conscious of his approaching death—a circumstance which, in view of the ability of the man and his former fortune, caused some amazement. And it is said that when he parted from his men before setting out for Sinigalia to meet the duke he acted as if it were his last parting from them. He recommended his house and its fortunes to his captains, and advised his nephews that it was not the fortune of their house, but the virtues of their fathers that should be kept in mind. These three, therefore, came before the duke and saluted him respectfully, and were treceived by him with goodwill; they were at once placed between those who were commissioned to look after them.

But the duke noticing that Oliverotto, who had remained with his band in Sinigalia, was missing—for Oliverotto was waiting in the square before his quarters near the river, keeping his men in order and drilling them—signalled with his eye to Don Michelle, to whom the care of Oliverotto had been committed, that he should take measures that Oliverotto should not escape. Therefore Don Michele rode off and joined Oliverotto, telling him that it was not right to keep his men out of their quarters, because these might be taken up by the men of the duke; and he advised him to send them at once to their quarters and to come himself to meet the duke. And Oliverotto, having taken this advice, came before the duke, who, when he saw him, called to him; and Oliverotto, having made his obeisance, joined the others.

So the whole party entered Sinigalia, dismounted at the duke's quarters, and went with him into a secret chamber, where the duke made them prisoners; he then mounted on horseback, and issued orders that the men of Oliverotto and the Orsini should be stripped of their arms. Those of Oliverotto, being at hand, were quickly settled, but those of the Orsini and Vitelli, being at a distance, and having a presentiment of the destruction of their masters, had time to prepare themselves, and bearing in mind the valour and discipline of the Orsinian and Vitellian houses, they stood together against the hostile forces of the country and saved themselves.

But the duke's soldiers, not being content with having pillaged the men of Oliverotto, began to sack Sinigalia, and if the duke had not repressed this outrage by killing some of them they would have completely sacked it. Night having come and the tumult being silenced, the duke prepared to kill Vitellozzo and Oliverotto; he led them into a room and caused them to be strangled. Neither of them used words in keeping with their past lives: Vitellozzo prayed that he might ask of the pope full pardon for his sins; Oliverotto cringed and laid the blame for all injuries against the duke on Vitellozzo. Pagolo and the Duke di Gravina Orsini were kept alive until the duke heard from Rome that the pope had taken the Cardinal Orsino, the Archbishop of Florence, and Messer Jacopo da Santa Croce. After which news, on 18th January 1502, in the castle of Pieve, they also were strangled in the same way.

THE LIFE OF CASTRUCCIO CASTRACANI OF LUCCA [Written By Nicolo Machiavelli — And sent to his friends Zanobi Buondelmonti — And Luigi Alamanni] Castruccio Castracani, 1284-1328

It appears, dearest Zanobi and Luigi, a wonderful thing to those who have considered the matter, that all men, or the larger number of them, who have performed great deeds in the world, and excelled all others in their day, have had their birth and beginning in baseness and obscurity; or have been aggrieved by Fortune in some outrageous way. They have either been exposed to the mercy of wild beasts, or they have had so mean a parentage that in shame they have given themselves out to be sons of Jove or of some other deity. It would be wearisome to relate who these persons may have been because they are well known to everybody, and, as such tales would not be particularly edifying to those who read them, they are omitted. I believe that these lowly beginnings of great men occur because Fortune is desirous of showing to the world that such men owe much to her and little to wisdom, because she begins to show her hand when wisdom can really take no part in their career: thus all success must be attributed to her. Castruccio Castracani of Lucca was one of those men who did great deeds, if he is measured by the times in which he lived and the city in which he was born; but, like many others, he was neither fortunate nor distinguished in his birth, as the course of this history will show. It appeared to be desirable to recall his memory, because I have discerned in him such indications of valour and fortune as should make him a great exemplar to men. I think also that I ought to call your attention to his actions, because you of all men I know delight most in noble deeds.

The family of Castracani was formerly numbered among the noble families of Lucca, but in the days of which I speak it had somewhat fallen in estate, as so often happens in this world. To this family was born a son Antonio, who became a priest of the order of San Michele of Lucca, and for this reason was honoured with the title of Messer Antonio. He had an only sister, who had been married to Buonaccorso Cenami, but Buonaccorso dying she became a widow, and not wishing to marry again went to live with her brother. Messer Antonio had a vineward behind the house where he resided and as it was bounded on all sides by gardens, any person could have access to it without difficulty. One morning, shortly after sunrise, Madonna Dianora, as the sister of Messer Antonio was called, had occasion to go into the vineyard as usual to gather herbs for seasoning the dinner, and hearing a slight rustling among the leaves of a vine she turned her eyes in that direction, and heard something resembling the cry of an infant. Whereupon she went towards it, and saw the hands and face of a baby who was lying enveloped in the leaves and who seemed to be crying for its mother. Partly wondering and partly fearing, yet full of compassion, she lifted it up and carried it to the house, where she washed it and clothed it with clean linen as is customary, and showed it to Messer Antonio when he returned home. When he heard what had happened and saw the child he was not less surprised or compassionate than his sister. They discussed between themselves what should be done, and seeing that he was priest and that she had no children, they finally determined to bring it up. They had a nurse for it, and it was reared and loved as if it were their own child. They baptized it, and gave it the name of Castruccio after their father. As the years passed Castruccio grew very handsome, and gave evidence of wit and discretion. and learnt with a quickness beyond his years those lessons which Messer Antonio imparted to him. Messer Antonio intended to make a priest of him, and in time would have inducted him into his canonry and other benefices, and all his instruction was given with this object; but Antonio discovered that the character of Castruccio was quite unfitted for the priesthood. As soon as Castruccio reached the age of fourteen he began to take less notice of the chiding of Messer Antonio and Madonna Dianora and no longer to fear them; he left off reading ecclesiastical books, and turned to playing with arms, delighting in nothing so much as in learning their uses, and in running, leaping, and wrestling with other boys. In all exercises he far excelled his companions in courage and bodily strength, and if at any time he did turn to books, only those pleased him which told of wars and the mighty deeds of men. Messer Antonio beheld all this with vexation and sorrow.

There lived in the city of Lucca a gentleman of the Guinigi family, named Messer Francesco, whose profession was arms and who in riches, bodily strength, and valour excelled all other men in Lucca. He had often fought under the command of the Visconti of Milan, and as a Ghibelline was the valued leader of that party in Lucca. This gentleman resided in Lucca and was accustomed to assemble with others most mornings and evenings under the balcony of the Podesta, which is at the top of the square of San Michele, the finest square in Lucca, and he had often seen Castruccio taking part with other children of the street in those games of which I have spoken. Noticing that Castruccio far excelled the other boys, and that he appeared to exercise a royal authority over them, and that they loved and obeyed him, Messer Francesco became greatly desirous of learning who he was. Being informed of the circumstances of the bringing up of Castruccio he felt a greater desire to have him near to him. Therefore he called him one day and asked him whether he would more willingly live in the house of a gentleman, where he would learn to ride horses and use arms, or in the house of a priest, where he would learn nothing but masses and the services of the Church. Messer Francesco could see that it pleased Castruccio greatly to hear horses and arms spoken of, even though he stood silent. blushing modestly; but being encouraged by Messer Francesco to speak, he answered that, if his master were agreeable, nothing would please him more than to give up his priestly studies and take up those of a soldier. This reply delighted Messer Francesco, and in a very short time he obtained the consent of Messer Antonio, who was driven to yield by his knowledge of the nature of the lad, and the fear that he would not be able to hold him much longer.

Thus Castruccio passed from the house of Messer Antonio the priest to the house of Messer Francesco Guinigi the soldier, and it was astonishing to find that in a very short time he manifested all that virtue and bearing which we are accustomed to associate with a true gentleman. In the first place he became an accomplished horseman, and could manage with ease the most fiery charger, and in all jousts and tournaments, although still a youth, he was observed beyond all others, and he excelled in all exercises of strength and dexterity. But what enhanced so much the charm of these accomplishments, was the delightful modesty which enabled him to avoid offence in either act or word to others, for he was deferential to the great men, modest with his equals, and courteous to his inferiors. These gifts made him beloved, not only by all the Guinigi family, but by all Lucca. When Castruccio had reached his eighteenth year, the Ghibellines were driven from Pavia by the Guelphs, and Messer Francesco was sent by the Visconti to assist the Ghibellines, and with him went Castruccio, in charge of his forces. Castruccio gave ample proof of his prudence and courage in this expedition, acquiring greater reputation than any other captain, and his name and fame were known, not only in Pavia, but throughout all Lombardy.

Castruccio, having returned to Lucca in far higher estimation than he left it did not omit to use all the means in his power to gain as many friends as he could, neglecting none of those arts which are necessary for that purpose. About this time Messer Francesco died, leaving a son thirteen years of age named Pagolo, and having appointed Castruccio to be his son's tutor and administrator of his estate. Before he died Francesco called Castruccio to him, and prayed him to show Pagolo that goodwill which he (Francesco) had always shown to HIM, and to render to the son the gratitude which he had not been able to repay to the father. Upon the death of Francesco, Castruccio became the governor and tutor of Pagolo, which increased enormously his power and position, and created a certain amount of envy against him in Lucca in place of the former universal goodwill, for many men suspected him of harbouring tyrannical intentions. Among these the leading man was Giorgio degli Opizi, the head of the Guelph party. This man hoped after the death of Messer Francesco to become the chief man in Lucca, but it seemed to him that Castruccio, with the great abilities which he already showed, and holding the position of governor, deprived him of his opportunity; therefore he began to sow those seeds which should rob Castruccio of his eminence. Castruccio at first treated this with scorn, but afterwards he grew alarmed, thinking that Messer Giorgio might be able to bring him into disgrace with the deputy of King Ruberto of Naples and have him driven out of Lucca.

The Lord of Pisa at that time was Uguccione of the Faggiuola of Arezzo, who being in the first place elected their captain afterwards became their lord. There resided in Paris some exiled Ghibellines from Lucca, with whom Castruccio held communications with the object of effecting their restoration by the help of Uguccione. Castruccio also brought into his plans friends from Lucca who would not endure the authority of the Opizi. Having fixed upon a plan to be followed, Castruccio cautiously fortified the tower of the Onesti, filling it with supplies and munitions of war, in order that it might stand a siege for a few days in case of need. When the night came which had been agreed upon with Uguccione, who had occupied the plain between the mountains and Pisa with many men, the signal was given, and without being observed Uguccione approached the gate of San Piero and set fire to the portcullis. Castruccio raised a great uproar within the city, calling the people to arms and forcing open the gate from his side. Uguccione entered with his men, poured through the town, and killed Messer Giorgio with all his family and many of his friends and supporters. The governor was driven out, and the government reformed according to

the wishes of Uguccione, to the detriment of the city, because it was found that more than one hundred families were exiled at that time. Of those who fled, part went to Florence and part to Pistoia, which city was the headquarters of the Guelph party, and for this reason it became most hostile to Uguccione and the Lucchese.

As it now appeared to the Florentines and others of the Guelph party that the Ghibellines absorbed too much power in Tuscany, they determined to restore the exiled Guelphs to Lucca. They assembled a large army in the Val di Nievole, and seized Montecatini; from thence they marched to Montecarlo, in order to secure the free passage into Lucca. Upon this Uguccione assembled his Pisan and Lucchese forces, and with a number of German cavalry which he drew out of Lombardy, he moved against the quarters of the Florentines, who upon the appearance of the enemy withdrew from Montecarlo, and posted themselves between Montecatini and Pescia. Jguccione now took up a position near to Montecarlo, and within about two miles of the enemy, and slight skirmishes between the horse of both parties were of daily occurrence. Owing to the illness of Uguccione, the Pisans and Lucchese delayed coming to battle with the enemy. Uguccione, finding himself growing worse, went to Montecarlo to be cured, and left the command of the army in the hands of Castruccio. This change brought about the ruin of the Guelphs, who, thinking that the hostile army having lost its captain had lost its head, grew over-confident. Castruccio observed this, and allowed some days to pass in order to encourage this belief; he also showed signs of fear, and did not allow any of the munitions of the camp to be used. On the other side, the Guelphs grew more insolent the more they saw these evidences of fear, and every day they drew out in the order of battle in front of the army of Castruccio. Presently, deeming that the enemy was sufficiently emboldened, and having mastered their tactics, he decided to join battle with them. First he spoke a few words of encouragement to his soldiers, and pointed out to them the certainty of victory if they would but obey his commands. Castruccio had noticed how the enemy had placed all his best troops in the centre of the line of battle, and his less reliable men on the wings of the army; whereupon he did exactly the opposite, putting his most valiant men on the flanks, while those on whom he could not so strongly rely he moved to the centre. Observing this order of battle, he drew out of his lines and quickly came in sight of the hostile army, who, as usual, had come in their insolence to defy him. He then commanded his centre squadrons to march slowly, whilst he moved rapidly forward those on the wings. Thus, when they came into contact with the enemy, only the wings of the two armies became engaged, whilst the center battalions remained out of action, for these two portions of the line of battle were separated from each other by a long interval and thus unable to reach each other. By this expedient the more valiant part of Castruccio's men were opposed to the weaker part of the enemy's troops, and the most efficient men of the enemy were disengaged; and thus the Florentines were unable to fight with those who were arrayed opposite to them, or to give any assistance to their own flanks. So, without much difficulty, Castruccio put the enemy to flight on both flanks, and the centre battalions took to flight when they found themselves exposed to attack, without having a chance of displaying their valour. The defeat was complete, and the loss in men very heavy, there being more than ten thousand men killed with many officers and knights of the Guelph party in Tuscany, and also many princes who had come to help them, among whom were Piero, the brother of King Ruberto, and Carlo, his nephew, and Filippo, the lord of Taranto. On the part of Castruccio the loss did not amount to more than three hundred men, among whom was Francesco, the son of Uguccione, who, being young and rash, was killed in the first onset.

This victory so greatly increased the reputation of Castruccio that Uguccione conceived some jealousy and suspicion of him, because it appeared to Uguccione that this victory had given him no increase of power, but rather than diminished it. Being of this mind, he only waited for an opportunity to give effect to it. This occurred on the death of Pier Agnolo Micheli, a man of great repute and abilities in Lucca, the murderer of whom fled to the house of Castruccio for refuge. On the sergeants of the captain going to arrest the murderer, they were driven off by Castruccio, and the murderer escaped. This affair coming to the knowledge of Uguccione, who was then at Pisa, it appeared to him a proper opportunity to punish Castruccio. He therefore sent for his son Neri, who was the governor of Lucca, and commissioned him to take Castruccio prisoner at a banquet and put him to death. Castruccio, fearing no evil, went to the governor in a friendly way, was entertained at supper, and then thrown into prison. But Neri, fearing to put him to death lest the people should be incensed, kept him alive, in order to hear further from his father concerning his intentions. Ugucionne cursed the hesitation and cowardice of his son, and at once set out from Pisa to Lucca with four hundred horsemen to finish the business in his own way; but he had not yet reached the baths when the Pisans rebelled and put his deputy to death and

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3371 created Count Gaddo della Gherardesca their lord. Before Uguccione reached Lucca he heard of the occurrences at Pisa. but it did not appear wise to him to turn back, lest the Lucchese with the example of Pisa before them should close their gates against him. But the Lucchese, having heard of what had happened at Pisa, availed themselves of this opportunity to demand the liberation of Castruccio. notwithstanding that Uguccione had arrived in their city. They first began to speak of it in private circles, afterwards openly in the squares and streets; then they raised a tumult, and with arms in their hands went to Uguccione and demanded that Castruccio should be set at liberty. Uguccione, fearing that worse might happen, released him from prison. Whereupon Castruccio gathered his friends around him, and with the help of the people attacked Uguccione; who, finding he had no resource but in flight, rode away with his friends to Lombardy, to the lords of Scale, where he died in poverty.

But Castruccio from being a prisoner became almost a prince in Lucca, and he carried himself so discreetly with his friends and the people that they appointed him captain of their army for one year. Having obtained this, and wishing to gain renown in war, he planned the recovery of the many towns which had rebelled after the departure of Uguccione, and with the help of the Pisans, with whom he had concluded a treaty, he marched to Serezzana. To capture this place he constructed a fort against it, which is called to-day Zerezzanello: in the course of two months Castruccio captured the town. With the reputation gained at that siege, he rapidly seized Massa, Carrara, and Lavenza, and in a short time had overrun the whole of Lunigiana. In order to close the pass which leads from Lombardy to Lunigiana, he besieged Pontremoli and wrested it from the hands of Messer Anastagio Palavicini, who was the lord of it. After this victory he returned to Lucca, and was welcomed by the whole people. And now Castruccio, deeming it imprudent any longer to defer making himself a prince, got himself created the lord of Lucca by the help of Pazzino del Poggio, Puccinello dal Portico, Francesco Boccansacchi, and Cecco Guinigi, all of whom he had corrupted; and he was afterwards solemnly and deliberately elected prince by the people. At this time Frederick of Bavaria, the King of the Romans, came into Italy to assume the Imperial crown, and Castruccio, in order that he might make friends with him, met him at the head of five hundred horsemen. Castruccio had left as his deputy in Lucca, Pagolo Guinigi, who was held in high estimation, because of the people's love for the memory of his father. Castruccio was received in great honour by Frederick, and many privileges were conferred upon him, and he was appointed the emperor's lieutenant in Tuscany. At this time the Pisans were in great fear of Gaddo della Gherardesca, whom they had driven out of Pisa, and they had recourse for assistance to Frederick. Frederick created Castruccio the lord of Pisa, and the Pisans, in dread of the Guelph party, and particularly of the Florentines, were constrained to accent him as their lord

Frederick, having appointed a governor in Rome to watch his Italian affairs, returned to Germany. All the Tuscan and Lombardian Ghibellines, who followed the imperial lead, had recourse to Castruccio for help and counsel, and all promised him the governorship of his country, if enabled to recover it with his assistance. Among these exiles were Matteo Guidi, Nardo Scolari, Lapo Uberti, Gerozzo Nardi, and Piero Buonaccorsi, all exiled Florentines and Ghibellines. Castruccio had the secret intention of becoming the master of all Tuscany by the aid of these men and of his own forces; and in order to gain greater weight in affairs, he entered into a league with Messer Matteo Visconti, the Prince of Milan, and organised for him the forces of his city and the country districts. As Lucca had five gates, he divided his own country districts into five parts, which he supplied with arms, and enrolled the men under captains and ensigns, so that he could quickly bring into the field twenty thousand soldiers, without those whom he could summon to his assistance from Pisa. While he surrounded himself with these forces and allies, it happened at Messer Matteo Visconti was attacked by the Guelphs of Piacenza, who had driven out the Ghibellines with the assistance of a Florentine army and the King Ruberto. Messer Matteo called upon Castruccio to invade the Florentines in their own territories, so that, being attacked at home, they should be compelled to draw their army out of Lombardy in order to defend themselves. Castruccio invaded the Valdarno, and seized Fucecchio and San Miniato, inflicting immense damage upon the country. Whereupon the Florentines recalled their army, which had scarcely reached Tuscany, when Castruccio was forced by other necessities to return to Lucca.

There resided in the city of Lucca the Poggio family, who were so powerful that they could not only elevate Castruccio, but even advance him to the dignity of prince; and it appearing to them they had not received such rewards for their services as they deserved, they incited other families to rebel and to drive Castruccio out of Lucca. They found their opportunity one morning, and arming themselves, they set upon the lieutenant whom Castruccio had left to maintain order and killed him. They endeavoured to raise the people in revolt, but Stefano di Poggio, a peaceable old man who had taken no hand in the rebellion, intervened and compelled them by his authority to lay down their arms; and he offered to be their mediator with Castruccio to obtain from him what they desired. Therefore they laid down their arms with no greater intelligence than they had taken them up. Castruccio, having heard the news of what had happened at Lucca, at once put Pagolo Guinigi in command of the army, and with a troop of cavalry set out for home. Contrary to his expectations, he found the rebellion at an end, yet he posted his men in the most advantageous places throughout the city. As it appeared to Stefano that Castruccio ought to be very much obliged to him, he sought him out, and without saying anything on his own behalf, for he did not recognise any need for doing so, he begged Castruccio to pardon the other members of his family by reason of their youth, their former friendships, and the obligations which Castruccio was under to their house. To this Castruccio graciously responded, and begged Stefano to reassure himself, declaring that it gave him more pleasure to find the tumult at an end than it had ever caused him anxiety to hear of its inception. He encouraged Stefano to bring his family to him, saying that he thanked God for having given him the opportunity of showing his clemency and liberality. Upon the word of Stefano and Castruccio they surrendered, and with Stefano were immediately thrown into prison and put to death. Meanwhile the Florentines had recovered San Miniato, whereupon it seemed advisable to Castruccio to make peace, as it did not appear to him that he was sufficiently secure at Lucca to leave him. He approached the Florentines with the proposal of a truce, which they readily entertained, for they were weary of the war, and desirous of getting rid of the expenses of it. A treaty was concluded with them for two years, by which both parties agreed to keep the conquests they had made. Castruccio thus released from this trouble, turned his attention to affairs in Lucca, and in order that he should not again be subject to the perils from which he had just escaped, he, under various pretences and reasons, first wiped out all those who by their ambition might aspire to the principality; not sparing one of them, but depriving them of country and property, and those whom he had in his hands of life also, stating that he had found by experience that none of them were to be trusted. Then for his further security he raised a fortress in Lucca with the stones of the towers of those whom he had killed or hunted out of the state

Whilst Castruccio made peace with the Florentines, and strengthened his position in Lucca, he neglected no opportunity, short of open war, of increasing his importance elsewhere. It appeared to him that if he could get possession of Pistoia, he would have one foot in Florence, which was his great desire. He, therefore, in various ways made friends with the mountaineers, and worked matters so in Pistoia that both parties confided their secrets to him. Pistoia was divided, as it always had been, into the Bianchi and Neri parties: the head of the Bianchi was Bastiano di Possente, and of the Neri, Jacopo da Gia. Each of these men held secret communications with Castruccio, and each desired to drive the other out of the city; and, after many threatenings, they came to blows. Jacopo fortified himself at the Florentine gate, Bastiano at that of the Lucchese side of the city; both trusted more in Castruccio than in the Florentines, because they believed that Castruccio was far more ready and willing to fight than the Florentines, and they both sent to him for assistance. He gave promises to both, saying to Bastiano that he would come in person, and to Jacopo that he would send his pupil, Pagolo Guinigi. At the appointed time he sent forward Pagolo by way of Pisa, and went himself direct to Pistoia; at midnight both of them met outside the city, and both were admitted as friends. Thus the two leaders entered, and at a signal given by Castruccio, one killed Jacopo da Gia, and the other Bastiano di Possente, and both took prisoners or killed the partisans of either faction. Without further opposition Pistoia passed into the hands of Castruccio, who, having forced the Signoria to leave the palace, compelled the people to yield obedience to him, making them many promises and remitting their old debts. The countryside flocked to the city to see the new prince, and all were filled with hope and quickly settled down, influenced in a great measure by his great valour.

About this time great disturbances arose in Rome, owing to the dearness of living which was caused by the absence of the pontiff at Avignon. The German governor, Enrico, was much blamed for what happened—murders and tumults following each other daily, without his being able to put an end to them. This caused Enrico much anxiety lest the Romans should call in Ruberto, the King of Naples, who would drive the Germans out of the city, and bring back the Pope. Having no nearer friend to whom he could apply for help than Castruccio, he sent to him, begging him not only to give him assistance, but also to come in person to Rome. Castruccio considered that he ought not to hesitate to render the emperor this service, because he believed that he himself would not be safe if at any time the emperor ceased to hold Rome. Leaving Pagolo Guinigi in command at Lucca,

Castruccio set out for Rome with six hundred horsemen, where he was received by Enrico with the greatest distinction. In a short time the presence of Castruccio obtained such respect for the emperor that, without bloodshed or violence, good order was restored, chiefly by reason of Castruccio having sent by sea from the country round Pisa large quantities of corn, and thus removed the source of the trouble. When he had chastised some of the Roman leaders, and admonished others, voluntary obedience was rendered to Enrico. Castruccio received many honours, and was made a Roman senator. This dignity was assumed with the greatest pomp, Castruccio being clothed in a brocaded toga, which had the following words embroidered on its front: "I am what God wills." Whilst on the back was: "What God desires shall be."

During this time the Florentines, who were much enraged that Castruccio should have seized Pistoia during the truce, considered how they could tempt the city to rebel, to do which they thought would not be difficult in his absence. Among the exiled Pistoians in Florence were Baldo Cecchi and Jacopo Baldini, both men of leading and ready to face danger. These men kept up communications with their friends in Pistoia, and with the aid of the Florentines entered the city by night, and after driving out some of Castruccio's officials and partisans, and killing others, they restored the city to its freedom. The news of this greatly angered Castruccio, and taking leave of Enrico, he pressed on in great haste to Pistoia. When the Florentines heard of his return, knowing that he would lose no time, they decided to intercept him with their forces in the Val di Nievole, under the belief that by doing so they would cut off his road to Pistoia. Assembling a great army of the supporters of the Guelph cause, the Florentines entered the Pistoian territories. On the other hand, Castruccio reached Montecarlo with his army; and having heard where the Florentines' lay, he decided not to encounter it in the plains of Pistoia, nor to await it in the plains of Pescia, but, as far as he possibly could, to attack it boldly in the Pass of Serravalle. He believed that if he succeeded in this design, victory was assured, although he was informed that the Florentines had thirty thousand men, whilst he had only twelve thousand. Although he had every confidence in his own abilities and the valour of his troops, yet he hesitated to attack his enemy in the open lest he should be overwhelmed by numbers. Serravalle is a castle between Pescia and Pistoia, situated on a hill which blocks the Val di Nievole, not in the exact pass, but about a bowshot beyond; the pass itself is in places narrow and steep, whilst in general it ascends gently, but is still narrow, especially at the summit where the waters divide, so that twenty men side by side could hold it. The lord of Serravalle was Manfred, a German, who, before Castruccio became lord of Pistoia, had been allowed to remain in possession of the castle, it being common to the Lucchese and the Pistoians, and unclaimed by either-neither of them wishing to displace Manfred as long as he kept his promise of neutrality, and came under obligations to no one. For these reasons, and also because the castle was well fortified, he had always been able to maintain his position. It was here that Castruccio had determined to fall upon his enemy, for here his few men would have the advantage, and there was no fear lest, seeing the large masses of the hostile force before they became engaged, they should not stand. As soon as this trouble with Florence arose. Castruccio saw the immense advantage which possession of this castle would give him, and having an intimate friendship with a resident in the castle, he managed matters so with him that four hundred of his men were to be admitted into the castle the night before the attack on the Florentines, and the castellan put to death.

Castruccio, having prepared everything, had now to encourage the Florentines to persist in their desire to carry the seat of war away from Pistoia into the Val di Nievole, therefore he did not move his army from Montecarlo. Thus the Florentines hurried on until they reached their encampment under Serravalle, intending to cross the hill on the following morning. In the meantime, Castruccio had seized the castle at night, had also moved his army from Montecarlo, and marching from thence at midnight in dead silence, had reached the foot of Serravalle: thus he and the Florentines commenced the ascent of the hill at the same time in the morning. Castruccio sent forward his infantry by the main road, and a troop of four hundred horsemen by a path on the left towards the castle. The Florentines sent forward four hundred cavalry ahead of their army which was following, never expecting to find Castruccio in possession of the hill, nor were they aware of his having seized the castle. Thus it happened that the Florentine horsemen mounting the hill were completely taken by surprise when they discovered the infantry of Castruccio, and so close were they upon it they had scarcely time to pull down their visors. It was a case of unready soldiers being attacked by ready, and they were assailed with such vigour that with difficulty they could hold their own, although some few of them got through. When the noise of the fighting reached the Florentine camp below, it was filled with confusion. The cavalry and infantry became inextricably mixed: the captains were unable to get their men

In a short time the cavalry who were engaged with the enemy's infantry were scattered or killed without having made any effective defence because of their unfortunate position, although in sheer desperation they had offered a stout resistance. Retreat had been impossible. with the mountains on both flanks, whilst in front were their enemies, and in the rear their friends. When Castruccio saw that his men were unable to strike a decisive blow at the enemy and put them to flight, he sent one thousand infantrymen round by the castle, with orders to join the four hundred horsemen he had previously dispatched there, and commanded the whole force to fall upon the flank of the enemy. These orders they carried out with such fury that the Florentines could not sustain the attack, but gave way, and were soon in full retreat-conquered more by their unfortunate position than by the valour of their enemy. Those in the rear turned towards Pistoia, and spread through the plains, each man seeking only his own safety. The defeat was complete and very sanguinary. Many captains were taken prisoners, among whom were Bandini dei Rossi, Francesco Brunelleschi, and Giovanni della Tosa, all Florentine noblemen, with many Tuscans and Neapolitans who fought on the Florentine side, having been sent by King Ruberto to assist the Guelphs. Immediately the Pistoians heard of this defeat they drove out the friends of the Guelphs, and surrendered to Castruccio. He was not content with occupying Prato and all the castles on the plains on both sides of the Arno, but marched his army into the plain of Peretola, about two miles from Florence. Here he remained many days, dividing the spoils, and celebrating his victory with feasts and games, holding horse races, and foot races for men and women. He also struck medals in commemoration of the defeat of the Florentines. He endeavoured to corrupt some of the citizens of Florence, who were to open the city gates at night; but the conspiracy was discovered, and the participators in it taken and beheaded, among whom were Tommaso Lupacci and Lambertuccio Frescobaldi. This defeat caused the Florentines great anxiety, and despairing of preserving their liberty, they sent envoys to King Ruberto of Naples, offering him the dominion of their city; and he, knowing of what immense importance the maintenance of the Guelph cause was to him, accepted it. He agreed with the Florentines to receive from them a yearly tribute of two hundred thousand florins, and he sent his son Carlo to Florence with four thousand horsemen.

Shortly after this the Florentines were relieved in some degree of the pressure of Castruccio's army, owing to his being compelled to leave his positions before Florence and march on Pisa, in order to suppress a conspiracy that had been raised against him by Benedetto Lanfranchi, one of the first men in Pisa, who could not endure that his fatherland should be under the dominion of the Lucchese. He had formed this conspiracy, intending to seize the citadel, kill the partisans of Castruccio, and drive out the garrison. As, however, in a conspiracy paucity of numbers is essential to secrecy, so for its execution a few are not sufficient, and in seeking more adherents to his conspiracy Lanfranchi encountered a person who revealed the design to Castruccio. This betrayal cannot be passed by without severe reproach to Bonifacio Cerchi and Giovanni Guidi, two Florentine exiles who were suffering their banishment in Pisa. Thereupon Castruccio seized Benedetto and put him to death, and beheaded many other noble citizens, and drove their families into exile. It now appeared to Castruccio that both Pisa and Pistoia were thoroughly disaffected; he employed much thought and energy upon securing his position there, and this gave the Florentines their opportunity to reorganise their army, and to await the coming of Carlo, the son of the King of Naples. When Carlo arrived they decided to lose no more time, and assembled a great army of more than thirty thousand infantry and ten thousand cavalry-having called to their aid every Guelph there was in Italy. They consulted whether they should attack Pistoia or Pisa first, and decided that it would be better to march on the latter-a course, owing to the recent conspiracy, more likely to succeed, and of more advantage to them, because they believed that the surrender of Pistoia would follow the acquisition of Pisa.

In the early part of May 1328, the Florentines put in motion this army and quickly occupied Lastra, Signa, Montelupo, and Empoli, passing from thence on to San Miniato. When Castruccio heard of the enormous army which the Florentines were sending against him, he was in no degree alarmed, believing that the time had now arrived when Fortune would deliver the empire of Tuscany into his hands, for he had no reason to think that his enemy would make a better fight, or had better prospects of success, than at Pisa or Serravalle. He assembled twenty thousand foot soldiers and four thousand horsemen, and with this army went to Fucecchio, whilst he sent Pagolo Guinigi to Pisa with five thousand infantry. Fucecchio has a stronger position than any other town in the Pisan district, owing to its situation between the rivers Arno and Gusciana and its slight elevation above the surrounding plain. Moreover, the enemy could not hinder its being victualled unless they divided their forces, nor could they approach it either from the direction of Lucca or Pisa, nor could they get through to Pisa, or attack Castruccio's forces except at a disadvantage. In one case they would find themselves placed between his two armies, the one under his own command and the other under Pagolo, and in the other case they would have to cross the Arno to get to close quarters with the enemy, an undertaking of great hazard. In order to tempt the Florentines to take this latter course, Castruccio withdrew his men from the banks of the river and placed them under the walls of Fucecchio, leaving a wide expanse of land between them and the river.

The Florentines, having occupied San Miniato, held a council of war to decide whether they should attack Pisa or the army of Castruccio, and, having weighed the difficulties of both courses, they decided upon the latter. The river Arno was at that time low enough to be fordable, yet the water reached to the shoulders of the infantrymen and to the saddles of the horsemen. On the morning of 10 June 1328, the Florentines commenced the battle by ordering forward a number of cavalry and ten thousand infantry. Castruccio, whose plan of action was fixed, and who well knew what to do. at once attacked the Florentines with five thousand infantry and three thousand horsemen, not allowing them to issue from the river before he charged them; he also sent one thousand light infantry up the river bank, and the same number down the Arno. The infantry of the Florentines were so much impeded by their arms and the water that they were not able to mount the banks of the river, whilst the cavalry had made the passage of the river more difficult for the others, by reason of the few who had crossed having broken up the bed of the river, and this being deep with mud, many of the horses rolled over with their riders and many of them had stuck so fast that they could not move. When the Florentine captains saw the difficulties their men were meeting, they withdrew them and moved higher up the river, hoping to find the river bed less treacherous and the banks more adapted for landing. These men were met at the bank by the forces which Castruccio had already sent forward, who, being light armed with bucklers and javelins in their hands, let fly with tremendous shouts into the faces and bodies of the cavalry. The horses, alarmed by the noise and the wounds, would not move forward, and trampled each other in great confusion. The fight between the men of Castruccio and those of the enemy who succeeded in crossing was sharp and terrible; both sides fought with the utmost desperation and neither would yield. The soldiers of Castruccio fought to drive the others back into the river, whilst the Florentines strove to get a footing on land in order to make room for the others pressing forward, who if they could but get out of the water would be able to fight, and in this obstinate conflict they were urged on by their captains. Castruccio shouted to his men that these were the same enemies whom they had before conquered at Serravalle, whilst the Florentines reproached each other that the many should be overcome by the few. At length Castruccio. seeing how long the battle had lasted, and that both his men and the enemy were utterly exhausted, and that both sides had many killed and wounded, pushed forward another body of infantry to take up a position at the rear of those who were fighting; he then commanded these latter to open their ranks as if they intended to retreat, and one part of them to turn to the right and another to the left. This cleared a space of which the Florentines at once took advantage, and thus gained possession of a portion of the battlefield. But when these tired soldiers found themselves at close quarters with Castruccio's reserves they could not stand against them and at once fell back into the river. The cavalry of either side had not as yet gained any decisive advantage over the other, because Castruccio, knowing his inferiority in this arm, had commanded his leaders only to stand on the defensive against the attacks of their adversaries, as he hoped that when he had overcome the infantry he would be able to make short work of the cavalry. This fell out as he had hoped, for when he saw the Florentine army driven back across the river he ordered the remainder of his infantry to attack the cavalry of the enemy. This they did with lance and javelin, and, joined by their own cavalry, fell upon the enemy with the greatest fury and soon put him to flight. The Florentine captains, having seen the difficulty their cavalry had met with in crossing the river, had attempted to make their infantry cross lower down the river, in order to attack the flanks of Castruccio's army. But here, also, the banks were steep and already lined by the men of Castruccio, and this movement was quite useless. Thus the Florentines were so completely defeated at all points that scarcely a third of them escaped, and Castruccio was again covered with glory. Many captains were taken prisoners, and Carlo, the son of King Ruberto, with Michelagnolo Falconi and Taddeo degli Albizzi, the Florentine commissioners, fled to Empoli. If the spoils were great, the slaughter was infinitely greater, as might be expected in such a battle. Of the Florentines there fell twenty thousand two hundred and thirty-one men, whilst Castruccio lost one thousand five hundred and seventy men

But Fortune growing envious of the glory of Castruccio took away his life just at the time when she should have preserved it, and thus ruined all those plans which for so long a time he had worked to carry into effect, and in the successful prosecution of which nothing but death could have stopped him. Castruccio was in the thick of the battle the whole of the day; and when the end of it came, although fatigued and overheated, he stood at the gate of Fucecchio to welcome his men on their return from victory and personally thank them. He was also on the watch for any attempt of the enemy to retrieve the fortunes of the day; he being of the opinion that it was the duty of a good general to be the first man in the saddle and the last out of it. Here Castruccio stood exposed to a wind which often rises at midday on the banks of the Arno, and which is often very unhealthy: from this he took a chill, of which he thought nothing, as he was accustomed to such troubles; but it was the cause of his death. On the following night he was attacked with high fever, which increased so rapidly that the doctors saw it must prove fatal. Castruccio, therefore, called Pagolo Guinigi to him, and addressed him as follows:

"If I could have believed that Fortune would have cut me off in the midst of the career which was leading to that glory which all my successes promised, I should have laboured less, and I should have left thee, if a smaller state, at least with fewer enemies and perils, because I should have been content with the governorships of Lucca and Pisa. I should neither have subjugated the Pistoians, nor outraged the Florentines with so many injuries. But I would have made both these peoples my friends, and I should have lived, if no longer, at least more peacefully, and have left you a state without a doubt smaller, but one more secure and established on a surer foundation. But Fortune, who insists upon having the arbitrament of human affairs, did not endow me with sufficient judgement to recognise this from the first, nor the time to surmount it. Thou hast heard, for many have told thee, and I have never concealed it, how I entered the house of thy father whilst yet a boy-a stranger to all those ambitions which every generous soul should feel-and how I was brought up by him, and loved as though I had been born of his blood; how under his governance I learned to be valiant and capable of availing myself of all that fortune, of which thou hast been witness. When thy good father came to die, he committed thee and all his possessions to my care, and I have brought thee up with that love, and increased thy estate with that care, which I was bound to show. And in order that thou shouldst not only possess the estate which thy father left, but also that which my fortune and abilities have gained. I have never married, so that the love of children should never deflect my mind from that gratitude which I owed to the children of thy father. Thus I leave thee a vast estate, of which I am well content, but I am deeply concerned, inasmuch as I leave it thee unsettled and insecure. Thou hast the city of Lucca on thy hands, which will never rest contented under thy government. Thou hast also Pisa, where the men are of nature changeable and unreliable, who, although they may be sometimes held in subjection, yet they will ever disdain to serve under a Lucchese. Pistoia is also disloyal to thee, she being eaten up with factions and deeply incensed against thy family by reason of the wrongs recently inflicted upon them. Thou hast for neighbours the offended Florentines, injured by us in a thousand ways, but not utterly destroyed, who will hail the news of my death with more delight than they would the acquisition of all Tuscany. In the Emperor and in the princes of Milan thou canst place no reliance, for they are far distant, slow, and their help is very long in coming. Therefore, thou hast no hope in anything but in thine own abilities, and in the memory of my valour, and in the prestige which this latest victory has brought thee; which, as thou knowest how to use it with prudence, will assist thee to come to terms with the Florentines, who, as they are suffering under this great defeat, should be inclined to listen to thee. And whereas I have sought to make them my enemies, because I believed that war with them would conduce to my power and glory, thou hast every inducement to make friends of them, because their alliance will bring thee advantages and security. It is of the greatest important in this world that a man should know himself, and the measure of his own strength and means; and he who knows that he has not a genius for fighting must learn how to govern by the arts of peace. And it will be well for thee to rule thy conduct by my counsel, and to learn in this way to enjoy what my life-work and dangers have gained; and in this thou wilt easily succeed when thou hast learnt to believe that what I have told thee is true. And thou wilt be doubly indebted to me, in that I have left thee this realm and have taught thee how to keep it."

After this there came to Castruccio those citizens of Pisa, Pistoia, and Lucca, who had been fighting at his side, and whilst recommending Pagolo to them, and making them swear obedience to him as his successor, he died. He left a happy memory to those who had known him, and no prince of those times was ever loved with such devotion as he was. His obsequies were celebrated with every sign of mourning, and he was buried in San Francesco at Lucca. Fortune was not so friendly to Pagolo Guinigi as she had been to Castruccio, for he had not the abilities. Not long after the death of Castruccio, Pagolo lost Pisa, and then Pistoia, and only with difficulty held on to Lucca. This latter city continued in the family of Guinigi until the time of the great-grandson of Pagolo.

From what has been related here it will be seen that Castruccio was a man of exceptional abilities, not only measured by men of his own time, but also by those of an earlier date. In stature he was above the ordinary height, and perfectly proportioned. He was of a gracious presence, and he welcomed men with such urbanity that those who spoke with him rarely left him displeased. His hair was inclined to be red, and he wore it cut short above the ears, and, whether it rained or snowed, he always went without a hat. He was delightful among friends, but terrible to his enemies; just to his subjects; ready to play false with the unfaithful, and willing to overcome by fraud those whom he desired to subdue, because he was wont to say that it was the victory that brought the glory, not the methods of achieving it. No one was bolder in facing danger, none more prudent in extricating himself. He was accustomed to say that men ought to attempt everything and fear nothing: that God is a lover of strong men, because one always sees that the weak are chastised by the strong. He was also wonderfully sharp or biting though courteous in his answers; and as he did not look for any indulgence in this way of speaking from others, so he was not angered with others did not show it to him. It has often happened that he has listened quietly when others have spoken sharply to him, as on the following occasions. He had caused a ducat to be given for a partridge, and was taken to task for doing so by a friend, to whom Castruccio had said: "You would not have given more than a penny." "That is true," answered the friend. Then said Castruccio to him: "A ducat is much less to me." Having about him a flatterer on whom he had spat to show that he scorned him, the flatterer said to him: "Fisherman are willing to let the waters of the sea saturate them in order that they may take a few little fishes, and I allow myself to be wetted by spittle that I may catch a whale"; and this was not only heard by Castruccio with patience but rewarded. When told by a priest that it was wicked for him to live so sumptuously, Castruccio said: "If that be a vice then you should not fare so splendidly at the feasts of our saints." Passing through a street he saw a young man as he came out of a house of ill fame blush at being seen by Castruccio, and said to him: "Thou shouldst not be ashamed when thou comest out, but when thou goest into such places." A friend gave him a very curiously tied knot to undo and was told: "Fool, do you think that I wish to untie a thing which gave so much trouble to fasten." Castruccio said to one who professed to be a philosopher: "You are like the dogs who always run after those who will give them the best to eat," and was answered: "We are rather like the doctors who go to the houses of those who have the greatest need of them." Going by water from Pisa to Leghorn, Castruccio was much disturbed by a dangerous storm that sprang up, and was reproached for cowardice by one of those with him, who said that he did not fear anything. Castruccio answered that he did not wonder at that, since every man valued his soul for what is was worth. Being asked by one what he ought to do to gain estimation, he said: "When thou goest to a banquet take care that thou dost not seat one piece of wood upon another." To a person who was boasting that he had read many things, Castruccio said: "He knows better than to boast of remembering many things." Someone bragged that he could drink much without becoming intoxicated. Castruccio replied: "An ox does the same. Castruccio was acquainted with a girl with whom he had intimate relations, and being blamed by a friend who told him that it was undignified for him to be taken in by a woman, he said: "She has not taken me in, I have taken her." Being also blamed for eating very dainty foods, he answered: "Thou dost not spend as much as I do?" and being told that it was true, he continued: "Then thou art more avaricious than I am gluttonous." Being invited by Taddeo Bernardi, a very rich and splendid citizen of Luca, to supper, he went to the house and was shown by Taddeo into a chamber hung with silk and paved with fine stones representing flowers and foliage of the most beautiful colouring. Castruccio gathered some saliva in his mouth and spat it out upon Taddeo, and seeing him much disturbed by this, said to him: "I knew not where to spit in order to offend thee less." Being asked how Caesar died he said: "God willing I will die as he did." Being one night in the house of one of his gentlemen where many ladies were assembled, he was reproved by one of his friends for dancing and amusing himself with them more than was usual in one of his station, so he said: "He who is considered wise by day will not be considered a fool at night." A person came to demand a favour of Castruccio, and thinking he was not listening to his plea threw himself on his knees to the ground, and being sharply reproved by Castruccio, said: "Thou art the reason of my acting thus for thou hast thy ears in thy feet," whereupon he obtained double the favour he had asked. Castruccio used to say that the way to hell was an easy one, seeing that it was in a downward direction and you travelled blindfolded. Being asked a favour by one who used many superfluous words, he

said to him: "When you have another request to make, send someone else to make it." Having been wearied by a similar man with a long oration who wound up by saying: "Perhaps I have fatigued you by speaking so long," Castruccio said: "You have not, because I have not listened to a word you said." He used to say of one who had been a beautiful child and who afterwards became a fine man, that he was dangerous. because he first took the husbands from the wives and now he took the wives from their husbands. To an envious man who laughed, he said: "Do you laugh because you are successful or because another is unfortunate?" Whilst he was still in the charge of Messer Francesco Guinigi, one of his companions said to him: "What shall I give you if you will let me give you a blow on the nose?" Castruccio answered: "A helmet." Having put to death a citizen of Lucca who had been instrumental in raising him to power, and being told that he had done wrong to kill one of his old friends, he answered that people deceived themselves; he had only killed a new enemy. Castruccio praised greatly those men who intended to take a wife and then did not do so, saying that they were like men who said they would go to sea, and then refused when the time came. He said that it always struck him with surprise that whilst men in buying an earthen or glass vase would sound it first to learn if it were good, yet in choosing a wife they were content with only looking at her. He was once asked in what manner he would wish to be buried when he died, and answered: "With the face turned downwards, for I know when I am gone this country will be turned upside down." On being asked if it had ever occurred to him to become a friar in order to save his soul, he answered that it had not, because it appeared strange to him that Fra Lazerone should go to Paradise and Uguccione della Faggiuola to the Inferno. He was once asked when should a man eat to preserve his health, and replied: "If the man be rich let him eat when he is hungry; if he be poor, then when he can." Seeing one of his gentlemen make a member of his family lace him up, he said to him: "I pray God that you will let him feed you also." Seeing that someone had written upon his house in Latin the words: "May God preserve this house from the wicked," he said, "The owner must never go in." Passing through one of the streets he saw a small house with a very large door, and remarked: "That house will fly through the door." He was having a discussion with the ambassador of the King of Naples concerning the property of some banished nobles, when a dispute arose between them, and the ambassador asked him if he had no fear of the king. "Is this king of yours a bad man or a good one?" asked Castruccio, and was told that he was a good one, whereupon he said, "Why should you suggest that I should be afraid of a good man?"

I could recount many other stories of his sayings both witty and weighty, but I think that the above will be sufficient testimony to his high qualities. He lived forty-four years, and was in every way a prince. And as he was surrounded by many evidences of his good fortune, so he also desired to have near him some memorials of his bad fortune; therefore the manacles with which he was chained in prison are to be seen to this day fixed up in the tower of his residence, where they were placed by him to testify forever to his days of adversity. As in his life he was inferior neither to Philip of Macedon, the father of Alexander, nor to Scipio of Rome, so he died in the same year of his age as they did, and he would doubtless have excelled both of them had Fortune decreed that he should be born, not in Lucca, but in Macedonia or Rome.

> THE ART OF WAR Dialogue on the Art of War Italian: Dell'Arte Della Guerra The Seven Books on the Art of War by Niccolo Machiavelli, 1521 Translation: Henry Neville, 1675.

(The Art of War is another book Machiavelli is famous for. The book that can be seen as continuation of The Prince, with the only difference that it was composed in a Question and Answer dialogue like in classic works of Aniquity.

Machiavelli's Art of War echoes many themes, issues, ideas and proposals from his earlier work The Prince. His theories were not merely based on a thorough study and analysis of classical and contemporary military works but on his very own experience. Machiavelli had served for fourteen years as secretary to the Chancery of Florence and personally observed and reported back to his government on the size, composition, weaponry, morale, and logistical capabilities of the most effective militaries of his day.

However, it proved to be extremely difficult to persuade complacent citizens and inept leaders to build up armed forces from their own native populace instead of just hiring unreliable mercenaries from foreign countries. As the native fighting force was not ready yet, the catastrophic defeat in Prato in 1512 was the result and it led to the downfall of the Florentine republican government.

Machiavelli wrote that war must be expressly defined. He developed the philosophy of "limited warfare"—that is, when diplomacy fails, war is an extension of politics. Art of War also emphasises the necessity of a state militia and promotes the concept of armed citizenry. He believed that all society, religion, science, and art rested on the security provided by the military.

Montaigne named Machiavelli next to Caesar, Polybius, and Commynes as an authority on military affairs. Although the massive use of firearms had changed weaponry, Machiavelli Art of War was still frequently used as guideline. It is very likely that Frederick the Great (1712–1786), General Friedrich Wilhelm von Steuben (1730–1794), and Thomas Jefferson (1743–1826) improved their military with the help of this book.)

Preface By Niccolo Machiavelli Citizen And Secretary Of Florence On The Books On The Art Of War To Lorenzodi Filippo Strozzi, A Gentleman Of Florence.

Many, Lorenzo, have held and still hold the opinion, that there is nothing which has less in common with another, and that is so dissimilar, as civilian life is from the military. Whence it is often observed, if anyone designs to avail himself of an enlistment in the army, that he soon changes, not only his clothes, but also his customs, his habits, his voice, and in the presence of any civilian custom, he goes to pieces; for I do not believe that any man can dress in civilian clothes who wants to be quick and ready for any violence; nor can that man have civilian customs and habits, who judges those customs to be effeminate and those habits not conducive to his actions; nor does it seem right to him to maintain his ordinary appearance and voice who, with his beard and cursing, wants to make other men afraid: which makes such an opinion in these times to be very true. But if they should consider the ancient institutions, they would not find matter more united, more in conformity, and which, of necessity, should be like to each other as much as these (civilian and military); for in all the arts that are established in a society for the sake of the common good of men, all those institutions created to (make people) live in fear of the laws and of God would be in vain, if their defense had not been provided for and which, if well arranged, will maintain not only these, but also those that are not well established. And so (on the contrary), good institutions without the help of the military are not much differently disordered than the habitation of a superb and regal palace, which, even though adorned with jewels and gold, if it is not roofed over will not have anything to protect it from the rain. And, if in any other institutions of a City and of a Republic every diligence is employed in keeping men loyal, peaceful, and full of the fear of God, it is doubled in the military; for in what man ought the country look for greater loyalty than in that man who has to promise to die for her? In whom ought there to be a greater love of peace, than in him who can only be injured by war? In whom ought there to be a greater fear of God than in him who, undergoing infinite dangers every day, has more need for His aid? If these necessities in forming the life of the soldier are well considered, they are found to be praised by those who gave the laws to the Commanders and by those who were put in charge of military training, and followed and imitated with all diligence by others.

But because military institutions have become completely corrupt and far removed from the ancient ways, these sinister opinions have arisen which make the military hated and intercourse with those who train them avoided. And I, judging, by what I have seen and read, that it is not impossible to restore its ancient ways and return some form of past virtue to it, have decided not to let this leisure time of mine pass without doing something, to write what I know of the art of war, to the satisfaction of those who are lovers of the ancient deeds. And although it requires courage to treat of those matters of which others have made a profession, none the less, I do not believe that it is a mistake to occupy a position with words, which may, with greater presumption, have been occupied with deeds; for the errors which I should make in writing can be corrected without injury to anyone, but those which are made with deeds cannot be found out except by the ruin of the Commanders.

You, Lorenzo, will therefore consider the quality of these efforts of mine, and will give in your judgement of them that censure or praise which will appear to you to be merited. I send you these, as much as to show myself grateful for all the benefits I have received from you, although I will not include in them the (review) of this work of mine, as well as also, because being accustomed to honour similar works of those who shine because of their nobility, wealth, genius, and liberality, I know you do not have many equals in wealth and nobility, few in ingenuity, and no one in liberality.

MACHIAVELLI ART OF WAR, 1ST BOOK

As I believe that it is possible for one to praise, without concern, any man after he is dead since every reason and supervision for adulation is lacking, I am not apprehensive in praising our own Cosimo Ruccelai, whose name is never remembered by me without tears, as I have recognised in him those parts which can be desired in a good friend among friends and in a citizen of his country. For I do not know what pertained to him more than to spend himself willingly, not excepting that courage of his, for his friends, and I do not know of any enterprise that dismayed him when he knew it was for the good of his country. And I confess freely not to have met among so many men whom I have known and worked with, a man in whom there was a mind more fired with great and magnificent things. Nor does one grieve with the friends of another of his death, except for his having been born to die young unhonoured within his own home, without having been able to benefit anyone with that mind of his, for one would know that no one could speak of him, except (to say) that a good friend had died. It does not remain for us, however, or for anyone else who, like us, knew him, to be able because of this to keep the faith (since deeds do not seem to) to his laudable qualities. It is true however, that fortune was not so unfriendly to him that it did not leave some brief memory of the dexterity of his genius, as was demonstrated by some of his writings and compositions of amorous verses, in which (as he was not in love) he (employed as an) exercise in order not to use his time uselessly in his juvenile years, in order that fortune might lead him to higher thoughts. Here, it can be clearly comprehended, that if his objective was exercise, how very happily he described his ideas, and how much he was honoured in his poetry. Fortune, however, having deprived us of the use of so great a friend, it appears to me it is not possible to find any other better remedy than for us to seek to benefit from his memory, and recover from it any matter that was either keenly observed or wisely discussed. And as there is nothing of his more recent than the discussions which the Lord Fabrizio Colonna had with him in his gardens, where matters pertaining to war were discussed at length by that Lord, with (questions) keenly and prudently asked by Cosimo, it seemed proper to me having been present with other friends of ours, to recall him to memory, so that reading it, the friends of Cosimo who met there will renew in their minds the memory of his virtue, and another part grieving for not having been there, will learn in part of many things discussed wisely by a most sagacious man useful not only to the military way of life, but to the civilian as well. I will relate, therefore. how Fabrizio Colonna, when he returned from Lombardy where he had fought a long time gloriously for the Catholic King, decided to pass through Florence to rest several days in that City in order to visit His Excellency the Duke, and see again several gentlemen with whom he had been familiar in the past. Whence it appeared proper to Cosimo to invite him to a banquet in his gardens, not so much to show his generosity as to have reason to talk to him at length, and to learn and understand several things from him, according as one can hope to from such a man, for it appeared to him to give him an opportunity to spend a day discussing such matters as would satisfy his mind.

Fabrizio, therefore, came as planned, and was received by Cosimo together with several other loval friends of his. among whom were Zanobi Buondelmonti, Battista Della Palla, and Luigi Alamanni, young men most ardent in the same studies and loved by him, whose good qualities, because they were also praised daily by himself, we will omit. Fabrizio, therefore, was honoured according to the times and the place, with all the highest honours they could give him. As soon as the convivial pleasures were past and the table cleared and every arrangement of feasting finished, which, in the presence of great men and those who have their minds turned to honourable thoughts is soon accomplished, and because the day was long and the heat intense, Cosimo, in order to satisfy their desire better, judged it would be well to take the opportunity to escape the heat by leading them to the more secret and shadowy part of his garden: when they arrived there and chairs brought out, some sat on the grass which was most fresh in the place, some sat on chairs placed in those parts under the shadow of very high trees; Fabrizio praised the place as most delightful, and looking especially at the trees, he did not recognise one of them, and looked puzzled. Cosimo, becoming aware of this said: Perhaps you have no knowledge of some of these trees, but do not wonder about them, because here are some which were more widely known by the ancients than are those commonly seen today. And giving him the name of some and telling him that Bernardo, his grandfather, had worked hard in their culture, Fabrizio replied: I was thinking that it was what you said I was, and this place and this study make me remember several Princes of the Kingdom, who delighted in their ancient culture and the shadow they cast. And stopping speaking of this, and somewhat upon himself as though in suspense, he added: If I did not think I would offend you, I would give you my opinion: but I do not believe in talking and discussing things with friends in this manner that I insult them. How much better would they have done (it is said with peace to everyone)to seek to imitate the ancients in the strong and rugged things, not in the soft and delicate, and in the things they did under the sun, not in the shadows, to adopt the honest and perfect ways of antiquity, not the false and corrupt; for while these practices were pleasing to my Romans, my

country (without them) was ruined. To which Cosimo replied (but to avoid the necessity of having to repeat so many times who is speaking, and what the other adds, only the names of those speaking will be noted, without repeating the others). Cosimo, therefore, said: You have opened the way for a discussion which I desired, and I pray you to speak without regard, for I will question you without regard; and if, in questioning or in replying, I accuse or excuse anyone, it will not be for accusing or excusing, but to understand the truth from you.

FABRIZIO: And I will be much content to tell you what I know of all that you ask me; whether it be true or not, I will leave to your judgement. And I will be grateful if you ask me, for I am about to learn as much from what you ask me, as you will from me replying to you, because many times a wise questioner causes one to consider many things and understand many others which, without having been asked, would never have been understood.

COSIMO: I want to return to what you first were saying, that my grandfather and those of yours had more wisely imitated the ancients in rugged things than in delicate ones, and I want to excuse my side because I will let you excuse the other (your side). I do not believe that in your time there was a man who disliked living as softly as he, and that he was so much a lover of that rugged life which you praise: none the less he recognised he could not practice it in his personal life, nor in that of his sons, having been born in so corrupted an age, where anyone who wanted to depart from the common usage would be deformed and despised by everyone. For if anyone in a naked state should thrash upon the sand under the highest sun, or upon the snow in the most icy months of winter, as did Diogenes, he would be considered mad. If anyone (like the Spartan) should raise his children on a farm, make them sleep in the open, go with head and feet bare, bathe in cold water in order to harden them to endure vicissitudes, so that they then might love life less and fear death less, he would be praised by few and followed by none. So that dismayed at these ways of living, he presently leaves the ways of the ancients, and in imitating antiquity, does only that which he can with little wonderment.

FABRIZIO: You have excused him strongly in this part, and certainly you speak the truth: but I did not speak so much of these rugged ways of living, as of those other more human ways which have a greater conformity to the ways of living today, which I do not believe should have been difficult to introduce by one who is numbered among the Princes of a City. I will never forego my examples of my Romans. If their way of living should be examined, and the institutions in their Republic, there will be observed in her many things not impossible to introduce in a Society where there yet might be something of good.

COSIMO: What are those things similar to the ancients that you would introduce?

FABRIZIO: To honour and reward virtu, not to have contempt for poverty, to esteem the modes and orders of military discipline, to constrain citizens to love one another, to live without factions, to esteem less the private than the public good, and other such things which could easily be added in these times. It is not difficult to persuade (people) to these ways, when one considers these at length and approaches them in the usual manner, for the truth will appear in such (examinations) that every common talent is capable of undertaking them. Anyone can arrange these things;(for example), one plants trees under the shadow of which he lives more happily and merrily than if he had not (planted them).

COSIMO: I do not want to reply to anything of what you have spoken, but I do want leave to give a judgement on these, which can be easily judged, and I shall address myself to you who accuse those who in serious and important actions are not imitators of the ancients, thinking that in this way I can more easily carry out my intentions. I should want, therefore, to know from you whence it arises that, on the one hand you condemn those who do not imitate the ancients in their actions, on the other hand, in matters of war which is your profession and in which you are judged to be excellent, it is not observed that you have employed any of the ancient methods, or those which have some similarity.

FABRIZIO: You have come to the point where I expected you to, for what I said did not merit any other question, nor did I wish for any other. And although I am able to save myself with a simple excuse, none the less I want, for your greater satisfaction and mine, since the season (weather) allows it, to enter into a much longer discussion. Men who want to do something, ought first to prepare themselves with all industry, in order [when the opportunity is seen] to be prepared to achieve that which they have proposed. And whenever the preparations are undertaken cautiously, unknown to anyone, no none can be accused of negligence unless he is first discovered by the occasion: in which if it is not then successful, it is seen that either he has not sufficiently prepared himself, or that he has not in some part given thought to it. And as the opportunity has not come to me to be able to show the preparations I would make to bring the military to your ancient organisation, and it I have not done

so, I cannot be blamed either by you or by others. I believe this excuse is enough to respond to your accusation. COSIMO: It would be enough if I was certain that the

COSIMO: It would be enough if I was certain that the opportunity did not present itself.

FABRIZIO: But because I know you could doubt whether this opportunity had come about or not, I want to discuss at length [if you will listen to me with patience] which preparations are necessary to be made first, what occasion needs to arise, what difficulty impedes the preparations from becoming beneficial and the occasion from arriving, and that this is [which appears a paradox] most difficult and most easy to do.

COSIMO: You cannot do anything more pleasing for me and for the others than this. But if it is not painful for you to speak, it will never be painful for us to listen. But at this discussion may be long, I want help from these, my friends, and with your permission, and they and I pray you one thing, that you do not become annoyed if we sometimes interrupt you with some opportune question.

FABRIZIO: I am most content that you, Cosimo, with these other young people here, should question me, for I believe that young men will become more familiar with military matters, and will more easily understand what I have to say. The others, whose hair (head) is white and whose blood is icy, in part are enemies of war and in part incorrigible, as those who believe that the times and not the evil ways constrain men to live in such a fashion. So ask anything of me, with assurance and without regard; I desire this, as much because it will afford me a little rest, as because it will give me pleasure not to leave any doubts in your minds. I want to begin from your words, where you said to me that in war [which is my profession] I have not employed any of the ancient methods Upon this I say, that this being a profession by which men of every time were not able to live honestly, it cannot be employed as a profession except by a Republic or a Kingdom; and both of these, if well established, will never allow any of their citizens or subjects to employ it as a profession: for he who practices it will never be judged to be good, as to gain some usefulness from it at any time he must be rapacious, deceitful, violent, and have many qualities, which of necessity, do not make him good: nor can men who employ this as a profession, the great as well as the least, be made otherwise, for this profession does not provide for them in peace. Whence they are obliged, either to hope that there will be no peace or to gain so much for themselves in times of war, that they can provide for themselves in times of peace. And wherever one of these two thoughts exists, it does not occur in a good man; for, from the desire to provide for oneself in every circumstance, robberies, violence and assassinations result, which such soldiers do to friends as well as to enemies:and from not desiring peace, there arises those deceptions which Captains perpetrate upon those whom they lead, because war hardens them: and even if peace occurs frequently, it happens that the leaders, being deprived of their stipends and of their licentious mode of living, raise a flag of piracy, and without any mercy sack a province.

Do you not have within the memory of events of your time, many soldiers in Italy, finding themselves without employment because of the termination of wars, gathered themselves into very troublesome gangs, calling themselves companies, and went about levying tribute on the towns and sacking the country, without there being any remedy able to be applied? Have you not read how the Carthaginian soldiers, when the first war they engaged in with the Romans under Matus and Spendius was ended, tumultuously chose two leaders, and waged a more dangerous war against the Carthaginians than that which they had just concluded with the Romans? And in the time of our fathers, . Sforza, in order to be able to live honourably (comfortably) in times of peace. not only deceived the Milanese, in whose pay he was, but took away their liberty and became their Prince. All the other soldiers of Italy, who have employed the military as their particular profession, have been like this man; and if, through their malignity, they have not become Dukes of Milan, so much more do they merit to be censured; for without such a return [if their lives were to be examined], they all have the same cares. Sforza, father of Francesco, constrained Queen Giovanna to throw herself into the arms of the King of Aragon, having abandoned her suddenly, and left her disarmed amid her enemies, only in order to satisfy his ambition of either levying tribute or taking the Kingdom. Braccio, with the same industry, sought to occupy the Kingdom of Naples, and would have succeeded, had he not been routed and killed at Aquilla. Such evils do not result from anything else other than the existence of men who employ the practice of soldiering as their own profession. Do you not have a proverb which strengthens my argument, which says: War makes robbers, and peace hangs them? For those who do not know how to live by another practice, and not finding any one who will support them in that, and not having so much virtu that they know how to come and live together honourably, are forced by necessity to roam the streets, and justice is forced to extinguish them.

COSIMO: You have made me turn this profession (art)of soldiering back almost to nothing, and I had supposed it to be the most excellent and most honourable of any: so that if you do not clarify this better, I will not be satisfied; for if it is as you say, I do not know whence arises the glory of Caesar, Pompey, Scipio, Marcellus, and of so many Roman Captains who are celebrated for their fame as the Gods.

FABRIZIO: I have not yet finished discussing all that I proposed, which included two things: the one, that a good man was not able to undertake this practice because of his profession: the other, that a well established Republic or Kingdom would never permit its subjects or citizens to employ it for their profession. Concerning the first, I have spoken as much as has occurred tome: it remains for me to talk of the second, where I shall reply to this last question of yours, and I say that Pompey and Caesar, and almost all those Captains who were in Rome after the last Carthaginian war, acquired fame as valiant men, not as good men:but those who had lived before them acquired glory as valiant and good men: which results from the fact that these latter did not take up the practice of war as their profession; and those whom I named first as those who employed it as their profession. And while the Republic lived immaculately, no great citizen ever presumed by means of such a practice to enrich himself during(periods of) peace by breaking laws, despoiling the provinces, usurping and tyrannizing the country, and imposing himself in every way; nor did anyone of the lowest fortune think of violating the sacred agreement, adhere himself to any private individual, not fearing the Senate, or to perform any disgraceful act of tyranny in order to live at all times by the profession of war. But those who were Captains, being content with the triumph, returned with a desire for the private life: and those who were members (of the army) returned with a desire to lay down the arms they had taken up; and everyone returned to the art (trade or profession)by which they ordinarily lived; nor was there ever anyone who hoped to provide for himself by plunder and by means of the searts. A clear and evident example of this as it applies to great citizens can be found in the Regent Attilio, who, when he was captain of the Roman armies in Africa, and having almost defeated the Carthaginians, asked the Senate for permission to return to his house to look after his farms which were being spoiled by his laborers. Whence it is clearer than the sun, that if that man had practiced war as his profession, and by means of it thought to obtain some advantage for himself, having so many provinces which (he could) plunder, he would not have asked permission to return to take care of his fields, as each day he could have obtained more than the value of all his possessions. But as these good men, who do not practice war as their profession, do not expect to gain anything from it except hard work, danger, and glory, as soon as they are sufficiently glorious, desire to return to their homes and live from the practice of their own profession. As to men of lower status and gregarious soldiers, it is also true that every one voluntarily withdrew from such a practice, for when he was not fighting would have desired to fight, but when he was fighting wanted to be dismissed. Which illustrates the many ways, and especially in seeing that it was among the first privileges, that the Roman people gave to one of its Citizens, that he should not be constrained unwillingly to fight. Rome, therefore, while she was well organised [which it was up to the time of the Gracchil did not have one soldier who had to take up this practice as a profession, and therefore had few bad ones, and these were severely punished. A well ordered City, therefore, ought to desire that this training for war ought to be employed in times of peace as an exercise, and in times of war as a necessity and for glory, and allow the public only to use it as a profession, as Rome did. And any citizen who has other aims in (using) such exercises is not good, and any City which governs itself otherwise, is not well ordered.

COSIMO: I am very much content and satisfied with what you have said up to now, and this conclusion which you have made pleases me greatly: and I believe it will be true when expected from a Republic, but as to Kings, I do not yet know why I should believe that a King would not want particularly to have around him those who take up such a practice as their profession.

FABRIZIO: A well ordered Kingdom ought so much the more avoid such artifices, for these only are the things which corrupt the King and all the Ministers in a Tyranny. And do not, on the other side, tell me of some present Kingdom, for I will not admit them to be all well ordered Kingdoms; for Kingdoms that are well ordered do not give absolute (power to) Rule to their Kings, except in the armies, for only there is a quick decision necessary, and, therefore, he who (rules) there must have this unique power: in other matters, he cannot do anything without counsel, and those who counsel him have to fear those whom he may have near him who, in times of peace, desire war because they are unable to live without it. But I want to dwell a little longer on this subject, and look for a Kingdom totally good, but similar to those that exist today, where those who take up the profession of war for themselves still ought to be feared by the King, for the

sinews of armies without any doubt are the infantry. So that if a King does not organise himself in such a way that his infantry in time of peace are content to return to their homes and live from the practice of their own professions, it must happen of necessity that he will be ruined; for there is not to be found a more dangerous infantry than that which is composed of those who make the waging of war their profession; for you are forced to make war always, or pay them always, or to risk the danger that they take away the Kingdom from you. To make war always is not possible: (and)one cannot pay always; and, hence, that danger is run of losing the State. My Romans [as I have said], as long as they were wise and good, never permitted that their citizens should take up this practice as their profession, notwithstanding that they were able to raise them at all times, for they made war at all times: but in order to avoid the harm which this continuous practice of theirs could do to them, since the times did not change, they changed the men, and kept turning men over in their legions so that every fifteen years they always completely re-manned them:and thus they desired men in the flower of their age, which is from eighteen to thirty five years. during which time their legs, their hands, and their eyes, worked together, nor did they expect that their strength should decrease in them, or that malice should grow in them, as they did in corrupt times.

Ottavianus first, and then Tiberius, thinking more of their own power than the public usefulness, in order to rule over the Roman people more easily, begun to disarm them and to keep the same armies continually at the frontiers of the Empire. And because they did not think it sufficient to hold the Roman People and the Senate in check, they instituted an army called the Praetorian(Guard), which was kept near the walls of Rome in a fort adjacent to that City. And as they now begun freely to permit men assigned to the army to practice military matters as their profession, there soon resulted that these men became insolent, and they became form idable to the Senate and damaging to the Emperor. Whence there resulted that many men were killed because of their insolence, for they gave the Empire and took it away from anyone they wished, and it often occurred that at one time there were many Emperors created by the several armies. From which state of affairs proceeded first the division of the Empire and finally its ruin. Kings ought, therefore, if they want to live securely, have their infantry composed of men, who, when it is necessary for him to wage war, will willingly go forth to it for love of him, and afterwards when peace comes, more willingly return to their homes; which will always happen if he selects men who know how to live by a profession other than this. And thus he ought to desire, with the coming of peace, that his Princes return to governing their people, gentlemen to the cultivation of their possessions, and the infantry to their particular arts (trades or professions);and everyone of these will willingly make war in order to have peace, and will not seek to disturb the peace to have war.

COSIMO: Truly, this reasoning of yours appears to me well considered: none the less, as it is almost contrary to what I have thought up to now, my mind is not yet purged of every doubt. For I see many Lords and Gentlemen who provide for themselves in times of peace through the training for war, as do your equals who obtain provisions from Princes and the Community. I also see almost all the men at arms remaining in the garrisons of the city and of the fortresses. So that it appears to me that there is a long time of peace for everyone.

FABRIZIO: I do not believe that you believe this, that everyone has a place in time of peace; for other reasons can be cited for their being stationed there, and the small number of people who remain in the places mentioned by you will answer your question. What is the proportion of infantry needed to be employed in time of war to that in peace? for while the fortresses and the city are garrisoned in times of peace, they are much more garrisoned in times of war; to this should be added the soldiers kept in the field who are a great number, but all of whom are released in time of peace. And concerning the garrisons of States, who are a small number, Pope Julius and you have shown how much they are to be feared who do not know any other profession than war, as you have taken them out of your garrisons because of their insolence, and placed the Swiss there, who are born and raised under the laws and are chosen by the community in an honest election;so do not say further that in peace there is a place for every man. As to the men at arms continued in their enlistment in peacetime, the answer appears more difficult. None the less, whoever considers everything well, will easily find the answer, for this thing of keeping on the men at arms is a corrupt thing and not good. The reason is this; as there are men who do not have any art (trade or profession), a thousand evils will arise every day in those States where they exist, and especially so if they were to be joined by a great number of companions: but as they are few, and unable by themselves to constitute an army, they therefore, cannot do any serious damage. None the less, they have done so many times, as I said of Francesco and of Sforza, his father, and of Braccio of Perugia. So I do not approve of this custom of keeping men at arms, both because it is corrupt and because it can cause great evils.

COSIMO: Would you do without them?, or if you keep them, how would you do so?

FABRIZIO: By means of an ordinance, not like those of the King of France, because they are as dangerous and insolent as ours, but like those of the ancients, who created horsemen(cavalry) from their subjects, and in times of peace sent them back to their homes to live from the practice of their own profession, as I shall discuss at length before I finish this discussion. So, if this part of the army can now live by such a practice even when there is peace, it stems from a corrupt order. As to the provisions that are reserved for me and the other leaders, I say to you that this likewise is a most corrupt order, for a wise Republic ought not to give them to anyone, rather it ought to employ its citizens as leaders in war, and in time of peace desire that they return to their professions. Thus also, a wise King ought not to give (provisions) to them, or if he does give them, the reasons ought to be either as a reward for some excellent act, or in order to avail himself of such a man in peace as well as in war. And because you have mentioned me, I want the example to include me, and I say I have never practiced war as a profession, for my profession is to govern my subjects, and defend them, and in order to defend them, I must love peace but know how to make war; and my King does not reward and esteem me so much for what I know of war, as because I know also how to counsel him in peace. Any King ought not, therefore, to want to have next to him anyone who is not thusly constituted, if he is wise and wants to govern prudently: for if he has around him either too many lovers of peace or too many lovers of war, they will cause him to err. I cannot, in this first discussion of mine and according to my suggestion, say otherwise, and if this is not enough for you, you must seek one which satisfies you better. You can begin to recognise how much difficulty there is in bringing the ancient methods into modem wars, and what preparations a wise man must make, and what opportunities he can hope for to put them into execution. But little by little you will know these things better if the discussion on bringing any part of the ancient institutions to the present order of things does not weary you.

COSIMO: If we first desired to hear your discussion of these matters, truly what you have said up to now redoubles that desire. We thank you, therefore, for what we have had and ask you for the rest.

FABRIZIO: Since this is your pleasure, I want to begin to treat of this matter from the beginning being able in that way to demonstrate it more fully, so that it may be better understood. The aim of those who want to make war is to be able to combat in the field with every (kind) of enemy, and to be able to win the engagement. To want to do this, they must raise an army. In raising an army, it is necessary to find men. arm them, organise them, train them in small and large (battle) orders, lodge them, and expose them to the enemy afterwards, either at a standstill or while marching. All the industry of war in the field is placed in these things, which are the more necessary and honoured (in the waging of war). And if one does well in offering battle to the enemy, all the other errors he may make in the conduct of the war are supportable: but if he lacks this organisation, even though he be valiant in other particulars, he will never carry on a war to victory (and honour). For, as one engagement that you win cancels out every other bad action of yours, so likewise, when you lose one, all the things you have done well before become useless. Since it is necessary, therefore, first to find men, you must come to the Deletto (Draft) of them, as thus the ancients called it, and which we call Scelta (Selection): but in order to call it by a more honoured name, I want us to preserve the name of Deletto. Those who have drawn up regulations for war want men to be chosen from temperate countries as they have spirit and are prudent; for warm countries give rise to men who are prudent but not spirited, and cold (countries) to men who are spirited but not prudent. This regulation is drawn up well for one who is the Prince of all the world, and is therefore permitted to draw men from those places that appear best to him: but wanting to draw up a regulation that anyone can use, one must say that every Republic and every Kingdom ought to take soldiers from their own country. whether it is hot, cold, or temperate. For, from ancient examples, it is seen that in every country, good soldiers are made by training; because where nature is lacking, industry supplies it, which, in this case, is worth more than nature: And selecting them from another place cannot be called Deletto, because Deletto means to say to take the best of a province, and to have the power to select as well those who do not want to fight as those who do want to. This Deletto therefore, cannot be made unless the places are subject to you; for you cannot take whoever you want in the countries that are not yours, but you need to take those who want to come

COSIMO: And of those who want to come, it can even be said, that they turn and leave you, and because of this, it can then be called a Deletto.

FABRIZIO: In a certain way, you say what is true: but consider the defects that such as Deletto has in itself, for often it happens that it is not a Deletto. The first thing (to consider), is that those who are not your subjects and do not

Copyright © 2018 by Lord Henfield, Guildford Scientific Press PAGE 3376 willingly want to fight, are not of the best, rather they are of the worst of a province; for if nay are troublesome, idle, without restraint, without religion, subject to the rule of the father, blasphemous, gamblers, and in every way badly brought up, they are those who want to fight, (and) these habits cannot be more contrary to a true and good military life. When there are so many of such men offered to you that they exceed the number you had designated, you can select them; but if the material is bad, it is impossible for the Deletto to be good: but many times it happens that they are not so many as (are needed) to fill the number you require:so that being forced to take them all, it results that it can no longer be called the making of a Deletto, but in enlisting of infantry. The armies of Italy and other places are raised today with these evils, except in Germany, where no one is enlisted by command of the Prince, but according to the wishes of those who want to fight. Think, therefore, what methods of those ancients can now be introduced in an army of men put together by similar means.

COSIMO: What means should be taken therefore?

FABRIZIO: What I have just said: select them from your own subjects, and with the authority of the Prince.

COSIMO: Would you introduce any ancient form in those thus selected?

FABRIZIO: You know well it would be so; if it is a Principality, he who should command should be their Prince or an ordinary Lord, or if it is a Republic, a citizen who for the time should be Captain:otherwise it is difficult to do the thing well.

COSIMO: Why?

FABRIZIO: I will tell you in time: for now, I want this to suffice for you, that it cannot be done well in any other way.

COSIMO: If you have, therefore, to make ibis Deletto in your country, whence do you judge it better to draw them, from the City or the Countryside?

FABRIZIO: Those who have written of this all agree that it is better to select them from the Countryside, as they are men accustomed to discomfort, brought up on hard work, accustomed to be in the sun and avoid the shade, know how to handle the sword, dig a ditch, carry a load, and are without cunning or malice. But on this subject, my opinion would be, that as soldiers are of two kinds, afoot and on horseback, that those afoot be selected from the Countryside, and those on horseback from the City.

COSIMO: Of what age would you draw them?

FABRIZIO: If I had to raise an (entirely) new army, I would draw them from seventeen to forty years of age; if the army already exists and I had to replenish it, at seventeen years of age always.

COSIMO: I do not understand this distinction well.

FABRIZIO: I will tell you: if I should have to organise an army where there is none, it would be necessary to select all those men who were more capable, as long as they were of military age, in order to instruct them as I would tell them: but if I should have to make the Deletto in places where the army was (already)organised, in order to supplement it, I would take those of seventeen years of age, because the others having been taken for some time would have been selected and instructed.

COSIMO: Therefore you would want to make an ordinance similar to that which exists in our countries.

FABRIZIO: You say well: it is true that I would arm them, captain them, train them, and organise them, in a way which I do not know whether or not you have organised them similarly.

COSIMO: Therefore you praise the ordinance?

FABRIZIO: Why would you want me to condemn it?

COSIMO: Because many wise men have censured it.

FABRIZIO: You say something contrary, when you say a wise man censured the ordinance: for he can be held a wise man and to have censured them wrongly.

COSIMO: The wrong conclusion that he has made will always cause us to have such a opinion.

FABRIZIO: Watch out that the defect is not yours, but his: as that which you recognised before this discussion furnishes proof.

COSIMO: You do a most gracious thing. But I want to tell you that you should be able to justify yourself better in that of which those men are accused. These men say thusly: either that it is useless and our trusting in it will cause us to lose the State: or it is of virtue, and he who governs through it can easily deprive her of it. They cite the Romans, who by their own arms lost their liberty: They cite the Venetians and the King of France, of whom they say that the former, in order not to obey one of its Citizens employed the arms of others, and the King disarmed his People so as to be able to command them more easily. But they fear the uselessness of this much more; for which uselessness they cite two principal reasons: the one, because they are inexpert; the other, for having to fight by force: because they say that they never learn anything from great men, and nothing good is ever done by force.

FABRIZIO: All the reasons that you mention are from men who are not far sighted, as I shall clearly show. And first, as to the uselessness, I say to you that no army is of more use

than your own, nor can an army of your own be organised except in this way. And as there is no debating over this, which all the examples of ancient history does for us, I do not want to lose time over it. And because they cite inexperience and force, I say [as it is true] that inept experience gives rise to little spirit (enthusiasm) and force makes for discontent: but experience and enthusiasm gains for themselves the means for arming, training, and organising them, as you will see in the first part of this discussion. But as to force, you must understand that as men are brought to the army by commandment of the Prince, they have to come, whether it is entirely by force or entirely voluntarily:for if it were entirely from desire, there would not be a Deletto as only a few of them would go; so also, the (going) entirely by force would produce bad results; therefore, a middle way ought to be taken where neither the entirely forced or entirely voluntarily(means are used), but they should come, drawn by the regard they have for the Prince, where they are more afraid of of his anger then the immediate punishment: and it will always happen that there will be a compulsion mixed with willingness, from which that discontent cannot arise which causes bad effects. Yet I do not claim that an army thus constituted cannot be defeated; form any times the Roman armies were overcome, and the army of Hannibal was defeated so that it can be seen that no army can be so organised that a promise can be given that it cannot be routed. These wise men of yours, therefore, ought not measure this uselessness from having lost one time, but to believe that just as they can lose, so too they can win and remedy the cause of the defeat. And if they should look into this, they will find that it would not have happened because of a defect in the means, but of the organisation which was not sufficiently perfect. And, as I have said, they ought to provide for you, not by censuring the organisation, but by correcting it: as to how this ought to be done, you will come to know little by little.
